

Beast 191

Chapter 191: Three Months

He had originally wanted to progress slowly and defeat at least three elites of the Ancient Capital University.

It was best to fight with the president of the battle club of the Ancient Capital University.

But it was over before it even began.

He didn't expect that he couldn't even defeat a new student.

Although the teachers of the Ancient Capital University said that this new student was very strong, it couldn't change the fact that Shiyu was a new student!

"No wonder Father couldn't get into Donghuang University..."

With this in mind, Fu Di'an left the university.

At the Battle Club training hall.

After Fu Dian left, Dean He couldn't help but secretly wave his old fists behind his back.

Good!

Shi Yu, well done.

White Brook, well done.

So what if Shiyu was an archeologist? Wasn't he still obediently helping the rise of the battle club!

"Hahaha, not bad."

Dean He ran over and patted Shiyu's shoulder. "As expected of you."

Among commander ranks, unless one encountered a true overlord race opponent or an even more insane beast taming talent, Shi Yu, this Nine Li Battle Beast, was invincible in solo battles.

"Thankfully, the other party was countered," said Shi Yu modestly.

"No need to be humble. Try to reach the Master level in two years. When that time comes, White Brook, Xu Ze, and the others will graduate. The future of the battle club will be up to you."

"I'll try my best." Shi Yu smiled.

Dean He was satisfied. If it was possible, they would be so powerful!

He nodded silently. A Master Beast Tamer in his early twenties had the potential to become a legend under the age of 30!

He was even more outstanding than Lu Qingyi back then!

“Damn it.” Many freshmen and senior students were silent. There was nothing to say.

At this moment, seeing how fierce Shi Yu was and realizing that the baby ginseng was nothing compared to the evolution of this iron-eating beast, the elite of the Battle Club fell into deep thought.

If Shi Yu challenged them and wanted to increase his ranking in the battle club, what would they do? Would they be beaten up?

As for the new students, they had completely given up on the idea of surpassing Shi Yu in the short term. There was still time in the future, so they wanted to see if there were any fortuitous encounters in the future...

...

After Fu Di’an left, half the people in the battle club dispersed.

After feeling bored, Shi Yu brought Eleven back.

“Unfortunately...” When it returned, Shi Yu could not help but sigh.

That Furian’s pet didn’t have any skills that were very worth replicating.

Lightning and White Thunder were pretty good.

When lightning was trained to a very high level of proficiency, it could mobilize natural lightning to a large extent and produce stronger attacks.

In the future, using this move in the wild along with charging lightning to recharge itself was pretty good, but it could only be said to be promising in the future. It was useless at the moment.

After all, the skill column didn’t have enough space. Eleven hadn’t reached the point where it had to learn lightning. Its racial skills weren’t maxed out yet, so how could he have the time to learn other skills?

Besides, lightning was a high-level skill among lightning-type pets. Any random lightning-type pet in the university could master it. There was no need to be anxious.

As for White Thunder, as a super skill of the thunder family, it was similar to Purple Thunder. It was pretty good, but one of the reasons was that this move didn’t belong to a pet, but was instead Fu Dian’s Beast Taming talent. It couldn’t be replicated. Another reason was that White Thunder had to match the light family and wasn’t compatible with Eleven.

Shi Yu was puzzled. Wasn’t there any Metal or gold Divine Lightning?

It didn’t seem like it...

He could only see if there were any super lightning that matched the metal element in the future.

“Hmm.” At this moment, Eleven leaned on Shi Yu’s shoulder and asked him if it could go to the gravity room.

“Go, go!” Shi Yu said helplessly. “Remember to come back early.”

“Oh, oh, oh!” Eleven was excited.

“By the way, starting next week, the battle club will probably start the social ranking competition every weekend. Are you interested? I’m not interested anyway. If you have any thoughts, go ahead.”

Eleven’s eyes lit up. No problem.

Shi Yu nodded. Since Eleven was full of energy, he decided to give it more combat missions.

It was not a bad idea to let Eleven meet the elite pets of the battle club every weekend.

“Of course, evolution is too easy. If you want to participate, fight in a reserved state.”

“Mainly increases battle awareness, battle experience, and battle will. Such actual combat experience can also be higher. Otherwise, it would be meaningless to instakill.”

Eleven:???

Was being beaten interesting then?

Eleven covered its mouth with tears. Shi Yu wasn’t the one getting hurt! Let Baby Ginseng go then!

...

At the same time.

Somewhere in the ancient capital.

After returning to Dong Huang, Fu Dian’s father visited an old friend.

In an elegant ancient-style house, Legend Fu and Legend Yin drank the bitter tea from the mystic realm and discussed their children.

“He inherited your talent. Not bad. That son of mine inherited his mother’s talent.”

“But thankfully he did. Otherwise, if he inherited my defective talent, the path would be difficult.” Fu Chuan shook his head.

“Your talent isn’t defective. It’s just difficult to develop.”

“In comparison, my Beast Taming Space Enhancement talent has encountered a similar bottleneck. I’ve already felt its drawbacks.” Legendary Yin sighed slightly.

Even if he could contract high-level pets in advance and contract many pets, it wasn’t practical.

When everyone reached the Legendary level, would there still be Mythical races and Mythical pets who would contract with them in advance to enhance their talent in the Beast Taming Space?

No...

At that time, the advantage of this talent would only be the ability to contract double the number of pets of the same level.

However, a double number of pets might not be very good, because the resources for training had to double as well. The same resources were invested in one pet and different pets. It was hard to say which was more cost-effective.

A totem level monster couldn't be defeated by numbers.

"I wonder if Zheng Fan can break the limit of this talent." Yin Legend continued to drink his tea and said.

"You just said that he went to Imperial University, right?" Fu Sheng asked.

"Mhm." Yin Chuanqiu nodded and said, "Because he lost to someone else in the vocation assessment, he must be competitive."

"There's actually someone who can defeat your son in the early stages..." Fu Chuan was surprised.

Beast Taming Space talents were strong in the early stages.

"Let me take this phone call. It's from my child."

At this moment, Fu Chuan's phone rang. After gesturing to Legend Yin Zhongrong, he picked up the call.

"It's over?" Fu Chuan received a call from his son. He was very surprised. So fast?

"Dad, you're right. Donghuang's Beast Tamer is too strong... I... I couldn't even beat the new students of Ancient Capital University. I lost the first match..."

"?" Fu Chuan fell into deep thought.

Are you kidding me?

It was fine if he couldn't beat a master, but what was the big deal if he couldn't beat a new student?

"Who is he..."

"A Beast Tamer named Shi Yu. I heard that he's the top scorer of this year's professional assessment, and even an archeologist... And it's even a talent in telepathy... and it's even an intermediate level..." Fu Dian's tone trembled slightly. He didn't believe it himself when he repeated it.

A moment later, the call was hung up.

"Where were we talking about just now?" Fu Chuan suppressed his confusion and looked at Yin Chuan.

Yin Chuan said, "We talked about how my son lost to a Beast Tamer named Shi Yu in the vocation assessment. Because he wanted to surpass Shi Yu too much, he ran to Imperial Capital University to train himself."

"Your son was also beaten by Shi Yu?" Fu Chuan was stunned.

Legend Yin: "?"

...

After this battle, Shi Yu's strength was finally not just tacitly understood among the new students...

But the older students of Ancient Capital University also knew of Shi Yu's abnormal strength.

Two days later.

The beast-eared girl returned to the university.

She looked at the three little iron-eating beasts that Ten brought to train every day and fell into deep thought.

1

Was the iron-eating beast that strong...

Although she had previously overestimated Shi Yu's strength, this time, after watching the training hall's battle recording screen, she directly refreshed her understanding of the Iron-Eating Beast's evolution form.

Otherwise, she would consider contracting one. After all, evolutionary materials were not expensive.

Why not talk to Senior Lu? The two of them could have one each and raise them together?

They were cute and had good potential, so why not raise them!

"Senior Sister Lu!!!"

[Lu Qingyi: Don't disturb. Next pet, possession type undead!]

1

At this moment, Shi Yu was already leisurely starting his peaceful university life again.

Lessons, points, studies, meditation, sleep, rice...

4

The life that was repeated every day seemed to have brought Shi Yu back to Earth's student era.

He had been waiting for the Butterfly Meeting that Senior Li mentioned, planning to use it as a stage for the evolution of Buggy.

This meeting could firstly increase its evolution potential, and secondly, Shi Yu couldn't miss the opportunity to come into contact with a guardian-level creature

However, this meeting gave Shiyu a huge surprise.

Because Shi Yu had waited for three months.

He waited until his scalp was itching, until Buggy was stressed.

Although news of the Butterfly meeting appeared one after another during this period, it was only today that it was completely confirmed that it would be held in Divine Capital in a week.

"I've waited so long. It's so bitter."

Shi Yu stood on the balcony of the student villa, blowing the wind and looking at the blue sky.

As for how bitter it was, one could tell from Buggy's expression.

On the balcony, Buggy, who had long absorbed the power of the evolutionary materials, was lying on a baby chair, swaying its body with a Buddhist expression on his face.

From initial excitement to later impatience, to now having a heart as calm as water. One could imagine the psychological changes that Buggy experienced.

Perhaps this was the most precious treasure during Buggy's evolution?

As for Shi Yu, he looked into his Taming Space.

In three months, he had already reached quasi-fourth level in the Imperial Beast Space.

99% of the crystal color of the spatial barrier turned green. He would be able to advance to a high-level Beast Tamer immediately and obtain the fourth contract slot.

Counting the time, it would only be two to three days.

And this result, apart from three months of bitter cultivation, naturally had to do with a large number of sachets and Ethereal Stones.

The dozens of Ethereal Stones he had obtained from the ruins had long been used up. If it wasn't enough later, he would still have to borrow resources from the Gem Cat.

Nothing major happened in these three months.

Originally, Sister Panda had planned on coming to the Ancient Capital University to let Shi Yu help her iron-eating beast enhance its hardness.

However, considering that there was still a pile of missions at the farm in Ping Cheng, and that Shiyu might still have to attend classes at the moment, she was also busy with her studies. In the end, she didn't come and chose to make an appointment with Shiyu during the holidays.

Just like that, Shi Yu peacefully spent three months.

Of course, it might not be a big deal for the Ancient Capital University.

In the past three months, apart from the increasingly profound rumors of the training of the Mad Demon Iron-eating Beast and the best student Ginseng Baby, there was no other news about Shi Yu. However, it was not calm at all for the team.

Three months... Even if Shi Yu only took out one-third of his time to add points every day and shared the additional points with the three pets, Eleven and the others had undergone a complete change!

For example, none of the skills below super level were below perfect proficiency.

In order to empty the skill column, Shi Yu even maxed out and deleted low-level skills.

"Continue sleeping. When Eleven and the others return and wake up with Chi Tong, let's have a short meeting and prepare to go to Divine Capital," Shi Yu said to Buggy.

"Ji..." Buggy's telepathy sounded, and its eyes lit up.

Shi Yu chuckled and continued to return to his bed. He picked up the ruin ring and prepared to meditate, hoping to break through in the next two days and contract Chi Tong first.

At that time, with the four contract spots added to his body, Buggy would evolve and take off directly! It had been holding it in for three months to accumulate strength, and it could no longer tolerate it!

Let's go to the Butterfly God!

Chapter 192: First Team Meeting Plan

Not long after, Eleven and Baby Ginseng returned.

Eleven, who was about 0.4 meters tall, pushed the door open.

In these three months, with the enhancement of proficiency, Eleven's size for training was no longer one meter.

According to unscientific experiments, 0.4 meters was the best condition for its current training efficiency and restraint.

This state was purely cute.

Handsome value -10, cuteness+10.

"Mm!"

With the electromagnetic levitation in hand, Eleven didn't have to worry about movement difficulties.

When he returned, Eleven flew to the fridge and took out a bottle of bamboo juice.

After drinking it, it smiled in satisfaction.

"Ha..."

Beside Eleven, Baby Ginseng, who was also about 0.4 meters tall, was also holding a bottle of frozen soda.

After taking a sip, it revealed a refreshed expression.

Nothing could be happier than drinking a cold drink after training and learning!

"Meeting, meeting, meeting!!!"

After Eleven and Baby Ginseng were done, Shi Yu's voice suddenly sounded in the huge student villa.

The two pets were stunned. They immediately obeyed the summon and ran over.

Moments later, four pets surrounded Shiyu, who was sitting on the bed.

Eleven hugged the bamboo juice.

Baby Ginseng hugged its soda.

Little Chi Tong hugged the ice.

Buggy lay on the bed like a patient.

They looked up at Shi Yu. What was it?!

“It’s nothing. I’ve decided to leave for Divine Capital in three days. Prepare yourselves.”

“Eleven, change your training plan.”

“Baby Ginseng, go and apply for leave too.” Shi Yu pointed at the calendar.

“Roar!” Eleven agreed!

It could train anywhere!

However, before leaving, it had to leave enough training missions for the three little iron-eating beasts. This was the most important thing.

“Yi!!”

Baby Ginseng also said that there was no problem. It had already finished its preparatory lessons for this semester, so it wasn’t a big problem to miss a few.

“That’s good.” Shi Yu chuckled.

“Then I’ll talk about something else.”

“You’ve improved quite a lot in the past three months, right?”

Eleven, Buggy, and Baby Ginseng revealed unquestionable expressions.

With the nutritional supplements of the ginseng baby and Shi Yu’s physique improving, the efficiency of time and space would increase exponentially.

These three months had made Eleven, Baby Ginseng, and Buggy beautiful.

For example, Eleven and Baby Ginseng had already reached the battle power level of a “quasi monarch”.

Their energy level had reached more than 100,000, and both had mastered a high-level profundity. They could probably exchange a few moves with ordinary monarch level battle power alone and wouldn’t be defeated too quickly.

Ordinary Monarchs referred to the weakest Monarchs with an energy value below 1,000,000 and ones that hadn’t mastered super skills or high-level profundities.

Of course, Eleven and Baby Ginseng were not sure how far they could fight. After all, they had never really fought.

“Ji...” On Buggy’s side, it muttered to himself.

Although it was in its cocoon form and didn’t have high combat power, it should be able to surpass Eleven and the Ginseng Baby after evolution, right?

Its energy value had increased by more than 10,000 compared to when it first turned into a cocoon!
40,000!

If it were to triple after evolution, it wouldn't be inferior to Eleven and the ginseng baby.

After three months of accumulation, Buggy believed that it wouldn't be weak after evolution.

Buggy had finished absorbing the evolutionary power two months ago and could break out of the cocoon at any time.

However, in order to wait for the so-called Butterfly Meeting, Shi Yu and the others forcefully endured for nearly three months.

This was also the reason why Buggy was so calm now.

Its Dao heart had been tempered steadily.

In the cocoon state, apart from the evolutionary nutrition that came with it, the efficiency of the insects absorbing nutrition from the outside world was not high.

Apart from adding points.

The additional points of the skill index could perfectly transform the power of Time and Ginseng Baby into skill proficiency, increasing the evolutionary foundation of Buggy.

Therefore, in order to let Buggy evolve with a super invincible foundation, Shi Yu's main target for these three months was Buggy.

Although he had added Eleven and Baby Ginseng many times, Buggy was undoubtedly the most favored during this period.

Even if the impact of non-racial skills on attributes was inferior to race skills, it still depended on how far Shiyu had added.

Now that he was covered in level skills, Buggy was still very willing to believe that it would be invincible very quickly after evolution.

Eleven was confident because of the high intensity training.

Baby Ginseng was confident because it had studied a few secret trump cards that could suppress Eleven and Buggy through knowledge.

As for Buggy, it was confident because it was about to complete the strongest evolution.

The three pets were full of confidence.

However, although they were very confident in their strength, they actually didn't know much about their teammates' strength.

In these three months, the three pets had almost no chance to communicate and fight.

Buggy was nourishing its body, and Baby Ginseng was researching secret weapons. Eleven was using the training facilities of the Ancient Capital University to train.

Whoever had the best enhancement effect... If they didn't spar, even Shi Yu couldn't analyze it 100% correctly.

"Seeing how confident you are... How about this..."

"Remember the 'team internal competition' I mentioned previously?" Shi Yu grinned.

Eleven, Bug, and Baby Ginseng looked up at the same time with serious expressions.

Could it be...

"When we return from Divine Capital and Buggy evolves, let's hold an internal team competition..."

"At that time, I'll give you a rank for your combat strength."

"Let me think. Since it's a competition, there must be a reward."

"I wonder when I can teach super skills..."

"The reward for the first meeting will be this. The winner will be rewarded with a super skill. How about that?" Shi Yu smiled faintly.

"At that time, the type of skill will be an attack skill. As for a support skill or whatever, you can choose for yourself."

"This is the benefit of the strongest."

"Ying!" "Ji!" "Yi!" Eleven, Buggy, and Baby Ginseng's eyes turned red.

Super skill!

Up until now, only Eleven had mastered the ability to hold back, while Baby Ginseng had only mastered the source of life.

These two super skills were undoubtedly their current core abilities.

Although the proficiency was only at the beginner level, the power of super skills made all their tactics revolve around those skills.

Eleven's explosive strength that exceeded the limit, Baby Ginseng's powerful self-healing and supplement effects, were all because of super skills.

They naturally knew that super skills were good stuff.

And Buggy without a super skill... Although it felt that it could also awaken after evolution, it wouldn't complain about too many super skills.

The reward of a super skill made the three pets excited.

This was the effect that Shi Yu wanted.

Buggy glanced at Eleven and the ginseng baby, calculating how far it had to evolve to defeat them.

The leader of the team had been sitting on the throne for too long. It was time for this empire to change hands.

“Yi...”

Baby Ginseng pushed its glasses. The team meeting, the chance to test his learning results, was finally here.

it didn't know if the anti-Eleven Energy Fruits and Anti-Buggy Energy Fruits it had secretly studied would be effective.

“Wuu...”

Eleven was originally quite excited and planned to use an interesting skill, but suddenly, its body trembled.

It felt an unknown gaze.

Eleven quickly turned around and saw Baby Ginseng whistling as if nothing had happened. Buggy was also lying quietly without any ambition.

Eleven fell into deep thought and rubbed its head.

At this moment, only Little Chi Tong was confused.

“Mi ~”

Team internal competition, super skills. What were those? Could they be eaten?

With three super skills, it had always been like a bystander when Shi Yu spoke.

“Are you participating?” Shi Yu smiled at his daughter.

[Name]: Sword Spirit (Chi Tong)

Attributes: Spirit, Fire

Race Level: High-Level Overlord

< Name > Iron-eating Beast

1

[Skill]: Soul Slaying (Initiate), Possession (Initiate), Light Flame Sword (Initiate), Interlocking Sword (Initiate), Sun Flame (Initiate), Spirit Dissection (Initiate)

Energy: 2000

1

For the past three months, Shi Yu had never let Little Chi Tong train.

Although he didn't receive any additional points or do any training and only ate normally every day, Little Chi Tong was also about to break through to the transcendent level. Shi Yu couldn't help but sigh at the power of a high-level overlord race.

Moreover, its energy level could already break commander races...

So strong...

However, compared to the battle power of Eleven, Baby Ginseng, and Buggy, it was definitely still much weaker.

It was the same even if it broke through to the transcendent level... Unless, if it possessed him, his battle power would increase. It was equivalent to the combined power of Shi Yu and the Sword Spirit.

“Mi ~!!!”

After Shi Yu spoke, Little Chi Tong’s eyes lit up (its sword light flickered).

It also sounded very interesting. Then it would participate and take a look.

Buggy and Ginseng Baby: “!!!”

Although they didn’t know what had happened, it seemed that no matter what happened, they wouldn’t be at the bottom?

They looked at Shi Yu. Were they really going to let it participate?

“Well... it’s not impossible.”

After some thought, Shi Yu said, “Then, when the time comes, you can possess me. We’ll participate in the battle together!”

In this case, he had to study it carefully. At the very least, he had to quickly nurture Little Chi Tong to transcendent and near commander rank.

The possession skill had to be increased too.

At that time, he would probably break through to the high-level Beast Tamer level and contract Little Chi Tong.

With the upper limit of his physique at that time, it shouldn’t be any pressure to control the transcendent sword spirit of the overlord race.

This decision was also because Shi Yu suddenly recalled what the beast-eared girl said about the martial arts conference.

It sounded very interesting. At this kind of meeting, if the Beast Tamer personally fought, he shouldn’t be regarded as an anomaly, right?!

It didn’t matter if the reward was there or not. It was mainly because Shi Yu’s hands were itchy.

He had finally contracted a biological daughter sword spirit. It was a pity to spoil it as a mascot!

Let’s fight together!

“Mi ~!!!” Little Chi Tong let out a happy voice and immediately ran over to stick to Shi Yu.

Shi Yu’s words made Buggy, Baby Ginseng, Eleven, and the other pets fall silent.

What!! Shi Yu wanted to participate too?!

What the hell?

If they beat up the Beast Tamer together, would there still be super skills?

Chapter 193: Third Breakthrough

After Shi Yu revealed the subsequent trip to Divine Capital and the team's internal meeting plans, every pet was excited.

Eleven and Baby Ginseng worked even harder for new super skills.

Buggy's daydreaming became more and more serious.

Only the little sword spirit was still lying in the ice without any worries and watching cartoons.

Little Chi Tong: "Beautiful Swordsman" is so beautiful!

Just like Shi Yu, he could transform.

Moreover, he could change instantly!

The little sword spirit thought about it. What could it do? After possessing Shi Yu, could it also change him?

At this moment, Shi Yu also made the final sprint.

Meditation!

He was about to strengthen the Beast Taming Space to level four. He needed one or two days.

This was also why Shi Yu decided to leave in three days.

Only when his level reached the standard would there be no accidents where Buggy evolution was too fierce while the Beast Tamer was too weak, unable to stimulate all its potential.

After all, after the worm evolved this time, it was very likely to be at the overlord race's commander level. Shi Yu relied on the current level-three Beast Taming Space and the level of an intermediate Beast Tamer to maintain the contract. It was very difficult.

But if he advanced to a high-level Beast Tamer, it would be much better.

...

Two days later.

The color of Shi Yu's Beast Taming Space Crystal Wall completely turned green.

Colorless, gray, white, green, blue, purple... Green corresponded to the fourth level of the Beast Tamer, advanced Beast Tamer.

Under normal circumstances, he could perfectly control commander rank pets!

If he took another step forward, he would be a master-level Beast Tamer.

This was another challenge.

During the process of strengthening spatial levels, there were different levels for Beast Tamers from level three to four, from level four to five, from level six to level seven. The difficulty was very high.

Because the difference between level four and level three was whether it could control commander-level pets.

