

Beast 111

Chapter 111: Panda Knight Attack

In the silent forest, a huge python nearly seven to eight meters long with obvious dark patterns was entrenched around the darklight grass. It stared at its surroundings cautiously. Its expression was fierce to the extreme, but its heart was in a panic.

It had already sensed the enemy's aura, but precisely because it sensed the enemy's unusual deterrence, it didn't dare to act rashly.

Not far from the dark screen grass, Shi Yu, Eleven, and the others stood behind a huge tree. On the other side, a lone candidate was standing behind another huge tree. There was also a blue centipede with multiple feet wrapped around his body.

The Mad Flow Centipede was a water-type pet of a high-level transcendent race. The Dark Ring Poison Python was also a ferocious beast of a high-level transcendent race, and it was a rare dark-type and poison-type ferocious beast. This Beast Tamer was clearly afraid, because the Dark Ring Poison Python was not to be trifled with at first glance.

If he didn't settle it properly, he couldn't go back alive anymore. His parents would not be pleased about that...

"Are you going?"

At this moment, the sudden sentence shocked the Dark Ring Poison Python and this candidate.

There were others?

This candidate clearly didn't notice Shi Yu and the others.

This was the power of the Perfect Level super vision. The energy vision trait of Perfect Level super vision could directly let Eleven capture the energy fluctuations in a large area. For example, Eleven could almost directly judge the exact amount of energy in the bodies of the Mad Flow Centipede and the Dark Ring Poison Python.

Its judgment was that its opponent was not very strong, only one-fifth of its strength.

"Do you have any Dark Ringed Poison Python or Darklight Grass for your missions? If you do, you go first. After you go out, just add me as a friend and give me a red packet," Shi Yu said with a yawn.

"I'm not, I didn't. I was just passing by, passing by!"

The candidate opposite was speechless. Should he say that he was a good person or a money-grubber?!

However, he gave up on this resource and this ferocious beast. This guy could fight whoever he wanted.

If he had the time, wouldn't it be nice to go and find those low-level transcendent bug-type transcendent ferocious beasts?

Shi Yu and this candidate started communicating through the air.

Dark Ring Poison Python:???

These people weren't very polite?

Although it couldn't understand, why did it feel like it had been mocked!

The Dark Ring Poison Python's eyes turned red. Son of a b*tch, It couldn't take it anymore. It suddenly stretched out its body and opened its huge mouth, wanting to eat the unripe Darklight Grass and escape. It didn't even wait for it to mature. Now that there are people eyeing it covetously, it would be a gain if it ate it. It was a snake, after all. In short, no one else can get it...

"Holy shit."

The series of actions of the Dark Ring Poison Python clearly stunned the candidate on the other side and his Mad Flow Centipede.

It ate it just like that? Not waiting for it to mature?

Shi Yu was also somewhat silent. F*ck, what the heck was with this snake?

You're a ferocious beast that caused the deaths of thousands of people every year, is your temper so weak? Shouldn't you kill us and then silently guard your food until it ripens? What kind of snake just eats it?

However, Shi Yu and the others clearly wouldn't give the snake this chance.

Boom!!!

Just as the Dark Ring Poison Python was about to directly eat the underripe Darklight Grass, an invisible wave instantly spread from afar!

This was the terrifying aura the Dark Ring Poison Python had sensed previously. Previously, it was still very faint, but at this moment, it clearly sensed that the aura was surprisingly terrifying and strong!

Buzz!

At this moment, the Dark Ring Poison Python's movements directly stopped. Its mind was in a daze and even a little dizzy. In order to save physical strength, Eleven didn't use all its strength. In the next second, Buggy did a follow up move. A transparent thread shot out and wrapped around the Dark Ring Poison Python's poisonous body. In the next second, the worm silk caved in and dark red blood splattered. The Dark Ring Poison Python's body was directly divided into two and it was dismembered on the spot!

"Wuu!" "Ji!"

Eleven and Buggy looked serious. They felt that their cooperation was not very smooth.

However, everything happened very quickly. This made the other candidate who was observing in the dark suddenly widen his eyes and take a step back with a hoarse voice. His Mad Flow Centipede also felt a chill in its heart at this moment and trembled all over. Because in their eyes, it was as if nothing had happened at all. The Dark Ring Poison Python directly died, and the scene was abnormally scary.

The sudden change shocked them so much that their hearts skipped a beat. They ignored everything and turned to leave, as if Shi Yu and the others, who had yet to show themselves, were even more terrifying than this Dark-Ringed Poison Python.

“Uncooked Darklight Grass. Its value isn’t high. If there’s no mission, it’s useless for ordinary people to harvest it. The energy will quickly disappear. However, if it’s transplanted into the ruins, there’s still hope of saving it... After it ripens, it can still be sold for tens of thousands. It’s alright.”

“Eh, why did he leave directly?” Shi Yu looked up and shook his head. He slowly walked to the vicinity of the spoils of war and began to clean the battlefield to collect valuable resources.

...

As Shi Yu gained something, the assessment had only started for less than an hour, but pets had already died and candidates had already left the assessment. In the sky above the Island of Trials, in the huge aircraft, many examiners were expressionless as they watched the rapid changes in the data.

They were still too young. It seemed that some candidates still came to participate in the vocation assessment without adequate preparations.

With this kind of strength and quality, they might as well obediently find an ordinary job to support them in their old age. Why did they have to take things so hard and step into the profession door? Did they think that it was just a normal game, a battle of rules?

“When can the Eye of Heaven synchronize the data?” The person in charge of the vocation assessment, Master Qu Jie, asked.

“It’s being loaded,” the technician replied.

“You’re talking nonsense.”

The other examiners smiled and looked at the screen that connected to the Eye of Heaven silently. On it, the assessment data of every candidate was updated in real time.

At the moment, in the highest record, there were already candidates that have hunted five transcendent-level ferocious beasts.

It was the little girl who had mastered the talent of elemental coordination.

This talent was indeed violent. In terms of output ability, she might be the most outstanding candidate this year.

...

At the moment, Shi Yu was still trying to walk out of the Twilight Forest.

He had a panda on one shoulder and a worm on the other. He walked step by step.

After walking for a long time, Shi Yu fell into deep thought.

Why?

He was a Beast Tamer, why did he have to walk himself?

“Eleven.”

“Huh?”

Eleven, who was on Shi Yu’s shoulder, revealed a lost look.

Moreover, it had a bad feeling.

“Come down and get bigger. Then, get on all fours.”

Eleven:???

What for?

Eleven felt uneasy and didn’t dare to go down.

“I’ve carried you for so long. It’s time for you to carry me, right? If we continue like this, the first one to run out of stamina might be me, the Beast Tamer.” Shi Yu chuckled and said, “Hurry, hurry, hurry. Moreover, I think I’ve found the correct way to use transcendent Level Hardening!”

The pandas in this world, also known as the iron-eating beasts, were different. Unlike on Earth, they were used to walking on two legs, but it wasn’t like they didn’t walk on all fours. At this moment, Shi Yu’s intention was very clear. He wanted Eleven to be his mount for the time being. He wanted to ride the iron-eating beasts like how he rode a horse.

Iron-eating beasts could also be mounts! He should have known that he had actually been an Iron-eating Beast’s mount for so long. This shouldn’t have happened.

Moreover, when he rode the Iron-eating Beast, he would always be in contact. Didn’t the conditions for Beast Tamers to harden the whole time be fulfilled?

Shi Yu carried the messy Eleven down and looked at it seriously.

“Sob!” Eleven looked conflicted. What about fighting? Why don’t we let Buggy become a dragon and carry us?

Buggy:???

What did it have to do with it? The Beast Tamer clearly wanted to be a Panda Knight, not a Dragon Knight!

Shi Yu said, “I feel that you still have to do it. The insect skills consume too much physical strength. If you do it, the consumption will be like a drop in the ocean. It’s not even 1% of the usual training volume. It won’t affect anything.”

“Just carry me while doing reconnaissance, and using deterrence.”

“The average level of the ferocious beasts on this Island of Trials is not high. It’s not interesting. The enemy can just be left to Buggy. It’s just nice to train it.”

“Ji!” Buggy expressed that it could. This island was the first step in its rise. As the Green Silkworm at the bottom of the food chain in the transcendent world, it was determined to defeat those top-notch predators and nurture its deterrence.

Eleven: Wuu. (== Ⅲ ==)

“Sob.” Seeing that Shi Yu and Buggy were on the same side, Eleven cried. As it cried, she multiplied into a size that could carry Shi Yu.

It was miserable. The Panda King had directly become a mount. Eleven couldn’t say it out loud, but forget it, who knew that its Beast Tamer could come up with this?

“Actually, Go even bigger. Then, I think I can sit on your shoulder... Forget it, that would be too wasteful of energy.” Shi Yu patted the iron-eating beast under him, feeling very pleased.

As for Buggy, it came to Eleven’s head.

“Wuu!!!” Eleven turned around and asked if they could start moving.

“We still have to wait.” Shi Yu looked at the surrounding trees and instructed Buggy, “Cut down a tree and cut a suitable wooden saber for me.”

Buggy was confused.

He was going to start again?

It was doubtful, but it still did as instructed.

Soon, a suitable wooden saber appeared in Shi Yu’s hand. Seeing this, Shi Yu couldn’t help but chuckle and say, “Eleven, harden!”

Buzz!

At that moment, Shi Yu seemed to be wearing invisible armor. At the same time, the wooden saber in his hand had become countless times harder.

Shi Yu cockily made Eleven take two steps forward. He directly swung his saber at the tree beside him. In the next moment, the huge tree split into two and fell.

“I’m invincible. This wave will definitely not fail..”

Chapter 112: Three Space Skills

Eleven’s hardening, Eleven’s deterrence, his own etherealization, and the support of Buggy.

Even if he went to PK a transcendent creature, with four layers of protection, Shi Yu had no idea how he got injured.

The soul of courting death burned fiercely.

As a simple person, his joy was actually very simple.

As long as there was excitement, it would be enough.

“Charge!”

“Wuu!”

Shi Yu turned into a Panda Knight and let Eleven sprint out of the forest.

It had to be said that with Eleven opening the way, their speed had increased ridiculously.

Moreover, as Eleven ran, it was extremely domineering, and no ferocious beast dared to stop them.

However, this was clearly not what Shi Yu wanted. Under his special request, they took the initiative to find a ferocious beast.

On the ground, there were fallen leaves everywhere. Shi Yu rode on the iron-eating beast and looked at the Gale Sparrow foraging in front of him.

Oh, wasn't this the assessment mission target?

What a coincidence.

This transcendent-level Gale Sparrow had just swallowed an Awakening-level Red-Crowned Snake into its stomach when it immediately welcomed unexpected guests like Shi Yu.

“Jiu!!!!!!”

The Gale Sparrow, which was covered in brown feathers, clearly didn't realize the severity of the problem, because Eleven had retracted its passive deterrence.

At this moment, it only had eyes for the fat caterpillar on Eleven's head.

Slurp. Slurp.

It had just finished eating a Red-Crowned Snake, and the one-meter-tall Wind Sparrow was still not satisfied. Its gaze was sharp and greedy, and the DNA engraved in its blood directly moved.

It hadn't been easy.

It completely didn't expect to see such a fat worm on this island.

Buggy: ` _ `, bastard bird!

“Ji!!!!” Buggy let out a hiss, its whole body trembling slightly, wanting to personally teach its natural enemy a lesson.

Damn bird! It had endured a long time of suffering for this!

“Don't panic, leave it to me.”

However, Shi Yu said confidently.

Don't worry, Buggy, since I've contracted you, your Beast Tamer will protect you well!

He could capture a mere Gale Sparrow easily.

Buggy turned to look at Shi Yu with a dark expression. Can you do it?

“Wuu.”

Under Shi Yu, Eleven said weakly. Even if it didn't trust Shi Yu, couldn't it trust its transcendent Hardening?

Since Shi Yu was willing to play, why not cooperate with the Beast Tamer.

"Ji..." The leader had already said so. What else could Buggy do?

As the man and two pets interacted, the Gale Sparrow felt like it had been insulted, just like the Dark Stripe Poison Python from before. This was too much!

"Jiu!!!!"

It let out a loud cry again. The surrounding leaves vibrated, and green energy waves spread on its wings.

The Gale Sparrow was a medium-sized wind-element bird-type pet. It was a medium-level transcendent species. It had racial skills such as Wind Wings, Whirlwind Drill, and Wind Feather.

Wind Wings was a speed raising skill, while Whirlwind Drill formed a small whirlwind on the sharp long beak with extremely strong penetration power!

At this moment, the Gale Sparrow's Wind Wings and Whirlwind Drill were activated at the same time. It suddenly attacked the Green silkworm on Eleven's head from the sky, planning to chop up and eat its prey first!

"If you use the long-range skill Wind Feather, I might be a little afraid of you."

"Unfortunately, you used the wrong skill."

On the iron-eating beast, Shi Yu looked at the green light that flashed before his eyes. He raised his wooden saber with a calm expression.

In the next second, Eleven's deterrence erupted. The Gale Sparrow suddenly stopped in midair. At the same time, Shi Yu, whose whole body and weapon had hardened, swung his wooden saber!

Profundity: Great shock!

At this moment, it was as if Shi Yu's saber had swung out, displaying an extremely powerful aura that shocked the Tempest Bird. The Tempest Bird had no place to dodge, and it was directly smashed to the ground like a meteor in mid-air!!

Bang!!!

Shi Yu's transcendent physique, in combination with Eleven's transcendent Hardening, was surprisingly effective!

"Damn it!"

With a swing of the saber, the Blazing Wind Sparrow naturally wouldn't lose its ability to fight because of this. Buggy attacked in time, and at this moment, Shi Yu fell into deep thought with an indignant expression.

"Next time, can any of you record this for me?" Shi Yu felt that such a handsome moment should be preserved.

Eleven, Worm:???

“Wu!” Eleven’s watery eyes widened. Which jerk said that giving battle recordings was meaningless just a while ago?!

Why was it that when it came to him, it wasn’t like that anymore!!!

Shi Yu scratched his cheek and said, “Did I say anything like that? Damn, at most, I’ll record it for you during the ranking battle.”

“I’ll hire a professional cameraman to record it for you, alright!?”

Just like that, Shi Yu completed an assessment mission. For some reason, the Eye of Heaven that was in charge of recording paused for a moment.

...

After satisfying Shi Yu’s Swordmaster Addiction, Shi Yu and the others finally placed their focus on traveling and gathering rare resources.

It took about an hour before Shi Yu and the others came out of the dark and humid forest.

Outside the forest, there seemed to be a valley.

Eleven climbed onto a higher rock and looked around. Then, it suddenly looked at the sky and cried out.

“Ji ji!!!”

“Ji!!”

Apart from Eleven, Buggy suddenly became excited too. He spat out a worm silk and sensed something with it.

Shi Yu also heard their conversation.

Eleven: “I sensed a strong energy wave nearby. Moreover, the energy wave is very similar to the bug’s skill wave!”

Buggy: “Yeah, that’s right, it’s spatial fluctuations!”

Both of them looked at the blurry sky in the distance.

“You mean, a spatial creature is fighting?” Shi Yu was slightly stunned and patted Eleven without another word.

Then what are you waiting for!!!

To the venue!

In the next second, Eleven leaped down from the mountain rock.

Shi Yu: “Damn, slow down.”

...

In the valley.

Where Shi Yu and the others were headed.

A handsome young man about 1.5 meters tall, with a lean figure and fair skin, stood calmly on the ground.

Not far from him, a white butterfly creature with huge transparent wings was fighting nine transcendent creatures alone.

The nine transcendent creatures were all killing bees of low-level transcendent races.

Although they were only low-level transcendent races, these nine Killer Bees had reached transcendent level on a rare occasion. At this moment, they were staring at the enemy in front of them crazily with their dark red eyes. The spikes on the tail of their stomachs were ready!

However...

Even if any professional Beast Tamer or intermediate-level Beast Tamer encountered these nine transcendent-level Killer Bees, they would still feel a headache and fear. At this moment, facing this huge white transparent butterfly, they felt as if it didn't even care.

Every time they stabbed the butterfly with their tails, they either went straight through the butterfly's body, as if they had stabbed air. That, or the butterfly teleported to other places, making them hit nothing.

The nine Killer Bees weren't stupid. They also wanted to directly attack the humans in the distance, but the nine of them seemed to be restricted in a certain space and couldn't leave this area at all. Every time they flew far, it was like hitting a transparent wall. It was very aggravating.

After playing around for a while, the patience of the nine Killer Bees had already been worn down to the limit.

At this moment, the teenager slowly said, "Let's finish them. Someone's here."

In the sealed space, the transparent butterfly nodded gently when it heard its master's command. In the next moment, the space in the domain where the nine Killer Bees were located seemed to tremble, and spiderweb-like cracks appeared. Then, strong vibration waves gathered inside. Almost instantly, the nine Killer Bees exploded and died...

Bang!!!!

On a rock somewhere, Shi Yu's heart surged when he saw this shocking scene!

"This age... is that Yin Zhengfan?"

"It's just f*cking ridiculous. Apart from the Zonyan Rock Beast that contracted a low-level monarch race, there's actually a spatial pet??"

[Name]: Spatial Crystal Butterfly

[Attributes]: Space

[Race Level]: High-level commander

[Race Skill]: Instant Transmission (Advanced spatial skill, can be used for short-distance space jumps).

Concealment (High-level spatial skill, can hide the body in an alternate space to avoid damage)

Space Shackles (Advanced spatial skill, can create a certain range of sealing space, and can cause spatial oscillations in this range to cause damage).

It's one of the strongest commander races. Although it doesn't have any super skills, it's comparable to a monarch species creature.

At this moment, information about this creature appeared in Shi Yu's mind.

Slowly, his gaze flickered.

He had previously asked the Archeological Seven Elites if there were any students who cultivated spatial pets in Ancient Capital University. The answer he got was very disappointing. There wasn't even one in the huge Ancient Capital University. It was obvious how rare spatial pets were.

However, right now, three high-level spatial skills appeared in front of Shi Yu.

And every one of them had extremely high tactical value!

Teleportation, the most powerful life-saving skill of traveling!

Concealment was similar to Shi Yu's etherealization. It was also a life-saving skill!

Space Seal, Strong Control and Output Skill, invincible!

What was this? Heaven's love?

At the same time, Yin Zhengfan, who had finished the battle below, raised his head and looked at Shi Yu. The young man looked handsome and elegant, but there were other qualities in his gaze that others couldn't see.

Shi Yu met his gaze and fell into deep thought.

"I have to find a way to replicate it! Otherwise, I won't be able to sleep tonight.."

Chapter 113: Evolution Countdown

"May I help you?"

The candidate of the Spatial Crystal Butterfly looked up in Shi Yu's direction.

Then, there was a slight silence.

Because the appearance of the person was a little strange, no, very strange.

On the mountaintop, Shi Yu and Buggy were riding the Iron-eating Beast. Shi Yu even held a wooden sword. This shape made the twelve-year-old boy a little confused, but he felt that it was awesome.

So handsome...

"Hello."

Shi Yu patted Eleven and smiled as if he was a good person.

During the process of coming down, he looked at Yin Zhengfan, who had straight hair like a girl's head. He was clearly a boy, but he was even more delicate than a girl. His smile was even wider.

He looked like a polite and obedient child. Perhaps stealing the butterfly's skills would go smoothly?

"Wuu." Soon, Eleven carried Shi Yu down.

Shi Yu and Eleven were alright, but Buggy looked at the Spatial Crystal Butterfly flying back to the young man in admiration.

So powerful.

And so handsome.

What would it look like after it evolved?

"Are you Yin Zhengfan?"

"The candidate who's first in the basic test." After Shi Yu got down, he got down from Eleven and looked at the other party.

In the face of Shi Yu and the others' questions, Yin Zhengfan's expression did not change. He nodded and said, "It's me."

"As expected, it's you! You can participate in the vocation assessment at the age of 12. Impressive. I was still playing with mud at your age," Shi Yu first said what the other party might like to hear.

"Thank you. I actually have a lot to learn." Yin Zhengfan.

"By the way, my name is Shi Yu..."

"Hello." Yin Zhengfan nodded, thinking that Shi Yu definitely had something to do.

"Well, I heard you contracted a pet of a monarch's race. I didn't expect you to have a Spatial Crystal Butterfly..." Shi Yu looked at the Spatial Crystal Butterfly and asked curiously, "Can I ask you a question?"

"

"When the Crystal Butterfly evolved, what did it use to break out of the cocoon?"

"Did it rely on Concealment to directly ignore the cocoon and come out, or did it rely on Instant Transmission to directly teleport out, or should I say, space shackles?"

"There's no other meaning. As you can see, I've also contracted a Green Silkworm and want to nurture it in the direction of the spatial system, so I'm more curious." Shi Yu revealed a bright and warm smile.

Yin Zhengfan looked at the bugs on Eleven's head.

Want to nurture it in the direction of space?

Shi Yu had an evolution plan?

If there was, why would he ask such a question?

However, Yin Zhengfan still answered, "Relying on spatial shackles."

The cocoon could be seen as a sealed space. The Spatial Crystal Butterfly spreading its wings inside caused spatial fluctuations. Whether it could shatter the cocoon determined whether it could evolve perfectly.

And Concealment and Instant Transmission were racial skills that could only be awakened after breaking through the cocoon.

"Is there anything else?" After a simple explanation, Yin Zhengfan, who didn't look like a young genius, asked again.

"There's one more." Shi Yu hurriedly said, "I heard that the Instant Transmission skill can also carry people. Can you let me and my Green Silkworm experience it? Of course, it's not a wasted experience. We will pay you."

"Because I want it to evolve into a spatial system, we're more curious about the experience of spatial movement skills."

Instant Transmission could carry people and move together, but without reaching transcendent level Instant Transmission, it could only teleport with the carrier!

Shi Yu wanted to use this method to come into contact with the Spatial Crystal Butterfly.

Yin Zhengfan showed a troubled expression.

"Carrying someone in Instant Transmission should consume a lot of physical energy, right? I can use this as a reward." Shi Yu took out an Ethereal Stone.

The Beast Taming Spatial Strengthening Talent was a money-sucking business. It urgently lacked spatial-type resources. Shi Yu knew this. A piece of Ethereal Stone for a Teleportation Experience Card. This was a very good deal, right!

"Ethereal Spirit Stone..." As expected, Yin Zhengfan's gaze was attracted by the Ethereal Spirit Stone.

It was indeed as Shi Yu had imagined. This talent to increase the level of space was very difficult. Cultivation resources like the Ethereal Spirit Stone were almost necessary.

Yin Zhengfan completely didn't expect that Shi Yu would take out an Ethereal Stone worth millions as a reward for one experience. From the looks of it, he was very sincere...

However, Yin Zhengfan's next words made Shi Yu's heart skip a beat.

"I don't want to."

Shi Yu: “?”

This damn child, didn't he know to feel sorry for his legendary father? He can't always let his father provide cultivation resources. It's time to learn to earn it himself!

“This is too expensive.”

“I don't want your Ethereal Stone. I can let the Spatial Crystal Butterfly give you a taste of Instant Transmission, but I have a condition.” Yin Zhengfan looked at the iron-eating beast beside Shi Yu.

“I've also heard of you guys. Shi Yu, Iron-eating Beast, basic test energy level 3186. Can you let it fight my Spatial Crystal Butterfly?”

Compared to the Ethereal Spirit Stone, Yin Zhengfan was more interested in the combination of Shi Yu and the Iron-eating Beast.

The reason why he came to participate in the vocation assessment at this age was to train himself. Because if he waited until he was a little older, the vocation assessment would be completely free of pressure for him.

His goal was to surpass his father and climb to the highest level, so he wasn't prepared to let go of any opportunity to improve himself. He might not necessarily have a chance to encounter Shi Yu in the next ranking battle, so it was better to challenge a candidate with pretty good strength now.

“Let the Spatial Crystal Butterfly fight my Iron-eating Beast?” Shi Yu was slightly stunned. “That's simple.”

“Alright,” Yin Zhengfan said gently.

But soon, Yin Zhengfan fell silent and had a worry.

If they fought now and defeated Shi Yu's Iron-eating Beast, would it affect Shi Yu's subsequent assessment?

He didn't mind. After all, no matter how the Spatial Crystal Butterfly was exhausted, there was still a pet of a monarch species. However, apart from an Iron-eating Beast, Shi Yu seemed to only have one Green silkworm with combat power close to zero.

“The battle will be in three days. When the assessment is about to end, I'll wait for you here,” Yin Zhengfan said after thinking about it.

Three days later?

