

Beast 251

Chapter 251: Machinery Reaching God's Forbidden Zone

In the ruins of Emperor Wu in downtown Wu Ling.

A long blockade line established by the Beast Tamer Troops wrapped the place tightly.

After all, there might be a totem inside.

Although it didn't look like an enemy totem, what if? If it came out, it would be troublesome.

"I've never felt so stifled in my life."

White Brook's uncle, Commander White, looked at the blockade and kept sighing.

At the moment, although Dong Huang's forbidden weapon had already locked onto Emperor Wu Ruins, if it fought with the totem in this geographical location, humanity would purely be harming itself.

The totems in the totem area and the totems in the human countries were two completely different levels of threat to a country. After all, no country wanted to throw forbidden weapons in areas with good economic development in their country.

"Commander... Commander Bai."

"There's a reaction from the ruins!"

During Commander Bai's daily patrol, suddenly, a soldier's voice attracted him, making him widen his eyes.

"What did you say?!!"

A moment later, under the gaze of hundreds of Beast Tamer Troops, the figure of four pets slowly appeared in the nine pillar teleportation area with a white flash.

At this moment, when they saw this figure, all the soldiers were stunned. They immediately cried. Wasn't this the Shi Yu they had been searching for nearly three months?

It looked like this disaster kid didn't die!

It was a good thing.

This meant that the totems inside weren't hostile.

"Shi Yu!!!" After discovering that Shi Yu had come out, Commander Bai arrived at the blockade and watched him from outside the teleportation area.

"Well..." Just as he came out, Shi Yu immediately understood what was going on when he saw the array.

He couldn't help but show an embarrassed expression. "Well, thank you for your hard work..."

"The totem inside..." This was what Commander Bai was most concerned about.

After a slight silence, Shi Yu said, "Probably... probably dead."

In the past two months, he had never successfully contacted Zhong Xuan again. When he came out, he also wanted to tell Zhong Xuan, but he didn't receive a response.

According to Zhong Xuan itself, it had probably used its racial talent to be reborn.

"Fuck, you destroyed the totem?" Commander Bai was shocked.

Everyon

Shi Yu: "?"

What was going on?

Many soldiers looked at their commander and were speechless. They had already said not to keep fusing with pig-type pets.

Shi Yu's face darkened. "How is that possible?"

Next, Shi Yu received the strictest care.

Soon, Legend Bai, President Bai, White Brook, Principal Feng and Lu Qingyi, who had been staying in Wu Ling City for the past two months, arrived.

When they saw that Shi Yu had come out unscathed, they were immediately pleasantly surprised.

"It's good that you're alright." Principal Feng laughed.

"Yay, you didn't lose an arm or a leg." White Brook punched.

Lu Qingyi smiled and didn't say anything.

Looking at Legend Bai, Principal Feng, Lu Qingyi, and White Brook in front of him, Shi Yu was silent.

Seeing so many people concerned about him, he was a little nervous.

He had probably caused quite a stir in the past three months of his disappearance. He had already expected it inside.

In order not to let everyone discuss him, Shi Yu could only quickly change the topic and say, "I'm fine, but I have something important to say."

"I made a big discovery inside. An archeological discovery."

Soon, all the relevant people gathered.

In a room, Shi Yu, Legend Bai, Principal Feng, and Bai Lu sat together.

Seeing how serious Shi Yu was with that complicated expression, the few of them were also taking this seriously. They temporarily shifted their attention from Shi Yu to what Shi Yu was about to say.

"Things are a little complicated

“The reason why the ruins of Emperor Wu changed, the reason why you were teleported out, and I was left behind is because a totem lives in the depths of the ruins space, and the true identity of this totem...”

“It’s Emperor Wu’s pet, Zhong Xuan.”

Shi Yu spoke slowly. As soon as he finished speaking, the pupils of Principal Feng, Lu Qingyi, and the others constricted.

“Holy shit.” Legend Bai was directly stunned.

“Zhong... Zhong Xuan... The legendary totem that has the bloodline of a divine turtle?”

“Wait, I remember that you cursed a turtle at that time. Was it because of this that you were left behind?”

Shi Yu :”...”

“How is that possible?”

Shi Yu quickly explained, “Actually, my guess that day was right. The Emperor Wu Ruins was indeed a training ground built by Emperor Wu to train the Iron-eating Beast Corps. Moreover, it was built by Chong Xuan.”

“The secret of the Iron-eating Beast’s second stage evolution is indeed stored inside.”

“Because Eleven and I performed too well on the Wei Lin Platform, we directly triggered the reward mechanism of the trial facility. Zhong Xuan was also awakened because of this.”

Everyone was a little stunned.

Especially Legend Bai, President Bai, and the others.

The few of them widened their eyes. Holy shit, Shi Yu was really right??

This luck was too damn good.

“Then?” White Brook couldn’t help but ask.

“I’ve come into contact with Zhong Xuan and also understood some lost history.”

“For example, the Wu Emperor Dynasty has a powerful iron-eating beast army.”

“For example, Emperor Wu himself also contracted a powerful Iron-eating Beast.”

“For example, Emperor Wu died from a battle with a demigod-level totem.”

“For example, the method for the iron-eating beasts to truly evolve into overlord races!”

Every word Shi Yu said shocked everyone. The entire Bai family was a fan of Emperor Wu, and as archeologists, Principal Feng and Lu Qingyi naturally cared about this very much. They couldn’t help but hold their breaths and listen to Shi Yu quietly.

“In short, because I was too outstanding, Zhong Xuan couldn’t help but pull me and help my Eleven complete the evolution.”

“Unfortunately, there aren’t many evolution materials stored inside... My Iron-eating Beast only evolved to a high-level overlord race with the help of Zhong Xuan. It doesn’t even have half the potential after complete evolution.”

Everyone:

‘They weren’t the ones with a problem. This Shi Yu was the one with a problem.

Damn it, was he using human language?

High-level overlord was looked down upon now?

President Bai and White Brook’s eyes turned red.

He had a pet of an overlord race that was already praised as legendary. Now that Shi Yu had a pile of them, was it appropriate?

Apity..?

Principal Feng said, “You stayed inside for two months just to evolve...? Then, what about Zhong Xuan??”

Shi Yu said, “No, the evolution wasn’t meant to be so focused on... The key is that Senior Chong Xuan is heavily injured and isn’t far from death. This time, it was purely shattered because we accidentally woke it up... It’s also the owner of the ruins, and it’s closely related to the stability of the ruins. If we’re not wrong, it should have fallen now. After that, the ruins space slowly stabilized, and we were able to come out...”

Everyon

“Zhong Xuan died??” Legend Bai was stunned, and his eyes exploded. Holy shit, how could it die?

Principal Feng, Lu Qingyi, and the others opened their mouths slightly. They wanted to say something, but they didn’t know what to say.

Shi Yu said, “Of course, it’s also possible that it didn’t die. It said that it still has hope of rebirth, but it needs hundreds of years...”

Their expressions changed again.

Was it any different from being dead?

Then, Shi Yu told the other party in greater detail about Emperor Wu, Chong Xuan, and Yun An.

‘When they heard that Emperor Wu Imperial Dynasty relied on the overlord race, the Iron-eating Beast Corps, to go against the half-god Yun An, everyone was momentarily at a loss.

“The greatest gain this time should be the iron-eating beast’s overlord race evolution plan,” Shi Yu said seriously.

“Among them, the most important evolution materials are the meteorite fragments.”

“Although other rare level-eight metals can also achieve the effect of evolution, I’ve checked. Those metals aren’t renewable resources. They have already disappeared from the historical stage, and the birth conditions are incomparably difficult. There are very few of them. In comparison, the meteorite fragment might be the only stable evolution channel.”

Meteorite Fragment

Principal Feng frowned and fell into deep thought.

“In other words, Emperor Wu pretty much took Yun An down with him, but Yun An might not necessarily be dead completely...” President Bai was solemn.

“It’s because it fought with Yun An that Emperor Wu could use the fragments of its body to steadily nurture the Iron-eating Beast’s second stage evolution form...”

“Well, actually... Zhong Xuan also gave me a piece of Yun An’s fragment, but the problem is that it said that if I used this thing, I would definitely be targeted by Yun An. That...” Shi Yu said, “So you understand, right?”

Legend Bai, Principal Feng, Lu Qingyi, and White Brook’s expressions gradually became rich.

This was guaranteed loneliness!!!

Ordinary totems, top-notch totems, half-gods... Half-gods were existences that stood at the top of totems. To find trouble with them?

Even if the stable evolution channel of the overlord race was important, the price to obtain it was a little too high.

“Actually, the most important thing is that Yun An might not necessarily be in its peak state now. After all, to revive it probably requires a huge amount of energy. If it still exists, it must recover its strength somewhere. Perhaps it doesn’t even have the strength of an ordinary totem now. This is the most important thing.”

“and to make a correction, perhaps it’s not a stable overlord race evolution plan, but a quasi-mythical race evolution plan. This is because it’s said that the more meteorite fragments used, the greater the evolution potential...”

Everyone:

“In short, let’s put aside our plans for Yun An first. If I use Yun An’s fragment... If it attacks, I should be fine, right?” Shi Yu asked quietly. “Can I use it?”

As Shi Yu finished speaking, everyone fell silent again.

Legend Bai had a headache. “You brought back impressive news.”

Archeologists were indeed all busybodies. Their Wuling City had used this ruin for decades and it was all fine, but Shi Yu had come with a bunch of trouble.

“If Yun An comes to Dong Huang because of this, things won’t be so complicated. Then it’s probably not far from becoming a renewable resource,” Principal Feng said.

White Brook said, “In other words, it’s very difficult to take the initiative to choose if you want to provoke a creature suspected to be a demigod because of a stable overlord race channel. You have to consider the gains and losses.”

“On the contrary, if it takes the initiative to attack, there’s no need to be conflicted?”

Legend Bai said, “That’s roughly what it means. This is the difference between taking the initiative to fight and being forced to fight back.”

“The act of initiating a battle with a totem area’s totem requires at least the approval of most of the legends and higher-ups in the country. Our Dong Huang main battle faction is actually still very small.”

“Moreover, if we can destroy Yun An for resources today, it might be thought that we might also attack the other totems tomorrow. It won’t be good if the totems also form an alliance.”

“The number of forbidden machines we use to deter totems is limited after all. If a large-scale battle breaks out, it will be disadvantageous for us.”

“In that case, law enforcement is the best choice?” White Brook asked.

Lu Qingyi: “... The premise is that Yun An really runs over here foolishly, but it’s impossible no matter how I think about it.”

At this moment, as he listened to everyone’s discussion, Shi Yu felt relieved.

Legend Bai said, “In my opinion, we can investigate Yun An’s information first.”

“After all, we’re the ones taking the initiative now.”

“If it hasn’t recovered yet, it’ll be easier to bombard it directly. In any case, the next totem battle will happen sooner or later. The benefits of being able to settle one of our forces in advance are definitely greater than the disadvantages.”

White Brook said eagerly, “I suddenly feel a little sorry for Emperor Wu... Speaking of which, how many forbidden weapons would it take to defeat Yun An?”

‘The opponent that Emperor Wu could only defeat with all his might was countered by the modern Mechanic class.

After all, the forbidden mechanical weapons and mechanical army of Dong Huang Totem only had one attack skill to deter the totems.

Self-destruct.

‘An incurable injury?

There was no intention to get injured in the first place.

Only this extreme battle strategy could make the totems tremble in fear.

Legend Bai said, "Sigh, although Emperor Wu is strong, the era has changed."

"As for how much needs to be used, it's hard to say."

"Although the divine-level forbidden weapon that that person developed can kill demigods, the problem is that there are limited numbers. The cost of creating it is too high, so it's impossible to easily activate it."

"Back then, it was because the divine forbidden machinery killed three foreign demigods that the totem battle in the world quickly ended. However, we have to be especially careful when using this thing. If we use it all, we won't have any weapons to threaten the totem creatures."

"Machines can reach the forbidden power level of Gods, but the premise is that our firepower is strong enough."

Not only could divine forbidden-type forbidden machines lock down space and lock onto enemies, but they were also suitable for various extreme environments such as the ocean and space. Moreover, they had a strong destructive effect on the soul and mind, not something ordinary forbidden weapons could compare to.

This was Dong Huang's final trump card.

"We definitely can't use a divine forbidden-level mechanical life form easily. If Yun An hasn't recovered to his full strength and we can rely on ordinary forbidden weapons to solve it... Even if we need ten ordinary forbidden weapons, such a resource exchange is worth it. After all, the cost of creating ordinary forbidden weapons isn't that high. The only difficulty is that we need a legendary Beast Tamer to activate them."

"But for a big matter of this level, everything will definitely depend on that person's decision."

"Ah..." White Brook was slightly stunned.

This was the first time Shi Yu had heard these important figures discuss the mechanical legend.

He said, "Will this matter alarm that person?"

Principal Feng glanced at Shi Yu and shook his head. "Let's make the decision first."

"That person no longer exists in the form of a human. After gathering resources in the country and creating a large number of forbidden machines, in order to prevent accidents from happening, he has already modified himself into a Mechanical Heart and turned into a consciousness to supervise all special types and forbidden machines."

"Under normal circumstances, he's sleeping. He can't be awakened easily."

Shi Yu was slightly stunned before nodding.

"Then I'll leave it to you..." After explaining the situation in Emperor Wu Ruins, Shi Yu knew that he couldn't interfere anymore.

It was up to the association to decide what to do next. He only needed to develop slowly now.

Perhaps, before the decision was made, he would already be a legend?

“By the way.” At this moment, Lu Qingyi looked at Shi Yu.

“Oh?” Shi Yu turned around.

“Recently, something big happened that’s related to you.”

“The Ice Dragon on the Ice Dragon Snow Mountain, the battle beast of General Mu Huiyin, broke through to the totem level not long ago and became an Ice Dragon Totem.”

“It has already made a decision to cooperate with humans to completely destroy the Ice River Totem.”

Shi Yu: “?”

“What?!”

Shi Yu widened his eyes and looked at Senior Lu.

“Aunt Ice Dragon advanced to totem level??”

Lu Qingyi nodded and said, “Yes...”

“After only talking once last time, it directly went to sleep and cultivated. When it woke up, it broke through to the totem... By the way, it said it wanted to see you. To be precise, it wanted to see your sword spirit.”

Principal Feng and the others had strange expressions.

Good heavens, he had contracted the heroic spirit of its master. It was time to meet it.

However, wasn’t Shi Yu’s experience a little too rich?

In just a year, the Ice Dragon, Zhong Xuan, Undying Dark Phoenix... He was related to a bunch of totems!

At this moment, Shi Yu was silent.

This.

Initially, he was still feeling regretful that he couldn’t cozy up to Senior Zhong Xuan, but... Aunt Ice Dragon actually advanced to totem?

So awesome?

Then, couldn’t he directly rely on Little Chi Tong’s background to become Aunt Ice Dragon’s associate and become its spokesperson to enter the first bureau? That would be living up to the name of his goddess!

“Let’s put the matter of Yun An aside first. You guys can slowly work it out. I, a little master, won’t interfere. When can I return to Ping Cheng?” Shi Yu said.

Everyone :” ...”

Principal Feng said angrily, "Let's settle the matter here first. I beg you, don't mess around anymore, although this time... it wasn't a loss!"

Legend Bai cried at the side. It was not a loss for the archeological discovery, but the economic loss of Wu Ling City this time directly went up to one billion.

Fortunately, the Emperor Ruins was alright!

"Wait."

Principal Feng suddenly discovered the blind spot.

"You're a master?"

Shi Yu said, "Well, thanks to the Space Crystal Stone President Ye gave me, I've been holding it in for two months. I even successfully broke through to the master level, but my pet hasn't broken through to the monarch level yet."

Everyone

Holy shit, these two months have been especially fulfilling.

"Wait, wait, wait, wait. The most important thing is how strong your Eleven has become!! Hurry up and tell me," White Brook couldn't help but say.

'The news she received today was too explosive.

Emperor Wu had an Iron-eating Beast??

Then she had to contract one too!!!

An overlord race.

'Was money a problem??

No!

"Very strong. In short, it's not a loss to nurture iron-eating beasts. Senior, there are still three little iron-eating beasts with very good aptitude at Ancient Capital University. Look and choose one for yourself and Senior Lu. Believe me, it's definitely not a loss!!"

White Brook and Lu Qingyi looked at each other. In any case, White Brook was very tempted.

But words were useless.

Legend Bai, Principal Feng, and the others looked at each other.

"Speaking of which, after discussing for so long, shouldn't we confirm the strength and potential of the iron-eating beasts of the overlord race first?"

This was the most important thing that determined the decision of the upper echelons of Dong Huang.

"This..." Shi Yu nodded and said, "Sure. "

“Should I directly show it or use it to fight? I think... it should still be pretty strong at the moment. Although it’s only at the commander rank, it shouldn’t be a problem to defeat ordinary monarch ranks.”

Legend Bai, Principal Feng, and the others had strange expressions. Good lord, look at this arrogant speech.

At this moment, President Bai, who had been unable to interject, suggested, “Haha, then I feel that you can completely take a master-level assessment while you’re at it. I happen to have a friend who’s on a business trip to Wuling City. He has a sealing talent, so he should be able to test the various skill

limits of your Iron-eating Beast very well. This way, the data you guys obtain will be more accurate.”

“Eh, wait, you guys definitely know him too. He’s Master Qu Jie from the ancient capital.”

Principal Feng, Shi Yu, and White Brook:

Again.

Chapter 252: Third Time’s the Charm

Master Qu Jie...

Upon hearing this name, Shi Yu felt an inexplicable sense of closeness.

Was this what it meant to meet an old friend in his hometown? It wasn’t only Shi Yu. Principal Feng and the beast-eared girl, who had accompanied Shi Yu to participate in the high-level assessment, were also very emotional.

Oh shit, didn’t this save trouble?

Didn’t Master Qu Jie say that he would prepare Shi Yu’s master license first?

He could get his license immediately after this fight. Not bad. “Can I... Then I’ll have to trouble Master Qu Jie.”

Shi Yu looked at President Bai in embarrassment.

President Bai laughed and said, “It’s alright. We’re old friends. This small matter is nothing.”

Wu Ling City. Just as he finished eating with the masters from the assessment office of the Wu Ling Association, Master Qu Jie returned to the hotel in a relatively good mood.

At this moment, his phone rang. “Old Bai? Has everything been settled? Why did you suddenly leave?”

After picking up the call, Master Qu Jie asked.

Because they had sealed the news, he clearly didn’t know that White Brook’s uncle had suddenly left the gathering because of Shi Yu. “Haha, soon, soon. Old Qu, are you done eating over there?”

“I’m done.”

“I might need your sealing talent to help out a little. Are you free?”

“It’s just a master assessment for a Beast Tamer and testing the limits of a few skills. His situation is relatively special. He broke through to the master level himself. His pet is still at the commander level, but his pet can display the battle power of a monarch level. Do you have time?”

“Oh?” Master Qu Jie revealed a surprised expression. A genius of the Bai family?

This situation was indeed relatively special.

Under normal circumstances, this was still considered a “quasi-master”. Without a monarch-level pet, it was always a quasi-master.

However, President Bai said that the other party had monarch-level battle power, so it was clearly not as simple as an ordinary quasi-master. Master Qu Jie thought for a moment. Perhaps only the Bai family’s Fusion Talent could allow commander-level pets to display monarch-level strength.

After all, after a Beast Tamer and pet fused, their strength would undergo a qualitative change.

“No problem,” Master Qu Jie agreed directly. Wasn’t this his job? Simple, with his relationship with Old Bai, he could still help with this little favor.

For President Bai to come to him directly, this person must be especially valued by President Bai...

A moment later.

On a battlefield near the ruins of Emperor Wu.

Master Qu Jie arrived not long after.

Moreover, he discovered President Bai and the others waiting for him at the designated location.

Master Qu Jie looked over... Apart from President Bai... There was also a group of people.

It was fine if there were more people, but after carefully judging these people’s identities, Master Qu Jie was a little stunned.

“Holy shit.”

Legend Bai of the Bai family, Principal Feng of Ancient Capital University, Lu Qingyi, White Brook, and... Also, f*ck, Shi Yu?

Almost instantly, Master Qu Jie’s heart skipped a beat as he realized that something was wrong.

Where was the master who wanted to take the assessment?

Bai Legend and Principal Feng definitely weren’t. Lu Qingyi and White Brook had long been masters. They also had monarch-level pets, so they definitely weren’t. Then, then...

Apart from them, Master Qu Jie locked onto Shi Yu at a glance.

At first, he was at a loss, but then his heart was in a mess.

Don't tell him it was that kid, Shi Yu!

Damn, wasn't this Wu Ling City??

He was already on a business trip!

Why were these people still here!!

He subconsciously turned around, but President Bai had already discovered him. 1

"Old Qu, where are you going? We're here."

Master Qu Jie : "..."

"I, I..."

Seeing that, Master Qu Jie sighed in his heart. It looked like he couldn't dodge anymore. After a moment of depression, he could only smile and greet his acquaintances.

"Hahahaha, isn't this Principal Feng, Dr. Lu, and White Brook and Shi Yu? Why are you all here?"

"Old Master Bai, long time no see."

"Master Qu Jie," Shi Yu and the others said.

"Long time no see." Legend Bai and Principal Feng chuckled.

The corners of Master Qu Jie's mouth twitched as he looked at President Bai and said, "Well, well, where's the candidate you mentioned?"

"It's me, Master Qu Jie," Shi Yu said.

He f*cking knew it was him! 2

Master Qu Jie cursed in his heart.

Wasn't the vocation assessment passed more than half a year ago? The advanced assessment was passed only three months ago? Why the f*ck...

What exactly was wrong?

"You broke through to master?" After cursing in his heart, he asked in pain.

No matter how he thought about it, it didn't make sense.

Shi Yu: "Yes, I used a Space Crystal Stone and other methods to accelerate... It was quite sudden."

Master Qu Jie : "..."

It was relatively simple to meditate below the master level. At the stage where it was the easiest to cultivate, one could break through as long as one was willing to endure the time, Shi Yu used up hundreds of millions of yuan and used the strategic resources controlled by the association to cultivate. Master Qu Jie didn't know what to say.

He suspected that this group of people had joined forces to give him a fright.

Be it Lu Qingyi or White Brook, they were definitely not as extravagant as Shi Yu!

“So you mean... you want me to give Shi Yu an assessment??” Master Qu Jie had a bitter expression.

They were scaring him!

Giving this young man an assessment... Was there a need for two former legendary Beast Tamers?

Principal Feng and Legend Bai were both legendary Beast Tamers who had retired because of age and various reasons. Lu Qingyi was a quasi legend, and President Bai was also a big shot who was busy every day. These people were all here to see Shi Yu’s assessment?

Because of his previous two experiences, he definitely didn’t believe that there was no conspiracy this time.

“Actually, I’ve long prepared Shi Yu’s master license,” Master Qu Jie said.

President Bai said, “??? What’s with that? Well, but the main thing about this license isn’t the license. It’s mainly to let you experiment with a few skills.”

Master Qu Jie’s ominous feeling became even stronger.

“Why is it so sudden? Did something big happen again?” He had to ask.

Shi Yu said, “It’s nothing. It’s just that my Iron-eating Beast has evolved to a high-level overlord race and awakened three new super racial skills. Everyone needs to collect new pet data.”

“Holy shit.” Master Qu Jie almost jumped up.

Huh??? He widened his eyes.

Weren’t you, weren’t you the middle-level overlord race’s Butterfly of Imagination that had evolved recently?

What was this high-level overlord doing here?

“Master Qu, you’re a professional in this kind of thing. There shouldn’t be a problem, right? The final data will be handed to the higher-ups to see,” Legend Bai said with a smile.

Master Qu Jie wanted to cry.

He kept feeling that he had been pulled into a den of thieves by President Bai.

It could be called above by Legend Bai. As for the headquarters?

What was going on? “It’s.. It’s not a big problem,” he said.

“Wait, President Bai, you just said that Shi Yu’s pet is only commander rank? It hasn’t broken through to monarch rank?”

President Bai?

White Brook’s uncle didn’t understand why he suddenly was so polite.

However, he still nodded and said, "Yes." "Then how many pets will be tested?" Master Qu Jie asked the most important question. He was really afraid that Shi Yu would use another possession tactic. "Just an Iron-eating Beast," Shi Yu said.

Upon hearing that, Master Qu Jie suddenly calmed down.

"I see."

That was alright...

Common sense. The commander-level single-body energy bottleneck was 200,000. No one had ever broken this rule.

Even if it was a creature of an overlord race, its energy level couldn't be too high due to the limited growth.

It was even considered pretty good for ordinary overlord races to have more than 100,000 energy points at the commander level.

The growth of Shi Yu's Nine Li Battle Beast was very high. Even if it steadily exceeded 100,000, it definitely couldn't exceed 200,000.

And this time, it was the master-level assessment. In other words, it was fine for his pet to casually use millions of energy points.

In this situation, it was another one-on-one battle and an energy suppression. How could he fail!

"Alright." After thinking it through, Master Qu Jie suddenly relaxed.

[Old Bull, your chance for revenge is here. This time, you can be a teacher and guide the other party fiercely.]

[It's Shi Yu again, it's the Iron-eating Beast again!]

[Master assessment!]

Although the Ox-Headed Beast King was Master Qu Jie's weakest pet, it was Master Qu Jie's initial pet. The relationship between the two parties was the

best.

Because of the previous two accidents, Master Qu Jie was the first to think of Old Bull.

He had to take revenge for this, or it would affect his relationship with the old bull.

[Ox-Headed Beast King:??]

[Roar!!!]

No.

[The other party has less than 200,000 energy points. You can use all your strength, that is, more than a million.]

In the Beast Taming Space, Niuniu was stunned. This time, the Beast Tamer finally stopped scamming?

In the outside world, Master Qu Jie recovered his smile. He still felt that the idiom “third time’s the charm” was right.

