

## **Beast 271**

Chapter 271 Could It Be Buggy's Epic Strengthening

"Long time no see..."

Seeing the Sky Penetrating Whale and the White Azure Dragon, Shi Yu chuckled. He didn't expect that the one in charge of guarding the entrance of the Dragon Palace City's mystic realm was an old familiar beast.

At this moment, under the shocked expressions of everyone, the Transcendent Whale asked again, "Excuse me, is your friend here?" "Oh, oh, I'll call it."

The conversation between Shi Yu and the Sky Penetrating Whale confused Zou Tianwang, Yu Shu, Yin Zhengfan, and the others.

But in the next moment, their expressions froze.

Hu hu hu ~

Hu hu hu ~ ~

Under Shi Yu's summoning, the surrounding temperature fell almost instantly.

Strands of cold wind lingered on the ground without any warning, freezing the air instantly and causing frost crystals to dance in the sky.

Under the outline of the snowstorm, a huge monster dozens of meters long spread its huge wings and descended, as if a legend had appeared. "Roar!!!"

It roared, and the strong ice stone body covered in blue and purple dragon scales directly stretched out. A cold wind swept the dragon might in all directions...

Boom!!!

With a boom, the surrounding time seemed to have frozen. After the Sky Penetrating Whale and the Mutated Giant Leviathan suddenly froze, they looked at this incomparably huge dragon.

"I feel so good."

The frost dragon felt comfortable in its heart. It had only yawned just now. After being summoned from the Ice Dragon Ruins by Shi Yu, it swung its thick tail and looked around with its dragon eyes. It stopped for a moment on the Sky Penetrating Whale and the Mutated Giant Leviathan.

"Woo!!!"

Seeing the frost dragon, the little white dragon instantly widened its eyes. It directly sensed the might of its parents' level from its body.

So strong... The Sky Penetrating Whale also fell silent instantly. It sensed abnormally terrifying power fluctuations from the Ice Dragon and understood that it was definitely not this senior's match.

"We've arrived at Dragon Palace City."

The frost dragon spoke slowly and searched for Shi Yu.

“We’re here...”

Beside Shi Yu, a cute creature that looked like a ragdoll appeared. It also yawned and looked at the familiar surroundings.

“Are you Senior Ice Dragon, who followed the Time Emperor?”

At this moment, as this ice dragon appeared, General Whale asked respectfully.

An old monster that could survive that era was worth its respect.

“Follow the Time Emperor? Sort of.”

Ice Dragon calculated in its heart. It had been caught by Mu Huiyin. Mu Huiyin was also a general under Emperor Shi, so it wasn’t bad to say that it had followed Emperor Shi.

“Senior Ice Dragon.”

Beside him, the Tyrannical Sea Legend also said, “Nice to meet you. I’m one of the current Titled Legends of Dong Huang, Yu Zhihui.”

After all, the Ice Dragon had participated in the totem battle and was a first-generation sage who had helped humans establish a dynasty. The Tyrannical Sea Legend also respected these seniors very much.

“Uh, Legend Yu, hello.” Ice Dragon looked at the Tyrannical Sea Legend and the Giant Leviathan under him. It felt that the strength of this combination seemed to be ridiculously strong, not inferior to any general under Emperor Shi back then.

It couldn’t help but show a kind expression. Sigh, the current human Beast Tamers were really strong. If it hadn’t broken through, it really didn’t plan to come out of the ruins. At that moment, perhaps the appearance of the ice dragon caused too much change, causing the totems in the depths of Dragon Palace City to be alarmed.

It was not a small matter for a totem-level expert to suddenly appear in this territory.

“Roar!!!!”

A moment after the ice dragon came out, strange movements appeared in the sky of Dragon Palace City again. Countless strong winds and black clouds condensed. Accompanied by a dragon roar, a huge green divine dragon nearly 100 meters tall appeared on the clouds. Because this huge dragon was too huge, its characteristics were even more obvious than the white dragon’s body...

The image of a snake body, crocodile head, lizard legs, eagle claws, snake tail, antlers, fish scales, whiskers, and beads under its forehead. Its face was silver-white, and its entire body was basically green. Its body revealed a shocking beauty filled with power. It was completely gorgeous, and various parts of it appeared extremely coordinated. Its beautiful posture was even more rich in charm, and its gaze maintained an insufferably dignified aura. “Lord Sea Dragon King!” Seeing this divine dragon appear, General Whale quickly spoke. The surrounding tens of thousands of shrimps and crabs also submitted.

“Father.” The little white dragon’s body trembled.

At the same time, the frost dragon also raised its head and met the Sea Dragon King's gaze. In an instant, the Sea Dragon King laughed heartily.

"Welcome, Senior Ice Dragon, to the Dragon Palace banquet."

"You're too kind, too kind..." The mother dragon that had been a shut in for a thousand years smiled.

"Pardon me for the disturbance."

It had a smile on its face, but it had another smile in its heart. As expected of Shi Yu, he had already set up contact. This Dragon Palace City Dragon King actually looked quite respectful to him. Not bad, not bad.

He deserved to be rewarded!

"Senior Ice Dragon, this place is simple. Why don't we move to my Dragon Palace to talk?" the Sea Dragon King suggested.

"Yes, thank you," Ice Dragon said.

"Then it's decided. Legend Yu, do you want to go together?" The Sea Dragon King looked at the Tyrannical Sea Legend. It was actually considered an old friend of the Tyrannical Sea Legend. The two of them had even sparred in a friendly duel before, and they were evenly matched for a short period of time.

"I won't go. I'll bring this group of young people to prepare for the next Dragon Palace banquet," Legend Ba Hai said calmly.

"Alright, Hei Ge, receive the guests from Dong Huang well," the Sea Dragon King said to the Sky Penetrating Whale.

With that said, it even looked at Shi Yu in the crowd and said, "Sir Shi Yu, please come together."

The Sea Dragon King knew that the Ice Dragon definitely had a deep relationship with Shi Yu. In addition, it was also very curious why the butterfly had given its scales to Shi Yu, so it definitely wanted to meet him.

"Then pardon the trouble, Lord Sea Dragon King," Shi Yu said respectfully. Then, he said to the Tyrannical Sea Legend, "Senior Tyrannical Sea, I'll go first."

The legend nodded.

In the next moment, Shi Yu was teleported to the frost dragon by the gem cat. The Sea Dragon King laughed and turned to lead the way, bringing Ice Dragon, Shi Yu, and the others to his Dragon Palace.

A moment later, only the disappointed little white dragon and the gem cat that was preparing to sweep through Dragon Palace City's food were left.

There was also the confused Zou Tianwang, Yu Shu, and the others.

Aba, Aba, Aba, Aba... Could someone tell them what exactly was Shi Yu's identity?

Dragon Palace of the Sea Dragon King.

It was a mystic realm of the Dragon Palace's mystic realm.

In the huge mystic realm space, the Sea Dragon King arranged the rare fruits and mutant fruits and received the Ice Dragon.

Compared to the two behemoths, the Sea Dragon King and the Frost Dragon, Shi Yu was much smaller. This made him a little tired. He even wanted to give these two guys some multiplication skills.

"Senior Ice Dragon, have you decided to join Dragon Palace City?"

As Lin Feng's pet, although the Sea Dragon King's strength didn't lose to the Ice Dragon, the Ice Dragon had experience here after all. It also called it senior.

"I've decided. Please, calling me senior would be too much. In the future, please let me rely on you, Sea Dragon King," Ice Dragon said.

"I wonder what the procedures are for joining Dragon Palace City."

"This is nothing. As long as we swear in the Dragon God Ruins under the joint witness of the Dragon God and other Dragon Kings that we won't betray Dragon Palace City, that we will suffer and gain glory together with Dragon Palace City, we'll be together for good. Haha."

The Sea Dragon King introduced it to the frost dragon.

"That's easy."

The frost dragon said indifferently. As a force that had existed for countless years, although Dragon Palace City had changed their Dragon God seat many times, it had really never declined. If it joined here, as long as it didn't think about the position of that Dragon God, it would basically always be glorious and wouldn't be a loss. "It's a big deal for Senior Ice Dragon to join Dragon Palace City. Now that some Dragon Kings aren't in Dragon Palace City, why don't we hold the joining ceremony after the Dragon Palace banquet ends? How about it? Tomorrow, Senior Ice Dragon could watch the Dragon Palace banquet with me and see how the genius descendants of Dragon Palace City are?"

"Every year at the Dragon Palace banquet, many ocean factions will also come to seek refuge in Dragon Palace City. At that time, Senior Ice Dragon might be able to choose some good followers." "Ah, alright." Ice Dragon pondered in its heart. Wasn't it also here to rely on Dragon Palace City? Sigh, it was good to be strong. Awesome.

The Sea Dragon King laughed heartily. The Dragon Palace banquet was indeed not important to the Dragon Kings. They basically took turns to host it. To put it bluntly, this Dragon Palace banquet was a conference for the younger generation of Dragon Palace City to showcase their talent and strength, including some sea beasts with potential who came to Dragon Palace City.

At that time, some old overlords, including it, the Dragon King, would take out some rewards for these juniors to compete.

Of course, the group of human Beast Tamers brought by the Tyrannical Sea Legend could also participate in this process. Moreover, they could even display their talent to obtain the recognition of some ocean overlords. At that time, the reward might not be some resources, but their heirs.

To put it more simply, the Dragon Palace banquet was a conference for the ocean overlord of the Dragon Palace faction to show off its child's results. It was held every five years.

Compared to the totem ice dragon joining Dragon Palace City, the Dragon Palace banquet was definitely not worth mentioning.

"By the way." The Sea Dragon King suddenly looked at Shi Yu.

Shi Yu also widened his eyes and looked at the Sea Dragon King.

"You have my appreciation, sir Shi Yu, for bringing Senior Ice Dragon to Dragon Palace City."

"It's nothing, it's nothing." Shi Yu smiled shyly.

"This kid is not bad. At this Dragon Palace banquet, the overlord's son that becomes his pet would be very lucky." Mother Dragon still was thinking about Shi Yu and immediately spoke good words for him, as if she was praising her child.

Since Mu Huiyin's heroic spirit had acknowledged Shi Yu, it definitely acknowledged him too. There was no harm in finding more powerful pet cubs for Shi Yu. "Oh?? Sir Shi Yu is also here for the Dragon Palace banquet??" The Sea Dragon King was surprised.

Shi Yu said, "Not really. It's mainly because I was entrusted by the Butterfly God to visit the Sea Dragon King and lead the way for Dragon Mother."

The Sea Dragon King didn't understand, but he was shocked. "Dragon... Dragon Mother?" Ice Dragon:? "Who... Who's your mother? Forget it, you can call me senior too," Ice Dragon couldn't take it anymore and said bluntly.

It was an innocent girl, but being called like this affected its reputation. It could ignore it previously, but now, it was about to become the female dragon of the Dragon Palace City's Queen. It couldn't let Shi Yu take advantage of it anymore. It had to control its reputation.

Otherwise, it would be difficult to find a partner in the future.

"Ah, this." The Sea Dragon King was silent. He couldn't understand the relationship between Shi Yu and the Ice Dragon. In theory, it was very difficult for a young man in his twenties to be related to Ice Dragon, a senior who had lived for more than 2000 years.

But they looked very intimate?

"This kid has obtained the recognition of General Mu Huiyin, the first general under Emperor Shi. General Mu Huiyin is also my Beast Tamer. In short, his future is immeasurable. He can be considered one of the few people related to me at the moment." Ice Dragon sighed.

"Heroic Spirit Ruins?" The Sea Dragon King was suddenly shocked.

As Lin Feng's pet, it had naturally heard of the heroic spirit ruins left behind by the Time Emperor.

"Yes." Ice Dragon nodded.

“Hahaha...” Shi Yu scratched his head and said, “Just lucky. I didn’t expect myself to be so lucky to obtain General Mu Huiyin’s recognition.”

“Little Friend Shi Yu, there’s no need to be humble. To be able to become a member of the third and eleventh bureau at this age, you must be a dragon among men. Your future is indeed immeasurable,” said the Sea Dragon King.

The third bureau, Feeding Bureau. Bureau 11, Archeology Bureau. The dragon knew.

Shi Yu was recommended by these two parties together and could also obtain the recognition of the heroic spirit of the Great General under Emperor Shi. In the Sea Dragon King’s opinion, his talent potential could completely defeat those legendary tamers’ sons.