“Alright.” Shi Yu nodded again. After a few seconds, he deduced what the other party was thinking.

Good child.

This Yin Zhengfan seemed to have decided to postpone the battle in order to not affect his assessment.

Shi Yu recalled how he had fought with his friends for the TV remote control at the orphanage when he was 12 years old. He felt that it was completely incomparable. A good upbringing was really important.

“Then three days later.”

Although he felt that the battle now wouldn't affect anything, Shi Yu still nodded in agreement.

At that moment, as Shi Yu finished speaking, Yin Zhengfan nodded. His Spatial Crystal Butterfly immediately waved its transparent water-like wings and slowly flew towards Shi Yu.

"Buggy," Shi Yu called out to Buggy, who immediately climbed onto Shi Yu's shoulder with a "Ji, Ji, Ji".

Apart from secretly learning skills, Shi Yu indeed had the intention of letting Buggy experience spatial movement skills in advance.

Perhaps it could increase the affinity of Buggy and the spatial element.

At the same time, Eleven was stunned.

"What about me?"

These guys went to experience Instant Transmission, what about Eleven?!

"Wuu!!" Eleven immediately shrunk back to a size smaller than a worm. It pulled Shi Yu's pants and climbed onto Shi Yu's shoulder.

It planned to experience it together.

This scene stunned Yin Zhengfan across from him.

Multiplication?

An iron-eating beast that could multiply?

Yin Zhengfan fell into deep thought. Forget it, a transcendent-level Iron-eating Beast with more than 3100 energy points was already very unscientific in itself, so it was fine if it could multiply.

As expected, just as his father said, the world was very big. There were all kinds of Beast Tamers and pets.

And if he wanted to become the strongest Beast Tamer, he had to meet different people and beasts one by one and defeat them!

Yin Zhengfan gradually revealed an imperceptible solemn gaze.

"Then, I'll be troubling you."

At this moment, on the other side, Shi Yu stretched out his hand, indicating for the Spatial Crystal Butterfly to come into contact with his hand. At the same time, he activated his telepathy and said to the Spatial Crystal Butterfly.

"Mimi??"

Shi Yu could also communicate with it. Clearly, this Spatial Crystal Butterfly did not expect this. It nodded slightly and responded politely like its owner, landing in Shi Yu's hand.

It was difficult to imagine that such a Spatial Crystal Butterfly had instantly killed nine ferocious and fatal killing bees just now.

At this moment, the Spatial Crystal Butterfly landed. Shi Yu activated the skill index at the same time.

[Confirm recording]

Skill: Teleport

Skill: Concealment

Skill: Space Shackles

Status: Can be taught

Shi Yu copied three high-level spatial skills in one go, and there were only two more skill slots left.

At the same time, he turned to look at Buggy on his shoulder.

All of them could be taught.

This was related to the Buggy's full-level spatial-element Worm Silk and the fact that it had already mastered the spatial skill, Phantom Illusion.

It could now be considered a halfway spatial Green Silkworm.

In comparison, Eleven didn't have any spatial talent at the moment. Apart from its main metal attribute, its thunder attribute talent was pretty good. After all, it quickly comprehended the Thunder Palm.

After the replication was completed, Shi Yu looked fine on the surface, but his heart had already bloomed like a flower.

Alright, there were four spatial skills. At the same time, the spatial shackles and illusions could be used to break out of the cocoon. The preparation of the skills before the evolution of the worm was almost completed.

Of course, like deterrence and multiplication, he could also teach it to Buggy in the future. It was also a pretty good way to use deterrence points to increase the bugs' mental attributes.

After these skill points reached proficiency level and above, it would be best if the Perfect level guaranteed that they could break out of the cocoon 100%. Next, Shi Yu only needed to prepare the corresponding spiritual and spatial evolution materials before he could let Buggy try to evolve.

Because their evolution method was relatively unique, there was no need to consider a specific evolution ingredient formula for the DIY evolution path at all. They just needed to find rare materials with corresponding attributes.

At the moment, Shi Yu had already made plans.

He had obtained a pretty good ranking in the vocation assessment. After entering the Ancient Capital University, if there were resources reward, he planned to use the Ancient Capital University as a platform to find spatial evolution materials.

As for Eleven's evolution materials, Shi Yu felt that after the Iron-eating Beast Evolution Theory was announced, as a Beast Tamer who had discovered the Iron-eating Beast's evolution method, it shouldn't be difficult for him to obtain them. He might even be able to get a very large convenience and discount!

At the thought of this, Shi Yu immediately felt that the two pets under him had the potential to become overlords of their species.

Evolution was just around the corner.

...

At the same time, on the professional assessment committee's side, the nine examiners finally had the video data synchronized with the Eye of Heaven.

Due to the huge amount of calculations, they had to update the assessment mission progress in real time and calculate the points of more than 6,000 candidates. They wanted to rescue the candidates at the first moment after they decided to give up the assessment. Only now did the Eye of Heaven upload some video information to the examiners.

At this moment, the nine examiners had also waited for a long time. After all, they still had to combine this assessment to choose 16 key seed candidates.

How to let these candidates perfectly display their strength and potential in the ranking battle was something they needed to consider in the future.

At the current assessment mission progress, no candidate had completed two missions. However, in terms of points, there were already candidates with 16 points. It was equivalent to hunting 16 transcendent creatures.

"It's Yin Zhengfan..."

The examiners watched the replay data of Yin Zhengfan's video. Then, they saw the process of Yin Zhengfan bringing the Spatial Crystal Butterfly to instantly kill transcendent-level creatures, including the scene of the Spatial Crystal Butterfly 1VS9 instantly killing nine transcendent-level Killer Bees.

All the examiners' gazes were stunned, feeling that it was ridiculous. They didn't expect that Yin Zhengfan actually had a Quasi Monarch Race's Spatial Crystal Butterfly!

He felt that there were very few candidates who could face his Zonyan Rock Beast and the Spatial Crystal Butterfly at the same time...

"If Legend Yin's son really takes first place in the end, there's nothing bad about it," the master examiners said after a moment of silence. In any case, they were all Ancient Capital people. It was the age that might agitate the other candidates...

Then, they watched the replay of Zhang Qianyi's battle video, which was currently second in points.

In the video, a black cloud followed beside a woman. The black thundercloud blew gently, and a high-level skill, Storm, and another high-level skill, Thundercloud Lightning, formed a combination skill that was several meters in size. It directly killed the five transcendent Rock Wolves in front of them.

In terms of the visual impact and real damage caused by skills, this one was better. High-level skills with different attributes were actually casually combined. This combination skill was probably the highest among this batch of candidates.

Whether it was Yin Zhengfan or Zhang Qianyi, the current situation was all easily crushing the ferocious beasts they encountered.

All the examiners nodded and gave high recognition.

Then, they began to look at the current performance of the candidates one by one according to the results of the first basic test. Although the performance of the third candidate, Miao Dongdong, was inferior to the first two, he had a parasitic Gu that parasitized the Emerald Tree Python. Similarly, no matter what transcendent-level ferocious beast they encountered, they would end it with an instant kill.

Overall, their performance was indeed worthy of their basic test results.

Then, as the examiners looked at Shi Yu's current video data, they fell silent collectively.

The first transcendent creature Shi Yu hunted was the Dark Poison Python.

In the scene that the examiners could see, Shi Yu was leisurely leaning against a tree. On his shoulder was a super small Iron-Eating Beast and a Green Silkworm...

"Why is that Iron-eating Beast so small? It doesn't match the basic test data at all."

"Multiplication, I heard that one of the racial skills of the Iron-eating Beast in its evolution form is Multiplication. Could it be that Shi Yu, this little Iron-eating Beast, has comprehended Multiplication?"

"It's possible..."

"But what's with that green worm..."

Everyone looked at the video again.

In the video, the Dark Poison Python in front of Shi Yu and the others wanted to swallow the Darklight Grass in one bite. At this moment, the Dark Poison Python was stunned. Then, its body exploded into pieces...

It was extremely sudden!

"What's going on!!!"

The examiners were stunned. Because during the broadcast just now, they didn't see Shi Yu and the others attack at all!

The Dark Poison Python directly died for no reason!

The examiner, Master Qu Jie, had an extremely serious expression. As he chose to replay it, he said, "Look carefully."

The video was continuously paused. The scene before and after the Dark-striped Poison Python was insta-killed was fixed on Eleven and Buggy's expressions and movements.

At a certain moment, Eleven's pupils suddenly constricted, and its expression was extremely dignified. A nearly corporeal spiritual wave that was difficult to see swept over.

The worm didn't seem to make a move, but its mouth clearly had a standard silk spitting action. However, the worm silk that it spat out was transparent.

Everyone looked back and realized that Shi Yu and the others had indeed made a move... However, the process of making a move shocked the examiners.

"That's... deterrence?"

The examiners' expressions were incomparably shocked. They didn't expect that Shi Yu's Iron-eating Beast would actually awaken its deterrence in advance. However, this was still alright. What shocked them the most was that the Dark Stripe Poison Python was actually killed by the green worm's silk!

"transparent worm silk, even if it's a perfect-grade worm silk, it won't have any obvious properties... It's all invisible." The head of the assessment, Master Qu Jie, watched the video in silence.

Through his words, everyone analyzed the implied meaning.

Transcendent level Worm Silk...????

How was this possible?

The masters were shocked, even more so than when they saw the spatial crystal butterfly.

In Dong Huang, the second silkworm that had grasped the transcendent level of Worm Silk had appeared?

"Not only that," Master Qu Xie said in an incomprehensible tone. "Even if it's a transcendent insect thread or an awakened-level Green Sponge Insect, it's definitely impossible for them to instantly dismember the Dark Pattern Poison Python with the insect thread."

"Although the Dark Pattern Poison Python is not a transcendent creature known for its defense, it is still a high-level race. Moreover, its growth level is at the supernatural level. This Green Sponge Insect... The growth level of this Green Silk Worm has probably been nurtured to the transcendent level by that participant!"

As soon as he finished speaking, the meeting room fell silent.

They looked at Shi Yu and the green worm in the video and felt like they had seen an unscientific pair of weirdos.

"Ridiculous."

"He's the same as Yin Zhengfan. Not only is his first pet ridiculous, but his other pet is also ridiculous!"

The examiners hurriedly looked at Shi Yu's next video information. Compared to those head candidates, Shi Yu's hunting points didn't seem to be much, but he had completed one assessment mission. They quickly opened it to see Shi Yu's further performance.

Then...

He saw the scene of a Beast Tamer riding a panda and holding a wooden sword, slashing down the Gale Sparrow with a sword.

His posture and expression made him look like a master who had been immersed in the way of the sword for decades. However, it was a little strange.

Perhaps because the Eye of Heaven had lived for a long time, it even playfully stuck a thumbnail at the side, as if it was giving this scene a thumbs up. This was the first time that the Eye of Heaven, which usually only edited simple videos, had done something like this. That was enough proof of how surprising this whole thing was.

All the teachers :●▽●?

This... this... what the hell was this!!!

Why did the scene change so quickly!

There was something wrong with this candidate called Shi Yu...

...

At the moment, ordinary candidates were struggling to survive. They tried their best to choose some weak transcendent creatures to hunt.

A slightly stronger candidate faced the danger calmly and searched for his assessment mission target.

The candidate at the head, on the other hand, arrived at the Island of Trials and went through it as if he were just taking a stroll in his garden.

Apart from that, there were also some candidates with clear goals.

For example, Yu Shu, who had a young Nether Bone Dragon and a dragon soul, seemed to be looking for something.

"I heard that there's a Dragon-type resource, Dragon Soul Grass, on the Island of Trials. I wonder if it's true. Where exactly is it..." Yu Shu rode the bone dragon and wandered around with a conflicted expression.

Dragon Soul Grass was a third-level dragon-type and spiritual-type resource, but its value was comparable to other fifth-level resources. This was because it was born from bathing in dragon might. It could allow the deterrence effect of ordinary creatures to be close to that of dragon might. It was also a rare resource that could allow creatures before the monarch level to have a chance to awaken deterrence skills in advance.

This resource was still very attractive to Yu Shu, who was half a Dragon Tamer.

Therefore, at the moment, not every candidate's goal was missions and points. For example, Shi Yu had completely forgotten about that at this moment and was excitedly experiencing Instant Transmission with Eleven and Buggy.

"Impressive."

"So handsome."

"Exciting."

“Wuu!” “Ji!”

Shi Yu, Eleven, and Buggy kept praising the Spatial Crystal Butterfly that brought them into a flicker.

Due to telepathy, the Spatial Crystal Butterfly could clearly feel the praise of outsiders, and it couldn't help but maintain a good mood.

“Telepathy talent?” When Yin Zhengfan saw that Shi Yu was playing so happily with his Spatial Crystal Butterfly, he immediately felt that something was strange. He kept feeling like he had missed something... Perhaps it was an illusion..

Chapter 114: Correct Usage of the Skill Index

Happy times were always very short.

As Yin Zhengfan and Shi Yu both wanted to continue the assessment, after Shi Yu and the others experienced Instant Transmission, the two of them bid farewell to each other.

He also agreed to return here to battle before the assessment ended to determine the winner.

“Three days later...”

Shi Yu watched Yin Zhengfan and the Space Crystal Butterfly leave and smiled. He quite liked this child.

Not only was he polite, but he was also easy to talk to. His pets were also rare and their skills were high-level. He really wanted to make friends with more of his pets.

“How do you feel?”

Shi Yu asked Eleven and Buggy, “Do you want to learn?”

“Ji!” “Wuu...”

Buggy's eyes lit up, finding it very interesting.

In the blink of an eye, it teleported to a very far place. How magical!

It was just that it was a little carsick during the teleportation process.

It wondered if it would be better when it was the one doing it.

Compared to Buggy's yearning for new skills, Eleven was relatively calm.

As a skill master, Eleven was analyzing the disadvantages of Instant Transmission.

After all, Eleven had heard that the child wanted the Space Crystal Butterfly to fight it.

Therefore, it had to seriously analyze its opponent's abilities.

Due to its attributes, this Space Crystal Butterfly's strength was still very ridiculous.

Even for some low-level monarch races, the outcome of a battle between ordinary transcendent-level creatures with super-level skills versus this butterfly was still unknown.

This was because of the attributes. Among the major attributes, space was the king, and time was the supreme. It and Buggy often saw this saying on the Internet.

From this, it could be seen that the space element was very powerful!

If he wanted to fight this Space Crystal Butterfly, the battle strategy that Eleven could think of was to counter speed with speed!

Although the Space Crystal Butterfly's teleportation speed was very fast, its natural flying speed and reaction speed might not necessarily be stronger than it.

No matter how fast Instant Transmission was, it still required time to activate. Moreover, this move was not an attack skill, so it also required time for the reaction time when the Space Crystal Butterfly attacked.

Eleven felt that it was enough as long as he could use this period of time to instantly kill the Space Crystal Butterfly with the super high-speed increase brought about by the Perfect Level Thunder Palm.

Moreover, it had a deterrence skill that could limit the reaction speed of the Crystal Butterfly.

"Your analysis is pretty good."

Shi Yu nodded and said, "The proficiency of the Space Crystal Butterfly's Instant Transmission, Concealment, and Space Shackles shouldn't be very high."

"In terms of skill proficiency, you have a huge advantage. In terms of energy, you should also have discovered it just now, right?"

Eleven nodded heavily. According to its super vision, the total energy of that Space Crystal Butterfly might not even be two-thirds of its total. Therefore, if it was a battle of attrition, Eleven had a higher chance of winning.

Shi Yu and Eleven analyzed the flaws of the three spatial skills one by one.

"Ji..."

Buggy looked bitter. Stop analyzing.

They were such cool skills but after the analysis, why did it suddenly feel like it wasn't amazing?

It made Buggy have the illusion that even if it learned it, he still couldn't defeat Eleven.

"Haha."

Shi Yu smiled. It was not a big problem, not a big problem. The upper limit of these three skills was still higher than the skills Eleven had mastered at the moment.

Analyzing the battle chances of Eleven and the Space Crystal Butterfly was completely based on Eleven's high skill proficiency.

As long as one of the skills of the Space Crystal Butterfly reached expert level, the pressure on Eleven would be much greater.

Regarding this, he needed to be careful. However, Shi Yu judged that the other party's skill proficiency shouldn't be high.

After all, Yin Zhengfan and the Space Crystal Butterfly were not that old. Moreover, skill proficiency was a skill that was more complicated the higher the level, and the harder it was to increase skill proficiency.

A low-level skill could be mastered after a pet trained hard for a year.

However, for a high-level skill to reach expert level, the amount of training needed was several times that of a low-level skill.

This was also why the consumption of points when Shi Yu raised high-level skills was much higher than low-level skills.

For example, for super skills, perhaps a monarch's pet might not even be able to upgrade from entry-level to proficient level after years of hard work.

The difficulty of raising the proficiency of high-level skills was too high. This also gave some low-level pets a chance to defeat strong enemies by using combination skills and profundities formed by low-level skills...

"If you learn Instant Transmission and we upgrade it to transcendent level, Eleven won't be able to defeat you even if he dies of exhaustion," Shi Yu said to Buggy.

Buggy was again in unexpected ecstasy.

"Wuu!"

Eleven pouted.

Tsk.

Stupid worm. It actually placed its hope of defeating it on the additional points. It had no ambition. It looked like it had been completely corroded.

When the Worm's Instant Transmission reached the maximum level, Eleven firmly believed that it would have definitely mastered a skill that could shatter space and would be also maxed out by the Beast Tamer!

Everybody knew how to get points!

Everyone stood on the same adding point line. They competed in hard work. In this aspect, Eleven was no weaker than a beast.

...

Then, Shi Yu took the wooden sword and rode Eleven to start a new adventure.

There were indeed many transcendent creatures here. Before long, they encountered another transcendent-level ferocious beast, a water-element Mad Python.

Shi Yu was speechless. Why were there so many snakes?

And they were all pythons!

Weren't there any snake spirits like Medusa or Little White and Little Qing?

That would be more exciting to chop...

“...”

At this moment, the dark-blue giant python was circling by the rock. It stared at Shi Yu and the others in cold blood and decided if it wanted to eat more later.

It was mainly because it had never eaten such a strange creature before and didn't know if it was delicious.

“There seems to be a lake ahead.”

After discovering the water-elemental ferocious beast, Shi Yu seemed to feel that the air had become much more humid. He immediately made a judgment.

He was familiar with the Mad Python. It had the Race Skill Maddening and Torrent Tail. Back when he was training at Mt. Tian Mang, there seemed to be a small Boss called Mad Python. At that time, Shi Yu even had the thought of replicating Mad Python. Madness, hardening, multiplying sounded fierce, but this was the first time he really encountered a Mad Python.

Having a water-type ferocious beast meant that there was a water source...

He had a mission, and that was to obtain water-element resources. Therefore, it was very normal for there to be lakes and rivers near the landing point.

“Hiss...”

Shi Yu, Eleven, and Buggy still chose to ignore the Mad Python and think about other things. This made the Mad Python extremely silent and had the urge to go crazy.

Just as Mad Python was thinking, Shi Yu suddenly looked at it.

“Have you ever been slashed at the speed of light?”

Mad Python: ???

After Shi Yu finished speaking, he slowly raised the saber.

In the next second, Perfect Thunder Palm, Transcendent Level Hardening, Expert Level Deterrence, Perfect Level Super Sight activated at the same time!

Lightning wrapped around its four limbs as it erupted with a terrifying speed. Following that, Eleven and Shi Yu's figures flashed like a bolt of lightning and instantly arrived beside the Mad Python. When the Mad Python reacted, the wooden sword had already stabbed into its head and beheaded it.

Crack...

“Profundity, Thunder Flash...”

Shi Yu's voice slowly fell. His body and hands were trembling. After all, his speed was too fast. If Eleven hadn't used hardening to stabilize him and used his super vision to accurately stab the wooden sword into the Mad Python's body, Shi Yu would have been sent flying like a worm.

In the distance, Buggy crawled up in confusion. He looked at the cool Beast Tamer and the extremely cooperative leader in front of him and felt depressed.

Couldn't they bring it along?

It could use the ability of illusions to add special effects! It wasn't completely useless!

At this moment, the Mad Python did not know what had happened at all. In the sky, The Eye of Heaven was shocked for the second time after observing more than 6,000 candidates.

As a monarch-level pet, it could naturally tell that the reason Shi Yu could successfully posture was all because his pet was assisting. But, were these guys doing a movie?? This was a vocation assessment!! How could you guys do this!

It saw that other candidates were working hard to use their Beast Taming Talent to strengthen their pets and let their pets hunt.

Shi Yu... He let his pets assist him crazily while he killed the enemy... How could he do this?

The Eye of Heaven was silent. It couldn't take this. It had to edit it seriously and shock all the examiners.

...

Before long, Shi Yu and the others arrived at the edge of a lake.

This lake looked calm, but Shi Yu felt that there was killing intent hidden. Transcendent creatures were probably underwater.

However, they still had to make a fuss over the lake.

That was because there were a few Water Lotuses on the lake's surface.

The water lotus was in the center of the lake, very far from the shore.

In this situation, it was really difficult to collect them without water-element and flying-type pets...

They were really bullying Beast Tamers who only cultivated Iron-eating Beasts.

"But I have two cards. How can you target me?"

Shi Yu chuckled. He didn't expect that he would complete the so-called assessment mission in less than half a day.

What did it mean to be fully prepared? What did it mean to be crushed by strength...

"Buggy, worm silk, go and get the water lotus."

Looking at the water lotus hundreds of meters away, Shi Yu instructed the worm on his shoulder.

"Ji..." Buggy understood and spat out a long transparent worm silk, flying away.

Very quickly, with a whoosh, the water surface was sliced open. A water lotus was plucked by the worm and quickly swept back!

There were no obstacles during this process.

Only when the water lotus was swept to Shi Yu's side did the lake suddenly tremble.

Boom!

The water surface seemed to have exploded, and an extraordinary high-level elemental creature, the Wildflow Fairy, suddenly crawled out of the lake in the form of a waterspout!

In addition, all over the lake, dragon carps of low-level transcendent races and praying rain frogs of medium-level transcendent races also appeared. They were basically at the awakening level.

Shi Yu looked at the changes in the lake and the water lotus beside him. He was basically certain that the boss of this lake was this Mad Flow Fairy.

[Name]: Mad Flow Fairy

[Attributes]: Water

[Race Level]: High Transcendent

[Race Skill]: Mad Flow, Water Wall, Purification

The Mad Flow Fairy was a rather strange elemental creature.

It liked water very much. Many floods and torrential rain were caused by it organizing a large number of water-type creatures. Its habit was to turn all land into water.

In comparison, the Dragon Carp and Rain Suppliant Frog that appeared were relatively harmless creatures. To be able to survive in such a place... It must be because of the protection of the Wildflow Fairy.

Mad Flow Fairies that had the cleansing skill were still very popular with other water-type creatures because they could cleanse water sources and increase the quality of the water source. Therefore, they were also called Cleansing Water Fairies.

Resources like water lotuses were actually mainly used to cleanse the water quality. Therefore, when Shi Yu took one away, the creatures in the lake immediately couldn't stay any longer.

"Boom..."

Under the roar of the Mad Flow Fairy, dozens of water-type creatures popped their heads out, full of intimidation.

"Wuu!!!!"

On the land, Eleven raised its head and roared at the creatures that appeared in the lake, showing some deterrence.

In the next moment, all the water-type creatures, including the Mad Flow Fairy, sank into the water and immediately slipped away. They seemed to be saying that it was fine, that they should just take it. The water quality here was already good enough, it didn't matter.

In nature, it was also so realistic. The fist was the law.

"Eleven, is there any way for me to split open the lake with a sword?"

Eleven: (□)!!

This guy was really pushing things!

"Ji!!" Buggy hurriedly said. It had a way, it had a way.

Shi Yu just had to pretend to swing his sword. It could use the transparent worm silk to simulate sword aura while tearing open the lake. In this way, it looked like Shi Yu had cut open the lake. Then, Eleven used deterrence to make all the creatures in the water faint in the lake that was split open. It was a great success in battle...

As a Panda Knight, it was normal for him to use deterrence sword aura.

Eleven: Σ (° △ ° | |) Hello, Worm Director.

"It's indeed a method, but it's too much of a waste of energy. Forget it." Shi Yu smiled. He was just kidding. He looked at the lake again. He didn't expect to see the Rain Suppliant Frog and Dragon Carp here.

[Name]: Rain Suppliant Frog

[Attributes]: Water

[Race Level]: Medium transcendent

[Race Skill]: Qi Yu (High Level Water Skill), Water Arrow (Low Level Water Skill)

This Qi Yu was a good skill. It was a rare ability that could change the weather.

