

Beast 141

Chapter 141: Ice Dragon Snow Mountain

The power of the electromagnetic cannon was even stronger than the profundities of the Thunder Armor.

This was because the Thunder Armor profundity required it to cover the hardened substance all over the body and form a protective layer. It was mainly defense and speed.

On the other hand, the Electromagnetic Cannon compressed the power of the metal element and the thunder element into a hardening-created ball and accelerated the launch to detonate. The result was destruction with both power and speed!

At this moment, after witnessing the power of the electromagnetic cannon, Buggy swallowed its saliva. It felt that the ice dragon it transformed into might not be able to withstand a single blow and would be blown up instantly!

What the hell?!

Eleven: <(T) <

“Wuu!”

Come on, come on!

Avoiding battle was bad behavior.

“You’ve challenged me so many times in the past two days, but I’ve never rejected you!” Eleven thought.

“Don’t be in a hurry to fight.”

Seeing Eleven excitedly initiate a battle with Worm, Shi Yu hurriedly said, “Let’s perfect the technique first.”

Shi Yu had saved Buggy’s life, making Buggy turn around with lingering fear.

Buggy suspected that Eleven was holding a grudge.

In the past two days, it had relied on the advantage of having many skills to challenge Eleven continuously and even fought back and forth. It might have annoyed Eleven...

“Huh?” Eleven looked at Shi Yu.

“Wuu!”

Eleven nodded obediently.

Alright, then they would fight another day.

Training, training!

Full Level Hardening was the same as full Level Worm Silk. As Eleven's control over this skill had reached an insane level, Hardening also extended many high-level usage methods worth training.

For example, after the hardening substance left the body, the duration was longer.

After Eleven made contact with Shi Yu and applied a layer of hardening armor on him, even if the two parties separated, Shi Yu's hardening armor would not immediately disappear. Instead, it would be maintained for a period of time according to Eleven's consumption.

In other words, even if Shi Yu didn't ride Eleven, as long as he armed himself with a layer of hardening in advance... it wouldn't be a problem for him to fight an ordinary transcendent-level ferocious beast alone.

This greatly enhanced Shi Yu's life-saving abilities and opportunities to show off.

Apart from that, it was only natural for Eleven to create hardening balls with the nature of metal just now.

With Eleven's current proficiency in hardening, it could even control this hardening ball that had left its body. It spun at a high speed, allowing the hardening ball to turn into an even stronger tearing force!

This was also why even though Buggy had learned a bunch of proficient expert level spatial skills and even perfect high-level dual-element skills, it still couldn't defeat Eleven.

Of course, the greater reason was that Eleven had upgraded its racial skill. Its racial skill proficiency had increased, leading to Eleven's growth. Its physical fitness might not be inferior to the overlord race's dragons at this moment.

"Thunder Palm, Hardening, and supervision, these three skills can't be separated."

"Next, try to integrate your supervision. This way, you can lock onto the target more accurately and let the electromagnetic cannon hit 100%."

"Your current profundity can only be considered an electromagnetic cannon. When the time comes, it will be a super electromagnetic cannon," Shi Yu sutured.

Well, a certain unscientific super electromagnetic cannon.

The hardening ball, which had compressed a huge amount of metal-element energy and thunder-element energy, was locked onto by super vision and shot out with electromagnetic acceleration. The final power might be able to heavily injure a commander-level creature...

Now, Eleven was getting closer and closer to being invincible in its level range.

Unfortunately, there were no longer any young divine beast cubs in this world that could be compared to it.

As for Buggy, even if it did not use the Ice Dragon Whiskers, it would not lose to some cubs of monarch races who had mastered super-level skills. It was also not bad.

As for the baby ginseng, the future was bright.

“Wuuu!!!”

After Shi Yu finished speaking, Eleven raised its hand excitedly. Train!

The next goal was the super electromagnetic cannon!

On the other hand, Buggy and Baby Ginseng had looks of envy.

Attack-type combination profundity

Although Buggy had a bunch of skills, right now, there weren't any profundity skills that had real combat value.

This was also one of the reasons why it couldn't defeat Eleven.

As for the Ginseng Baby, its combination skill was purely to make the effect of its supplement better...

“Ji!” Buggy looked up at the sky and sighed.

Ahhh, after the hardening and absorption of the special property, the leader became stronger again. It couldn't fight anymore, and the gap widened again.

Damn it.

It looked at Baby Ginseng and wondered if it could defeat its leader by teaming up with it.

There was another reason why it lost to Eleven. It was restricted by the Green Silkworm Race and had too little physical strength.

For a species like the Green Silkworm, the physique of bears like the Iron-Eating Beast was too much.

But with the support of the ginseng baby, the disadvantages of physical fitness would directly disappear, and even become an advantage...

“Yi?” Baby Ginseng looked at Buggy innocently. What's wrong?

At this moment, Buggy was thinking.

He and his leader were the “Wuji Airlines” combination, so teaming up with Baby Ginseng would be very impressive...

After Buggy let out a cry, it instantly fell silent.

“Yiji” combination...

...

After handing the Flat Thunder Rocks to Eleven and arranging training missions for them, Shi Yu began to quietly meditate and strive to level up as soon as possible.

He stopped adding points because tomorrow was the day to explore the Ice Dragon Ruins.

This time, there were four master-level Beast Tamers protecting him.

Apart from the main mission, Shi Yu also wanted to see if he could encounter a side mission.

He wanted to fight a few commander-level ferocious beasts on the way.

To look at the difference in battle power between Eleven, Buggy, and a commander-level ferocious beast.

If it was the difference in energy, Eleven and Buggy definitely hadn't surpassed it.

Even if it was a commander-level ferocious beast of a low-level transcendent race, after reaching the commander level, its energy value would be at least five digits, exceeding ten thousand.

Back then, when Eleven participated in the vocation assessment, its energy level was only slightly more than three thousand.

At the moment, although Eleven felt that its energy level had at least doubled, it should still be much weaker than a commander-level creature.

However, energy points did not represent battle power.

Eleven, who had mastered a bunch of profundities... Even if its energy value was inferior, its use of energy was good. It should still have the ability to fight a commander-level creature.

Generally speaking, the energy level of transcendent cubs of overlord races was above 6,000.

Currently, after Eleven used his supervision to make a rough judgment, its energy value should be above 7,000 when compared to the test.

If it encountered that Zonyan Rock Beast again, it could defeat it with a single punch.

The energy value of Buggy was more than 3,000.

As for the energy value of the ginseng baby, Eleven judged it to be around 7,000 with his super vision.

This was purely because the Ginseng Baby race had a lot of HP and MP, low attack, low defense, and low speed.

At this moment, Shi Yu was very curious about how much energy these three pets could gain after they grew to commander rank.

It didn't mean that a pet was commander level just because it had over ten thousand energy points.

Instead, when a pet reached the commander level during its growth stage, its energy level would definitely reach 10,000 and it would have magical abilities such as creating energy crystals.

From the transcendent level to the commander level, it was a process of growth, development, and awakening. It was commonly known as "minor evolution". It directly erupted the heritage and foundation of the pets. Some pets at the transcendent level might have an energy value of 3,000, but after breaking through to the commander level, it might directly increase by four or five times.

Similarly, after Eleven, Buggy, and Ginseng Baby broke through to the commander rank, with their current energy points as the foundation, their energy points would also increase explosively.

To put it bluntly, the growth level was a process that relied on external nutrition, battle training, accumulation, and specific opportunities to constantly increase the strength of the body, vitality, and energy intensity, approaching and breaking through the limits of the race.

Therefore, during this process, the higher the species level, the easier it was to increase. There would be no bottlenecks. As for transcendent species like Eleven and Worm, although their energy levels and skill proficiency were off the charts, due to the limitations of their race, it was still relatively difficult to break through. They needed to accumulate more time.

Only by reaching a certain point could they successfully break through.

According to Shi Yu's understanding, Lin Hongnian's Iron-eating Beast had been stuck at the transcendent level for ten years.

The opportunity for a breakthrough was a wild battle. The iron-eating beast was on the verge of death, its life hanging by a thread. It purely relied on the contract to not die directly.

After that, the Iron-eating Beast underwent a month of treatment. Using its extreme near death as an opportunity, it successfully broke through its species limit and grew to commander rank.

At that time, the energy, combat power, and racial skill proficiency of that Iron-eating Beast definitely weren't as high as the current Eleven. Therefore, this so-called opportunity made Shi Yu very conflicted.

But it didn't matter if there was no opportunity. With Eleven's current state, it wasn't impossible for him to break through when the conditions were right.

If it really didn't work, the so-called bottleneck would disappear after evolution.

It was also because of the evolution that Hall Master Lin's Iron-eating Beast broke through to the monarch level.

"Generally speaking, only a level-four Beast Taming Space can control commander-level pets and provide the nutrients they need to grow."

"I feel that before Eleven breaks through and evolves, my Beast Taming Space might not necessarily reach level four."

This was also what made Shi Yu conflicted.

"Forget it, it's alright. In any case, even if the Beast Taming Space doesn't have the binding power, Eleven can't break free from the contract. Moreover, as long as the absolute sleep level is high, their own absorption efficiency of nutrition will increase. The second and third-level Beast Taming Space can still maintain their training and growth."

Shi Yu planned to buy nutritional supplements, also known as a way to bypass paywalls, to increase the proficiency of the Absolute Sleep skill, which was similar to the effect of the Beast Taming Space. It was to reduce the pet's need for the Beast Taming Space level.

This way, after school started, he could immediately arrange for Eleven and Worm to evolve. Shi Yu was an impatient person and did not plan to wait for the Beast Taming Space to increase to level four. Why would he wait?! Level three was already not bad!

“Meditate!”

...

The next morning.

After Shi Yu finished eating breakfast, he called Eleven, Buggy, and Baby Ginseng out.

At this moment, Shi Yu had already put on the level-five cold-proof coat provided by the Ping Cheng Association.

The core material of this blue cold-proof suit was made from the monarch race’s ice-element ferocious beast, Snow Night Demon, supplemented with various cold-resistant insect silk. It had very good resistance to cold. With Shi Yu’s current physique, wearing this would allow him to withstand the coldest place on the snow mountain.

“Come here.”

After putting on the cold clothes and bringing the props, Shi Yu summoned his three pets.

“Wuu! (Exploration! Battle! Battle!)”

“Ji! (Ice Dragon! Ice Dragon!)”

“Yi! (Can we not go? I’m afraid of the cold.)”

Eleven climbed onto Shi Yu’s left shoulder, while Buggy climbed onto Shi Yu’s right shoulder. Baby Ginseng crawled into Shi Yu’s pocket with a forced expression.

“Let’s go!”

With three pets with him, this sense of security made Shi Yu sigh.

When he came out, a car had already stopped at the entrance of the villa area. Shi Yu took a look at the car number and directly opened the door to get in.

The driver’s seat was occupied by President Feng’s beautiful female secretary.

Shi Yu was slightly silent. This ten-thousand-year-old bachelor, Old Feng... Didn’t he look for a wife? Why was he always inseparable from his beautiful female secretary?

How could that be?

In the front passenger seat was President Feng. In the back seat, apart from Shi Yu who had just come up, Hall Master Lin was in the car already.

“Uncle Feng, Uncle Lin.”

After getting into the car, Shi Yu greeted each of them.

President Feng and Hall Master Lin smiled and said, “Shi Yu, you look pretty energetic today.”

In the past few days when Shi Yu had been living in seclusion, President Feng and Hall Master Lin had come to the villa to visit.

At that time, Shi Yu was in the midst of his refreshment period, so his complexion was naturally not very good.

As for now, how could he not look good after resting for a day...

"I'm good, I'm good..." Shi Yu smiled.

"Well... Where's Dr. Lu?" Lin Hongnian looked at Shi Yu and asked.

"Yeah, where's Dr. Lu?" President Feng also said in anticipation.

At that moment, they naturally knew that Lu Qingyi would follow them to explore the Ice Dragon Ruins.

Lu Qingyi was one of the few archeological big shots who was willing to explore the Ice Dragon Ruins. The Masters in Icefield City were very familiar with her. At the moment, Lu Qingyi and Shi Yu were jointly exploring the Ice Dragon Ruins. President Feng and the others had very high expectations.

"Senior Lu said she will directly arrive outside the snow mountain. Let's go over first," said Shi Yu.

"Alright! Old He and the others are also stationed by the snow mountain. Then drive. Let's go and find them." President Feng nodded and said to his secretary.

Right on the heels of that, this car that was carrying two master-level Beast Tamers and a newbie professional Beast Tamer drove directly to Ice Dragon Snow Mountain!

At the edge of the snow mountain.

A bunch of Beast Tamers who breathed cold air would enter the snow mountain from time to time and come out of the snow mountain, entering the camp outside the city wall.

Against the background of the white snow mountain, the living environment of the soldiers stationed outside the nearby city wall appeared especially arduous.

These soldiers of the Beast Tamer Corps had to clean up the ferocious beasts that came to the edge of the snow mountain every day and were in charge of reconnaissance and patrolling.

On the high wall, Lu Qingyi, who was wearing a white research suit, stared at the soldiers training below as if she was recalling something. Beside her was a huge Green Spirit Wind Bird that looked like a blue Phoenix!

"Have we arrived?" After a long time, Lu Qingyi shifted her gaze and looked at Shi Yu, Lin Hongnian, President Feng, and the vice regiment commander of the Beast Tamer Corps who came out of the car.

"Let's go over too." Lu Qingyi patted the Azure Spirit Wind Bird.

...

"Uh."

Below.

This was the first time Wang Meng, the commander of the Beast Tamer Corps in Ping Cheng, had seen Shi Yu.

Although he had already heard that there was an Ancient Capital Scholar in Ping Cheng and felt that Shi Yu was very impressive, Shi Yu's image was really difficult for him to understand.

The small iron-eating beast, green worm, baby ginseng combination... no matter how one looked at it, he didn't look like a top scholar.

"Little brother Shi Yu, awesome!!!" It was the first time the rough-looking Commander He Biao had seen Shi Yu since the last time he cracked the Ping Cheng ruins. When he saw Shi Yu, he immediately cursed. "F*ck, awesome, really awesome..."

This Beast Tamer who had grown up in the army no longer knew how to describe Shi Yu's achievements during this period of time.

"Not really, not really..." Shi Yu was embarrassed.

"The hope of the country." Commander Wang Meng praised. Then, he looked at President Feng, Hall Master Lin, and the others with a serious expression.

"According to the previous plan, I'll continue to guard the city wall. Commander He and everyone, let's head to the Ice Dragon Ruins."

"However, the Beast Tamer Corps in the city next door discovered today that there might be some abnormalities in the snow mountain."

"A monarch-level ferocious beast seems to have appeared in the path of the Ice Dragon Ruins.. Everyone, be careful!"

Chapter 142: Baby Ginseng's Attack Skill

"Monarch-level ferocious beast?!"

After Commander Wang Meng finished speaking, President Feng and Hall Master Lin were stunned.

Damn.

There were only about a dozen monarch-level ferocious beasts in the entire Ice Dragon Snow Mountain. Was it such a coincidence?

However, President Feng and Hall Master Lin weren't afraid.

"It's alright, it's just a monarch-level. It's fine if we didn't encounter it, but if we did..."

President Feng chuckled.

He had a monarch-level battle power, Deputy Commander He Biao had a monarch-level battle power, Lin Hongnian had two monarch-level battle powers, and Dr. Lu Qingyi, whose strength was similarly powerful... This monarch-level ferocious beast would also be sending itself to death if it came.

At that time, all the high-level materials in its body would be completely stripped.

Apart from Shi Yu holding them back and needing to be protected. Anyone in this team wasn't afraid of monarch-level ferocious beasts.

"What race?"

Shi Yu asked curiously.

He wasn't worried about the threat of a monarch-level ferocious beast at all. Did that beast think that all his bodyguards were hired for nothing?

He didn't care about the threat of this level of ferocious beast. Instead, he cared about the race of this level of ferocious beast.

It was purely an occupational disease.

What if the other party had some rare skill?

Generally speaking, at the monarch level, there were at least ten accompanying skills on it. It was guaranteed that it would have one super skill and one high-level skill!

If there were really rare skills, Shi Yu might even look forward to an encounter.

"I'm not sure."

"The exploration team retreated immediately after sensing the monarch-level deterrence from afar."

"However, through a rough investigation, it's suspected to be a plant-type creature," Commander Wang Meng said.

Shi Yu: "?"

"Plants?"

Holy shit.

Shi Yu's eyes lit up.

Plants, really?

Generally speaking, although plant-type pets might not necessarily have wood power, apart from a few exceptions, 95% of them still had wood power. Moreover, even if they weren't their default element, most of them would have secondary wood power skills!

Shi Yu's heart immediately stirred as he looked at Baby Ginseng.

Baby Ginseng: 0.0

He wondered if there were any skills suitable for baby ginseng...

"Plant type?" President Feng said, "It should be a new monarch."

Ten years ago, after the beast tide, Icefield City was the first to react.

After reacting, Icefield City, along with the master-level Beast Tamers from the surrounding second-level cities, directly formed a team and tackled the Ice Dragon Snow Mountain, initiating a counterattack.

That half a year-long expedition directly killed most of the Snow Mountain Monarchs.

Of course, the snow mountain was too big after all, and the environment was not suitable for human Beast Tamers to stay for long. Facing some ferocious beasts that were good at hiding in the snow, human Beast Tamers didn't have the energy to fight guerrilla battles with them at all, so there were a bunch of fish that escaped the net.

If President Feng didn't remember wrongly, these remaining monarchs didn't include plant monarchs.

Therefore, it was very likely that this was a new monarch-level ferocious beast that had broken through recently.

"That's a possibility," Commander Wang Meng said.

