Chapter 1181: Sword Undying Dark Phoenix (4)

Buzz!!!

In the next moment, orange-red Sun Flame power rose from the ruins.

Effective!

Sun Flame could really unlock this ruin with the lowest strength!

"Jiu!!!!!" At the same time, in the depths of the ruins.

The Undying Dark Phoenix, which was bathed in black and red flames, suddenly opened its eyes and let out a cry.

A terrifying creature gradually revived with the cry of a phoenix and the death flames.

At this moment, it was suddenly awakened. The Undying Dark Phoenix was still puzzled, but a moment later, it was overjoyed.

It was unsealed.

Someone began to unseal it through the Sun Flame.

It immediately sensed the familiar bloodline fluctuations.

"I didn't expect my good daughter to grow to this extent in such a short period of time. What a powerful bloodline power..."

The Undying Dark Phoenix was extremely excited.

This was actually its second awakening during this period of time.

The first time it woke up was when the laws revived. At that time, it was awakened.

Unfortunately, he still couldn't break through the seal with the change in the environment. Soon, he fell asleep again.

This time, it was really awakened.

It was extremely excited. It looked like the investment in the Undying Fruit and the two Sun Flame Flowers was not wrong. After the other party mastered the ability to unseal this ruin, it immediately came to save it. Its speed was faster than it imagined.

Because although the resources it left behind could allow Chi Tong to quickly increase to the totem level, that Beast Tamer would most likely be a burden, but from the looks of it, there didn't seem to be?

But it had only been such a short period of time. There was no reason for that young man to have reached the legendary level. Could it be that after the revival of the laws, it was easier for humans to increase their level?

Forget it, forget it.

After the ruins broke through, the Undying Dark Phoenix directly dragged its body and bathed in the cursed flames and sun flames as it flew into the sky outside.

In the next second.

The Undying Dark Phoenix flew in the outside world. Its huge evil flame body that was nearly a hundred meters tall made it look majestic. After flying in the outside world, its eyes flickered with a dark light as it stared at Shi Yu and Chi Tong in the form of a Sword Maiden.

"Hahahahahaha ~ ~" A huge laugh resounded through the Undead Battlefield.

"Good daughter, thank you."

"I'm really touched, but it's better to do good things to the end." It stared at Chi Tong and said, "I'm so hungry, so hungry, so hungry... You're already so strong. You should give me some."

"After absorbing your power, I should be able to return to the peak."

Demigod level... And a powerful demigod not inferior to a dragon!!!

"Jiu!!!!" In the next moment, it let out a high cry again, as if it had activated some special Skill. On the other side, Chi Tong's expression suddenly changed. It felt that the power of the Phoenix bloodline in its body immediately left its control and was about to be pulled out.

Chi Tong could sense that the Undying Dark Phoenix opposite was not strong and not at the demigod level, but it had a very powerful restraining effect on it, making it very difficult for it to resist with the power passed down by Mu Huiyin.

It was as if the other party had used some skill that specialized in countering the descendants of his bloodline.

"What are you doing?" Chi Tong's eyes were filled with anger as it looked at the Undying Dark Phoenix.

However, although it couldn't resist with the bloodline power passed down by Mu Huiyin, as the sword intent lingered in Chi Tong's eyes, shocking sword aura erupted from its body. In an instant, the Immortal Slaying Sword Formation broke through all restrictions. A shocking nomological Sword Chant erupted, instantly cutting off the bloodline connection between the Undying Dark Phoenix and Chi Tong!!

Boom!!!

The four swords lingered, and the cry of the Law Sword resounded through the world, shattering all the flames. Sword aura lingered, making the Undying Dark Phoenix opposite suddenly widen its eyes.

Quasi-divine skill, how was this possible!

"Hey, what a joke." At this moment, not only Chi Tong, but Shi Yu and the others also had unfriendly expressions.

Boom!!!

Demigod Eleven suddenly increased to a hundred meters tall and entered the Chaos form. It looked at the Undying Dark Phoenix tyrannically.

The gem cat girl revealed an as expected expression. With a swing of its tail, its aura rose steadily. The power of a demigod was undoubtedly displayed. The luster of the gem eye spread as it looked at the Undying Dark Phoenix in shock.

Wasn't this guy a little too anxious? He had just come out and dared to attack without figuring out the situation?

So what the other party said should be fake? Then what was the truth? The gem cat felt that it should know after completing the "cleansing".

Boom!!!

The full-level deterrence from Buggy, Baby Ginseng, Susu, Ling, and the others rose with a bang and suppressed over. At this moment, the Undying Dark Phoenix, which was just about to absorb the power of Chi Tong's bloodline, was suddenly stunned. Its eyes widened even more, and it almost felt that it was difficult to breathe.

"Two demigods..." It looked at the in shock and felt that it was a little familiar. Then, it looked at the cat girl and also felt that the other party's life fluctuations were a little familiar.

Weren't these two guys the bear and cat that followed this human Beast Tamer when it first woke up?

It remembered that among the two at that time, one was clearly only commander rank, and the other was only overlord rank.

How long had it been? How could it have reached the demigod level? Impossible!!!

It could still understand why Chi Tong's level had increased so quickly. No, it couldn't understand at all. At this moment, the Undying Dark Phoenix couldn't understand at all why Chi Tong had mastered a quasi-divine skill with just two Sun Flame Flowers and an Undying Fruit!!

It even completely escaped the restraints of a top-notch bloodline and cultivated a sword-type quasi-divine skill that exceeded its race!

Shi Yu said, "Come on, I forgot. You haven't had time to cleanse your curse and plague. Looks like your rationality has been corroded. It's not too late to cleanse now."

"Impossible!!!" The Undying Dark Phoenix shouted, almost covered in sweat.

He kept feeling that it was a little different from the script he had expected.

[Unscientific Beast Taming](#)

Chapter 1182: The Truth of the Empress Dynasty

Undead Battlefield.

The Undying Dark Phoenix was extremely afraid, not understanding why such a plot would happen.

"Wait!!!"

Seeing that Shi Yu and the others were about to attack, the Undying Dark Phoenix stopped them repeatedly.

"I just hallucinated because I was sealed for too long and was too hungry."

As it spoke... it suddenly let out a sharp phoenix cry. The nether flames on its body immediately increased, and it wanted to fly away.

Under Shi Yu's gaze, its energy level instantly increased from one billion to more than a billion and quickly approached two billion.

This was because the undead everywhere in the Undead Battlefield began to Spirit Release and become its nutrients because of the Undying Dark Phoenix's breakthrough.

This scene made Shi Yu's gaze involuntarily freeze. Fortunately, he didn't come to save the Undying Dark Phoenix too early.

