

## Beast 201

### Chapter 201 - Buggy's Haki online free - Novelfull

[Name]: Butterfly of Imagination

[Attributes]: Spirit, Space

[Race Level]: Medium overlord

As for more detailed information, such as evolution materials, prerequisites for evolution, and even skill data, it was impossible to publicize.

It would be fine if it was only a new pet of the transcendent and commander races, but the information of the overlord races was already strategic information. It was impossible to casually publicize it.

Therefore, after watching for a long time, apart from the name, attributes, and race of the Butterfly of Imagination, everyone still didn't know anything.

However, just this information was enough to shock everyone.

The higher the racial level, the greater the difference between each small level.

For example, although there were three racial levels between low-level and high-level monarchs, they only had one super skill.

The difference was only the racial difference in physique, vitality, and energy values.

However, the difference between the few levels of the overlord race was huge. There were often multiple super skills between each level, and the advantage was very big.

It had to be known that the race level of the Divine Feather Phoenix Butterfly was only a high-level overlord, and the Butterfly of Imagination had actually reached the middle-level overlord level. The entire country was incomparably shocked. This was simply an unreachable race level.

Generally speaking, the higher the race level, the easier it was to enter the guardian level. Mid-level overlord races were already very powerful.

Not to mention ordinary Beast Tamers, even the officials of the association were secretly shocked when they updated the information. As expected of Bureau 11, it caused a huge commotion again.

However, in fact, the big shots of Bureau 11 were also very confused, because this was all caused by Shi Yu himself.

To be precise, apart from the information about the Butterfly of Imagination, there were also two new pieces of information about the previous form of the Butterfly of Imagination.

[Name]: Green Worm cocoon

[Attributes]: Worm

[Race Level]:???

Back then, during the Butterfly Transformation Conference, the cocoon that could move and fly gave people a lot of shock.

This was clearly a new race. As the information of the cocoon spread on the Internet, people were completely numb and their values shattered.

Now, more and more people were curious about who the Beast Tamer of the Green Worm cocoon and the Butterfly of Imagination was.

Of course, although Shi Yu had revealed very little information at that time, it still aroused the imagination of some spectators.

For example, the Mechanical Tree Club.

The boss, Meng Qing, had gone through many trials. Now, they finally have some information of value.

According to the people present, the Beast Tamer who rode the Butterfly of Imagination at that time was very handsome in a red and black battle suit and a red cloak.

This description stunned Meng Qing for a long time.

It instantly reminded her of Shi Yu, who had come to Divine Capital from the ancient capital and had been a guest at her club for the past two days with an unscientific green worm.

She hesitated many times and wanted to ask Shi Yu, but it felt difficult to ask about such news.

In addition, in Ancient Capital University, Yu Shu, Wang Ling, and the others were silent for a long time when they saw such an unscientific cocoon and the information on the Imaginary Butterfly.

Although it didn't feel very likely, they all had the same feeling that it couldn't be that monster, Shi Yu. If it really was... they didn't want to live anymore. How could they be classmates?!

At the same time, in Hundred Butterfly Town, at the location, in Hua Xiajin's legendary private courtyard.

"What are your plans next?"

Hua Xiajin, who had been in charge of picking up Shi Yu, asked.

Shi Yu had given her too many surprises in the past few days.

Unfortunately, the birth of a new overlord race was still impossible to replicate.

Shi Yu had already made it clear, and Hua Xiajin was also clear. It was impossible to find a second copy of the inheritance of the Dream Shell and the mysterious dragon ball alone.

However, Shi Yu seemed to think that he could study the evolution of the green cocoon?

"It's time to return to the ancient capital. I'll continue to study the evolution method of the green cocoon," Shi Yu said.

"Have you thought about it? Is there anything I can do with Dr. Zuo Jiangyun's help?" Legend Hua asked.

She was the most powerful Beast Tamer in the country who specialized in the Worm Department, and Dr. Zuo Jiangyun was the chief researcher who specialized in the evolution of the Worm Department.

She had contracted a bug-type overlord of an overlord race. The other party had studied the evolution of the Green Silkworm into a low-level monarch race and the evolution path of a high-level monarch. It could be said that they were both authoritative representatives of the Dong Huang Insect Domain.

If Shi Yu had any needs, they could be of great help. To a certain extent, they were the people in charge of various competitions, research, and projects in the country's bug domain.

"There's really one," Shi Yu said. "I want a batch of Green Silkworms with proficiency in worm silk to perfection, as well as some evolution materials."

Because the research Shi Yu planned to do was not private, he decided to directly apply for experimental materials. Moreover, in order to pursue popularization, he definitely had to abandon the skill index and abandon adding points. At most, he would reference the general teaching steps of the index.

"Alright, no problem."

Legendary Hua nodded. It was a small matter. As long as he could develop the form of the Green Silkworm cocoon, even if this Green Silkworm cocoon couldn't reach the commander race like Shi Yu's cocoon, it would still be a low-level transcendent race. It would definitely be a big discovery.

Because Lin Feng legend had also concluded that evolution would definitely be accompanied by new racial skills.

This was very meaningful to the evolution potential of any Green Silkworm after breaking out of its cocoon.

"Actually, there's one more thing, but I have to seek your opinion," Legend Hua said in the end.

"What is it?" Shi Yu was surprised.

"Although they don't know who you are or who the Beast Tamer of the Butterfly of Imagination is, Dr. Zuo Jiangyun's daughter, who is also the Beast Tamer of the Ice Phoenix Moth at the Butterfly Meeting, wants to meet you and challenge the Butterfly of Imagination with the Ice Phoenix Moth. Perhaps, it's also Dr. Zuo's intention?" Legend Hua touched her chin and analyzed curiously.

"The Beast Tamer of the Ice Phoenix Moth?" Shi Yu was stunned.

"That Ice Phoenix Moth is only transcendent. There's no meaning to it, right?"

Legend Hua smiled and said, "Don't look down on that girl. She's a genius of the Demon Capital's large school team. Her father is a legend, her mother is a top-notch doctorate, and she's only a step away from becoming a master. Moreover, her talent is relatively special. Not long after the Butterfly Transformation Conference ended, the Ice Phoenix Moth was already strengthened to commander rank by her."

“Of course... There’s definitely a huge gap between her and your Butterfly of Imagination, but if she didn’t see it for herself, I reckon she won’t give up. After all, I heard that she came for the first place in the Butterfly Meeting this time.”

“Let’s meet them. It’s also good to let them know the strength of the butterfly.”

They? Shi Yu scratched his cheek. She had a grudge with Dr. Zuo?

“Alright, I can do both. I can see you before I leave,” Shi Yu said.

...

cDivine Capital.

In a hotel, Xia Qingwei, who was wearing a blue dress, picked up the phone.

“Mom, is there any news? Who exactly is the Beast Tamer of the Butterfly of Imagination?”

A voice came from the other side of the phone. “The other party has already agreed. You just have to find your Aunt Hua.”

“As for his identity...”

“Ancient Capital University, first-year student of the archaeology department. Shi Yu, he’s the top scorer in the vocation assessment who discovered the evolution of the iron-eating beast’s monarch race a few months ago. You should still have an impression of his green worm, right?”

The Ice Phoenix Moth’s Beast Tamer was stunned for a moment and said, “It’s him? The other party is... a Beast Tamer who just passed the vocation assessment? However, if it’s that Green Silkworm...”

“Don’t judge a person by their age and appearance.” The other party smiled and said, “Alright, go find your Aunt Hua first. Tell me the final results.”

Xia Qingwei hung up silently and fell into deep thought.

A moment later, she arrived at Hundred Flower Town and found her mother’s good friend, Flower Xiajin Legend.

“Aunt Hua.” Xia Qingwei stood outside the courtyard and looked at the noble lady in a butterfly-patterned cheongsam walking over. She greeted slightly, “Mother asked me to greet you on her behalf.”

“Qingwei.”

“You’re looking for Shi Yu, right?” Legend Hua smiled.

“Well, he’s the Beast Tamer of the Butterfly of Imagination, right?”

Xia Qingwei knew that the Butterfly Meeting was presided over by Legend Hua, and she also knew that Legend Hua and her mother were good friends. Through this relationship, she finally knew who the owner of the Imaginary Butterfly was in advance.

“Yeah, but have you decided to see the strength of that butterfly?”

“Its strength might exceed your understanding a little.”

“It’s alright.” Xia Qingwei nodded and didn’t mind. It wasn’t like she had never come into contact with pets of overlord races. She was already mentally prepared.

“Do you know where he is?”

“He’s currently in my courtyard,” said Legend Hua.

Before Shi Yu left Divine Capital, she would definitely be responsible for Shi Yu’s safety.

Shi Yu didn’t want to hide the fact that he was the Beast Tamer of the Imagination Butterfly, but he also didn’t have the intention to publicize it. He planned to develop normally in the short term. In the future, when it was time to send the Imagination Butterfly to battle, he would send the Imagination Butterfly to battle. Everything would go according to nature.

However, Shi Yu estimated that the full battle of the Butterfly of Imagination would probably be reserved until the battle exchange with Imperial Capital University in a while. Just the thought of it was exciting...

“I’ll take you to see him.”

At this moment, in the courtyard, Shi Yu was drinking flower tea in satisfaction.

Eleven, Buggy, Baby Ginseng, Little Chi Tong, and the others were playing in the huge garden.

The garden of the Legend Hua was very large, even larger than the field of a university. There were all kinds of flowers, spiritual plants, and wild butterflies and plant sprites living here freely, helping to take care of the garden.

In fact, Shi Yu had even replicated another wood-element skill from a gardener plant.

Skill: Lush

[Level]: Low-level

< Introduction > It’s a wood-element skill that can allow plants to grow.

This was another evolution skill that Shi Yu had selected apart from mutants.

However, this evolution skill was only useful for specific pets. Similar to hardening and worm silk, it was probably useless for ginseng babies. Even if it was useful, it definitely needed other evolution materials. At most, it could increase the evolution foundation.

Regardless of whether it was useful or not, it was just a low-level skill. It was very easy to maximize it. Shi Yu planned to find an opportunity to teach it to the ginseng baby. He would let it master the full-level lush skill first before deleting it.

Because this skill was also the gardener skill that Shi Yu had been thinking about for a long time.

Using this skill could increase the growth speed of plants. After the proficiency was high, it could even increase the power of plant-type skills, the growth speed of plant-type pets, or summon plants from the soil out of thin air.

The ability of this skill was actually severely covered by the control of the super skill plant.

However, super skills were far in the future. It was not difficult to maximize low-level skills now. Shi Yu planned to teach Baby Ginseng this foundation first. This way, it might be easier to master plant control in the future.

Moreover, during evolution, there would be a stronger foundation.

In addition, this skill that could simply control plants could cooperate with strengthening when the time came. It could also allow Baby Ginseng to have more offensive means before it mastered plant control. For example, at that time, using the combination skill of these two skills, it could completely create a hard wooden shield to protect itself. There was basically no problem.

“The new skill is enough. I’ll leave the remaining skill column to Little Chi Tong.” Shi Yu yawned.

The reason why Shi Yu copied it so casually was because he had added five new skill bars after contracting Chi Tong, and after filling and deleting some of the skills of Eleven, Buggy, and Ginseng Baby, there were a lot of empty skill bars.

In the courtyard, Shi Yu held his cell phone. After busying himself with the evolution of the worm, he had been paying attention to the news of the mutated environment of the ginseng baby.

As for Little Chi Tong’s, there was no need to worry at all. It had mastered the transformation evolution skill, Spirit Release. It would be enough to practice this. It was estimated that after the skill level reached transcendent, it would welcome a new transformation evolution, corresponding to a quasi-mythical race.

As for Eleven’s inscription, there was no use in being anxious. In the past three months, Shi Yu had even returned to the Iron-eating Beast Ruins many times, but he didn’t find anything new. However, when he recalled the content of his conversation with Senior Lu and guessed that Emperor Wu might have contracted an Iron-eating Beast, Shi Yu planned to find the ruins of Emperor Wu to see if there was any relevant information.

He had already locked onto the location of the ruins. It was a ruin that had been cracked. It was a place where Martial Emperors built to train their subordinates. Now, it was still a cultivation Holy Land. Coincidentally, that place was the venue of the martial arts conference that the beast-eared girl had invited him to participate in.

“Shi Yu.”

As Shi Yu was thinking about the subsequent plans, Legend Hua came from afar. Shi Yu looked up and saw a girl with a unique aura beside her. At a glance, she looked like a daughter from a rich family. He immediately understood that this was the daughter of Dr. Zuo that Legend Hua mentioned.

“Aunt Hua.” Shi Yu stood up slightly, while Eleven and the others continued picking the nectar to eat.

If it weren’t for the sake of eating, they wouldn’t have stayed outside for too long.

“This is Xia Qingwei...” Legend Hua introduced the two of them again with a smile.

Shi Yu and the other party also nodded briefly and greeted each other.

In just a moment, Xia Qingwei's gaze was attracted by the blue butterfly in the garden that was following a bunch of pets to pick flower honey.

"Butterfly of Imagination?"

Although it was much smaller, its extraordinary gorgeous posture still left a deep impression on her.

"Yes." Shi Yu smiled and said, "Miss Xia, you came this time to experience its strength, right?"

"Yes." Xia Qingwei nodded and said, "Can I?"

"You can, but as a worm-type pet, if its growth level hasn't reached the monarch level, it'll probably be very difficult to fight it normally..."

Xia Qingyi was stunned. Then, she shook her head and frowned. "Please don't underestimate us."

"I'm not looking down on you..." Before Shi Yu could say anything, Legend Hua said, "Qingwei, summon your pet and you'll know."

Xia Qingwei glanced at the Butterfly of Imagination and didn't understand what the two of them meant.

However, she still directly summoned the Ice Phoenix Moth.

In the next moment, a large moth-type creature with wings that looked like frost phoenix wings appeared behind Xia Qingwei and slowly flew up.

Monarch species, commander rank, Ice Phoenix Moth!

The moment the Ice Phoenix Moth appeared, it looked at the Butterfly of Imagination. At this moment, the Butterfly of Imagination that the worm had evolved into also looked over in a shrunken state.

Both parties looked at each other.

It was as if an Ice Aurora had collided at this moment.

Boom!!!

The moment the Ice Phoenix Moth and the Butterfly of Imagination looked at each other, the Ice Phoenix Moth seemed to have entered a world of ice and snow. On the other side was an Ice Phoenix Divine Dragon. Under the terrifying dragon might, its vision was covered by the huge divine dragon body that exceeded ten thousand meters in a single exchange. It saw a dragon claw that covered the sky slapping towards it. Unparalleled cold air erupted, instantly freezing and shattering its spirit!

The Ice Phoenix Moth's brain stiffened, as if it had experienced the fear of death in an instant. Its heart was in a state of despair, and its entire body trembled slightly. The ice crystals around its body seemed to have been affected by something, instantly disappearing and turning into nothingness. Its battle will fell to the extreme!

At the same time, the feelings of the pet's perception were also transmitted to the Beast Tamer himself. Xia Qingwei, who originally wanted to see the power of the Imaginary Butterfly, had a sudden change in expression. Her heart started to pound violently, as if she was quickly falling into a bottomless ice abyss. Her whole body was quickly enveloped by darkness and coldness.

In a short encounter between the two pets, the Ice Phoenix Moth's mind trembled, and it felt like it couldn't defeat the other party, or even attack.

The terrifying pressure of the Butterfly of Imagination made it unable to breathe. Just like during the Butterfly Meeting, it couldn't be at the same height as the other party.

This was Buggy's domineering aura!

Unknowingly, in just a few seconds, cold sweat broke out all over Xia Qingwei's body. Her limbs were a little stiff, and her breathing became rapid. Clearly, she was too deeply affected by the pet's fear.

"Do you understand?" Shi Yu continued, "My Butterfly of Imagination has mastered the Perfect Level Deterrence Skill. Even if the opponent isn't an insect, it's very difficult to have the courage to fight it. Moreover... your Ice Phoenix Moth is also an insect-type pet."

"Only a monarch-level butterfly with a qualitative change in mental strength and a deterrence skill can fight it normally."

Xia Qingwei's expression was pale.

Legend Hua glanced at her. As expected, this girl didn't realize that at the Butterfly Transformation Conference, the Green Silkworm cocoon split the sky and triggered all the origins of the spatial cracks because of the perfect level of deterrence that was comparable to the might of a dragon that could cause physical destruction in reality...

To be honest, even for her, only one pet had mastered such a level of deterrence.

It was impossible for anyone to defeat Shi Yu in the domain of a high-level Beast Tamer.

Worms didn't have the deterrence skill in the first place, and they didn't even have the right to stand in front of Shi Yu and the others.

The current Shi Yu was already invincible below master and monarch.

In fact, Shi Yu had long known that this would be the outcome. The current Buggy, a middle-level overlord race, was actually only at the surface level. After all, it also had full-level Psychic power, full-level Illusory Phantom, full-level spatial shackles... Even if it didn't use super skills, it was still a complete crushing advantage for pets of the same level.

It could be said that Buggy's current actual battle power was also that of a pseudo monarch. In fact, it wasn't the kind to resist. If it could carry level-seven equipment like Dragon Whiskers and Dragon Scales, it even had a chance of defeating some weaker commander ranks of monarch races. Only monarch-level pets with more than a million energy points could make Buggy lose!

"I..." Because the worm didn't have any real explosive deterrence, Xia Qingwei quickly calmed down. However, her expression was still filled with disbelief. As she looked at Shi Yu, at the blue butterfly that continued to pick flowers with the Little Iron Eating Beast, the Little Ginseng Baby, and the Little Sword Spirit, huge waves rose in her heart.

How was this possible...

Perfect level deterrence?

Was the guy a monster?!

In Xia Qingwei's eyes, Shi Yu immediately became a mysterious and incomprehensible monster.

"I, I understand." Xia Qingwei breathed heavily.

Then, Legendary Hua warmly welcomed Xia Qingwei and left her to drink tea. However, because the pet didn't even have the courage to attack in front of Shi Yu's Butterfly of Imagination, she also shut herself down with the pet and didn't talk. The battle couldn't continue. The silent Xia Qingwei didn't stay for long either. She bid farewell to Legendary Hua Xiajin and planned to return to Demon Capital.

After Xia Qingwei left, Legend Hua smiled at Shi Yu and the others.

"I thought you guys would play down the strength... Qingwei will probably suffer a huge blow."

As expected of a member of Bureau 11, Legend Hua thought to himself. He couldn't be regarded as a normal person his age at all. In fact, in Bureau 11, Shi Yu's potential at the same time could also be ranked first. It could be said that it was no problem for him to be the Beast Tamer with the greatest potential in Bureau 11. His talent potential was even above that of Lu Qingyi.

Shi Yu was also very helpless. He said, "How can we act like this?"

It was still the fault of the high deterrence skill. This was only a perfect high-level deterrence. If it was a transcendent-level deterrence, it would probably be even more impossible to fight. At that time, the deterrence would probably wrap around a rice grain and rely on a rice grain to scare a bunch of low-level pets to death.

Shi Yu had already thought about it.

When the time came, Eleven would condense a pile of hardening weapons and equipment, wrap them around deterrence, and then let Baby Ginseng create a pile of nutrient fruits to store them. Finally, it would let Buggy seal it with the spatial shackles and materialize a dragon phantom as a guardian. In this way, the "Shiyu Ruins" would be completed. Then, he just needed to die and have some future fateful person discover his ruins.

"No, Qingwei is a very strong girl. After she goes back, she will definitely choose to train harder. By the way, you're still a university student, so she should choose to fight you in the National League again. Unfortunately, she didn't inherit her father's talent. Otherwise, she should have more achievements in battle."

Shi Yu had almost forgotten that she was the daughter of a legend.

Good heavens, he had already beaten up three legendary children.

Yin Zhengfan, that... Rongguang kid, and Xia Qingwei.

Well, he couldn't continue like this. Shi Yu was afraid that it would create an alliance of worried fathers that would affect the stability of the world.

...

The next day.

At Ancient Capital University, Shi Yu returned to his base camp from the Divine Capital.

Just as he returned, Ancient Capital University was in chaos.

Miao Dongdong returned before Shi Yu, but he didn't say anything about Shi Yu.

However, Shi Yu's matter could not be hidden from those who were interested.

The beast-eared girl White Brook, who had obtained the news from Lu Qingyi, as well as the old principal of Ancient Capital University and the guardian overlord of Ancient Capital University, Meow, ran over to stop Shi Yu.

White Brook looked like she thought they'd win the national league for sure.

Overlord Gem Cat: Dragon Ball (Cry) Dragon Ball (Cry) My Dragon Ball (Cry)! It was actually the Dragon Ball!

The old principal of Ancient Capital University: Don't run around in the future. Be good and stay in school. It won't be good if you bump your head outside!!

Shi Yu didn't see these people yet, but as soon as he stepped into the school gate, he sensed an ominous feeling that made his scalp tingle. He couldn't help but stay at the school gate.

"I keep feeling that it will be very troublesome next time."

## **Chapter 202: Second Level of Beauty**

At the entrance of Ancient Capital University.

Just as he returned, Shi Yu had an ominous feeling.

He stuffed his hands in his pockets and pondered for a moment before saying,

"Buggy, Teleport."

"Send me back to the dormitory first."

"Huh?"

Buggy appeared from its concealed state and appeared beside Shi Yu.

After his Instant Transmission proficiency was maxed, Shi Yu became lazier and lazier!

Shi Yu had no choice because it was indeed useful.

"Please." Shi Yu smiled.

With Buggy's current strength, it was completely no problem for him to teleport anywhere in the campus of Ancient Capital University.

How much time did this save?

Buggy was equivalent to pretty much half a time element bug.

Well... In the future, when Eleven went to the training facility and Baby Ginseng went to class, it would probably be inevitable for Buggy to fetch them.

Buggy naturally thought of what Shi Yu thought.

It couldn't help but show a desperate expression. Its mentality had collapsed, but it still had to do the work.

Just as they were about to use their mental power to envelop Shi Yu and teleport him back to the dormitory, a cat quickly showed up.

"Meow!"

Before Shi Yu and the others could react, white light suddenly flashed in front of them. A huge white cat appeared out of thin air and landed gently. Then, it looked at Shi Yu and the others eagerly.

This gem cat's Instant Transmission proficiency... was probably not low.

Shi Yu and Buggy's mouths twitched when they saw the gem cat suddenly appear to welcome them.

"That Dragon Ball is actually the dragon ball of a divine dragon?" The gem cat was still eagerly waiting.

It was as if it had accidentally lost something precious.

Shi Yu: "That's what the Butterfly God said. It should be right... But I still don't know what race it is."

"Wu ~" The Worm of Imagination thanked the rich lady meow and the big boss for the evolution materials.

The reason why Buggy could have this day was because of Big Boss Gem Cat.

It would remember this favor. In the future, it would definitely make Baby Ginseng repay ten times over.

