

Beast 151

Chapter 151: Stealing the Energy Storage Beam

In the plant garden, in the battle area...

Shi Yu continued walking. In his Beast Taming Space, Baby Ginseng was crying.

“Don’t be anxious.”

Shi Yu smiled and said, “I’ll bring you to find powerful pets.”

This time, with “index” the index, Shi Yu couldn’t be bothered to use Eleven’s super vision.

He directly activated the energy detection function of the index.

In front of his vision, he immediately detected dense energy waves in a large area.

“Energy level 790, trash.”

“Energy value: 1093, boring.”

“Energy value 2195, are there no powerful pets here?”

“Uh, 15843? What the heck is a commander rank even doing here?”

“Eh, I got it. 3033, it’ll be you.” After staying on the spot for a moment, Shi Yu locked onto a pet with an energy fluctuation of about 3033. He planned to bring Baby Ginseng to challenge it.

This value might be a transcendent pet of the monarch race.

Of course, it could also be a commander-type pet that was cultivated better.

Shi Yu pondered for a moment and summoned Baby Ginseng on the spot.

The next moment, the white summoning array appeared in midair. Baby Ginseng fell out and was grabbed by Shi Yu’s hand and placed on his shoulder.

“Yiya!!!”

After sitting in Eleven’s seat, Baby Ginseng was very excited. It moved its little hand forward and let Shi Yu charge forward.

Today was its first battle as a towering emperor. It had to find a worthy opponent.

“Let’s go.”

Shi Yu chuckled. Today, Eleven and Buggy were resting. It was Baby Ginseng’s turn to show off!

It was mainly because if Eleven and Buggy came out, it wouldn’t be as simple as just fighting transcendent creatures.

...

As Shi Yu did not do normal things, this senior who was watching the surveillance cameras directly targeted him.

Regarding Shi Yu sending the Violent Wood Lizard flying with a punch, he first held a wait-and-see attitude. After all, there were too many strange Beast Taming Talents or pet skills.

Soon, as Shi Yu chose to summon his pet, the senior gradually felt that Shi Yu was normal.

“White Formation, Intermediate Beast Tamer.”

“The pet is...”

“Baby Ginseng???”

However, he only felt that Shi Yu was normal for a few seconds. Soon, Shi Yu ignored him again and directly summoned Baby Ginseng over his shoulder in the battle area. The senior didn't know what to say.

If all of this could still be explained by Shi Yu punching and needing the baby ginseng to replenish his physical strength, then the next scene completely made this senior feel that Shi Yu was really abnormal!

He saw Shi Yu run to the territory of a pet of a battle type...

Moreover, he made Baby Ginseng jump down from his body and confront the pet in front of him.

“F*ck, what's wrong with this person?”

“Don't tell me he plans to let Baby Ginseng battle Giant Sunflower!!”

...

“Energy level: 3033...”

After circling around and finding his target, Shi Yu looked at the pet in front of him.

It was a flower-type pet standing on two feet. It was half a meter tall.

It had a green ball root-like body and legs, and a huge golden flower on its head. The flower even emitted a faint light.

At this moment, the huge flower narrowed its eyes. As for its mouth, it grew in the flower. It was a very strange creature.

This creature with a mouth above its eyes looked at the guy who intruded into its territory in surprise.

At this moment, all its information was displayed in front of Shi Yu.

< Name > Giant Sunflower

[Attributes]: Light

[Race Level]: Mid-level commander

[Race Skill]: Flower Dance, Flash, Sun Force, Light Ray, Energy Storage Beam, Sunset

“We’re pretty lucky.”

Shi Yu was overjoyed.

This luck... He came to the plant garden to find pets that had “energy storage beam”.

According to his investigation, there were about five common wild plant pets that could store energy beams in the plant garden. He needed to find them slowly.

And Giant Sunflower just happened to be not among these five types, it could only be said that the heavens were watching over him, directly saving him a lot of time to search.

“Do you want to fight?” Shi Yu invited Giant Sunflower.

If it were other Beast Tamers who weren’t talented in telepathy, they might have directly started fighting.

As for Shi Yu, he was still used to chatting with it first.

This Giant Sunflower should be the pet of a certain senior. Otherwise, it would not have been cultivated to such a high energy level.

“F*ck...”

At this moment, Giant Sunflower heard Shi Yu’s telepathy and was stunned for a moment before nodding.

It didn’t matter. It had come to the battle area to fight. Otherwise, wouldn’t it be better to sleep in the Sunlight area?

However...

Giant Sunflower looked at the excited baby ginseng that jumped down from Shi Yu’s body, looked at the baby ginseng that was showing battle intent towards him, and suddenly felt at a loss.

Was he serious??

The battle didn’t matter, but the opponent...

It wasn’t like it didn’t know what a baby ginseng was!

Let Baby Ginseng fight it???

Giant Sunflower directly showed a disdainful expression, feeling that Shi Yu and Baby Ginseng were fools.

“Yi!! (I’ll attack first!)”

Seeing that Giant Sunflower did not have any battle intent, Baby Ginseng already condensed a small ginseng in its hand.

Under Shi Yu’s instructions, it specially condensed a small one, afraid that the power would be too great and kill the other party.

After all, the energy value of the baby ginseng was more than twice that of the Giant Sunflower. The skills it used were also high-level skills with great lethality...

With its height of more than ten centimeters, one could imagine how small the small ginseng it made was. Just like that, the small ginseng flew directly towards the stunned Giant Sunflower under the throw of the baby ginseng.

“F*ck...”

From this small fruit, Giant Sunflower only sensed fragrance, the kind that could relieve fatigue.

It called out, feeling that it was awesome despite not understanding it.

So, the other party wasn't here to fight, but to feed it? This wasn't a zoo either!

At this moment, the senior who was watching the surveillance video was stunned. This skill was so familiar.

It didn't seem like something a ginseng baby could learn. Instead, it was a skill of the evolution form of a ginseng baby, nutrition!

Shi Yu and the others were indeed here to feed...

The fruit fell beside Giant Sunflower's feet, but Giant Sunflower still ignored it.

Like its senior, it felt that Baby Ginseng was here to be funny.

But to be honest, this fruit smelled pretty good and was very tempting, making Giant Sunflower swallow its saliva.

Heh, it was no worse than the nutrients it had eaten before.

There was even a unique charm to it.

“F*ck!! (Then I won't hold back!)”

Giant Sunflower looked at the fruit, seemingly wanting to eat it.

At that moment, Shi Yu and Baby Ginseng fell silent.

Although they had once imagined this strategy...

Shi Yu really didn't expect that a pet with a Beast Tamer would be so silly to believe it and really plan to eat it.

Was this because it was in a plant garden, so it didn't think it would be dangerous?

But they had clearly agreed to fight just now!

“Let's give it a lesson.”

Seeing that Giant Sunflower did not have any sense of crisis, Shi Yu was really helpless.

“Whatever. Destroy!”

In any case, this Giant Sunflower had been in an energy storing state when it walked just now, he could just replicate the skill later. Shi Yu causally ordered.

“Yi!!” Baby Ginseng nodded obediently and looked at the Giant Sunflower.

It quickly detonated it, afraid that Giant Sunflower would eat it.

Although it was only a small amount of energy, if it exploded after being eaten, this Giant Sunflower would not be able to withstand it.

It was better to detonate it outside.

Baby Ginseng thought benevolently.

Boom!!!

The moment Baby Ginseng’s will detonated the fruit, a huge amount of energy rushed out of the fruit. With a loud bang, a surging energy tide spewed out. At this moment, the eyes of the Giant Sunflower, which was still drooling, widened. It felt that its vision was instantly covered by white light, and it was instantly swallowed by countless energy. A powerful force was crazily washing over its body!

“F*ck!!” Its eyes exploded. In the light, it felt its body quickly break apart. The intense pain made its consciousness almost faint.

Giant Sunflower roared unwillingly. It never expected that the nutrients thrown by Baby Ginseng would actually explode.

Damn it, a sinister enemy.

Carrying soaring resentment, Giant Sunflower directly fainted in the huge pit on the spot like a withered flower, losing the ability to fight.

Only rolling white smoke was left with it.

At this moment.

At the battle department academy of Ancient Capital University, a bespectacled boy suddenly looked out the window.

“What happened?”

Sensing that the Giant Sunflower he was raising had instantly lost its ability to fight, he showed a confused expression, directly packing up and heading to the plant garden.

“Did Little Flower challenge some powerful pet again? Being insta-killed... That’s ridiculous. I have to go take a look.”

In the botanical garden.

On this side, the Feeding Department senior who was staring at the surveillance also lost his ability to think like the Giant Sunflower, staring at the screen blankly.

“F*ck!” As the Energy Fruit exploded, he shouted with an incredulous expression.

“Supplement, the supplement exploded, f*king instakilled the Giant Sunflower.”

His shout made everyone look at him in confusion, as if they were looking at a fool.

“Li He, what are you doing?” A girl frowned and looked at him.

“Team Leader, Baby Ginseng... Baby Ginseng... The nutritional substance exploded. This isn’t scientific...”

Everyone: “?”

At the same time, Shi Yu brought Baby Ginseng to the side of the Giant Sunflower and shook his head.

“Baby ginseng, treatment.”

“Yi!” Baby Ginseng obediently stretched out its small hand and released a high-speed healing wave.

The super skill, Origin of Life, coupled with the perfect level healing speed, directly made the injuries of Giant Sunflower recover visibly.

During this process, Shi Yu patted the body of the Giant Sunflower with a worried expression, as if he was educating his child.

“Silly child, didn’t your Beast Tamer tell you not to underestimate any enemy?”

“With your personality, you’ll suffer sooner or later. Today, I’ll give you a lesson. The next time you encounter any opponent, you have to give it your all. Next time, no one will be so kind as to treat you.”

[Recording success]

Skill: Energy Storage Beam

Skill Level: Intermediate

< Introduction > It’s a light element skill. It can store light in the body and transform light into physical strength or light.

During the treatment, Giant Sunflower opened its eyes in a daze. It looked at Baby Ginseng, who was treating it with its small hand, and felt that it was still sleeping.

What happened just now... Who am I, where am I, what is this baby ginseng? Where was its Beast Tamer!

Chapter 152: Baby Ginseng Wants to Evolve Too

“This silly flower...”

Seeing that Giant Sunflower still did not look very smart after its injuries gradually recovered, Shi Yu patted his hands and walked away from it.

“Yi!”

At the same time, the ginseng baby quickly moved away from it. It was said that stupidity was contagious.

“F*ck...”

Giant Sunflower swayed and gradually remembered what was going on.

It had been blown up by nutrients!

When it thought of this, its lungs exploded with anger. It looked at Shi Yu and the others in anger.

“F*ck...”

However, at this moment, Giant Sunflower suddenly recalled what its teacher had said in its ear just now and could not help but be stunned.

It seemed to make sense.

Shi Yu and Baby Ginseng had said that they were going to battle. It had underestimated its opponent and thought nothing of it...

So, that wasn't a nutrient for it, but an attack?

Giant Sunflower could not help but be stunned. The idiot was actually himself, not the opponent. They weren't sneaky at all...

It was momentarily unable to accept reality.

“You've recovered, right? Do you want to continue fighting?”

Shi Yu looked at Baby Ginseng's unhappy expression and could not help but ask the suspicious Giant Sunflower.

“F*ck!!!” Giant Sunflower suddenly looked over and nodded crazily.

Of course! It wanted revenge!!!

...

In the hall of the plant garden building.

As they saw that the Learning who injured the Giant Sunflower had grown up...

However, in the image, Giant Sunflower had already been healed.

“There's clearly nothing here,” everyone said.

“Yes, but after Baby Ginseng injured the Giant Sunflower, it was healed...”

“Wait, it doesn't make sense again! Isn't slow healing only able to heal oneself... That's... high-speed healing?”

The feed department senior was stunned.

At that moment, before everyone could understand what he said in detail, Baby Ginseng and Giant Sunflower started fighting again.

Then, this senior wasn't the only one whose eyes exploded. In an instant, everyone's expressions were stunned.

In the video, the Ginseng Baby directly connected to the ground and turned into "Earth Ginseng Baby".

Like a war fortress, it threw out the "nutrients" in its hand as if they were free, forming a "Gunfire Suppression"!

And facing these nutrients, the Giant Sunflower acted like it was facing a great enemy. It immediately released light from the Sunflower, hoping to detonate them in mid-air.

However... It was useless.

This time, it wasn't a small amount of energy fruits, but the full version.

Before the Giant Sunflower exploded, Baby Ginseng still detonated them itself!

With a boom, white roses bloomed in midair!

A terrifying energy impact instantly spread to the side of the Giant Sunflower, instantly devouring the energy storage beam, scaring the Giant Sunflower into hurriedly pulling open the light screen!

Unfortunately, in the face of the explosion wave, the light screen also shattered instantly. The energy wave blew the Giant Sunflower away with a bang!

It was ridiculously powerful!

This attack did not cause much damage to Giant Sunflower's body, but it caused incomparable damage to Giant Sunflower's heart!

"F*ck!!!" It looked at the ginseng baby as it created two large radishes in horror.

"F*ck!!!" Is this a ginseng baby?

Holy shit, why does it have so much stamina? It can condense a bomb of this level just like that? And there were several of them at once?

At this moment, Giant Sunflower understood that its strength was not on the same level as the other party at all.

Without looking back, it turned and left, not wanting to be injured by the explosion.

This action... left Shi Yu and Baby Ginseng confused on the spot.

It ran away again?

"Are all the pets in this plant garden so challengeless?"

It was fine if it was just a weak Violent Wood Lizard, but why was this very strong Giant Sunflower the same!

“So be it.” After a moment, Shi Yu shook his head.

In any case, he had obtained the key skill.

As for Giant Sunflower’s other skills, Shi Yu did not fancy them either.

Although its light skills were also very rare, they were not suitable for Ginseng Baby.

Apart from the storage beam, Shi Yu felt that there was another light-element skill suitable for Baby Ginseng. It might be the combination of fire and light.

This was a type of weather skill, similar to Praying Rain. It could form a continuous skill with the storage beam. It was just that he didn’t know if Baby Ginseng could learn this skill.

Shi Yu actually lacked a weather skill. A domain skill that was extremely suitable and could increase the strength of the entire team.

However, because the attributes and battle styles of Eleven, Worm, Ginseng Baby were too different, it wasn’t easy to find a weather skill, area skill, and domain skill that could help all three of them at the same time.

Shi Yu looked at the ginseng baby that was holding the Energy Fruit. It didn’t know whether to throw it or not.

“See? I told you, you’re strong.”

Currently, there was a Ginseng Baby with more than 8,000 energy points with a proficient high-level skill Energy Fruit. Not to mention this Giant Sunflower, even Yin Zhengfan’s Zonyan Rock Beast would be unable to defend!

It was only because Eleven’s max level Hardening was too abnormal and Worm’s spatial skill was so shameless that Baby Ginseng thought it was useless.

“You’re not really weak. You’re just weak in the team.”

“(ಥ_ಥ)... Yi...” Baby Ginseng felt that Shi Yu was horrible at consolations.

The confidence it had just regained was instantly destroyed.

After a moment of silence, it ran back to Shi Yu’s shoulder and asked an important question.

“Yi!”

Eleven and the worm seemed to be preparing to evolve. They were already very powerful. If they evolved, would their strength become even more ridiculous?

This way, wouldn’t its junior position in the team become more and more solid?

Baby Ginseng didn’t want to be an emergency supplement for the rest of its life. It also wanted to be the main force and trump card of the team!

“Isn’t that for sure?”

Shi Yu muttered.

