Chapter 1221: Demigod-level Vermillion Bird Sword Maiden (5)

"Roar!!!" Seeing Chi Tong's perfect state, Buggy couldn't help but want to break through too. After it broke through, the Dragon of Imagination could let it evolve again. This time, Chi Tong had a quasi-divine skill to evolve into a faith skill, while Buggy hoped that it had a faith skill to evolve into a quasi-divine skill. This way, it wouldn't fall behind its teammates too much.

It cried to death. It had said that the one who evolved first would definitely fall behind the version.

Back then, it was so glorious for it to evolve into a green dragon. In the end, Chi Tong had already evolved twice in a row. One was the evolution of a god, and the other was the evolution of faith. It... was still waiting in line.

"Mi." When Sword Maiden Chi Tong flew over, it gradually turned into the form of a sword spirit and turned into a fiery red longsword that landed in Shi Yu's hand.

Then, both parties entered a complete possession state, and their auras were even more terrifying. Shi Yu was like a fire god that had walked out of the starry sky as he looked at the Phoenix Patriarch who had followed outside Blue Planet.

Under the fiery red flames, Shi Yu's Chi Tong was as dazzling as the sun.

"Patriarch, can you take us to crack the ruins now?"

"This power should be enough, right?"

Chi Tong, who was at the demigod level, possessed Shi Yu, who had eaten world, immortal, and eternal resources. At this moment, Shi Yu felt that he could defeat the Phoenix Patriarch, who the peak empress had used all her might to defeat, in a "one-on-one".

There was definitely no problem.

"You guys..." The Phoenix Race Patriarch had a shocked expression. She felt a huge pressure from Shi Yu and the others.

How could this be... Could it be that they had really become gods?!!

....

Phoenix Race, Super God Ruins.

The Phoenix Race's patriarch, Shi Yu, returned from the starry sky. Under the Phoenix Race's patriarch's lead, Shi Yu entered the meteorite-like starry sky ruins in the red universe.

Upon seeing the ruins, Shi Yu suddenly recalled that although the demigod of the Phoenix Race couldn't crack the ruins either, he had moved the entire ruin back from the universe...

The ruins were dead. If there were no living creatures inside, even if he couldn't crack it, he might be able to move the ruins back to the original space and time first. There was still time in the future?

"This is the place." After leading Shi Yu into the super ruins, Shi Yu and the others seemed to have entered a petrified world.

The entire world was gray. There was nothing on the petrified ground and the petrified sky. There was only a stone pillar standing in the center of the ruins. On the stone pillar was a spherical gem quietly.

It was like a glass bead. On its transparent appearance, a green crescent-shaped pattern was embedded inside.

Although it had yet to approach this glass bead, anyone could sense its powerful energy fluctuations that exceeded the divine level.

"On the stone pillar is that super-divine-level resource. We don't know its use at the moment, and we can't take it away."

"But as long as you get close, the ruins space will produce a strong rejection. Even demigods can't stop this rejection."

"In addition, the Phoenix Race has also confirmed that only creatures with the bloodline of the Phoenix Race can approach the stone pillar. Otherwise, there will be an even stronger rejection." The Phoenix Race Patriarch, who had turned into a few meters tall, looked at the World Tree Envoy in a fusion state beside him.

Because of the possession, the current Shi Yu and Chi Tong shared the Phoenix bloodline.

"Among them, it's not like the Phoenix Race hasn't tried letting the Undead Phoenix possess a human to take away resources, but they all failed."

"However, this is the first time a demigod-level undead Phoenix has possessed someone. In the history of the Phoenix Race, although a demigod-level undead Phoenix has been born, we've never found a human who can withstand its possession power, let alone a human that both parties contracted."

"So..." The Phoenix Clan Leader felt that this time, it might really succeed.

The power on Shi Yu and the others definitely crushed ordinary demigods.

It was already considered an expert among demigods.

However, in this state, Shi Yu was still not confident.

"I'll give it a try." Shi Yu nodded. Then, under the Phoenix Patriarch's gaze, he approached the stone pillar.

The Phoenix Race Patriarch's gaze was solemn. According to her past experience, the entire ruins space should reject Shi Yu and the others next.

According to the speculation of the past demigods, one had to at least have divine-level power to withstand this spatial rejection!

However, the next scene made the Phoenix Clan Leader a little at a loss. He saw Shi Yu and the others approach the stone pillar step by step. The so-called spatial rejection never appeared.

This situation stunned the Phoenix Patriarch. Seeing that Shi Yu was getting closer and closer to the stone pillar, it began to suspect that there was a malfunction in the ruins!

"How is this possible?" It also tried to approach, but in the next moment, a spatial repulsive force that was like divine might directly acted on this demigod, making its expression change.

Boom!!

It retreated slightly.

The huge commotion made the red-haired Shi Yu in front of him turn around and say, "Are you alright?"

"Why, why don't the ruins reject you?" The Phoenix Patriarch couldn't understand.

"What's going on?" Shi Yu was also very puzzled. He sensed his surroundings and indeed didn't feel any rejection power.

Could it be that he had heard of his famous name in this ruin??

Just as Shi Yu was puzzled, something unexpected happened. The glass bead on the stone pillar suddenly emitted an even stronger light.

The light kept strengthening. In the end, in midair of the ruins, it condensed into the phantom of a white Phoenix, emitting a divine pressure.

"This..." The Phoenix Clan Leader was still in shock and had yet to react. The super-divine resource had appeared??

Unscientific Beast Taming

Chapter 1222: Demigod-level Vermillion Bird Sword Maiden (6)

"Uh..." Shi Yu and Chi Tong, who had possessed him, also revealed confused expressions. What was going on?

"Patriarch, this should be a normal reaction, right? A part of the rejection? Is there still a battle test?"

"Test my ass!" The Phoenix Clan Leader was shocked. This was the first time the ruins had such a reaction after their ancestor brought it back!

At this moment, the Light Phoenix in the air was like a god. The Phoenix patriarch judged that it was very likely to be the ancestor who left Blue Planet in the Mythical Era and brought back super-divine resources.

At this moment, this Phoenix Race ancestor seemed to have just woken up and was very tired. Shi Yu and the others could sense that this phantom was no longer its real body, but a fixed program similar to illusions, mental bodies, and ruins spirits!!

In fact, because it had been too long, even the consciousness to think on its own had already disappeared. It was completely like an order.

"I'm finally seeing you again, Lord Blue Planet."

The moment the Phoenix Race god spoke, it shocked the Phoenix Race's patriarch.

"You might not be Lord Blue Planet, but you should be a member of the Phoenix Race with a deep relationship with Lord Blue Planet."

"No matter who you are, after obtaining this resource, please hand it to Lord Blue Planet."

"Next, please listen to me."

