

## Beast 211

### Chapter 211: Results of Changing the Industry

Imperial Capital, National Exhibition Center.

There were more and more people in the venue.

Before eight in the morning, every area was almost full.

At the same time, three people also entered the judging table, attracting a lot of attention.

“It’s President Ye Hui...”

“Dr. Lu Qi...”

“And Dr. Tian Xiu...”

“What a luxurious judging lineup. They’re already starting to get nervous.”

There were discussions below.

At this moment, a middle-aged man in a suit and holding a microphone walked to the center of the venue.

With a smile on his face, he first coughed dryly to attract everyone’s attention. Then, a loud voice sounded.

“Hello, friends from all walks of life. Welcome to the scene of the Feeding Conference.”

“I’m the host of this Feeding Conference, Deng Lin.”

The short-haired middle-aged man attracted everyone’s attention through his voice.

Deng Lin was also a famous Feeder. Unlike those Feeders with special Beast Taming Talents, he relied on a solid foundation to reach this stage over time.

After joining the Feeding Association, he became the representative of the Feeding Association to explain various feed results to the public. Everyone was familiar with him.

At a certain seat, Shi Yu and the others also looked over.

“Before the exhibition starts, please allow me to introduce the three judges of this Feeding Results Show.”

“They are respectively the president of the Feeding Association, Master Ye Hui!”

“Welcome, everyone.” On the judging table, the gray-dressed man sitting in the middle smiled.

Applause immediately sounded from below.

President Ye Hui was also considered a legendary figure. He had sat in this position at a young age. Of course, this was also related to his heaven-defying cultivation-type Beast Taming Talent. It had been unearthed and cultivated in the third bureau a long time ago.

“Imperial Capital University, PhD in Chemistry, Dr. Lu Qi!”

“Hello.” On the judging table, on President Ye Hui’s left, an old man smiled.

Below, the feed team at the Imperial Capital University seats applauded fiercely!

This doctorate in chemistry from the Imperial Capital University had researched 27 evolution plans for pets. There were evolution races that were transcendent to monarchs. There were even evolution types of two low-level overlord races!

Apart from the overlord race, everything else had a certain degree of replication. Moreover, these pets’ attributes were not limited to the worm-element. His position in the academic world was much higher than Dr. Zuo’s, and he was a senior figure of Dr. Zuo’s.

“I wonder what Dr. Lu Qi thinks of the green cocoon.” Beside Shi Yu, Dr. Zuo had an amused expression.

For the soil of time, Shi Yu had made ample preparations this time... Even she was shocked by the contents of the display.

“Talent Group, Chief Feeding Doctor, Tian Xiu!”

The last person was the old man on President Ye Hui’s right. He was a PhD representative of a financial group that mainly produced commercial products with the results of its operations.

“I’m very happy to be the judge of this Feeding Conference.”

She smiled and said, “Her experience is also very legendary. Most of the feed products she developed are suitable for the basics, and it can be said to be widely praised among Beast Tamers.”

Almost all the pets of Beast Tamers from Dong Huang had tried the nutritional supplements she had developed.

Many exhibition teams had no objections to the three of them being the judges of this Feeding Conference.

The judging method of this Feeding Conference was also very simple. Each judge had 10 points of authority and a total of 30 points. The three judges would evaluate the applicability of the feed results, their high potential, and many other aspects.

If the results of a feed were very strong, strong to the point of explosion, but the cost would be hundreds of millions, and it was very difficult to replicate. The range of applications was limited, so the overall score wouldn’t be very high.

Unless this product could be like those totem-level forbidden weapons that could greatly increase the battle power of a country. At that time, whatever else could be ignored. Just the height alone was enough to crush the results of other teams.

The judging criteria of this conference was to see the overall impact of the feed results on the Beast Taming Domain!

“Sorry for making everyone wait.”

After the host, Deng Lin, explained a bunch of assessment rules and the original intention of the Feeding Conference, as well as his expectations for the future of the Feeding Domain, he finally got to the point. He looked at the big screen at the venue with a smile.

“I believe everyone has been looking forward to it for a long time. Then, let’s invite the first show team.”

“They’re from the Feeding Department of Imperial Capital University, the tree-fruit research team led by Professor Fang Lin. The content they’re going to show this time is the ‘new breed of tree fruits!’”

Swoosh!

The title of the first display team appeared on the big screen in the center of the venue.

In addition, the configuration of the entire research team appeared on the screen.

Team person-in-charge: Professor of the Feeding Department of Imperial University, Fang Lin.

Members: Tang Yun, Jiang Tong, Guo Mingrui, and Du Yan, students of the Feeding Department of the Imperial Capital University.

When the team configuration was out, the audience was shocked.

He didn’t expect that the strongest feed result of Imperial Capital University this year was developed by a professor and a group of students.

“I’m looking forward to it.”

“The results of Imperial Capital University have been very strong in the past years. This year will definitely not be bad.”

As the first display team confirmed, everyone started discussing.

The feeding power of Imperial Capital University was pretty good. Everyone was curious about the major research results of Imperial Capital University this year.

Soon, the female professor of Imperial Capital University, Fang Lin, walked on stage.

“Hello, everyone. I’m Fang Lin, a professor of the Feeding Department of the Imperial Capital University. Cultivating new spiritual plants and spiritual fruits has always been an eternal research topic in the Feeding World. And the result of the fostering we brought this time is a new tree fruit cultivated using a special planting method, the ‘Luminous Fruit’.”

In the venue, the three judges watched quietly. Below, the many exhibition teams also watched quietly.

New product resources...

Shi Yu nodded slightly.

There was no hurry. When he taught Baby Ginseng plant control skills and upgraded it to Perfect Level, he could almost easily mutate the plants. There were as many new spiritual plants as he wanted. He could be a gambler every day!

Then, under the control of the female professor of Imperial Capital University, Fang Lin, the screen changed and a yellow-green fruit picture appeared.

She continued, "Generally speaking, tree fruits are usually used as one ingredient for certain evolution plans, skill teaching plans, and nutritional supplements. It requires other materials to maximize the effect. Only a small number of spiritual plants and spiritual fruits can bring huge improvements to pets and Beast Tamers on their own."

"The Luminous Fruit is a tree fruit species with astonishing effects alone. It can directly help a pet awaken an intermediate skill. As long as the pet matches this skill, the awakening rate will be above 99%."

Everyone was slightly surprised.

Because up to here, it didn't sound new.

Although the effect of this fruit was very strong and could make many low-level Beast Tamers envious, this was the National Feeding Conference. Just this kind of result was not enough to show the power of Imperial Capital University, unless...

Unless this mid-level skill was very important.

Under Fang Lin's instructions, her four students went on stage.

Behind the four students, each followed a pet. The four pets were of different races. One was a Lightning Rat, one was a Nightlight Cat, one was an Icefield Hound, and the other was a Thorny Beast.

Shi Yu took a look. Good lord, was he going to film "Tom and Jerry"?

"These are the four pets we applied to the Feeding Association. Everyone should be familiar with their skills. These four pets also only have racial skills, but next... they're about to awaken new skills!"

Among the four students, the girl named Tang Yun took out the tree fruits on display and fed them to the pets.

After feeding them, Tang Yun looked excited. Alright, little guys, let's stun everyone!

A few seconds later.

Unsurprisingly, all four pets flickered with the Light of Awakening. This was the sign that they were awakening to master new skills!

At the same time, under everyone's silent gaze, the pets suddenly opened their mouths!

"Hou!!!!!!!!!"

The pets of the four races, which were completely different, actually let out the same roar that did not match their race at the same time. Moreover, the sound was incomparably loud, ringing through the entire venue, causing the ground to tremble slightly and causing dust to be stirred!

“This is...” Everyone was slightly stunned. Then, some feeders revealed shocked expressions.

On the judging table, the three judges were stunned and immediately determined what skill it was.

“Could it be a battle roar skill?” President Ye Hui said in surprise.

On the display table, Professor Fang Lin smiled and said, “It’s the spiritual medium-level skill War Roar. Everyone is definitely familiar with the use of this skill.”

“This is a skill that can rely on the roar to increase your battle will, obtain mental resistance and a temporary increase in strength, and affect the enemy’s will. After the proficiency is high, you can still upgrade it to a group resonance skill!”

“Its greatest use is to allow commander-level pets to have the power to fight against the deterrence of monarch-level creatures and not directly faint!”

As soon as Professor Fang Lin finished speaking, everyone exclaimed. They immediately understood the strategic value of this skill.

This was not prepared for ordinary Beast Tamers.

This was prepared for the Beast Tamer Troops!

On the battlefield, why was it difficult for pets below the monarch level to change the battle situation?

Because monarch-level creatures relied on deterrence to have the initial capital to ignore the number of weak enemies, it was very difficult to defeat them with numbers.

In the face of the deterrence of monarch-level creatures, even commander-level pets would instantly lose their will to fight.

However, if the pet learned the Battle Roar, there would be no problem.

If an army was allocated with the Battle Roar and upgraded to a group skill, even a group of commander-level pets would have the possibility of surrounding and killing monarch-level creatures. And facing opponents of the same level, they would also have an incomparably huge advantage!

If the Luminous Fruit only helped the pet awaken an ordinary mid-level skill like the Thunder Palm, it would basically have no effect on Dong Huang’s Beast Taming Domain. But if it was a tree fruit with a stable awakening battle roar skill, the meaning would be different.

“A very rare research result,” Dr. Tian Xiu praised.

“Yes.” Dr. Lu Qi smiled. Obviously, he had known about this result.

“This tree fruit...” On Shi Yu’s side, Legend Hua and Dr. Zuo also revealed shocked expressions.

The battle roar skill was different from other skills. Because of the speciality of its group resonance, the effect of it exceeded high-level skills for specific people. This research result could be said to have a very different meaning.

“Does it depend on the roar to deal damage?” Shi Yu was also slightly stunned. This skill was not bad. It was very suitable for low-level army battles. Think about it, a group of battle beasts that had mastered the impregnable resonance skill. They would roar and charge at the same time, increasing their battle intent and strength. That felt good...

However, this skill still had some restrictions.

The effect was only obvious for those below the monarch level. The same effect was perfectly covered by deterrence. Although deterrence wasn't a resonance skill, after a high proficiency level, it was a group skill. It could overlap, be used to bully others with its power, and deterrence with high proficiency could completely increase the battle will of an entire army. The effect would only be stronger than the battle roar.

Although that was the case, it didn't affect anything. After all, there were only a few Beast Tamers who had mastered the deterrence skill in the entire Beast Taming Domain. Moreover, if the deterrence and battle roar were used together. Although the strength of the effects were similar and the mutual increase was limited, it wasn't like there was no increase at all.

This was... a very valuable research result!

Now, the value of the battle roar had been confirmed. It was completely incomparable to mid-level skills like Cannon Fist and Thunder Palm. The entire army being armed with the Thunder Palm was useless. However, the significance of the full armed battle roar was huge. Next, it would depend on the difficulty of nurturing the Gem Fruit.

From any perspective, if the Clear Gem Fruit was popularized in the army, the impact would definitely not be low, but if the cultivation cost of one was a lot of money, that wouldn't be too good.

“Professor Fang Lin, what about the cultivation cost of the Clear Gem Fruit?” President Ye Hui asked.

Professor Fang Lin said, “The cultivation of the Clear Gem Fruit requires special fertilizer and the support of plant-type pets to grow normally. If we cultivate them in batches, the cultivation cost of one fruit is about 100,000 yuan each.”

With that said, she flipped to the page and showed everyone the cost composition of nurturing the Green Glowing Fruit.

100,000...

After Professor Fang Lin finished speaking, the three judges fell into deep thought.

This price was very conflicted. It wasn't to the extent where it couldn't be used in the army, but if it was to be popularized, it wasn't that easy.

Dong Huang's annual military expenses of more than trillion seemed to be a lot, but just the food of the soldiers' pets alone had spent most of it. The remaining funds that could be used for the pets' skills, equipment, medicine, and training facilities were spread out. There wasn't much left.

With that money, it was enough to create many monarch and overlord-level mechanical lives.

However, this cost-effective ratio was definitely higher than armed mental equipment, so most importantly, it had potential again.

After all, the cultivation cost could be optimized. If he could find a cultivation plan that reduced the cost to half or a quarter, the strategic value of the Gem Fruit would be even greater.

“At the moment, we already have three cost optimization plans, but due to the funds, we can’t completely implement them,” Professor Fang Lin said.

This was also the goal of many individual feeding teams. They wanted research funds! They wanted to jointly do research with the third bureau!

The feeding team of Imperial Capital University was still showing off, explaining their subsequent research ideas, making everyone and the three judges nod to themselves.

At the moment, the Luminous Fruit already had the potential to increase the battle power of the Dong Huang Beast Tamer Corps overall. This feeding result was undoubtedly a huge success. It was worth the third bureau and even the military’s follow-up research.

During the evaluation process, Ye Hui, Lu Sheng, and Tian Xiu all gave extremely high affirmations.

“28.5 points.”

Ten minutes later, after a serious discussion by the jury, the new Tree Seed Fruit displayed by Imperial Capital University was extremely recognized.

Seeing this score, on the display table, Mentor Fang Lin smiled. The four students on the ground also had flushed faces and were very excited.

“Yay!!”

Their hard work for the past six months was not in vain.

At the Feeding Conference last year, there were only six feed results with scores exceeding 28 points. There was only one that exceeded 28.5 points, and the highest was only 29 points. This evaluation was undoubtedly very large.

“28.5 points?”

“Another genius Feeder appeared in Imperial Capital University. I’ve never heard of Professor Fang Lin before, but I’ve completely remembered her this time. I wonder if I saw the day when the Beast Tamer Troops were all armed with the Battle Roar.”

“Those few students also have boundless prospects. Perhaps they will be recruited by the military after graduation.”

“The first one is already so explosive.”

After the presentation of the Imperial Capital University’s Feeding Team, the research teams that were going afterwards were a little embarrassed.

Most of the feed results in these display teams were still not replicable or popularizing.

For example, when Dr. Zuo researched the Ice Phoenix Moth back then, although it increased her reputation greatly, it was only limited to this.

After all, regardless of whether it was ordinary people or high-end battle power, they rarely spent the effort to nurture a Green Silkworm that had mastered transcendent worm silk.

In addition, ice-element phoenix materials were also very expensive.

Even if the Ice Phoenix Moth's breeding results were very impressive, Dr. Zuo's evaluation for the Feeding Conference back then would only be ranked seventh.

Moreover, this ranking was largely not for the Ice Phoenix Moth.

It was because Dr. Zuo had proven that the Green Silkworm might directly evolve into a monarch race.

After all, the Ice Phoenix Moth was the first case. The Green Silkworm had become a classic example of a monarch race as the first evolution, providing many research ideas to other researchers.

Therefore, the popularization and potential displayed by the Imperial Capital University could increase the overall battle power of the Beast Tamer Troops. For the subsequent Feeding Team, it was simply a fatal blow, making them feel immense pressure.

"Thank you, Professor Fang Lin, for the Feeding Team of Imperial University. Thank you for your research results."

Host Deng Lin went on stage and sighed. "Thank you for the evaluation brought by the three judges."

On the judging table, the three judges smiled. They still had to thank the feeding team of Imperial Capital University.

They didn't expect the first feed result this year to be so meaningful.

Then, the conference carried out a short five-minute break.

On the Imperial Capital University's side, everyone was excited.

Tang Yun and the other students surrounded Professor Fang Lin and chattered excitedly.

"Although Feeders rarely go to the battlefield themselves, their existence, and the medical care department as well, can provide huge help to the soldiers at the front line. This is also a kind of battle." Fang Lin said with a smile and glanced at Tang Yun.

It meant that battle and feeding were indeed not separated, but there was no need to cultivate both. After all, a person's energy was limited, and she didn't have the battle-type Beast Taming Talent. Why didn't she just obediently follow her, her mentor, to specialize in feeding? She could still increase the battle power of the soldiers at the back.

"I understand. Speaking of which, which team is the next display team?" Tang Yun changed the topic quickly.

"I think it's Ancient Capital University," a student named Du Yan said.

“Ancient Capital University?” Tang Yun was stunned.

Similar to Shi Yu before, she had the same idea. As the only member of the battle club of the Imperial Capital University present, she knew that the next two schools had battle exchanges. Was she going to compete with them in the Feeding Department in advance?

“What about their research results?” Tang Yun asked.

Professor Fang Lin: “It looks like a new evolution form of the Green Silkworm?”

“They don’t seem to have a team that specializes in the research of the Green Silkworm, right?” the student Jiang Tong said. If he remembered correctly, Ancient Capital University’s main breeding research was in the undead department. Why did they come to study the Green Silkworm?

“Maybe they discovered a new form by accident.” Tang Yun smiled and didn’t care much.

A few new evolution forms would appear every year for the Green Silkworm, and they would be bet by the feeders, but there was nothing new.

Either its proficiency in the worm silk was too high, or the evolution ingredient was too dark. After all, the two concerned the potential of the Green Silkworm. After researching for decades, the Wind Crystal Butterfly that the Green Silkworm naturally evolved into was the most intimate.

At the same time, the other exhibition teams also discussed Ancient Capital University.

Compared to Imperial Capital University, the Feeding Department of Ancient Capital University was not famous.

Apart from a small number of people, probably not many people were looking forward to the results of Ancient Capital University’s feeding. After all, in the past years, the overall score of Ancient Capital University was never in the top ten.

Soon, the break segment ended, and the host, Deng Lin, went on stage.

“After a short break, let’s invite the second exhibition team.”

“It’s from Ancient Capital University. The research team of the Green Silkworm Evolution Feeding Group, led by Student Shi Yu of the Archeology Department, is going to showcase the ‘Green Silkworm New Evolution Form’!”

Swoosh!

When Deng Lin finished speaking, everyone was stunned for a moment.

“Huh?”

“Wait, did I hear wrongly?”

“Although I know that the archeology Department of Ancient Capital University is very impressive, isn’t this the Feeding Conference... Why isn’t it the Feeding Department leading the team, but the archeology Department?”

“Is that the problem? Why aren’t the professors leading the team, but... the student?”

As the host finished speaking, the crowd instantly exclaimed.

A moment later, someone suddenly felt that the name Shi Yu was a little familiar.

For example, Tang Yun of the Imperial Capital University was first shocked at how the Ancient Capital University spent so much effort to let the archeology Department participate in the Feeding Conference. Then, she was slightly stunned by the name Shi Yu.

Archeology Department, Shi Yu...

Was it that Shi Yu Yin Zhengfan cared about? The Shi Yu she had asked her cousin about previously?

While many people were stunned, the contents of the display team of Ancient Capital University appeared on the big screen in the center of the venue. In addition, the members of the entire research team appeared on the screen.

At this moment, the crowd was stunned again. They were extremely stunned.

Team In-charge: Ancient Capital University archeology Department student, Shi Yu.

Members: Dr. Zuo Jiangyun, director of the Demon Capital Insect Department, Feeder Xia Qingwei, Legendary Beast Tamer Hua Xiajin...

Everyone: “?”

Imperial Capital University: ???

Demon Capital University: ???

Good lord...

Imperial Capital University had a professor with four students. On Ancient Capital University's side, not only was the archeology student leading the team, but they also had a famous doctorate and a legendary Beast Tamer?

What the hell was going on?

Which one of them wasn't a big boss in the insect domain?

Why? They were members, and the person in charge was a student?

At this moment, apart from a few people who knew, most of them were confused.

On the side of Imperial Capital University, Tang Yun was extremely confused. So, was it the Shi Yu she knew?

Looking over with endless confusion... As a young man in a white research suit calmly walked onto the stage, she was even more confused.

It was definitely that Iron-eating Beast Knight. It was him.

This didn't make sense!

Why was it him?

The archeology Department didn't do archeology, but came to study feeding?

Wasn't Shi Yu very strong in battle too? If he wanted to dual cultivate, it would be battle. Why was he here to study feeding?

At Demon Capital University, some of the attendees felt their balls hurt when they saw the names of Dr. Zuo Jiangyun and Xia Qingwei.

However, the changes in the audience couldn't affect Shi Yu, who was on the stage.

He looked at the entire venue and the judging table.

"Hello, everyone. I'm a student from Ancient Capital University, Shi Yu. Because of the speciality of the Green Silkworm, the evolution form of the Green Silkworm has also been a research topic that will never change in the Feeding World. And the result of the feeding we brought this time is the 'new evolution form of the Green Silkworm'. However, this evolution form might be a little different from the evolution form everyone knows."

Shi Yu smiled.

As soon as he finished speaking, the crowd was in an uproar. Good lord, what was Ancient Capital University doing?

"I'll get to the point then." Shi Yu wasn't a professional feeder. He only wanted to show the results quickly and create big news!

"Next, please look at our research results."

As soon as he finished speaking, Xia Qingwei, who was also wearing a research suit, went on stage.

"That guy... seems to be Dr. Zuo Jiangyun's daughter, a member of the Demon Capital University team, the one from the Feeding Department like me..." At the Imperial Capital University, Tang Yun saw Xia Qingwei and her memories were evoked. She looked at the Ancient Capital University team in confusion.

Like her, Professor Fang Lin and many others couldn't understand.

At this moment, a green worm followed Xia Qingwei onto the stage.

Looking at this green worm, everyone wanted to see what the Ancient Capital University was up to.

"This is a level-ten Awakening Green Silkworm with an expert level proficiency in worm silk. Its skill proficiency is at a stage that most Beast Tamers can reach," Shi Yu said slowly.