After all, in essence, although Eleven and Buggy's battle power was off the charts, it was all due to their skills. Their races were instead a burden.

Although their race had received some enhancements because they had learned a bunch of external skills, there wasn't too much of a difference between them and the original race.

If Eleven didn't use skills and fought with an Ice Dragon cub, it would probably be knocked out with a slap.

As for Buggy... after evolution, their race would completely change. It would definitely be reborn.

"Yiya!!"

Baby Ginseng expressed its anticipation that it could also evolve.

"This..." Shi Yu said, "In theory, yes."

"Yi? (theory?)"

"Actually, it's quite difficult."

Ginseng Baby: ㄟ ▽ ㄟ

"Don't you know? When you were at Grandma Li's place, she had already tested if you could evolve..."

"The result of the experiment is that the evolution method of a normal ginseng baby is useless to you."

Baby Ginseng:!!!

After saying that, Baby Ginseng was dumbfounded. It really didn't know that the old witch had performed an evolution experiment on it.

Shi Yu continued walking with Baby Ginseng.

The evolution form of [Ginseng Baby] was [Ginseng Fruit Tree].

This evolution form made Shi Yu feel like complaining.

It gave him the feeling that humans would evolve into ginseng fruit trees.

The species itself had completely changed. It was as ridiculous as a carp evolving into a dragon.

In fact, the ginseng baby wasn't a ginseng, and the ginseng fruit tree wasn't a ginseng fruit tree either. These weren't the same things.

But in short, even though the ginseng baby could evolve into a middle class commander race's ginseng fruit tree, it still couldn't escape the fate of the supplements.

Compared to the sweet and slowly healing ginseng baby, the ginseng fruit tree only had two racial skills, Earth Chain and Nutrition. It still didn't have any offensive skills.

In combination, the current situation was very clear. The mutated ginseng baby was already much more impressive than the ginseng fruit tree. This evolution path no longer applied to it. This Grandma Li had already studied it.

The racial skills that the ginseng fruit tree knew, Earth Chain and Nutrition, had long become the racial skills of the mutated ginseng baby. It would even have an additional source of life skill.

The evidence was that after Shi Yu had leveled the Earth Chain Point into transcendent, it still wouldn't have reached the maximum level.

Therefore, mutated ginseng babies and ordinary ginseng babies could no longer be considered the same race.

This was also why Grandma Li judged the mutated ginseng baby as a low-level monarch race.

The evolution path of a normal Beast Tamer's Ginseng Baby was: Ginseng Baby → Ginseng Fruit Tree → Unknown.

As for Shi Yu's Ginseng Baby, it evolved through the mutation of the Fruit of Life. It was a new evolution chain: Ginseng Baby → Mutated Ginseng Baby → Unknown.

"Don't be too pessimistic."

Shi Yu smiled when he saw Baby Ginseng's desperate look.

"More than a hundred years ago, a Beast Tamer with the talent of 'evolution' among humans has already proven that all creatures have the possibility of infinite evolution, all the way to the Mythical Race."

"So, you must still have an evolution path, but it's just unknown at the moment."

"After Eleven and Buggy finish studying evolution, we'll consider your evolution path together."

Shi Yu comforted the ginseng baby considerably.

Although his skill index was not as clear as his evolution talent, if he studied it carefully, he might be able to open up an exclusive evolution path. After all, there were many evolutionary skills. He should give it a try.

If he pressed the evolution skills of other plant-type pets onto Baby Ginseng, maybe it could also evolve.

"Yi...!" Baby Ginseng's eyes regained its luster.

Really?

"You can choose not to believe me, but you can't not believe that evolution big boss." Shi Yu pushed the blame and said, "If you can't evolve, go and scold him."

Baby Ginseng:???

"I'm just kidding." Shi Yu chuckled. However, he also felt that what the evolution big boss said made sense.

Any creature had the potential to evolve into a Mythical race as long as they found the right method.

However, it was awkward that the evolution big boss himself couldn't cultivate a Mythical race or Mythical pet.

It was said that the Beast Tamer had evolved all the pets he contracted into a high-level overlord race before the age of 30, and their strength had all been cultivated to the totem level.

It was also because of this that he was known as one of the legendary Beast Tamers closest to the Mythical Domain, just like the ancient legend Beast Tamers like Emperor Shi.

Unfortunately, although he had created the view that pets could evolve infinitely, before he could evolve into a Mythical species or Mythical pet, this person disappeared. There were also different opinions about his whereabouts.

Some said that he had encountered an accident while exploring the Mythical Ruins in order to pursue the Mythical domain.

Some said that he left the Blue Planet and went to the Moon to look for evolution materials before getting lost in the starry sky...

There were all kinds of strange theories.

In any case, this Beast Tamer of Dong Huang, who had left a lot of marks in the field of evolution, never appeared again.

“Perhaps he transmigrated..” Shi Yu predicted in his heart.

Chapter 153: Light-Clearing Cannon

Next, Shi Yu prepared to continue bringing Baby Ginseng to challenge other pets.

This Giant Sunflower was clearly too weak. He had to at least find an opponent that could injure Baby Ginseng.

“Yi!!”

However, at this moment, after thinking about ginseng life, Baby Ginseng had a new idea.

“What?”

“Yi! (Why don’t we stop fighting and go back?)”

“Uh.” Shi Yu was stunned.

At this moment, Baby Ginseng felt that it was better to go back and study evolution than to fight these weak pets to find a sense of existence.

Evolution was the way to go!

Since Shi Yu wasn’t free for the time being, it wanted to transform into a researcher ginseng first. It would use Buggy and Eleven’s cell phones to search for information and think about it.

It heard that the evolution path of Buggy was thought up by itself. It had to learn it too!

“Yiya!!” Baby Ginseng stunned Shi Yu.

Shi Yu :” ...”

“Up to you.” In any case, he had already achieved his goal.

...

Shi Yu started to walk back.

At this moment, the seniors had already exploded.

Baby Ginseng’s battle power crushed the Giant Sunflower, and also directly shattered their world view!

“This is definitely not nutrition.”

“What skill is that...”

“No matter what skill it is, a ginseng baby is too...”

“Ah Yun, you were the one who registered him just now, right? What’s his background?” Everyone looked at the white-dressed girl who received Shi Yu.

At this moment, the girl called Ah Yun was also very confused.

“He... he’s a new student from the level 178 Archaeology Department. His name is Shi Yu.”

Everyone was stunned. A new student?

You call a person who directly tortured the elite pet raised by the seniors of the Combat faculty a new student?

“Shi Yu??” A girl in casual clothes frowned. She kept feeling that she had heard this name before.

Although it was the Feeding faculty and not mainly pursued battle power, it didn’t mean that everyone didn’t pay attention to the professional Beast Tamer assessment.

“The first place in this year’s professional assessment in Ancient Capital, Shi Yu?” She thought of something.

“It’s him.” Then, she quickly took a look at Shi Yu’s handsome appearance in the video and confirmed it completely.

“Team Leader, he’s first in this year’s vocation assessment?” The other feed department seniors were slightly stunned.

“Damn, no wonder he’s so awesome.”

This girl, who everyone called team leader, was slightly silent.

“Ridiculous...” After a moment, she felt that it was very ridiculous. She said, “If I remember correctly, during the vocation assessment, he only had two pets. Where did this ginseng baby come from? Moreover, in half a month... This battle power...”

Damn, this was as unscientific as that green worm!!

How exactly was it cultivated!?

Everyone was stunned again. Then, they took out their phones or used their computers to search for information on the vocation assessment in Ancient Capital this year.

After all, he was a man who had been on the trending list for half a day. There was still a lot of news about Shi Yu on the Internet...

When Yu left the botanical garden, he felt that the atmosphere in the hall just now was pretty good. It was abnormally strange.

Everyone looked at him strangely.

Shi Yu immediately realized something.

"It's really unscientific for Baby Ginseng to have battle power. I must contract a handsome, cool, and seemingly powerful fourth pet. This way, after adding some points and strengthening myself, it will look more scientific!"

...

Shi Yu left the garden indifferently.

Outside the hall, he walked past a senior who looked to be in a hurry to enter the hall. He calmly walked towards the dormitory.

During this period, Baby Ginseng could not wait to enter the ruins space and run to ask Buggy for its cell phone to fill in its own aspiration form to submit to Shi Yu.

However, Shi Yu felt that it was too early for Baby Ginseng to think about this.

Improving racial skills could effectively accelerate the growth of pets. This was an advantage that racial external skills did not have.

It was because of this that Eleven and Buggy could grow so quickly in just half a year, ignoring the impact of age and time on their growth levels to a certain extent.

Eleven and the worm were in a hurry to evolve because they only had one racial skill.

Moreover, it had already been fully stretched, causing them to be about to encounter a growth bottleneck.

If they wanted to grow to commander rank, they needed a certain opportunity. It was even harder to quickly grow to monarch rank.

Therefore, if Shi Yu wanted the two pets to continue growing at a high speed, he had to choose to let them evolve.

This way, the high-value nutritional supplements and food they ate daily could also be perfectly absorbed. They wouldn't have to waste a lot of nutrition due to race bottlenecks in the future.

However, there was actually no need to rush for the time being on Baby Ginseng's side.

It had a total of five racial skills, and even a transcendent skill. As long as it was maxed out, Baby Ginseng's growth level would definitely break through to commander rank and monarch rank.

There was no bottleneck. It was fundamentally different from Eleven and the bug.

Therefore, compared to the evolution of the ginseng baby, Shi Yu felt that it was better to increase its racial skill level first. Coupled with some attack skills, it was not that difficult for its battle power to exceed the Eleven and Worms before evolution.

...

A moment later, Shi Yu returned to the dormitory.

At this moment, he was just about to teach the ginseng baby a new skill when he felt his cell phone vibrate in his pocket.

"Eleven's evolution equipment is completed?" Shi Yu's heart stirred as he picked up the cell phone in anticipation.

He originally thought that it might be Dean Hao, but when he took a closer look, he realized that it wasn't.

Caller: White Brook.

Upon seeing this name, Shi Yu sighed slightly.

Although the beast-eared girl was beautiful, he wanted to see his panda wearing armor now.

Mechas were the romance of men. Even beast-eared girls had to stay away from them!

"Shi Yu."

Just as Shi Yu picked up the call, White Brook's clear voice came from the other side.

"Are you in school now?"

"Yes, what's wrong, Senior?"

"Do you still remember what I told you before?"

"It's about the battle club and the school team."

Shi Yu: "I remember..."

"After school starts, the battle society will recruit new students for the whole department. Remember to come."

"So early?" Shi Yu was stunned.

"I heard that the threshold for battle societies and school teams is not for high-level Beast Tamers, students with commander-level pets?"

The entry requirements for each school's battle club and school team were very high, because this was the place where they could represent the school to compete and obtain the easiest resources.

Because of this, the requirement for battle power was very high.

A high-level Beast Tamer with a commander-level pet was just the threshold. Shi Yu, this new student, clearly had not reached it yet.

“That was a long time ago. The policy has already been changed a few years ago. Now, freshmen with potential can also join as ‘reserve members’ and enjoy the nurturing benefits in advance. They can obtain a large amount of credits every month. It’s definitely better to enter as early as possible.”

“It can be considered a form of advance training for fresh blood in the school...”

After all... it had been too many years since Ancient Capital University had produced any results. Their battle results were just too ridiculous. White Brook muttered in her heart.

Even Lu Qingyi, a proud daughter of heaven from Division 11, was somewhat weak in battle power when facing the top geniuses of the top universities in Imperial City and Demon Capital, let alone others.

She heard from her family that the monster who defeated Lu Qingyi joined another special department after graduation and left Dong Huang to carry out missions overseas. It was no safer than archeology.

It would be alright if they went to other countries... But if they went to the territories of hostile human forces that had always relied on the totems and were not from the seven countries to carry out missions, it would be very dangerous.

Compared to this, White Brook still felt that it was safer to do archeology in the country with Senior Lu.

“Alright, I’ll remember that. Is there anything you need to prepare?” Shi Yu asked.

“No, it’s just that you might have to fight two battles with other new students or older students, or fight one or two battles with members of the battle club. You just have to walk down the arena to record your strength. With your situation, it definitely won’t be a problem,” White Brook said.

“Alright.” Shi Yu nodded.

White Brook smiled and said, “Then I won’t disturb you anymore. You go ahead.”

Then, the two of them hung up the phone.

After careful consideration, Shi Yu looked at the ruin ring.

What the beast-eared girl said was all trivial. The most important thing now was to upgrade the skill points.

“Come and learn a new skill!”

Shi Yu entered the ruins space and quickly called for Baby Ginseng.

This was an intermediate-level skill. It was very easy to teach, and it could be pushed to the proficient level in a while.

“Yi...”

At this moment, Baby Ginseng, who was being taught by the worm how to control the cell phone, raised its head and looked at Shi Yu, who had entered the ruins space.

Buggy was patiently explaining the cell phone operation method to it, but when it heard Shi Yu's voice, Baby Ginseng lost interest in the cell phone.

It pushed the cell phone away and returned it to Buggy, running over to Shi Yu obediently.

The evolution was too far away. At the moment, it was better to add some points.

The Ginseng War Emperor dream awaited it.

Buggy:???

"Ji!!!" The little green insect pouted and looked at the running baby ginseng. It shook its head. Hmph, it couldn't resist the temptation of adding points, that pitiful ginseng.

It wanted to continue training with the leader!

After adding a few points, the pets that could make up for the training were the real experts!

A moment later.

Baby Ginseng was already standing in front of Shi Yu with a serious expression.

It was already prepared!!

Today... was it finally its turn to add some deterrence!

It was definitely going to be the king of ginseng babies!

"It's still not deterrence, but a charging skill. This way, you can create more supplements," Shi Yu said with a chuckle.

Ginseng Baby: Σ (° △ ° | | |)

Ginseng Baby: "Yiii!!"

After saying that, Baby Ginseng immediately cried.

What happened to the battle ginseng and the towering emperor dream? Shi Yu was definitely still treating it as a supplement!!

"However, although it's a charging skill, it can also be converted into an attack skill."

"At that time, not only can the Energy Fruit have the effect of the Flash Bullet, you can also shoot lasers. It's impressive."

"Pointing at a commander rank enemy, you can let your opponent experience the pain of being slapped in the face at the speed of light."

"This move is called 'Light Clearing Cannon'."

"Yi?"

Ginseng Baby: \ (✿◡◡) /

The change in Shi Yu's words immediately made Baby Ginseng feel that it was powerful again.

Clearing Light Cannon, good!

It sounded like a very impressive skill.

It completely did not realize that Shi Yu was talking about the energy storage beam that had been instantly blasted apart by the Energy Fruit...

"Yiya! (Shi Yu, increase points!!)"

Chapter 154: Evolution Armor Completed

[Skill]: Energy Storing Beam (Mastery)

He added it immediately.

Skill replication was used to increase points.

In the midst of his intoxication, Shi Yu's bones felt numb as he leveled up four additional points.

"Yi ~ ~"

"Awesome!!!"

After Baby Ginseng and Shi Yu finished adding the points, they let out comfortable sounds at the same time.

Baby Ginseng was very excited because it instantly had a pile of experience for this new skill.

As for Shi Yu, he felt very high because he sensed the rapid increase in his physique again.

After his physique reached the upper limit...

His physical strength might be comparable to a master-level Beast Tamer?

Even a top-notch master?

Shi Yu wasn't sure of his limit, but he just needed to add some points.

Skill index and my body, let me see your limits!

"Yi..."

On the other side, after learning a new skill, Baby Ginseng subconsciously wanted to try it.

It turned around and looked at a rock in the distance.

Following Shi Yu's hint, it stood quietly on the spot and pointed at the stone.