In addition to the relationship with Ice Dragon...

“If Little Friend Shi Yu is interested, I can recommend a few descendants of overlords with pretty good talent for you. Oh right, my family’s little white dragon is also a pretty good choice. Unfortunately, it’s lazy by nature and isn’t willing to follow human Beast Tamers. Otherwise, I would definitely recommend it.”

The Sea Dragon King said politely, but in its heart, it actually had no intention of letting the White Azure Dragon follow Shi Yu. Although Shi Yu’s talent and potential were pretty good, he still had the gift of telepathy. Even if he could listen to history... it was still lacking.

From ancient times until now, there were no Beast Tamers with the gift of telepathy that could become Titled experts and fight against totems, let alone become legendary Beast Tamers. If possible, the Sea Dragon King definitely hoped that his son could follow a super genius like Lin Feng.

“Ah, thank you, Lord Sea Dragon King. There’s no need to force this. Everything will definitely still depend on His Highness the Third Prince’s thoughts.” Shi Yu hurriedly rejected, afraid that the Sea Dragon King would let him contract the little white dragon.

Fast rejection, fast rejection...

The success rate of teaching super skills was extremely low. How long would it take to pull it up? Shi Yu had already spent enough effort to nurture Buggy and the others. Now, he only wanted a pet with the will of an overlord.

At that time, with the infinite devouring of the Mutated Leviathan, it would directly take off.

He could be a gambler again.

Little White Dragon, whoever wanted it... Could take it.

“What a pity.” The Sea Dragon King sighed.

“Then let’s see if there are suitable candidates at the Dragon Palace banquet,” it said.

“Alright.” Shi Yu nodded. That was his intention. He would be happy when the time came.

Well, he didn’t have time to look at the bunch of useless soldiers just now.

They had to go take a look!

“By the way, you just said that you were entrusted by that butterfly to visit me. What’s the matter?”

The Sea Dragon King suddenly realized and asked.

It had not contacted that butterfly for a long time. It was useless to leave a scale for it, since it didn’t come to play with it. Now, it had given the certificate to someone else. What did it mean?

“This...” Shi Yu was slightly stunned.” Actually, I have a pet that completed its evolution with the Butterfly God’s blessing. Before that pet evolved, it accidentally swallowed a Dragon Ball, causing some abnormalities during its evolution. Even the Butterfly God doesn’t know who the owner of that Dragon Ball is. It thought that the Sea Dragon King might know, so it asked me to

ask. “

“Oh?” The Sea Dragon King was stunned.

“The one that can be blessed by it to evolve... Your pet is a Green Silkworm?”

“Yes, it was a Green Silkworm in the beginning, but now, it has already evolved into a butterfly with the Dragon Ball.”

“Can you summon it for me to take a look?” said the Sea Dragon King.

“Alright.” Shi Yu nodded.

In the next moment, a huge blue spatial ripple appeared behind him. Buggy was summoned by Shi Yu in its normal state. “Wu ~ ~” An extremely gorgeous Butterfly of Imagination appeared, and its body emitted a weak dragon might, instantly making the Sea Dragon King’s full attention focused on it.

Then, it was suddenly stunned.

Although it was only a rough observation, why did it feel that this butterfly was even stronger than its carefully cultivated son...

How was this possible?

“Wu ~ (Lord Sea Dragon King, Dragon Mother)” After Buggy came out, it also greeted the Sea Dragon King and the frost dragon.

The frost dragon:?

The Sea Dragon King:?? “Who... Who’s your mother? In the future, you’re not allowed to change randomly with my dragon whiskers!!” The frost dragon cursed.

The Sea Dragon King didn’t understand, but it was shocked. It felt that the noble circle was really messy.

Fortunately, Little Chi Tong wasn’t summoned by Shi Yu. Otherwise, if it called it Mom again and let the Sea Dragon King see it, it would shock it for an entire year.

“Buggy,” Shi Yu called. In the next moment, Buggy nodded and immediately activated the Dragon of Imagination. Following that, the surrounding space cracked, and countless spatial cracks appeared. In

the clouds in the sky of the mystic realm, a phantom figure appeared and gradually formed a divine dragon body. It was a huge dragon-shaped body covered in blue and white dragon scales. It kept floating and circling in the sky, the scales on its body shining, dazzling everyone.

Under its gaze, the Sea Dragon King was immediately stunned.

In the next moment, with a roar from the divine dragon, the incomparable divine dragon phantom instantly flew towards Buggy and wrapped around its back. At this moment, in the Sea Dragon King's perception, the Butterfly of Imagination, which was originally a little stronger than its child at the same level of growth, instantly became even stronger, as if it could easily crush the White Azure Dragon.

This change made the Sea Dragon King feel even more ridiculous.

It seemed like... the White Azure Dragon didn't tell the Sea Dragon King that it had suffered a setback in front of Eleven, Buggy, and the other four pets.

"Lord Sea Dragon King, this is the divine dragon phantom conjured by my pet after it activated the power of the Dragon Ball," Shi Yu immediately said after Buggy used the Dragon of Imagination.

At this moment, the Sea Dragon King looked at the huge divine dragon body wrapped in Buggy and fell into deep thought. "This..."

Its brain quickly recalled and kept feeling that it had sensed similar power fluctuations somewhere.

"Lord Sea Dragon King, can you recognize the race of the Dragon Ball Master?"

"Could it be..."

The Sea Dragon King stared at the Dragon of Imagination intently, his expression becoming more and more serious. In the end, he said in disbelief, "Could it be a Sea Serpent??"

"Sea Serpent??"

Shi Yu was stunned. Wasn't the Sea Serpent covered in golden-green dragon scales?? Wait a minute... The Sea Serpent in his impression seemed to be what Earth's version was. He would listen to the Sea Dragon King first.

The Sea Dragon King said, "That's a mysterious, powerful, and proud dragon. It rarely shows its true appearance to others, but it likes to maintain the form of low profile birds, shell species, and even dragon balls."

"The Sea Serpent is a race extremely close to a Mythical creature. It has powerful brute force, but what the Sea Serpent is really respected by the dragons for is its endless and extremely profound magic power. Through this magic power, it can easily create an illusion world that deceives all creatures and easily change the weather."

"Therefore, it's also known as the Illusionary Divine Dragon. Most importantly, the reason why I'm so clear is that the Sea Serpent is a Dragon God of a generation in the Dragon Palace City in the totem era, tens of thousands of years ago. It has the will of the Dragon God branded in the Dragon God Ruins. I've been to the Dragon God Ruins and even fought with the will of the Sea Serpent, so..." "But how is that possible..." It looked at Shi Yu and Buggy and said, "How could the dragon ball it absorbed be the Sea

Serpent Dragon's? Why would the Dragon God's dragon ball be left outside?" "Holy shit." As the Sea Dragon King finished speaking, although the frost dragon didn't know what was going on, it also looked at Buggy in surprise. This little guy had absorbed a Dragon God's Dragon Ball to evolve??

Although Dragon Palace City might have hundreds of generations of Dragon Gods, no matter which generation of Dragon Gods it was, they were all super dragons at the demigod level. Their dragon balls... were simply a priceless treasure second to Mythical resources.

"This." Upon hearing the Sea Dragon King's words, even Shi Yu and Buggy were stunned.

Holy shit.

Dragon Palace City's Dragon God's Dragon Ball??

Damn.

When the gem cat obtained this dragon ball, the energy of this dragon ball had already dried up to an indescribable state and fallen into a level-four resource. However, was the owner of this dragon ball so impressive? It was actually a half-god level existence like Yun An.

"Wu-" Listening, Buggy was excited. No wonder it had obtained such a powerful skill like the Dragon of Imagination. So the owner of the Dragon Ball was a Dragon God proficient in illusions?

"You also don't know how the Sea Dragon God's Dragon Ball was lost in the outside world..." Shi Yu asked.

"I'm not sure. When the Sea Serpent Dragon was in power, it could at least be traced back to nearly 100,000 years ago. Who still remembers what happened at that time? Countless generations of Dragon Gods have changed during that period. However, there's the Sea Serpent Dragon's Dragon God's will existence in the Dragon God Ruins... This is certain..."

"When Senior Ice Dragon enters, perhaps we can search carefully." The Sea Dragon King looked at the Ice Dragon.

"Ah..." Ice Dragon kept feeling that it was in trouble again.

At the same time, Buggy was overjoyed.

Could it be...

This time, it was... his Epic Strengthening??

Ji!!!!

It was awesome.

Leader, Baby Ginseng, wait and see!

"Can we also go to the Dragon God Ruins to take a look? I'm an archeologist. Perhaps I might be able to..." Shi Yu said.

"Wu!!!" Buggy hurriedly persuaded Shi Yu not to.

Although it also wanted to obtain more power from the Sea Serpent, the problem was that it was a Mythical Ruins. If Shi Yu destroyed it again, even Ice Dragon mother wouldn't be able to protect them!

Perhaps the next day, Dragon Palace City would start a war with Dong Huang.

The friendly alliance between East and Dragons was directly destroyed by Shi Yu.

It was better not to. Let Ice Dragon Mommy see.

"Uh..."

Shi Yu fell into deep thought.

Forget it.

"Not really. Only totem-level people can enter the Dragon God Ruins, or when the time comes, I'll go ask other totems about the Sea Serpent Dragon. Perhaps they know some inside information. After all... I arrived at Dragon Palace City relatively late," the Sea Dragon King said. "Then I'll leave it to you, Sea Dragon King."

"It's nothing..." The Sea Dragon King still looked at Buggy in surprise. No wonder this butterfly was even more impressive than the Divine Feather Phoenix Butterfly of the same level, even more impressive than its son. So it had swallowed the Dragon God's Dragon Ball and successfully evolved without exploding. It was extremely lucky.

At this moment, Shi Yu never expected that he would really know who the owner of the dragon ball that Buggy had absorbed when he came to Dragon Palace City... Unfortunately, it was the dragon race from nearly 100,000 years ago. What exactly happened at that time was something he was blind about.

"Sea Dragon King—!!!" "Lord Sea Dragon King—!! Something bad happened!!"

In the Dragon Palace mystic realm, the Sea Dragon King, the Frost Dragon, Shi Yu, and the others were chatting happily.

A cry suddenly came from the outside world.

The Sea Dragon King frowned. In the distance, a huge brown turtle was swimming over with all its might.

"Prime Minister Turtle, what's wrong?"

"Lord Sea Dragon King, two days ago, many teams that went to Dragon Palace City to participate in the banquet were attacked by unknown monsters," the old turtle said with a long face.

"Now, the Yaksha General who went to investigate is heavily injured and on the verge of death."

When they heard that, Ice Dragon and Shi Yu were stunned.

Holy shit, which sea beast was so bold to attack a member of Dragon Palace City? One Dragon Palace City had eight totems, and there was even a half-god among them. Was this guy kidding? "Oh?? This kind of thing? Why didn't you report it earlier??" The Sea Dragon King revealed anger.

"In the beginning, I thought that it was a blind sea beast that went berserk, so General Yaksha went to deal with it himself."

“In the end, I discovered that it was an overlord-level Poison Dragon. However, General Yaksha still fought it and successfully obtained the upper hand. However, who knew, who knew... Just as General Yaksha was about to kill the enemy, that overlord Poison Dragon directly mutated and turned into a totem-level monster. After that, the Yaksha overlord was no match for it at all. Moreover, it was poisoned and on the verge of death.”

“At the moment, that poison dragon has completely disturbed the passage in the surrounding sea. The poison it emitted has almost contaminated the entire sea. Moreover, it’s still moving aimlessly in the sea.”

“What???” Upon hearing the old turtle’s description, the Sea Dragon King’s whiskers immediately fluttered, and its eyes turned red.

It was its turn to organize the Dragon Palace banquet this year, but such a thing happened?? Courting death!!

“That guy, what’s his background???” The Sea Dragon King’s anger burned. He didn’t believe that a dragon overlord with no background would suddenly mutate into a totem.

The turtle prime minister said, “We’ve already started investigating from the start when it attacked the sea beasts. That dragon doesn’t seem to be an overlord living in the sea, but a rare intermediate form creature of the sea worm and land beast. It came from the seven islands...”

“Most importantly, it has no rationality at all and only has the desire to destroy. Moreover, we can’t cleanse the poison it releases at all.”

“According to Doctor Holy Clam’s analysis, the poison in its body should have come from the radiation of the forbidden weapon developed by humans. It’s a radiation-type poison, and it might have mutated into its current appearance because it came into contact with radiation...”

