

Beast 101

Chapter 101: Eleven's First Profundity

Following that, Shi Yu did not stay idle.

He tested his physique after breaking through.

Naturally, it was an experiment with Buggy.

Worm silk, teaching!

Pa!

“Ji!”

A white light flashed.

Cooldown Time: 4 hours

“Oh.”

Looking at the cooldown time, Shi Yu's eyes lit up and he threw Buggy aside.

He only needed a four hour cooldown time after teaching worm silk?

Then the cooldowns of skills at other levels would probably be reduced by about four hours?

“Not bad.”

Shi Yu thought to himself.

The further a Beast Tamer advanced, the more obvious the improvement in their physique.

He had just leveled up a little, and he got a four hour reduction in cooldown time. Not bad.

He estimated that if he broke through one or two more times, he would be able to teach a levelless skill like the Worm Silk without any pressure.

Sigh, as expected, being an insect-catching youth was more suitable for him. This fellow had many development directions, though it would probably give him eye bags for the exhaustion.

“Uh...”

After the experiment was completed, Shi Yu began to calculate the cost of the other skills.

If he wanted to make hardening become transcendent level, this cool down time reduction added up to nearly 200 hours. This was equivalent to saving nearly 200,000!

However, the cost of maxing out the skill was still quite a lot. He needed about 800,000 yuan to buy eight beans...

Although it was luxurious, he couldn't save this money. The hardening level was also used to quickly increase Eleven's growth level and help it break through to the transcendent level.

Shi Yu felt that there was still thunder palm he had to match.

Right now, the Thunder Palm's level was at the proficiency level. After reaching the perfect level, it could harden into Thunder Armor profundities. At this time, Eleven's battle power would experience a qualitative leap.

Perhaps, at that time, even if it didn't multiply itself, it could still fight evenly with the Ice Dragon Phantom at the same level.

And if he wanted to upgrade the Thunder Palm to Perfect Level, he would probably need less than five divine beans...

Together, thirteen beans, 1.3 million!

After some calculations, although Shi Yu's heart was bleeding slightly, it was still within the range he could withstand at the moment.

Krypton!

...

The next day.

Shi Yu and the delivery guy completed a deal tacitly.

Shi Yu directly bought 30 Divine Beans and some supplementary supplements. He only had 2.5 million left in his little savings.

"I wonder how long these can last..."

"Sigh, I'll sell the ice crystal someday."

The quality of the more than 1,000 ice-element energy crystals in the ruins was pretty good.

The first-level market price was 5k yuan each, and the second-level was 20,000 yuan each. It was not a problem to sell them for more than 10 million yuan.

With this amount of resources as support, Shi Yu could still be at ease and increase his points before the vocation assessment.

"Where's Eleven, Eleven!"

After carrying a box of divine beans into the villa, Shi Yu started to call Eleven.

"Huh?"

In the villa, Eleven carefully peeked out and looked at the box of supplements in Shi Yu's hand.

"Wuu!"

A moment later, it revealed a determined expression as if it was prepared to die and ran to Shi Yu's side.

Come on!

Become stronger!

It was already mentally prepared!

It also wanted to see where Shi Yu's limit was after breaking through!

"Ji!" On the window sill, Buggy nodded secretly.

As expected of a leader.

How much effort would it take to repay such a huge box of supplements?

Even so, the leader could still challenge resolutely. This determination was worth learning!

"Do you plan to increase the Thunder Palm first, or do you plan to increase the hardening first?"

Looking at the coy Eleven, Shi Yu asked with a smile.

"Of course, I'll definitely upgrade all of them in the end."

"However, different choices can allow you to experience different things in advance."

"Hardening first means you might break through to the transcendent level first."

"Add the Thunder Palm first, and you might master the profundities of the Thunder Armor in advance."

Eleven: (づ_づ)

"Wuu..."

Eleven thought about it carefully and made a choice.

Thunder Palm first!

It had been eyeing Master Lin Hongnian's Iron-eating Beast's Thunder Armor profundity for a long time.

Reaching the transcendent level meant that its strength had become stronger.

But Thunder Armor was awesome!

"Then come on!"

Shi Yu also showed a determined expression.

Intermediate-level skills, a 40-hour weak period.

It required 12 additional points to reach Perfect...

It was just 12 times, just two days!

He wasn't afraid!

For the next two days, lightning flashed in the training villa.

Buzz...

Thunder Palm (Expert+1)

Buzz...

Proficiency+1+1+1+1...

Two days later.

[Skill]: Thunder Palm (Perfect)

In the training villa, Eleven closed its eyes and stood quietly on the field.

Buggy and Shi Yu, who was holding a thermos, watched from afar.

“Wuu!!!”

Perfect-grade Thunder Palm!

Eleven roared and opened his eyes. Lightning seemed to shoot out of its mouth and eyes.

Zi Zi Zi Zi Zi!!!

At first, its hands were filled with a large amount of electricity. Then, the electricity flowed through its entire body as if it was being controlled!!

Rip!!

Surrounded by electricity, Eleven’s black and white hair shone. It looked fluffy, soft, and had a clear texture. He couldn’t help but want to give it a rub!

However, it seemed that he would just be electrocuted at this stage...

Bang!!!

The power of the Perfect Level Thunder Palm was that it could rely on the electric current to stimulate the muscles and increase cell activity, producing a powerful explosive speed to increase the strength and penetration of the Thunder Palm.

At this moment, Eleven’s feet stepped on the ground. Under the eruption of lightning, it immediately displayed a terrifying explosive power. Its figure flashed like lightning and was much faster than the previous Thunder Palm attack!

Crack!

At the same time that the ground was shattered by the eruption of lightning, Eleven’s figure had already appeared dozens of meters away. In its charging path, a huge trail of stone directly exploded from the center accompanied by lightning. Countless rocks wrapped in electricity stopped in the air!

A moment later, gravel fell to the ground piece by piece. Every landing sound hit hard.

At this moment, after Eleven braked hard, it stabilized itself and tried its best not to fall. It showed an excited expression.

“Wuuu!!!”

So strong! So strong!!

It was just a little difficult to control.

It almost capsized. Eleven fearfully reported the experience to Shi Yu.

"I know." Shi Yu licked his lips.

It was precisely because it was difficult to control that Hall Master Lin combined the Thunder Palm and Hardening into profundities.

If it wasn't easy to control, he might as well give up control and directly strengthen his defense and speed to the limit, charging straight at the opponent.

However, this flaw could be improved by Shi Yu and the others.

Hall Master Lin's Iron-eating Beast's Thunder Palm proficiency had only reached Perfect Level, and there was still room for improvement.

Perhaps, at that time, Eleven's Thunder Palm proficiency would be higher and it would be easier to control once it reached perfection.

Apart from that, Eleven could better lock onto the target in a high-speed state with super vision. This was also an improved direction.

The reason why Shi Yu had let Eleven train its coordination control these few months was for this day.

A single skill, even if it added points to perfection, wasn't omnipotent.

If he wanted to make up for the various shortcomings of the pet, he had to rely on the combination of different skills.

"Then let's begin the Hardening Increase. At the same time, your training mission has become to start developing the Thunder Armor profundities."

"Hardening+Thunder Palm+Super Sight. A perfect Thunder Armor profundity!"

"Wuu!!!" Eleven waved his hand excitedly.

Now, the only pity Shi Yu felt was that the enlarged state wasn't compatible with the perfect-grade Thunder Palm.

The former sacrificed speed in exchange for strength, while the latter was an acceleration skill. The advantages couldn't be coordinated at all.

However, it wasn't a big problem. At the very least, its shrunken state was quite compatible with the Perfect Level Thunder Palm.

Eleven, who was in a one-meter state, could currently maximize his speed advantage. He might as well just pursue destructive power with the Giant Thunder Palm.

...

Then, Eleven started to perfect the Thunder Armor's profundity according to Shi Yu's request.

Those were high-end skills that only master-level Beast Tamers would develop.

As for Shi Yu and the others, they had just approached the door of the professional level and were already about to start researching it. It completely exceeded the versions of Beast Tamers at the same level.

However, it was indeed not simple to perfect a profundity.

In the subsequent attempts, it accidentally injured itself and couldn't control it perfectly.

The Perfect Level Thunder Palm was a skill that stimulated the body strongly. It was an explosive skill. If one's whole body was covered in hardening at this time, the level of conflict between the two energies would be several times higher than the ordinary Thunder Palm and ordinary Hardening combination skill!

If he had to take into account the flow and superposition of the hardened substance midway, the requirement for the pet's coordination and control would only be higher!

This was also why Master Lin Hongnian had reminded Shi Yu back then that in the future, regardless of whether it was training combination skills or profundities, he had to be very careful. If he didn't understand, he could ask him for guidance.

Each of the profundities was completed through continuous trial and error. The difficulty was much higher than the combination skill.

Regarding this, Shi Yu and Eleven indeed felt that it was troublesome.

However, the problem was still not big.

If he was injured, it would use high-speed healing to treat itself.

Eleven was really determined.

In addition, as the training time was not long, Eleven could not perfectly coordinate the two perfect-level skills. This was also fine. If the coordination was poor, he would continue to increase the proficiency of the single skill.

If the proficiency of a single skill was high, this would reduce the requirement on coordination control.

Therefore, with Shi Yu and Eleven's double efforts, Eleven's Thunder Armor profundities had already taken shape in just three days.

< Name > Iron-eating Beast

< Name > Iron-eating Beast

[Skill]: Hardening (Perfect+24), Thunder Palm (Perfect), High Speed Healing (Expert), Super Sight (Expert), Deterrence (Expert), Absolute Sleep (Expert), Multiplication (Expert)

[Obscure]: Thunder Armor (Hardening+Thunder Palm+Super Sight)

"Wuu!!!"

In the past two days, Eleven, who was in Thunder Armor Mode, could often be seen shooting lightning in the ruins.

The metal on its body hardened, and lightning shot out from its body. The destructive power of its skill was astonishing. They didn't know what the situation would be like if it fought with that Ice Dragon Phantom again.

"Ji..."

Looking at Eleven's impressive figure, Buggy was very envious.

What happened to working hard together? Why was the leader so obsessed with being given points these two days that he couldn't free himself?

"It's alright. When Eleven breaks through to the transcendent level, it'll be your turn."

Shi Yu, who was wearing a cotton jacket, holding a thermos, and a scarf, said to Buggy with a smile.

Buggy: ♣ ω ♣ Okay!

December 7th.

There were still three weeks until the vocation assessment.

On this day, Eleven's hardening finally reached transcendent.

Skill: Hardening (transcendent)

It was also at this moment that Eleven completed the most important growth transformation. It could also be said to be a transcendent transformation!

Under the influence of its racial skills, it directly grew to the transcendent level without being two years old!

Chapter 102: Beyond Transcendent

Eleven finally broke through to the transcendent level!

"Wuuu!!!" Shi Yu shouted.

Of course, it wasn't anything concerning the whole ancestor thing.

Though, when he saw the little fatty Eleven running around happily, he also played with it..

This kind of happy thing had to be celebrated together.

Right, Buggy!

"Ji ji ji!!" Buggy also crawled around to celebrate.

However, this guy seemed even less agile than Eleven.

When it evolved, it would be agile.

"Hehe..." Shi Yu smiled and stretched his fingers.

Eh, some more power was connected back to him? Not bad.

Unfortunately, compared to the increase in the level of the Beast Taming Space, it was a little insignificant...

It was better than nothing.

On second thought, Shi Yu sensed Eleven's current state.

At this moment, the energy that was as loose as a stream in its body had become as dense as a stream under the push of the transcendent transformation.

Be it the quality of energy, the total physical fitness, or the physical fitness, Eleven had received an astonishing increase.

Not bad...

At this moment, Eleven should be able to easily defeat and kill that Ice Dragon Phantom.

Well, the premise was an awakening level Ice Dragon Phantom.

As for the Ice Dragon Phantom at the same level, it was still difficult.

After a trip to the ancient capital, Shi Yu gained a lot of knowledge.

He could already clearly determine Eleven's current strength.

Eleven was basically equivalent to a young monarch at the same level of growth.

Generally speaking, a monarch race would definitely master a super skill.

As for the overlord race, they had mastered two transcendent skills at least.

After witnessing the power of the "Inner Power" super skill, Shi Yu had a clear understanding of Eleven's battle power.

In other words, a transcendent low-level skill could only barely touch the threshold of entry-level super-level skills.

Therefore, the increase in strength brought by a super skill to a pet was very scary.

Eleven had yet to master super skills, so if it faced a monarch species cub who had mastered a super skill at the same level, it could only rely on the high proficiency of other low, medium, and high-level skills to close the gap between super skills and physical fitness.

If the other party's low, medium, and high-level skill proficiency wasn't low either, then Eleven's advantage would be lesser.

If the other party still had a Beast Tamer, and if the Beast Tamer had a battle talent, then Yu and Eleven might fall into a disadvantage.

Fortunately, Shi Yu and Eleven did not need to worry about this at the moment.

In the vocation assessment, everyone was a low-level Beast Tamer. There shouldn't be a baby of a monarch race. Commander race cubs were roughly the limit.

When they could encounter monarch races and overlord races, Eleven would probably also have mastered super skills and evolved

For example, the Frost Dragon was a classic overlord race. This was also why it was very difficult for Eleven to fight the Ice Dragon Phantom that only knew Ice Breath and Ice Rending Claw. The other party's physical fitness alone made Shi Yu and the others suffer!

If the frost dragon phantom back then had mastered one or two transcendent skills, Shi Yu and the others wouldn't have had a chance to clear the ruins.

"Under normal circumstances, Eleven can actually try to evolve now, but..."

Shi Yu looked at Eleven, who had just broken through and was so excited that his whole body hardened. Then, it entered the Thunder Armor state to test his battle power and Shi Yu fell into deep thought.

He felt that it was better to get hardening to the next stage before trying to evolve. The most important reason was that he still didn't have money for the time being.

It was the same for Buggy. Perhaps there would be more gains and surprises when the time came.

Compared to the current Eleven, Buggy's battle power was a little low.

Even among the extraordinary pets of the Awakening Stage, its battle power was only in the middle.

The ice dragon that it transformed into was simply a showcase. Without the use of props, the compatibility was completely insufficient. The ice dragon's strength had yet to project itself, so it was stronger to put on another layer of the Green Silkworm's alternate identity.

Shi Yu gave the current strength of the green worm a position.

Relying on the transcendent Level Worm Silk, the expert Level Absolute Sleep, and the expert Level Illusion, it was roughly equivalent to a middle-level transcendent pet that had been cultivated well at level ten. However, it was still lacking compared to a high-level transcendent.

Shi Yu thought of Chen Kai's Ice-Armored Beast. If Chen Kai's Ice-Armored Beast awakened at level ten and trained its racial skills to the expert level, its current strength would be comparable to the Green Silkworm... Therefore, the current worm was beating Chen Kai.

It could compare to Chen Kai's Ice-Armored Beast, but not to the pets like the Wings of Wind and the Nether Cat that he had encountered when he was competing for the Evolution Sacred Spring.

Although the worm had two expert high-level skills, its main body was too weak. This couldn't be helped.

Sometimes, the difference in the physical fitness of high-level pets was even greater than the difference in skills.

"Next, I'll continue to upgrade the worm silk..."

“1, 2, 4, 16, 64...”

Shi Yu looked forward to levels above transcendent Proficiency.

The effect of the transcendent Level Worm Silk was probably close to an expert low-level skill.

Then, what about the insect silk above transcendent?

He decided to try!

At this moment, Shi Yu’s Beast Taming Space had reached level two, and Eleven had reached the transcendent level. After spending nearly three months of hard work, he finally became a quasi professional Beast Tamer.

However, this was not the end. Before the vocation assessment, Shi Yu felt that he could continue to increase his strength...

...

Then, Eleven was thrown into the ruins by Shi Yu to repay the debt.

The Thunder Palm had been added to Perfect Level, and the Hardening Level had been added to transcendent Level. According to the training time of Hall Master Lin’s Iron-eating Beast, Eleven would have to work hard for at least ten years...

However, Shi Yu wasn’t a demon. He wouldn’t really specify any training volume. It was up to Eleven to decide.

Eleven: QAQ, the Beast Tamer is a little fierce this time...

“Buggy, come here.”

Then, it was finally Buggy’s turn to add points. Buggy was excited and looking forward to it.

Originally, under Eleven’s persuasion, it resisted the ability to add points to corrode the mind and thought that hard work could temper “willpower”.

But who knew that Eleven would be more proactive than anyone when it came to increasing points!

That was how Eleven explained it. It was because the additional points were too corrosive that he had to face it bravely and not dodge.

When he could rely on his hard work to repay the debt he owed, he would truly conquer itself.

Challenging temptation was not shameful, but it was shameful to not dare to face temptation.

Eleven proficiently used and taught this set of words that Shi Yu had used to deceive Eleven back then.

What else could Buggy do? It could only follow the footsteps of the spiritual leader, Eleven, and accept the challenge of fate...

“Ji...”

This time, Buggy also got his wish fulfilled and tried the taste of its soul being corroded.

It was indeed worth challenging and overcoming...

Just like that, another half a month later.

This time, Shi Yu's team was completely reborn.

< Name > Green Silkworm

[Level of Growth]: transcendent

[Skill]: Worm Silk (MAX), Absolute Sleep (expert), Illusion (expert+4)

After some hard work, Shi Yu's Worm Silk level was directly maxed out.

Why was it max level? Because at this moment, the skill index already showed that it couldn't teach the worm silk anymore.

On the page of the Worm Silk skill, there was also an additional deletion symbol.

This change made Shi Yu fall silent for a long time.

He finally realized that apart from contracting a new pet, this was the second way to increase the skill index space!

That was, if he filled a pet with the recorded skill, he could directly delete it from the records!

As for how many times the so-called max number needed, Shi Yu estimated that it was about 256.

He upgraded about 192 more times on the basis of the Worm's transcendent Worm Silk, and the index showed that he couldn't continue teaching.

Including the previous points, it was 256 times!

1, 2, 4, 16, 64, 256...

This time, Shi Yu finally discovered the general pattern of the index.

He was exhausted to death, but it felt so good.

Shi Yu did not know how to describe the worm silk above the level of transcendent.

Shi Yu only knew that during this process, the Green Silkworm naturally broke through to the transcendent level.

Moreover, the use of its insect silk had also undergone an extremely ridiculous change.

Firstly, in terms of toughness, even if Eleven used transcendent Level Hardening, it couldn't destroy the silk at all.

Shi Yu even tried burning it, but it was impossible.

In the end, Eleven had to use the combination skill of Perfect Level Hardening and Perfect Level Thunder Palm to cut the thread.

Secondly, in terms of sharpness, it could leave a mark even when facing Eleven's transcendent hardening!

Although the injuries weren't serious and were only ordinary scratches, at this stage, how many pets had such high defense power like his panda?

Then, in terms of the most ridiculous spatial nature, apart from the transparent worm silk, the current worm silk could even ignore Shi Yu's etherealization and touch Shi Yu with the worm silk.

Even Eleven couldn't do this.

Perhaps, at the moment, Shi Yu and the others had encountered a pet proficient in space. The effect of Buggy was even greater than Eleven.

In other aspects, it was the numerous small skills derived from the worm silk.