It looked very dumb.

In the next second, light slowly gathered on Baby Ginseng's body and fingertips.

One, two, three... After a few seconds, countless light beams gathered at Baby Ginseng's fingertip to form a small light ball.

“Yiya!!! (Light Clearing Cannon!!!)”

After gathering its strength, Baby Ginseng's pupils suddenly constricted. The light dot on its finger quickly lengthened, turning into a beam of light. With a whoosh, it instantly penetrated the rock it was aiming at!

Moreover, with a bang, the stone was instantly blasted into powder by the light beam. A deep hole that was penetrated and split open appeared on the ground.

“Yi...” After everything was done, Baby Ginseng looked at everything in front of it and fell into deep thought.

It looked at Shi Yu. Why did it feel that this move was not as powerful as the Energy Fruit that had been leveled up twice?

Why... did this skill have to store energy for so long...

Why did this skill, even though it had a very cool name, feel so similar to the skill of the Giant Sunflower that it had insta-killed?

It seemed that apart from the shooting speed being fast after energy condensation, there was nothing good about it.

“That's not a problem.”

“Next, the problem you need to solve is how to accumulate light to transform the stored energy into physical fitness under the Earth Chain state.”

“I won't ask you to accumulate light energy while using Earth Chain and Absolute Sleep for now. Just complete two combinations first.

“Let's use the three recovery skills together in the future. After all, only when the absolute sleep proficiency is high can there be sleepwalking effects.”

Baby Ginseng:???

“Also, the proficiency level of the combination skill has been reached. Try to integrate the accumulated light energy into the Energy Fruit. The power of the Energy Fruit should increase a little.”

After Shi Yu finished giving his instructions, he prepared to leave the ruins under Baby Ginseng's stunned gaze. He planned to find something to drink first.

He was a little thirsty...

Before leaving, Shi Yu looked at Eleven and Buggy.

At this moment, Eleven was happily practicing its electromagnetic force.

As for how to train, it could just create more than ten metal balls and then control them to fly at high speed in a small space.

When it could make more than ten metal balls never collide in this state, it would be considered a preliminary success.

Not only did it train its hardness, but it also trained its Lightning Palm and its supervision as well as its coordination.

Buggy followed closely behind the leader and also practiced similar abilities.

It was already very simple to create multiple illusions at the perfect level.

Just like how it created Eleven and its own phantoms at the same time back then, it could also create Ice Dragon Phantom and its own phantoms to cooperate.

During the vocation assessment, the cooperation between the two different illusions was actually very crude. It was just hardening and the combination of the worm silk.

But now, it has a bunch of skills. It could completely project an ice dragon and support its own ice dragon form, just like how the Sky Crystal Butterfly helped the Zonyan Rock Beast back then.

An Ice Dragon that could teleport... An Ice Dragon that could control space... When combined, Buggy would undoubtedly be even more awesome.

In addition, although the worm only had 3,000 energy points now, it was a classic example of fighting with high level equipment.

After using the new Ice Dragon Whisk, it was equivalent to a monster with lacking energy and skills, but its physical fitness was undoubtedly comparable to that of an overlord race dragon.

He could make a bunch of pets run with its physical strength alone.

In the dormitory, Shi Yu stood in front of the refrigerator. After happily gulping down half a bottle of iced sour plum soup, he suddenly felt his pocket vibrate.

This time, Shi Yu did not think too much and directly took out his cell phone.

However, because he didn't think too much, when he saw the contact, he was stunned on the spot!

Contactant: Dean Hao.

It wasn't Senior Lu, it wasn't Senior Panda, it wasn't Sister Beast Ear. Although he wasn't a rich lady, Shi Yu was even happier than seeing a rich lady on the phone.

He shakily pressed the answer button.

"Shiyu, tomorrow morning, the armor you customized will be almost completed."

"I remember you saying that you would immediately evolve after creating it?"

After picking up the call, a heavenly voice came from the other end.

“Yes.” Shi Yu clenched his fists and resisted the joy of jumping. “It’s been hard on you. I’ll go over at 10 tomorrow, alright?”

“Alright, sure.” Dean Hao’s tone was also a little expectant. “Prepare yourself, I’ll continue with my work.”

He had also been busy for several days working on the evolution equipment of Shi Yu’s pet.

Although Shi Yu wasn’t a student of his Mechanic class, it wasn’t a problem for him to help with such a small matter.

When Shi Yu grew up, it would be a huge favor.

Moreover, Dean Hao also felt a sense of accomplishment to personally help a powerful pet evolve.

After hanging up the phone, Shi Yu’s breathing quickened.

It was at least ten times more nervous than going to the college entrance examination.

He pondered for a moment and didn’t choose to inform Eleven, who was training hard, first.

Instead, he quickly contacted the few people who had specially reminded him to call them when Eleven evolved.

Actually, there were only two.

Senior Panda and her father were the only two people who were obsessed with the iron-eating beast’s evolution.

Ping Cheng.

Senior Panda was making plans for the ruins space.

As a top student of the Feeding Department of the Ancient Capital University and a woman about to inherit the family business, she became the chief planner of the Iron-Eating Beast Home Plan and was temporarily in charge of the new construction of the ruins.

Senior Panda was actually very talented. The other feeding faculty students might have entered Ancient Capital University through the professional feeder assessment, but she was different.

When she first entered Ancient Capital University, she had a professional Beast Tamer license and a professional Feeder license. Although her results weren’t outstanding in each assessment, she couldn’t help but learn a lot.

A few years after graduation, Senior Panda had advanced in both fields.

Beast Tamers were high-level Beast Tamers and had commander-level pets and feeders. Because they majored in this field in university, they didn’t fall behind.

Therefore, it was very difficult to find another person like her who had image, potential, ability, and time in Ping Cheng.

The Iron Eater's Village Plan that Shi Yu had imagined went around in circles and never went anywhere. After it was put into practice, the huge flag fell directly on Lin Xiuzhu.

"Iron Bamboo, Ironheart Wood, Golden Bamboo, and other food that iron-eating beasts like during their growth period must be specially grown..."

"Well, that fellow Shi Yu's growth speed will definitely be very fast. He's probably not far from evolution. I have to give them a special area to plant high-level spiritual plants according to the recipes that Dad's Iron-eating Beast likes after evolution..."

As Senior Panda was seriously planning, she suddenly received a call from Shi Yu.

She placed the cell phone beside her ear for a moment and pushed away the pile of information.

"These plans... are the same in the future!" She pressed her hands on the table and trembled. She was clearly very excited. She didn't expect Shi Yu to prepare Eleven to evolve so quickly!

How much would a billion yuan evolution material evolve an Iron-eating Beast?

She booked a plane ticket to the ancient capital overnight.

She wanted to see the first huge paywall evolution in this world.

Similar to her, Bamboo Stone Dojo's Hall Master Lin also widened his eyes and rushed out of the elderly lounge.

Of course, at this moment, Shi Yu himself would definitely be the most excited.

He had already entered the ruins space. He pulled up the back of Eleven's neck and forced it to sleep and rest. He adjusted his state and prepared for tomorrow's evolution.

"Huh? (Evolution?)" Eleven blinked and looked at Shi Yu.

Oh, that armed evolution...

Eleven nodded calmly.

It was just evolution, was there a need to be so excited?

Even if it didn't evolve, it could still be invincible in this world.

The pinnacle of pampering was hard work, self-discipline, slow seeking, and perseverance.

It was growth in adversity, rising from a low position, going through unyielding struggle, and definitely not relying on that evolutionary shortcut.

"(☆_☆)Ji—"

After Eleven finished speaking with a serious expression, Buggy, who had always regarded Eleven as a spiritual leader, showed an understanding expression.

As expected of a leader.

Tall, it was really tall. The thinking it had was indeed on a completely different level from it.

So this was the real reason why it had never been able to surpass its leader...

In terms of philosophy, there was always a gap between it and its leader!

“Then let’s not evolve?”

Shi Yu said, “In any case, the materials can be reforged and rebuilt. The increase in value is inevitable, so it won’t be a loss no matter what. I’m just worried that I don’t have money to buy evolution materials for Buggy.”

Buggy was excited. It wasn’t impossible. It didn’t have as much ambition as a leader, and it wanted to evolve.

Eleven: Sob (ಥ)(.ಥ∨ಥ), that’s wasn’t necessary.

It suddenly felt that evolution was not bad. At most, it would take a shortcut to evolve and try its best to make up for it.

Buggy:???

Buggy:?????

Shi Yu had seen through the essence of the iron-eating beast...

...

That night, Shi Yu and the others were discussing the evolution of the Iron-eating Beast. Eleven didn’t seem to mind, but how could he not? He was more or less looking forward to it.

After all, which pet could resist the temptation of becoming stronger and awakening new super skills?

During the discussion, Buggy that had yet to buy all the evolution materials and the baby ginseng that had yet to confirm the evolution path drooled with envy.

1

They were quite envious.

It was worth mentioning that because they were too excited, Eleven, Buggy, and Ginseng Baby, who had absolute sleep, slept very well and looked forward to tomorrow.

However, Shi Yu, who did not have absolute sleep... lost sleep.

It was not until dawn that he gradually fell asleep.

“You can still sleep and laze in bed like this?” The panda senior who rushed all night to Ancient Capital and came knocking on their door was speechless.

She looked at Shi Yu, who was washing up in a daze, and was very speechless.

“Wu—” Shi Yu spat out his mouthwash. It was precisely because he was looking forward to it that he didn’t rest well.

However, although he didn’t rest well, it wasn’t a big problem.

Shi Yu was already excited. In addition, he took a sip of the mini bottle hanging from his neck and immediately revived.

This was a continuous fragrance bottle made of Ginseng Baby's transcendent-grade sweet gas. It was very convenient and suitable for tired people.

"I was wrong. Let's go."

"By the way, where's Uncle Lin?" Shi Yu said in embarrassment after the incident.

Initially, he had said that he would go and fetch the two of them, but in the end, they came looking for him...

"He's still waiting outside."

"Alright, don't want to keep Uncle Lin waiting." Shi Yu hurriedly brought the panda senior out.

Outside, Lin Hongnian had indeed been waiting for a long time. He had a very restrained expression, but in fact, one could tell at a glance that this fellow seemed to be equally anxious.

"Shiyu... You're so slow. You have to take this kind of important life event seriously."

Lin Hongnian taught the young man that... he and the iron-eating beast were a relationship of true love. They had even taken a plane overnight to rush over.

"Yes, yes, yes. Let's go find Dean Hao," Shi Yu said with a smile.

"Let's go!" Hall Master Lin was secretly anxious.

...

Soon after.

Ancient Capital University, Mechanical College.

In a huge display room, an elder spoke to everyone with his hands behind his back.

"Here, this is it."

In his excited voice, everyone looked at the huge black armor hanging on the wall in front of him!!

Sharp claws, arms, tail, chest, back, and head. This armor covered very comprehensive armed areas, and the workmanship was very exquisite. Just by looking at it from the opposite side, everyone could clearly feel the simple and heavy power of the alloy armor.

And the effort the Mechanic had spent on it.

Metal Jade, Green Heart Sand, Black Purple Bronze Essence Ore, Heavenly Silver Iron, Blue Gray Pure Gold, Meteor Iron... These six high-level minerals had actually been named by Shi Yu.

Nine Li Alloy.

Generally speaking, one-tenth of the materials in front of them was enough for an Iron-eating Beast to complete the evolution of the monarch race.

And now, there were ten times more materials!!

During the period of searching for evolution materials, Shi Yu directly used his own strength to nearly empty the stock of the iron-eating beasts' evolution materials in the country. The low-level ones were still alright, but for example, after the evolution of four iron-eating beasts in a row, meteorite resources were currently very scarce.

If he continued searching, he might have to slowly buy it from individuals or other countries.

"How luxurious..." Under Dean Hao's lead, Hall Master Lin Hongnian looked at the huge armor in front of him in a daze.

Unfortunately, his Iron-eating Beast couldn't undergo a huge giant transformation before it evolved. Otherwise, he would have tried it back then no matter what.

"This set of armor, apart from craftsmanship costs... One billion?" Senior Lin Xiuzhu's beautiful eyes also flowed with anticipation.

Back then, Shi Yu was still a little kid who even needed to borrow money to buy iron-eating beasts...

And now, he actually so domineeringly prepared a billion yuan worth of evolution materials for that Iron-eating Beast. The reversal was simply too strong.

Lin Xiuzhu made up his mind in his heart.. He would earn money well. In the future, even if she didn't get a business as big as Shi Yu, she would at least get two-thirds of it to surpass his father, right?

Chapter 155: Eleven's Evolution

At this moment, the real protagonist of the room, Shi Yu, kept his gaze on the armor under the gazes of the three.

After a long time, Shi Yu took a deep breath and said, "You guys come and take a look too."

After saying that, three white summoning formations instantly appeared beside him.

Eleven, Worm, and Baby Ginseng instantly walked out of the summoning array, their expressions extremely overbearing.

However, when they came out and saw the super armor hanging on the wall in front of them, with just the chest armor even bigger than their current size. They immediately swallowed their saliva and were shocked by the pressure of the super armor.

"Sob..." Eleven looked at the huge armor in a daze.

It was huge.

Was it going to wear this?

"Ji!!" "Yi!!"

Buggy and Baby Ginseng were also shocked. Eleven wanted to rely on this big guy to evolve??

Too extravagant!

In the end... what would happen!

At this moment, the three pets were all shocked by the huge armor, while Dean Hao looked at the disappearing white array and baby ginseng in a daze.

When did Shi Yu... break through again?

The third pet had actually contracted... Moreover, baby ginseng???

With Shi Yu's current identity, he couldn't understand why Shi Yu's third pet would choose a ginseng baby.

In fact, Lin Xiuzhu and the others couldn't understand why Shi Yu's increase in speed was so unscientific. However, they were used to it, so it was alright.

"This ginseng baby... seems unusual." After carefully observing the baby ginseng, Dean Hao discovered that this baby ginseng seemed to be a little different from the ordinary baby ginseng. It wasn't as simple as it looked.

He took out the reconnaissance lens that was originally prepared for the evolution of the iron-eating beast and wore it in advance. He observed the energy value of Shi Yu's three pets...

Then, in an instant, the beeping energy value made the top-notch Mechanical Master, Dean Hao, almost hoarse.

A ginseng baby with nearly 9,000 energy points, an Iron-eating Beast with nearly 8,000 energy points, and a Green silkworm with 3,000 energy points...

Wh-what the hell!!!

"Let's begin!!"

At this moment, before everyone could have any more questions, Shi Yu could not wait any longer.

He glanced at Eleven.

The one-meter-tall Little Eleven immediately ran under the super armor under Shi Yu's signal.

It had seen the evolution of Hall Master Lin's iron-eating beast, so it was very clear about the evolution process.

"Wuu!!!"

Eleven looked at the huge armor in front of him. It first slowly enlarged to the point where it looked like it could wear the armor.

Then, it slowly picked up a component and put it on its body. The first part was similar to a helmet.

Then, under the sound of metal colliding, Eleven quickly put on all his armor and multiplied it, adjusting his compatibility with the armor to the most compatible state. It was almost seamless!!

“Wuu!!” Through the sealed head armor, Eleven’s black eyes looked at Shi Yu curiously.

Meanwhile, Shi Yu was also looking at Eleven.

Its whole body was wrapped in hard black armor...

It was the same for its face. Its head and face were covered in nearly sealed armor, revealing only black eyes, nose, and mouth.

As one of the weaknesses, its head even thickened the armor structure, looking like it was wearing a helmet, impressive and domineering.