"According to the statistics, the Green Silkworm is the pet race that the Beast Tamers have contracted the most. This has to do with its huge number and evolution potential."

"Therefore, studying the evolution form of the Green Silkworm has become the mainstream topic in the Dong Huang Feeding World. Many feeders have taken a fancy to the two special characteristics of the Green Silkworm and hope to find a powerful evolution form suitable for the masses."

"However, because its racial skills are too difficult to increase and its race is weak, it requires many high-level materials to improve its talent. Therefore, there has been no amazing result in this research route."

“But now, we’ve finally found it. The evolution threshold is extremely low, but the evolution path of the races is very powerful!”

“Its birth will rewrite the layout of Dong Huang’s Beast Taming Domain!”

When Shi Yu finished speaking, many Beast Tamers widened their eyes.

What was he saying!

Everyone originally thought that Ancient Capital University had only accidentally discovered a new evolution model.

However, as Shi Yu finished speaking, everyone suddenly realized that Shi Yu’s description was extremely grand.

The evolution threshold that was suitable for the masses was extremely low, but it led to the evolved form of a very powerful Green Silkworm?

The Feeding World had studied it for decades but had yet to find a suitable evolution plan. Now, Shi Yu said that he had researched it?

“How is that possible?” On the display team of Imperial Capital University, a few students looked at Shi Yu in a daze.

Did he know what he was talking about?

If this was developed, the strategic value would probably be above the Battle Roar Fruit.

Apart from the audience, the three judges narrowed their eyes.

“Now, please bear witness to its evolution.”

As Shi Yu finished speaking, Xia Qingwei brought the Green Silkworm to the booth the next moment.

“Ji!”

After arriving at the exhibition stage and being watched by so many people, the green worm wasn’t nervous. It spat out the worm silk skillfully and started to turn into a cocoon!

Soon, an ordinary cocoon transformation was completed.

Everyone looked at the Green Silkworm cocoon on the display table and was a little confused. However, a moment later, everyone’s eyes widened.

That was because, without any external stimulation, the Green Silkworm that had just turned into a cocoon was suddenly filled with evolution light!

“Wait!”

“After the Green Silkworm turns into a cocoon, doesn’t it have to sleep for at least a few days and absorb the evolution power before breaking out of the cocoon to evolve?”

“Dr. Zuo’s Beast Taming Talent seems to be able to accelerate the growth of pets, including pets in the cocoon state...”

“The problem is that Dr. Zuo didn’t go on stage. The little girl up there didn’t touch this cocoon either!”

Seeing the suddenly evolved Green Silkworm cocoon, many people were stunned.

Everyone looked at the booth carefully.

At this moment, the evolution light lingering on the green worm’s cocoon had already disappeared.

The green worm’s new evolution form appeared in front of everyone.

At this moment, everyone’s expressions froze. This was because after the Green Silkworm’s cocoon evolved, after evolution... it seemed to have evolved into...

No matter how they looked at it, this thing was still a cocoon.

In the beginning, it might have been because of the distance, but in the next moment, as the green cocoon turned around and opened its huge eyes, the feeders present widened their eyes.

This wasn’t the end. After opening his eyes, Xia Qingwei directly took out a prop and raised it beside the green cocoon.

Then...

With a boom, the Green Silk cocoon was filled with Psychic waves. It used the Psychic impact to instantly penetrate the prop Xia Qingwei raised. Seeing this scene, many people suddenly stood up.

“Holy shit, the Green Silkworm’s cocoon woke up? No... it became a spirit? No, it, it woke up?”

“Moreover, this is... Psychic power???”

Many feeders revealed shocked expressions. Shi Yu slowly said, “This is one of the results of our feeding. It let the Green Silkworm evolve into the Green Silkworm cocoon and awaken new racial skills, Psychic power.”

Many people’s mouths opened slightly. Green Worm cocoon???

That worked?

It was indeed different from the evolution everyone imagined. No wonder Shi Yu said that it might go against everyone’s understanding!

Others evolved into butterflies, but what the hell was this cocoon?!

“Wait... Green Worm cocoon?!”

“I remember now. Previously, didn’t the officials announce a new Green Silkworm race called Green Silkworm cocoon!”

Some of the Beast Tamers present suddenly thought of something and spoke abruptly. They even thought of the Butterfly Meeting!

At this moment, Shi Yu continued, “The Green Silkworm cocoon is a transition race before the Green Silkworm turned into a butterfly. This race can effectively increase the potential heritage of the Green Silkworm after its evolution.”

“This is the key to the entire study.”

“However, this evolution won’t end here. Although it has evolved once and broken through to the transcendent level, the green cocoon can still continue to evolve like an ordinary cocoon!”

In order to respond to everyone, Xia Qingwei activated her growth talent and placed her hand on the green cocoon. A moment later, the green cocoon welcomed a second stage evolution again. A green silkworm suddenly evolved twice in front of everyone, making everyone a little confused.

Under the dazzling light of evolution, the cocoon underwent a huge change. With a boom, under the pressure of Psychic power, the cocoon directly exploded, turning into white silk that flew in all directions.

At the same time, a palm-sized butterfly with bright spots on its wings appeared in front of everyone. It broke out of the cocoon!

“What ~” The butterfly danced in the sky, and the spiritual powder around it scattered. Its posture was gorgeous. Its new appearance made many people open their mouths slightly.

At the same time.

On the screen, information about this butterfly appeared.

[Name]: Crystal Butterfly

[Attributes]: Spirit

[Race Level]: High Transcendent

[Race Skill]: Worm Silk, Psychic, Psychic Powder, Absolute Sleep

Energy Points: 574

[Evolution Materials Cost]: 100,000

At this moment, when they saw the information on this new species of butterfly, many Beast Tamers were stunned and widened their eyes.

Even Professor Fang Lin from Imperial Capital University was stunned.

100,000?

Were they seeing things?

“If I want the Green Silkworm to evolve into the Green Silkworm cocoon and then into the Crystal Thought Butterfly, the cost of evolution materials is about 100,000 yuan.”

“The requirement for the worm silk is only at expert level.”

“It can be exchanged for a pet of a high-level transcendent spiritual type. This pet grasps the all-purpose skill Psychic, a spiritual powder with extremely high tactical value and high medical value, and absolute sleep that greatly reduces the cost of cultivation.”

“They have three spiritual skills: low, medium, and high.”

Shi Yu's voice echoed in everyone's ears, shocking many.

It was really 100,000 yuan?

Was it 100,000 yuan?

Initially, they had thought that the battle roar would be shocking enough, but now, the 100,000 yuan Psychic Crystal Butterfly stunned them all at once. Unlike the battle roar that could only be used in war, the cost-effective ratio of the Psychic Crystal Butterfly was too high. Not only could Psychic power be used in battle, but it could also have a huge impact in many fields such as medicine. Apart from the extremely high tactical value, Psychic Powder was also a resource urgently needed in the medical field. Many anesthesia jobs needed Psychic Powder.

As for Absolute Sleep, there was even less to say. At the very least, the Beast Tamer's cost of cultivating the Crystal Butterfly had been halved, and the cultivation period had doubled. No wonder Shi Yu said that the evolution form he discovered was incomparably powerful.

Although it was just a high-level transcendent race, this was a racial form prepared for the public. Skill matching skills were the most important. Psychic power could be used to attack, defend, or even accelerate oneself. Psychic powder could also be sold for money, and Absolute Sleep could accelerate the cultivation cycle to reduce the burden of cultivation... In addition, this super low evolution threshold...

If there had been an evolution form like the Crystal Butterfly back then, Shi Yu wouldn't have to loan hundreds of thousands of yuan to buy the Iron-eating Beast. He could have raised the Green Silkworm and bought the evolution materials to fly faster.

At this moment, as the information of the Crystal Thought Butterfly was announced, many people took a deep breath and looked at the young man.

[But now, we've finally found it. The evolution threshold is extremely low, but the evolution path of the races is very powerful!]

[Its birth will rewrite the layout of Dong Huang's Beast Taming Domain!]

What Shi Yu said just now was all true.

If the purpose of the battle roar was to strengthen the existing Beast Tamer Troops...

Then, the birth of the Green Silkworm cocoon and the Crystal Thought Butterfly could make all of Dong Huang's citizens soldiers. Ten years later, everyone could be Beast Tamers!

After all, the number of Green Silkworms... was even more than humans.

Moreover, the battle roar could also be matched with the Crystal Butterfly!

At this moment, everyone at Imperial Capital University was shocked.

Was this still the Ancient Capital University that was useless apart from the archeology Department?

This was a discovery that could change the structure of Dong Huang's Beast Taming Domain better than the Battle Roar Fruit!

At this moment, many feeders were numb. First was Imperial Capital University, then Ancient Capital University. How were the people behind them supposed to go on stage now?

At Ancient Capital University, Principal Feng laughed out loud. Were they shocked? However, did they think that was it?

Legend Hua and Dr. Zuo also smiled.

At this moment, Shi Yu looked at the judging table.

On the judging table, the three top-notch feed masters also fell into a thought storm.

If the cultivation cost Shi Yu gave was real, then this time, it was really an incomparable big discovery.

Although it wasn't an innovation field, it was a huge innovation in the current situation!

"This result... I can give you full marks!"

Although he was a doctorate from the Imperial Capital University, at this moment, Dr. Lu Qi was completely stunned. The so-called racial levels of the Green Silkworm Cocoon and the Crystal Thought Butterfly were simply far inferior to the evolution form he had developed. However, at this moment, Dr. Lu Qi understood that his feeding results were nothing compared to this.

This was what one should pursue after entering chemistry. It made the most common pet evolve into the pet with the lowest threshold!

He didn't take the best pet and spend a lot of money to evolve into a stronger pet!

He looked at Shi Yu. Could a student develop such a result??

No wonder Dr. Zuo and Legend Hua were willing to support him.

However, he kept feeling that there was something he hadn't sensed.

Dr. Tian Xiu, who was beside him, was also confused for a moment because of this huge achievement. There was actually someone who really relied on the Green Silkworm's evolution to solve the greatest problem of ordinary people becoming professional Beast Tamers?

At this moment, Shi Yu said, "Thank you, Dr. Lu, but my display isn't over."

"This evolution only shows popularization and applicability."

"It's far from the potential. The Crystal Thought Butterfly is just the form that a silkworm with expert worm silk proficiency evolves into. What if the worm silk is at the perfect level of proficiency, or even the transcendent level of proficiency?"

At this moment, everyone was stunned again.

In the next moment, the two green cocoons were teleported to the display table by an unknown force.

It was still the green worm cocoon with big eyes!

Shi Yu said, "Next, everyone, please take a closer look."

“The one on the left is the green cocoon with the perfect proficiency worm silk.”

“The one on the right is the green cocoon with transcendent proficiency worm silk.”

“Now, they are about to evolve one by one.”

As soon as he finished speaking, Xia Qingwei, the insect obstetric Feeder, took a deep breath. She sucked in the sachet hanging from her neck and pressed her hands on the body of the green cocoon. Her growth talent was activated!!

In less than a minute, the length of the two green cocoons that had almost grown up increased again!

The next moment, the green cocoon with the Perfect Level Worm Silk on the left erupted with evolution light!

## **Chapter 212: Shi Yu's Dream**

It evolved again!

Under everyone's shocked expressions, with a boom, a white butterfly that was not much different from the previous Crystal Thought Butterfly broke out of the cocoon! Its white compound eyes became even larger, and the energy fluctuations all over its body became even stronger!

From the aura, it was much stronger than the previous one!

“This is...!”

On the big screen, the information on this evolution form was displayed.

[Name]: White-Eyed Butterfly

[Attributes]: Spirit

[Race Level]: Low-level Commander

[Level of Growth]: transcendent

[Race Skill]: Worm Silk, Psychic, Psychic Powder, Absolute Sleep, Super Sight

[Energy Points]: 1001

[Evolution Materials Cost]: 100,000

Everyone looked at the information and opened their mouths slightly again.

Looking at the unchanged “evolution materials cost” and “race level”, they opened their mouths and widened their eyes.

“As everyone has seen, the Green Silkworm will evolve into another kind of butterfly of a low class commander species by using the same evolution material under the silk of a perfect level proficiency worm.”

“The energy level has become even greater, and it has even awakened a new reconnaissance skill, super vision. I won’t explain much here.”

At this moment, let alone the Beast Tamers below, even the three judges were slightly shocked.

The evolution ingredient hadn’t changed. It was just that the worm silk proficiency had increased by one level, and it had evolved into a low class commander race?

The increase in evolution potential in the form of the green worm cocoon was much greater than they imagined! Unbelievable!

At this moment, the members on the display at Imperial Capital University were completely speechless. However, everyone realized that the matter didn’t seem to be over.

At this moment, the green cocoon on Xia Qingwei’s right also started to emit evolution light!

Everyone held their breaths and looked over.

In an instant, the cocoon also exploded with light, but the battle array was even greater.

The strong spiritual torrent seemed to have formed a storm around the cocoon. The air rumbled, as if it was undergoing a strong vibration. Ring after ring of spiritual fluctuations like waves came from the cocoon!

With a boom, under the lingering light of evolution, a huge butterfly half a meter in size rose and flew into the sky, humming softly.

“Nn ~”

It had a white body, an even larger white compound eye, and huge light green wings. On its wings, there were white star-like spots. The spots flickered and were very dazzling.

Sensing the spiritual deterrence emitted by this butterfly, many people looked at the screen nervously. As expected, new content appeared.

[Name]: White Star Butterfly

[Attributes]: Spirit

[Race Level]: Low-level Monarch

[Level of Growth]: transcendent

[Race Skill]: Worm Silk, Psychic, Psychic Powder, Absolute Sleep, Super Sight, Psychic Shock (Super Level)

[Energy Points]: 2989

[Evolution Materials Cost]: 100,000

At this moment, the entire place was incomparably quiet. There were only rapid breaths and low cries of disbelief.

How was this possible?

They... weren't seeing things, right?

Low-level monarch race???

This was not the key. The key was... the cost of the evolution materials!!

100,000!

It was still 100,000!!!

How was this possible!!!

The three judges also revealed shocked expressions.

Shi Yu coughed dryly and said, "As everyone has seen, with the same evolution materials, the green cocoon will evolve into the White Star Butterfly of a low-level monarch race. Well, I named all three of them."

"Now, everyone should know the effect of the Green Silkworm cocoon, this transition race, on the increase in the Green Silkworm's potential, right?"

"In addition, because it's conscious, the success rate of breaking out of the cocoon is very high... Up until now, from our research, it's still 100 %..."

Everyone didn't know what to say. They stood there numbly.

Although the possibility of the transcendent-level worm silk evolving into a monarch race had been verified by Dr. Zuo, that was using phoenix materials.

Right now, just 100,000 yuan of cheap materials had allowed it to evolve into a low-level monarch race?!

The form of the green worm cocoon = Phoenix Race materials?

White-Eyed Butterfly, White Star Butterfly!

This was the subsequent research results of Shi Yu and the others!

Although they had failed to join other materials to try and evolve them into a special green cocoon, the green cocoon that increased the proficiency of the worm silk gave them a huge surprise!

This directly proved the unparalleled potential of the green cocoon race.

It directly showed that this evolution plan was not only suitable for low-level Beast Tamers, but also for mid-level and upper-level Beast Tamers!

Was it difficult to reach perfection?

Of course it was difficult.

If one wanted to nurture it, the Beast Taming Space and high-level ruins of a legendary Beast Tamer were the premise.

Then, there had to be a green worm with extremely outstanding potential, one in a million.

In the end, it was possible to create a green worm that had mastered the proficient worm silk with the help of a skill teacher.

For ordinary people, it was extremely difficult.

But for the country, it was not difficult to put these conditions together. As long as there was cultivation value, large-scale feeding was simple!

In other words, at this moment, Shi Yu and the others had developed a very, very low evolution threshold, but it was extremely stable. It was the evolution channel of monarchs!

Although the lifespan of the White Star Butterfly was much lesser than other monarch races as a bug type, it was at least a monarch race!

Shi Yu continued to add, "Although I haven't researched it yet, there should be some connection between the Crystal Thought Butterfly, White-Eyed Butterfly, and White Star Flash Butterfly. Perhaps the Crystal Thought Butterfly can still evolve into the White-Eyed Butterfly, and the White-Eyed Butterfly can also evolve into the White Star Flash Butterfly..."

As Shi Yu finished speaking, the entire venue shook again.

Indeed.

It was completely possible.

After all, this was evolved from the same evolution materials.

If that was the case, didn't that mean that there was a certain possibility of a basic-level Beast Tamer growing into a master??

At that moment, all the feeders looked at Shi Yu with burning gazes.

It could already imagine how high this young man would stand in the Feeding World in the future.

Some feeders in the third bureau might not be famous in history, but Shi Yu definitely would be!

This was the result of feeding the country and the people!

"Is this a genius?"

Dr. Tian Xiu muttered.

Freak.

"A student like this should come to the capital to study the Feeding Department. I'm willing to teach him all my knowledge!"

Dr. Lu Qi widened his eyes and was so jealous that his teeth fell out. Damn, the Feeding Department of the Trash Ancient Capital University was worthy of such a student?

Was it appropriate to let a student carry the school?

He had already imagined how explosive the Feeding Department of Ancient Capital University would be next.

He was afraid that it would become a prestigious institute of the domestic Feeding Department.

“This kid...” Among the three judges present, only Ye Hui knew Shi Yu’s identity as Division 11. He took a deep breath. Damn it, damn it. He had originally had huge expectations for Shi Yu and the others’ feed results. Now, this outcome almost satisfied him to death.

Should it be said that Shi Yu was lucky or talented? If it was the latter, he really had great talent. Even if Shi Yu didn’t have special cultivation-type Beast Taming Talent, it was worth pulling Shi Yu to the third bureau to further his studies.

He believed that the other big bosses in the bureau wouldn’t reject such a cute newbie.

On the way to Imperial Capital University, the few members on display were completely speechless. In the end, Professor Fang Lin said, “It’s too ridiculous. Is this result really coming from a student? Is he really from the archeology Department?”

“...” Tang Yun didn’t know what to say next. She didn’t expect that the candidate Yin Zhengfan cared about was so ruthless.

Expert in battle, archeology, and Feeding?

“Professor, didn’t you say that a person’s energy is limited?” She looked at the professor.

Professor Fang: “You call that a person?”

Tang Yun was speechless.

Tang Yun had nothing to say. She looked at Shi Yu.

Originally, Imperial Capital University had gotten a 28.5 score. They should be happy now, but...

Forget it, they should be happy. After all, this feeding result could make huge contributions to Dong Huang.

But then again...

“He’s actually been studying the evolution of the Green Silkworm? In other words, he should have fallen behind in battle, right?”

“...Not only did Zhengfan contract another high-level monarch species pet, but he also used the Beast Taming Space to strengthen his talent, making the pet’s growth level ignore his own level and have a breakthrough. This talent gap shouldn’t be able to be closed, right...”

Although she was unwilling, she was still willing to believe what the professor said. There was a limit to a person’s energy.

It was impossible for Shi Yu to not miss anything while doing this crazy thing, right?

However, at this moment, just as everyone’s minds were numb, Shi Yu, this bastard, spoke again.

He said, “Next, I’ll show everyone the height of the green cocoon. Of course, I guess you could call it its potential.”

Everyone: “?”

Tang Yun:???

More??

He had already displayed the transcendent proficiency worm silk, what else was there?!

“Whether it’s the Crystal Butterfly, White-Eyed Butterfly, or the White Star Flash Butterfly, the evolution materials have never changed. However, what if other evolution materials are added?” Shi Yu chuckled.

He continued, “Although only one case has been researched so far, and it’s not replicable, this case should be able to confirm that apart from these three races, there’s also the possibility of the green cocoon evolving into another race!”

“Moreover, in theory, the more evolution materials there are, the greater the potential...”

Boom!!!

When Shi Yu finished speaking, the scene shook again. Everyone looked at Shi Yu.

Holy shit.

This kid was serious. Was he still not done?

“However, the Green Silkworm cocoon indeed has the possibility of evolving into other races. Have you all forgotten!!”

“Half a month ago, Divine Capital, Butterfly Meeting!!”

“Who still remembers the news at that time? It was after that incident that the form of the green worm cocoon was announced! Although there hasn’t been detailed racial information and there’s only one name, at that time... there was already a green worm cocoon.”

“The entire Butterfly Meeting is still presided over by Legend Hua.”

“Dr. Zuo’s daughter, Xia Qingwei, who is also the little girl on the display table, even evolved an Ice Phoenix Moth in that meeting.”

“But the limelight of that meeting was all taken by a strange cocoon...”

At this moment, someone couldn’t help but say.

Dr. Zuo, Legend Hua, Xia Qingwei, the Green Silkworm Cocoon, and all the hot topics related to the Butterfly Meeting were here.

They were all in this feed team.

Now, no matter how slow their reactions were, some people had already guessed something.

At that time, the only unknown information was who the owner of the green cocoon was.

Coupled with the configuration of this feed team, it seemed that the truth would be revealed soon.

On the display table, Shi Yu smiled at the informant. At this moment, another message appeared on the screen.

[Green Silkworm Overlord Race Evolution]

[Name]: Butterfly of Imagination

[Attributes]: Spirit, Space

[Race Level]: Medium overlord

As soon as the information was out, everyone was shocked.

They looked at Shi Yu in disbelief. Could it be...

At the same time, an extremely huge spatial ripple appeared in the sky behind Shi Yu.

A terrifying mental wave spread from it and turned into a blue airflow.

In the spatial ripples, a huge butterfly about three to four meters in size slowly appeared with a strong pressure.

