[Unscientific Beast Taming](#)

Chapter 1041: Shi Yu Creates the World (1)

When Senior Lu arrived, Shi Yu received her warmly. He directly got Baby Ginseng and Ling to prepare a big meal and the banquet started.

As for why there was also Ling, as a mechanical pet, since even a difficult form like a mecha could change, then the form of the electric rice pot and the form of the microwave would definitely be out of the question.

The all-purpose mechanical pet.

"Wuu!"

At the same time, Eleven, Buggy, Chi Tong, Susu, Qi, Little Purple, and the others were also called out by Shi Yu.

On Senior Lu's side, the Green Phoenix, the Empress Flower, the Courtyard Sprite, the Mermaid Princess, and the Hurricane Demon were also summoned.

This wasn't the first time the dozen or so pets had met. They reunited after a long time and immediately started a social event.

"Lord Green Dragon..."

Senior Lu's mermaid princess also had a dragon-element bloodline. In addition, she had seen the world competition and worshiped Buggy very much. As soon as she came out, she looked up at Buggy sleeping on the tree, but Buggy ignored her.

"Wu... (There's everything in dreams.)" Buggy said.

Although the mermaid princess was very beautiful, it was not interested in dragons. If this mermaid princess came to chat with it, it was better to find Shi Yu. Shi Yu definitely liked her. After all, according to what Buggy knew, humanoid creatures grew in Shi Yu's aesthetic taste.

"Are you Qi?" Senior Lu's Courtyard Sprite saw that the Qi it had seen in Courtyard previously had become as tall as a big coke bottle and had a blank expression.

At this moment, Qi was floating in the air with the help of the wind element. She still looked the same. Her loose pink ponytail hung on her shoulder, and a strand of hair stood up. She was wearing a silver-white battle suit with black patterns, a pleated short skirt, and a small white cloak on her back. This was not a problem. The problem was that it was too small and had shrunk a lot compared to before.

"Multiplication?" the Courtyard Sprite asked. Shi Yu's pets indeed seemed to like multiplication and shrinking! After all, maintaining his main body's normal state consumed too much energy.

However, what was the point of multiplying the elves? Even if the elves maintained their normal state, the consumption was not high.

"I'm Qi... not multiplication... But it's also related to Skills..." Qi didn't know how to explain and sighed. "In short, I've become smaller, and I can't recover anymore."

The Courtyard Sprite was at a loss. Then, it looked at Shi Yu, who was chatting with Lu Qingyi, and suspected that there was a problem with Shi Yu's cultivation method.

"It's not because Shi Yu isn't. It's because of myself," Qi hurriedly explained. She waved her little hand around, afraid that Shi Yu would be misunderstood as having some strange hobby.

Ahhh, Space-time Travel!!

It made its Arms have to be customized again, like some fruit knife-sized Heavenly Thunder Blade...

"ROAR!"

On the other side, the Wind Demon Lion ran to Eleven to ask how the Leader could go from barely defeating itself to defeating a god so quickly. Big boss, take me along.

The Green Phoenix ran to Chi Tong in the form of a bird spirit. As a member of the Phoenix Race, they had a deep sisterly relationship and threw Susu aside.

The empress flower stood on the spot arrogantly, her gaze landing on the cooking ginseng baby. It was difficult to imagine that this was the towering emperor who galloped through the world competition.

The Hurricane Demon, on the other hand, sized up Little Purple flying in the sky curiously. It had never seen such a pet and asked Susu what it was.

"Ning! (Sea Vegetable Rice Ball)" Susu replied.

Little Zi: Mimi?

Most of Shi Yu's pets knew Senior Lu's pets, but Little Zi, who had joined the team after the World Tournament, had indeed never interacted much with Lu Qingyi's pets.

"Where's Little Ji and Duckie?" Lu Qingyi realized that Little Ji and Duckie had not been sent out by Shi Yu, so she asked, "Are you afraid that they'll fight?"

In fact, Lu Qingyi felt that Little Ji and Duckie were the most normal in Shi Yu's team.

"Them? One is sleeping and leveling up in the mechanical room, and the other is refining the Abyss Seed in the Sea Cleansing. They're both in a life-and-death state, so they're not called," Shi Yu said. "But Senior, haven't you contracted your seventh pet?"

Lu Qingyi said, "I've been busy cultivating the first team recently. The seventh one is still being considered between the Iron-eating Beast and the mechanical phantom beast..."

"Then we'll decide after a while," Shi Yu said. "Yun An has already appeared. Be it defeating Yun An or finding a new divine-level fossil, there are better choices."

Shi Yu suddenly remembered that he still had a single-horned demon's divine stone. Lord Lie Shan had given it to him, but he didn't know when it could wake up.

Seriously, if he woke up now, he could at least rely on the Mythical Race to give him some Stats. It wasn't a loss to contract it. If he didn't wake up soon, he would wake up in seven years. What was the use of it? At that time, he definitely wouldn't lack this bit of feedback.

Buzz!!

As the two of them chatted, suddenly, the sound of laws spread. A tempting fragrance suddenly attracted the attention of all the pets. Even Lu Qingyi, who was beside Shi Yu, was slightly stunned. Her snow-white neck trembled slightly as she turned around and looked at the wooden table.

A ginseng baby was setting up a plate with vines summoned from god knows where.

"Yi!!! (Dang dang dang dang!!!)"

On the wooden table, fruits and vegetables of various sizes were taken out by Baby Ginseng. They were extremely tempting.

Gulp.

Senior Lu's stomach growled unconsciously. Shi Yu looked over and instantly made her blush.

"Has Baby Ginseng evolved again?"

"Well, after the World Tournament ended, Baby Ginseng completed its evolution with the blessings of the World Tree. It's also a Mythical Race now. The nutrients it creates now are basically equal to top-notch level-eight resources. Senior, you're in for a treat in the next half a month," Shi Yu said with a smile.

Unscientific Beast Taming

Chapter 1042: Shi Yu Creates the World (2)

Lu Qingyi said, "You said it. Then I won't hold back."

"Yi!! (Don't stand on ceremony! It's just a little abandoned.)" Baby Ginseng nodded.

It was like this every day. If it weren't for the Legendary ruins, Ping Cheng probably wouldn't have lasted more than a few days.

Now, Baby Ginseng was strong and absorbing money.

< Name > Baby Ginseng

[Race Skill]:

"Advanced": Time Fruit (Dao Proficiency)

"Super": Time Mark (Perfect+), Moon Explosion (Perfect+), Life Fire Seed (Perfect+), World Tree Fruit (Perfect+), Green Wood Divine Body (Perfect+), Sun Forest (Perfect+), Plant Control (Perfect+36)

"Quasi Divine": World Favor (Initiate)

In those two months of bitter cultivation, Baby Ginseng's skills had almost been fused by Shi Yu.