The difference between level five and level four was whether it could control monarch-level pets.

Level-seven... was the overlord level pets.

Shi Yu used a total of three months to go from level three to level four under the enhancement of the five buffs from the ruins meditation technique, Calming Heart Concentration Sachets, Ethereal Spirit Stone, super physique, pet breakthrough, and evolution feedback!

This time was very fast, but also very slow.

Compared to other Beast Tamers, it was naturally very fast, but with Shi Yu having so many buffs, it seemed very slow.

Although Shi Yu had too many things to do and didn't spend most of his energy on meditation...

However, if he continued with this efficiency, Shi Yu thought for a moment. It would probably be even harder to break through to the master level.

It was at least five times the current time, which was... fifteen months?

"Monarchs and commander ranks are completely on different levels. With Eleven and the others' races, after breaking through, their energy values will be in the millions. Even with the ginseng baby, no matter how strong my physique is, if I'm restricted by the contract, Eleven and the others probably won't be able to break through to the monarch rank before I become a master."

If he forcefully broke through, it wouldn't be as simple as Shi Yu being squeezed dry. Instead, the contract would automatically break. The Beast Taming Space would shatter and fall. Shi Yu would suffer a backlash and suffer a huge blow to his vitality. It was serious and might even endanger his life.

Shi Yu's expression darkened when he thought of that situation.

"My speed is still too slow."

"Looks like I have to increase the proportion of meditation time. In addition, the Ethereal Spirit Stone should be exchanged for other high-level spatial resources."

For example, the root of the Grotto-Heaven Tree, one of the evolution materials of the worm, could strengthen the Beast Taming Space. However, it was worth hundreds of millions. Ordinary people really couldn't afford to use it.

However, if he couldn't afford it, Shi Yu had to buy some.

If he continued to increase points and meditate like this, Shi Yu felt that he would be the first Beast Tamer to suddenly die because he cultivated his pet too well.

2

This was too tragic.

“Wu...” After breaking through, Shi Yu looked at the spatial environment and clenched his fist. He was sure that his upper limit of physique had been broken again and he could continue to increase the strength of his physique through the additional points. This was very comfortable.

Apart from that, he could also contract Little Chi Tong now...

...

Little Chi Tong was still watching the cartoon. Shi Yu had appeared behind it without anyone noticing.

Buzz...

The little sword spirit quickly turned around.

Chi Tong: “!!!”

What was wrong!

It wasn't addicted, there was no need for curfew!

In order to let Little Chi Tong sleep enough, Shi Yu gave it limited time to watch cartoons every day.

“Not this.” Shi Yu smiled and activated the fourth contract slot.

A breeze blew, and the curtains fluttered. The contract halo appeared beside the little sword spirit.

“Mi?” Little Chi Tong was stunned before quickly reacting.

It condensed a surprised expression with flames.

Shi Yu had broken through?

“Yes.” Shi Yu smiled and said, “Sorry, I made you wait three months.”

“Mi!” The little sword spirit entered the halo without hesitation.

Under the envelopment of the contract halo, Little Chi Tong quickly turned into light dots and was contracted by Shi Yu to enter the Beast Taming Space.

At the same time.

In the charging room of Ancient Capital University, Eleven, who was holding the charging cable, looked up slightly.

In the plant garden, the ginseng baby, who was gathering anti-buggy materials, also raised its head and looked into the distance.

In the dormitory, Buggy woke up from its sleep.

They all looked in Shi Yu's direction.

Eleven and Baby Ginseng smiled slightly, while Buggy's eyes flickered with joy.

Not only had Shi Yu broken through, Little Chi Tong had also officially been contracted!

At this moment, among Shi Yu's pets, only Eleven, Baby Ginseng, and Buggy had a mental connection. Now, there was another little sword spirit.

If the Beast Tamer didn't forcefully distort the will of the beasts, then the feelings between the different pets contracted by the Beast Tamer were more like siblings.

Life and life would develop new emotions because of the Beast Tamer bond.

"My soul power has increased."

At this moment, just as he finished contracting Chi Tong, Shi Yu felt his soul power suddenly increase.

And it was still being nourished!

As a pet of the undead family, the most direct feedback Chi Tong could give to Beast Tamers was the increase in soul power!

Shi Yu smiled. This way, it was easier to possess him.

The condition for the possession of the undead was that the physique and soul power of the Beast Tamer reached the standard!

"Eh, you broke through too?"

After the surprise, Shi Yu was suddenly stunned. He sensed that Little Chi Tong was undergoing some changes in the Beast Taming Space.

He quickly summoned Little Chi Tong.

At this moment, compared to the size of the fruit knife at the Awakening level, Little Chi Tong had already grown to the size of a short sword the length of an arm.

Although there were no flames on the dark red sword hilt and the fiery red sword body, the soul was burning hot wherever his gaze landed.

"Mi ~" Little Chi Tong let out a happy cry.

After receiving the nourishment of the Beast Taming Space, it almost reached the transcendent level from the awakening level without any bottlenecks.

[Name]: Sword Spirit (Chi Tong)

[Level of Growth]: transcendent

[Energy Points]: 10,000

"10,000..." Shi Yu was slightly stunned when he saw the change in Little Chi Tong.

As expected of a high-level overlord race's sword spirit, the race closest to myth.

It had just reached the transcendent level and had yet to be strengthened with racial skills, but its energy level had already reached the lowest standard of a commander rank!

Perhaps after Little Chi Tong reached commander rank, he really had hope of using it to chase after Eleven, Buggy, and Ginseng Baby?

At the same time, Buggy, who had just entered to congratulate them, suddenly stiffened.

It saw Shi Yu smiling foolishly at the ceiling in the room. It revealed a frightened expression and quickly retreated.

It was better to continue sleeping. Shi Yu, who had just broken through, looked a little abnormal.

...

“Speaking of which, there should be five new pages in the skill index.”

A moment later, Shi Yu returned to his senses.

In the past three months, he had emptied many pages.

Now that he had five new pages, he immediately felt the pressure decrease.

“By the way, let’s see if we can teach super skills now.”

Shi Yu suddenly thought of something and quickly opened the skill index.

Shi Yu had already opened the skill index thousands of times, but during this meditation, Shi Yu suddenly realized that something was wrong.

In the space in his mind, an even darker rhombus pattern appeared on the black stone index book skin compared to before.

“What the hell?”

The skill index... changed with his breakthrough?!!

Shi Yu was stunned. It was common knowledge that the Beast Taming Talent would strengthen as the Beast Tamer’s level increased.

For example, Fu Dian’s White Thunder Talent might only be equivalent to an entry-level super skill in his current state, but as his strength increased, the subsequent development of his talent might have an effect equivalent to a proficient, expert, or even perfect super skill!

Similarly, those strengthening talents would also be more effective as the Beast Tamer level increased.

Shi Yu originally thought that the embodiment of the upgrade of the skill index was to increase the page count, but at this moment, as he flipped to the first page, he immediately realized his mistake!

In the pitch-black Sea of Consciousness, the black index floated there. Shi Yu revealed a shocked expression.

The skill index... had upgraded a function!

Skill: Deterrence

[Skill Level]

[Introduction]

[Status]

Apart from the basic information, there was a new column on the skill index.

It was not the occasional [Cooldown Time], but the [Teaching Method]!!

[General Teaching Method]: After absorbing the spiritual power of a creature of the spiritual royal family (a race with deterrence as a racial skill), one can break through the growth level under the deterrence of an expert level and above. There is a chance of awakening the deterrence skill. The awakening probability depends on the compatibility of the pet talent, pet race, and pet race with this skill.

Looking at the so-called “universal teaching method”, Shi Yu was stunned.

He quickly flipped through a few pages. Be it multiplication, impregnable, or Energy Fruit, apart from the super skills Plant Control, Inner Power, and Heavenly Frost Cold Energy, under every low, mid, and high-level skill that had been recorded, a [Universal Teaching Method] appeared!!

Shi Yu naturally understood what this was...

The index was updated. Even without the special power of the index, some pets could learn the “universal skills”!!

Shi Yu rubbed his eyes.

“This is... Is this for me to change my profession to a skill teacher???”

Skill teachers and evolution planners were both branches of Feeders.

For example, the evolution plan of the Goddess of Light Butterfly that Lu Qingyi gave Shi Yu back then was created by an evolution planner.

As for skill teachers, they were naturally the professions that taught other pets to learn skills and increase skill proficiency.

These two professions... were both known as the Beast Tamer deputy positions that earned the most money and had the highest status.

At this moment, as he looked at the new function of the index, Shi Yu, who had graduated from the Feeding Department, fell into deep thought.

He kept feeling that his identity as a graduate of the Feeding Department would be even more solid.

The new version of the skill index had been updated. He couldn't not use it, right? It was also good to sell some skill manuals to earn extra money.

“Archeologists who don't want to be feeders aren't good Beast Tamers?”

Chapter 194: Divine Capital

The new function of the skill index undoubtedly gave Shi Yu a surprise.

But not long after, Shi Yu sighed.

Because...

Skill: Inner Power

[Status]: Cannot be taught. The energy required for teaching is insufficient.

“Holy shit.” Shi Yu was stunned.

He still couldn’t teach super skills.

However, the information on the [Status] column changed!

Logically speaking, if there were no goals, it should show that there were no teaching targets for the time being.

Only when he wanted to teach pets would it show that he couldn’t teach them.

But this time, it directly showed that it couldn’t be taught.

It even marked the reason.

“After the index was upgraded, more than one function was updated.”

“It’s even more humane. Damn it.”

This made Shi Yu confirm again that it was his physical fitness problem that he couldn’t teach super skills.

“Ridiculous...”

Shi Yu stared at the Inner Power, plant control, and Heavenly Frost Cold Energy for a long time before shaking his head.

His current physique should be comparable to a top-notch master who had never paid attention to physical training.

If he trained to the upper limit, he might be comparable to a legendary Beast Tamer who had never paid attention to training.

Even so, wasn’t it enough?

“Is there a possibility that my body can do it but my energy isn’t enough? I need to level up again just like this time to teach super skills?”

Shi Yu guessed that he and the index were both trash. They didn’t have enough energy.

“In that case...” Shi Yu fell into deep thought.

“I feel that before I can teach super skills, I can even max out all the low, intermediate, and high-level skills of the four pets.”

It would take at least a year for him to break through again.

In a year, no matter how lazy they were, the pets’ skills should be full.

“Sigh...”

“Baby Ginseng, it’s time to come back.”

After some thought, Shi Yu transmitted his telepathy in the distance.

Life wasn’t easy, so how could he relieve his worries?

He could only numb himself with points.

“Before we leave, let’s upgrade Chi Tong’s possession skill to expert level and see the training effect.”

Shi Yu then looked at Little Chi Tong, who was crying at the melting ice.

Because of its own breakthrough... The low-level ice-element crystal couldn’t withstand its temperature anymore...

“Mi!!!” It was unhappy! Why was there a melting reaction!

At the same time.

Although it was very far away, Shi Yu’s thoughts still reached Baby Ginseng.

This was an ability that other talents of Beast Tamers couldn’t have.

Ordinary talented Beast Tamers let their pets grow. The two parties were very far apart. Unless the pets lost consciousness, were on the verge of death, died, or broke through, it was very difficult for Beast Tamers to sense the situation of the pets.

But for Beast Tamers with the telepathy talent, their telepathy talent could strengthen the mental connection between contracts and make the perception of both parties stronger.

In other words, in the future, when Shi Yu reached the legendary level, even if the pet was separated from him by a country, they might still be able to sense each other’s state. But if it were other talents, even if there was a contract, it would be no different from losing contact.

Around this characteristic, the pets of many Beast Tamers with talent in telepathy in ancient times had been cultivated into assassins who scouted secrets. Even if they died during the process, they could transmit important information to Beast Tamers far away in time.

In the plant garden, after receiving Shi Yu’s message, Baby Ginseng tidied up the anti-buggy plant in its bag. It was actually a spiritual plant that countered the bug type. It turned around domineeringly.

Home!

That night, Shi Yu, Eleven, Buggy, Baby Ginseng, and Little Chi Tong had a good meal to celebrate Shi Yu’s breakthrough and Little Chi Tong officially joining the team.

That night, Buggy was very happy, because it could go to Divine Capital tomorrow.

Little Chi Tong was also very excited, because this was the first time it had come into contact with additional points!

Shi Yu spent some effort to upgrade its “possession” skill to expert level after three times.

There weren’t many changes, but its spiritual physical fitness was more compatible with the target he was possessing and it could unleash greater strength.

However, Shi Yu didn’t expect Little Chi Tong to also like the feeling of having its points added. He felt that it found it as comfortable as sleeping ice.

“Mi ~” Little Chi Tong kept flying around Shi Yu and sticking to him. Why didn’t he continue?

It hoped to use the cute tactic and continue to be upgraded by Shi Yu.

As expected, for pets, being upgraded points was like eating rice to eat nutrition. It was fascinating.

No pet could escape the temptation of points, even if it was a high-level overlord race.

“No,” Shi Yu said mercilessly. It was just a test of the training effect. He had to get up early tomorrow and couldn’t continue.

Little Chi Tong cried. It was gone?

“Yes, that’s all.” Shi Yu felt sleepy and looked worried.

If he had known earlier, he wouldn’t have added points to Little Chi Tong.

The first time was indeed relatively fresh, unlike Eleven, Buggy, and Ginseng Baby who could restrain themselves now.

Chi Tong wanted to say something but hesitated.

“...You also want to see where my limit is?” Shi Yu stopped it.

“I’ll definitely do it next time!” With that, he fell asleep.

Little Chi Tong fell into deep thought. Hmph...

...

The next morning.

At the first airport of Ancient Capital City.

Shi Yu arrived in a black and red battle suit.

In his pocket, there was also a red cloak. Because it was hot, Shi Yu didn’t wear it.

This was the Flame Demon Armor he had specially bought. It was a level-six fire-element equipment. It cost him 15 million to match a top-level monarch.

The reason why he bought this was that this equipment could effectively increase the Beast Tamer's resistance to fire. If he wore this to withstand the possession of the little sword spirit, it could reduce the burden on Shi Yu's body.

Even if it wasn't a fire-element attack, the Flame Demon Armor could also provide pretty good protection.

The level-six Fire Demon Armor Set and a level-seven Ice Dragon Whisker, dual-element resource, were Shi Yu's more precious resources at the moment.

Of course, the crystal ring of the ruins of Bureau 11 was also a very precious resource, or even more expensive, but their value didn't have a very good level evaluation standard.

[The flight to Divine Capital is about to take off...]

In the crowd, Shi Yu yawned and boarded a high class commander rank plane.

Because of the Butterfly Meeting, there seemed to be a lot of people going to the capital recently.

In Ancient Capital University, many students skipped classes and planned to watch the commotion.

Some Beast Tamers who had contracted the Green Silkworm and had special evolution plans planned to participate in the Butterfly Meeting. Shi Yu wasn't the only one with this intention.

"Eh?"

On the plane, Shi Yu had just found his seat when he looked at the guy beside him in surprise.

In the seat beside him, a student in a cotton shirt also widened his eyes and looked at Shi Yu.

"Little Gu Master, what a coincidence." Shi Yu said.

"You're the little Gu Master. Please call me Gu Master!" Miao Dongdong retorted.

"You're going to Divine Capital too?" Then, he said,

This person was surprisingly the little Gu Master who had contracted the Shadow Gu and the Parasitic Gu. He had been destroyed by Shi Yu and Buggy during the vocation assessment and was now a battle-type student at Ancient Capital University.

"Of course. This is a flight to Divine Capital. You can't leave me alone halfway, right?" Shi Yu smiled.

Miao Dongdong was silent for a moment before saying, "Don't tell me you're going to participate in the Butterfly Meeting."

"I haven't seen your green worm in a long time. Has it turned into a cocoon?"

"Yes." Shi Yu nodded and said, "You too?"

Miao Dongdong's balls hurt. Shi Yu's Nine Li Battle Beast, Baby Ginseng, and Grand General Mu Huiyin's heroic spirit were already ridiculous. When that Green Silkworm completed its evolution, it would probably be able to reach the monarch race no matter what. At that time, wouldn't Shi Yu's battle power be even more ridiculous?

It was a transcendent-level worm silk!

How could there be such a monstrous Beast Tamer!

“Sigh.” Miao Dongdong sighed and said,

“I broke through and contracted a Green Silkworm sent by my clan. I plan to use the method of my clan to evolve it into a ‘Golden Wings Gu’.” He told Shi Yu his goal for this trip.

Golden Wings Gu, a high class commander species, a dual-element pet of the Wasp-type Metal and Worm type.

Shi Yu smiled. “It’s a Gu worm again. When the time comes, everyone will turn into butterflies. Wouldn’t it be awkward for a Gu Bee to come out of your cocoon?”

“Which evolution path is your Green Silkworm?” Miao Dongdong curled his lips and asked.

The Butterfly meeting was just a general name. It wasn’t like they all turned into butterflies.

“Well, if I say I don’t know either, would you believe me?” Shi Yu said.

Miao Dongdong:???

“You don’t know either?”

“What do you mean?”

Shi Yu smiled. “On the surface, I don’t use any of the known evolution plans to give it. I plan to take a gamble.”

“Creating an evolution plan?”

Miao Dongdong widened his eyes. Holy shit, how dare you?

Using such a green worm with terrifying potential as a bet?

If he messed it up, wouldn’t his heart hurt?!!

Regardless of whether Shi Yu’s heart ached or not, Miao Dongdong’s heart ached when he thought of the risk of that crazy Green Silkworm failing in its evolution.

What a waste.

“Yes.”

Shi Yu coughed dryly. In the end, he was also a little panicked. He didn’t know what Buggy could evolve into.

He had asked Buggy, but Buggy didn’t know either. This was very uncomfortable.

“So, am I not here for this Butterfly Goddess? I hope its blessings can increase the success rate.”

Shi Yu thought to himself. Increase the chances of Buggy evolving to an overlord race in one go.

The two racial skills that had advanced into Dao Proficiency, the mysterious Dragon Ball, the Grotto-Heaven Tree Root, and the Illusion Fruit, were a large number of max-level nutrition Fruits that increased the potential of evolution. When added together, their value exceeded Eleven's evolution foundation. Shi Yu felt that it was no different from failing if it didn't evolve into an overlord race.

Hopefully, everything went smoothly...

After all, he didn't have the evolution talent of Big Boss Lin Feng to allow a Green Silkworm to evolve five times. After the worm evolved this time, it would welcome a third evolution again. Who knew when it would happen? It was naturally best to get it done in one go.

"Then I wish you success," Miao Dongdong muttered.

...

"Divine Capital, one of the birthplaces of the Dong Huang Civilization. The mountains and rivers in the country are intertwined, and the terrain is complicated. There are a large number of mountain ranges surrounding it, and many guardians reside here. The mythical atmosphere is rich..."

On the plane, the tourists listened to the broadcast introduction of their destination and dozed off.

Because almost every tourist who planned to go to Divine Capital knew this information.

At the moment, the greatest guardian of the Dong Huang Continent was sleeping in the capital. This was actually related to the evolution big boss, Lin Feng. He was from the capital, and the guardian he cultivated, including the Butterfly God, naturally lived in the capital.

"We're almost there."

The plane passed through layers of clouds and mist. The journey was calm. Miao Dongdong took off his eye mask and looked out the window.

As for Shi Yu, he was seizing all the time to meditate and strive to break through to master as soon as possible.

Only by becoming a master could he have the ability to protect himself in various dangerous places in the country. After all, there were almost no wild hostile overlord-level creatures in the country. Monarch-level ferocious beasts were the greatest bosses.

As for going overseas to have fun, that would have to start from legendary.

"Have we arrived?" Shi Yu slowly opened his eyes.

At this moment, Miao Dongdong said, "By the way, have you booked a hotel? I have a brother who studied at Divine Capital University who helped me reserve their school's hotel. Why don't I get him to help you book one too?"

"At that time, we can still visit Divine Capital University."

Shi Yu said, "Thank you, but there's no need. I still have to deal with some things next. Let's meet at the Butterfly meeting in three days."

“Oh...” Miao Dongdong was stunned and nodded.

...

At the first airport of Divine Capital City.

After the plane landed, Shi Yu put on his mask and left.

If he was free, perhaps he would go to Divine Capital University with Miao Dongdong to... take a look. However, apart from the Butterfly Meeting, Shi Yu could also complete another thing on his way to Divine Capital. He just had to make do with his residence and ruins.

His other target was a high-level wood-element skill: Mutant.

There was an abnormal tree in the capital!

This was the evolution opportunity for the ginseng baby.

Although the Mutant Tree was ancient and had strong adaptability, it was not a native species of Dong Huang. Instead, it was a unique pet from the seven neighboring islands. The common type had already become all kinds of mutants, and it wasn't even limited to the form of a tree.

But in Dong Huang, there weren't many. About a hundred years ago, in order to study various evolution forms, the evolution talent big boss, Lin Feng, brought in a batch of pets from the seven islands. In order to not let it mutate into dangerous invading species, its number had been controlled in a certain range, in a specific area.

This should be a species imported from the same period as the gem cat and the slime.

In the ancient capital, there was no Mutant Tree. However, in the pile of information Shi Yu had investigated, there happened to be an organization that had a mutant tree.

After leaving the airport, Shi Yu casually took a taxi and arrived near the Mechanical Tree Club.

The so-called clubs were usually places where Beast Tamers supported by various large financial groups moved.

In Dong Huang, the power of the top five financial groups could not be underestimated. Their financial resources were extraordinary, and they monopolized most resources. They were forces with the ability to nurture legendary-level forces. The heads of the five major financial groups were also almost all top-notch experts in the country. Some financial groups even had connections with the legendary Beast Tamers.

Any one of them had a rich heritage that could crush a top-level institute alone. Moreover, they had a system similar to that of schools and regiments to nurture Beast Tamers, which were also the major clubs.

Through signing contracts with Beast Tamers with potential, they could compete internally and explore various dangerous areas through competition. The resources inside would be tilted.

The school system, club system, and army system were generally the normal promotion path for ordinary Beast Tamers. Apart from that, there were also a small number of Beast Tamers with overly

heaven-defying aptitudes who would enter some secret departments in advance to be nurtured. For example, Shi Yu was such a person. Compared to the dispensable school system, his identity as Bureau 11 was more important.

“It’s here, right?” Shi Yu looked at the dazzling huge stadium in front of him and planned to go in to take a look.

Opening the door, Shi Yu had just entered when he saw an armed mutant tree standing in the middle of the hall.

Shi Yu was silent.

[Name]: Mutant Tree (Mutated Type: Mechanical Tree)

[Attributes]: Wood, Machinery (Mutated)

Although he had already obtained some information, Shi Yu still found it magical.