"Ah, the Dragon Ball" The gem cat was lost.

"This..." Shi Yu said, " Well, are the gem fruits still enough? Why don't I get Baby Ginseng to send 500 more someday? "

On Shi Yu's side, he still chose to betray the ginseng baby.

500?

The gem cat's eyes widened.

A dragon ball actually made Shi Yu feel so guilty?

"Meow!"

The gem cat put away its aggrieved expression. It was waiting for this.

It patted the ground, indicating that it was fine.

It didn't matter if it was a dragon ball or not. There were really not enough gem fruits.

However, creating this thing was very tiring. Shi Yu and Baby Ginseng could only rely on themselves.

"Alright, then you have to spend more effort. This isn't a small project... The quality can't be reduced!"

The gem cat started to worry, afraid that Baby Ginseng wouldn't be able to take it.

It looked at Shi Yu and asked, "Is there still energy in that wood-element energy crystal?"

Shi Yu took a wood-element energy crystal he got from the gem cat. It was almost equivalent to a baby ginseng's charger.

It was very difficult for it to create a high-quality nutrition fruit. After all, it was a top-notch spiritual fruit that could increase evolution potential and vitality. It was even more tiring than fighting. Without a Charging Treasure, it was impossible to maintain perfectly with recovery skills.

"It's almost gone." Shi Yu shook his head.

"It won't cut corners. However, it's indeed a little difficult for it to create nutritional fruits now. It'll probably take a long time to hand in 500. However, if Baby Ginseng can also evolve like the worm, it might be much easier. We already have an idea now, we're just short of evolution materials."

Shi Yu was practically wagging his tail.

High level mind games.

Gem Cat:???

Did this kid think it was stupid?

After circling around for so long, he was here to obtain new evolution materials?

"Meow."

The gem cat fell into deep thought. However, it wasn't impossible.

The level of the ginseng baby was too low. Even if the quality of the gem fruits it created was very high, the amount was not enough, and it was not satisfying.

For it, it was equivalent to saying that a food was very delicious, but it could only eat one mouthful and was not full at all.

"Then go take a look when you have time." It rubbed its dizzy head.

Nurturing a chef was also for the sake of a better future.

"Alright." Shi Yu smiled and looked away. It wasn't that he was selling out ginseng baby, but it was already a mature pet. It was time for it to work and earn evolution materials.

...

He could go to the Gem Cat's warehouse and the Ancient Capital University's Resource Chamber to choose resources later!

Shi Yu was very excited. Buggy was happy for Baby Ginseng, and Baby Ginseng was in pain and also happy.

Previously, Shi Yu had only paid attention to the insect evolution materials and not much else.

He had to take a closer look this time.

Before that, Shi Yu continued what he had just done and made Buggy teleport itself into the dormitory.

After returning, he immediately lay on the sofa.

However, before Shi Yu could sit up, there was a knock on the dormitory door.

Shi Yu :” ...”

“Buggy, open the door.”

Opening the door with mental strength was easier than letting Eleven and Baby Ginseng open the door.

Including doing housework, it was also very convenient. Buggy controlled multiple cleaning tools at the same time with Psychic power. It was very efficient.

Now, Buggy was already the strongest in the team, fully deserving of the number one spot in life.

Buggy cried: (ㄥ ^ ㄥ)

After returning this time, Buggy kept feeling that Shi Yu didn't love it that much anymore.

It wasn't like when it was in its cocoon state, carefully protecting it.

Instead, it instructed it more than Eleven and Baby Ginseng.

Logically speaking, shouldn't Shi Yu feed it now that it had become stronger?

As expected, there was no such thing as love for no reason. It was time to slowly repay the pleasure he received when he was in the cocoon.

“Wu...” Looking at Baby Ginseng, who was eating a basin of milk ice cream, drinking an ice soda, and Little Chi Tong, who was holding an ice cube, Buggy, who was just about to drink fruit juice, could only put down the fruit juice and use its psychic power to open the door.

There were two people outside.

One was the president of the battle club, Beast-eared Lady White Brook.

One was the old principal of Ancient Capital University who had been living in the background.

“Grandpa Feng, why are you here too?” White Brook ran over to find Shi Yu. When she encountered the old principal, she was very surprised.

“Can't I come?” The old principal chuckled and touched his white beard.

“You can, you can.” White Brook gently hammered her head and smiled.

“Are you looking for Shi Yu for something? Why don't I leave first and come find him later?”

“It’s alright, I’ll leave after chatting a little. It’s nothing serious. Let’s go in together.”

As the two of them spoke, the door opened directly.

But when the two of them looked, no one was at the door at all. The door seemed to have opened automatically.

“Please come in!!” However, a high shout quickly came from inside.

At this moment, Shi Yu had already gotten down from the sofa. He put on his shoes and walked over to welcome them.

When Shi Yu saw the two people at the door, he was stunned.

White Brook... The other was the old principal of Ancient Capital University?

Shi Yu was not surprised that Senior White Brook had come. This was common, but why did this legendary old principal of Ancient Capital University suddenly come?

“Senior Brook, Principal Feng.”

“Buggy, wash fruits and make tea.”

Shi Yu quickly welcomed the two of them.

A moment later, the three of them sat down. Shi Yu asked, “Principal Feng, Senior Brook... May I help you?”

White Brook waved her hand and smiled. “I’m fine.”

Shi Yu looked at Principal Feng.

Principal Feng laughed and said, “It’s not a big deal either. I just keep hearing Qingyi mention you. In addition to the incident at the Butterfly Meeting, I finally couldn’t help but come over to meet you.”

As the old principal finished speaking, Buggy had already controlled the tea and juice to fly over. Eleven also carried a few bottles of milk, while Baby Ginseng raised two bottles of soda and sent them over.

It prepared a bit of everything since it didn’t know what they liked.

“Is this the Butterfly of Imagination? It’s much prettier than in the photos,” White Brook said with envy.

Girls still liked pretty things.

Unfortunately, the butterfly’s body was too weak. White Brook preferred fist to fist, and she didn’t like to be a mage or assassin through the Fusion Talent.

“It’s indeed a very beautiful race.” Principal Feng nodded.

“But because of this, Shi Yu, you have to be careful outside.”

The old principal looked at Shi Yu. The Sword Spirit of a high-level overlord race and the Medium-level overlord race, the Butterfly of Imagination. Moreover, Beast Tamers and pets were still very weak. In such a situation, even their own people would probably have some crooked thoughts.

Just the identity of Bureau 11 was not enough to deter some crazy people who could even throw their lives away.

"I understand. I'll take note." Shi Yu nodded.

"Even I'm envious. The overlord race... others will definitely be even more envious." White Brook looked on helplessly. The pets of her highest race were only quasi overlord races.

It was her six-tailed Light Fox. It had already evolved into a nine-tailed Light Fox and replaced the previous White Tiger pet, becoming her current highest priority fusion target.

The Nine-tailed Race, such a powerful pet, was still a little inferior to the overlord race. Shi Yu was simply too lucky to have contracted an overlord race.

"Haha, thankfully, the country is still very stable now. If it weren't for more than ten years ago, when such big news was made, it would probably be very difficult to have peace." The old principal of Ancient Capital University laughed.

"More than ten years ago?"

Shi Yu had actually always felt that Dong Huang's culture was pretty good. This was too rare for a high-level martial arts fantasy world.

"Well, more than ten years ago, Dong Huang wasn't so stable. There were many protective umbrellas of various foreign tribes, underground organizations, and evil forces. At that time, if any Beast Tamer without a background was very lucky to contract a special mutated pet, the greatest possibility for him to wait was that the contract was forced to be broken and the pet was taken away. Then, the Beast Tamer himself mysteriously disappeared..."

"The current stability is the result of a long period of blacklisting and eradicating evil." Principal Feng didn't have any taboo and told Shi Yu about the situation before Dong Huang.

"I know this," White Brook said. "I even heard from my grandfather that there was a legendary Beast Tamer in the totem area. It was because his pet was stolen when he was young and he was framed instead. Then, his family was destroyed. In the end, only he was lucky enough to escape to the totem area. In the end, he became Dong Huang's enemy... Although justice came later and that financial group was uprooted, he still didn't choose to return."

"Sigh, there was indeed such a thing." Principal Feng sighed. Because of this kind of thing, Dong Huang lost a genius with legendary potential for nothing. This kind of financial group was really detestable. They couldn't forcefully buy it, so they framed it and destroyed others' futures and their whole family. At that time, the law wasn't perfect either. In the end, it created a huge enemy for Dong Huang.

"I'll be careful." The corners of Shi Yu's mouth twitched. They were really scaring him. He just wanted to happily train a pet and happily crack a ruin. He mustn't encounter such a bad thing.

"Therefore, before becoming a master-level Beast Tamer, it's better not to run around. Even if it's a ruin that might be dangerous, don't go for the time being. Stay in the school first." Principal Feng smiled.

Shi Yu's current potential was too great. He had to protect it well.

“No, Senior Bai even called me to participate in the exchange activity in the capital, to participate in the martial arts conference, to participate in the national competition, to...”

White Brook: “?”

Principal Feng looked at White Brook.

“Cough, it’s not a big problem in such a formal public competition,” Principal Feng said. “It’s mainly to not go to dangerous places. Without enough bodyguards and strength, don’t think about some unsolved ruins.”

“Don’t repeat my mistake at such a young age.”

Shi Yu was slightly stunned. The past?

Beside him, Senior White Brook’s expression changed slightly. She clearly knew something.

Principal Feng chuckled and said, “You still don’t know, right? I’m also a member of that place.”

Shi Yu did not react for a moment.

“Bureau 11?” Shi Yu said in surprise a moment later.

“Yes.” The old principal chuckled.

Shi Yu was very shocked. “Why didn’t Senior Lu tell me...”

Speaking of which, he was still confused about the members of Bureau 11. He had to ask Senior Lu about it someday.

“Haha, I didn’t ask her to say it.”

“I haven’t used that identity for a long time. I left the archeology field very early, so at the moment, it’s just Bureau 11.”

“Back then, I was also an archeologist and a legendary Beast Tamer. I contracted an overlord-level pet. However, during an exploration of the ruins, I encountered danger. The overlord battle pet died, and my vitality was greatly injured. Since then, after losing a close friend who grew up with me, I withdrew from the archeological field. Sometimes, exploring the unknown is important, but other things are also important.”

With the death of the overlord-level battle pet, and him not in the mood to cultivate, the old principal of Ancient Capital University became a false legend who had a level-seven Beast Taming Space but no overlord-level battle power. In the country, there were many figures like the old principal of Ancient Capital University, but this was the first time Shi Yu knew about Principal Feng’s past.

“This... I understand.” Shi Yu understood. Principal Feng hoped that he wouldn’t be like him before he was strong enough. If anything really happened, it would be too late to regret it.

Shi Yu imagined that if Eleven, Buggy, Baby Ginseng, and the other pets had an accident because of him because he wanted to explore the ruins, he would probably be like Principal Feng and not want to come into contact with these things anymore.

White Brook poked Shi Yu and said, "I'll tell you secretly. Grandpa Feng is still Senior Lu's grandfather."

Shi Yu:!!!!

Shi Yu opened his mouth slightly and looked at the smiling Principal Feng. He was shocked. He didn't expect there to be such a relationship.

He became much more reserved.

"You little girl, this is no longer a secret, but a conspiracy," Principal Feng said.

"Hehe." White Brook smiled.

"Are you also a special telepathy talent?" Shi Yu asked Principal Feng. He vaguely remembered that Senior Lu had said that Eleven, including him, had this talent.

"Yes." Principal Feng nodded and said, "But after that accident, this talent was never activated again, but it doesn't matter. Bureau 11 is full of bad things. I'm currently working in the first and eighth bureaus. My retirement days are much more comfortable than back then."

Shi Yu: "?"

First round? Eighth round?

"One person can join three departments?" Shi Yu was slightly stunned. What the hell?

Didn't the members of Division 13 represent special talents in thirteen different domains?

Principal Feng chuckled and said, "There's nothing wrong with that. In the eighth one, I'm in charge of domestic education. I'm in charge of digging, guiding, and teaching geniuses with potential. I'm in charge of archeological education now, so why not? At least, under my lead, Ancient Capital University became the number one archaeological Department in the country. I also raised Qingyi. You were discovered by Qingyi, and I dug you up."

"Who said a person can't get several salaries at the same time?"

"..." Shi Yu was actually speechless for a moment.

So casual?

He suddenly understood why Senior Lu had never explored any dangerous ruins before graduation from university. With such a stable grandfather, before she had master-level strength, even Principal Feng was worried about her exploring dangerous ruins.

"Then when I develop any special feed results, can I join another Bureau?"

Shi Yu muttered. The evolution method of the iron-eating beast overlord race, the evolution method of the green cocoon, and a bunch of skill teaching manuals. It shouldn't be wrong to say that he was a special talent in the feeding field, right?

The Thirteen Bureau of Dong Huang should be spread across many fields such as feed, medical care, education, business, intelligence, strategy. The Feeding Department definitely had them.

“Research feeding?!! Archeology is the foundation of Ancient Capital University!” The old principal of Ancient Capital University widened his eyes. It was fine if it was just supplementary battle research, but Shi Yu wanted to research about feeding?

How could a person have so much energy?

What was Shi Yu thinking? He had the amazing talent to listen to history, and he didn’t specialize in archeology and instead went to study feeding?

It was impossible to develop any results.

The Feeding Department of Ancient Capital University was the same as the Battle Department. They were both more lousy.

“I understand, I understand.” Shi Yu didn’t lower himself to the old principal’s level. However, he had a cheat, so he’d secretly do it anyway.

“The third bureau of the Feeding Domain is boring. It’s worse than Bureau 11. Don’t think too much,” Principal Feng said.

“Principal Feng, what’s the overall combat power of the Beast Tamers of Bureau 11 in Division 13?” Shi Yu couldn’t help but ask when he finally met someone who understood.

“Third.” Without needing Principal Feng to answer, White Brook beside him rushed to answer. “As everyone knows, the Beast Tamers of the archaeology Department... have very fierce battle power.”

“There are two more who are stronger than the Beast Tamers of Bureau 11?” Shi Yu was stunned.

“Well...” Principal Feng thought carefully. Indeed, as White Brook said, there were only two people whose combined battle power could steadily suppress Bureau 11.

“If Bureau 11 can be ranked third, the second should be the fourth bureau. The first should be the first bureau.”

“The members of the fourth are all made up of the most talented Mechanics. The overlord-level battleships in the country were all created by them, and they’re in charge of many other cutting-edge technologies.”

“The fourth is indeed very strong, and their strongest point is that they can quickly create some legendary Beast Tamers for Dong Huang. There are many Beast Tamers in the country whose Beast Taming Space has reached level seven, but they can’t nurture overlord-level pets. In battle, if everyone is militarized, everyone will be assigned an overlord-level mechanical life...”

Principal Feng had a playful expression. In the past ten years, most of Dong Huang’s funds had been invested in the development of mechanical technology. Now, it was difficult for him to determine how many overlord-level mechanical lives were hidden in Dong Huang. The number announced by the Strategic Bureau to the other races definitely couldn’t be taken seriously, but without a doubt, the fourth could steadily suppress Bureau 11. They were the true defense force.

“The overall battle power in the first bureau is still above the fourth bureau?? Wait, Principal Feng, you just said that you’re still in the first bureau?” Shi Yu suddenly discovered a blind spot!

Shi Yu really couldn't imagine what department was stronger than the mechanics.

Could it be a department formed by the Titled Legends in the country?

No, then Principal Feng didn't have the right to enter.

Moreover, if he remembered correctly, the 13 divisions didn't include the battle department. They were all departments in special domains. Beast Taming battles were mainstream, while Division 13 was considered a branch domain.

"The first round is more secretive. There are fewer people who know about it than those who know about Bureau 11."

Principal Feng touched his beard and said, "A batch of Beast Tamers with the greatest talent in making friends has gathered in this bureau!"

Shi Yu: "?"

"You have to know that there are many guardian-level creatures close to humans sleeping in the country. Although no one contracted them, they must have chosen to stay in Dong Huang because of some 'bonds'. There is a group of people who can communicate with them and ask them to attack. In the first bureau, a group of special people gathered. To a certain extent, they can communicate with the guardians and ask them to attack when the country is in danger."

"They might be legends, ordinary people, or descendants of ancient heroes... It's all possible."

"Now, do you know why the overall battle power in the first round is the strongest? Because the guardians of Dong Huang's land are also included. If Dong Huang and the totem clans fight again, they will also be the absolute main force."

Shi Yu opened his mouth slightly and felt that it was unreasonable, but he couldn't refute it. This bureau, this bureau... was f\*cking ridiculous.

The Ministry of Foreign Affairs was the strongest?

It wasn't appropriate to call it diplomacy. Internal contact...?

PY Bureau?

If he could make friends with a guardian and cozy up to the guardian, he could enter the first bureau?

For a moment, Shi Yu wanted to curse, but he couldn't.

Damn, he couldn't communicate with the butterfly god at all previously and make friends.

Because the surprise brought by the Butterfly of Imagination and the scale for the Dragon Palace City was too big, even the worm-element nutrient fruit that Baby Ginseng studied didn't cross their mind. They could've given it to the Butterfly God. It was mainly because the Butterfly God chased people away too quickly.

It was not a big problem... Dragon Palace City, they had Dragon Palace City!

However, would Dragon Palace City be in danger? Shi Yu was momentarily conflicted.

“Alright...” After a moment of silence, Shi Yu glanced at Senior White Brook.

How does she know so much? Which bureau were her parents from?

Considering that White Brook could have such a good relationship with Senior Lu and even had a ruin space with her, he estimated that Senior White Brook’s family background was definitely very terrifying.

“Let’s end the conversation here today.” Principal Feng laughed and said, “I’ve finished what I needed to say. I should leave too. The two of you can continue chatting.”

“Aren’t you staying a little longer?” Shi Yu asked.

Principal Feng shook his head and said, “No... Uh, wait, I think I really forgot something.”

He looked at Eleven, Baby Ginseng, and Buggy, who were standing in a row in front of the wall and listening to their conversation, and fell into deep thought.

“I’ve only heard that your transformation is very magical and that you have the strength of the Butterfly of Imagination. I’m a little curious about the strength of the Nine Li Battle Beast. I want to see your current strength. Do you have a chance?”

“I also came here to spar with Junior Shi Yu. Sword Spirit! Butterfly of Imagination!” White Brook’s eyes lit up. She looked at Shi Yu and said, “How about I Possess the Nine-Tailed Fox and fight you?”

Shi Yu: “?”

Her Nine-tailed Fox’s energy level is more than ten times that of Buggy... What fight would that be?

“If you possess a commander-level pet. I’ll fight you,” Shi Yu said.

White Brook: “???”

Principal Feng laughed and suddenly thought of something. “Is your Beast Taming Space already level four?”

Shi Yu was stunned. “How do you know?”

“I sensed it, it’s just experience. But you probably haven’t undergone the high-level Beast Tamer assessment yet, right? High-level Beast Tamers require Beast Tamers to have commander-level battle power. Why don’t I call Master Qu Jie from the association to battle you with the sealing power? I’ll take it as an advancement assessment.”

“Good idea.” White Brook nodded.

“...” Shi Yu’s expression was strange.. It was very strange, especially strange. It was Master Qu Jie again?

## **Chapter 203: Shi Yu’s Dragon Army**

Master Qu Jie...

Shi Yu didn't know what to say.

Last time, when Eleven had just finished evolving, Dean Hao contacted Master Qu Jie and helped him carry out the Intermediate Beast Tamer assessment. The audience was the panda father and daughter.

This time, after Buggy finished evolving, Principal Feng seemed to also want to contact Master Qu Jie to help him carry out the high-level Beast Tamer assessment?

Seriously...

"It's not impossible."

Shi Yu said, "I indeed haven't carried out the high-level assessment."

Although Master Qu Jie didn't seem very happy the last time, he was in this line of work. Shi Yu and the others were also taking care of him.

"Haha, alright then. I'll contact Qu Jie now."

Principal Feng took out his cell phone and immediately dialed.

...

At the assessment venue of the Beast Tamer Association of Ancient Capital.

The in-charge, Master Qu Jie, unexpectedly received a call again.

"Principal Feng, what's the matter?"

Principal Feng's level was much higher than Dean Hao's.

Although he had already retired, he was also a legendary figure in the ancient capital back then. He was a senior.

"Haha, Master Qu, I have a student here who plans to undergo the high-level Beast Tamer assessment. Are you free?"

"Of course. Come, I'll take the assessment personally..."

Master Qu Jie still thought that it was something big.

Sigh, was that all?

Simple!

Principal Feng called him personally. Which student was so impressive?

Eh?

He frowned and realized that things weren't simple.

However, he felt that he was overthinking.

"Principal Feng, may I ask, which student is it?"

“You know this person. He’s the top scholar of our batch’s vocation assessment, Shi Yu.”

As soon as he finished speaking, Master Qu Jie was stunned on the spot.

Holy shit.

Shi Yu?

Why did this kid increase two levels in four months?

Even if he kept taking medicine, it couldn’t be that fierce, right?

“Then I’ll hang up first. We’ll go over now,” Principal Feng said.

“Ah...” Master Qu Jie was just about to say something when the other party had already gotten up.

...

A moment later, the Beast Tamer Association.

The corners of Master Qu Jie’s mouth twitched as he stood outside to welcome Shi Yu and the others.

He looked at Principal Feng and the president of the Battle Club of Ancient Capital University, White Brook, who came together and immediately understood. They didn’t come with good intentions.

The last time he came, it was also a big battle.

Why was there such a big scene for a serious person to come to the assessment?

“Principal Feng, Student White Brook, Student Shi Yu.”

Master Qu Jie looked at the three of them with a stomach ache.

“Master Qu Jie, long time no see,” the few of them greeted.

Master Qu Jie was silent for a moment before saying, “Actually, I was the one who gave Student Shi Yu the assessment last time.”

Principal Feng and White Brook were stunned. They looked at Shi Yu. There was such a thing?

They wouldn’t have paid attention to Shi Yu’s intermediate assessment either. They really didn’t know.

“Student Shi Yu performed very well last time.”

“Although the intermediate assessment only requires the pet to last a few minutes in the hands of a commander-level battle power, with Student Shi Yu’s strength at that time, defeating ordinary commander-level battle power was not a problem.”

“So I’ve considered it. There’s no need for the high-level assessment. I’ve already prepared the high-level certificate.” Master Qu Jie took out his identification.

The three of them:???

“This is against the rules...” White Brook said.

“Rules are all set by humans. As long as the standard is met, formalism is the most unnecessary,” Master Qu Jie explained.

“That’s true.” Principal Feng nodded.

Master Qu Jie chuckled. The old senior was still reasonable.

Principal Feng said, “Then don’t follow the rules. But since you’re already here, seal the pet’s energy level to 200,000. Fight Shi Yu with the lowest monarch-level standard. It’s just nice to test his current strength.”