The Green Wood Divine Body that was fused with Skills such as Source of Life, Heart of the Earth, Slow Healing, High Speed Healing, Multiplication, Mutation, and Deterrence. If the power of faith of the Green Dragon was excluded, its recovery ability far exceeded the Green Dragon Indestructible Body. It was also because of this physique that it was even more tempting now.

At the same time, this physique was extremely close to the natural power of earth plants and plants, and it had the effect of adapting to mutations. It could be seen as a super evolution skill, but now that it was already a Mythical Race, it was definitely even more harsh on evolution resources.

After plant control fused with sweet aura, nutritional supplements, energy fruits, lushness, and other skills, it also officially turned into a racial skill. At the moment, apart from superalloy and soul incarnation, it was a super skill with third proficiency in Shi Yu's team.

The Sun Forest was a domain skill. The fusion of the Energy Storage Beam, Clear Sky, Four Symbols Star Formation, Clone, and other Skills allowed Baby Ginseng to create the Sun Tree Forest that controlled the power of the sun. This forest could be seen as a Sunlight Domain. It could be used in battle, assisted in Moon Explosion, and could also be used as a cultivation holy land.

Baby Ginseng used all its might to create a Sun Forest. Relying on natural sunlight, as long as it was used in moderation, it was not a problem to form an almost eternal cultivation holy land. Even if monarch-level fire-element and light-element pets lived in it, there would be huge benefits.

In addition, although the small Skills had fused, they didn't completely disappear. Baby Ginseng still retained their usage EXP. Under the strengthening of the world, top-notch nutritional fruits and vegetables appeared on the dining table. There was also the most precious World Tree Fruit. This was the main thing.

"I'm starting!"

"Roar!!!"

....

After Senior Lu temporarily stayed with Shi Yu, Shi Yu began to help Senior Lu develop mental resonance and also let her pet participate in Eleven and the others' special training.

This participation made Senior Lu's pets wish they were dead.

After fighting Shi Yu's pet every day, Senior Lu's pet enjoyed divine-level treatment that even Little Ji, Duckie, and the others had never enjoyed.

Even the divine trial in the World Tournament wasn't that cruel!

Of course, the time he spent with Senior Lu was only a small number after all. Most of the time, Shi Yu was still cultivating alone.

Back then, Shi Yu was either meditating to recover his Restoration state or trying to modify his Beast Taming Space.

Now, Shi Yu's first Beast Taming Space had almost been modified by him.

On one hand, it relied on the resources of the outside world, and on the other hand, it relied on the power of the pet to modify it.

At that moment, his first Beast Taming Space was divided into six areas.

Eleven was in the Thunder Sea Bamboo Forest where the thunderstorm and the bamboo forest coexisted.

The cosmic meteorite group with rich cosmic power where Buggy was could live on asteroids.

The Forest of Life that Baby Ginseng was in contained more than a thousand plants.

The Sun Sword Domain Chi Tong was in. This place was born in the Sun Forest, but the trees had been cut into the shape of swords by Chi Tong.

In the Sea of Purification where Susu was, as well as the Sky City where Ling was, there were six pets and six areas. Under normal circumstances, they couldn't interfere with each other.

As for Little Purple, it was a baby that had yet to be weaned. It just had to be led by Ling obediently.

Here, although they couldn't let Eleven and the others undergo too exaggerated special training, because of the Blessing of the World Tree, resting in the Beast Taming Space was actually far better than special training in the Legendary Ruins.

Among them, the materials to modify the Beast Taming Space were naturally applied from Dong Huang. Shi Yu applied for a pile of rare materials that were expensive. Apart from that, he applied for more.

For example, Dong Huang, including the Green Dragon, White Tiger, Vermillion Bird, and Black Tortoise faith items of the surrounding countries, was also getting someone to help collect them and store them in the Ancient Capital Museum first.

These things were all equipment that could increase the strength of Enhancing Buggy. When necessary, they could be taken out as life-saving equipment. They had to be controlled.

Of course, Shi Yu felt that this alone was not enough. After all, a hard battle might consume many faith items. Apart from Dong Huang and Dragon Palace City helping him promote the power of faith, Shi Yu felt that he had to think of a way.

Therefore, Shi Yu also obtained a large number of resources and began to nurture Little Purple.

He finally started to nurture Little Purple.

For the past few days, the seaweed rice ball Susu mentioned had been lying in Shi Yu's hand every day.

The resources it used were relatively Normal.

Earth-element energy crystal, wood-element energy crystal, water-element energy crystal...

Previously, Little Zi only ate spatial crystals.

After eating it, it only cared about expanding the size and strength of the inner world.

Now, the area of its inner world at the commander rank had almost reached 100,000 square kilometers, far larger than the spatial pocket of the overlord-level Buggy, Susu's Infinite Devour Space, and Ling's mechanical space.

Unscientific Beast Taming

Chapter 1043: Shi Yu Creates the World (3)

However, although the space in Little Zi's body was ridiculously large, because it had yet to be modified, it was still empty. There was nothing.

And Shi Yu's so-called cultivation was naturally to start helping it "create the world in its body".

There were only two ways to "create".

First, Little Purple slowly modified its inner world through eating food and using the nutrition of the food.

Second, Allowing other lives to enter the inner world, introduced foreign species, and used their power to modify the inner world.

In fact, the second method was the fastest. If Shi Yu let Eleven and the others enter Little Purple's body, it probably wouldn't be long before he could create a normal world where mountains and rivers flowed and the sun and moon changed. However, Little Purple was too weak at the moment, and Eleven and the others' levels were too high.

Just like how those top-notch gods couldn't be on Blue Planet and high-level beasts couldn't be in the low-level Beast Taming Space, the world space would collapse.

Therefore, at the moment, Little Zi could only build the basics of the inner world with the support of Shi Yu and the others.

Of course, this method was not slow either, because Shi Yu's physical control talent could also be used on pets.

Therefore, not only was Little Purple creating the world itself, but Shi Yu was also supporting it together. This could allow Little Purple to achieve twice the result with half the effort.

With the experience of modifying the ruins mystic realm and the Beast Taming Space as the foundation, it was still easy for Shi Yu to help Little Zi build an ordinary world that didn't contain the power of laws.

"Sun and Moon."

In Shi Yu's hand, the cat-eared white ball of the purple nebula seriously created the phantom of the sun and moon through the Sun Fruit and Moon Fruit created by the ginseng baby.

"Galaxy."

The Radiant Moon and Radiant Sun were in a vast sea of stars. Little Zi didn't refuse anyone. It wanted to eat meteorites and cosmic strange water.

"Earth."

"Wood."

"Jiang He."

