

Beast 161

Chapter 161: Depressed Buggy

Eleven had evolved to raise its growth limit, thereby successfully breaking through to commander rank.

As for Baby Ginseng, its race level was very high to begin with, and it didn't have any bottlenecks. Now, it had broken through its growth level through the increase in its race skills and under the lead of the skills.

Buzz!!!

After Baby Ginseng broke through, an alluring energy wave surged into the sky and spread across the ruins.

Somewhere, Buggy and Eleven sensed the change in energy and couldn't help but swallow.

The breakthrough of supplements was like the appearance of a treasure. Not many pets could resist its allure.

"Holy shit, another one broke through."

Shi Yu was shocked.

How could he bear this? He was only a middle-level Beast Tamer, and he already had two commander-level pets?

He would be drained dry!

Wait a minute, the ginseng baby was a supplement. That was fine.

Eleven and Buggy, who rushed over after hearing the change, were also stunned.

Eleven was alright, but Buggy was in tears!!!

It had already sensed the huge energy wave from the baby ginseng.

This guy... this guy... This guy's energy level was probably more than 20 times his!!

Now, even if he had a spatial skill, he definitely wouldn't be able to defeat Baby Ginseng.

Baby Ginseng could exhaust it to death.

"Ji!!!!"

Buggy didn't expect to be reduced to the bottom of the team.

"Yi..." At this moment, Baby Ginseng was still a little confused.

Sensing that the energy in its body had undergone a qualitative change and become incomparably large, it could even solidify its energy at any time to form energy crystals. The ginseng baby was stunned.

It...

A breakthrough?

“You broke through.” Shi Yu looked at the energy detected on the index and took a deep breath.

Energy: 77,663

Although this energy level had yet to reach the 80,000 standard of the “overlord race” commander rank, it was already relatively high among the “monarch race” commander rank, approaching the limit of the overlord race.

Baby Ginseng was indeed a pet race that specialized in vitality and energy.

Considering that his baby ginseng also knew attack skills, Shi Yu could only say that the invincible towering emperor had finally taken the first step towards invincibility.

“Ji...” Buggy looked at Shi Yu with teary eyes and asked about Baby Ginseng’s energy level.

Shi Yu had a strange expression. “Don’t think too much. Baby Ginseng has eaten the Fruit of Life. This is a level-eight resource. It’s worth one billion at the least. It’s even more expensive than one billion’s worth of evolution materials.”

“Ji...”

Tell it the number. It could take it!

“77,663...”

“It’s more than 20 times yours, right?”

It was unknown if it fainted from exhaustion or from fright because it had vomited too much silk, but it directly entered an absolute sleep state...

Buggy collapsed.

“Wuu!!” Eleven, who was beside him, revealed a surprised expression and looked at Baby Ginseng, who had an equally surprised expression.

“Wuu!!! (Fight!!!)”

Eleven wanted to taste a commander-level Energy Fruit Bomb.

“Yi... (Sure!)” Baby Ginseng was also inflated. It felt that it wasn’t much worse than Eleven.

Now it was Buggy at the bottom! Great!

It wanted to protect its number two spot and challenge the number one spot!

It completely didn’t realize that the skills with high proficiency were all supplement skills. Even transcendent skills were supplement skills.

Eleven, on the other hand, had skills that purely increased battle power.

In addition, judging from the energy level alone, Eleven was playing unfairly. Eleven’s body strength, which was comparable to a giant dragon, was definitely not something a plant baby ginseng could crack.

“Fight my butt. Come, we’ll continue increasing points. Next, it’s time to add nutrients. Perhaps after this is maxed out, your energy level can exceed Eleven.” Shi Yu didn’t want it to waste meaningless time.

In this battle, both parties would probably have to rest for a long time...

Baby Ginseng:!!!

Continue to increase points!

“Wuu! (boring)”

Eleven crossed its arms. It only knew how to add points. Forget it, it was invincible. You guys could do whatever you want.

However, at this moment, Eleven more or less had a sense of crisis and decided to train harder!

At this moment, Buggy was still lying down...

...

Before continuing to increase the points, Shi Yu and the others first figured out the effect of the max-level sweetness.

Compared to the sweetness before the Perfect level, the sweet aura at the transcendent level was in more forms.

Before perfection, sweetness aura was just a sweet aura. There was nothing new.

After reaching perfection, the sweetness could be condensed into spices and perfumes by Baby Ginseng, and it could also limit the speed at which their fragrances spread.

It could be made into a sachet or something. When worn on a normal day, the effect was very good.

Shi Yu had prepared dozens of them. It was very practical to change one every day.

As for the change in the sweetness after reaching the maximum level, Shi Yu was very surprised.

Firstly, the effect was better. In fact, apart from reducing fatigue, it could also provide the effect of calming the mind.

This was very helpful in increasing Shi Yu’s meditation efficiency, preventing him from being distracted and distracted all the time.

Apart from the fact that the effect was better, the special property of the increase in the max-level sweet aura was relatively special. Shi Yu and Baby Ginseng didn’t know what to say...

Maximum-level sweet aura, its nature was change and simulation.

In an instant, Baby Ginseng mastered the change in scent in hundreds of millions. It could simulate the scent of the sweet scent into the aura of any spiritual plant or spiritual fruit, greatly increasing the temptation of the sweet scent.

“It doesn’t look like it’s useful... But it seems to be more convenient to form a pretty good deception effect with nutrition.”

“In the future, I can let Baby Ginseng release a pile of sweet aura to attract the dragon race in the wild. The dragon itself will come running over... The hunting skill is similar to the talent of the Dragon Blood Willow, but the range of attraction is more comprehensive!”

“Moreover, it’s easier to sell it for money...”

The scent that pets liked was different between each other. The current baby ginseng could be said to be able to satisfy all customers’ needs... Shi Yu’s expression was odd. This change was not bad.

In the future, he could do different things every day and inhale different flavors of sweetness.

This also greatly reduced his rejection of sweetness.

Speaking of which... What kind of spiritual plants did the gem cat like the most? Firstly, excluding the fish scent grass...

Shi Yu and Baby Ginseng didn’t linger on this for too long. They continued to increase their points.

It was similar to Shi Yu’s plan.

Two days after they started adding points, Baby Ginseng’s nutritional supplement skill also went from “expert level” to “Dao Proficiency”.

It was very smooth. Initially, Shi Yu thought that he would have to give Baby Ginseng some recovery items. Just shrinking, Absolute Sleep, the storage beam, and the Earth Chain might not necessarily be able to catch up to the consumption, but once it broke through, its energy immediately became rich.

The amount of supplements that could be provided with thousands of energy points at that time was completely different from the amount of supplements that could be provided with tens of thousands of energy points now.

The process of nutritional supplements from proficiency to perfect proficiency didn’t have any special changes, which affected their quality and shelf life.

However, after reaching transcendent level proficiency, the nutrition produced by the ginseng baby was upgraded to “growable supplements”.

It could absorb the power of the outside world over time and enrich itself, even breaking through the limit. The longer it was kept, the higher the nutritional value.

This was a divine skill, but Shi Yu felt that it was a pity that the growth speed was limited. He had to collect it for ten, hundred, or even a thousand years to have an obvious increase.

Shi Yu couldn’t wait that long. Unless, he could transmigrate back to hundreds of millions of years ago. When the time came, he would bury some supplements for himself. When he returned and dug them out, he would directly become an Undying God of Medicine. That would be awesome.

At that time, when the divine medicine was used again, forget about transcending skills, even divine-level skills would be randomly selected.

After the nutritional supplement skill reached “Dao Proficiency”, apart from the better quality and faster absorption of nutrition from the outside world, the additional property surprised Shi Yu.

The nutritional supplements produced by the ginseng baby, according to the power it provided, were none other than to help the foodie treat, recover energy, and provide growth nutrition.

And now, after the nutritional proficiency “Dao Proficiency”, according to the feedback of the baby ginseng, the nutrients were affected by the “Fruit of Life” and its corresponding skill “Source of Life”, which it ate. It seemed to have an additional effect that could increase the pet’s life force and level of life!

In other words, having more could increase one’s lifespan, then increase the potential of the pet race and increase the effect of evolution aptitude!

The specific effect was similar to the evolution holy spring that Eleven had entered. However, due to the restriction on the current baby ginseng’s strength, the increase in effect was definitely not as powerful as the evolution holy spring under the care of the Ancient Life Tree King!

But this was undoubtedly... also a very impressive effect. After Baby Ginseng became a Mythical creature, its skill was an evolution specialist. One bit of nutrient could directly allow other low-rank pets to complete evolution!

“Holy shit.”

Shi Yu sat on the bed in a daze and looked at the crying baby ginseng opposite him.

“This ability is so awesome, why are you crying?”

Generally speaking, this kind of nutritional supplement that increased vitality and changed the potential of his race would become worse and worse as he used it multiple times. But even so, Shi Yu felt that he was invincible. With Baby Ginseng around, wouldn’t he be able to live for a long time?

Even if it was Buggy, if it ate nutrients now, it might not be a problem to live for another two years.

Moreover, this effect could also be increased over time.

Now, Shi Yu really had the urge to transmigrate back to the ancient times to bury treasures for himself.

“Yi...”

Baby Ginseng cried. It was powerful, but it felt that only transcendent-level, commander-level, and monarch-level ferocious beasts coveted it. But now, it felt that even overlord-level and totem-level ferocious beasts might want to eat it!

After all, compared to the nutritional supplements produced by the Nutritional Skill, its own body was the best nutritional supplement. The effects of nutritional supplements could also be eaten by it, and it would be better.

Shi Yu :”...”

“It’s not a big problem, not a big problem. Now that you’ve almost added all your supplement skills, you can increase your attack skills with all your might... At that time, when you’re stronger, no one can eat you!”

“Sob.” Baby Ginseng still didn’t feel safe, but Shi Yu was right. It needed to quickly change its profession to a battle ginseng to feel safer.

Shi Yu: “?”

“Why are you “crying” like Eleven? I’m hitting one crying monster after another. You’re supposed to be happy after all these upgrades... You’re really getting to be like Eleven...” Shi Yu thought.

< Name > Ginseng Baby

[Attributes]: Wood

[Race Level]: Low Class Monarch

[Level of Growth]: Commander Level

[Skill]: Sweet Air (Dao Proficiency), Slow Healing (transcendent), High Speed Healing (Perfect), Nutrition (Dao Proficiency), Earth Chain (transcendent), Origin of Life (Initiate), Multiplication (Expert), Absolute Sleep (Expert), Energy Fruit (Proficient), Energy Storage Beam (Expert)

Energy Points: 90001

At this moment, Shi Yu thought about Baby Ginseng’s attributes and fell into deep thought.

Its five racial skills, sweetness, slow healing, nutrition, Earth Chain, source of life... Apart from super skills, it had already been upgraded enough.

And its growth level had also reached commander rank.

Due to the fact that its racial skills had been raised too high and its foundation was too terrifying, although the baby ginseng was judged by Grandma Li as a low-level monarch race in the beginning, its current supplement effect was probably not inferior to the supplements of those overlord races at all.

At this moment, Baby Ginseng’s energy level had already overtaken Eleven... to 90,000 points.

It was almost half of the minimum energy requirement of monarch level’s “two hundred thousand energy points”.

Transcendent races at the monarch level were usually around 200,000. Commander races at the monarch level were usually around 500,000. Monarch races at the monarch level were usually around 1,000,000.

Shi Yu felt that with the energy supplement of Baby Ginseng, perhaps there was hope for Eleven to give the weakest monarch-level pets a little bit of trouble?

However, the problem was that there were really too few people who relied on extraordinary races to reach the monarch level. There were very few. Generally, those who could reach the monarch level had at least a commander race, so it was still a long way to go.

In fact, Shi Yu felt that it would take a long time for Baby Ginseng and Eleven to become monarchs.

Judging from their situation, if they maxed out the skills of low, mid, and high-level races, they might not necessarily reach the level of monarchs.

It probably still depended on the development of super skills...

However... Even if Shi Yu's physique had reached its limit again and wasn't inferior to any master-level Beast Tamer's physique, it still hadn't reached the condition to teach super skills. This made Shi Yu feel very uncomfortable.

However, when he thought of the power of transcendent skills such as plant control, Inner Power, and Heavenly Frost Cold Energy, he endured it. Shi Yu estimated that if these transcendent skills reached perfection and advanced into the path, they might really be able to come into contact with domains at the level of "law" and "origin".

"Alright, it's finally over."

"Baby Ginseng, make the best perfume, spices, and nutrition fruits. I'll rest for a while. Later, we'll take the goods to exchange for Buggy's evolution materials... If we don't go and exchange now, it'll be so depressing."

Shi Yu lay on the bed. He was tired and weak.

"And Buggy, tidy up your worm silk too. It's messy and can't be sold."

"Yi! (Copy!)" Baby Ginseng looked at Buggy.

Buggy was silent.

"Ji!" Buggy was also lying on the worm silk.

How could it not be depressed? Now, the leader had more than 80,000 energy points, the baby ginseng was 90,000, and it...

Three thousand!!! Three thousand!!! Only three thousand!! Did they know how it spent its day in depression!!

When would it evolve? It should quickly change races. It didn't want to be a Green Silkworm anymore. This race was too lousy.. It had never seen a race that was even worse than a Green Silkworm. It was even worse than a Radish Baby!

Chapter 162: Exchange for Evolution Materials

In the resource warehouse of Ancient Capital University.

In order to prepare the evolution materials for Buggy, Shi Yu came again!

This time, he came prepared.

Apart from the huge sum of 130 million yuan, there were also three large boxes of supreme-grade worm silk, ten supreme-grade spiritual fruits, and five supreme-grade fragrance bags.

For the time being, Shi Yu only had time to prepare this. He just didn't know how much the latter could be sold for...

"The best news now is that the nutrition produced by the ginseng baby can increase its race's potential and change its evolution aptitude!"

On the way, Shi Yu was in a good mood.

Although it was impossible for the Ginseng Baby's nutrition to upgrade Eleven due to the limitation of the nutritional level and its own racial potential and evolution aptitude, it was more than enough to increase the potential of the Green Silkworm, which was only low-level transcendent at the moment.

It could be said that among the evolution materials of the worm, a large number of baby ginseng nutrients were locked.

This thing that could increase one's lifespan and increase one's racial potential was too suitable for the Green silkworm with an extremely short lifespan and huge potential.

Shi Yu did not have to worry about his evolution potential for the time being. Therefore, next, he only needed to find suitable spiritual and spatial resources for the worm to stabilize its evolutionary attributes.

His current goal... was to spend 300 million yuan.

There was no need to compare the value of the evolution materials with Eleven. This was really not decided by the amount of money, but by the compatibility.

Moreover, there was basically only one way for the green worm to use evolution materials.

Eat.

If the level of the evolution materials was too high and there were too many of them, the Green silkworms would explode. After all, the body of the Green silkworm was too weak.

Therefore, generally speaking, after the Green Silkworm finished eating the evolution materials, it would immediately use its racial talent to form a cocoon, transferring the huge amount of nutrients and energy that it couldn't absorb onto the cocoon, and slowly absorb it, letting this energy change its body and complete its evolution.

Ordinary green silk bugs could only use level three and four evolution materials.

However, Shi Yu's goal was to lock onto higher-level materials. This was also because the level of the worm silk was high enough and its growth level was high enough. It could absorb more energy and nutrition.

If it were another green worm, it would be very difficult to replicate such a magnificent feat.

"There are quite a lot of people today..."

Unlike the previous time, there were many people near the resource warehouse.

After all, school was about to start soon. Whether it was the new students or the older students, they had already come to school.

At this time period, the end of the first semester, was the time when the resource bank was the most lively.

At the entrance of the resource bank, in the small house that looked like a security room, Shi Yu took a few looks and couldn't find the overlord-level gem cat.

However, a female teacher was sitting at the reception desk lazily, yawning as she helped the students register.

After Shi Yu saw that there were no students around the female teacher, he quickly registered and went straight to the Appraiser Building.

This was the place where students sold various rare materials to exchange for credits.

After arriving, his gaze swept across the dazzling and spacious hall.

It was a coincidence. When Shi Yu arrived, it was cold and quiet. A bespectacled teacher with sparse hair received Shi Yu directly.

Behind the appraisal table, the bespectacled teacher smiled at Shi Yu, who was wearing a mask and hat.

This child was really hiding his face. Why did it feel like he had won the lottery?

No, it even looked like the bad guy in the TV series who sold stolen goods...

"Hello. I'm exchanging materials."

"What type? Take it out."

He looked at the backpack Shi Yu was carrying.

"The first is this."

Shi Yu took out the worm silk sample from his backpack.