Mutation was a rare skill that could transform normal life forms into Mechanical lifeforms.

However, his was just a ginseng baby. Forget it, its secondary attributes should still choose earth or light.. The mechanical ginseng baby didn’t sound very reliable, he might as well directly contract a nuclear bomb baby.

Chapter 195: Ancient Objects and Machines

Shi Yu directly entered the Mechanical Tree Club.

The club was an open facility that provided various services, including accepting missions, accepting event endorsements, and substituting competitions. Anyone could come.

When Shi Yu entered, the mechanical tree in the hall swept its gaze over.

At the far counter, a woman in casual clothes, about thirty years old, also looked away from the computer.

At this moment, Shi Yu was still wearing a black and red battle suit. There was even a red sword-shaped pendant around his neck. He looked impressive and handsome.

That pendant was actually Little Chi Tong.

As a spirit body, Little Chi Tong’s form was not so fixed, just like a ghost.

Even without mastering multiplication, shrinking and deforming was not difficult.

It could even pass through walls.

Of course, this kind of shrinking definitely didn’t have the skill effect of accelerating the recovery of physical fitness. It was purely convenient.

Little Chi Tong still liked to stick to Shi Yu like this. He was much more reliable and intimate than Eleven, Buggy, and Baby Ginseng.

This made Shi Yu realize that choosing a pet indeed had to start from the choosing the egg!

After entering, Shi Yu looked at the mechanical tree.

He smiled brightly and walked towards the mechanical tree step by step.

Shi Yu was just about to greet the mechanical tree through telepathy, but the next moment, the mechanical tree's expression suddenly changed.

The mechanical mutant tree had always been close to the door in the hall.

As the signature pet of this club, it stood here and worked as a hostess, security guard, cleaner, air freshener, gardener, and many other professions.

At that moment, when it saw Shi Yu and sensed the aura of the little sword spirit hanging on Shi Yu's neck, it suddenly glared at him and activated its security attributes.

The huge tree in mechanical armor trembled slightly and roared.

"There!!!! (Not good, the challenger is here!!!!)" Its voice was strong and entered Shi Yu's ears.

Shi Yu stopped in his tracks and was stunned on the spot.

Shi Yu: "?"

What the f*ck?

He came in with such a kind and sunny smile. How was he a challenger?

There was something wrong with this tree's intelligence.

The side effects of the mutant skill?

His baby ginseng was pretty smart. It couldn't become stupid after mutating.

"From the club next door?"

At the same time, at the counter, the woman who was playing with the computer and wearing a casual shirt stopped what she was doing and walked over. She stood beside the mechanical tree and observed Shi Yu.

"The club next door?" Shi Yu knew that she had misunderstood.

"You've got the wrong person."

"Isn't that so?" The woman was stunned and looked at the mechanical tree.

The mechanical tree widened its big eyes that were like light bulbs and pointed at the little sword spirit hanging on Shi Yu's neck with a vine.

Judging from the aura, it was.

At this moment, Little Chi Tong woke up from its sleep. Who was so loud!

Meng Qing looked at the trembling little sword spirit and sighed ."..."

"Then I should have recognized the wrong person." She looked at Shi Yu's age and indeed didn't look like the person next door.

"Since you say it's not, then you're not. Perhaps the mechanical tree made a mistake."

"Sorry, I didn't receive you well."

The mechanical tree scratched its head. Mistaken?

"It's fine," Shi Yu said casually. "But what's the club next door..."

Meng Qing said, "The other club is called the Antique Store Club. The pets they contract are basically antique artifact spirits preserved from ancient times. Here, it's similar to your little sword spirit. Perhaps because of this, you were misunderstood by the mechanical tree."

"The relationship between our two clubs has always been bad. It's common to challenge each other. Sorry for embarrassing you."

"I see. It's alright, it's a small matter." Shi Yu smiled and didn't mind.

However, he added in his heart...

This industry was really messy.

No... It seemed to be chaotic everywhere. Schools competed with schools, cities competed with cities, financial groups competed with financial groups. Then, it was quite normal for clubs to not like each other.

"So what do you want? Registration?"

"By the way, I'm the boss of this club, Meng Qing."

The owner of the Mechanical Tree Club, Meng Qing, guessed when she saw that Shi Yu was young.

Shi Yu looked to be around 20 years old. He didn't look like he was here to discuss business. Then, was he most likely here to register for the club's newbie selection?

But... he had contracted a sword spirit. He should go to the group of conservative guys next door.

The Mechanical Tree Club, which mainly used modern Mechanics, was a wrong option for him...

"Registration? No." Shi Yu shook his head.

Speaking of which, this big sister was the boss of this club?

So she was a rich woman!

Shi Yu thought that it was a hall girl who received guests. His eyesight was poor...

He said, "Hello, Boss Meng. I'm a feeder. I've been researching mutation evolution recently. I heard that the Mechanical Tree Club has a stable channel to nurture alternate trees, so I wanted to visit."

Shi Yu looked at the mechanical tree beside him and felt helpless.

Replicating mutants was actually relatively troublesome.

He had experimented before.

This kind of almost passive physique skill could only be replicated after it took effect with his own eyes.

In other words, he had to personally see the mutated tree use mutations to evolve before he could successfully touch and replicate it.

Now, if he directly touched this strange tree, he couldn't replicate anything.

When he was bored, he had tried it on other pets such as gem cats and even baby ginseng.

Therefore, if he wanted to replicate this passive physique skill, he had to find an opportunity.

"Feeder?" Meng Qing looked at Shi Yu suspiciously.

Really?

She didn't believe it.

Shi Yu was too young. At this age, even if he was a Feeder, he would only be a trainee. There weren't many professions.

"Do you have a certificate? If you're a professional feeder, I can show you around," Meng Qing said.

"Uh." Shi Yu was stunned. He didn't have this thing.

The only certificate he had regarding the Feeder was the graduation certificate of the number one high school in Icefield City...

This thing could only be used as a certificate for a trainee Feeder.

"The Feeder is my secondary position. Is my university student pass alright?" Shi Yu asked quietly.

"You're from Divine Capital University?" Meng Qing showed an interested expression.

"No, I'm from Ancient Capital University." Shi Yu showed his student ID to Boss Meng.

"Ancient Capital?"

"Shi Yu... Ancient Capital University's archeology Department."

Staring at the student ID, Meng Qing was stunned. It wasn't from Divine Capital University. The ancient capital was so far away, so why were the students there coming to Divine Capital?

"Ancient Capital is not bad either. So it's a university student from a top-level institute." Meng Qing nodded.

In this world, the Beast Tamers of the nine major universities were still very well represented.

This planet's people entered society after graduating from high school. High school was equivalent to a university on Earth. There were various specializations, and a few years in advance, students chose their future direction.

On the other hand, the Beast Tamer University only had nine institutions, which was the nine major universities. The admission conditions were very high, and those who could enter the university were all elites.

For example, when an archeology student from Ancient Capital University heard this identity, he could subconsciously think that this student was one of the best in a professional assessment in a first-level city. He was a super genius. Otherwise, it would be very difficult for him to enter the trump card specialization of Ancient Capital University.

Generally speaking, such a person had a high chance of becoming a master-level Beast Tamer in the future.

As a person who had been in society for many years, Meng Qing was still willing to communicate more with such a genius with potential.

Meng Qing said, "But you're from the archeology Department. Why did you choose to study the Feeding Department? Is university life so relaxed?"

She had never gone to university because it was meaningless. Her family still had a club to inherit, so she entered society early to train.

"An outstanding Beast Tamer has to know a little about everything." These were Shi Yu's sincere words.

"That's true." Meng Qing nodded.

Because Shi Yu was a university student, she chatted with him patiently.

What if Shi Yu was interested in joining the club after graduation?

Each financial group supported dozens of clubs, and each club was very internal.

The professional league and master league between the Beast Tamers in the clubs were even more intense than the national competition between university students.

The National League, the professional league of the clubs, and the Master League were about the largest scale competitions in the country.

As for the internal military exercises organized by the Beast Tamer Corps, these were usually not publicized.

In short, universities cultivated comprehensive talents. In the future, they had to move to various fields with strong freedom.

The club cultivated celebrity Beast Tamers, which was part of the business operation and national spiritual needs. It was the key to attract most ordinary people to become Beast Tamers and understand Beast Tamers. It was also a main industry to develop the country's economy.

And the army naturally cultivated battle-type Beast Tamers.

In Meng Qing's eyes, a genius from a famous school like Shi Yu was a resource.

After all, after graduating from university, it was still up to the Beast Tamer to decide what vocation to choose.

"Well..." At this moment, Meng Qing agreed to Shi Yu's request to visit the Mechanical Tree Club.

However, after looking at Shi Yu for a while, she suddenly felt that something was wrong.

"Wait, classmate, why do you look so familiar?"

The boss of this club looked at Shi Yu's face and fell into deep thought.

Had she seen this face somewhere?

"Uh, maybe I have a more common face?"

Shi Yu felt guilty. Good lord, could it be that the other party had also heard of the Iron-eating Beast Knight?

They were several cities away.

Moreover, he had only been on the trending list for half a day. Most importantly, the Beast Tamer of the club shouldn't be so free to pay attention to these things, right?

"No, I've definitely seen it somewhere before." The young female boss began to think carefully.

She usually liked to eat melons and watch dramas. Apart from supervising the training of the Beast Tamer signed by the club, she had nothing else to do. She was usually very free, but she still came into contact with more news.

"You..." The female boss stared at Shi Yu.

"Ancient Capital, Ancient Capital University, you're the top scholar of that Ancient Capital City vocation assessment this year??"

A moment later, she thought of something and widened her eyes.

To be honest, she didn't even remember the names of the professional assessment top scorers in Divine Capital, Imperial Capital, and even Demon Capital. This was because this group of people didn't have much to do with the Mechanical Tree Club. They would definitely directly bid for the nine major universities or be poached by the financial groups.

However, only the top scorer of the vocation assessment in the ancient capital had made too much news a few months ago. It gave people a deeper impression!

A new star in the archeology world, a genius archeologist who discovered the evolution of the iron-eating beast, and an iron-eating beast knight... When these few topics were put together, it was even more memorable than a solo assessment top scorer.

Shi Yu : "..."

She really did know.

“It’s me...” He didn’t expect that after a few months, someone would really remember him. However, this also indirectly meant that his publicity effect was pretty good?

Senior Panda, pay for the sponsorship!

“It’s really you...” Meng Qing was stunned and suddenly didn’t know what to say.

“What do you want to see? I can show you.”

Even if Shi Yu had nothing to do with the Mechanical Tree Club in the future, she had to get to know such a genius with super potential.

After working hard in society for so long, she understood the importance of connections.

“Well...”

“Excuse me, are there any mutant trees waiting to evolve in the club now?”

“I want to observe the evolution of the mutated tree,” Shi Yu asked.

When Shi Yu finished speaking, Meng Qing was stunned.

This was not a simple tour!

Although it wasn’t a big deal or private matter... It had to be said that Shi Yu came at a very coincidental time.

“Is there a problem? I can pay a certain amount of the observation fee,” Shi Yu said.

“No need.” Meng Qing’s expression relaxed. “There are two newbies’ mutant trees that are going to undergo modification mutations in two days. I can show you around then.”

“Thank you very much,” Shi Yu thanked.

“You’re welcome!” The female boss patted Shi Yu’s shoulder and smiled. “I knew it couldn’t be a common face. Student Shi Yu, you’re so handsome. I only took a look at the picture on the news and completely remembered it.”

Shi Yu smiled in embarrassment.

She had gone so far. Her little mouth was like honey.

Boss Meng smiled and said, “The modified machinery can only be delivered from the headquarters in two days. Why don’t I take you around the club today?”

“Alright.” Shi Yu nodded and said, “I’m still very curious about the operation of the club.”

Boss Meng smiled and said, “Alright, let me introduce you. Although our Mechanical Tree Club isn’t qualified to participate in the Master League, we’re also a popular team in the professional league. Overall, our strength is still very good.”

Meng Qing and Shi Yu introduced themselves. “I’ll take you to the training area of the official members first.”

...

The Mechanical Tree Club was very large. After all, it had a complete business chain. The various facilities were much better than Master Lin Hongnian's dojo.

Meng Qing brought Shi Yu to the training ground first.

At the moment, there were six Beast Tamers and six mechanical mutant trees practicing in the training ground.

From the current training mission, it seemed to be resistance training.

The mechanical modified mutant tree still retained the characteristics of most tree-type life forms that were inconvenient to move. It was like a fixed cannon battery, and it had a high requirement for standing still to take a beating.

"They're official members of the club. Every one of them is a high-level Beast Tamer." Boss Meng and Shi Yu stood on the high platform and looked down.

The six official members she mentioned were all between 25 and 30 years old. There were four men and two women. They were very young and looked pretty.

This was very normal. After all, the club was to create a celebrity Beast Tamer. They had to take on various endorsements and sponsored partnerships. They also used their youth as a selling point.

"Are the main members of the club all mechanical trees?" Shi Yu asked.

"Yes." Boss Meng nodded.

It was indeed as she had said. The Mechanical Tree Club, which had a stable cultivation route of the mutant tree and used the Mechanical Tree of the high-level commander race as the tactical core, had pretty good competitiveness in professional competitions where there were no master-level Beast Tamers or monarch-level pets.

"Student Shi Yu, are you interested in the mutant tree and the mechanical pets?" Meng Qing asked. "If you come to our side to sign the contract, we can give you a mutant tree and a modification machine with high commander potential for free."

"Sorry to disturb you," Shi Yu said.

Although she was sweet-tongued, it was impossible for her to trick him into working.

Shi Yu smiled helplessly. "At the moment, school is more important."

He belonged to an official organization, and his future development path couldn't be matched with the financial groups and club systems.

However, it wasn't like there was no connection between the financial groups and the officials. After all, many factions in the association were also supported by the financial groups.

And the founder of the Century Financial Group, which specialized in technological products behind the mechanical tree, was said to be the disciple of the legendary Beast Tamer who founded the Mechanic Department of Dong Huang.

At the moment, this legendary mechanical giant was very likely the only legendary Beast Tamer still alive in Dong Huang. After all, according to normal age length, he wouldn't die.

However, in the past decade, it was also true that there had been no news of this person. Many of the subsequent top-notch mechanical lives were also developed by new talents in the mechanical field.

Could it be that this person has also disappeared like Lin Feng the legend? Or is he in seclusion to challenge the Mythical stage? Shi Yu muttered.

The power of a guardian-level forbidden weapon exceeded nuclear weapons. As for a Mythical-level technological weapon, a Planet-level one?

At Shi Yu's level, he couldn't come into contact with this at all.

"I understand. Learning is more important." Boss Meng smiled. She was just asking casually. She didn't expect Shi Yu to really come.

With the status of the Iron-eating Beast's evolution planner, directly cooperating with the various large financial groups or the official associations was much more promising than joining a small club.

A moment later, the training below seemed to have ended. Those club members discovered their boss standing on it. One of them couldn't help but shout, "Boss, do you have any instructions?"

"Eh, is there a newbie?" A female teammate looked at Shi Yu beside Meng Qing curiously.

"This isn't a newbie." Meng Qing smiled. The clubs usually recruited Beast Tamers who failed their vocation assessments or didn't enter ideal schools and weren't willing to start over again for a year. Even the best clubs couldn't recruit a top scholar like Shi Yu.

"Let me introduce you. This is the top scholar of this year's Ancient Capital vocation assessment."

"Discoverer of the iron-eating beast's evolution form, archeologist of the Ancient Capital University's archeology Department, Shi Yu."

With that said, she walked down with Shi Yu.

As soon as Meng Qing finished speaking, there was silence below. Five people had shocked and confused expressions. Another male member suddenly thought of something and said, "That Shi Yu?"

"Who is it?" the female teammate beside him asked.

"This... how should I put it? You just have to know that it's a very famous top scorer in the vocation assessment." The person beside her didn't know how to explain...

A moment later, Meng Qing and Shi Yu came down. The few of them bumped into each other. Boss Meng continued to introduce.

"Student Shi Yu came to our place to take a look at the Mechanical mutant tree. I'll take him around."

“Oh, oh, welcome.”

“Hello, Student Shi Yu.” The six team members greeted when they heard their boss’s introduction.

But soon, their attention was attracted by the Sword Spirit pendant on Shi Yu’s neck.

“Sword spirit??” The male member who recognized Shi Yu looked at the pendant and said in surprise, “Your third pet contracted a sword spirit...”

“Oh right, my name is Lei Liang. I’ve seen your... video?”

Little Chi Tong tilted its sword head. Video, what video?

“Sort of.” Shi Yu smiled and said, “But it’s not the third one. It’s the fourth one.”

When Shi Yu finished speaking, everyone was stunned again.

Wasn’t Shi Yu the top scorer of the assessment this year? He was already... a high-level Beast Tamer so quickly??

Meng Qing was also stunned. This... was the main standard of their club in their first year?

Monster!

“Wasn’t it only beginner level four months ago...” Lei Liang was at a loss.

“You don’t understand the world of geniuses,” a female team member beside him said.

“I heard that this kind of artifact spirit pet is more popular in the ancient capital. Is that true?” She then asked curiously.

Shi Yu: “It’s not that popular, but there are indeed more Spirit Mediums in the ancient capital.”

“So, isn’t Mechanics not very popular in the ancient capital?” she continued to ask.

“No, it’s also a lot.”

When Boss Meng saw that everyone was talking about the sword spirit, she smiled and explained how the mechanical tree had mistaken Shi Yu as the challenger of the club next door.

The club members couldn’t help but smile in embarrassment.

Shi Yu heard it again and couldn’t help but look at Little Chi Tong. He asked curiously, “I feel that everyone is very concerned about this type of pet. Is it because of the club next door?”

Boss Meng smiled and said, “Perhaps there’s such a reason. We’re old enemies with our neighbor. It can still be traced back to my father’s generation. He and the owner of the club next door were originally good friends. They both liked antiques and sword-type pets and were good friends who pursued them similarly. But later, because the Mechanic class rose, my father went to change to the Mechanic class. The two of them also had a conflict and went their separate ways.”

“Ancient vs modern?” Shi Yu asked. This question didn’t seem to be limited to these two clubs.

After the modern era, antiques and swords could no longer produce spirits. There was only a batch of weapons preserved from ancient times, or the spirit bodies of those weapons.

Compared to this, the Mechanic class was a new life that had replaced these antiques.

In the modern era, very few Beast Tamers were willing to contract a sword, a bow, and armor like the ancient Beast Tamers. From the cost-effective ratio, they were completely destroyed by the Mechanics with greater potential now.

The former was rare, expensive, and had low potential. The latter was a new attribute, relatively popular, and had a high growth rate.

In the eyes of most people, an ancient sword spirit was much weaker than a mechanical light sword.

It could be said that the rise of the Mechanic class indirectly accelerated the decline of the ancient sword-type pets. The two had never been very friendly.

“That seems to be the case.” Meng Qing nodded.

“Speaking of which, are archeologists all ancient fighters?”

Lei Liang saw that Shi Yu had contracted a sword spirit. In addition to his identity as an archeologist, he subconsciously guessed.

The Ancient Battle Sect was like the ancient Beast Tamers. Beast Tamers who contracted armor, swords, and used pets like zither, chess, calligraphy, and painting to fight. Generally speaking, they were known as opposing modern Mechanics. Now, only a small number of inheritors had fallen. The main reason was that such life forms no longer existed in the natural world.

“Cut it out.” Meng Qing glared at Lei Liang. She suddenly felt that if they continued chatting like this, everyone would start arguing about this topic of new vs old.

“Probably not.” Shi Yu didn’t mind much. He said, “Actually, it’s the same in my opinion.”

“There’s no difference in strength between pets. The strength that can be displayed is completely dependent on his Beast Tamer.” Be it animals, elements, undead, antique swords, or mechanical lives, under the same race level, in Shi Yu’s opinion, their potential was about the same. They wouldn’t be inferior even if he added all the points.

“Maybe I’ll choose the Mechanic class next.”

Shi Yu’s idea was to have one pet of all types.

Animals, plants, undead, machines, elements... It wasn’t a collection hobby. It was purely because Shi Yu felt that their respective abilities were irreplaceable.

For example, right now, Shi Yu basically didn’t have the ability to fight in the sea. On Blue Planet, the ocean also occupied most of the territory. The ocean was a forbidden area for humans from ancient times to now. Even those legendary Beast Tamers couldn’t conquer the ocean.

Many powerful sea beasts lived in the deep sea, and they had incomparably rich resources. There were also many underwater ruins. The Dragon Emperor had once said that if the sea creatures attacked the land one day, no human country could stop them.

It was also because the resources on land were not suitable for sea beasts that the two had always been harmonious.

However, if Shi Yu wanted to explore the ocean, he had to contract a water-type pet, preferably an elemental-type pet.

“Mi! ~” Little Chi Tong bumped into Shi Yu. Although that was the case, couldn’t he at least praise it!

It was all the same, he said?

It had also understood mechanical lives before. It was just a hubigge robot, after all. It would kill one with one strike!

“Be good ~” Shi Yu comforted Little Chi Tong. You can’t cut it. Don’t you like electric ice boxes too? That’s the prototype of a mechanical life form!

Little Chi Tong: “!!”

Little Chi Tong was stunned. So that was the case. That Mechanic class was pretty good.

“For example, my Chi Tong is very strong,” Shi Yu added with a smile.

Chi Tong... was this sword spirit’s name?

Everyone looked at the little sword spirit again.

“That makes sense, but if the next one is a Mechanic, are you really not considering the Mechanical mutant tree?” Boss Meng still couldn’t forget about it. “If you have any needs, you can look for me. I still know many Mechanical Masters from the financial groups.”

The Century Financial Group mainly focused on technological products, and there were many Mechanics inside. Currently, the mechanical modification equipment of the Mechanical Tree Club was provided by the Century Financial Group.

“Alright, I won’t be polite then if I need anything.” Shi Yu smiled.

“Come, come, come, take a look at our club’s Mechanical Mutant Tree.” Meng Qing thought of Shi Yu’s business here. She looked at the six mechanical trees standing on the scene and introduced them.

Shi Yu looked over.

“They were undergoing resistance training just now, right?”

“Yeah.” Meng Qing nodded.

“That was a strengthening skill just now, right?” Shi Yu asked.

[Race Skill]: Mutant, Tri-Colored Bullet, Giant Arm, Lock, Strengthening, Giant Tree Cannon

Recalling the skill of the Mechanical mutant tree, Shi Yu pondered slightly.

Hardening was a mid-level skill that contained both earth and wood power.