It had an incomparably huge pair of wings. The entire surface of the wings was like white waves surging on the blue sea. The color and patterns were very spectacular, like a piece of art!

At this moment, a string of beautiful white halos embedded at the edge of the huge butterfly's blue sky-like wing shone. It was very dazzling and gorgeous, and there was even a strong pressure from an overlord race sweeping in all directions. The moment it appeared, the three little butterflies that had evolved just now lingered around it like its subjects and danced.

At this moment, it really shocked most people speechless. At least half of the 2,000 people in the audience suddenly stood up and looked at this butterfly in disbelief.

A... butterfly?

The overlord butterfly born in the Butterfly Meeting half a month ago?

They looked at Shi Yu and recalled the information about the Green Worm cocoon and the entire Feeding Team. Their voices were hoarse and they couldn't say a word.

So... the Butterfly of Imagination, the Beast Tamer of an overlord species pet... was the Shi Yu in front of him?? And not some legend?

How was that possible!

As if to confirm people's guess, the Butterfly of Imagination slowly shrank and landed on Shi Yu's shoulder.

This scene made the eyes of Tang Yun, a member of the Imperial Capital University battle club, explode...

That huge mental power just now... was definitely... definitely commander rank!

Overlord race, commander rank! How was this possible!

The opponent Yin Zhengfan had always wanted to defeat was this guy?

Overlord race???

In the entire Imperial Capital's big school team, only the captain had an overlord race pet. How was this Shi Yu owning one!!

A middle-level overlord race... This huge racial advantage made Tang Yun understand that if the race level didn't meet the standard, no pet in the commander rank would be a match for this butterfly!

Tang Yun opened her mouth slightly and felt a little nervous.

[Listen to me, don't, fight him!]

[That kid is not human!]

[Remember, don't fight him.]

Thinking of her cousin's reminder, Tang Yun suddenly understood what it meant. She couldn't help but stand up, scaring the professor beside her.

"Professor, he is indeed not human." Tang Yun muttered.

Zhengfan should maybe stop fighting this year? She was afraid his mentality would collapse. In any case, she had already collapsed.

"..."

"...I know," Professor Fang said.

Everyone looked at the arena again. They never expected the truth to be like this... It wasn't scientific, but it was reasonable. With this, everyone immediately knew what was going on with this luxurious configuration.

Damn, it was Dr. Zuo and Legend Hua who came to cozy up to Shi Yu? Forget it, it still didn't make sense!

"I'm done showing," Shi Yu said.

On the exhibition stage, Xia Qingwei took a deep breath and pretended to be calm. He felt that Shiyu had overdone it this time. Below, Legend Hua, Dr. Zuo, Principal Feng, and the others knew why Shiyu was so ruthless... Who would have thought that everything today came from him wanting a bottle of some soil of time?

No one else would have expected this.

"I understand..."

On the judging table, President Ye Hui also took a deep breath.

"Green Worm cocoon, Thought Crystal Butterfly, White-Eyed Butterfly, White Star Flash Butterfly, Imagination Butterfly..."

"You have perfectly proven the limitless potential of the green worm cocoon form."

“Impressive.”

He looked at the two Feeding Masters on the left and right, as if he felt that there was no need to discuss at all.

If not for the fact that the highest score was only 30 points.

They even wanted to give him a higher score!

Unsurprisingly, under the stunned expressions of everyone, Shi Yu’s team obtained a perfect score of 30 points!

This was the first time in nearly three years that a full score had appeared in the Feeding Conference!

At this moment, when he saw full marks, Shi Yu smiled. Alright, the soil of time is his!

When the others saw Shi Yu’s smile, they felt their hair stand on end. They felt that this young man was too sick. He had developed such a terrifying outcome and even contracted an overlord race pet. Was he trying to defy the heavens?

If they were totems, they would definitely shout, “This child can’t be left alive!”

Therefore, was there any suspense in the first place in this meeting?

Everyone was silent. They felt that the next participants were going to be fighting for second place.

The conference had just begun, and there was no suspense in the outcome.

Before long, all the students from Imperial Capital University, who had just obtained good results, sat down like salted fish.

If nothing went wrong, from here to the capital, the country would be shocked again.

After the evaluation ended, President Ye Hui’s love for talent appeared. He smiled at Shi Yu and said, “Let me ask you something off-topic.”

“How did you come about studying the evolution of the Green Silkworm?”

Xia Qing’s weak eyes lit up.

She knew this question, the soil of time!

At the booth, Shi Yu said seriously, “I graduated from the Feeding Department in high school. I’ve been very passionate about Feeding research since I was young.”

“After graduation, I even studied the internship experience of the Green Silkworm for three months.”

“Becoming a Beast Tamer and an archeologist is something that will happen later. My greatest dream is to be a legendary Feeder.”

Principal Feng, Legend Hua, Doctor Zuo, Xia Qingwei:???

Tang Yun:???

Everyone: “?”

What high school's Feeding Department could nurture such a monster!

[The principal of Shi Yu's high school in Icefield City, and the person in charge of the breeding base in Icefield City: "???" ]

"Very good." The eyes of the third member, Ye Hui, lit up.

He didn't expect Shi Yu to have such an experience.

Wasn't this a natural feeder?

Why did Bureau 11 intercept it?

Damn it!

Logically speaking, the telepathy talent was first a cultivation talent, followed by an archeological talent!

He thought for a moment. Shi Yu was clearly more suitable for the third bureau.

They wanted this person for the third bureau!

### **Chapter 213: An Appointment Battle From Yin Zhengfan**

A moment later, Shi Yu went down.

With his full marks, he went down.

Xia Qingwei, the Crystal Thought Butterfly, the White-Eyed Butterfly, and the White Star Butterfly followed behind silently.

After Shi Yu went down for a long time, the audience was still in shock and had yet to recover.

Various discussions about the results of Ancient Capital University's feed kept coming. People expressed their complicated feelings to each other.

On the display team of Imperial Capital University, student Du Yan muttered, "Is this research result really so smooth?"

The evolution forms of transcendent races to overlord races were displayed one by one. Please be a human.

Guo Mingrui, a student from the same team, said, "My girlfriend has always wanted a butterfly-type pet... I think this White Star Butterfly is pretty good."

"It's just that transcendent-level worm silk isn't easy to deal with..."

A Green Silkworm with transcendent worm silk was even rarer than a cub of a monarch species.

The lifespan of the Green Silkworm for one or two years did not give the Feeder many opportunities to nurture it at all.

Next, they could only see if the country would take out a high-level ruins space and invite a professional teaching team to train the Green Silkworms together.

If it could form a Feeding Chain, then they still had a chance to do this.

However, the price probably wouldn't be cheap either. Even if a Green Silkworm cub that had mastered the transcendent worm silk was cheaper than a monarch species cub in the future, it wouldn't be cheap.

After all, there was a chance to nurture it with various top-notch cultivation methods for more than a year. Even Dr. Zuo's research institute didn't nurture more than five in a year.

The venue fee for the high-level ruins cultivation space, the manual fee for the skill teacher, and the nutrition fee for the Green Silkworm...

Ignoring everything else, just the basic annual salary of a skill teacher of this level couldn't be less than a million.

This was still not prepared for low-level Beast Tamers. The Crystal Thought Butterfly was.

Moreover, if it became commonplace, such a Green Silkworm would definitely not be sold, but armed with the Beast Tamer Troops first.

"Why don't we do a White-Eyed Butterfly first? What if we study it and develop a way to evolve into a White Star Butterfly?" Jiang Tong from Imperial Capital University suggested.

They had already defected. One was thinking about other people's pets, and the other was thinking about other people's research content.

Professor Fang Lin's mouth twitched.

This was already flat-out admitting defeat, although they had indeed lost.

Guo Mingrui: "Not really... She definitely won't want the White-Eyed Butterfly."

"Low-level commander races aren't that low. If I can't figure out anything, at most, I'll break the contract in the future and switch."

"That's not the problem." Guo Mingrui turned around and said, "The name of the White-Eyed Butterfly is too ugly. My girlfriend definitely can't accept it..."

Everyone : "..."

At this moment, everyone in the Feeding Conference venue was discussing the green worm cocoon and Shi Yu.

At this moment, Shi Yu had already returned to his seat.

"Next, Dong Huang's Beast Taming Domain is about to open a new chapter."

After Shi Yu sat down, Dr. Zuo smiled and said, "If nothing goes wrong, the Beast Tamer Association, the Beast Tamer Troops, the third bureau, and the Feeding Association will definitely invest in establishing a huge Green Silkworm Breeding Base."

“When the time comes...”

Shi Yu exclaimed and said, “It shouldn’t be my problem anymore, right? You guys can do it.”

Everyone: “?”

Xia Qingwei said, “Don’t you want to become a legendary Feeder?”

This was definitely a national level project!

Shi Yu: “That’s a dream. It’s something to talk about. I have a lot of dreams, such as legendary Mechanic, legendary Dragon Tamer... But the energy of humans is limited.”

Everyone: “?”

Shi Yu looked serious and felt that what he said made sense.

He only wanted to increase his strength quickly.

In this world, one’s own strength was the foundation of everything.

Only with strength could he do all kinds of things he wanted to do.

With his current strength and horizons, his transmigration, the connection between Earth and Blue Planet, the myth of the Beast Taming Era... It was all filled with various mysteries.

But what if he was a legendary Beast Tamer, or even a mythical Beast Tamer?

At that time, most of the fog in front of him would disperse on its own.

At that time, the Mythical Ruins, Totem Ruins, restricted areas, and Moon Palace Ruins were all like a backyard. He could go as he pleased, unlike now, when he held the key to the Mythical Ruins left behind by the Shi Emperor but didn’t dare to look for it.

“You still think you’re human?”

Doctor Zuo, Legend Hua felt his teeth hurt.

Moreover, this guy wanted to be a Legendary Mechanic?

It was fine if he wanted to be a legendary feeder or archeologist, the threshold was not high.

However, being a Mechanic was not easy. The threshold was higher than any class.

Contracting a mechanical pet was different from becoming a Mechanic.

Only Beast Tamers who cultivated and upgraded their mechanical pets could be considered Mechanics.

The kind that spent money to find people to upgrade mechanical lives was not recognized as orthodox.

“Cough, which team is the next display team?” Shi Yu asked.

He quickly changed the topic.

“Some research institute that studies breeding,” Dr. Zuo sighed.

At the moment.

The Feeding Conference was still ongoing.

The third team to go on stage was actually the three-eyed human team Shi Yu had seen at the buffet restaurant.

The other party wasn't from a business or school, but a famous biological feed research institute.

And their products were "high-level pet fertility medicine"...

As the name suggested, it was a medicine that increased the pregnancy and reproduction rate of pets above commander races.

Of course, it was definitely effective with transcendent races that were relatively difficult to breed.

The Iron-eating Beast would be overjoyed.

This was also a relatively mainstream research content.

The higher the species level, the harder it was to reproduce.

For example, overlord races were basically single handedly passed down. They could only give birth to one child in their lifetime, and it still depended on luck.

Moreover, some overlord races were too special. They were the only race in the world, and they were also reproductive apart from other similar races, so it was possible that they would directly become extinct.

This was also why no country had a stable channel for overlord race breeding.

They could only rely on luck to occasionally evolve into a few overlord races that couldn't be replicated.

"Birth support medicine..."

"It's indeed a good study..."

However, Shi Yu thought about his Eleven. It shouldn't be a problem. He probably didn't need it.

Although the breeding of the Iron-eating Beasts was relatively difficult, it was definitely relatively stable. Otherwise, the ancient times wouldn't have bothered with the Nine Li Battle Beast Corps.

Moreover, Shi Yu felt that his Eleven was a steel bear. Love would only affect its training speed.

Although Eleven didn't have to worry, Buggy... Buggy..?!

Ah, Buggy!!!

What had he evolved into? It felt a little dangerous.

There was no other Butterfly of Imagination...

Could it reproduce normally with other butterflies?

Shi Yu fell into deep thought.

[Buggy: ???]

As for plant-type pets like Baby Ginseng, it was actually alright.

Plant-type pets could reproduce by themselves.

However, in most cases, breeding descendants would cause one to die or decrease in level. Their strength would decrease greatly, such as the Tree of Life. Only after death could new seeds be born.

As for undead and elemental pets, the difficulty of breeding was the highest. Therefore, such pets were very rare in nature. To date, feeders had yet to solve the mystery of the birth and breeding of undead and elemental pets.

As for mechanical pets, they were even more unsolvable. They weren't capable of breeding their own descendants.

"Forget it, why should I worry about them? It's as if I'm talking like Beast Tamers are prone to having children when their levels are high."

Shi Yu listened to the effect of the pregnancy supplement with interest.

The products of this biological feed research team had been modified on the original fertility medicine. There was a higher chance for the pet to inherit the talent potential of its parents. However, following that, a pile of dense experimental data made Shi Yu's head hurt.

At this moment, Shi Yu suddenly received a message.

White Brook: "Is the Feeding Conference going smoothly?"

[We plan to visit the various training facilities of Imperial Capital University first. The battle exchange will be in two days. You can participate in the conference in peace. When the time comes, we'll rely on you here.]

"Wu..."

He was going to take a look today?

Shi Yu looked around and glanced at the message before thinking.

The first place of the Feeding Conference should be stable. There was no point in continuing to watch here. After all, these guys only announced the results and didn't showcase any secrets. It was useless to watch it. It was better to do something else.

He heard that Imperial Capital University had time and space related training venues?

Didn't that mean that there should still be time-element pets?

The foundation of Imperial Capital University far exceeded that of Ancient Capital University. It should have.

It was worth worshipping.

“Aunt Hua, Aunt Zuo, I have something to do. I’m leaving first. Call me if there’s anything,” Shi Yu said to Legend Hua and Dr. Zuo.

“What are you doing?” Legend Hua asked in confusion.

“Senior Bai asked me to look for her after presenting.” Shi Yu chuckled and said, “I don’t know what it is either...”

“That little girl with the Fusion Talent?” Legend Hua came to a realization and nodded. “She’s also in the capital.”

“Yes.” Shi Yu said simply and left.

“This child...” Dr. Zuo shook her head.

As she watched Shi Yu leave, Dr. Zuo looked at Xia Qingwei, who was watching the competition, and sighed.

At the same time, at the Imperial Capital University’s display team.

Tang Yun also felt that it was boring here.

She recalled what Hong Xiao had said to her.

Shi Yu should also be in the Ancient Capital University exchange team this time.

If that was the case, Yin Zhengfan would definitely be able to come into contact with Shi Yu next.

They could definitely meet at the exchange event in two days...

To Yin Zhengfan, after working hard for so long, this was originally a very good opportunity to defeat a strong opponent...

However, if he worked hard and couldn’t defeat the target he wanted to catch up to, that would be a little impactful.

“Compared to letting Zhengfan know after the battle, why don’t... tell him about the situation here first.”

“Yes.”

Tang Yun decided to go back to school at noon today and talk to Yin Zhengfan about everything here.

At the same time, she would also tell her teammates in the battle club to take this new student seriously.

He felt that Shi Yu would definitely be a variable in the exchange between the two schools.

Generally, in this kind of activity, with a master-level student and monarch-level pet wouldn’t be published. The commotion was too big.

It was basically for ordinary members to communicate with each other, which was to say, high-level Beast Tamers.

At this level, everyone had a commander rank pet.

It was nothing in the first place.

However, how could a Beast Tamer with a middle-level overlord race and a commander-level pet suddenly appear in Ancient Capital University?

At this species level, his energy might have reached 100,000. Ordinary monarch species and commander ranks were only half of what he had. There was no way to fight at all.

Shi Yu undoubtedly had the strength of a quasi-master.

Even in the Imperial Capital University's battle club, there weren't many who could defeat Shi Yu. There were only a few.

At least, she, an ordinary member of the battle club, had no confidence.

Because she had come into contact with overlord races, she knew very well that overlord races and monarch races were already two different domains. Under the same level, there was no way to do a comparison between a tiger and a cat.

She probably could only rely on the quasi masters in the school team.

Although they didn't have any overlord species pets, they had many monarch species pets in their hands. They also had various abnormal battle-type talent. Moreover, every pet could take charge alone.

In comparison, she didn't believe that Shi Yu's other pets were also so strong, reaching the overlord race.

"Four months ago, he was clearly a junior Beast Tamer like Zheng Fan."

"How did you become a high-level Beast Tamer with a commander-level pet in just four months..."

Four months. High-level Beast Tamer and an overlord race pet. This was already ridiculous enough. She didn't believe that there was anything more ridiculous.

She sighed and decided to immediately slip away after the morning segment ended and return to the battle club.

At this moment... Shi Yu had already slipped away and headed straight for Imperial Capital University.

...

At Imperial Capital University.

Just like Ancient Capital University, it was like a school city.

Such a huge school, apart from some teaching areas and training areas, other places were allowed for visitation.

As for the teaching area and training area, they would probably have to wait for the opening day or use connections before they could visit.

However, if it was an exchange team from other top universities coming to exchange and learn, there would basically be no problem.

At that moment, not long after arriving at the capital, White Brook brought the elites of the Ancient Capital University's battle club to the Imperial Capital University, planning to visit their school first.

"I came here once four years ago. It's changed so much now. It's completely different from what I remember." In the team of 18 led by White Brook, a tall girl with long hair looked at the huge and tall school gate of Imperial Capital University's South District.

The vice president, Xu Ze, chuckled. "Don't talk about the school. The various facilities in Imperial Capital University are upgraded every year. What you're seeing now is already several updates from four years ago."

"Holy shit." Upon hearing the vice president's words, the other dozen or so people were jealous.

"President, how often does our school's training facilities change?" They looked at President White Brook.

"After we entered school, the training facilities have not changed."

White Brook frowned and said, "The training facilities aren't broken yet. Why would we start updating? Can you handle the current training facilities without pressure?"

"If you want new facilities, you can get first place in the National League. Ancient Capital University can also update every year."

She said, "If it was Teacher He, he would definitely say so. You also know that our Ancient Capital University is poorer than the Imperial Capital University. If you want good facilities, you can only rely on yourself to fight for them."

Everyone cried. It was too real.

Although, even if they were given the same school resources, they didn't have the confidence to defeat the students of Imperial Capital University.

The resources in the school were equal. If the talent and family background were inferior, it would be a waste.

"Sigh ~" Everyone sighed. Just as everyone from Ancient Capital University was about to go to the school gate to register and exchange learning information, White Brook's phone rang.

White Brook saw the caller and curiously picked up the phone.

"How are things on your side?" she asked.

"I'm done. Where are you? I'll go find you," Shi Yu asked.

He also wanted to visit the training facilities and even replicate a time skill. What if the ginseng baby had a chance to learn it after using the Time Soil to evolve?

White Brook : "..."

So fast?

Didn't the Feeding Conference last two days?

"We're at the south school gate, we haven't entered..."

"Wait for me," Shi Yu said.

After Shi Yu finished speaking, both parties hung up. White Brook looked at the many members and shrugged. "Let's register first and wait for Shi Yu at the door. He'll come over later."

"Oh, oh, oh ~?" Everyone was stunned. Was Little Monster Shi Yu coming too?

They had all seen Shi Yu vs Fu Andi and had been brainwashed by White Brook for a long time. Now, they were looking forward to Shi Yu, a new student, sweeping through Imperial Capital University.

White Brook smiled. Everyone continued to head to the registration office of Imperial Capital University. But at this time, on the campus, a 12 or 13-year-old youth was walking towards them.

Yin Zhengfan, who was preparing to go out for a meal, was stunned when he saw this group of people.

He met White Brook's gaze.

Yin Zhengfan had visited Ancient Capital University before, so he naturally knew the president of the Ancient Capital University's battle club.

And the people from the battle club of Ancient Capital University also knew this legendary Yin's genius son.

"Yin Zhengfan?" White Brook was slightly surprised to see this child.

"Senior White Brook..." Yin Zhengfan was stunned for a moment before quickly saying politely. The exchange battle would begin in two days. He didn't expect Ancient Capital University to come now.

But soon, he looked at the team of Ancient Capital University.

When he saw faces and didn't discover Shi Yu among them, his expression changed slightly.

"Well, Senior White Brook, didn't Shi Yu join the battle club? Or did he not come this time..."

Yin Zhengfan felt that Shi Yu was so strong. Even if he chose another specialization, there was no reason for him to give up fighting.

Battle power was the foundation of a Beast Tamer, and the battle club, school team, and National League were definitely the best place to train college students as Beast Tamers.

"Are you talking about Shi Yu?" White Brook asked.

"He's here too, but it'll take a while."

"Really?" Yin Zhengfan's eyes suddenly lit up, and countless battle intent surged in his heart. Shi Yu definitely couldn't imagine how much progress he had made during this period.

Immediately, Yin Zhengfan wasn't hungry anymore and decided to wait for Shi Yu here.

“Excuse me, can I wait for him with you? I want to fight a Beast Taming battle with Shi Yu!” As a reserve member of the battle club, he was only an audience member for the exchange two days later, so it didn’t matter if he waited for that day. If possible, he wanted to fight Shi Yu now.

“Uh.” As soon as Yin Zhengfan finished speaking, many students from Ancient Capital University had strange expressions.

There had long been rumors that Legend Yin’s son... had come to Imperial Capital University alone to study because he had lost to Shi Yu in the vocation assessment and was only a runner-up.

As expected, the rumors were true.

However... Why did it feel that this would be an inspirational but sad story?

## **Chapter 214: Chi Tong Battle**

Outside the capital’s main school.

The students of Ancient Capital University looked at Yin Zhengfan silently.