Master Qu Jie was stunned.

Fight?

“This...” White Brook was also stunned.

Therefore, was it a high-level Beast Tamer assessment or a master-level assessment?

“200,000, for real?”

Master Qu Jie was stunned.

However, after careful consideration, if it was 200,000, he could beat Shi Yu.

Shi Yu’s abnormal Nine Li Battle Beast only had less than 100,000 energy points three months ago.

Even if Shi Yu broke through, his pet definitely couldn’t break through with him.

If that Nine Li Battle Beast surpassed Shi Yu by another level and reached the monarch level, he definitely wouldn’t believe it.

No matter how good the physique of a high-level Beast Tamer was, it was impossible for them to control a monarch-level pet. The strength of the pet became greater the further it went. It was also because of this that the higher the level of the Beast Tamer, the harder it was to increase.

Therefore, the greatest possibility was that the Nine Li War Beast still had about 100,000 energy points.

Two times the energy difference!

Even if Shi Yu’s Nine Li Battle Beast’s skill proficiency was very high, that was fine. This was because his pet skill proficiency was not low either. He couldn’t widen the gap much. This time, as long as he arranged his battle tactics appropriately...

“It’s not impossible, right?” Master Qu Jie nodded.

“But 200,000 is indeed a little high. 4VS1. Shi Yu can send four pets. Master Qu Jie, you have one. This is according to the standard,” Principal Feng thought again and added.

He wanted to see the strength of General Mu Huiyin’s heroic spirit possessing Shi Yu and Shi Yu’s new pet, the Butterfly of Imagination. 1VS1 was definitely not enough.

“Sure.” Master Qu Jie felt that there was no problem. This was more reasonable. Otherwise, it would be a little bullying.

“Student Shi Yu, your pets are all commander rank, right?” Just in case, Master Qu Jie asked.

“Three commander ranks and one transcendent,” Shi Yu said.

“Oh, oh, not bad. You’ve improved very quickly.” Master Qu Jie smiled. It looked like he was overthinking.

...

After confirming that it was a different form of assessment, the few of them arrived at the specialized examination hall.

As he walked, Master Qu Jie communicated with the Ox-Headed Beast King telepathically.

“Old Bull, come to the assessment. This time, your chance to show off your might is here!”

“It’s still that Shi Yu, but this time, you have a 200,000 energy limit!”

“You definitely won’t fail this time. It’s a battle to wash away your humiliation.”

Ox-Headed Beast King:?

“Roar!!!”

In the examination hall, Master Qu Jie summoned his pet as he walked.

In the arena, a dark red flame formed, and the phantom of a huge bull-headed monster nearly four meters tall appeared.

“It’s still the Ox-Headed Beast King?” Shi Yu was slightly stunned when he saw his opponent.

They were old friends.

“Roar!!!” However, the Ox-Headed Beast King looked at Shi Yu with a rather unfriendly expression.

Hehe, your Grandpa Cow had 200,000 energy points this time!

It could relax a little and fight. Who else was there?

In front of Shi Yu, the energy value of the Ox-Headed Beast King had indeed been sealed by Master Qu Jie to “200001”.

“Summon your pets,” Master Qu Jie said with a smile.

“Alright.”

Shi Yu took a deep breath and started to summon his pet.

Hu hu hu ~

As Shi Yu began to summon his pet, a breeze blew.

The summoning array turned into a spatial ripple. A huge butterfly more than three meters tall with a body mainly blue and white came out. With watery blue compound eyes and a pair of gorgeous blue wings, whose wings were covered in bright white patterns, it slowly flew out of the spatial ripple.

After the Butterfly of Imagination appeared, it quietly stared at its opponent. As the overlord butterfly, its aura involuntarily emitted, its aura extremely intimidating!

Boom!

The overlord aura swept past, making Master Qu Jie's hair and the tuft of red hair of the Ox-Headed Beast King sway slightly.

At this moment, when he saw the Butterfly of Imagination, Master Qu Jie was first stunned. Then, after careful observation, his pupils constricted slightly.

He opened his mouth wide and suddenly raised his hand. He pointed opposite and trembled slightly.

The powerful aura of the Butterfly of Imagination caused the baby ginseng on the ground beside it and the little sword spirit floating in the air to not be noticed at all. The limelight was all snatched away by the worm.

"This is!!"

Upon seeing this butterfly, Master Qu Jie opened his mouth wide and looked at Shi Yu in shock. He looked at Principal Feng in the audience.

F\*ck!

Wasn't this the newly announced overlord species pet, the Butterfly of Imagination?!

Damn, why was it here!

Master Qu Jie was stunned.

"That Imagination Butterfly in the Butterfly Meeting is your pet?!!"

Master Qu Jie looked at Shi Yu in shock.

In fact, not many Beast Tamers knew that the Butterfly of Imagination was Shi Yu's pet at the moment. At the moment, only some core members of the associations related to this incident knew.

A legendary Beast Tamer might be able to find out if he wanted to investigate, but even a top-notch master like Master Qu Jie wouldn't know the truth so easily if he didn't have channels.

"Yeah." Shi Yu smiled.

Master Qu Jie looked at Shi Yu's lineup in confusion. Indeed, during the last assessment, only Baby Ginseng and the green silkworm, who were eating melons and were unable to interfere in the battle, were left. As for that green silkworm... it had already evolved into the butterfly of imagination in front of him?

Holy shit.

Master Qu Jie was stunned. Mid-level overlord race, commander-level Butterfly of Imagination?

He suddenly felt that the battle this time was not that stable.

After all, even that exaggerated Nine Li War Beast had yet to reach the overlord race!

And his Ox-Headed Beast King was only a low-level monarch race, much lower than the Butterfly of Imagination!

What a scam.

Also, he quickly looked at the little sword spirit. This was a sword-type undead?

The sword spirit was a large-type pet. If a new race didn't form on a large scale, its race level would be difficult to determine. Master Qu Jie fell silent.

On his side, there was completely insufficient information!

"Where's your Iron-eating Beast?" Master Qu Jie asked again. He felt troubled. Beside him, the Ox-Headed Beast King's face also fell. It had a bad feeling.

His Beast Tamer didn't seem to be reliable...

Shi Yu said, "Here."

Little Eleven crawled out of Shi Yu's pocket and onto his shoulder.

"Alright..." Seeing that Shi Yu's four pets were all here, a drop of sweat appeared on Master Qu Jie's forehead. He suddenly regretted taking this assessment.

Who knew that Shi Yu would have another overlord pet!

However, it wasn't a big problem...

He believed in the Ox-Headed Beast King.

Butterfly-type pets had a classic lack of defense, which meant that their vitality was not high, their stamina was low, and their energy levels were low. The Ox-Headed Beast King still had an advantage.

In other words, apart from the number advantage of super skills and the spatial advantage, this butterfly was not as powerful as that Nine Li War Beast...

"You guys attack first."

Master Qu Jie said seriously.

At the same time, he and the Ox-Headed Beast King focused.

"Master Qu Jie, because I haven't really sent them to a real fight together, you have to trouble yourself a little."

Shi Yu didn't know if he could defeat an opponent with 200,000 energy points and a high skill proficiency, but whether he could defeat him or not, Master Qu Jie had to adapt to the situation.

In theory, it was still the first time everyone fought side by side after Little Chi Tong broke through, after his own breakthrough, and after his possession was also increased!

"Then let me see your strength." Master Qu Jie expressed that there was no problem. "Don't have any worries."

Three commander ranks and one transcendent rank. He believed that he could still deal with it, but it might be troublesome...

Shi Yu stood in the arena and immediately said, "Then I'll start!"

Spatial shackles!!

He directly let Buggy use the transcendent high-level spatial skill, spatial shackles!

Stunning the enemy before the team battle was the foundation!

Boom!

As Shi Yu finished speaking, the gaze of the Butterfly Insect in the sky flashed slightly. Almost instantly, an incomparable pressure appeared around the Ox-Headed Beast King, making its expression change drastically. Master Qu Jie's expression also changed drastically.

Because the Butterfly of Imagination was too fast, so fast that even if they had experienced hundreds of battles, they almost couldn't react.

A transcendent-level spatial skill... was almost equivalent to instant cast.

"Roar!!!"

At this moment, red flames erupted from the Ox-Headed Beast King's body. With a roar, it raised its battle ax and directly slashed across the sky.

The huge ax burned with flames, and the surrounding heat wave began to sway. A transcendent Flaming Ax attack directly turned into a shock wave and flew towards the Butterfly of Imagination. At this moment, Master Qu Jie and the Ox-Headed Beast King realized what skill the Butterfly of Imagination had used just now.

Spatial shackles!!

Bang!

The Ox-Headed Beast King's Flaming Ax phantom didn't fly far before exploding into thin air, as if it had come into contact with some invisible wall.

At this moment, the full appearance of the spatial shackles gradually became clear after being attacked. A transparent huge semicircular domain directly enveloped the Ox-Headed Beast King and sealed it.

The spatial domain constantly produced ripples, but even though it suffered a huge impact, it quickly recovered its calm and was actually fine.

A transcendent mid-level skill was used by a pet that had reached the lowest standard of the monarch level. It actually... couldn't break the spatial shackles of a commander-level pet!

"How is that possible!" Master Qu Jie immediately widened his eyes.

"Roar!"

The Ox-Headed Beast King also stopped thinking.

“This spatial shackle...”

Principal Feng and White Brook’s pupils also constricted.

This spatial strength was a little ridiculous...

Although the current Ox-Headed Beast King was only at the standard of the transcendent monarch race, it had at least reached the threshold of the monarch level. Moreover, it had mastered a transcendent intermediate-level skill. Its energy efficiency was definitely not low. That 200,000 energy points, combined with the transcendent intermediate-level skill, was an absolute crush for commander-level pets.

However, the Butterfly of Imagination was so easily stunning?

“Unbelievable, much stronger than I imagined,” Principal Feng muttered. A middle-level overlord race could have this strength?

No, it wasn’t that the middle-level overlord race was very strong, but that this Butterfly of Imagination was very strong!!

At the moment, only Shi Yu knew what was going on. After all... Buggy used a transcendent high-level skill. Moreover, it was a powerful spatial skill. Moreover, its energy value was less than 60,000 lower than the other party. The difference was far from that big.

It wasn’t that the other party couldn’t break through the spatial shackles, but it probably had to use super skills or combination skills. However, Shi Yu clearly wouldn’t wait for the other party to directly break through the spatial shackles!

He didn’t let the worm cause spatial fluctuations any further to attack. Instead, he chose to let it strengthen the strength of the shackles. He took a deep breath and planned to charge the attacker!

“Flame Bath Battle Soul, Raging Flame Charge, Horn of Fire!”

On the other side, Master Qu Jie gritted his teeth and smiled. He decided not to let this little monster, Shi Yu, underestimate him.

In any case, Shi Yu had already touched most of his baseline the last time. In that case, he would fight with all his might.

The proficient level Flame Bath Battle Soul increased all-round attributes. The transcendent level Flame Charge increased explosive power, the transcendent level Flame Horn penetrated space, and with the absolute advantage of 200,000 energy points as the foundation...

Boom!

The Ox-Headed Beast King exploded as its muscles increased.

It charged at the spatial shackles.

However, at this moment, Master Qu Jie accidentally observed the other side and Shi Yu’s actions...

He couldn’t help but be stunned.

On the other side, under the breeze, Shi Yu's red cloak fluttered in the wind.

He stretched out his hand, and a large amount of black matter appeared out of thin air. Soon, a black sword condensed in Shi Yu's hand.

At the same time that Shi Yu swung it gently, Little Chi Tong quickly turned into a red light beside him and merged into Shi Yu's body to possess him!

At the same time, Eleven, who was standing on Shi Yu's shoulder, evolved in a posture of about 0.3 meters. It entered the sharp mode and erupted with hardening and lightning power armor all over Shi Yu's body.

Buzz!

In the next moment, the hardening sword in Shi Yu's hand was black and red, as if it had just come out of a furnace with lightning lingering around it.

Space seemed to tremble, and the air buzzed.

Shi Yu's body began to turn blurry and hot. Slowly, the color of Shi Yu's eyes and hair turned fiery red.

With a boom, countless fire threads condensed. A fierce spiritual aura that was like the flames of the sun turned into flames that wrapped around Shi Yu's entire body!

"Master Qu Jie, you're very familiar with this state, right? I've also done this in the vocation assessment..."

"But now, the equipment has been upgraded..."

Gulp.

Seeing Shi Yu's change, Master Qu Jie was stunned again. He suddenly realized that something was wrong, and his gaze exploded.

What was this? What was this? A familiar yet unfamiliar style!

At this moment, the Ox-Headed Beast King, which had suddenly attacked the spatial shackles, also suddenly felt that something was wrong. It sensed a terrifying hot aura that was much stronger than the Butterfly of Imagination from Shi Yu's body. As a fire-element pet, it was very sensitive...

"Wu wu wu wu wu wu ka ka ka!!"

As for White Brook, she was excited.

Principal Feng's eyes lit up.

This was the Sword Spirit Possession Mode?

In the arena, Buggy sensed Shi Yu's state and nodded secretly.

It was confident in dealing with Eleven, Shi Yu, and Little Chi Tong alone. However, when Eleven, Shi Yu, and Little Chi Tong combined their strength, the power that erupted was too much even if it went all out.

The Iron-eating Beast Knight combination was too strong.

No, this couldn't be exclusive to leader. Someday, it would have to materialize an ice dragon and let Shi Yu become a Dragon Knight. This was the correct way for Little Chi Tong's opening.

Because of this battle, Principal Feng and Senior Bai wanted to see the Butterfly of Imagination and Little Chi Tong attack at the same time. Therefore, Shi Yu could only choose this strategy.

Buggy played support, while he dealt damage!

"Master Qu Jie, we're making a move."

Shi Yu slowly raised his black and red longsword and swung it at the Ox-Headed Beast King that had already collided with the spatial shackles.

At this moment, the Ox-Headed Beast King, which had profundities added to its body, shattered the spatial shackles in an instant. However, the moment the spatial shackles shattered, the strong spatial vibration effect directly made it dizzy for an instant.

Buggy was too strong now. Even a support skill had a huge impact on the enemy.

However, what made Master Qu Jie and the Ox-Headed Beast King's eyes explode was not the Worm's spatial shackles, but Shi Yu's sword.

Swoosh!

An incomparably dazzling red light that looked like it was rolling in the thunder clouds quickly shot out.

Boom!

The sword light intertwined with lightning and flames that were about five to six meters tall was like the flickering light of an explosive star, instantly covering everyone's vision.

With an incomparably terrifying aura and a shocking aura, it rushed over.

The sword light shattered the ground and was incomparably violent. This was an explosive skill with a nearly legendary physique. Under the full-strength hardening armor, it bore the explosive power of multiple skills such as the super skill Interlocking Sword and the super skill Inner Power.

The power of the three parties had a special reaction at this moment. A huge air wave shook the sky and earth. In the air wave, even though Buggy had become so much stronger, it was still shocked. As for Baby Ginseng, it was almost blown away and directly exploded from fright. Fortunately, it stabilized its body with the Earth Chain in time.

As for Principal Feng and White Brook, they were completely stunned. This was because this attack seemed to be enough to break through a stronger monarch!

Not to mention a transcendent race with 200,000 energy points at the monarch level, even a commander race with 500,000 energy points at the monarch level would probably be extremely serious when facing this attack, not daring to take it head-on with their bodies.

The entire examination hall was trembling. On the other side, the Ox-Headed Beast King sensed the suffocating sword aura and its expression changed drastically.

This was an attack that a commander-level opponent could use?

“F\*ck.” At that moment, Master Qu Jie was also shocked.

They were shocked by Shi Yu’s transformation and his attack.

It should have been a familiar style, but why was the style of the Iron-eating Beast Knight so different from the vocation assessment!!

This time, it wasn’t the sword light special effect...

And it was... a real sword light! A five or six-meter-long one!!

What exactly had Shi Yu experienced?

The light of the blue lightning and the red flames swallowed the Ox-Headed Beast King almost instantly. Only the Ox-Headed Beast King’s final mental roar was left in Master Qu Jie’s heart.

Stupid Beast Tamer!

It won’t believe him again!

In the future, if the intermediate assessment didn’t allow it a cap of 500,000 energy, and the advanced assessment didn’t allow it more than 1,000,000 energy, it wouldn’t even come out!

Boom!!!

Soon, the Ox-Headed Beast King fell silent. A second ago, it was still fighting against the terrifying interlocking sword that divided the examination hall into two. The next second, the energy leaking from its entire body was instantly obliterated. The battle soul was almost instantly destroyed. It stretched out its limbs weakly and cried out in pain amidst the terrifying wave.

At this moment, Master Qu Jie even forgot to return the power of the Ox-Headed Beast King. It was one thing to bear grudges, but it was another to shock Shi Yu’s explosive power.

“You just became a vocation four months ago. Four months later, you already have the battle power to threaten monarchs.”

Moreover, this was still the strength that the Butterfly of Imagination and the Nine Li Battle Beast had yet to fully erupt!

In the entire battle, apart from creating enough time for Shi Yu and the others to accumulate strength and temporarily control the Ox-Headed Beast King, what else did the Butterfly do? Nothing! As for the Nine Li Battle Beast, it didn’t even release its full strength. It was still in a shrunken state!

Master Qu Jie was extremely shocked.

Four months, professional to master!

This growth speed was simply unimaginable in this era that was not in chaos.

“This, this, this, this...” In the audience, Senior White Brook was also completely stunned. Although she had repeatedly overestimated Shi Yu’s strength, Shi Yu’s performance now made her really not know what to say.

“Isn’t that sword spirit only at the transcendent level??”

Principal Feng looked at her. Although he was also shocked, at least he knew the true potential of that sword spirit. Although it was at the transcendent level, it was the heroic spirit of a high-level overlord race... But even so, wasn’t its strength too terrifying? The huge power was far more shocking than what Lu Qingyi and he had described.

After one slash, the examination hall became ruins!

The only ginseng baby that didn’t participate the entire time condensed a nutrient fruit with tears and ran to give it to Shi Yu. It wanted to become stronger, stronger, stronger!!

He didn’t want to be a medical ginseng anymore!

At this moment, Shi Yu had already recovered his black hair and eyes. He took the nutritional fruit and ate it in one bite.

The reason why Eleven wanted to transmit lightning in the form of a shrunken Nine Li Battle Beast was very simple. If Eleven enlarged to dozens of meters and erupted with lightning, forming an intertwining sword with his strength, he wouldn’t be able to withstand it either.

It would also be the same as in the Heroic Spirit Ruins. It wouldn’t be worth it to be unconscious for a day. Therefore, when Eleven transmitted the lightning, it was best to stop while it was ahead. It was standard for it to reach Shi Yu’s physical limit. Any more and Shi Yu would have to lie down.

“Sorry, its power is a little stronger than I imagined.”

“Master Qu Jie... can you continue...”

Shi Yu looked at the Ox-Headed Beast King, which was still standing strong on the ground in front of him, but was covered in smoke, injuries, and a confused gaze. It spat out black gas and spoke timidly.

Master Qu Jie:???

He was just about to scold Shi Yu and the others for being too abnormal, but when he considered that Principal Feng was also beside him, he couldn’t help but almost cry.

“Why don’t I prepare a master-level license for you too? After you break through in the Beast Taming Space, come and get your master’s license directly. Forget the assessment.”

Stop looking for him!

Principal Feng, White Brook, and Shi Yu were speechless.

This... was against the rules.

...

Next, Shi Yu successfully obtained a high-level license.

Under Master Qu Jie's curse in his heart, they left the assessment office.

However, although he was cursing in his heart, Master Qu Jie fell into deep thought as he watched Shi Yu and the others leave.

"What a ridiculous little monster."

"The ridiculous Nine Li Battle Beast, the ridiculous Butterfly of Imagination, and the most ridiculous is... that sword spirit." Master Qu Jie's gaze was distant.

Was that the normal power that could erupt from the possession of a transcendent-level sword spirit?

Impossible!

The race level of that sword spirit... Master Qu Jie suspected that it wasn't even lower than the Butterfly of Imagination!

... If nothing unexpected happened, another legend would appear in the ancient capital in the future.

Yin Legend's son went to Imperial Capital University in order to surpass Shi Yu. He didn't know if it was right or wrong...

"I definitely won't give him the assessment next time. I'm tired," Master Qu Jie cursed.

After giving Shi Yu two assessments, the small boat that he and the Ox-Headed Beast King had a friendship could be overturned just like that.

"Roar!!!" The Ox-Headed Beast King's cursing roar also came from Master Qu Jie's Beast Taming Space.

At the same time.

On the way back to Ancient Capital University, there was silence.

Shi Yu saw that Principal Feng and the beast-eared girl were staring at him and said uncomfortably, "What's wrong..."

"Nothing, haha." Principal Feng laughed.

Interesting. The newbie Lu Qingyi discovered was indeed interesting. Now, he was more and more curious about how far Shi Yu could go in the future.

Could it be possible to become the next titled legend of the Dong Huang Ancient Country?

The first titled legendary in Bureau 11?!

Although the battle power of the members of Bureau 11 was generally very high, and there were also Legendary-level Beast Tamers in the Bureau, the telepathy talent was, after all, a telepathy talent. It was really not easy to let a group of overlord-level pets fight against a totem level without the strengthening talent. No matter how high the proficiency of these pets' skills, how high their race level, or how strong their bloodline was... So what?

There were also a few totems and guardians that weren't overlord races. There were also a few totems and guardians that didn't have super strong bloodlines. Their skill proficiency, needless to say, could look down on most overlords just by transcendent-level skills.

"I'm looking forward to the exchange with Imperial Capital University more and more."

White Brook placed her arm on Shi Yu and said with a smile, "Your strength is too surprising to me. It's a pity if you don't do anything during this event. Let me tell you, the mentor of the Beast Tamer from the Imperial Capital University who defeated Senior Lu back then is still in charge of the clubs and school teams in the Imperial Capital University. With your current strength, you're completely invincible below the master level. No matter what, you have to show off to them."

Shi Yu: "I'll fight for it..."

"In half a month, don't forget!" White Brook suddenly thought of something. Although the Butterfly of Imagination was strong, she didn't seem to have seen its two super skills. Master Qu Jie was too weak...

Shi Yu chuckled. He couldn't forget. At this moment, Shi Yu's phone suddenly rang.

Shi Yu was immediately stunned when he saw it.

After he glanced at Principal Feng, he said, "It's Senior Li. I'll take the call."

"That old woman, Li Lianping?" Principal Feng nodded.

"Hurry up and answer it. She must have something good to tell you. She's the richest woman in Bureau 11."

Shi Yu : "..."

Shi Yu hurriedly picked up the call. This was the first time he had spoken to Senior Li since the last time.