After the Worm Silk was added to the maximum level, it could be said that with just one skill of the Worm Silk, the battle power of the Worm would not be inferior to other transcendent pets of the same level.

If it included Absolute Sleep and Phantom Illusion, it could strengthen itself again. It wasn't possible for its battle power to be comparable to a low-level commander species cub of the same level.

This time, Buggy really stood up...

At the same time, Shi Yu was even more worried about whether it would suffocate to death in the cocoon when it evolved.

This max-level worm silk seemed to be even harder to deal with than the transcendent worm silk.

However, if it evolved, it would probably be even stronger.

The current pinnacle of the Green silkworm's evolution experiment was a transcendent level Green silkworm with phoenix related evolution materials. It was to evolve into the Ice Phoenix Moth of a monarch race.

Shi Yu estimated that his family's Buggy might have a chance of becoming an overlord?

Well, the premise was that he had to prepare a skill that could 100% break through the cocoon for the worm in advance.

Otherwise, things would get out of hand.

In fact, Shi Yu only used five days to fill the worm silk. However, after filling the worm silk, his medicine didn't stop. He continued to increase other skills.

For example, the Green Silkworm's high-level skill, Illusion, was upgraded four more times.

Apart from that, Eleven was also strengthened by Shi Yu.

< Name > Iron-eating Beast

[Level of Growth]: transcendent

[Skill]: Hardening (transcendent), Thunder Palm (perfect), High Speed Healing (expert), Super Sight (perfect), Deterrence (expert), Absolute Sleep (expert), Multiplication (expert)

[Obscure]: Thunder Armor (Hardening+Thunder Palm+Super Sight)

Shi Yu also got Eleven's mid-level super vision to Perfect Level.

The reason why he chose this was very simple. It was to perfect the Thunder Armor's profundity one step closer.

The proficient level super vision was only 360 degrees without any blind spots, while the perfect level super vision could already achieve simple energy vision and see the energy flow.

There were roughly two main uses for energy vision. The first was to determine the opponent's level by looking at the size of the opponent's energy clearly. The index detection function of the cell phone was actually similar to this.

Second, he could observe his own energy flow and coordinate the energy flow between different skills.

This had a very important support role for Eleven's coordination of hardening and thunder palm.

It could be said that with the Perfect Level Super Sight, the current Thunder Armor profundity was completely completed.

In fact, Shi Yu still had a small goal, which was to level the Thunder Palm to transcendent.

Although Shi Yu didn't know the effect of the transcendent Level Thunder Palm, he knew the effect of the transcendent Level low-level skill Electricity.

Even a low-level skill like Electricity could be easily built into a magnetic field when trained to perfection. Thunder Palm should be able to too.

At that time, with the transcendent Level Thunder Palm, Hardening, and Perfect Level Super Sight, Shi Yu felt that it shouldn't be a problem for Eleven to develop the second profundity Skill.

It was the long-distance profundity Skill, Electromagnetic Cannon...

He could condense a metal cannonball with transcendent Level Hardening, then use the Thunder Palm to construct a miniature electromagnetic field and shoot the metal cannonball out with electromagnetic acceleration!

Shi Yu felt that this profundity was even more difficult than the Thunder Armor, but with the support of super vision that could see the energy flow, he should be able to give it a try!

But now, this small goal might have to be delayed for a period of time.

Firstly, it was because the supplements were running out of time again. Secondly, there were only a few days left until the vocation assessment this year. There might not be enough time.

Shi Yu arrived at the second-story balcony of the villa and looked at the blue sky. He sighed.

In the blink of an eye, three months had passed...

It had been nine months since he transmigrated to this world.

The small goal he set back then seemed to be to become a professional Beast Tamer within a year. Was he really going to achieve it now?

Although he did get help from a rich woman, but... As expected of you, Shi Yu!

“The vocation assessment is equivalent to the College Entrance Examination in the Beast Taming World. Be it entering a top-level institute, becoming an official member of Bureau 11, or enjoying comprehensive privileges, the professional Beast Tamer certificate is a threshold that can’t be avoided. To put it bluntly, countless Beast Tamers will flock to the vocation assessment every batch. This is the first stage for the vast number of Beast Tamers to showcase themselves.”

Then let’s give it a try.

Shi Yu called out at the round Eleven, which was now basically the size of a 0.4-meter Pikachu, and Buggy, who was in training.

“Huh?”

Eleven carried the cell phone that Shi Yu had provided for it and Buggy and walked over eagerly.

“Ji!”

The green worm also crawled over with excitement.

They were also counting on the time. They knew the vocation assessment would be starting soon.

These two guys naturally knew what the vocation assessment was. After all, it was hard not to know when they were doing two sets of papers every day.

“I’ve decided. I’ll return to the ancient capital tomorrow.”

“Prepare yourselves. Don’t screw up in this vocation assessment.”

Shi Yu looked at them sternly.

“Wuu!” “Ji!” Eleven and Buggy reassured Shi Yu.

He couldn’t guarantee the written test, but in terms of battle, they would definitely give their lives away. Otherwise, they would really be letting down Shi Yu’s points for this period of time.

With that, Eleven raised its cell phone. It would leave the other things to them, but was wondering if it could trouble Shi Yu to take a few photos for them to remember during the competition...

Please!

Shi Yu :” ...”

“How many times have I said this? I’m a Beast Tamer, not a photographer!”

Translator: Atlas Studios Editor: Atlas Studios

The weather in the Ancient Capital had already turned cold in December.

Outside the Ancient Capital Airport, flights after flights made the place very lively.

It was almost January. At the moment, the entire country was paying attention to one thing.

Job assessment!

In the Ancient Kingdom of Dong Huang, every city above level two had already started preparing for the vocation assessment.

Among them, the professional assessment organized by the Beast Tamer Association of the nine first-level cities was the highest number of participants and the highest quality of participants.

At that moment, most of the quasi professional Beast Tamers from the dozen or so second-tier cities around Ancient Capital that were the size of Icefield City arrived at this time.

Beast Tamers gathered!

It was much more lively than the opening day of Ancient Capital University in September!

In the airport, Shi Yu was wearing a white short-sleeved shirt with a panda pattern in the center. He wore an ordinary pair of black sports pants and carried a black backpack. His white sports shoes stepped on the ground as he tried his best to leave the crowd.

“Damn it, there are more people than last time.”

Shi Yu, who had finally left the crowd, took a deep breath, as if he had been reborn.

“Over here!!”

Just as they left the airport, Shi Yu was still looking around when a luxury car honked. The window was lowered, and the Panda senior in the driver’s seat poked her head out and waved at Shi Yu.

The gazes of the young people who had also come out of the airport stayed in the luxurious car and the beautiful Panda senior for a long time. Then, they saw Shi Yu get into the car with a smile and couldn’t help but feel jealous.

How envious!

They were all here in the ancient capital, so why did you have a luxury car and beautiful woman to pick you up?

“Where did the car come from?” Shi Yu asked curiously after getting into the car.

Although this car wasn’t a mechanical life, it probably wasn’t any cheaper than a pet of a good race...

“Junior Lin Yu’er.” Lin Xiuzhu smiled and said, “I borrowed it to pick you up.”

“Oh, oh.” Shi Yu nodded. The seven archeological elites!

Among the Beast Tamers who could enter the Ancient Capital University to study, apart from some geniuses who had rare Beast Taming Talents or just had pure talent, most were rich second-generation heirs and second-generation heirs. It wasn't strange for them to have a luxury car.

In the past few months, the Archeological Seven Elites had been so high that they exploded.

Hall Master Lin, Lin Xiuzhu, and other specializations in the Feeding Department, Research Department, and Archeology Department of the Ancient Capital University established an Iron-eating Beast Evolution Research Group. The Seven Archeological Elites also successfully infiltrated. Although they were only doing some miscellaneous work at the moment, it could be said that they had added a beautiful sum to their learning resume.

In three months, Hall Master Lin and the others' study of the iron-eating beast's evolution was almost coming to an end.

At the invitation of Hall Master Lin and the others, two master-level Iron-eating Beast Tamers who cultivated Iron-eating Beasts in the country completed the evolution, proving the feasibility of this evolution method. At the same time, they also tricked a large amount of research funds from them.

In addition, by comparing the various data on the evolution forms of ordinary Iron-eating Beasts and Iron-eating Beasts, the research team also researched how to let ordinary Iron-eating Beasts awaken their Giant Transformation skills at the awakening stage before the evolution.

If he could find a stable awakening method, the iron-eating beast's race level might even be reassessed. It wasn't impossible for it to become a high-level transcendent race.

Shi Yu was relatively satisfied with the research efficiency of this research team. Unfortunately, Eleven didn't have to learn Giant Transformation at all. The principle of Giant Transformation was the same as multiplication, and it couldn't be superimposed and used like hardening and impregnable iron. It was meaningless.

"When will the evolution of the iron-eating beasts be announced?"

In the car, Shi Yu asked.

"We're still lacking some data."

"There's also some controversy regarding the evaluation of race level."

"After experimenting with the iron-eating beasts of the other two masters, we finally confirmed how many evolution materials the iron-eating beasts use to evolve. It determines the race potential of the iron-eating beasts after evolution."

"For example, the racial level of my father's Iron-eating Beast after evolution was evaluated as 'middle class monarch'."

"Mid-level monarch? Not bad."

"Well, firstly, it's because the skill 'Inner Power' is an extremely outstanding battle skill even among super skills. Secondly, it's because the Iron-eating Beast's overall physical quality after evolution is completely not inferior to some alternative dragons. It's all thanks to its physical fitness."

Shi Yu nodded.

“However, there’s a master who used fewer evolution materials. This iron-eating beast’s body strength is much weaker after evolution. It can only be considered to have reached the evaluation standard of a low-level monarch race.”

“There’s also a master. Because of the comparison... Therefore, her Iron-eating Beast only used a small portion of the evolution materials to complete the evolution. After the evolution, it didn’t awaken any transcendent skills, and its species rank can only be judged as high class commander rank.”

“Iron-eating beasts are a rare race that are not fixed after evolution.”

“Oh right, during the process, we also tried to use other high-level alloys to complete the evolution, but we all failed. The alloy synthesized by Dean Hao according to the metal sheet is the best evolutionary ingredient ratio.”

“So, in the future, when your Eleven evolves, you mustn’t save on evolution materials. Sell everything you’ve got! It’s a pity that you don’t have suitable experimental subjects and don’t have enough funds. Otherwise, we would have to study whether the Iron-Eating Beast can evolve in the Giant Armor no matter what.”

Shi Yu :”...”

Previously, Qi Yingjie had even said that Eleven could shrink to more than ten centimeters and then wear an alloy battle armor to evolve. This could save a lot of money, but from the looks of it, they were indeed in a pit.

If he really did that, it would delay Eleven’s evolution potential.

However, wearing battle armor after becoming a giant??

If he let it multiply to dozens of meters and wear armor that was dozens of meters tall, how much would it cost?

Not even ten billion could cover it!

Even if they could stimulate better racial potential, could they find so many evolution materials in the country?

Shi Yu’s expression darkened.

However, the research team had researched that there was a chance of awakening the Giant Transformation before the iron-eating beast evolved. Perhaps that was how the Giant Transformation was used??

“Eh, what’s wrong with you?”

The panda senior looked at Shi Yu sitting weakly beside her and asked blankly.

Shi Yu: “No, I’m fine. I just have a stomachache.”

This research team was really established correctly. Shi Yu was now very puzzled. Was this research team here to resolve his problems or to deceive him into paying money?

“Although it’s a little controversial, it won’t be long. At the moment, the final assessment process is underway. It’s estimated that in at most a month, the information on the iron-eating beast’s evolution will be announced. At the same time, it will be included in the textbooks and exam questions.” The panda senior placed her hand on the steering wheel and smiled.

“Unfortunately, there’s no progress in the study of inscriptions. We’re almost here...”

This time, Shi Yu did not need to stay in a hotel. He just needed to stay in Ancient Capital University.

The Iron-eating Beast Research Institute that was built half a month ago was not small. It could completely vacate a spot for Shi Yu.

Although Shi Yu was currently a man who did nothing, no matter what, he still seemed to be the in-charge of this project.

...

After arriving at the research institute, Shi Yu realized that Master Lin Hongnian and the others weren’t around. Instead, a few of the archeological Seven Elites were idling here.

What should be there was not there, what shouldn’t be there was all there. He still wanted to touch the restrained giant panda and replicate his hand skill.

It looked like there was no chance today.

“Junior Shi Yu, you’re here.”

Lin Yu’er, another girl, Lu Yao, Zheng Yingjie, and Wang Le were playing cards on the first floor of the research institute. When he saw them, Shi Yu’s face darkened.

Good lord.

He was chilling around because he was here to get ready for the assessment, but why were these guys chilling too?

The panda senior beside Shi Yu smiled and said, “Have you fed the iron-eating beast? Are the experimental equipment checked?”

“We’re done, we’re done!” Everyone said.

However, it was still because their mission was not heavy. In the research institute, there were still a few Little Metal-eating Beasts in the backyard at the Awakening Stage for use in cooperation with research. Their mission was to serve the Little Iron-eating Beasts well and record their growth data.

They were clearly from the Archeology Department, but were doing the work of the Feeding Department and Research Department. Fortunately, this wasn’t a difficult task. With the guidance of an ancient major Feeding Department graduate who specialized in the cultivation of iron-eating beasts, Lin Xiuzhu was basically fine.

“Junior, seeing how energetic you are, you must be ready.”

“How is it? The level of the Beast Taming Space has increased, right? The Iron-eating Beast has also reached the transcendent level, right?”

“Have you contracted a second pet?”

As Shi Yu arrived, the few of them stopped their card entertainment and began to ask Shi Yu about his training results curiously.

Initially, after the research institute was built, everyone invited Shi Yu to stay over.

However, Shi Yu rejected it immediately. What a joke. There were so many people here, how could he be at ease and upgrade his pets' points?

“Yes, there's basically no problem.” Shi Yu smiled.

Now, the only uncertainty was the written test.

The question bank for the vocation assessment was much deeper than the items in the textbooks during school. He had only trained them for this for a period of time. He didn't know if it would work...

Although one didn't have to give outstanding grades and pass the written test, if one didn't pass the written test, they would also be directly eliminated. What a scam. This mechanism was too complicated.

“That's good.” Zheng Yingjie nodded and said, “By the way, do you want any news?”

“I heard that there are several monster geniuses participating in this vocation assessment. I wonder if you can meet them.”

“Tell me about it.”

At this moment, Shi Yu had already sat down and was drinking ice. He quietly listened to his seniors brag.

“There seems to be a person. His father is a Spirit Medium, and his mother's Dragon Tamer. He's even more ridiculous. He contracted a Nether Bone Young Dragon of both undead and dragon elements, as well a second pet. A remnant soul of a dragon of the undead family. The most ridiculous thing is that his two pets can still fuse together to fight. Although one is a bone dragon and the other is a dragon soul, they can't be considered real dragons, but together, it feels pretty much the same. Probably not even a single commander-type pet can withstand it.” Zheng Yingjie clicked his tongue.

“I heard that before the assessment even started, he had already been reserved by our Combat College's Combat faculty and Battle Club. By the way, his parents seem to be graduates of Ancient Capital University, famous top-notch masters. This is definitely a planned growth route.”

Shi Yu: Emmm

Initially, Shi Yu didn't mind because even if the opponent was a commander species creature, as long as its growth level was still at the transcendent level, Eleven could fight it. However, what the hell was the point of the two pets merging? Dragon Soul Possession Bone Dragon? That worked too?

In comparison, he felt that Eleven and Buggy didn't cooperate much... It was negligent. It was mainly because there was too much time and he didn't have time to give Eleven and Buggy a powerful double combat strategy.

"Also, I heard that Legend Yin's 12-year-old son is also going to participate in this vocation assessment. I don't know if it's true, but it's ridiculous. I haven't even awakened my Beast Taming Talent at the age of 12."

"Why are there 12-year-olds..." Shi Yu was speechless.

It wasn't strange for there to be candidates aged 32, 42, and 52, but twelve years old was too much!

"Maybe he inherited Legend Yin's Beast Taming Talent... His special Beast Taming Talent's strength can rank in the top 30 among all Beast Taming Talents."

"What talent?" Shi Yu asked.

Special Beast Taming Talent... Speaking of which, if his skill index was also considered a special Beast Taming Talent, it probably belonged to an extremely abnormal level.

At the moment, the known strongest Beast Taming Talent was still a Beast Tamer from the last century. It was said that he had the "evolution" talent and could help any pet complete evolution at the smallest cost. At the same time, he was the Beast Tamer closest to the Mythical Domain in the legends.

Shi Yu felt that his skill index was a little inferior to this evolution talent.

Sometimes, special talents were so unreasonable compared to strengthening talents.. The weakest Beast Taming Talent must be special talents, but the strongest Beast Taming Talent must also be special talents.

Chapter 104: This Shi Yu Is Poor

"His Beast Taming Talent is Spatial Strengthening Talent."

Speaking of this talent, Zheng Yingjie showed an envious expression, almost drooling.

"Didn't you say just now that it was a special talent? Why did it become a strengthening talent..." Shi Yu curled his lips.

"Ah, sorry. There are two Spatial Strengthening Talents. One is Spatial Strength Strengthening Talent. This classification is Strengthening. It's used on pets. It's also very strong."

"His Beast Taming Talent is 'Beast Taming Space Enhancement'. It's used on oneself, so it's a special type. It can strengthen the Beast Tamer's affinity for the Beast Taming Space and strengthen the strength, scale, and environment of the Beast Taming Space."

"Let me put it this way. Ordinary Beast Trainers can only contract one pet. They can contract transcendent race pets, but with this talent, they can contract two pets at the trainee stage and contract commander pets."

“The Beast Taming Space, after it reached the second level, would make it so that the upper limit can contract four pets, which is twice that of an ordinary Beast Tamer. At the same time, the growth level and race level of the contracted pet are also higher than that of a Beast Tamer of the same level!”

“This is the Beast Taming Talent of the legendary Beast Tamer Yin Zhongrong, the legend of the ancient capital. If his son also inherits this talent, that would be awesome. He would definitely be another legendary Beast Tamer in the future.”

Beast Taming Space Strengthening Talent?

Good lord.

Shi Yu was stunned. This guy’s talent was so unscientific!

It was cheating!

How were the other Beast Tamers supposed to deal with this?

However... his skill index wasn’t much better. It seemed to be cheating in other aspects too.

He had already mastered one of the combination skills mastered by a master-level Beast Tamer.

On the other hand, Beast Tamers who had the Beast Taming Space strengthening talent could enjoy the benefits of the high-level Beast Taming Space at a low level.

He felt that this Beast Taming Talent was also very fragrant.

[Skill index, skill index, you have to be more careful. It’s fine if you say that there’s a limit to the number of skill replications, and it’s fine if the teaching cost is so high, but you actually have some confidence. When can you be a little more promising and evolve an ability to replicate Beast Taming Talents] Shi Yu thought.

Shi Yu expressed that he also wanted to learn skills.

“This talent is low in the top 30. I feel that it can be ranked in the top 20 since ancient times,” Wang Le said.

Zheng Yingjie said that the Beast Taming Space Enhancement talent could also be ranked in the top 30 of all Beast Taming talents. Regarding this, Wang Le denied his views.