1

The effect was to harden the wood-element skill or plant life, fuse the power of the earth and wood-element, and make the plant as hard as the Earth Stone, turning it into a hardening plant.

It was considered a defensive skill, but it was both offensive and defensive. It was similar to hardening.

To be honest, this skill was a racial skill evolved by very few plants in harsh environments.

Shi Yu had always wanted to find a defensive skill for Baby Ginseng. The most common and conventional skill was the wood shield skill, but because it was too conventional, Shi Yu was not too satisfied.

He wanted skills that were rare and more functional. This way, it would be easier to form profundities with other skills. It wouldn't be eliminated so quickly.

For example, the wooden shield would be completely replaced by plant control in the future, but strengthening was a skill that could be used with plant control.

Just thinking about it, if the future ginseng baby summoning a huge wooden shield to protect itself... If it was just an ordinary plant wooden shield, the opponent would directly burn it with a ball of flames of the same level. But if it was a hardened wooden shield, it would contain some earth-element nature. It wasn't that countered then, increasing the power of the plant greatly.

Such a skill was relatively difficult to master, but Shi Yu didn't care.

Apart from the mutation, Shi Yu pondered for a moment after seeing the strengthening skill and was a little tempted. He had never seen this skill in the ancient big plant garden.

Now that Baby Ginseng had mastered the full-level "Dao Proficiency" Earth Chain, it used Earth Power very well and was very compatible with this skill. After learning it, even if Shi Yu didn't add points, Baby Ginseng would probably be able to master it quickly or even perfect it in a short period of time.

If it learned this, it would really be invincible.

"Yes," the few of them answered.

"Can I come into contact and take a look?" Shi Yu asked.

Meng Qing smiled and said, "Of course, do what you want. They're very docile."

Shi Yu came to the side of a mechanical tree and touched its hardening bark. "It's been cultivated very well. One of my pets has also mastered hardening, but it's still a little inferior to their hardening at the moment."

[Recording success]

Everyone smiled. They had specially cultivated secret manuals for the various skills of the mechanical tree. Their whole family relied on the mechanical tree to earn money, so naturally, they had some strengths.

The hardening mastered by Shi Yu's pet might only be at expert level at the moment, but these mechanical trees had already been trained to perfect level!

"It's not very intuitive to rely on the touch. You can use your pet to attack it. There's no need to be polite. Let them be trained." Lei Liang smiled and said, "You can let that little sword spirit try. Their defense is still very strong."

The mechanical trees:???

Human language?

When Shi Yu heard that, he was slightly stunned. Then, he smiled and said, "There's no need."

Little Chi Tong was only at the transcendent level. It was meaningless. Ordinary attacks were probably useless. If he used his full strength... Shi Yu was afraid that the other party wouldn't be able to withstand it.

No matter how strong it was, it was still the same as hardening. It mainly defended matter, but Little Chi Tong mainly attacked the soul.

Even if there was a major level difference, Shi Yu was afraid that Little Chi Tong would hurt the hearts of these big guys with less than 40,000 energy points.

As a high-level overlord race, Little Chi Tong's talent was very high. For example, although its Soul Slash, Sun Flame, and even the Interlocking Sword Skill were only at entry level, it could easily be combined and used. Flame, soul attack... Blood Suppression Mechanical Tree.

"I mainly want to observe, record, and study the difference before and after the mutation of the mutant tree," Shi Yu said.

"No problem." Meng Qing chuckled. "I'll definitely let you see it in two days."

Next, the Mechanical Tree Club warmly welcomed Shi Yu, the genius archeologist. However, Shi Yu didn't stay long. After all, he still had to train. Seeing that there was no chance to replicate the mutation today, Shi Yu and Boss Meng exchanged numbers and quickly took the initiative to leave.

...

After leaving the Mechanical Tree Club, Shi Yu let out a long sigh.

He thought for a moment. He didn't seem to have signed up for the Butterfly Meeting!

The Butterfly Meeting was held in the Divine Feather Mountain Range of the Divine Capital. It was in the wilderness, and not everyone could go.

The Butterfly Valley was separated from the city by a maze-like forest. At least professional Beast Tamers could pass normally. If trainee Beast Tamers wanted to enter, they had to find bodyguards.

In addition, the area of the Butterfly Transformation Valley was limited. The officials had to confirm whether the Beast Tamers who went there were sincere in helping their pets evolve or just going to watch the show. The latter didn't have a strong background, so it probably wasn't easy to go in and watch.

Generally speaking, every Beast Tamer who went to the Divine Feather Mountain Range and the Butterfly Meeting had to register in advance and record their identities.

This was also to prevent some lawless people from entering the mountain range. After all, in that chaotic place, most of the cocoons might not be by the owner's side. The cocoons didn't have any battle power, so if it wasn't strictly controlled, it was very likely that the poachers or hunters would have an opportunity to take advantage of it. Even more so, if it angered the guardian, it would be even more serious.

"I'll register first. Don't wait until the last day to line up." Shi Yu thought for a moment and quickly made a decision.

The process of registering and participating in the Butterfly Meeting was also very simple. He just had to take out his identification documents to register and show the officials the cocoon he had contracted.

When Shi Yu arrived at the Hundred Butterfly Town that led to the Divine Feather Mountain Range in the Divine Capital, he realized that there were only a few hundred Beast Tamers queuing here to register. It was possible that a large portion of them had already registered in advance, or it was possible that they had yet to reach the Divine Capital.

The Butterfly Transformation Valley could accommodate 100,000 people and 100,000 cocoons. Although the threshold of the Butterfly Transformation Assembly wasn't high and there was a chance to see the guardian, there didn't seem to be that many Beast Tamers participating in the Butterfly Transformation Assembly.

This was because most people didn't have the Green Silkworm evolution plan. Even if a Green Silkworm cocoon that normally evolved into a Wind Crystal Butterfly obtained benefits in the Butterfly Transformation Conference, it would at most be comparable to a middle-level transcendent race. It didn't mean much. In the end, the Butterfly Transformation Conference was still a stage prepared for those Beast Tamers who had supreme-grade evolution plans.

For example, those Beast Tamers who had mastered the high-level commander race evolution plan might be able to use the Butterfly Meeting to let their pet race's potential be comparable to monarchs or even monarch races.

Therefore, most of the evolution positions might still be used by the officials themselves. They could cultivate a certain type of butterfly through the butterfly god.

"It's my turn." A moment later, Shi Yu moved.

This was a place where ten rooms in the hall lined up to register. Shi Yu didn't wait long. About 40 minutes later, it was his turn.

When Shi Yu entered the hall, the person in charge of registering was a young lady. This time, the other party looked more like a service staff, unlike Boss Meng just now. As a boss, he actually sat in the hall and played with the computer to receive guests...

"Hello, please give me your Beast Tamer license." The registration lady smiled sweetly and said to Shi Yu.

“Alright.” Shi Yu nodded and handed his intermediate Beast Tamer license to the other party.

Speaking of which, shouldn't he find Master Qu Jie to apply for a high-level license when he returned?

Would he still be the examiner?

Master Qu Jie's sealing talent was pretty good...

“Please verify it.”

“Name, Shi Yu, age, 19 years, level, intermediate-level Beast Tamer, household register, Ping Cheng District of Icefield City, assessment venue, Ancient Capital Beast Tamer Association.” The registration lady routinely registered.

In theory, this age and level were very strong. But in the past few days, the registered young lady had seen too many geniuses from the nine major universities who came to participate in the Butterfly Meeting and was already numb.

“No problem.” Shi Yu nodded.

“Next, please summon the pets you want to participate in the Butterfly Meeting. They must be in a contracted state, and they can only be the cocoons of the Green Silkworm.” The registration lady said again, “We also have to help the pet's physical examination register. I'll also check the health state of the cocoon for you. It's free ~ Professional Beast Tamer benefits ~”

The Green Silkworm wasn't the only insect that could turn into a cocoon. However, the Green Silkworm was the most common insect-type in the world. At the same time, the Butterfly God was also a Green Silkworm in the beginning, so the Butterfly Meeting could only be attended by the Green Silkworm cocoon.

Shi Yu raised his head slightly and looked at the registration lady.

It was not a problem to summon the worm, but the other party wouldn't deny it after seeing the cocoon, right?

After all, his Green Silkworm cocoon was still a little different from ordinary Green Silkworm cocoons.

“Hm?” The registration lady glanced at Shi Yu.

“Well...” Shi Yu summoned it. A spatial ripple appeared in front of him, and a white and green flash array appeared on the summoning platform. In the next second, a cocoon wrapped in white silk appeared in front of the register lady.

High-level Beast Tamer?

The registration lady was stunned. She realized that Shi Yu's summoning level didn't match the information... Did he not go for the assessment yet?

If it was a high-level Beast Tamer, 19 years old would be a little scary.

She was in charge of registering so many people, and few were as monstrous as Shi Yu.

“The color is very poor...” Seeing the Green Silkworm cocoon, the registration lady was about to be polite, but her gaze was suddenly stunned.

That was because there was a small hole in this white cocoon. The big eyes in the hole were blinking and observing her.

To be precise, it was two eyes, but at the moment, Buggy was sideways. A moment later, Buggy turned and looked at the register lady with both big eyes.

“Holy shit.” The registration lady was stunned.

Her mouth opened slightly. This, what the hell was this!!!

At this moment, she had almost forgotten all the service etiquette.

Beep... Beep... Beep...

At the same time, the energy value of the current worm was displayed under the summoning platform in charge of the physical examination.

This was a device similar to a machine that tested energy values in the vocation assessment.

Energy Points: 388,69

1

At this moment, when she saw the number, the registration lady’s heart trembled again. She couldn’t help but widen her eyes and take a step back.

What??

Was she seeing things?!!

Shouldn’t the cocoons of the Green Silkworm be at level ten of awakening, with an energy value no more than 100??

You...

308,000 was already close to the standard of a monarch species... commander rank!

1

No, this wasn’t the cocoon of a green worm at all, right? The registration lady couldn’t help but look at Shi Yu!

“This... This isn’t a Green Silkworm cocoon at all!”

Buggy: “?”

Then who was it? Couldn’t she be more polite?

“This is the Green Silkworm cocoon,” Shi Yu said. “It’s genuine.”

The register lady shook her head crazily. She didn’t believe it.

She pointed at the wide-eyed cocoon and the more than 30,000 energy points below. You call this a Green Silkworm cocoon?

At the Butterfly Meeting, other people's cocoons would sleep and wait for the Butterfly Goddess to bless them and turn them into butterflies. Only your cocoon would open its eyes wide and wander around. Could you call this a cocoon of a Green Silkworm?

Shi Yu smiled and said helplessly, "It's true. My Green Silkworm is relatively special, so it's also relatively special after it transformed into a cocoon. It's considered a new form. I've already written half of the thesis... I can publish it after it replenishes the other half after it transforms into a butterfly."

Miss Registration: "?"

She couldn't understand.

This cocoon didn't look scientific at all.

A Green Silkworm cocoon that was close to the potential of a monarch?

What the hell?

"I... I have to inform our in-charge. I can't make the decision," she said.

She didn't know if she should let Shi Yu and Buggy, this pair of anomalies, inside.

She still didn't believe that this was the Green Silkworm cocoon.

"Alright." If Shi Yu didn't remember wrongly, the person in charge of the Butterfly Meeting should be a legendary Beast Tamer.

A legend that specialized in insect-type butterfly-type creatures.

At that time, the entire Butterfly Meeting would be presided over by her. She would also be in charge of communicating with the Butterfly God in the association.

At the same time, in a garden in Hundred Butterfly Town, a beautiful woman in her forties received a call.

"What's wrong? Is there a problem with the registration of the Butterfly Meeting?"

"Legend Hua, yes, when it was registered, a Beast Tamer with a very strange green worm cocoon appeared..."

"How strange is it?" The legendary Beast Tamer surnamed Hua smiled and said, "Different color?"

As a legendary Beast Tamer proficient in the cultivation of butterfly-type creatures, she had seen many strange and abnormal pets and was already used to it.

But even so, she still made the registration office pay attention to special participants in presiding over the Butterfly Meeting.

"No, it's that green worm cocoon. It has a pair of eyes and isn't sleeping."

Legend Hua was stunned.

“Eyes?”

“Moreover, its energy level has reached 38869. Its growth level is commander rank.”

Legend Hua:???

“Its Beast Tamer said that this is the evolution of the Green Silkworm. That Beast Tamer thinks that it’s very normal, but I’ve never seen it before, nor have I heard of it.. I’m not sure either. Do you... want to come over...?”

Chapter 196: Your cocoon isn’t scientific

cDivine Capital.

Below the Divine Feather Mountain Range, Hundred Butterfly Town, the venue of the Butterfly Convention.

When others registered, they would enter for a few minutes and immediately come out, followed by the next one.

Shi Yu registered and was directly invited inside.

“Please, sir, have some tea first. Our in-charge will be here soon.”

“By the way, our in-charge is Legend Hua Xiajin.”

The registration lady made a cup of tea for Shi Yu and even used honorifics. It was obvious how much the worm had affected her.

A commander-level cocoon with eyes... She didn’t understand, but she was shocked.

“Thank you,” Shi Yu said.

At this moment, Buggy was also on the table.

When Shi Yu drank a mouthful of tea, Buggy looked at the tea and sighed slightly.

It had not eaten or drunk for 100 days.

Although he could rely on sleeping to absorb nutrition, it was pretty light.

It wanted to change its taste!

Buggy had already made a decision. After evolution, it would first drink ten barrels of fruit juice!

Shi Yu put down the teacup. The registration lady’s gaze was still observing the worm.

The room suddenly fell silent.

In fact, just a few minutes later, the person in charge mentioned by the register arrived.

A beautiful woman with black hair and a colorful cheongsam with butterfly wings came to the room.

“Legend Hua.”

When the beautiful woman arrived, the registration lady heaved a sigh of relief and greeted her.

Shi Yu also got up and looked at the legendary Beast Tamer with a smile.

Hua Xiajin was one of the legendary Beast Tamers in Divine Capital. She specialized in Butterfly Beasts and had the overlord-level pet “Myriad Flower Butterfly Fairy King”.

It was said that the other pets had also reached the battle power of quasi overlords.

This was the combination of most legendary teams, one overlord plus many quasi overlords.

For legendary Beast Tamers, overlord-level pets also had it very difficult to obtain battle power.

Generally speaking, a Legendary only had one overlord-level pet.

Only those top legends had a high chance of possessing multiple overlord-level battle power.

“I just received a call. I was wondering who it was, but it’s Student Shi Yu.”

Hua Xiajin’s legendary voice was like the warm sun in spring. She spoke warmly after entering.

“Hello, Legend Hua,” Shi Yu also greeted.

“Legend Hua...” The registration lady looked at Hua Xiajin and then at Shi Yu.

From Legend Hua’s tone, she seemed to know this Beast Tamer?

Then... Then... She looked at the Green Silkworm cocoon on the table.

Could this cocoon really have evolved from the Green Silkworm?!

The registration lady’s heart surged. She had really lived long enough to see this!

“Previously, my student showed me the battle video of your vocation assessment,” Hua Xiajin said. “I have a deep impression of your Green Silkworm. Has that Green Silkworm turned into a cocoon?”

This sentence confirmed in the registration lady’s heart that the previous owner of this cocoon might indeed be a green worm.

At this moment, Legend Hua looked at the Green Silkworm cocoon on the table and was very surprised.

As a legend who specialized in the Worm Department, she naturally paid more attention to the Worm Department.

After learning from his students that there was a special Green Silkworm in a newbie contract, it was impossible for someone like Legend Hua not to notice.

In her opinion, Shi Yu’s Green Silkworm definitely had greater potential than that Ice Phoenix Moth.

She originally thought that it had been four months. Shi Yu's Green Silkworm might have immediately evolved after the vocation assessment, but she didn't expect that Shi Yu would actually catch up to the Butterfly Meeting? His luck was pretty good.

"Yes, that Green Silkworm." Shi Yu looked at Buggy.

Buggy looked at Legend Hua. It felt that the aura on this auntie was very nice.

It smelled better than the fragrance created by the ginseng baby!

Didn't Shi Yu feel it?

Beast Tamer!!! Win the favor of this rich lady!!!

"Growing eyes... unbelievable." Hua Xiajin looked at Buggy in surprise.

"!!!" Buggy shook its body to show its friendliness.

This action shocked Legend Hua even more.

Generally speaking, after the Green Silkworm turned into a cocoon, it would enter a state of absolute deep sleep in the cocoon. It would quietly absorb the power of evolution and fall into a complete sleep. It was a very quiet state...

Then, after absorbing the power instinctively, it would naturally break out of the cocoon and evolve. In the end, Shi Yu's could still maintain consciousness in the cocoon state? Moreover, it even broke through to the commander rank and obtained nearly 40,000 terrifying energy points?

How exactly did Shi Yu nurture it..

With her many years of cultivation experience, she actually couldn't tell what this cocoon would be after it evolved...

In addition, with eyes, it was already completely different from other Green Silkworm cocoons. Could it still be called Green Silkworm cocoon?

At this moment, the registration lady silently retreated and left the room for Legend Hua and Shi Yu.

"This cocoon form... is it like this after it turned into a cocoon?" She looked at Shi Yu, wanting to ask him something deeper, but she didn't know if Shi Yu was willing to answer.

"Yes, and..."

"I think, compared to the form of an ordinary cocoon, it's actually more like a new race that has evolved too much."

"Oh?" Legend Hua was rather curious.

Shi Yu looked at Buggy, and at that moment, Buggy looked at the teacup.

The next moment, a blue Psychic wave enveloped the teacup out of thin air.

Then, the water rose from the tea cup and floated quietly in midair.

Under Legend Hua's shocked expression, the water changed several forms and turned into water butterflies that fluttered before falling back into the teacup.

"In this state, apart from the worm silk, it can still use other skills. Apart from that, it has also awakened a new racial skill. Psychic power... has replaced the worm silk as its limbs at this stage."

"From the energy value, perhaps its cocoon form is a commander race."

After Shi Yu finished speaking, Hua Xiajin couldn't react for a moment.

However, after careful consideration, she suddenly looked at Shi Yu and suddenly realized what he meant.

It was one of the rules of racial evolution. A pet's evolution couldn't exceed the level of two major races.

However, if the cocoon was also considered an overly evolved race, and compared to the Green Silkworm, it had already crossed a race level. When it broke out of the cocoon again, in theory, the greatest possible race was not a monarch, but an overlord!

Of course, it was still too difficult to evolve to an overlord race. The overlord races were all the pets of the natural world and weren't so easy to be born. But even so, the commander species cocoon undoubtedly strengthened the evolution potential of the Green Silkworm, making the race it might reach after evolution even higher!

"Ridiculous." She stood up.

"It's said that your Green Silkworm obtained the inheritance of an overlord-level Dream Shell in the ancient ruins?" She looked at Shi Yu and muttered, "This... Could it be the key to its evolution into such an excessive race?"

This cocoon state was too important, it was greatly increasing the potential of the Green Silkworm race after their first evolution.

Although after the Green Silkworm turned into a butterfly... According to the evolution rules, it could still evolve infinitely, from a butterfly to another form...

However, subsequent evolution was undoubtedly more difficult than the first evolution. From worm to cocoon to butterfly, it was a natural law. However, from butterfly to another butterfly or creature, it was considered a racial mutation evolution. There were very few Beast Tamers who could nurture it to this extent. For most Beast Tamers, a single evolution was the limit of the green worm.

However, if other Green Silkworms could also evolve one more time like Shi Yu's Green Silkworm, awaken another racial skill, and increase their life level two times in a row, it would definitely be a major discovery that crossed the era for the Beast Taming Domain.

This meant that the green worm had completely stood up!

The cost of ordinary people becoming Beast Tamers was greatly reduced, but their growth potential increased greatly.

However, considering the specialness of Shi Yu's Green Silkworm, she also felt that it was almost impossible to replicate.

"That's a possibility. I'm also researching it," Shi Yu said.

In fact, he felt that the form of the worm might not have anything to do with illusions or spatial skills. The most likely related skills were Absolute Sleep and deterrence.

The cocoon was a special sleeping state, and because his Green Silkworm could sleep too well, had absolute sleep, and its spiritual power was off the charts, it was not that difficult to understand if it could control its lucidity in the cocoon state and transform its spiritual power into Psychic power.

"You have an idea?" Legend Hua was surprised.

"This is a very meaningful study. If there are any results, it will be a revolution for the entire Beast Taming Domain of Dong Huang. If you need any help, Student Shi Yu, you can contact me at any time." Legend Hua smiled and said, "By the way, what evolution plan is your Green Silkworm using?"

Legend Hua didn't suspect that this wasn't the Green Silkworm cocoon, but she was more curious now. Which path did Shi Yu choose to let the Green Silkworm evolve?

"The Space Crystal Butterfly?"

When she thought of the nature of Shi Yu's Green Silkworm, she couldn't help but judge. With Shi Yu's potential, getting the Space Crystal Butterfly evolution plan shouldn't be difficult, right? It was the same as that little kid Yin Zhengfan.

Shi Yu smiled awkwardly and said, "I didn't prepare evolution materials for it according to the known evolution pathways. Instead, I plan to study the evolution path myself, just like the seniors."

Legend Hua's expression froze.

Huh?

"After all, it has already mastered attack skills before evolution. Breaking out of the cocoon shouldn't be a difficult task, so it's better to choose some evolution materials that it likes."

After Shi Yu finished speaking, Legend Hua's expression eased. This made sense, but was this really scientific?

He was using evolution materials to awaken new racial skills.

Was he someone who had mastered the cocoon breaking skill before evolution and then fed a bunch of materials that you liked to evolve? No, this was definitely against common sense. It was an exception! After all, the Green Silkworm was one of the races that was least likely to learn other skills. Legend Hua looked at Shi Yu and Buggy in silence.

Talent appeared in every generation...

"Legend Hua..."

"Just call me Aunt Hua," said Legend Hua.

Shi Yu was stunned before saying, "Aunt Hua."

At the side, Buggy glanced at Shi Yu. She asked him to call her auntie, and he called her auntie? Call her sister! Shi Yu!

"It shouldn't be a problem for me to bring it to participate in the Butterfly Meeting, right?"

"No problem." Hua Xiajin Legend nodded and said, "Even if you don't want to participate, I'll drag you along. Right now, I might want to know more than you what race it will be after it breaks out of the cocoon."

"Moreover, it might even have a chance to obtain the only gift of the butterfly god."

In the Butterfly Convention, every insect cocoon could obtain the Butterfly God's Feather Blessing and increase its evolution potential. Under the Butterfly God's blessings, it could accelerate the evolution process.