Previously, he wanted to tell the other party about the evolution of the worm, but he couldn't get through to the other party. He only sent a message.

"Shi Yu." Senior Li's laughter came from the other side of the phone.

"Senior Li, I couldn't get through to you on the phone previously. Did you see that message?"

"I saw it. As expected, it awakened the dream stealing skill."

"Yeah." Shi Yu nodded. Buggy's few skills matched it.

Senior Li said, "It's not a big deal to call you back this time. It's mainly because of this dream theft and your previous experience."

"Since you've had the opportunity to enter the Tyrant Dragon fossil dream previously, are you interested in studying it in detail? I feel that with the Illusory Phantom and the Imagination Domain, together with the Thieving Dream and researching the Transformation Stone, there might be some magical results..."

Shi Yu was stunned. "You mean..."

“I have an Tyrant Dragon’s Teeth here. Its energy level is very high, and it also contains a fossil dream. If you’re interested, I’ll give it to you to study or the fossils of other ancient creatures. If you’re interested in studying it, you can tell me what I have here.”

Shi Yu opened his mouth slightly and looked at Principal Feng.

They weren’t lying.

Although Senior Li was old, she was really rich.

The moment he heard the Tyrant Dragon’s teeth, Shi Yu imagined a scene.

In the Imagination Butterfly’s Imagination Domain, there were sea dragons in the ocean that caused tsunamis. In the sky, there were ice dragons that froze the sky.. On the ground, there were Tyrant Dragons roaring. On the sea, on the land, Buggy... No, he had gathered a Dragon Army just like that?

## **Chapter 204: Moonlight Ginseng Baby**

Shi Yu chatted with Senior Li and felt that he couldn’t disappoint the old woman.

He couldn’t help but say, “I’m interested. I’ve loved researching ancient creatures and ancient fossils since I was young.”

With the phone in hand, Shi Yu was extremely sincere.

Archeology involved classifications. Among them, Shi Yu also had preferences.

He wasn’t very interested in development changes such as clothes, buildings, money, and art.

However, he was still very interested in the paleontological fossil research Senior Li mentioned.

In fact, there was also an “Tyrant Dragon” on Earth, and it was a creature with absolute strength. Its battle power was completely above tigers or lions.

On this blue planet where everything could evolve, the “lions and tigers” could constantly evolve into various commander races, monarch races, and overlord races. Shi Yu was still very curious about the information on the evolution of the Tyrant Dragon.

Of course, what Shi Yu liked to study the most was definitely still those ethereal Mythical histories. Unfortunately, Mythical Ruins were also the most dangerous and forbidden archeological types in the archeological domain of Planet Blue. Without some strength, it was really difficult to get started.

“Alright, I’ll get the people over there to prepare and send the fossil to your school.” Grandma Li smiled in relief.

Such a good young man actually liked fossils.

Shi Yu had already been delayed by this little girl, Lu Qingyi. Research on fossils was the right path!

“Qingyi, you’re still too young. You can’t control Shi Yu. Why don’t you let him try the fossil first?” She muttered to herself.

“Sorry to trouble you,” Shi Yu said.

“I keep feeling that he’s fighting for something.” Beside him, White Brook fell silent when she saw Shi Yu expressing his love for something.

Rich woman...

“Haha.” Principal Feng laughed. Studying fossils was pretty good. As long as it wasn’t excavating fossils in various dangerous places and had already been excavated, it was still quite safe. It was very suitable for a restless university student like Shi Yu.

...

A moment later, Shi Yu and the others returned to Ancient Capital University.

It was getting late. Principal Feng, White Brook, and Shi Yu bid each other farewell.

At this moment, Shi Yu’s face was filled with a smile. This was because Senior Li had said that the Tyrant Dragon’s Teeth was at the Ancient Capital fossil museum. He would get someone to send it to him later.

“Go back to the dormitory and wait for Stone...”

“Eh, forget it. Let’s go to the gem cat to take a look first.”

Shi Yu thought for a moment and looked at Eleven, Baby Ginseng, and Little Chi Tong.

“It’s your turn, Buggy.”

Transport Butterfly: “...”

A moment later, Shi Yu and the others were teleported to the resource warehouse of Ancient Capital University by Buggy.

He appeared outside the gem cat door without even registering.

As Shi Yu and the others appeared, the changes in mental waves and spatial fluctuations naturally couldn’t be hidden from the gem cat.

It opened its eyes slightly, and its cat hair exploded.

Although it had promised to sponsor the evolution materials for the ginseng baby when Shi Yu had just returned...

However, a day had yet to pass when Shi Yu charged over. This was too fast.

It had yet to delete the public info on its favorite gemstones to hide it from him.

“Good afternoon.”

When Shi Yu greeted outside, Baby Ginseng, Eleven, Little Chi Tong, and Buggy were already standing on the window sill, knocking on the glass.

In the room, the gem cat sighed and let Shi Yu and the others in.

Soon, Shi Yu and the others sat in front of the computer, their faces shining. They gathered around and picked up the materials.

At the side, the gem cat was nervous.

“Baby Ginseng is already a low-level monarch race, so evolution materials have to be at least level-seven materials,” Shi Yu muttered to himself.

The gem cat’s heart skipped a beat.

That being said...

It kept feeling that it was going to lose many treasures again.

“Yes...”

Next, Shi Yu and the others picked. However, the evolution materials of the ginseng baby were really difficult to obtain.

He needed to find resources that were stimulating to wood-element plants in order to produce the mutation power. Those ordinary resources, such as wood-element energy crystals, were impossible.

Shi Yu and the others picked for a long time from the Gem Cat Private Treasure Vault and the Ancient Capital University’s resource bank, but they didn’t find anything suitable.

“Huh?” However, hard work paid off. Shi Yu discovered a special resource in the messy folder of the gem cat.

“This...”

Shi Yu opened the resource information.

[Name]: Moonlight Gem

[Attributes]: Light

[Level]: Level 7

[Introduction]: A gem containing moonlight essence. Moonlight radiation might cause some animals and plants to mutate.

“Teacher Cat, this, this, this...”

Although there was very little introduction, Shi Yu was immediately certain that this was one of the things he was looking for.

“Meow!!!”

However, just as Shi Yu discovered this, the gem cat widened its eyes and said, “This... is dangerous.”

“It’s indeed very dangerous... If I remember correctly, the mixed-blood werewolves in the West relied on this mutation to evolve, right?”

“There’s also a race that once appeared on the seven islands that relied on the moonlight essence to mutate from monkeys to gorillas. They all relied on it.”

The gem cat nodded crazily.

“These are all examples. If you’re not careful, you’ll lose your mind during the mutation evolution process. Although relying on the moonlight essence can indeed increase your battle power more than ten times, it’s too dangerous. It has a very strong stimulation power for plants and animals. At the moment, only a few races can withstand its stimulation power.”

“But aren’t the races that can withstand it the top overlords of nature? Or even totems,” Shi Yu said.

“Moreover, I remember that after humans first boarded the moon with mechanical lives, they also successfully cultivated mutated spiritual plants on the moon. The effect of the spiritual plants improved greatly. Later on, after Dong Huang ascended the moon, we also successfully verified this saying.”

Shi Yu looked at the silent cat.

Dong Huang was the second country to develop Mechanics. The first country had long used Mechanical Life to break through the restrictions of the blue planet and reach the Moon. They even discovered Mythical Ruins on the Moon. Shi Yu remembered all of this.

Unfortunately, the conditions for moon landing were too harsh. It was even harder than killing a totem. Later on, after thinking that the moon didn’t have much exploration value, very few countries were willing to try moon landing.

When Shi Yu was searching for special environments previously, he had considered the Moon, but he definitely gave up after thinking about it... Finding the Moonlight Gem here was purely an accident.

“Perhaps Baby Ginseng can use it too,” Shi Yu said.

Since a pet had already overcome the Moonlight Radiation and completed the mutation evolution, if he raised the mutation skill of the baby ginseng to “transcendent”, there was no reason for the baby ginseng to not be able to withstand the power of the mutation as well.

Ginseng Baby’s Moonlight Evolution, Chang’e(the Lady of the Moon) Baby?

Baby Ginseng nodded crazily.

“Wu...” The gem cat trembled slightly and put it aside dangerously. The key was that it liked this Moonlight Gem very much.

Although it wasn’t very useful anymore, but...

“Yi!!!” Baby Ginseng looked at the gem cat with tears in its eyes, promising to make moonlight flavored gem fruits in the future.

It was named Moonlight Gem Fruit.

No matter how beautiful the Moonlight Gem was, it couldn’t be used. However, the Moonlight Gem Fruit could be eaten!

Gem Cat: "Meow! (Deal)"

Shi Yu: "?"

"Can you tell me what a moonlight flavored gem fruit is?" Shi Yu felt that he almost couldn't understand their communication.

"Hurry up and choose," the gem cat urged. "Forget about those useless things."

"No, after looking around, there's only one mutated material suitable for the ginseng baby," Shi Yu said.

The gem cat heaved a sigh of relief.. Stopped the damage in time... Alright.

## **Chapter 205: Buggy's Life Path**

The gem cat was in a better mood.

"Don't want the others, right?" it asked.

"No," Shi Yu said.

"By the way, is there any place that can produce a relatively positive mutation stimulation power for plants?" Shi Yu asked. "Special soil and special water are fine."

"Most importantly, where there's no danger. Baby Ginseng and I can go."

"Meow?" The gem cat pondered for a moment.

It couldn't think of anything.

It was mainly because Shi Yu and Baby Ginseng had too many requirements.

There was naturally a pile of ordinary places, but for a ginseng baby to use it, it naturally had to be a special wonderland with energy levels above level seven. Only then would the ginseng baby have a chance to mutate into an overlord race.

However, such places were very rare in the country... With restrictions, there were even fewer.

"I'll look and think about it later. I'll tell you when I find it." The gem cat waved its paw. "Is there anything else?"

"I'll get my clone to get you the gem first."

"No hurry, no hurry," Shi Yu said. "Let's leave it here first. We'll come and get it when Baby Ginseng is about to evolve."

Shi Yu had to prepare more of Baby Ginseng's evolution materials no matter what. Just one Moonlight Gem was definitely not enough.

Using just one ingredient was already letting down a max-level mutation skill, although the mutation skill had yet to be taught to the ginseng baby, not even lush or strengthening was taught yet.

But it was definitely not wrong to prepare more materials.

If he couldn't absorb too much, he wouldn't need it when the time came, but he definitely couldn't absorb too little either.

After all, who knew when the next evolution would be? This time, it naturally had to be done in one go.

"There's nothing else, but can you accompany me to the Undead Battlefield in a month?" Shi Yu suddenly said with a smile.

Eh?

The gem cat looked at Shi Yu.

Shi Yu looked at Little Chi Tong and said, "It has the Spirit Release skill. It needs to burn 10,000 transcendent-level undead to advance. We plan to liberate its next form later. We still lack a bodyguard."

The gem cat said, "Oh, oh, no problem. The Undead Battlefield. Hmph, it's just a place I once rampaged in."

"As long as that Undying Dark Phoenix doesn't appear, as long as no dangerous ruins suddenly appear, even if an Undead King suddenly upgrades into overlord, I can protect you all."

Shi Yu : "..."

Please, stop talking.

...

After making an appointment with a Moonlight Gem at the gem cat's place, Shi Yu and the others returned satisfied.

Apart from that, he also made an appointment for the trip in a month.

At that time, the school should be on holiday. It would take time to increase Little Chi Tong's strength. It would also be convenient for him to participate in the martial arts conference and explore the ruins of the Martial Emperor.

With the gem cat leading the way to level up, if he was lucky, not to mention ten thousand transcendent-level undead, he might even be able to kill a thousand commander-level undead along the way and raise Little Chi Tong's Spirit Release to expert level.

It made Little Chi Tong the first ace lady in the team to master an expert level super skill.

As for the perfect level, there was definitely no hope. Even with the gem cat leading the team, 100 monarchs weren't that easy.

In the near future, he definitely wouldn't be free. Apart from the fossils that were coming later, the Green Silkworm Experiment from Hua Xiajin's legend would also be sent over one after another. He had to work for a period of time.

"So fast?"

Just as Shi Yu arrived at the dormitory, he received a call from the Ancient Capital's fossil museum.

"Are you Student Shi Yu? I'm Liu Xingqun, deputy director of the Ancient Capital fossil museum."

"Hello."

Shi Yu was excited. He looked at Buggy, who had just sent them back from the resource bank.

It meant that there was no need to rest. It was time to get the fossils.

Eleven, Baby Ginseng, and Little Chi Tong waved at the worm. Have a safe trip.

They didn't follow and reduced the pressure on Buggy.

Buggy:...

It suspected that this was the reason why Shi Yu taught it Instant Transmission.

"Wuo~ ~"

Then, Buggy tiredly brought Shi Yu around.

When they returned, they had a transparent container with a huge tooth in it.

This was the Tyrant Dragon Tooth that Senior Li Lianping had given them to study.

This tooth was preserved very well. It was said that it was sealed underground and not much energy leaked out. There was actually a level-seven energy wave. It was very unbelievable.

Buggy looked at it with shining eyes.

At this moment, Buggy was very excited.

Including this, there were three dragon-element equipment. Even if its Normal State couldn't defeat Eleven, would it not be able to defeat Eleven with the equipment?

"Are you very happy?" Shi Yu looked at Buggy.

Buggy nodded crazily.

"You're happy too early. The Ice Dragon's Whiskers, Sea Dragon's Scales, Tyrant Dragon's Fang... They're all mine, not yours!"

Buggy: Σ ( ° △ ° | | )

Buggy was shocked, its compound eyes filled with tears. Was there a need to be like this with their relationship?

It already belonged to him, what's wrong with letting it use the equipment...

"It's not good to rely on external forces too much."

"After all, it's an external force. Moreover, don't you think that if you really want to get equipment, you can earn money and buy equipment yourself. Only then will you feel at ease."

Shi Yu educated him. It actually relied its hopes on three dragons mere overlord races. Where was its ambition?

You're already an overlord race. Even if you want to bring equipment, you have to find legendary materials and mythical materials.

At the dining table, on the seat, the ginseng baby holding a soda popped its head out and deeply agreed that it would only feel more at ease if it earned its own money to buy evolution materials.

Buggy was momentarily at a loss.

Could it be that it still had to continue selling the worm silk?

Shi Yu chuckled and said, "Thinking too small, Buggy."

"Your phantom is already at the transcendent level. What if you create a phantom that contains the power of your attack to seal in a certain piece of equipment and sell this guardian talisman?"

"If you train the spatial pocket skill to an extremely high level, who says you can't open an alternate space outside your body? It's suitable to combine worm silk and weave real spatial bag equipment to sell, no?"

"Isn't this more profitable than selling a single worm silk?"

Buggy:!!!!

Baby Ginseng:!!

Eleven, Baby Ginseng, and Little Chi Tong stuck their heads out from different places.

Good heavens, Baby Ginseng was a food wholesaler, and Buggy had become an equipment wholesaler?

Eleven, who was passing by, pondered for a moment. Did it have any ability to earn money? He didn't seem to have any...

If it had one, it perhaps could also use Hardening to condense weapons and equipment and sell them.

However, it felt that it was much lower than Buggy's spatial equipment and Phantom equipment.

Little Chi Tong also thought for a moment before giving up. This was because for the time being, it only thought about how it could handle the "cremation" business.

It could allow the dead to return to the void without any pressure. After all, its soul would have been burned.

"Wu ~"

On the other side, Buggy thought for a moment and its eyes lit up. It felt that it could. When it earned money, it would buy a bunch of recovery items to store in the spatial bag. It wanted to see if Eleven's reserved edge stored more energy or its spatial bag stored more energy!

It, Buggy, only wanted to earn money now!

As long as it worked hard enough, it wasn't impossible for it to buy items that could surpass these three dragon-element equipment!

Shi Yu smiled when he saw that Buggy had understood.

His pets were all big spenders. He had to slowly nurture their ability to earn money.

What was the greatest reason for those quasi legendary Beast Tamers who had reached level seven in the Beast Taming Space but didn't have overlord-level pets?

In the end, they still lacked money.

Although money wasn't omnipotent, with money, wouldn't it be easy to get an overlord-level pet?

"Wu!" Buggy suddenly said excitedly.

In fact, there was a more profitable method.

Shi Yu: "Huh??"

Buggy looked at the fossil. Stop wasting time. Quick, come and study the fossil. If we can revive ancient creatures, we have everything we want.

What if he could completely turn illusions into reality and let ancient times descend into the modern world? He would be rich by selling the Tyrant Dragon Baby.

Shi Yu : "..."

"Go away.. With that strength, isn't it good to go to the totem area to hunt monsters and earn money? Why sell the Tyrant Dragon Baby?"

## **Chapter 206: Birth of the Green Worm cocoon**

In Shi Yu's dormitory at Ancient Capital University.

In the ruin ring on Shi Yu's wrist.

Shi Yu and Buggy crawled in with the Tyrant Dragon's Teeth fossil.

As for Eleven, Baby Ginseng, and Little Chi Tong, Shi Yu let them play by themselves.

Next, he and Buggy had to do business!

After entering, Shi Yu placed the fossil on a stone table and sat down.

Buggy stared at the tooth fossil beside him, its eyes shining.

"Let's do it again."

"Find the feeling you had back in that fossil lesson," Shi Yu said.

“Wu!” Buggy nodded obediently.

It wanted to make up for its failure to observe the Tyrant Dragon properly last time!

“Let’s begin.” Shi Yu closed his eyes and entered a meditative state.

According to Senior Li Lianping’s explanation, there was a chance of entering the biological fossil dream realm with the special meditation technique for archeology left behind by Emperor Shi and the transcendent dream stealing skill.

Previously, before Buggy even learned Thieving Dream, Shi Yu and the others had successfully entered once. However, it was only once. The subsequent attempts had all failed.

But this time, Buggy finally learned the skill. Perhaps it could succeed?

After Shi Yu meditated, Buggy landed on Shi Yu’s shoulder in a small form.

In the darkness, Shi Yu quickly sensed the approximate outline, shape, and the clear traces of time on the Tyrant Dragon fossil.

Without the support of the meditation stone, Shi Yu quickly learned the special meditation method for that lesson in three months. This was also the greatest gain he had gained in the three months of school.

“Wu ~”

After discovering that Shi Yu had entered a state, Buggy tried to synchronize with Shi Yu’s perception. Apart from his Psychic Perception, it also used the dream stealing skill to try to enter the dream of the fossil. However, after a minute, Shi Yu and Buggy still didn’t succeed.

The light in front of him grew brighter, but it didn’t feel it was working.

A moment later, Shi Yu and Buggy gave up.

“Wu!!!” Buggy widened its eyes and flew up.

Shi Yu, increase points!

The requirement asked for a transcendent-level dream thief, but it was only at entry-level. It definitely can’t.

Shi Yu also opened his eyes and said, “Transcendent. That’s for others.”

“You have the maximum level of Psychic power. Your spiritual power has already been tempered to an unimaginable level. The requirements are definitely much lower than other pets. Otherwise, it would have been impossible to succeed previously.”

“There’s no need to add points first. Use the Imagination Domain. In the Imagination Domain, your spiritual power will undergo a qualitative change again. Perhaps there will be new changes.”

“If it’s still not enough, I will try adding more points until the skill advances!” Shi Yu refused to believe it.

There were a bunch of backup plans. He had to succeed!

“Wu...”

Buggy landed on Shi Yu's shoulder regretfully. It couldn't increase points anymore...

Buggy sighed and used its newly awakened super skill, Imagination Domain, according to Shi Yu's request.

In the next moment, Shi Yu and the others seemed to have fallen into another world.

Everything around him turned blue. The sky that emitted a blue aura, the ground that was covered in a blue aura, and even a dazzling blue and white sun.

This was not because Shi Yu and the others were in an illusion or a dream, nor did they really come to another world. Instead, Buggy's dream world materialized and overlapped with this space, changing everything and forming a domain.

The size of the Imagination Domain depended on the strength of the worm. In the Imagination Domain, there was no need for the worm to enter the dream world to construct illusions. Instead, it only needed a thought to instantly descend the life and items it imagined into this world.

It was really a Creation God-like skill. In terms of potential, it should still be above top-grade super skills like Inner Power.

"Wu ~" Buggy's expression became serious. It could only maintain this Imagination Domain for less than a minute. It had to do that as soon as possible.

At this moment, Buggy's entire body was filled with a blue and white light, like a holy spirit. Its powerful spiritual power had undergone a qualitative change again. Buggy's body actually couldn't bear it anymore and involuntarily leaked out, forming a strong pressure.

"Alright, let's do it again as soon as possible." Shi Yu closed his eyes again and entered a meditative state.

Buggy also sensed at the same time again. The outline of the Tyrant Dragon's Teeth fossil appeared in their vision at the same time.

In the darkness, the fossil flickered with light. Shi Yu and Buggy's vision kept shrinking, as if they were walking themselves, walking towards the world behind the light.

As they approached, Shi Yu couldn't help but feel nervous.

It was going to succeed this time?

The qualitative change caused by the Imagination Domain on the spiritual power of the worm, together with the speciality of the full-level Psychic power, made the worm's dream stealing skill display the effect of an entry-level proficiency.

Boom.

In a daze, the light in front of Shi Yu and the others disappeared. They landed on a dry land that stretched as far as the eye could see. On the ground, the Tyrant Dragon, which was more than fifteen meters long and about six meters tall, looked at the group of outsiders with its bloody mouth and roared.

“Roar!!!!”

A blazing wind passed through Shi Yu.

“Heh.” Shi Yu was unmoved by the roar. If he knew it was a dream, why would he be afraid of him?

The last time, he was shocked because he didn’t know what was going on.

“Wu ~” Beside Shi Yu, the Imagination Butterfly Worm also entered the Tyrant Dragon fossil dream with Shi Yu again.

Buggy wasn’t as cowardly as last time.

The man and pet looked at the Tyrant Dragon and revealed excited expressions.

In the next second, in the dream world, the Tyrant Dragon swept its tail over, sweeping up a terrifying aura.

Seeing this, the worm slowly flew up. As it flapped its wings, this dream world suddenly shattered, and cracks quickly appeared like glass where it had been hit. The Tyrant Dragon’s figure quickly froze in the crack. In the end, the worm even landed on the head of this Tyrant Dragon.

Crack!

The dream world shattered. Shi Yu and Buggy opened their eyes and their gazes landed on this field of imagination again.

“Have you replicated it?” Shi Yu asked Buggy.

Buggy nodded quickly.

“Wu!!” Moreover, it showed a confident expression.

In the next second, with a thought, the entire Imagination Domain immediately changed. It changed from the previous blue world to an ancient appearance.

The ground had become the dry and cracked ground in the dream just now. The sky was blue and extremely deep. On the ground, an incomparably huge Tyrant Dragon phantom slowly formed in front of Shi Yu and the others.

“Roar!!!!”