“Lord Sea Dragon King, what should we do now... We have no choice but to let you handle it. Otherwise, the Dragon Palace banquet won’t be able to be smoothly organized. Moreover, many sea beasts who have come to participate in the Dragon Palace banquet are already infected and difficult to treat... Until now, we haven’t found a way to cleanse the poison.”

“Seven islands?? Forbidden weapon radiation??” The Sea Dragon King’s eyes turned even redder. The frost dragon and Shi Yu’s breathing almost stopped.

Ice Dragon cursed in its heart. It didn’t expect to encounter such a thing as soon as it arrived at Dragon Palace City.

Shi Yu also cursed in his heart. He similarly couldn’t understand why he was so unlucky. He had come to Dragon Palace City with great difficulty and originally wanted to rely on the dragon aura to easily choose a top-grade pet. Why the hell did he suddenly encounter a totem-level Poison Dragon causing trouble? He hoped... that it wouldn’t affect the Dragon Palace banquet.

## **Chapter 272: Storming Dragon Palace City**

Dragon Palace of the Sea Dragon King.

After hearing Prime Minister Turtle's description, the Sea Dragon King fell into deep thought.

It said, "I understand. Where is that guy now? Then let me deal with that guy."

"Prime Minister Turtle, take care of Senior Ice Dragon, Little Friend Shi Yu, and the others. I'll be back soon."

"also, investigate hard. How exactly was this guy born? Didn't you say that it came from the direction of the seven islands just now??"

"Damn it, I knew that group of guys was restless. Back then, they made a lot of trouble for Lin Feng, and now they're here again!!"

"Curse the seven islands!!!"

The more the Sea Dragon King thought about it, the angrier it became.

Please don't let it find anything.

Otherwise, it would definitely encourage the other Dragon Kings to find trouble with the seven islands together.

So what if it was the Seven Nation Alliance? Dong Huang would definitely stand on the side of Dragon Palace City!

"I'll deal with that Poison Dragon first!"

"also, did you call the Immortal Dragon King back? The totem radiation that the holy shell can't treat can only be treated by it."

The old turtle said, "I've searched."

Listening to the Sea Dragon King's furious cursing, Ice Dragon and Shi Yu couldn't say a word.

However, as the Sea Dragon King made a decision, Shi Yu couldn't help but ask,

"Do you want to go yourself?"

"Will it be a little dangerous? The other party is also a totem."

1

Ice Dragon said politely, "Do you need help?"

The Sea Dragon King said, "I'm in charge of the Dragon Palace banquet this time, so I'll naturally go. Don't worry, there's also a difference between totems and totems."

"It's just a totem that mutated by radiation."

1

It relied on transcendent skills and the legendary resources in the Dragon God Ruins to advance to a totem with the support of the two resources.

In addition, it was a dragon. It was easy to solve a small totem.

It had already entered the totem level for a hundred years. If it couldn't defeat a newly mutated totem, it wouldn't have to be called the Sea Dragon King.

"However, does Senior Ice Dragon want to take action? If we can have Senior Ice Dragon's help, we can definitely finish that bastard faster," the Sea Dragon King said quickly.

Ice Dragon:??

It was just being polite, this guy was really asking it to go?

This was ridiculous! It was a guest!

"Of course, it's enough to rely on myself. It's mainly because I feel that this might also be an opportunity."

"Think about it, if Senior Ice Dragon can solve it with me, the ten million citizens of Dragon Palace City will definitely be very grateful. This will also be helpful for you to join the Dragon Palace in the future and establish your own faction and collect your faith."

"Senior Ice Dragon, don't you think that's the case?"

"ah, this." Initially, Ice Dragon was very against it originally and didn't want to fight.

Especially when it came to ocean battles.

However, when it thought about it carefully, what the Sea Dragon King said seemed to make sense??

It directly joined Dragon Palace City. Although dragons would welcome it, not all sea beasts would warmly welcome it.

However, if it had just arrived in Dragon Palace City and defeated a big enemy of Dragon Palace City with the Sea Dragon King, then under the circumstances where the people were inclined, it, the Queen of Dragon Palace City, was simply too genuine.

Emperor Shi had said that the people's hearts were the foundation to collect the power of faith. Those who obtained the people's hearts would rule the world!

The ice dragon pondered for a moment. It seemed that it was indeed not difficult for it to defeat a mutated totem with the Sea Dragon King.

Since it wanted to live in Dragon Palace City for a long time, this batch of merits could be earned.

Ice Dragon said, "I'm ashamed to say this, but I think so too. Everything is for the citizens of Dragon Palace City."

The Sea Dragon King said, "Yes, yes. Then, Senior Ice Dragon, shall we go together?"

"Roar!!!"

Shi Yu and Buggy : " ..."

A moment later, the Sea Dragon King and the Ice Dragon left together, leaving Shi Yu and Buggy in a daze.

To be honest, although he really wanted to see the totem fight, he, Shi Yu, wouldn't join in the fun.

This was poison and radiation. No matter how he thought about it, a small master like him couldn't interfere. It was more like letting the Tyrannical Sea Legend do it.<sup>3</sup>

"Sir Shi Yu..."

At this moment, the Turtle Minister floated in the sky with a sorrowful expression, not knowing how to receive Shi Yu.

Shi Yu: "Can we eat these fruits?"

Damn, when the Sea Dragon King took out these rare fruits and mutant fruits, none were lower than level five. He even saw level-seven fruits. It would be a waste not to eat them.

"Of course. However, can you stay here alone for a while, Sir Shi Yu? I want to see the situation of the poisoned people. There should be a batch of poisoned citizens being transported to the secret realm of Dragon Palace City now."

"Now, many seas have been polluted by radiation, and many sea beasts have been corroded by poison. If we can't resolve it, the Sea Dragon King will probably have a headache."

Shi Yu retracted Buggy. After a moment of silence, he said, "Then why don't I go with you?"

"Huh?" The Turtle Prime Minister was stunned.

"Also have a pet that has mastered the healing ability. Perhaps I can go with you to take a look."

Forget it, fruits could be eaten anytime. He wanted to see what the poison that made everyone in Dragon Palace City helpless was.

Could Baby Ginseng use the mutation to absorb it and create a poisonous fruit?

In the future, if it was eaten by an enemy overlord, it would be invincible.

The Turtle Minister immediately cried and said, "Although I don't trust your ability very much, I'm too grateful for your good intentions."

Shi Yu:

Was this being polite?

This turtle, did it know how to talk?

At the sea border between Dong Huang and the Seven Islands.

In the sea, a huge black dinosaur hundreds of meters tall was walking step by step.

With every step it took, the sea area its body came into contact with would be instantly polluted by a black radiation. Under the surging of the polluted water, countless sea beasts showed signs of being poisoned and almost fainted.

“Roar!!!”

The monster walked with no purpose. From time to time, a ray that emitted strong heat condensed in its mouth. When the ray swept over, the sea almost instantly evaporated.

1

“Roar!

This monster continued to destroy, and its physical fitness seemed to be endless.

Most sea beasts were fleeing crazily, but there were also creatures who took the initiative to approach this monster.

The sky darkened, rain and snow mixed, and strong winds howled.

“Roar!!!”

Two huge dragons appeared in the dark clouds. One was a standard Eastern Divine Dragon, and the other was a Western Frost Dragon. The two dragons stared at the black monster below, their eyes filled with judgment.

“The energy fluctuations are so strange,” the frost dragon said.

“However, its strength isn’t very strong,” it said.

The Sea Dragon King said, “After all, it just mutated into a totem.”

As the Sea Dragon King and the Ice Dragon appeared, the huge monster also slowly floated to the surface. After seeing them and capturing the strong aura of life, its desire to destroy became even stronger. A hot white light beam slowly condensed in its mouth.

Boom!!!

Its scarlet gaze turned to the Sea Dragon King and the frost dragon. The scorching light beam that was enough to easily heavily injure an overlord swept towards the two dragons.

“Roar!! (I’ll do it!!)”

In the next moment, accompanied by a roar in the sky, the sea in a radius of thousands of meters instantly froze. Even the huge monster’s body and the scorching light beam were instantly frozen. The surrounding time seemed to have stopped. In the sky, the frost dragon’s entire body emitted Heavenly Frost Cold Energy, and its dragon might directly erupted.

How was it!

“Roar!!! (Senior Ice Dragon, I was just about to mobilize the power of nature when you froze it!)”

“Roar??? (Ah, our attributes aren’t very cooperative.)”

As the two dragons conversed in confusion, the huge monster emitted a red heat wave. The frost on its body began to slowly melt. At the same time, the frost that froze the hot beam gradually began to melt. With a bang, the frost on the monster's body shattered. With a huge roar, the hot beam still swept towards the Sea Dragon King and the frost dragon quickly.

“Roar!! (Leave it to me!!)” This time, the Sea Dragon King shouted.

In the secret realm of Dragon Palace City.

Clearwater Island.

Prime Minister Turtle brought Shi Yu here.

At this moment, many sea beasts that had been poisoned had indeed been teleported over.

‘There were transcendent, commander, monarch, and even overlord ranks!

On the huge Clearwater Island, water bubbles that emitted white light floated.

On every water bubble was a sea beast with dark skin.

Under these bubbles, a pearl creature less than a meter tall with a white shell and intelligent eyes on the white pearl inside was hurriedly handling something.

Around them, there was also a huge pink jellyfish and a blue coral creature. Shi Yu, who had arrived with the Turtle Prime Minister, took a look and instantly recognized them.

Sacred Healing Light Shell,

The pink sea immortal spiritual jellyfish.

Heavenly Blue Star Coral.

They were all healing sea creatures of overlord races. Most importantly, these three sea beasts had also reached the overlord level and were extremely powerful.

Apart from them, there were also many monarch-level healing sea creatures around. They were also busy checking the situation of the poisoned sea beasts that had been sent over, trying to use their various skills to heal them.

“Doctor Shell, Doctor Shell, how's the situation? Rakshasha overlord...”

After the Turtle Minister, who had brought Shi Yu over, arrived at Clearwater Island, he asked nervously.

The Holy Healing Shell looked at the Tortoise Prime Minister and shook its head. “No, not only can the injuries of the Rakshasa overlord not recover, but the injuries of the other sea beasts are the same. We've tried everything, but we can't cleanse the radiation toxins in their bodies.”

“Ah.” The Turtle Prime Minister looked at the countless bubbles floating in the air in confusion. It was speechless. How could this be?

“But you don't have to be nervous, Prime Minister Turtle,” Doctor Shell said.

“Although we can’t completely cleanse them, we’ve already slowed down the spread of the poison. When Lord Immortal Dragon King returns, he can definitely easily heal them.”

“That’s, that’s the only way.” When the Turtle Prime Minister heard that, it choked.

The Immortal Dragon King was an ocean sprite dragon, one of the totems of Dragon Palace City. It was good at healing and cleansing. Until now, there had been no injuries or poison that it couldn’t heal. It could be said that its dragon fate in Dragon Palace City was even better than the Dragon God.

“By the way, this is...” Dragon Palace City’s Holy Clam looked at Shi Yu.

At this moment, Shi Yu was looking at the poisoned person on the bubble.

“Ah, this is Sir Shi Yu, the honored guest of the Sea Dragon King. He said that he also wanted to see the poisoned person, so I brought him here,” said the Turtle Prime Minister.

“Sir Shi Yu,” Doctor Shell greeted.

However, at this moment, Doctor Shell realized that Shi Yu’s expression was surprisingly serious.

A ginseng baby crawled out of Shi Yu’s hat and also stared at the monarch crab on a bubble with a serious expression.

“Tsay... Prime Minister Turtle...”

“Is it too late to call Lord Sea Dragon King and Senior Ice Dragon back now??”

“What’s wrong?” The Turtle Prime Minister was stunned.

“You guys... have you heard of Yun An??”

### **Chapter 273: Blue Sea Sprite**

“Yun An?? What’s that???”

Shi Yu’s words made Prime Minister Turtle, Doctor Shell, and the other creatures look confused.

Obviously, they had never heard of Yun An.

However, this was also normal. After all, in history, Yun An mainly moved on land.

“We feel that the radiation on their bodies is very similar to the power fluctuations of Yun An...”

vyil!”

On Shi Yu’s head, a small ginseng baby grew out of Baby Ginseng’s arm. It directly jumped onto the healing bubble and reached out to touch the poisoned person’s body.