Its neck and back were also covered in double armor. Its shoulders were long and protruded, making its entire body look more three-dimensional. However, after careful consideration, it looked more like the armrests used as mounts.

From the overall structure, the armor protecting its body seemed to be made of countless pieces of metal alloy. The area near its neck was like an iron circle, and its abdomen was like a vertical square steel plate. As for the area near its two legs, it returned to the iron circle structure that wrapped its whole leg.

In addition, the most important parts of the armor were the hard vambraces armed to sharp claws. The heavily strengthened vambraces made Eleven look rather strong overall.

Shi Yu was very satisfied with the armed monster in front of him. The only pity was that there were no extra materials to be used as weapons. However, this armor had already protected Eleven tightly. In this state, its entire body would be its weapon. It was the strongest war weapon!

“Quite domineering...” Master Lin muttered as he looked at Eleven, who had put on its evolution equipment.

Was he going to take the heavy armor route? The kind that was used in multiplication!

“Gulp...” Although Eleven had yet to evolve, the panda senior was already nervous. She placed her hands on her chest and prayed.

As for Buggy and Ginseng Baby, they were already filled with anticipation.

“Eleven, stop waiting.”

Shi Yu looked at Eleven and smiled.

“Hardening!”

After putting on the evolution armor, he used Transcendent Level Hardening to cover the entire body of the armor and connect itself to the armor. Only after there was no barrier between the two could the two be considered to have truly fused into one. Only then did it trigger the evolution opportunity!!

1

“Wuu!!”

As Shi Yu finished speaking, Eleven immediately used Hardening to cover its entire body. Even though it was very large and the armor was very complicated, it still completed it in an instant. Its use of Hardening had reached an unimaginable level!!

It was impossible for Hall Master Lin, Dean Hao, and Senior Panda to think that this wasn't Transcendent Level Hardening.

Instead, it was the hardening of a higher level of proficiency that Shi Yu had mentioned to them a long time ago, something that they felt was impossible!!

It was "Dao Proficiency" level!

"Wuu!!!!"

Under Eleven's roar, it hardened and armed its entire body. Its armor became even darker, making it look like it was wearing a layer of black armor. At this moment, Shi Yu's heart suddenly accelerated, and his body suddenly trembled. This was because a stimulating scene appeared at this moment!!

A strong white evolution light instantly enveloped Eleven's huge body!!

However, what shocked everyone was that the iron-eating beast, which was different from Hall Master Lin's that grew larger again when it evolved.

Eleven, who had evolved in the giant state, was actually shrinking under the light of evolution!!

As its body shrank, the armor on its body also seemed to shrink in proportion!!

It stabilized after reaching a height of two meters.

However, at this moment, no one felt the pinch about the materials.

That was because, although the evolution armor had shrunk as it evolved, Eleven's aura was really increasing at a terrifying speed.

It was condensed into essence.

Boom!!!

Under the light, a terrifying deterrence erupted from its body.

The instant Eleven's life potential rose to the level of a monarch, its deterrence skill became even more oppressive.

In addition, in the next moment, an invisible white flash of flames blossomed from Eleven's body, which was covered in white light, like an erupting volcano. Blue electric arcs were flashing in the huge flames that were several meters tall, stunning everyone.

The evolution scene of the three iron-eating beasts previously, even Lin Hongnian's intermediate monarch race evolution scene, wasn't as magnificent as this.

"Not only is it evolving, its growth level is also trying to break through to commander rank!"

At this moment, Dean Hao was detecting through the energy detector that Eleven's energy level was also increasing at a terrifying speed with its aura!

"Commander rank?"

Lin Hongnian and the panda senior were shocked. Shi Yu's Beast Taming Space was only level three.

At this moment, Dean Hao seemed to understand the reason why Shi Yu contracted this strange ginseng baby.

Shi Yu seemed to have expected that after the iron-eating beast evolved, its increase would be very terrifying and would increase the consumption of the Beast Tamer. Therefore, he contracted a ginseng baby in advance that could feedback to the Beast Tamer's physical recovery speed?

It had to be said that this guess was already very close to the truth.

Everyone was stunned the whole time, but in fact, Eleven's evolution process was very short, less than ten seconds.

At this moment, under the shocked expressions of Buggy and Baby Ginseng, Eleven's appearance after evolution finally appeared in front of everyone with the receding evolution light.

Seeing Eleven's evolution form, everyone was shocked for the second time.

1

This was because after the Iron-eating Beast evolved into a Nine Li War Beast, theoretically speaking, apart from its size, it wouldn't be much different from the armor form before evolution.

However, this experience was ineffective for the first time with Shi Yu and Eleven!!

Eleven was still covered in hard black armor...

However, the armor covering its face and head had already turned into the color of white lightning.

In addition, the places where its limbs connected to its body, the iron-wound thick armor also turned silver-white.

This made its overall color look even closer to that of ordinary iron-eating beasts.

It also made its overall impression look more mysterious, domineering, and honorable.

"Wuu—" In fact, apart from the armor, Eleven had another very important change!

In its evolution form, its original black eyes had completely transformed into a sky-blue color that seemed to contain lightning. Coupled with its black and white armor, it looked fierce and arrogant, like an overlord that could suppress everything!!

"Commander rank..."

At this moment, Shi Yu looked at Eleven, who had evolved, for the first time.

He had already sensed that Eleven's strength could easily break free of the contract and attack the Beast Tamer.

But clearly, Eleven didn't do that. Instead, it suppressed his strength.

Although it had changed appearance and looked even more impressive in armor, Eleven was still that Eleven, the Eleven that Shi Yu had slept with. There were no changes. At that moment, it was looking at him in surprise that only Shi Yu could understand.

1

"Congratulations." At this moment, Shi Yu spoke slightly in excitement. The invisible mirror index he wore also instantly detected the initial energy value after Eleven's evolution.

However, before Shi Yu could recover from his shock, Dean Hao, who was beside him, spoke with a stunned expression.

"Energy value, 8... 81964, 81964, how is this possible!!!"

"This is the standard of an overlord species pet among commander ranks!! It only just evolved and broke through!!"

"Could it be..." Dean Hao's eyes widened.

On the side, Hall Master Lin, who heard Dean Hao reciting the energy value, also had a stunned expression because this energy value could already crush any main force except his two monarch-level pets!

At this moment, looking at the shocked gazes of Dean Hao, Hall Master Lin, and Senior Panda, Shi Yu pondered for a moment and said,

"His race shouldn't have become overlord yet."

"This time, it only awakened a super skill. It's Inner Power."

"However, compared to ordinary Nine Li War Beasts, for some reason, Eleven seems to have an additional attribute, lightning. Because of this, it awakened two additional thunder-type skills!!"

"In addition... Without a doubt, in this state, its physical fitness doesn't seem to be inferior to some overlord races."

After Shi Yu received Eleven's feedback, he didn't care how much his strength had increased. He was only immersed in Eleven's current strength.

"Although it hasn't reached the threshold of the overlord race having multiple transcendent skills, at this time, due to its powerful physique and initial energy values, it might be more suitable to call it a quasi overlord race than a high-level monarch."

A quasi overlord race!

In the true sense, a ferocious beast that could tear apart dragons of the same level was born!

During this evolution, Eleven had five new racial skills!!

Skill: Electric Floating

< Level > Low

< Introduction > It's a thunder-type skill. It can fly freely using the magnetic force generated by electricity.

This skill directly solved the problem of Eleven not being able to fly.

After increasing its proficiency, it was indirectly training Eleven's control of the electromagnetic force!!

Skill: Lightning Storage

[Level]: Intermediate

< Introduction > It's a thunder-type skill. The body can be immune to the damage of lightning to a certain extent and can store lightning in the body and release it!

This was actually a skill similar to modifying the body. It could allow the pet to have excellent resistance and adaptability to lightning!

Moreover, it might be effective if it was combined with the reserved edge that could be almost infinitely charged!

The third skill... was Giant Transformation. This was actually the same as the slow healing of Baby Ginseng. It was very easy to be covered by high-level skills.

However, because of the existence of superior skills, the initial proficiency of this skill would not be low.

The fourth skill was the Nine Li Battle Beast's standard, impregnable.

Skill: Improvement

Skill Level: Advanced

[Introduction]: A metal-type skill. The user is protected by the metal-type power, increasing resistance to all types of skills.

This move could be superimposed with hardening, making Eleven even more meaty. He wouldn't be as afraid of soul, mental, and elemental attacks as before.

The fifth skill was naturally the metal-element surmounting skill, Concealment!

Skill: Inner Power

[Skill Level]: Level

1

< Introduction > It's a metal-type skill. It can enter a reserved state and create a physical source. It can accumulate power that exceeds its own limit and won't affect its own state. Under the sharp state, it can multiply the power accumulated and increase its attack power by several times, but it will pose a certain burden to the body.

This was the skill that Shi Yu looked forward to the most and felt was invincible.

Eleven suddenly had so many racial skills and became so strong. Shi Yu was so excited that he was about to explode.

The pets of the older students were only so-so.

Soon, he seemed to be invincible below the monarch level?

Wasn't this enough to sweep through Imperial Capital University?

What made his heart tremble even more was that it seemed like the inscription had yet to be carved?

Chapter 156: Second Stage Evolution Unrivaled Overlord

A quasi overlord race!!!

After Shi Yu finished speaking, Director Hao and the Lins gulped.

The evaluation criteria for race level was nothing more than reference pets' racial skills, racial growth potential, life force, energy value, physical strength, special talent, and so on.

Generally speaking, among the five major races of transcendent, commander, monarch, overlord, and myth, there were only three small levels: low, medium, and high.

However, according to the general division, due to the ridiculousness of certain monster races, Beast Tamers liked to call some races perfect pets. They were pseudo commander, pseudo monarch, and pseudo overlord races.

It meant that the potential of the species exceeded that of pets of the same level and was comparable to those of the next level. This was also applicable to the growth level.

For example, although Yin Zhengfan's Sky Crystal Butterfly was a high-level commander race, due to the speciality of the spatial attribute, its abilities were too unsolvable, so it was called a pseudo monarch race by Beast Tamers.

And more than a hundred years ago, the legendary Beast Tamer with the evolutionary talent cultivated pets. Because the racial potential was too strong, it couldn't be simply described with high-level overlord races. Instead, it was more suitable to use quasi-mythical races.

At the moment, the number of super racial skills did not meet the criteria of the overlord race, which meant that its growth potential was a little lacking. However, its life force, energy value, and physical strength had undoubtedly reached the criteria of the overlord race.

There was no problem calling it a quasi overlord race.

"This time, it should be quite scientific," Dean Hao muttered. Science was revealed in this unscientific situation.

The legendary Beast Tamer with the evolution talent had said that the evolution rules were that pets could evolve in multiple stages, but it was impossible for them to skip three levels at once.

Iron-eating beast of a transcendent race. After evolution, the monarch race was the limit.

Shi Yu's Iron-eating Beast's basic talent was so strong, and he had spent a huge price to evolve. It didn't seem like it was unacceptable for him to reach the pinnacle of the monarch race.

It's a scientific evolution, Dean Hao thought to himself.

"Science my ass."

"Aren't all evolution materials the same? Where did the lightning come from..."

"An additional two thunder-element racial skills awakened? What are they?!"

Master Lin Hongnian asked, his previous composure gone.

He was envious. Having two more racial skills meant that his race's potential would be much higher. After all, racial skills were the most critical factor in raising the level of a pet.

Moreover, dual-element pets were often more advantageous than single-element pets in certain situations.

In addition, the resources that could be absorbed were more selective.

Everyone clearly used the alloy of these six materials to evolve, so why did Shi Yu's Iron-eating Beast have an additional lightning attribute?

"It has awakened a total of five new racial skills."

"Low-level electromagnetic levitation, mid-level accumulation lightning, giantization, high-level impregnable defense, and super-level convergence!"

Shi Yu said, "Although you've awakened thunder-element skills, they're not very high-level skills."

Everyone:!!!

Lin Hongnian: w (◦Д◦) w

Electric magnetic levitation, storage lightning?

Lin Hongnian's eyes widened.

Although the level was not high, these two skills had super practical value, alright!!

Electric magnetic levitation could allow the Iron-eating Beast to fly, and it could also allow the Iron-eating Beast to master the electromagnetic force and control other metals to hover. It was known as electromagnetic control, so there was no need to talk about this.

Storage lightning was also very ridiculous!

If this skill was used on other pets, it would indeed be mid-level.

In essence, it was to transform the pet's body into an organ that could accumulate lightning energy from the outside world.

It could not have the effect of transforming physical fitness like the Energy Strengthening Beam, nor could it directly rely on the power of nature to increase the power of the skill like the high-level skill Lightning.

It was very ordinary. It increased the body's resistance and accommodation to lightning.

Although it had the effect of absorbing lightning to a certain extent to charge itself, there would definitely be an upper limit to its body and it couldn't be too heaven-defying. Otherwise, it wouldn't be judged as an intermediate.

But the problem was that the Iron-eating Beast's evolution type had an inner power skill!!

The skill could create a source of physical strength in the body. It could exceed the body's load and absorb external energy almost limitlessly!!

The upper limit of this energy capacity far exceeded the pet's own limit.

Then, at the critical moment, it could even multiply this power.

If there was a restrained edge and accumulation lightning, then the extreme power and upper limit of the accumulation power of the accumulation lightning skill would not be as simple as mid-level.

The so-called racial skills were really born to cooperate with other skills. They were interlinked and could be combined!!

Including Great Transformation, this skill with high consumption coupled with restrained sharpness could completely allow the pet to fight in the Great Transformation state to a certain extent, ignoring consumption!

"Why are there more lightning skills..." Dean Hao was also very confused.

Shi Yu was very special this time.

This had never happened before when the first three iron-eating beasts evolved!

He was the one who made the evolution equipment.

The problem was definitely not on the evolution equipment, but Shi Yu's pet itself!

"This... I'm not sure. I'll study it later," said Shi Yu.

He was also very puzzled.

He had a few guesses.

Could it be the effect of the Transcendent Level Thunder Palm on Eleven?

Or could it be the effect of maximal hardening on Eleven?

It had to be known that compared to ordinary hardening, Eleven's hardening had become easier to control and contain lightning because of its full growth rate. After absorbing the nature of the thunder-element mineral resource, the "Flat Thunder Stone"...

It happened to correspond to the two skills, Electric Magnetic Floating and Energy Storage Lightning.

Perhaps it was because of this that Eleven obtained the attributes of thunder after evolution.

To be honest, Shi Yu felt a little regretful.

If he had known earlier, he would have made hardening maintain the element of space and time no matter what.

However, Shi Yu quickly understood.

Resources of the time and space nature were originally few, and the price was ridiculous. He had really never heard of a metal mineral form. Only the metal mineral's nature could be absorbed, and even ordinary rock minerals couldn't!

Lightning wasn't bad either. After all, it was one of the most violent attributes. Shi Yu comforted himself.

"Eleven, you can transform into your previous form now, right?"

Shi Yu looked at Eleven and asked.

"Wuuu, wuu, wuu!!" Armor Eleven nodded. It could.

Using the Inner Power state, it could recover its previous state before evolution.

This skill could also be said to be free evolution.

Only in a degenerated and restrained state could the source of physical strength absorb external nutrition without restriction

Only in the state of evolution and Inner Power could the strength accumulated in his stamina explode.

"That's good." Shi Yu nodded, very excited.

"There's no hurry to restrain it. Do you want to see its new skill after its evolution?" Hall Master Lin asked curiously. "A combination skill of storage lightning and Inner Power... can it be done? If it can, it'll be invincible. It's known as the bane of lightning."

"Yes, yes." Dean Hao and Lin Xiuzhu agreed.

