Chapter 1211: When Baby Ginseng Eats the Undying Fruit (2)

"Don't worry, there's no conflict that can't be mediated. As long as everything's in place..." Shi Yu said.

The empress: "Huh?"

"As long as your emotions are sincere and your attitude is sincere, anything is possible."

"Actually, Mother is right," Shi Yu said.

The empress's face darkened. Why did he call her mother more smoothly than her? Was this a Mother Hunter Beast Tamer?

"Do you know why the Mythical Era ended?" Shi Yu smiled.

"Do you know the origin of humans and what mission they shoulder?"

Shi Yu smiled. At this place, he explained to the empress the reason for the end of the Mythical Era. He told her about the reason why Goddess Wa brought back the Human Seed and wanted the World Tree to nurture humans. He also told her about the time of the future Mythical Revival.

Shocking secrets made Empress Huang Xi open her mouth slightly in disbelief. She had forgotten her original goal in coming here.

"Therefore, humans are indeed a special race. Researching hybrids with humans might really be able to develop a path to become a god or even surpass the divine level. After all, we humans are a special race recognized by even supreme gods," Shi Yu said.

"It's very likely that it originated from a higher civilization in the depths of the universe."

"What exactly are you..." The empress wanted to ask who Shi Yu was and why he knew so many unimaginable things.

However, in the next moment, he was interrupted by Shi Yu. Shi Yu continued, "Therefore, the Vermillion Bird Demigod of Phoenix Island can choose not to give face to your sister, but it has to give face to the world's will, right?"

"To put it bluntly, the clan rules were only set by the ancestor of the Phoenix Race, but even the ancestor of the Phoenix Race is only a life born on Blue Planet."

"On a larger scale, Blue Planet's mother is the greatest... It's not too much to change the rules of the Phoenix Race, right? Phoenixes are dead, but the rules of the race are alive."

The empress: "?"

She looked stunned. She kept feeling that something was wrong.

However, why did Shi Yu call Blue Planet Mom... They seemed to be very familiar with each other. Moreover, was it really alright for him to call her by that combination name?

She raised her head slightly. The Blue Planet's Will was called Heaven in ancient times.

She was very afraid that a heavenly tribulation would strike down and kill Shi Yu...

"Stop looking. The Blue Planet's Will is sleeping."

"Let's go. I'll go to Phoenix Island myself. You stay here and deal with the mess here first," Shi Yu said.

With that said, Shi Yu slipped away, mainly because he couldn't wait to let Baby Ginseng eat the Undying Fruit to see the effect.

Of course, although Shi Yu had left, Chi Tong stayed behind to see if there was anything it could help with.

Seeing that Shi Yu left without any reluctance, leaving Chi Tong behind, the empress was speechless. She looked at this "sister".

"So... why exactly are you helping me?" The empress looked at Sword Maiden Chi Tong and felt a headache.

[Call me sister,] Chi Tong said.

The empress was stunned and said with difficulty, "Alright, Sister, can you tell me now?"

Chi Tong: "Guess for yourself."

The empress: "?"

Chi Tong raised its chin. Even Emperor Wu could tell, but it couldn't? No, stupid sister, guess for yourself!

...

In the Blue Sea Ruins.

Shi Yu and the others jogged back.

At this moment, he had obtained another pile of resources. For Shi Yu, training pets was the most important thing. For Eleven and the others, the most important thing was to eat after the battle.

The half-god of the Divine Phoenix was simply too difficult to hammer. The difficulty was even higher than Yun An. Not only did it eat the Undying Fruit, but it also had a transcendent-level Bathing Flame Rebirth. Eleven and the others spent a lot of effort.

"Wuuu!" Eleven ran to nibble on the metal.

"Wuu ka ka ka." Buggy nibbled on the spiritual fruit.

"Ning." Susu looked at them speechlessly and turned into a quiet beautiful girl. It continued to devour the power of the ocean in big mouthfuls, saving Shi Yu a lot of effort.

At this moment, Shi Yu weighed the Undying Fruit and looked at Baby Ginseng. He asked Ling, "After this thing eats it, will it immediately break through?"

Ling said, "No, the Undying Fruit isn't a strengthening-type divine-level resource. However, Baby Ginseng is on the verge of breaking through after all. When eating it, it still needs it to suppress the increase in soul power and transform it into potential. Fortunately, its soul power isn't its outstanding point. It's fine to use it now."

"Baby Ginseng, did you hear that?" Shi Yu said.

"Yi wu wu wu!" Baby Ginseng nodded.

It wasn't a big deal, a token.

Its Green Wood Divine Body had the effect of a mutation. It had a super mutation physique. Coupled with the control of the plant, it was not a problem to perfectly absorb a divine-level fruit!

"Alright, alright, come on then." Shi Yu threw the Undying Fruit to Baby Ginseng. Baby Ginseng didn't say a word. It enlarged its mouth and ate the Undying Fruit in one bite.

In the next second, in order to better absorb the power of the Undying Fruit, Baby Ginseng returned to its normal state from the form of a big white radish to the form of a huge tree.

A huge cream-colored trunk, emerald green leaves, moon-like golden branches, sun-like fiery red flowers, fruits that looked like ginseng babies, decorated this complete divine tree.

A gray soul halo lingered on the entire divine tree, and the entire huge tree began to slowly change.

Apart from the nature of reviving dead lives into undead, the Undying Fruit also had the nature of strengthening soul power. These two processes were both modifications to the body.

[Unscientific Beast Taming](#)

Chapter 1212: When Baby Ginseng Eats the Undying Fruit (3)

In Shi Yu's team, apart from Chi Tong and Shi Yu, the other life forms didn't mainly cultivate soul power. It was the same for Baby Ginseng. At this moment, eating the Undying Fruit was undoubtedly an epic strengthening of its soul power.

"Yi Na!!!" The World Tree Ginseng shouted, trying its best to digest the power of the Undying Fruit. One second, two seconds...

A moment later, under the pleasantly surprised gazes of Shi Yu and Ling, Baby Ginseng actually completed a small scale evolution. Just like the Nine Li Battle Beast carving a Normal inscription, it awakened a new Race Skill. Its form didn't change drastically.

If one had to say, there was. On Baby Ginseng's huge normal tree, there was a pile of fruits that Baby Ginseng could create. Time Fruit, World Tree Fruit... At this moment, there was another one, a gray Soul Fruit that looked like a honeydew!

< Name > Soul Fruit

[Stats]: Wood, Undead

[Level]: Super

< Introduction > It's a fruit that can increase the soul power of the eater and repair the damage to the eater's soul. If developed to the extreme, it can allow the eater to live a second life in the form of a soul.

"Ling, Ling, do you sense it!" Shi Yu excitedly pulled Ling, who had a look of disdain beside him.

It had actually awakened a supplement skill related to soul power!

As the team's healer, the most powerful thing about Baby Ginseng was actually still healing and replenishing blood, which was to replenish life force and physical fitness.