In the next moment, this baby ginseng clone’s face distorted and its body trembled.

The strong mutation power directly made Baby Ginseng's body give out waning signs crazily. Even if it was a transcendent mutant, it couldn't withstand the radiation.

This was the first time Baby Ginseng had encountered such a situation.

"The radiation on that monster's body isn't that simple. You mustn't come into contact with it."

"I know this radiation poison."

"It's very similar to a radiation power I know. The source should be from outer space. No, this kind of radiation, although it's a little similar to the injuries caused by Yun An, it seems to be different." Shi Yu's expression instantly became serious.

Yun An was on the seven islands?

Or could it be that someone was using Yun An's power to create forbidden weapons?

Shi Yu took a deep breath and said, "You've never heard of Yun An. Then you've heard of Emperor Wu, right? The second human legend in the Dong Huang Dynasty after Emperor Shi."

"He contracted a total of nine totem-level battle beasts, each with incomparably powerful strength. As for Yun An, he was the great enemy of the Dong Huang Dynasty at that time and was known as the king of totems."

"It's a life form formed by a meteor from outer space that landed on blue planet ten thousand years ago. It carries the radiation power from outer space. The injuries radiated by the power are impossible to treat. Although Emperor Wu and its nine great pets suppressed Yun An, because of this incurable injury, they can only end up in mutual destruction."

"The Emperor at that time tried Mythical resources, Legendary resources, and many totems proficient in healing and purification. He tried everything, but unfortunately, he couldn't heal his injuries."

"I've once come into contact with Senior Emperor Wu's battle pet, Chong Xuan, and seen it one last time. At that time, its entire body had already been corroded and dried up by the power radiation of Yun An. The current situation... the power corrosion on their bodies... It's very similar to the power fluctuations of Yun An."

"If it's really Yun An's power... Even if it's a totem level healing power, it might not necessarily work..."

As Shi Yu finished speaking, Prime Minister Turtle and Doctor Shell opened their mouths wide.

What!!!

They were timid! Stop scaring them!

"Then, then, then, then..." The Turtle Prime Minister was directly stunned.

"So I'm asking, is it too late to call Dragon Mother back now?" Shi Yu also had a long face.

Please don't become like that old bastard!!!

He didn't want the old to give funerals to the young.

“Lord Sea Dragon King...!!”

“Go, quickly call the other Dragon Kings to support the Sea Dragon King,” the Turtle Prime Minister shouted.

Beside him, Shi Yu had a headache and started to worry about Ice Dragon.

Holy shit.

How could he meet Yun An in Dragon Palace City?

What was going on?

Although this power came from an unknown monster, he didn't believe that the monster wasn't related to Yun An at all.

If this kind of injury was similar to the injury Yun An had caused, then there was no solution at all.

Emperor Wu had proven everything with his own experience.

He had already found all the methods he could find, so Shi Yu definitely had no other choice.

Even Baby Ginseng, a transcendent-level mutant couldn't withstand the radiation... Unless the regression effect of the Time Fruit could last forever, otherwise, this was an unsolvable injury.

2

As for the other abilities of the ginseng baby, there was even less of a need to talk about them. Its race was only good at life healing, and when it came to radiation toxins, what was needed was purification. This ginseng baby didn't know at all. The two weren't in the same power system at all.

“You mean that even Lord Immortal Dragon King can't heal this kind of injury??”

“I'm not sure, I don't know either.” Shi Yu shook his head. “That monster shouldn't be Yun An... Perhaps it can be cleansed.”

The Immortal Dragon King of Dragon Palace City had probably mastered a cleansing super skill above Perfect Proficiency. He didn't know if it could do it.

At that moment.

Dragon Palace City was filled with joy.

The news of the appearance of the poison dragon monster had yet to reach Dragon Palace City.

At the moment, only a small number of higher-ups knew about the Poison Dragon Totem.

After hearing Shi Yu's description, the Turtle Prime Minister was so scared that it rushed to find reinforcements. Only Shi Yu and a group of ocean healing pets stared at the poisoned citizens in the bubble.

At this moment, as Shi Yu, who understood the source of this radiation, appeared, the Holy Shell, the Pink Sea Immortal Spirit Water Jellyfish, and the Heavenly Blue Star Coral immediately asked Shi Yu for more information.

Unfortunately, what Shi Yu knew was limited.

il!

Baby Ginseng:

Baby Ginseng: (lw

However, Baby Ginseng replaced Shi Yu and tried its best to describe the horror of Yun An's radiation to the few overlords. It had seen the tragic state of Zhong Xuan.

The three overlord healers were shocked: w 833%) w

'When they heard that, their hearts instantly turned cold.

Now, not only was one overlord of Dragon Palace City corroded by that poison dragon, but thousands of sea beasts under the jurisdiction of Dragon Palace City were also in trouble. Most importantly, the Dragon Palace sea area had also been completely polluted. If it couldn't be cleansed, Dragon Palace City's reputation would definitely be severely affected.

When the radiation flowed to other places, the impact would definitely be greater.

"Lord Immortal Dragon King..." The pink sea immortal spiritual jellyfish started to pray for the Immortal Dragon King, who had gone out, to return quickly.

It hoped that the other party could easily solve everything.

"If it's really as Sir Shi Yu said..."

"What should we do if Lord Immortal Dragon King can't solve it?" the Heavenly Blue Star Coral cried.

The Holy Healing Shell frowned and said, "If even Lord Immortal Dragon King can't solve it, I reckon only that one can... But the problem is that the other party hasn't appeared for nearly three thousand years."

Shi Yu, who was studying the injuries of these poisonous sea beasts with Baby Ginseng's clone, asked, "Is there anyone more proficient in the power of purification than the Immortal Dragon King??"

"yes! However, it doesn't belong to Dragon Palace City... Moreover, its whereabouts are too difficult to find..."

"But if it's still here, it can definitely do it. Even the radiation of Yun An you mentioned is not worth mentioning in front of it."

Shi Yu was stunned. He looked at the Holy Healing Shell and said, "Lord Holy Shell, who... are you talking about?"

The Holy Healing Shell said, "It's Lord Blue Sea Sprite..."

"Blue Sea Sprite?" Shi Yu kept feeling that he had heard of it somewhere.

"Lord Blue Sea Sprite has existed since the totem era."

“Although we don’t know what Yun An is, in the records of Dragon Palace City, from the totem era, there have been countless meteorites that descended from outer space in hundreds of millions of years.”

“among them, there are also some meteorites with the radiation power from outer space that will cause the ocean to be polluted.”

“After the homes of countless sea creatures are polluted, what awaits them is basically the extinction of races.”

“In this case, it’s said that the Lord Sea Sprite is an incarnation of the sea born from the faith of countless sea creatures.”

“It grasps the strongest purification power and wanders in the entire sea. Wherever it goes, the sewage will be clear, the radiation will disappear, and the curse will disappear. Even the evil heart can be washed away by it and completely purified.”

“From ancient times until now, countless ocean creatures with evil hearts have become a good beast that helps fish and becomes the guardian of the sea under the purification of the Lord Sea Sprite. Therefore... The Lord Sea Sprite is also known as the Holy Lady of the sea.”

“It bears the faith of almost all ocean creatures. It’s the ocean sprite closest to the mythical level. Our Dragon Palace City has also received the favor of the sea spirit. If it were the sea sprite, it would definitely be able to cleanse everything, but...”

“But?” Shi Yu asked.

“Yi.” Baby Ginseng widened its eyes.

It was the big boss.

“Even if it’s an elemental creature, there will be a day when its life force is exhausted. Moreover, the Lord Sea Spirit cleanses the ocean all the time. Therefore, every once in a long time, the Lord Sea Spirit will undergo reincarnation.”

“It has lasted from countless years ago through this method.”

“Sometimes, it appears in the form of a mermaid. Sometimes, it appears in the form of a whale. Sometimes, it appears in the form of a water sprite. Almost every lifetime, it will transform into a new water elemental form.”

“However, it’s said that after every reincarnation, Lord Sea Spirit won’t directly have the power from before, nor will it inherit the memories from before. It will only inherit the powerful heart that wants to cleanse all filth.”

“Of course, there’s still a chance for Lord Sea Spirit’s reincarnation to take back its previous power. Before the first reincarnation, Lord Blue Sea Spirit built the Sea Ruins in various places in the ocean. After Lord Sea Spirit’s reincarnation grows to a certain level, it will vaguely summon it and guide it to accept the previous power inheritance.”

“Evolve from different reincarnations into the real Blue Sea Sprite.”

“At that time, the Blue Sea Sprite will awaken its own exclusive cleansing ability. Under this cleansing power, there’s almost no filth to resist. It’s been like this for hundreds of millions of years...”

Shi Yu was in a daze. There was actually such an impressive transcendent creature in the sea?

It had actually lived for hundreds of millions of years through reincarnation.

The Holy Healing Shell said, “Unfortunately, the Blue Sea Sprite hasn’t appeared in 3,000 years. This means that... its recent reincarnation shouldn’t have been able to grow up and receive the summoning of the Blue Sea Ruins.”

“Otherwise, if Lord Sea Spirit is still around, it can definitely cleanse the radiation erosion on Senior Emperor Wu you mentioned.”

“Can’t we find its reincarnation?” Shi Yu asked.

“It can’t be helped... No one knows what form the reincarnation of the Lord Sea Sprite is in and where it is. Finding a water elemental life form of unknown race and level in the huge ocean is no different from finding a needle in a haystack...”

“Otherwise, if we can find it, with the kindness the Lord Sea Sprite has shown to the sea creatures, there will definitely be countless totems willing to protect it and help it grow.”

The Holy Shell said with pity.

“[mean, since the Sea Ruins can summon the reincarnation of the Sea Sprite, the Sea Ruins definitely know where the reincarnation of the Inner Sea Sprite is. Why don’t you ask the Blue Sea Ruins?”

1

The Holy Healing Light Beetle overlord:??

1

#### Chapter 274 Advising Against Entering the Pit

Shi Yu’s words directly choked the three overlords, the Holy Healing Light Shell, the Pink Sea Immortal Spirit Water Jellyfish, and the Heavenly Blue Star Coral.

Why not ask the magical Blue Sea Ruins?

Good question! But... what the hell!

How??

If it weren’t for the fact that the Turtle Prime Minister had said that Shi Yu was the Sea Dragon King’s guest, they would definitely have suspected that Shi Yu was a fool. “The Blue Sea Ruins is a dead object. Only the Inner Sea Sprites can resonate with it...” Doctor Shell explained.

“But... As long as it’s an object that has undergone the baptism of time, even if it’s just a stone mirror, it’s possible for a historical spirit to be born and record some important information,” Shi Yu said. “In telepathy, there’s a special branch of abilities that can listen to the voice of history and listen to the voice of all things. Since the Blue Sea Ruins was built by the Blue Sea Sprites that carry countless beliefs, in theory... there should also be a historical spirit.”

After Shi Yu finished speaking, the three ocean overlords were stunned.

“You mean the special talent of the Dong Huang archeologist?” Doctor Shell asked.

Because Dragon Palace City was in an alliance with Dong Huang, it was definitely one of the transcendent biological factions that understood the human world system the most.

For example, many of the ocean overlords of Dragon Palace City had actually followed human Beast Tamers before.

In addition to the Dragon Palace banquet that happened every five years, it wasn’t like they didn’t know anything about the situation in the human world.

Doctor Shell had really heard of the listening talent Shi Yu mentioned.

But soon, its pearl face revealed a regretful expression.

“It won’t work. I seem to remember that it’s called Bureau 11? A group of guys explored the Blue Sea Ruins in that place, and it wasn’t even the Blue Sea Ruins in Dragon Palace City. But in the end, they didn’t discover anything. Are you talking about their talent?” Shi Yu :”...”

Damn it.

Senior Lu was right.

These seniors were indeed not obedient.

Wherever there were ruins, there they were.

But the problem was that if they came to explore, so be it... But they dragged down the coolness of archeologists and Bureau 11! This made it difficult for him to say that he was also a member of Bureau 11 and wanted to explore the Blue Sea Ruins.

“Ha... Ha...” Shi Yu scratched his head in embarrassment and said,” Perhaps their listening positioning was wrong.” “By the way, is the division of the Blue Sea Ruins in Dragon Palace City on this island...” Shi Yu suddenly looked at a huge ruin door that seemed to be purely made of water in the distance of Clearwater Island.