Through eating the energy crystals of various elements, the earth vein in Little Purple's inner world also contained a huge amount of natural power. With Shi Yu's help, soon, in just a few days, this 100,000 square kilometers small world looked thriving.

It was basically no different from the outside world.

However, Shi Yu understood that these were all fake. For example, the sun and moon hanging in the sky were all illusory items condensed from energy. For example, the seemingly vast starry sky was actually a background. It looked vast, but everything was actually locked in a small space.

As for these lands, plants, and rivers, they looked extremely prosperous at the moment, but they were also built on the condition that Little Purple constantly replenished the corresponding nutrition. Only then could they function normally and have extremely short lifespans.

Once the energy was exhausted and not replenished in time, the so-called planetary resources would dry up, and the lifespan of the world would reach the end.

Compared to those real planetary life forms with lifespans of billions of years and could even rely on the stable laws formed by the internal world to delay life, Little Zi still had a long way to go.

However, this was too far away, and Shi Yu and the others couldn't come into contact with it for the time being. The current level was more or less enough.

The reason why he wanted to help Little Zi build the basic world now was also for more power of faith.

Shi Yu planned to create a "divine kingdom world".

Let the lives here mainly cultivate the "power of faith".

Every life form could awaken "totems" in their minds after their mental strength took shape.

Visualizing and believing in totems could subtly change one's strength and obtain transcendent power.

And these totems could be the Four Holy Beasts, pandas, Star Sea Sprites, or even Little Ji, Duckie, or anything.

There were strong and weak totems, but it mainly depended on whether they were compatible with him.

This model was actually not rare in the various totem countries. For example, the Fox God of the Heavenly Fox Nation had the subordinate factions cultivate this faith power system to increase their strength.

With Shi Yu's current strength, it was naturally not difficult to replicate this system. Totem visualization was one of the cultivation systems in this world that Shi Yu had already confirmed. The goal was to increase the strength of Enhancement Buggy and the others.

Although the life forms that could be contained in Little Zi's body were far inferior to Blue Planet and Dong Huang in terms of strength and numbers, building a divine kingdom with Little Zi was really the only choice.

After all, as a normal human country, Dong Huang wouldn't let ordinary people, Beast Tamers, and transcendent lives mainly cultivate the power of faith on a large scale. It wouldn't let divine power override the law, so Shi Yu naturally couldn't do anything.

And if he went to the totem country to steal the country, he would have to face the risk of the joint condemnation of the various totem countries. Most importantly, it was too troublesome and Difficult to change the faith of the totem country. It was not something that could be done overnight.

On the contrary, Little Zi's inner world could be used by Shi Yu.

The greatest characteristic of Little Purple's inner world was that it could accelerate the flow of time in the world by eating time-element resources.

As long as there were enough resources, it might have only been a year on Blue Planet, but a hundred years had passed in the world in its body. The power of faith that could be accumulated for Shi Yu in a hundred years was far inferior to a year in the outside world.

This was the speciality of it as a Son of the Stars and a planetary life form!

When Little Purple's skill proficiency was high enough, when the world gave birth to a complete time law, Little Purple could also adjust the time flow in its inner world without the help of external resources.

Unscientific Beast Taming

Chapter 1044: Shi Yu Creates the World (4)

For Shi Yu, who couldn't bear to use the power of faith, it was clearly the most cost-effective to nurture faith himself.

As for more complicated worlds, such as the Six Paths of Reincarnation mechanism, the three realms of heaven, earth, and man, they were not something Shi Yu and the others could create at the moment. They could only use trickery to add some vitality to this world first.

"Let's call this continent 'Star Continent' first," Shi Yu said.

"Mi!!!" Little Zi agreed.

Next, in order to accelerate the evolution of the Star Continent, Shi Yu and the others began to create life.

Be it Normal animals or ordinary humans, there had to be them here.

Shi Yu and the others' method of creating life definitely couldn't let them directly capture a portion of it from Blue Planet and throw it into the Star Continent.

Firstly, there were too many needs, and it was easy to destroy the ecology of Blue Planet. Secondly, it was too troublesome.

For example, humans on Blue Planet. After a long evolution, the Beast Taming Strength system had already been engraved in their bloodlines. It was already very difficult to change it. It was not something Little Zi could do. Humans with Beast Taming Talents would definitely go astray in the evolution direction of the world.

Therefore, Shi Yu and the others chose to learn from Nuwa.

Build it himself!

It didn't rely on birthing.

It relied on making!

In the myths, Nuwa used mud to create humans, and Shi Yu and the others used a similar method.

Through Buggy's power of imagination.

First, he would let Buggy pinch enough animals and humans in the Legendary Ruins. Then, Shi Yu and the others would send them into the Star Continent.

This method had the greatest problem.

At the moment, Buggy's power of imagination had yet to cultivate a nomological divine skill, so it couldn't really turn illusion into reality and create life out of thin air.

Therefore, the illusions it created weren't real individuals. They couldn't provide the power of faith.

If he wanted to change this, he had to let these illusions really develop self-awareness, break free from Buggy's restraints, and complete new evolution.

Just like mechanical phantom beasts like Little Ji, after becoming a mechanical life form, it was no longer under Buggy's control. It was a new individual.

And this would have to be done by Little Zi.

Back then, a top-notch god named Goddess Wa brought humans to Blue Planet. The World Tree used these humans as the template core and created native Blue Planet humans who had mastered the power of Beast Taming.

At this moment, the Dragon God of Creation named Green Dragon brought humans into the Star Continent. As the will of the world, Little Purple could also rely on the power of the world to modify these life phantoms into native life forms by eating soul crystals, Spirit Crystals, Life Crystals, and other resources.

Of course, the premise was that the essence of these illusions was Normal life forms.

Buggy only created illusions of Normal animals and ordinary humans. It wasn't difficult for Little Purple to modify them through the power of the world.

However, if Shi Yu and the others were too arrogant and created Ultraman and Saiyans, they would definitely not be able to modify them.

"Mi!!"

In almost a few days, countless animals and humans moved on the Star Continent with ignorant understanding of the world.

At this moment, Little Zi's inner world didn't have extraordinary power.

Shi Yu was not in a hurry to activate the transcendent evolution of this world.

After all, the compatibility between these lives and their natives was still too low. There were too few of them, and their intelligence was not high.

It still needed to reproduce and evolve again to gradually integrate into the Star Continent.

By eating the fake god skill Time Fruit created by Baby Ginseng, Little Purple increased the speed of the Star Continent.

During the day, Shi Yu and the others trained Senior Lu. At night, Shi Yu and the others observed the changes in the new world. Just like that, half a month of Shi Yu's recuperation quickly passed.

At this moment, there were also new changes in Little Zi's inner world.