This also led to the Effect being the best when it treated Eleven and Buggy. When it healed Chi Tong, Ling, and Susu, the Effect was inferior.

It wasn't that Shi Yu had never thought of replicating some supplement skills that specialized in dealing with soul power, but they were too rare. In addition, it wasn't that Baby Ginseng couldn't heal souls, but it wasn't as expert as repairing life. Moreover, Chi Tong had also mastered soul repair skills, so Shi Yu found it troublesome and didn't look for it seriously.

At the moment, Baby Ginseng eating the Undying Fruit and modifying itself through the Green Wood Divine Body and plant control had immediately made up for Shi Yu's team's shortcomings in this aspect. No, it wasn't a shortcoming either. It was just that now, it had been strengthened even more!

Moreover, the most important thing was that Baby Ginseng's Soul Fruit had inherited the final nature of the Undying Fruit. In the future, it had a chance of mass-producing divine-level resources like the Undying Fruit!

"Yi!!!" Baby Ginseng was excited. As expected of it.

This way, the name of its previous evolution, the Undying Ginseng, lived up to its name.

As long as it studied this skill thoroughly, it could completely have multiple modes!

In its normal state, it would fight directly. If it couldn't defeat the enemy, it would self-destruct!

However, Baby Ginseng also understood that even if it self-destructed at the demigod level, it would be very difficult to blow up that pile of monster demigods...

For example, Eleven's transcendent-level Indestructible Golden Body, the Nine Li Army, and a bunch of physique skills weren't for show.

Now that Eleven was facing self-destruction head-on, it wasn't afraid. It was the same even if Baby Ginseng broke through to a demigod.

Baby Ginseng could be said to not even have the confidence to heavily injure Eleven.

However, this wasn't the first time it self-destructed. After the self-destruction ended, it revived and the Undead Ginseng self-destructed for the second time!

Right on the heels of that, the time mark revived. Baby Ginseng was another hero.

This wasn't the end. At the moment, a perfect-level time mark could only condense one time mark.

However, a transcendent-level time mark could already condense a second mark.

In other words...

When Baby Ginseng reached the demigod level and its Soul Fruit was maxed out, its time mark would upgrade and it could self-destruct four times in a row!

Quadruple Explosion!

Even if it self-destructed once and didn't kill demigods of the same level, what about four times?

Not to mention demigods, even if it was a primary-level god, Baby Ginseng felt that it wasn't impossible to kill someone above its level.

If he cultivated Moon Explosion, Time Mark, and Soul Fruit into quasi-divine skills and added three quasi-divine skills to his body, Baby Ginseng felt that the position of the strongest demigod of the Blue Sea Sprite should change hands.

What was the combination of the strongest Skill?

Baby Ginseng was the first clear in the team!

The overlords and totem first clear in the team were all maintained in Baby Ginseng's hands. At this moment, Baby Ginseng smiled foolishly, feeling that the divine level was also its.

It had already named this combination profundity.

It was called the Death Quartet!

"Yiya!" Baby Ginseng gave Shi Yu and the others a thumbs up. Giving the Undying Fruit to it to eat was really a clear choice.

"Indeed." Shi Yu was also excited. "This way, I won't have to trouble Qi to transmigrate to other parallel spaces to get the Undying Fruit. In the future, I'll directly let you create it in batches."

"Eleven, Buggy, even Duckie, Teacher Gem Cat. When the time comes, we'll each have one. There are even more and more types of gifts for the new year."

Baby Ginseng exclaimed and was completely stunned. Wait, damn it, only then did it react. The Soul Fruit was another supplement skill that the entire team could eat!! Its vision darkened and it felt a little weak.

[Unscientific Beast Taming](#)

Chapter 1213: Making Things Up (1)

Shi Yu and the others recuperated in the Phoenix Empire for a day.

The resources he obtained should be eaten and drunk. He wanted to recover to his peak state as soon as possible.

When it was about time, Shi Yu and the others didn't delay. They directly headed to Phoenix Island as envoys of the Phoenix Empire.

...

Phoenix Island was located in the southern sea area of the Dong Huang Continent, covering hundreds of thousands of square kilometers.

Unfortunately, it had completely disappeared after the end of the empress dynasty and was sunk by the battle between the empress and the Phoenix Race's patriarch.

This time, Shi Yu could be considered to have studied the sunken civilization on the ground.

In the sky, a huge battleship flew. Shi Yu enjoyed the beauty of the sky with Eleven, Buggy, Baby Ginseng, Chi Tong, Susu, Little Ji, Duckie, and the others.

After arriving above Phoenix Island, Shi Yu, Eleven, and the others looked at each other, wondering how to call the Phoenix Vermillion Bird demigod out next.

"Wu wu wu!" Eleven sensed that the natural energy here was abundant and took the initiative to volunteer. It climbed onto the railing and stood there.

"Eleven? Alright."

"Wuu!"

Shi Yu signaled. Eleven immediately nodded and roared down.

Boom!!!

A deafening sound immediately spread throughout the entire Phoenix Island, making many creatures look up at the sky in shock.

Dark clouds instantly appeared on the island. The sky was pitch-black, and black lightning was Blinking. The thunder was deafening!

Then, white lightning streaked across the sky again. The condensation level made the thunderclouds turn into lightning pools. The thunderclaps didn't stop, and the sky turned from dark to bright. Black and white lightning intertwined, as if Doomsday had descended.

The huge sound of lightning wrapped around the power of a demigod. It was as if a heavenly tribulation had descended, making all the lives on Phoenix Island look at the phenomenon condensed in the sky in horror.

"Where's the Phoenix Race Patriarch?"

The thunderclap turned into a mental wave that resounded in the heart of the high-level life form.

"Who is it!"

In the Phoenix Race, the half-sleeping Phoenix Vermillion Bird demigod was awakened and sensed an especially terrifying demigod power.

Its strength... might not be inferior to it!

It let out a cry and tore through the air, flying into the sky. On the island, the Phoenixes at the totem level also flew into the sky together to find the source of the phenomenon.

This power of lightning was too terrifying, enough to carpet bombard Phoenix Island. At that time, all lives below the totem level would probably die from the lightning. He had to figure out the source!

When a totem half-god and eleven Normal and top-notch totem phoenixes arrived in the sky, they were directly shocked by the scene in front of them.

A black and white bear more than a meter tall was bathing in the lightning sea. It seemed to have released the lightning, but it mobilized the lightning and triggered stronger lightning in the world. It seemed to have another goal!

It was eating!

Many Phoenixes saw that this black and white bear was devouring the natural power of lightning condensed around Devour in big mouthfuls. Among the eleven totem phoenixes, a thunder-element phoenix was shocked and said,

"Stop!! Stop it! If this continues, the natural lightning on Phoenix Island will be eaten!"

"At that time, Phoenix Island will become a country that loses lightning."