"Let's look for it on the way. It doesn't matter if it's a monarch or not. It's mainly to help Ping Cheng eliminate a potential danger," Shi Yu said.

President Feng, Commander He, and Hall Master Lin:???

They looked at the blushing and rather excited Shi Yu and cursed in their hearts. Are all young people so crazy?

They were there to explore the Ice Dragon Ruins, not to clear the ferocious beasts in the snow mountain.

It would have been fine if only Shi Yu was like this... But when the four masters saw this, the panda and bug on Shi Yu's left and right shoulders also had curious expressions about this monarch level monster...

Monarch-level didn't mean a monarch-level race.

One represented the growth realm, and the other represented the potential level. It was the difference between a complete adult and a growing child.

Eleven and Buggy had never seen a monarch-level battle with their own eyes.

"Yi..." Perhaps only Shi Yu's baby ginseng had a bitter look on its face. It had some idea in its heart and understood how terrifying monarch-level ferocious beasts were.

Although it had a battle dream and felt that Shi Yu, Eleven, and Buggy were very friendly, Baby Ginseng kept feeling that the three of them would cause fatal trouble sooner or later...

Before the few masters could educate Shi Yu on what a Beast Tamer should do in the wild, a black spot suddenly appeared in the sky.

Accompanied by a light cry.

Their gazes were attracted by the black dot in the sky. A moment later, a breeze lingered around, and an elegant and beautiful green Phoenix flapped its wings and landed.

On its body was a beautiful woman wearing a special battle-type research suit.

"Dr. Lu!" The four masters greeted him when they saw him.

Not only because of Lu Qingyi's status in the archeological world, but also because of her strength.

During her university days, Lu Qingyi had already reached the master level. Unlike Beast Tamers like them, whose potential had almost been exhausted, she had a chance of becoming a legend in the future.

"Hello, everyone." Lu Qingyi looked at everyone and nodded.

"When do we leave?" she asked immediately.

The few of them looked at each other. Everyone was here, they could set off at any time!

"Then, everyone, please be careful!" Commander Wang Meng said to everyone. Since it was his duty, he could only continue to guard here. He couldn't go with everyone.

"Old Wang, stay here and wait for our good news." He Biao laughed.

After saying that...

President Feng, Master Lin, and Commander He summoned their flying pets.

President Feng and Commander He's pets were both ice-element Ice Feather Birds. They were huge birds with wings like ice crystals.

[Name]: Ice Feather Bird

[Race Level]: Low-level Commander

[Level of Growth]: Commander Level

As for Master Lin, because he had a metal-element strengthening talent, his flying pet was an Ironback Dragon Eagle with weak dragon blood.

< Name > Ironback Dragon Eagle

[Race Level]: Mid-level commander

[Level of Growth]: Commander Level

Not only were the three flying pets commander races, their growth levels had also reached commander rank.

Only Lu Qingyi and Shi Yu were out of place.

[Name]: Green Spirit Wind Bird

[Race Level]: Low Class Monarch

[Level of Growth]: Monarch Level

Lu Qingyi was too strong. Not only was her Green Phoenix a monarch species, but its growth level had also reached the monarch level and it even possessed the Phoenix Bloodline. At this moment, just standing there, it made the other three flying pets feel the suppression from that bloodline.

As for Shi Yu, although he wasn't strong, he couldn't lose face. After nodding, snow lingered around him. Buggy closed its eyes and directly transformed into a frost dragon that was large enough to carry humans.

"Roar!!!" Snow and wind appeared around the three-meter-long Ice Dragon. Under its roar, the Masters were a little speechless.

Damn it.

Everyone looked at Shi Yu, who was riding the giant dragon with an expressionless face. He managed to act cool again.

Phantom Illusion was an amazing skill.

Using the weakest strength, he showed off its strongest moves.

Of course, there was a price to pay for acting cool. The other masters' pets did not consume much physical strength to carry people, and their flying speed was still fast, but for Shi Yu... he could only let the Green Silkworm exhaust itself a little.

No, it was the Green Silkworm and Ginseng Baby who would be feeling tired later...

"Let's go," Lu Qingyi said. "Before we reach the Blizzard Domain, let's accelerate."

"Alright." The masters nodded.

To go to the Ice Dragon Ruins, they would pass by a snowstorm area. The natural environment in that sky was harsh. Flying pets could not fly high and could only travel at a low altitude.

But before that, the few of them could completely rely on their flying pets to travel quickly.

The wind cut through the air.

The five of them rode on the flying pets. Under the gaze of Commander Wang Meng and the soldiers on duty who didn't understand what was going on, they widened their eyes and swallowed their saliva. Then, they suddenly erupted with high speed and flew towards the interior of the Ice Dragon Snow Mountain.

A group of flying pets looked domineering.

"Chirp ~!!!"

During this process, Lu Qingyi's Azure Spirit Wind Bird directly erupted with a monarch aura, which was also an expert-level deterrence, protecting everyone and preventing some blind flying ferocious beasts or ferocious beasts below from suddenly attacking.

Hoi

In an instant, Shi Yu and the others entered the snow mountain range.

As they went deeper, the cold wind gradually pierced into their bones.

However, Shi Yu felt that it was alright. With the protection of the cold-proof suit, Eleven's face hardened into thick skin. Did it just want to show off?

Soon, Shi Yu and the others flew to the so-called Blizzard Domain and were forced to stop.

This place was already considered to be deep into the snow mountain. The sky in front was gray. Fierce ice crystals accompanied by a storm circled in the sky, as if separating the sky from the ground and splitting the sky into pieces.

Legend had it that this harsh natural environment was caused by the war between the human tribes of Ice Dragon in Icefield City.

This was a change in the world that only occurred in the battle between overlords.

An Awakening-level creature belonged to the growth stage. Its energy was loose like smoke, and its unique point was that it had many growth stages.

Transcendent-level creatures had already broken free from their mortal bodies. Their energy was as dense as water, and their skills could already cause greater destruction.

A commander level creature's energy was flawless like crystal. It had the ability to create energy crystals, and with this, it was a powerful race.

Monarch level creatures, on the other hand, had their spirit and will materialize into aura. 100% of them had awakened their deterrence and could intimidate others. Top-level monarch-level creatures could even affect the real world with their mood.

As for overlord-level creatures, they had just come into contact with natural power. The aftershocks of their battles could almost permanently change the natural environment of an area.

Some historians judged that the entire ice and snow environment in Icefield City might have been caused by the Little Ice Age triggered by the frost dragons. The snow mountains of the ice dragons with harsh natural environments were most likely affected by the battle of the ice dragons.

Everyone was a master-level Beast Tamer and didn't have the ability to resist the power of nature. After arriving in this area, they landed obediently. Compared to the sky, although the environment of the icy plain below was also harsh, the intensity of the snowstorm was countless times weaker. It was relatively easy to overcome.

"Next, we have to fly for at least an hour to leave the snowstorm area."

"How do you feel?"

After coming down, Lu Qingyi looked at Shi Yu.

Even if he was wearing a level-five cold-proof suit, with Shi Yu's professional physique, it would definitely be a little difficult.

"The air is so fresh." Shi Yu sighed. The cold air felt so good.

On Earth, Shi Yu preferred winter over summer.

Everyone: “?”

“Hahahaha, good boy, your health is pretty good,” Commander He Biao laughed.

“Looks weak, but he’s actually not?” Master Lin and President Feng said to themselves. They revealed envious looks. It was good to be young, unlike them, who were old...

“...Let’s continue on our way,” Lu Qingyi said.

Just because they landed didn’t mean that they couldn’t fly anymore, but simply because they chose to fly at a low altitude.

If it were other low-level Beast Tamers, the downside of flying at a low altitude was that they were more likely to encounter ferocious beasts.

However, Shi Yu’s team had a monarch-level pet to deter them as they traveled. On the way, they basically didn’t encounter any dumb ferocious beasts.

After all, those who felt threatened and didn’t run were either strong or stupid.

At this moment, as they flew, Eleven looked at Lu Qingyi aggrievedly.

Its gaze was like that of a resentful little wife, making Lu Qingyi shiver all over.

Even the bug with its eyes closed made the Ice Dragon Phantom look at Lu Qingyi with resentment...

“What’s wrong with your two pets? Why are they staring at me?” Lu Qingyi’s face was speechless.

What kind of gaze was that?

“Uh,” Lu Qingyi said. The other masters immediately realized that Eleven, who was on Shi Yu’s shoulder, was looking at Lu Qingyi pitifully, as if Lu Qingyi had snatched its bamboo shoots.

“Cough.”

Shi Yu said, “Because Eleven and Buggy have been looking forward to exploring the snow mountain for a long time. They still want to encounter a few commander-level ferocious beasts and have a good fight... Now, because of the deterrence... Not to mention commander-level creatures, they can’t even see any creatures.”

“Sob!” Eleven nodded. This exploration was so lonely.

The Green Phoenix :”...”

Then I’ll leave?

“But this is pretty good, pretty good,” Shi Yu said.

Business was more important! They could fight anytime!

“Good lord.”

The few masters exclaimed and looked at Eleven. This Iron-eating Beast was indeed abnormal.

It was one thing not to feel sleepy in such a cold place, but it actually wanted to fight? Moreover, it wanted to fight a commander-level ferocious beast?

Even if it was field training, it didn't have this kind of training method... This young Iron-eating Beast hadn't experienced the brutal beating in the wild, right?!

"It's not impossible." Lu Qingyi glanced at Eleven and said slowly.

It was rare for so many master-level Beast Tamers to accompany Shi Yu. It was also a good choice to take this opportunity to train Shi Yu.

After all, such an opportunity was too rare.

As soon as she finished speaking, the phoenix quickly put away its might.

"Wu!!" Eleven looked at Lu Qingyi excitedly. Good woman! I acknowledge you!

Hall Master Lin, President Feng, Commander He, and the other masters also smiled.

They did whatever they wanted.

Indeed, without the deterrence of the phoenix, the five people immediately discovered a pile of ferocious beasts in this harsh environment's icy plain.

"Aowu ~ ~ ~ ~"

"Aowu ~ ~ ~ ~"

As they approached the edge of the mountain, a voice that made one's heart tremble sounded. Accompanied by wolf howls, a group of giant wolves stood on the icy plain, staring at Shi Yu and the others with blue eyes. They even bared their fangs and emitted a cold aura.

There were a total of 20 to 30 snow wolves.

In the lead was an even larger wolf king nearly four meters long. Its expression was even more ferocious.

A commander rank snow wolf and dozens of transcendent rank snow wolves. This was a pack of snow wolves foraging!

In the past, this group of snow wolves would have long charged forward when they saw their prey.

But now, staring at the group in front of them, the snow wolves didn't have the urge to hunt. They only had the thought of quickly avoiding them.

It couldn't be helped. Even without deterrence, the combination of the Green Phoenix, Ice Feather Bird, and Ironback Dragon Eagle also gave them too much pressure.

Besides, there was also a frost dragon that looked like it wasn't to be trifled with... Many snow wolves looked at Shi Yu and the ice dragon worm with fear.

At the moment, the snow wolf leader did not give the order to retreat immediately because of his ego.

"They're here." Upon discovering the wolf pack, the masters looked at Shi Yu.

It was his turn to perform before they ran.

None of the masters believed that the transcendent-level snow wolf could pose a threat to Eleven. After all, Shi Yu had killed indiscriminately in the survival trial.

But the problem was that commander rank snow wolf.

A ferocious beast that could break through the limits of its race and become the leader of a race in a natural environment was definitely not simple. It had definitely experienced countless life and death situations and had huge opportunities to obtain its current strength.

“You guys have probably never fought a commander-level ferocious beast, right?”

Master Lin Hongnian said, “Commander-level snow wolf... In theory, its energy level is more than four times that of your Iron-eating Beast.”

Master Lin used the energy value during the assessment as the standard.

With such a huge energy difference, even if the proficiency of Eleven’s skills was ridiculously high, it wasn’t that easy to fight.

At that time, with Eleven’s Lightning Armor profundity, the Snow Wolf Leader might be able to slap back with an Ice Rending Claw.

“Don’t be afraid. Go. See how powerful a commander-level ferocious beast is.”

He Biao said, “With us here, don’t worry and let the iron-eating beast go.”

“Alright.”

Shi Yu nodded. In the next moment, Eleven jumped down excitedly. Then, it kept enlarging and became more than a meter tall as it walked towards the snow wolves.

“Wuu!! (I’m here!)” Eleven stepped forward.

“Roar!!!! ~!” With the lead of the snow wolves, the snow wolves bared their teeth and growled, warning this seemingly weak little metal-eating beast.

They clearly didn’t want to fight directly.

“These snow wolves... don’t seem to have much battle intent,” President Feng said with a chuckle.

“Mm.” Lu Qingyi activated her glasses index silently. A dense pile of numbers appeared in front of her glasses and started to observe the situation of that snow wolf commander.

1... 33... 2... 9...

Energy Points... 13329!

It had an additional 10,000 energy points than the Little Iron Eating Beast!

Lu Qingyi was curious about how far Shi Yu’s Iron-eating Beast could fight with its skill proficiency in the face of such a huge difference. She originally thought so, but in the next second, Lu Qingyi’s expression changed.

That was because she had also accidentally detected Eleven's energy level.

The numbers on it made her doubt life.

It wasn't the 3,000+ points during the vocation assessment.

Instead, it was displayed at this moment, "7596"!

How was that possible!

Lu Qingyi's expression was incredulous, and she even suspected that the index was broken.

However, the other snow wolves had less than a thousand energy points, so it was very normal for them to remind Lu Qingyi that the index wasn't broken.

She took a deep breath and quickly looked at the Green silkworm. Its energy level was 3045...

It was similarly ridiculous!!

"..." What exactly had Shi Yu experienced these ten days...

At this moment, Lu Qingyi's expression had already changed slightly. The other three Masters were still laughing and joking, planning to see Shi Yu, this newly advanced genius Beast Tamer, suffer a loss. The gap between transcendent and commander rank... was still very huge.

So big...

Everyone was stunned. They saw that the snow wolf had no intention of fighting. Eleven simply stopped and stretched out its short and fat arm, aiming its palm at the snow wolf commander.

Eh?

What was this?

The few of them knew Shi Yu's Iron-eating Beast's battle style. Among them, there was no opening move to aim your palm at the enemy!

"Wuu!" At this moment, Eleven's super vision had already locked onto the snow wolf commander perfectly.

Buzz!

The next moment, its entire arm hardened into metal.

Crack!

Right on the heels of that, a strong electric arc appeared on Eleven's hardened arm and wrapped around it, producing a violent sound and shooting out dazzling electric light!

The black hardening substance and the blue lightning intertwined, making Eleven's entire arm look extremely beautiful.

"Old Lin, what are they doing?"

President Feng and Commander He asked Lin Hongnian, the Iron-eating Beast Master.

Lin Hongnian: "The combination of Hardening and Thunder Palm... But, I don't know this starting posture."

Under normal circumstances, shouldn't it harden the whole body and then use the Thunder Palm to stimulate the cell activity in the whole body to bring about a super explosive speed, piercing through the enemy in one hit?

What do you mean by standing here and pointing your palm at the enemy?

Master Lin Hongnian was confused.

The next moment, the three masters were stunned again.

As Eleven's entire arm shone, a black ball wrapped in strong blue lightning suddenly condensed in its palm!

Transcendent Hardening, Release of Hardened Material!

However, the three of them still didn't understand what Shi Yu and Eleven wanted to do.

"...What's this???"

In the next second, Lin Hongnian's expression suddenly changed. That was because the black ball wrapped in lightning actually started to spin irregularly at an extremely fast speed. The lightning lingered around, as if it had formed a small lightning typhoon, emitting strong hissing sounds!

Lin Hongnian was stunned. After releasing the hardened substance, it could still spin like a windmill?

Boom!!

Then, a scene that made the three Masters widen their eyes and reveal shocked expressions appeared. As Little Eleven's gaze focused, the ball that was wrapped in lightning and rotating crazily turned into a blazing blue light beam with a bang. It shot out suddenly. The speed of the light beam was extremely fast, and its destructive power was extreme. Its sound of breaking through the air was like the roar of thunder, shocking everyone.

On the other hand, although the Snow Wolf Commander was completely focused the entire time, when the blue light beam blasted over, it only felt that its vision couldn't keep up with the speed of this attack at all. Its body trembled to the extreme!

"Wuu!!!!!"

When it reacted, it felt as if its entire body was about to be penetrated and ripped apart. Accompanied by a wave of intense pain, the Snow Wolf commander let out an intense and miserable howl!!

Right on the heels of that, it was sent flying more than ten meters away by the light beam it came into contact with. It directly hit the middle of the mountain and instantly shattered the mountain!

At that instant, the entire wolf pack looked at the commander who flew backward and was shocked in their hearts. Their ferocious expressions turned to explosive as they fled like birds startled by the twang of a bow. In the mountain, the heavily injured Snow Wolf commander sensed the huge injuries on his

body and ignored the fact that the injuries were still bleeding. Its heart was filled with extreme horror as it directly sealed the injuries. It also turned around and ran with its pack in a panic!

Damn, a monster.

“Aowu!!!!”

In an instant, the wolf pack disappeared without a trace, leaving Eleven, who was staring at his palm in a daze and feeling confident.

And a few master-level Beast Tamers with their mouths wide open and blank expressions.

“It ran away just like that?” On the Ice Dragon, Shi Yu muttered to himself. Why couldn’t it fight back?

This was commander rank?

Or was the snow wolf race too weak?

Perhaps a pet like the Zonyan Rock Beast would only have reference value after it reached the commander rank.

“Um...” Shi Yu looked at everyone.

Everyone, including Lu Qingyi, looked at him as if they had seen a ghost.

Shi Yu felt a little embarrassed again.