Ginseng Baby: („,cowo)

Baby Ginseng suddenly felt that Shi Yu’s intention to court death was restless.

Was it because he didn’t dare to go to the Dragon God Ruins and was persuaded by Buggy to go to the Blue Sea Ruins? At this moment, Shi Yu’s curiosity was diverted again.

He wanted to take a look at the Blue Sea Ruins. Regarding the injuries of these sea beasts, he and Baby Ginseng were also helpless. They could only leave it to Dragon Palace City to deal with it themselves. However, he was deeply interested in the Blue Sea Sprite that Doctor Shell mentioned.

A water elemental life form born from the desire of countless sea creatures?

Master the strongest purification power?

Shi Yu felt that they could get to know each other.

To be honest, he had already started to consider teaching Baby Ginseng cleansing skills.

The main reason was that Eleven had yet to absorb another piece of the meteorite fragment.

According to Zhong Xuan, the meteorite fragment contained a strong power of the demon god. It suggested that it should absorb it after it reached the overlord level. Only then could its evolution be guaranteed. In the end, Zhong Xuan was afraid that Eleven's mind would be affected by the power of the meteor.

Therefore, Shi Yu had thought of many ways to increase the success rate of Eleven absorbing the meteorite fragment. After all, he also wanted to ensure that Eleven's evolution was foolproof. Among them, cooperating with cleansing skills was a plan. In Shi Yu's team, Baby Ginseng was the one who contracted the purification skill the most.

However, it wasn't especially compatible.

According to statistics, purification skills were mainly still mainstream with light, water, and wind attributes.

And Baby Ginseng's light-element compatibility was definitely not as strong as those real light-element creatures.

It wasn't that wood-element didn't have cleansing skills, but there were very few, and the level was very low.

The wood element that it was good at was actually more inclined towards replenishing hp and mana.

Including the ability of the baby ginseng race, it was also to replenish blood and mana.

However, purification was still essentially eliminating bad or unnecessary impurities, allowing energy to reach a pure level. There was still an intrinsic difference from healing skills that recovered life and energy.

The reason why Shi Yu had yet to teach Baby Ginseng and the others cleansing skills was firstly because Eleven had yet to break through to the monarch level before and didn't need the Meteorite Fragment. It wasn't that urgent, and secondly, he hadn't found a cleansing skill that matched them.

Now, after hearing that the Blue Sea Sprite had mastered the strongest cleansing ability, how could Shi Yu not be tempted?

If it was really as powerful as Doctor Shell said, then using this power to ensure that Eleven successfully evolved into a Demon God Panda, it would definitely be foolproof.

In fact, if it could even purify Yun An's radiation, then Yun An would really be a pollution-free renewable resource... At that time, forget one piece, as long as they could find Yun An, Eleven would probably be fine eating a house of Yun An's fragments.

Moreover, if it could even cleanse Yun An's main body, then the radiation power of the Poison Dragon Totem that had similar power fluctuations with Yun An should be easy to cleanse. The situation in Dragon Palace City could definitely be successfully resolved.

"Roar!!!!"

Soon, strong winds rose above the secret realm of Dragon Palace.

Under the rumbling of lightning and thunder, a vague white divine dragon appeared in the wind. This white divine dragon was huge and not much inferior to the Sea Dragon King. It also had the appearance of an Eastern divine dragon, but from the color, it was another race. It was similar to the Third Crown Prince of Dragon Palace City, the White Dragon.

The traces of its appearance didn't last long before its aura immediately disappeared. A moment later, the old turtle hurriedly returned to Clearwater Island and ran back.

"I've already informed Lord Azure Dragon to assist Lord Sea Dragon King."

After it returned to Clearwater Island, it immediately asked the three healing overlords about the poisoner. "There's still no other way. We can only wait for Lord Immortal Dragon King," Doctor Shelly said.

"Sigh, what's going on? Looks like the Dragon Palace banquet is going to be delayed this time..." The Turtle Minister looked worried.

Many factions who had decided to participate in the banquet had been poisoned and injured here. The chances of the Dragon Palace banquet successfully continuing were not high.

With its understanding of the Sea Dragon King, the other party would definitely delay the banquet and wait to settle the Poison Dragon Totem and treat the injured before continuing.

In that case... the impact was actually very big. Of course, it had an effect on the Sea Dragon King.

The factions who came to participate in the Dragon Palace banquet naturally didn't feel that there was anything wrong.

After all, Dragon Palace City provided food and accommodation during the Dragon Palace banquet. They ate the best, slept the best.

They probably wanted to delay it for a few more days.

But in the next few days... most of the losses would be paid out of the Sea Dragon King's own pocket.

As a live-in son-in-law... Sigh.

"Eh." After the old sea turtle painfully thought of its loss, it suddenly realized that something was missing in front of it.

“Doctor Shelly, where’s Sir Shi Yu?”

Doctor Shell, who had already run to study the poison, said, “I think... I think he wants to go to the Blue Sea Ruins to take a look?”

Turtle Prime Minister:??

Holy shit, why did these humans from Bureau 11 like to go to the various ruins of the Blue Sea Ruins, the Dragon God Ruins, and the Dragon Palace City every time they came to Dragon Palace City?

The Sea Ruins was indeed on this Clearwater Island.

The Blue Sea Sprite mastered the power of purification, and this island was also called Clearwater Island. It was probably related to some historical story.

After Shi Yu obtained the agreement of Doctor Shell and the others, he brought Baby Ginseng to the Blue Sea Ruins.

This was the first time he had seen such a ruin.

The Blue Sea Ruins was very tall. It was more than a hundred meters in length, width, and height. It was very similar to a building in Shi Yu’s memories. It was water cubic, and the dreamy blue surface of the ruins looked like crystalline water droplets under the sun. At least, Shi Yu felt that this ruin should be made of water elements.

“Found it.”

As he approached the Blue Sea Ruins, Shi Yu investigated the information about the Blue Sea Ruins through the archeological index and learned that this was also a half independent mystic realm-type spatial ruin.

From the outside, the Blue Sea Ruins looked like a huge water cube, but in fact, the inside of the Blue Sea Ruins was different. Most importantly, be it the Blue Sea Ruins in Dragon Palace City or the countless Blue Sea Ruins everywhere in the ocean, the water cubes that could be seen in the outside world were projections of the mystic realm. They were substantial mirages. There was only one true ruin, and that was the inner space that these water cubes led to.

They were equivalent to a broadcast station and spatial teleportation point across the ocean, as if they were just for the convenience of calling the reincarnations of the Blue Sea Sprites. “Wuu.”

“Wu.”

“Yi.”

“Mi.”

At this moment, apart from Baby Ginseng, the other three little guys were also called out by Shi Yu. They also widened their eyes and observed the beautiful sea ruins together. “The Blue Sea Sprites are very particular. The ruins are so beautiful.” Shi Yu touched his chin.

“Wu ~” Buggy agreed. This was much prettier than the Ice Dragon Ruins.

“Mi!” Chi Tong didn’t like hearing Buggy question Mu Huiyin’s aesthetic taste. “Wuu!” Eleven told them not to be noisy. If they continued to do it, would there still be Iron-eating Beast ruins in the ancient capital?

That was a completely broken ruin without even an independent space. “Wuu.”

But... could it really be said that the iron-eating beast ruins were lousy?

After all, it was a ruin that he could hear something from and obtained the iron-eating beast’s evolution method.

As long as there were gains, it was a good ruin. Otherwise, it was useless if it was mute.

The current Blue Sea Ruins... looked flashy without substance.

“Indeed...” Shi Yu muttered. In the information about the Blue Sea Ruins in the archeological index, there were actually comments from the seniors of Bureau 11.

This wasn’t strange... The information was also collected by humans. Probably only the seniors of Bureau 11 had the right to evaluate such a high-level ruin.

He also saw Senior Lu’s evaluation.

Lu Qingyi: “I don’t recommend archeological newbies entering the pit.”

## Chapter 275 Heart’s Fifth Pet

Good lord, Shi Yu was speechless.

This was definitely a loss.

Shi Yu imagined it. Senior Lu had probably been attracted by the various ruins in Dragon Palace City when she came to participate in the Dragon Palace banquet.

However, when Senior Lu was enthusiastic and spent most of her time researching the Blue Sea Ruins, apart from a pile of beautiful selfies, she didn’t obtain anything. She wasted her good time in Dragon Palace City. It was normal for her to not recommend newbies to enter the pit...

Hu...

A moment later.

Shi Yu stopped the archeological index connected to the transparent lens and observed the Blue Sea Ruins seriously.

The Blue Sea Ruins was a special ruin that couldn’t be researched at all apart from specific entry methods.

If it were ruins left behind by humans during the Beast Taming Era, such as the Iron-eating Beast Ruins, then they could still study and explore using normal archeological methods.

For example, the composition of the Nine Li Battle Beast Armor Fragment was detected by modern instruments. Moreover, through the ruins murals, one could also find the clue of the nine inscriptions.

However, this Blue Sea Ruins was completely not a ruin in the traditional sense. To be precise, it should be considered an “exclusive inheritance ruin”. It was very difficult to explore such an exclusive inheritance ruin. Even the members of Bureau 11 had only one method.

It was to try to activate the listening talent and see if they could communicate with the historical spirit of the Blue Sea Ruins and learn some special secrets.

At this moment, Shi Yu looked at the crystal clear Blue Sea Ruins that could even be used as a mirror. He activated his telepathy and said in unison,

“Ruins, ruins, who’s the most handsome Beast Tamer in the world?”

Eleven, Buggy, Baby Ginseng, Chi Tong:??? Was there such an opening line??

Obviously, Shi Yu’s looks did not receive the recognition of the Blue Sea Ruins. The ruins did not react.

“Lord Blue Sea Sprite, your devoted believer needs your help!”

II

11

“Excuse me... Did something happen during the reincarnation process?” Shi Yu had asked Doctor Shell and the others just now.

From ancient times until now, after the reincarnation of the Blue Sea Sprite, it would only be a hundred years at most before it would become the spirit of the Blue Sea again.

But this time, the sea spirit didn’t appear for three thousand years.

Not only did Shi Yu think so, even the other ocean totems felt that something had happened to the Blue Sea Sprite during its reincarnation.

“Lord Blue Sea Sprite, if you don’t appear soon... your territory will be completely eroded by Yun An.”

“Do you know Yun An?” Shi Yu gestured.

“A demigod from outer space and a king of totems. It has radiation that can’t be cleansed or cured. It likes to bathe in clear seawater the most.”

“It originally lived on land, but now, it has already aimed at the sea.”

“This is simply too much, right? He’s so arrogant.”

“Two days ago, it mutated a sea beast’s radiation into a Poison Dragon Totem. Under the contamination of this Poison Dragon Totem, the sea area of Dragon Palace City has now become a radiation sea. Countless sea beasts died because of this. Your citizens... need you very much now.”

“Apart from you, I’m afraid no one can cleanse this radiation.”

“It’s this kind of power shift. Can you feel it?”

Shi Yu took out the Meteorite Fragment from the ruins space and let Buggy use its mental strength to control it to stick to the Sea Ruins.

However, there was still no reaction from the Blue Sea Ruins...

“Wuu...” Eleven poked Shi Yu. No need to hold back. Use the unique skill.

Just like when they were talking about the iron-eating beast ruins...

Shi Yu was slightly stunned. Was this alright?

However...

He still looked at the Blue Sea Ruins and substituted Yun An’s emotions.

“In fact, Yun An even provoked you and said that your cleansing power definitely can’t cleanse its radiation.”

“This sea area will be its territory in the future!”

Buzz!

A ripple suddenly appeared on the surface of the water cube.

Shi Yu and the others: { ° 1 ° || |1)

Damn, what the f\*ck??? It was really effective??

“It said that you...”

“If you faced Yun An... You probably won’t dare to come out.”

Buzz!!

The ripples increased.

Everyone:!!!

“A mere Blue Sea Sprite is only so-so.” Blue Sea Ruins:?

Blue Sea Ruins:?

It actually... It really worked. Shi Yu’s vision instantly turned blurry. The sound of clear spring flowing and the roar of the sea sounded in his ears, making him feel extremely absent-minded. So, his talent was not to listen to historical talent, but “100% reaction talent when it came to ruins”?

This time, Shi Yu didn’t know how long he had experienced the flashes.

He felt that it was very, very long, and very short.

He saw many scenes.