The atmosphere made Yin Zhengfan feel that something was wrong.

White Brook said, “Challenge Shi Yu?”

“I don’t think so.”

Although she had brought Shi Yu here to sweep through Imperial Capital University...

Generally speaking, Yin Zhengfan was also a member of Imperial Capital University.

However, it was too cruel to start with a child.

Although Yin Zhengfan was a genius, with his age placed here, winning was meaningless.

“Shi Yu has become very strong now...”

The elders in White Brook’s family also knew Yin Legend. She felt that there was no need to let Yin Zhengfan get burned.

Therefore, she tried to persuade her with a smile.

“Has he become very strong?”

When Yin Zhengfan heard that, he looked like he had expected it.

It was abnormal for a person like Shi Yu to stop.

He was already prepared that Shi Yu’s Iron-eating Beast had already evolved into the Nine Li Battle Beast of a monarch race.

He was already prepared for Shi Yu's Green Silkworm to evolve into a pseudo monarch race that was not inferior to the Space Crystal Butterfly.

But even so, he was not afraid at all.

He was no longer the Yin Zhengfan from four months ago.

Just as Yin Zhengrong said, with the Beast Taming Space strengthening talent, the more resources there were, the stronger it was.

Compared to the vocation assessment, Yin Zhengfan had already started to develop the power of his talent.

After university, his Beast Taming Space broke through to level three and he became an intermediate Beast Tamer.

Originally, the upper limit of a normal intermediate-level Beast Tamer's contracted pet was three. The upper limit of his pets' growth level was also transcendent.

However, due to Yin Zhengfan's Beast Taming Space strengthening talent, the upper limit of his current contracted pet had reached six, twice that of a Beast Tamer of the same level!

The upper limit of his pets' growth level was not as simple as transcendent level, but commander level.

This was the power of the Beast Taming Space's strengthening talent.

Now, Yin Zhengfan had already contracted four pets, and two of them had even broken through to the commander rank.

This change in strength made Yin Zhengfan's confidence increase greatly.

Not only was his strength one of the best among the new students of Imperial Capital University, but he could also fight against some older students.

Even the team leader of the Imperial Capital University, the powerful man who had led Imperial Capital University to win the national championship, praised his progress and hard work, as well as acknowledged his current strength. Yin Zhengfan felt that the current Shi Yu was definitely not his match.

Because the current Shi Yu definitely couldn't have a commander rank pet.

"It's alright, because I've become stronger too."

Yin Zhengfan looked at White Brook seriously and revealed a confident expression.

He was already a little glad to have come to Imperial Capital University.

Because after coming here, he realized that there were even geniuses stronger than Shi Yu.

This atmosphere was spurring his growth at all times.

Ancient Capital University, ranked sixth in the National League, was completely different from the first ranked Imperial Capital University in terms of battle strength.

“Uh.”

“Why aren’t you listening?”

At this moment, everyone from Ancient Capital University didn’t know what to say.

After all, they couldn’t expose Shi Yu’s information to the enemy school now, right?

“What are you doing? Why are you all gathered here?”

At this moment, a voice sounded.

Shi Yu’s arrival was faster than everyone imagined.

At this moment, Shi Yu arrived at Imperial Capital University without even changing his research clothes.

Shi Yu’s voice sounded, and everyone turned to look at him.

Yin Zhengfan also looked over.

After he saw Shi Yu, Shi Yu’s gaze also landed on Yin Zhengfan.

“Shi Yu...” Yin Zhengfan opened his mouth slightly.

“Uh, Yin Zhengfan?” Shi Yu discovered Yin Zhengfan from the crowd and immediately revealed a shocked expression.

“Why are you here?”

White Brook: “He’s waiting for you.”

“Waiting for me?”

“Yes, yes.” The seniors of Ancient Capital University nodded.

“Why are you waiting for me?” Shi Yu was stunned.

“Shi Yu, can you fight me?”

“I heard from Senior White Brook that you’ve become much stronger.”

“And I’m no longer the same me as before.”

“I’m really happy to see you in the exchange team of Ancient Capital University.”

Yin Zhengfan looked at Shi Yu with a burning gaze and said, “Actually, ever since the vocation assessment ended, I’ve been thinking about when I can surpass you. For this, I came to Imperial Capital University to study. I hope to use the pressure here to grow quickly.”

“Now, I think I already have the strength to surpass you.”

Shi Yu opened his mouth slightly and looked at Yin Zhengfan.

“Can I?” Yin Zhengfan said in anticipation, afraid that Shi Yu would refuse.

“Imperial Capital University has a special battlefield,” he said. “Please.”

“Are you sure? You definitely can’t defeat me.” Shi Yu was speechless.

“It’s only been four months, and you want to surpass me?”

“I’m serious,” Yin Zhengfan said. “I’m also very surprised that I can improve so much in four months.”

“Are you willing to fight and see? Don’t tell me you’re afraid?” Because Yin Zhengfan, being a little cutie, was too anxious... He actually used reverse psychology.

“This... Alright then,” Shi Yu couldn’t withstand Yin Zhengfan’s yearning gaze and replied helplessly.

Sigh, children had a strong desire to win.

Forget it, it was fine even if they fought.

In Shi Yu’s opinion, no matter how much Yin Zhengfan improved, it was impossible for him to be stronger than his current self.

Otherwise, Eleven, Buggy, and the others could find a random Slime and kill themselves.

Shi Yu would also kill himself from the guilt of letting down the resources he had used.

Alright, then he wanted to see how much Yin Zhengfan had improved during this period.

“Ah, do you want to fight?”

“Fight now?”

As Shi Yu and Yin Zhengfan spoke, the students from Ancient Capital University were shocked.

It wasn’t the time for the exchange between the two schools yet.

Although Yin Zhengfan didn’t seem to be an official member of the battle club at Imperial Capital University... There was no need to care about this, was it really alright for Shi Yu to make a move now?

“It’s alright, it’s a simple exchange.” Shi Yu didn’t plan on sending the main force.

“Then I’ll bring you to the battlefield.” Yin Zhengfan couldn’t wait.

“Follow me.” With that, he wanted to lead the way.

“Alright.” Shi Yu nodded and followed behind Yin Zhengfan.

The other students of Ancient Capital University looked at each other.

Damn.

It was over.

Another teenager was going to lose his dream.

They could still remember the collapsed expression of that glorious Beast Tamer from Rongguang.

“Cough, let’s go take a look too.”

“Let’s go together.”

“Watch?? We haven’t registered at the school yet. Come with me after registering. Let them go over first,” White Brook said angrily.

...

At the third battle hall of Imperial Capital University.

It was still very lively around noon.

Shi Yu followed Yin Zhengfan over.

After arriving, Shi Yu was immediately stunned.

Damn it, not only was this university’s battlefield hall more luxurious than Ancient Capital University, but it also looked more luxurious than the venues for the Ancient Capital vocation assessment and vocation promotion assessment!

After entering the venue, the huge venue was divided into several areas. Each area had a huge screen.

On the screen, the names, levels, and current progress of the pets on both sides appeared to be very high-level.

“Over here,” Yin Zhengfan said to Shi Yu.

At this moment, about six to seven of the twenty venues in the venue were being used, but there were quite a lot of onlookers.

Yin Zhengfan brought Shi Yu to an empty venue. During this process, Shi Yu and the others bumped into a young man.

“Yo, isn’t this Zhengfan?” The hedgehog-headed young man saw Yin Zhengfan and greeted with a smile.

“Senior Zhang,” Yin Zhengfan said in surprise.

“A fight?” Senior Zhang said with a smile. He looked at Shi Yu, who was wearing a white coat behind Yin Zhengfan...

He didn’t know him...

“This is?”

Were they students from the Feeding Department, Research Department, or Medical Department?

He subconsciously treated Shi Yu as a student from Imperial Capital University. It was Yin Zhengfan who pulled him in for the battle.

“Ancient Capital University, Shi Yu.” Shi Yu smiled and introduced himself. “I came with the Ancient Capital University exchange team this time.”

After he introduced himself, Senior Zhang was stunned.

Holy shit.

Ancient Capital University’s exchange team?

Why did he come here to fight Yin Zhengfan?

What was going on? What was going on?

"We're friends. I invited him to battle," Yin Zhengfan said.

"This is Senior Zhang Yiming from the Battle Club of Imperial Capital University." With that said, he introduced him to Shi Yu.

"Hello, Senior Zhang," Shi Yu said with a smile. From the battle club of Imperial Capital University?

An opponent in two days?

"Hello." Zhang Yiming was stunned and nodded. He kept feeling that the name Shi Yu was a little familiar.

He thought about it carefully and his expression changed slightly.

Because a little genius Yin Zhengfan came, the members of the battle club of Imperial Capital University had some understanding of the vocation assessment in Ancient Capital.

Among them, many students still had some impression of Shi Yu, who had defeated Yin Zhengfan and was bestowed the title of Iron-eating Beast Knight and discovered the evolution of the Iron-eating Beast.

After Senior Zhang Yiming recalled for a moment, he said in surprise, "You're the top scholar of the Ancient Capital vocation assessment this year, Shi Yu?"

After asking, he quickly looked at Yin Zhengfan.

"That's right, it's me." Shi Yu nodded.

Yin Zhengfan nodded too.

In an instant, Zhang Yiming's expression was rich. Good lord.

It was no secret that Yin Zhengfan had lost to Shi Yu before. Tang Yun knew, and so did Zhang Yiming. Seeing Yin Zhengfan suddenly dragging Shi Yu to Imperial Capital University to fight in the battlefield hall, he instantly imagined countless scenes of love and murder.

He had just thought that Shi Yu was the main force of the Ancient Capital University's exchange team. It turned out that he was a new student from Ancient Capital University who had come to broaden his horizons.

Interesting...

"I'll be your judge. How about that?"

Out of curiosity about the Iron-eating Beast Knight, Zhang Yiming recommended himself.

He was very curious about what kind of Beast Tamer had defeated the little genius of Imperial Capital University, Yin Zhengfan.

He was even more curious about the strength of the new students brought by the Ancient Capital University's exchange team. Was it comparable to the reserve members of the Imperial Capital University team?

"Really? Then thank you, Senior," Yin Zhengfan said.

This saved him the trouble of looking for other judges.

"It's no big deal. Junior Zhengfan, Student Shi Yu, come on." Zhang Yiming chuckled and casually looked at the arena beside him. "Let's go to venue 11."

Shi Yu : "..."

"No problem." Yin Zhengfan nodded.

Imperial Capital University, battlefield hall 3, venue 11.

After stepping onto the arena, Zhang Yiming licked his lips and continued to climb onto the judge's platform. He sat on it and activated the battle facilities.

The next moment, the big screen in front of the battlefield lit up. He said to Yin Zhengfan and Shi Yu below, "What are the rules?"

Shi Yu looked at Yin Zhengfan and said, "You decide."

Yin Zhengfan thought for a moment and said, "Well, have you advanced to intermediate Beast Tamer?"

Shi Yu smiled. "What do you think?"

"I advanced to an intermediate Beast Tamer three months ago." Shi Yu said.

Shi Yu advanced once more half a month ago...

Yin Zhengfan showed an "as expected" expression and said, "Then you should also have contracted a third pet."

"Yes." Shi Yu nodded.

"How about a 3VS3 solo?" Yin Zhengfan asked.

"Sure." Shi Yu nodded again.

Zhang Yiming heard the rest of the words. 3VS3 solo. Alright, the settings were completed.

At this moment, looking at Shi Yu, Yin Zhengfan took a deep breath and said, "Then I'll go to the red side."

With that, he walked towards the red safety area of the huge arena.

Shi Yu took a look and walked towards the blue safe area behind.

A moment later, Shi Yu and Yin Zhengfan stood on both sides of the arena.

At the same time, the commotion here also gradually attracted the surrounding students of the Imperial Capital University, making them look over.

“Eh, isn’t that Yin Legend’s son?”

“The youngest member of the battle club, Yin Zhengfan.”

“He’s here to fight.”

Yin Zhengfan was also a famous figure in Imperial Capital University. As they discovered that he had come here to battle, many Beast Tamers in the battlefield hall were attracted.

“Who’s fighting Yin Zhengfan?”

“I don’t know, but that person on the judge’s seat is Senior Zhang from the battle club?”

Amidst the commotion, many people came over.

At this moment, Yin Zhengfan and Shi Yu had already summoned their pets under Zhang Yiming’s instructions.

Hu hu hu ~ ~

As the two of them activated the Beast Taming Space, a strong wind rose, and countless light spots flickered on the arena.

The light dots quickly connected into a trajectory, forming a huge circular array that looked like a star map.

On Yin Zhengfan’s side, there was a pure white summoning array. On the array, a huge lizard-like creature made of yellow sand, three meters tall, covered in black patterns, appeared. It looked like a two-legged creature. Sand ropes made of yellow sand surrounded it, and its pitch-black sunken eyes were filled with ferocity.

“Roar!!” The giant beast roared.

At this moment, the screen on the battlefield, under the red team lineup, had already displayed the pet’s profile picture and information.

[Race Name]: Desert Lord

[Level of Growth]: transcendent

[Energy Points]: 5940

Seeing this pet, many people exclaimed.

Although the information displayed on the battle screen was very simple, everyone knew what kind of creature it was.

Element!

High-level monarch race!

The monarch of the desert!

It was an absolutely powerful top-grade pet in the earth element.

Yin Zhengfan was young, and as an intermediate Beast Tamer, he had contracted such a top-notch pet. Countless people were envious.

“I remember that Junior Yin’s trump card pet is the Zonyan Rock Beast.”

“Another monarch pet?”

“It’s good to be rich.”

“What’s the opponent’s pet?”

Seeing Yin Zhengfan’s pet, everyone started to pay attention to Shi Yu.

As the attention arrived, soon, everyone’s gazes changed in unison, including Zhang Yiming, Yin Zhengfan, and everyone around the venue.

Especially Yin Zhengfan and Zhang Yiming, they looked at Shi Yu’s summoning array in disbelief.

It was a summoning array filled with a faint green light. It floated in the air like that. Seeing the color of this summoning array, Yin Zhengfan’s eyes widened in confusion.

Colorless, gray, white, green, blue, purple... The green summoning pattern was ranked fourth, corresponding to... high-level Beast Tamer...

Looking at the summoning array that was one level higher than his own level and sensing the powerful energy fluctuations coming from inside, Yin Zhengfan looked at Shi Yu in disbelief.

“Aren’t you an intermediate Beast Tamer...”

“I became an intermediate Beast Tamer three months ago. Half a month ago, I accidentally broke through to advanced again.” Shi Yu chuckled.

Yin Zhengfan: “?”

Zhang Yiming: “?”

“How is that possible?” Yin Zhengfan shook his head suddenly.

Although his Beast Taming Space was more difficult to cultivate than the Beast Taming Space of ordinary Beast Tamers, it didn’t make sense for Shi Yu to exceed his level in the same cultivation time.

After all, more than 99% of university graduates, including students from Imperial Capital University, were only high-level Beast Tamers when they graduated.

In an instant, Yin Zhengfan’s heart was in chaos. He couldn’t understand Shi Yu’s improvement speed.

“What are you...” Yin Zhengfan looked at Shi Yu.

He realized that Shi Yu was still so sick. It didn’t make sense!

However, he didn’t give up.

Although he was only an intermediate Beast Tamer, due to his special talent, he also had commander-level pets like high-level Beast Tamers. It was just that he didn’t directly send them out!

At most, he would change pets now!

“Don’t worry, I also summoned a transcendent pet,” Shi Yu said when he saw Yin Zhengfan’s angry expression.

This boy really didn’t even know his own situation and came to challenge blindly.

“You sent out a transcendent? Not a commander rank?” Yin Zhengfan was stunned.

At this moment, a red light flashed from the inside of Shi Yu’s summoning array. In the next moment, a red sword spirit wrapped in red flames flew out.

Little Chi Tong was overjoyed. After all, this was the first time Shi Yu had called it out to battle a Beast Tamer.

Boom!

The moment it appeared, the desert monarch opposite instantly felt a burning heat sweep over.

Moreover, the Sword Spirit itself was like a terrifying heat source, spreading strong heat waves like a continuous volcano eruption.

In an instant, Yin Zhengfan and the desert monarch’s expressions changed. They sensed the terrifying power of their opponent head-on.

“Roar!!!”

The desert monarch roared. It felt that the power on the other side was at least twice its own.

Yin Zhengfan’s gaze was extremely solemn. “You... call this transcendent?”

However, at this moment, Chi Tong’s level was really displayed on the battle screen.

[Race Name]: Sword Spirit (No detailed classification information for now)

[Level of Growth]: transcendent

[Energy Points]: 11808

Well... although the total energy of the little sword spirit was high, its quality had yet to reach the commander rank standard, so such a strange value appeared in front of him.

“Look at the battle screen if you don’t believe me,” Shi Yu said.

Everyone looked over.

Transcendent... Energy Points... 11808...

Yin Zhengfan: “?”

Everyone: w(◡◡)w

Damn, what the f\*ck?

At this moment, Yin Zhengfan revealed an incredulous expression again.

At the judge's seat, Senior Zhang Yiming from the Battle Club of Imperial Capital University was also shocked, his gaze incredulous.

"What the hell?"

Shi Yu, this new student's Beast Taming level, had reached level four. This already shocked him greatly and made him unable to understand.

At this moment, the pet Shi Yu summoned made him lose his ability to think.

Transcendent-level... more than 10,000 energy points?

Was he joking around?! 10,000, this was the standard for commander ranks of transcendent races!!

This guy was trying to say that this transcendent pet has reached the energy value of a commander-level pet??

## **Chapter 215: Fan Fan Who Doubted Life**

At this moment, Yin Zhengfan and everyone felt that it was extremely ridiculous.

"Is the machine malfunctioning?"

Zhang Yiming quickly checked the machine in front of him.

The battle facilities of Imperial Capital University were all high-tech and had their own energy detection function. However, as long as it was an instrument, there would be a malfunction. At this moment, Zhang Yiming suspected that the machine was malfunctioning. Otherwise, how could this value be possible?

Either the growth level displayed a mistake, or it should be commander rank, or the energy level displayed a mistake. It should be just in the thousands.

"This, what's going on!!"

At this moment, not only Yin Zhengfan and Zhang Yiming, but the students from the Imperial Capital University below also looked at the little sword spirit's growth level and energy level in a daze.

BUG?

Even if it was an ordinary overlord race at the transcendent level, its energy value would only be 6,000. This sword spirit was more than 10,000. How could that be!

This was a Mythical race?

"Wait a minute, I'll check the machine," he said.

However, after checking for a long time, Zhang Yiming still didn't find any problems with the machine.

At this moment, facing Shi Yu and the sword spirit, Yin Zhengfan was actually a little flustered for a moment. He didn't understand what was going on.

He should have had the absolute advantage, but the sudden high-level Beast Tamer and the unbelievable 10,000 energy points transcendent-level sword spirit directly couldn't sit right with Yin Zhengfan.

"Stop checking. This machine isn't malfunctioning. It's the same as my index value. It's very precise."

"It's just that my pet race's potential is too strong..."

Shi Yu stopped Senior Zhang. Senior Zhang was stunned. Everyone was stunned.

Human language?

Yin Zhengfan stood uneasily.

It was definitely not human language!

"Aren't you going to do it? Or do you plan to change pets?" Shi Yu said.

Little Chi Tong was already the weakest pet in his team.

It belonged to the kind of little guy who couldn't even last one round against the other three.

Of course, this was because it was only at the transcendent level, and its skill proficiency was not high.

However, if Shi Yu, who had the current legendary physique, fused with the transcendent-level little sword spirit, he could still barely resist Eleven, Baby Ginseng, and the others who didn't go full rampage on him.

"I'll fight!" Yin Zhengfan gritted his teeth.

"Sand, Absolute Erosion!"

In the face of Shi Yu's question, Yin Zhengfan revealed an indignant expression and immediately issued an order.

He wouldn't admit defeat!

Absolute Corrosion, earth-element super skill!

Creating a huge sandstorm, making it swallow enemies like a tsunami. The corrosive power contained in the sandstorm could erode all powers, having the terrifying effect of drying up energy, solidifying things and turning them to sand.

When developed to the extreme, it could instantly turn a town into a desert.

Boom!!!

At the moment, although the desert monarch had only mastered entry-level Absolute Corrosion, it already had powerful strength.

“Roar!!!” The three-meter-tall desert monarch roared, and the yellow sand on its body vibrated. In an instant, a huge sand sea that was six to seven meters tall surged behind it, and like a tsunami, it swallowed the little fire sword spirit floating in the air less than a meter away.

“It’s... the great earth-element skill, Absolute Corrosion!”

Everyone looked at the venue. It was huge right from the start. Looks like the ridiculous data of the sword spirit opposite made Yin Zhengfan feel immense pressure.

“Mi ~”

At this moment, Little Chi Tong was still very excited and had yet to recover.

“Be serious. Sun Flame, Light Flame Sword.”

Shi Yu said.

“Mi ~!”

Little Chi Tong expressed his understanding and turned to the huge sand sea that surged over. Endless flames gathered on the sword.

At this moment, the terrifying power fluctuations made the sand sea slightly deform, making the expressions of the desert monarch and Yin Zhengfan on the other side solemn.

No matter what the machine’s status was, this huge energy was definitely real.

Buzz...

As Shi Yu gave the order, Chi Tong looked like it was wrapped in sun flames. Flames covered the blade and the tip of the sword.

Super skill, Sun Flame!

It was a type of special flame!

An extremely powerful Sun Flame.