Not only did this guy have a connection with all the undead born from plagues and curses in the Undead Battlefield, but it could also instantly decide their life and death. It even maintained a very special connection with Chi Tong. If it were Chi Tong before its evolution, it would probably instantly become its bloodline nutrients.

However, even if the Undying Dark Phoenix had many trump cards, its first thought when it saw Shi Yu and the others was still to escape!

The Undying Dark Phoenix suspected that it was still dreaming and felt that it was too strange. It had only slept. When did demigod-level and quasi-divine skills become so common?

In its current state, it was definitely unwilling to fight a demigod head-on.

However, the Undying Dark Phoenix wanted to leave and continue absorbing the undead in the Undead Battlefield, but it had to ask Shi Yu and the others if they agreed.

Before long, the Undying Dark Phoenix's expression changed. It realized that the space here was completely sealed.

Then, the young man opposite turned into a red-haired and red-eyed person. The shocking Sun Flame Sword Formation locked onto it around it.

"Wuu!!!" A black and white millstone crossed space and appeared above its head.

Apart from that, another sound of laws vibrated. The Undying Dark Phoenix looked at the phantom of the Blue Sea Saintess behind Shi Yu in shock.

"Third demigod, aren't you the Blue Sea Sprite!!!"

"Why are you here too!"

It had seen the Blue Sea Sprite at its peak 3,000 years ago, but because of this, it couldn't understand why the figure of the Blue Sea Sprite appeared here.

"Sun Flame, Yin Yang Millstone, Sea Cleansing Spirit, three cleansing Skills. Do you like them?" Shi Yu said.

The pupils of the Undying Dark Phoenix constricted.

Under the sympathetic expressions of Buggy, the gem cat, and Ling, a miserable cry came from the spatial barrier.

The towering emperor covered his ears and sighed. Pitiful, pitiful, even Yun An wasn't in such a miserable state.

However, what depressed Baby Ginseng was that in this operation, it was also acting as a support healer and team doctor.

"Ah!!!!!!!"

The Undying Dark Phoenix's scream was extremely penetrating, like a woman in labor. Shi Yu's face tensed up when he heard it.

...

"Susu, Devour and seal it for a second cleansing."

...

In the Infinite Devour Space, this was the third time a guest had come recently.

Previously, it was the Abyss demigod and the Yun Race demigod. This time, the Undying Dark Phoenix was considered the worst.

At the moment, Yun An was still undergoing purification.

Its mind and Resistance had yet to be completely cleansed.

Susu's Sea Cleansing Spirit was very powerful when purified to the greatest effect. It could really make a bad person turn over a new leaf.

In history, many of the Abyss demigods who were lucky enough not to be killed by Susu had been completely cleansed by Susu of the power of the abyss and became the guardians of the sea.

If Yun An was cleansed to this extent, even if it was released, it wouldn't pose a threat to Dong Huang. It might even become Dong Huang's environmental ambassador.

However, the reality was that it definitely couldn't be cleansed to this extent. After all, if it was completely cleansed, what if its meteorite fragment didn't have the evolution Effect?

Therefore, at the moment, it was only a targeted partial cleansing. At least, it didn't have too strong a resistance when it tried to atone for its penitence.

On the Undying Dark Phoenix's side, after being imprisoned, it also continued to receive the baptism of the Sea Cleansing Spirit.

Susu didn't hold back against this guy. It directly underwent the greatest power cleansing. Not only did it have to cleanse its mind and Resistance, but it also had to cleanse the power on its body. After all, this guy's entire body was covered in plague and curses. Apart from creating uncontrollable ferocious spirits, there was no other use for it.

Because this guy's strength was insufficient for a demigod, and the most suitable was a quasi demigod like the Tyrant Dragon King, it was not difficult to cleanse.

"Ah!!!!!"

After a long time, the Undying Dark Phoenix woke up from its coma. Its strength had already been weakened by various cleansing methods.

It opened its eyes with difficulty and saw Shi Yu and the others standing neatly in front of it. Its eyes were dead.

"Kill me..."

"Congratulations, the plague and curse on your body have already been cleansed. In theory, you should have recovered your self-awareness and rationality," Shi Yu congratulated.

"Why are you so anxious to die?"

"Otherwise, why would you spend so much effort to find someone to save and cleanse you?"

"Or is what you said previously a lie?"

The Undying Dark Phoenix opened its mouth slightly and finally looked at the Sword Maiden Chi Tong standing beside Shi Yu in silence. It closed its eyes again, not wanting to explain too much.

"It does seem to have sobered up a little, but it's still not enough," the gem cat girl said curiously.

So what exactly was going on?

"Are you planning to say something? Is there something you can't say?" Shi Yu asked. "If you don't want to say it, we'll extract your memories. It might cause you a certain amount of damage."

[Unscientific Beast Taming](#)

Chapter 1183: The Truth of the Empress Dynasty (2)

"Of course, even if you say it, we might do it in the end, but gently."

As the Undying Dark Phoenix really had a bloodline connection with Chi Tong, Shi Yu and the others were not in a hurry to attack. After all, the other party was still fundamentally different from Yun An and the others.

"Ask away." When Shi Yu finished speaking, the Undying Dark Phoenix didn't open its eyes, but it spoke weakly.

Without the brutality when it just broke through the seal, its mind was cleansed by Susu and calmed down. Its mental force field also changed.

"Looking at your current attitude, what you told us previously is that the two internal strife between the Phoenix Race because of the hybrids and purebloods should be a fabricated story, right?"

"What exactly is your identity?"

The Undying Dark Phoenix opened its eyes again and looked at Shi Yu. "That story is true. From the perspective of the Phoenix Race, I'm indeed the mother of Mu Huiyin and the empress, but from the perspective of humans..."

"I was wrong about this. In the end, I brought this upon myself. I've understood that perhaps my soul dissipating is my best fate now."

"I'll tell you everything I know. Then, please let it end me," the Undying Dark Phoenix looked at Chi Tong and said weakly.

"Tell me." Shi Yu felt that the history hidden behind it might not be simple, so he asked.

The Undying Dark Phoenix said, "The origin of everything still starts from the Mythical Era..."

"According to the records of the Phoenix Race, the Mythical Era ended because of the war, and Blue Planet shattered. After that, the powerful gods of the Phoenix Race left Blue Planet one after another."

"Only a small portion of the Phoenix Race that didn't become gods stayed behind and evolved into the Phoenix Race in the future."

"After a long time, the Phoenix Race slowly forgot about the Mythical Era. History was annihilated in time, but one day, a half-god of the Phoenix Race went to the starry sky to break through to the divine level."

"However, it couldn't break through to the divine level on this trip, so it was forced to return because it couldn't withstand the environment of the starry sky."

"At this moment, its lifespan is already coming to an end. It only wants to die in its hometown."

"However, during the process of returning, it accidentally entered a Phoenix Race ruin in the starry sky."