For example, he saw the Inner Sea Sprite reincarnate into a water-element divine dragon. The divine dragon’s body was completely formed by water and was born in the deep sea. It didn’t take long for the

water-element divine dragon to grow to the overlord level, receive a summon from the Blue Sea Ruins, and awaken to evolve into an ocean sprite.

He also saw the Blue Sea Sprite reincarnate into a huge water-element whale. Its body was still completely formed by water and born in the ocean. It also didn't take long for it to reach the overlord level and receive the summoning from the Blue Sea Divine Hall.

Next, Shi Yu gradually saw many water-element creatures that the Blue Sea Sprite had reincarnated into. Mermaids made of water elements and corals made of water elements. These water-element creatures had one characteristic: their initial race level was very high.

Then, slowly, the racial level of the Blue Sea Sprite after reincarnation didn't seem to be as high as before. The dolphin formed by the water element, the shell formed by the water element... It seemed that every time it reincarnated, the racial level of the Blue Sea Sprite would decrease a little.

If the initial reincarnation could be said to be an overlord race that could grow to the overlord level very quickly and receive the summoning and inheritance of the Blue Sea Ruins, then as the race level after reincarnation became a monarch race, the difficulty of the Inner Sea Sprite growing to the overlord level immediately increased a little.

As it decreased to the commander race, the difficulty of the Blue Sea Sprite Reincarnation breaking through to the overlord level was not just a little.

The monarch race could also rely on training super racial skills to transcend perfection. There was a glimmer of hope of advancing to an overlord.

Then, the reincarnations of those commander races didn't even have this glimmer of hope.

In many images, Shi Yu saw that the reincarnations of the Blue Sea Sprite relied on its powerful willpower to survive the difficulties time and time again in life-and-death crises. Then, it would break through its growth level and break through to the overlord level. Every time, it was very dangerous.

It didn't rely on racial advantages and legendary resources, but on explosive potential with powerful willpower in a desperate situation to exceed the limit.

**Overlord's Will!**

Every low-level reincarnation Shi Yu saw next seemed to be able to display the will of an overlord in a desperate situation and erupt with super potential to break through levels. With this method, even if the Blue Sea Sprite reincarnated into a water-element sprite that was commander level, it still had a chance to grow to the overlord level. Then, it would receive the summoning of the Blue Sea Ruins, inherit the power of the Blue Sea Sprite, and evolve into a Blue Sea Sprite.

However...

As time passed, an even worse situation occurred.

The reincarnation race of the Blue Sea Sprites had fallen to the transcendent race. In this situation, even with the super overlord will, it wasn't so easy to grow up. In the scene Shi Yu saw, many reincarnations of the Blue Sea Sprites died directly in life-and-death crises without growing up. They could only be forced to reincarnate and start a new life. He could tell that, just as Doctor Shell had said, the

reincarnation of the Blue Sea Sprite was not strength or memory, but the heart that hoped to cleanse all filth. It was the reincarnation of will.

Every reincarnation of an Blue Sea Sprite seemed to have a very strong heart of justice. If this firm heart of justice was combined with high racial potential, it could naturally grow very smoothly, like a protagonist template.

However, if one had a firm heart but no corresponding strength, then this righteous heart would become a burden.

Under Shi Yu's gaze, he saw the low-level reincarnation of the Blue Sea Sprite countless times. Because of this super willpower, it could either save its companions or show justice to face an enemy that it couldn't defeat. Then, even if it broke through the limit, it couldn't obtain too much power at once. It could only die regretfully and reincarnate.

As the reincarnations arrived at the transcendent race, the difficulty of the Blue Sea Sprite growing into an overlord was ridiculously high. Under Shi Yu's observation, it seemed that only after a few accidental evolutions and raising its race level together with the overlord's will, could it grow into an overlord.

Perhaps it wasn't that transcendent races couldn't become overlords with the will of overlords, but that there weren't so many opportunities for trial and error, to make mistakes in reality...

"So this is the reason why the Blue Sea Sprite didn't appear again in 3,000 years..."

"The reincarnation ability of the Blue Sea Sprite is not limitless."

"Every time it reincarnates, its racial level will fall, from quasi Mythical to transcendent..."

"It's naturally very smooth to grow up with a golden spoon in your mouth, but it's not easy to grow up with a low race without the power and memories of my previous life and only rely on the inheritance of will..."

"This time, it seems to be relatively unlucky... It encountered a wall three thousand times in a row, but it didn't meet the conditions for the inheritance power of the Blue Sea Ruins."

Shi Yu was silent for a moment, but soon, he realized something.

(Please tell me where the reincarnation of this life is.)

[Even if it's a low-level transcendent race, I'm confident that I can help it grow to the overlord level in the shortest time.]

[Perhaps, perhaps, there's still a way to escape the restriction of reincarnation lowering race level.]

Purification ability, low growth level, high racial upper limit, overlord will, water, and elemental types. Wasn't this the pet template he dreamed of?

When Shi Yu thought of this, he immediately became excited.

At this moment, the ruins seemed to have given a response. He was in a state of observing history. Countless images flowed, and in the end, they were fixed on the last picture.

This was an island with an uncertain location.

The environment above was very good, and a large number of transcendent creatures lived. Among them, there was a special small river. Around the small river, a water-element creature race that couldn't be more common on the ocean lived.

They had blue translucent bodies that were like jelly. Their bodies were round, small, and looked very flexible. Their movements were simple hops... When he saw this group of creatures, Shi Yu was immediately stunned. This was... a middle-level transcendent race, a water-elemental elemental life form, a water slime?? Did this mean that the reincarnation of the Blue Sea Sprite was a water slime?

## Chapter 276 Rainbow Islands

Water Slime!!!

Shi Yu didn't know if this was a hint from the Blue Sea Ruins.

But if the reincarnation of the Blue Sea Sprite had already been reduced to a slime, that would be too tragic...

< Name > Water Slime

[Attributes]: Water

[Race Level]: Mid-level transcendent

[Race Skill]: Multiplication, Bubble

< Introduction > It's a low-level water elemental creature condensed from water elements. Its movements are slow, its intelligence is low, its attack pattern is single, its life form is extremely unstable, it's not

recommended to contract.

Shi Yu:"..."

Thinking of the Beast Tamer's evaluation of the Water Slime, Shi Yu was in a daze.

Indeed.

How should one put it?

Although it had mastered a high-level skill, even if it was facing a Beast Tamer intern, as long as that Beast Tamer was more experienced, the Slime would find it very difficult to stir up trouble.

For example, Shi Yu had once easily defeated the Electric Slime through insulation rubber gloves and replicated multiplication.

They were too slow and could only jump around. As long as it was a normal person, their speed was faster than theirs.

Their intelligence was also low, similar to the Green Silkworm. It was basically impossible for them to train their racial skills to a very high level on their own.

In addition, the life form was extremely unstable. Before “elementalization”, the racial ability that was a big deal in elemental life forms, it would turn into the corresponding elemental disintegration and die after being

heavily injured. Its life was extremely weak. This was why they were judged as transcendent races.

In any case, it was very difficult for Shi Yu to imagine how a Slime relied on its powerful willpower to grow to the overlord level.

It wasn't impossible, but it was too difficult. It was less than one in 100 million.

It was no wonder that the reincarnation of the Blue Sea Sprite had fallen to this race... It had never been able to reach the inheritance conditions of the Blue Sea Ruins.

From the historical segment, the lowest standard to receive the inheritance of the Blue Sea Sprite's ability should be the overlord level. This was not difficult to understand. The abilities of the Blue Sea Sprite were

definitely very unfair, like a cheat. Just like how Eleven and the others and Shi Yu couldn't withstand the teaching of super skills. If their strength and willpower were insufficient, the reincarnation of the Blue Sea Sprite

would probably find it very difficult to withstand the racial ability inheritance of the Blue Sea Sprite.

However, at this moment, this was not what Shi Yu cared about.

Since it was the reincarnation of the will of the Blue Sea Sprite, it meant that the reincarnated Slime should have a very high-level will level.

That meant that he could add some super skills.

With this evidence, so what if the race was low? If he taught it infinite devour, a terrifying Slime Demon King was immediately born.

Even if there was no overlord will, even if it wasn't the reincarnation of a Blue Sea Sprite... Because he had cultivated Eleven, Buggy, and Baby Ginseng, Shi Yu was also confident that nurturing an ordinary Slime would

turn into a very unscientific beast if it was him as the tamer.

In short, he was very confident that it could help the reincarnation of the Blue Sea Sprite reach the overlord level. This was only the lowest achievement. With the skill index and the will of an overlord, even if he

cultivated the Blue Sea Sprite to the Mythical level and let it escape the restraints of endless reincarnation, Shi Yu felt that it might not be impossible.

“Leave it to me.”

Shi Yu made a big statement for the Blue Sea Ruins.

“But the problem is... Even if there aren’t ten billion Water Slimes in this world, there should be at least one billion. I... Where can I find them?”

His imagination was very beautiful, but reality made Shi Yu depressed.

Even if he could detect the level of the will of every water slime through the skill index to determine if it was the reincarnation of the Blue Sea Sprite, even if the world’s slime lined up for him to detect, he still had to

take forever...

Moreover, it was impossible for them to really line up for him to test.

Shi Yu could only go to various parts of the world to slowly search for it himself. Ignoring the safety issue for the time being, the time spent was a huge number. If this Slime Reincarnation accidentally died during this

period and reincarnated into another race, it would be even more tragic.

“Can you... give me another hint?”

Buzz!

Perhaps due to Shi Yu’s strong confidence, there were some changes in the Blue Sea Ruins.

In the outside world.

Shi Yu quickly retreated from the observation history state. Eleven and the others stayed on Shi Yu and before they could react, Shi Yu was suddenly sucked into the Blue Sea Ruins by a huge suction.

“Damn...”

Shi Yu didn’t react either. He only felt that the suction power of this thing was even stronger than the Mutated Leviathan. With Eleven and the others, their bodies seemed to have plunged into a huge pool.

Crash...

Countless streams of water hit him.

Shi Yu felt a little suffocated.

When Shi Yu reacted again, he had already been ejected from the Blue Sea Ruins.

“Wuu!” “Wu!” “Yi!” “Mil!”

Shi Yu had yet to discover anything. As he rubbed his eyes and spat out water, the pets on Shi Yu’s body cried out in shock.

“What?”

He understood what Eleven and the others meant and couldn’t help but open his eyes to look around. The identical Blue Sea Ruins was still in front of him, but...

He was no longer on Clearwater Island!

At this moment, Shi Yu was directly in a strange rain forest. The unfamiliarity of the surrounding environment stunned Shi Yu.

Where was this?

Shi Yu jointly located his current location according to the archeological index and Feeding index, but he realized that he was no longer in the range of Dong Huang's map. He couldn't determine where he was at this

moment...

"Spatial teleportation?"

Shi Yu quickly looked at the Blue Sea Ruins and opened his mouth slightly.

"So, every Blue Sea Ruins is really a projection of the ruins space inside..."

It was said that, be it the Blue Sea Ruins in Dragon Palace City or the countless Blue Sea Ruins everywhere in the ocean, they were all projections of the Inner Sea Mystic Realm. They were all substantial mirages. There

was only one true ruin, and that was the inner space that these water cubes led to.

This saying was recorded in the archeological index, but Shi Yu didn't expect that the Blue Sea Ruins could actually be used as a teleportation point, allowing life forms to travel freely between the various ruins.

However, Shi Yu was only stunned for a moment before quickly recovering his calm.

This was not something that exceeded their understanding.

During the Kong Emperor Era, the Kong Emperor had once established spatial teleportation arrays all over the world. Although after the Kong Emperor died, most of these spatial teleportation arrays were abandoned

because they couldn't replenish energy, things like spatial teleportation arrays really existed at certain times, such as when there were spatial legendary Beast Tamers.

The aura of the Blue Sea Sprite was even higher than that of a demigod. It had gotten to know many ocean totems, so it didn't seem impossible for it to create an ocean ruin that could be used as a spatial teleportation

array.

"The Blue Sea Ruins. This is the place where we were teleported to the reincarnation of this time... Or was it teleported to the place closest to the reincarnation of the Inner Sea Sprite?"

Shi Yu was slightly stunned. If that was the case, the difficulty of finding the Blue Sea Sprite's reincarnation had indeed decreased greatly.

After all, he still remembered the approximate environment of the island just now. In addition, with the restriction of the slime race, it was much easier to find.