After the Tyrant Dragon phantom appeared, its gaze was still fierce and emitted strong deterrence. However, its behavior was completely different from the previous dream world. After it came into existence, it directly crawled forward like a subject kneeling to the monarch and letting the Imaginary Butterfly control it.

Buggy looked up proudly.

What was a top-notch Dragon Tamer?

“It’s exactly the same.” At this moment, Shi Yu looked at the Tyrant Dragon Phantom in front of him and took a deep breath. He had already sensed the powerful aura emanating from its body. He felt that this phantom could tear apart most commander-level ferocious beasts with a single claw!

Through the Dream Stealing Skill, Buggy directly replicated the information of the Tyrant Dragon left in the fossil dream realm. Moreover, through the Imagination Domain and the Illusory Phantom, it completed the materialization in reality!

The ancient tyrant had descended into the world again!

“Roar!!!” The Tyrant Dragon raised its head and looked disdainfully at the sky and the ground.

As an ancient overlord, it had a strong body and perfect earth affinity. It was undoubtedly a ferocious beast.

“Wu ~ ~” However, at this moment, Buggy felt that it was a pity that the Tyrant Dragon Phantom it conjured only had racial skills below super level, not super skills.

“It’s very normal. Your dream stealing skill level is too low. If you want to replicate even my super skill on the illusion, you have to at least have perfect proficiency.”

“It’s already very good. You simply used illusions to materialize an ice dragon, and for that one... Forget about all skills below super level... There were only two ice-element basic skills.”

“Wu ~ ~”

At this moment, Shi Yu took out his cell phone and began to take photos of the Tyrant Dragon Phantom from various angles, recording the data.

Phantom Illusion+Imagination Domain+Dream Stealing. This was definitely the most realistic physical Tyrant Dragon in this era.

Even those top-notch dream stealers would probably find it difficult to gather these three skills and combine them. At most, they would see ancient creatures in their dreams and not perfectly materialize them in reality!

A huge discovery!

At the moment, the strength of this Tyrant Dragon was secondary. The main thing was its research value.

“Unfortunately.”

Buggy felt that it was a pity, but so did Shi Yu. He placed his hand on the Tyrant Dragon’s rough body. Unfortunately, Buggy’s ability only made it look like a real life form. It couldn’t be a real life form yet.

Otherwise, his skill index might be able to use this method to replicate the abilities of ancient creatures.

But not now. If the level of the Imagination domain was high, so maybe it could be done?

Or, he could help Buggy replicate some skills that gave life.

Perhaps it could really advance to a master of creation!

Shi Yu did not expect a similar skill for a moment, but there was indeed a Beast Taming Talent that could give life and help dead creatures awaken.

The few predecessors who established the Mechanic class were similar Beast Taming Talents.

They could help some Mountain River Plants awaken their intelligence and let them complete their initial awakening.

This talent was named "Awakening".

Dong Huang's mechanical legend was actually not directly Mechanic at the start.

It was only changed after he entered the Legendary stage. At the start, he was only an ordinary Beast Tamer.

Only when he used his talent to create the first virtual data life form and made it a mechanical beast did Dong Huang's mechanical domain gradually take shape.

Since he had such a Beast Taming Talent, Shi Yu felt that perhaps he should have such a skill, but it was not easy to find.

But taking a step back, if he could find it and let the ancient creatures revive in the modern world, it might really be possible for him and Buggy.

Stones, plants, and water could all evolve into life forms, so why couldn't the dream illusion do the same? It wasn't like there weren't dream creatures in this world.

Shi Yu filmed and recorded. A moment later, Buggy cried out.

After being stunned, Shi Yu smiled and said, "Alright, alright."

As soon as he finished speaking, Buggy immediately dispersed the Imagination Domain. It wasn't difficult to materialize the Tyrant Dragon Phantom, but for it, maintaining the Imagination Domain was a little difficult.

The Imagination Domain disappeared, and the surrounding environment returned to the initial environment of the ruins. Shi Yu smiled and said, "Well done. Let's stop here today. I'll upgrade your dream stealing skill another day."

Buggy flew around happily.

"But although the completion level of the Tyrant Dragon Phantom just now is not bad, the surrounding environment completion level is not very high. Next, I'll give you a small training mission."

"Huh???" Buggy was stunned.

Shi Yu said, "The sunny environment and the thunderstorm environment. You choose one of these two environments to practice. When the time comes, cooperate with Eleven or Baby Ginseng to use it. As for the Tyrant Dragon Phantom, Ice Dragon Phantom, and Sea Dragon Phantom, just treat it as entertainment."

"Wu..."

Whether it was the Tyrant Dragon, the Ice Dragon, or the Sea Dragon, they were all overlord races. On the other hand, Buggy itself was also an overlord race. There was completely no need to materialize their battles. It was better to materialize oneself in the field of imagination. This way, the completion level of the phantom would be higher.

Of course, if Buggy carried those three level-seven equipment and conjured the three-headed dragon, its battle power would definitely be stronger. However, Buggy could grow after all, and those three equipment were only level-seven. Now, perhaps Buggy could increase a lot of its battle power with them, but sooner or later, the equipment would be eliminated. Everything still depended on itself.

Therefore, compared to materializing a dragon, it was better to practice how to materialize various extreme weather environments, venue environments, such as the Lava Space, Thunderstorm Space, Sun Space, Super Gravity Space, and so on to fight with teammates.

“Wu!!” Buggy felt aggrieved. Was the Dragon Tamer, Buggy, gone?

For a creature like the Green Silkworm, controlling a dragon was a very great accomplishment.

“Not really. If you really want to become a Dragon Tamer, the divine dragon phantom formed by the dragon ball on the day you evolved is your best choice. After all, it’s the power that has already been integrated into your bloodline. Moreover, you still have the skill Dragon of Imagination.”

“When the time comes, the combination of the Dragon of Imagination and the Domain of Imagination will definitely be stronger than the Tyrant Dragon, Ice Dragon, and Sea Dragon,” Shi Yu said.

At the moment, Buggy’s strongest mode should be to enter the Dragon of Imagination state first to obtain the dragon attributes, physique, energy, and health points. Then, it would activate the Imagination Domain and dominate everything.

Next, it would definitely train around these two skills.

Moreover, the proficiency of Buggy’s Dragon of Imagination and the Domain of Imagination wasn’t low now, and it was even close to the proficiency level. This was all thanks to the skill Phantom Illusion. After all, the three skills had a certain connection to some extent. They were all used as the “super power of imagination”.

“Wu ~!!” Buggy expressed agreement...

“All the best, practice. Let’s go to Imperial Capital University to communicate later. You’re the main force. When the time comes, I hope you can combine the Dragon of Imagination and the power of the Imagination Domain well.” Shi Yu smiled.

Buggy nodded heavily. No problem!

At this moment, after confirming that he and Buggy could really study the fossil domain, Shi Yu was also full of motivation.

His motivation wasn’t actually an ancient creature like the Tyrant Dragon, but the recovery of a divine beast. He hoped to obtain some materials from the Mythical Era to materialize Mythical creatures.

In this world, there were Mythical materials. They were ranked at the tenth level and were also called divine-level resources. Their value was in the form of ten billion trillion yuan, and even if one had money, they might not necessarily be able to buy them.

In his previous life, Shi Yu was first a Mythical Scholar, followed by an archeologist. The attraction of Mythical creatures to him was the greatest.

“Buggy’s dream stealing skill must be max level.”

“But before that, I should take care of Baby Ginseng first.” Shi Yu realized that Baby Ginseng’s battle power had already been pulled apart too much. He decided to teach Baby Ginseng the lush and hardening skills replicated in Divine Capital this time.

...

Three days later.

Shi Yu was breastfeeding Baby Ginseng.

[Name]: Ginseng Baby

[Attributes]: Wood

[Race Level]: Low-level Monarch

[Level of Growth]: Commander Level

[Skill]: Sweet Aura (Dao Proficiency), Slow Healing (Dao Proficiency), High Speed Healing (transcendent), Nutrition (Dao Proficiency), Earth Chain (Dao Proficiency), Source of Life (Initiate), Multiplication (Perfect), Absolute Sleep (Perfect), Energy Fruit (Perfect), Energy Storage Beam (transcendent), Multiplication (Transcendent), Strengthening (Perfect)

Energy Points: 102955

Three days after returning, Shi Yu directly upgraded Baby Ginseng’s lush and hardening skills to an extremely high level. As for its other skills, most of them had been upgraded in the past three months. Apart from the “super skill” Source of Life, Baby Ginseng’s other four racial skills had long been maxed out. Baby Ginseng had also fallen into a bottleneck period. This was also why Shi Yu began to consider its evolution path.

“Yiya. (Continue.)”

On the bed, Shi Yu and Baby Ginseng looked at each other. Baby Ginseng was becoming stronger, and so was Shi Yu during the teaching process.

After breaking through to the high-level, the upper limit of Shi Yu’s physique was raised again, but he had yet to reach the upper limit. Now, his physique was already close to that of an ordinary legendary Beast Tamer. It was easy for him to resist the skills of transcendent-level ferocious beasts. Shi Yu estimated that his current upper limit of physique should be at the legendary level, but it should take him a few more days to reach it.

After reaching the upper limit of his physique this time, even if Little Chi Tong broke through to commander rank, Shi Yu should be able to perfectly withstand its possession.

“Wait,” Shi Yu said to Baby Ginseng.

He took out his vibrating cell phone and took a few looks before smiling. “We’ll continue later. The Green Silkworm army is here. Let’s go and pick them up first.”

Baby Ginseng:??!!

Under Baby Ginseng’s confused expression, Buggy was called over. Through Buggy’s Instant Transmission, they went out to take a walk again. This time, Shi Yu even brought back 51 cages.

The cages were filled with Green Silkworms!

There were 51 in total.

They had all reached level ten of Awakening.

Moreover, their Worm Silk Proficiency was classified into 40 expert levels, 10 perfect levels, and 1 transcendent level!

These Green Silkworms were all experimental bodies carefully cultivated by the researchers of the Demon Capital Worm Department.

Apart from that, Legend Hua also sent Shi Yu a pile of cultivation resources. They were all applications according to the common teaching methods for Psychic, Absolute Sleep, Super Sight, and other skills on the skill index.

“Ji!!” “Ji!!” “Ji!!”

After Shi Yu brought the 51 green worms back to the dormitory, the dormitory immediately started chattering.

Little Eleven, Little Chi Tong, Baby Ginseng, and Buggy were all shocked by the 51 green worms.

Why were there so many?

Although they knew that Shi Yu was going to carry out evolution experiments, this was too much.

At this moment, these Green Silkworms widened their eyes. They seemed to be very brave. After all, their parents were definitely creatures of very high levels. In addition, they had been carefully raised by researchers since they were young. This was the main reason why they weren’t so afraid of others. Compared to the timid Buggy at the start, they were indeed very different.

“Wuu! (Looks much stronger than the worm at the start)” Eleven said.

Buggy:???

“Wu!!” Buggy glanced at the group of Green Silkworms and revealed a faint deterrence. The group of Green Silkworms immediately became obedient and stopped chattering, looking at Buggy in awe.

However, the worm quickly received Eleven, Baby Ginseng, and Little Chi Tong’s disdainful gazes.

Bullying a little worm was nothing.

Buggy: QAQ

Even if it wanted to bully those two, they wouldn't fight it.

Shi Yu stopped their discussion and said, "Alright, there's something new to do next. Baby Ginseng, according to the evolution ingredient formula we researched previously, let's first classify and assemble those materials."

"Yi!!" The knowledgeable ginseng baby in the team was a piece of cake.

If Shi Yu wanted to study the evolution method of the green cocoon, it naturally couldn't do without the evolution plan.

In the past few days since arriving in the Ancient Capital, he and Baby Ginseng had summarized the 20 evolutionary materials combination plans according to the materials for common teaching methods such as Psychic, Absolute Sleep, and Super Sight.

Shi Yu planned to let these Green Silkworms try it one by one. Practice. This was also the only method that could effectively determine the feasibility of the Green Silkworm's evolution plan. The evolution of life couldn't be simulated by machines.

"Do you know what you're going to experience next?" Shi Yu asked the group of green worms.

"Ji?" "Ji?" "Ji?" The green worms widened their eyes and looked at Shi Yu in confusion.

Shi Yu : "..."

As expected, the Green Silkworm was still stupid and didn't seem to have a high IQ.

That group of researchers was also impressive. They could pile their skill proficiency to perfect and transcendent levels in a short period of time.

Shi Yu looked at the Green Silkworm that had mastered the transcendent worm silk. He could already clearly sense that its life was less than a month away. If it didn't turn into a cocoon soon, it would die.

This was also reminded by Legend Hua.

"Let one of them eat the evolution materials and try to turn into a cocoon," Shi Yu said to Buggy.

There were ten evolution plans that could immediately turn into a cocoon.

There were ten types that could only turn into cocoons after changing their diet for a period of time.

"Yi!!" At this moment, Baby Ginseng had already quickly classified the evolution materials. Buggy turned around and used Instant Transmission to teleport ten Green Silkworms out.

After coming out, the green worms were extremely confused. However, with the deterrence guidance of the worm, it was quite easy for Shi Yu to command them.

"Cooperate well. If you succeed, you can change your fate. If evolution fails, I can also guarantee that you can live longer than ordinary green worms. There won't be any pain."

The group of Green Silkworms still didn't understand what Shi Yu said, but they could perfectly carry out the instructions of the worm. They immediately ran to nibble on the evolution materials brought out by the ginseng baby happily. There were so many high-level materials that they didn't often eat even when they were at the research institute. They wolfed it down, making the Green Silkworm in the cage look envious.

"Ji!" "Ji!" "Ji!"

They also wanted to eat it!

A moment later, the ten different sets of evolution materials were eaten by the ten Green Silkworms who had mastered the expert level worm silk. They each burped and their bodies enlarged. They were already so full that they couldn't even crawl.

"Buggy, let them turn into cocoons," Shi Yu said.

"Wu!!" Buggy expressed its understanding. At the same time, under Buggy's instructions, the ten Green Silkworms spat silk and wrapped themselves, as if it was instinct.

Among the ten awakened-level Green Silkworms, the proficiency of the worm silk was only at expert level, and the level of the materials used was not high. The cocoon transformation scene was naturally ordinary, completely not as shocking as when the worm evolved.

The worm silk wrapped the ten Green Silkworms bit by bit. The remaining Green Silkworms watched the commotion, while Eleven and Baby Ginseng recorded the whole process with the video device.

Soon, the ten Green Silkworms wrapped themselves with worm silk. After forming the cocoon, they began to sleep to absorb the power of the evolution materials. At this moment, Shi Yu couldn't help but frown when he saw that everything was calm.

Although he didn't know if they would still evolve into Wind Crystal Butterflies or other species after breaking out of their cocoons, or if they would fail to turn into cocoons, at this moment, he was certain that none of them had evolved into a green cocoon...

"You guys can't?" Shi Yu looked at the ten Green Silkworm cocoons. Just as he was about to get Buggy and Baby Ginseng to arrange the other ten evolution plans, something unexpected happened.

In Shi Yu and the others' vision, not long after the cocoon of one of the Green Silkworms turned into a cocoon, white light suddenly lingered around its body. That was... the light of evolution!

Just like Buggy, after this green worm turned into a cocoon, not long after, the light of evolution and awakening surrounded its body again!

Upon seeing this scene, Shi Yu, Eleven, Buggy, and Baby Ginseng widened their eyes and watched carefully.

A moment later, the full appearance of the green silkworm cocoon surrounded by evolution light appeared in front of Shi Yu and the others.

It was still in the form of a cocoon, but similar to the worm, it also had two eyes. Moreover, it was blinking and had consciousness!

Moreover, faint spiritual waves spread out from his body!

After being stunned, the index for Bureau 11 in front of him changed.

[Name]: Green Worm cocoon

[Attributes]: Worm

[Race Level]:???

[Level of Growth]: transcendent

[Race Skill]: Psychic

Energy Points: 250

Shi Yu was completely stunned. Luck?

No...

It was a miracle of ten consecutive draws!

Initially, Shi Yu thought that it would be a difficult battle to study the form of the green worm cocoon, but he didn't expect that the first round of experiment would be successful. Not only did this green worm evolve into the green worm cocoon, but it also broke through its growth level and reached the transcendent level. It even awakened a new skill, Psychic power!

Apart from the fact that its energy level was a little low, which could be said to be a disgrace to the transcendent level, it had yet to reach half of the normal transcendent standard. It was completely similar to the evolution pattern of the worm at that time.

"Baby Ginseng, which evolution plan did this green worm use and what materials were used?" Shi Yu hurriedly turned to look at Baby Ginseng.

Skill index, the most useful thing in the world!

At the same time, Shi Yu's cell phone suddenly vibrated. Shi Yu took a look and saw that it was actually Legend Hua. The other party had pulled him into a small group chat.

In the group chat, there were only three people. One was Shi Yu, the other was Legend Hua, and the last was Dr. Zuo, who had researched the Ice Phoenix Moth.

Legend Hua: "Shiyu, you've received the experimental subjects and materials, right? If you need any help, you can directly look for me and Dr. Zuo."

Dr. Zuo: "Yes."

Shi Yu looked at the group chat in silence.

He raised his cell phone and took a photo of the green cocoon before sending it over.

[Click here to send]

“Well, I casually picked ten and tried it just now. I think I’ve already found a way to let the Green Silkworm evolve into a Green Silkworm cocoon. It’s just that the energy level is a little low. It’s a hundred million times worse than my Green Silkworm race. It might still be a transcendent race.”

After Shi Yu sent it, the short silence in the group almost made Shi Yu think that his cell phone was stuck.

But a moment later, although there were only three people in the group chat, the news erupted like a flood.

Legend Hua:??

Dr. Zuo: “?”

Legend Hua and Dr. Zuo’s screens were filled with question marks...

## **Chapter 207: I’m Not Interested in Research**

In the insect research institute in Shanghai.

A beautiful woman in a research suit looked at the photo on the cell phone in a daze, wondering if her eyes were broken.

Wait...

Didn’t they just transport the Green Silkworm today?!

That was it?

How could it be so fast!

“Are you sure you’re not kidding???” Legend Hua asked.

A moment later, Shi Yu sent some more information about the green cocoon.

“The racial level should still be low-level transcendent. What I can roughly confirm now is that the birth of the green worm cocoon is related to the two skills Absolute Sleep and super vision.”

Shi Yu looked at the evolution plan list concluded by Baby Ginseng and fell into deep thought.

The evolution materials used by this green cocoon included universal teaching materials for absolute sleep and super vision.

There were no teaching materials for Psychic power.

So, why did it awaken its psychic power?

This skill point was so crooked that it instantly confused Shi Yu.

As long as he awakened more super vision or absolute sleep, Shi Yu wouldn’t be so puzzled.

“Why don’t I try again? What if it’s just a coincidence?” Shi Yu replied.

“Try it slowly. I’m heading to the ancient capital now,” Dr. Zuo Jiangyun typed.

“I’ll go too,” said Legend Hua.

The two of them originally thought that even if Shi Yu could achieve results, it would be a long time later.

However, Shi Yu had just received the goods and confirmed that the green cocoon could be replicated. Was this reasonable?

Moreover, they looked at the background of the photo. This was... the living room?

How could Shi Yu be so casual!

But no matter what the process was, this result was enough for them to let go of everything and take it seriously.

Although they couldn’t tell what was so impressive about this green cocoon that could only be worth 250, what if other evolution materials were added to this foundation?

For example, among the evolution materials of the Ice Phoenix Moth, could it allow the Ice Phoenix Moth to also master psychic power?

Psychic power was an all-purpose skill that could be matched with almost any element. Although it was a low-level skill, if it was learned, it could effectively increase the tactical diversity of the pet.

Although it was more likely that the evolution had failed due to the conflict of materials, what if there was an evolution form that could perfectly adapt to the green cocoon race?

At that time, would a new evolution form be born?

Shi Yu could be considered to have made a start. He had laid down a foundation for the birth of various new evolution forms for the Green Silkworm, just like how Shi Yu had developed the Butterfly of Imagination himself.

“Ah, Aunt Hua, Dr. Zuo, are you both coming?” Shi Yu was stunned. Forget it, so be it.

He would throw the research to others. This way, he wouldn’t have to squeeze out the ginseng baby and the worm. He could also go and do other things.

...

Ever since Xia Qingwei lost to Shi Yu, she had been in isolation for two days. Then, she had been quietly studying at the bug research institute.

In fact, the Ice Phoenix Moth had another evolution. It was developed six years later by Dr. Zuo after researching the evolution plan of the Green Silkworm to the Ice Phoenix Moth. It could reach high-level monarch races, but the conditions were very harsh.

There were requirements for every growth stage of the Ice Phoenix Moth. The cultivator needed to be sufficiently patient.

“Don’t always stay in the research institute.” Dr. Zuo walked into the laboratory and looked at his focused daughter.

“I want the Ice Phoenix Moth to evolve one more time,” she said.

Dr. Zuo felt a headache. If she had known that her daughter would go and challenge that Butterfly of Imagination and become a shut in all of a sudden, she wouldn’t have encouraged her to go.

He originally thought that he could obtain some combat information, but in the end, just a glance from the other party made Xia Qingwei and the Ice Phoenix Moth lose their battle will.

Was the strength of that butterfly really that terrifying?

This made Dr. Zuo even more eager to study the Green Worm cocoon.

“Even if you repeat my research, it’s very difficult for the Ice Phoenix Moth to defeat its opponent by race,” Dr. Zuo said.

Xia Qingwei was stunned. She sighed and lay on the table. Was there no other way to defeat the Butterfly of Imagination?

“The reason why that Butterfly of Imagination is powerful might be because the Green Silkworm Cocoon is a transition race. If you want to defeat it, you have to understand it first. Come with me to the ancient capital.”

“To the ancient capital?” Xia Qingwei was confused.

“That Shi Yu has already confirmed the replication ability of the Green Silkworm cocoon race. He has just cultivated a second Green Silkworm cocoon.”

“What!” Xia Qingwei suddenly got up and said, “Really?”

“Why would I lie to you? If it really proves that it can be replicated, in the next ten years, the research direction of the country’s worm-element field might all revolve around the ‘Green Worm cocoon’. Even if you want to study it, you have to follow the trend of the new era, right?” Dr. Zuo said.

At least, in her research system, no Green Silkworm could evolve into an overlord race.

However, in the green cocoon system, there was already an Imagination Butterfly.

It was better to explore new areas than to let his daughter repeat her research.

...

At Ancient Capital University, Principal Feng received a call from Legend Hua.

Because of Shi Yu and the Butterfly of Imagination, the two of them had been in contact many times recently.

“Legend Hua, what’s the matter?”

“Senior Feng, sorry to disturb you. Do you know that Shi Yu is studying the Green Silkworm cocoon?”

Principal Feng: “???”