As for the more boxes of worm silk, they were in the ruins.

At this moment, on the appraisal platform, in an exquisite jade box, a layer of transparent insect silk was neatly placed.

After the worm silk reached the maximum level, its color could be white, its texture could be transparent, and it could be completely invisible. All of this depended on its mood. As for its nature, it wouldn't change.

"Transparent silk..."

"Transcendent level?!" The appraiser saw the materials in the box and asked, "What kind of pet is it?"

The Green Silkworm wasn't the only species that knew worm silk skills. This teacher hadn't realized the seriousness of the problem.

“Green Silkworm.”

The teacher was speechless.

What the hell?

That low-level transcendent race with a pitiful short lifespan?

“Teacher, it’s a king of green worms that has awakened a special bloodline and mastered deterrence. It has reached the transcendent level.”

“In its life, it has absorbed rare spatial resources such as the Space Crystal Fruit and the Space Spirit Flower, which are worth one billion, and shaped the worm silk into a supreme-grade spatial worm silk that exceeds perfection.”

“And these are the few high-quality threads that it took a long time to condense. Each of them contains extremely special power, is strong, and has strange effects. Not only can it break skills such as air defense concealment, but it can also break the illusionary ability of a legendary Beast Tamer at will.”

“Even if it’s a quasi-monarch species that evolved, it can’t even survive one move from its insect silk.”

Shi Yu’s tone was deep as he explained in detail.

“Rare in the world, unique!”

“Huh?” When Shi Yu finished speaking, the teacher opposite was stunned.

Was this guy really not kidding?

Special bloodline, transcendent-level Green silkworm? A spatial worm silk formed from a billion worth of spatial resources?

Bullshit!

The teacher was about to refute, but suddenly, Shi Yu took off his mask and hat.

When he saw Shi Yu’s face, the teacher cursed in his heart.

He suddenly felt that it might be true.

This was because he knew Shi Yu. He also knew Shi Yu’s Green Silkworm.

The vocation assessment had not even been a month. This teacher from Ancient Capital University naturally knew that there was a magical Green Silkworm in the first place of this year’s Ancient Capital vocation assessment.

Just now... he didn’t expect it!

“Student Shi Yu...” The appraiser cried. Holy shit, what he said was true.

It was clearly real, so why did he have a ridiculous feeling just now?

Speaking of which, it turned out that such a worm silk was cultivated with one billion resources.

No wonder it was so strong. So that was the reason.

He believed it...

“Teacher, how much can it be estimated?”

Shi Yu said, “You should know how powerful the worm silk of this Green Silkworm is.”

“It can simulate sword aura from afar, go deep, and snatch the parasitic Gu from within a controlled puppet corpse. It can even do advertisements. It’s invincible.”

Shi Yu had to brag.

Because the growth level of the Green Silkworm was too low. Even if its worm silk proficiency exploded, the worm silk it made was not a high-level resource. It could only be said to be a super rare resource.

“This...” The appraiser’s forehead was covered in sweat. He was also someone with an “appraisal index”. He was confirming the value of the worm silk through the appraising glasses index.

To be honest, it was very difficult to estimate the value of this rare super resource.

“How much do you have?”

As the appraisal teacher was analyzing, on the side of the appraisal table, a big white cat that was as soft as a doll, big, and had a V-shaped head and smooth fur jumped up from somewhere and walked towards the worm silk.

Its fluffy tail swayed. After walking to the worm silk, its sky-blue gem eyes stared straight at the box of worm silk. Good stuff!!

Although the material level was a little low, and according to the energy level, it was only level three, it had never seen a worm silk of such quality!!

If the worm silk was also divided into racial levels...

Then, the worm silk Shi Yu took out was comparable to a mythical race in its eyes!!

The evaluation of resources depended on the energy level, not the rarity, but the energy level did not represent the final value.

The value of resources was determined by energy, nutritional level, function, and rarity.

This was also why some low-level spatial materials and dragon-element materials were more expensive than high-level resources.

As for the worm silk, it was almost equivalent to a level-three spatial resource, but the powerful thing was that its rarity was peerless!

Now, looking at this box of level-three worm silk, the gem cat was tempted.

The level didn’t matter. It was mainly rare and had extremely high collection value!

“Teacher Yao.” The white gem cat appeared, and the appraiser and Shi Yu greeted it.

The guardian of Ancient Capital University, the overlord-level gem cat that had lived for more than a hundred years was here!

“How much do you want?” Shi Yu kicked the question back.

He could make as much as he wanted.

“You have a lot?” The overlord gem cat screen recalled Shi Yu. Wasn’t this the boy with the ruins space from before?

Its ears twitched, and the hair on its neck that looked like a “scarf” stretched out. “Follow me, we’ll talk inside.”

“Alright!” Shi Yu was excited.

Initially, he had come to the resource bank with the intention of looking for this person. Now, he didn’t expect that the other party would take the initiative to come to him.

Under the teacher’s confused expression, Shi Yu followed the gem cat without any reluctance.

“Good heavens...” The appraiser looked at their backs and muttered.

The materials for sale had caught the attention of the overlord cat?

This time, Shi Yu should be rich!

This billionaire gem cat cost much more than the school!

...

In the Appraiser Hall.

Facing the gem cat, which he didn’t know whether it was its clone or its main body, Shi Yu took out the three large boxes of worm silk that Buggy had spent a lot of effort to condense.

This kind of resource-level exquisite worm silk was even more tiring than manufacturing it in battle. It couldn’t be vomited out just like that. In two days, Buggy ate a pile of nutrients provided by the ginseng baby to create this much.

“Meow...” Seeing this worm silk, the overlord gem cat was stunned.

It was as if it could see a drained Green Silkworm through the worm silk.

(Buggy: I really don’t have any left...)

“Any more?”

“The worm silk is gone for the time being, but there are other materials I plan to exchange with.”

Shi Yu also took out the spiritual fruit made by the ginseng baby to combine the sweet aura with the nutrients.

This spiritual fruit used the full-level sweet aura and nutritional supplements skill. It was a combination of the two.

As for the smell, because it was originally prepared for this overlord gem cat with a goal, Shi Yu and the others chose the gem cat race's favorite "gem mint" spiritual plant as the main scent and integrated the other three flavors that the gem cat liked, allowing their characteristics to be perfectly preserved.

This was a delicious spiritual fruit with a very high-level aura.

Of course, the attraction effect of the sweet aura was definitely many times stronger than the aura of the original plant!

Shi Yu placed a green fruit on the table. Initially, Shi Yu only wanted to give it what it liked and sell it for more money... However, the sudden change stunned Shi Yu.

Boom!!!

A huge aura erupted from the gem cat. Shi Yu took a step back in confusion. He saw the gem cat's eyes brighten. After smelling the aura, it looked at the fruit in surprise!!

"Meow!!!! (Yay!!! It's delicious!!)" The overlord's gem cat paw immediately pressed on the green fruit. Its gaze was excited, and saliva flowed down the corners of its mouth.

"This, this is..." It asked Shi Yu.

"A special nutritional substance."

Shi Yu didn't expect the other party to have such a big reaction. He felt that he had underestimated the attraction of the super nutritional fruits created by the ginseng baby...

Although according to energy classification, this was only a level-four resource, it seemed that the special effect of the full-level sweet aura and full-level nutritional supplements was enough to increase its temptation by several levels to specific people!

"It can increase the pet's life force, change its evolution aptitude, relieve fatigue, and let the consumer enter a state of meditation and calmness."

After Shi Yu finished speaking, the gem cat did not hear much.

"It's edible?"

"It's edible..."

"How much is there? I want this too."

The gem cat patted the fruit. Although it felt that the nutritional value inside couldn't increase it at all, it was so fragrant. With such a nutritional-level spiritual fruit coupled with this taste, it almost couldn't help but swallow it directly.

"Wait, where did you get this?" It looked at Shi Yu.

Shi Yu: "My pet."

"Meow!!!" The overlord gem cat exploded. You're telling me you can produce this thing??

"Teacher, if you like it, I'll send you one every month," Shi Yu said generously.

Gem Cat:???

One?

Did this guy think it was a stray cat? It's a gem cat!

"...How about 30 a month?" If it could eat such fruits every day, the gem cat felt that its cat life had reached its peak.

30?

Shi Yu's eyelids twitched.

It wasn't easy for Baby Ginseng to create this either...

"Of course, I won't freeload."

"Are you in a hurry to get credits by exchanging these?" The cat licked its claws gracefully like a lady.

"Pets just happen to need an evolution ingredient."

The gem cat said, "I understand. I've collected a lot of materials in my private warehouse. There are all levels 1 to 8. You can also take any materials from the school's resource bank in the future. I'll reimburse you. In the future, you'll send me some of these spiritual fruits every month. How about that?"

"Of course, take whatever you lack. Don't take away all the high-level materials in one go, or it'll be difficult to explain to the school. Moreover, my little vault is less than ten billion."

The gem cat looked at the green fruit and told itself that money was just a worldly possession. Cats valued food above all.

At this moment, Shi Yu was stunned.

That worked too???

He originally only wanted to sell some resources, exchange some money and credits, and then buy evolution materials...

Now, the gem cat told him that it could choose any materials from the school's resource warehouse and the overlord gem cat's private warehouse. It would reimburse it?

He only had to provide this kind of spiritual fruit every month?

Shi Yu was at a loss. He calculated this transaction in his heart and once again felt that he had underestimated the attraction of the spiritual fruits created by the full-level sweet aura and full-level nutritional combination skill to specific pets.

In addition, this transaction was definitely worth it. This was because although it required a lot of physical strength to create such an attractive-level spiritual fruit, it could freeload energy from nature. In addition, if all the resources could be reimbursed, Shi Yu could immediately replenish the energy consumed by the ginseng baby with enough energy crystals.

Therefore, this was basically a free deal.

“How is it?!” Seeing that Shi Yu was silent, the gem cat asked again.

“No problem.” With that said, Shi Yu hurriedly took out the remaining nine spiritual fruits, afraid that the gem cat would regret it.

Seeing the ten spiritual fruits, the gem cat’s eyes lit up.

“You’re not bad. You’re the most promising student I’ve seen in more than a hundred years. In the future, I’ll protect you at Ancient Capital University.”

Shi Yu :” ...”

Seemed like he had a big shot to protect him now.

Also, this was a cat. Although it was female, it shouldn’t be considered a rich woman like the others...

However, this gem cat was really too much... Was this a cat or a dragon...

“Crack.” At this moment, the gem cat had already used its mental strength to control a green fruit to float in front of it. It took a bite and chewed it patiently. Its face was filled with happiness and a little regret. Unfortunately, it was too strong now. If it had eaten this kind of spiritual fruit before the monarch level, it would have been even happier.

“~ ~” After eating a spiritual fruit in a few bites, the gem cat was a little intoxicated. After it savored it again, it confirmed that it wasn’t wrong. This spiritual fruit was indeed delicious, even more delicious than the level-seven and level-eight resources it had eaten.

It could almost be said to be the most perfect food it had ever eaten.

“Choose it yourself. The list in the black folder is the materials from the school’s resource bank. The white folder contains the materials I collected.” The gem cat summoned a laptop out of thin air and flew in front of Shi Yu.

At this moment, Shi Yu trembled slightly. He didn’t expect everything to go so smoothly.

It meant that not only did he not have to spend the pile of credits in the card, but he could also directly take away a pile of evolution materials?

“Buggy, if you don’t evolve into a quasi overlord race, you’ll be letting Baby Ginseng and me down...”

Chapter 163: Spiritual Space Dragon

“How do I assemble it...”

Shi Yu opened the two folders that the gem cat had mentioned.

In the resource warehouse of Ancient Capital University, the best spiritual-type resource was the Nine-Tailed Illusion Fox Heart.

The best spatial resource was the Tears of the Void.

Unfortunately, neither of them was suitable for Buggy.

One was the heart of a nine-tailed fox, while the other was the eye of a Void Worm. Both were difficult to absorb, and the compatibility was not high.

From ancient times until now, the evolution materials used to evolve the Green Silkworm were basically plants.

If it were other things, it wasn't impossible, but the absorption effect was definitely not the best.

This was like the Iron-eating Beast's digestive system. It was clearly easier to digest metal minerals, but if the Beast Tamer just had to feed it rock minerals. There would definitely be a problem...

"I have to have the Dream Fruit."

After taking a few looks, Shi Yu locked onto a plant resource in the Ancient Capital University's resource bank. He had long decided on this.

[Name]: Dream Fruit

[Attributes]: Spirit

[Level]: Level 7

[Main Use Introduction]: The fruit of the Illusion Tree blooms every 30 years and bears fruit every 30 years. It will only mature in another 30 years and can only be eaten in 100 years. The Illusion Tree is the king of the Illusion Domain and can pull its prey into the Dream World. In the Dream World, it can create illusions identical to the hypnotized person and let them fight the hypnotized person. Its fruit can greatly increase the resistance and proficiency of the eater towards illusion skills.

[Exchange Price]: 11,000 credits

"You." Shi Yu marked it.

Although this fruit wasn't as rare as the Nine-Tailed Illusion Fox Heart and was mass-produced, it was still a plant and was more compatible with Buggy.

In addition, the ability of the Illusion Tree was too fragrant.

If Buggy inherited a similar ability, together with the phantom illusion skill, it could more perfectly materialize dream illusions.

At that time, not only could it fight enemies in the dream, but it could also perfectly summon the dream phantom to reality.

Unfortunately, this plant creature was the same as the Dream Shell. There were only a handful of them in the world. Shi Yu had no place to go and steal and replicate skills.

"100 million..." Shi Yu calculated in his heart.

Just one fruit was worth hundreds of millions.

Resources above level-seven were basically not worth less than 100 million. He was already mentally prepared.

There was only one Illusion Fruit in the inventory, so he decided on one for the time being.

Next, Shi Yu searched for spatial resources.

In the resource bank of Ancient Capital University, there were actually not many spatial resources of higher levels and plants. After careful consideration, Shi Yu chose the root of the hollow tree.

[Name]: Grotto Tree Root

[Attributes]: Space

[Attributes]: Space

[Main Use Introduction]: The root of the Grotto-Heaven Tree. The Grotto-Heaven Tree is a spiritual plant that contains spatial power. Its body is an independent small world that can store anything except life...

This was also a resource that could increase spatial talent.

Apart from that, the grotto-heaven tree roots could also expand the size of the Beast Taming Space. Humans could also use it, so its value was even higher than the Dream Fruit. Unfortunately, it couldn't increase the strength and environment of the Beast Taming Space. Otherwise, Shi Yu would want to eat it himself.

"You're done?"

Shi Yu hesitated for a long time on the resource table.

At this moment, the gem cat couldn't help but eat three fruits.

After eating, it asked Shi Yu.

"Not yet, not yet..."

He knew that he had to choose more. Otherwise, it would become a losing deal.

Shi Yu looked at the gem cat's private warehouse and was shocked.

The value of resources was not much inferior to the resource warehouse of Ancient Capital University.

However, what was speechless was that the resources it collected were almost all pearls, gems, and strange stones...

[Name]: Soul Pearl

[Attributes]: Undead

[Level]: Level-eight resource

< Introduction > It's a pearl that seals the soul of Undead at overlord rank.

Good lord, did the gem cat obtain this item by itself?

[Name]: Holy Light Gem

[Attributes]: Light

[Level]: Level-seven resource

[Introduction]: The core crystal of the elemental life form, the Holy Tree.

The dazzling resources stunned Shi Yu for a moment.

However, because more than 90% of the resources here were gems, pearls, and strange stones... This was very unsuitable.

Buggy couldn't really absorb those.

"By the way, this gem cat likes gemstones so much. Why does it want to collect worm silk?"

"Does it want to roll it into a ball to play?" Shi Yu muttered in his heart.

1

Also, Shi Yu wanted to know if the gem cat counted these fixed assets when it mentioned its assets.

Next, Shi Yu looked for a long time but couldn't find any evolution materials suitable for Buggy.

Just as he was thinking that the Illusionary Dream Fruit and the Grotto-Heaven Tree's roots were almost good enough, and that Buggy wouldn't be able to absorb anything more, a resource attracted Shi Yu's attention.

[Name]: Dragon Ball

[Attributes]: Dragon

[Level]: Level 4

[Introduction]: The intrinsic Dragon Ball of the unknown dragon race. Because it has been too long, its energy has been lost. It has no effect of changing its race, but it can effectively increase the pet's racial potential and evolution aptitude, making its physique comparable to that of the dragon race.

Dragon Ball!

2

This was something only purebred dragons had, and it was also the most precious thing of dragon creatures. In addition, it was also one of the rarest resources!