Using Yang Flame to cast the high-level skill, Light Flame Sword, instantly made Little Chi Tong explode with powerful strength.

Boom!!!

Countless people who were looking at the venue felt that the light in front of them was instantly snatched away, and the world seemed to have fallen into darkness.

At this moment, the desert monarch felt it the most. It felt a strong threat, and its body seemed to have fallen into darkness.

But in the next moment, killing intent overflowed.

A terrifying Sun Fireball fell from the sky. It was a sword light. A Yang Flame Sword flash that seemed to have broken through the darkness streaked across, turning into a terrifying fire sword aura that tore apart the sand sea.

When everyone reacted, the huge absolute erosion had already stopped in front of Little Chi Tong. A huge hole had already appeared in the sand that was flowing like a tsunami. Moreover, the entire sand sea was instantly wrapped in orange flames and disappeared in the blink of an eye!

At this moment, behind the sand sea, behind the huge hole, a painful roar instantly erupted.

“Roar!!!” The desert monarch looked at the sword scar that had appeared on its body at some point in time. It lowered its head to look at the sword scar that was filled with strong flames and howled in pain. In an instant, its entire body erupted, and yellow sand fell from its body!

“Roar!!!”

As if it was sand roasted by the sun, the temperature of the desert monarch’s body instantly rose to the limit, making it feel so painful that it wanted to die. Its consciousness gradually fainted.

A moment later, it finally couldn’t take it anymore and collapsed.

Boom!!!

The high-level monarch race, transcendent-level desert monarch, was directly killed by Chi Tong’s sword.

As the desert monarch fell to the ground, Yin Zhengfan didn’t react at all.

Speed was the special thing about the Light Flame Sword.

With Sun Flame as the power source, it was absolute speed.

At this moment, the desert monarch fell to the ground. Yin Zhengfan was stunned, and his mind suddenly froze. He took a step back.

Everyone opened their mouths wide and looked at everything in confusion.

“Wait...”

“What happened?”

“In an instant...”

Everyone was shocked.

He recalled what Shi Yu had said just now.

At this moment, no one suspected that it was a transcendent race, commander rank.

Such a skill was undoubtedly a super skill.

So, it was really a high-level race, transcendent level?

This couldn’t be the sword spirit of a f\*cking overlord race, right? Moreover, it was the kind with a ridiculously high race, not even a low-level overlord.

Otherwise, it was impossible for it to have 10,000 energy points at the transcendent level!!!

“Super skill, monarch... no, overlord race?”

“How is that possible? Overlords aren’t common. Quasi overlord?”

At this moment, everything shocked everyone. Judge Zhang Yiming was stunned.

He looked at the absent-minded Yin Zhengfan and thought to himself that this was bad.

“Mi ~!” Only Little Chi Tong cheered happily.

“Ah, I’m late.”

At this moment, nearly 20 people rushed over from the side of the venue. They looked at the fallen desert monarch and the little sword spirit that was already floating in the air. They were first stunned before looking at the battle screen.

Among these 20 people, White Brook revealed a helpless expression. So it did happen.

At this moment, in the judge’s seat, Zhang Yiming’s expression changed when he saw White Brook and the others. He suddenly felt that something was wrong.

Holy shit, why were all the members from Ancient Capital University here?

He couldn’t figure out what was going on.

The other students from the Imperial Capital University also looked at this group of people who had suddenly come.

In an instant, the atmosphere of the battlefield hall was especially heavy.

In the arena, Shi Yu looked at the stunned Yin Zhengfan and said, “Little Fanfan, I knew you couldn’t defeat me.”

On the other side, Yin Zhengfan was silent.

After recovering from his daze, he looked at the info. Transcendent level. The number of 10,000 energy points was very incomprehensible.

Why... Why was this happening? He didn’t understand!

“Who said so?” A moment later, Yin Zhengfan looked at Shi Yu with firm eyes.

Light lingered on the ground as he directly recalled the desert monarch.

“I’ll definitely win.”

“It’s not over yet. Don’t forget, I have the Beast Taming Space strengthening talent.”

With that, Yin Zhengfan forcefully forgot everything and started to summon new pets. He planned to not think about those unscientific things first and fight with all his might!

“Roar!!!”

In order to answer Yin Zhengfan’s heart, in the next moment, a four-meter-tall rock creature that looked like a two-legged dinosaur appeared and let out a roar filled with battle intent!!

Most of its body was covered in sharp chestnut rocks. It had strong limbs and a tail!

On its neck was a ring of sharp rock that looked like a scarf.!!

It was Yin Zhengfan's Zonyan Rock Beast.

At the same time, on the battle screen, the desert monarch's profile picture dimmed, revealing new information.

[Race Name]: Zonyan Rock Beast

[Level of Growth]: Commander Level

[Energy Points]: 50,113

"Roar!!!" The moment the Zonyan Rock Beast appeared, lava began to flow out of the Zonyan Rock on its neck, releasing a scorching aura that was even greater than the energy on the little sword spirit.

It looked at Little Chi Tong and Shi Yu with an unfriendly expression.

When enemies met, their eyes were especially red.

Yin Zhengfan took a deep breath and looked at Shi Yu, temporarily ignoring the unscientific sword spirit.

This sword spirit... Even if it was ridiculous, no matter what, it was only at the transcendent level. It was only ten thousand energy points.

Then, as long as he sent out a commander rank pet.

"It's not over yet. Change your commander rank pet."

"You're a high-level Beast Tamer. You should have a commander-level pet, right?"

Yin Zhengfan took a deep breath and realized that this sword spirit couldn't change anything.

It would be fine as long as he defeated Shi Yu's commander rank pet.

"Kid, you're really stubborn." Shi Yu thought to himself and looked at Little Chi Tong. The other party's Zonyan Rock Beast... Chi Tong had possessed him and he felt like could fight.

And the chances of winning were not low.

However, considering that the red-haired Chi Tong's posture was too high-profile, and that he didn't know if the rules here allowed Beast Tamers to go on stage, he sighed...

"Alright." According to Yin Zhengfan's request, Shi Yu began to retract Chi Tong and summon a new pet.

"Mi???? (This is it...)"

As Shi Yu's voice fell, Little Chi Tong's figure began to disappear from the ground. At the same time, a new array appeared.

In the next moment, a small pet less than 0.3 meters walked out of the green array.

"Yiya."

When this pet appeared and sensed the hot aura of the arena, it frowned and snorted before looking at its opponent.

Where was the opponent?

Baby Ginseng raised its gaze.

“Yiya, Yiya, Yi!” It was extremely domineering.

It was so domineering that the entire place became extremely quiet.

Everyone: “?”

Yin Zhengfan and the Zonyan Rock Beast’s expressions changed.

Zhang Yiming’s expression also changed.

Baby Ginseng?

What a joke!

Using a ginseng baby to fight a Zonyan Rock Beast?

Was he crazy?

“It’s also very strong,” Shi Yu explained again when he realized Yin Zhengfan’s incomprehensible gaze.

“Holy shit.”

Only the people from Ancient Capital University and the others knew the strength of this ginseng baby. However, even they were completely stunned when they looked at the huge battle screen.

Soon, others also saw the information displayed on the huge screen.

[Race Name]: Ginseng Baby

[Level of Growth]: Commander Level

[Energy Points]: 10,3006...

100,000!

The huge number stunned everyone.

Including the seniors from Ancient Capital University. They knew that this ginseng baby was very strong, but... they didn’t expect it to be so ridiculously strong.

Even an overlord race, commander rank, didn’t have this energy value!!!

“Impossible.”

“This is definitely impossible!!”

The judge, Zhang Yiming, stood up and looked at the machine in confusion. So, the machine was definitely broken. It was indeed broken.

“100,000?”

“1, 2, 3, 4, 5, 6... Damn, it’s a six-digit number.”

“What’s going on?”

“Is this scientific?”

“Quasi monarch-level ginseng baby??”

In the arena, Yin Zhengfan was confused. He also took a look at the battle screen. With this look, his gaze instantly became absent-minded again.

It felt that it was even more unscientific than seeing the transcendent sword spirit with 10,000 energy points just now.

Baby Ginseng, wasn’t it a transcendent race?

Wasn’t the energy value of a transcendent race and commander rank less than 20,000?

Even if the ginseng baby race was more energetic, but... but...

Yin Zhengfan stared at the battle screen blankly and suddenly shook his head, rubbing his eyes.

The Zonyan Rock Beast also turned around and counted the energy level. Then, it was stunned on the spot halfway through.

This little guy in front of him had twice its energy?

“Stop looking. Its energy value is indeed 100,000,” Shi Yu said.

“100,000?” Yin Zhengfan asked with a panting tone.

“Yi!” Baby Ginseng nodded. It was average, third in the team.

100,000?!

At this moment, Yin Zhengfan looked at the little ginseng baby and at the big Zonyan Rock Beast. Compared to their race level, his mind was in a mess. He started to doubt his life and couldn’t understand until his worldview started to collapse... He knew very well what he had done these four months, but what exactly had happened to Shi Yu these four months!!

...

At the same time.

Tang Yun, a member of the Imperial Capital University team, successfully slipped out of the venue.

Her face was red and she was a little nervous.

Professor Fang Lin was too difficult to deal with. She had to coax and coax for a long time before she successfully escaped.

Next, it was time to do business.

Go to school and pass the information!

“Alright, I’ve successfully escaped. Now, I’ll go to the battle club to find Zhengfan and tell him about Shi Yu and the Butterfly of Imagination!”

“We can’t fight him. That butterfly is too scary.”

...

## **Chapter 216: Good News and Bad News**

At the battlefield hall of Imperial Capital University.

At this moment, the crowd was extremely restless.

A ginseng baby with 100,000 energy points...

Energy was equivalent to the mana bar of a skill in the game.

It determined the power of a single skill and the number of times it could be released.

Under normal circumstances, it was bound to the race level and growth level.

The level corresponded to the energy. This was scientific common sense.

Generally speaking, pets of overlord races only had an average of eight to 100,000 energy points at the commander level.

A little less meant that this pet was not cultivated well. Its growth and skill training were not very good.

Higher meant that this pet was outstanding.

The top students of Imperial Capital University could understand.

However, they couldn’t understand why a ginseng baby that was clearly a transcendent race could have energy values that surpassed overlord races at the commander rank.

Although it could strengthen energy points by training oneself and raising skills, it wasn’t that there were no channels to increase energy. It wasn’t a fixed value. It wasn’t that it couldn’t break the racial restrictions, but...

But it was precisely because of this that everyone was shocked. What kind of cultivation and tragic training did this ginseng baby undergo to have such an energy value?

It had cultivated his racial skills to perfection?

Three meals a day using heavenly treasures?

Even so, it still didn’t make sense.

“This... is this the main point?”

“The point is that the race of the ginseng baby doesn’t seem to have any offensive skills.”

“Moreover, the difficulty of learning offensive skills for supplement-type pets is 100 times higher than for battle pets. It’s almost impossible for them to be proficient...”

“Under such circumstances, Yin Zhengfan’s opponent still chose to send this ginseng baby. Don’t tell me that this ginseng baby also has battle power.”

After being shocked by the energy situation of this ginseng baby, suddenly, many Imperial Capital University students discovered a blind spot.

Baby Ginseng was a supplement-type pet.

No matter how much energy there was, it couldn’t be converted into battle power. Instead, it could only be converted into a nourishing recovery effect!

However, Shi Yu still sent Baby Ginseng. They suddenly felt that things were starting to develop in a strange direction.

“Hehe.”

Listening to everyone’s discussion, the members of Ancient Capital University gave them a “you guys know very well” look.

Right, what was even more unscientific was yet to come!

In the arena, Yin Zhengfan’s expression was solemn to the extreme at this moment, his heart thumping.

He had also thought of what the others had thought.

However, before seeing the truth, everyone wanted to not believe him.

“I don’t believe you,” he said stubbornly.

Even if he had already realized something, it still chose to fight.

“Roar!!”

Under Yin Zhengfan’s command, the Zonyan Rock Beast’s mouth condensed a brown rock glow. It was ready to attack!!

“Buzz!” A thick brown pillar of light shot out, and countless flying rocks swept towards Baby Ginseng opposite!

High-level earth-element skill, Rock Roar Cannon!

This attack was powerful. From the scale, it seemed like the aftermath alone could devour the ginseng baby.

“Yi.” But on the other hand, Baby Ginseng didn’t mind when it saw this move.

It didn’t even have the intention to dodge.

Boom!

For a moment, rocks flew and wild winds surged!

The Rock Roar Cannon directly hit Baby Ginseng. In an instant, a terrifying energy explosion stunned everyone.

Although there were no problems with the venue because of the high-level material, the violent storm and rocks still swallowed Baby Ginseng's tiny figure in an instant.

"Holy shit."

This scene made everyone a little confused.

The members of Ancient Capital University were actually equally confused.

From what they knew, this ginseng baby had mastered the "Energy Fruit", a nutrient that could explode, and the light-element unique skill, "Light Clearing Cannon". These were all powerful skills.

However, why didn't Baby Ginseng choose to counterattack but to take the other party's skill head-on!

Only Yin Zhengfan and the Zonyan Rock Beast's hearts skipped a beat.

Yin Zhengfan knew Shi Yu very well. He felt that... things were definitely not that simple.

"The smoke is so big, it can't be uninjured, right..." A bespectacled male student said, "After all... there's the law in anime where there's smoke without injury..."

At this moment, everyone looked at the venue in a daze. Then, their eyes nearly popped out.

As the smoke from the Rock Roar Cannon dissipated, Baby Ginseng was still standing there, looking as if nothing had happened.

It was really not injured at all!

At this moment, Yin Zhengfan's expression was almost dark to the extreme. The Zonyan Rock Beast also couldn't believe it.

"Roar!!!"

"Yiya."

Baby Ginseng was rooted in the ground, and its brown hardening power covered its entire body, as if it was wearing Earth armor. Its expression was calm.

Strengthening, a skill that combined plant power and earth power, could make the plant body hard as a rock.

Shi Yu had long upgraded this move to perfection. When it was activated, it was equivalent to temporarily turning Baby Ginseng into an earth-element creature. It had an extremely strong defense.

If that was all, it would be fine. In addition, Baby Ginseng's racial skill, Earth Chain, was at the "Dao Proficiency" level. It could also instantly mobilize the earth power dozens of meters deep underground for itself...

This already involved the initial use of nature's power.

Its current hardened weapon was much more resistant to attacks than Eleven's hardened weapon.

At the moment, it was impossible for the Zonyan Rock Beast's Rock Roar Cannon to break through the defense energy double that of his, and it was even relying on the natural power of the earth.

And the most despairing thing was that even if the Zonyan Rock Beast broke through its defense, it was still a superficial wound for Baby Ginseng.

Because after its slow healing and high-speed healing were maxed out, together with the source of life of the super skill, Baby Ginseng almost had the ability to instantly regrow broken limbs.

Baby Ginseng usually studied the anti-eleven Energy Bomb Fruit and the Anti-Buggy Energy Bomb Fruit. Once it accidentally blew up its arms and legs, its body could recover easily.

This incomparable defense and incomparable recovery power had already become a small monster in Shi Yu's team.

After the next move, Baby Ginseng looked at the Zonyan Rock Beast.

It was time for it to counterattack.

Then, Baby Ginseng simply stretched out its palm.

In the next moment, a brown seed condensed in its palm.

Nutrition!

After integrating its earth and wood power into the nutrients, the ginseng baby took root in the ground and activated "lushness" and "solidification".

In the blink of an eye, Baby Ginseng's palm that was holding the seed directly emitted light, and thick tree branches filled the sky!

The tree branches seemed to have formed a sea of trees that instantly swallowed the huge Zonyan Rock Beast.

"What is this!!!"

Yin Zhengfan was shocked, and everyone's expressions changed. They couldn't understand this skill at all. This skill scared the Zonyan Rock Beast into hurriedly resisting.

"Roar!!!"

In an instant, scorching magma erupted from the Zonyan Rock Beast's body, turning into countless fireballs that smashed into the sea of trees.

Boom!!!

The sea of trees attacked, but unfortunately, when the lava eruption that should have been extremely terrifying touched the sea of trees, it was like the water of a tap rushing to the stone surface, not leaving much impact.

The sea of trees directly resisted the magma and tied up the huge Zonyan Rock Beast. There was still surging magma flowing on it, but it couldn't burn these solid tree branches.

Nutrition+Earth Chain+Improvement+Multiplication. All four skills were above transcendent. The other two were Dao Proficiency. The profundities formed by these skills were completely incomparable to the entry-level Lava Explosion of the Zonyan Rock Beast.

"Profundity, Burial of the Tree Sea."

Shi Yu said. It was not the profundity formed by the four skills, but five. The moment the Zonyan Rock Beast was bound by the indestructible tree branches, small energy fruits began to be born on the pile of tree branches. These energy fruits that were born from absorbing the power of the tree sea were the final unique skill.

After they exploded, everything would be buried.

"Roar!!!!"

At this moment, the Zonyan Rock Beast struggled crazily from the tree branches all over its body. It felt as if it was bound by steel bars, and it watched helplessly as the tree branches bore fruits with strong threat.

The energy emitted by these fruits made the Zonyan Rock Beast panic.

In the blink of an eye, the grape-sized Energy Fruits flickered, as if it was about to bloom.

At this moment, the Zonyan Rock Beast's gaze exploded to the extreme. Yin Zhengfan's expression also changed drastically until he heard Shi Yu's voice.

"Retract your pet."

Upon hearing Shi Yu's voice, Yin Zhengfan suddenly woke up and hurriedly retracted his Zonyan Rock Beast.

At the same time, the profundity released by Baby Ginseng's palm, the Burial of the Tree, completely erupted at this moment...

With a bang, a terrifying energy swept through the entire place.

Cracks started to spread on the ground like broken glass.

The arena rumbled. The energy shield protecting the arena also appeared like rolling seawater at this moment. Countless dazzling white lights shone on the entire arena. The violent airflow fiercely stimulated Yin Zhengfan's nerves, making his heart pound.

Boom!

A moment later, everyone's ears buzzed.

The power of the Burial of Trees directly made Senior Zhang Yiming, who was the judge, stand up. He looked at the situation in the arena and felt his heart bleed.

A strong wind swept past, and the Zonyan Rock Beast was no longer in the arena. Only Baby Ginseng was still standing there.

At this moment, Yin Zhengfan's expression was already completely stunned.

"How can this be..."

He instantly understood the insurmountable gap between him and Shi Yu.

He had a confused expression, unable to understand why the difference between him and Shi Yu had become greater and greater after four months of hard work.

That attack just now...

Yin Zhengfan's body trembled.

If all of them hit the Zonyan Rock Beast, there was no doubt that the Zonyan Rock Beast would instantly be heavily injured and suffer damage stronger than the desert monarch... Because of that, Shi Yu reminded him to retract his pet.

And his sharp instincts also made Yin Zhengfan choose to listen to advice.

Next, there was only one Space Crystal Butterfly left... However, at this moment, Yin Zhengfan was completely not confident that he could defeat this ginseng baby with the Space Crystal Butterfly.

The strength of this ginseng baby directly penetrated his understanding.

Including Imperial Capital University and Ancient Capital University, all the students opened their mouths wide as they watched everything.

They couldn't understand it. They couldn't understand it at all.

This was a f\*cking ginseng baby???

What was that just now!

Ridiculous!! Baby Ginseng's palm directly drilled out of a large forest. The trees could ignore the magma and even explode??

"Ancient Capital University, what do you mean?"

At this moment, Zhang Yiming, who was in the judge's seat, was stunned when he saw all of this. Shi Yu's strength was too ridiculous. Even he wasn't his match.

At this moment, after seeing the Ancient Capital University exchange team led by White Brook appear, Zhang Yiming directly felt that they had come with ill intentions.

Could it be that from today onwards, Ancient Capital University was going to challenge them?

How dare they?

"What do we mean? We registered. We're here to visit the school today."

White Brook looked over. Because of her white tiger pet, her voice was especially deterring. It had the deterrence effect of being the king of all beasts, immediately making Zhang Yiming speechless.

Ancient Capital University?

At the same time, the surrounding Imperial Capital University students finally understood the identity of this group of people who had suddenly arrived.

In an instant, their expressions turned hostile.

On the venue.

Shi Yu and Yin Zhengfan looked at each other.

Yin Zhengfan's arm and clenched fist trembled slightly. He looked at Shi Yu and was silent for a long time before saying indignantly, "I... I admit defeat."

He didn't know how to continue fighting. If not for Shi Yu's reminder just now, the Zonyan Rock Beast would definitely have been heavily injured. He had already lost completely.

"Don't be so serious. Victory and defeat is common in war," Shi Yu immediately said when he saw Yin Zhengfan's face fall again.

"A loss is a loss." Yin Zhengfan couldn't accept it. He had clearly come to Imperial Capital University to broaden his horizons and seen many geniuses who should have been stronger than Shi Yu, so why... He didn't understand where he was lacking.

It turned out that it was true that Shi Yu said that he couldn't defeat him now.

"Thank you for fighting me. I won't be so reckless next time. Well, I'll leave first." Yin Zhengfan bowed at Shi Yu. His anxious mood of wanting to fight Shi Yu at the start had completely turned cold at this moment.

As he had yet to eat lunch, Yin Zhengfan was even more dizzy. After saying that, he turned around weakly and wanted to leave.

This scene stunned Senior Zhang Yiming, who was watching from the judge's seat, and also made White Brook and the others secretly shake their heads. Sigh, that was why they said not to fight Shi Yu. Damn it, their group of alumni didn't know why this university ginseng who often attended classes was so strong.