It was said that the creature with the greatest potential after evolution would also receive additional gifts from the butterfly god.

Shi Yu asked curiously, "Do you know what this gift is?"

Hua Xiajin smiled and said, "Of course, because I've received a gift once."

"My 'Myriad Flower Butterfly Fairy King' evolved to an overlord race because of that gift."

"At the same time, it's also the first and only Myriad Flower Butterfly Fairy King in the world. I even named it." Hua Xiajin smiled.

Shi Yu was stunned.

"You should know that the Butterfly God was a pet cultivated by that senior with the evolution talent. That senior had tried many times on the Butterfly God to let it break through to the Mythical Race. Therefore, he prepared many evolution materials."

"Of course, the final outcome was still failure. Some of these evolution materials were used, and some were left behind. The remaining evolution materials were the gifts prepared by the butterfly god."

"Although it's already useless to it, through its modification, these evolution materials can allow the evolved creatures to have the opportunity to evolve again. After all, they are materials prepared to break through to the Mythical Race. Even if some of their strength dissipates and only remains, they are still a rare treasure for races below high-level overlords."

"Is that so..." Shi Yu was shocked. Evolution materials prepared for evolutionary Mythical races?

He was suddenly even more interested in the so-called gift.

But then again...

Shi Yu suddenly looked at Buggy. After Buggy broke out of its cocoon, would the remaining cocoon shell be an extremely rare material?

Could it be used as fertilizer for Baby Ginseng?

Buggy:??

"In short, I look forward to the day you appear in the Butterfly Meeting." Hua Xiajin smiled at Shi Yu and the others.

"I'll definitely go. Thank you for coming specially," Shi Yu said.

"You're welcome." Hua Xiajin smiled.

...

Next.

Shi Yu and the legendary Hua Xiajin chatted a little more.

A moment later, Shi Yu finished registering and left.

Next, Shi Yu only had to wait for the opportunity to replicate the mutation in two days and the Butterfly Meeting in three days.

However, there were still a few days. Shi Yu did not plan to stay idle.

After chatting with Legend Hua for a while, Shi Yu suddenly had an idea.

Could he really develop an evolution plan to let other Green Silkworms evolve into cocoons?

If it could be researched, this might be super rare knowledge that was not inferior to the Iron-eating Beast's final evolution plan.

The power of the iron-eating beast's evolution plan was that it could evolve into an overlord race and become the only channel to stabilize the breeding of overlord races.

However, the disadvantage was that the restriction on evolution materials belonged to the middle and high-end markets.

The evolution plan of the Green Silkworm cocoon was popularization.

As long as the materials needed weren't that expensive, the popularization would definitely be very good. After all, the Green Silkworm was everywhere. There was no difficulty in capturing it, the difficulty of feeding it, or the difficulty of contracting it.

It was indeed as Legend Hua had said. If such a pet could have an additional evolution potential and reach a low threshold, it could definitely have a huge impact on the current Beast Taming Domain.

It would greatly increase the basic strength of the Beast Tamer domain.

Sometimes, universalization was the rarest. Quantitative change could cause a qualitative change.

What many people lacked was an opportunity to become a professional Beast Tamer with a relatively low threshold.

If a country could achieve a nationwide number of Beast Tamers, the probability of producing strong people would definitely be much higher than before. When there was a war, it could also have more wartime power, so that some people wouldn't be completely unable to resist the invasion.

After leaving Hundred Butterfly Town and entering a small path, Shi Yu entered the ruins space.

He opened the skill index and flipped to the page of Absolute Sleep.

“If I give an ordinary Green Silkworm as an evolution ingredient to teach Absolute Sleep and some other materials for strengthening mental skills, will it also be able to transform into a cocoon race first?”

As he thought about it, Shi Yu felt that he could give it a try. After all, if he succeeded, an Iron-eating Beast and a Green Silkworm would directly change the power of Dong Huang in the future. It could greatly prevent the disaster that had happened in history from happening again!

During the war of totems, the rations of ordinary people and wild beasts were no different. This was also a country with many disasters.

Shi Yu shook his head. Although he wasn't from this world, or to be precise, his soul wasn't from this country, after staying here for so long, he didn't feel that unfamiliarity anymore. After understanding the history here, he slowly integrated into it.

“You guys are all mocking me for being an Iron-eating Beast Knight, but when the time comes, everyone will have an Iron-eating Beast and a Green Silkworm. This is the mainstream...!”

“Alright, skill teacher, evolution planner. Looks like I really have to become a feeder.”

Shi Yu felt that if he hadn't gone to find that stone statue and been caught by Lu Qingyi, he might have already carried out his initial plan. He would sell the worm silk and become rich. Then, he would become a legendary feeder and retire happily.

After digging another pit for himself, Shi Yu's gaze returned to his green worm.

As it approached evolution, Shi Yu confirmed its information again.

[Name]: Green Silkworm's cocoon

[Attributes]: Worm

[Race Level]: In evolution

[Level of Growth]: Commander Level

[Skill]: Worm Silk (Dao Proficiency), Absolute Sleep (Perfect), Illusory Phantom (transcendent), Deterrence (Perfect), Super Sight (Perfect), High Speed Healing (Perfect), Space Shackles (transcendent), Instant Transmission (transcendent), Concealment (Perfect), Psychic (Dao Proficiency)

Energy Points: 388,69

These were all the gains Shi Yu had gained in the past three months.

Shi Yu had upgraded its mid-level skills, Super Sight and High Speed Healing, to Perfect Level.

The high-level skills “Absolute Sleep”, “Deterrence”, and “Concealment” had also been upgraded to Perfect Level.

As for the two offensive skills, “Phantom Illusion” and “Spatial Shackles”, as well as the spatial divine skill, “Teleportation”, they had even reached perfection, which was the maximum level of non-racial skills.

In these three months, among Shi Yu’s pets’ skills, the transcendent level was finally not limited to low and intermediate skills. It was finally time for high-level skills.

Under the perfect level, the skill actually wouldn’t have much changes. It still belonged to the skill’s own abilities and scope of effect. It belonged to the peak of a skill. After reaching the transcendent level, it would upgrade to have some other characteristics.

Buggy’s new ability was probably...

Perfect-grade super vision: Energy Vision, Illusion Counter. It could see through the size of the opponent’s energy and determine the strength of the enemy.

Perfect Level High Speed Healing: After paying a huge amount of energy, it can recover all ordinary injuries in one second and ordinary injuries in a designated group. The word High Speed is completely reflected, almost instant healing.

Of course, this skill only targeted ordinary physical injuries. It was useless against mental, soul damage, and some special states.

Perfect Level Absolute Sleep: At a faster speed, in less than a minute, digest the nutrition in the body, unearth the hidden limit of the body, and transform it into physical fitness. Of course, it can only be used once in a short period of time or once in a battle.

Perfect Level Deterrence: Can cause substantial physical damage, even interfere with the weather, and stimulate the battle intent of teammates.

Perfect Level Concealment: It can be in a Concealment state for a long time until the physical fitness is exhausted and the duration is maintained to the limit.

These all made Buggy’s strength undergo a qualitative change. However, because there was too little time, Shi Yu didn’t have time to max them out.

He looked forward to the concealment after transcendent. At that time, not only could Buggy hide itself, but it could also bring items and teammates to hide.

What really made Shi Yu feel that the change in Buggy’s strength was the three transcendent high-level skills, Instant Transmission, Space Shackles, and Illusion.

Transcendent Level Instant Transmission: It can teleport over a long distance. With enough energy, it can instantly let the worm bring a large number of items and life forms from one end of the city to the other end of the city. This distance will continue to grow as its strength increases. This is only a conventional ability. The most exclusive feature of transcendent Level Instant Transmission is that the worm can teleport skills!

Creating a Psychic team and teleporting the Psychic team to descend a thousand meters away!

To attack the enemy across super long distances!

The premise was that there was an accurate lock-on method. On this point, there was a super strong Psychic perception domain at the maximum level. It could be used together.

Transcendent-level spatial shackles: Apart from the strength of the spatial shackles and the increased damage of the spatial oscillation, the spatial shackles can be preserved for a long time. They can be upgraded to a seal skill. Buggy can let the spatial shackles escape its control and stay in the outside world for a long time. As its strength increases, it can even be almost permanent.

It could use the spatial shackles to seal certain things in an alternate space. If creatures inside tried to struggle, they would suffer the damage of spatial oscillations. If outsiders tried to open the shackles, they would also suffer the oscillation attack of the spatial domain.

At the start, the first thing Shi Yu thought of was to use this skill to regularly preserve the nutrients of the ginseng baby and make ruins treasures for future generations to play with...

Transcendent Level Phantom Illusion: It can allow the created illusion to leave the main body and exist in the outside world for a long time. It's equivalent to a program that can allow it to complete a certain amount of protective missions. Even after the main body dies, as long as the energy isn't exhausted, the illusion still has a chance to be maintained. Back in the Ping Cheng ruins space, the Dream Shell's Phantom should have belonged to this level.

Shi Yu felt that he had the potential to build ruins... Now, he even had a guardian illusion.

At the moment, with so many divine skills added to its body, it created the rich foundation of Buggy's foundation.

Perhaps nothing could be seen from the cocoon state, but Shi Yu believed that his investment was worth it. All its heritage would erupt perfectly during evolution!

Thinking about the luxurious attributes of Buggy, even Shi Yu, the Beast Tamer himself, couldn't help but sigh... His cocoon was indeed unscientific...

Chapter 197: Baby Ginseng Is the Big Money-grubber

After signing up, Shi Yu fell into deep thought.

How was he going to use it in the next two days?

Start researching ways to let ordinary Green Silkworm evolve into a cocoon race now?

Or should he continue to increase points, meditate, or study?

If he gave it a try, he might be able to maximize Buggy's skill.

However, Shi Yu felt that it didn't mean much.

The evolution big boss had said that if one wanted to be powerful after evolution, apart from some exceptions, it was fine to train racial skills.

The other big bosses had also said that if they wanted their pets to grow faster, they just had to train their racial skills.

Race skills were the foundation of a pet.

It concerned growth and evolution.

No matter how well one cultivated non-racial skills, it didn't have much impact on the growth and evolution of the pet. It only added battle power.

It didn't matter how much the energy value of the three months worm had increased from more than 20,000 to nearly 40,000.

But actually, most of the energy was added when increasing Psychic power.

Shi Yu maxed out the three high-level skills. The upgrade to the worm's growth was not even as big as a low-level skill.

This was the difference between racial skills and non-racial skills.

This was also why leveling up to the level totem required transcendent-level super racial skills, and not just any transcendent-level skill.

After convincing himself, Shi Yu understood.

Work and rest!

He had been cooped up in school for three months. It was time to relax in front of a big event.

He summoned all his pets and said to Eleven, Buggy, Baby Ginseng, and Little Chi Tong,

"In the next few days, how about we eat all the unique delicacies in Divine Capital?"

It was time to reward himself.

"Wuu!" "Yi!" "Mi!"

At the mention of food, Eleven, Baby Ginseng, and Little Chi Tong weren't sleepy anymore.

To be honest, although Shi Yu was giving them the most nutritious and suitable food to absorb now,

But eating this kind of thing, having nutrition didn't mean that 100% of it matched the taste. It didn't mean that it wouldn't get sick of it.

For example, ginseng baby liked to drink nutritious sodas.

The food Shi Yu mentioned was definitely not nutritious food that could promote growth for them, but it was definitely food that could satisfy their mouths and pleasure their hearts.

The few pets, even Eleven, felt that they could squeeze out the time to eat.

However, when Shi Yu finished speaking, Buggy revealed a confused expression.

It wanted to say something, but unfortunately, it didn't have a mouth.

Buggy:!!!

But it couldn't eat!

Ah!!!

Buggy hated it.

Wait a minute, Little Chi Tong didn't seem to be able to eat traditional food either?

It suddenly looked at Little Chi Tong.

Little Chi Tong also looked at it.

"Mi!"

It was not a big problem, not a big problem. After it burned the food with flames, it could still vaguely feel the taste.

Buggy:???

Buggy:???

Was this scientific???

It had seen burning paper money for undead, burning clothes for undead, but it had never seen burning food for undead!

"Then it's decided happily. Buggy, don't be anxious. Bear with it for three more days ~" Shi Yu comforted.

Buggy: T.T

...

For the next two days, Shi Yu really brought his pets to various places to eat and eat.

Every region had its own unique delicacies.

Shi Yu was also a rich person. It didn't matter if it was expensive or not, he just had to eat it.

He ate it himself, and so did his pets.

For two days, there were twelve meals, breakfast, morning tea, lunch, afternoon dessert, dinner, and supper.

After the entire process, Shi Yu felt very fulfilled. He suddenly felt that this was the correct way to transmigrate life.

Mechanical Tree Club.

When Boss Meng saw Shi Yu again, she was a little shocked.

"Student Shi Yu, are you a little fat?"

“The delicacies in Divine Capital are very good,” Shi Yu smiled and answered.

Actually, it wasn't that much fat. It was only ten pounds.

It didn't matter much, because when he added points later, his body would automatically adjust to the most perfect state due to the training effect.

Because of this function, Shi Yu had been gluttonous for a long time in the ancient capital. It wasn't considered gluttony... Because his physique far exceeded his peers, there was indeed a little too much nutrition needed to maintain his physical fitness every day.

Eleven and the others were the same. Although Eleven and the others ate a lot and absorbed a lot of nutrition, these things were sometimes not used to become stronger, but purely to maintain their bodily functions.

It was not like some totem creatures wanted to sleep for several years or decades. Instead, with such a powerful body, even if they didn't fight or train, just maintaining their life activities required a lot of nutrition every day.

“Ah, is that so?”

“Why didn't you look for me? I'll treat you.”

“How long do you plan to stay in Divine Capital? How about I treat you to a few meals later?” Boss Meng said generously.

“I'll look at my itinerary later. I'll definitely do it when I have the chance.” Shi Yu smiled and nodded. He decided to forget about this. After all, he was treated to a meal, so he wouldn't let go when he was eating.

“Alright, but you came pretty quickly. The delivery guy just left, and those mechanical devices are in the warehouse now.”

“I rushed over when I received the call,” Shi Yu said.

“Well, when the rookies are ready, we'll start the mechanical modification of the mutant tree,” said Boss Meng Qing with a smile.

The mutant tree was only a transcendent species creature, but after its mutation evolved into a mechanical tree, it was a high-level commander species.

Generally speaking, this kind of modification opportunity was reserved for the newbies with potential in the club's green training camp.

This time, Shi Yu happened to be in time for the Mechanical Tree Club to help the club's new Beast Tamer evolve. His luck was pretty good.

A moment later, the preparations at the club were completed. Boss Meng brought Shi Yu to watch.

This time, Shi Yu also brought some things that feeders should bring.

Otherwise, if he only touched it later, he would have looked weird. It was too fake.

In the huge modification room, as a bystander, Shi Yu was slightly shocked the whole time.

There were various dazzling complicated machines everywhere in the room. The two transcendent-level mutant trees stood at fixed positions nervously, nervously, and expectantly.

Before the mutated tree evolved, it was very ordinary. It was like a dry, bald, leafless tree with only one eye on the trunk.

At this moment, beside the strange tree, the two Mechanics were communicating with their Beast Tamers. Obviously, the one in charge of helping the strange tree transform and evolve was not the Beast Tamer himself, but the professional Mechanic in the Mechanical Tree Club.

“The mutation and evolution will take about half an hour. The two mutated trees have to undergo a physical examination before and after evolution. Student Shi Yu, do you want to record some data?” Meng Qing asked after bringing Shi Yu over.

After all, Shi Yu said that he wanted to study mutation evolution, so he definitely had to collect the data before and after the evolution of the mechanical tree.

“Sorry to trouble you,” Shi Yu said bluntly. He had to put on a show.

Otherwise, if he just said that he wanted to touch it after evolution, he would be regarded as a pervert.

In fact, this kind of tree was still alright. In the future, if the skills that they liked appeared on the elves, dragon girls, angels, and succubi, what would he do?

With conflicted emotions, Shi Yu and the others arrived.

The four people in the modification room looked over.

The two young and middle-aged Mechanics said, “Boss, you’re here.”

“This is Student Shi Yu, the one I told you to observe and study.” Meng Qing smiled and introduced.

As soon as he finished speaking, the four of them smiled and nodded at Shi Yu.

However, this smile didn’t look like that kind of warm smile at all.

Instead, it looked like he wanted to show a polite smile, but he couldn’t help but laugh even more crazily.

“I’ve heard so much about you, I’ve heard so much about you.” Because of Meng Qing’s introduction, it could also be a reminder from their club partner. Even if they didn’t know Shi Yu at the start, they would definitely investigate later.

This investigation was good.

Shi Yu’s expression was indifferent. So quickly did they do their research. The old matter of riding the Iron-eating Beast and sweeping through the enemy had been investigated!

Even the Beast Tamers who were playing antiques next door felt that they weren’t as good as Shi Yu... at playing this type of thing.

The Iron-eating Beast Knight was awesome!

However, the few of them had to admit that as the top scholar of the Ancient Capital's vocation assessment, the genius archeologist who discovered the evolution of the iron-eating beast was really impressive. They felt ashamed of their inferiority.

Such a genius actually came to visit the Mechanical Tree Club. What a rare guest.

"You're welcome, you're welcome." The corners of Shi Yu's mouth twitched. He gritted his teeth gently and smiled.

Are you all holding in your laughter???

Their pets' skills were very good, but in a while, they'd be his!

"Let's begin." Boss Meng coughed dryly.

"Alright," everyone replied.

The preparations were done quickly.

Soon after, the preparations were almost done.

After the physical examination of the mutant tree, the mechanical armor-like device was also ready.

During this period, Shi Yu also learned a lot of information about mutation.

This skill was undoubtedly very strong.

At this moment, the mutant tree was only a wood-element creature, but through these special modification devices, it could give them the three-element tri-colored bullets with the ability "Fire, Ice, and Electricity".

Shi Yu believed that Baby Ginseng was very likely to be able to use this skill to mutate a second powerful attribute if it could even give this attribute skill a mutation.

"There!!" "There!!" A moment later, the mutant tree was ready.

Then, under everyone's gaze, the two Mechanics began to install mechanical armor for the strange trees.

This process took more than 20 minutes.

Shi Yu and Boss Meng were also talents.

They discussed various things. From the initial skill of the mutant tree, to the modification device, and to which of the five major consortiums was more profitable.

In the end, the two of them reached a common conclusion. As the five major consortiums of the Beast Tamer Market, no matter how much money they earned, they couldn't compare to the officials who monopolized tobacco and real estate.

The annual income of the Dong Huang Tobacco was all towards trillions. It could easily defeat a single financial group.

The price of houses made ordinary people feel even more despair. What was even more uncomfortable than Earth was that the more expensive a house was, the further away it was from danger. Therefore, even though they knew that the houses were expensive, many ordinary people still worked hard to save money, hoping to live in a relatively safe place.

It didn't matter if he was a Beast Tamer, but he had to live in a place where Beast Tamers were strong to feel safe.

It could be said that this income had supported countless overlord pets...

"It's still strength." Shi Yu sighed. Without strength, the Dong Huang Association couldn't monopolize these profitable businesses.

"It's evolved." At this moment, Meng Qing suddenly spoke. Shi Yu also looked at the arena.

Buzz!

White evolution light blossomed on the mutant tree. A moment later, a brand new armed mechanical tree appeared in front of Shi Yu.

Shi Yu looked at the changes in the information on the index. His mood surged and he was tempted.

"Invincible!"

"There's finally a commander species pet!"

The Beast Tamer of the two mechanical trees was the most excited at this moment. His joy was already difficult to hide.

"Masters, it's been hard on you," they said to the two Mechanics who helped modify it.

The two old men from the club chuckled and said, "Thank you, Boss."

The two young Beast Tamers hurriedly nodded.

"From today onwards, the Mechanical Tree Club is my second home."

"Boss, feel free to ask us to do anything from now on."

The two of them looked at Meng Qing gratefully.

After all, both the mutant tree and the evolution equipment were provided by the club.

They only needed to follow the contract and work for the club for a period of time before they could change their fate. For most Beast Tamers with poor financial conditions, this was a very good path.

"Look at how happy you are. You can be happy when the pet's growth level also breaks through to commander rank." Meng Qing smiled and turned to look at Shi Yu. "Let's go and take a look too."

"Yes." Shi Yu had been waiting for this sentence for a long time.

In the arena, the owners of the mechanical tree were happily patting them. After Shi Yu passed by, he also patted them.

[Confirm recording]

Skill: Mutant

[Skill Level]: Advanced

< Introduction > It's a wood-element skill. It can collect the power of mutation through external stimulation. Whether it can perfectly absorb the power of mutation to complete the racial mutation depends on the skill level and the pet's growth level.

Initially, Shi Yu had some concerns about the mutated skills because in the information that had been announced, there didn't seem to be any mutated trees that mutated to above the monarch race.

But now, after seeing the description of the mutants in the skill index, many of Shi Yu's concerns disappeared.

It seemed that this was clearly an ability that was extremely difficult to increase proficiency and difficult to achieve with mutation conditions.

At the moment, no one had indeed systematically concluded the method of the mutant tree to increase the level of the mutation skill. However, Shi Yu didn't mind because he could directly increase his points until they reached the maximum level. At that time, no matter how strong the mutation power was, Baby Ginseng could still perfectly absorb it.

"Damn." But soon, Shi Yu's face fell. This was because after confirming that the mutated physique was used on the ginseng baby, it would probably cost a lot to modify the mutated environment.

Mutated light, mutated water, and mutated soil didn't seem to be cheap at all.

If he wanted the monarch species ginseng baby to evolve, Shi Yu definitely wouldn't be willing to give in. He had to mutate towards the overlord race no matter what.

He even wanted to charge at the high-level overlord race.

In nature, such a pursuit was probably very difficult to find a mutated environment that perfectly matched the ginseng baby. It most likely had to rely on itself to shape it, like the materials of the worm.

It would be best if they could find it in nature. Even if they only fulfilled one of the requirements, it would save a lot of money. If they couldn't find it...

It seemed to be another billion, and it might not be just that... Shi Yu felt that even a certain rich cat might feel dizzy.

Eleven and Buggy had just finished when Baby Ginseng came again. Moreover, it seemed to be the one sucking in gold.

"But everything is worth it, worth it... Constructing an overlord-level battleship requires 100 billion lives. I won't invest even a fraction of that. I'll change my overlord potential. It's worth it. When the time comes, after Baby Ginseng is powerful, I can earn it all back..." Shi Yu comforted himself. This was a strategic-level supplement. In the future, it had to withstand the damage of super skills for him. He had to spend this money!