After any creature absorbed the complete Dragon Ball, it had a chance to obtain the dragon race bloodline and make its physique comparable to a dragon!

For subspecies dragons, swallowing a dragon ball was one of the few opportunities for them to evolve into purebred dragons.

Shi Yu was really happy to discover the Dragon Ball.

Because the body of the bug type was too weak, the dragon ball could effectively change this weakness!

The Green Silkworm's body was very weak, and it was the same even if it evolved into a butterfly. Take Yin Zhengfan's Space Crystal Butterfly for example. Although its race level was very high, that was purely judged because its racial skills were strong.

In terms of energy value and vitality, it was inferior to the commander race's ginseng fruit tree. In terms of physical strength, it might even be inferior to wild iron-eating beasts that had yet to evolve. It was a classic example of a high attack with weak defense.

However, if he used the dragon ball, he could completely change this situation effectively.

One of the uses of the Dragon Ball was to make the physique and life force of the absorber become incomparably strong, comparable to the dragons!

The rarity of the Dragon Ball far exceeded resources like the dragon scale or even the reverse scale. It even exceeded spatial resources of the same level. Only time resources could suppress the Dragon Ball.

The only pity was that this dragon ball was a defective product. Its energy level had fallen to level four, and it no longer had much of the original effect of the dragon ball. It could only increase the physique.

"But it's just right. If the level is too high, it couldn't be absorbed by Buggy anyway. Even now, it might be a little difficult."

Shi Yu browsed through it again and looked at the gem cat.

"Excuse me, can I have these four resources?"

Shi Yu looked at the gem cat who was eating the fourth fruit. He labeled the three resources "Dream Fruit", "Grotto-Heaven Tree Root", and "Dragon Ball". Apart from that, there was also a pretty high-level "level-seven wood-element energy crystal".

The last resource was to charge the ginseng baby.

Without this, it was very difficult to pay this overlord gem cat...

"Uh..." The gem cat looked over.

When it saw the Illusion Fruit, the Grotto-Heaven Tree Root, both level-seven wood-element energy crystal, it nodded indifferently.

When it saw the "dragon ball", it pondered for a moment and froze.

Because it liked this blue dreamy dragon ball very much.

Moreover, it had yet to figure out which dragon this blue dragon ball belonged to, and its curiosity had yet to be satisfied...

"Forget it, curiosity kills the cat. Spirit fruits are better."

Although it liked it very much, after thinking about it, the spiritual fruit was indeed better.

"Take it, take it, take it all." It waved its claws.

However, it was too much for Shi Yu to take away resources worth 500 million at once.

It had to find a way to squeeze it back. It couldn't lose out.

"Thank you."

Shi Yu smiled and moved away. He didn't plan to take more this time. He would stop when he was satisfied.

He planned to come back the next time Baby Ginseng wanted to evolve.

When it was time for evolution of low-level monarch races, there would definitely be more evolution materials needed.

However, at that time, the gem cat probably wouldn't refuse.

After all, if Baby Ginseng evolved, the spiritual fruits it made would be even more delicious...

"I'll get my clone to get the goods for you. Remember to send a new spiritual fruit on the first of next month. By the way, what's the name of this fruit?" the gem cat said.

Wasn't the first day of the next month the day after tomorrow? Shi Yu was stunned.

Fortunately, he had the foresight to take an additional energy crystal. Otherwise, the ginseng baby would die!

"There's no name yet. Let me think. Why don't we call it the Gem Fruit?" Shi Yu said.

The profundity of Sweet Aura+Nutrition, Gem Fruit.

It meant that every single one of them was as precious as a gem and could bring huge wealth to the Beast Tamer. Perfect. He was really a genius at naming things.

Shi Yu was already considering whether he should use the gem fruit to bribe the little female dragon in the snow mountain.

As a dragon that had lived for more than two thousand years, it should have a lot of collections.

This cat had only lived for a hundred years, but it was already so rich. That dragon was the one who had helped Emperor Shi conquer the world. No matter what... its wealth couldn't be underestimated.

"Gem Fruit." When the gem cat heard that, it immediately felt that Shi Yu was very smart. It ordered its clone to quickly go and get the resources.

At this moment, the clones in the resource warehouse felt that their main body was being too ridiculous.

It ate the good stuff while they worked. They would remember this...

"Meow—"

...

...

Half an hour later.

In the student dormitory.

Shi Yu returned excitedly.

Illusionary Dream Fruit, Grotto-Heaven Tree Root, Dragon Ball... The day the worm evolved was today!

If it were an ordinary Beast Tamer, they definitely wouldn't dare to be so crazy.

The Beast Taming Space was only level three, but it had already contracted two commander-level pets. It also had to support an evolution body in the form of a cocoon. It would wait to be drained dry.

However, Shi Yu, whose physique exceeded that of a master-level Beast Tamer and who had contracted a supplement pet that had mastered two perfect supplement skills, was very arrogant.

"Is this considered half a Beast Taming Space strengthening talent?"

After Shi Yu returned, he entered the ruins space smugly.

At this moment.

In the ruins space.

Eleven was practicing flying. Because of the foundation of the Thunder Palm and the special hardening nature, it had only evolved for a short while, but it had already become very proficient in electromagnetic levitation.

As for Baby Ginseng, it entered a shrunken state. It rooted itself and absorbed light energy, recovering its energy with difficulty.

Shi Yu and those fruits had squeezed it dry.

As for Buggy...

It was a classic scene. Buggy was sleeping.

It was unknown if it was training or daydreaming.

Yesterday, Buggy daydreamed for the whole day. It dreamed that it had evolved, but unfortunately, it was fake.

In the words of Buggy, it was accumulating evolution experience in the dream in advance. When it really evolved, it would be much smoother.

"Where's Buggy?"

"I bought the evolution materials back."

Shi Yu left the ten gem fruits and three boxes of worm silk for the gem cat and brought back a pile of evolution materials.

"Ji..." As if it had heard Shi Yu's thoughts, Buggy woke up from its sleep and teleported to Shi Yu's side.

Moreover, it looked at Shi Yu with anticipation.

Evolution materials?

Wherever it was.W

“Wuu.”

In the distant sky, Eleven realized that Shi Yu had returned. It also flew over with an electromagnetic levitation, planning to watch the commotion.

As for Baby Ginseng, as the current second in the team, it wanted to observe the situation of the worm. If the worm’s evolution exceeded it, that would be uncomfortable.

“Ji!!! (Evolution! Evolution! Evolution!)”

When Eleven and Baby Ginseng rushed over, they saw Buggy shouting excitedly.

However...

“Although I’ve bought the materials, you can’t evolve yet,” Shi Yu said.

Buggy:???

Baby Ginseng was amused. Buggy was so miserable.

“You have to eat the nutritional fruits that the ginseng baby created to increase your racial potential and evolution aptitude first. After eating them until they lose their effectiveness, then we can let you evolve. This way, the evolution effect will definitely be better.”

“During this period, I also want to upgrade your spatial shackles skill to Perfect Level. At that time, with the two perfect high-level skills, spatial shackles and phantom illusions, you will be able to break out of the cocoon easier. It will be more stable.”

“Baby Ginseng, I’ll leave it to you.”

Baby Ginseng:???

“Ji.” Buggy was amused. Sure, sure, no hurry.

Baby Ginseng:???

“Yi!!!” Baby Ginseng frowned. It really didn’t have a single drop of energy left.

Shi Yu chuckled and took out a level-seven wood-element energy crystal. “It’s not a big problem. I even exchanged for this. Even if you grow and break through to the monarch level, the energy inside won’t be so easy to absorb.”

“With this, not only can you recover your energy at a high speed at any time, your growth speed will also be much faster.”

Shi Yu had no choice. If he didn’t exchange for this and just relied on the energy recovered from its natural strength for free, Baby Ginseng might not necessarily be able to support him, Eleven, Buggy, and the Gem Cat at the same time...

He still had to spend money!

“Yi—”

At that moment, when it saw the level-seven wood-element energy crystal, the ginseng baby was stunned. It sensed the huge wood-element life force inside. It swallowed its saliva and nodded.

He should have said so earlier.

This was the most attractive resource for it apart from the Fruit of Life.

With this, there would be plenty of nutritional supplements and sweetness.

Then, Shi Yu took out the Illusion Fruit, the Grotto-Heaven Tree's roots, and the Dragon Ball and informed the Green Silkworm of the effect.

Spirit, space, dragon... It just happened to satisfy all the requirements of Buggy.

Buggy's eyes lit up. It couldn't wait anymore. However, before absorbing these cocoons, it would increase its evolution potential in advance through the nutrition of the ginseng baby!

"Ji!! (Baby Ginseng, let me see your limit!!)" It looked at the baby ginseng holding the wood-element energy crystal and urged crazily. Quick! Quick! Quick!

Chapter 164: Buggy Evolved Too

A day later.

[Name]: Green Silkworm

[Level of Growth]: transcendent

[Skill]: Worm Silk (Dao Proficiency), Absolute Sleep (Expert), Illusory Phantom (Perfect), Deterrence (Proficient), Super Sight (Expert), High Speed Healing (Proficient), Space Shackles (Perfect), Instant Transmission (Expert), Concealment (Expert)

[Energy Points]: 4399

After spending a day, the Green Silkworm with an energy value of more than 3,000 previously underwent a complete transformation under the modification of Shi Yu and the ginseng baby.

Although it was still lousy.

Even if Shi Yu raised Buggy's high-level spatial skill to Perfect Level, even if Baby Ginseng created nine full-level nutritional fruits to change Buggy's evolution aptitude... Buggy's energy value still couldn't double.

It only increased by a third.

At this moment, after continuously absorbing nine nutritional fruits that could increase his racial potential, change his evolution aptitude, and increase his lifespan, this fruit had gradually lost its effect on the worm.

It looked like no matter how much it improved, it was very difficult for the worm to match an overlord race with the 'Green Silkworm Body'.

"It's alright, it's alright..."

Shi Yu was still relatively calm.

The Green Silkworm was the weakest pet race in the first place. Even the Dragon Carp, which was a weakling in the pet world, was stronger than it. Shi Yu was already very satisfied that it could have its current energy level.

In addition, the most special thing about the Green Silkworm was that its racial potential was huge.

Very few pets could increase more than the Green Silkworm after evolution.

The weakness before evolution was only for the rise after evolution.

This was related to the green worm's special evolution method.

The other pets evolved in an instant.

The evolution materials they used were rarely used perfectly.

It was either hidden in the body or lost, but it was definitely not the strongest state where it had perfectly absorbed the power of the evolution materials.

The evolution of the Green Silkworm Race was an exception.

They first turned into cocoons and then fell into a deep sleep. They experienced the baptism of the evolution power for at least a month and almost perfectly absorbed the power of the evolution materials before completing the evolution.

In the cocoon state, the Green Silkworm's absorption rate of nutrition for evolution materials was also among the best among all pets.

Therefore, after the worm evolved, it would definitely be reborn to the greatest extent. Shi Yu looked forward to the day when the worm woke up from its slumber and broke out of its cocoon to become a butterfly.

"Ji..."

After feeling that it had reached another "bottleneck" state, Buggy ran over pitifully.

It could eat evolution materials to turn into a cocoon.

It couldn't wait anymore.

"Then let's begin."

Shi Yu had also worked hard for the whole day, but he was surprisingly energetic at the moment.

Just now, he had also eaten a weakened version of the nutritional fruit created by the ginseng baby. Now, he felt like he had returned to his childhood and was extremely energetic.

Perhaps he had accidentally increased his lifespan by a year and a half just now...

Beautiful.

“Ji!!!”

Upon hearing Shi Yu’s command, Buggy’s eyes filled with tears. It looked to both sides and suggested that Shi Yu call Baby Ginseng and the leader over.

Let them see its heroic bearing after its worm evolution.

Shi Yu :”...”

What’s the hurry?

During the evolution process, Buggy would be inside the cocoon, and it would sleep for a month. How could it be that fast?

Considering that Buggy used high-level evolution materials, it might be more than a month.

“Alright.” Shi Yu looked at Buggy’s excited expression and shook his head. He called Eleven and Baby Ginseng over to record it.

In the blink of an eye, everyone gathered.

These two guys arrived faster than Shi Yu imagined. Clearly, they also paid a lot of attention to Buggy’s evolution.

“Wuu!! (Coming, coming.)” Eleven came over with its cell phone.

Don’t worry about evolution, it will seriously take a video of it!

“Yi—(After eating so many of my nutrition fruits, it can’t be weak)” Baby Ginseng cried.

“Ji!!”

Faced with the encouragement of its two companions, the Green Silkworm’s expression was firm.

Then, it looked at the white Illusion Fruit, the brown grotto-heaven tree roots, and the blue Dragon Ball.

Buggy didn’t hesitate. It first ate the Dream Fruit in one go and quickly swallowed the grotto-heaven tree root.

In the end, it swallowed the glass bead-sized Dragon Ball into its stomach in one go.

During this process, Buggy felt a terrifying power slowly flowing out of the evolution materials it ate...

If it were other pets, even if it was a commander-level pet with a very strong physique that swallowed so many high-level materials, it would definitely explode at this moment.

However, due to the Green Silkworm’s special racial talent, “Cocoon Evolution”, this energy did not explode the worm immediately. Instead, it quickly flowed into the infinite worm silk in the worm’s body!!

“Ji!!”

At this moment, the worm looked up. White worm silk surged into the sky like angry waves.

The endless threads were dense and crisscrossed, covering the sky and sun. In an instant, they turned into a white sea of clouds in the sky.

Such a strange scene shocked Eleven and Baby Ginseng.

How much would this sell for!

Ordinary green worm evolution definitely didn't have such a big scene.

Shi Yu had already expected the special scene that might occur when Buggy evolved.

However, he still underestimated everything.

At this moment, not only did Buggy spit out an incomparably huge worm silk, but the ground its body touched was also affected by an unknown effect, turning into a white line like a huge wave. The sky, the ground, and at this moment, Buggy, seemed to be in a world of white silk!

On the ground was a sea formed by lines with surging waves.

In the sky, there was a white sea of clouds that constantly surged and covered the sky.

Shi Yu had really never heard of such a shocking cocoon transformation.

In the next second, something unexpected happened.

After spitting out an unparalleled amount of worm silk, the worm finally began to form a cocoon.

Countless threads that approached its body began to quickly wrap around its body.

At the moment it was about to form the cocoon, Buggy looked at Shi Yu, Eleven, and Baby Ginseng. Whether it was a month or two, it had to wait for it...

When it thought about how it was going to turn into a cocoon and sleep for a long time, Buggy actually felt a little reluctant.

However, at the moment, the evolution path had already opened, and the transformation of the cocoon was already an irreversible fact.

Hu hu ~ ~

The worm silk wrapped the Green Silkworm bit by bit. Soon, it became a white cocoon lying motionless on the ground wrapped in white silk...

In the next moment.

The endless worm silk in the sky and ground began to transform into a white stream of light that surged into the cocoon with the cocoon as the core, as if the world had become light at this moment.

"Sob." Why did Eleven feel that the scene of Buggy's evolution was even more spectacular than its own?

"Yi..." Baby Ginseng looked at everything in a daze, very envious.

It already had a premonition that when the worm evolved and returned, it would definitely become the strongest.

A few seconds later.

The ruins were completely calm.

The worm silk that filled the sky had already disappeared.

There was only an oval cocoon the size of half an arm left.

This meant that even after breaking out of the cocoon and becoming a butterfly, the worm wouldn't be very large.

It was still... concentrated with essence?

"It's over..."

At that moment, as he looked at the sleeping cocoon, Shi Yu took a deep breath. He had already sensed that the worm had completely fallen asleep and was quietly waiting for evolution.

He just didn't know how long it would take for it to break out of the cocoon.

At this moment, Shi Yu had a very strange feeling.

This feeling was like... he was an old father waiting for his pregnant wife for ten months?

He looked at Eleven and Baby Ginseng.

He wanted to ask if they felt this way.

But at this moment, he suddenly saw Eleven and Baby Ginseng's eyes widen.

"Wuu!"

"Yi!"

They pointed at the cocoon and shouted, "Oh no, Buggy is dead!"

"Uh." Shi Yu hurriedly looked at Buggy. Buggy didn't die, so where did this corpse come from!

However, at this moment, there was indeed a change in its body.

Boom!!!!

The cocoon that was originally lying quietly on the ground suddenly erupted with soaring evolution light.

The scale of the white light was completely not inferior to the previous worm silk sea.

Upon seeing this scene, Shi Yu's mind went blank.

This...

Evolution light?

Damn...

After the green worm evolved, didn't it have to experience at least a month of sleep to perfectly absorb the evolution power?

How could it be so fast...