Because the evolution direction was different, the wild beasts obtained powerful strength, while the barbarians were relatively weak. They also developed the intelligence to rely on fire and Arms to fight the wild beasts. Both parties were evenly matched and evolved with each other. They developed well.

Seeing this, Shi Yu felt that it was time.

It was night.

Star Continent.

All life looked at the shining starry sky.

A sudden meteor shower descended at lightning speed.

Countless meteorites fell from the starry sky to the ground and ocean.

These meteorites didn't seem to have caused any damage to the ground, but they shattered the natural power contained in the entire world.

An extraordinary power suddenly appeared in the minds of countless lives who came into contact with the meteorite.

A green dragon appeared in the minds of some humans, a white tiger in the minds of some wild beasts, a vermilion bird in the minds of some birds, and a black tortoise in the minds of some sea beasts...

These Spirit Totems carried strong divine might, making these lives have the mood to submit. Some lives that regarded them as gods quickly discovered the transcendent changes produced by visualizing the bodies of these totems.

On this day, a new era began in the Star Continent. Future generations would call it the Mythical Era.

The entire Star Continent began the great cultivation era.

"With Little Zi's current strength, no matter how they cultivate or what methods they use, there's very little hope of their levels exceeding the transcendent level."

"The higher you go, the harder it is to. It's just like how no life form on Blue Planet can reach the divine level."

"However, there are people on Blue Planet who can break through the restraints of the planet and head to the starry sky. Little Zi, Ling, do you think a super genius might appear in this Star Continent in the future, break through the world restrictions, and ascend in front of us?" On the bed, Shi Yu held Little Zi and said to Ling, who was in charge of deducing the world beside him.

Unscientific Beast Taming

Chapter 1045: Earth and Ocean Overlord (1)

Alliance calendar, year 180.

It had been three years since Shi Yu became a Beast Tamer.

Moreover, he was still charging at the higher "Legendary Domain" and "Divine Realm".

He originally estimated that the former would take another two years, while the latter might take seven years.

Ping Cheng, garden villa area.

A blue Psychic flew over, and the fridge door automatically opened. A bottle of Frost flew into Shi Yu's hand.

Just as he completed the meditation cultivation in the second space, Shi Yu yawned in a daze.

His second Beast Taming Space had already reached level six. His improvement was very fast, and he was about to catch up to the level of the first Beast Taming Space.

In the second team, the ones with the fastest battle power progress were undoubtedly Little Ji and Duckie.

In half a month, with Ling's help, Little Ji had already evolved into a land overlord of a quasi Mythical Race through fusing with the Earth Divine Dragon fossil.

As for the duck, with Susu's help, it evolved into an ocean overlord of a quasi Mythical Race. Shi Yu preferred to call it the Sea Cleansing Demon Duck.

Because they were both new breeds, the racial names naturally followed Little Ji and Duckie's joy. The two went against each other, each taking the racial names of land overlord and ocean overlord.

Now, Shi Yu's half-eliminated legendary ruins space had already become a battlefield for Little Ji and Duckie. The terrain had almost been reconstructed by them.

Due to the lead of evolution and divine-level resources, their growth level had also reached the overlord level. They had the ability to change nature.

Although Shi Yu's second space was only level six, he didn't let them deliberately suppress their levels. After all, in his current situation, Little Ji and Duckie's breakthrough was no longer a contract above their level.

It could completely withstand it, and the benefits of the feedback were even greater than the consumption.

"Quack!!!"

Shi Yu only took a glance at the Legendary Ruins and saw an ocean.

There was also a huge black duck five meters tall with dark blue patterns standing on the tsunami and surfing.

On its neck, the pure golden-blue water that was like cleansing water froze like a ribbon, becoming a scarf-like part that floated behind it in an extremely domineering manner.

The rain fell drop by drop like bullets, strengthening the huge tsunami.

Because of the max-level cleansing, the excessive form of the Demon Subduing Duck, and the support of Susu's Sea Cleansing Spirit, after the duck absorbed the Abyss Seed, it didn't directly return to the form of the Abyss Demon Duck, but maintained the form of the Sea Cleansing Demon Duck that cleansed and coexisted with the power of the abyss.

This way, it could also better control the power of the abyss and not lose itself.

However, compared to the Sea Cleansing Demon Duck, the duck preferred to call itself an ocean overlord.

[Name]: Duckie (Race: Ocean Overlord)

Stats: Water, Dark

[Race Level]: High-level overlord (Quasi Mythical)

[Growth Level]: Overlord level

[Race Skill]:

[Intermediate]: Water Blade (transcendent+), Heart Strike (transcendent+)

"High Level": Heart Sword (expert+), Deterrence (expert+)

[Super]: Demon Vanquishing Pestle (expert+), Abyss Liberation (Proficient), Death Vortex (Proficient), Dark Sky Wave Rain (Proficient)

[Teaching Skill]:

[Intermediate]: Purification (Dao Proficiency)

"High Level": Wave Sword (expert+)

Energy Points: 71.1 million

The newly awakened Dark Sky Wave Rain indeed gave it the qualifications to become the overlord of the sea. A storm summon instantly drowned the continent.

For this reason, in order to protect its territory, Little Ji had already fought Duckie in the Legendary Ruins for a day and night.

If Duckie became stronger, Little Ji would as well.

At this moment, although the land was submerged by the sea, magma rose wherever it stepped. Soon, a new land was formed and they faced each other head-on.

"Roar!!!" At this moment, on the originally earth dragon-like body, Little Ji's appearance also changed.

Many cracks that looked like dry land appeared on its skin. In the cracks, the power of magma swam. It was this power that resisted the duck's attack.

[Name]: Little Ji (Race: Mechanical Beast, Land Overlord)

[Stats]: Machinery, Dragon (Earth, Fire)

[Race Level]: High-level overlord (Quasi Mythical)

[Growth Level]: Overlord level

[Race Skill]

"Intermediate": Basic Intelligence (expert+)

"Advanced": Space Splitting Sword (expert+), Dragon Breath (expert+), Deterrence (Perfect+), Clear Sky (proficient)

"Super": Earth Domain (expert+), Earthquake (expert+), Reverse Scale (expert+), Lava Explosion (proficient), Gravity Control (proficient)

[Teaching Skill]

"Advanced": Super Heavy Sword (expert+)

Energy Points: 73,910,000

Because the Earth Divine Dragon fossil was relatively incomplete, it only helped Little Ji awaken skills like Lava Explosion, Clear Sky, and Gravity Control. It was actually alright.

As for the divine skill of the Earth Divine Dragon, perhaps it would have to wait for Little Ji to increase the skill proficiency of the Mythical Revival like Ling before there was a chance of inheriting and awakening.

And now, Shi Yu had yet to nurture them through adding points. Clearly, quasi-divine skills were still far from Little Ji and the others.