"Wuu!" On the other side, Eleven's deterrence shook the sky and earth like a thunder god. When it heard the shout from the other side, it revealed a disdainful expression and immediately stopped eating. Petty person, what was wrong with eating some of your lightning?

This Phoenix Island was indeed a treasure land. The quality of the surrounding natural energy was very high, far exceeding any country Shi Yu had been to. When Eleven came, it immediately didn't want to leave. It felt that it could be full for a long time just by eating natural lightning here.

"The current patriarch of the Phoenix Race!" Eleven returned to Shi Yu's side and Shi Yu shouted. At this moment, many Phoenixes, the current patriarch of the Phoenix Race, and the sister of the Undying Dark Phoenix looked at Shi Yu and the others solemnly because the power Eleven displayed was too strong.

However, from the looks of it... that human was the leader.

Shi Yu faced the many Phoenixes and slowly said,

"I've been jointly entrusted by the seven gods of the Blue Planet's Will, the Boar God of the Mythical Era, Xuan Ming, the Holy Divine Deer, Lord Lie Shan, the Demon King Dragon, the Eternal Divine Tree, and the Ancient God Golden Bull to mediate the conflict between your race and the human race and take away your race's super resources."

Shi Yu stood on the battleship with his hands behind his back. He looked calmly at the totem half-god in front of him, the Phoenix Race Patriarch.

3.8 billion energy points!

This was the guy with the highest normal energy value Shi Yu had ever seen, even higher than Eleven. As expected of the Phoenix Race Leader who had lived for thousands of years and had always steadily suppressed the Undying Dark Phoenix. At the same time, it had mastered quasi-divine skills and faith skills.

It had probably eaten a lot of divine-level resources... There was even a pile for Undying Dark Phoenix, so the other party definitely had more.

However, no matter how impressive the other party was, Shi Yu's aura was also very strong this time.

Upon hearing Shi Yu's words, the red divine bird was clearly stunned. Then, it revealed an extremely ridiculous expression.

Huh???

It wasn't the only one. All the Phoenix Race was stunned.

Adjust the conflict between the Phoenix Race and the human race?

What a joke. What conflict did their Phoenix Race have with humans?

On Phoenix Island, the humans lived in peace and enjoyed longevity. They were the happiest batch of humans on Blue Planet. Their Phoenix Race had also always been known as auspicious totems. They were loved by all races, including humans. Shi Yu's entire story was nonsense!

Also, take away the super resources of the Phoenix Race?

What a joke. How could a human like Shi Yu take away something left behind by his ancestor when exploring the starry sky just like that?

He was even entrusted by the Blue Planet's Will, the World Tree, and the seven gods of the Mythical Era. Who was this Poof!

Unscientific Beast Taming

Chapter 1214: Making Things Up (2)

"Hahahahaha..." After the current patriarch of the Phoenix Race, the Phoenix Vermillion Bird demigod, heard this, he even threw his head back and laughed. He was stunned by this funny joke and laughed and cursed, "Sir, you didn't come to my Phoenix Race to tell a joke, right? "

If it weren't for the fact that the black and white bear was a demigod, they would have long attacked together.

"You don't believe me?" Shi Yu's expression was still very calm. He closed his eyes slightly and opened them!

Boom!!

As Shi Yu opened his eyes, his eyes turned emerald green.

The air around him began to hum and vibrate. The almost corporeal mental fluctuations formed green ripples around him.

In the next moment, Shi Yu's Psychic Eye spun. A strong aura bloomed from his body, and with him as the center, it quickly formed a domain that enveloped the world.

In the domain, the phantom of a huge tree that was infinitely tall emitted a faint golden light. It stood behind Shi Yu, revealing a miracle.

In the mind domain, the World Tree Domain changed the form of the World Tree!

After undergoing the strengthened Blessing of the World Tree, because Shi Yu had the mind domain and had eaten the World Tree Fruit, he had another ability that other Blessers didn't have, which was to reveal the will of the World Tree.

Although it also consumed a lot of physical strength and didn't have any battle enhancement effect, Shi Yu felt that sometimes, this ability was not bad. It was equivalent to an identity verification.

As the envoy of the World Tree, Yun An and the Abyss Demon Frog could ignore him, but he, a native life form of Blue Planet, couldn't ignore it, right?

The phantom of the huge world tree that reached the sky was filled with a golden light. The light from the sky made Shi Yu even more dazzling, emitting an aura that was not inferior to totems, like the Juggernaut of the world.

Endless light fell like a meteor shower and landed on Shi Yu's body, as well as the pet bodies beside Shi Yu.

The power of the world in all directions submitted to Shi Yu, producing a huge affinity. Shi Yu glanced at it and moved. At this moment, it was as if he could obtain the favor of Blue Planet. Many totem phoenixes, at their level, could see with their own eyes that the endless power of the world acted coquettishly beside Shi Yu as if they had seen their father. Shi Yu, this human, seemed to be able to casually touch the laws of this world!

How could this be... Many Phoenixes were shocked. What was this?

Boom!

Under the shocked expressions of the Phoenixes, the ginseng baby beside Shi Yu's feet yawned and also opened its green eyes. A World Tree Fruit condensed on the tip of its finger. First, it activated the favor of the quasi-divine skill world, then the World Tree Fruit. Similarly, the power that represented the Resistance of the World Tree spread on its body!

"Quasi-divine skill!"

The Phoenix Vermillion Bird demigod and the Phoenixes were immediately shocked. Wasn't that a ginseng baby? A trash supplement that the Phoenix couldn't even be bothered to eat. However, how could a ginseng baby master a quasi-divine skill? Moreover, this quasi-divine skill... could actually mobilize the power of the entire world!

"Isn't that the World Tree Fruit!!" The Phoenix Vermillion Bird demigod was shocked and saw the fruit created by Baby Ginseng.

Perhaps the other races didn't know, but in the Phoenix Race, because it originated from the Mythical Era like the dragons, it had a long history and had records of some rare resources. Among them, the fruit of the World Tree was one of them.

"Is this enough to verify my identity?" Under the blessing of the World Tree, Shi Yu said, "This is the authentication the World Tree gave me. Seeing me is like seeing her."

"Apart from that, my ginseng baby has also received the blessings of the World Tree. It can be considered to have completed its evolution under the love of the World Tree and inherited the power of the World Tree."

"If this isn't enough and you still can't trust me." Shi Yu knocked his forehead helplessly. Beside it, Eleven took a step forward and revealed the might of a demigod. The quasi-divine skill entered a ready state and triggered the sound of laws!

Buzz!!

Black and white colors lingered around it. In an instant, two sounds of laws vibrated and resounded through the sky. It was extremely shocking, making the eleven totem phoenixes feel an incomparably strong bloodline suppression and widen their eyes.

Apart from that, this wasn't the end. The wind of luck lingered around Ling, who had turned into a battleship. The sound of laws was triggered again, three sounds of laws!