It wasn't just the evolution light. Just like when Eleven evolved, Buggy was still experiencing a breakthrough!!

The growth level also seemed to want to go from transcendent to commander rank!

In the index in front of Shi Yu, the energy value of the worm was jumping crazily!

"Gulp."

Shi Yu gulped and was stunned. He didn't expect so many changes to happen to the evolution of Buggy.

It didn't make sense. Even if it had Absolute Sleep, it didn't make sense for it to absorb the power of the evolution materials so quickly, right?

This was unscientific!

However...

"What form will it take?"

Shi Yu was certain that after Buggy evolved, it would definitely not be any known butterfly, moth, bee, or worm, but a new form, an evolution form that had never appeared.

This was the power of the DIY evolution path.

The white evolution light was extremely dazzling. Soon, it slowly retracted and condensed on the cocoon.

The evolved form of the worm slowly appeared in front of Shi Yu and the others.

At this moment, Eleven was silent.

Baby Ginseng was silent.

Shi Yu fell silent.

"Huh?"

"Yi?"

"Huh???"

Three stunned voices sounded.

Shi Yu raised his hand and pointed at the "Worm Evolution" in front of him with a stunned expression.

Because at this moment, the worm was still in the form of a cocoon, but compared to the completely sealed sleeping worm cocoon form just now, there were two more small holes. Buggy's big eyes were observing everything outside...

3

Green Silkworm's evolution... Green Silkworm's cocoon?

2

"..." Buggy couldn't make a sound at this moment, but Shi Yu and the others understood what it meant.

Just now, for some reason, the worm might have been affected by Absolute Sleep, Phantom Illusion, and other skills. After it turned into a cocoon and fell asleep, it could still retain its thoughts and not completely lose consciousness...

In the dream, it had just had the thought of looking outside when... its body... couldn't help but evolve.

It evolved into a cocoon with eyes.

Moreover, it had awakened a new racial skill.

It could also feel that its evolution power had yet to completely disappear. It could still complete another evolution after sleeping for a period of time and completely absorbing the evolution power.

Buggy was confused by the changes in its body.

It had evolved, but not completely.

Shi Yu : "..."

F*ck.

What was this...

The Green Silkworm had this evolution form?

What should he call it now?

Green worm cocoon?

Ridiculous!

It felt that this form was even more terrible than the green worm form.

However, the current growth level and energy value of the Green Silkworm cocoon told Shi Yu how powerful the Green Silkworm cocoon was...

[Name]: Green Silkworm's cocoon

[Race Level]: ???

[Level of Growth]: Commander Level

[Energy Points]: 23333

It had already exceeded the standard of commander-level pets. It had 20,000 energy points.

In other words, the current cocoon was very likely a special form of a bug type commander species?!

“Commander rank cocoon? This is ridiculous. This doesn’t make sense.”

Shi Yu didn’t know what to say.

The form of the cocoon was used for sleep and to absorb power, waiting for the worm to evolve.

But this bug first turned into a cocoon form and even broke through the growth level. It even awakened a new racial skill??

The new racial skill awakened by Buggy was the low-level spiritual skill, Psychic.

[Name]: Psychic

< Level > Low

< Introduction > It’s a spiritual skill. It can materialize spiritual power and form Psychokinesis that’s as agile as your hands and feet.

In the cocoon state, Buggy’s previous racial skill, Worm Silk, was temporarily sealed.

However, as if to compensate for it, it automatically awakened its Psychic skill and replaced the worm silk as its limbs...

Although the level of Psychic was low, it was definitely one of the best skills to use...

“Wuu...” “Yi...”

At this moment, Eleven and Baby Ginseng didn’t understand, but they were shocked.

Shi Yu didn’t understand either, but he was also quite shocked.

“Therefore, the current situation is that you can wake up now or continue sleeping.”

“After absorbing all the evolution power, you can still easily carry out the next stage of evolution,” Shi Yu said.

“Ji!!” Buggy nodded excitedly. That was what it meant.

It even felt that it could fight now!

The worm silk was sealed, but the other skills weren’t!

Commander species, commander rank cocoon, invincible!

Great!!

It looked at Shi Yu and the others, reminding them of something important.

Speaking of which, if it turned into a cocoon and became commander rank first, would there be a chance for its next evolution to directly evolve into an overlord race?

The evolution law couldn’t cross the level of the three major races at once, but the problem was that it wasn’t a transcendent race now, but a commander race!!

In theory, the upper limit race if it continued to evolve was an overlord, not a high-level monarch!

When Buggy finished speaking, Shi Yu and the others were stunned. An unimaginable path...

“You’re really a genius... This evolution... This evolution is worth it.” Shi Yu’s expression was strange. It seemed to be true. If the cocoon was also a brand new race, it wasn’t impossible for the worm to evolve two consecutive times and become an overlord race.

At that time, wouldn’t it be a huge gain to have super racial skills in both psychic and spatial realms?

“Yi...” At the side, Baby Ginseng’s face instantly fell. Overlord race... What was going on? Wouldn’t it be at the bottom again?

Was its evolutionary fruit so powerful... It wanted to eat it too now!

Chapter 165: School Starts

After evolution, Buggy was very excited.

Because it felt that this evolution had yet to consume the power of any evolution materials.

It was purely because of its accumulation of natural evolution.

It was very curious now how powerful it could become after it completely absorbed the evolution power.

Even if it couldn’t reach the overlord race, it should be able to catch up to the Leader.

At the same time, it was even more curious about how strong it was now.

The energy value increased several times in an instant. Although it was not as high as the leader and the ginseng baby, battle did not depend on energy levels alone!

The use rate of energy points depended on the level and proficiency of the skill. Its skill level and proficiency were not lower than that of a leader or a ginseng baby.

In other words, under the same level, at a certain time, it wouldn’t be much weaker than the leader and the ginseng baby.

Only after a long time, when the battle evolved into a battle of attrition, would its disadvantage of having less energy appear.

Of course, having a lot of energy also gave some pets the capital to squander. For example, Eleven... relied on its energy to superimpose several skills to form profundities and attack as if it was a basic attack. Who could withstand that?

“Ji ~”

A moment later, Buggy said to Eleven telepathically, “If Baby Ginseng doesn’t want to fight, I’ll fight you!”

As it spoke, it even wrapped his entire body with blue Psychic power and flew up!

Eleven had the Electric Magnetic Floating skill, and now it had the Psychic power to float. Who couldn't fly!

Shi Yu, Baby Ginseng:??

"Fight my butt."

"Hurry up and go to sleep."

Shi Yu glared at Buggy.

Although it had evolved and was in a completely new form, the cocoon had to sleep obediently.

Did it still want to evolve successfully?

What if a "miscarriage" happened?

"Wuu!" Eleven also advised Buggy not to fight, at least not with it. It was afraid that it would accidentally help Buggy break out of its cocoon.

At that time, it would be a Thousand Sin Bear.

Buggy: (๑ _ ๑)

Didn't they agree not to act cool during evolution?

Why did it change when it came to it?

"Absorb the evolution power well first. When you're about to evolve, you can fight. At that time, you'll evolve on the spot and show off big time," Shi Yu advised, wanting Buggy to give up its current battle plans.

This cocoon form was like a little wife who had been pregnant for ten months. Although its battle power was not weak, it was better to be careful.

"Your current mission is to quickly absorb the evolution power and then absorb more nutrition from the outside world."

Shi Yu said, "I'll increase your absolute sleep skill points in the future. This way, your digestion and absorption of nutrition will increase. You might be able to break out of the cocoon earlier. Sleep in peace."

"Also, a new racial skill, Psychic... I'll also try to make it reach the maximum level before you evolve. Perhaps there will be an unexpected effect during evolution."

After Baby Ginseng's sweet aura, nutritional supplements, and other skills were maxed out, there were many more skill index slots. Shi Yu could relax and replicate Psychic power.

Now, he also had a difficult task, which was to lay a better foundation for the cocoon as much as possible!

Then the rank after evolution would at least be monarch and maybe overlord!

"!!!" Buggy was excited. It didn't expect this cocoon form was still viable for adding points.

“Alright, alright, come back and sleep.”

Shi Yu didn't plan to let Buggy wander outside for too long. He directly put it back into the Beast Taming Space.

However, just as he retracted it, Shi Yu suddenly felt a little tired.

It was unknown if it was because he was tired from worrying about his three pets or because contracting three commander-level pets was a little overload.

“Sigh.” Shi Yu smelled the sachet in his pocket and instantly revived. He looked at Eleven and Baby Ginseng, who were looking at each other.

“Eleven, stop training and rest.”

“Baby Ginseng, you... Although it's very cruel, please prepare the gem cat's food for the next month and do it well. After all, your future evolution materials might still have to rely on it...”

“° ° (๑ ๑)” Ginseng Baby understood.

They were sucking up to the cat.

At the same time, Eleven rubbed its head.

Stop training? Take a break?

Impossible!

Baby Ginseng had a training mission, and Buggy was also evolving and becoming stronger. Don't even think about tricking it into staying where it was.

Rest was impossible!

“Wuuu, wuu, wuu, wuu ~” Eleven revealed an intelligent gaze and jumped away to train.

Shi Yu :”...”

This child had been smart since it was young.

It had perfectly inherited the outstanding character of a Beast Tamer who was hardworking and unwilling to fall behind.

“You guys arrange the time yourselves. Work and rest are both important.”

Shi Yu was tired and planned to go back to sleep and think about it quietly until school started tomorrow.

The past few days before school started had exhausted him.

Not only had two of the three pets evolved, three of them had even reached commander rank!

His current strength...

At the moment, Shi Yu's strongest strategy should be to let Baby Ginseng create nutrients and let Eleven eat a bunch in one go.

This way, Eleven could accumulate a huge amount of energy in its restrained state. In the end, after reaching the limit, it would directly explode into a sharp edge using Inner Power. Who among the commander ranks could compare to it!

Then, the burden produced by the eruption could still be treated... It was invincible.

After Buggy turned into a butterfly, the combination of the three pets would be even more invincible.

With such strength, he could still be ranked at the top even in the big schools of the ancient capital.

“Fortunately, I didn’t go into the battle department. Otherwise, I would have graduated before school started.”

“Senior Lu is right. There’s really no future for the battle department.”

After school started, Shi Yu planned to distribute the time.

3: 3: 4.

30% of his free time was used to increase points and nurture bugs first.

30% of his free time was used to study. After all, Lu Qingyi had sent him to Ancient Capital University to let him learn some professional knowledge. He couldn’t always rely on his voice of history talent and archeological books.

Apart from the history and archeological knowledge of this world, Shi Yu was also quite interested in knowledge like machinery and feeding.

In this way, time was a little tight. However, he had at least four years to go to university. If he learned slowly, it wouldn’t be very urgent.

Most of the time, Shi Yu planned to use it to cultivate and meditate. After all, the level of the Beast Taming Space was the foundation of the Beast Tamer.

After knowing that the full skills of the index could be deleted, Shi Yu was no longer so obsessed with contracting new pets and adding new index pages. However, he was still a little obsessed with super skills.

The increase in the Beast Taming Space meant that the upper limit of his physique had increased... Shi Yu also wanted to teach super skills earlier.

Whether he could teach super skills... was definitely an important dividing line!

When the day came that he could teach super skills, perhaps his level could leave the scope of the younger generation and quickly advance to the older generation.

Just like when those legendary figures were young.

Emperor Shi had carried the burden and duty of driving out the totems and unified Dong Huang in his twenties, becoming the strongest under the Mythical stage. He was almost an evolutionary talent big boss who had reached the Legendary stage before the age of 30. He had one foot in the Mythical

Domain. Shi Yu felt that he should use him as his goal. Only then would he be worthy of the cheat-level talent, the skill index.

“Skill index, skill index, hurry up and make me invincible. When the time comes, I can go overseas or even the totem area to party.”

Especially the totem area...

Even the big shots of Bureau 11 didn't dare to explore the ruins there.

After all, it was the territory of the totem creatures. However, the more dangerous this place was, the more it attracted Shi Yu...

Shi Yu knew that this was an illness. He had to change it.

...

The next day.

January 31.

Shi Yu woke up early and opened his electronic guide letter.

School had theoretically started today.

Although class had yet to officially begin, they would meet the class mentor today. The students would also meet.

Perhaps, the new students of various specializations and even the entire school would gather to listen to the school leader's speech... At the thought of this, Shi Yu's expression darkened.

The universities in this world... The school wouldn't have any crazy opening ceremonies, right?

With a very nervous mood, in order to hide his handsome aura, Shi Yu deliberately didn't wear a panda costume. He only wore a simple blue casual suit.

Then, he arrived at a certain classroom for the class meeting at the specified time.

When Shi Yu entered, there were already more than 20 people in the class. The mentor had yet to arrive. As Shi Yu entered, the entire class suddenly fell silent.

Dead silence.

Some people widened their eyes and watched as Shi Yu slowly walked to the back row and sat casually in a seat beside the window.

“What's wrong? Who is he?”

A boy asked his deskmate beside him, wanting to know why the atmosphere in the class suddenly changed so quickly.

“Brother, you're not from the Ancient Capital, right? You don't often watch the news or surf on the Internet, right...” The person beside him was the one who had passed this year's Ancient Capital vocation assessment. He said with a serious expression.

“He’s Shi Yu, a super big boss.”

The new students of Ancient Capital University were mainly recruited from a bunch of messy assessments like the professional Beast Tamer assessment, professional Feeder assessment, professional medical assessment, and so on. The source of life was basically the candidates who passed the assessment in the nine first-level cities. It wasn’t that there were no candidates who passed the assessment in the second-level cities, but the requirements were very high.

Therefore, there were really a lot of people who didn’t know Shi Yu...

However, among the 20 plus people present, there were still many who passed this year’s Ancient Capital vocation assessment.

They had all seen Shi Yu take first place with their own eyes. How could they not recognize Shi Yu after changing his clothes?!

“This guy is actually my classmate?”

Many boys and girls in the class felt strange...

They were paying attention to Shi Yu, and Shi Yu casually glanced at them. It had been a long time since he sat in the classroom and listened to class with the little kids. He still missed this feeling.

“No one I know.” Shi Yu glanced at everyone and shook his head.

Why didn’t the school leader assign his opponents in the vocation assessment to this class to relieve his boredom?

No...

He knew someone here.

Two Spirit Mediums entered. Shi Yu recognized them.

“Wang Ling, Xu Jingyin, that should be the name, right?” Shi Yu raised his head slightly and looked at a boy in gray casual clothes and a girl in a black dress who entered the classroom.

He couldn’t remember it clearly, but this Wang Ling should be the armored man in the Ancient Capital vocation assessment. He had contracted a Skeleton General, Ghost Horse, and Sword Ghost. He liked the combination battle strategy of the “Skeleton Sword Knight”. He was that unlucky guy who was smashed into pieces by Yin Zhengfan’s Zonyan Rock Beast’s Lava Explosion!

As for that Xu Jingyin, she seemed to be from Icefield City just like him. Back then, when they were competing for the Evolution Holy Spring, Shi Yu was the second to fight her. His impression of her was that the other party had contracted a Nether Cat and was very weak. Back then, she was still a Beast Tamer intern. This person... had also come to Ancient Capital University?

“Perhaps the Evolution Holy Spring also brought considerable benefits to others at that time. In addition, during the probationary stage, no one has developed the Beast Taming Talent. Perhaps she also has an extremely special Beast Taming Talent...”

As Shi Yu analyzed in his heart, the two of them walked in his direction.

Then, they accidentally saw Shi Yu.

At this moment, their expressions couldn't help but change.

Shi Yu?

Shi Yu looked up with a smile. He wasn't a bad person. Did they have to be so exaggerated as to "change their expressions"?

"You know each other?" Shi Yu looked at the two of them walking together and asked curiously.

"She's my cousin." Wang Ling looked at Shi Yu and said, "I didn't expect us to be in the same class. However, there are only three classes for the archeology Department new students. It's not very surprising."

"..." Xu Jingyin looked at Shi Yu speechlessly. Back then, when Shi Yu announced that his Iron-eating Beast had an ancient evolution bloodline, the ones who were most depressed were definitely the group of people who competed with Shi Yu for the Evolution Holy Spring in Icefield City.

In their opinion, Shi Yu had definitely obtained the benefits from the Evolution Holy Spring.

Everyone was clearly soaked in it... Why did it have to be Shi Yu who earned it?

"Oh, oh, cousins. Not bad. I'll leave the next four years in your care!" Shi Yu said amiably.

Wang Ling and Xu Jingyin:???

Us? Take care of you? Human language?

Chapter 166: Martyr's Ruins

The two of them guessed what Shi Yu's so-called "care" meant.