“Student Shi Yu... Your expression...” Meng Qing suddenly realized that Shi Yu, who was staring at the mechanical tree, had a bitter expression.

“It’s nothing. I just suddenly feel that mutation is too difficult. I don’t understand...”

Everyone: “?”

Calm down, your archeology is already very outstanding, there’s no need to dig into the horn of the feeding industry!

Chapter 198: The Butterfly Meeting Begins

Boss Meng thought that she had already treated Shi Yu very warmly.

However, after studying the mutation evolution of the mutated tree, Shi Yu seemed to have mixed emotions.

One moment, he was happy, the next moment, he was depressed.

She didn’t know what Shi Yu was thinking. Perhaps this was a genius’s thought process!

Next, Shi Yu stayed at the Mechanical Tree Club for a period of time.

After all, he wasn’t a jerk. He couldn’t replicate the skill and left after wiping his hands.

Then, he continued to study it like a model.

Only when the inspection of the two mechanical trees after evolution ended and they could be led away by the Beast Tamer to train did Shi Yu escape.

“How is it? Did you gain anything? Do you want to continue researching?” Meng Qing asked.

“No, it’s been long enough. Let them go back with the Beast Tamer,” Shi Yu said. “The information I just obtained is more or less enough for me to digest for a period of time. If I need it in the future, I’ll definitely look for you again.”

“Alright.” Boss Meng laughed and said, “It’s no big deal. You’re welcome anytime.”

“By the way, do you want me to bring you for a meal tonight?”

At this moment, just as Shi Yu was about to continue speaking, his cell phone rang. It was a call.

“Phone? Answer it,” Boss Meng said.

Shi Yu glanced at the name and chose to answer.

A questioning voice immediately came from the other side.

“Shiyu, do you want to go together? Where are you now?”

The person who called was that little Gu Master, Miao Dongdong. Back then, Shi Yu and him said that they had a chance to participate in the Butterfly Meeting together.

After all, they were in the same school. They could chat together and relieve their boredom.

The Butterfly Meeting was tomorrow. When Miao Dongdong saw that Shi Yu still didn't update him, he couldn't help but call and ask.

He had to be with Shi Yu. After all, he was also very curious about what Shi Yu's Green Silkworm could evolve into.

At that time, there would be so many people and cocoons there. If he didn't stay with Shi Yu, he would probably miss the evolution scene.

"I'm outside now. I'll send you the meeting location later."

"Alright!" Miao Dongdong said.

The two of them spoke briefly before hanging up.

Boss Meng said, "What's wrong? Is anything the matter?"

Shi Yu said, "Yes, I might not be able to make it tonight. Next time, I have something to do later."

"Boss Meng, thank you."

It was tomorrow, but at night, Shi Yu indeed planned to rest well and adjust Buggy.

It was better to take the opportunity to leave.

"Alright." Meng Qing didn't say anything. She just smiled and said, "Are you leaving now?"

"Let's go now," Shi Yu said.

"Then I'll send you off," Meng Qing said.

...

At this moment, there was still a day until the start of the Butterfly Meeting.

However, the popularity of the Butterfly Meeting had already been completely raised.

At the moment, it had already firmly occupied second place on the Internet's trending list. After all, it was a guardian-level creature.

As for the first place on the trending list, it was the official love news of Heavenly King Zou of the Dark Club, which suppressed the guardian news.

This was one of the super-star Beast Tamers of Dong Huang, a top figure in the club system, a national celebrity, and a heavenly king. This was the title given to the best Beast Tamers of these club systems.

The champion of the National League was called the national champion.

The champion of the club's master competition was called Heavenly King.

The champion of the Beast Tamer Troops' martial arts competition was called the Soldier King.

Because the participants of these competitions were all under 30 years old, the Beast Tamers with these titles were basically the best and leading figures of the younger generation.

"A top-notch master that can fight an overlord, Heavenly King Zou." After leaving the club, Shi Yu took a taxi to Hundred Butterfly Town. He planned to stay outside the town and wait for the Butterfly Meeting. At this moment, he was sitting in the car, watching the news and clicking his tongue in wonder.

He was a super genius on the same level as Senior Lu.

The national competition champion, the master competition heavenly king, and the martial arts king in the army. In terms of battle power, they were actually from low to high.

The reason was very simple. The National League targeted students under the age of 25. Ordinary masters were the limit.

The master competition and military arena were targeted at all young Beast Tamers under the age of 30, so it was not strange for top-notch masters to appear.

The reason why the age restriction was so strict was that, according to Shi Yu's understanding, even the world competition required one to be under 30 years old. It was very simple.

This was because before the age of 30, Beast Tamers were at the most efficient stage to increase the level of the Beast Taming Space. After the age of 30, although they could still continue to become stronger, the efficiency would be a little worse. After that, as the age of Beast Tamers increased, the efficiency of leveling up would become lower and lower. When they were old, forget about advancing, it would be pretty good to maintain their current state.

Therefore, in the Beast Tamer domain, there was a saying that if one couldn't become a master under the age of 30, they would have no hope of becoming a legend for the rest of their lives. If one couldn't become a legend under the age of 30, they would have no hope of becoming a legend for the rest of their lives.

In the legends of Dong Huang, there were a total of seven people from Emperor Shi to the Mechanical Giant. All of them confirmed this saying. They had all advanced to the Legendary stage before 30 years old. Even the evolution talent big shots were legendary before 30 years old.

"Damn it." However, a relationship scandal actually suppressed the heat of the guardian. A moment later, Shi Yu felt that it was ridiculous.

There was no one else who could show off their love to the extent that everyone in the country knew about it. If he had been this popular back then, the price of the Iron-eating Beast would have at least doubled.

Shi Yu then looked at the trending topic of the Butterfly Meeting.

According to the information, up until now, more than 73,000 Beast Tamers had signed up for this year's Butterfly Meeting. Most of them were Beast Tamers trainees who were led by Beast Tamers from schools, clubs, and other institutions.

"I knew it." Although the official suggestion was that it was best to have professional strength before participating in the Butterfly Meeting, in fact, most of the people who contracted the Green Silkworm were still trainee Beast Tamers. As for the problem of him going to the Divine Feather Mountain Range not being safe, it was easy to solve it. He could find a bodyguard.

Soon, Shi Yu arrived outside Hundred Butterfly Town.

"Handsome, there are a lot of people. I won't drive in. Do you want to walk two steps?" In the taxi, the driver looked at the sea of cars and people in front and said to Shi Yu behind.

"Sure." Shi Yu nodded. After paying a few hundred car fare, he realized that there were indeed more people today than on the day he came to register. The number 703 might even increase before tomorrow.

They were all rushing to register on the last day... Shi Yu didn't know where they planned to sleep... From the looks of it, most people were going to pitch tents. There was definitely not enough room in Hundred Butterfly Town.

After Shi Yu got out of the car, he yawned and randomly found a place to enter the ruins space.

"Holy shit."

He didn't hide it either. Two or three passers-by who accidentally saw the living person suddenly disappear widened their eyes.

"He was alone just now. He's gone."

"So what? Look at your ignorant appearance... Do you know Instant Transmission? F*ck, shameless. He used Instant Transmission to cut the line? This big boss is a little petty."

Shi Yu definitely didn't cut the line.

In the ruins space.

Shi Yu summoned four pets. At this moment, Buggy's eyes were filled with tears. It had, for so long, waited. It could evolve soon. It was bitter.

"You're going to evolve tomorrow. Are you looking forward to it?" Shi Yu smiled at Buggy.

"Ji!!" Buggy transmitted telepathically. Of course it was looking forward to it.

From the moment it had instinct, it had been looking forward to evolution. It even dreamed that the Green Silkworm in its dream had become stronger through evolution more than once and defeated a group of natural enemies. Now that it finally had this opportunity in reality, the worm was extremely excited.

Most importantly, after evolution, it might become the strongest in the team?

It looked at Eleven, Baby Ginseng, and Chi Tong.

"Wuu. (Good luck, become stronger," Little Eleven said. Seeing Buggy grow from a little worm that he had slapped off a tree branch to this day, although Eleven felt that Buggy wasn't as hardworking as it

was, this shouldn't be Buggy's limit at the moment. It hoped that Buggy would fight it after it became stronger.

"Yi. (Don't waste the Evolution Fruit...)" Baby Ginseng looked at Buggy in pain. Buggy had eaten a bunch of max-level nutritional fruits that it had worked hard to create. If it didn't evolve a little harder, Baby Ginseng would feel that it was also trash.

"Mi. (After evolution, it can eat!)" Although Little Chi Tong didn't know what was going on, after all, when it entered the team, the worm was in its cocoon form. However, seeing that everyone was encouraging the worm and telling it not to be nervous, Little Chi Tong also encouraged the worm in his own way.

"Ji!!" Buggy cried. A leader was still a leader. Even if it could crush Eleven after evolution, it still acknowledged this leader!

For the sake of its evolution, Baby Ginseng also worked hard to help create nutritional fruits and assist Shi Yu in increasing his points. Buggy was also very grateful.

As for the little sword spirit, Buggy showed a determined expression. Just wait. Soon, tomorrow, you'll be able to see its true appearance! It's definitely not this miserable cocoon form.

"Alright, everyone rest well today. Let's go see the evolution of Buggy tomorrow."

Shi Yu chuckled. Eleven and the other pets were excited.

The Butterfly Transformation Conference was great. If 100,000 pets evolved together, it would be a huge scene. Eleven and the others were very expectant.

...

It wasn't just Shi Yu and the others. At this moment, every Beast Tamer with the Green Silkworm cocoon was especially looking forward to it.

Unfortunately, their Green Silkworm cocoons were all in deep sleep at this moment. They didn't have consciousness and couldn't communicate with Beast Tamers. Beast Tamers could only have anticipation alone.

On this night, a silver meteor shower streaked across the sky. Countless people looked at the sky and prayed, hoping that their pets could successfully evolve. Miao Dongdong from the ancient capital was also among them.

The person in charge of the Butterfly Meeting, Hua Xiajin, was also standing under the moonlight and looking at the silver meteor shower that suddenly appeared in the sky. Her face was very beautiful under the moonlight.

"Butterfly God has already started preparing."

She smiled and recalled the scene of participating in the Butterfly Meeting when she was young.

At that time, her pet's beautiful figure outshone everyone. In the end, it obtained the recognition of the Butterfly God and laid the foundation for her to become a legend later. Then, which lucky person would it be this time? Shi Yu? Or could it be someone else?

Under countless expectations, the sun rose as usual the next day.

Early in the morning, a large number of Beast Tamers gathered in Hundred Butterfly Town.

Shi Yu arrived at the appointed place and saw Miao Dongdong in a cotton shirt. This young man was very energetic, but Miao Dongdong's first words were, "Did you sleep yesterday? I couldn't sleep. I meditated for the whole night..."

"Uh." Shi Yu touched his cheek and said, "I can't sleep. I'm probably not tired enough..."

Miao Dongdong:???

Why can't I understand what you're saying?

"Wuu!" "Yi!" "Mi!"

At this moment, Eleven and Baby Ginseng, who had shrunk to a mini size, stuck their heads out of Shi Yu's two pockets. The hanging sword on Shi Yu's neck also shook, urging Shi Yu to quickly go to the scene.

"What's the hurry? It hasn't started yet," Shi Yu said. "Buggy isn't even worried, so don't worry."

The three pets : "..."

Was Buggy not worried? It was clearly afraid that it would be too excited and cause the cocoon to explode, so it started forcing itself to sleep. It was still waiting for him to wake it up.

"Cough." Miao Dongdong looked at Shi Yu with an envious expression.

It had an explosive battle power and self-disciplined little Iron-eating Beast, unscientific university student ginseng, and a high-level race. Its predecessor was the little sword spirit of the beautiful general sister. How nice.

In comparison, the parasitic Gu he hid in the Emerald Tree Python and the Shadow Gu in his body were becoming less and less cute.

The Golden Wings Gu that was about to break out of its cocoon... Hopefully, there would be... a surprise.

"Let's go over too," Shi Yu said to Miao Dongdong when he saw the large group walking towards Divine Feather Forest.

"Yes." Miao Dongdong nodded and went over together. Next, the first thing to pass through was the forest between Hundred Butterfly Town and the Butterfly Transformation Valley in the Divine Feather Mountain Range!

This forest was incomparably huge, like a maze. Tens of thousands of butterfly-type pets lived inside, from awakening rank to commander rank.

They didn't like people flying above the forest, so everyone could only walk. It would probably take a long time to pass through the forest, and they couldn't get lost. As for ignoring the butterflies' preferences and flying in the sky, they also had to see who was protecting them.

In the beginning, the Butterfly Goddess's Butterfly Transformation Conference was just to support the evolution of the wild Green Silkworms in the Divine Feather Mountain Range. The Beast Tamer's Green Silkworm was the result of the subsequent communication, it was a supplementary!

Therefore, the butterflies here were just like the citizens of the butterfly god. It was better not to provoke them. This forest was actually the first test the butterfly god prepared for the human Beast Tamers.

"When the Butterfly God woke up, the tens of thousands of butterflies in the entire mountain range were equivalent to the Butterfly God's eyes. It was already watching everyone at this moment." At that moment, the only one flying in the sky was Hua Xiajin, who had once been blessed by the Butterfly God.

She saw that the majority of the troops had already entered the forest from various places and planned to cross the forest soon, so she flew ahead of time to the destination of the Butterfly Meeting, Butterfly Valley!

As for the others... Whether they could reach the end point was not up to her to decide.

Under normal circumstances, 99% of people could still pass normally, but there was also a possibility that some unlucky people would be expelled by the Butterfly God.

After humans and pets lived for a long time, they would be infected by each other's aura. On different Beast Tamers, different pets had their own aura. Some pets were very sensitive to this aura.

Sometimes, some pets with strong perception could even judge a person's good and evil based on this. They could determine whether he was loved by the pets or was enslaving the pets as tools.

Shi Yu's worm had previously sensed an aura that was close to butterfly creatures on Legend Hua.

Therefore, sometimes, the butterflies in this forest would also occasionally replace the butterfly god and expel some trash Beast Tamers who weren't worthy of the butterfly god's blessing.

After Shi Yu and Miao Dongdong entered, a group of Wind Crystal Butterflies suddenly appeared in front of them not long after they left.

A group of Wind Crystal Butterflies wouldn't have strong battle power, but at this moment, when he saw them, Miao Dongdong, who was beside Shi Yu, became nervous.

He said, "I heard that it's not absolutely safe to cross the forest. Sometimes, the butterfly beasts in the forest will even expel humans. And if a battle happens, more butterflies will be attracted to join the battle, so it's best to avoid battle, even if we can win..."

At this moment, the Wind Crystal Butterflies were flying in front of him. Miao Dongdong was extremely nervous.

They were afraid that the Wind Crystal Butterflies would attack them.

At that time, neither fighting nor running would be an option.

However, at this moment, Shi Yu, who had telepathy, heard the message transmitted by the Wind Crystal Butterfly and was very surprised. "What, you want to lead the way for us?"

"Sha, sha, sha ~" The Wind Crystal Butterflies nodded. They sensed the aura of a king from Shi Yu and felt convinced.

They hoped that Shi Yu could obtain pretty good gains in the Butterfly Meeting and be noticed by the Butterfly God.

"Thank you." Shi Yu smiled as he looked at the cute Wind Crystal Butterflies. Good heavens, had Buggy's perfect-level deterrence taken effect? Buggy didn't come out either...

"Speaking of which, why were you so nervous just now? Aren't they all pretty friendly? They even led the way. I heard that it's very difficult to walk here." Shi Yu looked at Miao Dongdong.

Miao Dongdong:???

Chapter 199: Buggy's Final Evolution

Divine Capital, Divine Feather Mountain Range, Butterfly Valley!

A huge fairy that was ten meters tall and looked like a flower fairy flew in the sky like a butterfly.

Myriad Flower Butterfly Fairy King!

On the overlord butterfly, Legend Flower stood there and looked at the Beast Tamers who were arriving slowly below.

The Butterfly Meeting would officially begin at noon. The Beast Tamers entered the forest from 6 a.m. to dawn. Normally, even if they got lost a little, they could reach here before 12 a.m.

Moreover, there were so many people. Even if there were really a few people who were bad at directions, as long as they followed the large group and weren't targeted by the butterflies in the forest, there wouldn't be any problem.

"He's here too."

As a legendary Beast Tamer, Legend Hua had very good vision. His vision immediately clearly saw Shi Yu, who was communicating with Miao Dongdong in the crowd.

At the same time, Miao Dongdong was in disbelief.

"So easily?!"

Beside him, Shi Yu had a matter-of-fact expression. Why would he think he would get lost in the forest?

Anyone could successfully reach this place.

“Please don’t summon the cocoon first. After the Butterfly God descends, you can summon the cocoon to its designated area.” As more and more people gathered, Legend Hua’s voice entered everyone’s ears.

Many people looked up at the Ten Thousand Flower Butterfly Sprite King with adoring expressions.

It was good to have an overlord pet.

Legend Hua was also beautiful.

“It seems like we still have to wait for a while.” Miao Dongdong glanced at the time and said, “I wonder where the other students in the school are. Many people came from Ancient Capital University this time.”

“There are so many children.”

Shi Yu was not concerned about his classmates in the same school as Miao Dongdong. Instead, he sized up many Beast Tamers around and realized that most of them were sixteen or seventeen years old. They looked very young.

Miao Dongdong:???

You’re not that much older, alright?

However, Miao Dongdong looked at Shi Yu, who was wearing a black and red battle suit and a red cloak. He indeed discovered that Shi Yu looked more mature and handsome. The premise was that the little Iron-eating Beast and the little ginseng baby in his pocket didn’t show their cute faces randomly.

“Wuu.” “Yi!”

Eleven and Baby Ginseng asked, “Has the Butterfly God not come out yet? Has the Butterfly Meeting not started yet?”

“Soon, soon,” Shi Yu said.

At this moment, Beast Tamers everywhere in Butterfly Valley were discussing excitedly and expectantly.

It was noisy below, and it was lively. The sound wave covered everything.

In the sky, after a moment of silence, Legend Hua said, “From now on, everyone meditate.”

As soon as she finished speaking, the voices below immediately stopped. Tens of thousands of people suddenly fell silent.

Although they didn’t know what was going on, they guessed that it might be a specific ceremony. Therefore, they stopped discussing and meditated calmly, waiting for the Butterfly Meeting to begin.

“It’s much quieter.” The Legendary Hua Xiajin chuckled.

These guys were too noisy.

There was no ceremony. She just wanted these people to shut up.

Under Legend Hua’s persuasion, even Shi Yu began to meditate.

The Beast Tamers who rushed over later saw that the people who had already arrived were meditating, and they quickly entered a meditative state.

Just like that, in the silent environment, more and more people gathered in Butterfly Valley.

Time passed little by little, and changes slowly began to happen here.

A light wind blew from afar, cooling everyone.

This breeze seemed to be silver, perhaps mixed with silver scale powder or crushed silver worm silk.

In the sky, a silver substance landed in Legend Hua's hand. She suddenly looked up and smiled.

"Stop meditating," she said loudly, her voice reaching everyone's ears again.

At this moment, everyone stopped meditating and opened their eyes to look at the sky.

Silver!

At some point, silver whirlwinds filled the sky. In an instant, the Butterfly Transformation Valley seemed to have become a silver world.

Countless silver substances were swept together like rolling silver waves, extremely dazzling.

"The sky..."

"The sky disappeared!!"

At this moment, the number of people present had already reached 60,000 to 70,000. Many people opened their eyes and looked at the sky in shock.

Because in a short instant, the sky here seemed to have been covered, and the blue sky and sun couldn't be seen at all. Everyone seemed to have been wrapped and enveloped under a silver dome.

The dome shone and was especially beautiful, lighting up the surroundings.

Hu hu hu ~

Hu hu hu ~

Under everyone's gaze, the crystalline silver substance in the sky began to undergo a new change. Like a reverse silver meteor shower, it quickly gathered at a certain point and gradually formed a huge figure with endless fluorescent light. A powerful aura covered the sky.

This figure was incomparably huge, reaching a hundred meters tall. It was like a god. Its entire body was shining with silver light. Even the Legend Hua and the overlord butterfly she rode in the sky seemed like a baby in front of it.

Below, in the crowd, Shi Yu's heart raced like everyone else as he quietly looked at the huge figure that appeared in the sky.

It was a butterfly-type creature more than a hundred meters tall. It had two pairs of wings that looked like a silver ocean of feathers. Its body and head couldn't be seen clearly, but it overall revealed a mysterious and dangerous aura.

Dong Huang's butterfly guardian, Divine Feather Phoenix Butterfly!

Seeing this creature, everyone held their breaths and didn't dare to breathe loudly. After all, this was currently the highest level creature in the world.

"Wuu."

The little sword spirit on Shi Yu didn't say anything. Baby Ginseng was a little afraid and felt that 100 of itself wasn't enough for such a creature. Eleven, on the other hand, looked at this huge creature with shining eyes.

It was huge!

Although it could also become so big after getting its enlargement to the "Dao Proficiency" level, this hundred-meter state consumed too much physical strength. Even if it didn't do anything and only stepped on the ground after enlarging, it wouldn't last more than a few seconds. Could any creature really maintain this state to fight?

How destructive would the battle be?

"!!!" At the same time, beside Shi Yu, Miao Dongdong's body trembled in excitement when he saw the butterfly god.

Such a pet was what Beast Tamers should pursue.

Hu hu hu ~

After the Divine Feather Phoenix Butterfly appeared, it didn't show any special expression. It just continued to flap its wings gently. The endless silver storm turned into a tsunami again and blew. A moment later, not only the sky, but even the ground below the valley turned silver. At this moment, the Beast Tamers standing on the mountain swallowed their saliva.

"Now, you can summon your cocoons. Summon them to the silver area at the foot of the mountain, and you all just stay on the mountain," Legend Hua said again.

"Yes."

Many Beast Tamers nodded and listened to Legend Hua's instructions obediently.

In a moment, countless summoning lights and summoning arrays appeared on the ground at the foot of the mountain.

In the blink of an eye, cocoons appeared in the vast silver area one after another. Tens of thousands of cocoons appeared, and the scene was abnormally shocking.

There were so many cocoons, and they were almost identical. If it weren't for the contractual connection between Beast Tamers and their pets, after evolution later, Beast Tamers might still be able to find their pets.

"Buggy, you can do it."

In the crowd, the inconspicuous Shi Yu also summoned the worm. Because of the insufficient location, his summoning array was released very far away. Soon, an alternative Green Silkworm cocoon appeared in the white sea.