It could be said that at the moment, be it Little Ji or Duckie, their potential had yet to be completely unearthed.

Little Ji still had the possibility of awakening a Mythical bloodline, and the Abyss Seed that Duckie ate, as a divine-level resource, clearly had more than this amount of strength.

However, it had temporarily turned into potential. Its Abyss Liberation was a skill to unearth more abyssal power, but when used, it was easy to lose its rationality. It needed to be restricted by skills like Purification, Diamond Staff, Heart Sword, and so on.

Unscientific Beast Taming

Chapter 1046: Earth and Ocean Overlord (2)

After Shi Yu and the others' torment, the battle power of the second team's Little Ji and Duckie was considered to have taken shape.

Of course, that was for ordinary battles.

At the moment, Duckie and Little Ji's strength was basically at the threshold of a top-notch overlord, similar to the Green Scaled Dragon Shi Yu and the others were fighting.

This couldn't be helped. After all, their super Skill proficiency had yet to increase much. They were even inferior to Normal overlords like the gem cat previously. They didn't even have perfect proficiency.

To have the strength of a top-notch overlord, it relied on using divine-level evolution resources. It relied on other aspects such as physique, energy, life, and Resistance to be relatively good.

It was considered an overlord with shortcomings.

However, the future was promising.

When Shi Yu had extra energy and began to add points to them, he believed that they would quickly have stronger strength and even compete in the battle of the first team to participate in the battle between gods.

"Shi Yu, are you there?"

At the stairs, Lu Qingyi walked upstairs. After approaching Shi Yu's room, she called out to Shi Yu.

"President Lin just came to inform me to go to the 'Battle Island' tomorrow."

"It should be the examiner of the Alliance."

"We're finally here. Battle Island? I'll go with you too," Shi Yu said.

He wanted to go to another place on the way.

Space-time Dragon Vein.

He had almost recovered. It was time to start a new round of bitter cultivation. Shi Yu didn't plan to cultivate bitterly at Dong Huang. Instead, he planned to cultivate in the valleys around the Space-time Dragon Vein.

Over there, Qi could also use the power of the Space-time Dragon Vein to quickly recover the power of Space-time Travel. This was the main point.

"Alright, I wonder who the examiner sent by the Alliance is this time..." Lu Qingyi was rather nervous.

After all, Ye Xing had failed to challenge titled battle pet warriors twice in a row...

Although her strength had improved greatly with Shi Yu's help in the past half a month, she still didn't have much confidence. After all, her opponent was at the totem level.

"Relax, I'll prepare," Shi Yu immediately said with a smile.

He didn't have much to prepare. He just wanted to inform his pets.

At the moment, a few pets were not beside Shi Yu. They had all run out to train alone.

For example, Buggy ran to the rural areas of various places where people believed in the four holy beasts to absorb the power of faith at a close distance. In addition, it would occasionally appear and give them some good weather.

Eleven and Susu also ran to the sea. Eleven dived into the deep sea to use the pressure of the deep sea bottom to train its sea battle ability, while Susu dived into the sea and absorbed the power of the sea to continue strengthening the Sea Cleansing Spirit.

Although it could mobilize the power of the ocean anywhere through the Blue Sea Contract, it was definitely the most efficient to mobilize it when it was in the ocean.

[Activate: Long-range call.]

Shi Yu was in Dong Huang and had a few pets beside him. His safety was guaranteed, so he let them go out to play in peace. In any case, he had top-notch telepathy. If there were any problems, he could communicate at any time.

Even if Buggy had already run to Divine Capital and was ridiculously far from him, Shi Yu could still contact it through the "online meeting".

This was the power of a Beast Tamer with a high-level telepathy talent. His support ability was top-notch.

Of course, the reason why Shi Yu could be so fierce was also related to his strong mental strength and mastery of max-level Psychic power. The sensing range of other Beast Tamers of the same level wouldn't be so exaggerated.

"I say, you guys, it's time to come back."

As Shi Yu finished speaking.

In Divine Capital, a little green worm lying on the green dragon stone statue raised its head and chirped.

It just so happened that it was hungry too.

In the deep sea area of the East Sea, at the bottom of the sea, a group of pandas were originally fighting with their bodies alone at the bottom of the sea.

After hearing the sound, most of the pandas immediately turned into bubbles with bangs. Only one was left and quickly swam up.

Hu hu hu!!

Home!

"Ning. (Right away, right away.)" Somewhere in the ocean, Susu immediately replied.

Although they were both in the ocean, it wasn't with Eleven. It was mainly because Eleven's fighting movements at the bottom of the sea were too big. Even if it only used its body to fight, it was too disturbing.

"Eh."

"Susu, where are you?"

"Near the Battle Island?"

In the positioning, Shi Yu suddenly realized that Susu seemed to be near the Battle Island. He couldn't help but say, "Susu, stay there first. We'll go over later."

"Ning! (Alright ~ ~)" Susu.

....

Battle Island.

It was an artificial island. The specially built battle facility was one of the few artificial buildings that Dong Huang could withstand the highest battle fluctuations.

Here, it could at most withstand the battle fluctuations of top-notch totem-level creatures. Usually, it was a battle venue used by Beast Tamers of Dong Huang to challenge totem-level creatures.

For example, Dong Huang's legendary Beast Tamer titles were mostly here.

Next, the place Shi Yu and Lu Qingyi were going to was also here. At this moment, in the sea area heading to the Battle Island, a middle-aged man with a Western face, white skin, and blue eyes was standing on a huge ship and looking ahead.

The titled legend of Shen Feng in the Seven Nation Alliance, Fire God Jones.

The headquarters of the Seven Nation Alliance was on the Alliance Island. The management members were jointly formed by the Beast Tamers of the seven countries. Most of the work was to deal with the affairs of the totem country, as well as the exploration of ruins mystic realms and resource extraction in some public areas. It was the official institution of the seven countries to the outside world.

Every country of the seven countries had at least one titled legend stationed on the Alliance Island. Large countries like Dong Huang, Shen Feng, and Xue Yuan even had two titled legends stationed here, and there were many Normal legends.

[Unscientific Beast Taming](#)

Chapter 1047: Earth and Ocean Overlord (3)

Apart from some important things, the Alliance was also in charge of the challenges of legend Beast Tamers from various countries who wanted titles. Generally speaking, they would let Beast Tamers from other countries be examiners and bring the guardians of the Alliance to assess the challenger.

Shen Feng's Fire God, Jones, clearly became the examiner for Lu Qingyi's assessment this time. Of course, he wasn't in charge of the assessment, but a guardian of his partner.

It was a huge green bull frog more than ten meters tall, wearing a green leaf cloak. It held a branch in its mouth and narrowed its eyes.