"That's a mystic realm created by a Phoenix God who left Blue Planet in the Mythical Era. Inside is a secret treasure it brought back from the depths of the starry sky."

"In terms of resource level, that secret treasure is even above the divine level. Back then, the Phoenix Race ancestor who brought it back called it a resource that exceeded the divine level."

"Gaining a secret treasure. This Phoenix Race ancestor was originally very happy and thought that this was its hope of breaking through to the divine level, but soon, it regretfully discovered it."

"This super divine-level secret treasure is sealed in the ruins. It doesn't have the ability to take it away at all."

When the Undying Dark Phoenix finished speaking, the expressions of Shi Yu and the others changed slightly.

"It brought the ruins back to Blue Planet and the Phoenix Race before dying."

"Later, after the Phoenix Race's research, they discovered that if they want to take away the resources, they probably need divine-level power."

"Just demigod-level isn't enough."

"But in an era where the laws are incomplete, it's impossible for divine-level power to appear."

"At that time, in order to study the ruins, the Phoenix Race had already consumed a large amount of resources, causing the Phoenix Race to become much weaker. It was directly surpassed by the Dragon Race. After discussion in the race, in order to not let the Phoenix Race continue its endless investment and decline because of this ruin, they decided to seal the ruins and leave behind ancestral teachings. They would wait for the Mythical Revival before opening it."

"From then on, this ruin became a forbidden area for the Phoenix Race and the most important place."

"Until, in our generation, the Phoenix Race gave birth to two demigods. One was me, and the other was my sister." The Undying Dark Phoenix looked at Shi Yu and the others.

"Sister's talent has been better than mine since she was young. She suppressed me in every aspect. In the end, it was also this one who became the Phoenix Race Leader."

"We all have the bloodline of the Sun God Phoenix, but it was even more outstanding. It took a step further and successfully evolved towards the Four Spirits of Heaven, the Vermillion Bird. At that time, it was known as the creature closest to the Vermillion Bird."

"It even established a huge country and was worshiped as a god. Its citizens were spread throughout various races, and among them, the number of humans was the greatest."

"At that time, I was very indignant. I wanted to surpass it, but there was nothing I could do."

"Until I had a premonition dream."

"The premonition dream told me that humans are the key to opening that Starry Sky Phoenix Race ruin. As long as I can open this ruin, I can become the strongest of the Phoenix Race and lead the Phoenix Race to a more prosperous peak, surpassing Sister. For some reason, I believed this premonition dream."

"No, or rather, this dream only provided me with an excuse. I've long had this thought."

"In the end, I chose an unacceptable path."

"The Phoenix Race pursues the purity of bloodline, but in order to become stronger, I began to modify my bloodline and valued the potential of humans. I tried to modify the human body of human Beast Tamers and modify them into hybrids of the Phoenix Race. I hope to use hybrid humans as nutrients to make me stronger."

"In fact, if I can use humans to break through to the divine level, I can lead the Phoenix Race to a new chapter."

"During this period, tens of thousands of humans died because of my hybrid experiment. Some of them were captured from outside the Phoenix Nation, but their talent was not very good. In the end, I aimed

at the humans who had undergone the Purification of the Phoenix Mystic Realm and had superior bloodlines. They were all believers of the Vermillion Bird and had outstanding talent."

Unscientific Beast Taming

Chapter 1184: The Truth of the Empress Dynasty (3)

"However, the truth always comes out, there is no concealing the truth. I was discovered by my sister and it was very angry. It immediately forbidden me from continuing to modify my bloodline and stop this nonsense. It also wanted to judge me. According to the clan rules, it wanted to lock me up for a thousand years to reflect. I was naturally unwilling, so I led the clansmen who followed me to fight it."

"During this period, I secretly sent one of my proudest daughters, who contains my bloodline, out of the Phoenix Nation in advance, worried that she would be injured." The Undying Dark Phoenix looked at Chi Tong.

"The internal strife lasted for a long time."

"We suffered a crushing defeat in this battle, but on account of our old feelings, we were lucky enough to successfully escape. I led a portion of the Phoenix Race to leave the Phoenix Nation and come to Dong Huang to find that perfect hybrid."

"Unfortunately, I can't find her anymore."

"In addition, our vitality was greatly injured, so we opened a new mystic realm and fell into a deep sleep to recuperate. This sleep lasted for a thousand years."

"After waking up again, I picked up the plan and continued to create a large number of Phoenix hybrids, establishing a new faction in the east, the Phoenix Empire."

"Because there were no totem demigods in the east at that time, we quickly became the number one faction."

"A large number of mixed-blood Beast Tamers of the Phoenix Race also became the batch of human Beast Tamers with the best talent in the east at that time. Among them, Huang Xi was the Empress Dong Huang you mentioned. She was one of them."

"In the beginning, her talent potential was actually not good among the many Phoenix hybrids."

"She's a late bloomer. No one expected her to become a legendary Beast Tamer who can fight demigods in the end."

"Actually, from the moment we woke up and rebuilt the Phoenix Empire, Sister has already noticed us."

"Seeing that we don't repent and continue to challenge the Phoenix Race's rules, it's completely angry this time."

"The Phoenix Race won't allow their bloodline to flow to other races at all, nor will they allow the bloodline of their race to be tainted."

"Therefore, the Phoenix Nation, which was far away on the overseas island, became the greatest enemy of the Phoenix Empire."

"Both parties started the totem battle again."

"Retrieving my home and proving that I'm the orthodox one, taking away the super-divine-level resources left behind by the ancestor of the Phoenix Race, has also become the primary goal of the Phoenix Empire I lead."

"This time, because of the existence of the hybrid Beast Tamer, we're not at a disadvantage."

"In fact, as Huang Xi exceeded everyone's expectations and became a Legendary Beast Tamer, our strength has already exceeded the Phoenix Nation, forcing Sister and the others to retreat step by step."

"At this moment, I realize that the time is ripe. We've tampered with every hybrid Beast Tamer. We can use them as sacrifices and turn them into nutrients for our growth."

"I judge that if I absorb Huang Xi, my strength can definitely become a peak demigod not inferior to the Blue Sea Sprite. I can even surpass the demigod level and become a divine level."

"Therefore, I attacked. However, I didn't expect that I had underestimated her. Her strength had long escaped my control. Although the backup plan I left behind was useful, I was still killed by her."

"However, because I ate the Undying Fruit, I successfully revived and became an undead."

"Perhaps it's also because of kinship. After that, she didn't completely kill me. She only sealed me."

"This is all I've experienced since I was sealed here..." The Undying Dark Phoenix sighed. "Huang Xi is a good child. You look very similar. I've let you down. I actually wanted to use this method to become stronger. "

The Undying Dark Phoenix looked at Chi Tong and repented.

Shi Yu and the others also fell into deep thought.