“Although this snow wolf’s growth level is pretty high, its race is too weak. We have to find someone average...” he suggested.

“Holy shit.” Commander He widened his eyes.

President Feng was at a loss for words.

Lin Hongnian: Aba Aba Aba Aba...

Hall Master Lin’s expression was stunned. This, what the f*ck was this!!!

You Iron-eating Beast! Something was wrong!!

During the vocation assessment, it was already very unscientific. Now, what is this? Tell them, what was this?

Why did the hardened substance turn and fly out with a whoosh, producing such a huge destructive force?

Do tell! Do tell!!

Hall Master Lin: w(◦Д◦)w

“The increase in strength of your pet...” Lu Qingyi took a deep breath and looked at Shi Yu.

Wasn’t it a little ridiculous?

Could it be that this Iron-eating Beast had also obtained some divine level bloodline, just like her pet?

“What’s this?!!!” Even if Hall Master Lin was a very serious person, at this moment, he couldn’t help but cry out loud. Why did he feel that his Nine Li War Beast wasn’t as cool as his Little Iron Eating Beast...

Shi Yu: “The profundity skill of Hardening and Thunder Palm, Electromagnetic Cannon... Uh, I think there’s a skill in the Mechanic class called Electromagnetic Cannon. I can change the profundity name later.”

It was time for the difficult naming segment again... It was not easy to name stuff. Shi Yu sighed.

Hardening and Thunder Palm profundities?

Hall Master Lin was stunned. You call this a combination of low-level skills and mid-level skills?

Commander He and President Feng didn’t understand either. They hadn’t seen Hall Master Lin’s Iron-eating Beast have such a ridiculous profundity skill before!

“Wait a minute.” Lu Qingyi suddenly interrupted everyone and looked into the distance with the Green Phoenix.

“It seems like a heavyweight was attracted over because of the commotion...”

“Monarch-level creature...”

Holy shit.

As soon as Lu Qingyi finished speaking, the masters were shocked. Before they set off, Commander Wang Meng had just reminded them... They had really encountered it??

The few of them instantly became serious and entered battle mode.

Beside him, Shi Yu’s expression also lit up. “A monarch-level creature really appeared? I like it!”

Everyone: “?”

“Holy shit, don’t tell me you want to practice this?” Commander He shouted.

This boy... Something was wrong!

Commander He was very afraid that Shi Yu’s Green silkworm could directly instakill this monarch-level ferocious beast with some worm silk later. At that time, he was sure that he would definitely find an ice brick to kill himself and leave Planet Blue.

Shi Yu was stunned and said, “No, no... I definitely can’t defeat this. Please, I just like to observe monarch-level creatures. I heard that they are covered in high-level materials. I also like (to touch) them...”

Everyone :” ...”

Little money-grubber!

However, it was true that monarchs were covered in treasures...

After killing a monarch-level creature, it would be enough to directly become a millionaire.

This was also why high-level Beast Tamers were all very rich.

Although the cost of cultivating pets was huge, their ability to earn money was also difficult to catch up to in other professions.

Of course, all benefits coexisted with risks.

Sometimes, it was hard to say who was the hunted one.

“Let’s go take a look.”

Sensing the fluctuations of a monarch-level ferocious beast, Lu Qingyi said.

The few pets she had contracted at the moment were all at the monarch level. Naturally, she wasn’t afraid of such wild monarchs.

Unless the Ice Dragon in history books revived. That one would give her a headache.

After nodding at each other, they flew low and headed in the direction Lu Qingyi pointed.

At this moment, in the snowstorm, there was a creature about four to five meters tall. It looked like a pine tree, but its body was as white as frost. The tree crown was fluffy like a blue ice cloud, and the creature with fruits growing on it was walking with a branch.

In mid-air, everyone saw this creature from afar.

[Name]: Ancient Frost Tree

[Attributes]: Ice

[Race Level]: Low Class Monarch

[Level of Growth]: Monarch Level

[Race Skill]: Cold Breath, Blizzard, Snowfall, Ice Block, Ice Mist, Snow Collapse, Energy Fruit, Snowfield

“It’s the Ancient Frost Tree... Son of a b*tch.”

Upon seeing this plant monarch, Shi Yu’s heart turned cold.

This was because this thing was the evolution form of the Frost Tree. Its attributes were ice-element. Although it was a plant, it didn’t have wood-element!

Its super skills were also ice-element. Although it was also very powerful, it was useless against Shi Yu.

“The Ancient Frost Tree... is indeed a new monarch. Looks like it evolved from the Frost Tree for some special reason,” President Feng said.

“Well, it only has more fruits and walking abilities than the Frost Tree. It’s usually really difficult to recognize,” Lin Hongnian said.

Shi Yu had originally started to sigh and feel that his luck was bad, but suddenly, he also saw the blue fruit hanging in the Ice Clouds of the Ancient Frost Tree and recalled something.

“By the way, is that fruit a wood-element skill?” Shi Yu asked.

He admitted that his foundation wasn't strong enough and needed Division 11's index to save him.

"Yes, a high-level wood-element skill, Energy Fruit," Lu Qingyi said.

"I remember that this skill should theoretically be considered multi-element. But it's mainly wood-element," Commander He Biao said.

"Yes, in essence, it's to create a fruit with wood-element life force, but the inside of the fruit can be filled with different energy types. The upper limit is very high, and compared to a fruit, it's more like a bomb!"

"The Ancient Frost Tree likes to make its prey think that this kind of fruit is an edible spiritual fruit. When the prey eats the fruit, the fruit will detonate in their bodies and freeze the prey. At that time, the Ancient Frost Tree will become a hunter," Lu Qingyi introduced.

It was another plant that relied on its body to lure its prey...

At this moment, Shi Yu narrowed his eyes slightly as he listened to everyone's conversation.

He thought about whether this skill was suitable for his Ginseng Baby.

It sounded very similar to nutritional skills, but nutrition was used to create real spiritual fruits, while this energy fruit was used to create explosive fruits... It could also be said to be a time bomb...

The Ancient Frost Tree could use this to lure the enemy. In theory, the ginseng baby seemed to be suitable for this too?

At that time, directly combining nutrients, energy fruits, and sweet aura into a skill would definitely be more attractive than the energy fruits directly created by the Ancient Frost Tree. Even if a monarch-level ferocious beast saw it, it would probably not be able to resist swallowing it directly... It was even more impossible for it to imagine that the nutrients created by the Ginseng Baby could still explode.

Before learning how to control plants and land in the tree world, it was a very good overkill and camouflage skill... Even after learning how to control plants, creating a forest filled with explosive fruits seemed to be very fierce. It was very suitable for baby ginseng's attack skill.

Art was explosive!

"I want this skill.."

Chapter 143: Ice Dragon Daddy, I'm Here

Shi Yu and the others stared at the ancient tree from afar.

At this moment, the Frost Ancient Tree suddenly stopped.

After taking root in the ground, its life aura had completely disappeared.

Only the Energy Fruits hanging on its body emitted the aura that attracted the ice-type beasts.

It gave people the feeling that it was a high-level spirit fruit that would be greatly nourishing.

“It stopped?” Commander He Biao was surprised to see this.

“Did it discover us?” President Feng pondered. “I don’t think so.”

This plant-type monarch was actually very silly.

Other than a small number of special plants, plants like frozen ancient trees had poor reconnaissance and mobility.

This was also the reason why the plant kings in the snow mountain were the first to be cleaned up by humans.

They couldn’t even run fast if they were warned to. How useless.

The other monarch-level ferocious beasts did not need to be very powerful when facing the human expeditions. They just needed to run faster than the Frost Ancient Tree.

In fact, the Frost Ancient Tree liked to occupy a territory the most and wait for its prey to come knocking on its door.

Its disguise ability was not bad. At the very least, its current disguise was enough to deceive inexperienced wild beasts.

However, it was still a little young when facing experienced Beast Tamers like Shi Yu.

At this moment, the Frost Ancient Tree did not realize the seriousness of the problem.

The Energy Fruit swayed like an old sly fox who was about to seduce his prey.

“It doesn’t seem very smart,” said Hall Master Lin.

It were still walking just now, but now it was already pretending? Was he insulting their intelligence?

“It’s good that it’s not smart...”

“The core of the Ancient Frost Tree is a sixth-level ice-type resource. It’s worth 10 million...” President Feng said.

Should they just take care of it and reap the benefits?

This new monarch was actually very troublesome.

Those monarchs who had lived for a long time were all afraid of humans. They hid in the deepest part of the snow mountain and didn’t dare to come out.

And this kind of new monarchs that just went through a breakthrough was usually the most likely to run around and was more threatening.

“Then let’s attack together,” Master Lin Hongnian, who was riding the Ironback Dragon Eagle, said.

A battle between monarchs was no small matter. A group fight was the safest method.

“Our pets are both ice-element pets. It has a super. It’s not easy for us to fight,” Commander He Biao said.

“Let’s use deterrence to support Old Lin,” President Feng said.

“Sure.” Lin Hongnian nodded and felt that it would work.

This support was also very necessary. With the continuous deterrence of two monarch-level pets, it could reduce the battle power of the Frost Ancient Tree by 20%.

“Then I’ll leave it to you guys. I’ll protect Shi Yu.”

Lu Qingyi spoke and decided to stay by Shi Yu’s side to protect him.

With the four monarch-level pets of the three masters, it was not a problem for them to gang up and beat up a Frost Ancient Tree. Lu Qingyi could not be bothered to attack.

Most importantly, if she interfered, it would be difficult to split the Frost Core in the end. It was better to let President Feng and the other Beast Tamers of Ping Cheng split it themselves.

“Alright, thank you, Dr. Lu,” Master Lin Hongnian said. With Lu Qingyi protecting Shi Yu, they were also very relieved.

“Uh...” Shi Yu sat on the Ice Dragon Buggy and scratched his cheek.

Did they need to protect him? He had turned etherealization.

Forget it, if these guys said so... Shi Yu moved closer to Lu Qingyi.

...

At this moment, riding on their respective flying pets, the three masters started to summon their monarch-level pets.

President Feng summoned a monarch rank Frost Moon Ice Wolf. This was the Snow Wolf’s high class commander species evolution form.

Commander He summoned a monarch rank snow monster. This was a monster that looked like an ape. Its species was also high class commander rank.

On the other hand, Hall Master Lin summoned the monarch-level Nine Li Battle Beast and the Diamond Ape King.

From the pets, one could tell the strength of Lin Hongnian, the richest man in Ping Cheng.

President Feng and Commander He’s monarch rank pets were both high class commander rank. They relied on accumulation to break through the racial limit to become monarchs.

As for Lin Hongnian’s Diamond Ape King and Nine Li Battle Beast, one was a low-level monarch race, while the other was a mid-level monarch race. They were all very rich.

The difference in battle power between the two parties was actually very obvious.

Generally speaking, battle power was determined by growth level and race level.

It was basically impossible for commander-type pets to have super skills, so Hall Master Lin's two pets would definitely be stronger.

Shi Yu secretly glanced at Senior Lu.

As the president of an association in a third-level city, President Feng didn't have any king species pets. Yet, Lu Qingyi could casually find several monarch species pets for him to choose from. She was simply rich!

"Look carefully." Lu Qingyi looked at the Frost Ancient Tree and said to Shi Yu.

At that moment, under the command of the three Masters, the Frost Moon Ice Wolf, the Blizzard Monster, the Diamond Ape King, and the Nine Li War Beast looked at each other and walked towards the Cold Frost Ancient Tree with proud footsteps.

How could the F4 of Ping Cheng lose to a mere ancient frozen tree!

They didn't know how to lose, but at this moment, the frozen ancient tree that was rooted in wait for its prey suddenly panicked.

A bean-sized ice crystal dripped from its forehead. The Ancient Frost Tree sensed that something was wrong.

It felt that it had not attracted prey, but a group of big shots.

"Wu!!!!"

A moment later, the Ancient Frost Tree felt that it couldn't stay silent anymore. It immediately let out a violent roar, and its deterrence erupted!!

Boom!!!

A threatening aura that was almost corporeal erupted from the Ancient Frost Tree like a snowstorm.

"Roar!!!!"

The Ancient Frost Tree erupted with overwhelming deterrence. On the other side, the Ping Cheng F4 didn't show any weakness either. It displayed an even more classic bullying tactic.

Boom!!

Four similarly earth-shattering auras erupted and pressed down on the Ancient Frost Tree.

At this moment, the five auras collided. The wind and clouds in the sky immediately changed color, and countless falling ice crystals were obliterated into nothingness.

The violent wind was all swept back, and the icy plain shook as if an earthquake and an avalanche were about to happen. The gray sky that was covered in snowstorms looked like it was about to be torn apart, directly splitting into two like a natural chasm.

Swoosh!

In an instant, violent ice wind spread in all directions due to the collision of aura.

“Scree ~”

On Shi Yu’s side, the Green Phoenix directly erected the high-level wind-elemental protective skill, “Wind Protection”, to form a domain that isolated everything, allowing Lu Qingyi and Shi Yu to watch the show quietly.

“Wuu!” “Ji!”

Seeing the aura of the five monarchs colliding, Eleven and Buggy shouted excitedly.

This wave, this was what was really called “bullying others”!

Look at the special effects...

Eleven and Buggy gestured and learned.

“Yi...” Baby Ginseng stuck its head out. So, when could it learn that?

It also wanted to bully others...

“It’s so powerful. This proficiency probably isn’t low...” Shi Yu looked at the scene in front of him and gulped.

Lu Qingyi looked at Shi Yu in confusion.

Shi Yu: “?”

“Why, what’s wrong?”

“The deterrence proficiency of those five monarchs is only at the proficient level.”

She glanced at Shi Yu, Eleven, and Buggy.

These guys should have some self-awareness, alright?

Honestly...

“This is the proficiency level??” Shi Yu was stunned.

Lu Qingyi said, “Their deterrence power is strong and can affect the outside world purely because their own levels are high, and there are many forces colliding.”

“Your Iron-eating Beast is the ridiculous one...”

At the Awakening level, he had mastered the aura of a monarch that could cover a large area and instantly kill hundreds of ferocious beasts...

“Uh...” Shi Yu was stunned. He had thought that the deterrence of these pets had reached the perfect level.

He was thinking too much.

The Perfect Level Deterrence Mark could intimidate everything. It could change the weather with its thoughts. For example, if the sky was raining or snowing, a single glance could make the rain and snow stop. Or, it could make the rain and snow descend and affect the real world’s weather!

Although it wasn't as effective as true weather skills, it was enough to show the domineering aura of a monarch.

Right now, the deterrence collision of these few monarchs only looked like it, but it wasn't at that level yet.

In addition, Perfect Level Deterrence also had the effect of causing physical destruction. Not only could it destroy the mind, but it could also destroy the body.

Then, the monarch aura could not only destroy, but also become a buff. It could increase the battle will of its teammates on a large scale.

As for the transcendent Level Deterrence, it was even more powerful. It could wrap the Deterrence effect around other skills and items, allowing any skill to have the Deterrence effect and create mental equipment!

Shi Yu even heard that higher deterrence levels could change the bloodline of pets.

Even if it was an transcendent pet, after mastering super high-level deterrence, its descendants could directly have the potential of a monarch and awaken deterrence when they were young!

In short, this was a very common late game skill, but it was also a super useful skill.

Now, facing the deterrence of the four monarch-level pets, the Ancient Frost Tree's mentality collapsed.

It wasn't afraid of any one of these four alone, especially the Frost Moon Ice Wolf and the Blizzard Monster. They didn't look very strong, but with four coming at once, who could withstand them?

"Wu!"

The Ancient Frost Tree did not last long. It was instantly crushed back, and its battle intent was severely affected.

It had the intention to retreat. The roots turned into legs. As it retreated, a tsunami-like snowstorm condensed!

The snowstorm swept up a large number of energy fruits and blew in the direction of Ping Cheng's F4.

The Ancient Frost Tree kept throwing energy bombs into the snowstorm, hoping to block the enemy's path with this.

"Boom!!"

As the Energy Fruit exploded in the snowstorm, the explosive ice power instantly increased the power of the snowstorm by a level.

In an instant, the snowstorm was vast and covered an area of more than a hundred meters. It instantly covered all the environment in front of it. Faced with this high-level skill, Lin Hongnian's Nine Li Battle Beast walked out.

"Roar!!!"

The giant panda roared and its physique increased exponentially, turning into a height of more than four meters.

Moreover, the appearance of the armed armor instantly changed from a restrained state to a sharp state.

Super skill, inner Power!

Intermediate-level skill, Giant Transformation!

Intermediate-level skill, Cannon Fist!

Boom!!

Two augmentation skills and an attack skill. The Nine Li War Beast threw a punch out of thin air. A dazzling red light erupted from its fist. With the enhancement of the multiplication and Inner Power, the power of the Nine Li War Beast's cannon punch was increased by an unknown number of times. At this moment, it was like a scorching cannon fire.

At this moment, its armor turned red, and the energy in its body rose steadily. Red energy spewed out and enveloped its entire body!!

A shocking change occurred. Accompanied by the hot wind swept by the Fire Cannon Fist, a red hole instantly appeared in the huge snowstorm that covered more than a hundred meters. It quickly melted and detonated the surrounding snow and fruits!!

Bang!!!

After the shocking explosion, the hot wind was still sweeping towards the Ancient Frost Tree, making the Ancient Frost Tree's gaze burned to the extreme.

"It's hard to teach it at the moment... I have to let Eleven evolve quickly." Shi Yu was too thirsty for this skill.

Under the enhancement of this Inner Power skill, a mere non-metal cannon skill could be enhanced to such a ridiculous degree, let alone other skills.

Master Lin coveted the Super Electromagnetic Cannon, but so did Shi Yu covet a super skill...