Chi Tong, who was in the form of an energy-efficient loli Sword Maiden, stretched out its finger slightly. Four small swords lingered on its fingertip, and the four sounds of laws were triggered!

"Roar!!!" "Quack!!!" Little Ji and Duckie took a step forward. The Cataclysm and the Heart of the Abyss were directly released!!

It was like the sound of laws of an earthquake and a heartbeat!

Five, six... The sound of laws rose crazily and intertwined, almost collapsing the Void, making the world dark. It was filled with the low whispers of gods and demons, making the Phoenix Race Patriarch sweat profusely and extremely shocked.

The other totem Phoenixes didn't even fight. Under the collective aura of Shi Yu, their bodies were so weak that they couldn't move. They were completely stunned.

How was this possible!! They suspected that they were dreaming!!!

"Retract." Then, it was such a terrifying scene. Under Shi Yu's command, the pets collectively retracted. Shi Yu said, "This way, can you believe my identity?"

"Don't tell me you think that apart from the envoys of the World Tree and the humans chosen by the gods, there are other humans who can nurture so many terrifying pets and obtain the certification of the world's will?"

"Alright, my patience has reached its limit," Shi Yu said.

[Unscientific Beast Taming](#)

Chapter 1215: Making Things Up (3)

"I couldn't confirm your identity just now. I was rude. Please forgive me." Opposite Shi Yu, the Phoenix Race Patriarch directly restrained her aura and said in shock with rapid breathing.

At this moment, it completely believed it. After all, this ridiculous lineup really made it very difficult for it not to believe.

"This, this, this, this..." The other totem Phoenixes were also shocked. The envoy of the World Tree had come looking for them.

What was wrong with their Phoenix Race?

With such a terrifying lineup, at least six quasi-divine skills were enough to easily destroy the Phoenix Race!

Moreover, there were also a few harmless-looking pets that didn't show their strength at all!

"It's alright. It's normal not to believe it easily. The World Tree only shared her power with me because it considered the specialness of this identity," Shi Yu said. "Since you believe it now, you can sit down and talk."

"I'm here for a total of two things..."

The Phoenix Race's patriarch was silent. She looked at Shi Yu and said, "Lord Envoy, we're helpless in your request. There are indeed super-divine resources in the Phoenix Race, but we can't take them out at all."

"Moreover, I wonder what's the use of this resource, Lord."

Shi Yu said, "I know."

"But this resource is very important. It's an item Lord World Tree specified to obtain."

"In the Mythical Era, the three cosmic races invaded Blue Planet. Countless gods died in battle, and Blue Planet shattered. Although we finally won, those invading races weren't completely destroyed. Instead, they escaped back to the starry sky."

"At that time, Blue Planet was no longer suitable for gods to live in, so under Blue Planet's suggestion, they went to the starry sky to find a new home. Apart from that, they had another mission, which was to go deep into the universe and investigate those invaders."

"The super-divine resources brought back by your race are very likely to be an important item and some kind of news. Therefore, this thing is very likely to affect the future, life, and death of Blue Planet. This is also why the World Tree asked me to take it away."

The Phoenix Race's patriarch and a bunch of totem Phoenixes listened to Shi Yu in a daze.

Shi Yu was not done speaking. "The future of Blue Planet is filled with misfortune. That divine-level Phoenix that returned from the starry sky and brought back super-divine resources is actually not the first god to bring the resources of the outside world back to Blue Planet."

"Long before it, Goddess Wa, who was also a top-notch god and supreme god spirit like the Ancestral Dragon and the Origin Phoenix, brought back another resource."

"It's called Human."

"Humans, a large race in the starry sky of the universe, aren't native life forms of Blue Planet. However, later on, they were modified by the World Tree and became a member of Blue Planet. Human Beast

Tamers are jointly regarded by many gods and even the World Tree as the hope of Blue Planet life forms to break through and surpass the divine level."

"This is also why she chose me as an envoy."

"My other Quests this time are to pass this news to the Leader of the human race and a Leader of a large race like the Phoenix Race. This is also convenient and better to welcome the future calamity of Blue Planet."

"I know that the Phoenix Race has always treated humans well. This might also be because your ancestors received instructions from the World Tree."

"Don't worry, I'm prepared. I heard that the super resources brought back by that Senior Phoenix Divine Spirit are in a ruin and have set restrictions. Only those that contain the Phoenix bloodline can explore."

"Apart from that, it's difficult to take away that resource with the power of a demigod alone."

"This is indeed not easy... Therefore, after receiving the order from the World Tree, I made targeted preparations. I've long contracted a pet with the Phoenix bloodline in the outside world. We can work together to try to crack the ruins."

"If it can't be cracked, forget it. Perhaps the time hasn't come yet. Only when the Mythical Era descends again and breaks through to the divine level will there be hope."

"If it's successfully cracked, I can learn what information that senior brought back earlier and make targeted preparations."

"Please assist me, especially you, the current patriarch of the Phoenix Race."

At this moment, the Phoenix Race, who had learned many secrets from Shi Yu, was completely stunned.

Even the Vermillion Bird demigod had never learned so much explosive information at once.

However, throughout the whole process, Shi Yu's pets were very silent. Was this the power of transmigrating to the past and getting bad information? They almost believed it!

Even with Ling's top-notch intelligence, it couldn't analyze anything wrong for a moment.

"This..." The Phoenix Race was also deceived by Shi Yu's extremely complete statement.

"A pet with the bloodline of the Phoenix Race?" The Phoenix Race's patriarch, the sister of the Undying Dark Phoenix, had a surprised expression.

"Yes." Shi Yu looked at Chi Tong. At this moment, the loli Chi Tong had dispersed the Four Immortal Slaying Swords and the Phoenix clone slowly condensed on the tip of its finger.

The power of his bloodline erupted.

The powerful Phoenix bloodline from a demigod directly made all the Phoenixes present widen their eyes.

Among them, the Phoenix Race's patriarch, the sister of the Undying Dark Phoenix, was even suddenly stunned. She looked at the spiritual body Chi Tong in disbelief and said, "This bloodline... is the Phoenix bloodline entrusted to humans?"

Then, it almost exploded.

"Calm down!!!" Shi Yu shouted. "Have you forgotten what I just said? I still have another goal, which is to mediate the conflict between you and humans. This conflict also includes the conflict between the pure-blooded Phoenix and the mixed-blood Phoenix."

"Human hybrids are also a testable path discussed by all races and the World Tree back then. However, this path is very difficult. The Phoenix Race didn't try it first, but it was carried out by the dragons with more domineering bloodlines first. Human and phoenix hybrids have never been rejected by the Phoenix Race. Your clan rules should have been updated long ago."

Unscientific Beast Taming

Chapter 1216: Making Things Up (4)

The Phoenix Race's Patriarch and a group of totem phoenixes were in disbelief.