The guardian of the Alliance, the Forest King, and the wood-element Forest Frog Race. During the totem battle, in order to not be killed, they relied on one of the guardians of the Seven Nation Alliance. For more than a hundred years, they worked with fear and trepidation. What they mainly had to do was to train and assess safe jobs like sparring partners. Apart from work, they spent most of their time in "hibernation and sleep".

To the Forest King's surprise, after enduring for so long, he had finally become an elder of the Alliance and a senior of the Alliance. His status was extraordinary.

Choice was indeed important!

"I slept for three years at once. I'm so hungry." The Forest King looked at the Fire God, Jones.

"Dong Huang should have prepared food, right? It'll be there when we reach the Battle Island." The Fire God Jones smiled bitterly and said, "You've already eaten all the food prepared on the ship. The amount of food prepared is clearly the same as usual..."

"When you pick me up next time, prepare more. My strength should have improved again. I feel that my appetite has become bigger and bigger in the past few years." The Forest King looked at the sea.

"Can we eat the small fish and prawns here?"

Fire God Jones said, "Of course. This isn't the Dragon Palace sea area, nor has it entered the Dong Huang sea area. However, small fish and shrimps in such a place aren't very nutritious."

"Just treat it as a snack. I'll advance with you in the sea," the Forest King said.

With that said, he jumped into the sea with a plop.

Seeing this, Fire God Jones shook his head.

The ship continued to sail calmly.

As for the Forest King, it had already dived to the bottom of the sea and fed itself.

Just as the Fire God Jones had said, there were indeed no nutritious creatures in this sea area.

Most of them were Awakening-level sea fish. The Forest King opened its mouth and kicked with its legs. It easily leaped and directly swallowed dozens of sea fish into its mouth. However, it felt as if it didn't eat them at all. It basically didn't feel anything.

"Quack." The Forest King sighed. If it could do it again, it didn't want to become a totem-level life form.

Although he had become stronger, he had also lost a sense of joy.

It was the joy of eating to its heart's content.

For a totem creature with neither high nor low strength like it, it was unrealistic to eat well every day. It could only rely on sleep to offset its hunger. It was even hungrier when it attacked!

"I have to work again. I have to eat more before I work."

"But the candidate this time, Jones just said that it seems to be a level-seven telepathy Beast Tamer?"

"It hasn't even reached level eight, and it's still telepathy. It should be very easy this time."

As he thought about it, the Forest King dived deeper into the sea and searched for transcendent and commander-level sea fish as food.

As it ate, the Forest King swam in the direction of Dong Huang's Battle Island with the ship. However, it suddenly realized that the change in the flow of ocean energy in the deeper seabed was a little strange.

It was as if there was a greedy devourer devouring the power of the ocean to its heart's content in the depths of the sea.

This scene made the Forest King slightly concerned as it swam in the direction of the energy change.

Soon.

On the dark deep sea rock, the Forest King saw a cute jelly-like Water Slime opening its mouth wide and absorbing the sea energy!

"Wah!!! Wu!!!" As Susu cleansed the seawater, it absorbed the water-element energy into the Infinite Devour Space and strengthened the Sea Cleansing Spirit with the Blue Sea Contract!

The efficiency was much faster than directly absorbing it at home!

Susu also noticed the arrival of the Forest King, but it only glanced at the big frog casually and didn't care much.

However, to Susu's surprise, after the big frog saw it, its expression gradually became abnormal. With a croak, it became more and more excited.

"Strange, why is there a Water Slime here, but the energy fluctuations are so rich and fragrant." The Forest King directly widened its eyes, wanting to swallow this blue jelly.

Fish, worms, water elemental creatures, and plant lives were all its favorite food...

"Caw!!!" The Forest King leaped up and pounced at Susu.

At this moment, Susu was also stunned and revealed a puzzled expression. It wasn't a ginseng baby.

But was this guy serious?

It was so weak, but it still wanted to eat it?

As a Blue Sea Sprite, especially a Blue Sea Sprite that had fused a bunch of new top-notch water-element Skills...

In the deep sea, even Eleven, Baby Ginseng, and Chi Tong couldn't defeat it together... It was confident!

Unscientific Beast Taming

Chapter 1048: The Examiner Is Always the One Who's Injured

"Croak!"

It had been a long time since the Forest King had seen such clean food.

The Forest King still missed the cold jelly-like texture of the Water Slime.

However, the Forest King was actually a little puzzled.

It felt that this Water Slime was not weak!

This was very strange!

How could a slime be so strong?

In the end, the Forest King thought of an explanation himself.

It was most likely a lucky person who had accidentally swallowed some natural treasure.

This situation was very common.

Most low-level pets didn't rely on hard work, but luck to accidentally eat treasures.

It was the same.

The Forest King didn't expect that it was still so lucky. What was the difference between the Water Slime in front of it and a natural treasure?

"I'll swallow it!"

The Forest King laughed and stuck out its long tongue. Moreover, its tongue became larger and larger during the passage, wanting to pull the Water Slime into its mouth!

Seeing this, Susu was speechless.

It was so embarrassing.

What was that green mucus?!!

"Ning..." Susu frowned. It naturally wouldn't sit back and watch this guy eat it.

It directly erupted with energy, and frost surged all over its body.

Boom!!!

A shocking ice-element energy surged out.

When it attacked, the Forest King actually didn't realize the seriousness of the problem.

It could sense that Susu's energy fluctuations were very strong, but this perception was wrong!

Every pet of Shi Yu was often in a shrunken state similar to Eleven's restrained form in order to preserve its physical strength.

This could reduce the body's consumption to a very low level.

Therefore, from the perspective of outsiders, if they didn't master any powerful reconnaissance Skills to see the origin, it was very difficult to discover Susu's true strength.

Although the Forest King was shocked by the strength of Susu's energy, it clearly underestimated its strength.

Compared to Susu's original endless power, this was more than a drop in the bucket.

A shocking cold current erupted from Susu's body. The Forest King was stunned, and its pupils constricted. Before its brain could react, with a hum, a huge ice cube appeared in the deep sea!

Moreover, the power of frost was still spreading, gradually forming an iceberg at the bottom of the sea.

In the center of the ice was the totem-level Forest King.

Its current expression was still stunned.

It seemed to not understand why this Water Slime suddenly erupted with power several times greater than before.

Quas Elemental Control+Heavenly Frost Cold Energy!

Frost that froze time caught the Forest King, who had sunk into the sea, off guard!

After all, the Forest King was wood-element. The bottom of the sea was not its home ground. Be it its movements, strength, or mobilization of natural power, they were extremely restricted. However, the totem level was still the totem level.

In less than a second, the frozen Forest King's tongue began to vibrate intensely. Right on the heels of that, the vibration wave was transmitted to its entire body, and frog cries came from inside the ice.