At that moment, in order to counterattack, the Ancient Frost Tree immediately activated its super skill, Ice World.

The ice power of the thousand-meter icy plain suddenly formed a huge ice and snow domain with the heaven and earth as the boundary, enveloping the frozen ancient tree!

Boom!

Invisible waves erupted from the Ancient Frost Tree. Time seemed to have stopped in the domain. The hot and huge fist wind was instantly frozen in midair, turning into ice slag!

Skill: Ice World

< Introduction > A domain formed by freezing the land and freezing the sky. It gathers the natural power of thousands of kilometers. The person inside the domain is a king, and he has the absolute right to control the natural power of ice and snow.

When this move was used, together with the Frozen Ancient Tree's Ice Sealing Skill, the hot wind created by the Nine Li Battle Beast was instantly frozen in midair!

In addition, the thousand-meter icy plain environment became even more harsh. The extreme cold made the Ancient Frost Tree recover its state again. It looked coldly at the Frost Moon Ice Wolves and Blizzard Monsters that were deterring and suppressing it!

“Roar!!!”

In this situation, the power of the Frost Moon Ice Wolf and the Blizzard Monster, which were both ice-element creatures, was severely suppressed. They could only roar from afar and use deterrence support. At this moment, the Nine Li War Beast had already entered the Thunder Armor State. The Diamond Ape King also used the super skill Giant Body. Its muscles multiplied, and it turned into a violent gorilla that charged towards the Frost Ancient Tree.

As expected of the strongest battle power in Ping Cheng.

For example, President Feng and Regiment Commander He had to send all their pets out to cooperate when dealing with a monarch-level ferocious beast alone and use their Beast Taming Talent. But for Lin Hongnian, both trump cards had the ability to fight the Frost Ancient Tree alone.

Boom!

Under the pincer attack of the Nine Li War Beast and the Diamond Ape King, the Ancient Frost Tree immediately summoned a super blizzard to wrap itself in the ice and snow domain. The crazily spinning snowstorm had a powerful protective effect, as if it could freeze and expel everything.

However... it was still useless.

The Nine Li Battle Beast was like a bolt of lightning that relied on its body to withstand the power of the snowstorm. Its Inner Power erupted, and it directly used the Thunder Palm to penetrate the snowstorm and break through an entrance. The Diamond Ape King was even more domineering. After the Nine Li Battle Beast helped to break through the snowstorm, with a roar, it cooperated with the Giant Body and used the high-level metal-element skill, Giant Arm Beat, to swing at the core of the Frost Ancient Tree in hopes of knocking the Cold Core out.

The wind and snow roared, and the ferocious beasts roared. The battle had reached the most critical moment.

Behind it, the Nine Li War Beast and the Diamond Ape King bore the frostbite and launched a crazy combo on the Ancient Frost Tree!

The entire icy plain suffered intense destruction at this moment. If the battle of the kings was in Ping Cheng, a large area would probably turn into ruins.

“The iron-eating beast's evolution form is indeed impressive,” Lu Qingyi said at the side.

As expected of a race that required hundreds of millions of evolution materials. This strength was worth this investment.

Shi Yu said, "It's impressive, but it's just a monarch-level Frost Ancient Tree. It's a pity, a pity..."

The corners of Shi Yu's mouth twitched as he looked at the frozen ancient tree that was being beaten up by the Nine Li Battle Beast and the Diamond Ape King.

Why was he so ruthless?

He glanced at President Feng and Commander He, who had ice-element talent enhancement.

Neither of them showed any intention of contracting it.

It seemed that the two of them were relatively traditional Beast Tamers and weren't willing to take a huge risk to directly contract a wild monarch that had grown up.

"The battle is almost over. Let's go over too," Lu Qingyi said.

...

[Confirm recording]

Skill: Energy Fruit

Skill Level: Advanced

< Introduction > It's a wood-element skill. An energy fruit created with wood-element life force can be filled with various attributes. Within a certain range, the creator can detonate the fruit at any time and cause various effects.

Status: Can be taught

A moment later.

Under the roars of several ferocious beasts, the Ancient Frost Tree fell to the ground.

Everyone immediately surrounded it. The Frost Moon Ice Wolf and the Blizzard Monster also rushed over with drooling.

This plant-type monarch was full of treasures.

It really was nutritious. Why would a wolf drool at a fruit otherwise?

Shi Yu also came over. He casually touched the remains of the dead Frost Tree and glanced at the traumatized baby ginseng.

I'll teach you when I get back!

Ginseng Baby: Yi...

Baby Ginseng was still immersed in the battle. Humans were too scary.

Such a huge monarch was annihilated just like that.

On the other hand, Eleven and Buggy looked curiously at the Ice Wolves and other pets surrounding the Ancient Frost Tree, eating the broken leaves... Could this thing be eaten?

President Feng and Commander He looked at the dead Frost Ancient Tree and looked at Lin Hongnian with mixed emotions.

“Old Lin, as expected of you.”

Originally, as a relatively backward suburb, master-level Beast Tamers were relatively weak. But now, with Lin Hongnian, Ping Cheng’s overall strength could also be ranked among the top in Icefield City.

“Howl ~” “Roar ~” The Frost Moon Ice Wolf and the Blizzard Monster also greeted Big Brother Nine Li Battle Beast.

As a monarch-level creature, it was so strong!

They were blessed.

Those broken materials were also a rare delicacy for them.

“Wuu!!” The Nine Li Battle Beast expressed that it was all the power of his daughter’s dowry.

“Hehe, you guys take the materials.” Lin Hongnian said to President Feng and Commander He, “I’ll apply the medicine for them first.”

At that moment, the Nine Li Battle Beast and the Diamond Ape King’s bodies were covered in frost injuries. They resisted the snowstorm’s attack, and it was obvious that they had also suffered considerable damage. An injury of this level was not even something that ordinary healing skills could treat.

It was also because they had the physical strength of monarchs that they appeared harmless. If it were any other commander rank creature, its body would have already been completely frozen to death.

Master Lin used the frostbite medicine that he had prepared in advance and started to apply it to the Nine Li War Beast and the Diamond Ape King.

As for Shi Yu, he was considering whether to replicate other skills. In the end, he chose to give up.

Although there were still super skills, he couldn’t teach them at the moment. It was a waste of time to replicate them.

Besides, he didn’t have a pet that specialized in ice.

The worm could only be considered half ice element. It wasn’t worth it to occupy the skill column for an ice element skill.

After all, the Ice Dragon Phantom was just excessive. There was no need to be too obsessed with perfecting it. The upper limit was only the overlord race. Perhaps, after the worm evolved, it would be.

Shi Yu admitted that he was being arrogant.

They didn’t even fancy overlord races anymore.

If he wanted Buggy to invest a lot of energy to cosplay, he would have to invest a lot of energy to perfect it. How could a mere dragon do that? At the very least, he would need a Mythical-level divine dragon.

“Hahaha...”

As he thought about it, Shi Yu could not help but laugh.

This smile immediately attracted a few gazes like they were looking at a fool.

Lu Qingyi stood beside the Frost Ancient Tree with her arms crossed and observed this monarch. The other three masters and pets were actively dissecting the materials. When they saw Shi Yu standing on the spot and smiling, they couldn't help but cast puzzled gazes.

Shi Yu :” ...”

“I'm a little excited to see the Nine Li War Beast so strong.” Shi Yu looked up into the sky.

“Let's continue on our way.” Lu Qingyi glanced at the time and said. To her, encountering a monarch-level creature was just a small interlude. The most important thing was still the subsequent Ice Dragon Ruins.

“Alright!!” President Feng and the others dissected it more diligently. As for these materials, they would divide them carefully when they returned!

...

An hour later.

The five of them left the snowstorm area.

Perhaps because of the battle just now, even if the Green Phoenix did not release its deterrence during the flight, there was not a single ferocious beast on the road.

This made Buggy very depressed.

After the leader finished fighting, it wanted to fight too.

But it was fine if he didn't fight... After flying for the whole way, Buggy felt that it was going to die of exhaustion.

Fortunately, it had the ginseng baby and Absolute Sleep to support it. Otherwise, it definitely wouldn't be able to keep up with the other pets' speed.

“Ji!!”

Finally out of the snowstorm area, Buggy gasped.

“Sob.” Eleven looked at it in disappointment. What a good training opportunity, and it was actually complaining about being tired.

It still had to improve his thinking and awareness.

Eleven still wanted Shi Yu to ride it and race with these flying pets, but unfortunately, Shi Yu didn't want to. He felt uncomfortable.

Buggy: QAQ, I was wrong.

“Yi!” Baby Ginseng chuckled.

Outside the snowstorm area, the sky instantly recovered.

The white snow mountain and the blue sky appeared extremely beautiful.

This also meant that they were about to reach the Ice Dragon Ruins.

The Ice Dragon Ruins was located at the top of a snow-capped mountain.

It was a semi-developed ruins area.

It looked like a blockade building made of countless impermeable ice stones.

From time to time, dragon might would be emitted from inside and outside the building. This also resulted in no creatures daring to come into contact with this place other than humans. Even monarch-level creatures were in the same situation.

“This is the place.”

In the sky above the Ice Dragon Ruins, with Lu Qingyi as the lead, everyone slowly descended outside the ice stone building complex.

In the past, many researchers and archaeologists had come here to study. Unfortunately, the huge building complex didn't reveal any useful information.

The entire ruin looked like an ordinary building without any secrets.

However, the dragon might that leaked out from time to time told everyone that everything was not that simple.

“This is only the surface. The real Ice Dragon Ruins is an independent ruin space inside the hidden surface.”

“But up until now, no one has been able to find a way to open the ruins space.” After landing, Lu Qingyi looked at the entire building complex and said.

“Little Brother Shi Yu, what do you plan to do?” He Biao looked at Shi Yu, who had come down from Ice Dragon.

Master Lin Hongnian and President Feng also wanted to see what plans the genius archaeologist, Shi Yu, who had cracked that trial-type ruin, had.

At this moment, after arriving at the Ice Dragon Ruins, Shi Yu fell into deep thought.

“This is a tool I obtained from the ruins of the trial.” Shi Yu took out the Ice Dragon's whisker and threw it to the ice dragon formed by the worm.

Then, he said to it, “Try it first. Take this and call ‘Ice Dragon Daddy, I'm here. Mommy misses you!’”

Lu Qingyi: “?”

The Masters: “?”

Buggy:??

Was this how you do archaeology?

“In the face of this ruin without any hints, I can only take an unusual path...”

Shi Yu was serious. The change in the iron-eating beast ruins had opened a frivolous path for him.

Shi Yu looked at Buggy. At this moment, Buggy was stunned as it held the whiskers of the ice dragon and roared according to Shi Yu’s instructions.

“Roar!!! (Ice Dragon Daddy, I’m here. Mommy misses you!!!)”

Moreover, it released the Ice Dragon Might to verify his identity.

Boom!

Suddenly, the buildings of the Ice Dragon Ruins that had not changed for thousands of years trembled slightly...

In the Ice Dragon Ruins space, the frost dragon on the seal slowly opened its eyes. It sensed the bloodline connection and revealed a blank expression.

It was a female. Where did this fellow child come from? It must have been mistaken... However, what was with this bloodline connection?!

Chapter 144: Origin of Dong Huang

Boom!

“F*ck!”

As Buggy finished shouting, the ruins started to tremble. Commander He widened his eyes and pointed at the shaking ruins, losing his ability to speak.

What the f*ck!

Did it really react?

This f*cking worked?

President Feng and Hall Master Lin also had strange expressions and shock.

As for Lu Qingyi, she looked at the Ice Dragon Buggy. Apart from silence, there was only more silence.

“It must be because of that Ice Dragon’s whiskers.”

Lu Qingyi kept comforting herself.

That Ice Dragon Whisker was the key to the ruins.

It had to be.

At this moment, as the Ice Dragon Ruins shook, Shi Yu revealed a pleasantly surprised expression.

“It really moved?”

But soon, his expression tightened.

Holy shit.

If he really baited out a response, didn't that mean that there was really an ice dragon inside?

The few masters also quickly thought of this possibility and couldn't help but freeze.

At this moment.

“Roar!!!!”

A terrifying dragon roar suddenly came from the sky, causing the expressions of everyone present to change.

“Ji!!!”

Buggy's eyes widened. It was almost scared to death.

It really made a dragon daddy come out!

The dragon roar didn't hurt, but it seemed to contain a deterrence that made one's heart tremble.

Apart from Lu Qingyi, everyone present was a little pale.

A moment later.

Everyone's expression was a little stunned.

Because this dragon roar... clearly conveyed some meaning.

[I'm a female! I've never done it before, so where did this child come from!]

[However, what's with this bloodline connection? Where did you guys get it?]

Everyone was shocked to the extreme.

Ice Dragon Ruins... Not only was there an Ice Dragon...

And it was a living, conscious ice dragon that could talk!!!

This wasn't the first time the Ice Dragon Ruins released dragon might.

But having dragon might not mean that there were living creatures inside.

Spirit plants like Dragon Soul Grass or transcendent-level deterrence might be preserved.

But a dragon's roar, a dragon's roar that could answer questions, definitely meant that there was a living dragon!

"I, let's go." Old Feng's eyelids twitched.

A frost dragon that had lived for two thousand years was at least an overlord!

Moreover, as a dragon, it was definitely the overlord with the highest battle power.

Even if the few of them added up, it wouldn't be enough.

Unless a titled legendary Beast Tamer came.

There was indeed something wrong with this ruin...

"I feel that it means no harm."

Shi Yu said, "Perhaps, history isn't like legends."

At least, the stone statue had said time and time again that the legend passed down from the icy plain was wrong.

Perhaps Ice Dragon was a good dragon?

Its answer was quite down-to-earth and friendly.

"It's alright, try talking to it," Lu Qingyi stood at the side and said.

It was as if she had the confidence to face the dragon overlord without fear.

Shi Yu glanced at Lu Qingyi...

He didn't believe that Lu Qingyi was a Titled Legendary-level big boss. Even if it was an ordinary Legendary or top-notch master, it was a little exaggerated.

However, it seemed that this rich lady had a lot of backup plans.

That made sense. As an archaeological big shot who often explored Mythical ruins, how could she not have a few trump cards?

[Sorry, my pet is playful. It was just kidding.]

[It's not your child, but we have an Ice Dragon whisker. Excuse me, is this yours?]

[The bloodline connection might be from this.]

Shi Yu used telepathy at the ruins.

In the ruins space.

The frost dragon on the seal was slightly stunned and fell into deep memories.

Ice Dragon's Whiskers...

It seemed to have indeed given away a single strand of dragon whisker as a keepsake.

It had been two thousand years. Someone had finally brought the whisker here.

“Roar!!!!”

The frost dragon roared. In an instant, a huge door appeared in the outside world, in the buildings of the ruins.

It was a passage that connected to the ruins!

Upon seeing this scene, the expressions of Shi Yu and the others changed again.

[You guys, come in.]

The frost dragon sent a telepathic message.

When purebred dragons reached the monarch level, they would awaken their telepathy abilities.

Some spiritual-type creatures also had the aptitude to awaken telepathy. This talent was not exclusive to humans.

Their telepathy reached everyone’s hearts, and everyone hesitated.

“You guys wait outside, I’ll go in,” Lu Qingyi said to everyone.

“I’ll go with you,” Shi Yu said.

Lu Qingyi glanced at Shi Yu and said, “Then don’t leave even one meter away from my side.”

The three masters looked at each other. Are you archeologists crazy?

How could they enter?

It wanted you to go in, so you went in?

They collectively cowered. They kept feeling that it wouldn’t be so easy to come out of the Ice Dragon Ruins space after entering.

“No... I’ll go in too,” Master Lin Hongnian said.

He had promised his daughter to protect Shi Yu well. Although he felt that his battle power was useless at the moment, he couldn’t let Shi Yu and Dr. Lu take the risk themselves.

“Then we’ll follow in too.” Commander He and President Feng’s eyelids twitched.

Lu Qingyi glanced at the three Masters. Seeing their uneasy looks, she couldn’t help but feel speechless. Then, she looked at Shi Yu.

Now, Shi Yu looked curious, expectant, and excited.

She didn’t know if she should praise Shi Yu for being brave...

“It doesn’t matter. Just remember to stay one meter close to me.” Lu Qingyi took a deep breath and stepped forward.

Shi Yu and the others hurriedly followed behind her.

A moment later.

Space changed, and the stars changed. Shi Yu and the others appeared in a completely frozen world where time seemed to have stopped.

The extreme cold was several times colder than the deepest part of the snow mountain.

“Gulp.”

As soon as they entered, the five of them saw a huge monster at least ten meters tall lying on a huge ice and snow altar.

The creature in front of them had a strong body made of ice rocks. The color was ice-blue and dark purple. It looked cold to the bone.

Its body, its neck, head, long tail, sharp claws, and fangs, its four strong feet, as well as its pair of wings, were all made of ice and stone. Its scales revealed coldness and snow lingered.

“Roar!!!!” The Ice Dragon, who was lying on the altar, glanced at everyone and roared. Instantly, snow and wind condensed.

During the roar, Ice Dragon glanced over with its deep eyes. Its little ice-blue beard fluttered in the wind, looking majestic.

It was identical... It was identical to the ice dragon that Shi Yu had seen in the ruins of the trial!

At this moment, Ice Dragon glanced at the insect that had transformed into a frost dragon. It felt the Ice Dragon’s whisker in its hand and fell silent.

A worm?

This skill... was so familiar.

“Ji...!!” Being stared at by the frost dragon, Buggy cried. This was all its Beast Tamer’s mission. Don’t look at it.

The pressure that the real Ice Dragon gave Buggy was too strong.

It wasn’t the only one. The three masters’ pets, Eleven, who was on Shi Yu’s shoulder, and Baby Ginseng, who was in his pocket, all had nervous expressions.