“Who cares? This kind of thing has never been ranked official before. In short, it’s very strong,” Zheng Yingjie said. “But the more powerful this Beast Taming Talent is, the greater the burden on Beast Tamers.”

“I heard that Legend Yin’s money to buy cultivation resources every year is insane, you could travel around the world with that. It’s slow enough for ordinary people to increase the level of the Beast Taming Space. It’s only harder for Beast Tamers with Space Enhancement talent to increase the level of the Beast Taming Space. It’s purely a rich man’s talent.”

“However, with a legendary father, Legend Yin’s son should be able to cultivate very comfortably. He probably grew up on a pile of Ethereal Stones. His first pet must also be of a high race. It’s so frustrating!”

“My Legendary Beast Tamer Father”, Zheng Yingjie also wanted to be able to say a sentence like that.

What kind of vocation assessment was this? He came to participate in the vocation assessment at the age of 12 purely to attack people.

Everyone looked at Shi Yu in unison. Strangely, Shi Yu looked calm at that moment. He didn't seem to be under any pressure?

What was going on? Why was he not worried?

Shi Yu was stunned and said, “What are you looking at me for?”

There were also rankings for those who passed the vocation assessment. Rankings were also the goal of many quasi-level beast tamers.

The few of them thought that Shi Yu was lazy and did not want to compete.

“Aren't you going to compete?” Senior Panda leaned against the wall and hugged her chest. She smiled and saw through Shi Yu's true nature.

To put it bluntly, someone like Shi Yu lacked motivation.

“Eleven has mastered so many powerful techniques and even a combination technique. It's not necessarily inferior to those supernatural commander-level beast pets.”

“Why don't you guys give it a try? The higher your ranking, the greater the benefits.”

“For example, if you can rank in the top 20 of this year's assessment and enter the Ancient Capital University, not only will you be exempted from the four-year tuition fees, but the school will also provide a huge enrollment scholarship and credits that can be exchanged for various resources as a reward.”

“As for the top five... the top-grade commander-level beast cub school can also get you one of their cubs. It's not too much to say that it's a 10 million-level scholarship.”

“First place, well... there should still be cultivation resources worth tens of millions. After the annual vocation assessment, it's very common to try and keep people in. The main reason is to prevent the genius beast tamers from taking the assessment in the ancient capital from being transferred to other top-level colleges. Therefore, the school will spend a lot of money to keep these geniuses,” Senior Panda said.

This was the advantage of being in a top-notch school. As long as one had talent, they could compete and nurture many resources. It was far easier than obtaining resources in society.

“That's right. Junior Shi Yu, charge. There's only one chance,” Zheng Yingjie and the others said.

At this moment, after everyone finished speaking, Shi Yu was slightly stunned.

Not hidden benefits, but true gold and silver? How could they be so direct?

He had already decided to enroll in the Ancient Capital University's Department of Archeology. Because it was introduced by Senior Lu, the benefits and treatment were probably not bad.

However, this was indeed a little suspicious...

If he could use his potential to obtain resources, he might be able to use it more comfortably. After all, the discovery of the Iron-eating Beast Ruins was considered one. In addition to the vocation assessment, it should be able to represent his comprehensive potential... This school might indeed be a very good place to develop.

"I didn't say that we weren't competing... But there's no need to risk our lives. Let's just perform normally." Shi Yu said seriously.

Originally, he was also prepared to test the results of his training with the vocation assessment. This time, he had an even more important reason...

Alright... whether it was a bone dragon or a dragon soul, or a twelve-year-old kid, although he still didn't know how powerful they were... For the sake of the scholarship, please experience the weight of nearly ten million supplements later.

...

That night, when he heard that Shi Yu had returned to the ancient capital, Hall Master Lin also returned to the Iron Beast Research Institute.

In order to study the evolution of the Iron-eating Beasts and find experimental subjects, he had been so busy these days that his scalp had gone numb.

In order to study the evolution of the Iron-eating Beasts and find experimental subjects, he had been so busy these days that his scalp had gone numb.

For example, it was not a bad thing to have researched the evolutionary materials that determined the evolution potential of the iron-eating beasts. Instead, it was a good thing.

This greatly reduced the threshold for ordinary beast tamers to nurture iron-eating beasts to evolve. This allowed the iron-eating beasts to have good value in the low-level, middle-level, and high-level markets.

Now, it was a pity that the Iron-eating Beast only displayed combat value.

Now, the Beastmaster Association favored the beast pet races that had low requirements for evolution and could evolve smoothly and bring huge financial benefits.

For example, a pet that could produce such resources was a pet that could bring financial benefits.

And those pets that could farm.

This kind of pet that had mastered special abilities was the main demand in today's era.

This was also why some researchers had been studying the evolution of the Green Silkworm in exchange for fame and benefits. The Green Silkworm was highly malleable and had many evolution directions. Perhaps they could develop an evolution form that could cause changes in a certain field.

However, the evolution form of the iron-eating beasts was actually not bad. After all, the upper limit was a high-end battle power that might approach the overlord races. If high-level battle power was

thrown into the wild for future city developments, the economic benefits were not bad, maybe even better.

With such a racial level and the fact that the Iron-eating Beast was a unique pet of the Dong Huang, it was not impossible for the Iron-eating Beast to become the “national treasure” of the country.

The final goal of the Iron-eating Beast Research Group was to operate the Iron-eating Beast into one of the national treasures of the Nation.

Regardless of whether it could succeed in the end, when the time came, Shi Yu, who discovered that the Iron-eating Beast had evolved, would definitely become popular. He would directly gain both fame and fortune.

“How nice.”

At night, because Shi Yu said he wanted to see the iron-eating beast evolve, Hall Master Lin Hongnian directly let his iron-eating beast out.

Then, they saw Shi Yu go up and touch and pet it as if he had seen a relative, leaving Lin Hongnian’s Iron-eating Beast at a loss.

This guy wasn’t even petting his own Iron-eating Beast baby, so why would he be petting a twenty-year-old Iron-eating Beast veteran?

[Confirm recording]

Skill: Inner Power

[Skill Level]: Super level

Status: no target

Before long, Shi Yu stopped with a smile.

The other skills weren’t important. He had to let Eleven learn this godly skill quickly.

After Lin Hongnian’s research, this skill, even if it didn’t cost him, had very strong battle power.

As long as the iron-eating beast didn’t release its strength and was in a restrained and cute state, it was actually a process of accumulating strength.

It was equivalent to the Iron-eating Beast being able to slowly accumulate additional energy in its body even at full strength, waiting for the time to directly erupt.

Now, Shi Yu was very curious if he could teach super skills with his physique.

As he was too anxious to verify it, Shi Yu didn’t talk to Hall Master Lin and the others about the research progress and the vocation assessment for too long. He directly returned to the room and summoned Eleven.

“Huh?”

After coming out of the ruins bead, Eleven looked at Shi Yu in confusion.

Then, it quickly saw Shi Yu's expression.

Shi Yu even revealed a look of despair.

Skill: Inner Power

Status: Cannot be taught

"Damn! Why!"

Shi Yu: ¥#% # ¥#% # % #

Eleven:...

It was the same as the super skill Plant Control!

It couldn't be taught!

At that time, Shi Yu concluded three reasons.

There were two reasons why pets didn't have enough compatibility and strength.

Shi Yu didn't believe that Eleven wouldn't meet these two conditions.

So, it could only be the third reason?

Third, his physique was still too lousy and insufficient to withstand the teaching of super skills. The index was afraid that he would die, so it didn't allow him to teach. Just like the cooldown time, it was a protective mechanism... Shi Yu hated it!

As expected, it was because he was too lousy?

"Wu wu?"

Although Eleven didn't know what had happened, it couldn't help but pat Shi Yu's thigh comfortingly when it saw his depressed look.

It's alright, it's alright. Relax, he still had Eleven and Buggy by his side!

"I still hate it." Shi Yu's eyes were filled with tears.

It would take nearly a week to teach high-level skills, so super skills would probably be even more terrifying... When exactly could he teach them?

This was still an entry-level super skill. If he still needed to increase some proficiency, Shi Yu didn't dare to imagine what he would become.

Not only was the learning difficulty higher than low-level skills, but it would also be difficult to increase proficiency in the future... It was so tiring.

"Wuu!"

Eleven looked up. Was everything alright now? If so, it would go back to train!

“Yes.” Shi Yu said weakly, “It’s time for the assessment soon. Just warm up appropriately. Why are you training? Come, do two sets of papers with me. Then, be good and turn into a big bed and sleep.”

“???”

Eleven: (๑ ̎ ̎) Let the worm do it. It can change many more ways than I can!!

Chapter 105: Battle Restaurant

There were two ways to register for the vocation assessment.

One was to register at the local Beast Tamer Association, and the other was to register online.

Shi Yu had signed up on the Internet, so he just had to wait for the assessment to start.

“There’s still a day...”

After waking up in the morning, Shi Yu stretched.

At the same time, he thought about whether he should give Eleven and Buggy a double combat strategy at the last minute.

The first stage of the vocation assessment was alright. It was to verify the Beast Tamer’s Beast Tamer level and pet level. It was similar to an interview. Beast Tamers who reached the threshold could pass.

After being reminded by the panda senior, Shi Yu knew that the most important stage was the final assessment.

At that time, all the candidates who had passed the first three assessments would undergo the ranking battle.

There were no restrictions in this assessment.

For example, some Beast Tamers only cultivated one pet, but if their opponents cultivated two, they could only fight one against two.

To be precise, it was two against three, because in this battle, Beast Tamers could also participate in the battle. This was to give some Beast Tamers with special talent a chance to display their strength.

Therefore, this time, it was a test of the overall battle power of the Beast Tamer.

For example, the 12-year-old prodigy Zheng Yingjie mentioned might be able to summon three or four pets with his talent.

There were even candidates who had reached the third level in the Beast Taming Space in advance who could possibly summon three pets.

This way, teamwork was especially important. Beast Tamers who hadn’t undergone this training would definitely suffer.

“Panda, Buggy...”

“It doesn’t match.”

After washing up, Shi Yu began to think.

In fact, he also trained Eleven and Buggy’s tacit understanding. Eleven and Buggy often trained and fought together, so the two pets knew each other very well.

However, due to race and skill restrictions, if they wanted to cooperate, it would be to use the worm silk to control the opponent while Eleven attacked.

Although they could barely cooperate, he felt that there was no qualitative leap. It wasn’t a perfect fit.

It was far inferior to the Dragon Soul Possession Bone Dragon. The improvement brought by the integration strategy was more direct.

“Forget it, forget it. We’ll talk about it in the future.” With the skill “Illusory Phantom”, if he wanted to, Buggy and any pet could cooperate very well, but he needed a lot of time to practice them.

Now, Shi Yu clearly didn’t have much time.

Moreover, Eleven and Buggy had yet to master their own pile of skills, so how could they have the time to study double combat tactics?

Shi Yu was hoping that Eleven and Buggy could rely on their outstanding individual qualities to fight two to three.

This was also a method. In short, as long as the pets were strong enough, the number of the enemy didn’t matter.

Moreover, Eleven also had the deterrence skill.

“Eh, no one?” When Shi Yu came out of his room, he realized that the research institute was cold and quiet. Only Senior Panda was there.

It was only nine. He wasn’t late either.

“They went to buy experimental equipment.” Senior Panda was preparing a nutritious meal for the little Iron Eaters in the backyard.

“Oh, oh.” Shi Yu nodded.

“Did you have breakfast?”

“Do you want to drink the fresh milk prepared for the iron-eating beast?”

“Forget it.” Shi Yu waved his hand.

The iron-eating beasts drank too much milk. He was afraid that it would exceed the metal content.

Panda smiled and said,

“You can go to the school canteen to take a look. There seems to be instant noodles in the other cabinet too if you want.”

“Then I’ll go out and take a look.” Shi Yu didn’t really want to eat instant noodles either.

“If you want to go out, do you want to go to your own examination venue tomorrow?” asked the panda senior.

“Ancient Capital is still pretty big. Do you know where your next examination venue is?”

It would be too awkward if he missed the assessment because he was late to the wrong venue.

Although it looked pretty stupid, there were such Beast Tamers every year.

When Lin Xiuzhu participated in the assessment back then, she saw someone crying outside the examination hall because he was late... This group of unlucky children.

There were all kinds of people in the world.

Shi Yu exclaimed. Which examination hall was he from?

A certain someone fell into deep thought.

He really didn’t notice!

He originally wanted to confirm his location today, but Senior Panda reminded him just in time.

Shi Yu took out his new cell phone and checked it.

“It looks like the Lotus Lake Arena... I’ll go take a look later,” said Shi Yu.

“It’s quite far from here,” said the panda senior.

“Then why don’t... you send me there?” Shi Yu was addicted to sitting in the car.

The panda senior rejected and said, “Go alone. I still have to take care of the iron-eating beasts.”

“Besides, the car was also driven away by Junior Sister Lin Yu’er.”

“I understand.” Shi Yu was sad. The vocation assessment was such a big thing. Didn’t he get the treatment of getting a car?

After all, he might become the scholar of the year this year.

...

Shi Yu went out alone.

But thinking about it, it seemed normal.

This assessment was like the college entrance examination. The candidates, parents, and official institutions were the ones who thought about it all day. Although outsiders would also pay attention, they were purely watching the commotion.

Shi Yu didn’t have any relatives, so he was definitely being treated like an orphan.

“A taxi, my savior.”

It was not as convenient to buy a car.

Next, Shi Yu chose to listen to Senior Panda's suggestion and stepped on the examination venue in advance.

The Lotus Lake Arena was a very large venue in Ancient Capital City. It could accommodate 50,000 people at most, so it was definitely not a problem to treat it as an examination hall.

Shi Yu took an hour via taxi before rushing over from the research institute.

Without a traffic jam.

From the looks of it, he had to get up early tomorrow... Otherwise, he would be dead if he got stuck in a traffic jam.

"Why don't we just not go home?"

Shi Yu stood outside the arena and was silent for a long time. Finally, he picked up his cell phone and called Senior Panda.

"Are you there?" The other side asked.

"We're here. It's a little further than I thought, so I won't be going back today."

Panda:???

Was this how he did things?

"Is there still a place to stay? At this time, shouldn't the surrounding hotels be full?"

"Don't worry," Shi Yu said.

He had the Ruins bead. When the time came, he could just sleep on the panda bed in the bead. Why would he want a hotel?

In order to avoid waking up early tomorrow and to consider the risk of traffic jams, Shi Yu felt that it was safer to sleep near the examination hall.

As expected of you, Shi Yu. He directly eliminated the risk of being late. He sure was smart.

"Then, alright."

Regarding this, Senior Panda was speechless.

However, during the vocation assessment, in order to avoid some unnecessary trouble, she seemed to have rented a room near the examination hall.

This was indeed the easiest way.

After saying goodbye to the panda senior, Shi Yu hung up.

He looked at the arena. At the moment, the arena was in a sealed state. People were gathered around.

Judging from the age distribution of the crowd, they should be similar to him. They were all here to set the stage in advance.

In other words, they were all competitors...

“Forget it, let’s not think too much. Let’s find a place to eat first.”

Gulp...

After confirming the examination venue, Shi Yu began to pay attention to his stomach.

He definitely didn’t have time to eat breakfast, so he might as well eat lunch now.

He held his cell phone and started to search for restaurants nearby through the food reviews. To be honest, Shi Yu really found a restaurant that looked impressive.

Halberd Eating Garden.

Upon seeing the name, Shi Yu felt that this place was not bad. It might even be a little trashy.

This was a national chain restaurant that mainly used transcendent creatures as ingredients to make fantasy-level food. It was spread all over nine first-level cities.

The head chefs were all food Tamers with professional strength and big bosses in the cooking world.

At the moment, this restaurant was the most popular. Shi Yu opened the comments and immediately knew the reason.

This was still a high-level battle restaurant. The restaurant was in the midst of an activity. As long as any Beast Tamer who participated in the vocation assessment passed the battle test in the restaurant, the meal would be on the house.

“It’s a fancy promotion.” When Shi Yu saw the rules, he immediately thought to himself that these guys were business masters.

He understood the rules.

Generally speaking, the restaurants welcomed the Beast Tamers who participated in the vocation assessment to eat.

After the meal, the restaurant would arrange for two guests to battle.

The winner of the battle was directly exempted.

The losing party only needed to pay their own expenses, and there was no need for additional payment.

From the looks of it, the store was at a huge disadvantage. Not only did they have to waive a single order, they also had to provide the venue. It was a discount activity that was beneficial to all the customers.

However, when Shi Yu saw the price of the food, who would believe that the store would lose money?

As long as enough people went, even if only half of them spent money, the restaurant would still make a killing and even become famous. This marketing method was worth learning for other restaurants, because in this way...

“If every restaurant is like this, won’t I be able to freeload every meal?”

Shi Yu was clearly very confident in his own strength. He headed straight for the restaurant.

He clearly knew that the restaurant was baiting, but who would think that they were being baited?

Moreover... Shi Yu didn't just do it for free.

"Eating is secondary. Why don't we take the opportunity to let Buggy battle?"

Shi Yu thought to himself that the vocation assessment was coming soon. Apart from fighting Eleven, Buggy had never fought other pets. Should he let it experience it in advance? Otherwise, Buggy would fail at the critical moment.

Chapter 106: Buggy's First Battle

Halberd Eating Garden was originally called Halberd Eating Restaurant. It was established by a legendary Beast Tamer.

It was said that when this legendary Beast Tamer was young, he accidentally entered a dangerous place and lost contact with the outside world. He lived alone in the wild for several years.

For the past few years, in order to fill his stomach, he and his pets could only hunt those wild creatures for survival.

Then, they ate wild food for several years.

He had eaten creatures from the transcendent level to the commander level.

As he ate, they killed their way through the wilderness. He successfully returned to human society.

After returning, this Beast Tamer seemed to have opened the door to a new world, summarizing a philosophy of life: "Combat and delicacies are more compatible." Halberd Eating Restaurant was born because of this.

He himself had also gone on the path of a gourmet Beast Tamer and never returned. In order to eat the taste of monarch-level creatures or even overlord-level creatures, he started to work hard in cultivation. In the end, he inexplicably became a legendary Beast Tamer in Dong Huang.

"This is the power of a foodie?"

Shi Yu browsed the introduction of Halberd Eating Garden on the Internet and was a little shocked.

Good lord.

It was too inspirational.

He just didn't know if this legendary Beast Tamer had tasted a dragon in the end...

Shi Yu arrived at the Ancient Capital's Halberd Eating Garden branch with the mood of worship.

This place was very large. The entire restaurant was built in a huge courtyard that could accommodate thousands of people.

Before entering, he could already see many people. As expected of a legendary Beast Tamer company, it looked very popular.

“Welcome, do you have an appointment?”

After Shi Yu entered the courtyard, a waiter in a suit welcomed him and asked.

“No.” After Shi Yu simply explained to the waiter that he was here to participate in the event, the waiter immediately understood. Then, he led Shi Yu to a single-person private room to eat.

Then, Shi Yu naturally ate a big meal. He ate very “nourishing” food.

He could only say that he understood everything.