At this moment, the worm had just woken up in confusion. However, after discovering its surroundings and discovering that there were oval sleeping white cocoons everywhere, as well as an incomparably huge butterfly in the sky, it suddenly became excited.

“Ji!!!”

Unlike the sleeping cocoons, Buggy looked up at the Divine Feather Phoenix Butterfly, its eyes shining just like Eleven.

Then, Buggy quickly sensed that the layer of silver substance on the ground was very warm, as if it had woven into a soft bed. Moreover, it slowly released a special power that radiated around. This feeling was very similar to when it ate the nutrient fruit back then. Its evolution potential was slowly changing.

It wasn't the only one. At this moment, every Green Silkworm cocoon could feel the silver land and the silver sky.

It wasn't just here. The wild Green Silkworm cocoons that were everywhere in the entire Divine Feather Mountain Range also had silver wind blowing beside them and integrating into their bodies.

The Divine Feather Phoenix Butterfly was helping more than 100,000 Green Silkworm cocoons increase their evolution potential by itself to assist in their evolution!

“Wu ~” In the sky, the Divine Feather Phoenix Butterfly seemed to have made a sound for the first time. Its voice was deep and distant like the voice of a whale. After it made a sound, its wings began to spread with light. The wings that were like a silver feather sea seemed to have melted into light spots. The light spots in the sky were like Essence Energy, falling towards the green cocoons like a meteor shower.

“During this process, they will be able to accelerate their growth and absorb the evolution power from the Butterfly Goddess. They will begin to complete the final evolution one after another with different talent potential.” Hua Xiajin smiled and looked down.

It was as if she could already see the spectacular scene of the Butterflies' evolution.

It was indeed as Legend Flower had said. At this moment, every cocoon was accelerating the absorption of the evolution power that had yet to be absorbed due to the Divine Feather Phoenix Butterfly's Ascension Talent. Apart from that, this process was even merging the blessings that came from the Butterfly Goddess, increasing its evolutionary potential and absorbing additional evolutionary power.

“Impressive.”

Looking at the silver world in front of them, many Beast Tamers, including professional and master Beast Tamers, were extremely shocked.

Was this the power of a guardian? No wonder it could be called a national guardian.

How much power did it have to bless more than 100,000 cocoons at once?

"I feel that my Green Silkworm will break out of the cocoon soon..." At this moment, Beast Tamers looked down the mountain from various places and spoke if they sensed something.

"Me too."

"My Green Silkworm's consciousness has awakened."

"Mine is trying to awaken a new skill."

"It's starting to try to break free of the cocoon!"

Soon, Beast Tamers everywhere revealed looks of surprise and anticipation.

Of course, there were also people who understood the industry and showed disdainful expressions.

If they sensed that its pets were about to evolve so early, this meant that its pet potential was not good.

It reached its limit before it could absorb and bear the butterfly god's blessing.

Still smiling?

At this moment, nearly ten thousand people sensed the change in their pets.

In fact, their pets were relatively similar.

They didn't use any special evolution plans. They purely relied on the level of the worm silk to evolve.

Green Silkworm, Wind Crystal Butterfly!

With the Butterfly God's blessing, even if the Green Silkworm's worm silk reached perfect level, the Green Silkworm inside might still be able to break free.

Swoosh!!!

Soon after, finally, on the vast silver land, the first cocoon changed.

Chaotic wind blades wrapped around the inside of the cocoon out of thin air. Under the escort of several wind blades and the light of evolution, a Wind Crystal Butterfly broke out of the cocoon and flew into the sky!

Swoosh!!! Swoosh!!! Swoosh!!!

Then, Wind Crystal Butterflies broke out of the cocoons in the same way.

Using the newly awakened racial skill, Wind Blade, they broke the shackles of the cocoon.

The Wind Crystal Butterfly, which was as beautiful as the sky, was extremely beautiful. At this moment, thousands of Wind Crystal Butterflies were the first batch of creatures to evolve. They flew into the sky together, wanting to surround the Divine Feather Phoenix Butterfly and thank it.

"It evolved!"

The evolution of these cocoons seemed to be lit. As a white light lit up, dozens or hundreds of white lights flickered in succession, illuminating the place.

Countless cocoons began to break free. After the butterfly-shaped pets waved their wings a few times in discomfort, they flew up one after another.

From the initial Wind Crystal Butterfly to the later Ice Crystal Butterfly that relied on freezing the cocoon, shattering the ice crystal cocoon, and the Flame Crystal Butterfly that burned the cocoon, the Dark Crystal Butterfly and even the Light Crystal Butterfly that penetrated the cocoon with darkness and light were born one by one.

At this moment, the entire sky above the Butterfly Transformation Valley was covered in the colors of various evolutionary wings. The scene was like a colorful fairyland. It was beautiful.

Looking at the colorful sky, many Beast Tamers could lock onto the figures of their pets, and their hearts rippled.

Shi Yu also saw the changes in these pets through the index. The butterflies that evolved here had surprisingly high energy values, far exceeding pets of the same race.

And this moment had actually just begun.

Next, the birth of various commander races was the highlight.

Its size was even larger. An Ice Crystal Phoenix Butterfly that had reached nearly a meter in both ice and wind appeared. Generally speaking, this was the evolution form of the Wind Crystal Butterfly and Ice Crystal Butterfly. However, a Beast Tamer used a special method to complete the evolution in the first stage.

They came out with a snowstorm, and the scene of breaking out of the cocoon was gorgeous.

There was also suddenly a black-colored mist lingering around the cocoon that had become extremely strange. These cocoons seemed to have been twisted into a terrifying mask by a dark power. After a moment, a butterfly with a left and right wing that seemed to have different patterns, like a skeleton or a beautiful figure was born.

Its entire body was surrounded by an ominous aura. The patterns on its wings were black, yellow, and red. It was blurry and abnormally strange.

It was the middle class commander species Ghost Beauty Butterfly.

Apart from that, there was also a big peacock butterfly with ten eyes on its wings...

Thunder Crown Butterfly, Three-tailed Phoenix Winged Butterfly, Withered Leaf Spirit Butterfly, and Glass Butterfly. Then, various butterflies were born one after another, instantly suppressing the limelight of the transcendent species butterfly breaking out of its cocoon.

In fact, it wasn't just butterflies. All kinds of moths, beetles, and bees also broke out of cocoons. They had different forms and competed with other pets. The Butterfly Transformation Valley immediately reached the most prosperous scene. Every creature broke out of the cocoon in different ways, and the view was extremely gorgeous.

Unfortunately, there were too many powerful evolution forms. Even if it was a high class commander species butterfly, there were thousands of them here. No evolution form could snatch everyone's attention.

"My golden-winged Gu has also completed its evolution."

Miao Dongdong's gaze immediately locked onto his fingernail-sized Golden Wings Gu from the Ten Thousand Butterflies. Because of the speciality of the Gu worm, its body was very small. Although it had reached the high class commander species, it didn't cause too much of a commotion. However, Miao Dongdong was still very happy, communicating with the Golden Wings Gu to understand its situation.

Almost all the Beast Tamers who had completed their evolution were sensing the new power of their pets after their evolution.

"Next, the insect world will welcome a new eruption." In the sky, seeing this scene, Hua Xiajin's smile remained. Then, her gaze fell on the few pets still in the cocoon.

At this moment...

There were still very few cocoons on the ground.

Some of the Beast Tamers who had completed their evolution shifted their gazes from the sky to the ground.

At this moment, those who had yet to evolve had failed... Or were they maybe still accumulating evolution potential?

"Where's your cocoon?" Miao Dongdong asked beside Shi Yu.

Shi Yu looked into the distance quietly.

He knew that Buggy was still absorbing the butterfly god's feather power.

It was like a wolf that couldn't be full...

At this moment, because the cocoons had become very few, everyone also noticed a strange phenomenon.

"Holy shit!!"

"Holy shit!!!"

Suddenly, someone shouted. They widened their eyes and looked at the constantly moving white cocoon on the ground in shock.

As the other cocoons were lying quietly, there was actually a cocoon running at a low altitude!

Its target seemed to be a place with a richer power of ascension. Every time it stayed in a place with thinner energy, it would immediately roll to another place!

"What's this!"

What made the tens of thousands of Beast Tamers widen their eyes the most was that this cocoon actually had eyes too.

Not only did it have eyes, but it also had consciousness, absorbing the remaining Feather Energy everywhere.

“Huh? That’s also a Green Silkworm cocoon?”

“Whose is it... Did it evolve or not? Or did it fail to evolve, and became this state?”

At this moment, looking at this strange cocoon, most people were stunned and felt that it was ridiculous.

“F*ck, that cocoon.” Miao Dongdong also widened his eyes. What the hell?

In the next second, he looked at the calm Shi Yu beside him and was stunned.

He opened his mouth slightly and had a feeling that something was wrong.

“Don’t say it. This cocoon is yours?”

Shi Yu was silent because he could sense Buggy’s heart.

At this moment, Buggy looked up at the Divine Feather Phoenix Butterfly in the sky while absorbing the energy that could be perfectly absorbed in the rare cocoon state.

This, this, this...

Butterfly God, let me see your limit!!!

Divine Feather Phoenix Butterfly:??

After so long, even if it had to take care of the hundreds of thousands of insect cocoons in the Divine Feather Mountain Range at the same time, the butterfly god should have discovered the abnormality of the insect.

It looked at Buggy in silence, a little puzzled.

Seeing this freak, the Butterfly God almost thought that its Beast Tamer had returned and cultivated some strange breed.

“It seems to have attracted a lot of attention. Many people are probably curious about its Beast Tamer now.” In the sky, Legend Hua watched the show quietly.

Those who had yet to break out of their cocoons should have the potential of monarchs.

Countless people were attracted by the worm, but not long after, the creature that started breaking out of the cocoons diverted their attention.

The Space Crystal Butterfly of the spatial element, the Yin Yang Butterfly of the light and darkness coexistence, the Ice Fire Twin Butterfly that evolved into two bodies at once, the Hidden Spirit Butterfly that abandoned its body to transform into a spiritual body, and the Fairy Butterfly that transformed into

an elemental life form. The evolution forms of various races that could be said to be at the level of pseudo monarchs appeared one after another at this moment.

Under the blessing of the Butterfly God, it was not a problem to say that their race was a low-level monarch race.

These evolutionary masters had always been paying attention to their pets and weren't attracted by the strange worm cocoon. Until their pets evolved, they all smiled.

At this moment, strange phenomena appeared in Butterfly Valley.

However, just as these butterflies that had reached the potential of monarchs were about to bloom with their own light, an even greater aura erupted.

A phoenix cry suddenly came from a cocoon that was lying quietly somewhere!!

Then, the surroundings of the cocoon quickly changed. The terrifying frost immediately froze the silver ground, as if it had created an even more snow-white world!

In an instant, with it as the center, a range of hundreds of meters instantly became a snow domain!

Such a huge change instantly attracted everyone's attention. This evolution phenomenon completely suppressed the other evolutionary cocoons and immediately became the focus of everyone's attention!

"What happened?"

Countless people looked at this cocoon in disbelief.

That wave just now...

"This aura." Hua Xiajin's gaze landed on a girl in a blue dress surrounded by countless people.

She was in her early twenties, and her appearance was cold and beautiful. She watched the changes on the field like an iceberg beauty.

"It's time to evolve, Ice Phoenix Moth." At this moment, no matter how cold her aura was, she still smiled as the cocoon changed.

This stage should be prepared for her.

Ten years ago, her mother discovered the evolution method of the monarch race, the Ice Phoenix Moth, and her name spread throughout the world.

And today, she wanted to use the evolution method developed by her mother to obtain the recognition of the Butterfly Goddess and become a female expert like the legend of Hua Xiajin!

"It's Dr. Zuo Jiangyun's daughter." Hua Xiajin quickly recognized the origin of this cocoon and its Beast Tamer and couldn't help but smile.

Amidst the incomparably huge commotion, soon, in the snow world, this Ice Phoenix Moth broke out of its cocoon.

Originally, without the butterfly god's blessing, relying on the transcendent worm silk and ice phoenix materials, it could evolve into a true monarch race. Now, because of the butterfly god's blessing, this Ice Phoenix Moth's potential would only be higher, reaching middle-level monarch or even high-level monarch race!

Under the lingering phoenix cry and snow, what broke out of the cocoon seemed to be a phoenix instead of a butterfly. However, it had only used some phoenix materials, and it was only a phase of evolution. It was definitely far from the point where it could transcend species and change races.

It was similar to the method of breaking out of the cocoon of the Ice Crystal Butterfly and the Ice Crystal Phoenix Butterfly. Soon, its cocoon was also frozen into ice before shattering. With the crack and the incomparable evolution light, a huge Ice Phoenix Moth about three to four meters tall appeared in everyone's vision!

It had a blue body and wings that were like phoenix feathers. Its figure was incomparably cold and proud. It was born along with the crystalline snow and wind and instantly became the focus of the entire world. Even the Butterfly God acknowledged the potential of the Ice Phoenix Moth.

The limelight of the other evolution forms was all suppressed by it.

At this moment, in theory, there were no other cocoons.

But in fact, it wasn't that there wasn't a cocoon anymore.

On the silver ground, the worm glanced at the Ice Phoenix Moth and continued to absorb the last bit of Feather Energy. Because it was very conscious, its absorption efficiency was much faster than other cocoons. Moreover, it had been searching for places with abundant energy. The energy it absorbed at this moment was countless times more than other pets.

The butterfly god wasn't helping it specifically, so Buggy could only work hard on its own.

After the Ice Phoenix Moth completed its evolution, Buggy finally felt that its body had reached saturation. This time, it had completely unearthed its evolution potential.

"Evolve," Shi Yu thought when he saw this.

His attention, Eleven, Baby Ginseng, and the others were one of the few that weren't attracted by the Ice Phoenix Moth.

It had been watching Buggy the whole time, waiting for it to complete its final accumulation!

"Ji!" Buggy transmitted telepathy and slowly closed its eyes. At this moment, it completely activated all its strength!

At this moment, everyone was still immersed in the beauty and power of the Ice Phoenix Moth.

But at the next moment, something unexpected happened.

Boom!!!!

In an instant, a huge aura erupted from the last Green Silkworm cocoon on the ground.

It forced everyone to pay attention to it.

An incomparable aura shot into the sky, accompanied by a huge deterrence, shocking everyone.

Why was there still a Green Silkworm that had yet to evolve? Moreover, this might, what was going on...

"It's that insect cocoon with eyes that had been running around previously." At that moment, everyone was stunned. They looked at the cocoon that had acted extremely unscientific just now in confusion.

At this moment, its behavior was even more unscientific.

Under everyone's gaze, the cocoon slowly rose into the sky with a blue light and flew higher.

It flew up.

"Holy shit."

Many people were stunned, and then they looked at the ground and the sky. So, the Ice Phoenix Moth wasn't the last to evolve?

That insect cocoon that could run with its eyes open had yet to evolve?

Was it about to evolve too?

"What exactly is this..." Legend Hua took a deep breath and looked at the Butterfly God.

However, at this moment, the butterfly god's mood was not calm either.

It felt like this little guy flew into the sky with the goal of absorbing more of its power...

Ridiculous.

Moreover, it had expected every evolution form of the more than 100,000 cocoons present. However, to be honest, it couldn't understand why this one would evolve.

"What's going on?" The Ice Phoenix Moth's Beast Tamer frowned.

"Senior Sister Xia, that cocoon is a little strange..." A student from Demon Capital University said to the talented girl of Demon Capital University, Xia Qingwei.

Xia Qingwei was silent as she sensed the message sent by the Ice Phoenix Moth.

At this moment, although the worm was still evolving, the Ice Phoenix Moth that had already completed its evolution was actually also shocked by the huge might emitted by the worm, giving rise to a feeling of wanting to submit.

The feeling described by the Ice Phoenix Moth made her feel that it was incomprehensible.

In fact, although the Ten Thousand Butterfly Dance was beautiful in front of them, the highest they could reach was only at the transcendent level. At this moment, as a commander rank worm with perfect level deterrence, even if it didn't evolve, its strength would definitely crush every pet present.

Boom!

Under countless gazes, the strange cocoon in everyone's eyes began to evolve.

Its entire body emitted an evolutionary light that shot into the sky like its aura. At this moment, everyone's eyes suddenly widened, revealing an incredulous shocked expression, because...

"Heavens, heavens, the sky, the sky split open!!"

Looking at the silver sky that had cracked because of a spatial crack and the shattered space, everyone's mouths widened. What exactly happened? Why, why did the evolution of this cocoon crack the silver sky created by the butterfly god??

Divine Feather Butterfly:!!!

Not only were the people shocked, the butterfly god suddenly felt that something was wrong.

Impossible. With this commander rank cocoon, even if it reached the monarch rank, it would definitely not be able to cause such a huge change.

What evolution materials had it absorbed?

At this moment, the Divine Feather Butterfly suddenly felt a trace of dragon might on the evolution cocoon.

It was even purer, stronger, and denser than the Phoenix might on the Ice Phoenix Moth just now!

This cocoon, the evolution ingredient, had absorbed dragon-type power?

Moreover, it seemed to be the power left behind by the dragon race above it at a very high bloodline level!

Crack!! Crack!! Crack!!!

In the light of evolution, Buggy's deterrence completely erupted.

The tens of thousands of evolution butterflies present couldn't help but dance for the evolution of the worm.

The deterrence power of a perfect-level deterrence against its own race, and it was a deterrence that crossed a large level. Even if Buggy didn't have this thought, these evolution butterflies couldn't help but look at the mutation of the cocoon in the sky in admiration and dance to express their congratulations.

Even the Ice Phoenix Moth lowered its stance slightly at this moment and left the spotlight for this mysterious cocoon.

"Ten thousand butterflies dancing together, the birth of an overlord."

In the crowd, many experienced masters and even Legend Huas took a deep breath when they saw this scene and revealed shocked expressions.

That cocoon was going to evolve into an overlord race?

Apart from the legend of Hua Xiajin, everyone felt that it was impossible, because this violated the evolution law set by Senior Lin Feng!

How could a Green Silkworm skip two large stages of evolution to become an overlord race!

This didn't make sense!

But the scene in front of them, the scene of ten thousand butterflies dancing together to celebrate, couldn't help but make them confused.

"Impossible." The Beast Tamers, led by Xia Qingwei, who had evolved into butterflies with monarch potential, looked at the scene in front of them in disbelief. They looked at their sincere pets in disbelief and felt that the scene in front of them was ridiculous.

They were all super geniuses, so how could they accept this situation?

It would be fine if it was the butterfly god, but what was wrong with this cocoon!

The evolution light was still fermenting, and the changes were also continuing to upgrade. At this moment, not only was the sky splitting, but the surroundings of the cocoon were also filled with dense spatial cracks. It was difficult to imagine that this was the power that a green worm could awaken after evolution.

At this moment, countless information started to feedback to Shi Yu from Buggy.

Skill: Thieving Dream

[Level]: Advanced

Introduction: A spirit-type skill. It can enter the dreams of other life forms and pry into their secrets. It can also replicate their dream illusions and create its own dream world.

...

Skill: Space Pocket

[Level]: Advanced

< Introduction > It's a spatial skill. Opening the inner space can be used for storage.

...

Buggy began to awaken new racial skills one after another. Shi Yu's expression gradually became happy.

Thieving Dream, it was here!

Spatial pocket? It came from the root of the grotto-heaven tree, right?

Would it conflict with the ruin ring?

It was completely impossible. It could allow the worm to store huge energy crystals in its body. Top-notch resources like the Ice Dragon Whiskers could allow the worm to have the most perfect ability to materialize illusions at any time and anywhere. It was simply made for it!

It was equivalent to opening a pile of equipment for Buggy to wear infinitely!

Beside Shi Yu, Miao Dongdong had always been suspicious of this strange cocoon. At this moment, when he saw Shi Yu smile, he trembled. Damn it.

The evolution awakening continued.

Soon, Shi Yu received the feedback of the first super skill.

Skill: Imagination Domain

[Level]: Super level

< Introduction > It's a spiritual and spatial skill that overlaps the dream and illusion worlds with reality. In the Imagination Domain, the user grasps the power of imagination. All factors, including environment, space, change, and so on, will change because of the user's will. Moreover, in the Imagination Domain, the user's mental strength will undergo a qualitative change.

Shi Yu:!!!!

"Good job!"

He really wanted to praise Buggy for being awesome. This super skill... This super skill was simply the perfect upper level of illusions. This was simply a god-like ability, and it even perfectly included various weather skills and venue skills.

And this was still not the end.

"Roar!!!!"

At this moment, a dragon might bloomed in the sky. It wasn't from the cocoon, but from the Worm's evolution. The Imagination Domain unconsciously spread to the outside world. At this moment, the sky was already dark. Dark clouds lingered. Under the influence of its deterrence and the power of Imagination, rain fell from the sky.

Everyone watched the weather change in shock.

Even Eleven, Baby Ginseng, and Chi Tong couldn't help but look at Buggy. Why did Buggy evolve into a monster?

At this moment, in the sky, in the dark clouds, a phantom figure was vaguely visible, gradually forming a dragon phantom.

Shi Yu was stunned because this wasn't the ice dragon that Buggy had once transformed into, but an unknown dragon.

At this moment, even Shi Yu, the Beast Tamer, was a little stunned. But soon, he thought of the mysterious dragon ball that the worm had absorbed.

Could it be that it was the owner of the Dragon Ball

The phantom in the sky was a huge dragon-shaped body covered in blue and white dragon scales, a huge Eastern dragon.

It kept floating and circling in the sky, the scales on its body shining, dazzling the spectators. Under their gazes, it was as if they were pulled into another world.

Countless people sensed the huge dragon might and terrifying magic power of this divine dragon and couldn't help but be stunned for a moment.

What the hell was this evolution phenomenon!!!

Was this still the evolution of the Green Silkworm?

What the heck!

“Roar!!!”

A moment later, with a roar from the divine dragon, the evolution light of the insect cocoon was released to the limit. It was incomparable and huge. Seeing this, the divine dragon phantom immediately flew into the light, as if it had become nutrients for evolution and fused into it.

The scaled claws pierced through the nine heavens, the coiling beast tied itself to the clouds.

As the divine dragon integrated, the information of the last super skill appeared in Shi Yu's mind.

Skill: Dragon of Imagination

[Level]: Super level

< Introduction > It's a combination of spiritual, spatial, and dragon skills. Through the power of imagination, it can transform its physique into the body of a divine dragon. It has true attributes, physique, energy, life force, and dragon might that are comparable to dragons. It's an ability to compare and surpass dragons.

When trained to perfection, it could evolve into a dragon and break through the limit of the skill. It would surpass the dragon race and reach the extreme, walking out of its own path.

This was... a super evolution skill!