At this moment, a dry cough was heard.

"Cough."

"Students, please sit down first."

The class guide who had entered the classroom had already walked to the podium.

This voice was a little familiar.

Shi Yu's gaze passed the two Spirit Mediums and looked over. Then, he was stunned.

Isn't this Old Ding!?

He was the mentor of the archeological Seven Elites, one of the members of the archeological Research Group at that time!

Well, Mentor Ding was a member, and Shi Yu was in charge...

Shi Yu had a strange expression.

Bah, this was very strange.

“I’m your counselor for the next four years. Ding Jie, just call me Teacher Ding.”

The male teacher smiled at the students who had already sat down.

“Next, we’ll have a ‘short’ class meeting to distribute textbooks, school cards, and talk about the plans for the next half semester.”

Then, Mentor Ding said a bunch of nonsense.

It was only until the class committee’s election that the class atmosphere became restless.

It was good to be a class committee member. Although one would do more work, they got extra credits, and the credits in the school here were all real money. It was more suitable to describe it with points. They could be exchanged for cultivation resources!

Moreover, its value couldn’t be compared to the priority right of the lousy scholarship in his previous life.

“Is there anyone who recommends themselves?” During this period, Mentor Ding’s gaze looked at Shi Yu either intentionally or unintentionally, but Shi Yu dodged and shook his head...

It was meaningless. Being a lousy class committee member was a waste of time. For ordinary students, this might be a very good way out. They could get closer to teachers, expand their connections, and obtain some resources in advance. But for those really capable students, it was a waste of their lives.

Shi Yu had understood this in his previous life.

Shi Yu was pretending not to notice the whole time, and Mentor Ding had no choice either. In the end, the armored man, Wang Ling, took the class monitor position away. The other class cadres also separated the other positions and placed it on different students.

“There’s no hurry to collect the textbooks. I’ll talk to everyone about the subsequent plans.”

Mentor Ding finally started talking about business.

He looked at everyone with a smile.

“You won’t be taking professional lessons so soon. Before that, you might have to undergo military training in three to five days.”

“The school will arrange for you to live for a week with the Beast Tamer Corps stationed outside Ancient Capital City.”

“Of course, this process isn’t for you to undergo any arduous training or battle, but for you to experience history and get close to history!”

“You guys chose the archeology Department because you’re more curious about Dong Huang’s history, right?”

“As the capital of many dynasties, the ancient capital has a large number of ancient dynasty ruins and ruins. The earliest can be traced back to the era of the Shi Emperor. These ruins are all guarded by the Beast Tamer Corps in various places.”

“Letting you guys go there to live for a week is actually more like a trip. It’s considered letting you guys experience it. Of course, during the process, there will definitely be plenty of training, training, and receiving knowledge. You have to be prepared.”

Whoosh!

As soon as Mentor Ding finished speaking, the eyes of the 33 students in the class, including Shi Yu, lit up.

“Ancient Dynasty ruins...” Shi Yu’s DNA moved.

Although it wasn’t impossible for him to go alone, with his identity as Bureau 11, he could go and take a look at any ruin, he was still following the big wave. It felt safer and it had more atmosphere.

“Teacher Ding, have you confirmed the location? What era’s ruins are they?” Shi Yu couldn’t help but ask.

Mentor Ding looked at Shi Yu and smiled. “I’ve long confirmed it.”

“It’s a ruin from the era of Emperor Shi, the era of Dong Huang’s founding. No, to be precise, it’s a ruin space!”

“It’s a ruin from the era of Emperor Shi, the era of Dong Huang’s founding. No, to be precise, it’s a ruin space!”

1

All the students perked up.

“This ruined space is very magical. I believe you will definitely broaden your horizons. If you’re lucky enough, you might even be able to obtain some benefits from it, or even...”

Benefits?

“Hero??!!!” In the class, Wang Ling and Xu Jingyin suddenly thought of something, and the other Spirit Mediums in the class said in disbelief. Could it be that place?

“Is it the heroic spirit ruins?” they asked.

“Yes, that’s the place.”

“Perhaps some students don’t know. Let me introduce them to everyone.”

“This is a ruin that hasn’t been completely explored. It’s said that the Dong Huang Dynasty built it to record some heroes with outstanding achievements at that time. From ordinary soldiers, battle beasts, and even weapons with merits to legendary generals and heroic figures who formed the legends of the later generations, they were imprinted in this ruin space in a magical manner.”

“It records the heroic figures of every level in the early stages of our human rise. Emperor Shi himself even modified this ruin through his own time power. I hope the future generations can forever remember these heroes’ contributions to Dong Huang.”

“And this ruin has been preserved until now, and it has even developed a mysterious power.”

“Those heroes, war beasts, weapons, mountains, rivers, plants, legions, and marks that have become targets of faith have become heroic spirits drifting in the long river of history over a long period of time. The archeological world unanimously believes that it was Emperor Shi who used his own power to let them survive in another form to this day.”

“Although they don’t have their previous memories and are new lives, their strength and potential are still present.”

“And the other special thing about this ruin is that if someone enters the ruin and has suitable aptitude, there’s even a chance to summon a certain heroic spirit from the long river of history and become an undead-type pet in the form of a ‘guardian spirit’ to protect the Beast Tamer himself!”

“In the past hundred years, there have been many Beast Tamers who have received the recognition of heroic spirits in our human race. At the moment, there’s a legendary Beast Tamer in our ancient capital who has obtained the recognition of the ‘battle soul’. This is the conceptual heroic spirit formed by a certain invincible army of Emperor Shi due to their faith. It’s peerless in battle.”

Fu Jing!

Everyone knew which legend Mentor Ding was talking about.

Since entering the Alliance calendar, although there had never been a legendary Beast Tamer in Ancient Capital City, there were still many famous legendary Beast Tamers.

For example, Legend Yin and Legend Fu were both representatives of Ancient Capital City.

Moreover, unlike a Beast Tamer like Legend Yin who relied on his impressive Beast Taming Talent to rise, the turning point of Legend Fu’s life was that he obtained the recognition of the Battle Soul!

As an ordinary soldier of the Beast Tamer Corps, Legend Fu, who couldn’t even afford a decent pet but had a lot of ambition, was a classic rags to riches story.

Perhaps it was because of his personal charm or other reasons, but he obtained the recognition of the battle soul of the army under Emperor Shi from the heroic spirit ruins. This battle soul with an extremely high growth rate directly made him soar into the sky and grow into a legend all the way, becoming a big boss in the military world.

With Mentor Ding as an example, everyone instantly understood.

As soon as he finished speaking, all the students present were immediately filled with endless anticipation for this heroic spirit ruin.

They were even more curious about every big and small figure who had left merits during the Time Emperor Era. They were curious if they could obtain the recognition of these heroic spirits!

“Alright, there will be more specific notice later. The military training activity of the Martyr’s Ruins is jointly carried out by the archeology Department and the Battle Department. Everyone, just know in advance and prepare.”

“Next, class monitor, organize it. Everyone, go and get the textbooks.” Mentor Ding looked at the armored man, Wang Ling.

“After retrieving the textbook, you can go back today.”

“Yes!” Wang Ling nodded.

...

This class was very strange. Because the ratio of men and women was severely imbalanced, there were 24 boys and only 9 girls.

Then, under Mentor Ding’s lead, everyone went to the next room to carry books. What shocked Shi Yu was that there were a total of 32 textbooks for the first semester of the archeology specialization alone, and they were all pretty thick...

This page count was too much.

However, although there were many textbooks, everyone was a Beast Tamer. It was quite easy to move them.

Even if it was a girl, she could lift dozens of books with one hand. All of them were transcendent humans. There were no delicate female students who couldn’t even twist the bottle cap. This couldn’t help but make Shi Yu sigh at the valiance of the people on the blue planet.

When distributing the textbooks, many students chatted together and even flipped through the textbooks.

“Look at this book. It records the three generals and the three great armies under Emperor Shi. Perhaps we can summon some heroic spirit from it when the time comes.” Someone found a history book and smiled.

“Legend Fu seems to have obtained the recognition of one of the Beast Tamer Corps’ battle souls!”

After his reminder, everyone quickly flipped open the book.

The three generals under Emperor Shi were all Titled Legendary-level Beast Tamers. There were even countless experts in the army under them. This book recorded hundreds of Beast Tamers and pets that could be called heroes.

From their birth to their pets to their achievements, there were certain records.

“The three generals?” Shi Yu also flipped through it.

“General Bai Lin, Heavenly Formation General, Sea Suppression General...”

Upon seeing this, Shi Yu smiled.

“What are you laughing at?” Beside Shi Yu, Wang Ling, who had been secretly observing Shi Yu, looked at the monster that had been keeping a low profile just now.

According to what he knew, his childhood friend and strong opponent, Yu Shu, was extremely angry at this Shi Yu. It was one thing for Shi Yu to be strong, but in other aspects, Wang Ling also wanted to investigate.

“It’s nothing. It’s just that it looks like the history of that time hasn’t been completely recorded.” Shi Yu slowly put down the book.

“What do you mean???” Wang Ling was stunned.

After Emperor Shi opened the Beast Taming Era, compared to the Mythical Era and the Totem Era, the lost history was actually relatively small. However, from the looks of it, it still hadn’t been completely recorded. However, this was also normal. Even if it was a previous life without transcendent power, the amount of history that had been passed down is still incomplete. Whether it was real or fake is still a big problem.

“What I want to say is that as everyone knows, there are five of the Four Heavenly Kings, so there should be at least four of the three generals,” Shi Yu said.

Wang Ling: “?”

What was this confusing riddle?

“Are you going to tell me or not?” The corners of Wang Ling’s mouth twitched.

Shi Yu smiled and said, “That’s what I meant just now. I mean, apart from these three generals, there should be another general under Emperor Shi. However, from the looks of it, she hasn’t been recorded.”

Ice Dragon General, Mu Huiyin!

Due to special reasons, the Heroic Spirit Ruins had yet to be completely explored. He didn’t know if she was recorded inside.

Shi Yu looked out the window and in the direction of Ice Dragon Snow Mountain in Icefield City.

That ice dragon also have said that its Beast Tamer, the Ice Dragon General, was also a general under Emperor Shi. However, there were no records in this book.

She had clearly sacrificed herself to help the Country suppress the totems, but her merits had not been recorded... He wondered how the Ice Dragon General Mu Huiyin and the Frost Dragon felt.

“I want to discuss with the Ice Dragon to help the Ice Dragon General verify her name! It doesn’t matter if I get a dragon whisker, or scale, or whatever, the main thing is to restore history!”

However, compared to this, Shi Yu wanted to know more. If he entered that heroic spirit ruins, what kind of heroic spirit could he resonate with... Or could it be that without that one in ten thousand aptitude, he couldn’t summon anything in the first place...

Chapter 167: Beginning of Club Recruitment

Apart from the three generals, there was another general that had not been recorded?

Shi Yu's words stunned Wang Ling.

He didn't think that Shi Yu was talking nonsense.

There was no need for Shi Yu to lie.

However, how did Shi Yu know?

"Are you serious?" Wang Ling asked.

Shi Yu patted the book and said, "It should be announced in a while."

He didn't know how the conversation between Bureau 11 and Ice Dragon was going.

Now, Lu Qingyi was in charge of this matter.

He could ask later.

If he really planned to destroy the Ice River Totem, he also wanted to take a look.

He just didn't know if the mechanical guardians that had forbidden weapons could be touched by him.

Shi Yu estimated that there was no chance. From the looks of it, his plan to let his future mechanical pets be able to use nuclear bombs had failed!

"Stop chatting."

Just as Shi Yu and Wang Ling were chatting, Xu Jingyin walked over and interrupted their conversation.

"Uh." Wang Ling was stunned. Although his curiosity had yet to be satisfied, judging from Shi Yu's expression, he didn't seem to want to talk about it in detail.

Business was more important... Continue moving the books!

However, before leaving, Wang Ling suddenly said to Shi Yu, "Will you go to the battle club's recruitment tomorrow?"

At the beginning of school every year, the various clubs of Ancient Capital University would face the entire school to recruit new students.

Among them, the most popular battle club was definitely among them.

If other clubs had interests and hobbies, then battle clubs were purely about strength.

The club adopted a ranking system, and there were resources to be divided.

Within a year, various internal competitions of various sizes would be carried out in the club. When the National League was about to begin, the head students of the club would also form a school team and fight the National League.

After the National League ended, a new school year began. Some members graduated, and the clubs would be new from the older students who weren't strong enough to enter the clubs before. They wanted to see if anyone had any opportunities and improved their strength during this period.

Basically, the threshold to enter the battle club was to be a high-level Beast Tamer and commander-level pet.

Only those older students with the strength to accumulate could reach this condition.

However, in recent years, because the school had increased the favoritism of the resources of the battle club, and because of new policies, even those new students who only had transcendent pets could receive the training of the club in advance as long as they had the potential.

Wang Ling wanted to know if Shi Yu was interested in becoming a reserve member of the club.

Although Shi Yu had entered the archeology Department, everyone knew Shi Yu's strength clearly.

If Shi Yu planned to enter the battle club, he would definitely receive huge resources.

"Me? I should go take a look," Shi Yu said.

If he didn't go, the beast-eared girl would come knocking on his door.

The Ancient Capital University of the National League lost again this year. It didn't even enter the top five in overall grades, making the beast-eared girl explode.

Also... This year was her last year in school. She wanted to do well because the original president graduated and she became the president.

In this situation, Shi Yu was embarrassed to not join in the enthusiastic invitation of the beast-eared girl.

"You're going too ?..." After Shi Yu answered, Wang Ling muttered and left.

Sigh, Shi Yu was also going...

This guy would definitely steal the limelight again. Damn it.

As the two of them walked away, Shi Yu smiled.

A moment later, he waved his hand and the books disappeared.

In the ruins space, Eleven and Baby Ginseng watched as a huge pile of books piled in front of them.

Seeing these books, Baby Ginseng was still a little confused, but Eleven suddenly trembled.

"Wu!" It looked panicked.

Eleven was not afraid of anything, but it was afraid that Shi Yu would let them learn mathematics and physics.

Although these weren't the same subject, Eleven felt that it was similar.

"Yiya," Baby Ginseng asked. What was this?

“Wuu!” Eleven thought for a moment and said, “Wuu wu wu. (After mastering all the secret manuals to become stronger, one will be invincible.)”

“Yi?!!” Baby Ginseng’s eyes lit up.

Then, it was a little nervous.

Then could it take a look?

“Wuu!” Eleven expressed that Baby Ginseng could look around as it pleased. It was best to memorize everything.

With that said, the lightning sparked around it and it took off and left this troublesome place.

...

On the day of school, apart from the class meeting, there were no other meaningless meetings. Fortunately.

After putting away the books, he returned.

After returning, Shi Yu had originally planned to study the textbooks first.

However, after entering the ruins space, he realized that Baby Ginseng was staring at a book with a worried expression. It was studying for him, so he turned around and slept, planning to rest more.

“Ha ~” After yawning, Shi Yu slept and accompanied the green worm’s cocoon.

He sunk into his dreams, there was no concept of time. It was even a phone call that woke Shi Yu up.

“Hello, hello, hello ~”

“The club is recruiting new members today, remember to come ~”

“Also... remember to perform well later!”

White Brook knew Shi Yu’s background and potential. Although she also wanted to directly distribute most of the resources to Shi Yu, she still had to be fair in the position of president.

“Alright,” Shi Yu replied in a daze when he heard the beast-eared girl’s voice.

Eh? Wait, today?

Shi Yu was stunned and hurriedly looked at the time.

7: 32...

Holy shit, he had slept for more than ten hours.

It broke the record.

Shi Yu immediately became energetic. Apart from being a little hungry.

“Eleven and the others actually didn’t wake me...” Shi Yu rubbed his temples.

The club recruitment event began at 8: 30 pm. Shi Yu planned to find something to eat before going over...

After tidying up a little, Shi Yu left the house in high spirits.

...

Ancient Capital University, the northern campus, one of the exclusive training grounds for the battle club.

This place was huge. In the center was a huge venue. The seats from low to high were almost surrounded.

At this moment, it was already extremely lively here.

There were freshmen and seniors from the first to fourth years of university. There were students from all grades.

Archeology, Battle, Medical... There were also specializations.

Shi Yu walked in the noisy training ground and immediately saw the beast-eared girl on the platform.

Although she was small, White Brook, who stood there with a rare expression, had a very strong aura. A moment later, she sat in the main seat of the platform. On her left and right were seven or eight members of the battle club of the same age, both male and female.

“Senior White Brook is so brave.”

“Did you see the National League this year? She fought with a monarch-level pet and resisted the opponent’s skill. She’s so cool.”