If it was a rainy day, the performance of the water-type pet could receive a good increase. It was equivalent to another kind of water-element talent!

However, Shi Yu did not mind too much. After all, there was no suitable weather based pet in his team.

However, this Dragon Carp was very interesting.

Dragon Carp

[Attributes]: Water

[Race Level]: Low-level transcendent

[Race Skill]: Leaping Dragon Gate (No Level Water Skill)

Like the Green Silkworm, this Dragon Carp was a weakling in the pet world.

At the same time, it was also one of the few creatures that could rely on increasing their racial skill proficiency to evolve naturally, just like the green worm.

However, its evolution difficulty was much higher than the green worm, so its status was also much lower than the green worm.

It was said that as long as the Dragon Carp trained the Water Slapping skill, which looked like a salted fish turning over, to perfection level proficiency, it could evolve into a dragon attribute and become a sub-dragon.

This Leaping Dragon Door sounded very cool, but actually, just like the Worm Silk, it was a useless skill that could be trained to perfection. At most, it would cause a small impact wave.

But it was this useless skill that could increase the dragon carp's race potential.

At this moment, when he saw the Dragon Carp, Shi Yu fell into deep thought.

Speaking of which, although these levelless skills were trash, they didn't seem to be completely useless.

He felt that maybe he could look for it in the future and see if there were any suitable levelless skills to teach Eleven and Worm?

After all, teaching levelless skills was too easy. It didn't take much physical strength and time to quickly reach the maximum level. Then, it would turn something rotten into something magical. After that, after reaching the maximum level, it could also be deleted, leaving empty pages of the skill index. Compared to that, who knew how long it would take to delete the Inner Power and plant control in the skill index. Shi Yu felt that even if he became a Legendary Beast Tamer, these two super skills would probably still be lying in the index.

From a certain point of view, this might be the correct usage of the skill index's deletion function?

...

A day later.

Shi Yu had already ridden Eleven and swept the surroundings of the landing point.

During this period, he also encountered many candidates, but the assessment did not allow teaming up, so they did not have much interaction.

However, when they saw Shi Yu riding the iron-eating beast, the candidate they encountered was still very shocked.

This was the first time he knew that Iron-eating Beasts could be used like this, but he didn't know what use it had... Iron-eating Beasts weren't mount races either?

Save energy for travel? Clearly, they didn't have the chance to experience Shi Yu's hardening swordplay.

Currently, those who saw Shi Yu take action had all died. The beasts, naturally.

...

"There are level-three resources again???"

“Wu!!!”

In just a day, Shi Yu and the others had gathered many rare resources.

Because the assessment mission had been completed, Shi Yu did not care about the number of ferocious beasts he hunted. He focused on finding valuable resources and ferocious beasts. His goal was clear.

Their efficiency in gathering resources was still very high. Thanks to Eleven’s perfect super vision, they could judge the strength of the energy wave from afar and use this method to determine which direction and corner had rare resources. They could find one at a time.

“Wu wu wu!!”

However, Eleven seemed especially serious this time.

In addition, it felt his hair stand on end.

This was the first time.

“Ji.” Even Buggy felt a sense of familiarity, let alone Eleven.

“Wu!!!”

In the end, the two pets widened their eyes and were completely certain...

It seemed to be dragon might!

There was the aura of a dragon!

“A dragon-type creature, or... a dragon-type resource?” Shi Yu was also stunned.

...

On the stone path, Little Iron Eater Eleven ran with Shi Yu agilely with its short legs.

It became more and more familiar with being a mount.

At this moment, it was pleasantly surprised. It was the dragon’s might!

Dragon Might was actually a deterrence skill.

However, it could only be called Dragon Might if it was used by the dragon race.

Because the quality of the dragon race far exceeded other creatures in all aspects, it also caused the performance of the dragon’s might to far exceed the deterrence of other monarch-level creatures.

After all, purebred dragons were natural kings. None of their race levels were lower than monarch-level.

Eleven had experienced the dragon’s might of the Ice Dragon Phantom before and it was indeed very unusual. Therefore, it was very excited this time and felt that it could fight with the dragon again.

As for Shi Yu, he felt that it was dreaming. How could there be a giant dragon in such a godforsaken place?

Soon, Shi Yu and the others arrived outside a valley.

Not only was there no candidate around this valley, but there was also no wild creature. It seemed that all of them had been scared away by the dragon's might.

At this moment, just as they approached the valley, Eleven, Shi Yu, and Buggy felt a very strong pressure. If it weren't for Eleven using deterrence already, Shi Yu and Buggy might not have been able to withstand it.

"Close."

Shi Yu's gaze froze. He ordered Eleven to approach the valley to see what was going on.

However, just as they took a step forward, a brown lizard-like figure appeared.

"Roar..."

This brown giant lizard that was as rough as a rock stepped on the gravel and issued a warning with a dignified gaze. Then, a strong deterrence wave shot out. It was actually a deterrence skill, but from the deterrence level, it was only entry-level. It was really no match for Eleven.

But even so, Shi Yu and the others were still very surprised.

Because this was a wild ferocious beast.

Apart from his pets, Shi Yu had only seen one pet that had awakened deterrence skills before it reached the level of a monarch.

That was the Ice Wolf King from the breeding base of Icefield City.

Moreover, Shi Yu felt that the deterrence of this lizard was not as simple as ordinary deterrence. It even had a hint of dragon might!

[Name]: Earth Rock Lizard

[Attributes]: Earth

[Race Level]: Low-level Commander

The Rock Lizard was a commander evolutionary branch of the Rockback Lizard and the Rockback Lizard, a transcendent species. It was a transitioning stage for dragon-element evolution. Although it wasn't even a subspecies dragon yet, it already possessed some dragon-element characteristics.

At this moment, seeing such a creature with dragon might, Shi Yu was indescribably surprised.

Good lord.

Talent?

Monarch potential?

If not for the fact that the assessment rules did not allow them to take away and contract the ferocious beasts here, Shi Yu really wanted to capture them alive and pack them up.

However, he also understood the association's concerns.

It was basically impossible for a ferocious beast that had grown to the transcendent level in the wild to be tamed by a Beast Tamer. Its wild and ferocious nature was too strong, and it could only be forced to contract. But in that case, as the ferocious beast grew, there would be a risk of backlash against the Beast Tamer in the future. Not many Beast Tamers would contract with the risk of backlash, no matter how talented the pet's potential was.

In comparison, weren't the obedient pets cultivated by the breeding bases good?

Capturing and contracting high-level ferocious beasts was too risky. The mainstream views in the Beast Tamer domain also suggested that Beast Tamers contract those pet cubs and nurture them from young. This was beneficial to establishing restraints.

Of course, the truth was not absolute. It wasn't like there weren't Beast Tamers who specialized in capturing mature wild beasts. However, the mortality rate was several times higher than other Beast Tamers.

At this moment, because Shi Yu and the others were not afraid of deterrence at all, and because Eleven had always displayed an even stronger and scarier deterrence that was almost corporeal, the extraordinary Rock Lizard's eyes were filled with apprehension.

"Is this Earth Dragon Lizard talented, or is there some rare resource inside?"

Shi Yu looked at the nervous appearance of the Rock Lizard and looked deep into the valley.

"Roar—!!"

At this moment, another valiant dragon's roar came from the distance, stunning Shi Yu and the others.

A moment later, a black spot appeared in the sky. A young bone dragon about two meters in size with a small Tamer on it flew over.

"Damn, after flying for half an island, I finally found this place." This Beast Tamer was extremely surprised.

"Uh." However, as the young Nether Bone Dragon flapping its bone wings was about to land, this candidate suddenly discovered the Earth Dragon Lizard and Shi Yu, who were facing each other below.

His expression changed as he observed carefully again.

Then, after discovering that the situation below was still normal, he relaxed inwardly. Good, looks like the Dragon Soul Grass hadn't been obtained first.

"Roar—!!"

It was clearly a bone dragon, but it could actually make noise.

The Nether Bone Young Dragon landed. Its Beast Tamer Yu Shu started to size up the Earth Dragon Lizard that was releasing its dragon might, and the Panda King Eleven, who was also using deterrence to suppress the other party.

At this moment, his relaxed mood immediately tensed up again. His heart skipped a beat and stopped.

Damn it, there was still something wrong!

Where did this Earth Dragon Lizard come from? Could it be that all the Dragon Soul Grass had been eaten?

Moreover, what the hell was this Beast Tamer riding an iron-eating beast that could use deterrence??

“Roar...” The green eyes of the Nether Bone Young Dragon flashed, reminding its Beast Tamer that the Iron-eating Beast was not to be trifled with. Its aura was very terrifying.

Yu Shu’s expression changed. He realized that the good mood he had when he found the rumored Dragon Valley disappeared with a bang. Moreover, he kept feeling that this mission of his wouldn’t be very smooth.

“Nether Bone Young Dragon, you’re Yu Shu?” At this moment, Shi Yu turned around to observe the person’s bone dragon pet and asked curiously.

In just two days, he actually saw the two popular candidates mentioned by Seven Elites consecutively. His luck was pretty good.

“You’re Shi Yu?” After Yu Shu got down from the young Nether Bone Dragon, he looked silently at Shi Yu, who was riding an Iron-eating Beast and holding a wooden sword. A moment later, he also determined Shi Yu’s identity.

There were only a few people who scored high on the basic test. Everyone knew the other party’s test pet, so it was naturally easy to guess its identity.

Originally, Yu Shu was very unconvinced that the ability of a mere Iron-eating Beast was above his Nether Bone Young Dragon, but now, after discovering that this Iron-eating Beast actually knew how to use deterrence, he only felt that it was ridiculous.

Damn, where did this monster come from? His Nether Bone Young Dragon was a high class commander species, and it was even a dragon type. Yet... It was still a little short of awakening deterrence. What was wrong with Shi Yu’s Iron-eating Beast!

“Well, from the looks of it, you deliberately came here?” Shi Yu asked.

Yu Shu’s expression darkened. This was none of his business.

Although he thought this way, he still nodded. After all, this kind of thing couldn’t be hidden at all.

“There are the dragon-eating resources I need inside, but it looks like we discovered it at the same time. How is it? How do you plan to compete?” He looked at Shi Yu with interest. Although this iron-eating beast didn’t look weak, after his Nether Bone Young Dragon and dragon soul fused, its battle power was comparable to an extraordinary pet of a monarch race!

If it was according to the standard resource competition method, Shi Yu would not be his match.

He wasn’t even afraid of Yin Zhengfan’s beast. In short, he was determined to get the Dragon Soul Grass. The main reason was that this thing was very rare even in the outside world. It was very difficult to buy.

Although there were high-level substitutes, the high level resources were too high for his pet. Instead, the level of this Dragon Soul Grass was just right.

The lizard: ???

Get lost, that belonged to it!

It looked at the iron-eating beast and the bone dragon more fearfully. It kept feeling that both parties were coveting the Dragon Soul Grass in the valley.

“There’s indeed a treasure...” Shi Yu was stunned and found it interesting. He had a premonition that this resource was not simple.

Perhaps this trial island wasn’t all a pile of trash and low-level resources...

“Ji ji ji—” Before Shi Yu could make a decision, the bug became excited. Why not let it deal with this bone dragon and that dragon lizard? It felt that there would be dragon-element resources inside, and it wanted to fight for them itself.

Shi Yu: “You’re not his match either... Unless...”

It wasn’t that he looked down on Buggy. Even if the Buggy’s battle power was fully released, it would only be a transcendent pet comparable to low-level commander races...

It was barely enough to deal with this lizard, let alone the bone dragon.

Insect: [(☼´∩`☼)*]*equipment, equipment...]

What the worm meant was that expert level Illusory Phantom could use external items to increase the quality of the Illusory Phantom. Low class commander races weren’t its full battle power at all.. With so many ice-element energy crystals and that Ice Dragon Whiskers, just like during training, if it was used... It could transform into an Ice Dragon and crush this dragon lizard and bone dragon without any pressure!!

Chapter 115: Ice Dragon Bug VS Soul attached Bone Dragon

“How do you plan to compete?”

At this moment, after hearing Buggy’s petition, Shi Yu smiled.

So this worm was thinking about wearing equipment.

It couldn’t defeat the enemy naked, but couldn’t it defeat it with a+20 golden legendary equipment?

Indeed, the abnormality of an expert level phantom was that it could strengthen the phantom with external things.

If he didn’t include this ability, it would be a little unfair to say that the battle power of the bugs was only at the level of transcendent-level ferocious beasts of low-level commander races.

It had already been added to the expert level, why should it be used as a proficiency level!

However, Shi Yu's expression was strange.

Buggy was ruthless.

If he didn't remember wrongly, Buggy must have caught a cold when it used the ice-element energy crystal and the Ice Dragon Whiskers to train previously. It had been sleeping with a blanket for days and directly rejected the cold.

Ice-element energy crystals were alright... But the Ice Dragon Whiskers that the Clam used, even if it wasn't a level-seven resource for an overlord creature, it had to be close, right?

As a Green Silkworm, wearing such equipment would naturally be a huge burden.

Of course, the burden was great, and the gains were also great.

Although the combat power of the transformed ice dragon was very poor in terms of skills and could only use some basic ice-type moves, the physical fitness of the dragon race was undoubtedly powerful. It was very resistant to attacks.

Just like the Ice Dragon Phantom Eleven encountered, its physical quality was ridiculous, and its control over elemental energy was also ridiculous.

It was equivalent to an overlord race cub without any super or high-level skills, only having the strength of the body.

This was already very strong. Just based on this point, it felt that it could go head-on against ordinary monarch species creatures. After all, a real ice dragon was an overlord race. Squashing a commander species creature of the same level was as easy as squashing a worm.

In this case, Buggy indeed had the capital to interfere in the competition of the vocation assessment.

Previously, the Ice Dragon Whiskers and ice-element energy crystals were both external forces. In addition, the burden of using the bugs was relatively high. Shi Yu did not count them in the battle power Buggy. Now, since Buggy wanted to try again, it wasn't impossible to try...

"How else can we compete? Both parties compete with all their might."

"If you're afraid of affecting the assessment, you might as well give up." Yu Shu chuckled, hoping that Shi Yu would back off.

He had no intention of fighting one-on-one. After all, his strength was in team battles with pets.

"2 vs 2?"

"Alright, but shouldn't we deal with this Earth Dragon Lizard first and see what's inside?" Shi Yu said.

"It..." Yu Shu shook his head and glanced at the Rock Lizard, not paying much attention.

It was just a low-level commander species Earth Dragon Lizard. Even if it had awakened its deterrence, in terms of battle power, it might only be comparable to the Thunder Lion Shi Yu encountered during the basic test. Its energy level was about 1,000.

For a genius like Yu Shu, who had a single bone dragon that was close to 3,000 energy points, this Earth Dragon Lizard was also a ferocious beast that could be insta-killed.

“One point, I’ll take it.”

Yu Shu didn’t ask for Shi Yu’s opinion and directly let his pet attack.

In the vocation assessment, no matter the level of the ferocious beast’s race, as long as it grew to the transcendent level, hunting was 1 point. Therefore, it was really tiring and not pleasing to hunt a powerful ferocious beast like the Earth Dragon Lizard, but that was for ordinary candidates.

Yu Shu’s eyes were filled with arrogance. He was very disdainful of this creature associated with the word “dragon” but not dragon type.

“Roar...”

At this moment, the Rock Lizard’s heart skipped a beat as it suddenly realized that something was wrong.

Right now, it didn’t seem like it was a good time to watch this show??

It subconsciously wanted to burrow into the ground and return to the valley first. At this moment, Yu Shu’s Nether Bone Dragon flew up. At the same time, a green soul flame appeared in its skeleton body, forming a dragon shape that wrapped around the body of the Nether Bone Dragon!

At this moment, the aura of the young Nether Bone Dragon became extremely terrifying. Even without the dragon’s might, the Earth Rock Lizard could feel the spiritual pressure of a dragon-type creature!

[Name]: Nether Bone Young Dragon

[Attributes]: Undead, Dragon

[Race Level]: High-level commander

[Race Skill]: Dragon Claw (Intermediate Dragon-type Skill), Dragon Breath (Advanced Dragon-type Skill), Corpse Strengthening (Advanced Undead-type Skill), Bone Reassembling (Advanced Undead-type Skill)

[Name]: Dragon Soul (Incomplete)

[Attributes]: Undead, Dragon

[Race Level]: Low-level Commander

[Race Skill]: Possession (Advanced undead skill), Soul Flame (Advanced undead skill)

The two pets of the commander species completed the fusion almost instantly through the possession skill!!

In the sky, the young Nether Bone Dragon covered in green soul flames suddenly condensed a black flame breath!!

A powerful combination skill with the properties of dragon, undead, and fire blasted out!!

Hu hu!!!

Blazing dragon breath flames attacked.

Below, the Earth Dragon Lizard roared as sand and rocks gathered around it.

In the face of the attack, it instantly swept up the high-level skill Rock Sand Storm to resist.

The rock sand that filled the sky twisted into a force that collided with the dragon flames.

However, this Soul Fire Dragon Breath formed by the dragon soul possessing the young Nether Bone Dragon instantly penetrated the rock sand storm with a bang. Under the shocked expression of the Earth Rock Lizard, it turned into raging flames and got swept into the flames!

“Roar...”

The miserable cry of the Earth Dragon Lizard came from the dark green Inferno.

The battle power of both parties was not on the same level at all.

“Are you still planning to compete?” Yu Shu smiled.

He had the pride that most Dragon Tamers had and was extremely confident in his own strength.

Not far away, Shi Yu, Eleven, and Buggy watched this scene in silence.

It was fancy.

Wasn't it just insta-killing a lizard?

“Sob.” Eleven curled its lips. If it wasn't to save energy and use supervision to find more resources, one deterrence from it could directly knock this lizard out.

All along, when they were traveling, the passive deterrence that Eleven displayed was at entry-level.

Such a deterrence wave was enough to deter the enemy's battle intent.

As for proficient-level deterrence, it could already cause mental damage and directly stun the enemy.

As for the expert level deterrence that Eleven mastered, also known as the king's aura, the huge aura could stun hundreds of enemies and condense into a wave that crushed the enemy. It was a deterrence that could resist the dragon's might of the Ice Dragon Phantom.

It was very difficult for any opponent whose mental willpower was inferior to Eleven's, even if they were also at the transcendent level. After all, this was an expert high-level mental skill.

At the transcendent level, how many pets could train high-level skills to the expert level? The proficient level was the limit.

However, although Eleven felt that its opponent was being fancy, it glanced at Buggy. “Can you do it?”

“Ji!!!” Buggy was very unhappy because it was looked down on.

Wait and see!!

Buggy also understood that with added points and hard work, it definitely couldn't surpass the leader.

Then, it could only rely on wearing divine clothes.

With the enhancement of his divine armor, he could slay dragons like bugs!

“Sob.” Eleven shook his head.

It didn’t matter. It was a 2VS2 anyway, so it could try again if it didn’t work.

At this moment, Yu Shu was waiting for Shi Yu’s answer.

However, Shi Yu was not frightened as he had imagined.

“Of course I’ll be competing, but I’ll go and see what’s inside first.” Shi Yu smiled.

This guy was trying to scare him? Too young.

However, although he was young, Shi Yu casually glanced at the young Nether Bone Dragon. Its four skills were alright, but the possession skill of the dragon soul looked awesome.

This was a skill similar to the Fusion Beast Taming Talent.

Beast Tamers with the Fusion Beast Taming Talent could take the initiative to choose to fuse with different pets.

As for undead-type soul pets with the possession skill, they could also choose to possess different pets, or even Beast Tamers.

This was also a very mainstream life-saving skill among Spirit Mediums.

Shi Yu heard that there seemed to be a Legendary Spirit Medium in the ancient capital who specialized in developing the possession skill.

He contracted a heroic spirit with explosive battle power. After the heroic spirit possessed him, this Spirit Medium was said to be able to suppress overlord creatures alone.

In short, this was also a good skill. Unfortunately, Eleven and Buggy definitely couldn’t learn it, or else he would be even more handsome!

“What else could be inside? Dragon Soul Grass.”

Yu Shu glanced at the familiar Rock Lizard with strange patterns on the ground and shook his head. After patting the bone dragon beside him, he followed Shi Yu, who was riding the iron-eating beast, into the valley.

...

In the valley, three plants that looked like green wings swayed at the core.

The plant emitted strong spiritual waves that were like dragon might.

Seeing these three stalks of grass, Yu Shu was overjoyed.

There were actually three stalks.

“The Rock Lizard relied on the deterrence of these.” At this moment, Shi Yu and the others stared at the Dragon Soul Grass and revealed curious expressions.

Shi Yu had clearly memorized a large amount of resources, but he still couldn't find any information on this resource in his mind.

It seemed like it was a super rare resource.

“Do you know what this is?” Shi Yu asked.

“...” Yu Shu was speechless. After all this time, he didn't even know what it was and he wanted to fight with him?

“Dragon Soul Grass, level-three dragon-element and spiritual-element resources. Its value is comparable to resources above ordinary level five,” Yu Shu replied.

“Only when a purebred dragon dies in a place where the lingering dragon might doesn't disperse can such a plant be formed.”

“That Earth Dragon Lizard should have used the pressure of the Dragon Soul Grass to train its mental strength during its growth stage and awakened its deterrence on its own. Its talent seems pretty good.”

Yu Shu was relieved. Fortunately, it wasn't eaten directly!

The Dragon Soul Grass couldn't be eaten directly, or else there would be a huge risk of mental breakdown. It needed to be used with other materials. As long as the ferocious beast wasn't stupid, it could sense the danger of the Dragon Soul Grass. This lizard was very smart, and it only used its pressure to train its spiritual power.

As for why Yu Shu knew so much, it was very simple. It was because his mother had participated in the development mission of the Island of Trials before and personally hunted several subspecies dragons in this place that could breed Dragon Soul Grass.

Now, there were no more alternative dragons. All the high-level ferocious beasts had been eliminated, leaving only creatures like the Earth Dragon Lizard that might evolve into dragons.

“Is that so?”

At this moment, when Shi Yu heard Yu Shu say this, he knew the use of the Dragon Soul Grass without thinking.

Sure.

Mental resources? It felt like they could be used as evolution materials for Buggy!

It could even make deterrence have the nature of a dragon?

Wouldn't it be better to use deterrence after transforming into an ice dragon?

The completion level of the Ice Dragon Phantom increased again.

Shi Yu and Buggy's eyes lit up. They felt that they couldn't miss such a rare resource.

“Alright, I’ve satisfied your curiosity, right?” Yu Shu smiled and said confidently. “By the way, don’t tell me that your second pet is a green worm waiting to evolve.”

The reason why he wasn’t afraid to compete with Shi Yu for the Dragon Soul Grass was firstly because his Possession Double Strike battle tactic was invincible at the same level, and secondly, Shi Yu didn’t seem to be very smart. He rode an Iron-eating Beast, held a wooden sword, and even contracted a Green Silkworm to participate in the vocation assessment... What the heck?

Nether Bone Young Dragon, Dragon Soul VS Iron-eating Beast, Green Silkworm, how could they lose?

Yu Shu didn’t know how to lose!

It was also because Shi Yu was also a genius that he felt that he could befriend him. Otherwise, he wouldn’t have said so much to Shi Yu.

Although everyone was competing, there was no need to damage the harmony. He wanted Shi Yu to admit defeat wholeheartedly.

“It’s really my second pet.”

Shi Yu smiled. Not only was his other pet a Green Silkworm, but he even planned to let it fight one against two first...

“Then you’re finished. Do you plan to let the Iron-eating Beast fight one against two?”

“No.”

Yu Shu and Shi Yu’s gazes became even more serious. Both parties were determined to get the Dragon Soul Grass.

In that case, they could only compete according to the traditional competition method.

The two of them walked to a relatively empty place. Yu Shu was dressed in black. As he often flew, he even wore a red windproof cloak. He looked very strong.

Under his instructions, the bone dragon that was possessed by the dragon soul waved its bone wings and slowly flew up. In mid-air, it looked at Shi Yu and the others with its empty green fire eyes.

On Shi Yu’s side, Buggy quickly crawled into Shi Yu’s hand.

Shi Yu dug into his pocket and took out a level-two ice-element energy crystal from the ruin pearl. He fed it to Buggy and let Buggy put it in its mouth.

As for the Ice Dragon Whiskers, it had already been tied to its body by the transparent insect silk!

After the armor was completed, Buggy’s gaze was serious. It bent his body and jumped down!

Worm Leap!

The worm successfully landed opposite the Soul attached and stared at it with battle intent.