"Ribbit! Ribbit, ribbit!"

A super Skill shocked everyone.

Under the strong vibration of the sound wave, just as Susu froze the Forest King, the huge ice shattered with a bang.

As the ice shattered, the Forest King looked at the Water Slime in shock and understood that this was not an easy guy.

With its reaction speed, it actually couldn't dodge the Skill just now!

Although its power was weak, it was definitely an ice-element ultimate move!

"Who are you?" The Forest King shouted and gave up on eating Susu, planning to figure out the situation first.

However, at this moment, Susu didn't want to stop attacking.

What a joke. He directly attacked it and even asked who it was.

It wanted to give Shi Yu and the others an extra meal today.

Catch a bull frog and make an authentic gluttonous frog with the chili made by the ginseng baby.

It was a surprise for the incoming Shi Yu and the others.

Boom!!!

Before the Forest King could react, the Heavenly Frost Cold Energy that was almost certain to hit instantly froze the Forest King again.

The strong frostbite corroded the Forest King's body.

"Ribbit!!!" Under the frog's cry, the ice shattered.

The Forest King Frog waved its hand, and countless flying leaves that flickered with green fluorescent light attacked Susu.

These flying leaves absorbed the water-element power, and their speed and attack power became stronger and stronger. They were not obstructed at all in the water and directly cut out a temporarily maintained empty area in the deep sea.

"Ning."

More than ten flying leaves attacked. Susu was calm and composed. Its figure directly turned into water and fused into the sea. The control of the water element, together with the Elementalization, easily fused with the sea, causing this attack to lose its target.

Swoosh swoosh swoosh!!!

The bottom of the sea was divided, and countless large cracks appeared. The bottom of the sea was surging. When the Forest King saw the disappearing Susu, it frowned and turned to leave. It knew that fighting a water elemental creature with strong strength in the ocean was unwise.

It kicked its legs and wanted to swim back to the sea, but in the next moment, frost power surged, and the Forest King's body was frozen again.

At this moment, the Forest King almost cursed. After all, it had already judged that it was an extremely powerful ice-element ultimate move. It might involve time. Otherwise, it would be impossible to freeze it every time.

However, this Water Slime actually used such a unique skill three times casually as if it didn't need energy?

The laws of nature stated one should conserve physical strength and kill in one hit. If there was anything wrong, one should immediately slip away. This was the truth!

But at this moment, the Forest King felt that it had encountered a stubborn person who was chasing after it with a big move!

The big move was its regular, normal attack!

"Ribbit!!" Under the frog's cry, the ice shattered, but at the same time, the Water Slime appeared above it.

Unscientific Beast Taming

Chapter 1049: The Examiner Is Always the One Who's Injured (2)

What made the Forest King's balls hurt was that the other party seemed to have condensed a new big move.

Nine blue energy balls circled around this jelly-like Water Slime.

The Forest King sensed shocking ocean fluctuations in every energy ball.

Every energy ball seemed to contain the full power of an overlord-level life form.

This shocked the Forest King to suspect that this Water Slime was also a totem life form like him. Otherwise, it was impossible for it to squander energy like this.

No, even if it was at the totem level, it was too much. Was there a need to work so hard?

"Ribbit!! (Don't go too far.)" The skin on the Forest King's entire body vibrated, and a shocking sound wave came from his skin. At the same time, the sound wave was filled with green matter.

As a wood-element life form, using poison was also the Forest King's forte.

It immediately mixed toxins into its super sound wave skill, trying to affect the other party's elementalization and ocean environment to restrict the other party.

However, the Forest King's current actions were undoubtedly a minefield.

Seeing that the Forest King had released green toxins from god knows where, the pupils of the clean freak Susu suddenly constricted, and it was even more angry.

"Ning!! (Origin wave!!)"

The nine blue energy balls floated in front of Susu. It naturally didn't care about the consumption of energy. With the Blue Sea Contract, it had endless energy.

Therefore, it directly used the origin wave with the greatest power.

This skill was fused with super skills such as the Holy Water Ring, Wave Cannon, and Clone.

Not only could it slow down the abnormal damage that affected its nature, but it could also use the enemy's negative power to increase its wave power. At the same time, the wave power between each wave ball could also increase and strengthen each other!

It could be said to be a rather domineering move.

The Origin wave and the Star Sea Body fused from the upgrade of the starry sky power were the greatest gains from Susu's Skill fusion during this period of time!

The former gave it powerful attack methods, while the latter almost turned it into a cosmic life form, one step closer to the Star Sea Sprite.

Boom!!!

Then, under the stunned expression of the Forest King, his poisonous sound wave hit a few water balls, but although these water balls vibrated extremely violently, they didn't break!

Instead, its strength seemed to be slowly increasing. This scene directly made the Forest King panic.

The water balls were like vibrating hot kettles, extremely dangerous!

"Not good," it shouted. Right on the heels of that, all the energy balls shot out white and blue wave pillars that swept towards the Forest King.

Under the wave pillar of light, the flowing power of the ocean seemed to have become a help. In an instant, the Forest King felt the pressure of the ocean currents from all directions!!

At this moment, at the bottom of the sea, one was a totem-level life form that had fallen into an away battle, and the other was an invincible overlord with battle power comparable to a totem-level. When the two parties fought, in a short moment, they had already turned the bottom of the sea upside down.

The battle at the bottom of the sea naturally affected the sea.

The Alliance battleship was slowly driving towards the Battle Island, while the Fire God, Jones, was basking in the sun and enjoying the sea breeze on the splinted chair. Everything was calm...

However, at this moment, with a boom, the entire battleship shook violently, almost throwing the Fire God Jones off the chair.

"Damn it, what's going on!!" The ship shook violently, and countless water splashes flew up from the sea, immediately making the Fire God Jones suddenly open his eyes.

"Lord Fire God, the current in the depths of the sea has undergone a violent change. The energy of the entire sea area has directly transitioned from a stable state to a level-8 Berserking state." A subordinate in a battleship suit immediately came to report.

"What the hell!!" The Fire God, Jones, was stunned. "Did that guy, the Forest King, mess around again? He just ate a small fish and shrimp and caused such a big commotion. Damn it."

"It's possible!" The middle-aged man in the yellow battleship suit said, "If this continues, we can't sail normally. It might even cause a tsunami. I'll call Lord Forest King back through the machine."

"Hurry, hurry, hurry." The Fire God Jones had an incomparable headache. They were about to approach the Dong Huang Sea Region. This Forest King better not cause trouble. He didn't want to get into trouble because of the problem of eating above.

Soon, on the battleship, a Mechanic called the Forest King in the depths of the sea through the special communication signal brought by the battleship. The Fire God, Jones, came to the edge of the battleship and looked at the violently shaking sea with a frown.