In the audience, some new students looked at the platform and discussed.

“What’s the use of being cool... Didn’t Ancient Capital University still not produce any results this year? The other team members are too lousy.”

“Fortunately, Senior White Brook and her pet advanced before the competition. Otherwise, with the president at the master level, the results of Ancient Capital University would probably be even worse.” An inappropriate voice came from the side.

A guy sitting lazily in a chair and wearing a cloak said casually.

“You... who are you?” The surrounding new students looked at him.

“Don’t you even know me?” Yu Shu was helpless. “Forget it, it doesn’t matter. Anyway, the battle club of Ancient Capital University is too much. I hope that after I join, my teammates will be more awesome.”

Because his parents were students from Ancient Capital University, Yu Shu had long been internally decided by Ancient Capital University. He even planned to join the battle club of Ancient Capital University and restore the glory of Ancient Capital University!

Perhaps not in the short term, but if he was given two to three years, Yu Shu believed that he would definitely do better than these seniors.

“Little Yu, you’re so cocky now.” As Yu Shu was posturing, a palm landed on his shoulder.

Then, a person sat beside him.

As this person sat down, Yu Shu frowned and turned around. Then, his expression darkened.

“Shi Yu??”

Shi Yu sat down with a smile. He didn’t expect to meet someone he knew. Alright.

The first to call out Shi Yu’s name was not Yu Shu, but the surrounding students.

Obviously... The reputation of Shi Yu, the first place in the assessment, was much greater than Yu Shu, who couldn’t enter the top three.

“Holy shit, Shi Yu is here too.”

After discovering that Shi Yu had also arrived at the recruitment venue, many students around them began to stir and discuss.

However, everyone was young after all. Shi Yu was not an idol-level positive figure, so no one came over.

“What are you doing?” Yu Shu looked at Shi Yu. His Beast Taming Space was still a little short of breaking through to level three. It was a little early to take revenge on Shi Yu now, but after the military training ended and he obtained the recognition of the impressive heroic spirit, he was confident that he could surpass Shi Yu.

The Heroic Spirit Ruins was also the reason why Yu Shu, a Spirit Medium, stayed in Ancient Capital University.

According to tradition, almost 100% of talented Spirit Mediums like him could obtain the recognition of the heroic spirit. In fact, after obtaining multiple recognition, the heroic spirit could be chosen by him. However, the strength was not certain.

“Join the club? What else?” Shi Yu smiled.

“Tsk.” Yu Shu curled his lips.

What was a telepathy talent doing in the battle club? He should go archeology obediently.

Even the legendary figure of Ancient Capital University, Senior Lu, couldn’t use her telepathy talent to defeat those Beast Tamers with battle-type talent... Shi Yu definitely couldn’t.

Between high-level Beast Tamers and master-levels, there was a common title. Quasi-master-level Beast Tamers referred to Beast Tamers who could control commander-level pets and fight monarch-level creatures.

This was also the strength of the second tier contestants in the National League.

Generally speaking, the difference in strength between commander rank and monarch rank pets was difficult to cross even with the racial advantage.

Beasts alone did not have the ability to fight above their level, but with the increase of the battle-type Beast Taming Talent, there was a chance of doing it!

Because of these precedents, Yu Shu felt that Beast Tamers with battle-type talent would definitely widen the gap between them and non-combat-type Beast Tamers over time!

He looked at Shi Yu with pity... Unfortunately, such a good opponent was destined to be “surpassed” by him in the future.

“F*ck...” Shi Yu also looked at Yu Shu like he was looking at a fool. He was speechless.

He had to give him a lesson later. This Yu Shu had clearly not been beaten up enough!

At the same time.

On the stage.

White Brook picked up the microphone and directly spoke. As her voice sounded, the training ground immediately fell silent.

“I’m the current president of the battle club, White Brook.”

“Welcome, students who want to join the battle club.”

“There are limited social resources and limited venues. A small selection will be carried out next.”

“Today’s selection is divided into two rounds. After passing the first one, you can become an official member of the battle club. After passing the other one, they can become a reserve member of the battle club and even the school team. In short, one will face the older students and the other will face the new students.”

“Let me briefly explain the rules of the first selection. Next, the battle society will send out different Beast Tamers to guard the arena. The rules are 3VS3 solo. They will send their pets first. Those who want to join the club can go on stage and challenge them themselves.”

“As long as you can defeat two pets of the battle club’s guardian, you’ll pass the assessment.”

3VS3. The representatives of the battle club members and candidates who wanted to join the club could at most send three pets.

However, soloing meant that the three pets couldn’t be released at the same time. It wasn’t a team battle, but a 1VS1 battle.

At the level of high-level Beast Tamers, theoretically speaking, Beast Tamers could send out four pets at the same time, but the burden of commanding four pets at the same time was very high for Beast Tamers. Therefore, in battles that were not related to life and death battles, usually, Beast Tamers would choose rules that were relatively friendly and enjoyable for Beast Tamers.

For example, a 3VS3 solo battle was a very mainstream competition rule. That was, choose three out of all the pets he contracted and send them out to battle the opponent one by one. Whichever side all three pets lost their battle ability, or the Beast Tamer himself used his talent to exhaust his physical fitness, would be judged as a loser.

“Then, in order to save time, let’s start now.”

As White Brook finished speaking, someone had already walked onto the arena.

He was tall and strong, wearing clothes that looked like a basketball suit. He had messy hair, narrowed eyes, and a smile, looking very friendly.

After boarding the arena, he took the initiative to summon it.

“Jiu!!!”

In the green summoning array, flames rose. A huge bird with red feathers and flowing flames flew into the sky and let out a cry...

“Hong Xiao, high-level Beast Tamer, commander-level Flame Three-Headed Bird.”

The member of the battle club smiled and introduced himself.

Seeing him, many seniors who wanted to go on stage hesitated.

Because this person was not weak. As a Beast Tamer with fire-element strengthening talent, his output was clearly very violent.

In the battle club, there were still a few Beast Tamers with non-combat-type talent. Most of the older students who wanted to join the club wanted to wait for the weaker “examiner”.

[Name]: Flame Three-Headed Bird

[Attributes]: Fire, Wind

[Race Level]: Mid-level commander

[Level of Growth]: Commander Level

[Race Skill]: Flame Assault, Flame Breath, Wind Drill, Wind Pressure, Sea of Fire

[Energy Points]: 33976

A fire-element pet with extraordinary strength!

Shi Yu nodded after seeing the pet data through Bureau 11’s index.

If the Beast Tamer’s fire strengthening talent was added, it was indeed a nightmarish strength for new students.

“Aren’t you going?” Seeing that no one was going up for the time being, Shi Yu couldn’t help but feel bored. He asked Yu Shu, why didn’t the students register in advance for this recruitment activity to arrange the assessment order? In a club, it seems like there weren’t any logistics members in the battle club?

“What the hell?” Seeing that Shi Yu was asking him, Yu Shu’s expression darkened. The assessment for the new students was at the back, what was the hurry? This was prepared for the older students!

“No one’s going up...”

“Then I’ll go.” Shi Yu didn’t expect the assessment for the new students to be ranked at the end. In order to not waste time, he directly got up and slowly walked to the arena. In any case, he was entering the battle club. There was no difference between an official member and a reserve member.

Fire-element pets were perfect for Baby Ginseng to practice!

Chapter 168: Baby Ginseng’s Might

“Then I’ll go.”

When Shi Yu finished speaking, Yu Shu was first at a loss before saying, “Huh?”

As Shi Yu walked away, Yu Shu reacted from his daze.

What was Shi Yu going to do?

What did Shi Yu say he was going to do?

Wait, did he hear wrong?

This fellow... was going to challenge that Hong Xiao?

“Holy shit, is this guy crazy? Is he stupid?” Yu Shu stood up. He was stunned by Shi Yu.

At this moment, Shi Yu had already walked down.

They arrived at the border between the venue and the audience.

There was also a group of battle club members sitting here. They were registered for challengers who wanted to enter the club.

Coincidentally, when Shi Yu came down, three other senior students also came down.

Shi Yu couldn’t help but be speechless. They didn’t have to register and queue here, right?

“Register here if you want to take the entry assessment ~”

“One by one.”

“Do all four of you want to try?”

A tall girl with long hair waved a pen and said.

She looked at the four people who had walked over at about the same time.

The three older students were all familiar faces. Among the four students of the Combat Department, only Shi Yu was a new student. However, Shi Yu, this new student, seemed to be a familiar face to the few members of the battle club responsible for registering...

After carefully identifying it, they looked at Shi Yu in front of them in a daze.

“F*ck.” A member of the battle club was stunned.

When the three older students saw the reaction of the elites of the battle club, they also looked at Shi Yu.

Moreover, he also felt that the handsome Shi Yu was a little familiar.

“Are you Junior Shi Yu??”

The tall girl in charge of registering stared at Shi Yu with her beautiful eyes.

In the battle club, White Brook respected Shi Yu very much. She believed that in the next few national competitions, the new blood of Ancient Capital University, Shi Yu, would change their losing streak.

Regarding this, White Brook even brought some members to watch the vocation assessment.

The members of the battle club naturally knew Shi Yu.

However, it was precisely because of this that it was very strange... Shi Yu was clearly a new student!

“Yes.” Shi Yu nodded.

“Junior Shi Yu, you’re too early? The assessment for the new students is behind ~” the senior said.

“No, I’m here to participate in the assessment of an official member,” Shi Yu said.

Everyone: “?”

To participate in the official member assessment, one had to at least have commander-level battle power!

If they remembered correctly, Shi Yu’s Beast Taming Space level was only level two. Even if he broke through after the vocation assessment, he was only level three!

It was completely different from the official assessment.

“Are you serious??” The battle club sister confirmed again.

“I’m not kidding, senior. I already have commander-level battle power.” Shi Yu smiled.

As Shi Yu finished speaking, the nearby battle club senior was a little stunned.

Her head was dizzy.

Wait... Half a month ago, Shi Yu, who had just passed the vocation assessment at the second level of the Beast Taming Space, already had commander-level battle power?

He did look like he was kidding!

“Your guys...” At this moment, on the platform, White Brook also discovered the abnormality in the registration office.

In the arena, Hong Xiao also looked over.

They had all discovered Shi Yu’s figure, but they weren’t sure what was going on.

“Are you serious? I’ll register for you, then you go.” After realizing that she was dragging the progress, the tall senior immediately registered for Shi Yu. Although she had yet to figure out what was going on, Shi Yu could do whatever he wanted...

“Thank you, then I’ll go...” Shi Yu thanked, leaving the three older students beside him a little stunned.

It seemed like they had arrived a couple steps earlier, right? Damn it, Shi Yu gotta go first!

...

Shi Yu completed the registration and really stepped onto the arena.

At this moment, the members of the battle club and the new and old students who had all focused on the registration area were stunned.

Looking at Shi Yu’s familiar face, everyone rubbed their eyes.

“Why did he go up?!?!?”

On the platform, the beast-eared girl nearly collapsed the table under the gaze of her companions, scaring them.

White Brook was at a loss. What was wrong with Shi Yu...

At the same time, in the audience.

Zhang Qianyi, the Gu Master Miao Dongdong, Han Dong, who had also entered Ancient Capital University’s Elemental Coordination Talent, were staring. Han Dong, who had been insta-killed by Shi Yu during the vocation assessment, as well as Shi Yu’s classmates, Wang Ling, Xu Jingyin, and the others, all looked at Shi Yu, who had stepped onto the arena, in confusion.

No, what was this guy doing up there...!

“He’s crazy,” Yu Shu sat back down and said.

“Senior Hong, hello ~” After Shi Yu came up, he looked at the Beast Tamer of the Flame Three-Headed Bird and greeted him.

Hong Xiao was stunned. He looked at the register and saw the tall senior make an “OK” gesture at him, meaning that, yes, Shi Yu was the first challenger to enter the club.

She was leaving it to him.

F*ck... Hong Xiao didn’t understand why a new student like Shi Yu would come up now. However, at this point, he nodded and said, “Junior, send your pet out. It’s a 3VS3 solo.”

Shi Yu nodded.

In the next second, a white summoning array appeared in the arena.

Moreover, ripples came from the index. A pet figure was about to appear!

“White array, level-three space... He broke through.”

Before the pet appeared, many candidates of the same batch as Shi Yu were stunned when they saw this scene!

Shi Yu, who had the Iron-eating Beast and the Green Silkworm, was already so strong. Now, who knew what new pet Shi Yu had contracted... What changes had his strength made...

However, the problem was that even the level-three Beast Taming Space... didn't meet the standard of the battle club!

"Yi...!!!"

However, as the pets Shi Yu sent out appeared, the level of Shi Yu's Beast Taming Space was no longer the point of discussion.

At this moment, everyone's gaze was focused on Baby White Radish in the arena. No, Baby Ginseng!

"Huh...?"

"Jiu!!!!?"

Not to mention the audience, even in the arena, the pets of Shi Yu and the others, the Three-Headed Flame Bird that wasn't a human, were a little confused. What did it mean?

Its opponent was this thing?

Are you sure this is a battle and not an additional meal?

Burning a ginseng baby... This was too cruel.

It looked at its Beast Tamer.

At this moment, Hong Xiao was very silent.

He wasn't the only one who was silent. Everyone was.

Was the wood-element ginseng baby serious about fighting the fire-element three-headed bird??

Not only was it a battle of attributes... but it was also a battle of races. Shi Yu was definitely crazy! Everyone stared at the arena with widened eyes.

The most silent was still White Brook on the platform. Her expression was solemn. This ginseng baby...

A mutated ginseng baby of a low-level monarch race!

As one of the people present when Lu Qingyi recommended pets to Shi Yu, White Brook was the only one who knew the origin and extraordinary aspects of this ginseng baby.

However, even so, she still couldn't understand it at this moment. No matter how high the level of the mutated ginseng baby was... it was still a supplement.

Just because its race level crushed the Flame Three-Headed Bird didn't mean that its battle power would be higher.

“Baby Ginseng... What is this Iron-eating Beast Knight trying to do? I don’t understand.” In the audience, a battle faculty senior student spoke in confusion.

“Baby Ginseng doesn’t have any battle power. So what if it’s a commander rank? It’s still useless even if it evolves into a ginseng fruit tree.”

Beside him, a battle department senior who had also come to participate in the assessment had a messy gaze.

Baby Ginseng... Baby Ginseng didn’t have any battle power?

A long time ago, he also thought so, and so did his Giant SunFlower...

Until a new student brought a ginseng baby and blew up his Giant SunFlower.

After watching the surveillance video somewhere, he couldn’t calm down for a long time. He silently forgot this memory and picked up the Giant Sun Flower from that heartbreaking plant garden...

And now, the familiar figure of a Beast Tamer and pet in the surveillance video appeared again...

Giant Sunflowers Beast Tamer’s voice was dry and hoarse.

Damn.

It was them!

He looked at his companion. The problem was that this ginseng baby had battle power, and its battle power was so high that it didn’t make sense!!

“Why can’t Baby Ginseng have battle power? Of course it can! This Baby Ginseng’s battle power is definitely off the charts. It’ll bet on an energy crystal!” He gave up thinking and looked at his companion beside him. He planned to not be the only one injured.

“???” His companion.

“You’re here to distribute benefits? So be it, don’t regret it!”

The audience was bustling with activity. In a certain corner, Yu Shu looked at Shi Yu like he was a fool. Although Shi Yu was stronger than him now, he wasn’t as smart as him. Meanwhile, after a short silence, although the plot was a little wrong, the assessment still had to be taken. Senior Hong Xiao chose to let Shi Yu attack first.

“Junior, you attack first.”

He was afraid that if he attacked first, Baby Ginseng wouldn’t have anything else.

It was still a backup plan.

In the arena, Shi Yu had one hand in his pocket as he looked at the sky. Baby Ginseng, who was standing on the ground with its calves, also looked up at the sky and at the Three-headed Flame Bird that seemed to have fused with the hot sun.

“Jiu ~!!!!”

The flames on the Flame Three-Headed Bird's body swept up. Although it wasn't a move, the flames on its body seemed to have wrapped it into a fireball. Ordinary wood-element attacks probably couldn't get close to its body!

This was attribute suppression!

Moreover, did Baby Ginseng have any attack skills?

"Yiya ~ (So hot ~)" Baby Ginseng looked at the sky and muttered to itself.

Moreover, under the gazes of everyone, he stretched out a finger-like palm and pointed at the three-headed flame bird in the sky.

"Baby Ginseng, Light Clearing Cannon," Shi Yu said.

Clearing Light Cannon?

What the f*ck?

Shi Yu deliberately didn't use telepathy. After hearing this, Hong Xiao and the others were stunned.