"The reason why I contracted it is also because it's a hybrid of a human and a Phoenix. It was Lord World Tree who told me its location and thought that it had the potential to surpass the divine level. This is the advantage brought by the hybrid."

"Of course, hybrids are dangerous. The chances of success are less. It's also right for the Phoenix Race not to try easily. However, there's no need to treat successful cases as heretics and kill them all."

"Unfortunately, Lord World Tree sleeps all year round. It can only completely awaken after the Mythical Revival. Otherwise, with its guidance, the rules of the various races on Blue Planet wouldn't be so chaotic." Shi Yu sighed.

"Impossible..." At this moment, when it heard Shi Yu say that the ancestor of the Phoenix Race supported hybrids, the Phoenix Vermillion Bird demigod had a look of disbelief. "Impossible. Could it be that Sister..."

Shi Yu said, "Your sister is indeed wrong. It took the wrong path. It's completely the right thing for you to stop it. Its goal in nurturing hybrid humans is to use them as nutrients. They belong to the category of siblings killing each other. Its methods are harmful to the world, and it's easy to go berserk."

"The most harmonious path is still for human Beast Tamers to sign an equal contract with the Phoenix Race to grow together and help together. Mixed blood is just another extreme path, and your sister is even more extreme."

"However, when its crazy method was only carried out halfway, it indeed cultivated two talented hybrids."

"One is the spirit body in front of you, and the other is Princess Huang Xi of the Phoenix Empire."

"You've seen my sister?" The Phoenix Race Patriarch was stunned.

"Not only have I seen it, but I've also helped its daughter, the hybrid Beast Tamer, Princess Huang Xi, overthrow it. Its path isn't recognized by the World Tree, and it's easy to lead the Phoenix Race and humans to destruction. On the other hand, Patriarch, you're highly trusted by the World Tree. This time, I came because I hope that you can hold hands with the Phoenix Race and the human countries that Princess Huang Xi is about to establish to develop in harmony and form an alliance," Shi Yu said.

"Humans have to cooperate with all races sooner or later. It's the trend."

"As for Princess Huang Xi, as a human with the Phoenix bloodline, I think she's a very good support target for the Phoenix Race."

The expression of the Phoenix Race's patriarch changed. She felt that it was unbelievable. She felt that what she had learned today was very dreamy.

If this were said by others, it definitely wouldn't believe it. However, it couldn't not believe Shi Yu... this World Tree Envoy.

In the end, the Phoenix Race Patriarch was silent for a long time before looking at Shi Yu and Chi Tong.

Chi Tong in front of him indeed had terrifying talent and had actually mastered a quasi-divine skill. After all, in the thousands of years, only it and its sister had cultivated a quasi-divine skill, and both parties had used it for a long time.

This hybrid didn't look very old at all. Could it be that... hybrids really had such a huge advantage?

"How... do I assist you?" the Phoenix Race Patriarch said.

Shi Yu said, "It's very simple. Although it has already mastered a quasi-divine skill, it's actually only at the overlord level. The Mythical Race at the overlord level still has very powerful potential."

"At the moment, it's already on the verge of breaking through and can break through at any time. If it breaks through, it'll be a demigod. I plan to let it gather you, Patriarch, and your sister's forte to complete the breakthrough."

"Then, with my support, there will be a high chance of opening the super-divine ruins."

The Phoenix Race Patriarch was in disbelief again. An overlord could master a quasi-divine skill??? Was this the strength of the World Tree Envoy? If it weren't for the gift of the world's will, it couldn't imagine how a life form could touch the laws of the planet at the overlord level.

"Alright... I can assist you." The Phoenix Race Patriarch thought for a long time and finally made up her mind.

At the same time, Shi Yu felt strange. That was it? He didn't expect that he was quite talented. With a round of Poof, he made the Phoenix Race Patriarch take the initiative to offer super-divine resources and even take the initiative to help nurture Chi Tong... Not bad!

He felt that in the future, relying on a fixed template, he seemed to be able to deceive the resources of other large races. It was not good to fight and kill. Using information to exchange for resources was beneficial to both parties! It was just that it might be easy to get beaten up by the World Tree after learning about it...

"I wonder if my current strength can defeat the World Tree..." Shi Yu fell into deep thought. He still felt that it was difficult. As the true strongest demigod, he felt that the World Tree had at least dozens of quasi-divine skills...

Unscientific Beast Taming

Chapter 1217: Demigod-level Vermillion Bird Sword Maiden (1)

"We can assist you in trying to crack the super-divine ruins."

"However, what's the specific method?"

The Phoenix Race Patriarch stared at Shi Yu and the others on the battleship in silence.

This super-divine ruin had already made the Phoenix Race consume a lot of strength. It was useless even if they threw it.

It already believed Shi Yu's watertight words.

He also felt that it was more valuable to let Shi Yu and the others crack the ruins and take out key information that affected the survival of Blue Planet.

As the envoy of the World Tree, there should be something unique about it that could crack ruins that others couldn't, right?

"As for the specific method..."

"Before cracking the ruins, I want it to evolve and break through to its strongest state."

"At the moment, not only has it perfectly inherited the power of the Sun God Phoenix, but it has also walked its own path and mastered a Sword-type quasi-divine skill."

"For the sake of success rate, I also want its clone to walk the same path as you, Patriarch, and become a quasi Vermillion Bird."

"This way, the power of the Phoenix, the divine power of the Sword Skill, and the power of faith, together with the power of humans, can definitely have the battle power of a god."

"According to the deduction results of the Phoenix Race, with divine-level battle power, you can crack this ruin, right?" Shi Yu said.

"What?" Many Phoenix totems were shocked. So Shi Yu had gotten the patriarch to help him cultivate with this idea!

Vermillion Bird evolution method!

When the Phoenix Race Patriarch heard that, her red eyes flickered. "I see. Unfortunately, I can't help you with this."

"Evolution into quasi Vermillion Bird... I also don't have a systematic evolution plan because of many coincidences."

"Oh?" Although Shi Yu and the others felt that it was a pity, they also felt that it was normal.

"It's also within my expectations," Shi Yu said.

Alright then, but there were always more ways than Difficult.

Shi Yu said, "You don't have to worry about that."

"I'm the Envoy of the World Tree and have the fruit of the World Tree. You should know the effect of the World Tree, right?"

"It can increase comprehension and learning ability."

"Patriarch, you only need to showcase the Vermillion Bird faith skill you have mastered and give me a legendary feather that contains your own spiritual power and the power of the Vermillion Bird faith. We can deduce the Vermillion Bird Path ourselves."

The Phoenix Race Patriarch was stunned. "Are you sure?"

What a joke.

How could it be so easy to evolve into a Vermillion Bird? It felt that Shi Yu and the others might fail at this step.

"Feel free to help. I'll think of a way," Shi Yu said.

The Phoenix Patriarch's expression calmed down. After thinking about it again and again, she finally nodded.