Soon, the few of them entered the battlefield.

The others stopped. Master Qu Jie and Shi Yu only stopped when they walked onto the arena.

At this moment, Master Qu Jie summoned his pet.

In the arena, dark red flames formed. The huge Ox-Headed Beast King phantom slowly appeared. It held a battle ax and had a sharp and serious gaze.

“Roar!!!”

This time, Shi Yu was slightly stunned as he looked at the tall Ox-Headed Beast King.

Because the energy of the Ox-Headed Beast King without the seal was as high as 1.31 million. In any previous battle, it didn’t even use a fraction of its strength.

“Roar!!”

With all its strength, the Ox-Headed Beast King was very happy, its expression rather unfriendly.

This time, 1.31 million energy points... Could it still insta-kill it?

However, Shi Yu’s expression was a little strange.

Why was it the Ox-Headed Beast King again!

As a top-notch master, Master Qu Jie could theoretically fight against overlords.

Compared to his title, this Ox-Headed Beast King’s strength was clearly a little lacking. At the same time, Shi Yu was a little worried that it couldn’t block Eleven’s eruption...

“Summon your pet.”

“Alright.”

Upon hearing that, Shi Yu nodded.

A blue spatial ripple appeared in front of him, and a small Iron-eating Beast less than a meter tall slowly walked out.

Looking at Eleven, who was getting smaller and smaller and shrinking every time they met, the corners of Master Qu Jie’s mouth twitched.

“Wu Wu Wu.” Eleven greeted his opponent.

“Roar!” The Ox-Headed Beast King glared back.

At the same time, as Eleven appeared, the expressions of Principal Feng and the others changed slightly.

Through the energy value detector, after Eleven appeared, the number on it quickly changed.

One, ten, a hundred...

“195,764?”

As Eleven’s energy level was confirmed, Legend Bai exclaimed.

Holy shit.

This was a commander rank pet’s energy points?

Beside him, Lu Qingyi, White Brook, and the others were slightly stunned.

One had to know that three months ago, Eleven’s energy level was only 110,000. How could an evolution change so much?

What kind of ridiculous value was this!

“F*ck.”

On the arena, Master Qu Jie’s ears twitched, and his expression darkened. It didn’t exceed 200,000, but was it really that high? How could it be?

This energy value was double that of other overlord pets of the same level of growth!

He directly understood why Shi Yu said that the Iron-eating Beast had monarch-level battle power.

Because the Iron-eating Beast’s super racial skill was Inner Power, its energy efficiency was extremely high.

It could unleash all its strength and the additional power stored in the source of physical strength at the cost of serious injuries, temporarily unleashing several times its battle power!

However...

Fortunately, the difference between it and the Ox-Headed Beast King was still very large.

“Well, do you want to use the Ox-Headed Beast King to seal a portion of its power?”

Master Qu Jie asked.

After all, Shi Yu and the others’ needs were the priority in this assessment.

He felt that it was nothing to seal the energy of the Ox-Headed Beast King to 1 million.

The Ox-Headed Beast King:??

Get lost.

“No need, no need...”

At this moment, Shi Yu scratched his cheek and said, "Speaking of which, should our skills be tested one by one, or should we manifest it in the battle assessment and finalize the data?"

"Actually, I feel that these three new skills are quite unsuitable to be displayed alone. It needs to rely on combination skills in battle to display all the tactical value."

"It might not be a big deal to take it out alone, but when combined, it can fight a monarch."

Master Qu Jie said, "Up to you. We... We can do anything."

Legend Bai, Principal Feng, and the others nodded.

There was no hurry. There was a long time. There was plenty of time today.

In everyone's opinion, the outcome of this battle was not the main point.

No one expected Shi Yu to win.

The main point was to test the potential and battle power of the Three Inscription Nine Li Battle Beast!

A comprehensive battle and a single test had to be carried out!

However, although the Iron-eating Beast's energy level was indeed high, was it really appropriate to challenge an opponent whose energy level was six times higher than his own level?

If the opponent wasn't suitable, they would also be inconvenient when the skill was displayed.

"Alright, let's begin."

Shi Yu nodded and was already prepared to command Eleven to battle.

"Come, let me see how strong you've become now."

"Roar!!!"

The Ox-Headed Beast King raised its ax. At this moment, it was the one who wanted to fight the most.

Beast Tamer, well done. After winning this time, it would listen to him.

"What do you think the outcome will be?"

In the audience, Principal Feng and the others sat and thought.

Shi Yu was very mysterious. He didn't reveal the Iron-eating Beast's new skill along the way...

Just how powerful was this skill?

To make Shi Yu so confident and even think that he could challenge a monarch-level pet...

"Tsk, in any case, I don't really believe it." Legend Bai chuckled and said, "I think that maybe this kid hasn't experienced a beating and is arrogant."

“It’s not like I haven’t seen high-level overlord races before. To want to rely on transcendent skills at the commander rank to challenge old monarchs... The difficulty is very high.”

He himself had a pet of a high-level overlord race. He believed that even if he fused with this pet at the commander rank, it would be very difficult to fight above his level.

This was a difference of a million, not hundreds of thousands!

The Iron-eating Beast didn’t even have a fraction of the Ox-Headed Beast King’s energy!

“I think it can be done.” White Brook licked her lips.

Legend Bai:??

How could she mess with family like this?

“Why?”

“Isn’t it good to be strong? The Iron-eating Beast’s training ground is on our territory!!” White Brook seemed to have been possessed by a panda senior.

As everyone discussed, in the arena, Master Qu Jie saw that Shi Yu and the others had yet to move. He attacked first!

It wasn’t accurate.

Both parties should have attacked together.

However, on Master Qu Jie’s side, the Ox-Headed Beast King erupted with deterrence.

As for Shi Yu’s side, it was Shi Yu who attacked!

Everyone was stunned and looked at Shi Yu’s hand.

Shi Yu opened his hand, and on it were ten black metal balls.

Shi Yu directly threw ten metal beans onto the arena.

The next moment, the black metal bean was like a seed as it quickly absorbed external nutrients. White light lingered and evolved into small Iron-eating beasts that were identical to Eleven.

Each of them had about 40,000 energy points.

“Wu Wu Wu.”

The group of bean bears surrounded Eleven.

On one side, it was the powerful skill of deterrence, specializing in destroying cannon fodder. On the other side, they just happened to create a pile of fodder. At this moment, everyone clearly couldn’t react.

“Roar!!!!”

In the blink of an eye, as the Ox-Headed Beast King roared, the explosive fire deterrence swept up in all directions. Soon, everyone’s expressions changed slightly.

The Ox-Headed Beast King's expression was fierce as it howled in anger. The heat wave around its body began to sway. The substantialized red deterrence directly made the arena red. The perfect-level deterrence turned into a fire tornado that instantly swallowed its opponent!

However, in the face of such a powerful skill, the power displayed by the eleven little bears directly stunned everyone.

"Wu Wu Wu."

In the crowd, in the arena, eleven little Iron-eating Beasts immediately had golden light lingering around their bodies. Then, the golden light on their bodies resonated, turning into a huge golden domain that enveloped them.

Boom!

The Golden Domain was like a huge illusory city. It was unbreakable, and it shot out a shocking light. The golden flames were incomparably dazzling. The Panda King Eleven stood in the center. Impregnable at the Dao Proficiency level triggered the ten Little Iron-eating Beasts' expert-level impregnable skill. It directly resulted in the army resonance skill!

In an instant, deterrence and impregnable collided. A shocking scene appeared.

Under the protection of the golden domain, not to mention the Panda King Eleven, who was protected in the center by the ten Bean Bear soldiers, even the ten weak Bean Bears were actually unscathed in the face of the perfect deterrence of a monarch-level pet!

Because the strong deterrence directly disappeared with a bang when it touched impregnable.

"How is this possible!"

"Roar!!"

Seeing this scene, Master Qu Jie and the Ox-Headed Beast King widened their eyes.

Holy shit.

What the f*ck was this?

"During this evolution, a total of three super racial skills were awakened. One of them was the condensed bean soldier of the metal and wood elements." "This skill is relatively special. It's a special skill that can be preserved for a period of time as long as the distance doesn't exceed the pet's main body."

Shi Yu was excited. This was the correct way to condense beans into soldiers.

He would create the Bean Bear Soldier in advance and release it at the critical moment. As long as he recovered his physical strength in advance, it was equivalent to ten free subordinates.

At the moment, although the eleven little Iron-eating Beasts on the arena were much weaker than the Ox-Headed Beast King, with the impregnable army resonance skill, not only could their strength condense together, but they could also display greater strength!

The only disadvantage was that this move could only be defensive, and it consumed a lot of energy.

“Roar!!!” The Ox-Headed Beast King suddenly widened its eyes and looked at its Beast Tamer.

Wasn't this f*cking cheating???

It was fine if he had placed the Bean Bears in advance, but why did he have a f*cking resonance skill? Moreover, he was so proficient in cooperating.

“I...” Master Qu Jie's heart skipped a beat when he saw that the opening was disadvantageous. Why were all these abnormal super skills here?

This bean soldier was the same as the Inner Power. Obviously, it was also a super cheating skill!

“Wuu!!!” In the next second, Panda King Eleven waved a hand. It took a step forward, and the ten Bean Bears surrounding it also took a step forward. The huge metal domain that enveloped them also pushed forward. It directly pushed it towards the Ox-Headed Beast King!

“Roar!!!”

Seeing this, the Ox-Headed Beast King widened its eyes and swung its ax in anger! However!

Boom!!!

Its ax hit the golden dome, but only a crack was opened. It couldn't break through its defense. Instead, the powerful rebound forced it back a few steps!! It was impregnable. Not to mention mental, physical, and elemental attacks, it could even defend against soul attacks!

Holy shit.

Seeing this scene, Principal Feng and the others, who were sitting and watching, were overjoyed.

“This...”

They opened their mouths slightly. It was actually Bean Soldiers... “It's the same as Inner Power. It's one of the top skills of the metal element.” “I know this move, a very rare army skill. I didn't expect...”

Everyone was clearly not unfamiliar with this skill.

However, when the same skill was used by different pets, the tactical value was also different. The combat effect was the most important! For example, in front of them, the Iron-eating Beast had the army resonance skill known as impregnable. The effect of it being used to form soldiers was very good!

This skill was simply made for Iron-eating Beasts with the impregnable racial skill!

“You guys... You brats...” At the same time, in the arena, Master Qu Jie's expression changed continuously. He was clearly very shocked by this combination skill. However, did they think that he could fight a monarch with just a defense-type army resonance skill?

It wasn't that simple!

“Old Bull!”

“Attack!”

After being flaunted by Shi Yu and the others, Master Qu Jie no longer spoke about virtue. He directly let the Ox-Headed Beast King use its expert level super skill, the Flame Bath Battle Soul!

Boom!

After the Ox-Headed Beast King stabilized its body, a huge Bull Demon Flame phantom appeared behind it.

This was a super fire-element skill. It could summon the Flame Battle Soul and fight together. During the existence of the Flame Battle Soul, it could increase the user's strength, defense, speed, fire power, battle will, and injury recovery speed!

Although it wasn't as extreme and violent as Inner Power, it was a skill that increased battle power in all directions.

"Roar!!!" With the battle soul on its body, the Ox-Headed Beast King cracked the ground. It suddenly jumped up and swung its ax in the air again, wanting to completely shatter the impregnable fortress.

It looked at the eleven little iron-eating beasts protected by the metal city and was angry.

However.

It wasn't like Shi Yu didn't do anything when it condensed the fire soul.

Eleven stood on the spot and directly released the hardening substance, covering every bean bear with its hardened substance through the ground.

To be precise, this was not an ordinary hardening substance, but a hardening substance that Eleven had given the Lightning Rod attribute!

At the same time, lightning lingered on the hardened substance on Eleven's body.

Click.

Originally, when they saw Eleven use Hardening to strengthen the Bean Bears, they were a little confused. But in the next moment, as the sky rumbled, White Brook and the others immediately looked up at the sky and opened their mouths slightly.

Boom!!!

At this moment, the electric arcs on the hardening substance covering the eleven iron-eating beasts were already flickering very intensely.

Boom!!!

Another deafening sound. Dark clouds instantly appeared in the sky above the arena. The speed of the lightning clouds condensing was terrifyingly fast.

It was as if the natural power of lightning in Wu Ling City was attracted.

The sky was pitch-black, and the thunder was deafening.

There was no rain or wind, and the surroundings were extremely calm. In the thunderclouds in the sky, only lightning rolled crazily with a terrifying might.

The sky immediately darkened. The light of lightning lit up the bodies of every Iron-eating Beast, especially the Panda King Eleven, who was surrounded by the Bean Bears. At this moment, it was like a thunder god.

Under the lightning, the Ox-Headed Beast King that slashed down from the sky was stunned. Its ax landed on the golden fortress, and the entire impregnable fortress, even if it was an army skill, was instantly disintegrated in the face of absolute power. But at the same time...

Boom!!!

A bolt of heavenly lightning directly streaked across the sky, and then the lightning clouds turned into a lightning pool. The thunder didn't stop, and the sky turned from dark to bright, turning into a white ocean that illuminated the surroundings like the dawn before the end of the day.

"God's Punishment!"

As Shi Yu finished speaking, Little Eleven raised its arm and swung down. With a boom, all the power of the white lightning sea in the sky condensed into a huge lightning pillar that tilted down with a bang. Just as it cracked the protection, the Ox-Headed Beast King was suddenly attracted by the change in the sky.

The speed of the lightning was very fast. Just as the Ox-Headed Beast King raised its head, the next moment, the lightning pillar that enveloped the entire venue directly descended and swallowed all the pets, including the Ox-Headed Beast King, Eleven, and ten Bean Bears!

At this moment, Master Qu Jie, Legend Bai, Principal Feng, Senior Lu, Senior Bai, and the others' expressions changed.

What was this?

It could mobilize the power of nature on such a large scale??

"The Lightning Rod can transform itself or external objects into a physique that attracts natural lightning."

"Heavenly lightning will indiscriminately destroy everything around it."

Amidst the ten thousand thundering sounds, Shi Yu didn't care if everyone could hear him. The moment the lightning descended, the ten Bean Bears that were used as sacrifices to guide the lightning were the first to fall. Even if they had saved lightning, their bodies were instantly shattered by the huge power of the lightning

At the same time, the Ox-Headed Beast King was also experiencing the terrifying heavenly lightning baptism!!

"Roar!!!" The Ox-Headed Beast King's defense was still strong. Even if it was facing natural lightning, it still endured it. In the lightning, it felt pain and glared at Eleven. It didn't expect that it would actually be

injured consecutively by a commander-level pet. However, as it looked at Eleven in the lightning, it suddenly felt a sense of danger.

The Bean Bears couldn't withstand the natural lightning led down by the 11 Thunder Rods, but Eleven, who had the source of stamina, the lightning immunity, and the max-level storage lightning, could.

“Wuu!!!!”

In the lightning pillar, lightning lingered. Eleven seemed to have been released. Lightning lingered in its eyes, and its body gradually began to expand from a meter tall to incomparably huge. Soon, against the lightning, it became a huge lightning beast ten meters tall!!

Moreover, during this process, the evolution light lingered around its entire body. Its sharp mode erupted with all its might, directly transforming into the form of the Nine Li Battle Beast. The power of lightning was also quickly absorbed into its body!!

Shi Yu and Eleven called this huge explosive form that absorbed the power of the huge heavenly lightning into the Thunder God Armor Mode.

Under the cover of the black and silver armor, the huge Eleven revealed two eyes that seemed to contain lightning. At this moment, there was no lightning in the arena anymore. All the lightning was absorbed into Eleven's body...

This result was that the violent electric current flowing from Eleven's body made the monarch-level Ox-Headed Beast King opposite extremely shocked. It looked at the Nine Li Battle Beast that was countless times taller than it... A while ago, it was like a little kid looking up at it!

It wanted to move, but the transcendent deterrence that contained the power of lightning erupted from Eleven's body directly exploded in the Ox-Headed Beast King's heart like a thunderbolt, causing it to be in a daze.

“No way...” “Could it be...”

“How is this possible...”

Seeing Eleven absorb all the lightning so bravely, everyone was shocked. They looked at Eleven, who slowly clenched its fist, raised its arm, and pulled it back...

In the next moment, a ball of light wrapped in white lightning covered Eleven's huge hardening fist. Moreover, under the enhancement of the huge transformation of the skill, although Eleven didn't become too big, the move it condensed this time increased extremely quickly and became extremely huge. Space-shaking!!!

Boom!!!

After condensing, Eleven directly threw a punch. It didn't hit the Ox-Headed Beast King, but directly hit the air. But at this moment, everyone heard a huge sound that was expectedly destructive. They felt a power that could destroy everything!

In the huge vibration sound, with a crack, the space directly shattered. The space where the entire venue was located was directly like a broken mirror, constantly producing cracks like white lightning and

black lightning!! “Roar!!!” At this moment, the Ox-Headed Beast King sensed a fatal threat, and its huge pupils constricted.

At that moment, it faced Eleven’s full-strength eruption that had the help of the Inner Power and the storage lightning that had exceeded the limit of absorbing the power of eleven heavenly lightning!! 1

Under the stimulation of the Thunder Armor, Eleven’s strength reached the limit. The shocking power smashed out a shock wave, and after the enhancement of the hundredfold enlargement, Eleven finally threw out all his

strength.

Only Shi Yu’s pet, who was filled with full level skills, could do this kind of incomparable explosion. Only Eleven, who was not afraid of backlash, could do

At this moment, in the eyes of the Ox-Headed Beast King, Eleven didn’t look like a commander-level pet anymore... “Roar!!!! (Stupid Beast Tamer!!!!)” “Roar!! (This is f*cking 200,000??)”

“Roar!!! (You***, Your damn****)”

The Ox-Headed Beast King was roaring, but facing the terrifying attack that was not only enhanced by the giant transformation but also wrapped in deterrence, it could only resist.

Moreover, the affected range of this move was the entire venue. “F*ck.” At this moment, after being scolded by the Ox-Headed Beast King, Master Qu Jie had already lost his ability to think because he also sensed the horror of this move.

With his many years of self-sealing experience, he wanted to ask if this was actually a pet with 200,000 energy points and not 2 million??

At this moment, Master Qu Jie couldn’t help but be a little at a loss. He felt that he had lost his dreams. At this moment, he also wanted to shout in complaint that this was a f*cking commander rank!!

“What the f*ck are you monsters!!” Master Qu Jie finally widened his eyes. Then, his vision was enveloped by white light. 2

In the blink of an eye, the real world shattered like a mirror. The attack that contained terrifying power directly shattered everything, sweeping with incomparable vibration power and devouring the Ox-Headed Beast King.

Under the interweaving of the white lightning and the black spatial crack, everything in the entire venue shattered almost instantly. The huge vibration power even rushed into the sky, instantly tearing open a hundred-meter-long natural chasm in the sky!!

Nearby.

Many people stopped and looked at the change in the sky in confusion.

Then, they covered their ears in fright.

Boom!!!

At the same time, even with the protection of the Flame Battle Soul, the Ox-Headed Beast King's body almost instantly disappeared in the face of Eleven's attack that had also injured itself 90%. Its pupils also instantly turned white. A strong vibration directly attacked its body, causing it to be heavily injured. "Ugh... (Stupid Beast Tamer...)"

Until the last moment of its consciousness, the Ox-Headed Beast King was still cursing. It only felt that this world was all a lie.

This time, it was another scam.

It didn't even need to be sealed... It couldn't win with its full power.

Master Qu Jie : "..."

This time, Master Qu Jie's mentality exploded. He finally understood that if he gave Shi Yu another assessment, he would be an idiot!! This boy was not human at all!!! Also, President Bai wasn't his friend anymore! 2

A moment later, the Ox-Headed Beast King completely lost consciousness. Master Qu Jie also lost his ability to think. The dust had settled, but the venue was definitely gone. Legend Bai, Principal Feng, Lu Qingyi, White Brook, President Bai, and the others watched everything in silence, similarly speechless.

It was a little suffocating. Who would have thought that the "not inferior to a monarch" Shi Yu mentioned referred to relying on the commander level to challenge a powerful enemy that was one million energy points higher than it?

"Aba." At this moment, after being stunned for a moment, Legend Bai and Principal Feng cursed in their hearts.

Was it certain that this was a high-level overlord and not a high-level Mythical race?

"Space Quake can give the power of vibration to the metal substance or to hardening. The higher the level of the metal substance, the stronger the power of the spatial vibration, the greater the strength of the body, the stronger the power of the spatial vibration..." [Of course, this battle is only for reference. Everything is based on realistic measurements. Eleven is a royal, so it will be a little stronger than other iron-eating beasts. I hope other beast tamers would nurture their pandas rationally.]

At this moment, Shi Yu's final introduction came.

As the introduction went on, the Beast-eared Lady White Brook's eyes turned red. Her desire to nurture a panda had reached the extreme. Even Lu Qingyi, who wasn't tempted at the start, was extremely silent at this moment, her gaze filled with disbelief.

In the next moment, the two legends started to analyze again.

"Damn, this is only the enhancement of an ordinary level-eight metal??"

"How powerful is the Meteorite Fragment that Shi Yu said could allow the Iron-eating Beast to evolve perfectly??"

"This, this, this... If this isn't cultivated into a national treasure, it's simply intolerable."

Legend Bai and Principal Feng suddenly got up, their eyes red. At this moment, they had a premonition that Dong Huang would be shocked by the Nine Li Battle Beast next. If the Beast Tamers knew that the Iron-eating Beast could evolve into this thing, they would probably have to petition everyone to suppress a certain half-god and take revenge for Emperor Wu.. Yun An was in danger!!

Chapter 253: The Temptation of Ping Cheng

After the attack, the Ox-Headed Beast King fell heroically.

As for the Panda King, it fell as expected, and it was injured even more heavily than the Ox-Headed Beast King.

There was silence.

Now, everyone wanted to know. This Iron-eating Beast's commander rank was already so strong. If it broke through to the monarch rank, what would happen?

"F*ck."

"Are you trying to test it? You want to kill me and the old bull."

After reacting, Master Qu Jie cursed in his heart.

How much hatred, how much hatred.

Pretty soon this panda would become one of those self-destruct mechanical pets!

'Was there a need to be so desperate to test these moves?

Just as Master Qu Jie felt that things had exceeded his expectations and he felt a little dizzy, perhaps the test didn't have to continue.

The medical ginseng quickly ran to the venue and fed the dying Panda King something. The Panda King immediately crawled up energetically.

"Wuu!!!"

Eleven raised its arm and roared.

'Well done, medical ginseng.

Master Qu Jie : "..."

The Ox-Headed Beast King also seemed to have this treatment.

A moment later, it was also quickly fed the mysterious fruit by the medical ginseng. The two pets recovered their initial state.

Master Qu Jie : "..."

Looking at Eleven rubbing its fists, it seemed like it wanted to continue.

Qu Jie, Ox-Headed Beast King:??

“Should I... change a pet?”

Master Qu Jie’s face was almost black as he gritted his teeth.

What a tough life.

In the next test, he wanted to change to the strongest one. He couldn’t let Shi Yu defeat him every time.

“wu?”

Eleven and Shi Yu were stunned.

‘The Ox-Headed Beast King: “Roar!!! (F*ck, stupid Beast Tamer, why change? That fruit was very delicious just now, let me fight again!)”

As long as it wasn’t killed, it would tolerate it.

Master Qu Jie:???

Huh?!

‘Then, Master Qu Jie accompanied Shi Yu and the others through the remaining tests in a daze.

Where was the strength of the three inscriptions Nine Li Battle Beast?

‘The strong thing was that apart from the Inner Power of the core, the other skills were all free skills.

Forming beans into soldiers could be created for oneself or for others to use. It was equivalent to letting others master “Bean Soldiers”.

For Space Quake, as long as it was willing to help others enchant their weapon, any pet would have a spatial weapon that could easily attack spatial enemies.

‘There was even less of a need to talk about the Lightning Rod. It could turn itself or the enemy into a mobile Heavenly Thunder attraction.

It could be said that nurturing one was equivalent to nurturing a barracks filled with firepower!

In addition to the compatibility between the skills Shi Yu displayed and the Iron-eating Beast, it was very difficult for everyone to not agree with the Nine Li Battle Beast’s strength and potential.

Most importantly, Eleven was too strong.

A bunch of skills were maxed out by Shi Yu.

Therefore, when combined, the ability to fight above its level was even more shocking.

“Second Grandpa, I want to nurture this!!”

The more White Brook looked at it, the more she liked it.

After she broke through to the master level, she had yet to contract a new pet.

Now, she had found the right one.

“It’s strong, but it’s expensive...” Beside him, President Bai’s scalp went numb.

Three level-eight rare metals, wasn’t this guaranteed to be five billion?

No matter how strong the iron-eating beast was, their Bai family couldn’t afford to let White Brook create it like this.

A level-eight metal was already painful.

Thinking about it this way, Shi Yu, who had freeloaded so many evolution materials in the ruins, had profited greatly.

“It’s indeed expensive...” Old Master Bai was just about to agree and immediately stopped.

“It’s better to see Yun An’s information first.”

An Iron-eating Beast like Shi Yu’s was restricted by evolution materials. It should be very difficult to nurture.

On the other hand, they could look forward to the Iron-eating Beast getting through the strongest evolution of the meteorite fragment.

“Eh!” At this moment, Principal Feng was already at a loss for words. The current Shi Yu could no longer be said to be a potential legend.

Perhaps when he grew up in the future, he would have the chance to challenge the various titles that had been passed down in Dong Huang since ancient times.

“Do you want to contract an Iron-eating Beast too?”

The old man looked at Lu Qingyi.

Lu Qingyi was silent. “...It’d be a long time from now.”

She had just contracted a local sprite, so there was no extra contract slot.

If she wanted to contract it, she had to wait until after legend.

She didn’t know how long it would take to break through to Legend

In short, everyone had already subconsciously thought of Yun An.