At this moment, on the other side, the serious-looking Yu Shu and the Soul attached Bone Dragon paused for a moment.

What was the meaning of this?

Looking at the indifferent Shi Yu, the Iron-eating Beast, and the green silkworm that jumped out, they were speechless.

Please, please don't tell him that Shi Yu wanted the Green Silkworm to fight his Soul attached Bone Dragon!!

"Are you serious?" Yu Shu looked up at Shi Yu, but wondered what did Shi Yu feed the green worm...

"I'm serious." Shi Yu said calmly, "You're considered half a Dragon Tamer, right? I forgot to tell you, actually, I'm the same."

Yu Shu: "?"

Before Yu Shu could react, Buggy on the ground had already closed its eyes slightly.

Hu hu hu!!!!

At this moment, cold air started to emit from Buggy's body.

After entering the transcendent level, and after the Phantom Illusion Skill was activated to expert level+4, its spiritual power level combined with Absolute Sleep could already instantly create dream images.

However, this was actually still built up by Buggy's own efforts. If Shi Yu could replicate a skill related to controlling dreams for it, the quality of the illusions projected by it should be stronger. For example, in terms of details, perhaps it could really know how many hairs a cat in a dream had.

The skill, Phantom Illusion, was actually equivalent to providing a core. As long as the user constantly assembled other skills to increase the quality of the phantom, its upper limit was very high.

At this moment, Yu Shu still didn't know what had happened. The Soul attached Bone Dragon also felt a little confused, but in the next moment, the atmosphere had already started to change. The sky suddenly darkened, as if blue snow clouds were condensing.

In an instant, hail and snow started to fall. The snow mixed with strong winds formed a snowstorm. Countless snowstorms appeared. At that moment, the figure of the worm was already difficult to see clearly under the snowstorm.

Originally, Yu Shu was still in the mood to quietly watch what Shi Yu was up to. However, in the next moment, he and the Soul attached Bone Dragon's widened their eyes almost at the same time, revealing an expression of disbelief.

Because, at this moment, under the condensation of the snow, the spot where the insect was just now was forming a huge monster, a frost dragon!!

Yu Shu and the Soul attached Bone Dragon looked at the three-meter-tall dragon creature in front of them, their mouths agape.

The strong body of the frost dragon in front of him seemed to be made of frost. Its color was ice-blue and deep, representing extreme cold.

Not only its body, its neck, head, long tail, sharp claws, and fangs, its four strong feet, and its pair of wings were also all strong and powerful. Its scales revealed coldness, and there was wind and snow lingering around it, it was extremely domineering.

“Hou!!!!!!”

The ice dragon that the worm had just projected roared and flapped its wings.

During the roar, its deep eyes glanced at its opponent. The few ice-blue beards fluttered with the wind, causing the Soul attached Bone Dragon to subconsciously take a step back. It felt like its bloodline was being suppressed.

The frost dragon in front of him, which was even larger and more like a purebred dragon, directly stunned the Soul attached Bone Dragon.

What was going on, what happened...

“Impossible!!!” Yu Shu shouted, staring at the frost dragon in shock.

This kind of creature, this kind of creature, could a quasi-class Beast Tamer even summon it? Even if it was a legendary Dragon Tamer, there were only a few who could tame the frost dragon!

This was not a real frost dragon at all. Yu Shu’s gaze turned solemn as he looked at the disappearing green worm in confusion. “It’s... that green worm?”

“That’s not a Green silkworm. It’s a pet that can transform. Just now, it only turned into a Green silkworm, but now, it turned into a frost dragon.” Shi Yu chuckled, and Yu Shu started to curse in his heart.

Damn, never heard of it!!!

Was this how you lie?

Was it appropriate to let a powerful pet transform into a green worm to trick people??

Moreover, he looked at the frost dragon and swallowed his saliva. This was why he said he was half a Dragon Tamer?

Yu Shu’s expression turned solemn. In short, he didn’t believe it.

The Frost Dragon was an overlord of the dragon race. How could it be changed just like that by a quasi professional Beast Tamer’s pet?

It was just for show. He would immediately expose the true form of the ice dragon.

“Hou!!!!!!”

Facing the Ice Dragon Phantom in front of it, the Soul attached Bone Dragon didn’t sense that it was illusory at all. It knew that this wasn’t an illusion, but a physical illusion. Under the Beast Tamer’s command, the Soul attached Flame Dragon Breath condensed in its restless mouth and attacked!!

Boom!!!

A thick black flame pillar half a meter in diameter suddenly swept towards the Ice Dragon Phantom. The dragon breath flame that could burn the body and soul had completely annihilated the lizard. However, facing this Flame Dragon Breath, the Ice Dragon Phantom was not afraid at all and similarly spat out a breath!

It was just a very simple cold breath condensed from ice-element energy!

However, even the cold breath seemed to really be spat out by the frost dragon. It carried a strong dragon might like a flying ice dragon. Its power was incomparably huge, completely incomparable to the cold breath of those low-level ice-element creatures!

With a crack, the Soul Fire Dragon Breath and the cold breath collided. The result was that the cold breath instantly suppressed the dragon breath and showed signs of freezing this breath.

Seeing the dragon breath that instantly froze and was pressed back, Yu Shu's pupils constricted. Soul fluctuations surged around his body. As a Beast Tamer with a Soul Strengthening Talent, he could strengthen the power of the undead. With a boom, Yu Shu and the Bone Dragon resonated!!

Huge soul fluctuations appeared on the bodies of the two at the same time. The Soul attached Bone Dragon's Soul Fire Dragon Breath's flames were even more vigorous at this moment, and its power was instantly equal to the Ice Breath. Between the two breaths, intense dust and smoke instantly swept up, and the airflow spread to both sides...

"Strengthen, Claw Attack—"

"Roar!!"

In the smoke, the figure of the Soul attached Bone Dragon suddenly flew out. After activating the Corpse Strengthening skill, the bones on its body increased exponentially, as if it was wearing bone armor, and its whole body was incomparably heavy!

At this moment, it held the Soul Dragon Claw in both hands and crossed it towards the Ice Dragon Phantom!

In the face of the attack, the Ice Dragon Phantom stood still and looked over coldly.

Excessive movements would only consume more energy. It only needed to rely on its powerful strength to ignore and crush all attacks!

With a bang, the Ice Dragon Phantom took the attack head-on. Fine cracks appeared on its dragon scales. At the same time, a terrifying cold aura erupted from the Ice Dragon's broken body, freezing the curse energy and directly freezing its entire body along the claws of the Soul attached Bone Dragon.

Click.

The strengthened dragon bone was frozen and shattered, but under the repair of the skeleton recombination skill, the Soul attached dragon quickly recovered to its original state. However, in the next instant, the huge ice dragon turned around and swiped its claw. Before the Soul attached dragon could react, its entire body was ruthlessly smashed by the Ice Dragon Phantom's Ice Splitting Claw again and flew a few meters away...

“Roar...”

During this process, the Nether Bone Young Dragon and the dragon soul were forced to separate. It let out a painful cry and the Ice Dragon Worm heavily injured the two pets in one hit.

“Roar!!!” The Ice Dragon Phantom still stood on the spot like an overlord, looking down at them and letting out a high cry.

Yu Shu widened his eyes.

“Impossible, impossible, impossible.”

He looked at the completely crushed Soul attached Bone Dragon in one round of confrontation with a shocked expression.

How was that possible!

The physical fitness of this ice dragon was actually comparable to that of the overlord race’s ice dragon!!!

Just based on its physical fitness, it completely crushed his Soul attached Bone Dragon. In fact, apart from the basic skills Ice Breath and Ice Rending Claw, it didn’t use any other skills!!

This didn’t make sense. How could there be such a ridiculous transformation skill? He had never heard of it!!

“Do you still want to fight? I think there’s actually no need,” Shi Yu said.

If this continued, the Nether Bone Young Dragon and the dragon soul would definitely be heavily injured. Similarly, Buggy would have to rely on the Ice Dragon Whiskers to transform into such a powerful ice dragon, and his mental state would suffer a heavy blow. In the exchange just now, even if there was an expert level Absolute Sleep that constantly recovered physical strength at a high speed, it had already consumed more than half of Buggy’s strength.

The recovery speed was far lower than the consumption speed.

If this continued, it would be meaningless because Eleven had yet to make a move. Even if Buggy’s physical fitness was insufficient, the outcome of this battle was obvious.

“Wuu—” Shi Yu sat down, and Eleven showed a friendly expression to Yu Shu and the others.

Instantly, Yu Shu’s face turned green and white. Son of a b*tch, what was wrong with this Shi Yu!!

What kind of pet could turn into a damn dragon? Damn it!!!

“Roar...” The bone dragon and dragon soul advised the Beast Tamer not to fight anymore.

Son of a b*tch, they might not be a match for this guy!

At this moment, Yu Shu was completely numb. The bone dragon and dragon soul stared cautiously at the ice dragon opposite them. As for him, he looked solemnly at the iron-eating beast with 3186 energy points and the calm Shi Yu. He immediately deduced that he might really not be able to compete with this fellow. To think that he was so confident at the start...

Damn it, that wasn't a green worm at all!!!

Yu Shu had a deep grudge.

Whether the ice dragon in front of him was real or fake, its battle power was definitely not inferior to the purebred dragons of the low-level monarch race!

Dragon Soul Grass...

"You win." Yu Shu's expression darkened.

It was just Dragon Soul Grass. He didn't want a mere low-level resource.

Yu Shu didn't want to end the assessment early because of the three Dragon Soul Grass. If he continued fighting, his bone dragon and dragon soul would definitely lose their ability to fight. At that time, he would have difficulty moving in the next two days.

"I admit defeat. You guys are good. See you in the ranking battle. Also, remember not to use the Dragon Soul Grass directly."

Yu Shu summoned his two pets and turned to leave.

He didn't want to stay here anymore.

"You're leaving already? Be careful ~" Shi Yu waved his hand. This person was as easygoing as Yin Zhengfan. He was a good person.

He was just not as strong as Yin Zhengfan.

At the same time, on the ground, the ice dragon phantom gradually disappeared, and the green worm lay on the ground trembling.

Buggy: "Achoo!"

"Achoo..."

Hopefully it didn't catch a cold...

"Ji..." Although it felt cold all over, Buggy was especially excited at this moment. This was because these three stalks of Dragon Soul Grass were obtained by itself!

It quickly crawled to the edge of the Dragon Soul Grass and sensed the dragon might. At this moment, the insect's pupils constricted. It didn't eat the Dragon Soul Grass at all, but a powerful spiritual pressure suddenly erupted from its body!!

Boom!!!

It had automatically awakened its deterrence skill.

In the distance, Yu Shu, who had not walked far, turned around slightly.. He looked at the intimidating Green Silkworm King and was stunned on the spot...

Chapter 116: King of the Green Silkworms

“What’s going on???”

Initially, Shi Yu was smiling as he watched the Green Silkworm run to the Dragon Soul Grass, but suddenly, he was shocked.

He looked at the bug that emitted spiritual deterrence and was stunned on the spot.

Deterrence?

What the f*ck, Buggy awakened its deterrence skill on its own??

It must be kidding!

Shi Yu did not react for a moment and felt that it was a little unscientific.

A long time ago, after he saw that he could teach the Green Silkworm deterrence through the skill index, he sighed with emotion. “Who cultivated a Green Silkworm that could have deterrence?”

At that time, no matter how much Shi Yu thought about it, he definitely didn’t expect that a Green silkworm would actually awaken its deterrence on its own...

It was ridiculous!!!

Deterrence, a spiritual skill, was a symbol of “aptitude of a king”...

After a moment of silence, Shi Yu gradually calmed down.

Calm down, calm down. It was all because he cultivated it well.

Although it didn’t seem scientific this time, it wasn’t that unscientific either.

His worm had already strengthened its mental strength through the proficient level Absolute Sleep and Illusory Phantom, two high-level mental-type skills. It was also often used by Eleven as a deterrence training target. Its mental strength was definitely not weak.

Moreover, its own racial skill had even been maxed out. It had grown to become Transcendent with the body of a Green Silkworm. To say that it was the king of the Green Silkworm Race was already looking down on it.

It should be the god of the silkworm worm race!

Thinking about it this way, even a Snow Wolf King and a Ground Rock Lizard could awaken their deterrence before the monarch level. After his bug defeated a dragon type, it wasn’t that difficult to accept that it could awaken its king aptitude.

Shi Yu quickly analyzed the cause and effect, but while he could figure it out, Yu Shu and his two pets were completely breaking down.

He, the dragon soul, and the bone dragon looked at the Green Silkworm King around the Dragon Soul Grass in a daze. They felt its increasingly strong spirit and could not understand at all.

“Holy shit,” Yu Shu cursed.

Therefore, what exactly was Shi Yu's pet? What was it!!

Also, why did it awaken deterrence before it even ate the Dragon Soul Grass!

Yu Shu would not be jealous of any pet that had a chance to awaken after eating the Dragon Soul Grass. However, when he saw the Earth Dragon Lizard and then this pet that seemed to be a Green Silkworm that could transform, and saw that they had mastered deterrence, he immediately felt that the Dragon Soul Grass was becoming more and more precious like a hundred lemons.

"Let's go, what are you looking at?"

It was just a deterrence skill. A skill that any pet could awaken sooner or later was just so-so.

Looking at the stunned bone dragon and dragon soul, Yu Shu's face darkened again. He quickened his pace and left. The bone dragon and dragon soul looked at each other and quickly followed the Beast Tamer.

The Green Silkworm was so scary. Didn't Beast Tamers say that the dragon family was the strongest?

...

Shi Yu and Eleven came to Buggy's side and looked at the pleasantly surprised Buggy with strange expressions.

"Good heavens." Now, Shi Yu could only sigh.

Apart from racial skills, Eleven had learned Thunder Palm on his own, and Buggy had learned deterrence on its own. Shi Yu was really curious about what their next skill would be without the skill index.

Shi Yu estimated that it might have to happen after they evolved.

After they evolved, they would definitely awaken new racial skills.

Shi Yu guessed that the skills Eleven could awaken were definitely the high-level Inner Power and Impregnable.

As for Buggy, Shi Yu couldn't analyze what new racial skills it could awaken after evolution.

Didn't this mean that there would be one each for the transcendent-level skills of the spiritual and spatial attributes?

However, if two or more transcendent skills were awakened, the insect evolved form's race level should be judged as overlord. This was a little against common sense.

Because the current research on evolution in the Beast Tamer domain was already very clear. There were three laws for biological evolution.

First, the racial level might remain unchanged after biological evolution, and the evolutionary increase in the racial level wouldn't be able to cross three major levels.

<ol start="2">

Each creature has multiple evolution possibilities.

Third, evolution not only changes the form of creatures, but also their species, attributes, and gender.

These were all very easy to understand. For example, if the evolution of Buggy followed the current research pattern, the highest level of its evolution might be a high-level monarch race that was comparable to an overlord race.

If one wanted to become an overlord race, they had to rely on the second law to carry out the second stage.

Eleven might be the same. This had already been confirmed in the previous evolution experiment. Lin Hongnian's Iron-eating Beast's perfection-level racial skill+hundreds of millions of evolution materials had only raised the Iron-eating Beast's race level to middle class monarch.

As for that Ice Phoenix Moth that had reached the perfection stage of the worm silk and used phoenix related materials to evolve, it was only a low-level monarch race. It all matched this pattern.

Shi Yu was curious about this now. Could his Buggy with a max-level Worm Silk break this rule? However, he felt that it still depended on the evolution materials...

As for the third law, it was easier to understand. Changing forms was inevitable, and evolution to change species often occurred. For example, during the process of Dragon Carp to Dragon, from living body to undead, the species were considered directly changed. On the other hand, there were very few cases of gender change, and it only appeared on a small number of creatures.

"Wuu!" "Ji!"

Then, Eleven and Buggy started to exchange deterrence insights.

Great.

Apart from Absolute Sleep, they had a second similar skill.

Speaking of which, was there any way for the two of them to combine this skill and make their aura merge together to become stronger and intimidate others?

The two pets started to conceptualize the second combination skill after the Soaring Sky Strategy, to bully others.

"What the heck are these two even talking about..." Shi Yu looked at the Dragon Soul Grass with a dark expression. That Yu Shu seemed to have said not to eat the Dragon Soul Grass directly?

It meant that he needed to eat it with other spiritual plant resources.

Many spiritual plants were like this, especially some strong or poisonous plants. They needed to be matched with other spiritual plants to neutralize the effects.

Shi Yu decided to investigate it when he returned. Then, he began to transplant the Dragon Soul Grass into the ruins bead.

At the same time.

On the assessment committee's side, due to the help of the Eye of Heaven, everyone exploded again...

...

After a day of screening, these nine examiners had already preliminarily confirmed the candidates for the 16 key seeded candidates.

In the next ranking battle, these 16 people wouldn't collide too early. The collision between them would be the key to the entire ranking battle.

Apart from that, these 16 people would also be the cards of this batch of vocation assessments in the Ancient Capital. They were to edit some of their dazzling performance in the field survival assessment this time and then announce it to the public before and after the ranking assessment.

This way, the Beast Tamers of other cities could see the spiritual appearance of the candidates of the Ancient Capital!

The difficult task of editing was naturally handed to the Eye of Heaven.

This Eye of Heaven had been in charge of the vocation assessment in the ancient capital for several years. It was very familiar with the business and did not make any mistakes.

The examiners trusted it.

However...

When they saw the initial version of the video announced by the Eye of Heaven, they were instantly stunned.

When they saw the initial version of the video announced by the Eye of Heaven, they were instantly stunned.

The twelve-year-old handsome young man, Yin Zhengfan, controlled the Space Crystal Butterfly to gracefully defeat one enemy after another. There was no problem with this scene. The space element was incomparably mysterious, absolutely eye-catching.

He who controlled countless dead ferocious beast corpses with his Gu worms, the strange insect master Miao Dongdong. He had roamed the island of trials with a small beast tide. His performance was also very imposing, and this special beast taming occupation would also be a highlight.

Yu Shu, who rode the Soul-Armored Bone Dragon and traversed the sky of the Island of Trials, could not be found to be in the least bit odd. Every battle revealed the posturing aura of a Dragon Tamer.

These were all talents.

But the problem was, why was it that when it came to Shi Yu, it was all images of him riding the iron-eating beast and fighting using himself??

Profundity, great shock!

Profundity: Thunder Flash!

Profundity: Infinite Convergence!

In the scene, Shi Yu swung his sword, and dozens of wooden swords flew out like a storm, filling the sky. The sword force was like a net, peerlessly fierce, and spectacular. It directly surrounded the dozen or so Killer Bees that had gathered together. In the corner, Buggy used transparent worm silk to control the wooden swords that filled the sky. It was very awesome.

Worm Silk secret skill, Sword Control!

The examiners were stunned. This was a f*cking professional Beast Tamer assessment?

Are they sure it wasn't the admission test of the Ancient Capital Film Academy?

The examiners opened their mouths wide in shock.

They were confused for a long time before reacting.

This video was too deceptive.

Moreover, the editing of the Eye of Heaven was also very tricky and advanced. It diluted the pet and strengthened Shi Yu's performance. It was very compatible with Shi Yu's posturing.

It was only because they were experienced that they could tell how these sword techniques were used.

The group of examiners could tell that this wasn't because Shi Yu himself was ridiculously strong. Shi Yu didn't have any powerful talent similar to the Fusion Talent to allow him to fight. It was purely because the Iron-eating Beast had actually mastered transcendent Level Hardening, Perfect Level Thunder Palm, and even an impressive deterrence skill. The Green Silkworm was also very ridiculous. It had mastered Transcendent Level Transparency Worm Silk. It was only with the cooperation of the two pets that Shi Yu completed this series of dazzling operations.

Are all the candidates in Ping Cheng District of your Icefield City so good at performing?

Speaking of which, the skill proficiency of Hardening, Thunder Palm, and Worm Silk was too ridiculous.

Although it was only levelless, low, and mid-level skills, the group of examiners was still a little shocked.

They dared to conclude that Shi Yu was definitely one of the most monstrous candidates in this batch of vocation assessments! Unfortunately, the Green Silkworm had yet to evolve. Otherwise, it would be another powerful competitor for first place!

"Do we really have to publicize these images as clips of the promotional vocation assessment in Ancient Capital?" A master said in silence.

Didn't this Shi Yu have any normal training battle scenes? Oh, wait, there seemed to be one, and only one. It was the Dark-striped Poison Python that Shi Yu had first encountered... It was mainly because at that time, Shi Yu had yet to show off his world...

"It's not a big problem, not a big problem. This is the initial version. Let's see if there are better materials later..." Master Qu Jie said.

"Wait, there seems to be a battle between prospective seeded candidates."

Because the Eye of Heaven's Will focused on some key candidates, when important candidates met and competed, this group of examiners was the first to know.

The Eye of Heaven raised a short battle video.

"Who is it?"

In the video, Shi Yu and Yu Shu entered a valley together.

Shi Yu and Yu Shu?

The group of master-level examiners was slightly stunned and rather surprised.

He didn't expect that the two people ranked in the top five of this assessment would bump into each other.

They didn't know what the outcome would be.

However, when they saw this valley, the master examiners immediately understood. So it was to compete for the Dragon Soul Grass.

The Dragon Soul Grass was one of the most valuable resources on the Island of Trials this time. It looked like their luck was pretty good.

"Who will win?"

"But no matter the outcome, I hope the two didn't have a conflict."

The examiners really couldn't say for the time being.

Because he still didn't know how Yu Shu and Shi Yu planned to compete for the Dragon Soul Grass.

Soon, they received an answer. They saw that Yu Shu directly sent out the Soul-Armored Bone Dragon.

2VS2?

Just as they made this judgment, the expressions of all the master examiners froze.

"Roar..." In the video, a dragon roar sounded.

Their stunned expressions were almost at the same time as Yu Shu in the image.

On Shi Yu's side, the Iron-eating Beast was indifferent. The Green Silkworm directly leaped down, and instantly, its entire body was covered in snow and wind, transforming into a powerful frost dragon!!

In the video, the Soul attached Bone Dragon and the Ice Dragon started a fierce collision. In a short round, the Ice Dragon relied on its strong physique to send the Bone Dragon flying with a claw!!

Crack!!

During the process of flying backward, the bone dragon repaired its damaged body in pain.

The power of the slap was so great that it directly shattered the skeleton's strengthened body!!

A moment later, Yu Shu and the Soul attached Bone Dragon left with ugly expressions. They directly gave up the competition!

The frost dragon turned back into the green worm.

At this moment, the conference room was extremely silent.

The masters and examiners watched the video replay in confusion!

“Impossible.”

“This... What’s going on?!?!”

“You must be kidding.”

“Where did that frost dragon come from?!”

Perhaps because he was worried that the masters and examiners didn’t understand what had happened and didn’t understand some unorthodox skills, at this moment, the Eye of Heaven loaded the skill information of “Illusionary Phantom” and attached it to the end of the video.

Advanced Spirit and spatial dual-element skills, Phantom Illusion.

A powerful skill comparable to a super skill.

It was controlled by a green worm?

The master examiners were slightly stunned.

Now, they knew what was going on with the frost dragon, but not completely.

Another incomprehensible genius.

“I remember that there’s an Ice Dragon Ruins in Icefield City, right?”

“This Shi Yu has cracked the ruins space that appeared in Icefield City and his pet can transform into an ice dragon. Could it be an opportunity obtained from the ruins space? Are the two ruins related?” A master guessed.

“I can’t tell... But it’s very likely.”

“In short, don’t think about it if you can’t understand it. Whether it’s the Green Silkworm or other pets, we just have to organize the assessment well.” Master Qu Jie lit a cigarette.

“He came from a third-level city. He cracked the ruins space and studied the evolution method of the Iron-Eating Beasts through the ruins. He has two pets with ridiculous strength. In addition, he was reserved by the archeology Department of Ancient Capital University in advance... He will only enter the vision of certain organizations earlier than we do.”

“We were wrong. That’s not an ordinary green worm at all. The type is still pending.”

The master examiners nodded. Shi Yu’s identity information was very ordinary, but his experience was very ridiculous. There was only one possibility for this outcome: Shi Yu had been selected by a powerful Beast Tamer to be trained, or he had joined a special organization.

When the masters contacted Shi Yu's identity as an archeologist, they immediately thought of that place, but it was difficult to confirm.

Although a master-level Beast Tamer could become the president of an association in any third-level city, they could only be considered a middle-level force in the Beast Tamer domain. An organization like Bureau 11 was a high-level force that was equivalent to a legendary-level Beast Tamer. Not every master knew these mysterious institutions very well.