In that case, it wanted to see how the other party could evolve into a Vermillion Bird by observing faith skills and a Vermillion Bird feather!

"Sure." The red divine bird that the Phoenix worshiped immediately took out a feather.

In the next moment, the Vermillion Bird Divine Fire was lit on the red feather!

< Name > Vermillion Bird Divine Fire

[Stats]: Exort

[Level]: Super

< Introduction > It's a faith skill. The divine fire formed by burning the power of faith can even burn the laws of the planet!

Boom!!!

The divine fire was ignited. In an instant, it was as if a sun had fallen above Shi Yu and the others' heads. The season instantly changed from winter to summer, and the temperature changed greatly.

The blue sky and white clouds instantly turned into red clouds because of the appearance of this palm-sized bird-shaped divine fire.

This small bird-shaped fire was especially powerful. Under Shi Yu's perception, the threat level even exceeded some quasi-divine skills.

The Phoenix Race Leader in front of it had mastered quasi-divine skills and faith skills at the same time. It could be said that it was indeed ridiculously strong. It was no wonder that the Undying Dark Phoenix couldn't defeat it, and it was also sad that the empress could only perish with it.

Shi Yu sighed. The enemies faced by Legendary emperors like Dong Huang were really not simple.

Yun An was a cosmic life form with a quasi-divine skill. The Phoenix Race's patriarch had mastered the Vermillion Bird Faith Skill and a quasi-divine skill.

They were not what ordinary demigods could compare to.

"How is it?" At this moment, using the Vermillion Bird Divine Fire, the dignified queen's voice of the Phoenix Race's patriarch sounded. Shi Yu in front of him was indeed powerful. He had contracted a bunch of pets who had mastered quasi-divine skills.

If it fought Shi Yu, it would also have a headache.

However, the Phoenix Patriarch was certain that in a one-on-one situation, it was invincible.

Because it was the Vermillion Bird faith god! It had the backing of the entire Phoenix Nation.

Under the enhancement of countless power of faith, its Vermillion Bird Divine Fire could even burn the laws of divine skills.

"Not bad." Shi Yu revealed a satisfied expression. Unfortunately, the Phoenix Race's patriarch only mastered one faith skill, the Vermillion Bird Divine Fire.

Unlike Buggy, who had two faith skills the moment it evolved, and one of them had even been fused into a top-notch faith skill like the Green Dragon Indestructible Body.

"Eleven." Shi Yu gave the order. Eleven flew out electromagnetically. As the Phoenix Patriarch was stunned, it directly pinched the bird-shaped Vermillion Bird Divine Fire in its hand.

Boom!!!

Under the hot temperature, Eleven was excited. What a strong flame. Even with the transcendent Leaving Gold Battle Body, Indestructible Golden Body, and Molten Gold Skill, its Exort Resistance was extremely high. It felt the damage.

If such a strong flame was used to temper the body, the Effect would definitely be very good!

He hoped that Chi Tong's sister would learn it quickly!

At that time, Buggy's Dragon Star meteorite would train its fist, and Chi Tong's Vermillion Bird Divine Fire would train its body. Perfect!

"Impossible!" Seeing Eleven pinch the Vermillion Bird Divine Fire, the Phoenix Race Patriarch said in disbelief.

The other totem Phoenixes were also shocked. They could sense that the Iron-eating Beast in front of them was a metal-element creature.

Unscientific Beast Taming

Chapter 1218: Demigod-level Vermillion Bird Sword Maiden (2)

However, a metal-element life form countered by fire could actually hold a fire faith skill?

The Phoenix Patriarch couldn't understand. Even if this Vermillion Bird Divine Fire only fused a trace of faith power to avoid wasting the power of faith, even the most basic Vermillion Bird Divine Fire could easily kill a totem.

At this moment, it was actually being played with by a metal-element creature?

"It has loved to play with fire since it was young. Its Exort Resistance is pretty good," Shi Yu said.

Accompanied by Chi Tong, Shi Yu took a few steps forward and turned into a red-haired Chi Tong. He took the Vermillion Bird Feather that had its faith extinguished.

[Recording successful].

Shi Yu directly replicated the Vermillion Bird Divine Fire Skill.

No matter what kind of coincidence it was, it was his in the next second.

Many Phoenixes looked at Shi Yu, who was holding the Vermillion Bird Feather, in disbelief.

"Then, let's try to break through and evolve first. It won't be long before we return."

"Please wait patiently."

The red-haired and red-eyed Shi Yu smiled. Right on the heels of that, the entire sky darkened.

As a Green Silkworm on the battleship leaped up and jumped into the sky, with a boom, starlight flickered.

"Roar!!!"

In the dragon roar and green-gold light, its huge body was displayed.

Under the starry sky, the Green Dragon Faith God that looked like a dragon with two golden horns on its head and was covered in green scales descended directly. Its eyes and tail seemed to be burning with the fire of golden Spirit faith.

The group of Phoenix Race members was shocked again. Just now, Shi Yu's group of pets had displayed quasi-divine skills. It was extremely spectacular, but among them, the Green Silkworm and the Water Slime were only watching from the side.

They were originally curious about who these two were. At this moment, as the Phoenix Race Patriarch spoke in disbelief, all the Phoenixes were stunned and understood its identity.

"Green Dragon..." The Phoenix Race Patriarch said in disbelief. She sensed the vast power of faith from Buggy, who was also an evolver of the Four Saints. In terms of faith, the other party... might have evolved even further than her!

The Phoenixes saw Shi Yu and a bunch of pets boarding the Green Dragon from the battleship. The huge battleship also turned into a Rubik's Cube and landed on Shi Yu.

Their goal was the starry sky.

He was going to the starry sky to evolve and break through.

Boom!

Its dragon body swayed, and Buggy looked at the starry sky. Its entire body was quickly wrapped in golden light as it rushed out of Blue Planet.

"Patriarch..." Many Phoenix Race members looked at the Vermillion Bird demigod.

The Phoenix Race Patriarch was silent, sensing Shi Yu's horror again. This World Tree Envoy was simply a monster. Every contracted creature under him was extremely ridiculous.

Was it true that humans were the supreme race brought back by a top-notch god from the starry sky? It looked at the starry sky. In the end, the Phoenix Vermillion Bird wings spread out and let out a long cry before flying into the starry sky too.

"I'll go take a look."

....

As Buggy flew into the starry sky, Shi Yu planned the subsequent breakthrough evolution.

At the moment, although Shi Yu had replicated the Vermillion Bird Divine Fire, he couldn't teach it to Chi Tong yet. The Skill compatibility wasn't enough.

The current Chi Tong wasn't a god of faith in the starry sky yet. It couldn't learn faith skills at all.

However, Shi Yu believed that it would be done soon.

Wait a minute, after arriving at the starry sky, let Chi Tong turn some of the undead imprisoned in the undead space into nutrients to break through and grow first through the "Spirit Release Skill". It could easily break through to the totem level.