At this moment, Shi Yu was completely stunned. He didn't expect Buggy to be so powerful. He had never heard of this skill.

Boom!!!

Just as Shi Yu was feeling extremely pleasantly surprised, Buggy's main body finally broke out of the cocoon.

Its huge body was not inferior to the Ice Phoenix Moth from before. It reached three to four meters and was a huge butterfly. After evolution, the worm had a blue and white body like the divine dragon just now, and its figure was like a dream.

It was large and gorgeous, with a shining metal-like blue luster and a white luster. It was extremely beautiful. The entire surface of its wings was like white waves surging on a blue sea. Its color and patterns were very spectacular, completely exceeding any previous evolution form.

On the surface of the huge wing, it was even more like a string of beautiful white halos embedded in the blue sky. It was extremely gorgeous and had an elegant figure. When it spread its wings, it was like a

peacock spreading its tail, but its incomparably huge body also seemed to contain the powerful magic power of a divine dragon, shocking everyone.

Boom!!!!

After the worm evolved, its aura erupted again. The Butterfly God was shocked. All the Beast Tamers looked at everything in disbelief. In front of Shi Yu, the worm's current energy level was jumping crazily.

[Energy Points]: 141112

There were still the four newly awakened racial skills. Before they had been upgraded, there were an additional 100,000 energy points than before. It had already exceeded the energy value of Eleven and the ginseng baby. It was a proper overlord race, and it was definitely not as simple as a low-level overlord race.

Spirit, space, and dragon... Such powerful three attributes combined...

Buggy's current battle power was definitely not weak.

"I'll call you the Butterfly of Imagination," Shi Yu looked at the huge evolution body and muttered to himself.

Eleven, Baby Ginseng, and Little Chi Tong looked at the worm in a daze and felt that it was alright!

Beside him, Miao Dongdong looked at Shi Yu with an explosive gaze. His arm and fingers trembled as he pointed at Shi Yu.

At this moment, the nearly 100,000 Beast Tamers present were all crazy. They looked at this huge butterfly and lost the ability to think.

This, what was this?!

What race was this butterfly from?

Who, who was its Beast Tamer???

Countless people looked at the Butterfly of Imagination in confusion.

At this moment, Legend Hua was also extremely shocked. She looked at the Imagination Butterfly and swallowed her saliva. She felt that this guy's potential completely exceeded her Myriad Flower Butterfly Fairy King.

And this was still before he accepted the butterfly god's gift. There was definitely no surprise. Shi Yu and the others were the real protagonists in this Butterfly Meeting!

"Follow me." At this moment, the Butterfly Meeting had completely ended. The guardian-level Divine Feather Phoenix Butterfly, which could also be said to be at the totem level, looked at Buggy and Legend Hua in silence. Its gaze even crossed the sea of people and landed on Shi Yu, instantly locking onto the Beast Tamer of the Imaginary Butterfly.

It transmitted telepathy.

It made Shi Yu, the Butterfly of Imagination, and the others leave with it.

At this moment, Shi Yu patted Miao Dongdong's shoulder, raised his finger in front of him, and shushed him.

"I'll leave first. Don't sell my information. I'll finish writing the thesis first." Shi Yu didn't want to be disturbed unprepared.

Then, he smiled and slowly disappeared. Buggy instantly teleported to him, leaving behind a stunned Miao Dongdong.

He regretted following Shi Yu. This fellow didn't want to be human!!!

At this moment, the Divine Feather Phoenix Butterfly turned into a silver breeze again and led the way for Shi Yu and the others.

As Shi Yu appeared on the Butterfly of Imagination, everyone saw this mysterious Beast Tamer in a black and red battle suit. Unfortunately, they couldn't see his appearance.

Xia Qingwei and the others were shocked. They clenched their fists. Who exactly was this person?

That pet, that pet, could anyone nurture it?

An overlord race!

Moreover, it was definitely not just a low-level overlord.

He actually broke the evolution law set by Legend Ln Feng?

At this moment, countless people were shocked. A huge commotion arose in the sea of people.

"The Butterfly Meeting has ended. Everyone, leave in an orderly manner," Hua Xiajin said before looking in the direction of Shi Yu and the others.

The figures of the Butterfly of Imagination, Shi Yu, and the others slowly disappeared from everyone's vision with the silver wind. When she recalled that the Butterfly God had even called her, Legend Hua couldn't help but calm his churning heart and follow.

At this moment, Shi Yu was smiling very happily as he sat on Buggy. Eleven and Baby Ginseng were also jumping around.

"Wu ~" Buggy's light voice sounded, thanking Shi Yu, Eleven, and Baby Ginseng.

At this moment, when they heard the cry of the worm, Eleven and Baby Ginseng looked at each other.

Oh shit, it was over.

Wuji Airlines and the Yiji combination. Pa, gone!

Buggy:???

It had already evolved, so who would still do that!

Shi Yu smiled. After discovering that there weren't many changes to Buggy's evolution, he was in a very good mood. Speaking of which, shouldn't he arrange for Buggy to learn multiplication? This was too big, and it wasn't easy to keep it in his pocket.

“How do you feel?” Shi Yu asked Buggy.

Buggy’s eyes flickered. The image of itself being patted off the tree by the leader, then turned into a cocoon and broke out of the cocoon appeared in its mind.. It nodded heavily. It was very strong now, and it already had invincible strength!

Chapter 200: Gift of the Butterfly God

After the Butterfly Meeting ended, the Divine Feather Phoenix Butterfly turned into a silver whirlwind and flew into the unknown.

Shi Yu and the others followed behind, still unable to calm down.

Although the Butterfly Meeting had ended and the worm had evolved perfectly, the Butterfly God seemed to have additional gifts for the evolution with the greatest potential.

This was very exciting.

At the moment, Buggy had two super skills and was already the reserve of a low-level overlord race.

Because its spatial attribute was strong, it could still be raised by another level, just like Yin Zhengfan’s Space Crystal Butterfly.

Therefore, Buggy was the foundation of a middle-level overlord race.

Then, considering that the Space Domain and the Dragon of Imagination, one was a super powerful dual-element skill, and the other was an evolution skill with an extremely high growth rate and all-element augmentation skill, Shi Yu could no longer easily determine the species level of the worm.

What could be confirmed was that even if the worm couldn’t reach a high-level overlord race or quasi Mythical race at the moment, it would definitely be able to reach it when its Dragon of Imagination skill reached the perfect level. This was because at that time, it would usher in a new round of transformation!

“I feel that it’s about the same as a middle-level overlord. It’s still a little lacking compared to Little Chi Tong,” Shi Yu analyzed in his heart.

Just as Buggy said, it was invincible.

Even if they faced Chi Tong at the same level in the future, their race wouldn’t be at much of a disadvantage.

With this foundation, Shi Yu and the others were looking forward to the butterfly god’s gift again.

What could it be? Could it increase Buggy’s racial potential a little more?

A moment later.

Shi Yu and the others arrived deep in the mountain range.

On the path to the depths of the mountain range, a silver storm formed a barrier, making it a mysterious forbidden area.

However, at this moment, the storm barrier had already automatically opened a hole, as if it was inviting Shi Yu and the others to enter.

“Let’s go in. This is the habitat of the butterfly god.”

Legend Hua Xiajin also followed Shi Yu and the others from behind. At this moment, she spoke beside Shi Yu.

“Legend Hua!” Shi Yu said.

“You guys... aren’t bad.” Legend Hua smiled, still very shocked.

Was this the random evolution Shi Yu mentioned?

The spatial cracks that filled the sky tore apart the silver sky. The evolution light that shot into the sky danced with the ten thousand butterflies. There were even divine dragon phantoms that swept the wind and clouds into the cocoon...

She would even believe it if he told her that this was a prearranged movie worth hundreds of millions! Random your head!

Forgive her for being direct, but this Butterfly Meeting was, after all, a public meeting. If nothing unexpected happened, the news of Shi Yu’s pet would quickly shock the country and inherit the hot topic discussion of the Butterfly Meeting. It would even let the hot topic level increase!

This news was definitely more explosive than the so-called vocation assessment, the so-called popularity of the iron-eating beast’s evolution.

The vocation assessment was held once a year. There was nothing new about it. In a year, there were already nine top scorers in first-level cities. Everyone would only watch it for fun at a certain time period. Even if there were any famous infractions, they would quickly forget it. As for the evolution of the iron-eating beasts, the value was in the category of monarch races. It was worth being shocked, but it wasn’t very exaggerated.

This was because in the hands of institutions, financial groups, and even some top-notch masters, the evolution form of monarch races was not rare. Many monarch races had stable breeding, cultivation, and evolution channels.

However, overlord races were different.

At the moment, even at the national level, no country had a stable and continuous cultivation channel for overlord race life.

Even if it was an artificial mechanical life, if it involved the overlord race or overlord level, it would also need some super rare resources that could not be replenished or could not be replenished in the short term. Moreover, the creation of life depended on luck very much. It required the power of the country and the support of many legendary Mechanics.

In this context, the significance of the overlord race was especially great. For a country, the birth of the life of every overlord race was the possibility of increasing a legendary battle power in the future. Or it could be said that a legendary battle power was almost reserved.

This was a big matter that could make the entire country tremble. After all, the number of legends in Dong Huang, including the ones guarding the country, the defense line of the totem area, and the legends guarding the public areas jointly protected by many countries, had never exceeded 50.

From this, one could tell how much of a stir a Beast Tamer and pet with legendary potential and overlord potential could cause.

This was also the reason why Shi Yu immediately sealed the news after contracting the heroic spirits of high-level overlord races. It was because it was really important.

However, who would have thought that the overlord species pet would be like a wholesale one when it came to Shi Yu? Another one...

"Haha, my luck is pretty good," Shi Yu said with a shy smile.

"Wu ~" Buggy also said shyly.

Speaking of which, Buggy felt that if it weren't for the butterfly god's feather energy, even if it had a chance of becoming an overlord race, it wouldn't have been so smooth. It still had to thank the butterfly god.

"In short, congratulations. If nothing goes wrong, the next blessings of the Butterfly God can make your..."

"The Butterfly of Imagination," Shi Yu said. "Its new species' name."

Legend Hua smiled and said, "The race that can allow the Butterfly of Imagination to reach a higher level!"

"I never said that. Hua Xiajin, don't talk nonsense." At this moment, the two of them had already entered the depths. As they were talking, the butterfly god's telepathy interrupted their conversation. It was the same voice as before, like a normal voice.

Legend Hua:???

Generally speaking, these totem-level creatures that had lived for a hundred years and even some overlord-level creatures had pretty much mastered telepathy. Some even learned to speak human language.

However, the butterfly god's telepathy stunned Shi Yu and Legend Hua.

Legend Hua: What?

She had just finished talking, and got interrupted.

In the center of the silver storm, Shi Yu and the others had already arrived. When they landed, the silver whirlwind transformed back into the figure of the Divine Feather Phoenix Butterfly. This time, compared to the hundred-meter-tall behemoth from before, it was much smaller.

Shi Yu knew that the Butterfly God had once evolved into an elemental butterfly and also evolved into a Phoenix Vein Butterfly. It had experienced a total of five stages of evolution before it could become what it was today. The accumulation of five stages of evolution had allowed it to awaken five different racial skills and obtain a super strong potential. It even inherited the elementalization ability of the elemental butterfly and could freely transform into a silver whirlwind to form a new body.

In a sense, Lin Feng's legendary evolution talent could also help pets master many skills.

"Wh-what do you mean?"

However, those weren't the main points they were concerned about. Shi Yu and Buggy looked at the butterfly god nervously.

Couldn't increase race potential?

It never said that?

Well, it indeed didn't say... But, in theory, shouldn't this be the case? What was it denying?

"I didn't expect it to evolve into an overlord race in an instant. My gift can only increase the chances of an overlord race evolving into an overlord without increasing their life force. It's useless to this butterfly," the Divine Feather Phoenix Butterfly said confidently and very frankly.

Legend Hua:...

Shi Yu, Buggy:...

Eleven and the other pets looked at each other and mourned for Buggy in their hearts.

Strength was also a mistake...

"Butterfly God..." Shi Yu was about to cry. Buggy's heart turned cold. Was it wrong to be too awesome after evolution?

Legend Hua was a little at a loss. This... She suddenly felt that it was reasonable, but at the same time, it didn't make sense. The reasonable thing was the limit of the Butterfly God's ability, while the unreasonable thing was that Shi Yu and the Butterfly of Imagination actually made the Butterfly God helpless...

"I called you here to ask you what happened to the divine dragon phantom just now," the Divine Feather Phoenix Butterfly said.

The butterfly god could tell that the worm didn't break the evolution rules its master had concluded. It could tell that the cocoon was already in an overly evolved form.

It had seen too many strange evolution forms around its master, so it wasn't too shocked. However, that divine dragon phantom really made it curious.

Legend Hua also looked at Shi Yu. Yes.

She also wanted to know what was going on.

At this moment, Shi Yu was stunned. "Among its evolution materials, there's a level-four Dragon Ball Could it be related to that..."

Dragon Ball

It was not out of the expectations of the Divine Feather Phoenix Butterfly and Legend Hua.

"A level-four Dragon Ball" However, the Divine Feather Phoenix Butterfly was still puzzled.

"It's level four, but it's not level four at the start. It's because the dragon ball has been too long ago, and its energy has already disappeared naturally. Its original level can no longer be judged, and even the owner of the dragon ball can't judge..."

This was a dragon ball that the gem cat had obtained when it was looting an alternate realm in the undead battlefield. Its origin was unknown and incomparably mysterious.

Back then, it didn't even blink when Shi Yu wanted to take high-level spatial resources, but it only hesitated for a long time before gritting its teeth and giving it to Shi Yu to exchange for the gem fruit.

From the looks of it, this dragon ball was indeed a good thing. The owner's identity was also incomparable.

What Shi Yu had seen just now was a classic Eastern Dragon Phantom. Moreover, from the looks of it, Shi Yu actually couldn't determine what race it was. It looked like it was another super expert that had been lost in history.

"The owner of that dragon ball has a very high bloodline level."

"It's even above high-level overlord races. The limit is close to a Mythical race, or it can be said to be a quasi Mythical race. This bloodline can already be said to be a divine dragon."

"I've only seen this bloodline level on the Black Dragon King beside Master." The Divine Feather Phoenix Butterfly's tone was nostalgic.

Legendary Hua looked at Shi Yu and was not calm. The dragon ball of a divine dragon?

Ridiculous.

Where did Shi Yu get it and how did he end up feeding it to a Green Silkworm?

She didn't understand.

"Divine Dragon..." Shi Yu took a deep breath.

"It's this situation. Because of this Dragon Ball its potential has become too high. The gift I originally prepared is already meaningless to it, but since I have already agreed to the gift, I won't go back on my word."

A breeze blew over from a distance. Under the sweeping of the silver whirlwind, a palm-sized, sea-blue scale was swept out of its secret treasure vault.

The scales emitted a dragon might and were filled with pressure.

“This is...”

“The dragon scale of one of my companions is also a friendly keepsake of the underwater Dragon Palace City. There’s nothing else for you guys. This is for you. It’s one of the headquarters of the Eastern Dragon Race in Dragon Palace City. Perhaps you can go there to unearth more of its bloodline mysteries and better break through its limits.”

The butterfly god gave up. Since it couldn’t complete the gift, it simply sent Shi Yu to its companions.

“Sea Dragon Scale...” Seeing this scale, Legend Hua was stunned.

Legend had it that Lin Feng had once cultivated a Green Silkworm that eventually evolved into the Divine Feather Phoenix Butterfly. He had also cultivated a Dragon Carp, which evolved into a sea dragon and married into the Dragon Palace City.

It was indeed as Butterfly God had said. This was an important keepsake that led to Dragon Palace City.

This dragon scale looked like it had been collecting dust for a long time, but the energy and dragon might were still vigorous. It was probably not lower than level seven.

This was also good!

“Thank you.” Shi Yu’s expression changed quickly.

“Buggy, hurry up and thank the butterfly god.” It looked very much like a parent who was helping his child collect his New Year’s red packet money.

“Wu!” Buggy also quickly thanked the Butterfly God and put the dragon scale in its spatial pocket.

With this, could it also conjure a powerful sea dragon?

Just like when he used the Ice Dragon Whiskers.

At this moment, Shi Yu was very satisfied.

With the Dragon of Imagination skill, it was indeed not that important whether Buggy improved its race level or not.

However, the token of friendship that led to Dragon Palace City was too precious. Tyrant Dragons were everywhere there, and the totem dragons also had several absolute ocean overlord powers.

It was because the Dragon Emperor had befriended the underwater Dragon Palace City that Dong Huang could develop the strength of the navy and have absolute authority over the sea.

“Then that’s it. You guys can leave.” After holding the Butterfly Meeting, the Divine Feather Phoenix Butterfly was sleepy again. It didn’t have any intention of keeping Shi Yu and the others longer, and it wasn’t any more curious about Buggy.

“Hua Xiajin, I’ve completed the Butterfly Meeting according to our agreement. Don’t forget your responsibility.”

“Alright.” Hua Xiajin sighed.

“We won’t forget.”

Shi Yu looked at Legend Hua. Was there any other agreement between humans and the Divine Feather Phoenix Butterfly?

Hua Xiajin remained silent. Even if it was very strong, as a pet that had been raised by someone since it was a Green Silkworm, the request of the Divine Feather Phoenix Butterfly was actually very simple. After being alone for a hundred years, it only wanted to find its Beast Tamer. Up until now, the entire Dong Huang had never given up on searching for the missing Lin Feng legend. This was also one of the connections between the guardians left behind by Dong Huang and Lin Feng.

...

At the same time, in the outside world.

Just as Xia Jinqi had expected, it had already caused a huge commotion.

On the Internet, at the Butterfly Meeting, the birth of the overlord race, the mysterious butterfly species. This hot search immediately suppressed all the news and rushed to the top of the hot search.

However, although the evolution process and dreamy figure of the Butterfly of Imagination were described in words to be extremely shocking, the information about this evolution body and its Beast Tamer was still unknown.

At that moment, only a small number of people could know the full story of the incident through the information left behind by Legend Hua.

In the capital, at the headquarters of the Beast Tamer Association of Dong Huang, a few important figures received the information and slowly scanned it. After discovering that everything came from Bureau 11, they didn’t pay attention.

As for the ordinary Beast Tamers who didn’t understand these things, they were extremely shocked.

The Butterfly Meeting... produced a creature of an overlord race?

Demon Capital.

In the Dark Club, Heavenly King Zou browsed the trending list that had been pushed down and was slightly stunned.

At the Insect Research Institute of the Demon Capital University, Dr. Zuo Jiangyun, who had received the news from her daughter and researched the evolution method of the Ice Phoenix Moth, pondered for a moment and called Hua Xiajin Legend. Unfortunately, no one picked up for the time being.

In Bureau 11, all the members also obtained relevant information soon.

After knowing about this newbie, he created another big news.

Li Lianping, who had recommended Shi Yu to participate in the Butterfly Meeting, was immediately stunned. Even if she recommended Shi Yu to participate in the Butterfly Meeting, she didn’t let Shi Yu film a movie. The evolution phenomenon spreading on the Internet was like the birth of a Mythical creature. Good heavens, it was ridiculous.

“Well...” In a certain place, Lu Qingyi looked at the news and didn’t know what to say. Logically speaking, she just wanted Shi Yu to study well in Ancient Capital University first. The first half of the first semester of university wasn’t over, but he had already gotten two overlord race pets. What was going on?

She kept feeling that Shi Yu wouldn’t be too calm over the next period of time...

At this moment, the entire country was boiling as they pursued more information about the mysterious evolution butterfly. Among the many people who knew, only Miao Dongdong was mixed in the crowd and trembling.

“Is Shi Yu a huge event maker?” He was confused.

...

At this moment, the protagonist of this incident, Shi Yu, had already been brought back by Hua Xiajin.

Shi Yu temporarily ignored the huge reaction caused by this incident. After he returned, he temporarily stayed in Hundred Butterfly Town. The first thing he did was to return to the ruins space and help Buggy learn the multiplication skill in one go. He also raised the skill proficiency to expert level.

After everything was completed, the 0.3-meter Eleven, the Ginseng Baby, and the smaller Little Chi Tong looked at Buggy that had also become 0.3 meters and nodded.

As it kept shrinking, soon, Buggy’s size became about the same as before. This made it easier for it to interact with Shi Yu, Eleven, and the ginseng baby.

“Wu ~ ~” Buggy, with watery blue compound eyes and a pair of dazzling blue wings, landed in Shi Yu’s slightly raised hand in a blue butterfly pose and asked in anticipation.

When... was the team meeting? It couldn’t wait anymore.

[Name]: Butterfly of Imagination

[Attributes]: Spirit, Space

[Race Level]: Medium overlord

[Level of Growth]: Commander Level

Moreover, a pile of high-level skills, two abnormal super skills, 140,000 energy points, and two level-seven dragon-element equipment, how could it lose?

Eleven and Baby Ginseng’s expressions changed.

Good heavens, after just evolving, Buggy’s ambition was almost impossible to hide.

“What’s the hurry?” Shi Yu was quite calm. Buggy was too strong. Even if he let Little Chi Tong possess him, he would probably only be tortured. This version was not balanced at all. Why not let him strengthen Little Chi Tong first?

He had just broken through and was no longer that weak Beast Tamer who could not withstand the wind and could not be possessed.

“You should adapt to your new ability first. I still have to organize your information. Let’s settle the evolution storm first,” Shi Yu confirmed.

Buggy was stunned. Pa, the joy was gone.

It looked at Eleven and asked the leader if it wanted to warm up first.

“Wuu!” Eleven turned around directly. It clearly sensed Buggy’s strength at this moment. There was no hurry. It would wait until Shi Yu organized the team’s internal meeting. It didn’t want Buggy to know its background too early. Moreover, it had to take advantage of this period of time to work harder.

Eleven didn’t fight battles that it wasn’t confident in. If hard training wasn’t to defeat the opponent, it would be meaningless.

“Yi!” Baby Ginseng also turned its head. Although the worm didn’t look at it, Baby Ginseng felt that the Anti-Buggy’s Energy Fruit didn’t seem to be very qualified... It had to continue studying the Anti-Butterfly Energy Fruit.

“Wu!”

Seeing that Eleven and Baby Ginseng were scared by him, Buggy waved its wings indifferently and was excited. Great!

It didn’t matter!

It didn’t matter when. With its current strength, it would definitely be first place no matter when Shi Yu organized the team meeting!

Even if Eleven, Baby Ginseng, and Chi Tong were given a few months, could they still surpass the Butterfly of Imagination?

Impossible! It didn’t know how to lose at all!