"After leaving Blue Planet, Lord Origin Phoenix led us to the depths of the starry sky. During the long voyage, many gods sacrificed themselves, but in the end, we still successfully arrived at another civilization."

Shi Yu and the others were suddenly stunned as they listened to the other party seriously.

Then, what made Shi Yu and the others' expressions change was that this phantom was like a stutter. Its voice was blurry and it couldn't let out normal voices.

"#@¥%@##@¥".

After a pile of characters that Shi Yu and the others couldn't understand, the thought body left behind by the Phoenix Divine Spirit finally spat out the words clearly again.

"This stone is the key to connecting Blue Planet to a cosmic civilization. Please decide if you want to use it after careful consideration, Lord Blue Planet."

"Opening it might bring new life to Blue Planet, but it might also completely destroy Blue Planet."

"Its use is equivalent to a ruin key. It can allow the user to open a door. No matter where they are, they can directly enter another super planet. It can be seen as an interstellar Teleportation tool. Not only can it teleport over, but it can also teleport back."

"This super planet is a very special neutral planet in the universe. In terms of level, it exceeds you, Lord Blue Planet, by two growth levels. On it live the myriad races of the starry sky. Be it the cosmic Behemoth, the cosmic worm, or the human race, they're only members of the myriad races of the starry sky. Their civilization level has to a certain extent already exceeded Blue Planet, which is located in a remote star area."

"In short, through this key stone, we can let Blue Planet and the cosmic civilization intersect. Before the two parties come into contact, we will try our best to increase the status of Blue Planet Races in the universe..."

"Its opening method... 2#@¥@#% #¥%."

Bang!

This phantom was like an old and broken machine. As it spoke, it directly shattered.

Shi Yu and the Phoenix Race Patriarch: ???

"F*ck." Shi Yu directly cursed. Finish f*cking speaking. After saying that, then it could be scrapped!!

The Phoenix phantom was completely destroyed, but the suppression of the ruins space did not completely disappear. The Phoenix Patriarch was still rejected by the ruins, but Shi Yu could still advance easily until he picked up the so-called key stone in confusion.

After the words just now, Shi Yu was stunned. The Phoenix Race said that cracking this ruin required divine-level battle power. Therefore, before he entered, he let Chi Tong break through first.

In the end, what he wanted was not divine-level battle power, but Blue Planet's direct descendant identity??

"You... This thing is indeed as you said. It's very important to Blue Planet." At this moment, when he heard that the phantom of the Phoenix Divine Spirit had confirmed Shi Yu's identity, the Phoenix Patriarch, who originally trusted Shi Yu 99%, could be said to have directly reached 100% trust.

It hit the jackpot.

Shi Yu's pile of Poofs had been verified.

Shi Yu held the key stone in silence.

A Teleportation Device to another super planet in the universe??? Are you serious??

Unscientific Beast Taming

Chapter 1223: Space Emperor and Evolution Legendary (1)

In the Phoenix Race ruins, Shi Yu, who was holding the key stone, looked at the Phoenix Race Patriarch.

It meant, look!

I knew it. I have an official identity.

Moreover, this key stone was extremely important. It was left behind by the Phoenix Race's ancestor for Blue Planet's Great Resistance!

The lies were all made up!

Could it be that Ling was assisting again?

Shi Yu felt that he had made an impressive discovery in this archeology test.

The original space and time, this key stone, had undoubtedly been snatched away by the two unlucky things, the Phoenix Race Patriarch and the empress. Fortunately, he could transmigrate back to the ancient parallel space.

Otherwise, it would really be an unjust account.

"Lord Envoy..." The Phoenix Race Patriarch had mixed feelings.

"What a pity," Shi Yu said. "The most important information was lost."

"It's been too long, but if I bring it back to repair Blue Planet's Will, there might be a possibility of emergency treatment."

The Phoenix Clan Leader: "I understand."

Although this high and mighty Phoenix Race Patriarch also wanted to obtain the right to hold the key stone and take a look at a higher starry sky world, he also knew that this thing was not something it could grasp.

However, it believed that as long as it followed Blue Planet's footsteps, it and the Phoenix Race would definitely benefit the most in the future.

After all, this thing was brought back by the Phoenix Race ancestor.

The Phoenix Race god was working hard in the universe. How could the Blue Planet's Will mistreat the descendants of the Phoenix Race here?

At this moment, the Phoenix Race's patriarch had already made up his mind to follow the world's will well and develop steadily with Shi Yu.

"Next, I'll take this key stone away."

"In addition, prepare to head to Dong Huang to form an alliance with Princess Huang Xi."

"I feel that the key to opening the interstellar passage might be on humans. Otherwise, why would Goddess Wa bring humans back?" Shi Yu continued to deceive Poof.

"I see." The more the Phoenix Race Patriarch thought about it, the clearer it became. Her eyes lit up, and then her expression darkened. Unfortunately, her stupid sister had originally grabbed the right direction, but she went astray.

The next Phoenix Race couldn't take the wrong path. They had to get along with the humans according to the will of the world...

"There's one more thing." Shi Yu returned to the starting point and exited the energy-consuming possession form. The sword spirit, Chi Tong, floated beside Shi Yu in the form of a sword.

Shi Yu said to the Phoenix Clan Leader with a weak expression, "In order to let you believe our identities just now, I consumed a lot of energy."

"We came out in a hurry and didn't bring much food..."

"Mi..." Chi Tong was also hungry. Was this the power of a demigod? It was too hungry!!

It now understood Foodie Eleven a little.

The Phoenix Race Patriarch was stunned. "Sorry, I actually forgot to entertain the envoy. I'll get my clansmen to prepare food now. I'll definitely let you return full."

Shi Yu revealed a satisfied smile. This Phoenix was worth teaching.

...

The next pause made the Phoenix Race Patriarch's heart bleed.

It wasn't too much to say that the Phoenix Race of Phoenix Island was a huge faction comparable to Dragon Palace City.

Such a faction naturally had a huge amount of internal resources. Divine-level resources and Legendary-level resources were everything.

However, the Phoenix Race's patriarch discovered that even so, they still couldn't afford to entertain a god like Shi Yu!

"Patriarch, they've finished the new legendary food again."

As the Phoenix Race prepared the gift to establish diplomatic relations with the empress, they served Shi Yu food. In a short period of time, the resource reserves quickly decreased.

"What, it's finished again?!" The Phoenix Clan Leader was shocked.

A wood-element totem Phoenix cried and said, "Patriarch, that's at least six creatures who have mastered quasi-divine skills. They can all be seen as demigods. Not to mention us, I'm afraid no faction can afford their appetite."

"Fortunately, it's just today's meal. Next time... I can't entertain them anymore. Otherwise, Phoenix Island will definitely be eaten up."

The Phoenix Race Patriarch was silent and said, "I understand, but try your best to let them eat well..."