“Brilliant!!!”

At the thought of this, Shi Yu smiled and looked away.

“Yiya!!!” However, Baby Ginseng reminded Shi Yu nervously.

Apart from the territories of the seven countries, the other places were all totem areas. They were the territories of totem-level creatures and overlord-level creatures.

Now, Mother Ice Dragon isn't here, and the rich cat isn't here either. Is it really alright for them rookies to...

Could this Blue Sea Ruins still successfully teleport us back to Dragon Palace City?

Baby Ginseng's reminder made Shi Yu turn his head slightly to look at the Blue Sea Ruins.

“I've already marked this place and located it. Can you teleport us back first? We'll call for some people and find the Reincarnation together.”

“Hello? Hello!”

“Say something...”

Shi Yu: “...”

Why did this Blue Sea Ruins suddenly become unintelligent again?

Shi Yu originally thought that this guy was pretty smart. He knew that the reincarnation body was about to die and planned to find someone to help, but now, it was switched off again?

Shi Yu tried to use the index to call Senior Lu... But... there was no signal.

This was very annoying!

Exploring ruins was a dangerous activity. The sayings were right.

It directly teleported him from a very safe place to this ridiculous damn place!!!

“Forget it, let's take things as they come. It's not like we don't have any strength now. As long as we don't encounter totems, we aren't afraid of ordinary monarchs. Even if we encounter overlords, we might not

necessarily be unable to escape. It's fine as long as we're careful. In short, let's find the reincarnation of the Blue Sea Sprite first,” Shi Yu said.

With that, he put Baby Ginseng back into the Beast Taming Space.

“Stay here obediently. Don't come out during this period of time lest you cause trouble for us.”

[Ginseng Baby:??]

“Wu!” “Wu!” “Mi!” Eleven, Buggy, and Chi Tong couldn't disagree.

Initially, there might not have been any danger, but with Baby Ginseng hanging around outside, there would definitely be a lot of danger.

“Buggy, I’ll leave the reconnaissance to you. Let’s see if there are any creatures on this island first,” Shi Yu said. “Be careful. Don’t use Psychic Detection and Phantom.”

“Wu ~” Shi Yu gave the order. Buggy immediately expressed its understanding. It instantly used its phantom to create hundreds of small flying bugs that couldn’t be seen with the naked eye and started to fly in all

directions.

At the same time, Shi Yu made Little Chi Tong obediently enter his body and dye the hair red.

He put Eleven on his shoulder. This made him feel safe.

Shi Yu chatted with the Blue Sea Ruins for a few minutes.

He was very worried now. He didn’t know how Dragon Palace City would react after discovering that he had disappeared.

One Poison Dragon Totem was probably enough to give them a headache...

Shi Yu hoped he could figure this out and get back as soon as possible.

However, since he was already here, he definitely had to find the Heavenly Fated Slime first. Shi Yu had already confirmed that this guy was his fifth pet!

it wasn’t that there weren’t any creatures on this island.

However, the creatures on the island were very special.

As Buggy’s reconnaissance worm flew, it saw many colorful poisonous frogs, poisonous mushrooms, and poisonous bugs living on the island.

it was as if this island was a paradise for poison-type creatures.

However, fortunately, Buggy discovered that the growth levels of these poisonous creatures weren’t high. They basically didn’t exceed commander rank. This was a good thing. This way, the chances of Shi Yu and the

others encountering danger here were much lower.

“Wu (Little Snake)!!!”

The Phantom Reconnaissance Worm made by the worm quickly flew around the island. The strongest creature it discovered was only a monarch-level Ten Thousand Poison Python.

In the dense rainforest, in a damp cave, a multicolored python more than ten meters long was squinting, as if it was resting.

The Ten Thousand Poison Python was a monarch race’s poison-element creature. It was said that its body contained more than ten thousand types of poison.

At this moment, the Ten Thousand Poison Python was indeed sleeping. Taking advantage of this good opportunity, the flying insect illusions created by the worm crawled into its body and activated the Dream Stealing

Skill.

“How long will it take?” Shi Yu turned to ask Buggy from afar.

“Wu!!” Buggy said ten minutes.

Buggy was an all-purpose tool pet. Apart from being able to transform into various transportation tools, it was also very proficient in various vocation skills.

For example, cleaning the house. No one was faster than it. For example, when it taught other pets as a teacher, no skill was better than the Imagination Domain.

It could be a chef, a cameraman, and even a gardener for Baby Ginseng.

At the moment, it was obvious that the intelligence officer, Buggy, was online.

It directly used the phantom as a medium and used the Dream Steal skill to invade the Ten Thousand Poison Python’s dream realm, trying to steal valuable memories from its subconscious in its weak dream.

After being upgraded to the maximum level of Dream Steal, it could even steal the super skill from the ancient fossil and give it to the dream phantom, let alone the memory of the Ten Thousand Poison Python.

The information Shi Yu and the others wanted to know from the Ten Thousand Poison Python was also very simple. That was, the surrounding environment information...

As the strongest transcendent creature on this island, this Ten Thousand Poison Python should know the surrounding geographical environment better...

Generally speaking, after transcendent creatures reached the monarch level, as long as they weren’t from extremely special races, their intelligence wasn’t much inferior to humans.

This Ten Thousand Poison Python was nearly a hundred years old. It should have been in charge of this area for a long time. It already knew everything it needed to know.

“Wu ~” A moment later, Buggy sent Shi Yu a message.

“Wu =”

Firstly, this area was called the Rainbow Islands. It was a land without a master, with a total of 29 islands.

Why was it an ownerless place? Because during the last totem battle, a forbidden weapon battle happened here, causing the surrounding sea area to be polluted. There were basically no high-level creatures who

occupied this place as their territory.

The Rainbow Islands was also named at that time because the seawater at that time was basically colorful and belonged to the biological forbidden zone.

Although after more than a hundred years, the pollution had naturally become much calmer, this place was still ownerless. The strongest were only monarch-level creatures. These monarch-level creatures each

occupied an island as their territory. Then, these islands formed the entire archipelago.

This island was called Poison Fang Island, and it was the territory of this Ten Thousand Poison Python.

“Rainbow Islands?” Shi Yu fell into deep thought.

He had never heard of it. However, there were indeed many pollution places born because of forbidden weapons. Most importantly, they were rarely mentioned...

In the early stages of the development of the Mechanic class, the development of forbidden weapons had yet to mature. Compared to the various special forbidden weapons with no pollution that could attract natural

energy now, the forbidden weapons at that time usually liked to add some poisonous substances.

This combination of self-destruction could heavily injure those overlords and totems.

However, this way, the pollution to the environment was also very difficult to eliminate.

Poison-type creatures were still very glitchy. As long as the opponent didn't have the ability to detoxify, poison-type creatures were also small experts who could fight above their level. Low-level beats using dirty

tricks to destroy high level ones was a common sight.

“Wu ~” Buggy continued to steal the Thousand Poison Python's dream information.

Although this place was ownerless, there seemed to be traces of human activity. From time to time, Pirate Ships would pass by the Multi Colored Islands and stop on some islands, but those who could be reduced to

pirates weren't very strong. At most, they were at the master level. They basically wouldn't have any conflict with these kings of the islands, and everyone had been living in harmony.

Unfortunately, the Ten Thousand Poison Python didn't know which faction these pirates came from.

“Does it know about Dragon Palace City?” Shi Yu asked.

Buggy searched for a moment and showed joy.

“Wul!!”

This big worm actually knew.

This was because 50 years ago, an overlord-level Poison Wyrm was born in the Rainbow Islands. It unified the Rainbow Islands. In order to increase its bloodline, it hoped to lead the Rainbow Islands to join the Dragon

Palace City and obtain the protection of the Dragon Palace City. Therefore, it went to the Dragon Palace City.

Unfortunately, after that overlord went... he never returned.

The monarchs of the Rainbow Islands guessed that if the overlord didn't die midway, it was because the environment of the Rainbow Islands was too poor. Dragon Palace City didn't accept it, but the overlord wanted to

join Dragon Palace City too much to find a chance to increase his bloodline. Therefore, it stayed in Dragon Palace City and gave up the island.

"Overlord-level Poison Wyrm... I've never heard of it either, but since Dragon Palace City can still manage this place, it means that this place shouldn't be very far from Dragon Palace City."

Shi Yu suddenly became happy.

"Where's the slime? Is there an island with the slime?!"

"Wul!!" Buggy nodded heavily. There was also this.

Most of the islands in the Rainbow Islands were occupied by poison-type creatures, but there was one island that was very special.

The King of the Islands was a water-element elemental life form. The monarch-level Cleansing Water Sprite King had only risen in the past ten years.

Under its jurisdiction and purification, that island was different from other islands. The environment was relatively beautiful.

Among them, many water elemental creatures lived on that island. There were a large number of water Slimes there, all citizens of the Cleansing Water Sprite King.

However, the problem was that perhaps the individualism was too special. The Cleansing Water Sprite King and the other kings of the islands constantly clashed, and the lives of the islands and other islands often

collided...

"It should be this island. Let's go." After Shi Yu obtained the information, he took a deep breath and slowly floated up. "Buggy, lead the way."

"You've done well for being able to find the reincarnation of the Blue Sea Sprite so quickly! When we go back, I'll reward you with doubled training. Try to train your overlord willpower as soon as possible!"

Buggy:???

Although it wanted to train its overlord will as soon as possible, why did this reward sound so wrong?

“Wuu.” An envious voice came from Shi Yu’s shoulder.

Buggy:???

Damn it, this was too much....

## **Chapter 277 Dragon Palace City’s New Department**

After knowing that there were no overlords in the Rainbow Islands, Shi Yu and the others relaxed a lot.

Moreover, even if there was an overlord, it wasn’t a big problem.

Just like what the teachers in the school had taught, if he couldn’t defeat it, couldn’t he escape?

With transcendent-level Instant Transmission and the ruin’s space, if they wanted to escape, the other party might not necessarily be able to catch up or find them.

As for which teacher taught this thing, it was definitely the management teacher of the Ancient Capital University’s resource bank.

On the sea area of the Rainbow Islands.

The red-haired and red-eyed Shi Yu followed behind Buggy and flew in midair.

“Wuu.” Eleven pulled Shi Yu’s shoulder and looked forward to the next little friend.

According to Shi Yu... Could it be a child with the will of an overlord?

Moreover, it could also master the power of purification and help it eat Yun An?

That was great.

Not only could it pressure itself during training, but it could also help it digest food. Eleven liked it very much!

The panda swung its legs around Shi Yu’s shoulder excitedly.

Shi Yu:”...”

“Don’t move around. It’s itchy.”

“Things haven’t even started.”

“Wuu ?” Eleven was confused.

“Contracting a pet is like chasing a girl. It’s not that the other party will agree just because you want to.”  
Shi Yu muttered.

if it were other water-type pets, Shi Yu would be confident even if it was the Cleansing Water Sprite King on that island.

However, facing the reincarnation of a Blue Sea Sprite with an overlord's will, he felt that it was not very stable.

Most importantly, in the historical spirit scene Shi Yu observed at that time, it wasn't like it had never encountered a Beast Tamer before.

But as expected, all the human Beast Tamers who wanted to contract it were rejected. Those who wanted to forcefully contract it... The reincarnation of the Blue Sea Sprite would rather shatter than live in dishonor.

In any case, in the scene he saw, the will of the Blue Sea Sprite was extremely firm. It would not become a vassal of humans or even other lives at all.

In this situation, Shi Yu knew very well that it was probably not that easy to obtain the recognition of the Inner Sea Sprite Reincarnation.

Some lives had no backbone. When they saw an expert, even if the other party was an Ice Dragon, they could recognize it as mom. However, some lives had their own goals and wouldn't easily change their will and

dreams because of the outside world. Obviously, the reincarnations of the Blue Sea Sprite were all the latter. Shi Yu was very clear on this.

However, fortunately, compared to those in history, the greatest difference between Shi Yu and the Beast Tamers who wanted to forcefully contract it was because of the talent potential of the Blue Sea Sprite... Was

that Shi Yu knew in advance the pursuit of the Blue Sea Sprite Reincarnation Body engraved in the depths of its will.

He should be able to obtain the other party's recognition from this aspect.

"Buggy, Eleven, Chi Tong, from today onwards, I have a new dream. That is to become the environmental ambassador of Blue Planet. Everyone, monitor each other. In the future, it's your responsibility to protect the environment, do you hear me?"