Only Lu Qingyi’s Green Phoenix could still maintain its calm at this time.

[Are you here to complete the contract?]

Ice Dragon raised its head and spoke to everyone.

Contract...

What contract...

Shi Yu and the others were confused. They felt that they weren’t on the same wavelength as Ice Dragon.

“Wh-what contract?”

Shi Yu asked carefully before filling it in with his info.

“There’s a historical legend outside. It says that the human tribe living in Icefield City once fought with an ice dragon and sealed the ice dragon on the snow mountain. However, some people say that this historical legend is wrong. We came here to explore the real history.”

Ice Dragon raised its huge claws slightly. What was going on? It was sealed? Why didn’t it know?

“I obtained this Ice Dragon whisker from a Dream Shell in another ruin space. It was it who told me that the historical legends of the icy plain were wrong. As for what this contract is... we don’t know.”

The frost dragon listened quietly. When it heard the name Dream Shell, it recalled something.

“I see. Looks like no one remembers the contract anymore.”

“The Dong Huang Dynasty and the Icefield Tribe didn’t manage to survive that calamity.” The ice dragon sighed.

It conveyed a message that everyone present was rather concerned about.

“Sister Ice Dragon, I feel that the outside world has misunderstood you. Why exactly are you here, and... do you know the reason why Beast Tides often happen in the snow mountains? Can you tell us so that I can explain to the outsiders when I go out?” Shi Yu said.

The moment he spoke, this scumbag’s true colors were revealed.

Lu Qingyi and the others looked at him silently, especially Buggy.

Good lord, he called it daddy just now, but now he called it sister?

Pa!

The ice dragon hit the altar with its claw and showed a dissatisfied expression. It was dissatisfied that the Icefield people outside had actually forgotten its existence.

“I am the battle beast of the Ice Dragon General, Mu Huiyin, under the command of the Emperor Shi of the Dong Huang Dynasty. I’m here to suppress the Ice River Totem!”

“You guys say that I’m sealed here?”

Did they want it to fly away directly and release this Ice River Totem?

As soon as Ice Dragon finished speaking, the expressions of the five people present changed again.

Emperor Shi?

Totem?

Was it kidding?

The Ice Dragon Ruins that they thought were at most overlord-level actually involved such a deep thing?

Emperor Shi... That was the title of the first ruler of Dong Huang.

As for totems, they were known in ancient times. In modern times, they would be guardian-level!

More than two thousand years ago, a Beast Tamer with Time Strengthening talent rose and stepped into the legendary domain. He issued a God Annihilation Decree and destroyed countless totem clans. He threw them into pitfalls, sealed them, and expelled them. He ended the era of totem rule that lasted for tens of thousands of years and established the Dong Huang Dynasty. He was known as the Time Emperor. He was also one of the legendary Beast Tamers closest to the Mythical Domain in human history.

This was the beginning of the rise of the Eastern people, and also the birth of Dong Huang.

“You’re saying that there’s a totem under the altar?” Lu Qingyi’s expression was solemn.

The totem era was not a very good era for humans.

Although there were very few kind totems that were willing to protect humans, most of them raised humans as food.

Even after humans developed the Beast Taming Space Talent and entered the mid-stage of the totem era, this phenomenon still did not change.

At that time, humans had become the growth nutrition of many transcendent creatures. Many powerful totems used the excuse of protecting humans to make humans use the Beast Taming Space to help them nurture their clansmen.

In this era, it was common for Beast Tamers to be forced to contract pets that exceeded the limit of the Beast Taming Space. Their lifespans were average below 30 years old, and they would die from being drained dry by their pets.

At that time, countless powerful totems competed for the territory of Blue Planet. All races lived together. Humans were very low and small, just servants who did odd jobs for many totems.

Of course, it was precisely because of this kind of contempt that they didn’t treat humans as competitors. The thousands of races gave humans a chance to grow.

At the end of the totem era, in the east, the Shi Emperor rose and issued the God Annihilation Decree. He gathered some Beast Tamers who had escaped the control of the totems and launched a counterattack against the totems.

From then on, the totem era in the East ended and entered the Beast Taming Era. In the country, humans were supreme, and only pets became slaves.. This history was still clearly recorded, and everyone was not unfamiliar with it.

Chapter 145: The Truth About the History of Icefield

“It’s just a totem that died in an attempt to be reborn.”

“By the way, are you humans of Dong Huang?”

Faced with this question, Ice Dragon breathed out cold air.

“Yes, we’re all from Dong Huang...”

“But, rebirth?”

President Feng frowned. He had a bad feeling.

Damn it.

Rather than having a totem revived, it would be better to let the ice dragon go berserk on them.

The threat between the two was on a completely different level.

“Well, the Ice River Giant is an elemental creature. After reaching the totem level, it’s almost immortal.”

It slowly looked at everyone.

It thought that everyone was here to complete the agreement.

Boring...

But it was also good. It could continue to absorb energy.

Every time the Ice River Giant wanted to revive, it would absorb its energy. After two thousand years, the Ice Dragon felt that it was almost at the totem level.

It was awesome.

It felt that it could suppress the Ice River Giant for thousands of years.

“Sister, tell me in detail,” Shi Yu said.

Ice Dragon said, “Call me Grandma.”

Shi Yu: “?”

Everyone: “?”

Damn, why didn’t these dragons follow human social rules?

“Grandma Ice Dragon, tell me in detail...” Shi Yu said.

“Then I’ll tell you.”

It was rare for an outsider to bring a keepsake over, after all. Ice Dragon yawned.

“Probably thousands of years ago. I don’t know how long ago.”

“An Ice River Totem was born in this icy plain.”

“This fellow is very greedy. He wants to expand his territory and enter the sea area.”

“Therefore, it began to use the excuse of protecting humans to let human Beast Tamers help it nurture its clansmen, the Frost Stone Giants.”

“This is also the origin of the Icefield Tribe. Under the rule of the Ice River Totem, the Icefield Human Tribe and the Stone Giant Tribe have marched into the ocean many times. The war lasted for a long time.”

“In this war, the entire stone giant race and humans were severely squeezed dry. In the end, the human Beast Tamers and Frost Stone Giants wanted to resist and didn’t want to fight the sea anymore.”

“Later on, just as you humans were rising, the Ice River Totem was directly killed in a large scale battle.”

“However, the Ice River Giant is an elemental creature, and it’s extremely difficult to die.”

“In a few decades, the Ice River Giant that was killed will be reborn due to the rich ice elemental power.”

“My Beast Tamer, Mu Huiyin, was the strongest expert of the Icefield Tribe at that time. He was also one of the generals under Emperor Shi and was named General Ice Dragon.”

“Her lifespan is coming to an end, so she might as well directly modify the Beast Taming Space into a sealed space, permanently sealing the Ice River Totem here, cutting off the opportunity for the Ice River Totem to revive.”

“As for me, as her partner, I assisted in suppression and became the guardian of this place.”

Ice Dragon glanced over.

“How did you guys turn this story into that mess about me being sealed here?”

“Misunderstanding, misunderstanding.” President Feng and the others looked embarrassed.

“Then, what is the agreement about the token that you mentioned?”

“Back then, Mu Huiyin and I agreed to assist in suppressing the Ice River Totem.”

“The agreement is that when I break through to the totem level and have the strength to completely destroy the Ice River Totem, I can resolve the hidden danger and leave.

Apart from that, when the Icefield Humans in the outside world have the strength to resist the Ice River Totem, there will also be people who will come with a keepsake and cooperate with me to completely destroy the Ice River Totem. “

“So, just now, I thought that a Beast Tamer more powerful than Mu Huiyin appeared from the Icefield Tribe with a keepsake.” Ice Dragon looked at everyone.

“Looks like I’m overthinking.”

President Feng blushed.

In the current Icefield City, there wasn’t even a legendary Beast Tamer, let alone a Mythical Beast Tamer... It was difficult to fight against overlords, let alone totems.

“But it’s also within my expectations.” Ice Dragon lay down again. “After that great calamity, I’m afraid that the Icefield humans don’t have any records of the Ice River Totem anymore.”

Initially, it didn't expect to rely on humans.

"Senior Ice Dragon, the disaster you mentioned just now means..." Lu Qingyi asked with a serious expression.

The first generation of the Dong Huang Dynasty established by Emperor Shi was destroyed for unknown reasons. This was also a question that modern historians had yet to explore.

Although Dong Huang Scripture was rebuilt by someone else, this reason had always been an unsolved mystery.

"I don't know. It might be war."

Ice Dragon didn't mind. "At that time, I was sleeping here. When I woke up, the world outside seemed to have changed."

"Alright, I've helped you solve your confusion now. You guys can leave."

Ice Dragon looked at Buggy.

The blue dragon whisker instantly flew from its hand to the Ice Dragon.

It directly took back its Ice Dragon Whisker.

It was afraid that someone would use this to pretend to be its descendant in the future.

After waking up, it suddenly had an additional worm descendant. Who could stand this?

"Ji!!"

After the Ice Dragon casually took away the Ice Dragon Whiskers, Buggy's eyes widened. Shi Yu's heart was also bleeding.

Holy shit.

At least level seven or eight... This top-notch ice and dragon dual-element resource was directly taken away??

The problem was that Shi Yu didn't dare to ask for it back.

"Since we brought a keepsake over, then... Do you need us to cooperate with you to completely destroy the Ice River Totem?"

Lu Qingyi wasn't in a hurry to leave, but said to the Ice Dragon.

"Eh." Ice Dragon was just about to close its eyes when it suddenly opened them and looked at Lu Qingyi.

"In this way, you can also leave here and be completely free, right?" Lu Qingyi said.

Ice Dragon was in a strange mood. The problem was, It didn't want to leave.

It could still sleep every day here and absorb the power of the Ice River Totem to quickly become stronger. It liked this place very much.

Otherwise, why do you think Mu Huiyin made me stay?

“You think you can kill the Ice River Totem?”

On the surface, Ice Dragon looked at Shi Yu and the others in disdain.

It felt that his breath could freeze everyone and their pets here.

If it really let the Ice River Totem be revived, it would be trouble. That guy would be even fiercer than it.

Monarchs, overlords, guardians (totems), and myths. Among them, totems were also called quasi-mythical by Beast Tamers.

At that time, in the entire Dong Huang Dynasty, only Emperor Shi alone could kill totem-level creatures. Those generals given titles by Shi Di could at most barely resist the totems.

It didn't believe that Lu Qingyi and the others could do it.

“A mere totem.”

“We can't, but the humans now can. They can take out the power to destroy totems at any time,” Lu Qingyi said calmly.

President Feng, Master Lin, and Commander He's hearts trembled.

“Mere totem” ..?

However, from the perspective of the entire human race, this was indeed true.

“A mere totem?” The frost dragon widened its eyes.

Were all the Beast Tamers of the later era so fond of bragging?

“If the Ice River Totem really revives, I can apply for a forbidden weapon. The high temperature triggered by hundreds of millions of energy points is enough to instantly kill the Ice-type totem with its attributes.”

Lu Qingyi said.

Compared to ancient times, the reason why modern human societies were relatively peaceful was because the overall strength of humans had increased by more than a little.

A Legendary-level Beast Tamer who could defeat overlord-level creatures...

A top legend who could resist totems and was given a title by the Beast Tamer Association...

There were also Beast Tamers who could kill totems. The number of Beast Tamers in modern times definitely exceeded that of ancient times.

Not to mention that there was also a super forbidden weapon whose attack range covered half of the blue planet and had the power of a guardian. With this, it was enough to make those overlords and totems not dare to enter the human countries on a large scale. They could only stir in a small area of the border battlefield.

“Roar...”

Seeing how serious Lu Qingyi was, Grandma Ice Dragon's body stiffened.

It felt like this group of people wasn't lying to him?

These human Beast Tamers who came with a keepsake really had the ability to destroy totems?

"Forget it... I won't trouble you guys. I'll continue to suppress it here."

Ice Dragon yawned and said, "There's no better place to stay than here."

"When I'm tired of suppressing it, I'll ask for your help."

Everyone looked at each other. Good heavens, it was a shut in dragon.

Although that was the case, after everyone learned that a totem was sealed here, they definitely wouldn't be able to sleep well when they returned.

Perhaps the Ice Dragon Snow Mountain would be strictly monitored by the Dong Huang Nation for 24 hours.

"That beast tide..." He Biao said.

"The beast tide was also caused by the Ice River Giant. It's revenge on the Icefield humans and the clansmen who betrayed it," Ice Dragon said.

This time, everyone's confusion was completely cleared.

So, Ice Dragon was taking the blame for the Ice River Totem the whole time?

"In that case, we'll bid farewell first," Lu Qingyi said.

Since this Ice Dragon didn't have any thoughts for the time being, they would talk about it later.

Moreover, they weren't qualified to negotiate with this Ice Dragon.

Since they knew the situation here, it was easy. Later on, there would be higher-level Beast Tamers coming.

"Wait," Ice Dragon suddenly said and looked at everyone.

"You won't use that forbidden weapon to blast the snow mountain when you go back, right?" Ice Dragon was suspicious.

In theory, these people were far too different from the group of Icefield humans it had promised to protect.

It didn't know what the other party was thinking.

Everyone was stunned.

No, no, of course not!

"No..." Lu Qingyi was speechless.

“That’s good. I’ve shed blood for the human race, and I’ve done meritorious service for the human race. I can be considered your guardian dragon. I was sealed by the Time Emperor, so you guys have to show some respect.” Ice Dragon was still worried. “Actually, it’s not impossible to think about completely destroy the Ice River Totem now. We have to take our time to consider this.”

Ice Dragon thought about it. It had slept long enough. After finishing the Ice River Totem, it would be good to go home and take a look.

“How about this?” It glanced at everyone, especially Shi Yu, who came in with the Ice Dragon Whisker.

“I’ll return the keepsake to you.” Ice Dragon blew back the Ice Dragon Whiskers as if nothing had happened.

“Well, the energy in that one is almost exhausted. Give you one more.”

It blew another one at Shi Yu.

Shi Yu took two Ice Dragon Whiskers with a stunned expression.

However, what stunned it the most was that the second Ice Dragon Whisk was filled with vitality and even contained faint dragon might!

“The second one has my Dragon Might. With this, the ferocious beasts on the snow mountain won’t attack you.”

After Ice Dragon finished speaking, Shi Yu was still in a daze.

Because...

Skill: Skyfrost Cold Energy

[Skill Level]: Super Level

It’s a dual skill of ice and time. It’s a special type of ice power. After mastering it, you can transform your ice power into Heavenly Frost Cold Energy that can freeze time.

[Do you want to record?]

Ever since he entered the ruins space, Shi Yu had always felt that the time flow here was a little strange.

Holy shit, what the hell was this skill?

If Shi Yu remembered correctly, the frost dragon didn’t have this skill at all. How come the frost dragon even had a time-type skill? This wasn’t scientific.

However, the ice dragon in front of him was indeed different from other frost dragons. Shi Yu was silent for a moment, wondering if it had something to do with that Emperor Shi.

Previously, when he learned about this history, he was very excited. He thought that it was an emperor with the same surname as him. Perhaps there was another fate.

Later on, after careful investigation, he realized that the other party was called Emperor Shi (Time) purely because he had time-element talent.. His surname was not Shi at all, and this made Shi Yu happy for nothing!

Chapter 146: Officially Becoming a member of Bureau 11

“Roar!!! (Farewell!!!)”

After bribing Shi Yu and the others with two Ice Dragon Whiskers, Ice Dragon was relieved and let them leave.

Ice Dragon Snow Mountain.

After the group left the ruins space, they were stunned.

They kept feeling that this little female dragon, no, the old female dragon was a little strange.

“Let’s go first.”

At this moment, everyone’s emotions were very complicated.

They didn’t expect that the Ice Dragon Ruins didn’t seal the Ice Dragon overlord, but instead a totem-level creature thousands of years ago.

“Let’s go, let’s go. We’ll talk when we get back.”

Everyone took another look at the Ice Dragon Ruins and left directly.

They flew out of the snow mountain.

“Good lord, this is impressive.”

During this process, on the Ice Feather Bird, Commander He Biao suddenly became talkative.

This was too scary, there was too much information.

Moreover, the ancestor of their Icefield Human Race was actually the Ice Dragon General under Emperor Shi...

“I knew it. I’m a bit of a general myself, after all.”

“General my ass. Mister regiment commander. What should we do next?” President Feng rebuked.

“We definitely have to find an opportunity to completely eliminate the hidden danger,” Hall Master Lin said.

Since it concerned a totem, he definitely couldn’t place everything on that little female dragon.

After all, it had been separated from the Beast Tamer for more than a thousand years. Humans also didn’t know what it was thinking.

“Leave this to me.”

“When I return, I’ll immediately contact Bureau 11.”

On the Green Phoenix, Lu Qingyi spoke.

Indeed, Ping Cheng and even Icefield City did not have the ability to solve their own problems now.

They had to rely on the power of the country.

“Then I’ll leave it to you,” President Feng said.

At the moment, he could only report the news.

“Speaking of which, that ice dragon feels very strong.” Commander He Biao looked at the two ice dragon whiskers in Shi Yu’s hand.

“Dragon might, transcendent level deterrence...”

“And I remember that even an overlord-level dragon can only live for a thousand years.”

“It’s been here for at least two thousand years...”

Shi Yu looked up slightly.

Indeed, this ice dragon was ridiculously strong.

The proficiency of Dragon Might was so high.

“It’s very normal. After all, it’s a battle beast of an ancient general,” Lu Qingyi said. “Moreover, that shouldn’t be considered an ordinary ice dragon.”

“From its appearance, I can tell that there’s a big difference between it and ordinary ice dragons.”