“It’s fine if you didn’t mention it, but... If you mention it now, I’m going to nag at you, Hua Xiajin. Were you the one who bewitched Shi Yu to study some green worm cocoon and get involved in the feeding field?”

When Principal Feng thought of how Shi Yu was very interested in Feeding and even wanted to enter the third bureau of Feeding Specialization, he felt a headache.

“What are you thinking by letting a genius from Bureau 11 study the Green Silkworm cocoon? Do you think it’s so easy to replicate an overlord species pet?” Principal Feng said. “How much effort would this take? He doesn’t have the time.”

“Even if he does have results for the Green Silkworm cocoon, I wonder how much effort it will take.”

On the other side, Legend Hua was silent.

Principal Feng was also silent. In his opinion, the birth of the Green Silkworm cocoon and the birth of the Imaginary Butterfly were all accidents. They were fortuitous encounters during Shi Yu’s archeology, and they could not be replicated very well. In Bureau 11, almost every member had some relatively special pets that could not be replicated very well.

For example, where could he find a second Wind Demon Lion with the bloodline of the Evil Suppressing Lion?

If Lu Qingyi went to study how to mass produce the Wind Demon Lion with the bloodline of the Evil Suppressing Lion, wouldn’t it be useless?

“But the problem is that he didn’t spend much effort and completed the research in less than a few minutes.”

Principal Feng: “Even so, it’s... Huh?”

“Huh? What did you say?”

Principal Feng was stunned and stood rooted to the ground.

“Just now, Shi Yu cultivated a second green worm cocoon.”

“Senior Feng, the Green Silkworm has always been a very important part of ensuring the development of the middle and lower levels of the Beast Taming Domain. This discovery now is very important.”

“Now, Dr. Zuo and I both plan to go over. Look, can you cooperate with Ancient Capital University and help build a Green Silkworm cocoon research institute like the Iron-eating Beast Research Institute?” Legend Hua smiled and said, “We can work in Ancient Capital University.”

“This is an opportunity for Ancient Capital University’s Feeding and Research Department to be comparable to the archeology Department. It’s also because Student Shi Yu’s identity is special. Otherwise, he would have probably been poached to Demon Capital University by Dr. Zuo long ago.”

Principal Feng: “...I’m a little confused.”

The old man scratched his head as he pushed open the door and walked towards Shi Yu’s dormitory.

Holy shit, Shi Yu had really researched something?

As he walked, Principal Feng widened his eyes.

A moment later, he arrived in front of Shi Yu's dormitory.

Shi Yu opened the door and looked at Grandpa Feng, confused.

"Principal Feng, why are you here?"

Principal Feng didn't look at Shi Yu, but behind him.

At this moment, the eleven green cocoons were following behind Shi Yu eagerly. They widened their eyes and looked at him.

Principal Feng:???

"What... what's this?"

"Green Worm cocoon..." Shi Yu said, "I just confirmed it. It's really replicable. Unbelievable. If the evolution materials are used correctly, almost 100% can evolve to the cocoon race."

"I wonder if it can successfully break out of the cocoon... But it shouldn't be a big problem, because the cocoon state is also eligible for training skills." Shi Yu sighed.

"Principal Feng, do you think I can enter the third bureau with this research result?" Shi Yu asked.

When he first joined Bureau 11, his initial funds were 10,000,000. After becoming an official member, he even obtained many benefits such as the ruin ring, index, and meditation technique. Even the billion yuan that Eleven had evolved into was equivalent to what Bureau 11 provided. He thought for a moment. It was impossible for the third bureau of the specialization in the Feeding Domain to have fewer benefits than Bureau 11.

It didn't matter to him if he got another position. It was the same whether he was in one or two bureaus. It was always beneficial to get to know more seniors.

Principal Feng:???

He still wanted to work in multiple departments part-time?

Principal Feng regretted telling Shi Yu that he worked in three departments part-time.

"This, this might not be enough."

The corners of Principal Feng's mouth twitched. "If you want to enter that kind of place, even if you have researched a stable high-level monarch race cultivation method, you're still not qualified. There are even fewer members in the third bureau than in Bureau 11. All of them are monsters. I'll just tell you about one person casually."

"She's the top skill teacher of Dong Huang. She has the teaching manuals of three super skills with extremely high universal attributes. Moreover, her talent can assist in teaching. She once spent three years assisting a titled legend and cultivated an invincible overlord who had mastered six super skills."

“In other words, to reach a certain condition, they are a group of people who have the hope of nurturing pets with overlord potential.”

“The third bureau isn’t as simple as you think.”

“Of course, the cost of using their abnormal talent is also very high. In contrast, although our listening talent isn’t easy to activate, fortunately, there won’t be any major side effects.”

“It depends on whether you can enter Bureau 13 of Dong Huang using your Beast Taming Talent. It’s very difficult to rely on results alone unless the results are very huge. You better not think about it.”

“Can’t I...” Shi Yu laughed. Forget it, let’s talk about it in the future.

“So you’re here for...” Shi Yu looked at the anxious Principal Feng.

Principal Feng :”...”

“You’re interested in researching feeding?” he asked.

Principal Feng thought with a stomachache.

Firstly, it was indeed as Legend Hua had said. This was a pretty big discovery.

If any subsequent research results were produced, Ancient Capital University would not only be able to use the archeology Department...

But from then on, the Feeding Department would also be the top in the country.

Moreover, the research of the Green Silkworm cocoon was indeed a study that could promote development in the Beast Taming Domain of the entire country. It wasn’t an unprofessional thing.

Even if he studied archeology for a long time, this result might not necessarily be valuable.

Principal Feng raised his head slightly. He didn’t expect Shi Yu to have such talent.

He thought for a long time and decided to support it.

In any case, Shi Yu was still young. It was not a big deal for the school to build a research institute and let Shi Yu work part-time in the Feeding Department for two years.

Firstly, it could increase the feeding research foundation of Ancient Capital University. Secondly, it could also allow Shi Yu to develop in school in peace. As long as Shi Yu didn’t go to any dangerous place to wander, he could do anything. Moreover, this was also a serious matter.

The more Principal Feng thought about it, the more he felt that it was feasible.

“I’ve decided to establish a Green Silkworm Cocoon Research Institute and let you lead the research. Are you surprised?” After thinking it through, Principal Feng smiled.

It was as if he had already seen Shi Yu’s excited expression.

And he himself also imagined the future of the double ace specialization in Ancient Capital University.

“Huh?” Shi Yu shook his head in confusion and said, “I’m... not very interested in the research of the Green Silkworm cocoon.”

Principal Feng:???

“Then what’s going on!” He pointed at the green cocoons.

Shi Yu said, “Accident... coincidence? Don’t worry, after confirming the feasibility of the green worm cocoon, my mission will be over. Dr. Zuo and Legend Huaary seem to be coming over. When the time comes, I’ll hand the information to you. You guys can study it. I only want to get fossils now, preferably Mythical Creature fossils.”

Even if he studied the Green Silkworm cocoon thoroughly, it was only so for Shi Yu.

But if it was researching fossils, it was different.

This involved the power of imagination, the recovery of ancient creatures, and the recovery of divine beasts. This was the most attractive thing to a Mythical Scholar like Shi Yu.

Principal Feng:???

“Fossil... Fossils...” Principal Feng was speechless. What was there to study about that thing? Old Li had studied it all her life, but wasn’t it just that? Wasn’t it better to study the green cocoon?

He had completely forgotten that he had previously felt that it was not bad to let Shi Yu study fossils in peace.

“Forget it, let’s talk in detail when Dr. Zuo and Legend Hua arrive.” Principal Feng’s teeth hurt. He couldn’t force Shi Yu’s thoughts, but for some reason, he suddenly felt very tired.

...

That day, Legend Hua and Dr. Zuo arrived at Ancient Capital University.

For people of their level, traveling across cities was still very fast.

Dr. Zuo and Legend Hua were similar in age. One of them was still wearing a research suit, while the other was still wearing the butterfly-patterned cheongsam. However, the difference between the two was that one had a daughter who was already in university, while the other was still single for ten thousand years.

“There’s a sad story hidden in this.” The old principal of Ancient Capital University, who knew the inside story, received Dr. Zuo, Legend Hua, and the others at the same time.

“Uh, this is?” The old principal of Ancient Capital University was surprised to see the girl behind Dr. Zuo.

“Hello, Principal Feng. My name is Xia Qingwei. I came with my mother this time.” Xia Qing could only greet Principal Feng politely, but she observed Shi Yu, who was scratching his head beside him.

“Qingwei is my assistant.” Dr. Zuo smiled.

“Welcome.” Shi Yu chuckled and said, “Why don’t everyone take a look at the green cocoons first?”

“Of the 51 Green Silkworms, 20 have already completed their evolution. Among them, 11 are just Green Silkworm cocoons.”

Dr. Zuo and Legend Hua looked at each other. Could it really be replicated?

Soon, the few of them arrived at Shi Yu’s dormitory courtyard.

At this moment, the cocoons of the nine ordinary cocoons were sleeping in the corner, while the eleven who had evolved into cocoons were staring at each other and smelling the fragrance of the flowers in the courtyard.

It was so magical. Why could they smell fragrance without noses?

“Unbelievable.”

“Unbelievable.”

After entering, Dr. Zuo and Legend Hua looked at the eleven green cocoons and were extremely excited.

It was as if they had seen a newly opened door to the highest domain of the worm family.

It had been a long time since there had been any major research results in the bug domain.

“Student Shi Yu, you’re indeed a genius.” Dr. Zuo praised with all his might. “If Qingwei was half as outstanding as you, I wouldn’t have to spend so much effort.”

Xia Qingwei: “?”

You called me over just to say this?

Legend Hua smiled and said, “Principal Feng, have you considered it? Dr. Zuo and I are voluntarily taking our positions at Ancient Capital University this time.”

“Student Shi Yu, Dr. Zuo and I will assist you in researching the Green Silkworm cocoon in the future. How about that?”

There was only one research institute left.

Of course, with their identities, it was very simple for them to set up a research institute themselves, but it was not easy to abduct Shi Yu. After all, Shi Yu was a genius cultivated by Bureau 11 and was studying at Ancient Capital University. They had to consider the ideas of the principal first.

Principal Feng smiled awkwardly and said, “The problem is that this kid, Shi Yu, said that he suddenly lost interest in the research of the Green Silkworm cocoon.”

“The research institute still has to be built, but Shi Yu doesn’t seem to plan on researching it himself.”

Dr. Zuo, Legend Hua, Xia Qingwei:???

The three of them looked at Shi Yu.

What?

Shi Yu smiled in embarrassment. He didn't study the Green Silkworm cocoon for himself in the first place. He purely wanted to see if he could produce results in passing. In the beginning, he didn't plan to study it for a long time. Now that he had started, he felt that it was enough.

To Shi Yu, investing too much energy was not cost-effective.

"I don't have enough energy and professional knowledge, so I won't cause trouble," Shi Yu said self-awarely.

How could he start his own research? It would feel good to wait for the results.

"You mean casually researching the Green Silkworm cocoon is called insufficient professional knowledge?" The corners of Dr. Zuo's mouth twitched. This young man was crazy.

"You... you're not researching anymore?" Xia Qingwei was completely stunned.

Even if she was still young, she knew how important this research result was.

Shi Yu had given up on research just like that?

She suddenly couldn't understand the difference between her and Shi Yu.

Dr. Zuo and Legend Hua didn't know what to say.

"Understandable." After a moment of silence, Legend Hua looked at Shi Yu and said, "But it's a rare research result. Then, do you think you should use this result to participate in the Feeding Conference in a week?"

"In their state, they should be able to evolve in three to seven days. They can use the ruins space or their talent to accelerate. They can catch up." Dr. Zuo looked at the group of cocoons and then at Shi Yu. "Do you want to participate?"

"Uh, what's that?" Shi Yu said.

"During the annual Feeding Results Exhibition held by the Feeder Association, the participating members are basically Feeders from all walks of life. Through the selection of the most valuable Feeding Results, the Feeder Association will reward the researchers to a certain extent and also provide some support to the research project."

"The Green Silkworm cocoon should be a very good research result. If its form after transforming into a butterfly has more potential, it might have a chance to win the championship. It can even use this opportunity to publicize the Green Silkworm cocoon and obtain a large amount of investment," Dr. Zuo said.

There was such a conference?

Shi Yu was stunned. "Then the prize this time is..."

Dr. Zuo: "The soil of time, a special earth-element and time-element dual-element resource. It contains the power of time and can cause some spiritual plants to mutate. It's a research material that many feeders who study spiritual plants dream of. This isn't the main thing. The main thing is that this stage is the best place to show the results of the feeding. It can show the greatest value of a research result."

“It can be more widely spread than published papers. If it’s widely recognized, it’s very important for us to study the Green Silkworm cocoon next.”

Shi Yu probed, “A time and earth-element dual-element resource that can mutate plants?”

“Huh?” Dr. Zuo nodded.

Shi Yu wiped his hands and said with a serious expression, “When do we start researching the Green Silkworm cocoon? Can we develop greater results in seven days? I’m already prepared.”

Everyone: “?”

Weren’t you not interested just now???

## **Chapter 208: Birth of a New Race**

Time soil!

Initially, Shi Yu was not interested in the subsequent research of the green cocoon...

But speaking of this, he wasn’t tired.

With the mention of the Feeding Results Exhibition and the soil of time, Shi Yu’s research motivation immediately rose.

Special soil that could stimulate the mutation of spiritual plants?

It even had high-end and impressive time power?

Wasn’t this specially made for Baby Ginseng!

Shi Yu had never heard of this resource before. It looked like it was also a super rare resource. After all, it concerned the time attribute.

Moreover, as the reward for a national-level meeting, the value and level definitely wouldn’t be low.

Moonlight Gem+Time Soil+Ginseng Baby =???

Shi Yu was immediately curious.

No, just these two resources were not enough. The more the better!

But no matter what, he definitely wanted this soil of time.

“This soil of time sounds a little useful to me...” Shi Yu said.

Everyone :” ...”

Principal Feng: “Just for this?”

His position was so uncertain!

Shi Yu: "Then does our Ancient Capital University have similar resources? If there are, it doesn't matter if we participate or not."

"Uh." Principal Feng was stunned.

"No." His face darkened.

Dual-element resources of this level were mostly unique. It was very difficult to find similar ones.

This soil of time was most likely taken out from the third bureau.

Bureau 11 could produce resources of the same value, but it definitely wasn't earth and time.

No matter how one looked at it, this was a reward prepared for the feeder. Only the third bureau had it.

"The soil of time. And you still say that you're not interested in feeding research?" Legend Hua was speechless.

Shi Yu said, "...It's not for research."

He couldn't say that it was used as a random mutation material for Baby Ginseng, right?

Not only could the Green Silkworm be a gambler! Even Baby Ginseng could do it too!

Shi Yu realized that he quite liked this random evolution plan, but it was a little expensive.

"Then, it looks like we're going to participate in this conference?" Dr. Zuo pondered slightly.

In fact, she was also prepared to participate in this meeting, but at the moment, she gave up and planned to support Shi Yu with all her might.

Because Shi Yu's feed results had a chance to crush everyone. It was very meaningful.

"We only have seven days to prepare."

"Although the Green Silkworm cocoon is a pretty good feed research result, the Green Silkworm cocoon alone isn't enough."

"At least we have to confirm the value of its evolution form. As for whether there are other breakthroughs in seven days, it depends on luck."

"The only thing we can confirm now is that the cultivation cost of the Green Silkworm cocoon isn't high, right?" She looked at Shi Yu.

Because the cultivation materials Shi Yu and they wanted were relatively common low-level materials.

Shi Yu said, "The market price of the evolution materials alone is hundreds of thousands. If these materials are cultivated and produced on a large scale in the future, the cost can be controlled to a very low level. If it's about 100,000, most ordinary families should be able to bear it."

Xia Qingwei was stunned. "So cheap??"

Dr. Zuo smiled and said, "If we can control the cultivation cost of the Beast Tamer to less than 100,000 yuan, obtaining a pet that has mastered Psychic power is already a huge impact. Psychic pets generally have very high potential."

"If it's controlled at around 1 million, obtaining a pet that was commander race and could master Psychic power is a huge innovation in the Beast Taming Domain."

"Therefore, there's a high chance that this feeding outcome will come first in the Feeding Results Show."

"We have to hurry..."

"With you and Qingwei, there's no problem. It's just that you have to work hard." Legend Hua smiled and said to Shi Yu,

"Dr. Zuo and Qing Wei's talents can accelerate or slow the growth of their pets. It's similar to the accelerated growth effect of the Beast Taming Space, but it's not limited to the pets they contract, and the effect is stronger. Their talents are very suitable for research on insect-type life forms."

"In other words, they can quickly let the cocoon digest the evolution power like the butterfly god and complete the evolution. However, this talent consumes a little physical strength. The supplements during this period probably can't be neglected."

Shi Yu was stunned.

"That's easy. I'll provide the supplements."

Baby Ginseng, for the sake of evolution materials, as long as it didn't die, it would provide mountains of supplements!

Dr. Zuo and Xia Qingwei : "..."

Dr. Zuo: "In that case, let's find a place now. I want to see the form of the green cocoon after evolution."

"Then..." Shi Yu looked at Principal Feng. So, what about the research institute?

For the soil of time, Shi Yu risked it all.

During this period, Baby Ginseng didn't do anything else. It obediently created supplements and nutritional fruits to increase its evolution potential. It could work hard to let Dr. Zuo and Xia Qingwei open the cocoon for seven days and seven nights in a row.

"The research institute definitely needs some time to prepare..." Principal Feng said.

"Then let's go to the Iron-eating Beast Research Institute first. In any case, the infrastructure there is relatively complete, and it's currently in an idle state," Shi Yu said.

The few of them nodded and had no objections.

Shi Yu smiled and said, "It's not close. I'll bring everyone over."

He called out, and a beautiful butterfly figure appeared. Seeing this, everyone was slightly stunned.

"Use Instant Transmission," Shi Yu explained. "This is faster."

“Wu ~” Buggy gently flapped its wings, aggrieved. It directly changed from a private car to a bus?

“The Butterfly of Imagination!” The moment Buggy appeared, Dr. Zuo and Xia Qingwei’s expressions immediately changed.

Dr. Zuo looked excited. To be honest, compared to studying the Green Silkworm cocoon, she wanted to study the Butterfly of Imagination more. However, it was really difficult for her to say such an unreasonable request.

In comparison, Xia Qingwei looked at the haggard Buggy and was a little at a loss. She didn’t understand why the Imagination Butterfly, which had previously been impressive and domineering, who had made them lose their battle will with a glance, looked so haggard now.

It was a monster to its enemies, but in the team, it was like a mascot!

“Alright, let’s go.” Shi Yu was also quite anxious.

As the few of them observed, Buggy’s Psychic power had already wrapped around the 51 Green Silkworms and Green Silkworm cocoons present and was about to teleport.

“Everyone, please let its psychic power wrap around you,” Shi Yu said.

When Shi Yu finished speaking, the few of them hurriedly nodded. Their bodies were wrapped in blue light as they instantly disappeared from the spot.

...

Iron-eating Beast Research Institute.

At the training ground.

The three little Iron-eating Beasts were entertaining themselves and training.

They were extremely aggrieved because after Leader Eleven returned from the capital, it didn’t take much care of them. It said that they had graduated and could already train on their own.

This was purely because Buggy had become so strong all of a sudden, making Eleven feel a sense of danger. It worked even harder to run to undergo devil training and didn’t have much time to take care of babies anymore.

“What’s this...”

On the training ground, Shi Yu and the others gradually appeared.

After arriving here, Legend Hua looked at the three little Iron-eating Beasts who were using hardened iron fists to hit stakes and sprinting to do physical training on the training ground. She fell into deep thought.

This was the Iron-eating Beast Research Institute?

Research on how to make the Iron-eating Beast more diligent?

When the few of them arrived, the three little Iron-eating Beasts immediately looked over. After discovering that it wasn't the leader, but the leader's master, they couldn't help but show expectant expressions.

"You guys play by yourselves." However, Shi Yu's words made the three little Iron-eating Beasts extremely disappointed.

"Wu wu wu... (Continue, continue.)"

Shi Yu : "..."

Eleven's mental seal was still impressive.

Not only Legend Hua, but Principal Feng, Dr. Zuo, and Xia Qingwei also had strange expressions.

Among them, Principal Feng was still alright. After all, he had already heard of the Iron-eating Beast legend of Ancient Capital University.

Shi Yu: "Cough, ignore them. Let's get down to business first."

"Yes." Dr. Zuo nodded.

The so-called business was naturally Dr. Zuo using his growth talent to help the green cocoon quickly absorb the evolution power and break out of the cocoon as soon as possible.

This training ground was quite wide, so the few of them decided to experiment here.

Dr. Zuo walked forward and looked at the 11 green cocoons. Her gaze locked onto one and he gently picked it up with both hands.

The green cocoon didn't struggle either. After all, it was cultivated by the research institute. Its personality was relatively docile and cowardly.

Under everyone's gaze, Dr. Zuo's hands flickered slightly with fluorescent light. A huge amount of energy was injected into the green cocoon. At this moment, the green cocoon was stunned before it subconsciously closed its eyes.

In less than a minute, Dr. Zuo put down the green cocoon slightly and said, "It's done. It can try to break out of the cocoon with its mind power to evolve at any time. The evolution power has been completely absorbed."

"Eh, I'm old. I'm really tired. You'll be the one assisting in the next cocoon," Dr. Zuo said.

"Huh?"

Xia Qingyi was stunned and looked at her mother.

Wait, she was tired just like that?

When she was experimenting previously, she clearly didn't even pant when assisting the evolution of dozens of Green Silkworms in one go. Now, she was tired from just one?

Xia Qingwei suddenly felt that she had been brought here to be a tool for the evolution accelerator.

“It’s alright, I have enough supplements.”

“Baby Ginseng.” When Shi Yu saw this, he felt that he couldn’t let others work for nothing, so he summoned Baby Ginseng.

Baby Ginseng was also smart. After coming out, it immediately condensed a cigarette-shaped nutritional supplement with its nutritional and sweet aura skill.

“Yi!!” It ran over to Dr. Zuo, wanting to hand it to her.

As the saying went, a young woman with a cigarette was like a fairy descending into the mortal world. This was taught to it by Grandma Li’s supplementary pets. They said that Grandma Li loved smoking supplements the most back then. Every time she finished, her temper would temporarily improve.

“Yi...”

“Uh.” Dr. Zuo looked at the ginseng baby Shi Yu suddenly summoned and handed her a cigarette. She was stunned.

“Baby Ginseng!” Shi Yu’s stomach hurt. Who the hell taught you that!

Sensing Shi Yu’s reprimand, Baby Ginseng immediately shuddered. It ravaged the cigarette in its hand a few times, rubbed it into a cherry-like nutritional substance, and handed it over again.