On the other hand, Chi Tong heaved a sigh of relief. After completely confirming that it didn't have a deep mother-daughter relationship with the Undying Dark Phoenix, it was relieved. If Mu Huiyin didn't acknowledge its bloodline, it was the same. It only needed Shi Yu.

This bloodline brought too much suffering to Mu Huiyin, and it even made Mu Huiyin take the initiative to strip the bloodline away later. After Little Chi Tong heard the source of the bloodline, if it weren't for the fact that this bloodline could bring him strength and allow him to protect Shi Yu better, he would also want to give it up.

As expected, it felt that there was a reason why it liked the sword skill Mu Huiyin left behind more and not the power of the Phoenix.

"What happened after that?" Shi Yu asked.

"How did the empress dynasty perish and how did you become like this?"

The Undying Dark Phoenix said, "In the end... after I was sealed, Huang Xi changed the national name of the Phoenix Empire to Dong Huang. Compared to the identity of the Phoenix Race, she acknowledges her identity as a human more."

"The Phoenix Totem Nation finally became a human country."

"She ended the totem war in the east in one go. With the strength of a Legendary Beast Tamer, she let the east enter a peaceful era again. However, many years later, Sister broke through and started a war with Dong Huang again."

"The years of war have already made the conflict between the two parties irresolvable."

"Sister is much stronger than me, but after Huang Xi grew to the peak, she became even stronger. Not only am I not her match, even after Sister broke through, she's no longer her match."

"She led the Phoenix Army alone and blocked Sister and the others outside the country."

"After having the advantage, Huang Xi wants to take another step forward and take away the legendary super-divine-level resources left in the Phoenix Race."

"She's been very strong since she was young. Legendary isn't the end she wants. This resource might be able to allow her to take another step forward."

Unscientific Beast Taming

Chapter 1185: The Truth of the Empress Dynasty (4)

"However, when Sister saw that Huang Xi had targeted a super-level resource, she also fought back with all her might."

"In the end, according to what I know, Sister and Huang Xi perished together in the final battle. Huang Xi wanted to take away the super-divine-level resource in the Phoenix Race, but she encountered a trap set up by Sister in advance. The entire ruin disintegrated because of this battle, causing them and the entire ruin to fall into the spatial flux."

"In the seal, after learning about their situation, I began to think of cracking the seal and obtaining a new life. I studied the seal and absorbed the death aura that filled this place to continue modifying my bloodline. In the end, I modified myself into this ghost appearance. Not only did I not crack the seal, but I also turned the surroundings into a dead land. The so-called curse and plague were also the consequences of my own actions."

After the Undying Dark Phoenix finished speaking, it said, "I've already told you everything I know. Because of me, the entire Phoenix Race was almost exterminated. My daughter, who was originally close to me, also left me, and Sister lost her life because of this. The sins on my body no longer allow me to live in this world."

The Undying Dark Phoenix was indeed very regretful now. If it hadn't betrayed the Phoenix Race back then, the Phoenix Race wouldn't have weakened to this extent. If it had reflected in time and didn't attack the empress or make the empress become enemies with the Phoenix Race, perhaps the empress would be the one with the greatest hope of leading the Phoenix Race to the peak.

Unfortunately, every mistake caused so many evil consequences. Now that it had finally been rescued from the seal by a daughter, it still made the wrong choice. The Undying Dark Phoenix felt that its life was a failure.

Shi Yu and the others were silent.

They didn't know if it was because Susu's Sea Cleansing Spirit had taken effect, but they could feel that the Undying Dark Phoenix was indeed sincerely repenting.

However, what surprised Shi Yu, the gem cat, and the others was that so many twists and turns had happened during the era of the empress dynasty.

"Where's the location of that cosmic ruin?" Shi Yu asked.

The Undying Dark Phoenix looked at Shi Yu and shook its head. "On a huge island, it's called Phoenix Island. It's the initial headquarters of the Phoenix Race."

"However, if you're also thinking about that super-level resource, I advise you to give up. The entire cosmic ruin was swept into the spatial flux because of the battle between Huang Xi and my sister. Phoenix Island also sank because of the war. It's impossible to find it again."

The Undying Dark Phoenix said, "Can you kill me now?"

The gem cat said, "Unfortunate. Aren't super-level resources on the same level as the Eye of the Evil God!?"

The cat felt pity.

The Phoenix Race was really rich.

"Chi Tong." Shi Yu looked at Chi Tong in the form of a Sword Maiden. Chi Tong shook its head, indicating that the Undying Dark Phoenix had nothing to do with her. Shi Yu could decide whatever he wanted.

In the end, Shi Yu was silent. He swept the gem cat and the others out of the Devour Space.

He planned to think about it before deciding how to deal with the Undying Dark Phoenix.

It couldn't die yet. At least, it had to let Buggy enter a dream, Susu's memory water drop, and verify its words to obtain more details.

....

"The empress actually perished with the sister of the Undying Dark Phoenix, a demigod who evolved towards the Vermillion Bird."

"When the Undying Dark Phoenix was alive, it was really a demigod."

"Super divine-level resources in the Phoenix Race..."

"The predecessor of the empress dynasty, the totem country, the Phoenix Empire..."

Shi Yu and the others, who had received countless information at once, felt an itch in their hearts. So this was how the Phoenix Race was almost exterminated.

Among them, Shi Yu couldn't forget it the most.

He wanted Qi to bring them back to the era of the empress dynasty to take a look. Chi Tong's little sister, the empress, died just like that. It was a pity. He had seen Emperor Wu, and he also wanted to see the empress very much.

So what was the super-level resource brought back by the Phoenix Race's ancestor from the starry sky? Did the gods of Blue Planet really make a name for themselves in the starry sky?

He also wanted to ask how strong that genius sister of the Undying Dark Phoenix who was evolving towards the Vermillion Bird was.

"Everyone, I want to return to the space and time of the empress era to take a look. What about you?" Shi Yu asked his contracted pets and immediately received cheers from everyone.

Only Qi hit her head and said, "You've all broken through. I, I, I'll be exhausted. Unless, Shi Yu, you help me add some quasi-divine skills to increase the proficiency of Space-time Travel. If you break through, you should be able to add some quasi-divine skills, right?"

Shi Yu's face turned pale. He would die too...

[Unscientific Beast Taming](#)

Chapter 1186: Transmigrating to the Empress Era (1)

Ancient Capital University!

Shi Yu and the gem cat solved the hidden danger of the Ancient Capital, the Undead Battlefield, without anyone noticing.

He hid his merits and reputation and returned to Back School.

Unfortunately, from now on, the Undead Battlefield would be crippled, and there would be fewer and fewer undead.

But it wasn't a big problem. This kind of training place was too dangerous, so it was fine not to.

When the time came, Shi Yu could completely build a better training place for the Ancient Capital.