"Damn, did we miss something? He can use a pet to fight against two alone and easily defeat Yu Shu?"

What if the Iron-eating Beast was added?

The expressions of the examiners changed, and they suddenly felt that the final ranking of the vocation assessment this time was blurred again. Perhaps the quality of the vocation assessment in Ancient Capital City this time wouldn't be lower than those super cities.

...

On the island of Trials.

Shi Yu, who had obtained the Dragon Soul Grass, was very satisfied.

"Before we set off, someone seemed to have said that there are not only dragon-type resources on the island, but also spatial-type resources. Where are they..."

At this moment, Shi Yu, who was addicted to collecting rare resources, started to think about spatial resources.

"Eleven, it's up to you to find spatial resources."

Shi Yu placed his hopes on Eleven, who had perfect super vision.

"If you can find it, I'll spend a lot of money to buy you a set of your favorite training equipment."

This might be a threat to other pets, but for Eleven, it was a temptation.

However, at this moment, Eleven rubbed its head crazily and showed a difficult expression.

The detestable Beast Tamer was troubling it again.

Although its super vision could detect energy fluctuations in a few hundred meters, this island was too big. It was impossible for them to search all of it in three days without eating, drinking, or sleeping. Wasn't this searching for a needle in a haystack?

"But we still have to work hard to find it. It's all worth it."

"Ji ji, Ji." Buggy nodded heavily.

At the same time, Buggy looked at the Beast Tamer.

When would he arrange for it to have super vision?

This skill was good.

After reaching the perfect level, not only could one see the enemy's approximate strength, but they could also use it to search for treasures.

Most importantly, after its eyesight was enhanced, the Beast Tamer no longer had to worry about it playing short-sighted on the cell phone.

"We'll talk about it when we have time." Shi Yu touched his liver.

At this moment, after hearing Buggy's words, Shi Yu suddenly felt a headache.

This guy also wanted super vision...

It felt that there was nothing wrong with teaching standard abilities such as super vision, absolute sleep, and deterrence to any pet.

However, there were only two pets now, and Shi Yu felt that he couldn't take it anymore. In the future, if there were more pets, he might not be able to increase points.

However, the most infuriating thing was that the method of increasing the page count of the skill index encouraged him to contract more pets.

Every time Shi Yu contracted a pet, the skill index would increase by five blank pages. This page number was based on the number of pets, and not the level of the Beast Taming Space. It was very annoying to his body.

However, as a loving Beast Tamer, Shi Yu didn't dislike it.

On the contrary, he was very conflicted right now. When the time came, would the third one be a plant-type pet, or an undead-type pet that could be contracted? Or a mechanical-type pet with very high technology? He was quite envious now.

"Let's go, continue searching for treasures with me!"

Shi Yu called Eleven and Buggy.

"Sob!" Life was not easy. Eleven sighed and felt that it was meaningless to just carry Shi Yu.

If only Shi Yu and Buggy had focused on being heavier. This way, it could at least have the effect of weight training.

"Wuu!" After loading Shi Yu and Buggy, Eleven turned around.

They lacked a friend who knew gravity skills.

Eleven suggested to Shi Yu.

"Are you short of friends? You need someone that provides you with tools for training!"

Gravity training method? Did this panda want to become a Super Saiyan Bear?

...

In the blink of an eye, it was the last day of the wilderness survival trial.

Time passed pretty quickly.

Especially for someone like Shi Yu who searched for resources all over the island.

Actually, it wasn't a full search of the island. In the end, Shi Yu only wandered around the circular area of the landing point.

Of course, as a result, he forgot about spatial resources.

He didn't even find many level-three resources that were slightly more valuable.

Level-one and level-two trash, however, was something he had found. A peal.

Putting aside the Dragon Soul Grass, its value was barely seven digits.

It was mainly because of the agreement with Yin Zhengfan.

He promised Yin Zhengfan to fight his Space Crystal Butterfly before the assessment ended.

If he went too far, Shi Yu was afraid that he wouldn't be able to make it back in time and then leave the little kid hanging.

He could offer spatial resources, but leaving someone hanging was not a good behavior.

After all, Yin Zhengfan was more valuable to Shi Yu than spatial resources.

"There are still two hours until the end of the assessment..."

Shi Yu looked at the time and rushed towards the valley that he had originally agreed on.

In these three days, he didn't count how many ferocious beasts he had hunted. However, he had completed all three of the assessment missions along the way, so he definitely had a professional license now.

Soon, Shi Yu arrived at his destination.

Yin Zhengfan arrived earlier than Shi Yu. When Shi Yu arrived, this child was sitting quietly on a huge beast and using a furry tool to massage the Space Crystal Butterfly.

The Space Crystal Butterfly looked like it was enjoying itself. Usually, only Beast Tamers from the Medical and Feeding departments would master the massage method to relax and clear the energy circulation of different pets. It didn't expect Yin Zhengfan to be an all-round genius.

"Sob." "Ji!" Eleven and Buggy turned to look at Shi Yu. When could Shi Yu also massage them?

Shi Yu: "???"

He knew the basics, but he had to add points and massage now? Did it not treat him as a human? Shi Yu suddenly felt that he had worked too hard. The children were self-disciplined and hardworking, but they didn't know how to be filial to the Beast Tamer.

"There's no need to ask any questions for the time being after we go back. You have to arrange for housekeeping skills, nursing skills, and culinary skills. In the future, after adding some points, I'll be counting on you guys to take care of me."

Shi Yu felt that he should just be an emotionless tool.

Eleven, Buggy: (ㄋㄢ ㄣ ㄣㄣ)??

This was what it meant to shoot oneself in the foot? They shouldn't have said all that.

Below.

At this moment, Yin Zhengfan turned around with the Space Crystal Butterfly and also discovered Shi Yu who was rushing over from afar. Following that, his Zonyan Rock Beast turned around.

It was a huge rock creature about four meters tall that looked like a two-legged dinosaur. Most of its body was covered in sharp chestnut rocks, and it had strong limbs and tail.

The most classic feature was that there was a ring of mane rocks as sharp as a scarf around its neck. Although these mane rocks were also chestnut now, Shi Yu knew that the most terrifying power of the Zonyan Rock Beast was stored inside. The power of lava. Therefore, the Zonyan Rock Beast was also known as the Little Lava Beast, mainly because the name was already officially taken by another monster...

[Name]: Zonyan Rock Beast

[Attributes]: Earth, Fire

[Race Level]: Low Level Monarch

[Race Skill]: Rock Transformation, Earth Collapse, Rock Sealing, Mountain Collapsing, Rock Roar Cannon, Lava Explosion

Chapter 117: End of the Survival Trial

Two low-level skills, one mid-level skill, two high-level skills, and one super-level skill...

The Zonyan Rock Beast had a lot of racial skills, and the three highest-level skills were all powerful attack skills.

This was a classic example of a brute.

It looked powerful, and it was indeed powerful when fighting, but it had no replication value at all. The surprise was insufficient.

After all, strong support and swift damage was more of his speed. Shi Yu believed that piling strengthening skills and support skills was the way to go.

For example, Eleven, Hardening was an enhancement skill, while Multiplication was also an enhancement skill. Inner Power was still an enhancement skill. When the time came, wouldn't all three enhancement skills be a big move?

In comparison, he couldn't let Eleven learn Lava Explosion, right?

This didn't match Eleven's current moves either.

However, although that was the case, Shi Yu still smiled when he saw them.

Beast Tamers had three elements: Beast Tamer level, Beast Tamer talent, and knowledge base.

His own knowledge base included the special, efficient training method for the skills in the secret manuals, and the special cultivation method for pets that included evolution methods.

There were so many pets of the low-level monarch species, but Yin Zhengfan just had to choose a big idiot. He most likely had mastered some cultivation method that was suitable for the Zonyan Rock Beast.

Perhaps there was a super rare racial skill.

This was a treasure boy. He couldn't be looked at with common sense.

"You guys are here."

Seeing that Shi Yu and the others had come, Yin Zhengfan was somewhat pleasantly surprised. He jumped down from the rock hand of the Zonyan Rock Beast.

"Sorry to have kept you waiting..."

"This is the Zonyan Rock Beast? Impressive..."

Shi Yu looked at the tall Zonyan Rock Beast and compared it. He felt that his Iron-eating Beast was better. After all, this thing couldn't do anything other than fight. However, perhaps it was very efficient to send it to mine?

"It's alright." Yin Zhengfan also took a look at the Zonyan Rock Beast resting with its eyes narrowed and smiled, leaving it at that.

"Are you ready?"

"Do you guys want to rest?"

He looked at the iron-eating beast that Shi Yu had squeezed into a mount and asked Shi Yu and the others.

Although Yin Zhengfan had been looking forward to this battle for a long time, he didn't mind waiting a little longer.

"There's no need." Shi Yu glanced at the time. It wasn't far from the end of the assessment. It was better to start as soon as possible.

"I think it can't wait to fight a space-type opponent too." Shi Yu patted Eleven beside him.

"Wuu." Eleven smiled foolishly, revealing battle intent!

Because he had never fought a space-type opponent, Eleven was really a little curious. Its training was not good enough!

...

As the assessment approached the end, the nine master examiners gathered together.

Apart from that, an unexpected guest arrived in the huge mechanical cruiser in the sky above the Island of Trials.

A middle-aged man who looked as stable as a mountain and seemed to be born with the aura of a king arrived.

“Yin Legend...” Master Qu Jie and the others looked at this man and smiled helplessly.

Why was this person here?

“Don’t worry about me.” Yin Zhongrong was expressionless.

How could they not mind?

The nine master examiners muttered in their hearts.

However, even if this didn’t follow the rules, no one dared to say anything.

After all, everyone knew Yin Zhongrong’s legendary personality. He didn’t care about rules in the first place. This Yin Legend whose strength could be ranked among the legendary Beast Tamers only pursued the pinnacle of the Beast Tamer domain. This was what he valued the most.

Apart from that, he cared the most about this son of his. Yin Zhongrong only had a son at the age of 50. He regarded Yin Zhengfan, the child who had inherited his Beast Taming Talent, very highly, and his control of his son was relatively strong. Now, he was most likely here for Yin Zhengfan.

He sat in the cruiser and brewed a cup of tea himself. Then, he said, “Eye of Heaven, I want to see what Yin Zhengfan is doing at the moment.”

The Eye of Heaven paused.

Even the nine master examiners couldn’t order the Eye of Heaven. They could only wait for it to update its data and upload the situation of the candidates.

But at this moment, as Yin Zhongrong finished speaking, the Eye of Heaven immediately obediently grabbed the image according to his orders.

It couldn’t be helped. This was a big boss after all. Even its Beast Tamer was very respectful to Yin Legend. To be precise, it had been beaten up by Yin Legend before, so it was more afraid of this dignified uncle.

“The assessment is almost over. He should be packing his spoils of war now,” said a master.

“How’s his performance these few days?” Yin Zhongrong asked.

Master Qu Jie said, “He completed the three assessment missions perfectly and ranked fourth. It’s mainly because he has been training the Space Crystal Butterfly from the beginning to the end and hasn’t sent the Zonyan Rock Beast to battle.”

Now that the assessment mission was completed, these candidates naturally did not care how many transcendent-level ferocious beasts they had hunted.

The ones who should care were those candidates who had not completed the assessment mission and could only rely on their points ranking to decide whether they could become professional Beast Tamers.

What really concerned these candidates like Yin Legend's son was the final ranking battle.

"I understand." Yin Zhongrong closed his eyes slightly and opened them. At this moment, the Eye of Heavenly Silk had already transferred Yin Zhengfan's current state.

As a new image appeared on the center screen of the cruiser, Yin Zhongrong and all the examiners looked over.

The examiners were stunned.

That was because in the video, Yin Zhengfan was ordering the Space Crystal Butterfly to face Shi Yu's Iron-eating Beast! It was as if he was preparing to fight!

Holy shit!

The Masters were shocked. What was going on? Why did these two meet?

"Yin Zhengfan and Shi Yu are competing for resources...? No, the surroundings aren't resource points," an examiner said in surprise.

"Who is this person?" Yin Zhongrong looked at the scene and asked.

He knew his son's personality well. Like him, he basically wouldn't fight opponents he wasn't interested in.

Master Qu Jie said, "His name is Shi Yu. His basic test results are fourth in this assessment. He's a genius archeologist."

archeologist...

Yin Zhongrong looked at the screen quietly.

"Then his strength should be pretty good, right?"

Facing this question, the masters and archeologists looked at each other, not knowing how to answer.

Not only was it not bad, if Yin Zhengfan only planned to use the Crystal Butterfly to fight with that Iron-eating Beast, he would definitely fail!!

He should probably be using the Zonyan Rock Beast!

Maybe they should stop watching...

"Yes... Yes, it's not bad, and it's very unscientific. It's that Iron-eating Beast that got fourth place in the first assessment..."

Iron-eating beast?

Yin Zhongrong was incomparably surprised. However, he still didn't think that Yin Zhengfan would lose. After all, the racial difference between the Space Crystal Butterfly and the Iron-eating Beast was too big.

...

In the scene, Yin Zhengfan and Shi Yu had already started fighting.

The Space Crystal Butterfly VS Iron-eating Beast!

“Mi ~”

The Space Crystal Butterfly, which had a white body and transparent wings that were as huge as water, slowly flew to an empty place.

Yin Zhengfan walked near it, his eyes shining.

His Space Crystal Butterfly had just evolved and needed training. He hoped that Shi Yu and the Iron-eating Beast in front of him would be pretty good opponents.

“They won’t be weak. We have to be serious!”

Yin Zhengfan thought.

After all, Shi Yu and the others were ranked fourth in the test.

In front of Yin Zhengfan, Eleven stretched its body for a long time. Its gaze was serious as it looked at the Space Crystal Butterfly opposite her.

Shi Yu, on the other hand, observed carefully from afar.

Apart from this pair of pets and a pair of Beast Tamers, the Zonyan Rock Beast not far away, and the Green Silkworm on Shi Yu’s shoulder were also spectators. They sized up the battlefield. Among them, the Green Silkworm was very curious about how much pressure Big Sister Butterfly, who had mastered spatial skills, could give to the leader.

“Ji...”

Buggy let out a low cry. On the other side, a trace of a fierce aura flowed out of Yin Zhengfan’s calm expression. Compared to normal days, he looked like a completely different person in battle.

“Then we’ll go ahead and attack first.”

Yin Zhengfan waved a hand, and the Space Crystal Butterfly’s flying height increased slightly with a “Mi ~”. During this period, its wings flapped, and three crescent-shaped green lights flew out!

Low-level wind-element skill, Wind Blade!

Apart from the three spatial-type racial skills, it also learned the Wind Crystal Butterfly’s racial skills through other methods!

The skill was instantly activated, and the green light condensed. It was an expert level wind blade!

Right now, Yin Zhengfan clearly wanted to use this move to test the iron-eating beast.

“Wuu!!!” On the other hand, Eleven’s battle intent was high.

The wind blade attacked, causing the surrounding airflow to surge crazily. The sound of the wind blade tearing through the air was strong, as if it could cut through metal. Under the strong wind pressure, Eleven, who was standing not far from the Space Crystal Butterfly, trembled quickly, but Eleven's expression was very determined.

Especially its eyes. When he focused its mind, they were especially bright, as if it had seen another world.

Intermediate spiritual skill, perfect level super vision!

Under the activation of its super vision, the destructive power of the wind blade was clear. Its speed was also infinitely slow in its eyes.

Bang!!!

Eleven hardened its palm and suddenly pinched a wind blade that was coming at it. Immediately, a strong wind surged, and the seemingly ordinary move stopped the blade. However, after Eleven squeezed it, its body instantly cleverly dodged the other two wind blades that were also coming at it, causing the wind blades to miss and almost brush past its body.

"Is it a coincidence, or..."

At this moment, Yin Zhengfan's pupils constricted.

Not only did he realize that the iron-eating beast had crushed an expert level wind blade, but it was also unscathed.

He also discovered that it actually dodged two of the pincer attacks accurately, neutralizing their testing with almost the least consumption!

This Hardening Proficiency was at least at Perfect Level!

At this moment, Shi Yu's expression was calm. If Yin Zhengfan wanted to train the Space Crystal Butterfly, it would be meaningless to directly let Eleven unleash his full battle power. He also had the mentality of training Eleven. He didn't let it throw out all its strength, but planned to win with skill.

In this way, this battle would not be meaningless. It could have training effects on both pets!!

"Battle awareness is not bad."

At the same time, a round of confrontation made Yin Legend see how extraordinary the iron-eating beast was.

He nodded. Perfect racial skill?

And that exaggerated reaction speed, for the iron-eating beast race, was indeed as those examiners said. It was a little unscientific.

At that moment, when they saw Yin Legend nod calmly, the masters smiled bitterly. This was the beginning of illogical things!

In the scene, Yin Zhengfan and the Space Crystal Butterfly quickly launched a second round of attacks!

“Spatial shackles!”

The wind blades couldn't affect Eleven, so Yin Zhengfan wasn't in a hurry.

After all, his original intention was to use the speed of the wind blades to interfere with the iron-eating beast.

The instant cast attribute of the wind blade, together with its extreme speed, was very suitable for harassing opponents before the Space Crystal Butterfly chanted high-level skills.

As expected, while Eleven was fighting the wind blade, the Space Crystal Butterfly accumulated power for three seconds and directly created a spatial domain, locking Eleven inside.

Buzz!

At this moment, Eleven suddenly felt the air flow faster. Suddenly, the surroundings were extremely oppressive.

He felt like he was in another space.

Through its perfect super vision, Eleven could still vaguely see the energy flow of the surrounding space. This move was very strange. As a spatial-type move, it couldn't be sure if it could forcefully break through the shackles through the combination skill of Hardening and Thunder Palm.

However, there was actually no need to break it at all. This was because the spatial shackles couldn't directly cause damage. If the Space Crystal Butterfly wanted to deal damage through this move, it had to cause the spatial domain to tremble. Then, it could use the spatial shattering spatial wave to deal damage to the enemy!!

“Mi!!”

As the Space Crystal Butterfly flapped its wings, the space that shackled Eleven started to shake. transparent spider web-like cracks began to appear around it. In the next moment, transparent waves spread towards Eleven!

“Even if it can block with Perfect Level Hardening, it should be greatly affected.”

Yin Zhengfan's expression was serious. Even if his Zonyan Rock Beast relied on its expert level Rock Transformation and the physique of a monarch race to take this move head-on. It would also be injured.

As for this Iron-eating Beast...

Just as Yin Zhengfan made the judgment, a scene that made him very quiet happened to Eleven.

“Wuu!!”

After the shock wave was formed, Eleven's expression was serious. The ground under its feet immediately turned black as if it had turned into metal. Then, the black hardening substance was like liquid metal, instantly forming a half-sphere hardening barrier that completely isolated it from the outside world!

Perfect Level Hardening, Release of Hardened Material!

The huge hardening substance didn't come into contact with Eleven and formed layer after layer of hardening barriers around its body. The shock wave came with a bang, and cracks quickly appeared on the hardening barrier. The solid hemisphere almost shattered, but before the shock wave could continue to pass in, the continuous hardening substance quickly repaired the hemisphere's barrier and completely dissolved the shock wave. At this moment, Yin Zhengfan's expression changed drastically.

"How could this be..."

It wasn't Perfect Level Hardening, but... Transcendent Level!

In the scene, an incomprehensible expression appeared on Yin Zhengfan's young face.

He completely didn't expect Shi Yu and the others to actually still have such a trump card.

Seeing this exchange, Yin Legend also showed a serious expression and said, "Transcendent Level Hardening... He's just a newbie?"

The level of transcendence represented the peak of skill. Even if there were special training methods, cultivation methods, or even if it was a low-level skill, there was no reason for it to appear in the vocation assessment and in such a young person.

"Yes." The masters actually felt that it was alright, because the 12-year-old Yin Zhengfan was clearly more ridiculous.

When Yin Zhengfan turned 18, who knew if he would already be a young master.

Crack!!!

In the scene, the spatial shackles shattered, and the hardened substance flowed back and disappeared. The Little Iron Eating Beast appeared again.

At this moment, the hardening substance flowed into Eleven's palm and formed a metal ball the size of a ping pong ball. Eleven squeezed hard, and his super vision locked onto the slightly confused Space Crystal Butterfly not far away and threw it!!

Boom!!!

The hardening ball smashed towards the Space Crystal Butterfly like a cannonball. With Eleven's power, although it wasn't as fast as the previous wind blades, it wasn't slow at all.

"Mi!"

The black meteor smashed over, scaring the Space Crystal Butterfly into immediately disappearing. The hardening ball directly passed through the body of the Space Crystal Butterfly and smashed towards the mountain behind. With a bang, a shattering hole was directly smashed out of the mountain, and countless shattered rocks fell.

The huge sound entered Yin Zhengfan's heart, making him suddenly raise his head and look at Shi Yu opposite him.

At this moment, Shi Yu had already made a checkmate.

Yin Zhengfan also sensed this.

“I underestimated them...” He understood this, and his heart became extremely heavy. However, he did not plan to give up just like that.

Yin Legend and the examiners watching from the back also sensed this.

The Space Crystal Butterfly’s spatial shackles could not break through the absolute defense of transcendent level.

This meant that the Space Crystal Butterfly couldn’t hurt the Iron-Eating Beast.

And although the Iron-eating Beast also seemed to be unable to cause any damage to the Space Crystal Butterfly, which had Space Concealment and Instant Transmission.

However, these two skills had a very big disadvantage.

In the hidden state, the Space Crystal Butterfly couldn’t use other skills, and the consumption of Instant Transmission was too high.

Could it be that it was going to become a battle of attrition between the Space Crystal Butterfly and the Iron-eating Beast?

A battle of attrition was definitely not a good choice for the Space Crystal Butterfly.

Sweat dripped from Yin Zhengfan’s forehead as he sensed the extremely strong pressure from his opponent.

“Is he going to lose?” Yin Legend held the cup tightly and continued to stare at the screen.

At this moment, apart from the Eye of Heaven, no one knew that the Space Crystal Butterfly was facing the combination of Transcendent Level Hardening and Perfect Level super vision!

In a sense, this was also a profundity!

In the video, the battle between the two continued.

Under the lock-on of the perfect level super vision, the Space Crystal Butterfly had just retreated from its hidden state for half a second...

Bang!

Eleven threw out the hardened substance that had condensed into a ball with one hand and forced the Space Crystal Butterfly to teleport in a hurry...

In the next second, just as the figure of the Space Crystal Butterfly appeared after it teleported, another black meteor attacked. The Space Crystal Butterfly was forced to enter the hidden state to dodge again!

In the arena, Eleven, who was facing the Space Crystal Butterfly, was slightly calm. It was suppressing his opponent the whole time.

The Space Crystal Butterfly needed three seconds to cast the spatial shackle that posed a threat to it. During this period, it was enough to counterattack.

It only relied on Hardening and supervision skills.

Shi Yu's expression remained unchanged. So, could the Space Crystal Butterfly force Eleven to use its third skill?

"Ji..." The green worm cried as if it had seen its future.

On the other side, Yin Zhengfan stared fixedly at the changing situation, his brain continuously seeking ways to break out of the situation.

However, he could only sense the pressure from Shi Yu and the Little Iron Eating Beast growing stronger.

Under the reconnaissance and locking of perfect-grade super vision, even if the Space Crystal Butterfly had the spatial element, it seemed to have plunged it into an endless abyss.

The more he struggled, the deeper he sank. He couldn't escape from the huge hand high above.

This wasn't a suppression of attributes, nor was it a suppression of strength, but a suppression of skills. It relied on the high proficiency of the skill to look down on the opponent.

The Space Crystal Butterfly, which had just evolved and wasn't proficient in its skills yet, was like a child compared to the little Metal-eating Beast that had trained its skills to the peak.

"This candidate..."

Upon seeing this, Yin Legend felt that there was no need to continue watching.

He said, "Eye of Heaven, in addition to hardening, that Iron-eating Beast probably also used a skill that can lock onto the enemy."

It answered Yin Legend Zhongrong through the form of the subtitles.

Mid-level spiritual skill, super vision.

Although it wasn't as good as its Heavenly Eye, it was still a pretty good skill.

Most importantly, the super vision development of this Iron-eating Beast was ridiculously high.

...

A few minutes later.

The Space Crystal Butterfly finally couldn't hold on anymore. It couldn't withstand the pressure and its physical fitness was exhausted.

Shi Yu and Eleven didn't continue attacking because Eleven had always been in control of how much energy the Space Crystal Butterfly had left.

"I lost."