Without a doubt, it was definitely not a problem for Shi Yu to successfully obtain the master’s license. Even if he didn’t have a monarch-level pet, the strength he displayed was no longer inferior to any master.

Master Qu Jie would agree.

“Hahahaha.” After a long time, the test was completed. Legend Bai, Principal Feng, and the others came down and laughed.

Alright, alright.

'The Iron-eating Beast was really strong. Not bad, not bad.

"Damn, how can there be such a ridiculous pet?"

'As someone who had experienced it personally, Master Qu Jie widened his eyes. He also felt that the Iron-eating Beast was ridiculously strong, but as the one being beaten, he wasn't as happy as the others.

"After all, this is the strongest battle beast that even Emperor Wu had to spend a lot of effort to nurture as a trump card. It's been hard on you this time, Master Qu."

'As everyone communicated during the subsequent testing segment, Master Qu Jie also understood how Shi Yu and the others' subsequent abilities came about.

After Shi Yu's archeology discovered the evolution method of the Iron-eating Beast King's race, it freaking discovered the evolution method of the Iron-eating Beast overlord race. Moreover, it also discovered that the Iron-eating Beast was Emperor Wu's strongest pet. Master Qu Jie once again felt that the

archeological system was abnormal.

"It's... It's alright..."

After being thanked, Master Qu Jie's face darkened. He looked at Shi Yu and the others, as well as his ox, who was smugly holding the reward from the ginseng baby.

Only Master Qu Jie was traumatized!

"But next time, if you want to look for me about this kind of thing, please tell me in advance and let me be mentally prepared," he said as an old man. As a person who was almost old, he couldn't afford to be stimulated.

"Sure, sure," President Bai said with a smile. Wasn't this just an accident, after all.

"I's been hard on you, Master Qu," Shi Yu also said. "I'll look to you for the next top-notch assessment."

Master Qu Ji

He widened his eyes and said, "Why are you still looking for me? The Ancient Capital Association doesn't have the function of a top-notch assessment. Be good and go to the headquarters."

"There's still the legendary assessment and title assessment in the future. Go where you want."

An!

suddenly, Master Qu Jie felt liberated.

Yes, the upper limit of the Ancient Capital Association's assessment was only at the master level.

Next, even if Shi Yu wanted to break through ten thousand times and break through to the Mythical stage, it was definitely impossible for him to be related to Shi Yu anymore. Alright.

"Is that so? It's alright, it's alright. I just feel that I might need your help next." Shi Yu felt that Master Qu Jie's sealing talent was really useful.

Perhaps next, he could let the other party seal Eleven, Buggy, Chi Tong, and Baby Ginseng to the transcendent level or even the Awakening level for a period of time.

This way, he could train Eleven and the others better.

In short, he planned to return to the ancient capital to visit Master Qu Jie.

At the same time, Master Qu Jie felt an ominous feeling.

He kept feeling that there was nothing good about being targeted by Shi Yu.

What a tough life.

Then, everyone invited Master Qu Jie, who had been busy for half a day, to have dinner together.

It was difficult to refuse such hospitality, so Master Qu Jie could only agree.

However, Master Qu Jie still had to go to the hotel to pack his things. Shi Yu and the others walked towards the Bai family first.

This test could be said to have satisfied many expectations.

Along the way, everyone was overjoyed.

The Iron-eating Beast was too strong, and Shi Yu was too strong

Legend Bai suddenly thought:

“Perhaps we have to develop and use the ruins specifically. Shouldn’t our family nurture some Iron-eating Beasts first?”

“Whether it evolves or not is another matter, but the initial purpose should be to nurture a batch of outstanding talents first, right?”

President Bai agreed very much. “Yeah, why don’t we also transform the Beast Tamer Troops in Wu Ling City into the Iron-eating Beast Corps?”

In just a few years, wouldn’t Wu Ling City become the tenth first-level city?

Listening to the father and son’s discussion, White Brook couldn’t help but say, “Do you want to do it? I’ll do the discussions?”

“Huh?”

White Brook: “At the moment, there are basically not many wild Iron-eating beasts in the country. Several Iron-eating Beast Breeding bases have already been purchased by Master Lin’s family in Icefield City. Now, Ping Cheng Breeding Base is the largest Iron-eating Beast Breeding Base in Dong Huang, I think we can perhaps talk about cooperation. After all, the Emperor Wu Ruins is actually built specially to nurture Iron-eating beasts.”

“Hall Master Lin’s family?” Lu Qingyi looked at Shi Yu.

Principal Feng also looked at Shi Yu. Everyone knew that this was most likely related to Shi Yu.

“Alright.” Legend Bai and President Bai didn’t realize that White Brook’s reaction was so fast.

They had to talk.

Moreover, they had to go wherever White Brook went. The whole family had to go.

Shi Yu :”...”

Why did he feel that next, even the richest man in Icefield City might not be able to stop Senior Panda’s family?

This early investment was simply too much.

What a strong alliance.

“Then, I’ll return to Ping Cheng with you next. How about that?” The beast-eared girl followed Shi Yu.

“Well, it’s not impossible.”

Shi Yu couldn’t imagine what it would be like if the beast-eared girl joined forces with Senior Panda’s family.

If the archeological discovery of Emperor Wu’s first battle beast was announced, probably all the Beast Tamers in Wu Ling City, no, all of Dong Huang’s Fusion Talent would be high.

The price of the Iron-eating Beast increased again.

No, it was not accurate. At the moment, the number of iron-eating beasts was still small. Perhaps next, the iron-eating beasts would be controlled by the association. After all, the overlord potential was already a strategic requirement related to the development of the country. An overlord species pet that stabilized the evolution path could often lead to the birth of a new legend.

With the country behind them, the development of Senior Panda’s family, who specialized in raising iron-eating beasts, might be better, more long-term, and more stable.

“Sigh, as expected of me...”

In front of a group of big shots, Shi Yu couldn’t help but act cool again.

“TI go too,” Lu Qingyi also said at the side. “We still have to settle Ice Dragon’s matter.”

“Let’s put the Iron-eating Beast aside for now. You should go and see the Ice Dragon quickly.”

The Ice Dragon called Shi Yu by name. It would be bad if the other party became impatient.

‘The matter of the Iron-eating Beast had to be taken slowly. It couldn’t be rushed. The Ice Dragon Totem was the key now.

“Yeah, then I might have to go too,” Principal Feng said with a headache.

He looked at Shi Yu with a faint gaze. At the moment, the relationship between this ice dragon and Dong Huang was not considered stable.

The new totem didn't have any hostile tendencies at the moment. It definitely had to be befriended and tied to the country.

This kind of thing usually required a specific candidate to establish a friendship with it. It was a little unreliable to rely on benefits to maintain it.

There had to be restraints and benefits!

1

At the moment, in Dong Huang, perhaps only Shi Yu was suitable to chill with Ice Dragon.

'As a member of the first bureau, this mission had long been assigned to Principal Feng.

He needed to guide Shi Yu to obtain the recognition of the Ice Dragon and maintain a good friendship between the two parties.

Upon thinking of this, Principal Feng felt stifled. Damn, if it succeeded, would Shi Yu, this kid, also have to work part-time in three departments?

He wasn't even 20 years old yet!

Shi Yu directly saw Principal Feng's resentful gaze.

Shi Yu:"..."

"I understand, I understand." Shi Yu was suddenly shocked. Yes, he had almost forgotten about Mother Dragon.

He had yet to take a look at the matter of inviting Yun An back to prison in the country. Whether he could find Yun An was still another matter. The key now was how to cozy up to the Ice Dragon Totem.

"Eh." When they heard that Shi Yu was about to make friends with the Ice Dragon Totem again, the three from the Bai family couldn't help but be at a loss.

Amaster of management indeed

How could a master-level Beast Tamer talk to different totems continuously?

"Two... No, three... Be careful."

Principal Feng sighed. How much trouble had Shi Yu caused in such a short period of time?

They had to watch the Undying Dark Phoenix closely.

On the Iron-eating Beast and Yun An's side, it was another big matter that many higher-ups had to decide together.

They had to pay special attention to the Ice Dragon Totem.

He was already at the age of retirement, so he still had to do these things. Principal Feng didn't expect this.

Next, everyone's destination was very clear.

Apart from reporting the incident at the Emperor Wu Ruins, the Bai family wanted to go to Ping Cheng to discuss cooperation with the Lin family.

Principal Feng and Lu Qingyi needed to cooperate with Shi Yu to complete the relationship aspect with the Ice Dragon Totem.

Ping Cheng, this small place, immediately became the focus of many parties

That day, no matter how far the matter progressed, the tenth bureau of Dong Huang, the Intelligence Bureau, had already activated some of the elite undercover members in the totem area at the first moment and started to investigate information related to Yun An.

‘There was indeed nothing good about Master Qu Jie meeting Shi Yu. The guy was a complete disaster.

In one of the eleven totem districts in the east, in the Fox God Totem District, in a town with an ancient appearance... The elite member of the tenth bureau, Qu Ling, who had a special sealing talent, received an investigation mission from the country.

She was wearing an ancient cotton shirt and carrying a white fox. She walked on this street that was no different from the ancient times of Dong Huang, It was also filled with people.

The greatest difference between this place and the ancient towns of Dong Huang was that special fox-type creatures were worshiped in various places.

In the center of the town stood a huge fox god totem, accepting incense offerings.

“Yun An...” This person was the daughter who had inherited Master Qu Jie’s special sealing talent.

Every time an important investigation mission was issued, these members were in the most danger.

On the other side, in Dong Huang, a day later, Shi Yu and the others also came directly from Wu Ling City to the icy plain, Ping Cheng!

Chapter 254: Ice Dragon Mommy

Icefield City, Ping Cheng.

Today, the Ping Cheng Association was especially grand.

‘The reason was very simple. A big shot was coming.

In this tiny place where the highest level of Beast Tamers was only at the master level, the arrival of two legends was definitely an extremely sensational matter.

At the Ping Cheng Association.

President Feng, Hall Master Lin, Lin Xiuzhu, and the others had long received the news in advance.

“Sigh, sigh.”

At this moment, Hall Master Lin was extremely regretful.

“Why did this kid, Shi Yu, discover the evolution method of the iron-eating beast overlord race?”

“So be it. Why wasn’t I there when it evolved? I hate it.”

“Enough, enough...” Lin Xiuzhu asked his father to speak less.

You almost died laughing at that time, so what are you being grumpy for now.

Initially, after Shi Yu disappeared for three months, Senior Panda thought that something had happened to Shi Yu.

But who would have thought that as soon as Shi Yu had news, he would bring back an even more explosive piece of information.

He had discovered the stable overlord race evolution plan of the iron-eating beasts!

This news directly made the Lin father and daughter dizzy.

Through the communication equipment, Senior Panda had already learned about what had happened in the Battle Emperor Ruins from Shi Yu. She had even arranged for the Battle Emperor Set meal and all they were waiting for now was just to start selling pandas.

‘Why was she so hardworking?’

It was all because she had learned from Shi Yu that the second stage evolution of the Iron-eating Beast was still extremely expensive.

“I wonder how the Wu Ling Bai family is going to negotiate with our Ping Cheng this time.”

Old Feng was more worried. After all, the size of Ping Cheng was too different from Wu Ling’s Bai family.

‘One was a small county city that didn’t even have a top-notch master, and the other was a large family that had produced legends and mastered the ruins of Emperor Wu.’

“Don’t panic.” Hall Master Lin was relatively calm. “Shi Yu still has shares in the breeding base. He definitely doesn’t want to lose out.”

This cooperation definitely had to be centered around Shi Yu.

“President, he’s here.”

A moment later, the Wu Lingtian Group arrived at the Ping Cheng Association, the Bai Family’s Legend Bai, the Wu Ling Association’s President Bai, and the girl White Brook. They were all here.

Apart from that, there was also the old principal of Ancient Capital University and Lu Qingyi. However, surprisingly, Shi Yu didn’t follow.

“Welcome, welcome...”

Seeing such a big scene, President Feng was a little nervous.

President Feng, Hall Master Lin, and Senior Panda immediately welcomed the guests.

However, at this moment, after the panda senior's gaze searched for Shi Yu fruitlessly, she couldn't help but look at her genius junior, White Brook, and Lu Qingyi, who was also in the same batch as her but was known as the proud daughter of heaven in Ancient Capital University. These two.

Lu Qingyi and White Brook were also surprised to discover that... Why was this girl's clothes so similar to the panda jacket Shi Yu used to wear?

At the same time.

Shi Yu had already separated from everyone. He was not interested in this kind of cooperation. He only wanted to find Grandma Ice Dragon now.

"I want to talk to Ice Dragon alone first. It's not good to have too many people."

With this saying, Shi Yu headed to the Ice Dragon Snow Mountain alone.

As for Shi Yu's safety... To be honest, everyone was no longer very worried.

The Ice Dragon Snow Mountain only had monarch-level ferocious beasts, and they were distributed loosely. With Shi Yu's current strength, it was not a problem for him to escape from any one of them.

The etherealization ability of the ruin ring and Buggy's Concealment and Instant Transmission were not decorations.

Most importantly, Shi Yu still brought bodyguards this time.

"It's not here yet?"

A certain gem cat lay lazily on the flying carpet and said to the red-haired Chi Tong flying in the sky beside it.

"Soon, soon."

Shi Yu sighed.

The day after he came out of the ruins of Emperor Wu, this cat ran to Wu Ling City.

In the three months since Shi Yu disappeared, this guy was definitely the one who suffered the most.

After finishing the gem fruits and realizing that it couldn't find Baby Ginseng and Shi Yu, the gem cat immediately exploded.

After three months, he had lost a lot of weight.

This time, Shi Yu had finally appeared. No matter what, it had to stay beside Baby Ginseng and harvest a few more boxes of gem fruits before leaving.

A wave of cold passed through the white snow mountain and blue sky.

Shi Yu and the others landed at the top of a snow mountain, in an ice and snow ruin.

"Sob."

Eleven lay on Shi Yu tiredly. It was really not easy to muster up strength in such a cold place.

Baby Ginseng also hid in its pocket and rubbed its hands to warm up. It tried its best to stick to Shi Yu, who was in a possessed state.

Buggy flew up from Shi Yu's shoulder and looked at the Ice Dragon Ruins where its mommy, the Ice Dragon, lived. It sighed.

The last time Shi Yu threw it over to "acknowledge it as its mother", it was still a green worm. Now that it had evolved, it wondered if Ice Dragon still recognized it.

"Is this the place?" The gem cat also jumped down from the flying carpet and stared at the Ice Dragon Ruins.

It had heard that Western dragons liked to collect treasures very much, and this ice dragon had survived from the Time Emperor era and conquered mountains. Its battle results were much better than sweeping through an undead battlefield. Then, in theory... Could this ice dragon have a pile of rare gems?

"This is the place."

Shi Yu spat out some fire and looked at Eleven, Buggy, and Baby Ginseng. "I feel that we should come to Ice Dragon Snow Mountain to train later. The harsh environment here is quite suitable for you."

"Wuu!!" Although Eleven still liked to train in normal places, it wasn't unacceptable.

On the other hand, Buggy and Baby Ginseng had bitter expressions. They still felt that training in the ruins was more fragrant.

Boom!!!

This time, with the arrival of Shi Yu and the others, the ruins trembled without even knocking.

"Roar!!!"

A terrifying dragon roar suddenly came from the world. This dragon roar directly stunned the gem cat beside it.

So strong.

Damn it, it didn't know when it could enter the totem level.

It was too difficult to save money!

[You guys are finally here!]

In the ruins space, the ice dragon slowly opened its eyes. After Lu Qingyi told it that Mu Huiyin's heroic spirit had appeared, it had been waiting for Shi Yu to bring the sword spirit over.

But it had waited too long.

"Come in quickly," Ice Dragon said eagerly.

Space changed, and the stars changed. In the blink of an eye, Shi Yu and the others appeared in a completely frozen world. Time seemed to have stopped.

The extreme cold was several times colder outside.

The moment they entered, Shi Yu and the others directly saw the frost dragon lying on the seal staring at them.

< Name > Frost Dragon (Special)

[Attributes]: Ice, Dragon

[Race Level]

[Level of Growth]: Totem Level

[Energy Points]:??

At this moment, Shi Yu looked at the Ice Dragon. The index showed the same reaction as if it had seen Chong Xuan.

As the other party's energy value exceeded the upper limit of the index of 100 million, it directly couldn't be detected.

As for race level... Ordinary ice dragons were middle-level overlords, but this ice dragon had clearly mutated and evolved. It was estimated that at the very least, it was a high-level overlord race.

"Huh?"

At this moment, after seeing Shi Yu and the others again, Ice Dragon's full attention was attracted by the red-haired and red-eyed Shi Yu.

'As max-level possession would allow Shi Yu to temporarily obtain the power of the bloodline, Ice Dragon immediately sensed Mu Huiyin's aura on Shi Yu.

It couldn't help but be silent.

"Can you... split up first?" Ice Dragon raised its eyebrows.

"alright... Hahaha."

Upon hearing that, Shi Yu decisively removed his possession from Chi Tong.

In the next moment, a small phoenix made of orange and red flames appeared in midair.

"Jiu..." After coming out, Chi Tong looked at the ice dragon staring at it nervously. However, it instinctively felt a sense of closeness from the ice dragon. It was ice cold and wanted to stick to him.

At that moment, as Chi Tong appeared, the Ice Dragon's gaze became even more serious.

It stared at it carefully and seriously.

"Hahahahaha!!!"

However, who knew that in a moment, Ice Dragon laughed like it had gone crazy? It laughed especially crazily.

"It's indeed her bloodline."

F*ck... Shi Yu, the gem cat, and the others were shocked. Why was he suddenly smiling so crazily?

It didn't look like the touched and happy laughter one would expect from a pet that saw its tamer after a long time... It was more like

"Jiu..." Little Chi Tong was also shocked. It subconsciously wanted to hide back in Shi Yu's body, but he realized that i**tte had already been locked onto by the ice dragon.

Ice Dragon stretched out its huge claws and pulled the shocked Little Chi Tong to its side. It said arrogantly, "In the past, you asked me to call you Mom, but now I've decided. I want to acknowledge you as my goddaughter. That's what you get for bullying me in the past. Haha, do you have any objections???"

With that said, it looked at Shi Yu.

Shi Yu, the Gem Cat, Eleven, Buggy, Baby Ginseng:??

Holy shit, what the hell?

What a chaotic scene!

Buggy: "Then who am I???"

Chi Tong: QAQ???

"ah, this." Shi Yu was stunned. Wait, wait, something was wrong with this script.

Shouldn't Ice Dragon be crying and acknowledging Chi Tong as its master, deciding to follow it again in this life and go through fire and water?

Why did it directly drag it over to be Chi Tong's mother with a vengeance?

"Jiu!!! (Save me!!)" Being hugged by the ice dragon, Chi Tong turned around and begged Shi Yu for help.
shi Yu:"..."

Shi Yu wanted to say something but hesitated. He wanted to say something, but seeing that Ice Dragon didn't seem to have much ill intentions, he could only remain silent.

{calm down, calm down. It's pretty good to acknowledge it as your mother. If you acknowledge her, it'll save me the trouble. How good is it to have a mother? You no longer have to be afraid of wind and rain, and you have someone to shoulder everything.]

[chi Tong:???

"Meow..." At this moment, the gem cat couldn't react.

Shi Yu bit the bullet and said, "Long time no see. But, this... What does this mean?"

Ice Dragon didn't mind at all. "What's wrong with that? It's not actually my master anyway. I'm happy. Why, can't I? Do you lose out on anything? Do you?"

"Come and be my daughter!" it said to Chi Tong.

“Jiu!!! (No.)” Little Chi Tong immediately turned into the form of a little sword spirit, then shrank to the extreme, becoming the size of a rice grain, and escaped from the huge claw.

“Tsk.” Seeing Little Chi Tong escape, Ice Dragon was stunned and showed a bored expression.

In the past, if it did this to Mu Huiyin, it would definitely be beaten up and stepped on. That feeling made Ice Dragon miss it, but unfortunately, there was nothing now.

1

Forget it, forget it.

It looked at Shi Yu and the others with a burning gaze, especially Shi Yu. “Train it well. If you anger it, I won’t let you off.”

Shi Yu took the little sword spirit and nodded heavily. “Of course, it’s like my biological daughter. I’ll definitely take good care of it...”

Chi Tong agreed.

Ice Dragon: “Get lost, stop taking advantage of me.”

Shi Yu: “...”

After a moment of silence, Ice Dragon sighed.

“In short, this way, I can leave without any regrets.” It was very satisfied.

He didn’t expect to see the bloodline of its Beast Tamer before deciding to leave Dong Huang.

“Wait, wait.” At this moment, Shi Yu suddenly looked at Ice Dragon.

He didn’t forget the most important mission of this trip.

According to the clues provided by Senior Lu, Ice Dragon was thinking to leave Dong Huang.

If possible, the association naturally hoped that the Ice Dragon would stay in Dong Huang and become the guardian of this place.

“are you leaving Dong Huang?” Shi Yu asked.

Ice Dragon looked down and said, “Didn’t I say? After stepping into the totem and solving the ice river totem problem, I want to go home and take a look.”

“Two thousand years have passed. Although things have definitely changed, it’s still the place where I was born and grew up...”

It looked towards the west nostalgically.

“Emperor Shi died, and that Dragon Hunter must have died too. It’ll definitely be fine when we return.”

Listening to Ice Dragon’s muttering, Shi Yu was stunned. As expected, Ice Dragon Aunt had also escaped because of the Western Dragon Hunter.

More than two thousand years ago, a legendary Beast Tamer was also born in the West, known as the Dragon Hunter.

His hometown had been destroyed by the dragons since he was a child, and he had become very hostile to the dragons. In order to take revenge, he grew up all the way to become a legendary Beast Tamer and launched the Dragon Slaying Battle that shocked the West, slaughtering the Western dragons

until they fled or died. Although in the end, the Dragon Hunter was jointly killed by the totems of the dragons, the dragons suffered heavy injuries.

At that time, the fleeing dragons also began to spread their branches everywhere.

“Well, we should go home and take a look, but do you still plan to come back?” Shi Yu asked.

Ice Dragon said, “What?”

“What if Chi Tong misses you...”

Ice Dragon looked at Chi Tong. That made sense.

“Is it possible?” But it quickly reacted.

This guy didn’t even want to call it mom, and now they’re claiming it would miss it?

“What’s the point of coming back? There’s nothing worth it here. You just want to keep me in Dong Huang as a fighter, don’t you? You want to deceive me? No way.”

Shi Yu :”...”

“In short, don’t think about it. After that, I plan to go to the legendary Dragon Palace City to take a look. I heard that food and accommodation are guaranteed there, and dragons from all over the world are welcome to join. I came to the east with the intention of seeking refuge in Dragon Palace City. Who knew that I would be captured by Mu Huiyin midway?”

“But it’s not too late now. With my current strength, it shouldn’t be a problem for me to be a queen, right? Most importantly, I heard that it’s very friendly to the totems that join, and will also share the final secret to the Dragon God Domain...”

The Ice dragon chuckled and said, “It’s better to go there than to join your Dong Huang. Everyone there is a dragon, so it’s definitely more comfortable staying there than here.”

Totem-level battle powerhouses were a guest everywhere.

Even for a giant ocean faction like Dragon Palace City that had several totems, if a new totem joined, it would also have a huge impact on that place. Ice Dragon didn’t have any ambition after all, and planned to rely on a giant faction to live in peace.

With its strength, it was indeed not a big problem for it to be worshiped by Dragon Palace City and call the totems in Dragon Palace City brothers and sisters.

“Ah.” Shi Yu was stunned.

“Ah what?”

Shi Yu: “... The problem is that Dragon Palace City is also a part of Dong Huang.”

The frost dragon: “?”

“Dragon Palace City experienced an upheaval a thousand years ago and changed their Dragon God once. The current Dragon Palace City Dragon God is a good friend of the legendary Beast Tamer Dragon Emperor after Emperor Shi. They once fought side by side... Apart from that, the Sea Dragon King of Dragon Palace City is also a battle beast of the legendary Beast Tamer Lin Feng from Dong Huang. His strength reached the totem level a hundred years ago. Also... most of the totems in Dragon Palace City are more or less related to Dong Huang.”

“Now, Dong Huang and Dragon Palace City are super reliable allies.”

According to what Shi Yu knew, the individual members of the first bureau could enter that bureau because they were connected to Dragon Palace City

Ice Dragon:??

Holy shit, there was such a thing?

The ice dragon was a little stunned for a moment. During the Emperor Shi era, Dragon Palace City and the Dong Huang Human Race still had no connection.

“Well, my relationship with the Sea Dragon King is very strong. There’s also its scale keepsake. Ill visit Dragon Palace City soon. Why don’t I introduce you? When the time comes, we’ll go together.”

Shi Yu didn’t care if Ice Dragon joined Dragon Palace City or not. In fact, it was even better if it joined. His connections would be stronger.

“Ah...” The frost dragon was stunned again.

“You brat, something’s wrong, Tell me, do you need something from me?” Ice Dragon realized that something was wrong.

Shi Yu was silent.

Speaking of which, you might not believe me. Apart from you, Chi Tong has another mother. However, that mother seems to have ill intentions and might cause Chi Tong harm. If you can stay in Dong Huang, I can be more at ease. At least Chi Tong won’t be bullied anymore

“Can you bear to... let your daughter be snatched away by others?”

“It really needs a reliable guardian now.”

“After all, that Undying Dark Phoenix looks so fierce and powerful.. We can’t defeat it at all...”

Chapter 255: Overlord Will

Shi Yu used a lot of time to explain the Undying Dark Phoenix to Ice Dragon.

After hearing it, the Ice Dragon was shocked.

The mystery of its Beast Tamer's bloodline that she had never figured out in her life had finally been solved?

General Mu Huiyin had been tortured by the power of her bloodline since she was young and had to contract an ice-type pet to suppress her bloodline.