Logically speaking, with the gift of Blue Planet, the envoy of the World Tree shouldn't have come to the Phoenix Race to freeload, right? No, it wasn't to freeload. Perhaps it was purely because the Phoenix Race was too weak now and couldn't afford to entertain the other party. The Phoenix Patriarch's heart was depressed.

At the same time.

Shi Yu and the others, who were freeloading, completed this spatial travel perfectly.

Not only did he obtain the resources, but Chi Tong's clone also completed the evolution of the Vermillion Bird and changed the history of the Phoenix Race and the empress dynasty perishing together in the future. It could be said that it could return perfectly.

However, the archeological results this time made Shi Yu very conflicted.

The key stone that connected to another super planet... If that super planet was regarded as a large ruins space, then this, like the ruins prop, was a login device.

However... it was different from ordinary ruins props. Ordinary methods couldn't activate it at all.

The usage method was lost...

Forget it, even if he didn't lose it, Shi Yu didn't dare to try it easily. What if this thing broke over time?

What if it couldn't return after the Teleportation? Even if that Phoenix said that it could teleport back and forth, it was still a huge pit for people who didn't master the usage method.

Shi Yu decided to take it back and study it first.

...

Phoenix Empire.

After Empress Huang Xi succeeded the throne, she had been using lightning methods to gather the power of the Empire. However, in the short term, it was still unlikely for the Phoenix Empire to change its name to the Dong Huang Dynasty and become the Human Empire. After all, the Empire was troubled internally and externally now, and there were many things to deal with.

[Unscientific Beast Taming](#)

Chapter 1224: Space Emperor and Evolution Legendary (2)

Even if the empress wanted to incorporate the Eastern humans, she would need to work hard for a long time.

Now, a well-known enemy of the Phoenix Empire was the Phoenix Race of Phoenix Island. Although ordinary people didn't know about the small-scale conflict between the Phoenix Empire and Phoenix Island, the human experts and totem creatures in the east knew very well.

Before the empress displayed strength comparable to the Phoenix Race, not many people were willing to join a country with huge war hidden dangers.

In the Phoenix Palace, Empress Huang Xi looked into the distance in silence. She had always been very worried about Shi Yu going to Phoenix Island. Previously, when the dual sun phenomenon appeared in the sky, she suspected that something had happened to Phoenix Island.

"Sister Empress!" Just as the empress's thoughts were heavy, a voice entered her ears, making her face darken. However, at the same time, she was delighted. She looked at the sky. This voice appeared in her heart and belonged to telepathy.

A moment later, the empress rose into the sky and looked at Shi Yu and the others sitting on the cloud, as well as a pile of round Shi Yu pets. "You guys..."

She looked stunned.

Wait a minute, what was going on with them?

She looked at Shi Yu, Eleven, the big worm, and the others who had become fatter. She suspected that Shi Yu had gone to roast and eat all the Phoenixes of the Phoenix Race.

"This is for you." Shi Yu threw out a bottle that contained a drop of water. Shi Yu said, "I've already negotiated with the Phoenix Race. From today onwards, the Phoenix Race is an ally of the Dong Huang Human Race."

"This is the entire process of me talking to them. digest it and wait for the Phoenix Race to visit."

"As for me, I might have to leave. I might return, or I might not return."

"What?" When Shi Yu finished speaking, the empress was in disbelief. The Phoenix Race... was resolved just like that??

At the same time, Shi Yu's other words instantly made the empress very concerned.

"Leave? You won't come back. What do you mean?"

"The literal meaning is that you should understand after digesting these memories. If you don't return, it means that we've gone to explore a higher realm." Shi Yu smiled.

Shi Yu believed that without the threat of the Phoenix Race, as a hybrid Legendary, it wasn't impossible for the empress to live until the Mythical Revival a thousand years later.

With the empress presiding over Dong Huang in this space and time, he was relieved...

In the next moment, the empress received Shi Yu's memories as a World Tree Envoy and memories of the Phoenix Race's super-divine ruins. She knew what Shi Yu's "identity" and the super-divine resources of the Phoenix Race were.

Just like the Phoenix Race Patriarch, she was extremely shocked.

Shi Yu also left and began to digest his gains in this space and time.

After a long time...

The empress looked at Shi Yu and the others' disappearing backs. In the end, she returned to the Phoenix Palace in silence and waited for the Phoenix Race to arrive.

For a period of time, Shi Yu secretly paid attention to the entire process of the empress dynasty and the Phoenix Race successfully establishing diplomatic relations. When the spatial rejection reached the maximum, they were teleported back to the original space and time by the awakened Qi.

However, after leaving, Shi Yu kept feeling that he had forgotten something.

Only when he saw the pair of Golden-Winged Roc wings in the ruins did Shi Yu remember that there were still three Legendary resources that he had yet to ask the Garuda Empire for!

"What a big loss!"

On the ocean, Shi Yu, who was rushing back to Dong Huang, let out a heart-wrenching cry.

"Ling, why didn't you remind me?"

Ling: "After eating so many Legendary resources in the Phoenix Race... haven't you eaten enough?"

"No matter how small a mosquito is, it's still meat."

Ling: "It's indeed my mistake. Looks like there's still a bug in intelligence. It might have to be raised to transcendent to be able to calculate everything."

"The next one to break through to the demigod level can be me."

Shi Yu waved his hand and said with a dark expression, "Stop tricking me. Next... let Buggy do it. If there's no special situation like the Phoenix Race Ruins, our breakthrough order will be according to the order of entry into the team."

"Don't fight between any of you. It's fair."

Chi Tong was an accident this time. It was definitely not because of the treatment of a biological daughter.

"Ji?"

As Shi Yu finished speaking, on the cloud, Buggy cried and crawled out of the cotton cloud. Look, what did it hear!!

This was the most humane thing it had heard from Shi Yu this year.

"Ji!!!" Buggy pounced on Shi Yu with tears streaming down its face. Beast Tamer!! Love you!!

"Alright!!" Ling said helplessly, "This is also good. We can strengthen the spatial strength in advance."

"Alright, let me see the message first," Shi Yu said.

It had been a few days since Shi Yu and the others transmigrated. All kinds of information had been stored.

Among them, there was a pile of trash information.

For example, Teacher Owl had gotten to know a few beautiful dragons, beautiful butterflies, and beautiful moths, wanting to introduce them to Buggy.

It was obvious that he had ill intentions and wanted to manually promote the success of the prophecy.

Shi Yu decisively deleted it...

Buggy didn't need love!

He had to let the owl predict one wrong prophecy.

The prophecy was all correct. Shi Yu was afraid that it would become arrogant.

However, when he saw the owl, Shi Yu suddenly wanted to change direction. "Let's go to the capital first."

"Ling, call Teacher Ying and let it come too."

"We'll use the dual divine skills to assist in premonition and let Teacher Owl predict the relevant information about the super-divine resource brought back."