After the feedback from the Space Crystal Butterfly that it was unable to fight, Yin Zhengfan admitted defeat immediately.

He looked confused and indignant.

Anguish and torture.

This battle was what he felt.

Apart from the first time the Space Crystal Butterfly attacked the Iron-eating Beast, it was suppressed by the Iron-eating Beast the whole time.

This feeling made Yin Zhengfan almost unable to breathe.

After the battle, he was already drenched in sweat.

“Yes,” Shi Yu said. “Perhaps the situation will change if the Skill Proficiency of the Crystal Butterfly is higher.”

He was telling the truth.

However, it made Yin Zhengfan feel like this was the first time he had seen Shi Yu, who was having a friendly chat with him before.

Yin Zhengfan no longer had the smile from before.

He could chat and laugh with people his age who were weaker than him.

But facing his peers who were stronger than him, his heart immediately became extremely heavy.

He was a person with unparalleled self-esteem. His goal was to get first place in this assessment. Although this was not an official battle, at this moment, Yin Zhengfan still had to admit that Shi Yu and the Little Iron Eating Beast in front of him were very strong.

“Roar...” The Zonyan Rock Beast looked at the tired Space Crystal Butterfly and the lost Beast Tamer and got up slightly. Its four-meter-tall body stood like a small mountain.

It was asking if it wanted to fight.

It looked at the tiny Eleven. If it were it, it wouldn't dodge those skills at all. Its defense was dozens of times stronger than the Space Crystal Butterfly. Even if it took the hardening attacks head-on, it wouldn't suffer serious injuries. It could defeat all opponents with brute force.

“Huh?” Eleven also looked up at the big guy.

Were they going to continue?

“Ji!” Seeing the big Zonyan Rock Beast get up, the spectating Worm sighed with emotion that Big Sister Space Crystal Butterfly couldn't force the leader to use its full strength, and advised the Zonyan Rock Beast not to court a rebuff.

Did it think this was the full battle power of a leader?

“No need.” Yin Zhengfan waved his hand to indicate that the battle had ended.

With that said, he revealed a determined expression and looked at Shi Yu and the others.

“Although I lost this time, I'll definitely win the ranking battle.”

“When the time comes, it’ll be a 2VS2.” Shi Yu looked at the Zonyan Rock Beast and the Space Crystal Butterfly. He didn’t know what kind of sparks would result from the cooperation of these two pets.

“Yes, at that time, I definitely won’t lose,” Yin Zhengfan clenched his fists and affirmed.

He didn’t regret challenging Shi Yu, but regretted why he had underestimated his opponent. He didn’t manage to make his pet go all out in the first battle.

He lost...

“Alright, let’s fight again when the time comes.” At that moment, Shi Yu sensed Yin Zhengfan’s tone and looked at his expression, feeling a little panicked.

Damn.

He was still smiling amiably just now, why was he so serious now?

It couldn’t be that he was too young and couldn’t take it, right? Now, the feeling Yin Zhengfan gave Shi Yu was like he could cry at any moment, making Shi Yu regret fighting this battle a little.

“The assessment is about to end. We can finally leave this damn place.” Shi Yu took a look at the time and quickly changed the topic.

...

Yin Zhengfan lost.

In the mechanical airship in the sky, the master examiners still had the Eye of Heaven’s Will. They completely didn’t expect that Yin Legend had just come to see his son and would encounter such an explosive scene.

They secretly stared at Yin Legend who was silently watching the scene and didn’t say anything.

Until he himself spoke.

“Can I see this Shi Yu’s trial performance?”

Yin Legend didn’t look very emotional. Although Yin Zhengfan lost, he didn’t mind. After all, it was only a 1VS1. Moreover, it was also good to let the young Yin Zhengfan have some setbacks.

Under his protection, Yin Zhengfan was destined to not have the same growth experience as him back then. Moreover, the era was different now. The chaos and factional struggles both domestically and abroad had already temporarily calmed down. In his opinion, this kind of competition between peers within ten years of each other was very suitable for Yin Zhengfan to grow up.

“Ah, this...” At this moment, as Yin Sheng finished speaking, the master examiners were a little at a loss.

Yin Legend, oh Yin Legend, it was best not to look.

However, this was not under the jurisdiction of the examiners. Upon hearing Yin Chuan’s words, the Eye of Heaven immediately broadcasted its carefully edited Time Trial section, covering the current scene.

Yin Chuan, who had a serious expression, looked at the image again, wanting to see the hidden ability of this candidate who had made his son suffer a setback once.

Then, in the video, a young man riding a panda, holding a wooden sword, and wearing a happy expression slowly appeared. The intense scene of him cutting from the forest to the lake, from the lake to the valley.

Yin Legend couldn't calm down for a long time.

"Looks like the training missions assigned to Zheng Fan are still too few."

...

Before long, the three-day survival assessment finally ended.

After the time was up, the Eye of Heaven started its old job.

It teleported the candidates on the island back to the flying transport in the sky.

At this moment, the thousands of small black dots wrapped in blue light began to rise into the sky.

Under the cover of Psychic power, some candidates were laughing crazily, and some candidates looked like they had lost their parents.

Shi Yu was in a pretty good mood. After all, he had gained a lot this time.

Three spatial skills! Three Dragon Soul Grass! Buggy even awakened deterrence!

There was also the scrap resource of a pearl that could be exchanged for many divine beans!

Of course, if Shi Yu was in a good mood, there would be people who were in a bad mood because of him.

For example, Yu Shu, who had missed the Dragon Soul Grass, did not look happy at all after the assessment. He felt that he was unlucky to have met a monster in this assessment.

There was also the stronger Yin Zhengfan. It was fine before he fought with Shi Yu, the two of them could still communicate happily. After the battle... Shi Yu felt that his little friend Yin Zhengfan had directly missed out on their friendship.

Son of a b*tch, battle was so pointless. Shi Yu couldn't help but sigh.

How could he replicate skills in the future...

"Forget it, forget it. I won't think too much. Next, I can finally sleep soundly!"

Before long, Shi Yu was teleported to an aircraft. However, what confused Shi Yu was that it didn't seem to be the one he was sitting in at the start?

Apart from Shi Yu, there were fifteen other people, including Yu Shu and Yin Zhengfan. They were the 16 key candidates chosen this time!

At this moment, after meeting Shi Yu again, Yu Shu's expression darkened...

Chapter 118: Ancient Capital University Resource Bank

In the huge airship space, the sixteen people stood on the ground and observed each other.

Among them, Shi Yu had only seen Yu Shu and Yin Zhengfan previously.

Shi Yu didn't know the others.

However, judging from the cleanliness of their clothes and their full spirits, they were definitely the best in this assessment.

Those who could ensure such a state in the field survival for three days were definitely very strong.

Among the sixteen people present, there were twelve men and four women. The ratio was about the same as the male and female participants in the vocation assessment. Shi Yu's gaze took note of the four girls. After all, who would look at rough men...

Although that was the case, apart from Shi Yu looking at the girls, most of the candidates were still observing Yin Zhengfan, who was only 12 years old. After all, this age was too exaggerated.

"As expected, their strength and looks are on par." The four female candidates gave Shi Yu a strange feeling. Apart from their looks, they were all pretty good. Perhaps it was due to cultural differences, but the Beast Tamers in this world wore fancy clothes.

For example, among the four girls, one of them was wearing a similar qipao but more like a magician's robe. The other was wearing a black leather shirt that only covered a small portion of his body, and the other was wearing clothes that looked like ancient wuxia clothes... What the hell?

It was the same on the men's side. There were also many abnormalities. It was still alright for Yu Shu, who was wearing a black trench coat and a windproof cloak to act cool. Shi Yu even saw a fool wearing metal plate armor. Wasn't he tired from the weight?

"There aren't many normal Beast Tamers like me anymore."

Shi Yu looked at his white panda short-sleeved shirt and black pants and immediately felt that he was more affable to the people. On the other hand, these guys looked like they had come out of a cartoon.

"Or are these guys' clothes made of special materials that can be used to increase attributes?"

The clothes in this world were also very particular. For example, the worm silk of the Green Silkworm could be used in the field of clothing to create clothes with many special effects. However, Shi Yu didn't even have enough money to eat and drink, so he didn't pay much attention to some brands with equipment.

His clothes seemed to be a gift from Bamboo Stone Dojo...

"Firstly, congratulations on passing this vocation assessment and officially becoming a professional Beast Tamer. You have stepped into the door of the vocation field."

When the 16 people wondered why they had appeared here, a middle-aged examiner in a formal suit walked out of the cabin door and smiled at the crowd.

“Hello, I’m the overall in-charge of this vocation assessment, Qu Xie.”

Master Qu Jie?

1

Everyone immediately recognized this person from his name. Qu Jie, a top-level professional Beast Tamer.

Only when one’s Beast Taming Space reached level six would they have the chance to enjoy this top-notch master honor.

It was still alright if the Beast Taming Space was from level one to three. As long as the Beast Tamer worked hard, he could accumulate it with time.

However, after the Beast Taming Space reached level three, it was not so easy to improve. Talent, cultivation resources, and feedback from the upgrade of his pet could not fall behind.

Therefore, the level-six Beast Taming Space was already a very high level.

After that, it would be a Legendary-level person that could control overlord-level creatures.

“Master Qu Jie.” A portion of the candidates greeted. A portion of the candidates didn’t say anything and continued waiting for Qu Jie to speak.

Master Qu Jie smiled and said, “Among you, probably no one plans to give up the fourth ranking competition, right?”

“No.” Everyone shook their heads. Although they were already professional Beast Tamers after passing the third round, they all knew that the fourth round’s ranking assessment was the most important.

This final assessment could determine their ranking in abilities among the new batch of professional Beast Tamers. It could decide their fate in the future!

“If not, then congratulations to the sixteen of you again for becoming key seed candidates for this year’s assessment. According to your performance in the Wilderness Survival Trials, you have an additional point policy. You can skip the assessment ranking segment and directly enter the final ranking elimination battle.”

“A total of 784 Beast Tamers passed the third assessment this time. It can also be said that you’re internally confirmed to be in the top 32. You don’t have to compete with most of the candidates anymore.”

Master Qu Jie smiled. This was preferential treatment for these 16 people, and also a form of protection for the other candidates.

Upon hearing that, Yu Shu, Miao Dongdong, and the others nodded. There was no surprise.

They were sufficiently confident in their strength. If they participated in the assessment ranking segment, facing ordinary candidates, it was tantamount to a massacre. It was also good to directly start the competition from the top 32.

The 16 of them observed each other again and understood that the people around them were their real competitors.

“Alright, in the next three days, you guys can relax and rest. You can come and watch the subsequent assessment if you want, or you can choose not to come. Apart from that, there’s also one more thing. The battle scenes of the sixteen of you in the field survival assessment will be edited as a promotional video for this Ancient Capital vocation assessment. This is also a proof that you can become key seeded candidates. There’s no problem, right?”

“No,” the strangely dressed crowd said calmly. Instead, they were looking forward to this opportunity to appear on TV.

What was this crap...!

Shi Yu also subconsciously said that there was no problem since everyone did, but his heart skipped a beat when he suddenly realized that Master Qu Jie was looking at him strangely.

Holy shit, wait, what did he just say?

Promotional video??

“...” Shi Yu recalled what he had done in the wilderness survival trial and his expression immediately darkened.

No way?

Just now, Shi Yu had even said that these guys in strange clothes were stupid. Now, he realized that he was the stupid one.

Shi Yu wanted to say something but hesitated. At this moment, Master Qu Jie hurriedly coughed dryly and said, “In that case, sit down. You should be able to reach the second airport in a minute. Just remember to pay attention to the assessment information later.”

With that, he quickly turned and left...

He couldn’t give Shi Yu a chance to refuse. It turned out that Beast Tamers could still play around with so much skill. When Shi Yu became a legendary Beast Tamer in the future, this promotional video would be the dark history of his youth. As the main examiner of this batch, he might be able to gain some fame with this... Pfft.

1

...

Not long after Master Qu Jie left, the airship shook. It looked like he had arrived at his destination. His speed was very fast.

The sixteen key seeded candidates were not very familiar with each other. There was no conversation during the entire process.

Shi Yu wanted to go to Yu Shu's side and ask him how to use the Dragon Soul Grass, but when he thought about how this would agitate Yu Shu and also lose the friendship of this future great Dragon Tamer like losing Yin Zhengfan, he decided to forget it.

He would talk about it after returning to school.

After arriving at the destination, everyone quietly got off the cruiser. However, at this moment, the second airport was noisy. After all, thousands of candidates had arrived and landed here at the same time.

At the moment, most of the candidates still didn't know the situation of their assessment results. Those candidates who completed the assessment mission were alright, but those who couldn't complete the assessment mission and planned to bet on their points ranking were still very nervous.

"I'll leave first." After Shi Yu came down, he smiled and waved at Yu Shu and Yin Zhengfan.

The other thirteen candidates glanced at Shi Yu slightly. Yu Shu turned his head unhappily and ignored Shi Yu. As for Yin Zhengfan, after a moment of silence, he said politely, "I'll see you in the ranking battle."

Shi Yu nodded and didn't stay long. He immediately left because someone was picking him up... He opened his cell phone and saw a message.

There was also a picture attached to the message. The picture showed Senior Panda's location. Just like the last time he came to Ancient Capital, after Shi Yu completed the Wilderness Survival Trial, Senior Panda replaced the archeological Seven Elites to fetch Shi Yu.

"Where is it..."

Shi Yu walked out of the airport almost immediately. However, because of this, before the car could be found, he was stopped by a two-man reporter team who was waiting for him.

It was a man and a woman. The man wore a blue hat and carried a huge camera as he attacked Shi Yu. The reporter lady held a red microphone warmly and asked, "Hello, handsome. We are reporters from Phoenix TV Station. May I ask..."

"The assessment is very smooth. I think it's not difficult. I'm very confident in the upcoming ranking battle. Thank you for your blessings and I wish you success in your work." Shi Yu didn't wait for the reporter lady to finish asking. He didn't want to waste time on the interview. Under the confused expressions of the two, he quickly passed them and the crowd.

The reporter was speechless.

You've already answered it, what else do I have to ask?

"So uncooperative. To think I even chose the most handsome one for the interview," she said indignantly.

“Delete this part... it’s useless.”

1

...

“Beep... Beep...”

“Over here!!”

After Shi Yu passed through the crowd, he finally discovered the panda senior who had her window open and was waving at him.

Shi Yu smiled and quickly walked over. He opened the car door and sat down in relief.

“Phew—” After getting into the car, Shi Yu felt the cold wind and the fragrance drifting in the car. He immediately felt relieved.

It was still more comfortable to sit in a car. As expected of human intelligence. It was more comfortable than a panda mount, though Eleven was more unique.

Eleven in the Taming space:???

“How is it?” At this moment, in the driver’s seat, Panda Sister was wearing large black sunglasses. She smiled and asked.

“The research institute has prepared a celebration dinner for you. Don’t say that you failed the exam.”

Shi Yu smiled and said, “How could that be? Moreover, I seem to have become some key seed candidate. I can directly enter the top 32 without participating in the complicated competitions before the ranking battle.”

“Really??” The panda senior was slightly surprised. “This means that your performance in the comprehensive evaluation of the assessment committee is ranked in the top 16! Not bad!”

Although Shi Yu’s basic test results were very good, the second pet was a Green silkworm after all. Everyone was quite worried at first.

From the looks of it, Eleven was very impressive this time?!

Little did the panda senior know that the MVP for this battle was Shi Yu himself... Eleven and Buggy were support teams.

After the car started, the panda senior asked questions as she drove.

Shi Yu also asked.

“Any progress recently?”

It referred to research related to the evolution of iron-eating beasts.

The panda senior said, “It’s basically done, so we have to quickly confirm the name of the iron-eating beast’s evolution form. Also... Master Guo gave us his training cultivation manual.”

Currently, there were a total of three Iron-eating Beasts in the country that had completed their evolution. Master Guo was one of them.

He was talented. He had once developed a skill training manual that quickly increased the proficiency of the Iron-eating Beast. Because of this, his Iron-eating Beast's hardening skill had reached transcendent.

At that moment, he gave this secret manual to the research institute. Senior Panda and the archeological seven elites in the Iron-eating Beast Institution were preparing to combine this training secret manual to study the method to quickly increase the Iron-eating Beast's hardening proficiency.

After all, if it were to train normally, it would be very difficult for the Iron-eating Beast to train hardening to expert level in a year. It would also be very difficult for it to reach transcendent level in 20 years, causing the Iron-eating Beast's evolution threshold to be too high.

Therefore, the training method to increase proficiency had to be studied in detail in the future. This could indirectly increase the status and value of the iron-eating beasts.

"Oh, oh." Shi Yu didn't mind. It was an efficient training method to increase proficiency. He wasn't interested. It couldn't be faster than his points method anyway.

However, the tribe represented by the iron-eating beast ruins should have similar training methods. Otherwise, it was difficult to imagine that dozens to hundreds of iron-eating beasts would simultaneously have racial skills above transcendent.

Well... In short, he still couldn't help with this research. He could only cheer on Senior Panda and the others.

On the other hand, when he was free, he could use the skill index to study the training method to quickly increase various skill proficiency in reverse. As for now... he wasn't free, leveling up was more important.

"By the way, you just said that the harvest was not small?" the panda senior asked curiously.

"Yes, I obtained some rare resources. By the way, Senior, is there anywhere suitable to sell things?" Shi Yu recalled the messy pile of low-level resources in the ruins pearl and the ice-element energy crystal. He decided to find a place to pack and sell them.

As for the Ethereal Spirit Stone, he definitely had to keep it first. After all, using this thing to assist in cultivation was quite fast. Just like supplements, it was also an indispensable resource.

"Let me think..."

"Why don't you try contacting Chief Li?"

Senior Panda suggested, "If you're a student of Ancient Capital University, you can actually participate in training activities frequently. The resources obtained by secondary school students during training activities are purchased at a slightly higher price than the market price. In addition, the school also buys resources obtained by students from other channels according to the market price. You can exchange it for money and credits."

“Then, similarly, students can also use credits below the market price to exchange for various resources. In short, it’s very cost-effective. Although you’re not a student of Ancient Capital University, if it’s you, I feel that you can definitely use connections to get a taste.”

When Lin Xiuzhu thought of how Shi Yu could become the in-charge of the Iron-eating Beast Ruins, she immediately knew in her heart that he definitely had an indescribable relationship with Ancient Capital University! Then he should directly sell it to the university!

“Is that so? I’ll ask later.”

Shi Yu nodded. Famous schools were still better. They would try their best to let students take advantage of them. No wonder it was said that schools were the best place for Beast Tamers to grow up. The association’s education fees were several trillion yuan a year, and this was also the reason why the major schools in Dong Huang dared to continuously give students benefits.

Soon, Sister Panda brought Shi Yu back to the research institute.

It couldn’t be more coincidental that at this moment, the archeological seven elites were cautiously welcoming their Mentor Ding and Director Li.

The two of them also knew the future of their archeology specialization. Shi Yu, the hope of their archeology specialization, had just passed the vocation assessment today and immediately came to greet them.

“Director Li, Mentor Ding?” Shi Yu was surprised. Alright, it saved him the trouble of looking for them. He just had to ask them here.

“Student Shiyu, the assessment went smoothly, right?” The slightly plump Director Li said with a smile, his face filled with joy.

“It went smoothly.” Shi Yu smiled.

After the three of them finished exchanging pleasantries, the Seven Elites politely invited them to stay for dinner. When Director Li and Mentor Ding saw that the food was sumptuous, better than the canteen, they directly took it seriously.

This... The archeological Seven Elites were very confused. They ordered a table of high-level take-out and even invited a famous chef to cook. With this, in addition to the teachers coming over to eat and drink, the amount of food they could eat instantly decreased again. They were teary-eyed. They just didn’t know how many exam points they could get with one meal...

In the research institute, Shi Yu began to ask about what Senior Panda had said.

“Of course.” When Director Li heard that, he immediately laughed. Such a small matter was not worth mentioning.

“Looks like you’ve really gained a lot. Well, I’ll tell the resource bank later. You can go directly to exchange it then.”

“Thank you, Director Li,” Shi Yu thanked.

Then, Shi Yu asked curiously,

“By the way, what’s the highest level of resources in our school’s resource bank? Are there any resources with spatial attributes?”

The website that Granny Lu gave him was actually not very rich in resources. It was just a shopping website that some professional Beast Tamers often used. It had a very good reputation, was very fast in logistics, and was very safe. In terms of resources, it might not be as rich as the Ancient Capital University. For example, the website was often short on Ethereal Stones.

Shi Yu searched for insect evolution materials and was not very satisfied.

“There’s everything you need. Even if it’s a time department resource, it’s not like we haven’t had it before.” Chief Physician Li smiled and said, “As for the level of the resource, it’s at most level seven.”

“Well, the types of resources in the school’s resource bank can be seen from the school’s official website. You can borrow their account to take a look.” Director Li pointed at the group of foodies.

At the dining table, some archeological elites stuffed themselves with food. Using the name of the celebration banquet, they ordered many delicacies that they normally couldn’t bear to eat, such as 100,000 pots of lobster with weak dragon blood. They had to eat more.

“Use my account. Although I’ve graduated, I think I can still enter,” Lin Xiuzhu said after picking up a steamed bun.

“Alright.” Shi Yu nodded.

Following that, Shi Yu ate while looking forward to it. He hoped that there were suitable evolution materials in the Ancient Capital University’s resource bank.

School started in February at Ancient Capital University. At that time, he would be a new student of Ancient Capital University. If the vocation assessment ranking was high and really gave a large sum of credits, then maybe next month, he could let Buggy try to turn into a cocoon!!!

...

After dinner, Director Li and Mentor Ding left.

During the lunch break, everyone went back. Shi Yu got Sister Panda’s account and ran to the room to study it.

After Shi Yu entered the resources interface of the Ancient Capital University’s official website, he immediately searched for the resources he needed.

Screening Search: [Space] [Spirit]

Order: [Level Descending Order]

Shi Yu rubbed his hands in anticipation.

At the next moment, the page was updated.

[Name]: Nine-Tailed Illusion Fox Heart

[Attributes]: Spirit

[Level]: Level-seven resource

[Main Use Introduction]: The heart crystal of a quasi overlord-level creature, the Nine-Tailed Illusion Fox. The Nine-Tailed Illusion Fox is good at illusions. Its heart crystal is mainly used to strengthen the talent in pet illusions... (Click on all of them)

[Exchange Price]: 15,000 credits

[Remaining Number]: 1

[Name]: Tears of the Void

[Attributes]: Space

< Level > Level 6 Resources

[Main Use Introduction]: The eye of the Worm of Void that lives in spatial cracks. It's used to increase the affinity of the pet space... (Click it all)

[Exchange Price]: 18,000 credits

[Remaining Number]: 2

Shi Yu was silent.

Alright, the resources were indeed rich and the quality was also strong, but damn, it was so expensive. Based on the ratio of credits and money, it was over 100 million!!

"But it doesn't seem to be very compatible with its cultivation path of illusions. The level isn't important, the compatibility is the most important. In any case, Buggy can't completely absorb such high-level evolution material. It's a waste. Let's look at other things."

The growth level and resource level of the pet were actually corresponding, representing the absorption effect. It didn't necessarily mean that the higher the evolution ingredient level, the better. It would overflow with a lot of energy or burst the pet, so compatibility was the most important. Shi Yu comforted himself mentally.

[Level-seven Spirit Gem], [Space Splitting Grass], [Dream Fruit], [Mirror Stone]...

Next, Shi Yu started picking them one by one. Damn it, damn it. The more he picked, the angrier he got. He wanted all of them, but he didn't have money.

...

In the afternoon, under the guidance of the panda senior, Shi Yu arrived at the resources bank of Ancient Capital University. He planned to sell the resources first before thinking of buying anything. He smiled in anticipation.

Director Li had already contacted him, and Shi Yu did not delay. After all, there were many resources in the ruins that were unsuitable for prolonged storage. It was better to take action as soon as possible.

On the clean streets of the school, Senior Panda walked in front with Shi Yu beside her. Suddenly, Senior Panda seemed to have thought of something and exhorted, "Shi Yu, be polite later."

"Oh, the teacher in charge of the resource bank is very strong?" Shi Yu could not help but be curious when he saw Sister Panda reminding him.

Senior Panda crossed her arms and frowned. "Indeed very strong."

"Top-notch master?"

"It's higher than that."

"Legendary-level?" Shi Yu stopped in his tracks. No way.

How many treasures were there in the resource warehouse of Ancient Capital University that a legendary Beast Tamer had to watch over?