Dean Hao: "I happen to have a mechanical pet that knows thunder-type skills. I can charge it for you to see."

Shi Yu said, "Alright, but there's no hurry."

"Evolution hasn't been completed yet." He took a deep look at Eleven.

"Inscription."

"Don't forget, there's also an inscription!"

As soon as he finished speaking, the other three were stunned and suddenly remembered something.

That's right!!

The metal piece and the special inscription recorded in the ruins had yet to be carved.

What exactly was this inscription that Shi Yu and the others guessed was a medium for second-stage evolution?

Including Master Lin Hongnian's Nine Li Battle Beast, the previous three evolved Nine Li Battle Beasts would have a rejection reaction when inscribing inscriptions. Then, what about Shi Yu's one?

"Eleven, try?"

"Wuu!"

It nodded. It still remembered the appearance of the nine inscriptions.

It hesitated for a moment, then hardened the sharp claws of its right hand and slowly carved the special inscription on the metal piece on its body.

Screech...

Under everyone's shocked gazes, Eleven actually carved an inscription that the other Nine Li Battle Beasts couldn't inscribe.

At the same time, during this process, Eleven's body filled with white light.

In particular, the white light on the inscription Eleven carved was even more dazzling!

However....

Although it could be damaged, it wasn't completely carved.

Halfway through the inscription, Eleven also sensed the repulsive force that Hall Master Lin Hongnian's Nine Li Battle Beast mentioned. Its movements were forcefully stopped by the repulsive force.

"Wu." Eleven showed a difficult expression and looked confused.

At the same time, a sudden force seemed to be awakening in Eleven's body.

This feeling was like awakening a new racial skill, but for some reason, it couldn't completely awaken because it didn't fit with his body.

"Wuu—"

After failing countless times, Eleven was forced to stop carving. The inscription that he had just carved also quickly disappeared.

It quickly tried other types of inscriptions, but the results were all the same!

Halfway through, a repulsive force appeared. Every time, it showed signs of awakening skills of different races. Then, in the end, it didn't succeed.

Apart from Shi Yu, who was in deep thought, the other three had stunned expressions.

So what was the situation now?

It had clearly succeeded in carving half of it, so why couldn't he continue?

And that white light... seemed to be the light of awakening and evolution!

“Looks like the max level of hardening is indeed one of the basic conditions to inscribe an inscription.”

Shi Yu analyzed Eleven’s feedback in his heart. This definitely hid a big secret. He had to take a look later.

“However, it’s impossible to complete the carving perfectly with the full level of hardness alone.”

“Looking at Eleven’s feedback, does it mean that the nine types of inscriptions represent the opportunity for the awakening of skills of nine different races?”

Shi Yu was stunned.

In this way, if all nine inscriptions were engraved once, wouldn’t Eleven have more than ten racial skills?

After all, racial skills could reach the level of “Dao Proficiency”.

How much potential did this race have?

However, it still depended on the level of the new skill awakened.

If it was just low-level and middle-level, it was nothing.

If it were nine transcendent race skills, Eleven’s race level would probably be directly approaching the quasi-mythical level.

1

Apart from the fact that they couldn’t be considered divine beasts without divine-level skills, the number of transcendent-level racial skills would completely crush high-level overlords.

This was barely fitting for the godly Chi You’s mount.. At that time, if it evolved into a third stage, it would definitely be a Mythical Panda.

Chapter 157: Eleven’s New Race Skill

“Shi Yu??”

Shi Yu fell into deep thought for a moment. Lin Hongnian asked, “How is it?”

“It’s fine.” Shi Yu recovered and looked at Eleven.

“Looks like Eleven can’t either. Let’s try again in the future.”

“But the function of the inscription is already very clear. Every inscription should be able to awaken a new racial skill.”

“As for the conditions for activating new racial skills, it’s still unknown if a second evolution will occur during the activation of new racial skills,” Shi Yu said.

When Shi Yu finished speaking, the other three were shocked.

He could even awaken new racial skills?

Generally speaking, only when pets evolved, mutated, or obtained special bloodlines could they awaken new racial skills.

Nine inscriptions could do this? What exactly was this inscription!?

Of course, Shi Yu felt that it was definitely not as simple as nine inscriptions. It might still be related to full-strength hardening.

He already had a guess.

Maximum hardening could absorb the nature of other metal minerals and transform them into hardness.

But this nature, in essence, was a simulated external force and not its real strength. Eleven didn't completely digest it.

Could it be that this kind of inscription could permanently engrave the special metal nature of the iron-eating beast in its bloodline and become a racial skill?

Each inscription represented a special metal. Only specific metals that were compatible with the Iron-eating Beasts could form new racial skills...

If that was the case...

Shi Yu's heart skipped a beat. There were so many special metals in the world. If there was no exact route, even if he was the richest man in the ancient capital, he didn't have the capital to slowly test it.

Of course, it was also possible that this wasn't speculation. It was impossible to continue inscribing inscriptions now, or Eleven's growth level might not have reached the standard.

Sometimes, evolution had requirements for the growth stage. The most typical was that some pet races with the word "monarch" had to grow to the level of monarch to evolve.

"That white light just now really made me think that it wanted to evolve into a second stage."

Dean Hao took a deep breath. He didn't know what to feel now.

Lin Hongnian and Lin Xiuzhu were both happy and disappointed. They were happy that the inscription had such a special effect, but they were disappointed that there was no iron-eating beast that could engrave the inscription.

However, Eleven being able to carve half of it and detect the effect of the inscription was already a huge breakthrough.

Perhaps if Shi Yu was given a little more time, he could really fulfill all the conditions?

"Let's study it slowly." Although Shi Yu was anxious, he knew that there was no other way. Moreover, Eleven's current state already satisfied him.

"Yeah." Everyone nodded. Haste makes waste.

"Let's see Eleven's newly awakened racial skill first," Shi Yu said.

Then, he looked at Eleven.

“Wuu.”

White light flickered on Eleven’s body, and it immediately recovered to less than a meter tall, becoming its original appearance.

Surprisingly, during this process, its eyes also returned to the black color of ordinary iron-eating beasts.

The super skill Inner Power, restrained state!

“Ji...” “Yi...” As Eleven became smaller and its armor disappeared, Buggy and Baby Ginseng showed aggrieved expressions.

Eleven in this state was more intimate.

The evolution form was too powerful.

They had heard that there were more than 80,000 energy points. This was too exaggerated.

After they evolved and broke through, could their energy level also increase ten times like this?

Buggy calculated his own and felt that it should increase by 20 times. It didn’t seem very high to increase it by 10 times. Damn it.

“Eleven, Electric Magnetic Floating.”

Shi Yu gave the order. Eleven immediately nodded.

Blue-white electric arcs shot out around its body, producing faint blue electric light. In this state, its body slowly floated up.

“Electric magnetic levitation—” Hall Master Lin and Senior Panda revealed envious expressions. It was really good that he could fly.

Because it was a racial skill that had just been awakened, Eleven was not very proficient. Perhaps after his whole body hardened, it could be improved with the special nature of the current hardening, but there was still a long way to go before he could reach the flying skill of that wind-element pet.

Of course, this was normal. The abnormality was that Shi Yu had the ability to immediately add points to the skill level.

At that time, he would directly use electromagnetic levitation and not use the super electromagnetic cannon at all.

Perhaps it could even turn into a super-electromagnetic bear and launch itself.

If his growth level was higher, it might even be able to pull down the meteors in the sky!

2

“Wuu!!!”

After flying casually twice, Eleven landed excitedly and clapped crazily. Then, it looked at Buggy and Baby Ginseng.

Did you see that? It could fly by itself.

In the future, he would handle the Wuji Airlines battle strategy himself.

“Ji...” Buggy cried. Their feelings had faded. It didn’t want Buggy anymore after learning a new skill.

Was this electromagnetic force as handsome as the illusionary wings?

It seemed like it really was. Buggy was depressed.

“Yi!!” Baby Ginseng patted the worm. “It’s alright, Eleven doesn’t want you anymore, but you have me.”

Baby Ginseng expressed that it also wanted to grow wings and fly. When the time came, they would be the air force. If Buggy brought it along to fly, it would throw energy fruits from the sky. Wouldn’t it be better to bombard the sky?

“Ji!!” Buggy nodded. Alright, alright!

Their “Yiji Oneshot” combination would definitely be stronger than the “Wuji Airlines” combination. They’d destroy the enemy!

1

Ignoring the theater of Worm and Ginseng Baby, Eleven, under Shi Yu’s instructions, planned to see the combination of storage lightning and Inner Power

“I’ll leave the rest to you,” Shi Yu said to Dean Hao.

“It’s nothing.” Dean Hao laughed and immediately summoned the formation.

Previously, Dean Hao had summoned a monarch-level and high-level commander-level laser sword to help Master Lin inscribe inscriptions.

However, the laser sword was a combination of machinery and light. This time, Dean Hao clearly planned to summon another pet!

Boom!

Lights flashed.

In the next moment, a huge body nearly five meters tall appeared from the summoning light.

It was a huge purple mecha. It was tall and handsome with the appearance of a human. It was very similar to the Gundam in Shi Yu’s childhood impression.

“Purple Electric Mecha?” Shi Yu quickly saw the racial information of this mechanical pet through the index.

< Name > Purple Electric Mecha

[Attributes]: Machinery, Thunder

[Race Level]: High Class Monarch

[Level of Growth]: Monarch Level

[Race Skill]: Electricity, Energy Wings, Energy Shield, Thunderbolt, King's Spear, Electromagnetic Interference, Purple Thunder Core

Energy Points: 1779648

"Gulp." Shi Yu gulped and said, "1.7 million energy points??"

"Uh." Dean Hao glanced at Shi Yu and laughed. "A very high-level detector."

It could actually detect the energy value of the Purple Electric Mecha. It seemed that Bureau 11 had equipped Shi Yu with pretty good equipment.

"But it doesn't look like a mechanical life form. Do you want me to upgrade it into a mechanical life form?"

"No need, no need." Shi Yu hurriedly said, "I don't have that intention for the time being."

To turn the index into an AI, he would have to add points together with the three other pets. Shi Yu was not mentally prepared.

In addition, wasn't the mecha cool?

Shi Yu, Lin Hongnian, and Senior Panda looked at the tall mecha in shock.

"Dean Hao, during battle, can Beast Tamers also enter the mecha?" Shi Yu asked.

"That's right," Dean Hao confirmed. "Although it isn't as perfect as the Fusion Talent, the higher-level mecha are all installed with the Beast Taming Talent Connection System and the nutrition system. It can allow the pet to more perfectly connect to the Beast Tamer's Beast Taming Talent and allow the Beast Tamer to maintain the optimal state at all times."

"Of course, the value of this mechanical life..." Dean Hao smiled.

Mechanical pets were definitely the most expensive pets.

A complete Sovereign mechanical suit had a terrifying price. Even if it was a non-machine life form, the cost of building it was hundreds of millions. In comparison, the evolution materials of the iron-eating beasts were nothing compared to the expensive Mechanics.

"Wuu!" Eleven looked at this cold big guy and felt that its own armor was not as handsome as it.

Buggy and Baby Ginseng's eyes lit up, especially Buggy. They felt that this thing wasn't inferior to a dragon.

It wanted to try transforming into this tomorrow. Its eyes lit up when it saw Shi Yu, intending to curry favor with the Beast Tamer.

Determined Buggy.

However, what made Shi Yu most envious was actually not the Purple Electric mecha.

It was this guy's super skill, Purple Thunder Core.

Skill: Purple Thunder Core

[Level]: Super Level

< Introduction > It's a dual skill of both machinery and thunder. It can transform ordinary lightning energy into purple lightning.

Through the index, Shi Yu only saw a very simple introduction. However, although this introduction didn't go into detail, the description was too similar to the Heavenly Frost Cold Energy. They both converted ordinary energy into a higher-level energy!!

The power of the purple lightning definitely far exceeded lightning of the same level!

Unfortunately, this thing had the word 'core' and a mechanical attribute. Shi Yu really didn't dare to secretly learn it.

Although it was also a thunder-type skill, Eleven might not necessarily have a compatibility score.

"It's alright. It's fine if I don't want the purple lightning. Sooner or later, I'll get Eleven another super special lightning," Shi Yu muttered in his heart.

"I wonder what color Eleven likes. Red lightning? Black lightning?"

1

At the moment, super skills were no longer as attractive to him as in the rookie stage. Firstly, he couldn't teach them, and secondly, his horizons had broadened.

There were still many similar skills.

The flames, lightning, frost, and water in nature weren't completely the same. Many special elemental energy bodies existed as spiritual objects.

The Heavenly Frost Cold Energy and Purple Thunder were both special energies. Apart from that, there were also many Strange Fire and Strange Water.

After the corresponding pet absorbed this spiritual object, it was possible for it to master new skills.

In fact, not only pets, but also some Beast Tamers' special talents were special energies of similar forms.

For example, if a Beast Tamer had the talent "Cold Fire", he could transform the fire power of the pet he contracted into Cold Fire and give it an unbelievable nature.

"Purple Lightning, release lightning at that little Iron-Eating Beast," Dean Hao said to the purple mecha.

"Wuu!" Eleven took a step back.

It widened its eyes. It had heard it just now.

It had more than 1 million energy points. Did it want it to die?!

“Don’t worry, the other party will definitely control the power. Your storage lightning skill can resist absorbing the lightning from the outside world and store it in your body. As long as the power isn’t strong enough, it’s basically charging you,” Shi Yu said.

“Sob...” Even if Shi Yu said that, Eleven still panicked.

However, it endured.

“Wu! (Come on!)” Restraining Eleven raised his head. Just as he was about to look at the purple lightning mecha, a blue and white electric current had already descended!

It wasn’t purple lightning, but ordinary electricity.

Moreover, the Purple Electric Mecha had weakened a lot of energy, leaving only a trace of energy.

“This discharge is roughly equivalent to the proficient level power of a commander rank thunder-element pet,” said Dean Hao.

Zizizizi!!!

As soon as he finished speaking, the lightning landed on Eleven.

In the restrained state, it was actually equivalent to sealing the evolution power. Compared to the sharp state, Eleven’s attributes in all aspects were ruthlessly weakened.

The electric shock landed on it. As there were no defensive measures, Eleven cried out in pain.

However, it didn’t seem to hurt that much?

“Wuu!!!” Eleven opened its eyes and opened its mouth as if it was eating lightning. It directly used the lightning to swallow the lightning in its body and store it.

Although storage lightning couldn’t restore physical fitness like storage light beams, storage light beam couldn’t devour violent energy like storage lightning. The two had their own strengths.

After devouring it, Eleven patted its little stomach in satisfaction and looked at the Purple Electric Mecha to indicate that it would do it again.

“Yes.”

Seeing this, Lin Hongnian, the panda senior, Worm, and Baby Ginseng showed shocked expressions.

The power of the discharge just now was actually not small.

Both Buggy and the ginseng baby felt that this lightning could easily heavily injure them.

And Eleven directly swallowed it in its restrained weak state?

Although it was restrained, Eleven’s current physical fitness was still ridiculous!

“Heh.” Dean Hao looked like he knew it. Then, he signaled for the Purple Electric Mecha to continue releasing electricity.

In the next moment, the same powerful but endless electric current fell crazily.

“Wuu!!!” Eleven opened his mouth and tried his best to absorb and store the lightning energy with his body.

One second, two seconds, three seconds...

Ten seconds later, Eleven was still absorbing the lightning energy for storage!!!

“Storage lightning and Inner Power can indeed be combined,” said Shi Yu.

At this moment, he seemed to see a source of stamina like a thunderball in Eleven’s body!!