"With a physical medium, its prediction accuracy can also be higher."

"Alright." Ling nodded.

[Unscientific Beast Taming](#)

Chapter 1225: Space Emperor and Evolution Legendary (3)

...

Before he studied the Teleportation Key Stone, Shi Yu thought of letting the gem cat use the wishing divine skill. Ling would use the luck divine skill to assist the owl in predicting its information.

As long as there was a trace, it could save them a lot of research energy.

In the sky above the capital.

When Shi Yu and the others arrived at Imperial Capital University, they happened to meet the gem cat that Ling had shaken over.

The cat girl rubbed her temples and looked at Shi Yu and the others. "Why are you using my Skill again when you just returned? You're busy."

"What's the matter this time?"

On the cloud, Shi Yu looked at the cat girl who had changed into a suit and said happily, "Teacher Ying, you're wearing pretty formal clothes."

The cat girl in the suit said calmly, "That's true. I'm the sect master cat of the Gem Financial Group now... My super multinational corporation is about to officially operate. When I earn big money, you won't have to worry about food and drink."

Shi Yu's face darkened. This guy was really doing this. Was he trying to snatch business from the Blue Planet Alliance?

The gem cat: "Hey, hey, hey, what kind of expression is that? This is also under the Blue Planet Alliance. It's legal."

Shi Yu said, "That's good... Didn't I go to the sunken Phoenix Island to do archeology according to the memories of the Undying Dark Phoenix?"

The gem cat nodded. Yes, yes, so?

"Then, I obtained some trinkets, but there was too little relevant information. I needed to rely on premonition ability to provide some clues."

Shi Yu also decided to replicate Teacher Owl's Future Prediction this time. It was too troublesome to keep looking for it to predict the future.

However, Shi Yu kept feeling that Teacher Owl's Future Prediction was more accurate than normal Future Prediction.

Other premonition pets weren't as fierce as it. Overlords could predict demigods.

If he predicted it himself, it might not necessarily have such an Effect.

Unfortunately, the owl didn't react at all when it fed the owl the Reincarnation Fruit, making Shi Yu, who thought that it was the reincarnation of a god, give up on this guess.

Perhaps it was really just that Teacher Owl was talented and had gained enlightenment?

Otherwise, there were higher-level secrets hidden on it.

"Huh? You really gained something." At this moment, the gem cat was slightly stunned. It felt surprised, but not that surprised. She sighed. Forget it, she should have known. The ruins that Shi Yu had targeted definitely had to be tested before he would stop.

"Yeah, let's go." Shi Yu smiled.

The territory of the Prediction Owl was still the capital, but at this moment, as its identity leveled up, it had already moved away from the Imperial Capital University. With its current totem level identity, it was already the national guardian. It was a little wasteful to predict this and that prophecy for its students.

It was directly assigned a mystic realm under the arrangements of the association. When Shi Yu and the others arrived, Teacher Owl had already come out enthusiastically to welcome them.

"Shi Yu!! Shi Yu!! Did you bring Brother Green Dragon Buggy for a blind date?" Grandma owl's sharp voice was filled with joy. She was especially happy to see Shi Yu and the others arrive.

"Don't even think about it. Buggy doesn't need to date. Dating will only affect its speed of becoming stronger," Shi Yu said.

"Come, help me predict an item."

The owl's expression turned bitter. "Wuu... Speaking of which, Shi Yu, your team won't be single for the rest of their lives, right? You too..."

Shi Yu: "Aren't you too?"

The owl : "..."

The gem cat girl said, "Hurry, hurry, hurry, old witch, predict it first. Hurry up. Time is money!"

"I know, I know. Come, come, come, what do you want to predict this time!" the Prediction Owl said.

Shi Yu and the others followed into the mystic realm. First, they gave the Prediction Owl a bunch of buffs. Then, Shi Yu threw out the key stone he had obtained from parallel space.

At this moment, as Shi Yu took out this special super gem, the gem cat girl's eyes widened.

"This is..."

"It's a trash stone. Don't mind it..." Shi Yu said.

The gem cat girl: "Nonsense! You went to dig gems yourself behind my back again. Wu wu wu wu."

"This, this can't be the super-divine resource the Undying Dark Phoenix mentioned, right!"

"Didn't it lose it with the empress and the others? Where did you find it!"

"You're too ridiculous..."

"This thing..." The Prediction Owl had a serious expression. It could tell that this resource was extraordinary and that there were complicated traces of time flowing on its body.

It took a deep breath. It didn't know if it could successfully predict the relevant information...

Shi Yu said, "I want to know if its usage method can help predict where the opportunity for us to obtain its usage method is in the future. If it really doesn't work, any relevant information is fine."

"I'll give it a try..." the Prediction Owl said.

The hexagram in front of his chest glowed slightly. He looked at the key stone in front of him and closed his eyes...

Then, it spoke...

"Well, why does your prediction feel strange?"

"Superdivine-level resource... Damn it, I, the owl overlord, can predict demigods. Now that I've reached the totem level and with two divine skill buffs, I can definitely predict transcendent-level!"

"The heavens didn't give birth to me, the owl..." The Prediction Owl encouraged itself as it predicted.

Shi Yu and the others looked at the owl solemnly. Then, the owl's expression suddenly froze.

"This is..."

After being stunned, it right on the heels of shouting that it was impossible!

In the dark premonition scene, the Prediction Owl seemed to be racing. Its vision shuttled crazily, as if it had passed through the cosmic starry sky and arrived at another planet. At the same time, the energy on its body was also crazily consumed!!

In the end, it saw two figures.

These two figures were sometimes blurry and sometimes clear. The Prediction Owl saw a pile of similar rocks in front of them!!

The Prediction Owl believed in these two figures and definitely wasn't wrong.

"Space Emperor, Lin Feng Legendary... How can it be them??"

It was the legendary emperor of Dong Huang, the Space Emperor, who had already disappeared in the starry sky of the universe, and the legendary Beast Tamer of Dong Huang, Lin Feng, who had also suddenly disappeared!

Moreover, the vast divine power on their bodies made the Prediction Owl feel that it far exceeded the Legendary, demigod, and even demigod-level reincarnation gods it had seen!

These two figures were not the past Space Emperor and Lin Feng, but the current or future Space Emperor and Lin Feng. The Prediction Owl was very certain.

It shouted in disbelief. At the same time, its feathers quickly withered, and its aura kept weakening, as if it had aged dozens of years. Its life aura disappeared very quickly, faster than any premonition in the past:

"Holy shit, the Space Emperor and Lin Feng are still alive and might have broken through to the divine level. They're on another planet. They also have a stone like you!"

[Unscientific Beast Taming](#)

Chapter 1226: Space (1)

The owl's premonition this time completely exceeded Shi Yu's expectations.

Emperor Kong and Legendary Lin Feng were still alive?