But even so, every time she used her ability, Mu Huiyin would still be tortured.

In order to help its master overcome the power of the bloodline and find out the mystery of the bloodline, Ice Dragon and the other pets worked hard for a long time.

In the end, although Mu Huiyin successfully separated a portion of the violent bloodline power and stored it in the heroic spirit ruins, they still didn't understand where Mu Huiyin's bloodline power came from until her death.

"Phoenix Race."

"Sun God Phoenix, Undying Dark Phoenix."

The frost dragon muttered to itself. Holy shit, General Mu Huiyin's mother was sealed in that place called the Undead Battlefield??

If it had known, it wouldn't have been in such a hurry to acknowledge this daughter. Who would have thought that the other party's biological mother was still alive?

Moreover, it was the highest race of the Phoenix Race.

According to Shi Yu's description, although that Undying Dark Phoenix claimed to be Chi Tong's biological mother, it did look like there was a risk factor.

No one knew if its words were true.

Unlike the Ice Dragon, whose existence and identity were recognized by the heroic spirit of General Mu Huiyin in the heroic spirit ruins.

Ice Dragon's gaze kept lingering on Chi Tong and Shi Yu. It wanted to say something but hesitated.

Helping Beast Tamers solve the mystery of their bloodlines was also the wish of all Mu Huiyin's ice-type pets at that time.

1

Unexpectedly... only after two thousand years, after Mu Huiyin passed away, did a hint of a clue finally appear in the mystery.

However, the Ice Dragon Heart was very tired at the moment. It kept feeling that this matter was very troublesome.¹

Damn it, why did Shi Yu suddenly say this?

“What’s the strength of that Undying Dark Phoenix?”

“Top-notch totem, right?”

Ice Dragon said, “I think it’s fine if we don’t want this biological mother. It’s too dangerous. Don’t care about it. Don’t go to that battlefield. Just do your own thing well.”

After all, Little Chi Tong wasn’t Mu Huiyin herself. Ice Dragon really didn’t want to interfere too much.

“Yes, that’s what we’ll do.”

The frost dragon quickly cleared its relationship. Its intuition told it that Mu Huiyin’s bloodline was definitely involved in many troubles and disputes. In short, it involved the Phoenix Race, which was even more chaotic than the dragon race. It didn’t want to look for trouble.

No matter what conspiracy was going on inside, it had nothing to do with it!

“Ah...” Seeing the frost dragon immediately turn away, Shi Yu was silent. This dragon was smart!

“It’s fine if the Undying Dark Phoenix is good, but what if it has other plans for it?” Shi Yu asked.

The frost dragon: “I just broke through to the totem level, how can I win!”

“It’s different. It’s been sealed for so long. It’s very weak. You have a time element. You’re very strong.”

“Even if you say so...”

“Mil!! (Mom!!)” Under Shi Yu’s command, Little Chi Tong directly shouted.

“Mother Dragon—!!” Shi Yu also shouted.¹

The frost dragon was speechless.

Damn it!!

Looking at Shi Yu, who was looking at it with tears in its eyes and its master’s spirit that had been led astray by Shi Yu, the frost dragon was immediately stunned.

‘Why was its mouth so annoying? Why was it randomly calling it mom?!

“Mil!”

“Dragon...”

“Stop shouting. I know!” The frost dragon felt a headache.

It immediately regretted it. This was clearly a battle between two mothers. One of them would definitely die.

“But I’m warning you, I’m not your fighter. Unless you’re in danger, otherwise, I definitely won’t interfere in your business.”

The contract had been broken, so it had no reason to suffer with this bloodline anymore!

“I want to go to Dragon Palace City. I want to be the Dragon King. I want to have my own faction. I’m not a fighter!!” the frost dragon shouted.

“Sure, sure... That’s already very good for us, what you said. Dragon Palace City, right? I understand. I’ll lead the way for you when the time comes!!” Shi Yu’s expression was immediately filled with joy when he saw that Ice Dragon still recognized its Beast Tamer bloodline reincarnation.

Sigh!!!

He just didn’t know if the Undying Dark Phoenix was good or bad. He kept feeling that the Undying Dark Phoenix wasn’t very reliable. Otherwise, if Chi Tong had two totem mothers, how good would that be?

It meant that he had two totem relatives, after all.

He could be completely arrogant in Dong Huang then.

However, the outcome now was not bad. The frost dragon wanted to join Dragon Palace City, and it was also still staying in Dong Huang.

Moreover, that meant he had an even greater backer. It was equivalent to Chi Tong and Dragon Palace City becoming relatives.

In addition, if he introduced Ice Dragon’s mother to Dragon Palace City, Dragon Palace City would definitely cry and thank him for sending a totem to join. Perhaps they would even give the genius Dragon Palace City’s Dragon Lady to him to nurture. This way, everyone would be happy, everyone would be

satisfied, and they would be even closer.

“..” Shi Yu fell into his imagination.

Ice Dragon, Gem Cat, Eleven, and the other pets were silent.

“Meow.” The gem cat poked Shi Yu. How could he be distracted in such a cold place?

“The gem cat ignored Shi Yu and finally looked at the frost dragon.

As for the frost dragon, when it saw the gem cat releasing a friendly signal at it, it couldn’t help but be stunned. It looked at this strange cat that seemed to be very strong.

“You, do you like gemstones?” The gem cat went straight to the point.

“Who doesn’t like that?” The frost dragon was stunned.

“Very good, then we’re good friends too!”

“Huh?”

Where did this little cat come from?

Then, the gem cat and the ice dragon started a protracted discussion about the gems, leaving Shi Yu and the others stunned.

Eleven, Baby Ginseng, Buggy, and Chi Tong simply looked at the surrounding environment.

Baby Ginseng was in the Heavenly Frost Cold Energy and surprisingly discovered that this was also an extremely extreme environment. It could actually absorb the Heavenly Frost Cold Energy to condense a mutated fruit. It couldn't help but secretly increase its strength, preparing to earn a sum.

"Take the time element, but not the ice element."

Shi Yu's suggestion made Baby Ginseng nod repeatedly. It understood.

But clearly, the Heavenly Frost Cold Energy was still mainly ice-element power. It was very difficult for Baby Ginseng to condense a mutated fruit.

At the same time, Shi Yu sized up the gem cat and the frost dragon.

He first looked at the frost dragon.

This huge dragon that had fought with General Mu Huiyin in the past... was judged by the skill index to have a "medium" success rate for teaching super skills.

Then, he looked at the gem cat.

The gem cat surprisingly had the aptitude to learn the Imagination Domain. It was judged by the skill index that the success rate of teaching super skills was also "medium".

Neither of these two pets had the "high" and "extremely high" evaluation that Shi Yu imagined.

After all, one of them was a thousand-year-old dragon that had participated in the totem battle and was already at the totem level, while the other was a hundred-year-old cat that had participated in the undead natural disaster. They were overlord-level creatures.

Even for them, their willpower and hearts couldn't withstand the additional points of super skills 100%?

Logically speaking, even if it was the experiences of a life-and-death crisis, they should have experienced it several times.

To be precise, among all the pets Shi Yu had seen after breaking through to master, the success rate of super skills teaching had yet to exceed "medium".

In fact, most of Lu Qingyi and Senior White Brook's pets' success rates for super skills displayed in the index were also "extremely low" and "low".

There were very few pets like Eleven whose teaching success rate was "low".

This discovery made Shi Yu understand that it wasn't his pet being unreliable, but that the skill index had especially strict requirements for the points added to super skills. It had extremely high requirements for the pet's willpower and heart.

"Alright, is there anything else?"

After discussing a business with the gem cat, the frost dragon was happy.

It didn't expect this cat to know so much.

It suspected that this cat was a dragon.

“Then let’s arrange a time to go to Dragon Palace City together? The Dragon Palace City banquet will be in a while. It’s a good time to visit,” Shi Yu said.

“No problem.” Ice Dragon beamed.

“I want to go too.” The gem cat was also eager to try.

“Go, you can go either way,” Shi Yu said. With a bodyguard taking the initiative to follow, it would be a waste not to. This way, even without the “Tyrannical Sea Legend”, Legend Ba Hai, leading the way, he would be very safe there.

“Alright, it’s settled then.” The Ice Dragon sighed. Next, it wanted to continue squeezing out the ice-element power that it had absorbed from the Ice River Totem to revive the gathered ice-clement power. When it was almost done absorbing it, it would directly get humans to throw a forbidden weapon to completely change this environment and kill the Ice River Totem.

Reliable!

From today onwards, it would bid farewell to the snow mountain and start a new life from scratch in Dragon Palace City!

“But how long will it take?” Ice Dragon asked.

“Less than a month,” Shi Yu replied.

During this period of time, he had to hurry to the capital to help Baby Ginseng evolve.

“Well, then it’s about time.” Ice Dragon nodded.

They chatted again. A moment later, Ice Dragon sent Shi Yu and the others out.

After leaving, Shi Yu was amused.

Although the negotiation this time lowered the seniority level from grandma to mom, overall, he successfully associated himself with the Ice Dragon.

“Heh heh...” On the way back, Shi Yu was especially excited.

At this moment, he had entered the state of the Sword Spirit Possession again, releasing flames to fly in the snowstorm.

At the side, the gem cat was still on the flying carpet, squinting and yawning.

“Wait.” Soon, Shi Yu and the others arrived at the snowstorm area of the Ice Dragon Snow Mountain. Just as the gem cat was about to bring Shi Yu and the others to teleport, Shi Yu suddenly called for a stop.

“What?” The gem cat saw Shi Yu staring at Blizzard and sizing it up.

“Let’s see how the intensity of the snowstorm here is.” Shi Yu looked at the snowstorm in the sky. Previously, when he, Hall Master Lin, and the other masters came over, their group had to go down obediently and slowly cross this area. Even Senior Lu couldn’t resist the power of nature.

Eleven and the others were even smaller compared to the snow environment here.

Even totem-level creatures relied on the power of nature to strengthen themselves and attack the enemy. From this, one could tell how huge the potential of nature's power was.

Shi Yu had thought about it. He wanted to nurture the pet's will and heart, overcome life and death, overcome fear, overcome despair, overcome fatigue, overcome pain, establish a firm goal in his heart, and experience the baptism of time. They couldn't do all of that at the same time, but the pet's will and heart was doable.

Perhaps he could train one or two qualities here.

"Let's confirm the training venue. This place might be used to train the willpower of the ginseng baby."

In an extremely cold environment, it was very suitable to consume all its physical strength to break through the limit. With a tired body, it could withstand the pain brought by the snow and wind to train himself.

Apart from Eleven, Shi Yu felt that the other three pets couldn't withstand it.

Chi Tong, Baby Ginseng, Buggy : "..."

The gem cat raised its eyebrows. "Can I report you for abusing pets? Isn't this self-mutilating?"

Shi Yu said, "I'm doing it too."

He couldn't add points to super skills, and his heart itched. Now, if he could tolerate it for a while, they would all immediately reach the totem level.

"That's not the problem!" The gem cat muttered and said, "What's the use of training will or whatever? They're all overlord races. In the future, if they practice their skills and use resources, they can break through to the overlord level when the conditions are right. You still want to give them willpower to train an overlord's will?"

"What's the problem then?"

Shi Yu suddenly looked at the gem cat.

The gem cat was stunned. Seeing the anxious gazes from Buggy, Baby Ginseng, and Chi Tong, it suddenly covered its mouth and realized that it had said something wrong.

"No, no."

"Tell me the problem."

"Ten... fruits! Let Baby Ginseng make it tonight."

Baby Ginseng:??

"alright then." The gem cat immediately spread its claws and smiled. "When ordinary overlord race creatures break through from the monarch level to the overlord level, they can easily break through the bottleneck by training their racial skills or using high-level resources to strengthen themselves."

“But for low-level creatures, especially those creatures without super racial skills, and even some creatures with super racial skills, it’s very difficult for them to break through to the overlord level. It’s the same even if they have legendary-level resources to strengthen themselves. It’s very difficult. This is the restriction of the race, and it can’t be changed.”

“However, there is always a way. As long as they constantly experience life and death to temper their strong willpower and hearts, there’s a chance to condense a very loyal ability, ‘Overlord Will’, to assist them in breaking through to the overlord level. Generally speaking, this is the best way for low-level pets to reach the overlord level. Of course, it’s the most difficult way. For high-level pets, there’s no need to be so tired. They just have to lie flat and grow naturally.”

Shi Yu was stunned. “Is this overlord’s will powerful? Do you have it

The gem cat waved its paw and said, “Well... It’s not a matter of whether it’s powerful or not, but it’s very rare. However, even if low-level creatures have the will of an overlord and are restricted by their race, they definitely can’t defeat high-level creatures, even if they are mentally strong.”

“But under the same level and race, having the will of an overlord is indeed much more powerful. Because in various extreme environments, they can easily erupt with extremely unscientific power that exceeds their understanding, so this ability is very ideal.”

“Like in those anime, the beasts with this overlord will can “overcome their limits” and turn the fight. Occasionally, they will kill their opponents before they die, occasionally break through on the spot, and occasionally exceed their limit to fight above their level. Do you understand?”

“As for me, I don’t need this kind of thing. It wasn’t easy for me to mutate into an overlord race. Next, let resources and money corrode my heart.” The gem cat licked its claws.

“It’s too pointless to suffer when your race is high.”

At this moment, Shi Yu looked at Eleven, Buggy, Baby Ginseng, and Chi Tong.

The four pets had a bad feeling.

“Oh no, I evolved your race too high too early.”

“But it’s not a big problem. Why don’t you also try to condense that overlord will?”

This way, the additional points for super skills should be fine, right?!

“Wu!!” Eleven rolled into its pocket and felt that there was no problem. It thought that it could challenge it.. It looked at its other three companions... Together!!

Chapter 256: Change in the Ruins Space

Ping Cheng.

Shi Yu returned to the small villa that he had not returned to for a while.

In fact, if possible, he felt that living in the ruins space was pretty good.

At this moment, the ruins space had long been built into a huge home by Shi Yu and the others.

Eleven's Bean Bear Troops Training Ground, Baby Ginseng's Fruit Research Institute, Buggy's Equipment Research Institute... and Shi Yu's residence far away from these places. There was everything here.

Apart from that, there was also the farming area, resource room, canteen, and Chi Tong's favorite leisure area.

Living in the ruins space was fine, but it was easy to be isolated from the world and become a shut in. After all, unless he took the initiative to leave, it was very difficult to quickly contact the outside world.

Most importantly, there was no Internet.

After returning to the villa, Shi Yu found a place for the gem cat to stay and called Principal Feng.

"Oh, Shi Yu?" Principal Feng's voice came from the other side.

"Principal Feng, we've already seen the Ice Dragon."

Somewhere, Principal Feng, who was representing Ancient Capital University in discussing the cooperation with the Ping Cheng Association, raised his eyebrows. How fast?

'Wu Ling's Bai family wanted to ride the Iron-eating Beast's rise, so Ancient Capital University naturally also wanted to take a ride.

If the Iron-eating Beast became popular in the future, Ancient Capital University would become the only institute that could distribute the Iron-eating Beasts to outstanding students and help the Iron-eating Beast Tamer plan the evolution method. Then, what would Imperial Capital and Demon Capital

University do?

The temptation of a pet cub with overlord potential was definitely greater than everything.

"How is it? How did Ice Dragon react when it saw General Mu Huiyin's heroic spirit?" Principal Feng asked quickly.

"Not bad, they're as close as mother and daughter," Shi Yu said.

Principal Feng smiled and looked away. Alright, alright.

Although he knew that Ice Dragon and Mu Huiyin's relationship wasn't bad, he didn't expect it to be so good!

It looked like General Mu Huiyin was also a binding Beast Tamer. She actually raised her pet as a daughter. Not bad, not bad.

The reason why Dong Huang became stronger and stronger in the future was not only because its development was getting better and better, but also because a group of predecessors had left behind pets who voluntarily protected Dong Huang.

Compared to humans, the lifespan of some pets was still very long. For example, plant life forms, elemental life forms, dragons, and undead. As long as they absorbed enough resources that could ensure their growth, they could live for a long time. If it really didn't work, they could still choose to sleep

and become secret guardians.

Just the benefits brought by this point was enough for the association to strongly promote the bond between Beast Tamers and pets.

"Then what did the Ice Dragon say? What plans does it have for the future?" Principal Feng asked.

"Thanks to the threat of the Undying Dark Phoenix, the Ice Dragon is willing to stay near Dong Huang as the guardian of Little Chi Tong and protect it from growing up. After all, it's also afraid that the Undying Dark Phoenix will hurt its daughter. It still looks like one will definitely be injured if the two mothers fight..."

"Huh???" Principal Feng suddenly sensed that something was wrong.

Wait, wait?

Who was whose mother?

"Principal Feng, can I enter the first bureau?"

After being stunned, before he could react, the corners of his mouth twitched. "We'll talk about it later. It's inconvenient over the phone, why don't you come over too, or we'll find you later."

If he really associated with the Ice Dragon, Shi Yu could only be considered a reserve member of the first bureau.

After all, it was impossible to say how close the two parties were at the moment.

It wasn't that easy to become an official member of the first bureau. At least, he had to fight alongside the guardian once and solve the crisis of Dong Huang before he could officially enter the sect.

Only in this way could it be proven that the Beast Tamer and the guardian had a certain bond. It could be said that there were basically no Beast Tamers who relied on tricks or intimidation tactics to get a beast to fight for them in the first bureau. They were all Beast Tamers who had a good relationship with the guardian to the point where they could request their help.

After informing Principal Feng, Shi Yu was busy with his own things. After dealing with Ice Dragon, there was nothing important left.

Oh, wait, he still had to find time to teach the metal-element nurturing method to Senior Panda and get her to help Eleven awaken its Panda King bloodline.

At that time, Shi Yu could see the effect of Eleven's deterrence skill.

A transcendent deterrence could even wrap around external objects for a long time. Shi Yu wanted to know how powerful a deterrence at the Dao Proficiency level was.

“Ying, I’ll go to the ruins space to take a look first. Call me if there’s anything.”

Shi Yu abandoned the gem cat into the villa and prepared a room for it. After leaving enough gem fruits, Shi Yu set up a temporary spatial teleportation passage in the ruins and said.

“Huh??” The gem cat let out a lazy cry. It felt that Shi Yu was becoming more and more impolite. He actually didn’t even call it teacher.

To think that it had even taught Shi Yu knowledge about the overlord’s will. Oh, Shi Yu used resources to exchange for it. That was fine.

A crunch sounded. The gem cat took another bite of the gem fruit and watched Tom and Jerry calmly on the sofa.

In the ruins space.

Shi Yu gathered the four pets and looked at them seriously.

“About the overlord’s will...”

“Gulp.” Apart from Eleven... Buggy, Baby Ginseng, and Chi Tong swallowed their saliva.

They were actually not afraid of injury and training. After all, they had instant recovery and healing methods.

However, the problem was that Shi Yu’s description was too terrifying.

It required one to be exhausted and not have the strength to use skills and drag one’s injuries to face a situation where life and death exceeded the limit. This... wasn’t this making things difficult for the pet?

If they were careless, they might really die.

“If possible, I actually don’t want to force you to train this either.” Shi Yu fell into deep thought.

These little guys, including Baby Ginseng, were still in the child stage.

As for the overlord will, it was a product condensed by low-level pets to exceed the limits of their race and break through the racial bottleneck. During the training between life and death, their will and mind were trained to the extreme.

‘There was indeed no need for them to suffer now. It was good to grow up happily.

From the fact that Shi Yu had never heard of the overlords will before, he could tell that this thing was very difficult to condense. It was basically not common.

But the problem was that it had to be trained. If not, there would be no super skills.

Shi Yu estimated that the success rate of pets with overlord willpower to absorb super skills would definitely be above “high”.

As for what this thing was, Shi Yu found a way to understand it.

For example, if they encountered a totem, and if Baby Ginseng didn't have the overlord's will, it would definitely be so scared that it would pee and obediently offer up its whiskers and nutrients to save its life.

However, if Baby Ginseng had the overlord will, although it might still die after being touched by the totem, even if it was already dead, it still couldn't accept it. Even if it died, it couldn't accept it. Before dying, it wanted to use its whiskers to slap the other party. Perhaps, with the help of the overlord will, it could even break through on the spot and kill the other party.

Inacertain situation, it was a very important ability.

He looked at Eleven and the others and said, "According to Teacher Ying, although your race level is enough for you to successfully grow to the overlord level, what about the totem level and the Mythical level?"

"You don't have a Mythical race, so you can't rely on natural growth to break through to the Mythical stage. Don't you want to become a unique Mythical creature?"

"The overlord's will might not be much help for you to break through to the overlord level, but since it can allow low-level creatures to break through bottlenecks and reach a higher level, it might also be the greatest help for you to break through to the Mythical level in the future."

Eleven, Buggy, Baby Ginseng, and Chi Tong blinked.

It was too far, too far. The big pancake was too far away. They had yet to reach the monarch level. It didn't feel realistic at all.

"Forget it, I'll lay my cards on the table with you guys. There's a problem with adding points. Although my physique is now enough to withstand the additional points of super skills, the side that receives the additional points, which is you guys, can't absorb the experience of super skills without enough willpower."

"At best, your body will collapse, at worst, you will go berserk. It's very dangerous. After all, the experience contained in super skills is not something low-level skills can compare to. It has already involved some rules."

Eleven, Buggy, Baby Ginseng, and Chi Tong's expressions changed. No wonder Shi Yu had never added any super skills!

"So you guys understand, right? The premise of adding points for super skills is the overlord's will. If you can't train the overlord's will, you basically won't be able to enjoy additional points in the future. In another way, as long as you have the overlord's will, you're basically guaranteed to be at the totem level. Oh, no, the half-god level, which is the level of Yun An and the king of totems."

"This current hard work is for the future."

Their expressions gradually became solemn.

“But you’re still young, so I won’t force you. If you’re interested, practice. If not, there’s no hurry. Take your time. After all, even if you all have the overlord’s will, I can’t add more points for all of you. There has to be a queue. Whoever can train the overlord’s will first will definitely have to add more points...”

suddenly, they all felt a sense of danger.

“Before that, let me think... Should I directly go to the wild to contract a wild pet that has already formed and mastered the overlord’s will...” Shi Yu fell into deep thought.

“Before you master the overlord’s will, I’ll give it some super skills...”

Great, this seemed to be a good idea?

He would directly contract a pet that had already undergone life and death training in nature and had a high success rate of adding points to super skills!

He just didn’t know if such a pet would follow humans. If it was disdainful towards adding points for free, that would be awkward.

“Wu wu wu!”

At this moment, Eleven’s expression gradually became serious. It cried out, “No, no, no.”

It was definitely training its overlord will!

For the sake of increasing the points of super skills, charge!

Wasn’t it just tougher training? It wasn’t afraid!

“Wu!”

Buggy followed closely behind. The additional points of a super skill had the prerequisite was the overlord’s will? He should have said so earlier!

At most, it would experience the suffering during the Green Silkworm period again.

It would give it his all.

“Yi.” Baby Ginseng was also envious. If it became the first pet in the team to learn the overlord’s will, it would be the first to enjoy adding points to super skills. Then, its advantage would be like a snowball effect, rolling bigger and bigger

“Mi.” Chi Tong looked around. Seeing that everyone was so moved, it also flapped its wings. Then... Then it would also work hard.

“Very good!!!”

After saying a bunch of things, none of that was as persuasive as saying that the overlord’s will was the premise for the additional points of super skills, Shi Yu was in tears. Ice Dragon had been corroded down by the comfortable environment, while the gem cat had been corroded down by money. Their hearts had been corroded by the points.

However, it wasn't a big problem. If their current efforts weren't for the sake of making it easier in the future, it would be meaningless.

After Shi Yu finished painting the rewards for the pets, the four little guys were eager to try.

However, they were quickly at a loss, not knowing what to do.

The greatest problem now was actually still because they were too strong. As their points had been added very comprehensively, they had Absolute Sleep that could quickly recover their physical strength, high-speed healing that could quickly heal injuries. The strength of a powerful monarch could allow them to face most of the danger. Apart from some special environments, the training environment in the ruins didn't seem to be enough for them to train.

"There's no hurry now." Shi Yu looked at the four little guys standing on the spot, not knowing how to train. "In a few days, we'll go to the time mystic realm at Imperial Capital University."

"I heard that the environment there is harsh. Life forms with weak willpower, lack of concentration, and unstable hearts will not be able to withstand the baptism of time power. In other words, that place is a very good place to train your willpower and heart. When Baby Ginseng goes there to evolve in a few days, you guys can find a way there first."

"Yil!" Baby Ginseng's eyes lit up. Evolution!

"Before that, compared to hoping to quickly train your overlord will, it's better to spend time training super skills yourself first. Although super skills are harder to increase proficiency than low, mid, and high-level skills, with your foundation, proficiency should still be able to be reached quickly with hard work," Shi Yu touched his chin and analyzed.

Initial level to Expert level... Even if one didn't directly add points, it wasn't impossible.

"For example, Eleven, because you have lightning, electromagnetic levitation, and storage lightning trained to the extreme, your Lightning Rod skill is far more than just a regular entry level. It should be at the proficient level now."

"Also, Buggy, your Imagination Domain and Dragon of Imagination are also almost proficient under the influence of phantom illusion."

"Baby Ginseng, with your slow healing and high-speed healing proficiency increasing greatly, your proficiency level should have been driven away from the initial level."

Super skills could increase the proficiency of low-level skills. In other words, low-level skills could definitely increase the proficiency of super skills. However, the range would definitely be much smaller, because super skills were harder to master the further one went, but without a doubt, it was still effective!

Therefore, Shi Yu was also considering whether he should teach more low-level skills with high compatibility before they could be taught super skills so as to increase the level of super skills! Accumulation!

“In short, Eleven, you should mainly practice four super skills first. Your four super skills can be practiced at the same time. The efficiency won’t be low.”

