

# Billionaire CEO Won't Leave

## Chapter 363

"Cough, cough! Er Er... "

When Master Kang coughed, Shen Yin, who was unable to breathe, faintly came. Bai nianxi also felt a burst of tightness in his chest.

The emergency attracted a group of doctors to rush in. Seeing that Master Kang's face was red, they quickly took Master Kang out of the ward and carried him to the CCU intensive care unit nearby.

"Lolo! Are you ok? "

Conmo North urgent ask words, already will Luo Luo picked up, straight to the outside.

"Wow!" The sleeping Lele wakes up with violent movements and bursts into bursts of crying.

In the chaotic ward, conmobei, holding Lolo and pulling Bai nianxi, runs to the doctor's office not far away.

After listening to Kang Mobei's urgent voice, the doctor looked at the pesticide bottle from Kang Mobei, and then gave each of them a mask, and said faintly:

"it doesn't matter if you inhale a little, just go out for a breath of fresh air."

"Ah Fortunately, fortunately... " Conmber was relieved, and his face twisted with pain.

Kang Li Qing angrily stares at the crazy woman Mu Rusheng. The security guards cooperate with the police to imprison Mu Rusheng and push him out of the hospital. Mu Rusheng has a bright face.

"It's just a little insecticide. You see, Bai nianxi is scared. Ha ha ha." Mu Rushuang knows that it's just a little revenge, and she always feels happy when she thinks of Bai nianxi's fright.

"If my father has any questions, I want you to bury the whole Mu family with him!" Kang Liqing scolded angrily.

"Ha ha ha, your Kang family is on the verge of collapse, and you still have the courage to talk big!" Mu Rushuang did not hide his sarcasm, and his voice gradually faded away as the security guards pushed the wheelchair.

In CCU, a doctor came out with a frown.

"Be psychologically prepared. The patient has already suffered from respiratory failure. Although the dose of insecticide inhaled by the patient is not much, the asbestos contained in it is enough to cause a huge burden on the patient's lungs. Now the patient's lungs are showing signs of fibrosis." The doctor's tone seems to be blaming the family for their poor care.

"Asbestos? Fibrosis? " Kang Liqing couldn't understand the obscure professional vocabulary.

While walking, the doctor explained to Kang Liqing: "pulmonary fibrosis is that when the lung is damaged, the lung secretes collagen to repair it. Excessive collagen secretion will cause a large number of fibrous cells, which will gradually form pulmonary fibrosis. For young people, long-term asbestos deposition will cause serious symptoms, but the patient will have respiratory failure In addition, asbestos aggravates the process of pulmonary fibrosis

.....

Kang Liqing had already listened to the doctor's words and sat on the chair for a long time.

Police station, mu Rushuang a face meaningless looking at the police questioning.

"I just used insecticide to scare that woman. I didn't want to spray her. As a result, I saw that she had another child with my fiance. I couldn't help spraying her."

"Ha ha." With a bitter smile, the police recorded mu Rushun's words.

"Hum..." The mobile phone next to the police's hand rings.

"Well, what? what? Oh, I see

After hearing the news, Mu Sili, with his lawyer, rushed into the police station. He saw that mu Rushuang had no problem, and that the police were making a leisurely phone call. After the police hung up, Mu Sili said coldly:

"Mr. police, the lawyer has come to bail, can we take someone away?"

The policeman's face with a bitter smile gradually became gloomy and cold:

"Miss mu Rushuang, you are suspected of intentional injury. If the patient can't be rescued, your charge will become intentional homicide, so you can't be released on bail if you are detained according to law."

"Murder?" Mu Rushuang's face suddenly changed after hearing the news.

Musili was also shocked: "intentional homicide? I advise you to be clear! Otherwise, I will sue you for slander

"Stop it, don't make any noise," the policeman stood up with a cold face. "Miss mu Rushun, you know that the insecticide contains harmful substances to human body, but you are still spraying it in the ward. This is intentional and intentional. Now the master of Kang family is in the emergency treatment, you can stay here honestly."

After that, the policeman stood up with his cap on and waved to several policemen next to him, and they would push mu Rushuang into the temporary detention room -

with lingering fear, kangmobei took Bai nianxi and Luo luolele back to Bai nianxi's private house, told them to stay well, and then rushed back to the hospital.

Kang Liqing saw that Kang Mobei had gone and came back, and he couldn't do anything more now. The great grief was in his heart, twisting his heart.

Although I had long expected that there would be a day when father and son would leave, I just didn't expect that this day would come so quickly, and even let him count down the days

"Grandfather, why hasn't he come out yet?" Kangmobei didn't know what happened. He thought that Bai nianxi would be OK and so would his grandfather.

"Wow!" Kang Liqing suddenly burst out crying, crying bitterly.

"Dad, you..." Kangmo North caught unprepared to hear the cry, looking at the cry of Kangli Qing, he was at a loss for a time."What about the frost? I want this woman to die! " Kang Li Qing suddenly put away the cry again and rushed to the distance of the corridor with an angry roar.

Kangmo North quickly stopped, kangxinyue with the nurse, in the ward to clean up the mess, heard the outside of the movement, rushed out of the ward.

"Don't get excited, brother." Kang Xinyue comes up quickly and blocks the crazy

Kang Liqing with Kang Mobei.

"Dad, he The doctor said, "Dad..." Kang Liqing couldn't live to export that unlucky word.

Kang Liqing's desire to talk and stop, has made Kang Xinyue realize that it's not good: "no, dad was fine just now. He can talk and eat. It's just insecticide. I don't think he can..."

"The doctor said that asbestos in the insecticide can cause pulmonary fibrosis and can't breathe WOW As Kang Liqing spoke, he burst out crying again.

Kang Xinyue clenched her fist tightly, and her face was full of grief.

Soon, doctors will be wearing breathing apparatus of Kang Taiye out of the ward, a group of medical staff even though wearing masks, but still can see that they are showing embarrassment.

"How's my grandfather? Is it all right? " He tried to squeeze out a smile and sniffed, expecting a good reply from the doctor.

"There is no effective treatment for pulmonary fibrosis. I think it's just a few days." A doctor seems to be used to life and death, tone calm way.

Kangmobei, like a bolt from the blue, stood in the same place.

"Wow! Dad Kang Xinyue immediately cried with Kang Liqing, and the cry echoed in the long corridor.

The medical staff in a hurry moved a series of instruments that commobei could not understand to the new ward. After confirming that the measures were correct, they left the ward one after another.

Conmber tried to suppress the pain. He grabbed a doctor's arm and asked calmly, "well, pulmonary fibrosis, is it painful?"

The doctor shook his head: "the lung lesions are not painful, but the feeling of being out of breath is very painful."

"You mean My grandfather will eventually Suffocating to death? " Conmber's mouth twitched.

The doctor nodded: "almost."