To put it bluntly, the Undead Battlefield was a dangerous place affected by a top-notch totem that had fallen from a demigod.

Which pet in Shi Yu's team was inferior to it?

Shi Yu casually patted his head and could think of ten training locations that were not inferior to the Undead Battlefield.

Then, Shi Yu and the gem cat girl returned to Ancient Capital University.

He found Principal Feng.

"Shi Yu, you're awake??"

Principal Feng, who was watering the plants and stepping into retirement, was very surprised to see Shi Yu and the gem cat girl appear.

He could be said to have nothing else to ask for now.

The school had the strongest Legendary and the weakest demigod. What else was there to work hard for? They just had to lie flat.

His name would definitely be recorded in history with the names of Shi Yu and the gem cat.

After a few days of fermentation, although the world still didn't know which level Shi Yu had broken through to, that battle directly changed Shi Yu's title from "world legend" to "strongest Legendary".

After being numb for a few days, Principal Feng gradually accepted it.

After all, even his granddaughter had become a titled legend. It was not a big deal for Shi Yu and the gem cat to become Legendary battle power and demigod battle power.

"From the looks of it, you don't look like you just woke up."

Principal Feng looked at the energetic Shi Yu and the others with unsatisfied expressions.

"Roar, roar, roar." Eleven, who was following beside Shi Yu, touched its stomach and asked if the university could still provide food.

A Yin Yang Millstone had just come. Although it had controlled its power, it was still hungry.

Principal Feng's expression darkened. "I... It can't anymore!"

Shi Yu, this was already at the demigod level. It could eat all of Ancient Capital University alone!

Shi Yu's entire team... could eat up the Ancient Capital!

Shi Yu had slept for seven days since Shi Yu returned and Principal Feng could tell that he was no longer human!

It was better to let Shi Yu and the others think of a way to solve it themselves!

"Wu..." Eleven lowered its head aggrievedly. Principal Feng, you've changed. In the past, you always made me eat everything.

"Indeed, I didn't just wake up. After waking up, I dragged Teacher Ying to the Undead Battlefield for a walk," Shi Yu said.

Principal Feng: "I went to the Undead Battlefield for a walk..."

He suddenly had a bad feeling.

"What did you do?"

"I let the Undying Dark Phoenix out along the way," the gem cat girl said.

Principal Feng's eyes rolled back and he almost fainted from fright. Why did they act on their own!!

But soon, he realized that... it didn't seem to be a big problem?

He instantly imagined the scene of the Undying Dark Phoenix breaking through the seal and seeing three to four demigods surrounding him.

That felt so good...

"So, so is what the Undying Dark Phoenix said previously true?" Principal Feng immediately asked.

Shi Yu and the gem cat girl looked at each other and said to Principal Feng, "It's Yun An's neighbor now."

Principal Feng understood. Villain, right? He knew that this Phoenix wasn't a good person!

"But the Undying Dark Phoenix is indeed the empress's mother."

Principal Feng widened his eyes and immediately had an extremely hungry expression. "Quick, tell me..."

Who wasn't an archeologist?

"Wait, a message," Shi Yu said in embarrassment. "President Lin."

A moment later, Shi Yu finished replying.

Principal Feng asked, "What is it?"

Shi Yu said, "It's nothing. He brought the Prediction Owl to a meeting in the Alliance. Teacher Owl suddenly broke through for a while in the meeting and asked me what was going on."

"Forget about them. Let's continue."

Principal Feng: ...

The gem cat: "Damn it!"

...

Then, Shi Yu told Principal Feng the secret of the empress dynasty.

Principal Feng sighed continuously!

After satisfying his curiosity, Principal Feng fell into a sigh.

He really wanted to witness it personally!

It could be said that it wasn't just Shi Yu. Every archeological Beast Tamer had the feeling of wanting to participate personally after learning a lost history.

Unfortunately, they didn't pray.

"Well, so I'll leave the Undead Battlefield to you to deal with the aftermath," Shi Yu said.

Principal Feng : "..."

He knew that Shi Yu's goal in telling him about this was definitely to push the blame.

"I understand, I understand. Leave the rest to me."

"Are you going back to the icy plain?" Principal Feng asked.

"No, I still have to stay here for a period of time," Shi Yu said.

Shi Yu temporarily had no intention of leaving Ancient Capital University. After all, he still had to work with the gem cat to seal Yun An.

If the gem cat worked harder, Buggy and the others could work less...

The premise was that the gem cat didn't let him take care of food.

"Alright, I'll see if I can call Qingyi back," Principal Feng said. "She definitely wants to know about the empress. When the time comes, you can tell her."

"No problem." Shi Yu nodded.

About a week later.

Yun An was sealed in the Legendary Ruins by Shi Yu and the others and sent to Wu Ling City.

Senior Ji Mengzhu's hands were almost trembling as she took the ruin she had personally given Shi Yu.

She didn't expect that after going around in circles, the family heirloom would return to her. Moreover, it had changed from a tool to seal a top-notch totem to a tool to seal the half-god Yun An.

[Unscientific Beast Taming](#)

Chapter 1187: Transmigrating to the Empress Era (2)

Ji Mengzhu looked at the item and thought about him. She felt that at this moment, Emperor Wu and her father's spirits in heaven could also be comforted.

"Your progress is still too slow." After Shi Yu and the others left, Ji Mengzhu said to Lin Xiuzhu, "Shi Yu... When I met him, he was only a level-six Beast Tamer. Now, he's already the strongest Legendary. If you want to catch up to him like this, according to the normal training method, it's completely not enough."

Senior smiled bitterly. "Then what should we do? It's alright, I won't chase anymore. I'll nurture the Iron-eating Beast Corps for him."

Ji Mengzhu sighed. Yes, what should they do? Shi Yu was like Emperor Shi of the Time Emperor Era, Emperor Wu of the Emperor Wu Era. No, he was stronger than them.

In this situation, how could his peers catch up? Even if they had Legendary aptitude, it was completely insufficient.

After all, the current Shi Yu was recognized as the strongest Legendary on Blue Planet.

On Shi Yu's side, without the Legendary Ruins, the turtle, Little Ice, and the short cat had also changed their training environment.

It wasn't the Blue Sea Ruins, but a portable mystic realm created by Buggy itself.

This way, it would be easier for it to modify the training environment, and it would be more convenient to train the will of the four heavenly beasts' followers.

After finishing his work here, Shi Yu could finally busy himself.

His current goal was to become a demigod. It was best to wait until the Mythical stage completely revived. Once he broke through, he would directly be invincible at the divine level.

...

Shi Yu's first goal was to add points to Little Ji and Duckie and pull their super Skills to the current limit.

Using this and Baby Ginseng's supplements to increase his physique...