“After you use bean soldier to summon 10 Bean Bears, you will first enchant the spatial abilities to the Bears and then use Thunder Rod to enchant them and yourself with the Thunder Rod to attract a thunderstorm. Then, you will let them use the Space Quake to resist the thunderstorm. If nothing goes wrong, the thunderstorm will instantly destroy them. Of course, you will definitely be fine. The thunderstorm will be absorbed into your source of strength and used to train your Inner Power. This way, the four skills will be circulated...”

Eleven wanted to cry. Buggy, Baby Ginseng, and Chi Tong also wanted to cry.

‘What level of training method could this capitalist think of?’

Bean, bean, bear...!

“Buggy, your training is also very simple. Practicing more of the “Finishing Touch: profundity is equivalent to training two super skills at the same time,” Shi Yu said. “If you have spare energy, you can use Psychic and Deterrence too.”

The ultimate profundity of the Finishing Touch was the strongest attack profundity of Buggy, which combined skills such as the Imagination Domain and the Dragon of Imagination.

If it wanted to use it, he had to first set up the Imagination Domain. This way, Buggy’s mental strength would undergo a qualitative change, and its strength would increase greatly. In this situation, using the Dragon of Imagination to obtain the dragon attribute and increase the dragon-element affinity would greatly increase its physique. Then, it would fuse with the Illusory Phantom and the Imagination Domain and create the Divine Dragon Phantom in the Domain. Its main body could perfectly fuse the Divine Dragon Phantom to launch a fatal attack on the enemy.

This move could use Psychic power to accelerate the speed of the divine dragon and use Dragon Might to wrap around illusions. If it used the high-level dragon-element equipment in the spatial pocket, the power would be even higher, so high that even Eleven would find it difficult to withstand it.

Therefore, Buggy with equipment and Buggy without equipment were two completely different races.

“Wuu wu wu.” Buggy nodded.

“Baby Ginseng, you... source of life... You just have to treat yourself after hurting yourself.”

Baby Ginseng:??

“It means that it’s better to wait for evolution. There are too few super skills now.”

Ginseng Baby: QAQ

It was easy for Chi Tong. He just had to hand the Ice Dragon Blade to it for safekeeping. Chi Tong could use the ice power through the possession of the Ice Dragon Blade. At this moment, the Ice Dragon Phantom in the Ice Dragon Blade would use the frost power to cooperate with Chi Tong’s Sun Flame

and use the Interlocking Sword. This could also be considered to have trained the Sun Flame and the Interlocking Sword.

The use of the Interlocking Sword would cause damage to the body and was extremely draining. The Flame of Rebirth in the Spirit Release Phoenix Spirit state, the Flame of Recovery, solved these and could be considered training.

“Use the Ice Dragon Blade and the Heavenly Thunder Slash to practice in turns,” Shi Yu said to Chi Tong.

In fact, apart from the Ice Dragon Blade and the Battle Emperor Ruins, Shi Yu and the others had also forged other equipment in the past three months.

Among them, the Heavenly Thunder Slash was the second longsword created by Shi Yu and the others after the Ice Dragon Blade.

If the Ice Dragon Blade was an ice-element weapon, then the Heavenly Thunder Slash was naturally a thunder-element weapon.

It still used a forging method similar to the Ice Dragon Blade, but the core of the Ice Dragon Whiskers was changed to the hardening substance that Eleven gave the lightning-eating characteristic.

Inside the Heavenly Thunder Slash, Eleven’s phantom, created by Buggy, was sleeping, controlling the lightning switch.

In short, when Chi Tong possessed the Heavenly Thunder Slash, it could trigger the power of the Heavenly Thunder and cooperate with it to use the Thunder Flame Interlocking Sword to suppress it.

Unfortunately, Eleven’s Space Quake proficiency was too low, and its nature was not enough to last. It could not create spatial weapons, but the Ice Dragon Blade and Heavenly Thunder Slash were enough.

Relying on the metal element, the Ice Flame Interlocking Sword, and the Thunder Flame Interlocking Sword, the destructive power was already large enough. The interlocking attributes were also perfect. Just these two profundities were enough for Chi Tong to train in a short period of time.

“Go.”

After coaxing the four little guys away, Shi Yu stretched and thought for a moment before strolling in the ruins space.

He realized that there seemed to be no more resources here. All of them had been consumed in the ruins of Emperor Wu. He might need to replenish some.

Now, there were only the spiritual plants and spiritual fruits in the farm area ginseng baby had grown for the entire team.

There were high-level spiritual fruits that replenished nutrition for Eleven, Buggy, and Chi Tong, as well as delicious spiritual fruits that purely satisfied their appetite.

These could barely maintain daily consumption and output using the lush skill of the ginseng baby. However, apart from that, Shi Yu also planned to replenish some metal resources for Eleven, some

water and earth resources for the ginseng baby, and soul crystals for Chi Tong. As for Buggy, well, it could

really just eat fruits. It wasn't that Shi Yu couldn't bear to buy other things.

After confirming the nutritional resources needed to be replenished, Shi Yu went to the equipment research institute.

Apart from forging the Heavenly Thunder Slash, there was actually much more equipment during this period.

For example, the spatial equipment "storage bag" created by the fusion of the worm silk and the full-level spatial pocket.

After Buggy's spatial pocket reached the maximum level, it had the ability to temporarily open up an alternate space separate from its body. With this ability, Shi Yu and the others developed storage equipment.

Unfortunately, due to the restriction of Buggy's strength, the storage bag's ability could not be maintained for long. Shi Yu estimated that if he wanted to commercialize the storage bag, the shelf life of this equipment would have to be more than a year. Perhaps after Buggy's monarch level, it would have

the ability to do it.

And when it reached the totem level, it might also have the ability to open up a mystic realm.

Apart from the Heavenly Thunder Slash, storage bag, and equipment research institute, there was actually a pile of messy things. These levels were relatively low, and the shelf life was not long. If Buggy's research institute was a pile of perfume and sachets, then this place was a pile of talismans and jade pendants wrapped in deterrence and containing illusions. They were all experimental toys for Eleven and Buggy.

If this was only a small experiment, then the Equipment Research Institute beside the equipment research institute was a big project.

There were the Awakening Mirror and the Tyrant Dragon fossil preserved here. Apart from that, although there were no mechanical parts, there was a pile of little Tyrant Dragon Phantoms running around in the backyard like chickens.

After Buggy's dream stealing reached the maximum level, the effect of its ability was even stronger. Even the super skills mastered by the Tyrant Dragon in the Tyrant Dragon fossil dream could be replicated and given to the Tyrant Dragon Phantoms.

In other words, apart from not being a real life form, the Tyrant Dragon phantom it created now had time restrictions and no growth. The racial abilities and skills it had mastered were already no different from that of the Tyrant Dragon.

Now, surrounding these illusions, Shi Yu and the others were studying how to revive these illusions in the true sense of the word. For example, they had tried using the Awakening Mirror directly, or using Baby Ginseng's Life Nutrition Fruit. Unfortunately, they couldn't. Therefore, in the end, it looked like they had to return to the Mechanic class.

The greatest disadvantage of phantom illusions was that they needed energy to maintain and had no growth rate. If they could rely on the mechanical shell to maintain it, they could solve the problem of survival. If they could integrate into mechanical lives, the problem of growth would also be solved.

The ancient mechanical lives that had mastered ancient skills could be born because of this!

In the ruins of Emperor Wu, Shi Yu was restricted by the materials and couldn't carry out subsequent research. However, after coming out this time, Shi Yu planned to let this work go on track.

Firstly, it was to buy a batch of basic mechanical materials!

He still wanted to enter the fourth bureau with the research of the ancient mechanical lives

After walking around the ruins space again, Shi Yu realized that he still had a lot of missions. However, at the moment, the most important thing was definitely still the evolution of the ginseng baby. Shi Yu stepped into the resource room to take a look.

The Moonlight Gem sent by the gem cat, the soil of the time prize of the Feeding Conference, the 13 Death Mutation Fruits condensed by Baby Ginseng itself, and the time mutation fruit that it had gotten for free from the Ice Dragon Ruins were almost all the materials Baby Ginseng had prepared for evolution.

"Life and death, sun, moon, and time are all high-level things. It's probably the foundation of a middle-level overlord race..." Shi Yu was filled with anticipation..

Chapter 257 Returning to the Imperial Capital

After spending half a day arranging the materials list, Shi Yu glanced at the pets who were training according to his plans and left the ruins space happily.

Outside, after an unknown period of time, the gem cat had already changed the television program from Tom and Jerry to Digimon.

The cat lay on the soft sofa, eating delicious fruits and watching the television leisurely...

It was the life Shi Yu yearned for.

After solving the mystery of the disappearance of the myth and his transmigration and contracting a divine beast to watch over the family, he had to return to this beautiful life.

"Why are you out again?" The gem cat took another bite of the gem fruit. It was living purely for food.

"Internet connection."

“Well, I plan to go to Imperial Capital University in two days to help Baby Ginseng evolve in the Time Mystic Realm. Do you want to go?”

“Ha -” The gem cat yawned and said with sleepy eyes, “Go? In my opinion...”

“Let’s take advantage of this evolution to directly let it break through to the monarch level. Stop suppressing it...”

The gem cat had a premonition that after Baby Ginseng evolved and broke through, the gem fruits it created would definitely be more delicious.

However, it was ridiculous for Shi Yu to keep letting the four pets hold their levels down together. The other Beast Tamers who couldn’t nurture monarchs would cry when they saw this.

Was he trying to train that overlord willpower??

The gem cat couldn’t imagine a ginseng baby with an overlord’s will. However, after thinking about it carefully, it felt pretty good that a pet with an overlord’s will had to be its chef?

“No, it’s still early.” Shi Yu rejected.

In any case, the four pets could break through at any time. What was the hurry? After they broke through to the monarch level, each of them would have millions of energy points. At that time, the training cost would be immeasurable.

At least, Shi Yu didn’t think that they could still train freely in the ruins space after breaking through to the monarch level. Although the ruins space gifted by Bureau 11 was not low-level, it definitely couldn’t withstand the four powerful monarchs training crazily inside. They would definitely make a mess inside.

At least they could train inside now that his level was low. When he broke through, there would really be no training venues in school or city.

LILY.

Why were there basically no master-level students in the school? Why didn’t master-level students continue to study higher?

It was because the school’s training facilities were no longer enough to support the effective training of masters and monarchs.

If masters and monarchs wanted to enter a level higher, they could only go to various places in the wild to train, such as the Ice Dragon Snow Mountain and the Undead Battlefield.

Then, Shi Yu lay on his big bed and started to shop online.

He directly ordered an expensive thing and placed the address in the Beast Tamer Association, in case he wasn’t at home. It was impossible for him to buy it himself. He could only buy it online.

After completing all of this, Shi Yu’s phone rang. It was from Senior Panda. Shi Yu directly picked up.

“We plan to have dinner with Principal Feng, Legend Bai, and the others. You should come over too.”

“Alright, where’s the address?” After chatting with Senior Panda for a while, Shi Yu realized that it was getting late. He couldn’t help but stretch lazily.

After chatting with Senior Panda for a while, Shi Yu realized that it was getting late. He couldn’t help but stretch lazily.

At this time, a strong alliance was indeed a good choice. The Iron-eating Beast Feeding Base in Ping Cheng provided the Iron-eating Beast cubs, Emperor Wu Ruins in Wu Ling City provided the training venue, and Ancient Capital University... provided high-quality buyers. As a scientific research organization, they studied the evolution, skills, and system cultivation methods of the Iron-eating Beasts. At the same time, they connected the officials and planned to kill Yun An. “Where’s Buggy? Stop training and C... Oh, wait, Teacher Ying, please teleport me.”

Ying: “?”

“Let’s go eat,” Shi Yu said. The gem cat got up. This was more like it.

In the high-end restaurant specially used by the Ping Cheng Association to receive guests, Shi Yu was the last to arrive.

When he arrived, Master Lin and President Feng were chatting with Principal Feng, Legend Bai, and the other big shots with a smile.

As for Lin Xiuzhu, Lu Qingyi, and White Brook, the three of them were chatting happily on the other side. When he saw this scene, Shi Yu immediately fell silent. This was because he realized that Senior Lu and Senior Bai were also wearing the same panda coat as Lin Xiuzhu and also similar panda accessories. Shi Yu :” ...”

“You’re here.” Principal Feng immediately smiled when he saw Shi Yu and the gem cat teleport over.

“Yeah!” After Shi Yu nodded, he still looked at the three seniors, wanting to know what was going on. “How is it? The souvenir Senior Lin gave us when we were shopping at the breeding base isn’t bad, right?” White Brook asked.

Lin Xiuzhu smiled and nodded.

Shi Yu: “Not bad...”

“Eh, is this a gem cat? Shi Yu, when did you contract a gem cat?” At the same time, Elder Feng of Ping Cheng looked at the gem cat around Shi Yu in surprise and said, “This cat is really handsome...”

“Uhh.” Shi Yu raised his brows. Old Feng... This president didn’t know what he was doing... “Let me introduce you. This is the guardian overlord of our Ancient Capital University. He’s the gem cat screen teacher who saved many teachers and students from Ancient Capital University in the undead disaster a hundred years ago.” Principal Feng immediately introduced with a smile.

After being introduced, the gem cat looked at President Feng. President Feng was immediately stunned, and his eyes nearly popped out. He kept cursing in his heart. This gem cat was an overlord-level creature??

It was the same level as the ice dragon on the snow mountain before it broke through??

After all, there wasn't a single overlord-level creature in the entire Icefield City who could befriend humans. The ones they were friends with were usually somewhere around legend...

"Sorry!!" President Feng immediately bowed crazily to the Gem Cat. Seeing this, Hall Master Lin, who was beside him, laughed. This president wasn't good enough. His eye power was weak.

Unlike him, who had long known that such a powerful creature was hidden in Ancient Capital University through his daughter who studied at Ancient Capital University.

"Sigh -" The gem cat continued to yawn and said, "When is dinner?"

"Almost," President Feng immediately said and treated this lady like an ancestor.

Soon, everyone sat down and waited for dinner. They also communicated about the cooperation. Although everyone had almost finished discussing, they definitely had to seek the opinion of Shi Yu, the Iron-eating Beast spokesperson.

"We plan to establish an iron-eating beast army experimentally and train each other."

"Uh."

Shi Yu listened and said, "You want to build an Iron-eating Beast Army?"

Legend Bai smiled and said, "Yeah, let's recruit 100 Iron-eating Beasts with outstanding aptitude first. We'll learn from Emperor Wu and create an invincible Iron-eating Beast Army."

"We plan to let Hall Master Lin be the commander and White Brook as the deputy commander. Student Lin will be the feeder. Among them, the Soldier Fusion Talent and the Metal-element Strengthening Talent will number about four to five. Then, they will be supplemented with some Beast Tamers with special talent to join the army and be nurtured with the resources of the special elite troops in the Beast Tamer Troops."

"As for the members, they must mobilize the elites from the Beast Tamer Troops. How is it? Is it worth it?"

"Huh? Hall Master Lin is the commander?" Shi Yu immediately felt that it was unreliable.

He looked at Hall Master Lin. Although Hall Master Lin had a monarch race, the Nine Li Battle Beast, Hall Master Lin was already old...

If something happened... he would twist his waist or something. Hall Master Lin: "?" "What, what? I feel that I can still fight for 20 years." Hall Master Lin was overjoyed.

Shi Yu, this kid, looked like he thought he was getting old. Perhaps he didn't know what it meant to be old but strong!

Initially, he didn't have much hot-bloodedness, but the Iron-eating Beast's quasi Mythical Race Evolution Plan, the invincible Iron-eating Beast Army, this pile of temptations really made him unable to stay idle in little Ping Cheng anymore. Although he didn't have much potential anymore, he had experience. It was still feasible to bring new recruits and an Iron-eating Beast Corps that resounded through Dong Huang.

“Sigh.” Looking at the high-spirited Master Lin, White Brook shook her head secretly. It was too difficult for her.

What she was more worried about was whether her family would delay her from going to archeology with Senior Lu after arranging this mission for her.

“But I’m just a deputy commander, right? Can I go archeology with Senior Lu occasionally?” White Brook asked. “In any case, it’s for the Iron-eating Beast Corps...”

“No!!” Legend Bai’s eyes widened. “Don’t you know your own abilities?”

“Ugh -” White Brook revealed a disdainful expression.

Shi Yu looked at Senior Lu.

“As for me, I’m suddenly a little interested in the totem era when Yun An first woke up. Next, I plan to investigate the information of the creator of the iron-eating beast ruins,” Lu Qingyi smiled and said to Shi Yu.

Yun An descended ten thousand years ago and wreaked havoc in the east five thousand years ago. The ruins of the Iron-eating Beast in the ancient capital were established about 4,500 years ago after Yun An was first destroyed.

It could be said that the Nine Inscription Evolution Method, the method that relied on eating fragments of Yun An, was not developed by the generation of Emperor Wu. Emperor Wu and the others only inherited the research results of their predecessors.

For people who had really researched the first and second stages of the Iron-eating Beast’s evolution, in the totem era, this was clearly another extremely secretive break in history. Next, Lu Qingyi planned to investigate deeper

“This is good.” Shi Yu’s eyes lit up. He felt that everyone could form a team. He was also interested!

“Apart from that, those few rare metals are also very scarce at the moment. They all belong to resources that have been plucked since ancient times. If you want to obtain some, you probably can only work from ancient ruins and ancient mystic realms,” Lu Qingyi added.

“Meow ~” At the side, the gem cat ate silently. It understood that tomb robbing wasn’t its cup of tea.

“There’s no hurry.” Shi Yu nodded. He didn’t know when the association would be able to send the other four rare metals and let Eleven add new super skills. He would probably have to wait.

“But doesn’t Senior Lin still have to take care of the farm? Can you spare some energy?” Shi Yu asked.

“Yeah.” Lin Xiuzhu smiled.

“So I’m a little worried that I can’t take on this big responsibility...”

Compared to White Brook and Lu Qingyi, she seemed to... not have much talent.

“Haha, don’t be afraid.” Principal Feng smiled and looked at this outstanding graduate from Ancient Capital University who was about Lu Qingyi’s age. “It’s just a reserve army in the short term.”

This army was purely established to welcome the large number of meteorite fragments that might be obtained in the future. If they couldn't obtain the meteorite fragments, they couldn't be considered an important army. Even the evolution materials of the Nine Li Battle Beast weren't worth investing in.

However, if he could obtain a large number of meteorite fragments, then the entire process of the first and second evolution would have to be arranged for this army. In the end, this time period was to give White Brook and Lin Xiuzhu gain experience.

With this, it was hard to say if they would become a legend.. But they would definitely become a top-notch master in the future.

"Then I'll teach Hall Master Lin and Senior Lin the metal-element nurturing method Senior Chong Xuan gave me as soon as possible," Shi Yu said. "I'll also see if I can find more Iron-eating Beast Kings."

"Oh right, let's help Eleven awaken his royal bloodline first."

Shi Yu had naturally told everyone about what Zhong Xuan had said back then. The Iron-eating Beast King's words had refreshed everyone's understanding of the Iron-eating Beast... No wonder Shi Yu's Eleven was so abnormal. It turned out that it had a royal bloodline.

"When are you teaching?" the panda senior asked eagerly.

She also wanted to help Eleven awaken its royal bloodline quickly to see the changes after Eleven.

Senior Panda hoped to learn this skill well and help more. "Tonight..." Shi Yu suddenly felt that something was wrong. "I definitely can't tonight. It's too late. Tomorrow."

"By the way..."

"I didn't say it on the phone previously. It's Ice Dragon. It seems to have the intention to join Dragon Palace City." Shi Yu looked at Principal Feng. As Shi Yu finished speaking, everyone was stunned. The topic quickly changed from the Iron-eating Beast to the Ice Dragon Totem. Everyone was a little caught off guard, and this news...

"The Ice Dragon Totem is going to rely on Dragon Palace City??" Principal Feng was slightly shocked.

Shi Yu had previously said on the phone that Ice Dragon was willing to stay "nearby" in Dong Huang. It was really nearby.

"Yes." Shi Yu nodded and said, "This shouldn't be a problem, right? I promised Ice Dragon to go with it in a few days. Isn't Dragon Palace City coincidentally holding a Dragon Palace banquet?" "Well..." Principal Feng fell into deep thought. "Yeah..." "I see. If it's willing to stay in Dong Huang, indeed, that place is one of the few places that attract it," Principal Feng said with a nod.

"This way, Dragon Palace City will have a new totem." Lu Qingyi sighed slightly beside him.

"As expected of the greatest totem power in the Eastern Sea Region. Its attraction to the dragons is indeed very fatal." Legend Bai also sighed.

"That's not a problem. Our Dong Huang definitely can't produce resources that can attract Ice Dragon better than the Dragon God Ruins in Dragon Palace City," Principal Feng said. "As long as they're allies."

The Dragon God Ruins was a Mythical trial ruin. Legend had it that the Dragon Palace City was a faction left behind by a Mythical divine dragon, and this ruin was established to choose the Dragon Palace City's Dragon God.

There were endless treasures and opportunities there.

For millions of years, although every dragon-type creature that could obtain recognition in the Dragon God Ruins couldn't become mythical, they undoubtedly became the totem king of the demigod level and led Dragon Palace City.

The most beloved thing was that Dragon Palace City had a rule. Any totem dragon who sincerely joined Dragon Palace City could enter the Dragon God Ruins and obtain a large number of treasures. Although some of them would belong to Dragon Palace City, the remaining portion would belong to the dragon. There might even be Mythical resources.

With this, Dragon Palace City attracted countless dragon-type creatures to join.

Currently, Dragon Palace City had a demigod-level totem king. Under the totem king were seven dragon-element totems. If the new ice dragon was included, there were a total of nine totems.

Generally speaking, any creature that could break through to the totem level was extremely arrogant. With their strength, they could completely build their own divine kingdom and collect faith. It was still very rare for multiple totems to gather in one faction.

For example, the eleven totem districts that surrounded the Dong Huang Ancient Country, the Heavenly Fox Nation, and the Divine Tree Nation, only had one totem commanding everything. It was completely different from a super faction like Dragon Palace City, where there was a totem king commanding many totems.

"Wait!!!"

"Didn't you say that Ice Dragon would follow you to Dragon Palace City?" Principal Feng was suddenly stunned.

"Yeah."

"...This." Suddenly, Principal Feng's expression became more and more expectant.

"Good lord, things are getting interesting." "If the Ice Dragon wants to join Dragon Palace City and you travel with it, the invisible benefits will probably be huge."

The Dragon Palace Banquet was a huge event held once every five years by the royal family of Dragon Palace City. It would invite all the factions under the commander of Dragon Palace City and humans to participate.

Among them, the human delegation was basically aiming to obtain the recognition of high-level pets. However, after so many years of cooperation, the transcendent creatures of Dragon Palace City were not stupid. They would choose the best humans to entrust their descendants to.

At that time, Shi Yu would definitely not be the only human young talent to visit Dragon Palace City. There would be a bunch of them accompanying Shi Yu.

These people were considered competitors.

In short, if one wanted to obtain an overlord cub, they had to showcase their abilities.

When others tried their best to display their talent, strength, and potential in order to obtain the recognition of the various overlord factions in Dragon Palace City and send a banquet congratulatory gift to show their financial resources and sincerity... Shi Yu would just directly call the Ice Dragon Totem out and call it Mom. He would also be the one who sent Dragon Mom into Dragon Palace City. Wasn't this greater than talent, potential, and sincerity?

When out in the world, nothing was better than having a good background...

Ice Dragon Totem, plus the Sea Dragon King's friendship token...

Generally speaking, there was only one totem presiding over the Dragon Palace banquet every year. However, this time, the addition of a new totem would probably attract a bunch of totems and even the Dragon God, increasing the atmosphere of this Dragon Palace banquet to the highest. At that time, as long as Shi Yu and the Ice Dragon were a little closer and exchanged a few words with the Sea Dragon King, Shi Yu could choose any of the overlord heirs.

Perhaps, in order to befriend the Ice Dragon Totem, it was even possible for him to have a totem's child!

After all, the resources in the Dragon God Ruins were endless, and the dragon-element totem was the only existence that could continuously take out resources from the Dragon God Ruins. As a huge mutual benefit, it was very normal to maintain friendships and exchange resources. The addition of the dragon-element totem would not only not reduce the resources in the Dragon Palace City, but it would also increase. This was the reason why the Dragon Palace City had never declined and had many totems.

"Looks like the new overlord race is guaranteed, and it's the kind you can choose casually," Principal Feng thought.

As expected, no matter what talent one had, having powerful backers was always better.

"I think so too," Shi Yu thought.

The Ice Dragon would join Dragon Palace City. Chi Tong and the Ice Dragon was as close as a mother and daughter, and Chi Tong and Shi Yu was as close as a father and daughter. In other words, it was also a member of Dragon Palace City. This way, Dragon Palace City couldn't treat it badly, right?!

Principal Feng and Shi Yu. One of them was already in the first bureau, while the other was trying to get into the first bureau. The surrounding people were silent as they watched these two talk about getting backers...

Did they go off topic? Didn't they agree to discuss the Iron-eating Beast?

Two days later, in the capital.

After Shi Yu returned to Ping Cheng for a short period of time, he used some time to teach the Metal-element Cultivation Method to Senior Panda. She also tried to help Eleven massage. However, just as Chong Xuan said, it definitely wouldn't be effective in the short term, and took time.

Apart from that, Ice Dragon was still plundering the power of the Ice River Totem at the end. After Shi Yu realized that there was nothing to do, he decisively left Ping Cheng and came to the capital again.

Imperial Capital University, Prophecy Temple.

There was another sign outside saying, "Today's an off-day. Don't be noisy, or bear the consequences."

The Prediction Owl was gone...

After Shi Yu arrived, he looked at the cold surroundings and was a little silent. Fortunately, the gem cat that came with him seemed to be as familiar with the place as President Ye Hui.

Boom!!!