Moreover, it broke through to the divine level?

Moreover, they also had a pile of similar rocks in their hands?

Legendaries like the Space Emperor and Lin Feng, who had not disappeared in battle and were relatively close to the modern era, were still alive in a certain place. Shi Yu was actually not very surprised.

However, if the owl said that they were on another planet and also held the Teleportation Key Stone, Shi Yu would be overthinking.

"Hey, hey, hey, what are you talking about?"

The gem cat girl was also stunned. Why did he predict the usage method to the Space Emperor and Lin Feng!

Was the Beast Tamer of the Void Mantis really still alive? And that legendary Feng...

"Cough..." The owl interrupted them and lay on the ground on the verge of death. Before it could say the word "save", a ginseng baby had already started to save it!!

"Teacher Owl, hold on!" Shi Yu said.

The owl: "I'm going to die... I'm going to die..."

"Don't worry, with my rich EXP consumption, with the supplements of the ginseng baby, you can recover in less than half a month."

The owl's vision darkened. After a while, it was pulled back by Baby Ginseng and sat on the ground. It widened its eyes while panting and felt a lingering fear.

Damn it, it looked at the Teleportation Key Stone in horror and decided not to predict this thing anymore.

"Yi!" Baby Ginseng made the owl believe in its technology.

Shi Yu fell into deep thought beside him. In his mind, he recalled what the owl had just said.

Could it be that after the Space Emperor and Lin Feng disappeared, they went to this super planet that the Teleportation Key Stone led to?

They also had the Teleportation Key Stone in their hands. Did this mean that the gods had not only brought back one key stone, but a pile?

Many missing legendaries and demigods left through this method.

No, according to the description, this key stone could return. Why didn't they return again?

Even if Blue Planet couldn't withstand the divine level at the moment, they shouldn't have broken through to the divine level just after arriving at other planets, right?

As long as a returnee left behind information, Blue Planet wouldn't be completely ignorant about that super planet at the moment.

Shi Yu got Ling to analyze it. Although he instantly analyzed many possibilities, he couldn't be very certain of any of them.

However, what was certain was that if Shi Yu went out to wander the starry sky one day...

Perhaps he could encounter the Space Emperor and Lin Feng.

"I feel that Teacher Owl still predicted loneliness. In the end, I still can't confirm the opening method of the Teleportation Key Stone..."

...

In the depths of the universe, on a high-level planet.

A handsome and elegant man met another young man who looked very weak in the sky.

"Lin Feng." Seeing the young man's Enfeeble appearance, the handsome man said calmly, "You're working too hard."

The young man named Lin Feng smiled and said, "The consumption of deducing the super divine-level evolution path is too huge. It can't be helped. Senior Space Emperor, you also sensed it, right?"

"Someone is deducing our traces of existence. The one with this ability should be a super-divine-level god, right? I wonder if it's friend or foe."

"That's not important. The main point is that there's still no news of the mother planet on Kai's Planet?"

"No, could it be that an accident happened to them? Logically speaking, they should have already sent the key stone to their home planet at this time." Lin Feng felt that it was strange.

"It can't be helped. Let's wait a little longer."

"I wonder how Dong Huang is now under the governance of Old Man Divine Source," Lin Feng sighed.

Emperor Kong said, "If there's no news in a year, join forces with them and send out another team. We have to contact Blue Planet before the revival of the laws of Blue Planet."

The Space Emperor looked at the starry sky and fell into memories.

He wondered what had become of Blue Planet.

Back then, when he explored the starry sky, he accidentally entered the universe void and was teleported to an extremely far place from Blue Planet.

After working hard and breaking through to the divine level, he realized that this was the center of the universe. Only then did he see an even vaster world.

Unfortunately, he couldn't go back now.

Even if he broke through to the divine level and contracted ten spatial divine beasts, it was still difficult for him to return to his mother planet.

Although it was a pity, there was nothing he could do. However, to the Space Emperor's surprise, he also discovered the faction left behind by the gods of the Blue Planet's Mythical Era in the center of the universe.

Dragon Race, Phoenix Race, Angel Race, Demon Race... Many gods from Blue Planet had already left their traces in the universe.

It was even to the extent that the leader among them had already exceeded the divine level.

However, even so, it was still difficult for these gods to return to Blue Planet.

Firstly, the laws of that starry sky had been broken and couldn't withstand their existence. Secondly, the consumption of the return trip was too huge. It was Difficult to lock onto the location, and the return cost-effective ratio wasn't high. There was nothing worth staying for on Blue Planet anymore.

After the baptism of time, these large races had even long forgotten that their mother planet was Blue Planet. Most of the initial batch of gods had already died. These could only be considered descendants.

It could be said that although he had come into contact with them, the Space Emperor didn't feel the friendship of being from the same hometown from them.

Only when hundreds of years passed did another kid named Lin Feng, who claimed to be from Dong Huang, find him did the Space Emperor learn that he wasn't the only one who had accidentally transmigrated from Blue Planet to the depths of the universe.

[Unscientific Beast Taming](#)

Chapter 1227: Space (2)

This person named Lin Feng had better talent than him. Unfortunately, Lin Feng had also lost the direction of Blue Planet like him.

Compared to the divine factions of the Mythical Era, the Space Emperor and Lin Feng had a deeper obsession with Blue Planet, no, or rather, Dong Huang. As they became stronger, they also searched for a way to return.

After their hard work, they indeed found a way. Even the gods of the Blue Planet's Mythical Era had tried this method, but there was basically no result, so they left it at that.

In the universe, above the divine level was the super divine level, and above the super divine level was the cosmic level.

In the starry sky of the universe, there were a total of five cosmic life forms, four cosmic emperors, and a cosmic overlord.

Among the four cosmic emperors, one was a cosmic planetary life form. It was the only super planet in the universe. This planet could be said to be the most prosperous place in the universe.

Many cosmic races that could gallop through the universe had something similar to a ruin stone. It was equivalent to the coordinates of a spatial teleportation array. They could freely teleport to this planet or freely teleport back to their mother planet.

Back then, the Blue Planet gods who entered the universe had tried to send the rare Teleportation Stone back to their mother planet and build the connection between Blue Planet and the universe through this stone.

However, it was unknown if it had failed to return or if Blue Planet had given up on connecting to the universe. There was still no news of Blue Planet.

As the Teleportation Key Stone was also a very precious treasure, and the price of returning to Blue Planet was too high, the gods who left Blue Planet didn't try many times.

In fact, the Space Emperor and Lin Feng didn't know very well what these gods had done. After all, it had been too long. It was already very difficult to see the initial gods. They had all returned to dust and earth. Not many had lost their lives in pursuit of higher realms.

The starry sky of the universe was even more of a cruel battlefield.