Damn it, could it be that the overlord cat had given Baby Ginseng special treatment?!

The students of Ancient Capital University were suddenly shocked. After all, someone often saw Baby Ginseng and the overlord cat of Ancient Capital University appear together.

"Alright." Shi Yu pondered for a moment. Seeing Yin Zhengfan leave, he also shook his head and took back the excited baby ginseng. He helplessly got off the stage and came to White Brook and the others.

He had a premonition... that Yin Zhengfan wouldn't give up so easily. After knowing his strength, the salted fish eyes of Yu Shu and the others didn't appear on Zhengfan. Shi Yu felt that Yin Zhengfan didn't seem to have admitted defeat yet.

"It's over just like that? I haven't announced the results yet. Can you guys respect the judge a little?" At this moment, the most stunned person was Senior Zhang Yiming. He stood in the judge's seat in a daze and suddenly looked at Shi Yu.

Seeing Shi Yu and White Brook meet up, Zhang Yiming was at a loss. The corners of his mouth twitched as he took out his cell phone and planned to ask for help. He felt that he couldn't hold on alone here.

Ancient Capital University definitely didn't have good intentions.

On the other side, Yin Zhengfan pushed through the crowd and wanted to go to the lounge to lie down for a while. At this moment, his cell phone rang.

Yin Zhengfan looked at Tang Yun's name on the screen with dim eyes and chose to answer.

"Senior, what's the matter?"

"Zhengfan, where are you? Have you eaten? Why don't we go together at noon?"

"I... don't have an appetite." Yin Zhengfan was silent.

"But I have very important news to tell you in person."

Yin Zhengfan : "..."

"Why aren't you saying anything?? Alright, alright, it's the same over the phone. That Shi Yu seems to have really come to Imperial Capital University."

"I... I already know."

"What, you know?"

At the door of Imperial Capital University, Tang Yun was stunned. "That's fine too, but, um, there's something else I need to tell you."

"That Shi Yu is much stronger than during the vocation assessment. I saw his pet, I feel that..." Tang Yun didn't know how to describe it.

She was thinking of a way to let Yin Zhengfan understand that he might not be able to defeat Shi Yu now.

"Senior, there's no need to say anymore."

"...Well, I've already fought Shi Yu." Yin Zhengfan's tone was low as he said, "I'm sorry, I was reckless this time. I didn't recognize the difference and challenged blindly. I... lost, I lost very badly."

Just as they entered Imperial Capital University, Tang Yun was stunned when she heard the weak voice on the other side of the phone. Her mouth fell open.

"Wh, when did this happen?"

"Just now."

Tang Yun's heart skipped a beat. She looked in the direction of the Feeding Conference in disbelief. Shi Yu wasn't there??

Why, why did he suddenly come to Imperial Capital University and even finish fighting Yin Zhengfan??

This didn't make sense.

Wasn't the exchange event two days later? She clearly came after the competition ended in the morning.

What exactly happened...

"Senior, don't worry. I can take the blow."

Although Yin Zhengfan's expression was a little dim, he didn't despair. This was because he had indeed seen many more monstrous geniuses in Imperial Capital University.

For example, the current captain of the big school in the capital was a complete monster.

Because of his family's influence, he could write online gaming hack codes at the age of 12.

After awakening the Beast Taming Talent at the age of 13, he directly created a virtual life and used it to invade the school's Internet, the Internet of nearby companies, and the Internet system of the Beast Tamer Association... It shocked the entire association.

This was because he had the same "Awakening" talent as the Mechanic ancestor. He could upgrade the Internet data program to a virtual life form and create mechanical creatures.

As expected, this person was secretly cultivated by the association. He only appeared again a few years later and started university life.

Yin Zhengfan was extremely respectful towards this captain of the Imperial Capital's big school. This was because even his father, Legend Yin, admired this genius very much.

Although he only had one pet, that pet was created, assembled, and upgraded by him. It was a mechanical life form made of virtual data from an overlord race.

Facing this super genius known to have the ability to participate in the development process of an overlord-level mechanical life, the future legendary Mechanic, and even this year's national champion, Yin Zhengfan had long understood the vastness of the outside world.

After witnessing such a genius at Imperial Capital University, Yin Zhengfan felt that his horizons had been broadened a lot. He even set this captain as a distant goal. It was the next goal to surpass after defeating Shi Yu.

Therefore, at this moment, even after witnessing the incomparable difference between him and Shi Yu, Yin Zhengfan didn't lose heart.

In the end, it was still because he didn't work hard enough. There was clearly a training place with a crueler environment. Yin Zhengfan clenched his fists. He wanted to enter the time mystic realm of Imperial University to train...

If he could overcome the environment there, perhaps, no, he could definitely narrow the gap between him and Shi Yu and the others.

“Zhengfan...” Tang Yun didn’t know what to say.

Although Yin Zhengfan lost, it seemed that he didn’t suffer too much damage and instead converted the loss into motivation?

Tang Yun was relieved at once. She added, “Well, it can’t be helped. That Shi Yu’s Butterfly of Imagination is a middle-level overlord race. It has too many advantages. It’s normal that you can’t defeat it now, but I believe that you can surpass it soon...”

“...”

“Zhengfan? Say something.”

At Imperial Capital University, Yin Zhengfan held the phone in a daze, his expression gradually becoming confused.

“Wh-what butterfly?” he asked.

At this moment, both parties’ hearts skipped a beat.

The good news was that Yin Zhengfan didn’t encounter the abnormal Butterfly of Imagination.

The bad news was that Yin Zhengfan lost before touching the Butterfly of Imagination.

...

At the battlefield hall of Imperial Capital University.

Due to the heavy atmosphere inside, White Brook was afraid that she would fight with the students of Imperial Capital University, so she immediately left with Shi Yu and the others.

At this moment, everyone looked at Shi Yu as if they were looking at a monster.

“I feel that Imperial Capital University won’t let us off. The venue is cracked.”

“Cough.” Shi Yu looked at the sky and said, “The weather is pretty good.”

“Are we going to visit Imperial Capital University next?”

“I heard from Senior Lu that Imperial Capital University has a time department facility. Is that true?”

“I’m not sure...” Many seniors of Ancient Capital University shook their heads.

White Brook glanced at Shi Yu and said, “It’s true.”

“The Time Mystic Realm was left behind by the first principal of the Imperial Capital University. Ten days inside is equivalent to one day outside. It can quickly increase battle power.”

“However, you can forget about visiting this place. The environment inside is very harsh. You have to wear a lot of high-level equipment to offset the erosion of the power of time. Even students from Imperial Capital University aren’t allowed to enter casually, let alone us.”

The first principal of the Imperial Capital University rose during the last totem war. Like Emperor Shi, he also had time strengthening talent. However, his growth experience was not as legendary as Emperor Shi. In the end, he only became a legendary Beast Tamer and did not contract many time-element pets.

This time mystic realm was a place where he used his Beast Taming Space to modify humans to cultivate battle power at a high speed before he died.

Unfortunately, although the idea was good, the final result had many drawbacks. Because the effect of time erosion was too serious, very few pets could adapt to the environment inside.

In addition, only Beast Tamers and pets below the legendary and overlord level could enter, so the Time Mystic Realm was actually very useless in Imperial Capital University.

“Ah, you’re not giving it a tour?” Shi Yu was stunned.

“There’s such a mystic realm?!” The other members of the battle club were tempted.

Holy shit.

Looking at it this way... Ancient Capital University was so weak.

“Of course not,” White Brook said. “But the guardian of the Time Mystic Realm, a time-type pet left behind by the first principal of the Imperial Capital University, likes to interact with people very much. We can go and take a look.”

“Is it the legendary owl that likes to tell fortunes and predict the future?” Xu Ze, the vice president, asked.

“That’s the one. The time-element monarch race, the Future Prediction Owl. That owl has mastered the super skill, Future Prediction, but because it’s too difficult to train, its Future Prediction effect is very poor... Not only can’t it predict things that exceed its strength, but it can only predict them once every ten times. It’s said that its favorite is to tell fortunes for the students of the Imperial Capital University who pass by.”

“Fortune-telling?? Future Prediction??” Shi Yu was slightly stunned when he heard the beast-eared girl.

Good heavens, Future Prediction Owl? What kind of race was this? Its race name was too simple and clear. Which genius named it?

“Are you interested?” White Brook looked at everyone, especially Shi Yu.

“Although it might not be very accurate, it’s quite interesting.”

“Of course, before the prophecy, it will ruthlessly charge according to the target...” White Brook chuckled. “So those without money can forget about it.”

Many people’s faces darkened. As expected, fortune-tellers were all black-hearted.

“Let’s go take a look.” Shi Yu’s eyes lit up. It didn’t matter if it was a fortune-teller or not.. It wasn’t like it could predict which ruin he would die in in the future. He just wanted to be friends with the prophecy owl!

## Chapter 217: Future Prediction

In Imperial Capital University, Teacher Shen, the instructor of the battle club, calmly took out his cell phone.

When the exchange team of Ancient Capital University finished registering and entered the school to take a look, he had actually already received the news.

But he didn't mind.

This was because this kind of exchange activity had always been between students.

Therefore, there were no teachers at Ancient Capital University. There were no teachers opposite, so he naturally couldn't be bothered to receive them.

After hearing the news, he only informed the students of his club.

If there were students who were willing to receive them, they would go. It didn't matter if no one let the Ancient Capital University team visit it themselves. After all, it was the exchange match day of the two school battle clubs two days later.

Only at that time did he have the interest to take a look.

Teacher Shen: "The battle club exchange team from Ancient Capital University has come to visit the school. If you guys are willing to be guides, go ahead."

He casually mentioned it. After all, the person who came was a guest. Although the school was in a competitive relationship, there was no deep hatred. Many students were still willing to do this.

Even though they weren't from the same school, they were still students together.

It wasn't like there hadn't been cases of top-notch students from Imperial Capital University leading other schools' juniors to visit schools. Perhaps there would be sparks of love between them. It wasn't like there had never been cases of students from different schools falling in love and walking into the sour and smelly hall of love.

Zhang Yiming: "Not good! Ancient Capital University is here to challenge us! Junior Zhengfan is so sad now..."

Teacher Shen: "?"

Yin Zhengfan: [???

Tang Yun: [...]

Teacher Shen: "What's going on?"

Somewhere in Imperial Capital University, Yin Zhengfan felt a little stifled when he saw Senior Zhang Yiming directly selling the news of his defeat.

Although everyone would know sooner or later, it had just ended not long ago. Couldn't they let him have a good meal first?

Reserve member Yin Zhengfan: "...I'll say it myself. I... just encountered an exchange member from Ancient Capital University. For certain reasons, I issued a challenge and lost to him."

Many of the diving seniors didn't mind because it was very normal for Yin Zhengfan, a new student, to lose when he encountered the other party.

However, Yin Zhengfan's next words made these people unable to hold it in anymore.

[The other party has a ginseng baby with more than 100,000 energy points. My Zonyan Rock Beast... was insta-killed by the other party...]

Everyone: [?]

Teacher Shen: [???

Teacher Shen: "A ginseng baby with an energy value above 100,000?? Zhengfan? Are you confused?"

Zhang Yiming: "It's absolutely true. I was the judge at that time... At the scene, that ginseng baby was so strange and strong. I feel that apart from the captain and the two vice teams, the rest of us will feel a lot of pressure when we face that ginseng baby. The other party doesn't come with good intentions. Should we be careful during the competition..."

The captain and two vice-captains of the Imperial Capital University's team were both master-level Beast Tamers with monarch-level pets. The three of them didn't care about this exchange at all, because apart from the beast-eared girl, there was no one else worth their effort in Ancient Capital University.

The real competition stage for these masters was the National League. This kind of exchange activity was trained by everyone below the level of master. Therefore, after Zhang Yiming said that apart from these three masters, no one else was safe from the students of Ancient Capital University who defeated Yin Zhengfan, the group instantly became restless.

Jin Wei, a member of the battle club: "Who is it? Who cultivated a ginseng baby in Ancient Capital University? Why don't I remember such a person?? I still feel that something's wrong. Baby Ginseng?"

Yin Zhengfan: "Shi Yu... is a new student from Ancient Capital University. He and I are candidates for the same vocation assessment. However, he's already a high-level Beast Tamer now. Baby Ginseng is also a commander rank, a commander rank with 100,000 energy points..."

Everyone was shocked and suddenly felt that this name was a little familiar.

[The Iron-eating Beast Knight who discovered the evolution of the Iron-eating Beast?]

Someone thought of something.

Wait, it was him? How was this possible? Wasn't this growth speed too ridiculous?

In four months, from a low-level Beast Tamer to a high-level Beast Tamer, it had a ginseng baby with 100,000 energy points?

Yin Zhengfan had already relied on his talent to have commander rank battle power in four months. What was wrong with this Shi Yu?

Everyone was completely stunned. They didn't expect that the expert from Ancient Capital University that Yin Zhengfan and Zhang Yiming mentioned was a new student. Although this new student was very famous, as the son of a legend, Yin Zhengfan was also quite famous as a genius Beast Tamer at the age of 13. He was famous too!

What made many members of Imperial Capital University think that it was ridiculous was Zhang Yiming and Yin Zhengfan's high evaluation of him. What did they see and experience?

Teacher Shen: "Don't stay in the slumps for too long. Train as usual in the afternoon."

At this moment, looking at the chat record, Teacher Shen from the Imperial Capital University was first surprised that a super genius had appeared in the Ancient Capital University. He was shocked by such a high-energy battle ginseng. Then, she said without much thought, because no matter how strong a genius was, it couldn't be stronger than the Imperial Capital University.

Just the captain of the Imperial Capital University's team, Qiu Miao, alone was enough to suppress his peers. A battle ginseng with 100,000 energy points sounded very ridiculous, but Teacher Shen thought about it. Apart from the three captains, the few quasi-master-level students in the team, with the explosive power of their Beast Taming Talent, it wasn't difficult to deal with them. As a teacher, there was no need to pay too much attention. He just let the students handle it themselves.

Obviously, he didn't know Shi Yu's identity at all...

Yin Zhengfan: "There's... another news."

Another piece of news?

Tang Yun: "Let me tell you! That ginseng baby might not be Shi Yu's trump card. I just finished the morning Feeding Conference with Professor Fang... You might not believe me, but Shi Yu, who I mentioned just now, also participated."

Everyone: "?"

What was going on?

[I won't explain the feed results first. You'll know when you watch the news later. The key is that at the Feeding Conference, Shi Yu showed his pet!!]

[That pet, that pet, do you remember the Butterfly Meeting in Divine Capital? At the Butterfly Meeting, a middle-level overlord race's Butterfly of Imagination appeared. The Beast Tamer of the Butterfly of Imagination was Shi Yu, a middle-level overlord race, commander rank... Spatial-type, Butterfly of Imagination! It's actually a new student's pet...]

The Butterfly of Imagination, Shi Yu's pet?

In an instant, the group fell silent.

Even Teacher Shen behind him was stunned, revealing an incredulous expression.

In this world, there would always be some life forms that would become unique races due to special opportunities. Such races were all powerful overlords, divine pets pursued by Beast Tamers, and symbolic pets that could become legendary Beast Tamers.

The Butterfly of Imagination was such a unique super rare pet. When most of the people from the battle club at the Imperial Capital University saw that news, they were incomparably yearning. However, when they learned that such a creature was only a pet of a student of the same age, or even younger than themselves, they were instantly speechless.

“...”

Teacher Shen originally didn't care about this exchange, but at this moment, his expression changed slightly. Wait a minute, what kind of monster came to Ancient Capital University this time? A student contracted an overlord species pet... In the hundred years of history of the nine major universities, there were only a few...!

“Who is this Shi Yu?” At this moment, this thought appeared in everyone's minds.

At the same time, Shi Yu and the others had already been brought to one of the most remote places in Imperial Capital University by the beast-eared girl.

“This is near the mystic realm of time? No one's watching over it???”

On the stone forest path, a group of people from Ancient Capital University climbed the stone mountain and were very curious about the surrounding environment.

“No. After all, without the permission of the school committee of the Imperial Capital University, even legendary Beast Tamers can't find the entrance to the mystic realm of time. There's no need to look after it at all. Moreover, the owl we're looking for now is an overlord-level pet. Although I heard that the prophecy isn't very reliable, it still has strength. With it watching, there's no problem. If there's someone coming, it's not like it would be protecting the mystic realm, but more like it'd be accepting the guests.”

Just as White Brook finished speaking, two people walked out of the stone forest. From their age, they seemed to be students from Imperial Capital University. When the two students saw Shi Yu and the others, they were slightly stunned before ignoring them. They continued walking down and chatting.

“It's over. Even Lord owl said that my confession will fail. I think it's better not to...”

“Don't be afraid. What if it was wrong? Isn't it common for it to predict wrong things? You have a chance!”

“Come on, there's definitely the accuracy if it's such a small matter...”

The two students spoke one after another, walking further and further away under the stunned expressions of White Brook, Shi Yu, and the other Ancient Capital University members.

Vice President Li Ze said in confusion, “Does it predict love matters???”

After a moment of silence, White Brook said, “This isn't the most ridiculous thing. The most ridiculous thing is that it's said that it once calculated for a Beast Tamer that the Beast Tamer's best partner is its pet.”

Everyone :”...”

Everyone was originally looking forward to this time-element Prediction Owl, but why did they suddenly feel that it was still mostly a scam? After all, if they accepted the money, even if it didn't use super skills and was just randomly giving a result... No one could say anything. They didn't know if it was true or false.

A success rate of 9 to 1, could it be that it had been scamming money like this all along?

The dozen or so people continued to walk speechlessly. Soon, they arrived at the legendary habitat of the Prediction Owl.

It was a temple in the stone forest, making the atmosphere of a charlatan very strong.

There was a dark blue owl with a time hexagram pattern on the light-colored feathers on its abdomen. It narrowed its eyes and listened to the students in front of it.

Two students had just returned, and there were still seven to eight students lining up here. This owl's business was pretty good...

“If nothing goes wrong, your pet can give birth in a year.” It still narrowed its eyes, but its beak moved as it said to a female student in front of it.

It could talk!!

In Shi Yu and the others' ears, the voice looked like a sharp old witch in her fifties or sixties.

This reassuring voice was scary.

The girl: “???”

“Lord owl, I'm begging you to predict where the opportunity for its evolution is. I didn't ask you to predict when it will give birth.” She pointed at the half-tall yellow bear beside her feet, which was an earth-element desolate bear, and broke down.

The owl straightened its feathers and said helplessly, “I only saw this scene. Perhaps there's a connection? Since fate has been decided, it's up to you now.”

The girl received the prophecy and had a crying expression. The students beside her looked like they were watching a show.

This owl's prophecy was so ridiculous, but strangely, it had really used an extremely ridiculous prophecy to let some Beast Tamers see the correct future. After decades, no one knew if this guy was reliable or not.

Because of its premonition, many students from the Imperial Capital University changed their fate in advance.

It was also because of its premonition that many people took the wrong path. After a long time, they finally understood and turned around while crying.

Fortunately, this owl charged relatively low fees for students of the Imperial Capital University. It was also a pet of a legendary Beast Tamer, so the students were still willing to come to it to predict the future. What if they hit the jackpot? What if?

They wanted to see the results with a verification mindset!

“Perhaps the son would evolve?” Her friend guessed.

Wild Bear :” ...”

“Eh, many people are here. Do you want me to read your future?” The Future Prediction Owl narrowed its eyes and raised its head to look at the students of Ancient Capital University standing neatly in a row behind.

“Just taking a look...”

“...” Many students of Ancient Capital University still felt that it was a little unreliable.

However, there were also people who felt that it was quite interesting. For example, Xu Ze, the deputy president of the Ancient Capital University, asked, “Well, how much does it cost to predict the future?”

He wanted to know where the opportunity for his pet to break through to the master level was. From the current progress, it felt like it was far in the future.

The owl turned around and said, “You’re not students of the Imperial Capital University, right? A level-five energy crystal for payment.”

“Level-five energy crystal, it’s all about money...” Xu Ze was directly angry. Stealing money? But considering that the creature in front of him was an overlord-level creature, he said cowardly, “After thinking about the price, I decided to forget it. My fate hasn’t been decided. I have to fight for it myself.”

He would never squander millions of yuan on an inaccurate and unknown prophecy.

Ridiculous.

So expensive!

The other students of Ancient Capital University also had this thought.

Everyone suddenly felt that this guy might be even richer than the gem cat. It was definitely a black businessman.

“Who is it?” As the two conversed, the students from the Imperial Capital University present looked at the dozen or so people who had suddenly appeared. They revealed puzzled expressions. They weren’t students from the Imperial Capital University?

Where did it come from?

“Then if it’s a student from Imperial Capital University, how much is it every time?” A senior from the club with long hair asked.

The Owl: “It’s either free or infinitely big.”

“Listening to you is like listening to a sentence,” the long-haired senior said.

Obviously, this owl didn't plan to let people outside Imperial Capital University predict the future.

In an instant, the students of the Ancient Capital University looked at each other. A level-five energy crystal was equivalent to a monarch-level resource. There was only White Brook, a master, present. Apart from her, probably no one else could take out so much money.

It was too ridiculous.

“Don't look at me. I've already calculated it once when I was young. No.” White Brook shrugged.

As for what it was, she blushed. Although it wasn't accurate now, in the future... she hoped to hit the jackpot!

Eh?

The owl shook its head. ‘Who are you?’

Forget it, I forgot.

It said, “It's understandable if there's an occasional mistake.”