Eleven’s body had long reached the upper limit of its endurance and could no longer accumulate lightning power.

However, this thunderball was like an independent electrical organ. It took a different route to exceed the limit of Eleven’s body’s endurance and absorbed the external power crazily.

Inner Power+Energy Storage Lightning!

This meant that after Eleven removed its restrained state and entered the sharp state, the total amount of lightning it could release in one go would be several times stronger than its original entry-level lightning accumulation!!

Of course, there was definitely a price to pay, and the body would suffer a huge burden. However, it was still very strong because this also meant that Eleven would become the bane of thunder!

“Not bad, not bad!!!” At this moment, Dean Hao sensed Eleven’s state and said, “By the way, Shi Yu, your Beast Taming Space has reached level three, right?”

“Then did you participate in the assessment and become an intermediate Beast Tamer?”

“Not yet...” Shi Yu said.

“Then do you want to bring it in this state to the Beast Tamer Association to promote yourself to Intermediate Beast Tamer?”

“I remember that the promotion requirement seems to be for all pets to last a few minutes in the hands of a commander-level pet.”

1

“Uh.” Shi Yu and the others had strange expressions.

Did he have to have such a bad taste?

Are you sure that Eleven in this state wouldn’t slap the examiner’s pet to death?

Chapter 158: Shi Yu’s Advancement Examination

“Isn’t this too ruthless...”

The panda father and daughter looked at Dean Hao.

Letting the current Shi Yu participate in the Intermediate Beast Tamer assessment?

They felt that this suggestion was a little too much, very much!

Eleven should have very few opponents among commander-level pets at the moment.

Among the same level, the conditions to defeat the current Eleven were very harsh.

At least it had to be an overlord race. The skill proficiency couldn't be low. Moreover, it was best if the Beast Tamer's Beast Taming Talent was more violent.

Only then would there be hope of defeating Eleven.

However, how could the pets sent out in the middle-level Beast Tamer's promotion assessment meet this condition?

Who exactly could last five minutes under whose hands?

"It's not impossible."

Shi Yu said after some thought.

Evolution was for showing off. Otherwise, what was the point?

Now that Eleven had just evolved, he also wanted to fight and take a look.

But these people in front of him weren't suitable.

Dean Hao estimated that there were no pets lower than the monarch level that he couldn't defeat.

The other two were familiar faces. It wasn't easy for Eleven to attack them.

"Then let's do it."

Dean Hao laughed and said, "In any case, the Beast Tamer Association is close to the school."

"I'll call them right away and get them to prepare an exam for you."

"Alright." Shi Yu looked bashful.

Then he might as well level up his license.

The money a Intermediate Beast Tamer could get was even more. The school even had credits as a reward. It was a waste not to take it.

"Wuu!!" Eleven also raised its arms to make the lightning stronger.

...

The Beast Tamer Association of Ancient Capital.

At the assessment venue.

The in-charge, Master Qu Jie, unexpectedly received a call.

“Director Hao, why are you so free to call me today?”

In the circles of the ancient capital, these masters were still very familiar with each other.

“Haha, we have a student here who plans to take the Intermediate Beast Tamer Examination.”

“Look if you have time to prepare.”

Master Qu Jie smiled and said, “I’m free anytime. I understand. Should the examiner be more impressive?”

The reason why the examiner was better was not because he wanted to target the candidates, but because it was for the sake of the candidates.

An outstanding examiner must also be an outstanding teacher.

Sending any ordinary commander rank pet to the examination was completely different from carefully choosing a pet to guide the examination.

In any case, the examiner in the intermediate assessment would go easy on the candidates to the normal standard. As for whether the candidates wanted to have a fruitful examination, that was up to the examiner.

“Call your best examiner over.”

Master Qu Jie smiled. It looked like Dean Hao took this student very seriously.

“Which student is it? Do I know?” he asked.

He also knew those genius Beast Tamers from Ancient Capital University.

“It’s Shi Yu.”

“Shi Yu???” Master Qu Jie was stunned.

This kid.

This vocation assessment had not even been a month and he was already here to take the intermediate-level license?

It was really fast!

As the main examiner of Shi Yu’s vocation assessment, Master Qu Jie knew Shi Yu’s abilities.

He indeed had to arrange for a qualified examiner.

“I understand.”

After hanging up, he chuckled. I’ll arrange it.

Forget it, he’ll do it himself!

He had to give enough face for this top scholar of the ancient capital.

No one knew how to guide battles better than him, Master Qu Jie.

He was responsible for the vocation assessment to the master assessment in Ancient Capital. He knew it too well.

...

A moment later.

Shi Yu and the others arrived at the Beast Tamer Association.

After getting out of the car, Shi Yu looked regretful.

Lin Xiuzhu and Master Lin also had looks of regret.

They thought that Dean Hao would bring them here in his mecha.

Driving was boring...

“Hao, Dean Hao?!”

Outside the Beast Tamer Association assessment building.

A curly-haired woman in a white formal suit and holding a folder revealed a shocked expression when she saw Dean Hao, Shi Yu, and the others walking over.

She was arranged by Master Qu Jie to receive her... She originally thought that Shi Yu would be alone, but she didn't expect there to be someone important!

This dean of the Ancient Capital University's Mechanical College was a very busy person. Although he was only a top-notch master, his value was not inferior to ordinary legends due to the uniqueness of his Mechanic class.

After all, the current Mechanic class was known as the guardian of humans.

It was the most crucial power to differentiate between the humans of the Seven Nation Alliance and the humans of the totem area.

The woman looked at Shi Yu and sighed. The top scholar of the ancient capital this year was actually so highly regarded.

It was actually Dean Hao who personally came to accompany the assessment... However, shouldn't Shi Yu enter the Archeology Department? No matter how bad it was, what did it have to do with the Mechanic Department...

“I'm an intern examiner from the assessment department. Hello, Liu Jie, Dean Hao. Hello, Junior Shi Yu. Master Qu Jie asked me to wait outside.”

After putting down her doubts for the time being, Liu Jie immediately welcomed them from afar.

She graduated from Ancient Capital University last year and was now a high-level Beast Tamer. She was very familiar with the school leaders of Ancient Capital University.

“Uh, hello, hello.”

Director Hao and the others were chatting as they walked. When they saw someone coming, they immediately replied.

Beside her, Lin Hongnian glanced at Liu Jie and felt very emotional.

Back then, when he participated in the intermediate assessment, he even registered himself to look for the venue. Shi Yu was still a big deal.

A mid-level assessment made so many people surround it with interest, and there was even someone to receive him!

“Examiner Liu Jie... Are you going to give Shi Yu the assessment next?”

When he saw Liu Jie, Dean Hao asked, “Isn’t this little examiner too young? He doesn’t look much older than Shi Yu and is about the same age as Lin Xiuzhu!”

“No, no. Dean Hao only asked me to pick Junior Shi Yu up. He’s preparing to personally assess Junior Shi Yu.”

As an intern examiner of the assessment hall, Liu Jie had also heard of Shiyu. She couldn’t help but look at this legendary figure with a smile on her face, the Iron-eating Beast Knight...

“That’s good.” Dean Hao smiled.

“That’s good?” Liu Jie was stunned and felt aggrieved. He looked down on her. She was also very good at coaching battles, and this result was nearly full marks, alright?

After receiving so many people at once, Liu Jie panicked a little. She led the crowd to the dedicated examination hall.

During this process, Shi Yu was a little silent.

“Master Qu Jie... is that Master Qu Jie I know? He’ll evaluate me personally?”

“I remember that he’s a top-notch master.”

Ordinary masters were like Lin Hongnian, President Feng, and Commander He. There were only one or two ordinary monarch-level pets.

Top-notch masters referred to experts who could barely fight against overlord-level creatures for a period of time when almost all their pets were at the monarch level.

Could such a big boss take out a commander-level pet for his assessment?

“Master Qu Jie has mastered the special Beast Taming Talent, ‘Strength Seal’. He can seal the power of all his pets to maintain a relatively weak state.”

Liu Jie smiled and said, “It’s no problem to maintain it at the lowest commander level.”

Shi Yu: “Uh.”

This talent was a little useless.

At the side, Dean Hao laughed. “Are you thinking that this talent doesn’t sound very good?”

He said, "Master Qu Jie's talent is actually quite abnormal."

"This' Strength Seal 'is one of the few skills that can deceive the highest-level energy detector."

Shrinking couldn't deceive the energy detector. Even the reserved state of the super skill's Inner Power couldn't deceive the top-notch energy detector because of the existence of the stamina source, but this strength seal talent could!

In other words, this was a divine skill of undercover, assassination, and even bait the enemy. Sometimes, even Dean Hao felt that it was a little wasteful to misinterpret this as an examiner's specialized trait.

And the most impressive thing about this talent was that after deep development, it could seal the power of wild extraordinary creatures and make it easier for him to contract high-level pets!

"I see..." After Shi Yu heard it, he understood. It meant that he would have to face a suspected monarch-level pet that had sealed its strength to commander rank.

What a bully, this intermediate-level assessment! Its level was lowered artificially, but the skill proficiency and experience were still there.

"Don't worry, the intermediate assessment is actually mainly a guidance battle to test the various qualities of the Beast Tamer."

Examiner Liu Jie smiled and said to this junior, "Master Qu Jie is a battle instructor. As long as your performance reaches the standard, you'll pass."

At this moment, Dean Hao and the panda father and daughter were laughing in their hearts.

Guiding battle? Don't worry, it was already considered good if he didn't fail!

...

In the huge specialized examination hall, Master Qu Jie had been waiting for a long time.

When he saw Liu Jie bringing a group of people over, he was stunned.

Dean Hao? And that person... wasn't he the first Beast Tamer of the Nine Li War Beast, Master Lin Hongnian?

It wasn't Shi Yu himself, but there were actually so many people.

"Director Hao? Master Lin? And Shi Yu... Why are you guys here too?"

Senior Panda was clearly ignored.

"Isn't this because not only did Shi Yu break through, but the Iron-eating Beast has also just evolved? Let's come and watch the show." Dean Hao smiled and said, "After all, the evolution equipment was made by our Mechanical College."

"Uh." Master Qu Jie's expression turned solemn.

He cursed in his heart.

He looked at the smiling Shi Yu.

Holy shit, that little Metal-eating Beast that could only be worth more than 3,000 was already quite ridiculous.

And now it had evolved?

After evolution, when one reached the level of a monarch race, their energy value would multiply by six to seven thousand.

No, it would definitely be higher. It might even approach ten thousand and reach the pseudo commander rank!!

Apart from that, his physical strength and other qualities were definitely stronger. There were also new skills...

Considering that Shi Yu's pet's skill proficiency was also ridiculously high, if he only sealed his pet's energy level to the commander rank's minimum requirement of 10,000, this guidance battle would not be easy to guide.

That was because, in theory, Shi Yu had 3VS1 in this battle. Apart from Eleven, Shi Yu could also send two other pets.

Master Qu Jie's scalp went numb. He understood why Dean Hao said that a powerful examiner was needed.

If the examiner was too trashy, he might even fail in front of a newbie like Shi Yu. It would be embarrassing.

"It's not a big problem."

Master Qu Jie laughed and said, "Then watch carefully. How is it, Student Shi Yu? Can we carry out the assessment now?"

Soon, he recovered his calm. It was fine. Even if his pet sealed its strength, it still had a bunch of perfect proficiency skills and other skills with perfect proficiency.

The skill proficiency was at least higher than Shi Yu's new pet.

Even if it was one against three pseudo commanders, he could still win 100%. This was his confidence as a top-notch master.

"Then let's begin," Shi Yu said.

After Master Qu Jie and Shi Yu confirmed it, the two of them walked towards the venue.

As for Dean Hao, the panda father and daughter, and the intern examiner, Liu Jie, they sat at the spectator area to watch the commotion.

"Let's send our pets out together."

After arriving at the venue, Master Qu Jie casually said to Shi Yu and started to summon the formation.

A moment later, the purple summoning array was accompanied by dark red flames that surged out, forming a four meter tall phantom!!

“Roar!!!”

The phantom gradually formed and condensed into a monster with brown muscles holding a stone battle axe with a pair of giant horns.

[Name]: Ox-Headed Beast King

[Attributes]: Fire

[Race Level]: Low Level Monarch

[Race Skill]: Raging Flame Charge, Flaming Axe Strike, Flame Horn, Thorny Flame Armor, Deterrence, Fire Battle Soul

The instant Master Qu Jie summoned his pet, Shi Yu was at a loss. The panda father and daughter were also at a loss.

That was because Master Qu Jie had the talent of strength seal. With this talent of baiting the enemy by pretending to be prey, theoretically speaking, he should contract some pets with stronger deceptive appearances...

You contracted a ferocious Ox-Headed Beast King<segment>, so it was obvious that you were very strong, alright? How could you deceive the enemy?

This was one of the evolution forms of the monarch race of the transcendent ferocious beast, Ox-Headed Beast... The prerequisite was to awaken deterrence skills with other evolution materials.

“Energy value, 10086.”

Through the index, Shi Yu could tell the Ox-Headed Beast King’s energy value with a glance. Its strength had indeed been sealed to the commander rank threshold.

Shi Yu had a strange expression because there was no need.

“Sob.” On Shi Yu’s side, in the white summoning array, the restrained Little Eleven slowly walked out and looked at the ox-headed beast king opposite him.

“Sob.” Eleven showed an excited expression. This opponent looked pretty good.

He felt that it was on the same level as the Zonyan Rock Beast. They were both very powerful.

“White Formation, Beast Taming Space level three.”

At this moment, Master Qu Jie saw the color of Shi Yu’s summoning array and nodded. Shi Yu had reached one of the requirements for the advancement of an intermediate Beast Tamer.

The other condition was that in the hands of a commander-level pet, it would fight for five minutes without losing!

This was the hardest.

“Huh?” After Shi Yu summoned Eleven, Master Qu Jie said, “Where are your other two pets?”

Shi Yu said, “Yes...”

Shi Yu then summoned the worm and ginseng baby.

As soon as these two guys came out, they immediately looked like they had the intention of sitting around.

They had no intention of attacking at all.

“Uh.” At the same time, Master Qu Jie was stunned again when he saw the worm and ginseng baby.

This worm had yet to evolve. Good, good. If this worm also evolved, it would be even harder for him.

As for the ginseng baby, Master Qu Jie was at a loss. Why would Shi Yu’s third pet contract a ginseng baby?

Logically speaking, a genius Beast Tamer like Shi Yu should contract a rare pet...

“Wait!!”

Master Qu Jie didn’t pay attention to the worms and ginseng babies for too long. He suddenly widened his eyes and looked at the reserved Little Eleven who was rubbing his fists.

The Ox-Headed Beast King also sensed the unusual aura on Eleven’s body. At this moment, it was looking at the Little Iron Eating Beast with narrowed eyes.

“It... has reached the commander level?” Master Qu Jie said in disbelief.

“Yes.” Shi Yu nodded.

“This...” Master Qu Jie was stunned. Shi Yu didn’t have the Beast Taming Space strengthening talent like Yin Zhengfan. How could a pet reach commander rank in advance?

Generally speaking, only the fourth-level Beast Taming Space and the physique of high-level Beast Tamers could withstand the consumption when commander-level pets broke through and grew.

Those who broke that rule... were usually drained dry.

Suddenly, Master Qu Jie looked at Baby Ginseng. Please don’t tell him that in order to break the restrictions in advance, Shi Yu had specially made a bunch of preparations... including contracting emergency supplements.

Damn, that worked?

“Commander rank?” At the same time, in the spectator area, examiner Liu Jie was stunned.

She looked at the other three.

The three of them smiled and nodded.