Unfortunately, this was a restaurant targeted at Beast Tamers and didn’t provide food for pets. Otherwise, Shi Yu even wanted to call Eleven and Buggy out to eat together. In any case, the meal might be free later.

As the ingredients were all transcendent creatures and the taste was too delicious, Shi Yu alone spent a total of 60,000 yuan.

Actually, the price was alright, not even as expensive as a divine bean. However, this was also related to the fact that divine beans weren’t prepared for ordinary professional Beast Tamers. They were standard supplements for master-level Beast Tamers.

Shi Yu might be the first person to eat something so nutritious at the trainee stage...

After eating a pile of nourishing food, Shi Yu wiped his mouth and fell into deep thought.

Although after these supplements were cooked, they gave up part of their nutrition in pursuit of delicacies and didn’t have the natural supplements, it seemed to be alright.

If there were such events every day, he would come for a meal every time he finished adding points. Moreover, there would be free venues and sparring sessions. Wouldn’t that be beautiful?

“But here’s the problem again. Is it safe to let Buggy go? If it loses, it will be 60,000 yuan...” Shi Yu was stunned.

The peak battle power of the worm was equivalent to that of a low-level commander pet cub. It was still risky.

There shouldn’t be any lousy candidates who would dare to eat at such a place, right...

Forget it, forget it... It didn’t matter. If Buggy dared to lose, it could just let it work to repay its debts. Its ability to earn money was still better than Eleven’s.

After pressing the bell for the waiter, Shi Yu began to silently wait for the subsequent battle arrangements.

...

At the same time, in another private room.

Two boys of similar age were drinking drinks and waiting.

They are discussing a very important question.

“Cousin, who’s going to participate in the battle later?” A young man with a crew cut said.

Halberd Eating Restaurant’s activity this time supported multiple candidates eating together. When the time came, they just needed to send one representative to battle. There was no need for every candidate to battle.

The restaurant would match its opponent according to the amount of money the customer spent. In the end, no matter who won, the restaurant would not lose.

“The two of us are about the same. Actually, it’s the same for both of us. As long as we don’t encounter commander-type pets, aren’t we just killing randomly?” the buzz cut cousin said.

In the vocation assessment, there were still very few who could contract the cubs of racial creatures. They didn’t believe that they were so unlucky to have encountered it.

“That’s right. Then, I’ll go? But if I lose, you can’t blame me. We’ll split the meal 50-50,” the short-haired cousin said.

“Alright, alright,” the buzz cut cousin said. “But you have to be more serious. For the professional assessment, I’m a little tight on money now... Otherwise, I wouldn’t have come to such a place to be a gambler.”

The short-haired cousin: “It’s not a big problem, not a big problem. I shouldn’t lose.”

Not long later, a waiter in a suit entered the private room and said to the pair of cousins who were participating in the vocation assessment, “Sorry for the wait. I’ve already prepared a suitable opponent and venue for you.”

...

Ordinary restaurants definitely didn’t have the right to casually prepare a battlefield area. Halberd Eating Garden was relatively special. After all, the founder was a legendary Beast Tamer.

In Dong Huang, the legendary Beast Tamer was the highest battle power below the national guardian. They enjoyed special privileges everywhere.

From the chefs to the waiters, everyone in the Halberd Eating Garden was a Beast Tamer. It was also considered a restaurant with a very special style.

Next, under the lead of the waiter, the pair of cousins arrived at a battleground in the courtyard. It was extremely lively here. There were people fighting in every independent battleground. It seemed like they were all candidates who had come to participate in the vocation assessment to warm up.

“He’s our opponent?” After the short-haired brother was brought over by the waiter, he saw Shi Yu, who was leaning against the edge of the venue, browsing his cell phone on the isolation net.

“Yes,” the waiter said.

The buzz cut cousin stared at Shi Yu and felt that he looked a little familiar.

A moment later, he chuckled.

This smile immediately made the waiter a little puzzled, and also made the cousin who was about to fight beside him a little puzzled. At the same time, it also attracted Shi Yu's attention.

"What is it?" asked his cousin.

"I remember a happy thing," the buzz cut cousin whispered. "You're safe in this battle."

He finally remembered why Shi Yu looked familiar.

Back then, when he was visiting Ancient Capital University, he wanted to find a random person to fight and kill time. Then, he happened to find Shi Yu in front of him.

However, that battle could not be established in the end. The reason was very simple. At that time, Shi Yu was too lousy. He said that his pet was only at the ninth level of Awakening and had not even reached the transcendent level. When the buzz-cut cousin heard that, he lost interest and directly rolled his eyes and left.

The world was so small.

Fate was indescribably wonderful.

At a time like this, he liked rookies like Shi Yu a lot. After all, he could freeload. He had only awakened level-nine three months ago. Even if he broke through to the transcendent level three months later, how strong could Shi Yu be?

"This guy's smile is so annoying. Do I know him?"

Shi Yu looked at the two people the waiter brought and was a little stunned. He had completely forgotten that he had met the other party once.

His head didn't remember useless things. It was filled with pet information and the rich lady's cell phone number.

"Brother, how are you?" At this moment, the cousin who had been encouraged by his cousin walked forward and greeted Shi Yu.

Cousin knew him? He was a little more confident now. At the same time, he smiled.

"Hello." Shi Yu nodded. He was quite enthusiastic?

However, he didn't look very smart or like an expert. Buggy should be stable.

"Gentlemen, can we start the battle now? The battle rules are a one-on-one battle between pets," the waiter said.

Time was money. They didn't have time to let the guests talk too much. It was also because of this that the battle rules here had always been a battle between pets. This could avoid a lot of trouble and shorten the battle time.

“Sure,” Shi Yu and the straight hair boy said at the same time.

At this moment, as Shi Yu and the straight hair boy arrived at the two sides of the arena, the waiter also acted as the judge. The buzz cut cousin, who was watching by the side, touched his chin.

“Great, I can save some money again.”

Next, in the center of the arena, the waiter and judge quickly repeated the rules and left the arena to the two parties.

Shi Yu and the boy named Zhao Rui quickly summoned their battle pets at the same time!!

Hu hu hu!!!

The same gray summoning array represented that both of them were Beast Tamers who had reached level two in the Beast Taming Space.

A huge figure two meters tall appeared in front of Zhao Rui. This figure had a strong brown body. Its body was like a huge wrapped branch, and its whole body was covered in green vines.

Above its body, there were deep and empty yellow shining eyes and mouth, indicating that it wasn't as simple as an ordinary tree.

[Name]: Tree Spirit

[Attributes]: Wood

[Race Level]: High Transcendent

[Race Skill]: Wood Spike, Wood Whip, Absorption, Wood Shield

This was a common but very powerful plant-type pet.

The branches of the tree spirit were harder and stronger than steel bars, and it could be as agile as hands.

The penetration power of the wooden spikes could easily penetrate most metal.

Wood shield and absorption. One guaranteed the defense of the tree spirit, and the other guaranteed the continuation of the tree spirit by absorbing the nutrients of the opponent's body!

Like the Wings of Wind, the tree spirit was one of the few pets with excellent comprehensive qualities among transcendent races!

Moreover, it was obvious that this tree spirit's growth level had also reached the transcendent level. Under normal circumstances, it was very difficult to deal with.

“As long as the opponent isn't a fire-element pet.”

In the arena, Zhao Rui summoned the formation and kept looking at the pet Shi Yu had summoned.

Then, he fell into deep thought about life.

It wasn't just him. The waiter, judge, and Zhao Rui's older cousin also “Huh?”

“Ji ji, ji ji!!!”

In the small summoning array on Shi Yu’s side, a tiny caterpillar with a green furry body and innocent eyes crawled out. It had two yellow antennae on its head. It raised its head and looked at the tree spirit in front of it, smiling.

It was the disgrace of the pet generation, the Green Silkworm!

At this moment, Buggy looked at the tree spirit excitedly. Good, this time, it countered the other party!

Birds countered bugs, while bugs countered plants. There shouldn’t be a problem, right?

Although that was the case, Zhao Rui and the tree spirit did not have the slightest awareness of being countered. They immediately felt depressed.

“Are you f*cking serious??” Zhao Rui was at a loss.

As expected of my cousin, he really didn’t lie to me. His opponent doesn’t look very smart, so this wave was stable.

“Please be more serious,” Shi Yu said. “You guys attack first.”

Seeing that his opponent seemed to be looking down on Buggy, Shi Yu knew that the bug’s deception was too strong, stronger than the cute form of an eleven-year-old cub.

This couldn’t be helped...

“Damn.” Zhao Rui’s cousin was also stunned. Although he believed when his cousin said it was stable, he didn’t expect things to be so stable. What was Shi Yu doing? Doing charity?

It wasn’t that he despised the Green Silkworm, but at least let it evolve before coming. Even if it was the most basic evolution Wind Crystal Butterfly, he wouldn’t have such a reaction.

An awkward cold wind blew... raising dust.

“Grab him and be gentle. Just throw him out of the arena.”

In the arena, Zhao Rui gave the order with a dark expression. He was also afraid that the tree spirit would smash the green worm into meat paste with a wooden whip.

The command was very gentle. He was a kind person.

“Ah!!!” The tree spirit cried out in difficulty. Then, an arm-thick brown branch stretched out from its body and grabbed the green worm opposite it.

It was a very simple whipping, but it shouldn’t be a problem. It was simply a waste of talent to deal with the green worm.

However, in the face of such an attack, Buggy on the other side showed a dissatisfied expression.

“Ji!” Can you be more serious?

Usually, Buggy fought with Eleven, who didn’t lose to the cubs of monarchs. It was clearly dissatisfied with this kind of attack.

Swoosh!

It spat out a crystalline white thread from its mouth. It didn't even use the spatial nature to make the worm silk transparent as it spat it out.

What?

The green worm's actions stunned everyone. Worm silk versus wooden whip?

Good lord, was it the same level?

However, before everyone could be stunned for long, their expressions froze in the next second.

The worm silk spat out by the Green Silkworm immediately bent slightly from the middle when it approached the wooden whip wielded by the tree spirit. It was like a dancing sharp blade, waving and emitting a few whooshing sounds.

"Ah!!!" Immediately after, the tree spirit suddenly shouted. Its wooden whip directly fell to the ground one by one, as if it had encountered an extremely sharp weapon cutting into it!

The full-level worm silk that had been added 256 times could even leave a mark on Eleven's transcendent Level Hardening, let alone just cutting the small branch like this.

In a round of confrontation, Buggy directly displayed his strength!

Shi Yu and Buggy weren't surprised, but as this scene happened, Zhao Rui and the others were directly stunned.

"How is this possible!"

Whoosh!!!

This wasn't the end. After cutting through the opponent's wooden whip, Buggy's gaze focused as he continued to control the worm silk to shoot.

"Ah!!!" At this moment, tree sap flowed out of the tree spirit's forehead. It was drenched in sweat. It sensed the pressure and quickly controlled the wooden whip to smash.

Swoosh!

However, the instant the thick branch and the thin worm silk collided, the outcome was still the same as before. In just an instant, the worm silk slashed out like the sharpest and toughest weapon, splitting the wooden whip into pieces!

At that moment, Zhao Rui's expression nearly exploded, as if he had seen something that shattered his values.

This was a f*cking green worm? This was a f*cking worm silk? What was going on!?

Wasn't his cousin hinting that the opponent was very weak??? The pet race he sent out was indeed very weak, but this strength was unscientific!!

The buzz cut cousin was also shocked. What was with this green worm? He couldn't understand it at all!

As for the waiter, his mouth was slightly agape from the start to the end. He could not understand the performance of the green worm.

“Wood Shield!”

At this moment, seeing that the Green Silkworm’s worm silk was continuing to attack the tree spirit like a life-threatening rope, the veins on Zhao Rui’s forehead popped up. Wood-element natural fluctuations appeared on his body, and a strong wind swept up around him.

At the same time, the quality of the energy in the tree spirit’s body increased. After being enhanced by the Beast Tamer’s wood-element strengthening talent, its battle power increased greatly. As its body retreated, a row of wooden pillars bent in front of it, forming half an arched wall to protect itself...

Swoosh!

This time, the worm silk only left a white scratch on the wooden shield and did not successfully break through the defense.

Zhao Rui was delighted. That’s it?

Unfortunately, he didn’t last long. In the next moment, his expression collapsed again, and he put on the painful mask.

The worm silk could only leave white marks on the wooden shield. This did not mean that the wood shield’s defense was high. It was also because the green worm’s current worm silk was not at its strongest state!

Not only did it not activate all the spatial properties of the worm silk, but there were also relatively few worm silk at the moment. At the same time, it had yet to use illusions to manifest its stronger self in the dream realm!

“Ji!”

At this moment, in the face of a stronger opponent, the worm quickly retracted its worm silk. At the same time, dozens of almost transparent thin silk threads shot out of its mouth. Then, these silk threads were wrapped together, forming a thick pillar like a wooden whip.

The head of the thread pillar was wrapped like a spear. At this moment, under the control of the Green Silkworm, it shot out at a high speed!

At that moment, although everyone could not see the insect silk clearly due to the special nature of the worm silk, the sudden sound of breaking through the air and the action of the green worm spitting out the worm silk directly made everyone’s expression change.

This time, the destructive power of the worm silk was so strong that it directly penetrated the wood shield with a bang. After the wood shield shattered, the thread pillar pierced through the tree spirit’s body. In the next moment, the tree spirit’s body slightly caved in, and it directly suffered a huge impact. Its pupils constricted, and its two-meter-tall huge body was directly flipped over. It scraped the ground and slid for three to four meters before stopping!

“Ji!” In Normal State, the worm with full battle power directly destroyed the enemy’s defense unreasonably.

The expressions of the cousins froze and completely collapsed. They felt that they were dreaming!

“You lost. The Green Silkworm’s worm silk has already pierced into the tree spirit’s body. Now, it can start destroying the tree spirit’s body from the inside with a thought.”

At the same time, Shi Yu spoke directly. Because the other party had held back at the start, he also let Buggy hold back a little. After all, there was still an assessment in a few days. It would be bad if the tree spirit was injured too badly.

It was just a meal. It was better to be friendly.

“Ah...” At this moment, just as Tong Yu had said, the tree spirit on the ground didn’t dare to move at all. Although it still had the strength to fight, it could clearly feel that there was a fatal killing weapon flowing in its body.

There was another special quality to the max-level worm silk. Even after leaving the Green silkworm’s body, it could still be controlled by the Green silkworm for a long time. At this moment, these transparent worm silk were like little worms, constantly waiting for their master’s attack orders in the tree spirit’s body.

This move was very difficult to defend against. As long as one was stabbed in any part of the body by the silkworm’s thread, it was equivalent to being sentenced to death by Shi Yu.

With the transparent nature of the skill, it was not much of a problem to say that Worm was the strongest killer of the extraordinary race.

“1...” At this moment, Zhao Rui’s expression was unable to accept it. This was because he had received the tree spirit’s feedback and knew that Shi Yu wasn’t lying!

Because of this, his values were almost shattered and he couldn’t understand at all.

Green silkworm... Green silkworm was using the worm silk to suppress the transcendent-level tree spirit??

Was this what his cousin meant by “this wave is stable”?

Stable his ass, liar, refund!

But clearly, even his cousin didn’t expect this situation at this time.

Including the waiter, the three of them were extremely shocked. In the end, Zhao Rui’s voice was almost hoarse. He said with a trembling voice, “Transcendent-level Green silkworm, transcendent-level silkworm silk?”

“You know your stuff.” Shi Yu nodded. “Not bad.”

F*ck! What was not bad! This didn’t make sense!

As Shi Yu confirmed it, Zhao Rui and the others did not feel the slightest joy of being enlightened. Instead, they felt that it was even more ridiculous!!

Was there really a f*cking person who cultivated the Green silkworm to the transcendent level?? And even trained the worm silk to the transcendent level??

This guy had a problem—

The three of them were shocked to the extreme. Fortunately, no one here noticed. Otherwise, this place would only be more sensational. Putting aside whether the Green Silkworm could reach the transcendent level, just based on the fact that it had mastered the transcendent level worm silk, it could be determined that this Green Silkworm almost had the potential of a monarch race after evolution!!

This had already been proven!

The cousins were dumbfounded. They couldn't understand why such a candidate had appeared. This kind of pet, this kind of proficiency, was completely impossible to understand!

“Ah!!!” The tree spirit reminded its Beast Tamer to stop wasting time. Quickly admit defeat. Its body was so itchy and in pain.

It swore never to fight with bugs again. It was countered this time...

“I...” Zhao Rui's face was in a mess. It could be imagined that he was also a genius from a certain place, an influential figure. He wasn't necessarily worse than the group of people who competed with Shi Yu for the Evolution Sacred Spring back then. However, it was such a genius who had already seen the dangers of society before participating in the vocation assessment.

In the boundless world, there were all kinds of Beast Tamers and pets.

Zhao Rui was forced to admit defeat because the life and death of the tree spirit was indeed in Shi Yu's hands.

As soon as he finished speaking, his heart skipped a beat.

Cousin, this really isn't my fault. You should be able to understand... It was clear that there's something wrong with this Beast Tamer and pet!

“Heh heh...” Shi Yu chuckled. Although the opponent was weak and the battle between the bugs would definitely not be enjoyable, it was good as long as it was free...

“Ji...”

At this moment, Buggy was indeed a little dissatisfied. It swept a glance at the crowd with stunned faces and silently turned around. There wasn't a single person who could fight, and it actually didn't even force out its dream form. It was boring. If the opponent in the vocation assessment was only at this level, it felt that it could destroy everything without his leader stepping up?

Chapter 107: I'm Too Excellent

After showing off, Shi Yu left in satisfaction.

At that moment, Buggy was very excited. He felt that one battle wasn't enough, and even wanted to fight a second one.

"Why don't we have another meal tonight?"

Shi Yu had some crooked ideas, but soon, he was very disappointed in this restaurant.

Because the event rules said that each person was limited to one event... Damn it.

In any case, the restaurant guys couldn't lose out either, and they even f*cking limited it... This is very lacking in trust. Where's the most basic trust between people?

"Alright, go back to the bead and fight Eleven," Shi Yu said to Buggy on his shoulder.

Buggy's face fell.

Did it say it wanted to fight?

It wanted to torture noobs!

What kind of battle experience was there to fight with leader?

At the moment, the strength of the worm was very good. After the worm silk was raised to the maximum level, the effect was simply a qualitative change. Just the worm silk alone could make it kill a large number of extraordinary creatures of the same level.

If it used those two proficient high-level skills, at the same level of growth, it wouldn't be impossible for it to battle commander species creatures!

Therefore, it was not a random claim that Buggy could kill most geniuses in second-tier cities.

"Usually, geniuses will be left for Buggy, while monster geniuses are left for Eleven. It's been arranged," Shi Yu analyzed.

...

In the afternoon, Shi Yu couldn't be bothered to return to the research institute.

As he couldn't think of where to go for the time being, he simply found an empty place and entered the ruins bead to do the papers.

At the last minute, he had to sharpen his weapons, his skills. Even if it wasn't fast, it was light. If he could suppress one more thing, it would be another.

After Shi Yu entered the ruins space, there were no traces left in the outside world. But, the disadvantage was that if Shi Yu wanted to go out, he could only go out on the spot.