Baby Ginseng had this skill?

Moreover, the name of this skill sounded a little fierce. It felt like a super skill!

Boom!

After Shi Yu gave the order, everyone was attracted by the light that appeared on the arena.

Because Hong Xiao chose to let Shi Yu attack first, it gave Baby Ginseng time to accumulate light energy.

Although its storage beam was only at the expert level and its proficiency wasn't very high, the energy value of the ginseng baby was currently as high as 90000!

It was three times closer to the Three-headed Flame Bird in front of him!!

Under the guidance of such a huge amount of energy, the formation speed and scale of the light beam transformed from the energy fusion in its body was not as slow and small as imagined.

A few seconds later, a ball of light the size of a marble and containing terrifying power appeared in front of Baby Ginseng's fingertip.

Buzz ~ Buzz ~ Buzz ~

The dazzling light and surging energy suddenly made the Three-headed Flame Bird in the sky feel that something was wrong.

Hong Xiao's expression also changed.

"Something's wrong."

"Let's increase the distance and use Flame Assault to accelerate!"

As he didn't know what was going on, Hong Xiao quickly gave the order.

In an instant, the flames on the three-headed bird's body became even stronger. It used an acceleration attack skill and burned the power in its body!

However, it was already too late. The white light ball at Baby Ginseng's fingertip had already spewed out.

The light ball extended and turned into a dazzling light pillar. It shot out of Baby Ginseng's fingertip like a flash from the sun.

At this moment, the airflow around the arena was dyed white. Because the power of the storage beam was too strong, it had already caused the air to tremble!

Boom!!!

Under the lingering of the hurricane, the terrifying white pillar of light turned into a white shock wave. Its speed completely exceeded the Three-Headed Bird's Flame Assault and reaction speed, directly devouring the Three-Headed Flame Bird, whose pupils constricted, and pushing it into the distant sky!!

An incomparably thick beam of light pierced into the sky at an extremely terrifying speed. The flames on the Flame Three-Headed Bird were instantly extinguished. Its gaze gradually became absent-minded as it was pushed by the power of the beam until it was covered in injuries!

"Screech—" In the sky, the cry of the three-headed flaming bird came.

At this moment, everyone only felt a flash of light. In the next moment, the three-headed bird's body that was riddled with holes from the beam of light appeared in front of everyone. Only the ridiculously strong beam of light continued to penetrate the sky...

Because he underestimated the enemy, this battle club leader didn't even have the time to activate his talent, and the Flame Three-Headed Bird didn't know what happened either. Its eyes turned white and it fell from the sky with a white smoke...

It was a huge tragedy.

Bang!!!

A moment later, the Flame Three-Headed Bird fell heavily to the ground. At this moment, the entire place was dead silent.

From Hong Xiao to Yu Shu, Miao Dongdong, Han Dong, and the other new students who were watching the commotion at the same time as Shi Yu, their gazes gradually exploded. Their mouths were agape, and their hearts almost stopped.

Especially Yu Shu. His mind went blank as he looked at the calm Shi Yu in the arena.

This Yu Shu suddenly lost the ability to think.

He almost blacked out, unable to accept the reality in front of him.

"Aba Aba Aba Aba..." Yu Shu.

At the same time, in the arena, Hong Xiao widened his eyes as he looked at the fallen Flame Three-Headed Bird.

“How, how is this possible!!!”

Who could tell him what was going on!!

Everyone, including the members of the battle club, looked at the baby ginseng that retracted its arm in shock.

What was that just now? How was it possible? That powerful skill... That powerful light-element skill... They had only seen it on White Brook’s Six-tailed Light Fox previously... No, Baby Ginseng’s move might even be stronger than a Six-tailed Light Fox of the same level!!

Was this a f*cking supplementary pet with the lowest battle power?

At this moment, all the new students who knew Shi Yu stood up and looked at the arena in disbelief.

A ginseng baby that could instantly kill an elite commander rank battle pet of the battle club?

Moreover, was it wood-element versus fire-element?

“This doesn’t make sense!”

“Yi...” In the face of everyone’s shock, Baby Ginseng enjoyed it very much. It endured the excitement in its heart and tried its best to make itself as” proficient “as Shi Yu at looking calm. From today onwards, the Ginseng towering emperor would stand tall on the ground, dictate the ages, and be invincible.. Mortals, let’s celebrate and be shocked!

Chapter 169: Giving You A Chance Is Useless

This was impossible, this was impossible, this was impossible!

Shi Yu was the first to go on stage. After insta-killing his opponent in one round, countless people muttered this sentence.

Zhang Qianyi and the others from Shi Yu’s batch looked at this commander rank “ginseng baby” in disbelief.

He couldn’t understand why a ginseng baby not only had combat power, but was also so ferocious.

The feeling that the beam just now gave everyone was that it was almost a crushing level of destructive power!

“It feels like an energy storage beam skill...”

Someone muttered, “Baby Ginseng can master the storage beam?”

“Bullshit storage beam, how can a storage beam have this power? Didn’t you hear him? This is a Light Clearing Cannon. It should be a special super skill that only a certain baby ginseng race can master... It’s just that I’ve never heard of it before.”

What a powerful Light Clearing Cannon. Countless people had learned something new.

“Is this the Beast Tamer of a big city?”

Why didn’t these pets follow the routine!

The Gu Master Miao Dongdong sat in the audience in confusion. This didn’t make sense. Where did Shi Yu get these pets that had mastered strange skills!

“There might be a top-notch skill teacher behind this Shi Yu,” a girl wearing a headband beside Miao Dongdong said.

“Skill teacher?” Miao Dongdong turned around.

“It’s very similar to the elders of our tribe. They have mastered many skill manuals. It’s a branch profession of the Feeder. The most powerful skill teacher in Dong Huang had managed to make one of their pets master a hundred skills,” the girl in the lead handkerchief said.

“A hundred?!” Miao Dongdong widened his eyes. This was a person?

“Her comprehensive ability strengthening talent can make it easier for pets to learn external skills of the race. There are also a few skill teachers in Ancient Capital University. Although they can’t reach that level, they all have their own secret manuals. You can save up some credits. When the time comes, ask them to help pets awaken deterrence in advance or learn other skills,” the girl in the lead handkerchief instructed.

“Forget it... I haven’t understood my pet race skill yet.” Miao Dongdong was speechless.

Everyone looked at the venue again.

Commander-level ginseng baby.

At this moment, everyone understood why Shi Yu could have commander-level battle power in advance.

As a supplement-type pet, even if the level was higher, the baby ginseng could feed the Beast Tamer’s physical recovery speed. In addition, it could provide supplements at all times. It was much easier for the Beast Tamer to withstand it than to withstand battle pets of the same level.

If that was the case, it could be understood. This was considered a kind of sneaky escape method, but not every Beast Tamer was willing to do this. Apart from Medical-type Beast Tamers, very few Beast Tamers were willing to nurture supplement-type pets.

Everyone completely didn’t expect that Shi Yu, the top scholar of the ancient capital, would actually choose a ginseng baby instead of a high-level battle pet... Shi Yu didn’t have any strengthening talent either. In theory, telepathy was one of the talents that didn’t consume physical strength the most. A supplement-type pet was completely meaningless to Shi Yu.

However, no one could say that this choice was bad, because this ginseng baby's battle power was indeed a little stronger.

"Not bad!!!"

In the training ground, Hong Xiao was the most embarrassed.

Right now, he only wanted to find a hole to hide in.

Heavens, Hong Xiao, what exactly have you done?

He actually let a new student torture him in public!

Senior Hong Xiao's face flushed red as he retracted the Flame Three-Headed Bird.

"Junior, next, I'll send out stronger pets and use my Beast Taming Talent."

His heart trembled, hoping to regain his composure in the next battle.

Hong Xiao admitted that he had been careless just now.

This mistake shouldn't have been made.

He already had a premonition that he would definitely be scolded by the president when he returned later!

It didn't matter if their strength was inferior, but losing because they underestimated the enemy was a huge taboo in the battle club!

"President, this Shi Yu..." On the platform, the other students of the battle club looked at White Brook.

White Brook shook her head. She didn't really understand, but it seemed that this ginseng baby was more abnormal than she imagined!

As expected of a pet recommended by Senior Lu!

As expected of a genius supplement that ate the Fruit of Life and didn't explode but instead evolved!

She didn't expect that there was actually a talent to master attack skills. Shi Yu had picked up a treasure.

"Remember, Hong Xiao underestimated the enemy. When he comes back, his training volume will double. Flame Three-Headed Bird, obeyed the Beast Tamer's wrong command and underestimated the enemy. Without its own judgment, it will increase by one level. The training volume will be super doubled." White Brook patted the table and said,

"Although Shi Yu has a lot of potential, he's only a new student after all. There's still one round. Give Hong Xiao another chance! This time, it's only a light punishment!"

"If this is the performance of the members of the battle club... What will the other new students think?"

The members of the battle club beside him didn't dare to say a word. They looked at Hong Xiao sympathetically. All the best. There's still one more chance. This time, give it a try... Seeing Hong Xiao lose so badly, they also felt ashamed.

At the same time.

On the venue.

After Hong Xiao toughed out the embarrassment, he summoned another pet.

“Roar!!!!”

The moment this pet appeared, a dazzling red light shot out of the arena, and a shocking hot wind spread on the ground. At this moment, the temperature of the entire arena seemed to have increased a lot!!

In the loud roar, Hong Xiao sent out a red dinosaur-type creature!

Its scarlet skin was like the combination of a lizard and a dinosaur. It had huge wings, a strong body, and a thick tail. This was a subspecies of dragon species with a weak dragon bloodline. It was a high class commander rank species, the Flame Dragon Lizard!

“Roar!!!” The nearly three-meter-tall Exploding Flame Dragon Lizard swung its thick red tail and stared at Baby Ginseng with its fiery red eyes.

“The Flame Dragon Lizard... he didn’t summon his monarch level trump card.”

Seeing that Hong Xiao’s second pet was still not his trump card, many students were stunned.

As one of the famous people in the school, many students were not unfamiliar with Hong Xiao’s configuration.

He had a pet of a low-level monarch race. That was the trump card!

But soon, they were relieved. This was only a recruitment assessment. Using an ace was too harsh.

Even if this Exploding Flame Dragon Lizard wasn’t Hong Xiao’s trump card, its strength was enough to be ranked second in his team!

[Energy Points]: 41,168

Beep... Beep... Beep...

[Energy Points]: 56,167

The energy value of this Exploding Flame Dragon Lizard quickly appeared in front of Shi Yu!

Although it was only a high class commander species, because it was a rare subspecies dragon species, its energy level was terrifyingly high, comparable to some low class monarch species with relatively weak energy points!

What was even more ridiculous was that in front of Shi Yu, the energy value of the Flame Dragon Lizard suddenly increased fiercely, quickly reaching 50,0006!

It increased by a whole 105,000!

It wasn’t a move that relied on external forces to erupt with stronger power, but...

Shi Yu looked at Hong Xiao and saw that red light had already spread around Senior Hong Xiao. His entire body was already wrapped in a red arc, and even his gaze was suffused with a faint fiery red. The Flame Strengthening Talent from the Beast Tamer was directly used on the Exploding Flame Dragon Lizard at this moment!

It increased the quality of the Flame Dragon Lizard's flame power, indirectly increasing the amount.

It made its strength increase by a full level!

Apart from the fact that it might not have super skills, its various qualities were already not inferior to low-level monarch species pets!

Boom!

The crazy heat wave made Baby Ginseng take a step back and reveal a serious expression.

If one were to say that the flaming three-headed bird just now was no threat to it...

Then this Exploding Flame Dragon Lizard, which had been strengthened by the Beast Tamer, was already qualified to heavily injure it!

Facing the other party's fire-element moves, even if Baby Ginseng had the source of life and healing skills, if it was hit, it would definitely not feel good. After all, the attribute restraint more or less existed.

"Strengthening Talent..." Shi Yu took a deep breath when he saw Senior Hong Xiao and the Exploding Flame Dragon Lizard erupting with all their might.

The reason why Beast Tamers' pets were stronger than wild ferocious beasts was partly because of careful cultivation, system, and science. On the other hand, it was because of the various talents of Beast Tamers.

The Exploding Flame Dragon Lizard was only a mere high class commander species. Under the enhancement of the Beast Tamer, its various qualities at the moment weren't much weaker than low class monarch races.

For people like Hong Xiao, their Beast Taming Talent development should be relatively poor.

After all, he was really young.

It was also by relying on various Beast Taming Talents that Beast Tamers could fight higher-level pets. Those titles of quasi-master, top-notch master, and top-notch legend actually valued the talent development of Beast Tamers more than pets.

The increase of a Beast Tamer was the key to determining whether a pet could fight above its level!

"Roar!!!"

Because it had learned from its teammate's mistakes, the Exploding Flame Dragon Lizard was very cautious at this moment. After it slowly took off, its gaze was always fixed on Baby Ginseng, waiting for the Beast Tamer's command.

At this moment, seeing the extremely calm Baby Ginseng reveal a serious expression, Hong took a step back and smiled.

He felt that he could do it again.

The only lesson humans learned from history was that humans didn't learn anything from history.

"Junior, you guys should attack first."

Hong Xiao planned to take revenge.

However, for safety's sake, glittering scale-like structures had already appeared on the smooth skin of the Exploding Flame Dragon Lizard!

Fire and Dragon Dual Attack Skill, Fire Dragon Scale!

It was the favorite of alternative dragons!

At this moment, the defense of the Exploding Flame Dragon Lizard was comparable to the Three-headed Flame Bird.

Clearing Light Cannon, come on!

At this moment, seeing that Hong Xiao "didn't underestimate the enemy" and was fully armed, many people nodded at the members of the battle club.

Yu Shu, the half Dragon Tamer, sensed the huge aura of the dragon lizard and recovered from the shock of Shi Yu.

"Shi Yu... This guy..."

"No matter how ridiculous and unscientific this ginseng baby is, it should end here."

"After all, this is an assessment for older students. Why would a new student like him join in the fun..."

"Moreover, he probably only has one commander, Ginseng Baby. This fellow got lucky. He definitely won't have it anymore." Yu Shu kept convincing himself. After all, the Ginseng Baby was only a supplement!

At the same time, on the venue.

"Alright." Shi Yu slowly raised his head.

He quickly analyzed it.

And gave Baby Ginseng an attack command.

"Sweet aura."

Buzz!

Shi Yu gave the order. Baby Ginseng brewed for a second. In the next moment, a huge pink gas bloomed from its ginseng flower!

If the previous Light Clearing Cannon had confused many spectators, then now, the audience didn't understand Shi Yu's intention!

Sweet aura?

Wasn't this a supplement-type skill to relieve fatigue?

Releasing this thing... was to relieve someone's fatigue?

His?

Yu Shu and the other candidates from Shi Yu's batch widened their eyes. They kept feeling that things weren't that simple.

Now, Baby Ginseng was like a supplement, but would everything be that simple?

"This isn't ordinary sweetness..."

A moment later, everyone suddenly realized that there was something wrong with this sweetness!

The problem was the spreading speed!

This didn't look like a wood-element sweet aura skill at all. Instead, it looked like a combination of light and wind!!

The moment the sweet aura was released, it rumbled. In the blink of an eye, the sweet aura spread and actually covered the entire arena and sky!

The Exploding Flame Dragon Lizard also stopped for a moment in the blink of an eye. It realized that the sweet aura had already lingered around and was even absorbed into its body!

The smell spread at a ridiculous speed. It might even be faster than the attack speed of the beam just now!

After the sweet aura reached transcendent proficiency, Baby Ginseng could casually control the speed at which the sweet aura spread. Now, the sweet aura at the Dao Proficiency level spreads at an even more ridiculous speed.

"What's with the sweet aura?" White Brook and the others frowned.

Under their gazes, the Exploding Flame Dragon Lizard directly inhaled a large amount of sweetness!

"Don't breathe!!!"

Seeing the Exploding Flame Dragon Lizard's nose wrinkle, Hong Xiao's eyes widened. He was not stupid, nor did he think that Shi Yu was a fool to take the initiative to help the enemy relieve their fatigue.

There was definitely something wrong with this sweet aura. He didn't plan to let the Flame Dragon Lizard absorb it with him, but before he could order it, the sweet aura entered the Flame Dragon Lizard's body at lightning speed!

"Roar!!"

The Exploding Flame Dragon Lizard blinked innocently. It was too much.

Moreover, it was just a little sweet. What did it matter? It didn't feel threatened at all. It even felt that the power in its body was even more active...

Buzz!