But even if they didn't have those treasures, would anyone dare to rob them?

It was not a big deal for a legendary Beast Tamer to be a principal. But it was too generous to manage a warehouse...

"Not really."

The panda senior smiled and said, "It's an overlord."

Chapter 119: Buggy's Dragon Aura

What?

Overlord level?

Shi Yu: "???"

Shi Yu suspected that he had heard wrong.

This didn't seem to be the level system of a Beast Tamer...

It was for a transcendent creature!

Awakening, transcendent, commander, monarch, overlord, guardian, myth. There were seven major growth stages for transcendent creatures. The overlord was at the fifth stage!

"He's not human?" Shi Yu fainted.

"Yes." Lin Xiuzhu nodded. "Teacher Yao is a gem cat."

Shi Yu: "???"

"Is it the gem cat I know?"

< Name > Gem Cat

[Attributes]: None

[Race Level]: Low-level transcendent

[Race Skill]: Gem Eye (Levelless Skill)

[Introduction]: A cat-type transcendent creature that can complete evolution through various Cat's Eye Gems.

Weren't gem cats a low-level transcendent race?

If Shi Yu's impression wasn't wrong, according to the current records, the gem cat with the highest racial level was only a high-level commander race. It wasn't as powerful as Buggy.

How did this pet grow to the overlord level!

"Which legendary Beast Tamer's pet is it..." Shi Yu asked curiously.

"Not a pet," Lin Xiuzhu said, "but an ownerless overlord creature."

Shi Yu: "???"

As she walked, she introduced it to Shi Yu.

"This started more than 100 years ago."

The suggestion started with the Mythical Era...

"At that time, the seven human countries formed an alliance."

"In order to show their friendliness, the countries gave each other some special pets of their own countries."

"That's when the gem cat was introduced into the country from other countries."

"At that time, Ancient Capital University had just been established. Because the principal liked cats very much, she raised dozens of cat-type pets on the school campus. This was considered a special scenery for Ancient Capital University at that time."

"The students can see all kinds of cat pets on the lawn and in the corners casually."

"Teacher Ying was one of the gem cats at that time. It was also the oldest gem cat."

"It seems that the students and teachers at that time liked this gem cat very much, so they wanted to collect a good quality Cat's Eye Gem and give it to it to help it evolve."

"But no one expected that this gem cat is very special. It can't complete evolution through the Cat's Eye Gem."

"Although it can't evolve, this gem cat likes gemstones very much. It has no intention of returning the gift it has gotten. Every year on its birthday, it will receive a Cat's Eye Gem as a gift."

“Ten years later, it obtained a Cat’s Eye Gem necklace... It became the richest transcendent creature in Ancient Capital University.”

“Then?” Shi Yu was at a loss. That worked?

The panda senior had a strange expression. “Then, the turning point came. A hundred years ago, a mystic realm of the totem era appeared. The disaster of the undead erupted in the ancient capital. The ancient capital University was the first to bear the brunt of it and was swept into the disaster.”

“Many students and pets were in danger. At this moment, this gem cat, which was like a stray cat, completed its evolution through more than ten Cat’s Eye Gems. It obtained more than ten high-level skills of different attributes and even super-level skills, leading some students to complete the counterattack...”

“From then on, it became the guardian of Ancient Capital University. It stayed for a hundred years and sent away batch after batch of students and teachers. To this day, it’s said that its growth level has already reached the overlord level.”

“???” Shi Yu was stunned on the spot.

It was ridiculous!

Are you sure this growth experience is an ordinary gem cat and not a mythical creature cub?

Lin Xiuzhu shrugged and said, “When I first heard this story from my senior, I was at a loss for a long time... But everyone says so, so maybe it’s true.”

“Although it has never had a Beast Tamer, it is indeed a guardian of Ancient Capital University. It has been living on the campus since the school was built a hundred years ago.”

“At that time, it was the wealthiest transcendent creature in Ancient Capital University. It’s the same now, because it’s managing the resource warehouse here... It received the salary of a guardian for decades and bought a warehouse of gem collections...”

Shi Yu fell into deep thought. It was better not to know where to start complaining.

A gem cat that had grown into an overlord?

For pets like the Gem Cat, as long as they had the rare resource “Cat’s Eye Gem”, they could obtain different racial skills according to the type of gem and complete evolution.

But one thing could be proven. A gem cat could only complete evolution through one Cat’s Eye Gem in its lifetime. But this one from the Ancient Capital University, it completed evolution through more than ten pieces at once? It obtained more than ten racial skills?

This didn’t make sense!

This talent... was too strange.

“In short, when the time comes, don’t treat it as a stray gem cat to play with and tease. Be more respectful, more respectful,” Lin Xiuzhu warned.

“Understood!” Shi Yu nodded heavily. What was the point of petting cats? He was petting pandas...

Wait, wait!

“You just said that this overlord-level gem cat has more than ten high-level skills with different attributes, and even super-level skills?” Shi Yu was stunned.

“Yes.” Senior Panda nodded.

“If I can’t touch it, can I greet it by shaking its paw...”

Lin Xiuzhu: “?”

“I’m just kidding. What abilities does it have? Did it get them from the Cat’s Eye Gem?”

“I’m not sure either... I only know that it can clone itself, use psychic abilities, and Teleport.” The panda senior shook her head.

“I see...” Shi Yu fell into deep thought.

He had never seen an overlord-level creature before. More than ten high-level skills sounded very replicating...

If it could use Psychic and Teleport, it meant that this Teacher Ying had spiritual and spatial talents??

However, this was not what Shi Yu was most concerned about.

What caught Shi Yu’s attention the most was the words “different attributes”. It was its racial skill as a gem cat, the levelless Gem Eye!

Skill: Eye of the Gem

[Level]: None

[Introduction]: The racial skill of the gem cat can allow the eye to evolve and become a special structure that can absorb the power of the cat’s eye gem. It’s a rare special racial skill without any concept of proficiency.

Gem Cats evolved through this skill, similar to Green Silkworm and Dragon Carp.

They could absorb the power of the Cat’s Eye Gem through the Eye of the Gem and obtain skills of different attributes.

However, the difference was that the Eye of the Gem skill could not increase proficiency. There was no concept of proficiency, and it could only fuse one gem.

Therefore, there was a limit to the gem cat’s evolutionary potential. No matter how good the quality of the cat’s eye gem was, they couldn’t absorb it perfectly. The gem cat evolution form of the highest race recorded was only a high-level commander.

However, the gem cat from Ancient Capital University was definitely super...

At this moment, Shi Yu was curious. Was this gem cat’s Eye of Gem skill relatively special, causing it to mutate?

For example, it could increase proficiency and absorb more mutations such as the power of the Cat's Eye Gem.

But even if it wasn't a mutation, if he replicated the skill Gem Eye, could he teach his pet and increase its proficiency?

Shi Yu was more curious.

This was the same as the Worm Silk and the Leaping Dragon Gate. It was a skill that could change the pet's talent in attributes. Moreover, it had no attributes, which meant that the compatibility could satisfy most pets.

If Eleven learned the Eye of the Gem and absorbed the power of a Time-Element Cat's Eye Gem, even if it couldn't complete its evolution like the Gem Cat, as long as it perfectly absorbed the power of the gem through this skill, it would be equivalent to it obtaining a time talent. It would be like the perfect level of worm silk that could change attributes.

In other words, this was a basic skill that could change a pet's compatibility with different attributes... Shi Yu was wary.

In the future, if there were any skills that he really wanted to teach Eleven and the bugs but didn't have enough compatibility, he might be able to use this method to change their corresponding talent.

...

Soon, Shi Yu and the others arrived at the resource warehouse.

The Ancient Capital University's Resource Chamber was just like a tall neighborhood. It was huge.

At the entrance, there was a small house that looked like a security room. Inside, a big, soft, doll-like, white cat with a V-shaped head and smooth fur was hugging a pillow to sleep.

After sensing that someone was coming, it patted the bed with its fluffy tail and slowly opened its eyes, revealing eyes that were like blue gems in the sky. Then, it slowly got up and shook its body, stretching the hair on its neck that was like a "scarf".

"Wu ~ ~" It yawned and jumped onto the window sill. At this moment, Shi Yu and the others happened to walk over.

"Teacher Ying!" Sister Panda greeted with a smile.

"Hello ~" The white gem cat continued to nap lazily and spoke in human language. Its voice was like a mature mature mature mature woman with a lazy voice.

"Are you a new student?" The big white cat glanced at Shi Yu, who was carefully observing itself behind Lin Xiuzhu, and asked.

School had yet to start at this time. During the holidays, there were basically no new students. However, Shi Yu had already greeted the Archeological Department in advance and came through the back door. It didn't matter.

"Yes." Shi Yu nodded.

“Then you guys go in.” It took a sip of water and continued to turn around and return to the bed.

“I’ve already informed my clone.”

Shi Yu :”...”

Lin Xiuzhu immediately pulled Shi Yu into the place to collect resources.

“Are all of these managed by its avatars?” Shi Yu asked.

“No, but it’s a holiday now. The other teachers are on leave, so it’s the only one here.”

Then, under Lin Xiuzhu’s lead, Shi Yu and the others saw another cat that was identical to the gem cat just now.

Clone skill...

This was also a high-level skill. It was a little similar to an illusion, but it could only create its own clone.

At entry level, one could only create phantom clones.

At the proficiency level, he could create a physical energy clone, and he could have the same skill as his main body, which was his attribute weakness.

After this skill’s proficiency was high enough, its tactical value was actually very high. However, at the moment, Shi Yu temporarily didn’t have any need for this.

1

“What do you want to sell?” The big white cat stood in the courtyard and signaled for Shi Yu to take out what he wanted to sell.

“These...” Shi Yu touched the ruin bead on his neck. In the next second, countless resources were placed in the courtyard.

The mountain-like pile of resources and ice-element energy crystals made the gem cat’s expression darken.

It glanced at the ruin bead on Shi Yu’s neck and felt its head hurt. This new student was not simple.

There was actually spatial equipment.

However, why were they all trash resources, and there were so many of them!!

“Meow!!!”

The original Ying was making an annoyed sound too.

The other employees weren’t around either. It had to do the calculations itself and categorize and collect them!!

“Hee.” At this moment, when she saw the headache on Ying’s clone, the panda senior smiled imperceptibly.

Before setting off, she had also inquired about it. Didn't Shi Yu want to sell resources? Why did he come out empty-handed?

Immediately after, Shi Yu showed her the Ruins Bead, making Lin Xiuzhu fall silent for a long time.

Then, Lin Xiuzhu asked Shi Yu how many resources he had to sell. When Shi Yu mentioned hundreds of types, Lin Xiuzhu had already expected the situation in front of him.

This cat preferred simple transactions. For example, if Shi Yu sold a Nine-tailed Fox Heart, it would definitely trade happily. However, it had always been blind to low-level and large numbers of trash resources because it was too troublesome to recover and the work was too cumbersome.

"Wait for me." Its face fell.

Soon after.

The pile of low-level resources that Shi Yu took out was estimated.

The resources collected by Shi Yu from the Island of Trials, excluding the Dragon Soul Grass, were worth about 1,200,000.

As for energy crystals, due to their pretty good quality, they were worth about 25 million.

In total, there were more than 26 million worth of resources. Shi Yu sold them all in one go.

From then on, the only valuable resources left were the Ice Dragon Whisker, Dragon Soul Grass, and Ethereal Spirit Stone.

26,000,0000!

Shi Yu was overjoyed. 260 divine beans! Even if it was a high-level skill, it could be used nearly 200 times!!

What did this mean?!

It represented three high-level skills!!

Initially, Shi Yu only had two million yuan in savings and was about to become poor. However, after this, he became rich immediately and gained some freedom.

Of course, if he wanted to finish all of them, Shi Yu estimated that it would be difficult to do without at least a year or so. Constitution and money were the greatest enemies that limited his points.

"I've taken away the resources. Your money will be in the account in two hours."

"Alright, you can leave now," the big white cat said with a headache after sending the reclaimed resources to different places.

"Wait, Teacher Ying, I still want to buy three sets of Moonlight Powder," Shi Yu said.

Moonlight Powder, a level-three spiritual-type resource, was used to neutralize and match the Dragon Soul Grass. Shi Yu had already investigated it clearly. Wasn't this perfect for Buggy?

At that time, it would master the deterrence skill with the nature of the dragon's might. Its current frost dragon phantom would be even more completed.

As for the evolution materials for Eleven and Worm, Shi Yu was really helpless at the moment. He would wait for the vocation assessment and the reward for discovering the Iron-eating Beast's evolution to be transferred to the account.

"Buy resources?"

"That's the job of the other clone. You guys go and find it." When the big white cat heard that, it immediately waved its paw lazily and started chasing people away.

Shi Yu and Lin Xiuzhu: "???"

Are its clones still divided into each other???

...

Next, after spending more than 200,000 to buy three bottles of Moonlight Powder, Shi Yu and Lin Xiuzhu left the resource area.

"Senior, thank you for leading the way."

After coming out, Shi Yu thanked her.

After recognizing the way this time, he could come by himself next time.

"No problem."

Lin Xiuzhu smiled and said, "Spatial equipment, more than 20 million yuan. Most of it was obtained from the ruins in Ping Cheng, right? You're a little rich now."

When he thought of how Shi Yu wanted to borrow money to buy the iron-eating beast cub half a year ago, Lin Xiuzhu felt that it was unreal.

This growth speed and earnings speed was too unscientific!

"20,000,000 isn't enough to buy Eleven a pair of evolution claws." Shi Yu smiled bitterly.

Lin Xiuzhu covered his mouth and smiled. "I think the evolved form of the Iron-eating Beast should still be called the Gold-Eating Beast."

Shi Yu smiled. This naming style was too much. After Buggy evolved, would it be called the Gold Swallowing Butterfly?

Iron-eating Beast Research Institute.

After walking around the resource bank, Shi Yu and the others returned.

Just as he returned, Shi Yu discovered a message on his cell phone.

The results of the survival assessment in the vocation assessment were out.

Although Shi Yu had already known the results in advance, most of the candidates only officially knew now.

However, at this moment, among the more than 6,000 candidates in various places in Ancient Capital City, only 700 were in a good mood, while the remaining thousands wore painful masks.

They had fallen off the rankings... They would have to wait another year.

Apart from the results, they were also informed of the subsequent assessment procedures.

The final ranking battle would be held in the Ancient Capital Arena in the Beast Tamer Association of Ancient Capital City tomorrow.

At that time, relevant personnel from major media, universities, and businesses would come to watch the battle.

Among them, the audience had all adopted an internal invitation system. No passers-by could come to the venue to watch this rule just by buying tickets, so only a few relevant institutions could see the ranking competition.

Most unrelated people could only wait for the official announcement of the assessment rankings and subsequent news editing. They couldn't see the details of the battle.

But even so, there were still thousands of spectators present.

This was because the candidates participating in the vocation assessment also had special benefits. They could be relevant personnel and watch the subsequent assessment. If the candidates who fell off the rankings also went to watch the assessment, the number of spectators would immediately increase.

"Want to watch the battle?"

Shi Yu stared at the electronic invitation on his cell phone and shook his head.

Forget it, it didn't mean much.

"The next ranking battle will continue for three days. The top 16 of the 700 plus candidates will be decided, and then the final ranking battle with the 16 seeded candidates..."

"In other words, I have three days to prepare."

After Shi Yu returned to the room, he thought about it. Compared to watching the battle, it was better to prepare for battle.

For example, he could use these three days to help Buggy absorb the Dragon Soul Grass and then assist it in raising its deterrence to the proficient level. That was the extent of the damage.

He should just add a high-level skill as soon as possible. It shouldn't affect his condition, right...

...

In the ruins pearl.

At this moment, after selling all the resources, the place became much quieter. Only Eleven and the food of the bugs were left.

At that moment, the two pets were practicing Soaring Sky and bullying tactics.

They planned to use the combination of the two tactics.

This Wuji Airlines tactic's greatest flaw was that its accuracy wasn't enough, and its opponent would easily be able to dodge.

In that case, as long as they used deterrence together during the fall to deter the enemy from moving, wouldn't that be fine?

This was inspired by the profundity of Shi Yu's swordplay!

Precision Strike! This wave was invincible!

"Stop for a moment."

Looking at the huge pit on the ground, Shi Yu looked at the Eleven and Buggy with a dark expression and patted his forehead.

"Wuu!" "Ji!!"

Seeing that the Beast Tamer had come in, the two pets quickly came over and begged Shi Yu to prepare a match for them to use their dual battle tactics.

It wasn't that they felt that the joint attack strategy was very powerful, but that they wanted to take a picture together.

There was no point in taking many pictures together in a one-on-one battle, but using a joint attack strategy of "Wuji Airlines" and "Bullying" could show their tacit understanding!

"Alright, as long as you guys are happy," Shi Yu said indifferently. At the same time, his heart ached for the opponent of this tactical experimental subject for a second.

This strategy was very dumb, but the pets that used this strategy was very strong, so it would cause the opponent to be very desperate.

But as long as Eleven and Buggy were happy, this was not a problem.

"But Buggy, is your deterrence still a bit weak?"

Buggy:???

What a big truth.

Eleven nodded silently. It was indeed a little lousy.

It felt like it was the one doing all the deterrence, like Buggy wasn't doing much.

"Ji!" Buggy looked at the leader with tears in its eyes.

What happened to being a bully together?

In the end, it wasn't using force to suppress others, but its own teammate?

Shi Yu and Eleven nodded. Wasn't that what it meant now?

"Ji—" Seeing that the Beast Tamer and the leader said this, Buggy shed tears. Didn't it just learn it a while ago...

What could it do?

"Hehe, then let's take advantage of the time and improve."

With that said, Shi Yu smiled and took out the golden Moonlight Powder and the preserved Dragon Soul Grass.

"Ji! Ji!"

The worm that was originally feeling aggrieved immediately lit up when it saw the Dragon Soul Grass.

It was the Dragon Might Grass!

Can it use it now?

"Yes."

"Let's try the effect first, but it might be very difficult for you to control the deterrence during the process. Eleven, you have to suppress its deterrence later to prevent the worm from losing its mind and going berserk."

Buggy shook its head. No, no, no.

Please believe in its willpower!

"It's not a matter of willpower or not. This is a level-three resource. The energy intensity is very high, and it's almost level four..." Shi Yu found clear water to soak the Moonlight Powder. Soon, the bowl of clear water turned pale yellow.

"Wuu!" Eleven patted its chest. Teach it.

Even if it was the might of a True Dragon, it couldn't stir up any waves in front of it.

"There."

Next, Shi Yu followed the instructions he had found and let Buggy drink the Moonlight Water.

After the worm gulped it down, Shi Yu handed it a Dragon Soul Grass.

"Swoosh, swoosh, swoosh." After taking the Dragon Soul Grass, Buggy quickly ate it.

Then, they widened his eyes and waited for a reaction.

"(◯ ▯ ◯ ✕)!!!!" A moment later, Buggy's brain was stunned.

It suddenly felt a violent force surging in its body.

It showed a painful expression. A huge mental wave erupted from its body, forming a substantial spiritual deterrence. It was clearly a silkworm, but its deterrence wave seemed to have turned into an azure dragon at that moment.

“Roar!!!”

Due to the huge power contained in the Dragon Soul Grass, the deterrence effect of the Dragon Soul Grass at this moment combined with the spiritual deterrence of Buggy itself... Started forming an even stronger pseudo dragon’s might. Intense energy kept leaking.

Fortunately, Eleven was standing beside Buggy at this moment, letting the monarch aura wrap around Buggy’s aura so that its aura wouldn’t affect Shi Yu.

“(ᄇ _ ᄇ) Ji!!!” Buggy cried. It was indeed a little out of control.

Now, Buggy felt that its deterrence was like a wild horse that had escaped its restraints and was running continuously.

“Steady, steady, the effect of the Moonlight Grass hasn’t taken effect yet.”

Shi Yu comforted it. After a moment, the moonlight water that the worm had drunk at the start finally had a special effect. The spiritual fluctuations of the Dragon Might and the worm began to slowly fuse.

At this moment, Buggy’s expression eased.

After another two minutes, Buggy finally controlled his aura. It opened its eyes in confusion and unknowingly broke out in sweat.

“How do you feel?”

Shi Yu asked, “Is there anything uncomfortable about this?”

“Ji.” Buggy shook its head.

Then, it looked up in despair at Eleven, who was releasing its king’s aura, which was also an expert level deterrence. It kept feeling that even after it was strengthened, its deterrence still broke at Eleven’s deterrence in an instant.

Eleven’s deterrence just now was like a big hand covering it, preventing it from really going berserk...

“Ji!!!” The bug released its deterrence again.

Boom!!!

The invisible spiritual deterrence hit Eleven’s almost physical king’s aura like a drop of water sinking into the ocean.

Worm: Σ (° Δ ° | |)

“ 〈(ㄱ)〉 〈Wuu.” Eleven took a look at the Dragon Soul Grass and Buggy and shook its head silently. As expected, it wasn’t as powerful as the point upgrade power of a Beast Tamer!

What dragon might? It was all fluff.

Skill proficiency was the way to go!

Buggy :” ...”

Buggy was silent, finally realizing this.

Why wasn't this dragon might as powerful as he imagined?

“Ji! (Shi Yu, increase points!)” In the next moment, Buggy pushed aside the Dragon Soul Grass and Moonlight Powder and looked at the Beast Tamer in anticipation.

Forget it, It should choose to believe in Beast Tamers.

Shi Yu :” ...”

“Who asked you to use deterrence to compete with Eleven? The nature of the Dragon Might is to better perfect the Ice Dragon Phantom...”

Shi Yu's face darkened, but he still took out the divine bean and stretched out his hand to increase points. He planned to increase the deterrence of the worm to the proficient level first.

Then, he would let Buggy use the remaining two portions of Dragon Soul Grass...

A moment later.

[Skill]: Deterrence / False Dragon Might (Proficient)

After adding the points, Shi Yu sat beside it weakly, holding a thermos.

Damn it.

The high-level skill was too damaging. It was still alright now, but he definitely couldn't increase it randomly before the competition, or else even with supplements, he wouldn't be able to withstand it.

Shi Yu didn't want Eleven to really push him onto the stage in a wheelchair.

This definitely didn't match the style of the edited survival trial. It affected one's character profile.

He had to take one path to the end. As long as he wasn't embarrassed, everything was fine.

“Ji!!!” This time, after deterrence reached the proficiency level, Buggy released deterrence again!

Boom!!!

This time, it was no longer an invisible deterrence. The green spiritual wave hit Eleven's almost physical king's aura domain like a green dragon. Then, it was like a drop of water that sank into the sea again without any ripples.

Worm: Σ (° △ ° | |)

Eleven: (— — ◯)

There was still a level difference.

Shi Yu speechlessly looked at the bug that wanted to use deterrence to defeat Eleven. Although it couldn't defeat Eleven, the ice dragon that was formed from this proficient pseudo-dragon might shouldn't be too weak even if it didn't use the Ice Dragon Whiskers.

Most importantly, he felt that he could really use this silkworm as a dragon now.

At that time, he would directly make Buggy become an ice dragon during the summoning process. Then, it would release dragon might when it came out. He felt that even if it was a commander rank creature, it would be scared away if it wasn't careful.

"Alright, the dual deterrence has been achieved. I hope the next opponent won't faint and lose the courage to attack." At this moment, looking at the deterrence confrontation between Worm and Eleven, Shi Yu looked forward to the next ranking battle and felt that he was a little closer to first place.

Target: Honor (Rewards)!

Chapter 120: The Video Came Out and Shi Yu Ran

In order to face the ranking battle in three days, Shi Yu made the final sprint...

In fact, it was just increasing the frequency and recuperating.

As for the 31 opponents he might face next, Shi Yu chose the most brutal way to understand them.

That was the gossip information that passed the assessment forum.

The assessment arrangements were too tight, and there was not much time for each candidate to investigate potential opponents and prepare. It was already not bad to know the opponent's pet race, Beast Taming Talent, and pet skills in advance.

For example, long-term preparations to learn targeted skills and nurture targeted new pets wouldn't appear in the vocation assessment.

Perhaps only a world-class competition was worth the effort of a player to snipe someone.

Shi Yu felt that his skill index was a very good sniper rifle. If he was really determined to target a certain Beast Tamer, he felt that he was invincible. For example, if he faced a Beast Tamer who was proficient in fire-element skills, he would arrange a fire escape skill for each pet. How would the other party play?

However, even for Shi Yu, who had the skill index, the investment was relatively large. Ordinary people really couldn't afford to do this.

Apart from Shi Yu, the other candidates were also making various preparations with the countdown of three days.