Now, as the time for the revival of the Blue Planet's laws approached, the Space Emperor and Lin Feng started the second return plan. They found the large races that walked out of Blue Planet and joined forces with them to find Blue Planet's coordinates. They sent a team to send a new batch of Teleportation Key Stones to Blue Planet.

This time, the Blue Planet faction was very cooperative. Firstly, it was mainly the Space Emperor and Lin Feng who contributed.

The second was because Lin Feng had received the blessings of the World Tree and confirmed that the revival of the laws on Blue Planet was in the near future.

The factions of Blue Planet weren't doing well in the universe either. If Blue Planet could recover to the foundation of the Mythical Era and connect to a cosmic civilization, take another step forward and become a high-level planet, as direct descendants of Blue Planet, they could also obtain more benefits.

Both parties hit it off and carried out a new contact mother planet plan together. They were already waiting for the arrival of the Blue Planet rookies on the cosmic planet, World King Planet.

Now, these factions from Blue Planet only hoped that the newbies from Blue Planet would have better talent and replenish their new blood.

They didn't have high requirements either. They were already satisfied if their talent was comparable to the Space Emperor and Lin Feng, two humans who had walked out of Blue Planet. These Blue Planet factions could be said to be extremely surprised that Blue Planet had actually started to nurture humans.

Was it a human seed brought back by a god?...

Humans were also very special races in the starry sky of the universe. Although their ranking among the ten thousand races in the starry sky was not high, for some special reasons, the position of humans in the universe was irreplaceable.

All the races in the starry sky were basically related to humans. They grew together in a one-on-one equal contract. Even universe overlord who destroyed planets rarely destroyed human planets. Ordinary people didn't know why.

...

Blue Planet...

After leaving the owl, Shi Yu returned to Ping Cheng to slack off and not let himself think too much.

It was useless to think too much. After all, he hadn't even reached the maximum level of the current version of Blue Planet. He wasn't qualified to explore the starry sky at all.

His own Beast Taming level was still one level away from level nine. Among his pets, only Eleven and Chi Tong had reached the demigod level. Susu was barely considered half.

Moreover, even Eleven and Chi Tong had yet to reach the pinnacle of the demigod level. After all, quasi-divine skills could still continue to add points. Only when the points were perfect could they be considered to have advanced to the divine level.

"Ling, I'll leave it to you. There's no hurry to study this thing. Just leave it to the clone to tinker with."

After returning, Shi Yu threw the Teleportation Key Stone to Ling. Right on the heels of that, under the angry expression of Ling's clone, he pulled Ling's main body to see the situation of the three new pets.

Turtle, Little Quas Snake, and Dwarf Cat.

A candidate pet for the Black Tortoise and White Tiger cultivation plan.

Now that he had the Green Dragon and the Vermillion Bird, Shi Yu felt that it was time to put the other two on the agenda.

At the moment, after Shi Yu used the Legendary Ruins to seal Yun An, these three guys had all moved to Little Purple's star world to train.

Little Purple was a planetary life form, the Son of the Stars. Now that it had reached the overlord level, it was completely no problem to put the commander-level Turtle, Little Quas, and transcendent-level short-legged cat into its inner world.

After the inner world reached perfect proficiency, it was basically no problem to put a life form that was also at the overlord level into the inner world.

Under Shi Yu's additional points, Little Purple's world upper limit had long been raised to the overlord level. Shi Yu could also enter.

At the moment, although Little Purple was only an overlord-level life form, the growth Effect in Little Purple's inner world had already exceeded ordinary legendary ruins. The Son of the Stars Race could be said to be very awesome and exciting.

Unscientific Beast Taming

Chapter 1228: Space (3)

"Mi!!" After being summoned by Shi Yu, Little Purple curled into a ball and rubbed against Shi Yu's hand. It looked at Shi Yu eagerly and asked when it could participate in the battle.

Shi Yu smiled bitterly at this question. What did Eleven and the others instill in this guy again?

"Mi!"

Little Zi looked serious. It didn't want to be beaten up like Blue Planet!

"No hurry, no hurry. You'll only be considered an adult when you reach the divine level. It's still too early."

In fact, in the beginning, Shi Yu only wanted to nurture Little Zi as a support.

A planetary life form was only a support in the first place.

Generally speaking, planetary life forms had three common Race Skills, inner world, world power, and world blessing.

The first move was to increase the size of the inner world and the upper limit of one's level. It was not used in battle. It was a cultivation-type Skill, similar to the upgrade of the Beast Taming Space.

It was a proper support skill.

Second, the power of the world could mobilize the various natural powers, the power of the Void, the power of faith, the power of laws, and many other power systems in the inner world to attack. This was indeed the attack method of a planetary life form, but the problem was that it was easy to transfer it out, but it was difficult to replenish it.

Back then, Blue Planet also participated in the war of the Mythical Era. Apart from being related to the battle of other divine-level creatures, Blue Planet also participated in the war.

Without the help of Blue Planet, the chances of the life on Blue Planet defeating the three invaders were very small.

After this battle, Blue Planet consumed a lot of energy and would only recover after recuperating for countless years. One could imagine the price of a planetary life form consuming the power of its world.

At the moment, Little Zi had just entered the overlord level. Its absorption of external nutrition was already comparable to a totem.

When it reached the totem level, its consumption would probably be comparable to the divine level.

If it weren't for the fact that it also had more feedback to Beast Tamers, Shi Yu definitely wouldn't be able to afford to raise this guy in the future.

Therefore, although there were attack methods, this attack couldn't be used easily. The higher the level, the more it couldn't be used.

Using a little would cause the weather in the inner world to change and a natural disaster to appear. This was very unfriendly to the life in the body.

Therefore, ordinary planetary life forms cultivated the lives in their bodies. Like a Beast Tamer, they let the lives born in their bodies harvest resources in their place to protect themselves.

This way, their consumption could be reduced to the minimum. Only if they had no choice would the planet life form attack themselves.

It was precisely because of this that Shi Yu didn't want Little Zi to fight too... His family was really at a loss.

Third, the World Blessing. This was also a cultivation method for planetary life forms. It could bring various magical strengthenings to other lives.

For example, the World Tree Blessing Shi Yu received was a type of world blessing.

The Effect of this world's blessing depended on the direction of the planet's upgrade. For example, the cultivation system of the Star Continent in Little Purple's body mainly cultivated the power of faith of the four holy beasts. Therefore, Little Purple could also mobilize the power of faith of the four holy beasts and give birth to various blessings.

For example, providing Buggy with the power of faith, or giving it Black Tortoise and White Tiger Blessings when the turtle, Little Quas, and Shorty trained in its body.

This way, they could evolve faster in this direction.

From the three Skills, planetary life forms were not very suitable for their own battles. Therefore, Shi Yu had never nurtured Little Purple as a combatant.

However, Shi Yu should have expected it long ago. There would definitely be a problem if he handed Little Purple to Eleven, Buggy, and the others to train their Resistance...