Everyone :” ...”

“There aren't any level-five energy crystals. Is it okay if it's a rare level-four resource?” At this moment, Shi Yu suddenly spoke from the crowd.

“What? Level-four resource?” The owl was just about to say that he had slashed the price too much, but it was suddenly stunned.

No one saw what was going on when Shi Yu suddenly took out a fruit.

When everyone showed confused expressions, the owl fell silent.

It looked at Shi Yu's bracelet.

This guy brought a ruin space?

In addition, this fruit...

[If it's not wrong, this is a fruit that contains a weak power of time. I haven't seen a spiritual fruit of this quality in a long time. Although the energy level is a little weak, the life force inside is incomparably pure. It seems to be able to increase the potential of creatures below the commander race... Next time, after throwing it to the ruins of time to undergo the baptism of the power of time, its level might be able to grow to a very, very high level.] The owl looked at this nutrient fruit and was extremely surprised.

What a future spirit fruit! It was a species he had never seen before!

The owl showed an interested expression and said, “Deal.”

“I'll predict it for you once!”

The corners of Shi Yu's mouth twitched. "Five times. Although this fruit is only at level four, its value definitely exceeds a level-five energy crystal. It's raw at first, but it's worth is definitely above level five. I still have a pile of this kind of spiritual fruit over there. Perhaps I'll come here to have my fortune told next time."

This was a top-notch nutritional fruit condensed by Baby Ginseng at the cost of exceeding the limit of its strength. It could change the pet's evolution potential and increase the effect through the power of time. It was definitely not something ordinary level-four resources could compare to. It was too crazy to only give a prophecy once.

"Five times?!!" The owl had never seen anyone so black-hearted. They thought that time-element super skills were like cabbages...

However, at this moment, the owl vaguely sensed that the Shi Yu in front of it was very special. It was as if he was someone favored by time. A weak but pure power of time lingered around him. Generally speaking, if it wasn't a time-type talent, then it would definitely become like this because he often came into contact with the power of time.

Who was this guy?

Where did this come from?

It thought for a moment. In addition to the ruins space and this special spiritual fruit, the Prediction Owl nodded and realized that Shi Yu's identity was not ordinary. In that case, it said, "So be it. I'll give it to you."

Before Shi Yu could react, the nutrient fruit in his hand disappeared. It was controlled by Psychic to fly out of his palm and into the room behind the owl.

At this moment, everyone looked at everything in a daze.

What, what, what? What happened? What did Shi Yu take out? Why did the Foresight Eagle agree to do it five times?

However, although they didn't know what it was, judging from the owl's reaction, Shi Yu had definitely taken out something extremely rare and valuable.

"Boss, you're so silly!!" The seniors of Ancient Capital University looked at Shi Yu. Even the surrounding students of Imperial Capital University looked at Shi Yu as if they were looking at a spoiled kid.

"Hu! Hu!" The little desolate bear that was given a bad prediction also looked at Shi Yu with a pained expression.

If he didn't want the money, he could give it to it.

"Alright, what do you want to predict?" The owl flapped its wings with a Buddhist expression.

From various signs, the premonition could specify a direction.

"I want to predict the future for myself and my four pets. Do mine first."

Shi Yu said, "Actually, I'm an archeologist. I'm more curious. In the future, which ruin will I be in when I encounter a life-and-death crisis?"

Although it was said that this premonition was to become familiar with the owl so that he could replicate skills later, it wasn't like Shi Yu didn't want to know certain things.

For example, if he really started to return to his old profession and become obsessed with ruins, there would definitely be a day when he would encounter danger. How could he not be prepared? If he could know in advance which ruins would bring him danger, then he would...

It was impossible not to go. At most, he would wait until he developed a little more before going.

Well, he would wait until Eleven and the others reached the Mythical stage before going in. He would directly smash the main door.

"Archeologist?" The Prediction Owl revealed an interested expression, as if it knew what was going on with the power of time on Shi Yu's body...

It was even more concerned about the prophecy that it was about to give to Shi Yu.

It only had one super skill, Future Prediction. However, its proficiency was only at the expert level.

Ordinary overlord-level creatures usually had super skills basically at the perfect level, but this owl had lived for less than a hundred years, and its growth level had already broken through the racial limit. Yet, the super skill was actually only at the expert level. It was really unscientific, but this also indirectly explained the difficulty of the Future Prediction skill.

In fact, for some future fragments related to its battles in the future, the Prediction Owl could easily predict them and use this to easily dodge the enemy's attack. It could fight with the opponent from an omniscient point of view, like a player. However, it was impossible to increase proficiency with the Prediction Future skill only because it was related to itself.

Moreover, just predicting the future for a short period of time was not the future it wanted to see.

It wanted to have the feeling of seeing through the fate of all creatures. Therefore, in order to train this skill, it stayed in Imperial Capital University for 100 years and calculated countless lives for others. Unfortunately, the skill was still far from perfect.

However, what made the Prediction Owl happy was that every time it predicted the right future and that future did happen, it would obtain an uncertain skill proficiency. Although it wasn't much, it was better than nothing. Moreover, it could earn extra money. It wasn't a loss.

"Yes."

"Alright, I'll give you a prophecy..."

The time hexagram on the owl's chest glowed slightly. Everyone looked at it and Shi Yu.

This guy was still getting scammed!!

Good lord, this was the prophecy?

The ruins were definitely dangerous. Why would he explore ruins with so much money?

If he had money to see the future crisis, he might as well spend money to change his fate!!

“Eh...”

As the owl asked in confusion, everyone looked like it was as expected. Look, it was a scam.

At this moment, sensing the traces of Shi Yu in front of him, the Prediction Eagle’s expression became more and more strange.

In fact, predicting the future of others was like drawing a lottery. Even if it had a fixed direction, its skill proficiency might still be crooked. This also led to some extremely ridiculous results being predicted.

Some of these crooked results were correct, while others were completely crooked. This was because there were endless possibilities in the future. However, this time, the owl had planned to give Shi Yu a good premonition, but it didn’t expect that it had a feeling that it was going to be crooked from the start.

“So vague.”

“Forget it, I’ll just take a look around.”

The owl was immediately immersed in a dark world and began to see blurry scenes. It had prophesied to many Beast Tamers, and some people had even become legends. Yet, their futures never felt so vague.

Soon, the owl captured the ruins and crisis related scenes according to its “prayer.”

Countless images flashed past. Some collapsed, some couldn’t be seen clearly, but some were quickly seen by the owl.

Finally, under the full concentration of the owl, it saw Shi Yu’s figure and saw him coming out of a blurry ruins space.

In the next moment, the ruins collapsed, and a beam of light shot into the sky.

In the incomparably dark future scene, the Prediction Owl saw pairs of eyes opening one after another. There were dozens of eyes. The owners of the eyes emitted a terrifying aura. The aura of every creature was more than ten times that of it. It was extremely terrifying, and its gaze locked onto the light and Shi Yu!

A moment later.

“Ah!!!” The Prediction Owl, whose voice was like that of an old witch, suddenly opened its eyes. Its whole body exploded, and its narrowed eyes opened directly, looking extremely panicked.

“Why, what’s wrong...”

Shi Yu was shocked when he saw the Prediction Owl suddenly jump.

The others were also shocked by the owl’s actions.

“You, you, you, you...” At this moment, the premonition owl was shocked and delighted as it looked at Shi Yu in shock.

“What’s the result?” Many people stared at the owl and Shi Yu.

The Future Cat said with a trembling voice, “What... Why are you being targeted by more than ten totem creatures when you explore this ruin??”

“F\*ck!!” It directly cursed.

It had never seen so many totems when it participated in the last totem battle with the first-generation principal of the Imperial Capital University!

“What the hell?” As soon as the owl finished speaking, everyone was shocked.

White Brook and the others opened their small mouths.

Shi Yu himself was even stunned on the spot. He was stunned. Holy shit, what the hell? Seriously?

“This... This... As expected, it’s crooked again.” At this moment, the corners of the girl’s mouth twitched. “Lord Owl, aren’t you only able to predict things that don’t exceed your strength? How can there be more than ten totems...”

“It’s still a matter if there were that many totems in the totem area around Dong Huang...”

“Ah, this.” The owl was also at a loss. So, was its skill about to improve, or was it ridiculously crooked this time?

It looked at Shi Yu and said, “No matter what, why don’t you rather believe it? Child, it’s better not to explore the ruins. Why do I feel that you want to trigger the next totem battle...”

The corners of Shi Yu’s mouth also twitched. “So, which ruin is it?”

“I didn’t see clearly.”

“Which totems?”

“They should all have eyes. There are red, orange, yellow, green, green, blue, purple.”

“Can I ask you for compensation for mental damage...” Shi Yu cursed in his heart. He was a little regretful for predicting it. What was going on?

“Huh?” The Prediction Owl tilted its head and pretended to be stupid.

At this moment, everyone stared at Shi Yu, not knowing what to say. Therefore, was it crooked or not? It should be crooked.

“I...”

“Next, next.” At this moment, the Prediction Owl felt that its strength had improved. It urged Shi Yu.

Forget about the totems and ruins first. What was the next prediction?

Well... it also felt that it was crooked. How could there be such a future?

Let's see if the next one was reliable.

Shi Yu :“ ...”

Shi Yu had countless complaints in his heart. He couldn't deal with this owl anymore. He was even more determined to never leave the country before he reached the legendary level. He would rather believe it!

“Let me think...” The corners of Shi Yu's mouth twitched. He wasn't allowed to put it aside first. He couldn't waste the opportunity.

Eleven... Why not give Eleven a premonition of its inscription?

What could Buggy, Ginseng Baby, and Chi Tong ask for...

### **Chapter 218: Each More Ridiculous Than The Next**

“What's your next prediction?”

Now, the owl was looking forward to it.

It had been a long time since it had predicted anything related to totems.

The last time it predicted it was when its Beast Tamer was still alive.

It had only predicted it when his talent was strengthened by time.

Now, it had actually predicted it again. It didn't care if it was ridiculously crooked, but at least it had predicted it.

This could be considered a breakthrough.

Therefore, the Prediction Owl judged that its Future Prediction should have improved unconsciously.

Let's see the effect of the next premonition...

“Let me see.”

Under everyone's gaze, Shi Yu emitted a faint light in front of him. A small green array appeared in midair.

In the next moment, a mini Iron-eating Beast, a mini sword spirit, a mini butterfly, and a mini ginseng baby quickly fell from it.

“Wuu!”

The Little Iron-eating Beast flashed with lightning and landed steadily with the electromagnetic levitation.

“Mi!” “Wu!” The mini sword spirit and butterfly flew elegantly.

Only Baby Ginseng fell to the ground with a bang and patted the dust on its body with a calm expression, as if nothing had happened.

"It's their future," Shi Yu said.

After the four little pets were summoned by Shi Yu, the Prediction Owl was stunned.

"Good heavens, the entire celebrity formation." The students of Ancient Capital University took a deep breath. Many people felt that the butterfly was a little familiar... They knew that Shi Yu had a Green Silkworm, so that Green Silkworm had evolved? What race was this?

At this time, in this team, only White Brook knew about the Butterfly of Imagination.

"Uh." When the students from Imperial Capital University saw this group of little pets, they were puzzled. Why were they all so small?

They looked at Shi Yu. Wasn't Shi Yu a high-level Beast Tamer? Why did his pets look like babies?

The types of pets were also messy. Iron-eating beast, unknown little butterfly, ginseng baby, sword spirit?

It was not systematic.

"Wuu!" "Wu!" "Yi!" "Mi!"

Ignoring the surrounding environment, the four of them started chattering. What should they ask for?

"Let's give it a prediction first. I want to know... where its next evolution opportunity is."

In other words, where was the opportunity to carve the inscription?

Shi Yu bent down and picked up the little Iron-eating Beast. He said to the owl, depriving Eleven of its right to choose the Future Prediction.

"Wuu!!" Eleven danced around. Don't pull it!

However, predict the next evolution?

It wasn't impossible.

"Evolution again. You Beast Tamers like to take shortcuts."

The corners of the owl's mouth curled up. "But let me say this first. The future has endless possibilities. If in the future you guys can't come into contact with the opportunity to evolve at all, then the things that you can predict might still be wrong. It's very wrong."

"I can only predict what you might achieve in the future."

"Don't come to me after you fail after trying."

Thinking that its premonition had misled many people, and the owl felt guilty.

They had agreed in advance that they understood the risks.

"Alright." Shi Yu nodded.

In any case, he would definitely continue to investigate the secret of the iron-eating beast. In the future, he would definitely be able to obtain some information, and now, through using the owl, he might be able to learn something in advance...

It was a more targeted investigation.

This time, it couldn't be crooked.

He hoped that this fellow would be more reliable this time. The previous prophecy felt that it was completely unreliable. No, there was something reliable amidst the unreliability, making Shi Yu a little afraid.

"Coming, coming!" The owl closed its eyes again.

Eleven tilted its head and everyone looked at it carefully.

At this moment, the owl activated the super skill Future Prediction again, and the time hexagram on its body flickered.

"This..."

However, a moment later, what made the Prediction Owl feel that it was unscientific was that Eleven's future scene was just as vague as its Beast Tamer's.

Some further futures were like darkness, impossible to see clearly.

However, there was another force that successfully made the owl see some images. Only then did the owl sigh in relief. As expected, its strength had improved again, although it didn't know what was going on...

Soon, the blurry scene became a little clearer, but it was also limited.

The Prediction Owl saw the blurred outline of the little Iron-eating Beast in front of it.

It was a hundred meters tall, and its figure was difficult to see clearly. Its entire body emitted terrifying dark magic power, like a new Demon God.

Opposite it was also a terrifying creature, like a demon god. Its dark aura was even higher than the Iron-eating Beast. It was definitely a top-notch totem. Although it was only a premonition, the owl instantly made a judgment and was shocked.

The battle intent of both parties had accumulated to the limit.

Boom!!!

The aura of both parties erupted, shaking the Prediction Owl's body. It suddenly left the future scene and flapped its wings in anger again, its eyes wide open as it woke up.

How was that possible!

"Damn you, damn you!" It kept repeating like a parrot.

Everyone: "?"

Holy shit.

What was it again?

Why was it so shocked again?

What did it see this time?

“Wuu!!” Eleven shouted. Say it, it could take it.

“There’s a result?” Shi Yu gulped and asked.

The Future Cat’s eyelids twitched and it looked over. “It, it...”

It looked at the little Iron-eating Beast and said in disbelief, “Its evolution opportunity is dark-element power?”

“And why is its evolution related to another top-notch totem! It seems to be fighting! Why is it another totem!!” The Prediction Owl cursed.

What exactly was going on today?

Its pupils constricted. The Iron-eating Beast in front of it had totem aptitude?

Shi Yu: “?”

Everyone: “?”

Holy shit!

They collectively looked at the little Iron-eating Beast.

Eleven: “Huh?”

Eleven was confused. Dark element? Wasn’t it metal and thunder element?

Shi Yu was also at a loss. What?

Not an inscription, but a dark element? Or was the inscription related to the dark element?

“You said it’s also related to another top-notch totem... What is it?” Shi Yu asked.

The owl looked at Shi Yu and said, “I’m not sure, but the number of dark-element totem creatures is pitifully small. There aren’t many options...”

“Isn’t the evolution form of the Iron-eating Beast the Nine Li Battle Beast? It’s indeed crooked again.” At this moment, the Beast Tamer of the Barren Bear seemed to be very angry and continued to undermine the situation. She had spent so much money to predict that her pet would give birth and evolve a year later. What was going on...

After the prophecy ended, she confirmed again that the owl’s prophecy was not reliable at all. If she had known, she wouldn’t have listened to her classmate’s recommendation and come to the prophecy.

Each one was more unreliable than the other.

The students of Ancient Capital University glanced at her. Didn't she know that the person in front of her was the discoverer of the Nine Li War Beast?

Perhaps this owl had predicted the evolution form of the Nine Li War Beast!

However, of course, they didn't think that the prophecy was right either, because it was too ridiculous.

Even if Dong Huang was powerful now, it was unwilling to take the initiative to provoke a top-notch totem.

"..." At this moment, the Prediction Owl was speechless because it also felt that it was unreliable.

Ever since the end of the last totem battle, totems were already legendary creatures and rarely appeared. Even totems that were close to humans, such as the Butterfly God, only woke up once every few years or more. Outsiders couldn't come into contact with those totems in the totem area.

Now, it had prophesied twice in a row, and both were related to totems. No matter how one looked at it, it was very ridiculous.

Most importantly, the Prediction Owl felt that its two predictions didn't consume much power, just like the consumption of conventional predictions.

If it was related to the totem, it was definitely impossible for the consumption to not change. Therefore, it was also a little guilty. It felt that it had most likely made a wrong prediction. It was so crooked that it was kind of embarrassing. It had predicted a fake thing that was impossible.

"Dark element... Dark element... totem..."

However, to the owl's surprise, Shi Yu himself fell into deep thought as if he really believed it.

[The evolution of the Nine Li Battle Beast, or should I say, the inscription might be related to the dark element?]

Shi Yu was momentarily at a loss, but more than that, he felt relaxed.

Although he didn't know if it was correct, he seemed to be able to investigate in this direction.

Although light and darkness couldn't compare to time and space, it was also the top attribute in this world.

The Kingdom of Glory in the West believed in light power and used light as a holy symbol.

As for dark power, in the ancient times of various countries, it was called magic power. It was not magic power, but the power of a demon god.

Therefore, dark-element creatures were occasionally called magical beasts, monsters, and dark creatures. Dark-element totems and Mythical creatures were also called Demon Gods.

Their strength could be seen from this unique name.

"Strange, too strange."

At this moment, the Prediction Owl felt that today was too strange.

Did it bump into a totem nest? Why did it predict so many totem levels?

There was always a bad feeling.

It looked at the little butterfly, the little ginseng baby, and the little sword spirit and fell into deep thought.

“Well, do you still want to continue predicting? I feel that my condition today isn’t very good. Why don’t we talk about it another day? I’ll remember the number of times first?” it said.

“It’s alright, continue.” Shi Yu recovered and grinned.

Who said that he couldn’t do this a second time?

There was still time in the future. Shi Yu was only here to meet this owl.

After confirming that the Future Prediction Cat had been doing business here, Shi Yu didn’t plan to replicate the Future Prediction skill now.

This was because replicating it also occupied the same space as plant control, restrained sharpness, and Heavenly Frost Cold Energy. It could only be seen but not used.

Having already learned this lesson three times, Shi Yu would not make any mistakes and waste his skill column.

In any case, the Prediction Owl had always been here. He could come back when he was lacking in the future.

He looked at Buggy, Baby Ginseng, and Little Chi Tong.

“Do you want to see your future?” Shi Yu didn’t have anything urgent to know about them.

Evolution?

This was already a predetermined fate. There was no need to ask.

Buggy’s evolution skill was Dragon of Imagination, Baby Ginseng’s evolution skill was mutation, and Chi Tong’s transformation evolution skill was probably Spirit Release. This was very clear.

Compared to the mystery of inscription, these had a concrete path.

In that case, Shi Yu handed the premonition opportunity to them.

“Wu!!” Buggy was the first to fly out.

“Wu?!”

It wanted to ask if its race could still get married and have children in the future?

Buggy was a little panicked now that Shi Yu had imagined the scene of him dying alone at the Feeding Conference.

It also liked those big sisters who were as beautiful as it!

Shi Yu :”...”

“Ah.” The Prediction Owl was stunned and a little teary-eyed. The thing it wanted to predict this time looked relatively normal.

“What does it want to predict?” Beast-eared Lady White Brook asked.

“This... It wants to calculate its future partner and the situation of its descendants...” The corners of Shi Yu’s mouth twitched.

However, in general, although Buggy was only a year old, it had already spent most of its life when it was a green worm. It wasn’t impossible for it to awaken this idea in advance.

“Eh...”

“This...”

Shi Yu’s prophecy completely exceeded everyone’s expectations.

The owl closed its eyes in relief, but its face quickly fell.

It was the same.

In the blurry scene, it opened its mouth slightly in shock.

It saw a huge butterfly and a dragon-shaped body laughing happily. Their bodies were covered in shadows and censored. Among them, the aura emitted by the dragon-shaped body shocked the owl again.

Damn.

Another totem??

The owl felt like it lost a hundred years of its life.

“F\*ck!” It opened its eyes and exploded. A wood-element pollution-type sound wave skill was released.

Holy shit.

Everyone was shocked along with the owl.

## **Chapter 219: Invitation to the Third Round**

Buggy was momentarily stunned in the air. At this moment, the bottle-sized Buggy had a bad feeling.

“You, you, you...” It looked at the little butterfly in front of it and didn’t understand. It carefully sensed its power, but...

As expected, its predictions were wrong again?

“What did you predict?!” Beast-eared Lady White Brook quickly asked. She knew this butterfly race.

If it could give birth, it might be another larva with overlord potential.

The Prediction Owl's expression darkened. "I don't see the situation of its descendants, but, but its future partner might be a totem-level dragon creature??"

"Why is it a totem again!" It cursed.

When it was a military advisor in the totem battle, it didn't predict totems so frequently.

Today was too unscientific.

As soon as it finished speaking, everyone present was speechless.

Buggy's expression immediately collapsed.

"Wu!!" What was going on?

Although it felt that the power of dragons was strong, it was very sure that its aesthetic taste was still the aesthetic of bugs.

Shi Yu was also stunned on the spot.

Damn...

Even if Buggy thought that dragons were very strong, it didn't have to have such a big appetite, right?