“The ice dragons are a middle-level overlord race. As for this ice dragon, I feel that its race has reached a high-level overlord.”

“It should be thanks to the reward from Emperor Shi.”

“According to the ancient books, after the era of totems ended, Emperor Shi obtained many treasures and rewarded them to his generals to help them increase their strength. Perhaps that ice dragon mutated and evolved because of this.”

“As for lifespan, don’t you feel that the flow of time in the ruins is a little different from the outside world?” she asked.

Apart from Shi Yu, the others were stunned.

“If I’m not wrong, that ruin space should be filled with Heavenly Frost Cold Energy.”

“This is a super skill with both ice and time elements. It can slow down the flow of time within a certain range. When trained to perfection, it can even freeze time. It’s one of the strongest super skills since ancient times.”

“I’m afraid that only Emperor Shi’s subordinates can master such a powerful time skill.” Lu Qingyi took a deep breath and said.

“That ice dragon, as the representative battle beast of the Ice Dragon General... Although it hasn’t reached the totem level, its battle power is definitely close to or even enough to fight against the totem.”

“Heavenly Frost Cold Energy...?”

This was clearly the first time the three Masters had heard of this skill.

Beside them, Shi Yu felt good that he was in the know.

Mere Heavenly Frost Cold Energy...

Was it very impressive?

I’ve already replicated it!

Although he couldn’t teach it yet and didn’t have anyone to teach it to,

But in the future... Shi Yu had already imagined the scene of his pet using the Heavenly Frost Cold Energy to cool him down in the summer!

“This skill sounds so ridiculous. Ice Dragon relied on this ability to gain eternal life?” He Biao clicked his tongue.

“Staying in the Ice Dragon Ruins for two days, will only one day pass in the outside world? Then, this is a cultivation Holy Land.”

“Perhaps. There are similar time faculty training venues in Imperial Capital University,” Lu Qingyi said.

Time... had always been the strongest attribute.

When such an attribute landed on a dragon, it would be even more invincible.

“When can you guys tear a giant dragon apart?”

As he listened, Shi Yu looked at the three babies on him.

After seeing the Ice Dragon, Eleven, who had always wanted to tear a dragon apart, was very quiet.

Buggy was also very obedient as if it had seen its grandmother.

Baby Ginseng was even more afraid that Ice Dragon would eat it.

Shi Yu felt that he had given them deterrence for nothing. They had to show some dominance!

Eleven and Buggy looked helpless. It wasn’t impossible to tear a dragon apart.

The premise was that Shi Yu had to increase points!

Now, they felt that they were the ones who had been torn apart.

Ginseng Baby had the same thought. As long as he added enough points, it could do it too.

A moment later.

The five of them flew back to the city wall outside the snow mountain.

“President Feng, Regiment Commander He,” Lu Qingyi said to the two of them.

“Alright.” The two of them immediately understood that during this period of time, Ping Cheng, no, the entire icy plain had to strengthen their protective awareness.

After leaving the snow mountain, the two of them immediately went to their posts to give the news.

Lin Hongnian also separated from Shi Yu and the others for the time being.

Only Shi Yu and Lu Qingyi were left behind. They looked at the snow mountain in the distance.

“Senior, is the assessment for Division 11 completed like this?”

Shi Yu asked. The ruins had been cracked, but not completely.

If he cracked it all, it would be a big deal. Now that he had asked for the truth, it should be over.

“It’s enough.”

Lu Qingyi said, “Leave the rest to Bureau 11 to handle. As for you, prepare to start school. University life is very beautiful.”

“By the way, give me the first Ice Dragon whisker. As for the last one the Ice Dragon gave you, you can take it with you first. It’s surrounded by deterrence from an overlord. It might have some special use in the future.”

“Alright.” Shi Yu handed the Ice Dragon Whisk to her.

“I have something for you too.”

After putting away the dragon whisker, something appeared in Lu Qingyi’s hand.

It was a black bracelet.

“What’s this?” Shi Yu was stunned.

“The function of the ruin ring is similar to the ruin bead.”

“The predecessor of this ruin ring is a top-notch legend’s Beast Taming Space. This is a tool assigned to you as an official member of Bureau 11. I’ve told you before.”

“There’s an index prepared for you inside, as well as a certificate for an official member of Bureau 11.”

“From today onwards, you’re an official member of Bureau 11.”

Lu Qingyi had long prepared everything, but she didn’t expect that she could pass it to Shi Yu so quickly.

Shi Yu looked at the ruin ring and instantly felt that he was about to take off.

Then, Lu Qingyi added something that made Shi Yu even more excited.

“By the way, the index also contains a special meditation method.”

“This is a meditation method improved by the founder of Bureau 11. Only official members of Bureau 11 can learn it. Beast Tamers need to meditate in the ruins space. The efficiency of meditation is several times higher than normal meditation. Remember to use this meditation to learn. Your Beast Taming Space level should be able to increase a little faster.”

You should have said so earlier!

Shi Yu felt that this was what he needed!

Shi Yu took the ruin ring and said with anticipation, “This meditation method can also use resources such as the Space Spirit Stone to assist in cultivation.”

“Of course.” Lu Qingyi said, “As long as there are enough resources, maybe you can reach level three in the Beast Taming Space before school starts.”

“It’s easier before level three. And it’s harder after level three. However, after graduation, if you have enough resources and enough cultivation time, you might be able to reach level six in the Beast Taming Space.”

“Senior, what level was the Beast Taming Space when you graduated from university?”

“Level five,” Lu Qingyi said.

“She reached the master level in university?” Shi Yu thought to himself. As expected of someone who also cheated.

“Yes, I was still weak at that time. There were relatively few ruins that I could explore, so it wasn’t the time for my strength to rise...”

Human language?

The corners of Shi Yu’s mouth twitched. Becoming a master after graduating from university, this was still called not reaching the explosive stage of strength?

Shi Yu quickly fell into deep thought. Speaking of which, Senior Lu was from Ancient Capital University, right?

“Senior, have you participated in the National League? The one that Senior White Brook mentioned...”

Even with Lu Qingyi, Ancient Capital University had never gotten first place?

“I was pulled by the principal to participate once, but I lost to a monster from the Imperial Capital University.”

Lu Qingyi said helplessly, “Why do you have to mention that? Hurry up and go back. I have to do business too.”

“You don’t have to worry about the Ice Dragon Ruins.”

“Alright.” Shi Yu still wanted to trouble himself. He didn’t have the strength to trouble himself.

If he wanted to think about the Ice Dragon Ruins, he might as well think about how to avenge his senior and sweep through Imperial Capital University. This was more realistic.

...

After leaving the snow mountain and separating from the others, Shi Yu went straight home.

Just as Lu Qingyi said, whatever happened after that was none of his business.

At this moment, Shi Yu had already satisfied his curiosity. It was very comfortable, but he wasn't completely satisfied.

Now, he wanted to know how the first generation of the Dong Huang Dynasty was destroyed when the Shi Emperor was so impressive and had so many experts under him.

The capital of the Dong Huang Dynasty was the ancient capital. He felt that after school started, he might be able to take a look at the relevant ruins.

As for now, the most important task was to move.

After getting the new ruins space, Shi Yu took a look and immediately understood the difference between the two ruins.

The size of the ruin ring was almost several times that of the ruin pearl.

The amount of energy inside, the strength of the space, and the speed at which it absorbed energy from the outside world were completely incomparable to the ruins.

"Wuu wuu!!" "Ji ji ji!!" "Yiya yiya!!"

Compared to the environment of the ruins pearl, the three pets also clearly liked the ring space with more energy.

After Shi Yu threw them in, the three of them immediately got high.

Upon seeing this, Shi Yu was enlightened.

"Alright, Ruin Bead, you're useless."

"Be good and stay in Ping Cheng to become the breeding base for giant pandas."

In the training villa, Shi Yu immediately started moving things.

The most important items, the Space Spirit Stone and the Ice Dragon Whisker, were all moved to the ruin ring by Shi Yu. In an instant, the ruin bead was completely desolate.

Initially, Shi Yu wanted to immediately inform Old Lin and Old Feng to come and collect it, but considering that they were definitely busy dealing with the Ice Dragon Ruins, he wasn't in a hurry. He would talk about it later.

At the same time, Shi Yu looked at the Eleven Bureau's official identification documents and the box containing the index.

Shi Yu didn't care about documents. He didn't want to see his handsome face anymore. He was tired of it.

He opened the box and took out the cell phone model index.

It was a very ordinary-looking silver-white cell phone. There were also two invisible lenses in the box.

This mirror shard could make Shi Yu feel like he was looking at a virtual reality video. He instantly knew the information about all the pets and spiritual plants in front of him, as if he was using an omniscient hack.

In addition, through this, he could also control the growth of the pet's energy at any time and place.

Shi Yu did not wear the lens first. Instead, he chose to turn the index on. He picked up the index and pressed the switch. The screen slowly lit up.

The next moment, Shi Yu revealed an unhappy expression.

A pleasant female voice came from the index...

[Archeological Type 1111 intelligent index [unnamed] is at your service. Please enter the opening password.]

"F*ck, why is he naming things again?"

Chapter 147: It's My Turn to Cheat

Shi Yu held the cell phone index and fell into deep thought.

He had specially asked for a non-machinery life form to avoid some unnecessary trouble.

However, he had forgotten that even ordinary cell phones might have artificial intelligence and virtual assistant programs!

The problem was, why wasn't it pre-named already?

"What does 1111 mean?"

Shi Yu's expression darkened.

"Must it be named..."

"Then I'll call you 'index'." Shi Yu dug his ears and said perfunctorily, "In the future, I'll rely on you for information that I don't know."

After inputting the opening password, Shi Yu named the virtual assistant.

[Name successful.]

[Archeological 1111 intelligent index [index] is at your service.]

Shi Yu smiled. This virtual female voice was pretty nice.

Index girl.

Without thinking too much, he searched for Eleven, Worm, and Ginseng Baby.

These three...

Shi Yu was silent. The three of them were grimacing as they looked at the Ice Dragon Whisker he had put away.

“Wuu!!!”

“Ji!!”

Eleven and Buggy widened their eyes and sweated as they came into contact with the deterrence of the Ice Dragon Whiskers.

They used the pressure of the dragon’s might to train.

“Yi!”

Baby Ginseng wanted to try, but it didn’t dare to.

Shi Yu came to their side and looked at them speechlessly.

“Catalog, test energy value.”

Shi Yu had already put on the invisible lens. As he gave the order, some numbers immediately appeared in front of his eyes.

Floating on Eleven was “7596”.

Floating on Buggy was 3046.

Floating on top of Baby Ginseng was 7408.

“Buggy,,,” Shi Yu muttered to himself.

It wasn’t even half as high as Eleven and Baby Ginseng.

No wonder it was panting while flying. It was short and weak.

“Ji?” Buggy turned around with an expression of ‘I’m very sorry for being a worm’.

It was just a green worm, why was Shi Yu making things so difficult for it?

“Alright, we can see your specific energy points now.” Shi Yu smiled and said to the three pets,

“Eleven, you’re 7596. Highest. Baby Ginseng, you’re 7408. Buggy, you’re 3046, currently at the bottom.”

Eleven and Baby Ginseng also turned around.

“Wuu!” Eleven acted as if it was only natural.

“Yi!” Baby Ginseng was surprised that it was so much taller than Buggy.

But soon, its face fell.

With high energy levels, what was the point of not having offensive skills?

“Yi...” Baby Ginseng looked at Shi Yu with anticipation.

Teach it deterrence first!

“It’s not impossible,” Shi Yu said. “There’s no hurry. I’ll teach another one first.”

“\ (☼◡◡) /”

Really?

“Eleven, Buggy, play by yourselves.”

“I’ll go modify the ginseng baby. I’ll let it fight with you guys later.”

On this trip to the snow mountain, Shi Yu copied two skills.

One was an Energy Fruit, the other was Heavenly Frost Cold Energy.

Among them, the Energy Fruit was the attack skill that had to be taught to the baby ginseng.

As Eleven and Buggy looked at each other, Shi Yu pulled Baby Ginseng away.

A moment later.

Baby Ginseng prepared the sweet aura and looked at Shi Yu excitedly.

“Yi...”

What skill was it?

It was extremely curious.

“You’ve actually seen it before.” Shi Yu smiled.

Then, he reached out and pressed on Baby Ginseng’s head.

“Energy Fruit, teaching.”

“After learning this move, you have to remember one thing.”

“The art of battle is explosions!”

As the light flowed in, Shi Yu breathed in the sweetness before heaving a sigh of relief.

At this moment...

In the ruins, Baby Ginseng was completely stunned.

It was as if a cook, no, ingredient, suddenly had a pile of explosives battle experience.

The relevant usage method of the Energy Fruit was instantly mastered by Baby Ginseng.

[Skill]: Energy Fruit (Initiate)

“Yi...” After Baby Ginseng recovered, it looked at Shi Yu in a daze.

“Try it?” Shi Yu said.

“Yi!!!” Baby Ginseng expressed its understanding, and its expression immediately became serious.

Buzz!!!

It directly multiplied into a height higher than Shi Yu, like a super big white carrot.

After becoming bigger, it lowered its head to look at Shi Yu before extending its short hand.

In the next moment, countless light spots lingered on its short palm as it quickly condensed a white fruit with green leaves. It looked like ginseng or a radish.

The fruit emitted a faint fragrance and was very tempting. However, compared to Baby Ginseng's sweet aura, it was clearly worlds apart.

"Yi!!" After creating the Energy Fruit, Baby Ginseng was abnormally excited.

It directly pulled at the leaf and assisted it a few times, throwing it out like a stone.

Although Baby Ginseng's strength wasn't great, the fruit still quickly reached the sky 100 meters away. At this moment, with a thought from Baby Ginseng, "Boom!" The fruit immediately changed in the distant sky!

The white fruit first flashed with a dazzling white light, then a loud bang was instantly heard. Then, like a super explosive, the white light kept expanding.

The moment Baby Ginseng's will detonated the fruit, a huge energy rushed out of the fruit. With a world-shaking bang, the rolling energy tide rose into the sky like a sandstorm.

The white smoke rolled up with a bang and swept up energy fluctuations. It was like enchanting white roses that instantly bloomed in the sky.

The strong wind could be clearly sensed even from 100 meters away.

"Yi..." Baby Ginseng was stunned.

Was this the destruction caused by it??

Was this the destructive power of a baby ginseng's skill?

It didn't make sense anymore.

At this moment, Baby Ginseng had the urge to cry. It had finally mastered a lethal skill!!!

Shi Yu had his hands behind his back beside it, looking profound.

"In the future, if you encounter bad people who want to eat you, don't resist first."

"Be good and create an energy fruit for it. When it's placed in its mouth, you'll directly detonate it!"

"However, if you want to deceive the world, you have to train the Energy Fruit well first and integrate the appearance of the sweetness and nutrients inside, understand?"

"High-level hunters often appear in the form of prey..."

Ginseng Baby: (๑ _ ๑)

Although it felt that it didn't match its aura of a towering emperor sweeping through the world, the Beast Tamer probably knew what he was doing.

"Hurry up and show Eleven and Buggy your new skills."

"Yi!!!" Baby Ginseng was excited. Yay, yay, yay!! It liked Shi Yu the most.

After saying that, it immediately shrunk to its normal state and ran towards Eleven and Buggy.

Looking at this fellow, Shi Yu touched his chin. He felt that the Ginseng Baby was just like the Frost Ancient Tree. It couldn't run fast...

"Under the Earth Chain state, it's even harder to move."

"In the future, Baby Ginseng is destined to be like other plant-type pets. It's destined to stand still."

"Looks like I have to find a skill to increase its defense..."

"Well, in terms of attack power, Baby Ginseng is temporarily good enough, but this skill isn't very agile. I still have to modify it."

The Energy Fruit was a high-level skill. Although Baby Ginseng had only mastered the entry-level Energy Fruit, its power was still very strong when combined with its more than 7,000 energy points.

It was even possible for a fruit to break through Little Yin's Zonyan Rock Beast.

As for the brittle skin of the Sky Crystal Butterfly, as long as it was hit, it could only be insta-killed.

This was actually just the initial state of the Energy Fruit.

The entry-level energy fruit was only able to detonate the wood-element life force that was injected.

After the proficiency level, one could add another attribute power, just like the Ancient Frost Tree.

For example, the Ancient Frost Tree had added ice power to disguise the Energy Fruit as an ice-element spiritual fruit. In addition to the power of the energy explosion, the Energy Fruit that exploded like this also had some freezing effects.

Baby Ginseng was temporarily at a disadvantage because it didn't master any other attack power... However, Shi Yu had the skill index, so it wasn't a problem after this.

Then, for proficient, perfection, and every major increase in proficiency, the Energy Fruit could be injected with an additional power that could be disguised as a top-grade spiritual fruit with multiple elements. In a sense, the Energy Fruit was similar to Zhang Qianyi's Elemental Coordination Talent, but there was a certain upper limit. It was a super limited version.

...

On the other side, after finally learning the attack skill, Baby Ginseng ran over excitedly to show off to Eleven and Buggy.

Just now, Eleven and Buggy also sensed the blast.

At this moment, when the baby ginseng came over, they couldn't help but let it demonstrate again.

“Yi! (Alright!)”

Then, Baby Ginseng demonstrated.

A white rose bloomed in the sky again.

“Yi!!”

Baby Ginseng looked pleased.

Eleven and Buggy, on the other hand, showed an expression that was only so-so.

When Shi Yu came over...

Baby Ginseng seemed to have experienced something devastating as it sat on the spot and cried.

Eleven and Buggy looked innocent.

Eleven expressed that it only hardened its whole body and crushed an Energy Fruit.

On the other hand, Buggy expressed that it had entered into a concealed state and casually let the baby ginseng blow fruits up a few times.