Shi Yu could only temporarily suppress Little Purple's battle desire...

At least, the battle Skills he could come into contact with now were not suitable for the life forms on Little Purple's planet to learn. Just like Qi, it couldn't learn anything. Shi Yu could only wait until he went to the starry sky in the future to see if there were any planet battle Skills suitable for Little Purple to learn that didn't affect him.

At that time, he would replicate their skills!

For example, what the Phoenix God had said about a super planet that exceeded Blue Planet by two levels. Shi Yu had already started to look forward to whether it had any Superdivine Planet Skills.

"Master, Master..." Beside him, Ling saw Shi Yu begin to smile unconsciously again. It was suddenly distracted and was very helpless. It kept feeling that Shi Yu would definitely have Alzheimer's when he was old.

"Cough." Shi Yu patted his face and looked at Little Purple floating in front of him.

"In the next period of time, I'll add points to Little Purple to the peak of the overlord level first and personally supervise the Resistance training of Turtle, Little Quas, and the Shorty."

"I feel that I should be able to contract a new demigod when the time comes, right?" Shi Yu asked Ling.

Ling nodded and said, "It's about the same. Little Purple, let me ask you. What's the equivalent of adding 3x47 points?"

"Next, it's your turn to add points again!"

"Mi... (1221 times.)" Little Zi revealed a bitter expression. It wanted to add points again. Although it also liked it, it had to control itself... It might have the most complicated emotions towards adding points in the team.

Because as soon as it came up, it added some super Skills. Accompanied by the comfortable feeling of leveling up and the huge Affliction, it was painful and happy.

Unlike Eleven and the others, who had the joy of laying the foundation for a bunch of low-level Skills.

The race level was too high, and there were no trash Skills. The consequence of not being able to learn trash Skills was that there was a Resistance requirement from the start.

Shi Yu: "1221? Ling, did you teach Little Purple how to count well?"

Ling: "If it really doesn't work, let's empower it through the memory water drop. I can't teach it anymore."

Shi Yu slapped his forehead. Sigh, it must be that the nutrition of Blue Planet's sap was not enough and did not lay the foundation for Little Purple.

Why was its planetary life form still a bottom-feeder, even inferior to Little Ji's basic intelligence?

Little Zi: Mi?

Did it calculate wrongly? Did it calculate wrongly? It started to argue solemnly... $3 \times 47 \dots 3 \times 4 = 12$, $3 \times 7 = 21$, 1221. That's right.

...

[Unscientific Beast Taming](#)

Chapter 1229: Dragon Palace Rebellion (1)

In the inner world of the Son of the Stars, Little Purple, there were three otherworldly islands in the Star Continent.

It was called Turtle Island, Snake Island, and Cat Island.

Shi Yu's three clones were trainers. They were respectively on the island, accompanying Turtle, Little Quas Snake, and Shorty to train their Resistance.

His main body was working overtime in the outside world. As he added points to Little Purple, he meditated and cultivated.

At the moment, the star world in Little Purple's body was developing pretty well. Although Shi Yu didn't understand in detail, he also knew that a monarch-level life form and several commander-level life forms had already been born inside.

As Little Purple broke through, the native lives of the Star Continent obtained many benefits.

However, what was more speechless was that high-level lives were all wild beasts. Not long after the cultivation era began in Little Zi's body, the evolution speed of wild beasts began to far exceed that of humans.

Although humans could also cultivate the power of totems and strengthen themselves, the strongest at the moment had yet to exceed the transcendent level. Just like the humans on Blue Planet, compared to transcendent lives, their battle power was very weak. They just had some insignificant special abilities.

This made Shi Yu feel that there was something wrong with the laws of the universe. Why was it so targeted at humans? This was even the result of Little Zi taking extra care of humans.

Otherwise, humans would probably have long been destroyed by transcendent beasts.

Shi Yu also felt that this couldn't continue, so he got Little Purple to change the cultivation system of humans. It was still that humans could sign a contract with transcendent lives. Moreover, the growth of transcendent lives could feedback to human Stats and accelerate human cultivation speed.

This way, the growth of the humans in the Star Continent might be smoother.

...

While Shi Yu was working overtime, Shi Yu's other pets were not idle either.

In the second Beast Taming Space, Little Ji and Duckie gathered together and played Gomoku to determine the winner.

In the Beast Taming Space, there was not allowed to be too much commotion. As time passed, the martial arts battle could only become a literary battle.

In any case, it was equivalent to training their intelligence. Little Ji and Duckie felt that it wasn't a waste of time.

This situation also happened on Team One's side.

Ling was obsessed with research and Susu received inheritance. Chi Tong pulled Buggy to film a historical movie and let Qi comment as an audience. Baby Ginseng farmed, and Eleven slept...

It finally didn't look that complicated. What everyone did basically had nothing to do with training, apart from Susu running away secretly and chasing after Chi Tong.

During this period, Shi Yu and Buggy's [Time Traveler] account finally updated one after another.

For example, once "Emperor Wu Legendary" and "Empress Legendary" were released, they exploded on the Internet and finally lifted the veil of lost history.

"As expected of the strongest archeologist."

Elder Gu of Bureau 11, who had explored the Mythical Ruins, sat in the garden with President Lin. As he drank tea, he watched the videos Shi Yu had updated.

At this moment, Gulao, who had lost contact with the outside world for six years, was already completely convinced. He knew that this newbie from Bureau 11 was extraordinary.

Although he still felt like he had left reality, with the truth in front of him, he had to admit that the current Shi Yu was the strongest archeologist, the strongest Legendary on Blue Planet...

"The ice dragon of the Emperor Shi Dynasty was awakened by him."

"He resolved the great enemy of Emperor Wu Dynasty, Yun An."

"It was also the one who dealt with the source of disaster left behind by the empress dynasty, the Undying Dark Phoenix."

"Now, the connections of the five dynasties of Dong Huang can almost be pieced together."

"I really didn't expect that the strongest Beast Tamer today would actually be a new archeologist." Gu Yun still sighed.

"Is this the so-called evolution era under the revival of laws? I really don't know if more strange geniuses will appear in the future."

"It's probably very difficult," President Lin said. "I feel that Shi Yu's aptitude has already exceeded the restrictions of Blue Planet. Probably only the vast universe starry sky can find a genius who can compete with him."

"For example, my great-grandfather, Lin Feng. Who would have thought that he had already broken through to the divine level and started to wander the starry sky of the universe?" President Lin Xiao smiled.

"I wonder how he will feel if he knows that Dong Huang has a Beast Tamer more talented than him."

"Space Emperor, the confirmation of Lin Feng's Legendary traces is indeed very shocking. However, can Teacher Owl's premonition really be taken seriously?"

At this moment, President Lin had already learned Shi Yu's premonition results from the Prediction Owl.