When they went out later, would there be anyone around? It would be more difficult to deal with, but it wasn't a big problem. They could release the bug to scout the situation first. No one could see it.

In the ruins bead, after Shi Yu and Buggy entered, Buggy started to report the good news of their victory just now to Eleven.

“Wuu?” “Ji!” “Wuu!” “Ji!”

Eleven’s blood boiled, and Shi Yu’s face darkened. Good lord, it was just a crushing battle, but it made Buggy describe it as a world-shaking battle.

The worm silk was like a vast white ocean. During the battle, there were gunshots and saber shadows, and the drums and horns sounded together. It was a rather spectacular sight. The worm opened its mouth and kept talking.

The enemy wasn’t simple either. With a clap of its hands, the tree realm descended, but unfortunately, it was destroyed by it with irresistible force!

Shi Yu rolled his eyes.

Who had it learned this ability from?

Oh, Shi Yu knew. Cell phone.

In order to allow Eleven and Buggy to develop completely, Shi Yu taught Eleven and Buggy simple literacy. Eleven was still alright. There weren’t many changes. It did the questions sincerely, but Buggy liked to hug its old cell phone and browse this and that all day... Especially the fantasy advertisements that popped up on the webpage. It was very easy to immerse itself in them.

None of that mattered. What made Shi Yu speechless was that Eleven actually listened attentively. It believed it!!

Sh*t, with this intelligence, why did it feel like the world was going to be overtaken by bugs very soon? Cell phones even had the ability to develop intelligence?

“This can’t go on. Buggy even knows to learn idioms to brag. Eleven just likes to do stupid stuff like take a selfie with the cell phone and completely won’t use it in the right place.”

“Looks like I have to let Eleven come into contact with cell phones more. Maybe it can become smarter.”

After Shi Yu took out “Three Years Simulation for the Five Job Examination”, he called Eleven and Buggy over.

Eleven and Buggy stood in front of Shi Yu obediently.

Because they knew that as long as they dared to disobey Shi Yu, they would suffer.

When other Beast Tamers threatened their pets, the punishment would be doubled and they would not be allowed to eat. Now, Shi Yu had a new trick.

Eleven was still happy if it was punishment training. Buggy’s training was to sleep, so it was not a threat.

Punishing three meals would affect the development of the pet. Shi Yu felt that it was a huge loss.

Therefore, Shi Yu understood.

In the future, the punishment measure would be to do the papers.

This method was very useful. Both Eleven and Buggy hated doing papers and didn’t like it very much.

But the key was that this wasn't useless. For example, Buggy was already familiar with memorizing the attribute list and counters.

There was also Eleven, who could already recognize the names of thousands of pets.

This made the Beast Tamer feel relieved. Only Shi Yu could increase his points and not care about the amount of pet training. Otherwise, which proper Beast Tamer would let their pet do questions all day long? The time for pet training and rest was not enough.

"Don't do the papers today. I'll give you some homework on Initiating Intelligence."

Shi Yu smiled at Eleven and Buggy.

"Huh?" "Ji?"

Eleven and Buggy were very happy to hear that they didn't have to do the papers anymore.

However, what the hell was this little homework for initiating intelligence? Did Shi Yu think they were stupid?

The two pets looked at Shi Yu with intelligence.

Eleven, Buggy...

"Buggy, your homework is very simple. You have more than ten worm silk usage skills now, right?"

"Use your idiom talent more and give each skill a high, short, and appropriate skill name. When the time comes, I can give commands."

Buggy was stunned and then pleasantly surprised. This homework was alright, it didn't reject it!

"Eleven, you..."

Eleven had to be heavily arranged!

"From today onwards, you will learn acting skills. You have to familiarize yourself with 'The Self-Cultivation of an Actor'. Don't you like to take photos? Next, when facing the camera, you have to learn to control your gaze, expression, and every move! It's best if your acting skills reach the point where outsiders can't see through your true thoughts."

"From today onwards, you will learn acting skills. You have to familiarize yourself with 'The Self-Cultivation of an Actor'. Don't you like to take photos? Next, when facing the camera, you have to learn to control your gaze, expression, and every move! It's best if your acting skills reach the point where outsiders can't see through your true thoughts."

Eleven:???

Shi Yu chuckled. A pet with high acting skills would definitely not be too stupid. This was also very training in intelligence. Most importantly, after Eleven learned the skill of Inner Power in the future, it would need to use acting skills.

Under the restrained state of the skill, the basic requirement was to shrink all power and make oneself ordinary. However, this was only the foundation. How was just restrained power enough? Hiding one's form, expression, and emotions was the true success of restraint.

This was a test of acting skills...

"You have to remember that from today onwards, you are a small iron-eating beast cub that is a few months old and 30 to 40 centimeters tall!" Shi Yu looked at Eleven, scaring Eleven into shrinking to Shi Yu's designated size.

It understood... In essence, it was to hide their trump cards and use them one by one at the critical moment.

Let the enemy see where their limit was at a glance, but never see where their real limit was .jpg.

"You can do it!"

After arranging the homework for Eleven and Buggy, Shi Yu was satisfied and started doing the questions himself.

...

The next day.

Outside the examination venue of the Lotus Lake Arena, there was a sea of people.

Even if Shi Yu slept on the ground outside the examination hall and had eleven alarm clocks, he could only line up after waking up.

Good heavens, he was already sleeping not far from the examination hall, but there was actually someone earlier than him?

Don't you all need to sleep!?

"F*ck."

Just as Shi Yu was marveling at the enthusiasm of these people, a vulgar voice suddenly came from the side.

"Eh." Shi Yu turned around and was immediately delighted.

Weren't they the Beast Tamer Brothers from yesterday?

"Morning, you guys are also in this examination hall."

"Morning..." The straight hair cousin's name was Zhao Rui, the cousin who lost to Shi Yu. The cousin who had previously invited Shi Yu to battle and despised Shi Yu for being too weak was called Ding Yao. When the two of them saw Shi Yu, they felt that the early morning was not a good sign.

After all, the meal yesterday was basically a guaranteed 60,000 yuan for free. In the end, when they encountered Shi Yu, not only were they dealt a blow, but they also spent 30,000 yuan each. If they had known, they wouldn't have gone to eat there yesterday...

“Don’t worry, today is the basic test. You guys will be fine,” Shi Yu comforted.

The two of them were speechless. Of course they knew that it was fine with them.

The so-called basic test was for Beast Tamers to enter the designated location and summon their own pet.

Through the color of the Beast Tamer’s summoning array, the examiner could determine whether the Beast Tamer’s level had reached the standard.

Then, there would be a corresponding machine to test the pet’s energy. The pet’s energy level would reach the transcendent level qualified.

These were all the old assessments over the years. There was nothing new.

“Your Green Silkworm... aren’t you going to have it evolve?” Although they felt that Shi Yu wasn’t human, the brothers were very curious about him.

The transcendent-level Green silkworm even mastered the transcendent level worm silk!

Has this ever been achieved by a Beast Tamer?

Currently, in Dong Huang, the only Green silkworm that had mastered the transcendent of the worm silk had already evolved into the monarch species Ice Phoenix Moth. However, this one had not reached the transcendent level in the form of the Green silkworm.

The two of them had been discussing it the whole night yesterday, but they still didn’t understand where this Shi Yu came from. Where did this big boss come from? Where did this second-generation heir come from?

If he didn’t have a legendary Beast Tamer father, how could he have such a green worm?

“There’s no hurry,” Shi Yu said. Wasn’t he still unprepared?

Buggy wasn’t anxious yet. By the time it went all out, the world would tremble!

What the f*ck was this person saying, there was no hurry? Bringing a transcendent-level Green Silkworm to attack people randomly was ridiculous!

Zhao Rui: “Holy shit, I’ve already imagined the shocked expressions of the surrounding examiners and candidates when you send your pet out later and the machine detects that it meets the transcendent standard.”

The examiner would definitely be dumbfounded by the transcendent-level Green Silkworm!

“This...” Shi Yu was stunned. Speaking of which, during the test later, he only needed to test the level of one pet.

Which one should he send?

If he remembered correctly, the examination machine seemed to be able to detect the specific energy level. It would be specific to the level. It was very advanced.

From a certain point of view, it might be similar to the Battle Detector in Dragon Ball.

Of course, it was only to test the amount of energy in the body. This was only one of the criteria to determine the strength of a pet. In a real battle, the accompanying skills, skill level, and proficiency were also very important.

Shi Yu was conflicted. Buggy and Eleven seemed to be pretty ruthless. The former's race was too shocking, while the latter, because the foundation laid down was too strong, after the transcendent transformation, the total energy in its body seemed to have reached a very terrifying level... Even if one didn't consider the skill proficiency, it would definitely be a wonder among transcendent pets.

Well, it was indeed too outstanding.

Shi Yu had no intention of hiding his abilities, nor was there a need to. After all, the assessment would show his strength sooner or later. He was conflicted about whether he could measure both of them at the same time. He wanted to know the specific energy values of Eleven and Buggy. His lousy cell phone could only detect big levels and could not accurately detect detailed energy conditions. As expected, he still had to change his cell phone!

Chapter 108: The Job Examination Begins

Union calendar, January 1, 178, 7 a.m.

In Dong Huang, Ancient Capital City's examination venue of the Lotus Lake Arena, the door was finally opened. The candidates rushed in noisily.

The scene was bustling with activity. Most of the people present were young, and there were also some middle-aged men who came to give it a try for their academic degrees and dreams.

"Ah..." At that moment, the buzz cut cousin looked at Shi Yu who had left and felt an itch in his heart.

It was such a fucking pity.

They were not in the same examination venue as Shi Yu. They might not be able to see the scene of Shi Yu's green worm showing off and shocking the examiners.

He kept feeling that he had lost 100 million yuan.

At this moment, Shi Yu looked at the venue displayed on the admission ticket and walked along with the crowd and signs.

"This feeling is really similar to the college entrance examination..."

"Unfortunately, apart from the written test, we came prepared this time!"

Shi Yu chuckled.

Lotus Lake Arena, exam venue No. 10.

Soon, Shi Yu arrived.

To be honest, he felt that something was wrong, because it wasn't Arena 11. This was a little interesting. The lucky number was gone just like that?

...

The basic test was tested together at many examination venues. Only in this way could the candidates guarantee that they would finish the test in the shortest time possible.

In the morning, there was the field basic test, and in the afternoon, there was the indoor written test. The assessment efficiency was very high.

In a short day, he could complete two assessments. Moreover, the contents of the written test were all judged by the machine, and the results could be announced the next day.

On the day the results were announced, the candidate rested for a day. Then, it was the third assessment!

At this moment, Shi Yu and the other 79 candidates were standing around the No. 10 examination venue, surrounding the blockade of a huge testing table.

This detector wasn't built directly here, but it was transported here. It was very similar to a boxing ring, but it was bigger. It was less than a meter tall, but it was ten meters in length and width. It was an energy detector, and its precision was very high.

Standing on it, one could not only detect the pet's energy data, but also the pet's race, height, weight, physical development, and age.

At the moment, three tables were placed inside the blockade facing the testing table. Behind the table, two men and one woman were controlling the computer alone. The two of them were reading the information with calm expressions.

"Yet another vocation assessment." The female examiner looked up at the candidates who had almost arrived outside the blockade and sighed.

Every year, there were people who were happy and people who were sad. I wonder if people will take things too hard this year...

"I'm a little curious about the quality of the candidates this year."

"Needless to say, it will definitely get better each year."

The other two male examiners chuckled.

They were all professional Beast Tamers of the Beast Tamer Association in Ancient Capital. Every year, the basic-level examiners were randomly transferred from professional Beast Tamers.

Although it was only a few days, the treatment was very good.

At this moment, seeing that it was about time, the middle-aged female examiner in a professional black skirt stood up and opened the blockade, saying, "Alright, quieten down."

She looked at everyone with a dignified gaze.

“I’m the main examiner for your basic test, Zhuang Ping. Next, I’ll be in charge of your basic test. This test is very simple. When you hear your name later, you just have to go to the testing table and summon your own pet.”

“There’s no ranking for this basic test. You’ll pass if you cross the line. But the pets you summon might affect the questions of your wilderness assessment according to their race and attributes. So, if you have many pets, think about which one you should summon first.”

“The third assessment is the Wilderness Trial. I believe you have already understood it. At that time, you will be thrown into a wilderness area. Then, you will be asked to survive there for a period of time. During the survival period, I will arrange some assessment missions for each of you, either to hunt a certain ferocious beast or to take some resources.”

“The mission arranged will, to a certain extent, counter the pets you send for testing next. Do you understand?”

The 80 prospective Beast Tamers below the stage listened quietly and nodded in unison.

He understood.

For example, if he sent a fire-element Moon Flame Beast to participate in the basic test now, in the third stage, the mission would let the candidate deal with water-elemental ferocious beasts and adopt water-elemental resources.

He was always making things difficult for others.

Although it was difficult, the Beast Tamer Association didn’t hide this rule. They directly reminded the candidate on the surface.

Most candidates had contracted two pets. If both pets reached the transcendent level, in a sense, this also gave the candidates the right to choose the mission type in the third assessment.

The candidates could completely use this rule to make their third assessment easier.

After all, they could counter one pet, but could they restrain both?

Of course, for candidates who contracted one pet or only had one pet that had reached the transcendent level, the rules were not very friendly...

...

“Time’s up. Then, we’ll start the basic test. The candidate whose name is mentioned, do as I said before. Move faster.”

As soon as the examiner Zhuang Ping finished speaking, a male examiner holding a register cleared his throat and called out by name, “Examination number 1439, He Yu.”

The first candidate whose name was read was a girl in a ponytail who wasn’t even 20 years old. When she heard her name, her heart skipped a beat. She raised her hand nervously and shouted, “I’m here!”

“Go up and test.” Zhuang Ping also held a register and nodded.

She looked at the information in her hand. On it was recorded the photo, name, age, gender, and identity of this girl named He Yu...

Under the full attention of the audience, the first candidate, He Yu, jogged up to the testing table. The moment she stepped on the testing table, the glass-like venue immediately lit up, scaring the little girl.

But soon, she stabilized her emotions and carefully looked at the examiner.

“You can directly summon your pet after going up,” Zhuang Ping said.

“Alright.” The girl nodded and took a deep breath. In the next second, not far in front of her, a huge gray array that was flickering with countless light spots like a star map appeared in mid-air.

Right on the heels of that, a water-like ripple appeared on the surface of the formation. A cute little creature in a standing posture, light blue body, clear blue eyes, purple eyes, and appearance similar to a flying Momonga floated out of the summoning array!

< Name > Super Flying Mouse

[Attributes]: Spirit

[Race Level]: High Transcendent

[Race Skill]: Psychic Wave, Clone, Barrier

It was a relatively rare spiritual pet!

As everyone looked at the super flying rat, the next moment, the monitoring station’s automatic voice broadcasted the test situation.

“Race name, super flying rat.”

“Race level, high-level transcendent level.”

“Level of growth, transcendent level.”

“Energy value, 599 points.”

After the voice broadcast was completed, the girl, He Yu, blushed and clenched her fist excitedly. Good, not bad!

Below, a small number of people had blank expressions. Most of them nodded secretly. Obviously, not everyone knew what this value represented.

At this moment, the examiner in front of the computer also received other more detailed data of the super flying rat. Then, he seriously uploaded it. The examiner who called out its name began to record the paper information.

As for the examiner, Zhuang Ping, she added,

“Energy value represents the amount of energy in the pet’s body. The energy in the body of a pet in the Awakening Stage is basically within 100 points. As for the transcendent level standard this time, it’s 500

points. This value largely determines whether the pet can use high-level skills and whether it can use skills multiple times. You can use it as a reference to determine the strength of your pet.”

After the pet’s growth level reached the transcendent level, it did not undergo the many awakening transformations like during the Awakening Stage. Its strength would not undergo a qualitative change at a certain point. Instead, it had to slowly accumulate.

This was because pets of this level had already passed the stage of rapid growth. Their racial skills had basically been awakened.

Next, there was only this big level in the entire transcendent level. There was no small level division.

As for the next growth and transformation of the pet, that would have to wait until the commander level.

At this time, the pet’s strength would undergo a relatively large qualitative change. The pet could even release energy, solidify, and condense energy crystals themselves!!

In the wild, some commander rank creatures relied on this method to nurture their clansmen. The difference in strength between a group with a commander rank creature and a group without a commander rank creature was very obvious!

...

“Examination number 1440, Jin Fei.”

...

“Race name, Shadow Leopard.”

“Race level, high-level transcendent.”

“Level of growth, transcendent level.”

“Energy value, 761 points.”

...

“Examination number 1441, Ji Yuan.”

...

“Race name, Wind Gathering Vine.”

“Race level, medium transcendent.”

“Level of growth, transcendent level.”

“Energy value, 524 points.”

...

Then, candidates were called names one after another and went on stage to test.

However, the testing segment was basically very ordinary. There were no explosive points.

Until...

“Examination number 1461, Bear Star.”

“Race name, Thunder Lion.”

“Race level, low class commander.”

“Level of growth, transcendent level.”

“Energy value, 1214 points.”

At this moment, the calm atmosphere of the basic testing segment was directly broken.

“Holy shit, it went over 1,000???”

“F*ck, it’s twice as much as my Earth Crystal Butterfly...”

“It’s ridiculous. The commander races are awesome...”

Everyone looked at the young man on the testing table and the golden lightning lion beside him, and they were all shocked.

Low class commander species, Thunder Lion!

This energy value almost completely destroyed the pets of the previous examinees!

“Roar...” On the examination table, the Thunder Lion growled and enjoyed the feeling of being watched with the Beast Tamer.

The Beast Tamer named Xiong Xing had a calm expression but was abnormally satisfied in his heart.

He, the center of attention!

“Not bad.” The three examiners nodded silently in the face of the first candidate who broke through a thousand, but they didn’t say much.

At the transcendent level, the battle power of the pet was actually the pet’s race, skills, and self-training situation.

Through daily training, pets could slowly increase their upper limit of energy and increase their skill proficiency. In battle, this was the competition.

Among them, high-level pets definitely had natural advantages. Their upper limit of physical fitness was naturally higher than low-level pets. This couldn’t be helped.

It was normal for pets with high races to have high energy levels.

But this didn’t mean anything.

As long as the energy difference between extraordinary creatures wasn’t too great, this difference could be made up for.

If the skill proficiency of high-level pets was not high, they could not actually use their energy advantage.

On the contrary, if a low-level pet trained one skill and combination skill to a very proficient level and could instantly explode with all its energy, it wouldn't be much weaker.

Although the pet's energy level reflected the pet's strength to a certain extent, the key was still the performance of the skill that specificized energy.

These three examiners were all high-level Beast Tamers, so they naturally wouldn't be as shocked as the candidates.

What a joke. They were just a group of trainee vocation candidates. Even if they didn't need to test their pets, it was within their judgment. This was experience!

At this moment, Shi Yu watched silently among the candidates.

It seemed like it was going to be his turn soon?

He wondered how much Eleven's specific energy level could reach...

Although its race wasn't high, none of the candidates who had summoned middle-level Transcendent pets had an energy value above 700, Eleven was clearly not ordinary...