The Exploding Flame Dragon Lizard was still acting as if nothing had happened. However, in the next second, its wings suddenly stopped, and its eyes gradually turned red and chaotic. At this moment, Hong Xiao even felt that the mental connection between him and the Exploding Flame Dragon Lizard had been instantly broken by the chaotic and violent emotions produced by the Exploding Flame Dragon Lizard!

Hong Xiao's pupils were constricted.

As expected, something was wrong.

Everyone discovered the abnormality of the Flame Dragon Lizard.

"What's going on..."

Everyone was confused. Wasn't this ordinary sweetness?

Shi Yu and Baby Ginseng... What special strategy were they up to again?

"After inhaling that sweet aura, it will indeed relieve fatigue and the effect is very good. However, if the pet's state is already very full, it will produce a certain amount of excitement due to its special scent, falling into chaos..."

Shi Yu chuckled.

Apart from using the sweet aura of Dao Proficiency to simulate tempting auras, it could also be used to simulate some dangerous auras, such as the hypnotic aura, the stink, and the special scent that made life forms confused!

While letting Baby Ginseng take the plants like the gem mint to learn how to simulate the aura, Shi Yu also found many other plants.

One of them was called the "Flower of Chaos". It was a ferocious plant that relied on its aura to cause chaos in the energy of living creatures.

Now, with the abnormality of the Flame Dragon Lizard, everyone was stunned.

Damn.

It was indeed not a proper supplement pet.

Who dared to inhale this sweet aura?

Are you sure this is sweet gas, not poisonous gas?

Hong Xiao was also stunned. What was going on?

Idiot dragon, I already said not to inhale randomly. The other party put rat poison in the candy!

After Shi Yu finished explaining, Baby Ginseng had already thrown several Energy Fruits into the sky.

The Energy Fruit was thrown very high.

Moreover, it emitted an extremely tempting fragrance.

“Holy shit, what’s this?”

“It looks... like nutrition.”

“The racial skill of the ginseng fruit tree... is also a supplement skill.”

“Do you believe it? I don’t believe it... It’s probably not a poisonous fruit...” The audience was smart.

It had already realized that this was definitely not a proper ginseng baby.

However, although everyone realized it, the confused dragon lizard didn’t.

After the Flame Dragon Lizard in the chaotic state smelled it, it was like a hungry dog that had seen someone throwing bones. It drooled without any ability to think!

“Roar!!” It roared loudly, flapped its wings, and charged at the few fruits.

“Idiot, come back!!!” Seeing Baby Ginseng throw out the “nutritional supplements” right after spreading “sweet aura”, how could Hong Xiao still dare to let his pet come into contact with it? However, at this moment, under the extreme chaos, the Exploding Flame Dragon Lizard completely ignored the Beast Tamer, making Hong Xiao howl in anger.

“Wake up, don’t eat.” Hong Xiao was going crazy.

As he shouted, he saw that the Flame Dragon Lizard was about to touch the Energy Fruit.

He wanted to take back the Exploding Flame Dragon Lizard and change his pet, but it was already too late. The moment the Exploding Flame Dragon Lizard approached, these few fruits were already filled with white light.

With a thought from Baby Ginseng, with a boom, the fruit immediately changed in the sky!

The fruit first flashed with a dazzling white light, then a loud bang was instantly heard. Then, like an explosive, the light kept expanding and instantly swallowed the Flame Dragon Lizard!!

Everyone’s expressions froze again.

Hong Xiao’s gaze nearly exploded.

F*ck...

It could even f*cking explode?

This... this might as well be a poisonous fruit.

That was more scientific. When it was supplemented to the extreme, it would be poisonous. They accepted it!

However, the explosion was f*cking ridiculous!!!

“Holy shit, this power...” Someone covered his eyes.

At this moment, huge energy rushed out of the consecutive fruits. With a world-shaking bang, the rolling energy tide rose into the sky like an earth-shattering sandstorm, squeezing each other and overlapping!

The white smoke that was swept up with a bang swept up energy fluctuations. It was like enchanting white roses blooming in the sky, or like dazzling suns releasing strong light.

The strong wind could be clearly felt by every audience in the venue.

After the white light, countless people widened their eyes and looked at the dragon lizard in the “nutritional supplements” that exploded with a bang, their expressions stunned again.

Boom!!!

Under Hong Xiao’s confused expression, the Flame Dragon Lizard was smashed by the huge energy impact in the sky and fell rapidly. With a loud bang, its broken body appeared in the huge gravel pit that was born on the ground with a loud bang.

The energy level of the attack just now was several times that of the energy storage beam.

It directly tore apart the dragon scale of the Flame Dragon Lizard and heavily injured it.

The shocking change made the scene silent again.

“You guys...” Senior Hong Xiao’s hand trembled slightly, and he had yet to recover.

Sweet aura, nutrients?

Hahahaha, supplement pet, so good.

“Freak!” Zhang Qian, Miao Dongdong, and the others’ pupils constricted. They looked at the motionless ginseng baby rooted in the ground and found it even more difficult to understand!

“That ginseng baby, baby...” Yu Shu stuttered. Mom, what was going on!!!

His gaze was empty. The alternative dragon species was killed by two supplement skills?

Although he already knew that the ginseng baby was very strong in the first round, after Hong Xiao used his strengthening talent and sent out a stronger pet, the ability displayed by this ginseng baby was even more ridiculous!

This time, Yu Shu completely collapsed. His values were shattered.

Was Shi Yu still human?

The previous iron-eating beasts and green worm were already unscientific.

The new trump card was even more unscientific!

Sweet gas and nutrients could be used to attack?

On the platform, many members of the battle club watched this outcome with twitching mouths.

In the arena, the dragon lizard slowly crawled up with a blank expression. Although it didn’t lose its battle power, it didn’t look like it could continue fighting.

“Senior, do you want to continue?” Shi Yu’s voice sounded like a demon’s whisper in the ears of the stunned Hong Xiao.

His heart stopped. He wanted to send a monarch species pet to take revenge...

However, at this moment, a low voice came from the platform.

White Brook’s mouth opened and closed. Finally, after a long period of silence, she said, “Hong Xiao, come back here.”

“Shi Yu passed the assessment. Next.”

At this moment, many members of the battle club looked at the crying Hong Xiao and felt uncomfortable. Little Hong, oh Little Hong, the president gave you a chance. You guys didn’t treasure it...

However, one way or another, this Junior Shi Yu... No wonder the president thought so highly of him. They looked at Baby Ginseng, who had a calm expression and looked rather strong. They were speechless. That baby ginseng should be Shi Yu’s current trump card. This strength was indeed not inferior to ordinary battle club members.. They were only in their first year!

Chapter 170: Beast Ear Lady’s Hope

“Is it over?”

Upon hearing the beast-eared girl’s words, Shi Yu planned to stop fighting.

Shi Yu originally thought that he would still need Eleven for the battle club’s assessment, but he didn’t expect it to be resolved with Baby Ginseng.

It was mainly because the senior was too kind. The first round gave him enough time to store energy, and the second round gave him enough time to compress the sweet aura and release it...

Baby Ginseng was overjoyed. Defeating two powerful enemies in a row made it feel proud in front of so many people!

It, the battle ginseng, was invincible!

Supplements would never be a slave!

No one would dare to drool at it!

“Yi!!!”

Baby Ginseng’s roar, which was just about to expand, was stopped when it was immediately retracted by Shi Yu.

“Then, Senior, I’ll go down first.”

Shi Yu said to the confused Senior Hong Xiao.

"I # @% @." Hong Xiao didn't know what to say.

"Junior Shi Yu, please register at the platform too. The assessment will continue."

At this moment, White Brook's voice sounded from the platform.

Shi Yu was stunned before nodding and walking towards the platform.

At this moment, as they watched Shi Yu leave, the candidates who were in the same batch as Shi Yu had dazed expressions.

Shi Yu... had directly become an official member of the battle club?

And they still had to wait for the assessment of the reserve members?

Damn it!

However...

"This guy is so strong."

"Where did this ginseng baby come from?"

"Is it a mutant contracted from some ruin?"

Countless people had mixed feelings. It was no longer a secret that Shi Yu had cracked the two major ruins.

And ruins were equivalent to other hidden spots and ancient inheritances.

It was said that Shi Yu's Green Silkworm and Iron-eating Beast had obtained benefits from the ruins he had cracked.

The green worm obtained the illusion ability in the Ping Cheng ruins, awakened a special bloodline, and broke the racial restrictions of the green worm.

The Iron-eating Beast had obtained the inheritance cultivated by the ancient Iron-eating Beast and had unlimited potential. There was still a possibility of going further.

Then what about this ginseng baby?

Don't tell them that Shi Yu accidentally cracked a ruin again and made the supplement-type pet take charge!

"Sister, I want to learn archeology." Miao Dongdong looked at the girl beside him.

The girl frowned. "Our Gu Master lineage should just be thrown away then?"

Miao Dongdong : "..."

At this moment, countless battle faculty students recalled what the trump card specialization of Ancient Capital University was.

They were restless and had the thought of changing their major.

They felt that the battle specialization... had no future.

...

“You guys continue hosting.”

On the platform, as Shi Yu came over, White Brook threw the recruitment mission to the other members and pulled Shi Yu, who had just arrived, to the back.

Backstage, she observed Shi Yu from left to right, as if she wanted to see through him.

“Senior, you’re so strong...”

Shi Yu sweated. He felt that his physique, that didn’t lose to any master-level Beast Tamer... was actually not as strong as the petite beast-eared senior.

She had yet to transform.

“Beast Tamers with Fusion Talent generally have higher physiques,” White Brook said.

“I know, I know,” Shi Yu said. “When trained to the extreme, it should be like Emperor Wu. Even if it doesn’t fuse, you can still tear apart ferocious beasts with your bare hands, right?”

“Yes.” White Brook nodded and said, “Emperor Wu is the common goal of all Beast Tamers with our Fusion Talent.”

Emperor Wu, another legendary Beast Tamer after Emperor Shi.

After the Dong Huang Dynasty established by Emperor Shi collapsed for unknown reasons, many expelled totem creatures returned. The Dong Huang Continent continued to be in war for many years, and the people everywhere were plunged into misery and suffering.

However, heroes always appeared in troubled times. At this moment, a Beast Tamer with Fusion Talent completed the unification of Dong Huang Dynasty again, expelled the totems, and established the second generation of Dong Huang Dynasty.

Legend had it that when he cultivated his physical body to the extreme, he became the human with the strongest physique. He completely relied on a pair of fists to defeat a group of totem-level creatures.

With such a legendary figure, the Beast Tamer with the combination talent naturally became a goal for people like White Brook.

Shi Yu was also very curious. Was the Fusion Talent giving that Emperor more physical strength, or was the skill index giving Shi Yu more physical strength?

“Stop talking about me. What’s wrong with you?”

White Brook originally planned to let Shi Yu become a reserve member first. Who knew that Shi Yu would give her such a big shock?

“What’s going on? You mean Baby Ginseng?”

“As expected of a pet recommended by Senior Lu. Its potential is really too great.” Shi Yu praised. “This mutated ginseng baby has unlimited potential. Perhaps, it can break the racial restrictions of supplement-type plant pets and become an all-rounder!”

As Shi Yu finished speaking, White Brook had a look of agreement and worship in her eyes. “As expected of Senior Lu.”

Shi Yu :” ...”

Damn, bootlicking!

“Cough.” White Brook coughed dryly and said, “Then your current strength...”

It had only been half a month since the vocation assessment ended. She originally thought that even if Shi Yu’s strength had improved, it wouldn’t be so fast.

But after just now, she suddenly couldn’t be sure.

She wanted to ask Shi Yu personally.

“You saw the battle power of the Mutated Ginseng Baby just now. It has already reached commander rank. Its current battle power should be comparable to a monarch race commander rank pet.”

White Brook’s eyes turned solemn.

Was Shi Yu’s evaluation of this ginseng baby so high?

It had to be known that whether there were super skills or not was a huge dividing line for pets.

“The Green Silkworm has already turned into a cocoon. After completing its evolution, I estimate that it won’t be weaker than the ginseng baby, nor will it be inferior to the monarch race.”

[Ginseng Baby:???)

“The Iron-eating Beast has already evolved and also broken through to commander rank. Its species rank is close to the overlord race.”

“It’s my trump card now.”

[Ginseng Baby: QAQ]

“Fortunately, I contracted the ginseng baby. Otherwise, it might be a little difficult for them to evolve.”

[Ginseng Baby: Uncool! When will I evolve!]

“That’s about it. I passed the Intermediate Beast Tamer assessment two days ago.”

“Unfortunately, the level of the Beast Taming Space isn’t high enough. Otherwise, I should be able to take down the high-level license along the way.”

When Shi Yu saw White Brook ask, he simply told her.

It wasn’t any valuable information, because Shi Yu felt that this information would probably be overturned a month later...

“...” At this moment, White Brook was already speechless. She looked at Shi Yu in disbelief.

The growth trajectory of everything was extremely reasonable. In her opinion, it was inevitable that the Green Silkworm and the Iron-eating Beast would evolve.

However, White Brook didn't expect Shi Yu's execution ability to be so high. Moreover, after completing all of this, Shi Yu's strength would change so drastically.

In that case, that ginseng baby was actually the last pet in Shi Yu's team??

“You... you... you...” White Brook fell into deep thought.

She looked at Shi Yu again and felt that at this rate, in less than a year, Shi Yu's strength in the battle club would be at the top?

This year, could Shi Yu fight in the National League? A first-year student participating in the National League?

She didn't choose the wrong person!

White Brook's mood brightened.

“In short, welcome to the club. I won't give you the specific benefits of being a member.”

Shi Yu: “?”

“Don't worry, it means that you can use the school's training facilities as you wish. The club will reimburse you and give you the greatest amount of resources.”

“The training facilities in the school can all be very useful to the growth of the pet. Some of the facilities require a huge amount of energy to be activated. It's more expensive than providing food and nutrition to the pet. This is the greatest spending place for every student in the school.”

“Your mission is to not have any worries. Use these training facilities as soon as possible to cooperate with your ruins space and support your pets to become stronger,” White Brook said.

“When it's almost the holidays, I'll take you to see the world. Moreover, at the end of this year, you should also participate in the National League. The results don't matter. It's mainly to train for a year first, and then see if your strength has reached the standard to take over the club.”

“I don't believe that you can't take even one national championship in four years of university.” White Brook shouted.

In her opinion, Shi Yu's starting point was even more perfect than Senior Lu.

At least, before Lu Qingyi graduated from university, she had never cracked any major ruins or obtained any substantial benefits from them.

However, Shi Yu was different. He had started to show his talent at the rookie stage.

Every ruin he cracked had a huge increase in his strength.

This was a crushing advantage for young people in their twenties.

"Is it that urgent?" Shi Yu scratched his face and said.

However, the club benefits were alright.

Ancient Capital University had a charging room for thunder-element pets. It seemed that Eleven would have a place to freeload in the future. He could use this Inner Power often.

"Of course. Every step is slow. It's always right to quickly increase your strength," White Brook said.

"Alright." Shi Yu nodded. He didn't know if he could match a master-level Beast Tamer in a year.

In his opinion, if he wanted to participate, he should get first place. Otherwise, he might as well not participate.

"Where are we going during the holidays?" Shi Yu asked.

"The exchange match," White Brook said. "In order to warm up the National League, there will be a certain amount of communication between schools at various times in a year. It's our turn vs Imperial Capital University this year. When the time comes, I'll take you to the Imperial Capital to take a look."

When White Brook finished speaking, Shi Yu's expression froze.

Holy shit.

He kept shouting about sweeping through Imperial Capital University and Imperial Capital University... Was this retribution?

He was just casually thinking about that...

"Don't worry. Usually, in such an exchange match, master-level students won't take action." White Brook patted Shi Yu's shoulder and said, "I won't talk to you anymore. The recruitment assessment still has to continue."

Shi Yu: "...Then I'll go back first."

"Aren't you going to continue watching?"

"No." Shi Yu shook his head and said, "I still have a bunch of things to do over there."

"Besides, we still have to go to the heroic spirit ruins to train in two days. I have to prepare in advance."

"Heroic Spirit Ruins?" White Brook thought of something and said, "The one with Emperor Shi?"

"Yes."

"I've also been there. Unfortunately, the heroic spirit that responded to me doesn't match my aesthetic taste. Although it's a big disappointment, I let it go back again." White Brook sighed and said, "And I don't want to fuse with the undead either. It's strange. How good is a furry pet, right?"

Shi Yu : "..."

You are indeed obsessed with looks.

However, it was true that White Tiger Mother, Fox Tail Lady, and Cat-eared Lady did indeed sound a little Yang Realm compared to “half human, half ghost” and “female ghost”.