Liu Jie was silent. This junior was ruthless.

“What’s the point of the assessment?” On the other side, Master Qu Jie’s face darkened. “You definitely meet the standard of an intermediate Beast Tamer.”

“Even the standards of high-level Beast Tamers are almost fulfilled.”

Shi Yu had an innocent expression. "Then we won't take the assessment?"

Master Qu Jie was silent.

"Forget it, I'm already here."

He looked at Dean Hao and the others who were smiling in the audience, and his expression darkened. He finally knew why the busy Dean Hao had come to watch the show. It turned out that there was a big show to watch.

Did he want to see Shi Yu beat up the examiner?

Impossible!

Not only did he want to give him an intermediate-level license, he also wanted to fight the examiner!

How could an examiner, such a sacred profession, be beaten up by an examiner?

"Fight!"

He wanted to see how powerful Shi Yu was now.

In the blink of an eye, Master Qu Jie did not talk about virtue. With a boom, dark red flames erupted from the Bull-headed Beast King's body!!

"Roar!!!" The Bull-headed Beast King roared, raised its battle axe, and swung down!!

Bang!!!

The huge ax burned with flames, and the surrounding heat waves began to sway. The destructive flames directly made the arena red and crack.

The transcendent Exploding Flame Axe attack directly changed the terrain, causing the venue to start shooting flames. He even condensed a terrifying flaming axe shadow and released its energy!

Hu ~ Hu ~

In the arena, a Flaming Axe attack that could easily hack a steel building in a range of several meters attacked.

"Master Qu Jie is too shameless..." In the spectator area, examiner Liu Jie spoke up. A mid-level assessment, and he was using the transcendent skill of his pet?

Even if the opponent was also a commander rank, it was a little bullying...

However, just as she finished speaking, her mouth opened slightly. She saw that the restrained Eleven opposite her suddenly erupted with lightning.

Buzz...

At the same time, Eleven made a posture of gathering strength to punch. The violent lightning power formed countless arcs on its body. It was now like a violent lightning machine!

In an instant, Eleven punched.

Buzz...

At this moment, Master Qu Jie and the Bull-headed Beast King's expressions froze.

They sensed a huge threat from Eleven's palm that was filled with electric light!

"Eleven, Hardening Thunder Palm," Shi Yu said.

Boom!!!

As the lightning accumulated in Eleven's body erupted, electromagnetic wave patterns instantly appeared around it and gathered into a fist. The terrifying fist power swept up a huge fist wind like an electromagnetic storm.

The Thunder Palm's energy was released and blasted towards the Flame Axe. Then, it instantly swallowed all the flames. During this process, it directly lifted up most of the cracked floor and crushed it. Then, it swept the gravel and swallowed the Ox-Headed Beast King!

Even if it was in a restrained state, its energy value was not what the Ox-Headed Beast King with sealed power could compare to.

Bang!!!

In an instant, smoke and lightning lingered around the Bull-headed Beast King's body, and it was sent flying by the aftermath of the thunder palm's explosion!

At the Transcendent level, he released the Thunder Palm! Under the coordination of the thunder nature of the hardened state, he even borrowed the power of the accumulating lightning!

Examiner Liu Jie's eyes widened as she watched helplessly as the Ox-Headed Beast King was sent flying by Little Eleven, who hadn't moved at all... Monster? Moreover, this was still in a restrained state, right??

Chapter 159: Strength in the Nine Li Form

Bang!!!

The Ox-Headed Beast King was sent flying.

"You guys..."

After this attack, Master Qu Jie's expression changed.

It quickly looked at the ox-headed beast king in the smoke, whose body was partially charred. It used its ax to stab the ground.

If he remembered correctly, after the Iron-eating Beast evolved, it mastered the super skill to restrain its sharpness.

Shi Yu's Little Iron Eating Beast was clearly in a restrained state!!

The Ox-Headed Beast King of a monarch race was suppressed before this panda even erupted with power??

“This power, what’s going on...” At the spectator area, Liu Jie was similarly confused.

“The reason is very simple. It’s because it’s strong enough.”

Dean Hao said calmly. A billion worth of evolution materials, even in the Iron-eating Beast state, would more or less receive some increase.

“Just now, It didn’t use the additional lightning as a source of stamina. It only used the strength naturally stored in its body.”

Dean Hao said, “Even so, can he still have such strength in its reserved state?”

He began to be curious about Eleven’s strength.

Beside them, the panda and its daughter were also looking forward to it.

The stronger the iron-eating beast, the happier they were.

After all, Shi Yu and Eleven were ambassadors of the Iron-eating Beast Breeding Base...

“In that case...”

In the arena, Master Qu Jie was numb. He felt that it was troublesome. He took a deep breath and gave the next order.

Since ordinary skills were not enough, he would combine the profundities!

“Roar!!!” In the next second, the Bull-headed Beast King stomped on the ground again.

Profound: Red Lotus Explosion

Boom!!!

Its entire body was filled with flames again, as if it had turned into a flaming tank.

Under the profundity combination skill of the Ox-Headed Beast King’s Raging Flame Charge and Horn of Fire, the flames it turned into seemed to have become a fire red lotus with a huge horn. It charged at Little Eleven with very terrifying power and energy.

“This...” Liu Jie was stunned again.

Hey, hey, hey, Master Qu Jie, this is an intermediate Beast Tamer assessment, not a master assessment!

“Wuu!!!”

The profundities didn’t matter either. In the face of this terrifying attack, Eleven still had a calm expression. After letting out a roar, it directly turned into a size similar to the Bull-headed Beast King in a restrained state!

Moreover, its whole body hardened, and it smashed towards the bull-headed beast king’s huge horn without dodging!!

It was a super combination skill that was proficient in level multiplication+Dao Proficiency!

Bang!!!

In an instant, under the collision of the Bull-headed Beast King and Eleven, explosive flames surrounded their bodies!

Boom ~ Boom ~ Boom ~ Boom ~

Accompanied by the roar of the flames and the explosion of heat waves, this huge confrontation stunned Liu Jie, who was watching the battle. You call this an intermediate assessment?

If that was all, it would have been fine. In the next second, the huge flames changed shape, as if forming a fire tornado, and then disappeared. In the flames, with a roar, the huge Bull-headed Beast King was pulled by Eleven's horns, raised, and thrown out!!

Bang!!!

The Ox-Headed Beast King, which had used the combination profound meaning to collide, was directly blocked by Giant Eleven. It was thrown out and hit the ground!

Examiner Liu Jie's expression was already stunned. She dared to confirm that if one of them was her, she would have been insta-killed!

No wonder Director Hao looked down on her...

"Roar!!!"

At that moment, the Ox-headed beast king that was thrown out by the horns exploded in anger.

Why was the strength and defense on the other side so ridiculous?

"Damn it." As the Ox-Headed Beast King crawled up, Master Qu Jie panicked.

Although the Ox-Headed Beast King had sealed its power, this little Iron-eating Beast was too difficult to deal with.

If he didn't show some real ability, he would probably fail.

"Roar!!!"

After being suppressed one after another, the Ox-Headed Beast King was filled with anger, and flames of war filled its eyes.

"Roar!!!"

This time, fiery cracks appeared all over its body, as if the ground had been split open by the flames. At the same time, an even larger illusory image of the Demonic Ox Flame appeared behind it.

Skill: Thorn Fire Armor

[Introduction]: Intermediate fire-element skill. Clad in armor of flames that looks like thorns. When the enemy attacks you, the flames will erupt with a stronger power to attack the enemy.

Skill: Flame Battle Soul

< Introduction > It's a transcendent fire-element skill. Summon the Flame Battle Soul and fight together. During the existence of the Flame Battle Soul, it can increase the user's strength, defense, speed, fire power, battle will, injury recovery speed, and can be a substitute to help the user be immune to one fatal attack.

Boom!!!

After using some proficient level Thorny Flame Armor and Bathing Flame Soul, under the enhancement of the battle soul, the Ox-Headed Beast King was like an incomparably violent giant fire beast. Its huge body could barely capture the explosive speed with Eleven's perfect super vision. It came in front of Eleven amidst the trembling ground and swung its ax.

"Wuu!!!"

Eleven entered the Thunder Armor state under the enlarged state and took this axe head-on. However, even if it was full-strength Hardening+Perfect Level Thunder Palm+Mastery Level multiplication, it could only be suppressed by this violent attack.

Eleven first felt the huge power of the Ox-Headed Beast King, and its feet collapsed. Then, it felt the second rebound of the Thorny Flame Armor from the ax after it hit the ax!!

This Ox-Headed Beast King had actually trained the Thorny Flame Armor to the point where it could be enchanted into the battle axe, although the battle axe was originally one with the Ox-Headed Beast King.

Boom ~ Boom ~

"Wuu!!!" Under the double strength, the restrained Eleven's energy value was much higher than his opponent, but it was still knocked over with a bang in terms of strength. Like a leaking panda balloon, it was smashed back to its one-meter state and flew onto the arena!

Bang!!!

Eleven fell into the pit.

"Finally..." Examiner Liu Jie felt that it was hard for Master Qu.

"Phew." After finally suppressing Shi Yu and the others, Master Qu Jie felt that he had regained some face.

However, before he could calm down for a moment, Eleven, who was opposite him, let out a cry of dissatisfaction.

After recovering quickly with the help of the high-speed healing, it got up.

White evolution light shot out of his body.

At this moment, for some reason, Master Qu Jie and the Ox-headed Beast King's hearts trembled.

Boom!!!

Under the light, a terrifying deterrence erupted from Eleven.

At the same time, with the light, Eleven's body gradually enlarged to nearly ten meters.

A moment later, Eleven's Nine Li Battle Beast form appeared in front of the Ox-Headed Beast King.

The huge armor of black and white covered its entire body in hardened armor. Its blue eyes were as domineering as lightning. At this moment, lightning was really entangling in the metal armor. In an instant, an incomparable pressure enveloped the Ox-Headed Beast King.

Even before the strength seal, as a real monarch-level pet, it couldn't help but swallow its saliva when facing Eleven in this form.

"This is... its evolved form?"

Master Qu Jie also gulped.

"Again."

"Wuu!!! (Again!!)"

Shi Yu and Eleven spoke at the same time. At the same time, with a boom, Eleven's super skill was activated for the first time after it evolved into a sharp state.

The overload of lightning that had been accumulated in its stamina source directly filled its entire body, making it look like a tall Thunder God. It was incomparably domineering. The power of this lightning bolt completely exceeded the thunder palm just now!

Boom!!!

The shocking energy explosion stunned Liu Jie, who was in the audience, again. She originally thought that Master Qu Jie was finally going to turn the situation around, but she realized that things weren't that simple...

Congratulations, Master Qu Jie, for baiting the opponent's "sealed" state.

At the side, the panda father and daughter and Dean Hao revealed excited looks. This power was such a waste of talent if not used against dragons!

Multiplication+Energy Storage Lightning+Lightning Palm+Inner Power...

Nearly 100,000 energy points against the Ox-Headed Beast King that was sealed with about 10,000 energy points. At this moment, the difference could no longer be made up with skill. This was absolute power. No one could stop a difference of ten times.

"Roar!!!!"

At this moment, sensing a huge threat, the Ox-Headed Beast King roared and activated the proficient level of the flames of war. The battle soul floating behind it directly attached to its body and fused into its body. At this moment, the Ox-Headed Beast King's muscles increased exponentially and its body enlarged. Its gaze shot out flames as it swung out another Flaming Axe!!

Boom!!!

The air vibrated!

However!

This Bursting Flame Axe Strike, which should have been earth-shaking and could casually send Eleven flying with one strike just now, hit Eleven's hardened armor... With a bang, it actually didn't leave any marks on Eleven's body!!

Instead, the huge impact made the Ox-Headed Beast King's whole body go numb, and it took a few steps back!!

There was no way to break through the defense!

The Ox-Headed Beast King revealed a shocked expression, its hand trembling so much that it couldn't even hold the battle axe properly.

"This body strength, how is it possible..." Master Qu Jie also said with a shocked expression.

It was no wonder that Master Qu Jie was shocked. After evolving, Eleven's body strength was comparable to that of the overlord race's dragons. In addition to hardening, there was a difference in energy. As long as the Ox-headed Beast King remained in this state, even if it attacked with all its might, it would still be giving Eleven a mere massage!

"Wuu!!!" After evolution, even though the expression under the armor was very fierce, Eleven still smiled foolishly. It was its turn.

Boom!!

Eleven, in its giant form, directly threw a simple palm.

It was a simple palm, but it contained monstrous power.

Buzz—

The Thunder God's palm that descended from the sky made the expression of the Bull-headed Beast King, who was holding a battle axe, change.

Stupid Beast Tamer.

What kind of assessment did they call him out for?

Intermediate assessment?

And sealed his power for this?

What kind of assessment was this?!

Give back the Ox-headed Beast King's power!

Otherwise, it would turn from a bull-headed beast king into a battle-axe steak!!

"Hou!!!" The Ox-Headed Beast King let out a roar!!

Master Qu Jie was also shocked by the might contained in this attack.

This was called a commander rank?

Without nearly 100,000 energy points, he definitely couldn't release such a powerful skill!

"For you!"

At this moment, Master Qu Jie was forced to unseal a portion of the Ox-Headed Beast King's power, restoring it to a level close to 100,000 energy points. This level was still considered a "commander-level" standard, but compared to the 10,000 just now, one was the lower limit, and the other was almost the upper limit.

If he was forced to let the Ox-Headed Beast King recover its monarch-level battle power during the assessment, then he wouldn't need to be an examiner anymore. He could just retire!!

This was his final stubbornness.

Boom!!!

An almost tenfold aura erupted from the Bull-headed Beast King.

"Old Qu can't handle it," Dean Hao shouted.

"It's been unsealed..." Liu Jie's intern examiner was also a little confused. Was this an intermediate examination?

The examinee forced the examiner to release the seal and used the strength of almost the upper limit of the commander rank to deal with it?

It had already exceeded the level!!!

She admitted that she had underestimated Junior Shi Yu a little previously.

This guy was a pervert!

The top scholar of the ancient capital? Even if the top scholar of the imperial capital and demon capital were added together, they probably wouldn't be enough for him to fight!

At least, as a high-level Beast Tamer, Liu Jie felt that she was inferior to Shi Yu in a one-on-one battle.

Ten times the energy was unsealed.

The Ox-Headed Beast King erupted.

It felt that it could do it again.

However.

"Roar!!!" Even though the Bull-headed Beast King had recovered to an even stronger state, Master Qu Jie and the others still underestimated this attack.

The lightning power contained in this palm wasn't as simple as Eleven's limit.

It had long surpassed the extreme destructive power of Eleven Hardening and Thunder Palm!!

This was thanks to the huge amount of electricity that accumulated energy lightning and converged sharpness that helped Eleven accumulate power that exceeded his own limits!!

This was part of the power of the monarch-level Purple Electric Mecha!

The effect of Inner Power was to accumulate a huge amount of energy that exceeded the limits of the body and then multiply it out!!

However, the process would cause huge side-effect damage to oneself.

At this moment, the electricity that should have caused a huge load on his body, under the coordination of Eleven's hardening "Thunder", fused into the Thunder Palm at the smallest cost and was released by Eleven!!

"Wuu!!" Eleven felt the terrifying lightning power as if it wanted to tear apart the hardened substance, armor, and palm. The huge pain made Eleven both excited and afraid.

As long as it wasn't afraid of pain, it could release powerful skills that exceeded the limits of its body?

It liked this Inner Power too much.

Later on, Shi Yu had to maximize the high-speed healing... It could use this skill as self-destruction!

Bang!!!