In the next moment, his expression froze.

In the battleship, everyone also looked over in shock.

A huge vortex formed, and an extremely terrifying pressure gradually came from the deep sea.

The sky suddenly changed. With a boom, two huge waterspouts rose out of thin air and connected to the sky from the deep sea. Moreover, an incomparably miserable croak came from them.

"Jones, save me!!! A Slime wants to kill me!!!"

Right on the heels of that, under everyone's stunned expressions, the waterspout dissipated from the inside. A huge frog covered in frostbite and its body smashed apart floated in midair with a frightened expression.

At this moment, it had already lost one of its four legs and was frozen in the collapsing water.

As for the other waterspout, after it collapsed, it was a Water Slime. At this moment, it was looking at the huge frog unkindly.

"Ning!" Susu didn't expect this guy to be so timid. It didn't fight it at the bottom of the sea no matter what and wanted to run up no matter what. In that case, as it wished, even on the sea surface, it was still its home ground...

Unscientific Beast Taming

Chapter 1050: It's Always the Examiner Who's Injured (3)

"Damn it, what's going on!!!"

At that moment, on the Alliance battleship, the titled legend, Fire God Jones, was stunned. He looked at the huge frog that escaped from the bottom of the sea and the Water Slime floating opposite with a stunned expression.

"Lord Forest King!" On the hull, the Beast Tamer of the Alliance, who had gone to fetch the Forest King with the Fire God, also looked at the Forest King in confusion.

"Cut the crap. I encountered a ferocious beast at the bottom of the sea. This guy is terrifyingly strong. I've already suffered a fatal injury. Jones, let's attack together. Otherwise, none of us can leave today," the Forest King shouted and looked at Susu fearfully.

However, at this moment, Susu's blue eyes had already sensed that something was wrong.

It looked at the Alliance battleship and the huge frog calling for help from the Alliance battleship and fell into deep thought.

At this moment, when the Beast Tamers on the Alliance battleship heard the Forest King's shout, they instantly felt as if they were facing a great enemy, including the Fire God, Jones. However, they looked at the Water Slime. It was difficult to imagine that the ferocious beast the Forest King mentioned was this cute thing.

"What exactly is going on?" Fire God Jones summoned his pet while brainstorming.

"Wait, Water Slime." Then, the Fire God's pupils constricted.

How could there be such a strong Water Slime here?

With this doubt, he quickly thought of a rumor.

It was said that in the World Tournament, one of the pets of this batch's world legend, Shi Yu, was the legendary Blue Sea Sprite.

As for the Blue Sea Sprite, its initial form in the World Tournament was a blue Water Slime!!

Could it be...

Connected to the fact that this place was relatively close to the Dong Huang Sea, the Fire God, Jones, looked at the Water Slime in disbelief and shouted tentatively, "Wait, wait!"

"Blue Sea Sprite!!!"

"Are you the Blue Sea Sprite?"

"Legend Shi Yu's contracted target."

"We're from the Alliance, not enemies, not enemies! Don't attack!"

"I came to Dong Huang this time for the title assessment!"

Apart from the Blue Sea Sprite, the Fire God Jones really couldn't think of a second Water Slime that could heavily injure the totem-level Forest King.

In the World Tournament, legend Shi Yu's Iron-eating Beast suppressed the gods. The Green Dragon and Baby Ginseng instantly killed the totems. Everyone in the upper echelons of Shen Feng knew.

Then it was not strange for the Blue Sea Sprite to have the ability to fight a totem.

"What the hell?" At this moment, seeing that the Fire God Jones was calling it the Blue Sea Sprite and not an enemy, the Forest King was even more shocked. At the same time, it was still thinking about what the Blue Sea Sprite was.

As a frog on land, it was only 200 years old and had also missed the world competition. It really didn't understand the Blue Sea Sprite that hadn't appeared in 3,000 years.

"Ning?" Hearing the other party's words, the corners of Susu's mouth curled up.

As expected, it was really someone from the Alliance.

At that moment, Susu examined the badge of the Alliance battleship and looked at the Fire God Jones, the Forest King, and the Fire God Jones's words echoed in Susu's ears.

"I came to Dong Huang this time for the title assessment!"

Titled assessment?

Susu was silent. Dong Huang seemed to really have a legend who wanted to accept the title assessment of the alliance recently.

Lu Qingyi.

Lu Qingyi's Mermaid Princess even helped train for a few days...

In other words, not only were these people from the Alliance, but they were also from the Alliance to give Lu Qingyi a title assessment?

Susu looked at the big frog. In other words, this guy was Lu Qingyi's examiner??

In an instant, Susu had an indescribable emotion.

"No matter who you are, this guy wanted to eat me just now. I can't let it off easily," Susu said with the telepathy it had learned not long ago.

At this moment, Susu didn't admit its identity, but it didn't deny it either. However, with this image and strength in front of it, the Beast Tamer on the battleship had already confirmed that it was the Blue Sea Sprite.

Now, when they heard the Blue Sea Sprite say that the Forest King wanted to eat it, the Beast Tamers led by the Fire God, Jones, were immediately stunned.

What!!!

The Forest King actually wanted to eat the Blue Sea Sprite??

How bold was this?

"What exactly is going on? Jones, help me!!!" The Forest King shouted. His leg hurt slightly, and one of his legs had been broken. If it wanted to recover, it wasn't something that could be solved with some food.

"Forest King! You wanted to eat Lord Blue Sea Sprite just now?!" Seeing that the Forest King didn't deny it at all, the Fire God Jones already believed 80 to 90% of it in his heart. After all, the Forest King went into the sea to find food.

However, damn it, why did he encounter the Blue Sea Sprite, and it even wanted to eat the Blue Sea Sprite ridiculously!

"What the hell? How would I know who it is... I don't want to eat it. I just saw it and wanted to spar." The Forest King saw that the Fire God Jones' tone and expression were a little strange and immediately said.

The Forest King also knew that it was in the wrong. After all, it was the one who took the initiative to attack first. However, this was clearly not the sea area of Dong Huang and the Dragon Palace.

Did it kick some iron plate?

"Lord Blue Sea Sprite, it's a misunderstanding. We're willing to compensate." The Fire God Jones knew that the Blue Sea Sprite's identity was special, and he knew that Shi Yu's identity was special. He immediately made it clear.

"Sure."

At this moment, Susu also felt bored. It didn't want to argue with them, nor did it want to cause trouble for Shi Yu. It glanced at the frozen frog leg floating in the water and directly swept it over with water.

Susu looked at the huge frog leg and felt that it was enough for Shi Yu.

If it wasn't enough, he would get the other party to compensate a few more!

Sustainable food production+1 again.

It ignored this group of people and directly wrapped the frog leg before returning to the ocean.