Not only had the evolution holy spring improved his physical fitness once, but the feedback brought by the hardening of the transcendent-level racial skill and the feedback brought by a bunch of external racial skills could increase the upper limit of his energy...

He was very curious.

"Examination number 1464, Shi Yu."

As Shi Yu thought about it, it was indeed his turn.

At this moment, the first candidate to break through a thousand had just appeared. The surrounding candidates were still in a state of agitation.

It felt insipid, as if all the limelight had been suppressed.

F*ck, he had contracted a commander species creature at this stage. He was rich and willful.

Next, Shi Yu went on stage.

The male candidate was still alright. He only took a silent look at Shi Yu and lost interest.

Shi Yu, who was wearing an Iron-eating Beast short-sleeved shirt, was too ordinary. It was obvious that he wasn't very impressive.

"The pet's an Iron-eating beast, right?"

Otherwise, which normal boy would wear an Iron-eating Beast short-sleeved shirt!

At this moment, the female candidates were evaluating Shi Yu's looks in their hearts.

"There's finally a more handsome candidate."

Just like that, Shi Yu boarded the testing table under the gazes of the candidates and three examiners around venue 10.

“Summon your pet,” the examiner Zhuang Ping said.

On the examination table, Shi Yu nodded. In the end, he decided to summon Eleven.

The transcendent-level worm was too ridiculous. It was better not to agitate everyone. Low profile, low profile.

“Eleven.”

Shi Yu communicated with Eleven, who had been waiting for a long time in the Beast Taming Space.

In the next moment, a gray summoning array appeared on the ground in front of him.

Under the lingering light, Eleven, who was more than a meter tall, appeared in the arena.

The one-meter-tall Little Iron Eating Beast clearly hadn't reached adulthood yet. Its gaze was firm as it stood on the field with its fat stall. Its soft black and white hair fluttered with the breeze. From the bottom angle, it was very perfect.

“It's indeed an Iron-eating Beast...”

However, although it was perfect, the race of the iron-eating beasts completely hit the predictions of the other candidates.

The hint of Shi Yu's clothes was too obvious!

Next, the middle-level iron-eating beasts wouldn't have much energy even if they reached the transcendent level.

About 550?

The candidates made their judgment.

Forget about candidates, even the three examiners, out of boredom, also estimated after taking a glance.

At this moment.

The monitoring station automatically broadcasted Eleven's energy situation...

“Race name, Iron-eating Beast.”

“Race level, medium transcendent.”

“Level of growth, transcendent level.”

“Energy value, 3186 points.”

Energy Points, 3186 points!!

At this moment, the entire place suddenly fell silent.

Everyone's pupils dilated slightly. Of the two male examiners in charge of recording, one's hand was still on the keyboard, while the other's pen stabbed heavily on the paper with rich expressions.

It looked like love.

...

There were only gasps around.

3186??

Was he sure it wasn't 586? Not 1186? Instead, 3186?!

This number was a little ridiculous!

For a moment, everyone present couldn't think straight.

The sound of the detection counter echoed in everyone's ears, and their mouths were slightly open.

How was that possible!

What went wrong!

One had to know that the energy value of a pet that was commander level just now was only 1214!

How could a middle-level Iron-eating Beast have this number?

At this moment, the three examiners were even more shocked than the candidates.

This was because they knew that normally speaking, the upper limit of the energy level of a transcendent commander race was only 3,000 points...

The value of this iron-eating beast was completely not something a creature of a medium-level transcendent race should have!

On the contrary, even if it was a young monarch species, after breaking through to the transcendent level, it had to go through a certain amount of training to reach it!

In short, how was this value possible—this was too unscientific!

The two male examiners paused for a second.

The examiner, Zhuang Ping, looked at the calm Shi Yu and the Little Iron Eating Beast on the testing table in disbelief.

They... weren't surprised at all??

Could it be that he had already expected this value?

The main examiner was silent, unable to understand.

"Age, not even two years old?"

At the same time, a male examiner was flabbergasted as he looked at the other detailed data on the iron-eating beast on the computer. He was shocked again.

F*ck, did it have to be so ridiculous? Even if it had started raining in the womb, it couldn't be that fast, right? Moreover, it was an Iron-eating Beast famous for its laziness!

At this moment, after the sudden silence in venue 10, there was no sign of recovery.

Around the testing table, regardless of whether they had tested it or not, all of them widened their eyes.

Especially that Beast Tamer of the Thunder Lion, he was a little dizzy and felt a little stunned.

With this comparison, why did it feel that the Thunder Lion was weak?

Was this really an Iron-eating Beast? And not a young monarch wearing an Iron-eating Beast coat?

"Is it done?"

On the testing stage, Shi Yu asked.

Eleven was indeed still fierce...

"It... It's done." Below, the main examiner, Zhuang Ping, took a deep breath and tried to memorize Shi Yu's appearance.

At the same time, she judged in her heart that after Shi Yu's basic test information was transmitted, he would probably receive a lot of attention.

This was also the goal of the first test. It was to allow the Beast Tamer Association to pay attention to candidates with potential in advance!

At this moment, she didn't think that the machine was broken or that Shi Yu and the others had cheated, because it was absolutely impossible for there to be a problem with this machine. Even if the pet used enhancement skills, even if the pet used shrinking skills, even if the pet's condition was poor, this machine could perfectly detect the real situation of the pet.

This was specially made for the vocation assessment and had been modified by countless Mechanics... Therefore, this value was probably real.

Moreover, judging from the calm looks of Shi Yu and his pet, it could be seen that this value was probably the true energy value of this Iron-eating Beast!

This was clearly an Iron-eating Beast with a mid-level transcendent race, but it was comparable to a monarch-level pet cub!!

Ridiculous!!!

If it wasn't a racial mutation, then this Beast Tamer named Shi Yu would definitely have invested an astronomical amount of resources into this Iron-eating Beast to strengthen its potential!!

This was the only possibility.

Although that was the case, the three high-level Beast Tamer examiners still couldn't calm down for a long time. They weren't as calm and collected as before at all, because this had indeed broken their understanding.

Even Lin Hongnian, a master-level Beast Tamer who specialized in Iron-eating Beasts, had always felt that Shi Yu's Little Iron-eating Beast was ridiculous... Let alone these guys. Even after his Iron-eating Beast had evolved, he still felt that it was lacking compared to Eleven...

"Come back, Eleven." At the moment, Shi Yu roughly understood Eleven's energy situation.

It was lower than he had imagined.

But it was alright.

After all, its true strength was the skills with high proficiency.

In terms of battle power, the other pets might not necessarily perform better than Eleven.

"Wuu!"

Eleven nodded and returned to the Beast Taming Space. At the same time, Shi Yu walked down.

As expected, after testing Eleven's energy level, Shi Yu began to be curious about Buggy again...

After returning to the research institute, he would ask if there were such machines in Ancient Capital University. He felt that there should be!

"This is your information card. Please go to the designated location in the afternoon to do the written test. Your assessment information should also be refreshed after the assessment official website."

After Shi Yu came down, the male examiner in charge of recording the data gave him the subsequent assessment information card. At the same time, he raised his head curiously and sized up Shi Yu.

Icefield City, Ping Cheng? This was the birth point of Shi Yu according to the information. It was a little familiar, as there were indeed iron-eating beasts there...

In short, he had to pay attention to this monster candidate in the future.

"Thank you." Shi Yu took the assessment information card. After taking a look, he put it in his pocket and walked out of the blockade.

The moment he returned to the assessment crowd, the dozens of candidates around him immediately became noisy!

"Holy shit, brother, what's wrong with your Iron-eating Beast!!"

"3186, it's fake, right?"

"Brother, can I get your contact information?"

"Can I touch your Iron-eating Beast?"

Even the candidate who had led the Thunder Lion race earlier didn't receive such treatment from Shi Yu. Shi Yu's scalp immediately turned numb. Then, he looked at the red-faced bespectacled woman who wanted to touch the iron-eating beast. His vigilance was raised to the limit.

This person didn't have any replication talent, did she? He couldn't let her touch him!

“Silence!!!”

At this moment, the chief examiner, Zhuang Ping, had a dark expression on her face. “Noise is prohibited here. Violating the rules will be seen as giving up the assessment. All communication is to stop now. The assessment will continue.”

The candidates smiled in embarrassment after the organizer spoke. Then, the next candidate went on stage to take the test.

In fact, he could leave directly after the test.

However, most of the people still stayed behind to see how the others’ test results were out of curiosity.

At this moment, Shi Yu sensed everyone’s gaze on him and fell silent. Although he also wanted to continue looking... he felt that it wasn’t suitable to stay here for long.

Why not retreat first?

...

Shi Yu withdrew and left without anyone knowing.

Not long after he left, two short-haired youths rushed to the venue of the tenth exam.

They raised their heads and searched for something in the crowd, but they didn’t find anything.

The buzz cut cousin poked a candidate casually.

The candidate turned around in confusion.

The buzz cut cousin whispered, “Brother, did an extraordinary-level Green Silkworm appear here previously?”

“Are you surprised? Are you surprised?!” the straight hair cousin whispered.

The candidate was stunned. Damn it, idiots, where did these two idiots come from?

“Are you crazy? Your Green Silkworm can reach the transcendent level?”

He turned around in bad luck. He hadn’t finished the test yet, so he didn’t have time to deal with idiots.

“Why are you cursing?” The straight hair cousin was immediately displeased when he heard that.

He had been beaten by a worm, so why couldn’t the Green Silkworm be at the transcendent level?

Not only could it be transcendent, it could also be very strong. Its energy level had to be at least 666, it couldn’t be any lower.

At this moment, they were confused. The cousins looked at each other and felt that it was a little strange. It was strange. Shi Yu should be at this venue.

It was fine if they didn’t find Shi Yu, but why didn’t the surrounding candidates hear of him?

The smart cousin asked another person.

This time, they chose a girl who looked easy to talk to. The buzz cut cousin said, "Beauty, did you have a candidate named Shi Yu here previously?"

The girl turned around and was slightly stunned. "You're talking about that Iron-eating Beast..."

"Yes, yes, yes. It's that Beast Tamer wearing the Iron-eating Beast's short sleeve!" The cousins said excitedly. They had asked the right person.

"Is he done testing?"

The girl looked around and said, "The test is over. Do you know him?"

"Sort of..."

"Then do you have the contact information of that handsome guy?? He left too quickly..."

"So powerful. How did he nurture that Iron-eating Beast that can only be worth more than 3,000..." The candidate could not forget.

Eh?

The short-hair brother was stunned. What the hell? What Iron-eating Beast with more than 3,000 energy points?

"What are you talking about?" they asked.

"Don't you guys know that Shi Yu? I'm talking about his Iron-eating Beast."

The cousins' hearts skipped a beat. They kept feeling that something was wrong.

"Isn't the pet he's training a Green Silkworm? transcendent-level, Green Silkworm, didn't you see it?"

The female candidate: "???"

"An Iron-eating Beast with 3,000 energy points, but where did the Green Silkworm come from!" She rolled her eyes at the two of them and said, "Do the two of you have his contact information?"

Ding Yao and Zhao Rui smiled awkwardly and retreated. Damn, something seemed wrong.

Where was their huge transcendent-level green worm?!!!

Didn't they say that the Green Silkworm shocked everyone!

However, what the f*ck was with an Iron-eating Beast with more than 3,000 energy points? The two of them had blank expressions.

...

At noon.

After leaving the lotus lake examination venue, Shi Yu found a random place to make do with a bowl of beef ramen.

The basic test had just ended, and no one came to disturb him.

However, for example, Senior Lu, Senior Beast Ear, Senior Panda, Hall Master Lin Hongnian, and the archeological seven elites had sent him a message yesterday to wish him success.

Fortunately, it wasn't completely orphan treatment...

"Wu—" After eating and drinking his fill, Shi Yu fell into deep thought about life.

The written test, the written test, it was finally coming!

Shi Yu became slightly nervous.

"Why don't... I take a look at a few more questions?" In the small room, the air conditioner was blowing. Shi Yu felt that it was quite comfortable. He felt that it didn't matter even if he waited here until the afternoon... He took out "Five Year Examination Mock Questions" and casually looked at a question.

[The Greenback Eagle has an extremely fast flying speed, and it has pretty good performance in battle and reconnaissance. How fast can a Greenback Eagle, which has grown to the transcendent level and has mastered a proficient level Wind Wing skill, reach?]

"...Simple, I know this question, choose C."

Chapter 109: Wuji Airlines Tactic

Following that, Shi Yu attacked for another afternoon.

In the afternoon, he started to carry his beloved little school bag and headed to the examination hall.

In the Beast Taming Space, Eleven rubbed its fists.

Buggy transformed into a classic head scarf with "fighting!" printed on it, and decided to go big.

Because Shi Yu had said that if it couldn't pass the written test this year, it shouldn't do anything else for the next year.

They'd do a year's paper together and wait for next year's assessment.

"Wu..." Ji..." This scared Eleven and Buggy.

If they had known that Shi Yu was so ruthless, they would have worked hard no matter what!

...

The written test started at 2 pm. It lasted for a total of 150 minutes and could be handed in early.

When Shi Yu arrived outside the examination room, the candidates who had already arrived immediately looked at Shi Yu. Their gazes were like electric torches that nearly blinded Shi Yu.

That gaze seemed to be saying, big boss, please guide me!

Shi Yu : "..."

It was still that group of people from venue 10 in the morning.

Even the examiners were the same trio.

However, why were they looking at him... If it was the third assessment of the wilderness trial, he might still be able to destroy other candidates indiscriminately, but this written test really couldn't be destroyed easily. It couldn't be...

He couldn't even guarantee passing himself. If anyone wanted to cheat, please don't look at his answers. Otherwise, he would be screwed.

"Everyone, go in. Sit according to the seat number."

Shi Yu arrived at the right time. At this moment, the examiner, Zhuang Ping, stood outside the door and spoke to the candidates waiting outside.

Shi Yu directly entered the examination room.

"This place is pretty big."

The examination room was modified to the battle room, so it was not a problem to store a hundred people. After Shi Yu found his seat, he looked at the mechanical life in charge of monitoring the ceiling and fell into deep thought. He also had a headache.

This feeling was so familiar.

It felt like he had returned to his high school days... It couldn't be said to be a beautiful memory. It was better to let him bring Eleven and Buggy to challenge another dragon cub.

"If an ancient Legendary Beast Tamer with relatively little information encountered a modern genius Legendary Beast Tamer, whose chances of victory are higher?" When Shi Yu took out a pen, he was more curious about this question.

How much could this pet knowledge increase the strength of a Beast Tamer?

After mastering it, there would definitely be improvements to Beast Tamers, but it was more worth pondering about how much it was after quantifying it.

Moreover, was there something special about the ancient Beast Taming Civilization...

Generally speaking, no matter what civilization it was, it was basically getting more and more developed.

However, the history of this world was a little strange. There was a Mythical Era that came into contact with the world's Origins and laws.

The Mythical creatures of that era were active. These Mythical creatures mastered the power of various laws, so they were undoubtedly the strongest.

There were also countless gaps in the totem era and the Beast Taming Era, hiding many secrets. For example, the tribe that had mastered the two evolution methods of the Iron-eating Beast looked ridiculously strong.

If only there were pets that could travel through time and take him to the ancient times...

“Let’s start handing out the papers now. Everyone, check if there are any problems with the papers first before filling in the information.”

Just as Shi Yu was letting his imagination run wild, the examination time arrived. The three examiners started to distribute the papers.

The first thing Shi Yu did when he got the paper was not to fill in the information, but to look at the questions!

He could ignore the political and historical questions that gave him points for the time being. It mainly depended on the big questions about common pets...

“As expected, there’s questions about the Green Silkworm. This wave is stable!”

“No one knows the Green Silkworm better than me...”

...

The various vocation assessment venues in Ancient Capital had already entered a quiet written assessment segment.

At this moment, in a conference room of the Beast Tamer Association in Ancient Capital, nine master-level Beast Tamers sat down one after another.

They were the examiners of the subsequent two assessments.

The first two tests of the vocation assessment were to screen a batch of candidates who did not meet the basic requirements. The real assessment actually started from the third level.

“According to the association’s requirements, we have a mission next. It’s to combine the results of the first and third stages to choose 16 key candidates. At that time, there will be special arrangements for them during the final ranking battle.”

Among the nine master-level Beast Tamers, the only middle-aged man who enjoyed the title of top-level Beast Tamer was also the overall in-charge of the professional assessment in Ancient Capital, Master Qu Jie.

“At the moment, the basic test information of the various venues has been gathered. Everyone, let’s analyze it together.”

After saying that, he pressed the remote control. The big screen in the meeting room displayed 50 names, pet names, and some numbers.

“This is ranked according to the energy values detected in the basic test from high to low.”

“We’ll choose the 16 key seed candidates from here.”

After Master Qu Jie finished speaking, the master examiners nodded and looked at the screen.

Then, the first information stunned them.

1. Yin Zhengfan.

Beast Taming Space level, level two.

Test pet, low-level monarch species, transcendent-level Zonyan Rock Beast.

Energy Points, 3991 points.

“Yin Legend’s son really participated in this assessment???”

In the seat, a bald master exclaimed.

“Looks like it. He contracted a monarch species pet at the age of 12. Ridiculous!”

When the masters saw this surname, this unscientific pet race, and this unscientific energy value, they were immediately stunned.

Legend Yin had really invested a lot in this son of his!

He had successfully contracted a monarch’s species pet before becoming a professional Beast Tamer. It seemed that this little kid, Yin Zhengfan, had perfectly inherited his father’s Beast Taming Space strengthening talent!

“This little guy is indeed impressive.” Master Qu Jie nodded. It was said that apart from Ancient Capital University, the other eight top universities had long contacted Legend Yin, hoping that his son would go to their place to study and further his studies.

After the vocation assessment, the nine great academies would definitely have to spend a lot of money to fight for this little Yin Zhengfan...

This Yin Zhengfan’s talent was indeed terrifying. He was also very curious how the outside world would react if the first place of this year’s assessment was taken down by a 12-year-old teenager.

In short, when faced with this information, apart from feeling that it was ridiculous, the examiners couldn’t think of any other description. Of the 16 key seed candidates, there had to be a place for Yin Legend’s son.

<ol start="2">

Zhang Qianyi

Beast Taming Space level, level three.

Test pet, high-level commander species, transcendent-level Thunder Cloud Sprite.

Energy Points, 3567.

Many examiners recognized the second name.

This girl was a genius from a small city. Even her parents weren’t Beast Tamers.

However, she had awakened an extremely powerful Beast Taming Talent, Elemental Coordination.

The abnormality of this talent was that it could ignore the intersection of energy and assist pets to make powerful combination skills of different elements and different attributes.

For example, the combination skill of lightning and fire, the combination skill of light and darkness. Not only would there be no problems, but it could also form an effect that was greater than when used alone!

This was actually her second time participating in the vocation assessment. When she first came to the Ancient Capital to participate in the vocation assessment, she did not pass.

However, with this stage, a top-notch master with similar talent took a fancy to her talent and accepted her as a disciple to nurture.

In one year, it seemed that not only had she made a breakthrough in the level of the Beast Taming Space from last year, she had even contracted a stronger pet.

Without a doubt, this candidate was also someone who needed to be paid attention to. In fact, she had already reached the standard of an intermediate Beast Tamer.