This outcome was undoubtedly shocking. However, considering the uncertainty of the premonition, everyone couldn't be happy too early.

Elder Gu had this doubt. Of course, he looked forward to it being true more. This way, he might have a chance to see those Legendary ancients in the future.

"This is what we're going to discuss in the next meeting," President Lin said. He had already decided to hold the highest meeting to discuss the owl prophecy and study how to contact Lin Feng and the others.

If this premonition result was correct, then Dong Huang's development of technology to explore the starry sky was undoubtedly the right path.

President Lin put down his teacup and was just about to get up when his expression suddenly changed.

He had just received the news.

Intense energy fluctuations continued to appear in the East Sea.

"Something happened in Dragon Palace City," President Lin said. Beside him, Elder Gu was also shocked.

Dragon Palace City.

Although they were allies with Dong Huang, one was a totem faction, the other was a human faction, the other was far away in the Deep Sea Mystic Realm, and the other was on land. Apart from some important things, the connection wasn't that close.

Unscientific Beast Taming

Chapter 1230: Dragon Palace Rebellion (2)

Generally speaking, both parties had their own operating systems and rarely interfered.

But this time, President Lin looked in the direction of the East Sea solemnly...

A demigod-level dispute?

Before President Lin could ask for more information, a familiar voice suddenly sounded in his heart.

His special contact information with Great-grandfather Lin Feng's second team pet...

At the same time, a miserable and heavily injured figure had already arrived.

"Senior Sea Dragon King."

"What happened?"

Seeing this figure, President Lin was slightly shocked. He looked at its injuries and quickly asked what had happened.

"Little Lin." The Sea Dragon King shrunk to a form of more than ten meters. After arriving in a very weak Enfeeble state, it immediately looked at President Lin.

It was Lin Feng's second team pet. During its growth stage, President Lin had received a lot of care from it, so it could naturally be called Little Lin.

The Sea Dragon King said, "In the Dragon Palace's coup, three dragon gods of the Mythical Era revived from the Dragon God Ruins."

"Moreover, they want to snatch Dragon Palace City!"

"What?!" President Lin was shocked.

After the revival of the laws, many Mythical creatures revived. As the inheritance of the Mythical Era, theoretically speaking, there would definitely be gods revived.

Initially, President Lin was still thinking that at that time, Dong Huang's allies could expand further.

Unexpectedly, he directly heard the news of the Dragon Palace's coup from the Sea Dragon King.

The Sea Dragon King panted and said solemnly, "The three revived gods are all pursuers of the Ancestral Dragon. They were once generals under the top-notch Divine Ancestral Dragon."

"Dragon Palace City is an inheritance left behind by the dragon race. They're very dissatisfied with the change in faith in Dragon Palace City."

"All the sources originated from Dragon Palace City. Some areas changed to the faith of the Green Dragon. They think that the Green Dragon and the Ancestral Dragon being put together is blasphemy.

"The three revival gods casually destroyed the things related to the Green Dragon, causing an internal dispute in Dragon Palace City. Lord Dragon God was forced to abdicate, and Lord Dragon God was unwilling, so the two parties fought."

"However, Lord Dragon God is one against three and can't resist well at all. She's not their match. The two parties are still in a confrontation."

"Fortunately, the three gods shouldn't be willing to have a big battle in Dragon Palace City and destroy the mystic realm, so it's only a small-scale collision at the moment."

"Ridiculous." After President Lin heard that, his anger burned. But soon, it was as if a basin of cold water had been splashed on him. This was because Dragon Palace City was indeed an inheritance faction of the Mythical Dragon Race, and the faith of the Green Dragon was derived later.

Now that the original owner had returned, it was also within expectations to reorganize Dragon Palace City.

However, President Lin still found it difficult to accept.

"What has it got to do with the Green Dragon? The Mythical Era has already ended for so long. The Green Dragon Legendary has long gone deep into Dragon Palace City. The faith of the Green Dragon has already spread throughout the world. Many generations of the Ancient Dragon God Dynasty's Green Dragon have evolved."

The sword of the previous dynasty was here to kill the officials of this dynasty?

"We also advised Lord Dragon God to admit defeat first, but she refused." The Sea Dragon King had a bitter expression.

"Therefore, I can only come and ask Dong Huang for help."

"After all, a portion of the Green Dragon faith in Dragon Palace City is Shi Yu. He's currently the greatest beneficiary of the Green Dragon faith. Perhaps he still has to come out and help."

President Lin felt a headache.

This matter was indeed not easy to deal with.

After this generation's Dragon God succeeded the throne, the faith in the Green Dragon in Dragon Palace City had indeed relaxed a lot.

It was mainly because the Dragon Emperor had also cultivated a green dragon, and the Dragon God had also participated.

Therefore, the Dragon God had far more feelings for the faith of the Green Dragon than the faith of the Ancestral Dragon.

In addition, Shi Yu had also cultivated a green dragon. It was not too difficult to let the Dragon God watch them destroy the green dragon in Dragon Palace City.

Gu Yun said solemnly, "We can't give up Dragon Palace City."

"I know. I'll contact Shi Yu immediately."

"Perhaps only Shi Yu can solve this matter," President Lin said.

Not only was Shi Yu an envoy of the World Tree, but he was also Dong Huang's strongest battle power at the moment.

The opponent was three demigods. At the moment, Divine Source Legendary was sleeping. With the gem cat not good at battle, only Shi Yu could reinforce the Dragon God and see if he could rely on his identity as the World Tree Envoy to cool down the anger of the three Mythical Era divine dragons.

The Sea Dragon King said, "Tell Shi Yu to be careful. A god that has been suppressed to the strength of a demigod is far stronger than ordinary demigods on Blue Planet. It's very difficult for Lord Dragon God to fight one alone..."

"Moreover, there are still three opponents. It can be said that every one of them has battle power above Yun An."

President Lin felt a headache.

But in the next moment, he felt an even greater headache.

"I can't contact Shi Yu again. I can't contact him in any way!!!"

"Where did this kid go at such a critical moment?"

Elder Gu and the Sea Dragon King were stunned.

"I'll contact Teacher Ying first and let her find it." President Lin was numb.

...

At this moment, the Shi Yu Dong Huang was searching for was training in the starry sky.

It was easy to get sick from holding it in in one place all the time.

Shi Yu would occasionally cultivate bitterly in Ping Cheng and occasionally go to other places to change his mood.

After a round of cultivation, Shi Yu's realm quickly increased.

Not long ago, his second Beast Taming Space had reached level eight.

After the second Beast Taming Space broke through to level eight, Shi Yu immediately received powerful feedback, and his physical fitness increased exponentially.

According to Ling's judgment, it was no longer a problem for Shi Yu to contract another demigod.

As for this new demigod, Shi Yu planned to join the team according to what he had said previously and chose Buggy.