As for Qi's spatial travel, the current success rate of teaching was extremely low. Shi Yu really didn't dare to teach it. He decisively threw Qi to Buggy to continue the special training of Resistance. At least, he had to have the overlord's Resistance before coming!

If he wanted to add points, he could train his Resistance!

As for Duckie and the others' quasi-divine skills that already had the overlord's Resistance, Shi Yu actually dared to teach them. This was because as he broke through, the success rate of teaching those quasi-divine skills had already reached a low level.

Coupled with multiple supports, although the consumption was huge, there might be a success rate.

Apart from that, because of this breakthrough, a pile of super top-notch Skills with a success rate of 0 also had a success rate. Unfortunately, it was also extremely low.

For example, Eleven's Demon God Body and Thunder God Armor could actually be fused. Although the success rate was extremely low, Shi Yu was also very curious about what kind of skill could be fused.

From the difficulty, it was most likely a quasi-divine skill!

Quasi-divine physique skill!

He felt that... if it fused, it could definitely defeat Ancient God Golden Bull's physique quasi-divine skill.

Of course, Shi Yu didn't want to try this extremely low level easily at the moment... He planned to go from frugal to extravagant.

After the demigod battle in the Demon Sea that shook the world, the strongest Legendary Shi Yu disappeared from everyone's vision again.

Shi Yu returned to the icy plain and started cultivating again.

First was Duckie's Demon Subduing Staff, Abyss Liberation, Death Vortex, and Dark Sky Wave Rain. They were all chosen by Shi Yu (Perfect+47).

Low-level Skills could also be fused, but because there were too few accompanying moves, Shi Yu didn't move for the time being. He planned to replicate more Skills like Team One in the future and give it customized fusion skills.

At this moment, Duckie's battle power, together with the Heart of the Abyss, could be said to be very fierce. Its battle power was close to the first team. What it lacked was replication of top-notch skills and exclusive cultivation.

Of course, if the duck became stronger, Little Ji would definitely become stronger. They were both super Skills, but they were all upgraded to (Perfect+47). Among them, because the compatibility between the Earth Domain and the earthquake was too high, Shi Yu conveniently fused it into Earth Control.

It could be said that apart from basic intelligence, everything else was already the limit.

At this moment, apart from Little Purple and Qi, the contracted pets in Shi Yu's team already had the overlord's Resistance.

Shi Yu did not stop adding points. He continued to add points crazily and attacked Little Purple.

Although Little Purple's Resistance was lacking, after suffering a little, super Skills could still be added.

On the other hand, although Eleven and Susu's super Skill could already continue to increase points from transcendent to Dao Proficiency, Shi Yu didn't want to.

On Eleven's side, it was because the stronger it was, the greater its appetite, and the greater the burden on the Beast Tamer. The physique Shi Yu received from feedback was completely incomparable to the burden. If he continued to add points to it, it was better to add points to Little Purple. After Little Purple became stronger, not only was it free of burden, but it could also strengthen the Beast Taming Space and continue to reduce the burden.

It was obvious who it was that was more comfortable for the Beast Tamer.

As for Susu, it didn't need to add any points at all. It just needed to use Infinite Devour to digest the inheritance of the Blue Sea Ruins. At the totem level, its acceptance speed was even faster. Shi Yu didn't need to trouble himself with the two inheritance skills from transcendent to Dao Proficiency.

In fact, for the sake of Shi Yu's state, he had to take it easy.

Just like that, two months later, Shi Yu's physique finally had a small breakthrough. Ling thought that he could contract a totem demigod above his level.

In theory, it was best to choose Little Purple, Baby Ginseng, and Buggy for this totem.

Among them, Little Zi had broken through to the totem level. Its feedback to the Beast Taming Space was definitely the greatest. However, Little Zi only had medium Resistance at the moment. It had just become an overlord. Continuing to add points to the totem level would consume too much energy.

Baby Ginseng could break through immediately. At that time, it could strengthen Shi Yu's recovery ability. The supplements it created would also have stronger effects.

It was the same for Buggy. After breaking through, its Dragon of Imagination could be raised to transcendent. It could allow it to evolve again. At that time, Shi Yu estimated that Buggy would also be a Mythical Race. As a spatial element, its feedback to Shi Yu's Beast Taming Space would be second only to Little Purple.

Unscientific Beast Taming

Chapter 1188: Transmigrating to the Empress Era (3)

Apart from that, there was also a more comprehensive attribute feedback.

However, in the end, no one of these three were chosen.

He used Chi Tong as the first candidate. This was an additional reward for being first in the previous team. Apart from that, there was another reason. Shi Yu and the others were tired of staying and planned to go to the empress era to play.

Shi Yu and the others' current situation was that because the breakthrough had become too strong, the pressure when Qi transmigrated would be much greater than before.

However, due to the restriction of Qi's will, it was too early to add points. Although Qi later expressed that she didn't mind and could transmigrate with Shi Yu and the others if she consumed more energy, Shi Yu couldn't bear to.

Therefore, after two months of training, Shi Yu successfully did something else.

Shi Yu transferred Qi from the contract of the second Beast Taming Space to the first Beast Taming Space and officially promoted Qi to the first team.

After arriving at the first team and enjoying the nourishment of the level-eight space, Qi was immediately strengthened. At this moment, the consumption would be much lower if she transmigrated with Shi Yu and the others.

Unfortunately, Shi Yu had only trained his body in the past two months and ignored the upgrade of the second space. Otherwise, he wouldn't have gone through so much trouble to let Qi move.

As he was going to the empress era next, keeping the breakthrough opportunity for Chi Tong was definitely the best choice.

Because the empress dynasty was the era of the Phoenix. At that time, opportunities were everywhere for the Phoenix. If Chi Tong wasn't allowed to break through and evolve in one wave, it would simply be a waste of the opportunity to transmigrate.

He also wanted to take a look at the super divine-level resources of the Phoenix Race. It was said that only divine-level power could take them away. If Chi Tong wasn't even a demigod, it would definitely be difficult for Shi Yu to take them away.

If Chi Tong reached the demigod level, could possess him, eat the Time Fruit, and sacrifice more than ten totem-level scapegoats... Shi Yu felt that it wasn't impossible to instantly reach divine-level battle power.

In the past two months, Chi Tong had done nothing else. It took out its bird spirit and phoenix spirit form, which was the bloodline from the Undying Dark Phoenix, and squeezed them into clones.

This way, not only could it escape the influence of the Undying Dark Phoenix, but it could also only inherit Mu Huiyin's talent and be itself.

As for the Phoenix clone, Shi Yu and the others planned to nurture it towards the Vermillion Bird to see if it could succeed. Apart from the existing cultivation methods, Shi Yu was also about to return and learn from the Undying Dark Phoenix's sister. Wasn't the other party known as the Sun God Phoenix that had mastered the power of the Starry Sky Vermillion Bird, the demigod closest to the Vermillion Bird...