Professional Beast Tamers were divided into three titles, primary, intermediate, and advanced.

The criteria for primary and intermediate level was actually in the level and battle experience of the Beast Taming Space. The pets were basically still at the transcendent level.

Only high-level titles required Beast Tamers to have a pet that had grown to commander rank.

<ol start="3">

Miao Dongdong

Beast Taming Space level, level two.

Test pet, high-level transcendent species, transcendent-level parasite.

Energy Points, 3294.

The candidates this year had indeed surprised these master examiners too much.

"This person... What's going on?"

"This Miao Xiaodong, he's a worm master, or a Gu Master."

"This parasitic Gu parasitizes the Emerald Tree Python of a low-level monarch race," Master Qu Jie said.

Insect Masters and Gu Masters were actually the same as Dragon Tamers, Mechanics, Plant Control Masters, Spirit Mediums, and Elementalists. They were all known as branches of Beast Tamers.

However, Gu Masters were too small in number, not even one in ten thousand Beast Tamers could be found. The requirements for beast taming talent and cultivation methods were extremely high, basically all inherited through families.

High-level transcendent race, parasitic Gu. This Gu worm was not powerful, but at the same time it was also very powerful.

It could parasitize the corpses of other dead pets and occupy their bodies with nests, similar to possession.

Right now, Miao Xiaodong, who was ranked third in the basic test energy level, had obtained this result by controlling a dead monarch species pet cub.

The masters nodded and started guessing Miao Dongdong's background.

Dong Huang only had so few Gu Masters, and there were even fewer powerful Gu Masters. Who knew where he came from...

<ol start="4">

Shi Yu

Beast Taming Space level, level two.

Test pet, medium transcendent species, Iron-eating Beast.

Energy Points, 3186.

The master examiners:???

"This... What's going on?"

They could understand the first three.

One was because of his Beast Taming Talent, which allowed him to contract a monarch's pet in advance.

One was because she had made a comeback and his level was higher.

One was because of the speciality of the bug master, but what was the fourth place... and who was he?

"He..." As the overall in-charge of this vocation assessment, Qu Jie obtained more information than the examiners.

He narrowed his eyes and looked at Shi Yu's profile picture.

"He's an internally determined candidate in the archeology department of Ancient Capital University. It's said that a few months ago, he just cracked an ancient ruin and discovered the evolution method of the iron-eating beast. This news hasn't spread yet. The iron-eating beast has the potential of a monarch after its evolution. His iron-eating beast seems to have awakened part of its evolution bloodline. It's also very unusual."

"And I heard that apart from the ancient ruins of the Iron-eating Beast, he also cracked a trial-type ruin in his hometown. He's a genius in the archeology world."

The archeologists were shocked. So that was the case.

These archeologists were not simple either. After all, there were simply countless opportunities in those ancient ruins.

This Shi Yu was also worth paying attention to. He wasn't much worse than the people in front.

<ol start="5">

Yu Shu

Beast Taming Space level, level two.

Test pet, high-level commander species, Nether Bone Young Dragon.

Energy Points, 2999.

Everyone was no stranger to this candidate.

The parents of this candidate were both top-notch Beast Tamers in the ancient capital. He had perfectly inherited his parents' talent and had pretty good attainments in Dragon Taming and Spirit Control.

The Nether Bone Young Dragon was a race formed by the skeleton of a dragon after its death. It wasn't considered a legitimate dragon, and unless it evolved, it had always been in the form of a young dragon, so its race level was relatively low.

But even so, it was very powerful compared to ordinary candidates.

If the examiners didn't remember wrongly, this Yu Shu even contracted a dragon soul of a commander race. After the bone dragon and dragon soul fused, they weren't necessarily inferior to monarch-rank pets. The dragon bones and dragon souls already had most of the power of dragons.

He explained, "The selection of the key seed candidates requires not only the results of the basic test, but also the other pet of the candidate and their own Beast Taming Talent."

"After all, the results of a pet don't mean anything at the moment."

"Understood!" The examiners nodded.

This vocation assessment... was going to be interesting. At least, none of the Beast Tamers in the top five of the basic assessment were easy to deal with.

...

At the same time, in the examination hall, Shi Yu fell into deep thought.

If they were in the wild and their pets were infected by the poison of the Floating Poison Spider, what should they do?

Eleven's high-speed healing didn't seem to be useful. It only fixed ordinary injuries.

I wonder if it's useful to add points to a higher level? If I can't reach transcendent, I should at least have some antidote effect at the maximum level, right?

Shi Yu's thoughts flew.

However, clearly, this was definitely not the correct answer... The correct answer was to let the Beast Tamer think of a way through the other natural resources in the wild.

What plants in the surroundings could cure this poison...

"The two of you...." Shi Yu's face darkened.

Eleven, Buggy: "Damn it, why must I be infected with this kind of poison? Can't I just kill the other party before I get infected?"

At the moment, Shi Yu had already answered most of the papers.

His answer was pretty smooth, but there were still some questions that Shi Yu couldn't think of no matter how hard he tried.

But from the looks of it, this was the only way. He had to pass!

...

150 minutes passed quickly.

There were a bunch of people who handed in their papers in advance, but without Shi Yu, they waited until the end.

After putting away the papers, Shi Yu instinctively wanted to do something...

For example, exchanging answers with classmates.

However, he didn't seem to know anyone at all.

"Forget it, the results will be out tomorrow. There should be an answer online later, right?"

"Just go and get the right answer."

Following the crowd, Shi Yu quickly left the Lotus Lake examination venue. He didn't give the lady in the same examination hall a chance to get his cell phone number. Then, he sighed.

He finally made it through the most difficult stage. If it went smoothly, he should be able to participate in the third assessment the day after tomorrow. At that time, it would be simple.

Shi Yu, who had experience training in the wild on Mt. Tian Mang, was very confident in the third assessment. No matter how the examiners countered Eleven, he felt that he could still kill them randomly.

Iron-eating Beast Research Institute.

Because the next assessment was the day after tomorrow, Shi Yu definitely had to return.

In the research institute, the panda senior clearly knew that Shi Yu was coming back after the exam in the afternoon. However, she looked at the unhappy Shi Yu and immediately understood. Did he fail?

"Try harder next year?" she asked cautiously.

"Not at all." Shi Yu's face darkened. Although he had answered many questions wrongly, he definitely passed the threshold.

He had already checked the answers on his phone in the taxi just now.

The problem was very big, but not very big either. It felt neither high nor low.

"Then why are you looking so miserable?" The panda senior was amused.

Shi Yu: "I got the wrong question for a question. I lost five points for nothing..."

He put on a painful face.

The panda senior smiled and said, "Don't think too much. It's fine as long as you pass the written test. You have to have a high Beast Taming level, a strong pet, and good grades for the written test. How can there be such a superman? Most people just pass the written test."

"Oh, oh, oh, junior is back!!"

As Senior Panda consoled Shi Yu, the archeological seven elites had just returned from god knows where. Their eyes lit up when they saw Shi Yu.

"Junior Shi Yu, we heard that your Iron-eating Beast's energy level has reached more than 3,000 points!!"

"Impressive."

"This wave is off. There's definitely hope for the top ten!!"

Shi Yu was stunned. "You guys are pretty well-informed."

Zheng Yingjie laughed and said, "After all, there are so many people watching the basic test. There are one or two ridiculous values that spread very quickly."

"Do you remember that Yu Shu we talked about before, and Yin Chuan's son?"

"That Yu Shu's Nether Bone Young Dragon seems to be almost three thousand. Your Iron-eating Beast is impressive, even stronger than dragons of the same level!"

Everyone expected Eleven's strength. After all, Perfect Level Hardening, expert Level multiplication, expert Level Thunder Palm, and even having awakened an evolutionary bloodline. What a joke! He couldn't be weak!

However, although they had expected it, this data that was comparable to a young monarch pet still surprised them a little.

It had yet to evolve. If it were to evolve, what would happen?

Shi Yu didn't mind this. After all, Eleven had even beaten the Frost Dragon Phantom.

He was more curious about the twelve-year-old child.

"The twelve-year-old really participated in the assessment?"

Lin Yu'er said, "Not only did he participate, his basic test results are still the highest at the moment. He seems to have contracted a young king of a monarch race, his energy level is almost 4,000."

"I heard he's a handsome little boy. I wonder if I'll have the chance to be his senior. Sigh, my girlish heart."

"Ew."

The other six elites looked at her in disdain.

"Is that so?" Shi Yu was stunned as his heart skipped a beat.

Monarch cub?

Damn, there really was one.

His energy level was so much higher than Eleven...

He probably also mastered a super skill, but he didn't know how his skill proficiency was, including other skills.

"I feel that if I want to get first place, it won't be so stable." Shi Yu fell into deep thought.

However, if the other party had the Beast Taming Space strengthening talent, Shi Yu would not suffer much in battle.

Unlike Beast Tamers with enhanced talent, who could increase their pets in battle.

After all, those people could forcefully turn a proficient level skill into an expert level skill. It was troublesome.

"Where's Hall Master Lin?" Shi Yu asked Senior Panda.

"He had something to do back in Ping Cheng. What's wrong?" said the panda senior.

"No..." Shi Yu nodded. That was fine.

He had been conflicted about whether to replicate the impregnable skill. After all, there were only five pages in the skill index.

Compared to replicating this skill first, he actually wanted to hold back and see if there was a chance to encounter other rare skills first. After all, this skill wouldn't run away or anything. He could replicate it sooner or later.

Moreover, to be honest, the impregnable skill didn't help Eleven much at the moment.

Unless it was above expert level, though there would definitely be no time and energy. There was no need.

In Eleven's current state, it was pretty good. In the future, under the circumstances that he had mastered a profound skill, it was not impossible for him to give it a try.

"Since Junior Shi Yu has already finished his exam and is resting tomorrow, why don't we go out for a meal tonight?" Senior Wang Le suggested.

Everyone looked at Shi Yu.

Shi Yu: "I'm fine with anything."

...

On the first day of the vocation assessment, there was a commotion in Ancient Capital.

Almost everyone on the local forums was discussing this batch of vocation assessments.

Those few with higher basic testing energy values were naturally the focus of discussion.

Of course, apart from those who discussed the local assessment situation, there were also those who discussed the assessment situation in other cities.

After all, the level of beast taming in Ancient Capital City was not very high among the nine first-level cities.

For example, in the capital where the Beast Tamer Association's headquarters was located, the second-generation heirs gathered would only be even more ridiculous.

However, this had nothing to do with Shi Yu anymore. Shi Yu had already had a good meal before returning to sleep to rest. He fell asleep.

The next day.

After Shi Yu opened his eyes, the first thing he did was to take out his cell phone and open the scoring website.

After inputting the name and exam number, the page refreshed, and Shi Yu's heart stopped.

Name: Shi Yu

Examination: GD 1464

Results: 250

It was nearly 10 points higher than the estimated score. In a situation where the full score was 300 points, this result was very standard. After all, the vocation assessment had a very high requirement for the written test. Passing was not calculated according to 60%.

However...

Shi Yu was speechless. Why did this result feel a little mocking?

"Heh."

Forget it, just cross the line. He was happy today.

With a smile, Shi Yu directly entered the ruins space. He found the panda and the chirping worm to announce the good news.

However, just as he arrived, Shi Yu was even more speechless.

"What are you guys doing???"

On the other side, Eleven and Buggy seemed to have developed something on their cell phones. Buggy directly transformed into a pair of metal wings and installed them on both sides of Eleven's body, connected by transcendent Level Hardening.

At this moment, Eleven was flying at a low altitude with a serious expression.

He couldn't fly steadily at all.

"Wuu."

“Ji!”

What was it doing? Climbing into the sky!

Eleven decided to try the training method of falling from a height of 10,000 meters. It was for the thrill.

At that time, its whole body would harden, and it would be thrown down from a height of ten thousand meters by the worm to hit the enemy with gravity acceleration. It was a super skill after all, right?

Previously, when they heard Shi Yu say that he might study the dual combat strategy in the future, Eleven and Buggy did not stay idle either and conceptualized it.

This was the Wuji Sky Strategy they had developed!

It could be used for training and battle. Perfect!

“You guys are really smart...” Shi Yu looked at the few huge pits on the ground as his eyelids twitched. Can you control your strategy well and guarantee that it won’t hit your Beast Tamer? Oh, he could just be etherealized, so it’s fine.

Chapter 110: Wilderness Survival Trial

Translator: Atlas Studios Editor: Atlas Studios

Soaring Sky Strategy, to think you could think of that!

“If you could achieve zero off-target quantity and ensure that you could hit the target directly, with very high accuracy, that would be alright.”

With the acceleration of gravity, it looked like a high-speed kinetic weapon. But the problem was that even with the support of super vision, Eleven couldn’t do it.

After all, it couldn’t control itself during the fall.

“But Eleven and Buggy have indeed become smarter!”

“They all know how to study battle tactics.”

It had to be said that the upper limit of this battle tactic was pretty high. If Buggy could bring Eleven into the world and throw him down, its power would be comparable to a meteorite hitting the ground.

The premise was that Eleven wouldn’t die during the process and after hitting the ground. This was a little difficult.

“Wuu!”

“Ji!”

After being pulled out, Eleven sat obediently on the stool while Buggy lay on its head.

The two of them had looks of anticipation. Shi Yu had passed the written test. Even if they didn’t contribute much, they had worked hard, right?

What rewards would there be...

"I'll reward you with a large amount of resources." Shi Yu chuckled.

Eleven and Buggy's eyes lit up.

What did it mean? Speak in detail.

"After that, I'll give you three days to bring you to a place filled with a large amount of rare resources. At that time, you can pick whatever you want. It's all yours."

Shi Yu's expression was calm and very heroic.

However, Eleven and Buggy felt that something was wrong.

"Wuu."

"Ji."

Eleven and Buggy discussed for a while before opening their cell phones and casually pressed a few buttons.

Then, a video started playing.

In the video, a woman in a professional suit was broadcasting the news.

"After a day of strict assessment, the current number of people passing the first two stages of the professional assessment in Ancient Capital is 6440."

"These 6,440 people will be carrying out the most important assessment in the vocation assessment tomorrow. It's also the assessment that determines whether they can become professional Beast Tamers, which is the field survival assessment."

"At that time, they will be thrown into the huge trial island with 100,000 transcendent-level ferocious beasts and live for three days. In this dangerous place, there are all ferocious beasts that are extremely threatening to humans. But at the same time, it's said that resources are everywhere here. There are a large number of rare resources from level one to three, and the resources are ten times richer than in similar dangerous places."

"According to the assessment situation in the past years, during the wilderness survival trial, apart from completing the corresponding assessment missions, the resources obtained by the candidates during the assessment are all personal."

"Of course, these resources are definitely protected by a large number of ferocious beasts... Therefore, I can imagine that this wilderness survival trial will be a test where risks and opportunities coexist."

Eleven and Buggy looked at Shi Yu after watching the video.

It meant that in the third assessment, not only did they have to complete the corresponding assessment mission, they also had to be fighters for a few days and work hard to collect resources?

Pa!

Shi Yu smacked his forehead. Damn, why are the two of you looking for news yourselves?

“That’s about it.”

Shi Yu crossed his arms and said stubbornly, “We have the Ruins Bead, so you know what I mean.”

“This Island of Trials is similar to Mt. Tian Mang. It was specially prepared by the Beast Tamer Association in Ancient Capital for the vocation assessment. There are many low-level resources inside, and there are no commander-level ferocious beasts. It’s the best place for us to showcase our abilities.”

“As long as you have spare energy, our efficiency in obtaining resources will definitely be dozens of times faster than other Beast Tamers.”

Every year, in the Wilderness Survival Trial segment of the vocation assessment, a bunch of candidates and pets would die. But similarly, those who survived could also obtain pretty good growth from this treasure land.

These resources were part of the benefits that the candidates might get while letting the candidates take the risk of the assessment.

However, it was also because of these resources that the training island used as the assessment venue in Ancient Capital City this year was filled with transcendent-level ferocious beasts. These ferocious beasts that were artificially raised were the trial stones prepared for the candidates by the Beast Tamer Association in Ancient Capital City!

Eleven and Buggy looked at each other.

“Do a big one?” Shi Yu asked.

“Wuu!!!” “Ji!!!”

Eleven raised its arms and Buggy jumped down.

Charge, charge, charge!

For the sake of money! With more money, he could buy more supplements and level them up!

Eleven naturally didn’t care about the Wilderness Survival Trial, let alone Buggy. They all had the skill Absolute Sleep, so it wasn’t a problem for them to crazily plunder resources for nearly three days and three nights.

“Charge.” The three of them obtained consensus.

Eleven and Buggy’s eyes lit up like hungry bears and hungry bugs.

1

For ordinary candidates, the third stage was actually very difficult. They had no time to consider obtaining resources.

However, Shi Yu and the others were different. Those assessment missions were definitely convenient for them.

Before noon, Shi Yu's application interface refreshed the gathering time for tomorrow and his assessment mission.

Eleven and Buggy came over.

Shi Yu was also very curious about what mission the Beast Tamer Association would use to target the Iron-eating Beast race.

After taking a look, Shi Yu was immediately amused.

Mission 1: Hunting a transcendent-level Gale Sparrow.

Mission 2: Hunting a transcendent-level Deception Flower.

Mission 3: Collect a water lotus.

They really did know how to counter Eleven.

The Blazing Wind Sparrow was a wind-element ferocious beast of a mid-level transcendent race. It mastered the wind wings and flew extremely fast.

It was undoubtedly very difficult to let an iron-eating beast that couldn't fly and only had close combat abilities hunt the Gale Sparrow.

Moreover, it was in a dangerous place like the Island of Trials where ferocious beasts were everywhere. The Wind Sparrows there were probably very vigilant. If they encountered a strong enemy, they would run away immediately. The hunting difficulty would definitely be higher.

The Deception Flower was a Piranha Flower that could create illusions. It liked to disguise itself into various forms and hypnotize its prey before eating it.

This was a ferocious plant that was good at mental attacks. Generally speaking, it was impossible to deal with an Iron-eating Beast that only hardened.

As for the water lotus, it was a level-two resource that only grew in the water. It was also not easy to obtain for the iron-eating beasts.

Both missions were chosen to counter ordinary iron-eating beasts.

Unfortunately, Eleven was not an ordinary Iron-eating Beast, but the Panda King.

In Shi Yu's opinion, these missions were not difficult at all.

Their primary goal was indeed to take advantage of this assessment to collect more resources and enrich their little vault.

"Every candidate who participates in the Wilderness Survival Trial will have three assessment missions. Two of them need to be completed in the field survival for three days."

"The difficulty is about the same."

Although Shi Yu felt that he could complete it, if it were an ordinary candidate with an iron-eating beast, he would definitely fail.

Unless, this candidate's other pet countered these three missions.

For example, if an Iron-eating Beast Tamer and a second pet were super flying rats, the three missions would be directly given to them for free. The Psychic Wave limited the flight of the Fierce Wind Sparrow, and the Psychic class countered the illusion of the Deception Flower. Clone skills could be used to obtain resources, which was not a perfect pass.

Of course, this kind of situation was still a minority.

Most candidates, even if they had two extraordinary pets, they basically had one attribute.

