

# Billionaire CEO Won't Leave

## Chapter 459

Following behind a group of doctors, Qin ruoqing became more nervous and regretted.

I regret that I entered the meeting room hastily and said that it was up to me to announce. The closer she got to the ward, the more she realized how cruel those words were to Musili.

Retreat, attack on the heart.

"Here we are, miss. Go in." The doctors stood at the door and urged Qin ruoqing without expression. They even separated a passage consciously to let her enter smoothly.

"I..." I regret Qin ruoqing can't say this. She looks up at the ward. The lonely figure of Mu Sili stings her heart and makes her more regret. She thinks that she can be cruel and be a villain.

Originally, I really can't

"Hurry up." The doctor looked at the wristwatch and said hastily, in a hurry.

Qin ruoqing's intention of retreating was stronger: "I'm sorry! I can't do it! "

After that, Qin ruoqing ran away, leaving a group of doctors confused and looking at each other.

"It's all here. Let's just say it." A doctor directly hard under the heart, the first into the ward.

"Mr. mu, it's time to announce something."

After hearing the news, Mu Si looked back and saw several doctors standing behind him.

It's like a big announcement, or a bad thing.

"Go ahead." Muse should take a deep breath and be prepared.

After hearing this, the doctor simply took out an image that Mousse couldn't understand: "you see, this is Ms. Mu Rushuang's brain angiography. You can see that Ms. Mu Rushuang's brain shows signs of melting, so medically speaking, the probability of Ms. Mu Rushuang's awakening is almost zero."

Musi was in a daze and burst into fury: "get out! Get out of here! My sister can wake up! Get out of here! "

Roar, scared a group of doctors rushed out of the ward.

When the ward returned to silence, Mousse dragged his hair painfully. His throat wanted to roar, but he couldn't make any sound. He could only put on an expression of great pain.

Outside the ward, Qin Ruoying peeps at Mu Sili's back through the small glass window.

His back was shaking regularly because of his swallowing. Just looking at it like this, Qin Ruoying felt very uncomfortable and wanted to go in and hug him, hoping to comfort him.

"Like frost Will you wake up Please... " Mousse sobbed away.

When his throat was blocked, Mousse's back suddenly felt a force, which slowly hugged him.

Qin Ruoying tightly hugs Mu Sili's back and tries to resist the urge to cry, saying in a low voice:

"if you want to open a hospital, you want to take good care of your family, because you look very hard. If you haven't finished with you clearly, I'm sorry."

Qin Ruoying said that, while wiping her tears, she ran away.

Mu Sili felt as if he had heard an illusion, but the feeling that his back suddenly lost its strength reminded him that it was not an illusion.

"If it's fine?" Musi suddenly turned back, and there was no one behind him.

Impulse forced Mousse to run after him. He didn't want to face it alone. He was tired, too tired.

Qin Ruoying ran out of the hospital and stood on the side of the road, looking at the cars coming and going blankly. Clearly there was a place to go, but she would rather just stand.

"Qin ruoqing!"

Voice suddenly came, Qin ruoqing's hand was also seized by a huge force, and then, let this force, dragged her to the unknown direction.

Seeing that Mu Sili came out, Qin ruoqing seemed to be able to express her smile as if her heart had been untied.

No one in the alley, Qin ruoqing was pushed to the wall, the impact of the back is a little painful, but not as important as in front of him.

Moussili dropped her head and put it on her shoulder dejectedly.

Looking at Mu Sili's shoulder twitched by silent sobs, Qin ruoqing also has a sour nose.

"I can't help you anything, I can only try not to bring you trouble and upset, sorry to disturb you." Qin ruoqing murmured.

"No, you didn't disturb me." Mu Sili raised his eyes and looked at Qin ruoqing's face with tears in his eyes.

"The elder came to your home that day to tell you that your father can receive treatment and recover, but It's just that you misunderstood... " Qin ruoqing whispered, inexplicable heart empty pile in the chest.

"Oh, so I see When Musi heard the sound, it seemed that the big stone on his heart had been moved away. He felt relaxed, but he was still uncomfortable.

"Well So You can cry if you want. I won't tell anyone Qin ruoqing tries to smile to make her smile look more natural and relaxed.

Looking at her smiling face, mousse didn't want her to leave.

"Stay with me. Don't go." Mu Sili holds Qin ruoqing in her arms and asks in a low voice.

"..... Well, OK, I'll be with you. " Qin ruoqing pursed her lips and her tone went up. Lumi Island, the mess left behind before, has been cleaned up, but the explosion accident is still under investigation, so the scene is blocked by yellow cordon.

Passing by the scene, commo went straight to the office building.

All the staff are working step by step in the office building.

When he saw commobei coming, the Minister of technology trotted up to him.

"Mr. Kang, there's something extraordinary! Come and have a look! " The minister said mysteriously.

Conmber followed obediently to the technology department.

The minister retrieved a large list of telephone numbers and a series of incomprehensible signal fluctuations.

"This What is it? " Conmber was puzzled.

The minister explained: "look at this call record. The time of the explosion accident is 3:00 p.m. after monitoring and restoring, it can be confirmed that the moment of explosion is 3:05. If your reasoning is correct, then the blaster will immediately call out to ask for instructions within 5 minutes after 05."

"Mm-hmm, and then?" Conmber nodded and then continued.

"All the call records between 3:05 and 3:10 are here. No call to the capital has been found. Assuming that your reasoning is true, there will be such a call. Then the only possibility is that someone will act faster than us and delete the relevant call records first." The minister explained at length.

"Say the point." Conmber frowned.

"So ah, we took all the signal charts at that time and compared the call records one by one," the minister said. He took the large number of signal fluctuation charts to commobei. "Every call record can match the corresponding signal wave chart! Here comes the great discovery

"The big discovery is that a signal fluctuation diagram is missing a corresponding call record, isn't it?" Kang Mobei said frankly and helplessly.

The minister nodded hard: "yes."

"....." Kangmobei twisted his brows into a knot in one's heart, "I know, and then what?"

"No more." The minister opened his innocent eyes and the topic ended.

"What I want is evidence. Can it be evidence?" Conmberg laughed with anger.