The thunder palm hit the huge axe of the Ox-Headed Beast King below, whose eyes were bulging. But in the next moment, the Ox-Headed Beast King's expression almost exploded.

He sensed an unbearable terrifying power descend.

"Boom!!!" The ground under the ox-headed beast king's feet directly cracked, as if it was about to collapse and drown it.

"Roar!!" The Ox-Headed Beast King's gaze exploded. Wait, this power... Something's wrong! Is this f*cking commander rank?

Beast Tamer, help! This bit of sealed energy wasn't enough to sh*t!

Master Qu Jie was also stunned. He didn't expect that despite unsealing so much power, the Ox-Headed Beast King was still suppressed by this attack!!

"Huge Transformation and Inner Power are both skills with high consumption and high damage superimposing attack power. Even if the opponent's level is relatively high, he might not necessarily be able to withstand a round of explosive power," Master Lin Hongnian explained excitedly.

This was the Iron-eating Beast, this was the Nine Li Battle Beast!!

Every skill was born to increase strength beyond the limit!

Compared to the average enhancement of the Flame Bath Battle Soul, not only was it not damaged, but it also had a protective super skill. The reserved sharpness was even more extreme!

It gave up everything in exchange for an attack power that exceeded the limit. In fact, during this process, it would even heavily injure the user. In the direction of the attack, almost no super skill could compare to the extreme Inner Power!

The name of a battle beast was well-deserved.

“Roar!!!” The Ox-Headed Beast King resisted with all its might.

When the lightning palm made contact with it, violent lightning surged out. At the same time that the Ox-Headed Beast King was tortured, it also exploded Eleven’s hardened substance and armor. Fortunately, these things were already completely one with Eleven. They could be recovered with high-speed healing. If they were like the Mechanic class, they would have to spend money to repair them after breaking through. Shi Yu would cry to death.

Bang!!!

In an instant, the ground collapsed. The venue rumbled, lightning flashed, and sporadic electric arcs and fire snakes flew in all directions. As for the Ox-Headed Beast King, it was about to lose control and was smashed into the ground, revealing a tragic expression.

Son of a b*tch, what a scam of a Beast Tamer. He won’t play assessment battles with this guy anymore.

Who exactly was the one being tested?

It was just about to continue cursing when it suddenly realized that it had disappeared from the outside world and returned to the Beast Taming Space.

Eleven hit nothing but air and shattered the arena.

In the outside world.

Master Qu Jie had an idea. After putting away his pet, he had a calm expression and said calmly, “Not bad, five minutes have passed. Congratulations on passing the assessment. You’re the most outstanding candidate I’ve tested. Not only have you resisted for so long, you almost forced out more power from the Ox-Headed Beast King. Your future is very promising.”

Boom.

After the palm missed, Eleven looked at Master Qu Jie in confusion. Are you a sore loser? Let it out, it can still fight!

“Uh.” Shi Yu was also stunned.

In the distance, Dean Hao and the panda father and daughter had strange expressions.

What did you say?

He had already forced it out!!

When Eleven was still in a restrained state, his battle standard had already far exceeded the intermediate assessment!

Which examiner would use transcendent skills, combination profundities, or even super-level skills to test candidates?

Moreover... They looked at the corner of the arena, where each of Shi Yu's two other pets were just staring there, revealing a confused expression. Moreover, only one of Shi Yu's three pets appeared...

The three of them looked at Liu Jie, the intern examiner beside them.

Liu Jie: ①_②It's too dangerous to be an examiner. Perhaps what she needed to do was to be as thick-skinned as Master Qu Jie?

1

Shi Yu and Eleven were too strong...

"..." At this moment, although Master Qu Jie's expression was calm and stubborn, his heart was already trembling. F*ck, what was wrong with this Shi Yu? Were both he and these pet monsters? The vocation assessment was already ridiculous... But now...

Even among the high-level Beast Tamers, he was probably in the first tier.

As other pets break through, they might be able to touch the threshold of the "quasi-master level" very soon. They could barely fight against real monarch-level pets.

Now, Qu Jie felt a little regretful for appearing personally. If he had known earlier, he would have thrown the assessment mission to someone else. Guidance battle... Guidance his a*s. He couldn't control the situation on his side the whole time. Guidance his a*s.

Right now, he only wanted Shi Yu to take the intermediate-level license and leave quickly. He wanted to go back and comfort his and his pet's injured hearts.

"Then... I passed?" Shi Yu asked.

Qu Jie's face darkened. "Yes."

You passed. Go already, you monsters!

I wonder how your cohort's candidates will feel when they see this assessment... He heard that in order to catch up to Shi Yu, Yin Zhengfan seemed to have gone to some Capital University?

Chapter 160: Baby Ginseng Breaks Through Too

Shi Yu successfully obtained an intermediate-level license.

It was a pity that his Beast Taming Space was not Level 4 yet. Otherwise, he could have gotten his high-level license as well.

However, in terms of battle power, Shi Yu was not inferior to a high-level Beast Tamer at all.

Only the best among the high-level Beast Tamers, which were also the quasi-master-level Beast Tamers who could fight against monarch-level creatures, had the strength to defeat Shi Yu.

Usually, such people were the core force even in the school teams of the nine major schools.

At the moment, although Eleven was very strong, it was still much, much weaker than those monarch-level pets with energy values that could easily exceed millions.

Even if he relied on Inner Power to erupt, it was very difficult to resist.

After all, it couldn't enjoy the enhancement of the Beast Tamer's talent, nor could it have a combination skill like Yu Shu's pet.

Shi Yu didn't mind. After all, Eleven had just evolved and broken through. There were a lot of racial skills to be learned.

Slowly, it was only a matter of time before his battle power reached the pseudo monarch level.

"Hahahaha."

After passing the assessment, Master Qu Jie did not stay long at all. He directly sent everyone out.

Outside, when he thought of Master Qu Jie's dark face, Dean Hao smiled very happily.

As expected of a pet that completed its evolution with his help. It was indeed strong!!!

Apart from the Flame Battle Soul, none of Master Qu Jie's Bull-headed Beast King skills were lower than perfect proficiency.

Even so, Eleven still suppressed him very badly at the same level.

Dean Hao already had a premonition that Shi Yu would become a very impressive Beast Tamer in the future.

Eleven would also become a guardian-like pet that stood tall in Dong Huang.

As the person who made all of this happen, Dean Hao felt a sense of accomplishment.

After all, he was also a teacher. He enjoyed the feeling of nurturing people into talents.

"Uncle Lin, Senior Sister, you guys are satisfied now, right?"

Shi Yu looked at Master Lin Hongnian and Senior Panda.

The two of them rushed over to see Eleven's strength after evolution. There shouldn't be any regrets now, right?

"Haha, of course I'm satisfied." Lin Hongnian smiled.

"By the way, my daughter's Iron-eating Beast doesn't seem to have a spouse yet. Shi Yu, take a look. Can your Eleven and her Flower pair up?"

He felt that Eleven's bloodline was too impressive. It would be a pity if he didn't make a little Iron-Eating Beast.

Shi Yu, Lin Xiuzhu:???

Dean Hao also had a strange expression. This Hall Master Lin was really amazing.

But that made sense... If Eleven had a cub, its talent potential would probably be off the charts.

There should be a bunch of Beast Tamers willing to pay hundreds of millions to apply for raising. After all, their parents' potential and talent were too strong.

"This..." Shi Yu was embarrassed. "Eleven is still a little young, right? He's only two. "

Lin Xiuzhu also had a helpless expression. Her Iron-eating Beast was already 11 or 10 years older.

Although age wasn't an issue?

"I'm just saying." Hall Master Lin chuckled.

It couldn't be rushed... Eleven was indeed a little young.

Then, everyone sat in Dean Hao's car in satisfaction.

Their destination was not the school, but the restaurant.

In order to celebrate Eleven's evolution, Shi Yu had to treat everyone to a big meal no matter what.

After lunch.

The panda father and daughter didn't plan to stay long in the ancient capital. After all, there were still a lot of things to settle in Ping Cheng.

After satisfying their curiosity, the father and daughter went back.

In the end, only Dean Hao drove Shi Yu back to school.

In the car.

Dean Hao couldn't help but ask again, "Shiyu, do you really not have any intention of upgrading that index to a mechanical life form?"

Shi Yu smiled bitterly. "No, really."

"But I'm actually quite interested in mechanical suits."

"It's not impossible if the index can become a part of a battleship and mecha."

Dean Hao smiled. "Mechanical lives like mechas have higher requirements for Beast Tamers."

Apart from orthodox Mechanics, even if some Beast Tamers wanted to contract mechanical lives, they would only choose simple machines like laser swords and electromagnetic guns.

Ordinary Beast Tamers really couldn't control the life of a mecha, nor did they know how to upgrade and maintain it.

"Ah, this..." Shi Yu felt that it was a pity.

“By the way, after I start school, can I choose a Mechanic course?”

Dean Hao laughed and said, “No problem, no problem, but every department is a big field of study. Are you sure you can learn it?”

Shi Yu said, “No problem. I’m not going deep. I just want to have a rough understanding.”

One way or another, Shi Yu really wanted Dean Hao’s Gundam. Oh, wait, mecha.

When there was a chance in the future, he would definitely make one.

He wanted to understand Mechanical Life and Mechanic skills well. After all, he had the skill index. Perhaps he could find another way to become a Mechanic.

It was fine if he did not understand the upgrade of his mechanical suit. When he looked at the Purple Electric mechanical suit, he saw that some of the skills recorded in the skill index could also be taught to mechanical lives!

In short, Mechas were still a man’s romance!

...

After arriving at school, Shi Yu returned to his dormitory.

At this moment, Eleven had just recovered.

Although the attack just now was strong, it directly crippled its right palm. The various parts of its body also suffered huge injuries from overloading the lightning.

Even if Eleven used high-speed healing, it couldn’t recover immediately. It lacked energy.

Fortunately, Shi Yu and the others still had the invincible Ginseng Baby.

Under the knock-off Fruits of Life that Baby Ginseng quickly created, Eleven quickly became lively.

However, it was a pity that the lightning energy from the Purple Electric Mecha in its body was all gone.

In the source of physical strength in a restrained state, there was no longer any energy.

In this way, even if it evolved again, it wouldn’t be able to erupt with the super strong state it had just now.

If he still wanted to have that state, he could only spend money.

Using metal-element energy crystals and thunder-element energy crystals, he could increase the upper limit of his energy through the spending limit.

“Although Inner Power is powerful and one of the most powerful super skills, the drawbacks are also very obvious... It costs money.”

“Fortunately, Eleven has awakened the ability of storage lightning. This way, even if it’s lightning in nature, it can still be absorbed and stored as energy. This is very cheap.”

“It seems that in the future, on rainy days and thunderstorm days, Eleven will have to fly into the sky and be struck by lightning. It’s impossible to feed energy crystals. It’s fine if it’s just one or two battles, but it definitely won’t be able to withstand it for a long time.”

The only pity was that in nature, there were relatively few metal-element natural environments, unlike lightning environments.

Now that he thought about it, Shi Yu felt that his secondary attributes were really on the right path.

Thunder types were too easy to absorb from nature for free, and the natural thunderstorm energy was not small!

It perfectly matched Inner Power.

But if it were time and space, where would they go to replenish their energy quickly and exceed the limit? Even Eleven’s own metal power wasn’t as easy to accumulate as thunder power.

...

“Wuuu!!!”

In the ruins, Eleven was floating with a smug look on its face, showing off its power to the bugs and ginseng babies.

“Ji!!” “Yi!!”

Buggy and Ginseng Baby were both envious and proud.

That was all?

After they evolved, they would definitely be stronger.

Also, who was the one who despised evolution at the start? Why was it so excited after evolution?

Buggy and Baby Ginseng despised it.

“Sob.” Eleven slowly landed. It was going to train hard. It had taken too many shortcuts to evolve. It was time to make up for it.

When Eleven decided to go for training, Shi Yu happened to enter.

After he entered, the three pets immediately looked at Shi Yu.

“Eleven, go train yourself. You have nothing to do for the next month.”

Eleven: QAQ

“Ji!!” “Yi!!!” Buggy and Baby Ginseng agreed with both hands.

Eleven was too strong. Let’s strengthen Buggy and ginseng babies!

“Sob.” Eleven clenched its fist in excitement. It didn’t matter. It was very strong and hardworking now. It was invincible. It didn’t matter if it didn’t get to add more points.

With that, it ran off to train.

There was even a very excited smile on its face.

Evolution was so good.

It, Panda King Eleven, was really invincible this time.

It looked forward to the next evolution!

Shi Yu smiled and looked at Eleven, who was still running away like a child.

He planned to let Eleven, who had just evolved, settle down and adapt to the next two states.

In addition, he should take advantage of this time to upgrade Buggy.

This was really quite urgent.

After all, the lifespan of a worm wasn't comparable to that of a baby ginseng or Eleven.

Shi Yu planned to let Buggy evolve in the near future.

"Buggy, I'm preparing to arrange your evolution next," Shi Yu said. Buggy was overjoyed.

"So, I'm going to give Baby Ginseng more points."

Buggy:???

Baby Ginseng was overjoyed. What was going on?

But it liked it.

"The money for the evolution materials isn't enough for the time being. Next, Buggy, you create more Worm Silk. I'll increase the sweetness and nutritional skills of the Ginseng Baby. Let's sell Worm Silk, spices, and nutritional supplements to earn it!!"

Buggy was ecstatic again. That works too.

Baby Ginseng cried crazily. So it was adding points to sell supplements.

"Calm down, calm down. When Buggy's evolution is over, it's your turn. You have to follow the order of entry."

"Now, add the skill level. When the time comes, sell more money. You also have money for your evolution materials." Shi Yu patted the Radish Baby.

Upon hearing this, Baby Ginseng nodded determinedly. So be it. It was all for a better future!!

"Hu..."

At this moment, looking at the two pets, Shi Yu planned to test the limits of his contracted ginseng baby.

After the Beast Taming Space upgraded, the upper limit of his physique and physique increased. After contracting the Ginseng Baby, his physical recovery speed increased again. After Eleven evolved and broke through, it brought great benefits to Shi Yu.

The current Shi Yu was in his best state.

Two days.

He gave himself two days.

School would start in three days. He wanted to upload the skill points of Baby Ginseng and Worm in two days. Then, he would sell the products of their “Dao Proficiency-level skills to the rich lady gem cat who liked to collect rare treasures in Ancient Capital University to exchange for a small sum of money to buy evolution materials.

If it went smoothly, perhaps when school started, Buggy could turn into a cocoon.

Moreover, its physique could also reach another limit.

“Come on.” Shi Yu’s expression was determined.

...

Currently, the sweetness of the ginseng baby was at perfection, and the nutritional content was at expert level.

Shi Yu felt that he could still take the exhaustion of one low-level skill and one mid-level skill.

Then, the green worm spat out the worm silk into a pile of boxes in pain and joy.

As for Shi Yu, he held the ginseng baby and increased his points crazily.

With every point added, Shi Yu’s physique improved after recovering from the sweet smell.

At the same time, the skill proficiency of the baby ginseng and its energy level could also increase.

Initially, Shi Yu thought that everything would go smoothly.

However, an accident still happened.

Shi Yu was stunned when he upgraded the sweetness aura of the ginseng baby from “transcendent” to “full”.

Beep... Beep... Beep...

The energy value of the ginseng baby reached 9999...

Then, a white light filled its body. It directly underwent a growth transformation.

Its aura kept rising, and its energy kept erupting. Shi Yu’s detector could clearly see that its energy value was jumping crazily.

Obviously, Baby Ginseng’s growth level went from transcendent to commander rank.. Just like Eleven, it broke through!