“Nutrition?” Dr. Zuo smiled and took the nutritional substance. She smiled and said, “Thank you, little guy.”

Speaking of which, Shi Yu actually contracted a ginseng baby with him??

“Apart from nutritional supplements, it might also be an Energy Fruit Cherry Bomb.” Beside him, Principal Feng pondered. He had heard of the battle between Baby Ginseng and the battle club.

Dr. Zuo just took the cherry and almost threw it out.

“It’s a nutritional supplement, and it’s a combination skill of sweet aura and nutritional supplements. The fruit wraps around the sweet aura, so there’s no need to eat it. Just putting it close to your nose and smelling it can relieve a lot of fatigue,” Shi Yu said helplessly.

After Shi Yu finished speaking, Baby Ginseng made another one and handed it to Xia Qingwei.

Baby Ginseng had a sincere expression. Good luck, auntie in a research suit and big sister who had been beaten by Buggy. Its evolution materials will depend on your explosive research.

Let it see where their limits are!

“Uh, thank you.”

Xia Qingwei also recognized Baby Ginseng. Wasn’t this one of the little pets that plucked flower honey with Buggy in the garden back then?

Apart from it, there was also a little Iron-eating Beast and little fire sword spirit. They should be Shi Yu’s pets...

At this moment, after Dr. Zuo took a deep breath, she had already placed the cherry nutrient provided by the ginseng baby on the tip of her nose and smelled it.

“Wu...”

In the next moment, she immediately felt refreshed. The fatigue from rushing from Demon Capital to the ancient capital disappeared like smoke. It was as if she had just woken up in the morning and come to an extremely fresh place to breathe in the scent of nature.

The relief in his body made Dr. Zuo look shocked.

“This...” Dr. Zuo took away the nutritional supplements and put aside the upper limit of the effect first. Just this quality that completely relaxed the mind, body, and mind as if it was one with nature was too rare.

“Its nutritional and sweet aura level should be very high, right?”

“Yes,” Shi Yu said. “And it’s a mutated race. It has a super skill that enhances the effect of recovery-type skills.”

“As expected, it’s not an ordinary ginseng baby!” Xia Qingwei thought to herself.

She knew that a genius like Shi Yu wouldn’t contract any ordinary pet.

“Looks like Li Lianping gave you a good pet.” Principal Feng looked at Dr. Zuo’s surprised expression and clicked his tongue in wonder.

A moment later, out of curiosity, Xia Qingwei also smelled the nutrient. In the next second, her expression was red, and her whole body was so numb that she almost wanted to moan. She hurriedly took this thing away.

For ordinary Beast Tamers, the supplement of the ginseng baby was indeed a little strong.

There weren’t many Beast Tamers like Shi Yu who ate nutrients as if they were fruits without a change in expression.

“It can evolve now, right?”

After Shi Yu got Baby Ginseng to distribute the nutrients, he looked at the green cocoon that had already been successfully accelerated and opened its eyes again.

At this moment, the green cocoon’s expression was confused as it stayed on the spot at a loss.

“Yes.” Dr. Zuo nodded.

“In that case, Green Worm cocoon, try to break out of the cocoon.” Shi Yu said to the cocoon, “Do you know what to do?”

“Wu ~ ~” Buggy also instructed.

When the green cocoon heard the command, its body immediately swayed. Its eyes emitted a dark light. It activated its Psychic power and tried to break free from the cocoon’s restraints from the inside to completely release its potential.

“Ji!!!” At this moment, the green insect cocoon actually let out a rare sound.

Then, with a hum, an evolution light erupted from its body.

Everyone held their breaths.

Under the lingering light of evolution, the cocoon underwent a huge change. With a boom, under the pressure of Psychic power, the cocoon directly exploded, turning into white silk that flew in all directions.

Upon seeing this scene, Shi Yu’s heart ached. He recalled the cocoon that had been obliterated into nothingness by the spiritual and spatial powers when the worm evolved...

He originally wanted it to be fertilizer for the ginseng baby, but in the end, there was nothing. When these guys evolved, couldn’t they be a little gentler and take it off bit by bit like taking off their clothes??

It was ridiculous to tear it open directly. Why was it in such a hurry to reincarnate?

“It evolved!”

Although the green cocoon had exploded, the white light inside was still as before, gradually forming a new figure. Xia Qingyi exclaimed.

At the same time, the energy value of the Invisibility index in front of Shi Yu quickly changed.

[Name]:???

[Attributes]: Spirit

[Race Level]:???

Energy Points: 571

“Its energy level is 571, more than double. It can be said to be quite high for butterflies,” Shi Yu said in surprise.

“Moreover, the information is unknown. It’s a new race!”

As soon as he finished speaking, the light dissipated. A butterfly that was less than the size of a palm and was completely crystalline and white appeared in front of everyone with bright spots on its wings.

“What (ni) ~” This newly born butterfly immediately cried out softly.

“It’s indeed a new race.” The eyes of the worm-element expert, Legend Hua, and Dr. Zuo lit up when they saw this butterfly.

At this moment, under Buggy’s instructions, this new butterfly flew up and displayed its newly awakened racial skills for everyone.

Its crystal wings flapped, and a large amount of shining crystal powder quickly appeared. Soon, the crystal powder was attacked by a wave of Psychic power and blew forward fiercely!

After completing all of this, this evolution form fell from the sky and fell to the ground to sleep.

Everyone :”...”

After a moment of silence, Dr. Zuo said, “If I’m not wrong, what happened just now was a low-level spiritual skill, Psychic, mid-level spiritual skill, Psychic Powder, high-level spiritual skill, Absolute Sleep.”

“Transcendent level. Not long after breaking through and evolution, it has 571 energy points. Moreover, it has three spiritual skills. Without a doubt, this is a high-level transcendent race.”

“The cost of 100,000 yuan, a high-level transcendent race, and a rare spiritual element. The strategic value of the Green Silkworm cocoon is going to be infinitely expanded.” The more she spoke, the more excited she became.

Psychic fan.

After touching the Spiritual Crystal Powder, it would produce one of the effects of spiritual poison, mental paralysis, and spiritual sleep. It was very powerful.

Not only were they important materials for medicine, but their tactical value was also very high.

Absolute Sleep was even more so. If it wasn’t useful, Shi Yu wouldn’t have taught this skill to every pet.

This was simply a training divine skill that could greatly reduce the burden of cultivation.

In the evolution laws concluded by Lin Feng’s legend, although evolution didn’t increase race level 100%, it awakened new racial skills 100%. Now, two mysterious butterflies that had awakened new racial skills directly surprised Legend Hua, Dr. Zuo, and Xia Qingwei.

Generally speaking, when the Green Silkworm evolved normally, it would only have one more wind blade skill.

But now, spending hundreds of thousands more for three more spiritual skills was simply unimaginable.

“So strong?” Shi Yu also looked at the butterfly blankly.

This outcome exceeded his imagination.

He originally thought that it would be a middle-level transcendent race, but he didn’t expect that it actually directly reached a high-level transcendent race!

If that was the case, the cost-effective ratio of this butterfly was definitely super high for most Beast Tamers.

After all, the Green Silkworm was not expensive, and the evolution materials were very cheap.

The greatest difficulty and regret might be that even if the worm silk was only cultivated to expert level, it was not a simple thing for ordinary Beast Tamers.

Also, the lifespan of transcendent butterfly-type creatures wouldn’t be too long. If they couldn’t break through the racial limit, they might only be able to accompany Beast Tamers for ten years. Compared to Iron-eating Beasts that had decades of lifespan, they were also much inferior.

But this was enough. The value of a high-level transcendent pet for ten years completely exceeded the cost of this investment. It was a very good initial pet that could quickly help Beast Tamers enter the Beast Taming Domain.

Sometimes, it wasn't that many people didn't have abilities or talent. What they lacked was a stepping stone, and the evolution of the green cocoon was the best stepping stone!

"A very outstanding race," Dr. Zuo said. "Although it can't increase high-end battle power, it can greatly reduce the threshold for ordinary people to become Beast Tamers."

"Compared to the Wind Crystal Butterfly that the usual Green Silkworm evolved into naturally... This pet's growth potential is very huge."

"The all-purpose basic skill, Psychic Power, has been developed appropriately. It can satisfy all needs. Not only is the Psychic Powder very tactical, but it can also be collected and sold to subsidize Beast Tamers. Absolute Sleep can accelerate the growth of pets and increase the efficiency of training. It can allow the worm-element sprites with fast battle power to form battle power faster. This is simply the most suitable pet race for low-level Beast Tamers."

Although Legend Hua, Principal Feng, and the others had previously realized that the potential of the Green Silkworm cocoon would be very large, the potential of the new race born from the two consecutive evolution of the Green Silkworm still shocked them.

"Principal Feng, I knew it. The Feeding Department of Ancient Capital University is about to take off." Legend Hua looked at Principal Feng with the same smile as Dr. Zuo.

Principal Feng grinned. "What do you mean take off? It's mainly to contribute to the Beast Taming Domain of Dong Huang. Ancient Capital University will cooperate fully in the subsequent research!"

"Shi Yu, well done!"

Xia Qingwei also looked at Shi Yu and was completely convinced.

"This isn't the end."

"This is only the result of the evolution materials of the expert level worm silk and the green worm cocoon. What if it's the perfect level worm silk, the transcendent level worm silk?"

"Is it possible to give birth to a new pet of a commander race, or even a monarch race? If other materials are added, is it possible to give birth to a butterfly with two attributes!" Dr. Zuo said. "The experiment is far from over. The rare Feeding Conference has to be shown more results."

"Qingwei, let's speed up the experiment together."

"I understand." Xia Qingwei heaved a sigh of relief when she saw that her mother didn't choose to squeeze her dry. However, at the same time, she was very excited. It was tiring to participate in such a major research.

"Then I'll have to trouble everyone." Shi Yu was also very satisfied. Was the soil of time stable?

"By the way, the name of this pet..." Dr. Zuo said.

Legend Hua: "Shi Yu, you name it."

Shi Yu casually said, "Name whatever you want. I think it should be called the Crystal Thought Butterfly. Let's form a family with the Wind Crystal Butterfly, the Flame Crystal Butterfly, and the Dark Crystal Butterfly."

"So casual..."

...

Then, the Iron-eating Beast Research Institute was temporarily changed to the Green Silkworm Cocoon Research Institute. Everyone studied it excitedly.

As for the old principal of Ancient Capital University, he hurriedly went to help Shi Yu register for the Feeding Conference in the name of Ancient Capital University.

The Feeding Conference was the big event of the third bureau. The large-scale exhibition hosted by the Feeding Association was a very important stage. Several large financial groups and nine major universities would participate, and it was also a relatively important opportunity. Principal Feng was overjoyed. He didn't expect Shi Yu to be quite so reliable.

"Hehe." Principal Feng walked happily.

"Ah, Grandpa Feng." The beast-eared girl, White Brook, accidentally bumped into him.

Seeing that Principal Feng was so happy, she smiled and said, "What's good?"

"Yes, you will know later. Where are you going?" Principal Feng chuckled and said, keeping it a secret.

"Go find Shi Yu and talk to him about the exchange activity with Imperial Capital University. We plan to set off to Imperial Capital next week," White Brook said.

Principal Feng's face fell and he said, "No, no, no, what exchange activity? Don't let him be distracted by this kind of thing."

White Brook:???

Principal Feng thought to himself that Shi Yu would also go to the capital in a week, but not to participate in any exchange activity, but to participate in the Feeding Conference!

If there was a conflict in time, the Feeding Conference was more important!

...

At the same time, in the capital, at the headquarters of the Feeder Association.

For the upcoming Feeding Conference, this place also became busy.

Not only here, but in Imperial Capital University, the new and senior students of Imperial Capital University's battle club also increased their training in order to welcome the upcoming battle club exchange with Ancient Capital University.

They were neither arrogant nor impatient. No matter who the opponent was, they had to deal with it seriously. This was the social training of Imperial Capital University's battle club. Even if the opponent was the weak Ancient Capital University, they were still seriously preparing for battle as usual.

However, social training was social training. They did it on the surface, but in the heart, not everyone valued it that much.

It had only been half a year since the end of the National League, so how could they not know the strength that the Ancient Capital University had?

"Zhengfan, the training is over. Aren't you leaving?" A beautiful two pony-tailed woman shouted at the young man in the arena.

Yin Zhengfan, a reserve newcomer of the battle club at Imperial Capital University. Because he was very young, he could be considered the most cared for member here.

Most importantly, Yin Zhengfan himself was also very hardworking. This made others have no choice but to admire this child.

"Senior, I still want to train a little longer," Yin Zhengfan said.

"Don't tire yourself out." The battle society sister shook her head and left first. Everyone knew why Yin Zhengfan was working so hard. Was it because of the battle club exchange with Ancient Capital University?

If they weren't wrong, Yin Zhengfan should be very concerned about a Beast Tamer of the same period in Ancient Capital University.

Shi Yu, this year's top scholar in the Ancient Capital assessment, the only one who defeated Yin Zhengfan.

However, Shi Yu was only a new student after all. He might not necessarily participate in this exchange. In fact, it was said that the other party was from the archaeology Department. It was even uncertain if he had joined the battle club of Ancient Capital University. Yin Zhengfan had worked so hard to prepare for battle, so he might not even have seen the person in the end.

"But if Shi Yu really comes, he'll definitely be shocked by the change in Zhengfan's strength."

"The growth atmosphere of the two schools is completely heaven and earth."

The senior left the venue with a smile.. Even in the Imperial Capital University where monsters gathered, Yin Zhengfan, who had fought hard enough, was considered one of the best among the new students. Perhaps she should help Yin Zhengfan investigate Shi Yu's current situation?

A week later.

Ancient Capital, Ancient Capital University.

In the student dormitory, Shi Yu and the others were packing their luggage.

This trip to the capital would take at least a week. He had to be prepared.

“Wuu!”

At this moment, Eleven pushed open the door. It was crackling all over and had clearly just returned from the charging room.

It was normal for it to be filled with electricity before leaving.

“Wu...”

“Wu...”

It wasn't interested in the Feeding Conference, but it was interested in the exchange activity with Imperial Capital University.

Shi Yu had been unwilling to organize the team's internal meeting for a long time. It shouldn't be a problem for them to attack outsiders, right?

In the past seven days, Buggy had already mastered the two super skills, the Space Domain and the Dragon of Imagination.

In Shi Yu's team, the only one who was more concerned about the Feeding Conference was Baby Ginseng. After all, it concerned its evolution materials.

“Yi...” Baby Ginseng wiped its sweat and finished preparing a basket of gem fruits. This was something to show respect to the overlord cat before leaving.

Moonlight Gem, soil of time... One was related to the moon, and the other was related to time. Baby Ginseng felt that it was about to be invincible in the team. During this period, it had to be good and ensure that its evolution was smooth.

The most carefree person was Chi Tong. It wasn't interested in the battle exchange or the Feeding Conference. It only wanted to go to the Undead Battlefield with Shi Yu to kill the spirits after these two events ended.

“Are you leaving?”

As Shi Yu and the others were preparing in the room, a whirlwind lingered above the sofa. With a flash of light, the gem cat's figure appeared on the sofa and it was licking its claws as it looked at Shi Yu.

“Yes, we'll set off in a while.” Shi Yu patted his luggage.

“Yi!!” Baby Ginseng shouted for the gem cat and pointed at the fruit basket behind it.

“Good baby.” The gem cat's glass-like eyes lit up.

Teacher Cat, I didn't dote on you for nothing!

“By the way, Teacher Ying, it's been more than ten days,” Shi Yu asked. “Is there any news of the mutated environment?”

Previously, when he went to the resource bank to choose resources, Shi Yu also asked about the mutated environment.

The gem cat had lived for more than a hundred years. In theory, it should be very knowledgeable.

But from the looks of it, there was no outcome?

Shi Yu chose to ask Legend Hua or Principal Feng and the others later.

“Ah, this.”

The gem cat had already walked to the side of the ginseng baby. With a pat of its paw, the fruit basket had already been teleported to god knows where.

It turned around and said slowly with a hesitant expression,

“I only thought of one thing, that it might be a little dangerous.”

“Where?” Shi Yu asked.

“Yi?!” Baby Ginseng was also stunned.

Danger?

Baby Ginseng was least afraid of danger.

Born in a place where monarchs roamed everywhere in the forbidden zone, it had seen all kinds of danger.

As for the danger that the mutation environment posed to it... Baby Ginseng didn't care even more.

It was a ruthless ginseng that had successfully eaten a level-eight resource and survived when it was young.

In order to become stronger, it even wanted to eat a few mouthfuls to increase its evolution foundation before evolution, but it didn't know if it was useful...

“A place in the Undead Battlefield.”

The gem cat recalled and said, “Perhaps, probably, it still exists.”

“Compared to a blessed land, that place is more like a dangerous place.”

“Dangerous place...?”

“Well, the land of death is called the Undying Pond. It contains incomparable death power. Even if monarch-level creatures come into contact with it, they might be corroded by the death power. It's one of the seven dangerous places in the undead battlefield.”

“A large number of undead have come into contact with the lake water before, and their souls were instantly corroded by the power of death.”

“Uh...” Shi Yu and Baby Ginseng's expressions stiffened.

A pool filled with the power of death?

Shi Yu glanced at the ginseng baby. The ginseng baby was wood-element. It would definitely major in life force in the future. It didn't match.

"This pool can mutate plant pets??" Shi Yu asked.

The gem cat nodded and said, "Of course. Firstly, you have to understand how it was born."

"The Undying Pond was formed after the death of an overlord who mainly cultivated the power of death. Because that overlord was too strong, it caused the environment to change."

"Change the environment..." Shi Yu nodded.

The symbol of a monarch-level creature was awakening deterrence.

As for the symbol of an overlord-level creature, it was the initial mastery of special powers such as the power of nature. It could use natural power to increase the power of the skill, and the aftermath of the power could almost permanently change the environment of a place.

This was also why the legends in Icefield City said that the Ice Dragon Snow Mountain was formed after the frost dragon arrived.

However, the power of death didn't belong to one type of natural power. Instead, like life force, mental strength, and soul power, it belonged to a special power. If natural power was to cultivate external forces, then the power of death and life were to train one's own strength.

The difference between the two was that different environments might have different effects on the strength of overlord creatures.

An overlord race that majored in natural power and was a water-type creature, for example... In the sea, borrowing the power of the endless sea might not necessarily be impossible for it to resist fire-element totem-level creatures.

At the overlord level, the concept of energy value was even less of a reference for the pet's strength, because no one knew how much the pet had trained in the power of nature. After all, no matter how strong its own strength was, it was rare for it to fight against the power of nature.

The factors of the venue had a very huge impact on the strength of overlord-level creatures.

Therefore, generally speaking, overlords in the wild had their own fixed territories. If they fought in their own territories, their battle power would increase greatly.

If it went to an area that was disadvantageous, its battle power would decrease.

This was also the reason why the ocean had always been a forbidden area that humans couldn't enter.

After all, a simple tsunami triggered by the sea overlord was enough to make most Beast Tamers suffer.

Compared to overlords who cultivated the power of nature, pets who cultivated special powers like life force and death power that belonged to them didn't really care about the environment they fought in. If it excluded external forces, its own qualities were also stronger than pets who cultivated natural power at the same level. However, these special powers were even harder to cultivate compared to natural power.

For example, Baby Ginseng's Earth Chain and Energy Storage Beam were actually prototypes of controlling natural power, and its source of life skill was a skill to train its own life force.

Naturally, it was not like there were no pets that trained natural powers themselves. However, the effort invested and the requirements for their race would definitely be greater. In most cases, it was the super skills of the pets that determined the subsequent development.

If it couldn't awaken a new super skill, Baby Ginseng would definitely mainly train its life force in the future. After all, it had the super ability of the source of life, and like Earth Chain, even if it was trained to the maximum level, it was only a mid-level skill after all. The potential to cultivate the natural power of the earth was definitely far inferior to developing life force.

"That overlord dual cultivated death power and water power, so it led to the change in the environment. The pool water also contains rich death power, which will erode life forms. But if the pet that comes into contact with the pool water has talent related to death power, or if its life force is strong enough to withstand the death power, it can understand the true meaning of death." The gem cat symbolically licked its claws and continued,

"You humans previously had a legendary Beast Tamer who contracted an Ancient Tree of Life who wanted to cleanse this dangerous place. After all, if such a place is left in the wild, although ordinary undead wouldn't dare to come into contact with it, if there are undead who obtain benefits from it, it will give it the opportunity to break through to the overlord level."

"However, during the process of cleansing the Undying Pond, the Beast Tamer's Ancient Tree of Life accidentally comprehended the power of death during the battle between the life force and the power of death. It mutated and evolved into the first case of Dong Huang, the Ancient Tree of Life and Death of a middle-level overlord race. At the same time, it controlled the two special powers of life and death."

"After that, he gave up on the cleansing pond and chose to seal this place with others. He relied on this method to avoid wild undead contact. After all, there are too few environments in the country that purely contain the power of death. This kind of place is very rare. It's a pity to completely cleanse it."

Baby Ginseng listened with interest.

Eleven, Buggy, and Chi Tong listened with interest.

Buggy couldn't help but sigh. This nonsense sounded even more high-end than its evolution materials.

Eleven, on the other hand, was puzzled. It kept feeling that it was the most normal one in the team.

Shi Yu was also slightly stunned.

"Really, the Ancient Tree of Life and Death?"

Aunt Tree of Life could also evolve?

The Tree of Life... The Ancient Tree of Life... The Ancient Tree of Life and Death... Should "Dead Ancient Tree" be the next one?

"It's real. I participated in the crusade against that overlord and even participated in the sealing of the Undying Pond."

The gem cat raised its head proudly, although at that time, it wasn't that strong. Instead of saying that it participated in the crusade of that overlord, it was more like it participated in the crusade of that overlord's subordinates.

[A special environment that might cause plants with strong vitality to mutate and control the power of death?]

Shi Yu memorized it secretly. To be honest, this power was not in Shi Yu's plans at all in the beginning.

His original plan was to let the wood-element ginseng baby increase its earth-element and light-element talent more. This way, he could borrow the power of nature to freeloader and create as many supplements as possible.

However, the weak power of time attached to the soil and the Undying Pond mentioned by the gem cat immediately made Shi Yu conflicted.

His plans couldn't keep up with changes?

Although he didn't know what changes Baby Ginseng could make after learning the power of death, it sounded so powerful. Shi Yu decided to consider it carefully before making plans.

"Why don't you take me there to take a look when we go to the Undead Battlefield?" Shi Yu asked softly.

"Sure ~" The gem cat yawned. If it were the initial Undying Pond, it definitely wouldn't have brought Shi Yu over. However, the current Undying Pond's power had already been mostly purified, and its power was relatively weaker. With it, an overlord, protecting it, there wouldn't be any danger.

"Thank you!" Shi Yu smiled and moved away. Beside him, Baby Ginseng fell into deep thought.