After all, a Beast Tamer with a metal-element talent couldn't contract a fire-element pet.

Therefore, this was also the reason why very few people passed the vocation assessment in Ancient Capital each year.

Pass the conditions of the Wilderness Survival Trial. First, survive three days on the Island of Trials. Second, complete any two assessment missions in three days.

The one who completed it would officially become a professional Beast Tamer.

As for those who did not complete it, it was not impossible. After all, there were various coincidences in the assessment process. Not all candidates might be able to quickly find the hunting target.

During the survival process in the wild, the candidate would receive one point for every hunt of an extraordinary-level ferocious beast, regardless of the type of ferocious beast. After three days, the Beast Tamer who did not complete the assessment mission would be ranked according to the points. At that time, the Beast Tamer in the top 5% of the points could similarly become a professional Beast Tamer, just like the candidate who completed the mission.

Every year, among the nearly ten thousand candidates in Ancient Capital City, only a few hundred people could become professional Beast Tamers.

The inner volume was several times that of other second-tier cities, such as the vocation assessment in Icefield City.

As for the final ranking battle, it was actually an additional addition. The nature of the battle was similar to a competition. It was to give the candidates who passed the third round a specific strength ranking. At that time, there would be a lot of spectators.

This could also better let the major schools and businesses understand the true appearance of this batch of professional newbies.

"Gather at the second airport in Ancient Capital tomorrow at 7 a.m.??"

After Shi Yu confirmed the gathering point and time for tomorrow, he decided to do the same thing again.

The distance was still not close. Why not just spend the night there today?

The reason why they gave the candidates a day off was not to let the candidates rest, but to let the candidates quickly prepare resources according to their assessment missions and formulate a plan. However, Shi Yu did not have to do any preparations, so he looked especially relaxed...

...

“They’re all here.”

When Shi Yu went out, the archeological seven elites were playing with the iron-eating beast cubs transported from the Iron Bamboo Breeding Base.

When they saw Shi Yu come out, they immediately asked, “Has the assessment mission come out? What is it?”

“Gale Sparrow, Deception Flower, a small mission,” Shi Yu said casually.

The seven archeological elites nodded and didn’t say anything. After all, they were all candidates who had passed a certain vocation assessment.

He knew that this kind of targeted assessment mission could counter ordinary pets, but it couldn’t restrain Shi Yu’s little iron-eating beast that was comparable to a young monarch.

Shi Yu would definitely pass this round easily. Even if he didn’t take the assessment mission route, taking out the Little Iron Eating Beast to multiply it would not be difficult at all. He could just choose to wipe out the transcendent beasts and get points.

However, what made the seven archeological elites more worried was that when they asked Shi Yu when his second pet was, he said it was a green worm.

A green worm that had yet to evolve!

This was very awkward. Wouldn’t that mean that Shi Yu would have to fight with just one pet against multiple throughout the entire process? Including the ranking battle later...

“What are you doing?”

At this moment, when he saw Shi Yu coming out with a backpack, Zheng Yingjie asked curiously, “Don’t tell me you’re planning to find a place to stay near the next examination venue?”

“That’s my plan.” Shi Yu chuckled.

“Good heavens.” No one expected Shi Yu to be addicted to sleeping in the examination hall. He was really unwilling to get up early at all.

This habit... If he was pulled into war, wouldn’t she run to the entrance of the enemy camp to sleep at night?

Speaking of which, there was a big problem with Shi Yu’s lifestyle!

It was almost noon and he had just come out. It was the same previously. If he didn’t see anyone in the morning, what was Shi Yu doing at night?

Stay up late to meditate?

Shi Yu had no choice. He needed to sleep more when he was growing...

“Do you need me to give you a lift?” said Lin Yu’er.

Shi Yu: “It’s alright, it’s alright. I’ll go over myself.”

As he wasn’t as familiar with the archeological seven elites as he was with Senior Panda, he didn’t trouble her.

Speaking of which, where did Senior Panda go this morning?

However, it wasn’t important. After chatting with Qi Yingjie, Shi Yu left the research institute coolly.

At the same time, Hanging Eleven crawled out of Shi Yu’s pocket. The Green Silkworm unzipped the backpack and revealed its head.

Next was the Wilderness Survival Trial. Shi Yu decided to let them protect him from now on. Only then would Shi Yu feel safe.

Shi Yu felt that it was not enough just to turn into ethereal!

“I forgot to ask Hall Master Lin. How strong can a Beast Tamer’s battle power be when combined with the Iron-eating Beast’s transcendent Level Hardening?”

As soon as Shi Yu went out, he fell into deep thought. If Eleven hardened its whole body, could Shi Yu one-punch an ordinary transcendent-level ferocious beast?

Although he had been beaten up badly the last time, Shi Yu still had a martial arts dream...

...

At the second airport of Ancient Capital City.

The area here was relatively small compared to the first airport, and it was rarely open usually. After it was open, the flying purpose was all for business flights.

For example, the Ancient Capital University wanted to send a batch of students to the capital to exchange and learn. Or, a certain unit of the Beast Tamer Troops in the Ancient Capital wanted to go to a certain place to carry out a mission. At this time, the second airport would be opened.

When Shi Yu arrived, it was noon. The airport was still sealed off. He took a casual look and started looking for food.

In the restaurant’s private room, Shi Yu also contacted Hall Master Lin.

“It’s Shi Yu. Did the assessment go smoothly?”

“Isn’t it time for the third assessment?”

On the other side, Hall Master Lin’s laughter came.

“Yes, thanks to you, the third round will definitely be fine,” Shi Yu said.

The hardest part of the Wilderness Survival Trial was that the pets could not replenish their physical fitness in time. However, the vocation assessment was very humane. It did not exclude the wealth of the Beast Tamer from their strength. It allowed the Beast Tamer to bring a large amount of supplements, nutritional supplements, medicine, and even the most effective energy crystals to recover energy.

Naturally, people like Shi Yu had prepared a pile.

Among them, the energy crystals provided by Hall Master Lin when he contacted the dojo before he left Ping Cheng. It was enough for Eleven to use for a month.

“I actually wanted to ask you how the Iron-eating Beast should cooperate with the Beast Tamer after mastering transcendent Level Hardening.”

“Just apply the hardened substance to the Beast Tamer through contact? There won’t be any danger, right?”

Shi Yu was waiting for an answer, but there was silence on the other side.

“Hello? Is the signal bad?”

“Strange... Hello?”

Lin Hongnian: Son of a b*tch.

He was thinking about why Shi Yu was asking this.

Lin Hongnian said, “Don’t tell me that Eleven’s hardening proficiency has already reached transcendent...”

Don’t joke around!

It had only been half a year since the contract was made! Moreover, Eleven hadn’t even mastered Hardening when the contract was made!

“Yeah, would you believe me if I said so?” Shi Yu smiled.

“Like hell I believe you.” Master Lin Hongnian shook his head.

“This ability can indeed be used on Beast Tamers, and it won’t have any impact on Beast Tamers, but the premise is contact. If Beast Tamers and Iron-eating Beast don’t maintain contact, the hardened substance will automatically disappear, so the tactical meaning isn’t very big. Generally speaking, only when Beast Tamers face powerful long-range attacks and can’t dodge, and when the Iron-eating Beast is beside them, will they let the Iron-eating Beast assist in increasing their defense.”

“In short, it’s useless. Compared to entrusting my life-saving hope to this skill, it’s better to nurture a pet that’s more agile and can create shields now.” Master Lin Hongnian gave him a suggestion. “Iron-eating Beasts are not suitable for a close combat bodyguard at all.”

Transcendent Level Hardening. It wasn’t fun at all! Master Lin was deeply touched. In all aspects.

“Alright.” Shi Yu was just asking to clear his confusion.

He couldn’t maintain Armament Haki in the human body for a long time to become Iron Man...

It was boring.

Low-level skills, useless! He'd spent so much on them, too.

Wait... There seemed to be a max level to look forward to?

"I have nothing else to do. Then I won't disturb you anymore." After Shi Yu spoke to Master Lin, both parties hung up.

Soon, Shi Yu left the restaurant, found a hidden corner, and disappeared from the world.

He wanted to tear the test papers and relax. He wanted to prepare for the Wilderness Survival Trial tomorrow. However, one thing was for sure. The contents of the paper indeed recorded a lot of field survival knowledge. If he mastered all of it, the survival ability of a genius Beast Tamer in the wild would definitely be stronger than that of a bad student.

It was better not to tear it up. Let Eleven and Buggy revise again. Although they could crush the whole test with their strength, who knew what might happen?

...

January 3.

Time passed quickly.

In the blink of an eye, it was the day of the Wilderness Survival Trial.

More than 6,000 candidates gathered outside the second airport. Not far away, there were many onlookers.

In addition, the media of the Ancient Capital Television Station searched for the more famous candidates crazily, wanting to interview them.

However, there were too many people and it was too difficult to find.

For candidates like Yin Zhengfan, Zhang Qianyi, Miao Dongdong, Shi Yu, and Yu Shu who had made a little name for themselves on the basic test, the media reporters couldn't catch them at all. They could only watch helplessly.

In the end, they could only choose to casually find a few candidates with passable looks to interview and get a feel for it, hoping they would accidentally share their missions in the test.

7 a.m.

The blockade line of the second airport opened. Under the guidance of the soldiers of the Beast Tamer Troops, the candidates entered in batches. Then, according to the line drawn in advance in the airport, they stood in a huge formation.

When there were more people, everyone appeared to have no presence. Shi Yu stood in the crowd and, like everyone else, silently waited for the assessment committee's arrangements.

Soon, under the guidance of the examiners and soldiers who were maintaining order at the scene, the more than 6,000 candidates boarded six huge aircraft in batches.

“Damn, a single one can hold thousands of people. I wonder what race level it is. It has to be at least a high-level commander.”

A candidate immediately exclaimed after coming up.

But soon, he received some disdainful looks from the candidates.

Look at this naive look.

“There’s an answer...” Shi Yu smiled after sitting up.

He didn’t know who was stronger between the ancient Beast Tamers and the modern Beast Tamers.

However, he knew that modern Beast Tamers must be more comfortable than ancient times. The experience was brought about by mechanical lives with various technological crystals.

Computers, cell phones, cars, and planes. There wasn’t such a thing in ancient times, right?

In terms of talent, those Mechanics might not be inferior to the Beast Tamers who had mastered special cultivation methods in the ancient times.

In fact, these technological crystal mechanical lives could even break through the atmosphere and carry people to the moon.

In comparison, even in the Mythical Era, not every Mythical creature could break through the restraints of the planet, right?

And now, a special modification, a mythical mechanical life form, could do it. It could even completely become a taboo weapon of a country, deterring wild overlord creatures and other countries from afar.

“Sigh...”

The flying transport was divided into three levels, similar to a plane. Clearly, it was also a mechanical life form. After Shi Yu came up, he casually sat in a seat. Beside him sat a nervous-looking boy.

He kept sighing, causing Shi Yu to feel a little depressed.

Since he was already here, he should be happier.

“What are you sighing for?” Although Shi Yu didn’t know him, he decided to enlighten him with the mentality of helping others.

“N-nervous,” the boy said.

“I heard that the venue of the assessment is quite dangerous...”

“It’s indeed quite dangerous...”

“Right, my Frigid Tree basic test only has 1,300 points of energy. I wonder if it can work,” the boy said humbly.

Shi Yu: “?”

Shi Yu turned his head and no longer meddled in other people’s business.

This kid just wanted to show off his results, right?

1300 points, low class commander species Frost Tree. Did he not think he would wreck everything in the wild? What are you nervous about!

The candidates with more than 500 energy points had yet to say anything so depressing.

“What about you?” He hurriedly asked about Shi Yu’s basic results, confirming Shi Yu’s guess even more.

“Guess,” Shi Yu said with a grin.

“Zi...”

“Zi...”

“Can you hear me?”

At this moment, a deep and hoarse voice came from inside the aircraft.

It was the sound of a machine. The person who spoke shouldn’t be on the aircraft.

“I’m the overall in-charge of this vocation assessment.”

“Firstly, congratulations on successfully passing the first two levels.”

“However, the third round is the key to the vocation assessment. I don’t know if you guys are prepared, but it’s too late to regret now.”

“Next, you will all be sent to the Island of Trials to undergo a three-day survival assessment. You are very lucky. At the moment, there are a large number of rare resources on the island, almost everywhere. There are even rare spatial and dragon-type resources. You have many opportunities to use these resources to complete a self-reinforcing.”

“What I want to remind you right now is that the vocation assessment encourages competition. If two candidates discover a resource at the same time, as long as it doesn’t hurt the Beast Tamer’s life, you can compete for the right to belong through any method. Whether it’s a battle or an equal distribution, it’s up to you.”

“Of course, these are just additional benefits for participating in the vocation assessment. The most important thing for you is to complete your assessment mission and survive.”

“During the assessment process, please also prioritize your own safety. If you encounter danger, you can seek help from other candidates or give up the assessment. Although the assessment encourages competition, it also encourages mutual assistance. However, please remember that regardless of whether it’s hunting ferocious beasts or completing missions, you are only allowed to complete them alone with your own strength. The team results are useless. The assessment committee will watch you at any time.”

An unfamiliar voice echoed in the ears of the candidates through the aircraft for a long time.

Not only did it encourage candidates to help each other when in danger, but it also encouraged competition when resources were encountered?

Shi Yu touched his chin. He wasn't concerned about this, but he had heard that there were spatial resources?

This was too beautiful.

After all, an ordinary spatial-type resource like the Space Crystal Fruit was also 500,000 yuan each.

Space-element resources were basically not worth less than a six-digit number. In other words, there were several divine beans. He had to work hard.

Apart from competing for a higher ranking during the ranking battle, he couldn't let go of the resources everywhere at the moment. Even if he didn't take them, they would have to be enjoyed by the ferocious beasts on the island. It would be a waste not to take them.

"We're about to reach our destination in three minutes..."

In the aircraft, as the candidates were thinking silently over the words of the in-charge, another voice came from the aircraft.

At this moment, the flying device had already begun to fly. The Island of Trials was outside Ancient Capital City. It wasn't very far. With the extreme speed of this flying device, it could indeed reach in a few minutes.

It didn't even shake. Just as everyone was in a daze, an electronic voice came from the aircraft.

"Destination has arrived... Please follow the guide and head to the aircraft exit in an orderly manner..."

A moment later.

Outside Ancient Capital City, above a huge island that was as big as a city, countless black dots landed!

Six huge flying transports floated above the blue sky. Figures walked out of the flying transports one after another and slowly landed at different spots on the Island of Trials!

It was not a parachute jump, but faint blue fluorescent light spread over every candidate.

Psychic power!

If one observed carefully, they would discover that higher up in the sky, in the white sea of clouds, a huge eye more than a hundred meters wide was open, silently looking down.

The eye was shining with a blue light.

It was using its mental strength to throw every candidate from the sky to the designated assessment location.

Name: Eye of the Sky

[Attributes]: Machinery, Spirit

[Race Level]: Medium Monarch

[Race Skill]: Psychic, Heavenly Eye, Deterrence???

< Introduction > It's an artificial mechanical life. It has analytical abilities and powerful Psychokinesis that exceed supercomputers.

Although the vocation assessment in Ancient Capital City was strict and the most intense in the inner scroll, at the same time, the resources invested in a vocation assessment organized by a first-level city was not what those second-level cities could compare to. This was also why the competition for the assessment in a first-level city was so intense, and there were still many people who came to challenge it.

His entire body was enveloped by Psychic power. As Shi Yu slowly descended from the sky, he raised his head and looked at the huge eye in the sky.

"It's too high, I can't touch it."

"But forget it. The super skill Heaven's Eye isn't very useful. It can't be upgraded too, so it's definitely far inferior to the highest level super vision cost ratio."

...

The original name of the island of trials didn't matter anymore. After it was chosen by the Beast Tamer Association as the wilderness survival assessment venue for the vocation assessment, the name of this place had always been this.

The island was very large, and there were more than 100,000 ferocious beasts everywhere. However, the scale and strength of the ferocious beasts had always been under the control of the Beast Tamer Association. After all, as a vocation assessment location, there shouldn't be commander-level creatures.

At this moment, on the trial island, in the mountain range, in the snow mountain, under the volcano, in the forest, by the forest... In various environments, there were already candidates who had been thrown into positions closer to their hunting targets.

As the island was huge, the candidates would not encounter it easily in the short term.

Twilight Forest.

Shi Yu should have landed at this place. At this moment, in the dark forest, Shi Yu wanted to curse.

Couldn't they send him to a prettier point? The seaside at the edge of the island was pretty good!

"Wu!!"

"Ji!!!"

Eleven climbed onto Shi Yu's shoulder, and the Green Silkworm climbed onto Shi Yu's right shoulder. Alright, alright, let's go!!

"Let's leave this place first," Shi Yu said. Regardless of whether there were Wind Sparrows or Deception Flowers nearby, this place was not likable.

It was better to slip away first. The assessment mission depended on fate. If they encountered it, they would hunt. If they didn't encounter it, then forget it. In any case, the points from the ferocious beasts they encountered when they gathered other resources were probably enough for them to advance.

“Wuu!!” Eleven nodded heavily. Then, he suddenly turned around and looked behind a thick tree. With a buzz, the leaves fell.

In the next second, a one-meter-tall mantis with sharp double blades, a hunter in the forest, and a huge saber that was preparing to ambush Shi Yu and the others fell.

< Name > Great Blade Mantis

[Attributes]: Insect

[Race Level]: Medium transcendent

[Race Skill]: Slash

They had agreed that there were transcendent-level ferocious beasts everywhere, but this one seemed to have only awakened level ten. It was meaningless, it didn't even have points.

However, expert level deterrence was very useful.

“Ji—” At this moment, Buggy was just about to pull the prey over with the worm silk when Shi Yu stretched out his hand to stop him.

“Let's go.”

This thing wasn't worth anything, nor was it like a ginseng baby. After fainting, those babies could still be hugged and nibbled.

However, there was definitely no such thing as a cute pet like Baby Ginseng in such a place. On this training island, there were all wild beasts, ferocious beasts, and ferocious beasts with strong attack tendencies!

After turning around, Shi Yu looked at the sky again. Speaking of which, could that Eye of Heavenly Silk accurately record the points of more than 6,000 candidates?

If it was comparable to the analytical ability of a supercomputer... Perhaps it could.

...

“Eh, resources are really everywhere.”

At this moment, before leaving the forest, Shi Yu discovered an unripe level-two dark-element resource, Darklight Grass.

To be precise, Eleven discovered it. Its super vision could see the energy flow and avoid the meaningless battle just now. It was very convenient to find resources!

“Wu!” However, after Eleven's reminder, Shi Yu was in no hurry to attack. This was because not only was there an extraordinary-level ferocious beast nearby, there seemed to be other Beast Tamers spying on this resource.

“Hiss...”

Perhaps it sensed that a life form had entered its territory. In the forest, the ferocious beast that regarded the Darklight Grass as its own couldn't sit still anymore. A huge python covered in dark patterns slowly crawled around the Darklight Grass, its snake eyes observing its surroundings.

This was a dark-element transcendent-level snake-type ferocious beast. Its battle power was definitely not low.. Seeing this, the Beast Tamer on the other side immediately had the intention to retreat.