...

In a study in a villa area in Ancient Capital, Yin Zhengfan lowered his head to face his father. He didn't dare to look into his father's eyes and waited for criticism.

“Do you know where you lost?”

After returning, Yin Chuanqi asked Yin Zhengfan about all his experiences in the survival assessment. Yin Zhengfan didn't hide anything and reported everything, including how he lost to Shi Yu before the assessment ended.

This was his only loss in this assessment. Actually, it couldn't be considered a loss. After all, it didn't affect the assessment. However, for Yin Zhengfan, it was still a little difficult to accept. This was because both Yin Legend and himself had very high expectations.

Legend Yin Zhongrong wrote calmly. On the other hand, Yin Zhengfan had a stubborn expression and said...

“Using the Sky Crystal Butterfly to challenge the opponent's trump card, I underestimated the opponent's strength. But I don't think I've lost completely. The goal of this battle is to train the Sky Crystal Butterfly in the first place. I won't lose in the next ranking battle.”

Yin Chuan said, “What if I say that when you guys fought, he hadn't even used half of his strength.”

The Perfect Level Thunder Palm displayed in the video, the unknown level deterrence... When fighting Yin Zhengfan, Shi Yu used neither. Moreover, that transcendent-level Green silkworm with transcendent worm silk was also very powerful.

These were all things Yin Chuanshi knew, but Yin Zhengfan didn't.

Yin Zhengfan's expression changed, but he quickly said, “I'll still win.”

Yin Legendary nodded and said, “Let me tell you one last piece of information. Shi Yu only became a Beast Tamer half a year ago. The time he contracted the Iron-eating Beast is less than half a year. While it could be said you two are in the same age range. It seems like he took a huge advantage of his age. But the one who really took advantage was you, who started cultivating and nurturing pets since you were young. The reason why I asked you to participate in the vocation assessment now is not because of age, but because of cultivation time. Only then will there be a meaning in competing with others on the same stage.”

“Alright, go and prepare. If you can defeat him this time, I'll give you a gift.”

Yin Chuanqi waved his hand, indicating for Yin Zhengfan to go down and cultivate.

On the other side, Yin Zhengfan was suddenly at a loss. How was this possible?

Didn't that mean that the time he spent cultivating the Sky Crystal Butterfly was far, far longer than the time Shi Yu spent cultivating the Iron-eating Beast?

It wasn't the unequal battle he imagined. Instead, judging from the cultivation time, Shi Yu had been at a disadvantage the whole time?

How was it possible for that Iron-eating Beast to...

“Who is he...”

“You can go now.”

Yin Zhengfan left in disappointment. Yin Legend looked at the five words he had written.

Bureau 11, Shi Yu.

After watching the battle on the cruiser, he was also deeply curious about Shi Yu. Then, he investigated.

This investigation shocked him.

He had an ordinary identity and background, but he had such ridiculous strength. So he was related to this organization.

Recalling the few Monster Beast Tamers in Bureau 11, Legend Yin shook his head.

“To be able to listen to the Voice of History and spy on history, this talent is not necessarily worse than the Beast Taming Space’s strengthening talent, or even better. Whether it’s that Green Silkworm or the Iron-eating Beast, it looks like they obtained quite a lot of benefits from the ancient ruins.”

Yin Legend was originally worried that no opponent of the same age could pressure Yin Zhengfan in the vocation assessment, but from the looks of it, there was no need to worry. For a long time to come, Yin Zhengfan would have sufficient growth motivation.

There had never been a lack of geniuses in this world, but only those who could stand out from the many talented people had a chance of charging into the highest domain.

...

On the other side, Yu Shu was also being educated by a middle-aged woman who was sitting on the sofa, smoking a cigarette holder and had her hair permed.

“How did I give birth to a stupid son like you? How could someone else snatch that Dragon Soul Grass?”

In the face of his mother’s disdainful expression, Yu Shu’s face darkened. “A frost dragon, do you know what a frost dragon is?”

“It doesn’t matter if it was transformed or not. It’s just like the real thing.”

“What Frost Dragon?” Yu Shu’s mother was also a top-notch Dragon Tamer, so she naturally didn’t believe in such nonsense.

Even if her son was exaggerating, she was still indifferent.

“That’s the Illusory Phantom skill. At least at the proficient level. It’s a transformation completed with the help of high-level resources. It’s at least a level-six resource. Can you be more careful in the future before the battle?” Yu Shu’s mother rolled her eyes.

He was actually so silly as to let others wear divine clothes and trick him.

“Illusion? How do you know?” Yu Shu asked in surprise.

“Don’t worry about that.”

“I...” Yu Shu’s heart skipped a beat. Expert Level Illusory Phantom? That skill that could strengthen the battle power of the illusion with the help of external forces?

What the f*ck! His expression darkened, and he had the urge to slap himself. So Shi Yu couldn't afford to go against him! He actually needed external help!

It was one thing to borrow it as a support item, but it was actually a resource at least level-six! Shameless!

1

It wasn't that he couldn't afford equipment of this level for pets. It was just that due to the restrictions of the rules, he didn't care.

"Just you wait..." Yu Shu said, feeling stifled. The ranking battle's assessment only allowed pets and Beast Tamers to bring equipment below level three. When the time came, Shi Yu couldn't smile anymore.

This rule was also the reason why Shi Yu did not place his hopes on Buggy's Ice Dragon Phantom.

"Why do I feel that you still can't defeat it?" Yu Shu's mother sighed. Even if the other party was restricted by the rules during the competition and couldn't send out Buggy, she heard that the strength of that iron-eating beast seemed to be even more ridiculous.

Her silly son didn't seem very smart... In short, there were too many monster candidates this year. She didn't expect Yu Shu to get first place. It was fine as long as he got into the top five.

...

It wasn't just those who had interacted with Shi Yu. Those seeded candidates who had never interacted with Shi Yu and believed that they could break through from more than 700 candidates to the final ranking battle were all investigating the information of potential opponents.

In the blink of an eye, a day later.

In the Ancient Capital City, in the Beast Tamer Association building complex, in the Ancient Capital Arena.

More than 700 candidates stood neatly in the venue.

The surrounding audience seats were filled with thousands of candidates who had already been eliminated.

Apart from that, the recruitment personnel of the major corporations, the instructors of the admissions office of the nine major universities, the officers of the Beast Taming Troops, and the major media were all gathered at various places in the venue.

These 700+new professional Beast Tamers could be said to be the most outstanding batch of new Beast Tamers in Ancient Capital and dozens of second-tier cities around.

Next, they would be paid attention to by the various large institutions in the ranking battle segment. After that, they would encounter the crazy struggles of the various large factions. This was the pinnacle of their lives.

Under the light of the cameras, Master Qu Jie stood on the stage with a smile and looked at this batch of new professional Beast Tamers.

“Congratulations to everyone present for officially becoming professional Beast Tamers. Our examiners have witnessed your performance in the field survival trial. No one can doubt your excellence. I hope you can never slack off in the future and start a new glory in the Beast Tamer domain.”

“A total of 784 Beast Tamers have passed this vocation assessment. Next, you will undergo the final ranking battle. This assessment will also determine your strength ranking among the newly promoted Beast Tamers!”

“By the way, among these 784 people, a total of 16 seeded candidates won’t participate in the assessment ranking segment, so the 768 candidates present will first carry out the ranking competition, and after the top 16 are determined, you will carry out the final ranking battle with them.”

As soon as Master Qu Jie finished speaking, the 768 newly promoted Beast Tamers present immediately started discussing.

Although there were strong seeded candidates in every vocation assessment, most candidates would think that on what basis weren’t they chosen to be these sixteen candidates?

Whether there was a conspiracy or not, whether or not it would be unfair... Many people still had this thought.

“It’s about to begin.” Many people stared at Master Qu Jie.

However, as a seed candidate, while there was preferential treatment to not participate in the preliminaries, they had to bear a certain amount of pressure. For example, the pressure of his abilities being directly exposed in public.

On the high platform, Master Qu Jie said, “Before the ranking battle officially begins, the Ancient Capital Beast Tamer Association’s official website has updated the exciting episode of the candidates for the survival assessment segment of this batch. The main characters of the video are the seeded candidates chosen this time. Before the assessment, everyone can admire the elegance of this batch of candidates.”

“Next, the big screen at the arena will also play it on repeat.”

Whoosh!!

After Master Qu Jie said that, the people from the various domains, as well as the new professional Beast Tamers who were about to participate in the ranking battle, were suddenly more engaged.

Everyone waited for a long time. Weren’t they waiting for the assessment situation of the seeded candidates in the survival assessment segment?

The outside world couldn’t pay attention to the assessment situation in real time like the examiners. This was the only way to understand the examinee’s bearing in the third assessment.

“I want to see how powerful the seeded candidates are...”

“Ridiculous. I contracted a pet of a middle-level commander species. I’m actually not a seed candidate even though I got fifteenth for the first test?”

The new professional Beast Tamers were all in different moods.

Then, more than 700 new professional Beast Tamers dispersed on the spot and waited for the ranking assessment to officially start in half an hour.

At this moment, no one went to rest. After a few scattered people went to pee, they immediately ran back and stared at the big screen in the venue.

Why was it that others were seeded candidates but not him? It could be determined in this exciting event.

...

At the training ground of the battle club at Ancient Capital University.

The students from the other departments had already gone on holiday, but the batch of students with top battle power who specialized in battle between the battle club and the school team of Ancient Capital University was still preparing for the national competition. With their opponent being the geniuses of the other eight top educational institutions, they didn’t dare to relax for a moment.

However, there was still some time to rest.

“Eh!!”

“The promotional video for this year’s Ancient Capital vocation assessment has been updated. Do you want to see it?” A boy who was resting with a towel around his neck suddenly shouted at everyone.

“Perhaps our future juniors will be inside.”

On the training ground, White Brook, who was the vice president, exited her beast-eared girl form and turned to look at the member.

“The promotional video of the vocation assessment...” She recalled Shi Yu, who Senior Lu had introduced to her. That guy’s performance was indeed not bad. He was fourth in the basic test. He would probably be edited into the promotional video this time.

White Brook’s interest was piqued. She planned to see Shi Yu and the Little Iron Eating Beast’s performance in the wilderness survival assessment segment.

...

At the Iron-eating Beast Research Institute, when Shi Yu was still lying in bed and resting, Jiu Yingjie exploded. He gathered around and shouted for Senior Panda.

“The promotional video for the Ancient Capital vocation assessment has increased. Shi Yu is a seeded candidate, right? He must have been cut in. Everyone, come and see.”

“Where’s Shi Yu?”

“I think he’s lazing in bed again.”

“Forget about Shi Yu, come quickly.”

...

In Ping Cheng, Bamboo Stone Dojo, including Master Lin Hongnian, all the disciples of the dojo had also discovered the news. It was no secret that Shi Yu had run to the ancient capital to participate in the vocation assessment, so they naturally had to pay attention.

Not only them, but also President Feng of the Beast Tamer Association in Ping Cheng. As his secretary massaged his shoulders, he smiled and stared at the computer screen, intending to see Shi Yu’s dazzling performance. After all, Shi Yu was a Beast Tamer in Ping Cheng.

At this moment, the exciting collection of survival trials released by the Beast Tamer Association in Ancient Capital City could be said to have instantly attracted the attention of countless people.

In less than two minutes, the number of viewers online had exceeded six digits, and the number was still rising.

At the start of the video, when the screen was still dark, passionate background music sounded.

As a promotional video, accompaniment was a very important part. Even before they saw the video, the Beast Tamers watching the video felt their blood boil.

Boom!!

With a loud bang, an image appeared.

The first thing that entered his eyes was a woman in a black silk qipao with a slit. She held a book in her left hand and flipped through the pages with her right hand as she walked. At this moment, the ground in front of him shattered. A ten-meter long Ground Legged Centipede that looked like steel and had a ferocious face crawled out of the ground. This was an extraordinary creature of a low-level commander race. It loved to eat humans the most and was a demon in the eyes of many Beast Tamers.

After the Earth Legged Centipede appeared, the woman raised her head and glanced at it slightly. In the next moment, a dazzling light descended. With a boom, a bolt of lightning descended from the sky. The terrifying lightning pillar was like a heavenly punishment. It instantly penetrated the Earth Legged Centipede’s body and scorched its entire body. At the same time, a huge pit ten meters in diameter appeared where the lightning landed.

The woman gently put down the book, and a black cloud flew to her side. The two of them walked towards the scorched Earth Legged Centipede step by step.

“This person is the second in the basic test, Zhang Qianyi with the elemental coordination talent. That’s a high class commander species Thunder Cloud Sprite!!”

At that moment, seeing this scene, in the Ancient Capital Arena, the thousands of meters candidates looked at the destructive power caused by the lightning in silence and felt guilty. They felt that even if their pets went up, they would also be instantly killed!

“The power of the lightning is so strong... and the control is also strong...”

The video had only just begun, but it had already used an explosive scene and a beautiful young lady to attract the attention of the viewers. The video immediately made many people fall into it. As Zhang Qian approached the Ground Legged Centipede, the scene lit up and changed. The music's tempo became faster, and directly appeared in the Sky Battlefield. Yu Shu rode the Soul-Attribute Bone Dragon and easily duelled more than ten transcendent-level Tempest Sparrows in the air.

“Roar!!!!”

In the video, the Soul-Armored Bone Dragon let out a dragon roar. The terrifying Soul-Armored Dragon Breath suppressed the storm that filled the sky and swallowed many Tempest Sparrows in an instant. Then, the scene shattered. A huge rock giant was locked in a spatial domain. After the scene shattered to the point where the space shattered and turned, the huge rock giant's body directly shattered into pieces. A light butterfly flew up from the broken rock and onto the young man's shoulder.

The scene kept changing. Next, it gradually played the exciting performance of each seeded candidate, making the spectators involuntarily hold their breaths as they watched the promotional video seriously.

One by one, they watched the video. Every frame gave these new professional Beast Tamers and candidates who had fallen off the rankings a strong feeling. The seeded candidates were so strong.

Moreover, this batch of seeded candidates had a very diverse development style. There was even a Gu Master who controlled a beast tide. He specialized in defense against the anti-injury black Tortoises that could kill ferocious beasts with just a beating. Animals, plants, elements, undead, no matter what type of pet they were. These seeded candidates were incomparably calm on the island of training as if they were strolling in their own backyard.

“Damn, so awesome.”

“We're actually from the same batch?”

“Monsters, this group of people.”

“It's right not to let them participate in the preliminaries... I don't want to bump into them.”

Many newly-promoted professional Beast Tamers stared at the scene in the video with their mouths agape. Why was it that they had worked so hard to survive on the Island of Trials and carefully searched for hunting targets, but these people could kill indiscriminately in the same place??

However, one way or another, the promotional video was indeed very shocking. As the background music became faster and faster, everyone was about to realize that the most exciting moment was coming.

“Here it comes..!”

Countless people shouted in their hearts. Then, the background music reached the most exciting moment. The video suddenly changed...

A figure riding an Iron-eating Beast, holding a wooden sword, and a green worm hanging from its shoulder appeared.

“What's this...”

This scene stunned many people.

Why did it suddenly become like this?

A glitch?

Everyone was extremely confused. Some people also recognized Shi Yu.

However, even they were stunned when they saw Shi Yu's attire.

Then, what stunned them and everyone else came.

On the Iron-eating Beast, Shi Yu's expression was indifferent. He raised the wooden sword with both hands and swung it down!

"Boom!" Instantly, the air vibrated, as if a translucent crescent sword qi (insect silk) was formed. A path was directly cut open in the forest in front of them. In the next second, more than ten stone baboons walked out and looked at Shi Yu with reddened eyes.

"F*ck, what the hell!!!"

This attack stunned many new professional Beast Tamers.

Facing the Stone Baboon group in front of him, the candidate, Shi Yu, was still indifferent.

Facing the attacking group of baboons, the iron-eating beast took a step forward. At that moment, Shi Yu raised his wooden sword again and faced the stone baboon that was charging over with its stone claws.

At the same time that they attacked, Shi Yu also attacked.

Profundity, great shock!

At that moment, the group of baboons that flew over seemed to have encountered a great horror. They revealed looks of horror, and their movements were several times slower. Shi Yu swung his sword, and instantly, an extraordinary-level stone baboon's body caved in as it flew more than ten meters away!

Just like that, the Iron-eating Beast slowly walked forward. One, two, every time Shi Yu swung his sword, a Stone Baboon would be sent flying like a flying meteor.

Even if some stone baboons immediately turned their bodies to stone to resist, they were still shattered by a single slash. They were no match for the other party.

In a short moment, the stone baboons fled. The candidate, Shi Yu, leisurely entered the forest.

During this process, the wooden sword didn't show any changes. Shi Yu's movements were extremely coordinated, as if it was a group of baboons that he had killed himself.

The people watching the video opened their mouths wide, unable to react.

The video... continued. It was impossible for every candidate to only have one exciting performance. There were sixteen seeded candidates, and each of them had three or four exciting episodes. The video

kept playing. After a slight silence, the video returned to normal. However, not long after, at the most exciting moment, another scene of Shi Yu riding an Iron-eating Beast appeared...

Profundity: Thunder Flash!

Lightning flashed on Shi Yu's body and sword. His figure teleported and his sword pierced through the Mad Python.

Profundity: Infinite Convergence!

Shi Yu threw out a wooden sword. The scene changed, and dozens of wooden swords instantly appeared in the sky. They obeyed Shi Yu's command to cut down the bees.

It was like a shooting star, killing everything in the endless path it carved.

Shi Yu was riding a panda and holding a wooden sword, and he was indifferent to life and death and would fight any beast he saw.

When the video was completely broadcasted, everyone had already been brainwashed and had completely forgotten the exciting performance of the other seeded candidates. The only thing left in their minds was the scene of Shi Yu riding the iron-eating beast and slashing with demonic nature. The scene was completely unlike that of a beast tamer.

Did something strange happen...

The seeded candidates who were also watching the video had dark expressions, especially Yu Shu and Yin Zhengfan. Their values were the most broken. They kept feeling that the Shi Yu they knew was different from the one in the video...

Ping Cheng, Bamboo Stone Dojo.

At this moment, the values of the apprentices who contracted the iron-eating beast shattered. They didn't understand what was going on.

What happened to the exciting performance of the iron-eating beast?

Lin Hongnian was silent. His balls hurt.

1

After President Feng of the association finished watching the video, his body stiffened. Even his secretary couldn't massage him anymore.

Lu Qingyi, who was somewhere, took a deep breath. She put away the cell phone and rubbed her eyes.

At Ancient Capital University, the beast-eared senior who had once taught Shi Yu life-saving skills was left in endless confusion.

Looking at Shi Yu's impressive performance in the video, Senior Panda and Jiu Yingjie were also stunned!

This was Shi Yu?

That was Eleven?

Excuse me, what were they doing?

What the hell was this? Why was it different from what they imagined!!

“Holy shit.”

As the video played on repeat, the entire Ancient Capital Arena no longer had the atmosphere of the assessment. Everyone recalled the video just now in confusion. Gosh, sounds rose and fell, mainly because there were a total of 16 seeded candidates. Everyone only saw the scene when Shi Yu appeared. They couldn't understand it at all!

Oh, divine beasts in heaven... Who could explain what happened to them?

A special Beast Taming Talent similar to the Fusion Talent? Or was that wooden sword also a pet?

Why were the other candidates using their pets to kill the enemy? This candidate could kill everyone himself...

“How did he become like this...” Among the newly-promoted Beast Tamers, Bai Qi, Xu Jingyin, and the others, who were also from Icefield City and had once competed with Shi Yu for the Evolution Sacred Spring, also knew Shi Yu. However, they were stunned because they knew him.

It was fine if the difference in strength was increasing, but why was the difference in style also increasing?!

Similarly, the cousins who had lost to Shi Yu in the battle restaurant and even the passers-by on the plane who had fought Shi Yufan were all shocked.

“That's not a Beast Taming Talent at all, and the wooden sword is not a pet at all...”

“It's that green worm that looks like it's lazing around and the iron-eating beast that's its mount...” Just like how the master examiners could tell the truth, there were also some experienced master-level Beast Tamers present who could tell the truth at a glance. Their faces couldn't help but darken.

What kind of weird candidate was this!!!

Often, the truth wouldn't be hidden for long. In a short period of time, the video comments area had already been flooded. A group of big bosses analyzed the key points of the hidden technology of this video.

[Damn, this candidate is ridiculous!]

[That Iron-eating Beast has mastered Transcendent Level Hardening, so it can apply the Hardening Material to Beast Tamers and wooden swords, making the Beast Tamer's physique and wooden sword's attack power enough to injure transcendent-level ferocious beasts!!]

[There's even a perfect-level Thunder Palm. This is a move that can release powerful speed!!]

[Not only that, but that Iron-eating Beast probably also mastered the deterrence skill. The expression of fear produced by those ferocious beasts when facing attacks is too similar to the effect of the deterrence skill!]

[Is this a f*cking Iron-eating Beast?]

[The most ridiculous is that green worm. I took a screenshot. There's one scene where it's definitely silk spitting, but I can't see the worm silk. Holy shit, transparent worm silk, do you know what it represents? It's a worm silk with an invisible nature! It's another transcendent skill! Ridiculous, that sword aura is actually a worm silk, and the one controlling the wooden sword to slash randomly is also a worm silk! Holy shit, worm silk can even be played like this...]

[Big bosses, slow down...]

At this moment, because of Shi Yu, everyone analyzed the technical content in Shi Yu's battle images. This analysis not only shocked the candidates, but even some masters and top-notch masters fell into deep disbelief.

Although apart from deterrence, he used skills without levels, skills that were at low-level, and mid-level... This skill proficiency was too exaggerated.

Moreover, it appeared on weak species pets like the Iron-eating Beast and the Green silkworm. How did he do that?

The most shocking thing was that although the pets were clearly so strong, why was it that the battle scenes of this Beast Tamer were all him playing cool?

Was the destruction of conscience behind all this, the fall of pets, or the distortion of human nature?

Even before the ranking battle began, the major media outlets in Ancient Capital City had already captured the hot topic and published news.

"Master Level Analysis! The scary truth hidden in Iron-eating Beast Knight Shi Yu's battle skills!"

'I'll take you into the inner world of Iron Eater Knight Shi Yu!'

"Shocking! Iron-eating Beasts and Green Silkworms can actually be used like this!"

"The collective action of the various major film academies! Several film hegemon corporations looking for one person! What exactly is the reason behind all of this? Let's lead everyone to understand."

At this moment, countless people were watching Shi Yu's video with strange expressions. After hearing the masters analyze the technical content of Shi Yu's battle and watching the video again, many candidates had a new feeling.

So powerful.

It could actually assist a weak human Beast Tamer to instantly kill transcendent-level ferocious beasts. Its support was so strong.

However, what confused people the most was why Shi Yu could be so calm and not show any embarrassment!!!

At this moment, it could be said that Shi Yu was completely famous.

Many people were looking forward to Shi Yu's performance in the final ranking battle.

At that time, would Shi Yu still fight using his own body?

Although the process was a little bumpy, after the big bosses' analysis, everyone suddenly realized that this Shi Yu was an even more ridiculous monster hidden among the candidates!!

At this moment, Shi Yu was still sleeping soundly.

Boom! Boom! Boom!!

In his sleep, Shi Yu only opened his eyes in a daze when he heard someone knocking on the door.

"Who is it?"

"Open the door." Outside, the stifled laughter and discussion of Senior Panda and the others sounded.

"Quickly open the door."

"What, what's wrong??" Shi Yu was stunned.

"Junior Shi Yu, impressive. You're famous. I'm certain that even if the evolution of iron-eating beasts won't skyrocket the value of Iron-eating beasts, the Iron-eating Beast Knight definitely can!" Zheng Yingjie laughed wildly.

"???" Shi Yu immediately woke up. His heart skipped a beat. He quickly picked up his cell phone and had a bad feeling.

A moment later, Shi Yu swiped the promotional video of the Ancient Capital vocation assessment and a pile of comments below the video.

After taking a look, his temperature suddenly rose, and his vision turned dark. However, he quickly stabilized himself.

"Where is he?" Lin Xiuzhu was still knocking on the door.

As for Shi Yu, he silently rolled up the blanket and kept rolling around on the bed. F*ck, this day had finally come. If he had known earlier, he wouldn't have messed up.

1

"Don't look for me. See you after the vocation assessment."

A moment later, Shi Yu found a cap and a pair of sunglasses. He entered the ethereal state and directly passed through the wall to leave. He chose to run. He couldn't meet anyone he knew. When the commotion stopped and everyone calmed down, he would return...