This mutated environment sounded much more dangerous than the Moonlight Gem and the soil of time.

Was it reliable?

Moonlight Gem+Time Soil+Undying Pool+Ginseng Baby =??

The strange mutation route increased again.

...

At the Ancient Capital Airport.

Shi Yu, who had been chatting with the gem cat for a long time, almost forgot about the serious matter. If it weren't for the calls from Legend Hua and the others, he would still be imagining the evolution path.

After hurriedly putting away their luggage, Shi Yu got Buggy to teleport them to the school's mechanical school.

"Coming, coming."

When Shi Yu saw that Principal Feng, Legend Hua, Dr. Zuo, Student Xia, and even Dean Hao were waiting here, he smiled and said.

On this trip to the capital, no one planned to take the airport plane.

Instead, they planned to directly let Dean Hao of the Mechanical College use its monarch race, the monarch-level Mysterious Meteorite to receive them. This was a mechanical life form that was not inferior to the Purple Electric Mecha.

This speed was undoubtedly faster...

“Shi Yu, not bad,” Dean Hao said in admiration the moment they met.

What a little monster.

Dean Hao, who had just helped Shi Yu complete the evolution of the Iron-eating Beast a few months ago, originally thought that Shi Yu would use the Nine Li Battle Beast to quickly rise in university. Who would have expected that not long after, Shi Yu would run to Divine Capital to evolve the Imagination Butterfly of a middle-level overlord race himself?

He also received the joint support of Legend Hua, Dr. Zuo, and Principal Feng to launch an incomparably huge research project in Ancient Capital University.

“Dean Hao, you’ve worked hard.” Shi Yu laughed.

“What hard work? It’s a pleasure to be able to contribute to Ancient Capital University.” Dean Hao chuckled.

Everyone :” ...”

Legend Hua, Dr. Zuo, Xia Qingwei: Was this the school culture of Ancient Capital University?

“Let’s go,” Principal Feng said with a smile.

The few of them immediately boarded the Mystic Meteorite.

Driving this thing could let them sweep through the Ice Dragon Snow Mountain and the Undead Battlefield. Not many monarch-level creatures were willing to provoke it. Using it as a transportation tool, the few of them could be said to be quite comfortable.

However, it was a pity that the Mystic Meteorite was not big. It could only carry the few of them at most. Otherwise, Principal Feng might even have planned to pull White Brook and the other members of the battle club who had gone to Imperial Capital University to communicate together.

Now, he could only let White Brook and the others take the plane to the airport.

“This is your first time going to the capital, right?”

After getting on the plane, Principal Feng asked Shi Yu.

“Yes.” Shi Yu nodded.

“The first time you’re going, and soon you’re going to be famous all over the country. Are you nervous?” Dr. Zuo smiled.

After researching the Crystal Butterfly, they really had a new breakthrough.

It was a huge breakthrough.

If it was only the green worm cocoon, they still had doubts about first place in the Feeding Conference.

But now, in the eyes of Dr. Zuo, Legend Hua, and the others, the first place in the Feeding Conference would definitely be Shi Yu's.

"Shi Yu is still very low-profile. If he wanted to, his name would have already spread throughout the country when he was in Divine Capital." Legend Hua smiled.

After she finished speaking, Principal Feng and Dean Hao had strange expressions.

Shi Yu kept a low profile?

He was thinking too much!

Did a person with the title of Iron-eating Beast Knight look like a Beast Tamer who could keep a low profile?

They suspected that Shi Yu was most likely studying the Butterfly Knight and was holding it in!

Shi Yu : "..."

"Cough, I've been looking forward to the capital for a long time." Shi Yu coughed dryly.

He looked ahead.

In the capital, in the current capital and political center of Dong Huang, there were the most number of legendary Beast Tamers, as well as the top educational institutions with the strongest comprehensive strength...

The headquarters of the Beast Tamer Association, the headquarters of the Feeder Association, and many other important associations were established here. It was a place with a relatively rich Beast Tamer atmosphere.

Two hundred years ago, a totem battle that swept through the world began. For the time being, only a piece of pure land was left in the capital.

This totem battle lasted for decades. It was an important opportunity for the seven countries to form an alliance. At that time, the representatives of the seven countries officially confirmed the alliance in the capital of Dong Huang. After the totem battle ended, Dong Huang built the Beast Tamer Association headquarters here.

From then on, this place also replaced the other capitals in history and became the center of a new country.

In addition, the economic development level here was also very high, so the overall number of Beast Tamers was also one of the best in the nine first-level cities. Someone had said that the nine major universities were divided into two tiers. One tier was a top-level institute led by the Imperial Capital and the Demon Capital University, and the other was a regular top-level institute.

“I should be able to make it in time for the exchange...” Shi Yu thought to himself. He wondered what the beast-eared girl and the others were doing now. Touring?

Three days later was the exchange between the two schools. At that time, the Feeding Conference would probably be over...

At the same time, at Imperial Capital University.

As the exchange between the two schools approached, a student from the Imperial Capital University, a senior who had always taken good care of Yin Zhengfan, chose to ask about Shi Yu out of curiosity.

Because at this time, the exchange team members of Ancient Capital University should have been confirmed. Generally speaking, this kind of exchange activity was usually brought by the president and his old members. After all, they couldn't avoid battle, but if there were new students with extreme potential, it was very likely to bring them here to broaden their horizons and train.

She opened her contact list and locked onto a name. This person was a relative of hers. Because of her family address and because her talent wasn't especially outstanding, she chose Ancient Capital University.

“Cousin?” A puzzled and nervous voice came from the other side of the phone.

On the other end of the phone, in Ancient Capital University, Hong Xiao was stunned and a little nervous. His genius cousin rarely contacted him apart from family gatherings. Why was it... so sudden this time?

“Hong Xiao, did you come to the exchange team from Ancient Capital University this time?”

“How am I qualified to go with my strength?” Hong Xiao smiled bitterly.

Hong Xiao's cousin had an expected speechless expression... She was disappointed.

“I have something to ask you.”

“Is there a student named Shi Yu in your school?”

“Why are you asking about him?” Hong Xiao's expression darkened.

He recalled the fear of being dominated by Shi Yu's ginseng baby during the battle assessment.

“I'm curious. Has he joined your battle club?”

“Yes, he joined.”

“Oh? How's his strength?”

Hong Xiao: “...What are you doing?”

“I'm just asking if he joined the exchange team this time.”

Hong Xiao's face was extremely dark. How could he not have joined? When the Beast-eared Lady President lectured them, she used Shi Yu as an example all day!

She always said obscure words like “I’m going to bring Shi Yu to sweep through Imperial Capital University”. This meant he was definitely in the exchange team.

“He should be there too.”

“What about strength?”

“I...” Hong smiled and said, “Why are you paying attention to a ‘new student’?”

“I asked for it for a friend.”

Hong Xiao was silent and said, “This isn’t too good, right? Although it’s not any ‘important’ or ‘confidential’ information, I’m still from the battle club of Ancient Capital University. Cousin, you want me to sell information?”

“Pfft, is that necessary? Alright, I won’t ask anymore. I’m hanging up. It’s enough to know that he’s here too.”

“Eh, wait.” Hong Xiao hesitated for a moment and felt that it wasn’t good to say nothing. After all, they were relatives.

“What else do you want to say?”

Hong Xiao took a deep breath and recalled the battle where Shi Yu’s Nine Li Battle Beast crushed the Thunder Ray Beast. He brewed his emotions and advised, “Listen to me. Don’t fight him!”

“That kid is not human, son of a b\*tch.”

“Remember, don’t fight him.”

“???”

In a classroom of Imperial Capital University, Tang Yun looked confused. Just at this moment, a teacher knocked on the door.

“I’m hanging up!” she said and looked at the teacher.

It was a female mentor in a research suit who came in. She looked at Tang Yun helplessly and said, “You just came back from training again.”

“You’re a student of the Feeding Department, and your talent is also in the Feeding Department. Why don’t you focus on your own specialization instead of going to the battle club to join in the fun all day long?”

Tang Yun chuckled and said, “Feeding and battle are the same.”

“Teacher Xie, what’s the matter?”

“Let me remind you of the things to take note of at the Feeding Conference tomorrow. Don’t mess up the rare opportunity to study.”

Tang Yun patted her chest and promised, “Don’t worry, I have applied for leave for the training at the battle club. I will cooperate with you, Mentor.”

Before that, she would first tell Zhengfan that Shi Yu had also come. Then, she would prepare for the Feeding Conference in peace!

## **Chapter 210: The Eve of the Feeding Conference**

That day, Shi Yu and the others arrived at the capital.

There were 33 teams for the Feeding Conference this time, not many.

The threshold of this meeting was relatively high.

Only the Feeding Association's recognized feeding institutions, such as the nine major universities' Feeding Department, the Feeding Research Team of well-known businesses, or the Feeding Team established by some famous Feeding Masters were qualified to register.

For example, although Ancient Capital University wasn't famous for the Feeding Department, it was still a top-notch educational institution. It definitely signed up successfully without any pressure.

But if an unknown individual feeder wanted to show off the results of the feeding, the procedures would be complicated.

He would have to apply to the Feeding Association a month in advance. The judge, after feeling that after the feed results reached the standard, would decide that he could display the feed results with these top-level feed institutions and compete for the top resources provided by the third bureau.

This was also to screen some casual research enthusiasts. If there was no threshold for participation, the value of this Feeding Conference would be too low. Perhaps someone would develop a new type of dog food and eagerly come to participate.

At this moment, in an office in the Feeding Association building, the current president of the Feeding Association and a member of the third bureau, a man in a gray suit yawned and took the display list sent by his assistant.

The Feeding Conference was a competition organized by the third bureau. The reason for doing this competition was also very simple. Although the elites of the Feeding World were all in the third bureau, the intelligence of individuals was undoubtedly small compared to the intelligence of groups. By taking out rewards and letting some individuals and collectively display the results of the feeding research, it could also provide some ideas in their research direction.

Almost every year, the third bureau would start a certain amount of cooperation with some feed institutions through the Feeding Conference. Both parties would benefit from each other and promote the active development of Dong Huang's feeding domain.

"There aren't any new results this year." He roughly glanced at the list.

New nutritional drinks?

Mixed spiritual plants?

Mutated tree fruit?

High-rank pet fertility medicine?

There was also the new evolution form of the Green Silkworm...

Although these feed results were definitely innovative and had good effects, in terms of type, they were still the same. They were still in a fixed field. No one created a new research direction.

Although it was not bad to study the existing domain in depth... The third bureau was actually to see the emergence of new domains.

“President, look, the participating team of Ancient Capital University...” The male assistant said, “It’s very strange.”

“Eh?” The president of the Feeding Association, Ye Hui, first took a look at the results of the Feeding Research at Ancient Capital University... The Green Silkworm had a new evolution form?

There was nothing new...

However, as he saw the members’ configuration of the research team, his expression changed slightly.

The person-in-charge: Shi Yu.

Members: Hua Xiajin, Zuo Xiaoei, Xia Qingwei.

“This is...”

Hua Xiajin, Zuo Xiao’e, he was familiar with these two names.

Hua Xiajin was a legendary Beast Tamer. Although not all Beast Tamers knew his name, he was definitely not unfamiliar with someone of his status.

As for Dr. Zuo Xiao’e, there was even less of a need to say. She was a famous doctor in the Feeding World. She specialized in the research of the Worm Department and had studied the evolution form of a large number of Green Silkworms. She was at the highest level of a monarch race!

The problem was that Legend Hua was a legendary Beast Tamer in Divine Capital. Dr. Zuo was a professor at Demon Capital University. Why did they all go to Ancient Capital University!

He knew why his assistant wanted him to watch this team. The configuration was too strange. The in-charge... Shi Yu, who was this? He kept feeling that he had heard of it somewhere.

Ye Hui stared at it carefully for a while and contacted the research results of this feeding. A moment later, he was suddenly stunned.

That newcomer from Bureau 11 who had a pet that evolved into a middle-level overlord race, the Butterfly of Imagination, and cultivated a strange green cocoon pet?

“Sure, this kid, I see.” He thought for a moment and immediately understood.

This newcomer from Bureau 11 could actually let a legendary Beast Tamer and a famous doctor assist in research. Ridiculous, why didn’t such a genius newcomer appear in the third bureau? Speaking of which,

why didn't the other party do his archeology since that was his field? Now that he had entered the Feeding World, President Ye Hui fell into deep thought.

"By the way, adjust their display order forward."

"I'm a little curious. What did they create on that foundation..."

...

"We're finally here."

On the other side, in the huge hotel prepared by the Feeding Association for the 33 exhibition teams, Shi Yu came to his room exhausted and fell onto the bed.

Although he had been riding a fighter aircraft the whole way, it was quite tiring. Shi Yu finally understood why Dean Hao's Secret Meteorite had so many seats. It was because this mechanical life form could actually be driven using the energy of many people. Dean Hao jokingly let Shi Yu try it. After Shi Yu really tried, he was directly drained out of a lot of energy.

Dean Hao said that at the moment, many large mechanical lives in the country were like this. Although they were mainly made up of one Beast Tamer, they could be strengthened by multiple people. This was the main development direction of mechanical lives at the moment, and it could maximize the gathering of the power of some idle Beast Tamers.

If another war really happened, they wouldn't be able to count on Beast Tamers below the Legendary level to change the situation. It would be pretty good if they could protect themselves.

But if there was a kind of overlord-level mechanical life form that could gather the power of thousands of low-level Beast Tamers and condense their power into one, that low-level Beast Tamer would also have the ability to change the battle.

When ten thousand Beast Tamers with thunder-element strengthening talent strengthened a battleship together and fired a huge thunder-element cannon, the power would definitely be stronger than a Beast Tamer strengthening alone.

The malleability of mechanical lives was also the reason why various countries developed it.

"I've also flown a fighter plane before... Although I didn't get to shoot the cannon on the way..."

Just as Shi Yu was thinking about what his mechanical life pet would be like, there was a knock on the door.

"Shi Yu." Xia Qingwei's voice sounded along with the thumps.

"Little Xia, what's wrong?" Shi Yu stretched and opened the door. He looked at the research assistant in a blue dress.

"Are you going to eat? My mom asked me to call you." Xia Qingwei was annoyed. She was a little famous in Demon Capital University, an influential figure in the Demon University team. When she arrived at Ancient Capital University, she was directly reduced to Little Xia. The key was that Xia Qingwei couldn't have a temper, because regardless of strength or feeding, she was crushed by Shi Yu.

“The hotel has a buffet. You can eat all three meals there.”

“Did Auntie Zuo and the others go?” Shi Yu asked.

“My mom and Aunt Hua said they were going to see a friend. It’s just the two of us.”

“I’m not hungry. You go,” Shi Yu said.

Xia Qingwei: “?”

Shi Yu had already eaten the nutrient fruit of the ginseng baby. He was no longer hungry, but the after-effect was a little strong. He only wanted to lie down and sleep now.

“Alright.” Xia Qingwei didn’t invite him anymore. She said, “If you’re hungry, go yourself. Remember to stay on the tenth floor.”

“Alright, thank you.” After Shi Yu sent Xia Qingwei away, he prepared to rest well and welcome the exhibition tomorrow. He first took out the research suit gifted by Principal Feng and planned to change his Fire Demon coat into this next.

This research suit should be the same as Senior Lu’s. According to Principal Feng, it was made of the top-notch level-six material. It was very expensive and had multiple effects such as spiritual and soul strengthening.

After preparing the clothes, Shi Yu yawned and took a last look at the situation in the ruins space.

Eleven was practicing the combination skill with the Giant Transformation skill as the core.

After Shi Yu pointed Eleven’s Giant Transformation to “Dao Proficiency”, apart from turning Eleven into a hundred-meter-tall beast, the greatest change was that it had the special ability of Giant Transformation.

It was roughly reflected that if Eleven released the Thunder Palm, it could completely erupt with more power at the standard of enlarging. With its one-meter body, it could slap a huge Thunder Palm 100 meters in diameter away from itself and crush the enemy, allowing the skill to exceed the original upper limit.

Shi Yu named it: Giant Transformation Skill.

Compared to releasing a skill after the transformation, the difference was that the energy consumption was much smaller, but the power was not much different.

Not only did it retain the flexibility of the small body, but it also obtained the explosive power of the enlarged body.

Compared to the hardworking Eleven, Little Chi Tong was very comfortable. It lay on the ice pile and roasted the yam nutritional supplements that Baby Ginseng had prepared for it. It looked at Buggy and Baby Ginseng, who were researching new combination tactics, freely.

“Wu!” Buggy and Baby Ginseng argued.

It believed that it should seal the enemy in the spatial shackles and then use Instant Transmission to transfer the large number of explosive energy fruits created by Baby Ginseng into the sealed space. Finally, they would detonate the spatial and energy fruits at the same time. Only then would the power be sufficient. It could be said to be “Invincible Wuji”, the strongest strategy!

“Yi!” However, Baby Ginseng felt that this was too cruel and too utilitarian. It wasn’t suitable for ordinary battles. Apart from Eleven, there shouldn’t be any opponent who could withstand it. It was better to use some handsome tactics.

For example, the “Yiji Array Enemy Bombardment Tactic”. They directly flew into the sky and threw the Energy Fruit Bombs to bombard it.

Shi Yu could tell that Baby Ginseng was doing this on purpose. It wanted to fly. Otherwise, both Eleven and it could match a bunch of dirty tactics with the all-purpose support worm. It seemed like it was the only one in the team who couldn’t fly...

“Sleep...” Shi Yu no longer worried about his pets and collapsed.

...

The next morning.

Shi Yu put on his research suit. Although it was unnecessary, it was better to wear normal and formal clothes on this occasion.

“How was your rest?” Early in the morning, after Shi Yu, Dr. Zuo, Legend Hua, and the others met, they were asked.

“It’s alright.” Shi Yu smiled. Now, he belonged to the category of people who could sleep soundly anywhere.

“That’s good. Let’s go have breakfast first and go over as soon as possible. The meet starts at 8. We’re the second show. We have to prepare in advance,” said Legend Hua.

The few of them chatted as they headed to the hotel’s buffet level. Apart from Shi Yu and the others, many of the other members of the Feeding Team were also eating here.

After Shi Yu arrived, he casually took a cup of milk and a plate of pastries. He was actually still not very hungry... Baby Ginseng’s nutritional supplements were getting stronger and stronger.

With the plate in hand, Shi Yu found a place to sit.

“Cough, cough, cough.” However, he had not sat for long when the simple milk and pastry nearly choked Shi Yu. This was because he suddenly saw a young man with an eye on his forehead walk past him and was suddenly shocked.

Shi Yu looked over in a daze. At this moment, Xia Qingwei had just finished preparing breakfast. She took a look and said, “It’s a three-eyed hybrid.”

“Hybrid,” Shi Yu whispered.

“Yes, it’s a hybrid with a bloodline that’s inclined towards humans.” Xia Qingwei nodded and said, “The humans of the three-eyed race can also open up the Beast Taming Space and become Beast Tamers. However, their Beast Taming Talent is uniform. It’s that third eye. Its effect is similar to the Heavenly Eye. It’s a high-level skill with super vision. It’s a special reconnaissance talent. It’s said that there’s also a way to see through the pet’s potential.”

“Sigh ~” This was the first time Shi Yu had seen a living hybrid.

In person, at least.

There were actually two types of mixed blood.

One was a human who mainly had the bloodline of other creatures. Such a human could still open up the Beast Taming Space, such as General Mu Huiyin, the empress, and the three-eyed human just now.

The other type was the bloodline of transcendent creatures that had a small portion of human blood.

They were called human-type pets compared to creatures that didn’t have human bloodlines but looked similar to humans.

These types of creatures did not have the Beast Taming Space, but they had various skills, so they could be contracted by the Beast Tamer as pets. It was considered a side door pet classification that was different from elements, plants, undead, and machinery.

According to what Shi Yu knew, the mermaids in the sea, the Dragon Palace City Dragon Girl, the werewolves, vampires, and even the legendary angels in the west were all humanoid creatures that could be contracted as pets. He just didn’t know if these claims were true.

The mermaids were alright. Senior Lu seemed to have contracted a mermaid princess to explore the underwater ruins. As for the others, especially things like angels, it was really difficult to determine if they were real or fake.

“Eat quickly,” Xia Qingwei said. Shi Yu immediately stuffed all the pastries into his mouth.

If he remembered correctly, there seemed to be a bureau in Division 13 that was specially set up for the hybrids?

From his conversation with Principal Feng, he learned that the overall battle power didn’t seem to be weak.

...

When Yu and the others arrived at the venue, a group of people had already gathered here.

However, unlike the battle competitions of the National League, the people who came to the Feeding Conference were all industry insiders. They invited some powerful Beast Tamers and Feeders, and not just anyone could buy a ticket to come in and watch.

Therefore, in the entire venue, including the audience, there might not be more than two thousand people. It was less people than a single high school that had a parent day event.

On the Ancient Capital University seats, Principal Feng, Dean Hao, and the others had long been sitting and waiting. Some experts and professors from the Feeding Department of Ancient Capital University also came.

Initially, apart from the evolution of the iron-eating beasts, Ancient Capital University didn't have any outstanding research results this year. The research of the Green Silkworm Cocoon could be said to be a timely help for Ancient Capital University. Otherwise, the Feeding Department of Ancient Capital University this year would definitely be at the bottom again, or they would give up competing.

"Let's go over."

"Qingwei, cooperate with Shi Yu later. Don't be nervous." As Shi Yu and the others walked towards their seats, Dr. Zuo said to Xia Qingwei.

"I understand," Xia Qingwei said with a nod.

There were more people in the National League than this, so she wasn't nervous. What was there to be nervous about?

Although that was the case... Xia Qingwei was still a little nervous. As a student of Demon Capital University, was it reasonable for her to support the students of Ancient Capital University in participating in the conference... She glanced at the seats of the Demon University and felt a little guilty.

Beside her, Legend Hua had a smile on her face. Over the past few days, Dr. Zuo had been squeezing Xia Qingwei dry. However, anyone with eyes could tell that she was helping Xia Qingwei. Even if she only contributed a little during the process, it would be very helpful for her future development.

"We're the second... Then which feeding team is the first to showcase?" Shi Yu asked as soon as he sat down.

As the leader of the Feeding Team of Ancient Capital University... After he came here yesterday, he slept directly until night...

"I remember it's... Imperial Capital University?" Legend Hua thought for a moment and said, "Well, it should be Imperial Capital University."

"Their Feeding Department seems to be pretty strong..."

"But there's definitely no one who can compete with us this time."

Imperial Capital and Demon Capital were schools without any shortcomings. Apart from the battle specialization, their other specializations were also strong.

"Imperial Capital?"

Shi Yu was stunned. What a coincidence.. He still had to go to Imperial Capital University to have a battle exchange later. He didn't expect to see the feeding results of Imperial Capital University before that...