The gem cat directly rushed over with Psychic power and blew up the Prediction Owl that was sleeping in the temple!

"Ah! Which bastard? Eh, so it's you, bad cat."

After the owl flew out, it looked at Shi Yu and the gem cat in a daze. It didn't understand why the pair had suddenly come to visit it.

"Lord owl, good afternoon. Didn't you say last time that you were going to enter the Time Ruins to help Baby Ginseng mutate and evolve with the power of time..."

"We're here this time." Shi Yu chuckled and pointed at the baby ginseng in his pocket.

"Yi!!!" Baby Ginseng was extremely excited. "Wu..." The owl pondered. It was for real.

This unreliable evolution method was indeed thought up by someone as unreliable as Shi Yu.

"Long time no see!! You tricked me last time. Help me predict for free this time. It's not too much to predict what that guy can evolve into." The gem cat wanted a spoiler in advance. It stared at the Prediction Owl.

When the owl saw this situation, it had a bitter expression. Why did they all want to freeload?

"Forget it, forget it. Let's do it for free. However, you have to inform Little Yezi if you enter the Time Ruins..."

With that said, it began to enter a prediction state and made an evolution prophecy for Baby Ginseng. A moment later, in the white mist, the Prediction Owl saw a figure similar to Baby Ginseng

Then, it opened its eyes in silence and looked at the expectant Baby Ginseng.

At this moment, Baby Ginseng had actually already acknowledged the owl. Through the Undying Dark Phoenix and Yun An, it felt that the owl's prophecy was 80% correct even if it wasn't 100% correct. This fellow might be able to predict what it would evolve into!

However...

"Unfortunately, you seem to have failed in your mutation?? Your appearance hasn't changed much..." the owl said regretfully. It knew that Shi Yu coming here was unreliable... Baby Ginseng:?? "Yi!!!" The

towering emperor was furious. Did this owl make a good prophecy!? Why did it have to be this time? It wasn't related to the totem!

Chapter 258 Baby Ginseng's Invincible Evolution

When Shi Yu arrived at Imperial Capital University, the old principal of Imperial Capital University and the vice-chancellor, Ye Hui, received the news immediately.

Because Shi Yu was brought on by the president of the Feeding Association, Ye Hui, the mission of watching Shi Yu enter the Time Mystic Realm naturally fell on his head. When Ye Hui arrived at the Prophecy Temple, he saw Shi Yu, the owl, and the others arguing about something

"The prophecy is reversed, you guys, this means it'll succeed," a certain cat said in all seriousness.

If the prophecy failed, it must have evolved successfully.

"Nonsense!!"

The prophecy was only about something happening today. The target of the prophecy wasn't very strong either. The owl didn't believe that the prophecy could be wrong this time. This time, it was clearly much more reliable than the previous totem-related predictions. Moreover, even if one thought about it, they knew that Shi Yu and the others weren't going to be satisfied this time.

The time element was the strongest and rarest attribute. The Prediction Owl approved of this point. How could such a powerful attribute be evolved by a mere time ruin? Using the Time Ruins as the main evolution location, Shi Yu and the others were directly in the wrong direction! It wasn't that it didn't trust the ruins left behind by its Beast Tamer. After all, even if it was Emperor Shi, according to legend, he couldn't help other creatures develop time attributes. At most, he could let the pets under him learn the combination skill of time elements!

"I say, you guys..." President Ye Hui scratched his head. At the moment, he didn't need to think to know what was going on. It was probably the prophecy surrounding the owl again. "I'm here, I'm here." President Ye interrupted everyone. "Yo, Little Yezi, you're here." Seeing President Ye Hui arrive, the owl said, "Where's the

pass?"

"Uncle Ye," Shi Yu said.

The cat also glanced at the president of the Feeding Association. "Yes." President Ye laughed. If he wanted to open the Time Mystic Realm, he had to have a pass from the Imperial Capital University's school. He had to get the principal and many higher-ups to agree. Although the owl was in charge of the Time Mystic Realm, it was restricted by the rules of the first principal. The procedures to enter were still necessary. "Then can we go in now?" Shi Yu said. Ye Hui said, "Well, sure, but only you can go in yourself. The time mystic realm has strict restrictions on the level of entry. Teacher Ying can probably only wait for you outside." He glanced at the guardian overlord of Ancient Capital University.

"It's alright, I'll wait outside. It's been a long time since I came to Imperial Capital University... I can..." It looked at the Prediction Owl.

It wanted to beat this owl up!

“Bastard.” The Prediction Owl cursed. Unfortunately, its skills were all on Future Prediction, and it couldn’t defeat this cat. “Then let’s hurry,” Shi Yu said with a smile. “Let’s go, let’s go.” The owl sighed. Next, Shi Yu and the others started preparing. In fact, what needed to be prepared was enough resources. Even if only three days had passed outside, it was equivalent to a month inside. Inside, apart from the basic facilities, there was no other resource produced at all. Therefore, these preparations had to be done before the Beast Tamer entered.

It didn’t take long for everything to be arranged. The owl began to lead Shi Yu and the others deeper into the Time Forest. At the same time, he exhorted, “No matter how long you can last, for safety’s sake, I’ll throw you out after three days in the outside world. There are still too many unstable factors inside.” “If anything happens, there’s also a mechanism to communicate with the outside world inside. After you press it, I’ll sense it immediately.” “Understood!” “You agreed so readily. I’m very worried.” The owl fluttered its beautiful blue feathers. “Wu.” President Ye also followed beside him and asked, “Probably, nothing will happen, right?” “Uh.” Shi Yu was stunned. “For example, there won’t be a situation like the Battle Emperor Ruins, right?” President Ye said.

Shi Yu had disappeared for three months before coming out. The members of the third bureau definitely knew. At that time, President Ye had also gone to Wu Ling City to think of a way. He was more worried now. If Shi Yu also caused trouble in the Time Mystic Realm, it would be troublesome.

No matter how one looked at it, the time mystic realm created by the first-generation principal of the Imperial Capital University looked more fragile than the Emperor Ruins. This time, he was the one who arranged for Shi Yu to enter the Time Mystic Realm. If something happened... then the responsibility... President Ye suddenly wanted to cry and was a little afraid.

Most importantly, Shi Yu... was indeed restless.

“Uh.” Hearing President Ye mention this, the owl was stunned. What was wrong with the Emperor Wu Ruins?

It really didn’t know what had happened in the Emperor Wu Ruins. Back then, in order to find Shi Yu, although Bureau 11 had also found pets that could predict the future, they didn’t go for this owl. Instead, it found other relatively more reliable pets, such as the time overlord that had mastered the perfect level of premonition. However, clearly, even a more reliable guy couldn’t predict Shi Yu’s exact situation at that time.

“It’s nothing. Shi Yu caused a crack in the Emperor Wu Ruins.” The scheming cat said, “I heard that you’re the in-charge of the Time Ruins? You should be very troubled if the Time Ruins crack.”

The Prediction Owl:???

“No, no, no. I’m just letting Baby Ginseng enter to undergo evolution. What big deal can happen?” Shi Yu laughed. “Let’s go, let’s go.” This time, Shi Yu really planned to only evolve and train obediently. If he was rejected by the owl because of his past battle results, he wouldn’t cry. “Don’t rush me, don’t rush me,” the owl said. In the depths of the Time Forest, there was a white ruin. After Shi Yu and the others arrived, a white vortex hole was opened by the Prediction Owl on the ruin wall.

This was the entrance to the Time Ruins.

“Are you ready?” The owl looked up at Shi Yu. At this moment, Shi Yu was naturally ready. He nodded eagerly. “Alright, go in.” After the Prediction Owl, the Gem Cat, and President Ye looked at each other, they sighed. As the hexagram of time appeared, the vortex at the entrance of the mystic realm quickly expanded. “Then I’ll go in. Wait for me!” Shi Yu directly stepped in without any reluctance to leave the outside world. As Shi Yu entered, in the outside world, President Ye, the gem cat, and the Prediction Owl looked at each other again. President Ye said, “Senior owl, did you really predict that the mutation of that ginseng baby failed?” “That’s true,” the owl said. “Its form hasn’t changed at all, and its aura hasn’t changed much either.”

“Is it possible that it evolved, but not completely? I mean, it became stronger, but its form hasn’t changed,” Ye Hui said.

The owl couldn’t be bothered to think about it. It said, “These are all secondary... The main thing is that I don’t think the Time Mystic Realm has a function that can assist in evolution...” “Do you think he’ll succeed?”

Ye Hui chuckled. How should he put it? Relying on the soil of time and the mystic realm of time, Shi Yu wanted a ginseng baby that had already mutated once to mutate the time attribute again. He also felt that Shi Yu was a little delusional.

However, pets like the Butterfly of Imagination and the Nine Li Battle Beast had been tamed by Shi Yu. At the moment, Shi Yu was still a member of their third bureau. Perhaps there was really a chance of successfully researching the mutated species of the ginseng baby. “It’s hard to say. After all, I don’t know what his other mutated materials are. If he uses higher-level time materials... who knows?” The gem cat licked its claws at the side and said, “There’s probably no higher-level time materials, but there’s a Moonlight Gem and the death power of the Undead Battlefield’s Undying Pond. It’s a huge hodgepodge... With my hundred years of experience, I’m a little confused about the scientific basis of such evolution materials. President Ye, do you understand?”

The owl was speechless. What kind of strange evolution formula was this?

President Ye: “... This...”

President Ye was stunned. Moonlight Gem, a light-element ingredient that represented the power of the moon? The Undying Pond that represented the power of death and water? The soil of time that represented time and earth and the mystic realm of time that purely represented time...?

Why was it so messy!

Didn’t Shi Yu want to train the ginseng baby in the time element?!

With President Ye’s many years of feeding experience, his thoughts were actually stuck at this moment. For ordinary pets, bearing two secondary attributes was the limit. As long as it was a normal feeder, they knew that it was best not to have more than two attributes. The directional cultivation was relatively stable, but for Shi Yu...

“Do you know what Shi Yu said?” he asked the gem cat.

The gem cat said, "He said that gambling felt good and continuing gambling felt even better. Use all high level materials and waddle past everything, and miracles can happen. Multiple combinations easily produce unscientific skills."

President Ye: "?"

The owl was speechless again. This was how they trained pets in the third bureau? The owl felt that the prophecy was definitely stable this time.

Under normal circumstances, Shi Yu naturally didn't dare to bet, but with the successful case of Buggy and the fact that transcendent mutants had already displayed the ability to easily deal with various mutations, the success rate of the bet became very high.

Time Mystic Realm.

This was a white world. White land, white sky, and white buildings were filled with white mist.

After Shi Yu entered, he felt that it was extremely stuffy and hot. The air seemed to have become much thinner. He walked a few times and his movements became abnormally difficult. From the looks of it, the gravity here was also different from the outside world.

Most importantly, not long after he entered, Shi Yu felt that his brain couldn't concentrate. It seemed to be very difficult to meditate, scaring him into immediately inhaling the sweetness in the sachet.

"Wuu!"

"Wu!"

Yi!"

"Mi!"

After Shi Yu entered, the four pets were naturally released by Shi Yu. Compared to Shi Yu, their ability to adapt to the new environment was much stronger. They didn't feel much change at all. However, it was also normal. President Ye and the owl said that they would only take them out three days later, which was 30 days inside. In other words, they felt that it was not a problem for Shi Yu to stay here for a month. "Let's go in first and train later." "The pressure here will increase depending on how long we stay here. Let's take advantage of the fact that Baby Ginseng's spirit is better now and evolve it first," Shi Yu suggested.

"Yi!!!"

Baby Ginseng raised its arm and imitated the leader in a celebratory state, expressing its agreement.

At this moment, Eleven crossed its arms and looked like a big boss. Anything was fine. Chi Tong was aloof from worldly affairs. Its form kept changing between sword, sparrow, and phoenix... as it flew in the mystic realm of time. "Wu..." Buggy cheered for Baby Ginseng with a bitter expression. It calculated that Chi Tong and the leader's racial levels were higher than its own. They had three to four super skills, and now, Baby Ginseng was at the bottom. If Baby Ginseng also mutated and evolved very strong,

then... It suddenly had a teary feeling and understood a little. Being the first one to evolve might not necessarily be the best. The characters that appeared later would always be stronger than the previous ones. The reason was also very simple... Shi Yu's strength and financial resources were constantly rising. The evolution materials used would definitely become better and better with time.

After deciding to evolve immediately, Shi Yu and the others arrived at the white palace square of the Time Mystic Realm. Although this place was also bare, compared to the white ground outside, it was at least barely a place for humans to stay. After arriving, Shi Yu and the others began to take out various mutated materials. The level-seven light-element resource, the Moon Gem that contained Moonlight Radiance. This Moonlight Radiance had once created a new species of werewolves and the giant ape totem of the seven islands. Ginseng Baby's portion was definitely much smaller, but it should be able to provide some mutation effects. There was also the soil of time that contained the power of time and could mutate plants. There was an undead fruit. It had a chance for a lifeform to comprehend the power of death, or it could kill the lifeform with the corrosion of the power of death. In addition, the time mutation fruit that Baby Ginseng had spent a lot of effort to freeload from the Ice Dragon Ruins was almost all its savings. However, before eating this, Baby Ginseng itself absorbed the mutation power produced by the Time Mystic Realm through the mutation. "Yi..." After absorbing for a while, Baby Ginseng frowned and had a bitter expression. It felt that the volume here was a little larger than the Ice Dragon Ruins. Although there was indeed the power of time mutation and the stimulation was greater, absorbing it was still not that efficient...

As expected, the power of time was so high-end.

"Take it slow," Shi Yu said with a smile.

With that said, he took out a set of poker cards and called Eleven, Buggy, and Little Chi Tong. "Let's wait for it while playing." Baby Ginseng:?? "The longer we stay in the time ruin, the greater the mental pressure. In any case, you don't feel anything now. Why don't you rest first?"

"Sob." Eleven felt that this was a waste of time. Buggy also felt that way. Both of them wanted to train their overlord will as soon as possible, and they weren't very interested in casual entertainment at the moment. Although Chi Tong was a little tempted, seeing that Eleven and Buggy didn't say anything, it also turned around with difficulty and decided to train. "It's not a big problem. You guys train yourselves. Just leave the Bean Bears and the Dragoness Phantom Illusion for me to play with." Shi Yu was still very human. His qualities in various aspects were definitely inferior to pets. He wasn't that resistant to pressure. He could only pass the difficult days through the entertainment project... A day after the Time Mystic Realm... More than two hours had passed in the outside world.

As Shi Yu entered the Time Mystic Realm, President Ye and the others left soon. After all, according to calculations, Shi Yu could only come out three days later in the outside world. President Ye, this busy person, went straight to work, while the gem cat dragged the local tyrant, the Prediction Owl, to treat it. For a moment, no one paid attention to Shi Yu. At this moment, in the mystic realm, Shi Yu and the others happened to arrive at the most critical moment.

After a day, Baby Ginseng had already accumulated a lot of time mutation power in its body through the transcendent mutation. It felt that with this time mutation power, it could mutate and evolve, and its strength would increase greatly.

However, Baby Ginseng and Shi Yu were clearly not satisfied with this. Baby Ginseng's mutated body had yet to feel the pressure, so it could continue absorbing. However, what followed wasn't just the power of time.

"Yi..." Baby Ginseng started to eat the Moonlight Gem and the soil of time. It started to eat the undead fruit and the time fruit, continuing to enrich the mutation power in its body. At this moment, if not for the fact that it had the mutation skill, its body would have already exploded. At the moment, there was already a huge amount of mutation power accumulated in the special organ that was waiting for Baby Ginseng to absorb it... A long time later... Baby Ginseng glanced at Shi Yu and felt that it was time to absorb the mutation power. "Then let's begin." Shi Yu smiled and gave Baby Ginseng a thumbs

up.

"Yi!" Baby Ginseng showed a determined expression. As Baby Ginseng decided to evolve, the other three little guys who had been strolling in the Time Mystic Realm for a long time immediately ran over to watch.

They surrounded Shi Yu and stared at Baby Ginseng, curious if Baby Ginseng could successfully mutate. In fact, if Baby Ginseng became stronger, the whole team would benefit. Eleven and the other pets understood this very well.

"Yi!"

From Baby Ginseng's perspective, apart from being able to heal Shi Yu better after becoming stronger, its desire to increase its battle power was actually very strong. Whether it could escape the fate of the supplements depended on this moment!!

The mutation materials used this time were already very high-level. Although the mutation was a permanent skill, it was unrealistic to expect another mutation. This time, it had to be done in one go!! "Yi!!" Baby Ginseng shouted again. "Evolve." Shi Yu looked forward to it silently.

In the next moment. Boom!!! Baby Ginseng completely activated its mutation power. In an instant, its body was like a reactor. All kinds of mutation power erupted uniformly and modified Baby Ginseng's body. At this moment, the white evolution light instantly filled Baby Ginseng's entire body. Among them, the huge power of time was the first to bloom, making Baby Ginseng's body like a white hole in time. Under the baptism of the endless power of time, Baby Ginseng accidentally sensed in the white world that the greatest change that the power of time brought to it was actually... Digging out the potential in its body again to increase its quality. It was as if its body had experienced dozens or hundreds of years of training in an instant. Its life force had become incomparably rich. This was the speciality of supplement-type pets. The longer it lived, the better the nourishing effect.

This power of time seemed to directly change it from a hundred-year-old ginseng to a thousand-year-old ginseng. In addition, the skill that benefited the most might be the source of life. At this moment, its proficiency actually started to approach expert level. An incomparable fragrance bloomed from Baby Ginseng's body and instantly filled the entire palace, moving Shi Yu, Eleven, and the others. "Yi..." In the white light, Baby Ginseng's consciousness was in a daze. At the side, Shi Yu and the others didn't dare to breathe, afraid that they wouldn't be able to control themselves.

Holy shit.

This fragrance... At this moment, although Baby Ginseng's evolution had yet to be completely carried out, Shi Yu's index clearly reflected the energy changes of Baby Ginseng. In a short moment, its energy value went from 110,000 to 160,000, quickly catching up to the large group. However, this wasn't what shocked Shi Yu and the others the most. The next scene was. The time power in Baby Ginseng's body seemed to have resonated with the time power in the Time Mystic Realm. It immediately changed the extremely calm environment of the Time Ruins. Baby Ginseng's body was like a huge black hole. It still wasn't satisfied after absorbing the time mutation power in its body, as if its potential had yet to be completely unearthed. It actually started to absorb the time power of the outside world like it was absorbing the natural power!

This change directly made the white fog in the Time Mystic Realm look like a rolling sea of clouds. The entire Time Ruins trembled because of this. "Holy shit." Seeing this, Shi Yu, Eleven, and the others were stunned. However, what made them even more stunned was still coming. At this moment, the evolution light on Baby Ginseng's body swept through the power of time and directly turned into a power that surged into the sky, opening a huge white hole in the sky. No matter how Shi Yu looked at it, this huge white hole was like a huge hole opened by the owl when it sent them in.

At this moment, the appearance of this huge hole was very spiritual. It made Shi Yu very inclined to think that the Time Ruins wanted to take the initiative to pull them out. After all, they had wasted too much energy here...

However, the current evolution definitely couldn't be stopped. Now was the most critical moment of Baby Ginseng's evolution. Under the cover of the evolution light that illuminated the entire palace, Baby Ginseng had already started to awaken its first skill!

When this skill was awakened, Shi Yu was immediately stunned. His expression was flushed.

Because...

Time skill!!

Skill: Time Fruit

Attributes: Wood, Time

[Level]: Advanced

< Introduction > Creatures that create the Time Fruit and eat the Time Fruit can temporarily become young or old, thereby obtaining the peak strength of their youth or the peak strength after growth. Holy shit!

Shi Yu cursed in his heart twice. This was high-level? This was high-level?

The effect of a high-level spatial skill was already this impressive. Shi Yu didn't expect that a high-level time skill was even more impressive. In an instant, he was stunned by the powerful ability of the Time Fruit.

What did this mean?

For example, if Zhong Xuan, who had suffered an incurable injury, ate a Time Fruit, could it directly recover to its peak without being injured? Of course, this definitely had a strength requirement for Baby

Ginseng. Baby Ginseng had to be at least at the totem level. Apart from that, if it was eaten by a pet with great potential but not grown up, would it directly obtain the peak battle power of the future years? Would its battle power be off the charts?? Time element! Time element! This skill matched the time element too well. The only regret Shi Yu had was that it was “temporary”. All the effects were temporary, but this was also normal. If it wasn’t temporary, it would be a completely divine skill. Even super level would be too low of a category for it. Perhaps the duration of this Time Fruit was pitifully short. At the same time, the consumption of the ginseng baby would be countless times greater than creating nutrients. Shi Yu held his breath and continued watching. At the same time, what Shi Yu and the others didn’t know was that after the white hole formed by the resonance with Baby Ginseng connected to the outside world, it directly transmitted the commotion of Baby Ginseng’s evolution. The fragrance that filled the sky also quietly flowed out of the outside world.

At this moment, many people’s gazes had already been attracted by the huge white hole in the sky.

This white hole could also be seen in the outside world!

“What’s this?”

“What’s going on?”

In the outside world, the teachers and students of Imperial Capital University were extremely confused.

This was... the entrance to the ruins? The appearance of the entrance to the ruins was not the most terrifying thing. The most terrifying thing was that as the fragrance spread from the white hole, the entire sky was like the birth of the Undying Divine Medicine. Coming from the time ruin, it condensed an extremely spectacular heaven and earth phenomenon.

It was as if a huge ginseng baby made of fragrance was waving at everyone in the sky. In an instant, the white hole seemed to contain endless magic, making the pets watching there tremble as its genes reacted. At the battle club square of Imperial Capital University.

Because they had lost to Shi Yu, in order to wash away their humiliation in the National League, this group of people trained double the intensity every day. Vice-captain Bai Wenjie, Jiang Ran, ordinary members Liang Yan, Tang Yu, reserve members Yin Zhengfan, everyone was training hard. Of course, their pets were no exception. At this moment, perhaps because it was almost lunchtime, in the face of the sudden sky phenomenon of Imperial Capital University, these pets instantly drooled... As if their brains were controlled by something and they couldn’t help but want to rush in that direction.

“Ice River Mammoth, what’s wrong with you?” “Dark Three-Headed Python?!”

“Space Crystal Butterfly...”

Countless Beast Tamers’ pets were attracted by the change in the sky. They even broke away from the mental connection with the Beast Tamer all at once and showed some uncontrollable trends. This change made the students pale in fright, scaring them into hurriedly retracting their pets. At the same time, they looked at the huge change in the birth of the white hole with the divine medicine and immortal medicine in confusion. “What happened...” After everyone was stunned for a moment, they realized that something even more ridiculous was still to come. The pets with owners were naturally

pulled back, but like a capital university in a school city, there were too many pets and wild pets raised. Even Ancient Capital University had a plant garden, so Imperial Capital University naturally had more.

At this moment, an extremely strange phenomenon occurred in Imperial Capital University. A large group of ownerless pets drooled as they walked towards the mountain forest where the owl's temple was located. Their goal was to reach the highest point and approach the fragrant white cave.

Imperial Capital University, Feeding Department.

Many teachers from the Feeding Department looked at the anomaly in a daze. A respected old professor was confused for a long time before reacting and muttered, "This is... Is a legendary quality immortal medicine coming into existence?? Something's wrong, in that direction, the Time Ruins??" At the moment, the most confused ones were definitely the gem cat and owl who were having a meal on a certain floor.

They naturally discovered the change very quickly.

The shocking fragrance was not only limited to the transcendent, commander, and monarch pets in the university, but even the two overlords trembled. They felt that the food in their mouths was no longer fragrant. "Holy shit." The owl was stunned. At this moment, it suddenly felt that its Future Prediction skill had improved a little. "That direction is your house?" the gem cat asked.

"This, this, this..." The owl had yet to react. "Why did the mystic realm open by itself!!!" It was shocked. As for the gem cat, it looked at the baby ginseng phantom in the sky and was a little silent. After pondering for a moment, it said, "Perhaps an accident happened. Calm down. Although it was broken by Shi Yu, the Battle Emperor Ruins didn't completely explode." "Oh? You haven't reacted yet? Something must have happened to your time ruin. It's most likely related to... Shi Yu and Baby Ginseng's evolution." Owl: ???!!!

The owl was stunned. Without a word, it flew out of the room and crawled towards the Time Mystic Realm, not understanding what had happened.

Holy shit, the premonition skill improved, so shouldn't that mean that the prediction was correct...

Didn't that mean that the mutation had failed?

Why was there such a big reaction!!! Seeing this, the gem cat followed closely. At the same time, its heart was not calm...

As expected, something had happened in the Undead Battlefield and the Emperor Wu Ruins. It was impossible for nothing to happen this time...

The change was still ongoing. Baby Ginseng's energy level was even continuing to increase. In the mystic realm of time, Shi Yu was extremely shocked. How should he put it? Baby Ginseng was indeed a race that specialized in energy. Previously, it was only a low-level monarch race. Its energy value naturally couldn't compare to the other three pets of the overlord race.

But now, as it evolved, in a short moment, before it even awakened a new super skill, its energy level had already risen to 180,000, and it had already caught up to the large group. At the side, Buggy sensed the shocking change in the aura of the white ginseng baby and was getting depressed.

Fwoom...

Soon, Baby Ginseng indeed awakened a new super skill. This meant that its evolved race was not limited to the monarch race. It perfectly absorbed the power of mutation and successfully mutated its race level to the overlord level!

The dazzling evolution light fused with the power of life and seemed to have formed a white sea of life. A bright white moon directly rose from here and shone with dazzling light. Skill: Moon Explosion [Attributes]: Wood, Light [Level]: Super level < Introduction > The plant life it created can fuse with the Moonlight Radiation. The Moonlight Radiation will cause the natural life force in its body to expand until it exceeds the limit and erupts with power that far exceeds normal self-destruction. Self-destruct!!!