Right on the heels of that, after reaching the totem level, Chi Tong had the ability to "optimize its bloodline race".

At that time, even without using evolution skills, the totem creatures could perfect their race and evolve themselves.

Of course, for ordinary totems, this process was extremely long...

If totem-level life forms were regarded as students and evolution as a research topic, then it was rare for one in a million students to study this research topic thoroughly.

There was a difference in the learning ability of every life form. Just like giving a knowledge domain, no matter how hard one studied, they couldn't get started. Some people could easily study a domain to the extreme and create a new domain. The difference between a genius and a mortal spirit would increase after the totem level.

Chi Tong's aptitude was clearly already considered a little genius. In addition to the cheat, the World Tree Fruit, it should be able to progress very smoothly on the path of totem-level self-optimization of its race.

Although it was more difficult to evolve into a Vermillion Bird, Shi Yu wasn't the only cheat that could assist it.

There was also Buggy's Four Holy Clones that could assist it in mobilizing the power of faith of the Vermillion Bird to perfect its race. There was also Ling's Blessing Wind. It could increase Chi Tong's luck and let it find a shortcut to evolution as soon as possible. With so much help, it ensured that Chi Tong could complete its evolution like the Phoenix Clan Leader.

Could it be that these things couldn't compare to the opportunity of the Phoenix Race's patriarch?

Moreover, there was no need for perfect evolution.

After slightly optimizing its bloodline, Chi Tong could increase its compatibility with the Vermillion Bird Divine Fire. At that time, through Shi Yu's additional points, it could absorb the skill EXP of the Vermillion Bird Divine Fire. It shouldn't be a problem for its clone to evolve into a Vermillion Bird.

Perhaps it could even stand on the shoulder of the Phoenix Race's patriarch and walk further than it.

In the incomparably vast starry sky, in the vast universe where the sun could be seen at a glance, the Green Dragon brought Shi Yu and the others up and left the restraints of Blue Planet.

Unscientific Beast Taming

Chapter 1219: Demigod-level Vermillion Bird Sword Maiden (3)

"Roar!!!"

In the starry sky, the green dragon roared.

The moment they entered the starry sky, apart from Buggy, Shi Yu and the others more or less felt some suppression. This suppression would become stronger and stronger as they left the planet and went deeper into the starry sky.

Generally speaking, only cosmic life forms could move relatively freely outside the planet. If it were other races, they would be like fish out of water. They would feel very uncomfortable.

This suppression was also the reason why some gods on Blue Planet didn't have the ability to sail far.

Unless they could optimize their bloodlines and modify themselves into a cosmic race. However, there was still the same problem. Not every life form had the aptitude to complete their evolution.

However, although it couldn't survive in the universe for a long time, at Shi Yu and the others' level, it was still not a problem to stay for a few hours.

This period of time was enough.

"Chi Tong." After flying to the starry sky, Shi Yu called out. Chi Tong, who was in the energy-efficient form beside him, nodded and returned to its growth form.

Sword Maiden Chi Tong, who was wearing silver-white armor and had red hair draped over her shoulders, directly summoned the Sun God Phoenix clone.

[Then I'll go.] Chi Tong turned around and looked at Shi Yu with its red eyes.

Shi Yu nodded.

"Jiu!! ~ ~ ~"

Then, the orange-red Sun God Phoenix clone flew out under the illumination of the sun. Fire spiritual aura lingered on Chi Tong's body, and it directly changed from Buggy to the Phoenix clone.

"Wu wu wu!!" "Roar!!" "Yi!!" "Ning!!" "All the best!!"

Eleven and the others cheered for Chi Tong. Chi Tong nodded heavily and rode the Phoenix clone away from Shi Yu and the others. During this process, the fire power on its body was even stronger!!

The power on the Phoenix clone was Sun Flame, the Sun God Fire Exort, and the power that had been stripped away by Chi Tong. However, she could still control it, and her own flames were the flames of life, flames that belonged to her.

Under the lingering of the double flames, the Yun clan totem undead imprisoned by Chi Tong in its undead space burned one after another, turning into Spirit Release nutrients that assisted Chi Tong in breaking through, leaving only the Abyss Demon Frog, a demigod puppet.

Soul aura that filled the sky surged and lingered around Chi Tong and the Phoenix clone, causing their joint aura to increase steadily.

Apart from that, Chi Tong also used the World Tree Fruits prepared in advance by Baby Ginseng and the Sun Flame Flowers plundered from the Phoenix Empire's national treasury.

Under the enhancement of many resources, its original 300 million normal energy points began to take a qualitative leap.

It began to break through!!!

Strength turned into life source!

1 billion... 2 billion... 2.5 billion... 3 billion...

Soon, Chi Tong's normal energy level also exceeded the three billion mark. Without a doubt, once it broke through, it would be at the demigod level.

This time, Shi Yu was most concerned about the change in Chi Tong's "Spirit Release" Skill.

The proficient level, expert level, and perfect level Spirit Release allowed Chi Tong to have the bird spirit form, phoenix spirit form, and Sword Maiden form. Then what about the transcendent level Spirit Release this time?

Shi Yu and Chi Tong didn't know, but soon, they knew. They saw the red breakthrough light become stronger and stronger. The flames that filled the sky seemed to have wrapped them into a huge fireball that reflected the starry sky.

"This is..." When the Phoenix Patriarch also flew into the starry sky, she immediately saw the scene in front of her.

"This is..." When the Phoenix Patriarch also flew into the starry sky, she immediately saw the scene in front of her.

On Blue Planet.

At this moment, any life form that looked up could also discover that two suns seemed to have appeared in the sky.

This special phenomenon directly confused and shocked many lives.

Shi Yu and the others on the green dragon were stunned before immediately reacting.

The transcendent-level Spirit Release directly made Chi Tong's bloodline form return to the essence power of the Sun God Phoenix, the power of the sun!

At this moment, Chi Tong seemed to have obtained the true body of the sun and could freely transform into the form of the sun.

However, this was not a Skill. Just like the previous Flame of Regeneration and the Flame of Restoration, it was just a derived form of Spirit Release to increase proficiency.

In this state, it would be even easier for Chi Tong to mobilize the power of the sun.

Boom!!!

In an instant, the light of the sun swept in all directions. In the incomparably dazzling hot sun, a figure with surging sword intent and an aura that pierced through the starry sky walked out. It was Sword Maiden Chi Tong.

She was still beautiful, and her figure was even more dazzling in the sun.

At this moment, Chi Tong had already completed its breakthrough, but it had yet to complete its evolution. After looking at Shi Yu and the others through the starry sky, Shi Yu and Buggy's mouths curled up and they smiled.

"Buggy, I'll leave the rest to you."

"Roar!!!"

Under Buggy's roar, it directly activated the Four Holy Clones Skill. One round of the Four Holy Vermillion Bird clones, which was originally created with Chi Tong as the prototype, mobilized the power of faith from the Vermillion Bird faith items collected by Shi Yu and the others to help Chi Tong undergo the Awakening Purification.