Was it trying to give his descendants dragon blood?

"Wu!!!" Buggy looked at Shi Yu with tears in its eyes. This was definitely not accurate.

It definitely couldn't be like this.

Shi Yu fell into deep thought and said telepathically, "It's also possible that you created a partner for yourself. When the power of imagination reaches the maximum level, you might really be able to do it. Self breeding or something..."

"It's not like there haven't been cases of self-interest in the natural world."

Buggy:???

Then it would also be a butterfly, not a dragon!

At this moment, everyone, including Eleven, Baby Ginseng, and the little sword spirit, looked at the worm with especially strange expressions.

Buggy shuddered.

Totem-level dragon, Buggy also learned to rely on rich women?

Due to Buggy's strong retort, Shi Yu and the others coughed dryly and chose to believe Buggy. That was most likely wrong again.

As for the students of Ancient Capital University and Imperial Capital University, they directly treated it as a joke from the start.

The Dragon Totem was f\*cking ridiculous. The owl had indeed drunk too much today.

Even if it was a dragon-type... it was impossible for it to be with such a small butterfly, let alone a totem-level dragon-type!

“Yi ~!!”

After Buggy ended, Baby Ginseng quickly spoke according to the order of entry.

Should it be its turn?

“Yi!!”

Baby Ginseng looked at the owl with shining eyes.

This guy’s prophecy was very high-end. It was actually related to totems.

Even in the forbidden zone that it was born in, the strongest creature was only an overlord.

It desperately wanted to know its future.

“Yi!” Baby Ginseng asked.

“It wanted to know... how strong it will become after it evolves?”

When Shi Yu heard Baby Ginseng’s question, he was immediately tempted. He also wanted to know.

“After Baby Ginseng evolves... How strong can the ginseng fruit tree be?” A few students from the Imperial Capital University muttered in their hearts.

On the other hand, the students of Ancient Capital University had a serious expression. This wasn’t an ordinary ginseng baby.

“This...” The Prediction Owl wiped its sweat and took a deep breath.

The ginseng baby in front of him didn’t look simple either. It didn’t treat it as an ordinary ginseng baby.

Even from so far away, it could sense that this guy was very nutritious.

After this guy evolved... The owl had a bad feeling.

It closed its eyes and started to predict. A moment later, it exploded again and couldn’t hold on anymore.

“Yi!!!” Baby Ginseng showed a serious expression. As expected, it was very strong, right? It even scared the overlord-level owl!

After it evolved, it would definitely be invincible.

“Ah!”

“Why are you being chased by a bunch of overlords and totems in the future!!! In the end, you were even thrown into the mouth of a totem!” The Prediction Owl wiped its saliva.

Baby Ginseng:???

Ginseng Baby: Σ (° △ ° | | )

Eleven, Buggy, Little Chi Tong: (⊖⊖⊖)

It was... thrown into its mouth by a totem-level creature?

Everyone: “?”

Holy shit, what the hell was this?

At this moment, Baby Ginseng was sweating profusely. It took a step back and its expression exploded. It was a little panicked.

“Yi!!”

It wanted to know how strong it would be after evolution, not how attractive to totems it'd be!

Baby Ginseng cried crazily. Why did it sound like the situation after evolution hadn't changed at all?

“Cough.” The corners of Shi Yu's mouth twitched and his face fell. Was this for real?

Ahem, this, he felt that it might be true...

Baby Ginseng was already ridiculously supplemented. If it evolved into an overlord race supplement, it might really be able to attract totems.

Shi Yu immediately felt that the future of his team was a little rugged.

In the future, when he went out to explore ruins, he didn't even have to take the initiative to provoke the enemy. As long as he pulled Baby Ginseng out and slipped around, he could probably attract many ferocious beasts, overlords to totems.

Baby Ginseng was some high class bait...

The bad news was that if he was in danger in the future, he would become the enemy of all beasts. The good news was that he couldn't die from weakness in the future. He could only die from being too healthy.

“Yi...” Baby Ginseng looked at Shi Yu. Evolution... was a little dangerous. From the materials they have gathered so far, there shouldn't be any materials for strengthening and nourishing effects, right? They had to specialize in battle!

Why not add a poison element to it? This way, no one would dare to use it.

Shi Yu: “?”

“Do you want to poison me?”

“Don't worry.” Shi Yu looked at Baby Ginseng seriously. Combatization was a must, but the nourishing effect couldn't be reduced. After all, he was also counting on Baby Ginseng to extend its life. It was impossible for the poison element since it was too dangerous.

“Eleven and the others will protect you.”

Eleven and the other beasts nodded crazily. The first target to protect in the team was Shi Yu, and the second was Baby Ginseng!

Ginseng Baby: "..."

"Today, as expected..." At this moment, the owl was a little dizzy.

It felt that Shi Yu and the others were too strange.

The Beast Tamer was stared at by more than ten totems with hostility.

The Iron-eating Beast turned into a Demon God and faced a top-notch totem.

A butterfly and a totem-level dragon having some good times.

A ginseng baby was chased and nibbled by a group of powerful totems.

No matter how it thought about it, it was too ridiculous!

It looked at the last little sword spirit that looked very obedient.

As for it...

"Mi..." Little Chi Tong's expression was blank.

To be honest, it didn't know what it wanted to predict.

It looked at the silent Shi Yu, hoping that Shi Yu could make the decision for it.

"Don't make things difficult for Lord owl, why don't we..."

At this moment, although the Beast Tamer of the Wild Bear felt that the owl was very unreliable, she was a little worried when she saw the expression on its face.

Could it be that Lord Owl was really not in a good state today and was sick?

Although she had never heard of it in reality, she had seen it in novels. Predicting the future and looking at fate meant suffering a backlash.

Could it be... retribution?

"No, I don't believe it." At this moment, the Prediction Owl's expression was stubborn. It wanted to find out if it was Shi Yu and the others' problem or its own.

"Tell me, what do you want to predict?" It looked at Little Chi Tong again.

"Mi! (Speak, what do you want to predict!)" Little Chi Tong turned to look at Shi Yu.

Shi Yu : "..."

Shi Yu thought for a moment and looked at the Prediction Owl.

"Its bloodline is very extraordinary. In the future... is it possible to solve the mystery of its bloodline?"

Rather than thinking of it as asking for Little Chi Tong, it was more like asking for General Mu Huiyin. After all, Little Chi Tong was formed by Mu Huiyin's bloodline power.

"Let me see." The owl was stunned and closed its eyes again.

The mystery of its bloodline?

This was reliable.

The owl was gradually familiar with giving Shi Yu and the others predictions. It didn't care if it was blurred or not as it quickly searched for key information.

Suddenly, a place filled with plague and curses appeared in front of it.

The Prediction Cat was overjoyed.

"My Future Prediction skill has indeed improved. It's no longer blurred, no longer blurred. Ahaha, isn't this the undead battlefield of the ancient capital?" It spoke in surprise.

Previously, it was all mosaic quality, but now, it was finally high-definition.

"The Undead Battlefield, in the country. This time, it's a safe place."

Just as it finished thinking, a sword light descended from the sky and cut open the place where the Undying Dark Phoenix was sealed...

A terrifying creature gradually revived with the Phoenix Cry and Nether Flames. The expression of the owl gradually changed from joy to collapse...

A ferocious top-notch totem sealed in Dong Huang was directly released.

In the real world, the owl suddenly opened its eyes. They were filled with blood vessels as it looked at Little Chi Tong, its wings flapping...

"What did you predict?" Shi Yu was filled with curiosity.

"Any clues?"

Prediction Owl:???

"Get lost, I didn't foresee anything. Go, go!"

Shi Yu and Little Chi Tong:???

Everyone: "?"

Damn, this owl was completely broken.

"By the way, don't go to the undead battlefield in the ancient capital. Let me tell you, there's a life-and-death crisis for you there..." Its expression was serious as it returned to its witch mood and muttered.

Shi Yu and Little Chi Tong: "?"

He understood. The clue was in the undead battlefield.

Shi Yu's mind surged as he became more and more hungry for the Future Prediction skill.

This was simply comparable to a cheat that listened to the Voice of History.

One was to look for clues ahead, while the other was to look for clues behind them.

He liked it. He had to teach it to his pet in the future. After all, it was too expensive to spend money to predict the future!

The owl looked at everyone and said, "There are special benefits today. Who wants to make another prophecy? I'll let you guys freeload this time."

The predictions were too strange. The verification had yet to end. Whether it was Shi Yu's problem or its own problem, it had to be compared to confirm.

It looked at everyone.

In an instant, everyone's expressions changed.

Holy shit, a free chance?

Although it wasn't accurate, it was for free.

"I'll do it!" "Me, me, me, me." "Lord owl, look at mine."

"Well, calculate for me again!" Even Senior White Brook was suddenly excited. She wanted to calculate her marriage fate with her senior again.

In an instant, the members of Ancient Capital University and Imperial Capital University fought over each other.

Shi Yu was immediately stunned. What was going on? They could still freeload?

Shi Yu was just about to say something when his cell phone suddenly rang.

Sensing the commotion around him, he was speechless. He stepped back slightly and took out his cell phone to look at this unknown number.

"Hello, who's this?"

A hearty laugh came from the other side.

"Student Shi Yu, do you remember me?"

"I'm... Ye Hui."

Shi Yu was stunned. The president of the Feeding Association, the senior of the third bureau, Master Ye Hui?

"I wanted to talk to you after the morning meeting, but I realized that you had already left."

"I can only find you in this way."

"What's the matter?" Shi Yu asked.

"Well."

"I heard about your love for Feeding. I've discussed with some seniors and want to invite you to join the third bureau. I wonder if you have this intention..."

Shi Yu revealed a look of joy. As expected... he was made to be a Feeder!

“But I’m already a member of Bureau 11...”

“The divisions aren’t independent of each other. For example, Senior Feng of Ancient Capital University has his position in all three departments at the same time. In essence, we serve Dong Huang together, there’s no difference between us.”

“It’s just that after joining multiple departments, the responsibility on your shoulders has become even greater. This is what you should consider.”

“Of course, the benefits of the third bureau are also not bad. It definitely far exceeds Bureau 11, haha. We might not have many ruins here, but we have a lot of rare materials, such as the soil of time, or the meteor iron for your Iron-eating Beast. We still took it from the third bureau.”

Shi Yu had a serious expression. There was no other way. The greater the ability, the greater the responsibility. It looked like for the future of Dong Huang, he had to go for the third bureau.

“Where are you? Let’s... talk?”

“The prophecy was clearly very normal this time!!!”

Imperial Capital University, Prophecy Temple.

After predicting the third prophecy, it suddenly freshened up.

It felt that the predictions were very normal.

No messy scenes appeared.

No messy totem creatures appeared.

Therefore, it wasn’t the one with the problem! It was the Beast Tamer just now!

As expected, that Beast Tamer was too strange.

“Where is he?” It looked around and searched for Shi Yu.

“Where is he?” It looked at the beast-eared girl, White Brook, who had come with Shi Yu.

At this time, White Brook was in a daydream.

Realizing that the Future Cat was calling for her, she said in a daze, “I think... he had an emergency and had to leave first.”

Prediction Owl:???

...

At the National Exhibition Center.

How could Shi Yu know that the third bureau would be so quick?

In less than half a day, they actually started to invite him to join the third bureau. The efficiency was much higher than Bureau 11.

With a noble heart that had greater ability and greater responsibility, he came with a nervous mood.

When Yu arrived, President Ye Hui was drinking tea with Principal Feng in the conference room.

“He’s here.”

When they saw Shi Yu push the door open and enter, the two of them smiled.

But no matter how one looked at it, Principal Feng’s smile was a little twitchy.

Shi Yu seemed to be wondering if he could join another bureau if he developed any special feeding results.

Principal Feng: “Research what research! How can a person have so much energy! Moreover, the threshold to enter the third bureau is very high!”

Thinking of his conversation with Shi Yu, he felt a sense of loss. Had the era changed?

This didn’t make sense at all.

“President Ye, Principal Feng.”

After Shi Yu entered, he sat down.

President Ye smiled and said, “How is it? Have you thought about it along the way?”

“It’s not bad to join the third bureau. Archeology and feeding aren’t separated. It’s not impossible to use archeological things to nurture pets.” Principal Feng shook his head helplessly.

He found an excuse to accept reality.

Didn’t the Nine Li Battle Beast come to existence just like that?

“Yes,” Shi Yu said.

To be honest, he was hungry for the resources of the third bureau!

However, the skill index had updated the skill teaching method. With this talent as a guarantee, Shi Yu could still join the third bureau with a clear conscience. It couldn’t be considered a freeloader’s resource.

“Hahaha, good. If nothing goes wrong, the Green Silkworm Cocoon’s breeding base should become a national priority. You can’t run away as the in-charge.” Ye Hui smiled.

In terms of bug-type research, there were only Legend Hua, Dr. Zuo, and the others in the country. Shi Yu was already familiar with them and had received the Butterfly God’s Blessing. He had also cultivated the bug-type life form of an overlord race. The Green Worm cocoon was also developed by Shi Yu. If he wanted to continue researching the Green Worm cocoon, he definitely couldn’t miss Shi Yu.

“Uh...”

However, Shi Yu’s expression didn’t look right.

Shi Yu realized that others always liked to arrange things that they were no longer interested in.

He was a man who didn't end well.

"He's probably not interested," Principal Feng muttered beside him.

Ye Hui: "?"

What did it mean?

Shi Yu took a sip of tea and said, "Well, the Green Silkworm cocoon was accidentally developed by me. I won't add to the trouble next. Actually, I have a new research direction for feeding. I think this is much more important than the research of the Green Silkworm cocoon."

President Ye was stunned.

Principal Feng fell into deep thought.

"What is it?" the two of them asked in unison.

Shi Yu smiled. "Of course it's a stable breeding channel for overlord races. It can also be said to be 'Iron-eating Beast's second stage evolution plan' and 'Nine Li Battle Beast evolution method'. To be honest, I already have some clues."

The two of them opened their mouths slightly.

President Ye was just about to say, "What is more important than the research of the Green Silkworm cocoon?"

But now, he suddenly couldn't say anything.

A stable breeding channel for overlords was important, but was it reliable?

"I saw you mention it in the paper, but hasn't there been any progress?"

In fact, Principal Feng didn't have much expectations for this kind of thing from the start.

A stable breeding channel for overlords was too unrealistic.

Even the funds assigned by Bureau 11 to Shi Yu to study the evolution form of the Nine Li War Beast were actually mainly to help Shi Yu buy evolution materials. They didn't expect Shi Yu to really develop anything.

Shi Yu said, "Isn't this a new way to think about the combination of archeology and Feeding... Most importantly, I just went to Imperial Capital University and encountered the Prediction Owl... It gave me predictions once and gave me some new ideas."

Prediction Owl?

The two of them revealed slightly surprised expressions.

Could that thing be trusted?

Ever since the death of the Beast Tamer of the owl, without the enhancement of his talent, it had never predicted anything nutritious.

“Is it reliable?” The corners of Principal Feng’s mouth twitched.

“I think it’s pretty reliable.”

Shi Yu nodded. If Eleven obtained the dark element in the future, combined with the history of this world, and became a Demon God after stepping into the totem, wouldn’t that match? This was because it was rumored that Chi You was also called an ancient Demon God.

In addition, it was suspected that Emperor Wu had also established the Iron-eating Beast Corps. This was also the main investigation direction. Legend had it that Emperor Wu’s army had reached the hometown of the totems, and it was said that Beast Tamers at that time were the fiercest in history.

Not only was Emperor Wu’s personal battle power fierce, but his army was also very fierce. If it was an army of pets of ordinary monarch races, it would probably be very difficult for them to be this powerful. But if it was an Iron-eating Beast army that was proficient in army skills and led by the overlord race’s Demon God Panda, it might not be so.

In the owl’s prophecy, Eleven would face off with a dark-element totem when it obtained the form of a demon god. Could this totem be related to Emperor Wu? Was it an enemy or a friend?

Some totems that had lived since ancient times might know more secrets of history and the secrets of the Nine Li Battle Beast. However, that batch of totems shouldn’t be within the borders of Dong Huang.

Shi Yu thought about it. Wasn’t investigating this better than studying the stimulation of the Green Silkworm cocoon quietly?

At that time, the combination of archeology and Feeding would really kill two birds with one stone.

“Uh.” President Ye scratched his nose. Why did he feel that it was unreliable?

Perhaps at that time, even if Shi Yu evolved his pet into an overlord race, it would still be impossible to replicate.

However, like Bureau 11, there was no such thing as a forced recruitment in the third bureau. He shook his head and said, “The identification for the third bureau will be given to you along with the reward for this Feeding Conference. How about that?”

“Alright.” Shi Yu nodded slightly.

After that, he looked at President Ye Hui.

So... what were the benefits?

“By the way.” Sensing Shi Yu’s burning gaze, President Ye Hui coughed dryly.

He said, “Generally speaking, the third bureau will give the new member three benefits.”

“Firstly, it’s the documents. As a member of the third bureau, you can contact and purchase materials and pets that ordinary Beast Tamers can’t come into contact with.”

“In the outside world, level 7 and 8 resources are the top, but in the national resource bank, there are higher-level materials, such as level 9 legendary resources and level 10 mythical resources. If there’s a legitimate reason to use them, the members of the third bureau have the right to use them first.”

“After all, no matter how rare the resources are, only suitable feeders can maximize their value.”

Ye Hui looked at Shi Yu’s shining eyes and smiled.

Shi Yu: “Mythical resources?”

Instantly, Shi Yu was extremely tempted.

He wanted to ask if there were any materials for Mythical creatures.

After all, through the power of imagination and dreams of Buggy, there was a chance to reproduce the power of totems and myths.

However, he also knew that he was purely thinking about the unreasonable..

Unless he combined the power of imagination with dreams to open up a new research idea in a new feeding field, it would definitely not be that easy to apply for legendary and Mythical materials.

It was mainly because his current feeding research results were completely different from applying for these resources.

“Yes.” President Ye Hui smiled.

The third bureau was definitely one of the richest departments in Division 13. Almost every member had a legendary resource.

If Shi Yu also wanted to apply for it, it would depend on his subsequent contribution.

“Second, it’s something you already have.”

“I have it?” Shi Yu was stunned. “The ruins space?”

“Ahem, no, there’s no ruins in the third bureau.” President Ye Hui revealed an awkward expression and said, “The index. Bureau 11 should have assigned it to you, right?”

“If it’s a new member who joined the third bureau, they will actually also be assigned a feeding index. In terms of functionality, the difference between the two isn’t too big. It’s just some knowledge bias problems.”

“When you’re free, I can update the index for you and open up some feeding knowledge.”

“For example, the cultivation methods of various pets, the evolution plans of hundreds of pets, the teaching methods of thousands of skills... Where to produce rare resources and the activity range of rare pets? The knowledge recorded by these associations can be checked in the index.”

“Moreover, as long as it doesn’t exceed a certain limit, you can also transfer this knowledge to others, so you call it the Feeding Index.”

“Of course, I can also help you upgrade the index to a mechanical life form in the third bureau. If a Feeder doesn’t have his own Feeding Team, it’s actually pretty good to have a research-type mechanical life form as a partner. I think your archeological index still seems to be an ordinary machine.”

Shi Yu was slightly stunned.

There were hundreds of evolution plans for pets.

Thousands of skill teaching methods?

And it could be freely used or even given?

Shi Yu recalled the rich lady, Senior Lu, who had taken out the three Green Silkworm evolution plans for him to choose.

In the future... would he be even richer than her?

As the saying went, knowledge was money.

The feeding index in the third bureau felt even better than the archeological index in Bureau 11.

The archeological index recorded various ruins locations and information both domestically and abroad. This was a huge pit. Although the benefits of cracking the ruins might be huge, the risks were also huge.

However, the knowledge recorded in the index was pure money.

However, the ruins space was still the impressive one. This was probably the core power of Bureau 11.

“I’m envious.” Beside him, Principal Feng listened to the benefits of the third bureau and showed an envious expression.

Looking at Shi Yu, he seemed to see his young self.

If it weren’t for the fact that the benefits of the 13 divisions of Dong Huang were really good, he wouldn’t be working in three departments at the same time.

The first, third, fourth, and eleventh departments all had better benefits.

“The third benefit is very easy to understand.”

“Every Feeder who joins the third bureau actually has a unique Feeding Talent.”

“They either have cultivation-type talent, reconnaissance-type talent, or research-type talent. In short, everyone’s talent is very special.”

“And in the third bureau, there are many resources with unknown effects but huge potential value.”

“Beast Tamers with these top-level Feeding Research Talents are actually the batch of people who have the greatest hope of researching and developing the true value of these resources.”

“Therefore, every member who joins the third bureau has the chance to choose a research subject suitable for their talent. For example, if a Feeder with a natural talent joins the third bureau, he can apply for a rare level-eight or even level-nine spiritual plant to nurture and study it, digging out its secrets.”

“For example, if Dr. Zuo joined the third bureau and she has a growth talent, she could totally apply for a special pet with huge potential but slow growth for her to nurture.”

“For you...” President Ye Hui smiled at Shi Yu...

“You have the gift of telepathy, and you have a lot of room for growth. In fact, I suggest you apply for a pet with huge potential to train.”

The main reason was that Shi Yu’s talent was only suitable for this. He couldn’t let Shi Yu study spiritual plants, right?

“It means that you can distribute a high-level pet?” Shi Yu asked.

“That’s about what I mean.”

“And the ones assigned are usually unique, or very rare, endangered species pets.. Only such pets are worth the effort of the members in the third bureau.”