After awakening this skill, Baby Ginseng felt that it was walking further and further on the path of the explosive ginseng. This skill seemed to be similar to the effect of the Energy Fruit, but the upper limit was even higher. There was no need for Baby Ginseng to create more fruits one by one. In the future, if it used plant control to create a sea of trees and a forest, then in that forest, every blade of grass, tree, and even tree roots could absorb the Moonlight Radiance and erupt with power that exceeded self-destruction. At the same time, most importantly, Baby Ginseng could also use this move to make itself self-destruct and unleash incomparable power. Seeing Baby Ginseng awaken this move, Shi Yu was shocked and delighted.

Baby Ginseng should be very happy now. The power of this move was probably not inferior to Eleven and Buggy's super skills. In fact, if it self-destructed, it would definitely be the strongest output in the team.

Unfortunately, self-destruction could only be used once. This was a skill that would definitely be used at the cost of one's life. Dong Huang's mechanical army relied on the self-destruction skill to intimidate the totems. In short, although this move was strong, it couldn't be used... "Even if it's just the self-destruction of plants, the power is immeasurable..." Shi Yu thought. After all, the simple explosion of the Energy Fruit was quite terrifying. If the Energy Fruit could absorb the natural power of the Moonlight Radiation, causing the energy to expand several times before exploding, the effect could be said to be even more terrifying. Shi Yu had heard that the energy value of the Giant Ape Totem of the seven islands could increase by at least ten times after absorbing the power of the Moonlight Radiation! This move was equivalent to a skill borrowing natural power. Moreover, it involved outer space, so it was definitely promising in the future.

At this moment, Baby Ginseng's energy level had already broken through the 200,000 mark during continuous evolution, directly breaking through to the upper limit of the commander rank in one go. At this moment, Baby Ginseng already felt that it could break through to the monarch rank at any time and place. However, it was still suppressing it, but even so, it couldn't offset the shocking energy fluctuations erupting from its body. As it evolved this time, Baby Ginseng displayed the shocking energy advantage of the supplement race again and directly ranked first in the team!!

At this moment, in the outside world, a large group of people had already gathered in the Time Forest.

The teachers, students, and even the school leaders and the several overlords guarding Imperial Capital University were all attracted by the commotion here and came to the owl's territory. "Roar!!!!!"

In the sky, although it was still daytime, a bright moon was shining abnormally in the sky. It seemed to have formed a mysterious connection with the white hole. After that, the fragrance produced by the vortex was even richer, and even the overlord-level creature guarding Imperial Capital University was a little tempted. What exactly was it?? At that moment, the old principal of the Imperial Capital University, a white-haired woman, and a middle-aged man arrived at the same time. They looked at each other and the corners of their mouths twitched. They looked at the owl circling in the sky with a headache. Soon, they knew that this wasn't the owl's doing, but a big problem had happened in the Time Mystic Realm!! "What a sin." The old principal of Imperial Capital University naturally knew what was going on.

Apart from Shi Yu, who had applied to enter the Time Mystic Realm to try and help Baby Ginseng evolve, it was impossible for there to be anyone else inside!! In other words, this commotion was caused by Shi Yu??

After knowing Shi Yu's battle results in the Undead Battlefield and Emperor Wu Ruins, she shouldn't have let Shi Yu come again!! "Damn, what's going on?" President Ye Hui widened his eyes as he looked at this shocking phenomenon. He suspected very much that the Undying Divine Medicine had really appeared. Even the birth of a supplement from a quasi Mythical race didn't cause such a big commotion, right? Shi Yu... what was this guy doing!!! "Stay away, get lost, get lost!!!" In the sky, the Prediction Owl maintained order with a stomach ache, its overlord aura spreading "Senior owl, this, what's going on?"

A teacher and student who were more familiar with the owl asked in confusion. In the sky, the owl widened its eyes and said, "How on earth would I know? If I tell you that a ginseng baby is evolving inside, would you believe me??"

Everyone: "?"

What???

Everyone looked at the baby ginseng phantom in the sky in a daze, unable to think straight. F*ck, who were they kidding? How could there be such a big commotion when a ginseng baby evolved?? It could attract all the wild pets of the Imperial Capital University? It could make their pet disobedient and come to inhale the fragrance? It could make a group of overlord guardians come here to wipe their saliva? This was clearly some Undying Divine Medicine planted in the ruins of time that had ripened!

Undying Ginseng? At this moment, the world changed again. The illusory figure of the ginseng baby formed by the fragrance began the final change.

A ball of white mist crazily gathered around Baby Ginseng's eyes... gradually forming a pattern. This pattern directly made the Prediction Owl in the outside world widen its eyes. This was surprisingly a time hexagram.

Inside the Time Ruins.

The white evolution light had already slowly faded, and Baby Ginseng's appearance gradually appeared in front of Shi Yu and the others. Just as the Prediction Owl said, Baby Ginseng's mutation this time didn't change its form at all... No, it wasn't accurate. There was still a little change, but the pupils of Baby Ginseng's eyes directly turned into a white time hexagram, looking mysterious and noble. "Yi." At the same time, the hexagram in Baby Ginseng's eyes spun, awakening the last super skill.

Skill: Time Mark

Attributes: Wood, Time

(Level]: Super level

< Introduction > It can condense a time mark and record its own state. It can reverse time, reverse life and death, recover injuries, or revive itself after being injured and dying. Shi Yu: “????”

Holy shit.

Shi Yu widened his eyes. Baby Ginseng had only awakened three skills during this evolution. Among them, there were only two super skills. However, as the last super skill awakened, Shi Yu and Baby Ginseng instantly fell silent. What kind of awesome skill was this???

He just said that self-destruction was a forbidden skill, but now... even the revival skill was available??

Although Baby Ginseng sensed that the condensation and use of the time mark was very limited,... At this moment, Eleven, Buggy, and Chi Tong’s figures were immediately reflected in Baby Ginseng’s hexagram eyes. It felt that first place wasn’t that far off. At this moment, he silently analyzed Baby Ginseng’s current situation. Shi Yu felt that among the names, perhaps the one that matched its current state the most was that... [Race Name]: Undying Ginseng

[Race Attributes]: Wood, Time

[Race Level]: High-level overlord (Quasi Mythical) [Level of Growth]: Commander Level [Race Skill]:

Low-level: Sweet Aura (Dao Proficiency), Slow Healing (Dao Proficiency) Intermediate: Earth Chain (Dao Proficiency), Nutrition (Dao Proficiency) Advanced: Time Fruit (Initiate) Super level: Source of Life (Proficient), Time Mark (Initiate), Moon Explosion (Initiate) (Taught Skill] Low-level: Multiplication (Transcendent) Intermediate: High Speed Healing (transcendent), Strengthening (transcendent), Energy Storage Beam (transcendent), Super Sight (transcendent)

Advanced: Absolute Sleep (transcendent), Multiplication (transcendent), Energy Fruit (transcendent), Mutant (transcendent), Deterrence (transcendent) [Energy Points]: 220061 This time, not only did Baby Ginseng have the strongest time element, but its energy advantage also erupted perfectly! Although there weren’t many super skills and judging from the number of skills alone, it was only middle-level overlord race. Together with attributes, energy, and other qualities, the race was definitely above high-level overlords! “Undying Ginseng... Undying Ginseng Baby, revival skill... I didn’t expect... It’s the combination of the power of death and the power of time?” Shi Yu immediately shared the state of Baby Ginseng to Eleven, Buggy, and Chi Tong.

A moment later, the three pets were stunned.

After seeing Baby Ginseng’s terrifying energy value, the three pets were shocked. Especially after seeing the Undying Seal, Eleven, Buggy, and the others widened their eyes suddenly. “Wu!!!” “Wu!!!”

Eleven and Buggy danced around. What a joke. This, what kind of skill was this! Was this guy simply too frustrated from not being the strongest? It could even reverse death?? “Yi ~” Seeing that Eleven and Buggy were so excited, Baby Ginseng put its hands behind its back with a calm expression. Well, it wasn’t that strong or anything. Although it could achieve the combination skill of self-destruction and

revival, the restrictions were still pretty big. For example... Before Baby Ginseng could finish showing off, suddenly, a suction force came from the white vortex in the sky. Shi Yu and the others were immediately stunned. What was going on! They had only stayed in the Time Mystic Realm for a day.

In the outside world, as the commotion became smaller, the owl gradually recovered its connection to the Time Mystic Realm. After that, it had no choice but to quickly pull Shi Yu and the others out of the mystic realm, afraid that something bad would happen again, such as the time ruin being blown up.

Then, under the gaze of countless people, Shi Yu, Eleven, Buggy, Baby Ginseng, and Chi Tong appeared in the white ruins with a white light.

At this moment, as Shi Yu came out of the Time Mystic Realm, time seemed to have stopped. Many Imperial Capital University students stared at Shi Yu in silence. The expressions of the students from the Imperial Capital University who had been beaten up by Shi Yu, especially Yin Zhengfan, froze almost instantly. Wait a minute, why, why was it Shi Yu?? At that moment, Shi Yu suddenly realized that something was wrong. He also looked silently at the crazy-looking owl, the gem cat that had a helpless expression, and the thousands of teachers, students, and pets surrounding him... After that, his heart skipped a beat. What... happened?

Why, they were all here. Didn't they have school??

"You guys... came to see my ginseng baby evolve?"

Chapter 259 Time-type Undying Ginseng

In the Time Forest, outside the Time Ruins.

After Shi Yu was pulled out by the owl, hundreds of teachers, students, and pets looked at Shi Yu in silence. They mainly looked at the ginseng baby beside its pants. [If I tell you, a ginseng baby inside is evolving, would you believe me?]

[Are you guys here to see my baby ginseng evolve?]

Everyone looked at the fragrance phenomenon of the ginseng baby that condensed in the sky and the ginseng baby that was teleported out by the owl. The words of the owl and Shi Yu echoed in their ears.

So... everything just now was really caused by the evolution of a ginseng baby?

What a joke!

How could Baby Ginseng's evolution be so big!!!

To directly turn all the pets in the school into hungry dogs, what level of supplement was that!

However, that wasn't the most important thing. Most importantly, this ginseng baby seemed to be Shi Yu's?

In the crowd, Yin Zhengfan widened his eyes and recognized this exaggerated ginseng baby. Wasn't this the battle ginseng that insta-killed its Zonyan Rock Beast!

Why were Shi Yu and Baby Ginseng in the Time Ruins of Imperial Capital University??

After all, he originally wanted to apply to enter the Time Ruins to surpass Shi Yu. He was the one who first...

“Wait, isn’t that still a ginseng baby? Has it evolved?”

“Look at its eyes, its eyes have become completely different from other ginseng babies. The time hexagram pattern on Lord Owl’s body also appeared in its pupils... What is this.”

“Even if Baby Ginseng evolves, shouldn’t it be a ginseng fruit tree?”

In an instant, everyone started discussing.

At this moment, Baby Ginseng had already restrained most of its strength. But even so, the enchanting aura of a supplement with quasi Mythical potential still couldn’t be restrained. Many pets still looked at it in a daze, wishing they could lick it a few times. If it weren’t for the overlord owl blocking in front, they wouldn’t have been able to control themselves.

“Yi! (Don’t be perverted)” Baby Ginseng frowned.

“Wuu!!!” After Baby Ginseng finished speaking, the Prediction Owl circling in the sky spoke.

It shouted crazily, “Unrelated people, leave my territory immediately. Now that you’ve seriously violated the school rules, I’ll give you five minutes. Leave quickly!!”

At this moment, the Prediction Owl naturally discovered the astonishing change in Baby Ginseng’s body. However, the current scene was really not easy to investigate. It planned to blast away this batch of spectators first.

Although the owl’s battle power was not high among overlord-level creatures, its seniority in Imperial Capital University was still ridiculously high. After all, it was a pet left behind by the first principal.

“...” Many teachers, students, and pets were incomparably silent. At this moment, in the crowd, the old principal of the Imperial Capital University also took a deep breath and said after the owl, “Everyone, leave.”

“Don’t gather here. Go do whatever you need to do.”

“You guys should leave first. I’ll explain later.” She looked at the three guardian overlords of Imperial Capital University who had been attracted by the commotion.

“Roar!!”

Among the hundred beasts, there was a huge green-winged giant tiger, an elemental life form that looked like a stone giant, and an ancient tree with a thousand hands. When they heard this, they took a look at Baby Ginseng and turned to leave.

As the old principal of the Imperial Capital University spoke, no matter how reluctant they were to leave the scene, these teachers, students, and pets could only reluctantly turn and leave.

However, many students, especially the students from the battle club, looked at Shi Yu and the others deeply with complicated gazes when they turned around to leave.

“I keep feeling that he’s stronger again...”

“That ginseng baby seems to have become even more ridiculous...”

“Damn it, what exactly is going on?”

One person left, then two people, followed by a group. A moment later, this ruin was sealed, and only a few people were left at the scene.

What was left was the old principal of Imperial Capital University, President Ye, the Prediction Owl, the Gem Cat Screen, and Shi Yu and the others.

At this moment, looking at the old principal of the Imperial Capital University, the worried President Ye, the depressed owl, and the gem cat that was watching the commotion with anticipation, Shi Yu felt a headache.

He quickly glanced at the phenomenon in the sky again and took a deep breath. “An accident, purely an accident.” “Like hell I believe you!!!” The owl shouted. At this moment, it had already sensed the situation inside the Time Ruins.

It shouted, “The time power inside is much less all of a sudden. I wonder how long it will take to recover!! What exactly have you guys done to the mystic realm? If it’s just that ordinary evolution and training can’t be rejected by the mystic realm!!” President Ye hurriedly smiled and said, “It’s already much better than what I imagined at the start. At least the ruins didn’t explode, right? In any case, no one uses it usually. Let it slowly recover first. The key problem now is...”

He looked at Shi Yu and Baby Ginseng and said, “You guys... evolved successfully??”

The owl was also stunned. It looked at Baby Ginseng. You guys... evolved successfully?

Could it really evolve successfully with such a strange collection of evolution ingredients?

The Time Ruins really had evolution effects???

“It has exceeded 200,000 energy. The power of time lingering outside its body is suppressing the power to break through...” The old principal of the Imperial Capital University still looked at Baby Ginseng in silence, her gaze scrutinizing Shi Yu.

The old lady also didn’t understand what had happened to this ginseng baby. She didn’t understand what Shi Yu and the others had done.

“Yes, I barely succeeded,” Shi Yu said in embarrassment. “A new mutated race, Undying Ginseng, wood, and time. Its racial level is estimated to be above a high-level overlord...”

Everyone: “?”

“Otherwise... Otherwise, there wouldn’t be such a big commotion, right?” As Shi Yu finished speaking, the voices of the old principal and President Ye of the Imperial Capital University were extremely hoarse.

The monarch species owl beside them widened its eyes. As for the gem cat, it was shocked and delighted

Holy shit, above high-level overlord?

What a joke!

Moreover, it really mutated into a time element type??

“Damn, can that material really succeed? Who are you kidding?” The owl shouted in shock.

The time element of a high-level overlord race, who was he kidding!

Even its master didn't contract a time-type pet of this race. It wasn't even an overlord race. It was the most impressive thing!

In the end, the time ruin left behind created a high-level time overlord race? It didn't believe it!!

Apart from Emperor Shi, the Prediction Owl didn't believe that anyone could nurture such a pet!

“The materials might not be the main thing. It's mainly because my Baby Ginseng's talent is unique... It has a mutated physique.” Shi Yu smiled shyly.

To be able to mutate successfully, the mutation environment was actually secondary. It was mainly because the transcendent mutation suppressed all detrimental factors and perfectly turned the power of mutation into the potential of the ginseng baby.

If it were other pets... Even if it was a mutant tree that also mastered mutations, restricted by the skill level, such a mutation was definitely courting death.

After Shi Yu finished speaking, everyone still didn't react.

They still felt that it was a little unbelievable.

The spatial pets of overlord races were already quite powerful. Time-type... was unimaginable. Why could Emperor Shi end the totem era? Wasn't it because of his heaven-defying time-element talent?

From the method of building the heroic spirit ruins, one could tell that the power of Emperor Shi was something that subsequent emperors like Emperor Wu and the empress could not reach.

Even Emperor Kong, who had once successfully established an intercontinental spatial teleportation array that crossed the ocean, felt that he was inferior to Emperor Shi and said that Emperor Shi was the true emperor of time.

“Then, after the mutation succeeded, what changes did Baby Ginseng have?” President Ye Hui hurriedly asked.

Without a doubt, the Undying Ginseng was a brand new race. For a Feeder like Ye Hui, Baby Ginseng was currently as attractive to it as the Mythical Ruins to Shi Yu. It wanted to explore it very much.

Shi Yu smiled bitterly. “You guys saw it too... That just now... should mean that the nourishing effect is better, right?”

“Its energy value is almost two to three times that of pets of high-level overlord races of the same level...”

“Now, it should be considered a high-quality super supplement with legendary potential. In the future, when it grows up, it will definitely be a divine medicine...”

Baby Ginseng’s face also fell. What was he talking about this, talk about its battle power!

“Apart from that, it also awakened three new skills. Among them, there are two time-element skills, one high-level, and one super-level...”

“Well, the high-level time skill is a dual-element wood and time skill. It’s called the Time Fruit. Its effect is... It can allow the user to temporarily use the power of time to obtain the full strength of their youth or the strength after growth.”

“The general effect is that it can make a baby temporarily become a big man, and an old man temporarily become a strong man?”

Everyone: “?”

Holy shit.

As Shi Yu finished speaking, the pupils of the old principal and President Ye Hui of the Imperial Capital University constricted. The Prediction Owl and the Gem Cat were also stunned.

What kind of sick skill was this?

“Have you guys heard of a legend? The army of the Imperial Dynasty of Emperor Shi is the only army in history that won’t weaken because of age...”

“Although there are no records, I suspect that one of Emperor Shi’s pets most likely mastered this move.”

“Shi, Shi, Emperor Shi?” President Ye said subconsciously.

“Yes.” Shi Yu also suddenly made the connection later.

Unfortunately, there were very few records... Perhaps he could ask Ice Dragon later.

Just thinking about it, if those old generals who were old and unable to increase their pets could use a Time Fruit to return to their peak... It was invincible.

“So this is high-level? High-level?” The old principal of the Imperial Capital University couldn’t help but widen his eyes.

He called this a high-level skill?

Shi Yu waved his hand and said, “It’s indeed high-level. Of course, my ginseng baby definitely can’t compare to Emperor Shi’s pet at the moment.”

[Ginseng Baby: Get to the important part!]

“It’s limited by its strength. Now, apart from using it himself, its Time Fruit can only be effective against pets of low levels. In other words, its Time Fruit can only be effective against pets below the transcendent level...”

“Moreover, the maintenance time probably won’t exceed a minute. After returning to its peak state, it’s also considered overdrafting the user’s strength. The burden on the user is huge... It’s probably going to lie down later... Although, it’s already worth it.” After Baby Ginseng sensed it carefully, it indeed discovered the current limitations of the Time Fruit.

However, this wasn’t a problem. As long as the skill wasn’t super, Shi Yu could immediately arrange for it to be maxed out.

At that time, forget about taking effect on pets of the same level, it might even have a weak effect on pets one level higher than Baby Ginseng!

Because Emperor Shi had the time element to strengthen his talent... Perhaps he couldn’t reach the level of Emperor Shi’s pet, but it was probably not a problem to get close.

“You also know that time-element skills are not easy to practice. It’s so difficult to increase proficiency...” Shi Yu said.” Moreover, the consumption of condensing one such fruit is comparable to using ordinary super skills several times. It’s not that impressive.”

At the side, the owl nodded deeply. Indeed, time-type skills were too difficult to train.

“That’s also...” President Ye Hui and the old principal of Imperial Capital University still felt that it was very strong.

For a pet of the racial level like Baby Ginseng, when its strength rose in the future, it probably wouldn’t be a problem to live for hundreds or thousands of years. With this skill, after it grew up in the future, it could completely rely on the power of one hit KO’s to pull up Dong Huang’s battle power level. They still said that this was a f*cking high-level?

“Speaking of which, are there any pets for me to do experiments nearby...” Shi Yu suddenly muttered. The pile of pets just now seemed to have been chased away by the owl.

“I’ll do it!!” At the side, the gem cat was eager to try. Its entire body emitted blue light. In the next moment, a brown earth-element creature the size of an arm was teleported over by the gem cat.

“Heh!!!” The wild Rockback Lizard, which lived in the mountain area of Imperial Capital University and was in charge of polishing rocks, was shocked.

It looked at the surrounding environment and the phenomenon that was gradually disappearing in the sky, extremely shocked.

To be honest, it had also sensed the changes here just now and even wanted to come over. However, because it was too excited, it had just gone out and planned to leave when it was thrown on the spot tens of thousands of meters away.

“Then let’s give it a try?” President Ye said in anticipation.

“You feeders are really wasteful... But it’s alright,” the old principal of Imperial Capital University said.

Even if the level of the Time Fruit was very low, it sounded very expensive.

It was too extravagant to experiment with a wild transcendent creature directly. However, the research of feeders seemed to be like this.

“Baby Ginseng.” Shi Yu immediately nodded at Baby Ginseng

At this moment, Baby Ginseng was also impatient. Under the gaze of Eleven, Buggy, and Chi Tong, it tried its best to condense the Time Fruit.

It was similar to the process of condensing energy fruits and nutritional supplements, but the consumption was greater than both.

When Baby Ginseng stretched out its hands to condense the Time Fruit, its six-pointed star pupils spun crazily. Light emitted from its hand, and the power of time constantly wrapped around it. Its physical fitness was also being crazily extracted.

In a short period of time, half of Baby Ginseng’s physical fitness was taken away. Only then did a time fruit with the lowest quality successfully condense.

“Yi!!!”

After a white light flashed, a small white fruit like a pineapple appeared in Baby Ginseng’s hand. It held the fruit and panted with difficulty...

After the Time Fruit was condensed, Baby Ginseng threw it to the Rockback Lizard beside it. Under the gaze of a group of big shots, the Rockback Lizard swallowed its saliva...

Eat!

After all, this thing was still pretty fragrant. It shouldn’t have been poisoned.

Click.

The Rockback Lizard wolfed it down. “Heh!!!” After eating, the Rockback Lizard suddenly froze on the spot.

In the next moment, its energy suddenly began to increase steadily.

Everyone instantly focused.

Boom!

Then, under the explosive increase in energy, the Rockback Lizard’s entire body was actually filled with evolution and breakthrough light!

This was...

This change suddenly shocked the old principal, President Ye Hui, the Prediction Owl, and the gem cat.

After swallowing the Time Fruit, the Rockback Lizard, which had less than a hundred energy points, actually evolved and broke through. In a short moment, its body grew several times, and its body

became comparable to a lion or tiger, growing into a new race!! At this moment, the index data in front of Shi Yu changed crazily.

This was the previous data.

< Name > Rockback Lizard

[Race Level]: Mid-level transcendent

(Level of Growth): Level 10 Awakening

Energy Points: 77

“Roar!!!” A moment later, the evolution light dissipated, and a huge lizard appeared in front of Shi Yu and the others.

Its huge body, black patterns, and characteristics that looked like dinosaurs were the appearance of the Rockback Lizard after it ate the Time Fruit.

In Shi Yu’s index, the data had become like this.

< Name > Earth Rock Lizard

[Race Level): Low-level Commander

(Level of Growth): Commander Level

Energy Points: 22318

The old principal and President Ye Hui of the Imperial Capital University clearly had similar detection methods. Beside them, the Prediction Owl and the Gem Cat could also clearly determine the changes of the Rockback Lizard. At this moment, as they clearly saw the changes after the Rockback Lizard ate the Time Fruit, they opened their mouths wide. Damn it.

Wasn’t the effect of this Time Fruit a little heaven-defying?

It directly made the Rockback Lizard evolve? It even broke through two levels in a row? Its energy level increased by hundreds of times??

“This...”

“This works too?”

“Is this a time skill?”

At this moment, the most shocked was still the Rockback Lizard. It felt its powerful strength and was directly stunned.

However, in less than ten seconds, its expression suddenly changed. Its entire body flashed, and its body kept shrinking as if it had breathed out. It returned to its Rockback Lizard form.

At the same time, it lay on the ground with a weak expression, its limbs and tail twitching.

“It has some potential, but it’s limited... It can’t maintain peak battle power for long...” Shi Yu was silent.

Seeing this, Baby Ginseng was just about to heal the Rockback Lizard, but the Time Fruit seemed to have some additional power. The Rockback Lizard that fell flashed with evolution light again. In the next moment, because it had experienced its peak strength, it seemed to have broken through the racial limit and actually evolved again.

A moment later, a brown lizard creature that was different from the Rockback Lizard and the Earth Rock Lizard appeared in front of Shi Yu and the others.

< Name > Earth Rock Lizard

(Race Level]: High Transcendent

(Level of Growth]: transcendent

Energy Points: 588

However, it was still so weak.

At that moment, everyone was stunned when they saw this change. “What the?!!!” Then, President Ye Hui was stunned. “It’s one thing to directly let an awakened pet obtain commander rank power, but it actually lets it complete a temporary evolution!! A temporary evolution!!”

Not only was this Time Fruit a peak battle power experience card, but it also let the pet experience stronger strength for once, thereby confirming the best shortcut to its own path!!

After the power of time lost its effect, the Rockback Lizard directly relied on its previous understanding to increase its strength and even completed an evolution!

After all, this was only the entry-level Time Fruit that had just awakened.

In an instant, the two of them and the two overlords looked at Baby Ginseng in amazement. Eleven and the others also looked at Baby Ginseng in admiration.

As expected, it was still better at cheating. “Yi!!” Seeing this, Baby Ginseng revealed a smug expression. Shi Yu also took a deep breath. It was alright. The effect was better than he had expected. As expected of an invincible time-type skill. How powerful would it be to have the skill advancement??

Just the entry-level Time Fruit alone made Shi Yu feel that it was much more expensive than the full-level Nutrition Fruit.