Therefore, now, Chi Tong's image had already become a humanoid sword spirit. The one standing on the Phoenix clone and holding the sword... was the Phoenix Sword Maiden!

The next stage of evolution was the Vermillion Bird Sword Maiden holding the Immortal Slaying Sword Formation.

...

"Let's go!!!" After cultivating bitterly for two months, Shi Yu was extremely excited. He could finally travel through space and time again.

They chose an auspicious day and quickly set off.

Shi Yu flew through Psychic power and didn't ride on his pet to enjoy the vastness of the sky.

However, just as Shi Yu passed through the Demon Capital, he suddenly braked and stopped flying towards the Space Island.

He looked at his cell phone with a surprised expression.

It was a person who sent a message in the Bureau 11 group.

The sender was Gu Yun.

The only person who was absent from the last Bureau 11 meeting.

It was that veteran of Bureau 11, the former strongest archeologist of Dong Huang who could be said to be the director of Bureau 11.

Through the ruins, this senior had helped Dong Huang obtain two Mythical resources alone. More than ten legendary resources. He was quite a legendary figure.

Unfortunately, it was said that he had gone to explore a Mythical Ruins and had not come out for five years.

At the same time, he told no one to disturb him and look for him. Otherwise, not only would they not help him, but they would also do something bad with good intentions.

An Expert like him was indeed qualified not to let others point fingers.

At this moment, he sent a group message. This meant that... he had successfully cracked the Mythical Ruins and came out??

The message was just sent a few seconds ago. In the ruins for several years, it was also rare for cell phones to still have electricity. It should be a mechanical life form.

Gu Yun: "I'm out. I'm outside that ruin now. My pet and I haven't eaten for a long time and have lost our mobility. We're very hungry now. Anyone. Hurry up and send some food over..."

In the group: "!!!"

Lu Qingyi: "Senior Gu?!"

Li Lianping: "Who's near the Demon Capital?"

Ke Yingzong: "Senior Gu, don't worry. I'm contacting the president of the Demon Capital Association, but the food of the seven overlords might take a while to prepare."

Fang Lan looked at the chat and trembled.

Shi Yu looked at the coordinates and was silent for a moment. "I happen to be near the Demon Capital. It's very close. I'll send some food to Senior Gu first."

Lu Qingyi: "Shi Yu, are you there? Please."

Shi Yu didn't expect to encounter a senior from Bureau 11 who cracked the ruins and came out of seclusion on the way.

Staying in the Mythical Ruins for six years... The resources brought at the start were probably completely insufficient to support the other party's activities.

They had finally come out this time. They must be starving.

Shi Yu's entire team could understand the feeling of hunger.

After looking at the coordinates, Shi Yu quickly ran towards the location of the Demon Capital Mythical Ruins recorded in Bureau 11's Index.

It didn't take long for Shi Yu to reach the location.

At this moment, Senior Gu Yun was lying weakly on the ground with seven overlord-level pets. The surroundings were like a primitive forest. The old Senior Gu was already skin and bones. His overlord-level pets were also extremely weak.

[Unscientific Beast Taming](#)

Chapter 1189: Transmigrating to the Empress Era (4)

From the looks of it, after using the last of his strength to send the message, Shi Yu saw that the other party's overlord mechanical pet that looked like an Index had already been completely switched off and fell into a dormant state.

When Shi Yu saw Senior Gu like this, he immediately took out a sachet and dispersed the fragrance.

In the next moment, the white-haired Senior Gu Yun and the pets immediately looked better and slowly opened their eyes.

"Senior Gu, eat." Shi Yu took out some spirit food with relatively mild nutrition that the team usually ate and used his Psychic power to control it to float in front of Senior Gu and the others.

Smelling the fragrance, they were like hungry ghosts as they crazily ate it.

After wolfing it down, the pale Senior Gu Yun's face instantly turned much redder. At this moment, Gu Yun was very surprised. He had only drunk a few mouthfuls of milk tea and eaten a few dried fruits, but his body immediately felt warm and quickly recovered to a healthy state?

What kind of food was this?

Gu Yun knew very well how poor his condition was. What kind of food could allow him to recover so quickly so gently?

"Roar!!!" At the same time, he could also sense that his overlord pets had clearly only eaten a small portion, but they immediately became spirited. It was simply unbelievable.

"You are..." At this moment, after recovering slightly, Senior Gu Yun, who was sitting on the ground and leaning against a tree, finally noticed Shi Yu in front of him.

A young man in his early twenties.

He got up with Shi Yu's help.

"Senior Gu, my name is Shi Yu, a newbie of Bureau 11. Lu Qingyi invited me to join the bureau. I happened to be near the Demon Capital. After seeing the message, I was the first to rush over," Shi Yu said.

Senior Gu Yun looked at Shi Yu. "Newbie..."

"Yeah, it's been six years."

"Shi Yu, the food you gave us just now must be very precious. Thank you."

He was sincerely grateful.

Shi Yu smiled and said, "You don't have to worry about it. They're all Normal food. They're very nutritious and suitable for Enfeebled people to absorb."

"Qingyi has invited an impressive genius," Senior Gu Yun said kindly. How could those be Normal food? To be able to carry these things with him, this newbie from Bureau 11 was probably impressive.

He was definitely an archeologist with a legend aptitude and was being heavily nurtured by the association.

He wondered if Lu Qingyi had broken through to the legend level in six years.

"Senior Gu, are you feeling better?" Shi Yu asked. "I still have food here."

Old Gu Yun hurriedly waved his hand and said, "There's no need. It's enough. I say, kid, do you know where this is..."

"Haha, Mythical Ruins." The old man suddenly laughed.

"I've already cracked it. From it, I even obtained a Mythical resource! Haha, a Mythical resource in six years, not a loss!!!"

Senior Gu Yun looked at Shi Yu and said, "But this ruin is really dangerous. I almost couldn't return. I was lucky to bring this Mythical resource back this time. You juniors, don't take such a risk in the future."

Gu Yun had already expected Shi Yu's shocked expression. After all, Mythical resources and such archeological gains were enough to shock the archeological world.

"Mythical resource?!!!" However, to Gu Yun's surprise, this newbie, Shi Yu, was very composed. He was only slightly surprised.

Elder Gu was stunned. Not bad, not bad. His mental fortitude was not bad.

This newbie from Bureau 11 was quite outstanding.

In the current era where Bureau 11 was deficient, it was rare and precious. Gu Yun sighed. After this, he was prepared to retire and really didn't have the energy to mess around with ruins. It was better to invest his energy in these new generations of Bureau 11 and nurture them.

He felt that Shi Yu, who had come to deliver food to him immediately, was not bad.

"Senior Gu!!!"