They didn't do anything overboard at all.

“Isn't that too much?”

“...” Shi Yu was speechless.

How many times did the two of you upgrade points? How many times did Baby Ginseng add points? Was it appropriate to bully it like this?

Don't blame him if Baby Ginseng wouldn't work hard the next time he upgraded points for them...

Ginseng Baby: QAQ I'll remember this.

“Alright, I'll talk about the next plan.”

After Shi Yu came over, he directly got to the point.

“There are still nearly ten days until school starts. Next, I'll try my best to meditate with new meditation techniques and the Ethereal Stone to see how the effect is.”

“It's best if I can raise the Beast Taming Space to level three before school starts. At that time, I can contract a ginseng baby.”

Baby Ginseng blinked.

After the contract, it didn't have to guess what Eleven and the insect's cries meant.

“But we shouldn't be in Ping Cheng for the next ten days.”

“I plan to pack up and leave for the ancient capital immediately.”

“At that time, firstly, I’ll ask Dean Hao to help build the equipment for you to be evolved into, and secondly, it’s time to collect credits to exchange for your evolution materials.” Shi Yu smiled.

“Well, and after the contract, Baby Ginseng, I’ll take you to challenge other pets to fulfill your battle dream.”

Shi Yu’s words made the eyes of the three pets light up.

“Wu!!” “Ji!!!” “Yi!!!”

...

After making the decision, Shi Yu began to meditate and cultivate as he prepared.

During this period, he asked the school to help him prepare a billion yuan worth of Iron-eating Beast evolution materials.

In addition, he also left a message for President Feng and Hall Master Lin to take over the ruins pearl and discuss the Iron Eater Village plan.

“Damn, so fast.”

As for Shi Yu, he established his connection within the new ruin space through the ruin ring and slowly tried the special meditation technique that Senior Lu had given him.

The new meditation technique wasn’t difficult. He only made some modifications to the original foundation.

To be specific, it could be described using a gaming example: In the past, it was as if he was always one of his small accounts fighting monsters to level up, but now, he was using his main account. By using both accounts, he could raise his alternate account to level up and fight monsters to collect experience, and the efficiency of leveling up would directly double!

The ruins left behind by the Legendary big boss were big accounts, while his own ruins were small accounts.

Now, Shi Yu knew why Eleven and the others liked to train in the ruins space.

“At this rate, I might really be able to raise the Beast Taming Space to level three in ten days...”

Shi Yu picked up an Ethereal Stone and said silently. Strong physique+special meditation technique+spatial resources... This was an upgrade acceleration hack!

Chapter 148: Returning to the Ancient Capital

When his meditation speed increased and he could make the Beast Taming Space have changes every second, Shi Yu felt that he had fallen in love with the feeling of meditation.

As long as he worked hard for a few days, his strength would immediately take a qualitative leap. It was completely different from the feeling of needing to bitterly cultivate and meditate for a year and a half to gain something.

The former could make one unable to sleep all night, while the latter would only make one want to work hard more and more.

However, after Shi Yu's meditation speed increased, the energy consumption of the Ethereal Stone increased faster when he used the Ethereal Spirit Stone to assist in his cultivation.

At this rate, he didn't know if these Ethereal Stones could last until he reached level four in the Beast Taming Space.

"How am I going to do this..."

Shi Yu didn't care about the consumption of the Ethereal Stone. Compared to the evolution materials, the current consumption of the Ethereal Stone was nothing.

At this moment, as he strengthened the Beast Taming Space, Shi Yu studied the foundation of all Beast Tamers.

When the Beast Taming Space reached level seven, it was said that the Beast Taming Space would undergo a qualitative change, producing some special abilities.

For example, the "etherealization" mastered by Shi Yu was one of the standard abilities used by legendary Beast Tamers with the help of the Beast Taming Space.

These abilities were not awakened by oneself, but developed by generations of Beast Tamers.

For example, the method of separating the Beast Taming Space from the body and transforming it into a mystic realm space and sealing space was developed by the Beast Tamers themselves.

Therefore, there were actually many secrets hidden in the Beast Taming Space. To a curious person like Shi Yu, he also wanted to research special abilities to play with.

"I don't have high expectations. I just hope that you can mature a little more by yourself. It's fine even if you're slower. Don't keep making me meditate. I can still take it now, but when my level is higher... No one wants to do this all day..." Shi Yu advised his Beast Taming Space.

He, Shi Yu, had to study this ability and benefit all the Beast Tamers.

...

"Aiyo, Brother Shi Yu, you're really my lucky star!!"

After busying himself with the matters regarding the Ice Dragon Ruins, President Feng hurriedly pulled Lin Hongnian along to visit Shi Yu.

When he learned that Shi Yu had directly assigned the ruins pearl to Ping Cheng through his identity as Division 11, President Feng immediately teared up.

It was good to have someone close in his city. If it was handed to the Archeological Association, how could it be distributed so quickly?

He didn't dote on Shi Yu for nothing.

President Feng, who was in a suit and leather shoes, rubbed his hands excitedly. He felt that he wasn't far from being promoted. Once Ping Cheng developed, would he still have to worry about not being able to advance? Once he advanced, would he still have to worry about not being able to raise his Beast Taming level?

"Old Lin, I think Shi Yu's suggestion is pretty good. How about we work together to turn Ping Cheng into a village of iron-eating beasts?"

"With a mystic realm as the foundation, it will be very effective in two to three years. At that time, Ping Cheng's economic development level might not reach the standard of a second-level city, but there's still hope for them to survive in Icefield City."

Hall Master Lin, who was pulled over by President Feng, was very realistic. "I don't want to talk about dreams with you. I only want to talk about money now. After the benefits are distributed, everything can be discussed."

Many parties in Ping Cheng would definitely be able to cooperate and win. However, the problem now was that everyone wanted the most benefits.

President Feng's expression fell. "Old Lin, you've changed. You're no longer the man who gave up everything for the Iron-eating Beast."

Lin Hongnian: "Then you don't know how much the evolution of the Iron-eating Beast costs. I don't have the money for my daughter's evolution materials yet, nor do I have the money for my wife's Iron-eating Beast evolution materials... My future grandchildren..."

"I'm doing this for Ping Cheng! Have you forgotten how we protected Ping Cheng during the beast tide back then? Don't you want Ping Cheng to become better?"

"It doesn't matter if Ping Cheng is good or not. They're all ingrates. Even if we nurture talents, we can't keep them in the district. The extra resources might as well be given to Old Wang, Old He, and the rest of the strengthening clans." Hall Master Lin was very open-minded.

"Then it's settled. When the time comes, the bulk of the money will be used to strengthen the Beast Taming Troops. It's not bad to increase our military strength." President Feng and Hall Master Lin spoke one after another, making Shi Yu, who was drinking tea beside them, speechless.

"Uncle Feng, Uncle Lin, maybe you guys should go back to discuss that..." Shi Yu wanted to see them out.

They could distribute them however he wanted. Shi Yu wanted to rely on his shares in the breeding base to give Eleven some food.

"We all agree that we should get an Iron-eating Beast Knight statue as a scenic spot. What do you think?" The two of them looked at Shi Yu. After Shi Yu became a legendary Beast Tamer, this would be a holy land...

Shi Yu: “?”

“I’ll sue you for violating my portrait rights.”

“There’s an endorsement fee.” Old Feng said, “A lot.”

Shi Yu’s eyelids twitched. “Not even if it’s a lot. This concerns my reputation...”

A moment later.

Shi Yu sent the two away with a righteous expression.

After sending them away, Shi Yu was worried. He kept feeling that the two of them were unreliable.

The one who he felt was the most reliable was still Senior Panda. Shi Yu heard that she directly contacted her maternal grandmother’s clothing factory before the release of the Iron-eating Beast’s evolutionary paper and mass produced various panda clothes...

It was fine if she couldn’t afford the Iron-eating Beast. There were also the Iron-eating Beast toys and the Iron-eating Beast clothing here to sell. Senior Panda was really an understanding person.

“It’s a long road to turn the Iron-eating Beast into Dong Huang’s national treasure pet.”

First, he would build an Iron-eating Beast Village and make Ping Cheng a big tourist city. This was the first step. Then, he would increase the upper limit of the individual achievement of a certain Iron-eating Beast. This mission belonged to Eleven, and this was the second step. As for the third step, it was to let all Iron-eating Beasts have the evolution path of an overlord race...

Letting the Iron-eating Beast become a new national treasure was also an insignificant wish of Shi Yu, a transmigrator from the Heaven Dao. Apart from wanting to know all the broken history, he didn’t have any big dreams. He could only use these boring nurturing goals to fill his empty heart.

...

Two days later.

Shi Yu, who was still in Ping Cheng previously, had returned to the ancient capital.

This time, he wasn’t prepared to go back in the short term.

After returning to the ancient capital, Shi Yu first found Director Li.

In the department head’s room, Director Li handed a student card to Shi Yu with a smile.

“Student Shi Yu, guess how many credits there are?”

“5,000?”

Shi Yu and Chief Physician Li were pretty close now. They did not treat him as outsiders. They sat down and chatted with him.

When new students entered the school, the school would allocate basic credits.

Using credits, students could exchange for various resources in the school's resource bank or open training facilities.

At that time, Senior Panda and the others had told Shi Yu that if the first place in the vocation assessment entered Ancient Capital University, he would be able to get at least tens of millions of resources.

The ratio of credits in Ancient Capital University was about 10,000 for one credit.

Therefore, Shi Yu estimated that 5,000 credits could be exchanged for 50 million resources in the resource bank.

This resource... could slightly solve the pressing problems.

"Too few!" Chief Li's face was squeezed into a pile.

"8,000?"

"No!"

"A total of 10,000 yuan." Chief Li said, "Are you surprised? Are you surprised?"

"Apart from the credits allocated for the professional assessment, you also have a scholarship when you jointly discovered the evolution of the iron-eating beast in the archeology of the Ancient Capital University."

Shi Yu: "Oh."

Director Li: "?"

"Why don't you look happy at all?"

Shi Yu said, "Yes, I'm very happy."

He was happy, but not completely. The Nine-tailed Fox Heart in the resource warehouse was worth 15,000 credits, and the Tears of the Void was worth 18,000 credits, but he still couldn't afford it.

Including the 10,000 credits, the assets he could use to prepare the insect evolution materials should be close to 130 million...

It was still not enough. He felt that he had to raise at least 300 million to meet the requirements of the insect's evolution materials.

One was a spiritual-type, while the other was a spatial-type.

However, the problem wasn't very big. Putting aside whether the worm needed resources of this level, Shi Yu had already found a way out if resources of this level were suitable for it to absorb.

He had heard that the rich overlord of the Resource Chamber, the Gem Cat, was very rich. Moreover, it liked to collect strange things. The price was very high. Shi Yu planned to sell a bunch of worm silk when the time came. He really couldn't afford so many pets. Now, as expected, he still had to use pet labor.

Director Li: "Sigh, you young people... don't have any concept of money anymore."

“When I was in college, my dad gave me 10 million yuan for my living expenses. I was so happy for a long time.”

Shi Yu :”...”

Damn rich second-generation heir.

School had yet to officially start, and the new students from all over the world had yet to arrive at school. With the help of his connections, Shi Yu obtained the student card in advance and the key to his dormitory.

Although the Iron-eating Beast Research Institute was not small, each student’s individual dormitory was not bad...

The size and luxuriousness were basically not inferior to Shi Yu’s training villa in Ping Cheng. It could be said that the school had specially prepared a training villa for each student. This was also to facilitate the students’ interaction with their pets.

The reason why the total area of Ancient Capital University was not inferior to the area of a city in Ping Cheng was this.

With a new place to stay, Shi Yu decided not to squeeze into the Iron-eating Beast Research Institute. He directly moved all the things from Ping Cheng here, planning to treat this place as his new home.

“Huh?”

“Ji?”

“Yi?”

As he walked through the maze-like Ancient Capital University dormitory area, Shi Yu finally found his super dormitory after a long time. He pulled Eleven, Worm, and Ginseng Baby out of the ruins with a sense of relief.

There was also a pile of daily necessities moved from Ping Cheng. They were also thrown out of the ruins space.

“Alright, it’s your turn to work. I have to meditate to build a home for you. I’ll take care of everyone, while you take care of the family.”

Eleven, Worm, Ginseng Baby :”...”

Eleven looked at Buggy. This time, Buggy looked at Baby Ginseng. Although their language was different previously, after its hard work, Baby Ginseng could roughly understand what it and Eleven meant.

“Ji! (Don’t forget to make your new home fragrant with sweet aura.)” Buggy gestured as he used his worm silk to make an emoticon for Baby Ginseng.

“Wuuu!! (All the best, this is also a part of cultivation!)” Eleven encouraged. Everyone had gone through this before.

Ginseng Baby: “QAQ, I’ll remember this”, it thought.

Therefore, when a new teammate joined the team, it could order others around.

At the same time, in the dormitory, Shi Yu had just pulled open the curtains. Before he could sit down and rest, his cell phone suddenly rang. He took a look and saw that it was Dean Hao of the Mechanical Academy. It was this person who had completed the evolution equipment of Hall Master Lin and the other three Iron-eating Beast Tamers.

Shi Yu picked up the call, and Director Hao's voice immediately came from the other side.

"Shiyu, the mineral materials have all been prepared. Next, it's up to your design requirements. Do you have any ideas?"

"Yes, yes, I just prepared it yesterday.. I'll send you the design plan now," Shi Yu said.

Chapter 149: Contracting Ginseng Baby

As school approached, Shi Yu and Eleven discussed the appearance of the evolution equipment overnight.

In the end, they unanimously decided not to use fancy wings, shields, and other equipment.

In fact, the most important reason was that apart from having strong defense and high hardness, the evolution armor had no other special properties.

Even if he got a pair of wings, it would be flashy without substance. It wouldn't be of any help. It wouldn't really be able to fly like a bird.

This might also be the reason why in the historical video Shi Yu had seen, the iron-eating beasts' armor only protected their weaknesses.

"Sigh, in the end, I'm still poor. The materials are limited." After Shi Yu sent the evolution blueprint to Dean Hao, he felt a sense of sorrow.

In the end, it wasn't that they didn't want to be fancy, but the funds didn't allow it.

Otherwise, wouldn't it be cool to set up two cannon barrels to release super electromagnetic cannons? It looked like he could only use hardening substances to simulate it later.

1

In fact, there was another important reason. It was because Eleven's battle style was too fancy.

Eleven didn't like to fight with weapons and shields. Instead, it liked to fight in close combat with fists. Compared to the super electromagnetic cannon, it preferred the profundities of Thunder Armor.

Considering Eleven's battle style, perhaps it was more suitable for a full-body armor.

In the end, Shi Yu combined the armor structure of Master Lin and the others' Iron-eating Beasts, as well as the image of the Runic Battle Bear, Battle Tyrannosaurus, Mechanical Bull, Mecha Super Dream, and Iron Man in his mind. He tried his best to design an evolution equipment that matched its battle style.

However, Shi Yu still hoped that there would be some leftover materials that could be used as weapons for super-electromagnetic cannons for Eleven.

At the moment, Eleven was of the metal element. However, due to the growth potential of the Maximum Level Hardening, Shi Yu planned to shape its second attribute in the future, thunder element.

Let it cultivate the Electromagnetic Force, one of the four basic powers of the universe. This was very suitable for the metal element. When the time came, it would be invincible if Eleven could replicate a super-level thunder skill like "Heavenly Frost Cold" that could modify the power of lightning.

"Dean Hao, how long will it take to complete this set of equipment?" After a while, Shi Yu returned a call to Dean Hao.

The other side pondered for a moment and estimated. "I'll try to finish it for you before school starts, but do you really plan to multiply the iron-eating beast and have it wear huge armor..."

"Yes."

Dean Hao thought that young people these days were really rich. This was the cost of one billion evolution materials.

Perhaps after evolution, the iron-eating beasts would become a high-level monarch race, approaching the level of overlords!

"I'll inform you when the time comes," Dean Hao said.

With such a large amount of materials, it would take him a lot of effort to create armor even with the support of a mechanical life form.

"Thank you very much." Shi Yu kept thanking him. He might be able to see Eleven evolve before school started.

Shi Yu looked forward to it a little.

Training... The most important thing now was still training.

After entrusting the matter of the evolution equipment to Ancient Capital University, Shi Yu began to meditate wholeheartedly again.

About five days later.

Under the strengthening of his meditation, more than half of Shi Yu's gray Beast Taming Space Barrier began to turn white.

This meant that the strength of his Beast Taming Space had already touched the threshold of level three!

Shi Yu was in a good mood and continued to cultivate in peace.

Two days later.

Shi Yu cultivated in seclusion for a week in the dormitory of Ancient Capital University.

On this day, he slowly opened his eyes and took a deep breath. He didn't expect everything to go so smoothly.

With multiple buffs, his meditation efficiency was almost ten times higher!

"It's finally upgraded."

Shi Yu was extremely excited when he sensed the huge increase in his physique again.

The Beast Taming Space was level three!

This meant that his upper limit of physique had increased again. With the additional points later, it probably meant that his physique would soon be comparable to a transcendent ferocious beast!

Apart from that, he could finally contract the ginseng baby.

After the contract, his physical recovery speed would be directly improved by the ginseng baby. It would be easier and more efficient!!

The combination of the two was a very important transformation for him. It also meant that he could already afford Eleven and Worm evolution!

"Where's Baby Ginseng?" Shi Yu looked for Baby Ginseng in the ruins space through the ruin ring on his wrist.

At this moment, Baby Ginseng was still practicing the Energy Fruit skill.

Under its training and Shi Yu's additional points, it could already control the amount of energy fruits well. It could create large and small bombs at will, so that it wouldn't accidentally blow itself and its opponent up in the arena.