Although the Maximum-level Nutrition Fruit could rely on the power of time to strengthen the effect, increase the evolution potential, and increase life force, this Time Fruit directly let the pet experience the power after evolution. Rockback Lizard+Time Fruit = Earth Rock Lizard... This reminded Shi Yu of the classic combination of a card game. “Time Magician “+” Baby Dragon” = “Thousand Year Dragon”!

This fruit was too suitable for pets with great potential but needed to grow for a long time, such as dragons!

Initially, Shi Yu didn’t know what gifts he would bring to Dragon Palace City apart from the frost dragon. He estimated that Dragon Palace City wouldn’t fancy the Nutrition Fruit either, but now, when he saw the Time Fruit, he immediately understood. Max-level Time Fruit!

It could definitely make a group of dragon babies go crazy. "This is the way pets in the growth stage obtain mature strength..."

"It should still be able to be used in reverse. For example, letting an old Earth Dragon Lizard with weak battle power temporarily recover to its prime," Shi Yu said.

The old principal and President Ye of the Imperial Capital University naturally understood. They couldn't help but suffocate.

"...C-condense another one," the old principal of Imperial Capital University said to Baby Ginseng

"Yi?" Baby Ginseng was stunned. After Shi Yu nodded, it still did as he said. In the next moment, it took root in the ground and absorbed the light energy. At the same time, it condensed the Time Fruit.

Soon, Baby Ginseng's physical strength was drained. However, with the Earth Chain, Energy Storage Beam, and Absolute Sleep recovery measures, its recovery speed was still alright.

A moment later, another time fruit appeared.

Baby Ginseng was handed to the old principal. Did he still need to experiment?

"Yes..."

After Baby Ginseng condensed the Time Fruit, the old principal of the Imperial Capital University looked at the Time Fruit and hesitated.

He stretched out one hand as if he was fighting a mental battle.

"Forget it, forget it. There's no need." She touched her wrinkled face and blushed. "It's just that small duration. It's meaningless..." Shi Yu, President Ye, and the pets : "..."

They immediately understood the thoughts of the old principal of Imperial Capital University. Just now, she definitely wanted to use the Time Fruit to return to the era of when she was a fair and beautiful young woman!

Returning to being young was indeed a fatal temptation for women.

"Not bad, in short, not bad. Student Shi Yu, from now on, Imperial Capital University will be your second home." After the old principal of the Imperial Capital University saw Baby Ginseng's ability, she immediately changed her previously calm expression and said brightly, "I look forward to the day Baby Ginseng becomes stronger. This skill is good. You have to practice it quickly and increase your level!!"

In that case, if she asked Shi Yu for a few more Time Fruits, she could occasionally become younger. Which rich woman didn't want to become beautiful?

President Ye and the owl:???

"Ah, this." Shi Yu also reacted.

Holy shit.

This skill's real use was not to increase battle power, but a trump card against an old rich woman?? Baby Ginseng was also stunned. Under the influence of the Beast Tamer, it quickly reacted to how lethal this move was to the old rich lady.

"Alright, alright," Shi Yu hurriedly nodded. "Very good." The old principal of the Imperial Capital University instantly found Shi Yu much more pleasing to the eye. She even wanted to snatch him from Old Feng.

At this moment, Baby Ginseng looked at the time fruit in its hand and fell into deep thought.

Beside it, Eleven, Buggy, and Chi Tong were eager to try.

They wanted to eat it!

"Yi!" Baby Ginseng glared at them.

This thing was only useful for those below commander rank.

"Wu Wu Wu." Eleven waved its hand. It's alright. It could create transcendent-level bean bear experiments.

It wanted to see if it could evolve the Bean Bear into the Nine Li form.

"Yiya!" Baby Ginseng shook its head crazily, thinking that this was more wasteful...

"Eat it yourself and see. Isn't the Time Fruit effective in ignoring your own level?" Shi Yu said.

"Yi?!!" Baby Ginseng smiled happily when it heard that. Yes.

With that said, it wanted to swallow it in one go. "Wait, wait!!!"

Seeing this, Ye Hui and the old principal of the Imperial Capital University were shocked and hurriedly stopped Baby Ginseng.

"Don't eat it. It can break through to the monarch level at any time now. After eating the Time Fruit, I'm afraid it can directly obtain the monarch level power. Just now, its evolution released such a huge reaction. If it breaks through now, are you sure it won't alarm the pets in the entire city??" President Ye hurriedly stopped it.

At that time, it was possible for Baby Ginseng's energy level to increase by ten or 20 times.

The commotion was definitely greater!

Doing it the second time was too much!

"Yi! (You can ask Teacher Ying to seal the space.)" Baby Ginseng looked at the gem cat and still wanted to eat it.

However, in the next second, Baby Ginseng saw the gem cat wipe its saliva and shake its head.

"I advise you not to mess around. I'm afraid that I'll accidentally eat you after you break through." The gem cat's gaze was faint, scaring Baby Ginseng

"Yi???"

“Yeah.” The Prediction Owl’s gaze was also faint. “Time-element monarch-level supplement... Perhaps, after eating you, my Future Prediction can directly reach Perfect Level.”

“(A) Yi!!!” Baby Ginseng was shocked and hurriedly threw the hot potato, the Time Fruit, into Eleven’s hand.

“Sob.” Eleven was pleased.

“I’m just kidding. However, after you break through to the overlord level, remember to give me more of this Time Fruit.” The Prediction Owl also remembered the Time Fruit. After all, maybe it could also rely on this to break through?

At this moment, because the shock brought by the Time Fruit was too great, the old principal and President Ye of the Imperial Capital University even forgot about the discussion!

They hurriedly asked, “Speaking of which, what’s the super skill!!”

If a high-level time skill was already so impressive, then super... how terrifying would it be??

“There are two super skills. One is the wood and light element Moon Explosion, and the other is still a wood and time skill, Time Mark.”

“Moon Explosion... It’s probably the ability to make the internal energy of the corporeal wood-element skill expand several times before exploding with Moonlight Radiation.”

“If Baby Ginseng’s main body uses this skill to self-destruct, with its current 220,000 energy points, it should be able to instantly expand to more than 2 million energy points, and then produce a violent big explosion...”

Shi Yu guessed. Beside him, Baby Ginseng nodded. Explosion was art!

“This, the Moonlight Gem really worked?!”

At the side, the gem cat was stunned. The Moonlight Radiation was clearly due to the Moonlight Gem.

Obviously, this was a powerful attack-type skill.

The destructive power of a single skill could even exceed the combination of a bunch of explosive skills when Eleven fought Grandpa Bull.

At the side, the corners of everyone’s mouths twitched. As a supplementary ginseng baby, it was ridiculous for him to have comprehended such a skill.

“This skill...”

It was really difficult to evaluate for the old principal and President Ye.

However, it was still acceptable.

Although the self-destruction power of the Moon Explosion sounded much stronger than traditional self-destruction, it definitely couldn’t be used. As for other uses, they were only so-so compared to heaven-defying time skills. In comparison, it seemed obvious that these two skills have the wrong level classification.

However, skill levels were often determined by the skill upper limit. Something as big as the moon could borrow the power of a celestial body to cause a huge explosion was indeed a little extraordinary.

When trained to the extreme, its power might be comparable to the explosion of a small planet.

“Yiya!!!” Baby Ginseng shouted. Should it also experiment with Moon Explosion?

It liked this month too much.

With its current strength, self-destruction should be enough to kill those monarch-level pets with millions of energy points.

If it directly self-destructed after breaking through to the monarch level, wouldn't it be invincible at the monarch level and heavily injure overlord-level creatures?

“It wants to test the power of the Moon Explosion, especially the self-destruction,” Shi Yu translated, making the eyelids of the people beside him twitch.

Wait, wait, these guys were drunk on evolution.

“Try the power of the self-destruction??” The old principal and Ye Hui wondered if they had heard correctly.

Their expressions darkened. Courting death?

“What do you mean? Won't he die if he self-destructs...” President Ye said. “Don't tell me he won't die. Self-destruction with an energy increase of ten times... is even more ridiculous than the self-destruct skills of those Mechanics.”

“Of course it will die, and it will die without leaving any dregs. However, don't forget its race name, Undying Ginseng...” Shi Yu said.

Everyone was stunned.

Shi Yu said, “Baby Ginseng's last super skill of wood and time is formed by combining the power of death. It can condense a time mark, also known as the Undying Mark, and record its own state. Then, after it's injured and unnatural death, it can reverse time and life and death with the time mark to recover from its injuries or revive itself.”

“Therefore, in theory, it can be combined into a continuous skill of self-destruction and revival...”

As Shi Yu finished speaking, the scene suddenly fell silent.

The old principal, President Ye, the owl, and the gem cat widened their eyes. What did he say?

“Yi!!!” Baby Ginseng looked at everyone and was eager to give it a try. It wanted to try! It wanted to find an opponent and experiment! Its awakening skill happened to come with a time mark!

If not, it would feel uncomfortable.

The old principal and President Ye of the Imperial Capital University looked at Baby Ginseng, who was eager to self-destruct, and revealed ridiculous expressions. They reacted for a long time before shouting, “What did you

say??!"

"This skill?? This skill exists???"

They directly lost their ability to think. "Damn, damn, damn." After the Prediction Owl was stunned, its eyes turned red. They were both time-element skills, so why was Baby Ginseng's skill so awesome?

The teacher on the screen beside him was also a little confused. Holy shit, what the hell was this skill?

Who the heck designed this skill? "Infinite self-destruction and revival??" President Ye was stunned.

"Are you sure you're not kidding?" This was a f*cking supplement? Not a special forbidden weapon? Suddenly, the Prediction Owl was shocked and remembered the scene it had predicted about the ginseng baby. A group of totems chased after the ginseng baby and placed it in their mouths...

If at that time, Baby Ginseng already had the strength of an overlord. The totems were in danger.

Initially, when the owl first saw this scene, it felt that Baby Ginseng was ridiculously miserable. But from the looks of it, it suddenly felt that if this premonition was real, the ones who were miserable were those totems.

They f*cking ate a nuclear bomb baby!

A nuclear bomb baby that could revive!

With the Moon Explosion and the Time Mark, it suspected that Shi Yu and Baby Ginseng were going to fish out and hunt totems!

Baby Ginseng: Tired of running. Destroy! "It's not that simple..." Seeing the four of them imagine with blank gazes, Shi Yu hurriedly waved his hand and smiled bitterly. "At the moment, only one Time Mark can be found in Baby Ginseng's body. Moreover, after using one, Baby Ginseng needs to invest all its energy and spend a long time to condense the next one. The restriction is very big."

"Although I don't know what changes will happen when the skill proficiency is high, now, it still costs a lot to self-destruct once. The cooldown time will probably be a few months."

"Yi!!" Baby Ginseng expressed that it was alright, it was alright.

This skill was completely promising in the future. When it trained its overlord will and let Shi Yu maximize this skill, at that time, what if there were multiple time marks in its body? Wouldn't it be close to infinitely self-destructing?

At that time, there would be no need for Dong Huang's mechanical army to suppress Yun An. They could just request for the Undying Ginseng First, eat a Time Fruit and become the strongest state. Then, use Moon Explosion to self-destruct and revive!

This wave was invincible!

It could completely dictate the ages alone and suppress a half-god. "This..."

After Shi Yu finished speaking, the old principal and President Ye of the Imperial Capital University didn't feel that the restriction was very big at all. Bastard, when Baby Ginseng grew to an overlord, Shi Yu would have a forbidden weapon that could be reborn. This was... heaven-defying!!

The two of them looked at each other. The Prediction Owl and the Gem Cat also looked at each other. No wonder Shi Yu called it the Undying Ginseng. No wonder Shi Yu said that it was a quasi-mythical race. This strength and potential...

"In short, you're forbidden from using this move in Imperial Capital University." The eyelids of the old principal of Imperial Capital University twitched.

Suddenly, she was a little worried about the National League of Imperial Capital University this year.

After Baby Ginseng broke through to the monarch level, could Gao Xuan's Ultimate Sacred Dragon Beast withstand the self-destruction?

He definitely couldn't withstand it, alright?

Even after Gao Xuan and the Ultimate Sacred Dragon Beast fused into the driving state, their energy level didn't exceed ten million. However, the self-destruction of the monarch-level ginseng baby's energy level definitely exceeded ten million.

"And this move, don't use it in ordinary battles. It really can kill pets..."

It wasn't Baby Ginseng that would die, but the opponent.

"I won't use it, of course..." Shi Yu scratched his head and laughed. No, no, he definitely couldn't use it casually.

Upon hearing that, Eleven, Buggy, and Chi Tong heaved a sigh of relief.

It would be best if it was banned in the team competition too!

Although Baby Ginseng could only use it once, Eleven, Buggy, and the others didn't dare to bet on themselves!

Its teammates would die!

It was recommended to seal this forbidden
move!

At this moment, President Ye looked at Shi Yu silently.

This boy... had already grown to this extent in a short period of time?

"How many overlord species pets do you have?" Ye Hui couldn't help but ask.

"Four... I guess." Shi Yu glanced at the four little ones and said, "After we go to Dragon Palace City, there might be five."

"Didn't Lord Owl predict that I could contract a totem in Dragon Palace City? Now, I'm more and more convinced of its prophecy." Shi Yu looked at the owl piously.

Everyone: ...

Owl: ...

Little Chi Tong's sword unsealed the Dark Phoenix. After all, that place was really related to Chi Tong's bloodline. Eleven's battle against the demon god was probably also accurate. That demon god was Yun An. Now, the prophecy of Baby Ginseng being chased and eaten by a bunch of totems didn't seem that difficult to understand. Shi Yu even had the thought of going fishing for totems in the future...

From the looks of it, perhaps he could really contract a totem on his trip to Dragon Palace City?

To be able to reach the totem level, it was definitely an overlord race.

Of course, Shi Yu didn't expect the other party to really be a water-element totem. His strength definitely couldn't contract a totem level growth, but what if it was a reincarnated totem like Chong Xuan?

It was also possible that the owl had predicted that his fifth pet would be at the totem level after it grew up...

However, the water element was definitely stable. After all, Shi Yu's first choice now was water-element and elemental creatures.

Chapter 260: Let's Have a Baby Cup

At this moment, Shi Yu had finished explaining everything,

It was impossible not to give an explanation for causing such a big commotion in other people's territory.

However, it was also because Baby Ginseng was hardworking and the Time Fruit had enough potential that the current principal and the Prediction Owl of Imperial Capital University found Shi Yu pleasing to the eye.

Therefore, in Shi Yu's opinion, perhaps the high-level skill, Time Fruit, was the strongest!

It was even more useful than super skills like Moon Explosion, Source of Life, and Time Mark. It was more suitable for public relations!

After all, no matter how powerful the time mark was, no one else could use it.

Of course, feeding the ginseng baby to a beast so it could get stronger, and then reviving it was a way to use it for someone's sake... This kind of cruel method was indeed feasible... But it was too inhumane!

Moreover, the time mark was too difficult to condense.

He needed Baby Ginseng to invest all its energy and do nothing to concentrate on condensing this for a long time. For a person like Shi Yu who lacked ginseng babies, he couldn't leave Baby Ginseng's side for even a moment... If Baby Ginseng wanted to go into seclusion to condense the Time Mark for a

few months, the increase in the team's strength would probably have to be suspended on the spot.

Therefore, it was better to wait to add points to the Time Mark in the future and see if there would be any changes when the level was high.

If he condensed time imprints now, the cost-effective ratio would be too low!

He just didn't know if the time mark could develop a way to record other people's states after its level was high.

Emperor Shi's heroic spirit ruins... seemed to have used a similar ability.

"Well..."

At this moment, Shi Yu looked at the Time Ruins in silence and said, "Well, speaking of which, can we continue to use the Time Mystic Realm?"

The originally smiling owl's expression suddenly fell.

"This isn't a question of whether I want to let you use it or not. It's that the mystic realm doesn't want to let you use it anymore."

Shi Yu: QAQ?

"When Baby Ginseng evolved... it indeed resonated with the mystic realm and absorbed more time power..." Shi Yu said in embarrassment.

"In any case, your goal has been achieved, so stop using it! Moreover, the mystic realm is unstable now," the owl advised.

Not only did the mystic realm didn't want to be used, the owl also didn't want to let it be used!

2

What a joke. If it still dared to after witnessing Shi Yu's power, people would think it hated the mystic realm.

If Yi Yu and the others wanted to try to die inside and self-destruct, what would happen?

At that time, Baby Ginseng could still be revived. The mystic realm would be shattered!

"Wu wu?"

"Wuu?"

"Mi???"

After hearing that they couldn't use the time mystic realm to train their overlord will, the other three little ones were suddenly shocked.

What?

It couldn't be used anymore?

"Cough." The owl shook its head and said, "There's no other way."

Previously, the Time Ruins were restricted to legendary and overlord levels.

Now, it wanted to add another restriction, banning a certain ginseng baby and Shi Yu.

Although it would miss Baby Ginseng, it definitely couldn't let Shi Yu come into contact with the ruins... The people from Bureau 11 were too scary.

"Ah..." Upon hearing that, Shi Yu looked worried. He had only stayed in the Time Mystic Realm for a day. Only two hours had passed in the outside world.

If he had known that the Time Ruins was so sensitive, he would have let Baby Ginseng evolve before leaving.

"Wu?"

"Wuu?"

Eleven, Buggy, and Chi Tong looked at Baby Ginseng. It was too much!

"Yi..." Baby Ginseng took a step back aggrievedly. This couldn't be helped. It couldn't control it either.

'At most... it would compensate everyone with a pile of time fruits later.

At this moment, Shi Yu looked at the four little guys in silence.

Forget it... Compared to the Time Ruins, Overlord Will, and some super skills, he wanted to maximize the Time Fruit to see the effect!

This was the most important!

"Then there's no need."

He looked at the similarly silent principal and President Ye of the Imperial Capital University and couldn't help but say obediently, "Wait, everyone, don't be in a hurry to leave. Baby Ginseng, you've disturbed everyone for so long. Hurry up and create some local specialties for the seniors."

Baby Ginseng:

Although he knew that Principal Zhao and President Ye might not necessarily lack the nutritional fruits of the ginseng baby, Shi Yu still got Baby Ginseng to prepare a batch of local specialties, including some for the Prediction Owl.

Of course, there was definitely some for the gem cat. It had been eyeing the gem fruit after Baby Ginseng evolved from the start.

It was not very interested in the Time Fruit, but it simply loved the Gem Fruit.

After Baby Ginseng evolved, the quality of the gem fruit increased as expected, with a very big increase.

If the previous gem fruit was only in the category of level-four resources, then it could already exceed most level-five spiritual fruits now.

Next, although he couldn't enter the Time Ruins, Shi Yu wasn't in a hurry. He directly stayed in the capital.

To be precise, he found a corner in the capital and entered the ruins space to stay.

The gem cat went to freeload with the Prediction Owl, while Principal Zhao and President Ye went to calm the commotion. It was the same as the situation in the Heroic Ruins. Although everyone knew that Baby Ginseng's evolution was very powerful, the specific news definitely couldn't be revealed.

Baby Ginseng's ability was too buggy. If it was leaked, it would be much more serious than the Butterfly of Imagination, even more serious than Chi Tong.

They had sealed off Chi Tong's news only because they were worried that a large number of enemies of General Mu Huiyin in the totem area would pay attention to Shi Yu. This was only a small group of people, but Baby Ginseng's information could make Shi Yu an enemy throughout the world.

Probably no totem wanted a quasi-mythical pet that could self-destruct and revive... ever to grow up.

This accompanying move directly represented that as long as Baby Ginseng had the strength of an overlord, it had the capital to threaten the totems.

In addition to the nourishing effect of the ginseng baby, not to mention foreign enemies, even humans might not necessarily be able to treat them calmly.

Shi Yu had enough titles and was already eye-catching enough. They couldn't give Shi Yu any more aggro debuffs.

Shi Yu naturally knew this.

Therefore, for him, increasing his strength was the most important at the moment.

First was the Time Fruit.

He started to hide in the ruins space with his four pets and crazily added points to the Time Fruit.

yi! (Shi Yu, increase points!)"

"Ican't take it anymore... Baby Ginseng, heal me!"

yi! (Shi Yu, increase points!)"

"Heal me!"

After Shi Yu broke through to the master level, the upper limit of his physique was unlocked again.

At this moment, it was difficult for him to determine the level of his physique, but he estimated that after reaching the upper limit again, apart from Beast Tamers with Beast Taming Talents that enhanced their physiques, as well as mixed-blood humans, even among Legendary-levels, there should be

very few Beast Tamers with physiques above his.

The benefits this powerful physique brought to Shi Yu, apart from being able to add points at will, was that he could better withstand Little Chi Tong's possession.

Unfortunately, the changes brought to the Beast Tamer by the increase in physique were still singular. It couldn't be compared to the various magical abilities brought by the increase in the Beast Taming Space.

The various magical effects of the legendary Beast Taming Space had already been developed. In comparison, the legendary physique was a little boring. No wonder Beast Tamers studied the Beast Taming Space and rarely studied improving physiques.

“Finally...”

After an unknown period of time.

In the ruins space, Shi Yu looked at Baby Ginseng happily. Baby Ginseng also looked at Shi Yu excitedly.

This kind of upgrade session that filled up high-level skills in one go was a challenge for Baby Ginseng and Shi Yu.

As he was very anxious to know what the higher-level effect of the Time Fruit was, Shi Yu couldn't even be bothered to sleep.

“It exploded!!”

At this moment, Shi Yu maxed out Baby Ginseng's Time Fruit. After adding it to the Dao Proficiency, he only wanted to shout that he had exploded!!

From entry to perfection, there was nothing to say. It only reduced the energy consumption of the Time Fruit created by the ginseng baby, increased the little effect of the Time Fruit, and reduced the side effects.

The specific ability was still not much different from when it was at the entry level. It could only be effective against creatures at a lower level than ginseng babies.

However, as the Time Fruit reached transcendent, the effect directly increased. Just as Shi Yu thought, the time power of the Time Fruit was already huge. It could also be effective on pets of the same level as Baby Ginseng. Baby Ginseng could also freely control the strength of the Time Fruit it created.

In other words, Eleven, Buggy, and Chi Tong could also temporarily obtain stronger battle power by eating the Time Fruit.

This was not the end. After adding 64 points, it was far from the end. When the Time Fruit was added to 256 points by Shi Yu and reached the level of Dao Proficiency, the Time Fruit was already strong enough. A creature one level higher than Baby Ginseng, which was a monarch-level creature, could also

be slightly affected/

Of course, this was not the strongest increase. The strongest increase was that the Time Fruit was no longer limited to positive gains.

The time fruit created by Baby Ginseng could be controlled by it more freely.

It could directly create a fruit and let the target who ate it return to their infant state temporarily, causing their battle power to fall to rock bottom.

It could also directly create a fruit and turn the target that ate it into an old beast, barely breathing.

The only pity was that the change was still temporary.

However, this was enough. At this moment, the best way to use the Time Fruit for Shi Yu was no longer to use it to increase battle power.

“yi!!!” After being filled with the Time Fruit, Baby Ginseng’s energy value naturally increased again, approaching 240,000. It was very terrifying, more than 30,000 higher than Eleven.

With such strength, Baby Ginseng naturally couldn’t wait to organize the team competition.

It couldn’t take it anymore!!!

Even if it didn’t have to self-destruct, with everyone at the commander rank, it would directly give itself a Time Fruit to temporarily obtain the battle power of a monarch. It would have millions of energy points. Even if Eleven exceeded the limit and erupted, even if Buggy had equipment, even if Chi Tong possessed Shi Yu, Baby Ginseng felt that it had a huge chance of winning.

“Competition, competition, you only know competition,” Shi Yu educated. “Is becoming strong only for the sake of competing with each other?”

Baby Ginseng:??

“Besides, to be honest, your strength isn’t very stable.”

“Think about it, do you have any way to break through the concealment of the Buggy?”

“It’s not a problem for Buggy’s main body to hide in the alternate space for half a day. Your light energy is high, and you don’t have spatial skills. Even if you self-destruct, you can’t blast its main body.”

yi!!!” Baby Ginseng shook its head crazily. No, it had studied the Anti-Buggy Energy Fruit. With the seed of the spatial-element Spirit Fruit, it could grow into a fruit bomb and use the enhancement of the Moon Explosion to completely blast Buggy!

It was already prepared.

The spatial seed that attacked the worm could grow into a spatial bomb under its control.

It also prepared the Eleven counter fruit, fire-element spiritual fruit seed. At that time, it could also combine the power of the sun. This was an anti-eleven energy fruit bomb.

In fact, it had even prepared the anti Shiyu’s Hypnosis Fruit Bomb. In order not to hurt Shi Yu and Little Chi Tong, it was very considerate, so Shi Yu didn’t have to be afraid of being injured at all.

Shi Yu: “?”

This guy was still arguing?

“No, the spiritual fruit seed is an external object, not something you made yourself. It’s considered equipment. You definitely can’t bring it with you in the team competition, just like how Buggy can’t bring dragon-type resources.”

Baby Ginseng:??

But didn’t Little Chi Tong also use equipment

“It’s not impossible to organize and bring equipment... It’s mainly because you guys are too strong. It’s easy to hurt the other party in a battle. It’s too painful. Alright, why don’t we do this...”

Shi Yu called Eleven, Buggy, and Chi Tong over.

“Let me tell you a piece of good news. Baby Ginseng’s Time Fruit has the ability to turn you back into infants. This is simply an ability stronger than Master Qu Jie’s sealing talent!”

“At that time, forget about the low energy value, you’ll probably be able to degenerate into a baby form. The skill proficiency will probably be gone. Is there a better form to train the overlord’s will than this? In the baby form, resist the pressure.”

“In my opinion, the team internal competition should also be a baby cup. You guys fight in your baby form. To be fair, I won’t possess Little Chi Tong anymore. I’ll directly fight you with my physical body.”

The pets: ???

Human language?