At this moment, the sound of a helicopter suddenly appeared in the sky. At the same time, a broadcast-like loudspeaker sounded. A helicopter-type mechanical life form suddenly landed here.

The helicopter landed not far away. A slightly plump middle-aged man in a gray formal suit immediately ran over nervously with a group of medical staff.

"Senior Gu!!! Are you alright!!!"

"Little Huo." When Senior Gu saw this middle-aged fatty, he immediately smiled and said, "I'm fine."

"You're a step too late. I've already been saved. It's all thanks to Shi Yu. He happened to be nearby."

The middle-aged man in front of him was the president of the Demon Capital Association, the legend Beast Tamer, Huo Di.

"Sorry, sorry, Senior Gu, we're late." At this moment, President Huo Di's attention suddenly shifted as he looked at Shi Yu, who was nodding at him.

"President Huo, Senior Gu sent a message to Bureau 11. I happened to be nearby, so I rushed over first. However, he still has to undergo a full checkup. I'll leave it to you," Shi Yu said.

President Huo's eyes widened.

"Legendary Shi Yu?!"

Holy shit.

Bureau 11 actually sent this god.

He almost suffocated.

As a Legend, he was already qualified to know some things and understand how terrifying the young man in front of him was.

One person killed two demigods!

The recognized strongest Legendary Beast Tamer of the Blue Star Alliance.

Speaking of which, the first time he heard of Shi Yu was at the Feeding Conference... Who would have thought that in a short period of time, this young man who was first unearthed by Bureau 11 had already grown to such a ridiculous extent?

[Unscientific Beast Taming](#)

Chapter 1190: Transmigrating to the Empress Era (5)

Blue Planet's strongest!

Perhaps not every legend in Dong Huang knew this title, and he happened to have channels to know some inside information.

It could be said that this was publicly acknowledged in the world. Even Divine Source Legendaries were inferior to the young man in front of them.

President Huo didn't expect that the first to rush to Senior Gu's side was actually Shi Yu.

"Legendary Shi Yu, I understand. I'll immediately bring Senior Gu to undergo a full inspection." As President Huo finished speaking, Senior Gu beside him was stunned.

What, what, Shi Yu Legendary? What kind of strange title was this??

He didn't understand why Huo Di was so strange.

The surrounding medical staff were also stunned. They also knew Shi Yu.

World legend Shi Yu!

However, why did President Huo call him Legendary Shi Yu?

"Senior Gu, your body shouldn't be in any major problems anymore, but it's better to do a full checkup," Shi Yu said.

There was a professional medical-type mechanical overlord in a first-level city. From a professional perspective, it was considered a fusion of Baby Ginseng and Ling. Although Shi Yu was already certain that the other party was fine, it was better to professionally check it according to the process. It could let the other party know his physical condition more clearly and save him the trouble.

"Alright..." Senior Gu nodded as he spoke telepathically to the junior he was more familiar with, Huo Di.

[Little Huo, why were you calling Shi Yu just now a Legendary?? What kind of strange name is this?!] He was confused.

President Huo smiled bitterly. He suddenly realized that Elder Gu had explored the ruins for six years... He probably knew nothing about the changes in the outside world.

He gathered his thoughts and let Elder Gu sense them.

[Elder Gu, Legendary Shi Yu. Although he's a newbie of Bureau 11, he has already taken over your title and become the strongest archeologist on Dong Huang, no, Blue Planet. Apart from that, in two months, he even personally led three totem half-gods to kill the totem half-god who destroyed Emperor Wu Dynasty, Yun An, and the ancient Abyss Sea half-god. He's already the recognized strongest Legendary on Blue Planet. Even Divine Source Legendary has decided to give him the position...]

[Elder Gu, times have changed. The young man in front of you is the strongest human on Blue Planet now.]

Gu Yun: "?"

The old man suddenly widened his eyes and looked at Shi Yu. He had just been saved, and now he suddenly had a heart disease.

Shi Yu: ...

....

One after another, the members of Bureau 11 rushed to the Demon Capital. Elder Gu suppressed his emotions and accepted the inspection, mainly because he also suspected that there was a problem with his reception of information from the outside world.

"Shi Yu, why are you near the Demon Capital?" Lu Qingyi, who had rushed over, nudged Shi Yu and asked.

"Thanks to you, Elder Gu looks more energetic than I imagined."

Shi Yu smiled and said, "I'm preparing to travel overseas."

"Oh, where?" Senior Lu said.

"I told you previously. Although the Undying Dark Phoenix said that Phoenix Island, the enemy faction of the empress dynasty, has sunk, I still want to find it. Why, do you want to go together?" Shi Yu smiled.

Lu Qingyi shook her head and said, "Forget it, forget it. Invite me along when you find it. I still have many things to do here."

"Alright then (Great)," Shi Yu said. "Senior, after Elder Gu receives the treatment, greet him for me. I won't stay here any longer."

Lu Qingyi: "So anxious?..."

"Archeology."

There was a reason why Shi Yu went to the dragon vein today. Today was the most active stage of the dragon vein. If he used the power of the dragon vein to transmigrate, the consumption would be reduced to the minimum. If he was a little later, he would have to wait for a long time. Otherwise, why would it be called an auspicious day?

...

Location, Space-time Dragon Vein.

After Shi Yu and the others finally arrived, as Qi exerted strength, a pink and white light that enveloped Shi Yu and the others first flickered before calming down.

In the past space.

Dong Huang Calendar, 955 years.

At the same time, after the destruction of Emperor Wu Dynasty, the totem world was in chaos!

In the east, the Phoenix Empire in the Central Plain was known as the strongest totem country and occupied the richest area.

In the surroundings, there were hundreds of countries. Totem countries of various sizes and human cities dotted the east.

It could be said that in the east, there were hundreds of races standing in a forest. Outstanding heroes were divided, and geniuses kept appearing.

Among them, the hybrid Beast Tamer of the Phoenix Race was the most famous...

The most representative was the daughter of a demigod, Princess Huang Xi of the Phoenix Empire.

...

On the chaotic and silent sea.

Figures appeared out of thin air on this Desolate Island under the dark sky with the pink and white spatial light.

"Coming, coming, Qi, is there another time deviation?!"

"Wu wu, the time seems to be a little earlier than expected."

"Forget it, forget it. It's better to be earlier than later. In short, let's go to Dong Huang to take a look first." Shi Yu and the others pounced onto the Dong Huang Continent excitedly like wolves, planning to see the current situation in the east first.

This time, Shi Yu and the others had several goals... One of them was to take away the super-divine resources and plunder the Seven Islands Treasure Vault of the Undying Dark Phoenix again!

Also, he wanted to give the empress a spoiler of the Undying Dark Phoenix's crooked thoughts. He wanted to see the ancient version of motherly filial piety.

...