During the week of Shi Yu's meditation, because of the presence of the baby ginseng, his mental state was better, so he added a few more points.

< Name > Ginseng Baby

[Skill]: Sweet Air (Transcendent), High Speed Healing (Perfect), Nutrition (Expert), Earth Chain (Transcendent), Source of Life (Initiate), Multiplication (Expert), Absolute Sleep (Expert), Energy Fruit (Proficient)

He had brought Baby Ginseng's sweet aura to perfection, and the Energy Fruit to proficient.

After that, Baby Ginseng's energy directly exceeded Eleven!

The racial skill at the level of "Dao Proficiency" was still quite a big increase in energy.

If he also raised a certain species skill point of the Ginseng Baby to the level of "Dao Proficiency", Shi Yu really suspected that its energy value would directly break through 10,000 and reach the commander rank standard.

At the moment, the transcendent-grade sweet gas did not increase Shi Yu's recovery effect much, but it could be manufactured into perfume and spices to sell for money. Shi Yu even wanted to maximize the selling price of the nutrients so that the whole family could work together to buy evolution materials for Buggy.

"Yi??"

At this moment, Baby Ginseng, who was burying fruit landmines and trying out various ways to use the Energy Fruit, saw Shi Yu enter and stood up curiously.

"Dig them all out." Shi Yu's face was speechless. "Don't casually plant land mines at home."

"Yi!!" Baby Ginseng patted its chest. Don't worry, even if he stepped on it, it wouldn't explode. This was a time bomb.

"Even so, dig it out!"

Ginseng Baby: QAQ Yes.

After Baby Ginseng finished handling all the Energy Fruits, Shi Yu sighed slightly.

It was so difficult to take care of the baby. A Beast Tamer might die from carelessness.

He took a look at the skill index. Transcendent skills still couldn't be taught. He couldn't help but sigh even more. He would look again when his physique was maxed out.

At the next moment.

Shi Yu and Baby Ginseng's gazes met.

Shi Yu took a deep breath and said, "Are you ready?"

"Yiya?? (What for?)" Baby Ginseng was stunned.

"What else could it be? A contract!"

At this moment, Shi Yu looked at the Beast Taming Space in his brain.

It was a world with a white crystal wall and a sea of clouds inside.

Hu hu ~ ~

As Shi Yu communicated with the Beast Taming Space, countless light dots flickered in front of him. A white array that looked like a star map appeared above the baby ginseng!

"Wuuu!!!" "Ji ji ji!!!"

At the same time, Eleven and Buggy rushed over from the distance of the ruins excitedly.

As Shi Yu's contracted pets, they had long sensed Shi Yu's breakthrough.

Shi Yu could obtain considerable benefits from their growth. Similarly, when Shi Yu broke through, their growth upper limit could also be increased!

"Wuu!! (Don't resist.)"

“Ji! (Cheering)”.

As they were familiar with the process of the contract, Eleven and Buggy immediately reminded the confused baby ginseng after running over.

“Just relax.” Shi Yu smiled.

Next, like Eleven and Buggy, pleased to meet your acquaintance.

In the next second, countless weak light spots flowed out of the formation and wrapped around Baby Ginseng, about to cover it!

“Yi! (Come on!)”

After understanding it roughly, Baby Ginseng called out with a determined expression.

After being contracted, there was no need to worry about the risk of being made into soup.

It very naturally accepted the contract. Its entire body was directly enveloped by white light before gradually turning into fluorescent light, disappearing from the outside world and entering Shi Yu’s Beast Taming Space!

The third pet, Baby Ginseng, was successfully contracted!

Shi Yu happily looked at the ginseng baby in the space. He had already sensed its feedback to his physique after contracting the ginseng baby.

However, the most important thing was that there were five more blank pages in the skill index!

Now, it was a total of 20 pages!

Apart from the deleted Worm Silk, Hardening, and Thunder Palm, there were 15 recorded skills.

They were: Deterrence, High Speed Healing, Supervision, Absolute Sleep, Multiplication, Plant Control, Illusion, Inner Power, Instant Transmission, Space Shackles, Concealment, Earth Chain, Sweet Air, Heavenly Frost Cold Energy, and Energy Fruit.

Also, five blank pages were ready and he could replicate new skills at any time.

“Come out.” Next, Shi Yu summoned the ginseng baby that he had just contracted from the Beast Taming Space.

At this moment, for the three pets, Baby Ginseng, Eleven, and Worm could also understand each other’s language through telepathy.

The ginseng baby that had just come out of the Beast Taming Space was still not used to it.

“Yi?”

“Wuu!” “Ji!”

“Yi!!”

After the three pets communicated, they were instantly very excited.

Shi Yu also smiled. At the same time, he felt that he could start a new round of point upgrades.

“But it’s been a week. I’ve already leveled up while I’m at it. Isn’t the armor done by Dean Hao yet?” Shi Yu suddenly remembered Eleven’s evolution equipment.

“Director Hao should be quite busy recently, let’s wait a little longer.”

It had been three days since he left the academy, and many new students had already come to the ancient capital.

As the dean of the Mechanical College, Dean Hao must be very busy. Shi Yu thought for a moment and took out his student card. He decided to replicate a new skill for Baby Ginseng first.

Next, it was time to do high-intensity points again. He took a fancy to a recovery and attack skill, which was very suitable for baby ginseng.

At the same time, it could also fill in the defects of the wood attribute energy fruit.

Many pets raised in the plant garden of Ancient Capital University knew this skill. Shi Yu felt that he could replicate it after walking around.

This ability was the storage beam of a light-type skill that was very compatible with plant-type pets.

Skill: Energy Storage Beam

Skill Level: Intermediate

< Introduction > It’s a light element skill. It can store light in the body and transform light into physical strength or light.

Shi Yu planned to teach this skill to the ginseng baby as well.

Firstly, he could have an additional recovery method that would allow him to move eternally and freeload more of his natural strength. Secondly, he could also have an additional attack skill.

This was another practical skill that could be used both ways. However, in terms of attack, it might be a little useless.

For non-elemental pets, because light energy was not easy to accumulate, it also needed time to change. It would take about ten seconds to charge up and attack once. The combat value was low, and like the Earth Chain, it relied on the environment.

Even if it was trained to the perfect level, under the sun, the accumulated energy beam attack needed to be converted for a few seconds. It was very slow.

However, this was not a problem for Shi Yu. If the proficiency had reached transcendent. Was there a need to be afraid that it could not shoot beams instantly?

“After learning it, will Baby Ginseng have more flash bombs other than ordinary bombs...”

Chapter 150: Shi Yu in the Plant Garden

Many training facilities existed in Ancient Capital University, including a mystic realm space.

In these training facilities, the training efficiency of the pets could be greatly improved.

The last time Shi Yu came to Ancient Capital University, he had only experienced the battle tower to train the Beast Tamer's life-saving abilities.

This time, he was prepared to go to a plant garden in a holy land of plant pets in Ancient Capital University.

"Let's go out for a while."

"Maybe I can take you to a fight."

After making the decision to steal a skill, Shi Yu exited the ruins space and said to the baby ginseng who was staring at him with a fruit on the table in front of him.

"Yi? (Battle?)"

Baby Ginseng's eyes lit up.

In short, it had been looking forward to the day where Shi Yu brought it to challenge other pets for a long time.

It was purely because the two teammates were too strong, so up until now, Baby Ginseng had not made a correct assessment of its battle power.

In short, it had been looking forward to the day Shi Yu brought it to challenge other pets for a long time.

"That's right."

"Go to the Beast Taming Space to sleep for a while and recover. I'll call you later."

Under Baby Ginseng's expectant expression, Shi Yu recalled it to the Beast Taming Space.

He had just contracted a ginseng baby. Shi Yu was still willing to let it rest more in his Beast Taming Space to sharpen its feelings.

After that, Shi Yu took his school student card and went out.

...

"By the way, I wonder what the effect will be if I go to the Internet Addicted Granny now."

As he walked in the direction of the plant garden, Shi Yu muttered.

He was still very vengeful.

At that time, he wanted to use the bone sword to PK the energy pet in the Battle Tower but he only got beaten up by the group. But now, Shi Yu, who had an extremely strong physique, felt that he could take revenge...

He was no longer the man who only knew how to dodge. Well, he would go to the plant garden to try first before going to the battle tower.

“Hey, look, doesn’t that person look like the Iron-eating Beast Knight...”

As Shi Yu walked, he suddenly heard people talking about him.

He turned his head slightly and saw two girls carrying a bag of daily necessities talking with their heads lowered.

Unfortunately, after Shi Yu’s physique was strengthened, his vision and hearing had also been enhanced. He could hear them.

“Kind of. That Iron-eating Beast Knight is an archeologist. He should have entered our school.”

“Is it him in person? He’s much more handsome than in the video. He’s so silly in the video. I remember my stomach hurting from laughing.”

“Heh...” Shi Yu couldn’t help but walk faster. Stupid humans.

He didn’t feel like a new student, but a senior returning to school. His name actually spread so quickly...

“It’s troublesome when people become famous.” Shi Yu took out a black and white baseball cap from the ruins space and put it on himself, trying to not be recognized. If he could still be recognized, he might be forced to wear a mask.

...

Ancient Capital University was too big. It took Shi Yu a lot of effort to reach the plant garden from his dormitory.

In fact, although the plant garden had the word ‘garden’, its area was quite ridiculous.

According to the school’s official website, the area shouldn’t be inferior to Mt. Tian Mang that he had gone to in Ping Cheng. It was much larger than the Iron-eating Beast Breeding Base of Lin Xiuzhu’s family.

This was actually also a mountain, but the entire plant garden mountain was clearly divided into several areas.

There were areas with richer water-element resources, areas with more abundant earth energy, and areas with richer natural wood and sun power. These were all modified, suitable for the habitation of various plant pets.

It could be said that using Earth Chain and Energy Storage Beams here could directly maximize the effect.

“We’re here.”

The entrance of the plant garden was separated by a white building. Shi Yu looked around and saw that the surroundings were cold and quiet. He didn’t care too much and directly entered.

As soon as he entered, Shi Yu smelled a fragrance. He immediately determined that it was a sweet aura skill.

However, it was only at the proficient level. It was nothing much. He didn't even feel it when he smelled it.

"Hello..." After Shi Yu entered, in the hall of the building, a girl in a white dress who was trimming flowers stopped what she was doing and looked over in surprise.

Apart from her, the building looked like a huge office. There was also a group of young people sitting in front of computers. They took a look over and saw that someone was already handling Shi Yu, so they continued working.

"Hello," Shi Yu greeted when he saw the senior.

"What business do you have?" she asked with a smile.

Shi Yu felt strange, but thankfully, he had done enough homework before he came.

There were three main possibilities for students to come to the plant garden.

1. Come and raise pets.

The environment of the plant garden was very suitable for the growth of plant-type pets. If the pets were more obedient, it would be no problem for the students to let the pets stay here for some time. It could have a good effect. Moreover, during this period, there were also students and teachers from the Feeding Department who were part-time workers who would help take care of the pets and provide food, nutritional supplements, and medical care.

<ol start="2">

Contract a new pet.

The plant garden also had the function of the Feeding Base. There were a large number of plant-type pet cubs of commander races. Their growth levels were basically at the Awakening level. These pets could be contracted and were suitable for Beast Tamers to contract, but students needed to use a certain amount of credits to exchange for the contract qualifications.

Like what Senior Lu said, the Seven Star Four Leaf Clover lived in a certain place in the plant garden.

<ol start="3">

Battle experience.

There were also a large number of transcendent creatures that had already grown up in the plant garden. There were even commander rank and monarch rank creatures living inside to guard the plant garden. For some students who wanted to increase their battle experience with plant-type pets, the plant garden also provided battle experience.

At the same time, the pets raised by some students could also be considered opponents.

Therefore, there were many opportunities for battle here.

"Battle," Shi Yu said.

"Alright, come over and register." The part-time senior signaled for Shi Yu to follow him.

“Yes.” Shi Yu nodded. He felt that the environment here was pretty good.

At least no one cared about him, and this senior didn’t look like she knew him.

As expected of the Feeding Department, they didn’t pay attention to the results of the vocation assessment at all.

Perhaps compared to the professional Beast Tamer assessment, this group of people were more concerned about the professional Feeder assessment.

Next, Shi Yu followed his senior to a machine to swipe his card and register. Releasing pets and contracting new pets required credits, while battle training was completely free. However, every student had a certain number of times per month. This was also to prevent the plant garden from being overloaded and unable to function normally.

“Eh, level 178? You’re a new student?” The senior looked at the message in surprise after Shi Yu swiped his card.

Level 178 archeology student, Shi Yu...

At this time, it wasn’t time for school yet?

But soon, she was relieved. If it was a new student with some connections, it wasn’t rare for him to enter the school early and live here.

“Yes.”

“Oh, it’s a junior.” Realizing that it was a new student, the senior who was working part-time was much more polite. She smiled and said, “Do you plan to go in and take a look yourself, or do you plan to specify pets to fight?”

In this botanical garden, there were many elite pets almost invincible at the same race level. Students who wanted to fight and train could even specify some pets in the plant garden to fight. Of course, they could also go in and randomly try their luck.

“I’ll go in and take a look myself.” Shi Yu smiled.

“Alright, you have to be careful. Most of the pets in the plant garden are raised here by seniors. They’re very fierce,” the senior reminded.

“Yes.” Shi Yu nodded.

That was exactly what he wanted. He felt that the wild ones were too weak.

“Can you go in yourself?” As Shi Yu was a new student, the part-time senior asked.

“No problem.” Shi Yu took the compass from his senior’s hand and reassured her.

This compass could guide Shi Yu into the battle area of the plant garden and help him find the way and leave. Apart from that, it could also be used with the software navigation on the Ancient Capital University’s official website, but it was not as convenient and accurate.

...

After registering, Shi Yu entered the plant garden.

As Shi Yu entered, a senior in front of the computer stretched with difficulty. He didn't expect that he had to work before school started.

In order to ensure the stability of the plant garden and prevent any conflicts between the pets that had been raised, there were surveillance cameras everywhere in the plant garden. His job was to discover unstable factors. Among them, students who came here to battle and train could also be considered unstable factors. They needed to be paid attention to.

He looked at the screen. At this moment, Shi Yu had already entered the battle area with the compass.

In the battle area, there were basically no ferocious beasts below the transcendent level. They were all very brave and good at battle. Soon, the senior was stunned.

This was because just as he entered, Shi Yu encountered a transcendent-level Violent Wood Lizard.

It was a half-meter-long lizard made of wood matter. Although it looked like an animal, it was indeed a plant life form. It was essentially of a wood element.

"A Wild Violent Wood Lizard..." The senior's expression was relatively calm. However, what made him uneasy was that in the scene, Shi Yu saw this Violent Wood Lizard and had no intention of summoning his pet??

In the scene, Shi Yu and the Violent Wood Lizard looked at each other...

"Its battle power is only 5... No, its energy level is only 599? Trash..." Shi Yu looked at the energy level of the Violent Wood Lizard in front of him through the Invisibility Mirror Image and sighed. This was too weak.

A pet of this level was weak enough for Baby Ginseng to make it faint with just a sweet aura. There was no meaning in fighting.

"Hello, do you want to fight? You can fight with me, but we have three rules. You're not allowed to use skills."

However, Shi Yu still issued a challenge to the Violent Wood Lizard through telepathy.

Baby Ginseng:???

Didn't you say you wanted me to fight???

The Violent Wood Lizard was also stunned.??

It had lived here for a while, but it had never seen such a strange request.

The name of the Violent Wood Lizard sounded very irritable, but in fact, they were also very good gardeners. Poop was the best fertilizer, so these lizards were kept in the plant garden.

But even so, it didn't mean that the Violent Wood Lizard didn't have any battle power.

"Heh!!! (You said it, don't regret it.)" After a moment of silence, the Violent Wood Lizard chose to satisfy Shi Yu's wish.

It leaped over and pounced at Shi Yu. It had no intention of hurting Shi Yu. If it dared to hurt a human, it would have to become dinner for the monarchs and commanders of the plant garden tonight. It only wanted to pounce on Shi Yu and let him see how powerful it was.

However...

Just as the Violent Wood Lizard pounced at Shi Yu, it felt its stomach suffer an incomparable blow before it could even come into contact with him. With a boom, it was sent flying and hit a tree in the distance.

On the spot, Shi Yu moved his slightly sore fist and looked at the Violent Wood Lizard.

“Again!” Shi Yu said.

As expected of him, his physique was really not much inferior to a transcendent-level ferocious beast. He could actually still gain the upper hand against a creature that did not specialize in physiques like the Violent Wood Lizard??

If he reached the current upper limit of the level, he might be able to fight transcendent creatures who used skills!

At this moment, after it was sent flying. The Violent Wood Lizard stood up in a daze and stared at the human in front of it, revealing an expression as if it had seen a ghost.

Although this punch didn't cause it much injury, it still hurt. It thought about it. It couldn't take on this battle. It was too aggrieved.

“Heh!!! (Fight my ass, I'm not allowed to hurt you, and you're also so strong, are you even human?)” The Violent Wood Lizard cursed angrily and turned to leave, even pulling a pile of shit on the spot to show its disdain.

In the botanical garden, it didn't matter how the pets fought. As long as they didn't die, it was fine. However, Beast Tamers definitely couldn't be injured. This was the rule.

Shi Yu :” ...”

Seeing the Raging Wood Lizard leave, Shi Yu was silent. In the hall of the plant garden building, the senior who was staring at the surveillance was also shocked.

“Holy shit.”

What the hell was this student? Which specialization was he from? Why was he here? Did he come to train himself or his pets? Just go to the battle tower if he wanted to train himself!