Chi Tong was also trying its best to use the power of faith of the Vermillion Bird to optimize the bloodline of its Phoenix clone.

"This is..."

The Phoenix Race Patriarch, who had followed, couldn't help but be stunned when he saw the huge Vermillion Bird phantom flying behind Chi Tong and mobilizing the power of faith to help it modify its bloodline.

It suddenly looked at the ten-thousand-meter-long green dragon. Why... why could this green dragon even mobilize the power of faith of the Vermillion Bird!

This didn't make sense!

"Moreover, my Vermillion Bird Feather..." The Phoenix Race Patriarch suddenly realized that the current Chi Tong was already disintegrating its Vermillion Bird Feather. It seemed to be really as Shi Yu had said. They were simulating the evolution path of the Vermillion Bird through deduction.

Unscientific Beast Taming

Chapter 1220: Demigod-level Vermillion Bird Sword Maiden (4)

"How is it?" Ling asked beside Shi Yu.

On the green dragon, Shi Yu, who had red hair and red eyes and was still in the possession state of the Sword Spirit clone, chuckled and said, "It's even smoother than your deduction."

"In just an instant, the Vermillion Bird Divine Fire is in a teachable state."

Ling: "Great, this way, we might be able to walk an evolution path more perfect than the Phoenix Race's patriarch."

"Yeah." Shi Yu stretched out his palm and faced Chi Tong from afar. He entered a mental resonance state and closed his eyes slightly. Then, right on the heels of that, he seemed to have entered a dark world. In this world, only he and Chi Tong were back to back, sticking closely to each other.

As he was in the state of clone possession and mental resonance, Shi Yu directly added points from afar and imparted the skill EXP of the Vermillion Bird Divine Fire to Chi Tong in the optimization race.

In the next moment, scarlet light also lingered on Shi Yu's body. In the distance, the Fire of Spirit Faith ignited in Chi Tong's mind. With a boom, an even stronger light bloomed from her body. The sun phantom was even larger and more dazzling, covering everything about them.

During this process, the Phoenix Race's patriarch sensed the gradually growing power of its sister's mixed-blood daughter in confusion the whole time. It felt that it was getting closer and closer to the orthodox Vermillion Bird.

In fact... it would soon surpass him.

"Jiu!!!!!!!"

The Vermillion Bird Divine Fire that filled the sky lingered in the sun phantom. A Vermillion Bird seemed to have really been slowly born inside, shocking the Phoenix Clan Leader's jaw.

That was... its Vermillion Bird Divine Fire? Why...

It had only been a few minutes since they flew into the starry sky. In these few minutes, a life form directly completed its evolution towards the Vermillion Bird and completed the path it successfully walked under countless opportunities. This... it couldn't accept!

Finally, the gathering of the power of faith and the Vermillion Bird Divine Fire perfected the last body of the Vermillion Bird Constellation.

Accompanied by a sparrow cry that resounded through the starry sky, its body completely formed under the red evolution light.

The Phoenix derived the power of the Vermillion Bird, and the red starlight that filled the sky turned into a parasol tree. The Vermillion Bird that came out of the morning sun spread its wings and flew from its habitat state. Its body was covered in the Vermillion Bird Divine Fire and finally burned. Its vigorous life force was as vast as the sun. It was in the form of a divine bird completely made of fire. It was wearing a golden Fire Feather coat, like an Elemental life form, like a divine transformation of fire.

It flew out of the hot sun. On its body stood a woman with red hair draped over her shoulders and agile eyes. She was also wearing a Fire Feather Shirt. It was Chi Tong.

At this moment, Shi Yu was very excited. It was completed. Her main body maintained the form of a Sword Maiden. With the Four Immortal Slaying Swords in hand, she transformed into the evolved Vermillion Bird form and formed the super-divine mode of the Vermillion Bird Sword Maiden!!

This wave was invincible!

"Ling, record the analysis Skill." At this moment, although Shi Yu was immersed in Chi Tong's evolution, he didn't forget to share the information with Ling.

In this evolution, Chi Tong had learned a total of three Skills.

Shi Yu felt that it was simply ridiculous. After all, Buggy had only awakened two faith skills when it evolved through the Green Dragon Domain.

Of course, one of them was replicated by Chi Tong.

The first was that the Vermillion Bird Divine Fire had successfully turned into a racial skill during Chi Tong's evolution.

The second was an undead skill.

< Name > Soul Guiding

[Attributes]: Undead

[Level]: Super

< Introduction > Consuming the power of faith can allow the believer's soul to not be destroyed after death and undergo soul reincarnation!

Shi Yu didn't know how to evaluate this skill. There were actually very few lives with reincarnation abilities, and Chi Tong's ridiculous thing was that its faith skill could allow believers to reincarnate.

Buggy's Green Dragon Indestructible Body only used the power of faith to reincarnate and revive itself.

"In the pre-Qin era, the Vermillion Bird was thought to be able to guide the souls of the dead to rise in the sky and was related to the soul. Could it be that Chi Tong's spiritual body form happened to match some requests?"

The third Skill...

< Name > Sun True Body

[Stats]: Exort

[Level]: Super

< Introduction > It can burn the power of faith and turn itself into a sun, burning everything, reflecting the starry sky and burning stars.

And the skill that Shi Yu felt was the most ridiculous was still the third. This should be the Vermillion Bird Faith Skill awakened by Chi Tong by combining its race and the power of faith.

It should be considered a high-level faith skill of the Vermillion Bird Divine Fire. The Vermillion Bird Divine Fire was only the combination of Normal Fire and the power of faith, but the Sun True Body was the combination of the Sun God Exort and the power of faith. Its power was even stronger.

It was a faith Skill that could destroy stars when trained to the extreme. Just like the Dragon Star Group, it could directly Devour a planet into the sun.

At this moment, Chi Tong's attributes were quite perfect. Not only did its main body master the quasi-divine sword skill, but its clone also mastered three faith skills. The combination of the two made its energy level increase steadily to 3.53 billion.

It had already exceeded Eleven, who had just broken through, but after the current Eleven swallowed Yun An and ate a pile of resources, its normal energy level had long been even more ridiculous. Chi Tong had yet to completely catch up.

"Chi Tong!" In the starry sky, Shi Yu condensed his mental strength and shouted. Chi Tong, who was opposite him, directly absorbed the Vermillion Bird clone into its body, like a Nine Heavens Goddess who had descended from the starry sky, leaning towards Shi Yu and the others.

She smiled.

Chi Tong felt that it might be able to keep defending the championship in the team!

Susu and Ling definitely couldn't defeat her.

"Wuu!!!" Eleven and the others sensed Chi Tong's current state and were indeed shocked and envious. They felt that even if Chi Tong didn't possess Shi Yu, it could still pose a strong threat to them.