Buggy, Eleven, Chi Tong:???

Shi Yu's gaze was firm. As a Beast Tamer, if he pursued a pet, he had to change himself for it.

As long as it wasn't some outrageous dream, it didn't matter if he had a few more ideals and made more changes.

Otherwise, what right did it have to win its liking?

He was definitely going to be the environmental ambassador.

Rainbow Islands, Qishui Island.

Shi Yu and the others had just approached when they discovered the abnormality.

Originally, the sea area of Qishui Island that should have been very clean was now surrounded by a large amount of mud, and the sea water was turbid.

A large number of transcendent creatures that looked like gray mud gathered around the island, destroying the environment.

< Name > Sludge Monster

[Attributes]: Poison

[Race Level]: High Transcendent

[Race Skill]: Source of Pollution, Poison

< Introduction > A transcendent life form mutated from mud containing various poisonous substances.

Shi Yu saw a large number of Sludge Monsters boarding Qishui Island from the sea and stopping in the sky, and he was slightly stunned.

The Sludge Monster was also a transcendent creature in Dong Huang. Their favorite was to dye a clean environment into an environment suitable for them to live in to obtain better growth.

However, humans weren't qualified to evaluate the Sludge Monster race. Although they were evaluated as harmful creatures, in the end, they were transcendent lives born by humans after entering modern society.

There was no such thing in ancient times.

However, since it concerned the survival environment of the race, it didn't matter if it was right or wrong. It just depended on the position. It was enough to clear them out.

If nothing went wrong, this group of Sludge Monsters should have targeted Qishui Island. From the memories of the Ten Thousand Poison Python, this shouldn't be a short-term war. It should have lasted for a period

of time.

"Compared to the territories occupied by other poisonous creatures, the clean environment of Qishui Island is more convenient and suitable for the transformation of the Sludge Monsters. As for the islands that are

already covered in poisonous substances, it's not that easy for the Sludge Monsters to pollute them, so they targeted Qishui Island..."

After a simple analysis, Shi Yu used his super vision to look into the distance.

In the distant sky, an elemental life form several meters tall, similar to a manta ray whose entire body was made of water elements, was fighting. Upon seeing this scene, Shi Yu's heart skipped a beat.

Holy shit.

Wasn't this the Cleansing Water Sprite King?

Stop fighting!

Seeing that the king of the island on Qishui Island was fighting an unknown creature, Shi Yu immediately panicked, afraid that the reincarnation of the Blue Sea Sprite would die again in the battle of the island.

The weak little slime couldn't withstand this kind of torment.

After discovering the battle, Shi Yu hurriedly flew into the island.

"Eleven, deterrence, charge!"

"Wuu!" Eleven patted its chest and expressed that it would take care of it.

Shi Yu gave the order. Then, an extremely shocking scene appeared in the entire Qishui Island.

As Shi Yu flew into the island, the Sludge Monster that logged onto the island almost instantly distorted and fainted with a frightened expression.

In fact, with Eleven's deterrence, it wasn't impossible to directly insta-kill them, but that way... the exploded Sludge Monster would become a stronger pollution source. He didn't want to trouble the water sprites on

Qishui Island.

At this moment, as Shi Yu stepped onto the island, on Qishui Island, the Sludge Monsters fainted one after another. The Water Slimes, Water Sprites, and Mad Water Sprites that resisted the Sludge Monsters looked at

the red figure in the sky in shock.

At the same time.

The Cleansing Water Sprite King was fighting a mud dragon more than ten meters long on the island.

The color of the Sludge Dragon was similar to the composition of the Sludge Monster, but its body was in the form of a dragon. It was a mutated evolution of the monarch race of the Sludge Monster.

At the scene of the battle, as the Sludge Dragon waved its huge tail, more than 100 purple Sludge Bombs instantly flew backward like meteors, smashing towards the Cleansing Water Sprite King.

Regarding this, the Cleansing Water Sprite King was very helpless. In the face of this skill, its best way to deal with it was to dodge a portion of it. This could save a lot of physical strength, but if it let these mud fall into

the island, the environment would quickly be polluted.

"Ji~~" Therefore, the Cleansing Water Sprite King could only activate the mid-level water-elemental skill Purification to resist the Sludge Bomb on a large scale.

"Mi~ ="

In the sky, the Cleansing Water Sprite King circled its body. A light blue light emitted from its mouth, and the light spread into waves that enveloped the mud. A moment later, the purple color on the mud faded,

turning into blue water balls.

Bang!!!

Right on the heels of that, the blue water balls that filled the sky exploded, and rain started to fall from the sky. In the island, those battles between transcendent and commander ranks were actually nothing. The battle

between the two monarch ranks was the key battle that determined the ownership of the island.

However, this battle didn't last long. The Sludge Dragon and the Cleansing Water Sprite King's expressions suddenly changed. They looked at the red-haired human flying over from the distance, emitting a terrifying

deterrence.

"Energy value, 1,660,000."

"Energy value, 1,710,000."

"Not bad, but..." In the sky, Shi Yu's expression was calm. After flying over with the deterrence Eleven emitted, his figure suddenly stopped in midair.

"Give me some face. Battle, pause."

"Roar!!"

"Mil!"

The Sludge Dragon and the Cleansing Water Sprite King stopped fighting and looked at this red-haired human of unknown origin with fear.

"Hello."

Stopping in midair, Shi Yu looked at the two monarch-level lives with a calm expression.

"Wuu!!" Eleven showed a ferocious expression and warned.

At this moment, Buggy's Psychic Domain kept expanding, trying to stop the battle on the island and prevent a certain Slime on the island from dying.

"Human??" The mud dragon's voice.

"Who are you??" It was the Clearwater Sprite King's light female voice.

At this moment, the power of telepathy was obvious.

These two monarchs clearly didn't know telepathy, but because Shi Yu knew how, he could directly communicate with them without any obstacles.

“Let me introduce myself. I’m the person in charge of the Ocean Environmental Protection Department established by the Ice Dragon King in Dragon Palace City. You can call me Minister.”

Sludge Dragon: “2”

The Cleansing Water Sprite King: “2”

Eleven, Buggy, Chi Tong:???

Dragon Palace City had this department?

The Rainbow Islands was clearly not far from the sea area of Dragon Palace City. The monarch-level creatures here had all heard of the famous Dragon Palace City. Sensing the pressure brought by Shi Yu, the Filthy

Dragon and the Cleansing Water Sprite King were both shocked and uncertain.

“In short, from today onwards, the environmental protection problem of this sea area is under our jurisdiction. I heard that the Cleansing Water Sprite King has done meritorious service in environmental protection. I

hereby appoint you as the deputy minister of the Ocean Environmental Protection Department under the command of the Ice Dragon King. As for the Mud Dragon, because it violated the fourth law of the Dragon

Palace City’s Ocean Environment Protection Law, we will adopt mandatory sanctions.”

“Roar!!! (Damn it!)” The Mud Dragon was furious. What nonsense was this?

Stop looking down on it!!!

Just as it finished roaring, Eleven, who was 0.3 meters tall, stretched out its small palm and patted down on Shi Yu’s shoulder.

In the next moment, in the sky, under the situation where the Sludge Dragon and the Cleansing Water Sprite King’s eyes instantly widened, the phantom of a huge lightning palm more than fifty meters in diameter

quickly condensed, sweeping with terrifying thunder, wrapped in supreme deterrence, and fell with a bang!

The deterrence of Dao Proficiency and the lightning palm wrapped in giant transformation directly descended from the sky, oppressing the Sludge Dragon until it couldn’t move. It could only show frightened eyes as

the lightning palm landed on its body.

In the next moment, with a boom, a huge pit was directly pushed out of the ground. Under the cry of electric currents that filled the sky, beneath the disintegration of the strong electric current, the death of the mud

dragon didn't even cause any ripples. Even the poison was instantly "cleansed" by the high temperature of the electric current.

After Eleven directly erupted all its power through the Giant Transformation skill, it instantly killed the Sludge Dragon, shocking the Cleansing Water Sprite King beside it.

"M-Mr. Minister, you've come to Qishui Island. Do you... Have any instructions for me, sir?"

Seeing Shi Yu's terrifying strength, regardless of Shi Yu's identity, the Cleansing Water Sprite King found it difficult to resist. It was mainly because the deterrence wave swept by Eleven's deterrence palm just now was

too strong. Even as a bystander, the Cleansing Water Sprite King's heart wavered when facing the true might of a king.

Skill: Infinite Devour

Status: Can be taught

[Teaching success rate]: Medium

Shi Yu looked at the Cleansing Water Sprite King and revealed a regretful expression.

If only Eleven and Buggy could also learn Infinite Devour. Unfortunately, this skill didn't have high requirements for spatial compatibility, but its requirements for water-element compatibility were ridiculously high.

Only water-element pets could learn it.

t's nothing. You've heard of Dragon Palace City, right?"

The Cleansing Water Sprite King nodded. Of course, the absolute lord of the Eastern Sea.

ce Dragon King... Forget it, you definitely haven't heard of this."

Lord Ice Dragon King is a new totem dragon in Dragon Palace City. It's an elder who likes to be clean. It can't stand the slightest pollution in the ocean, so it established the Ocean Environmental Protection Department."

"At the same time, they entrusted me, the Beast Tamer who also can't bear to see any pollution, to be the minister of the Ministry of Environment."

"I heard that there's a Cleansing Water Sprite King here whose cleansing ability is pretty good, so I came to take a look. Moreover, I wanted to see if there are any potential people suitable to become members of the

glorious Marine Environmental Department among your people..."

The Cleansing Water Sprite King was stunned.

“In short, you just have to summon your citizens quickly... Tell them clearly. One goal of cleansing the ocean and a great project related to ocean environmental protection, that we need their help. There should be

people with similar thoughts among your citizens, right?”

The Cleansing Water Sprite King: “Among my people, there are indeed some creatures who are proficient in cleansing skills...”

“In short, call all the life forms together,” Shi Yu said. “This is a good thing!”

A moment later.

The Cleansing Water Sprite King gathered the thousands of water-element creatures on Qishui Island according to Shi Yu’s request.

As the guardian of these water-type creatures, the Cleansing Water Sprite King still had a very tall image in their hearts.

They had just obtained a huge victory in a battle. At this moment, these water-element creatures looked at the Cleansing Water Sprite King in admiration. At the same time, they looked at Shi Yu beside it in confusion.

“Everyone...” As the mother-level figure of the water-element life form on Qishui Island, the Cleansing Water Sprite King immediately attracted all its attention after using the special communication method of the

water-element life form.

“This is... Dragon Palace City... Ocean’s Environmental Protection Department? Sir, thanks to his help, we were able to easily defeat the invaders in the invasion of the Mud Island. The so-called Ocean’s Environmental

Protection Department is to cleanse the polluted waters and provide habitable homes for more ocean life. It’s a very great organization.”

“As for Dragon Palace City, it’s one of the strongest factions in the ocean. This time, Dragon Palace City’s Ocean Environmental Protection Department recruited new members, hoping to obtain the recognition of

more ocean life forms and join them. They will contribute their strength to protect our common home.”

“Are any of you willing to join the Ocean Environmental Protection Department?” the Cleansing Water Sprite King asked.

It felt that with Shi Yu’s strong strength, he shouldn’t resort to lying. If Dragon Palace City really had such a department, it couldn’t wait to bring all its citizens into it. However, such a high-level department definitely

wouldn’t take in people so easily.

In that case, the Cleansing Water Sprite King only hoped that more citizens could obtain the recognition of this environmental minister and then let Qishui Island obtain the protection of Dragon Palace City.

Shi Yu looked at the thousands of confused water-element lives in front of him.

He said slowly, "Protecting the ocean is the responsibility of every water elemental life form."

"The blue ocean is the cradle of life."

"You were born from the ocean. The ocean is like a mother feeding you, and if you protect it... Not only is it protecting yourself, but it's also protecting the future of your race."

"Only by improving the ocean environment can everyone have a good life."

Shi Yu recited the various environmental protection campaigns that his teacher in his previous life had given, feeding them to these marine creatures.

After more than ten classic sentences, these sea creatures were a little moved, and the Cleansing Water Sprite King beside them was a little touched.

Shi Yu was indeed real.

"Although I'm only a human, I also know the importance of protecting the ocean. We only have one blue planet. All things and nature need to coexist in harmony. Corrupting the environment is equivalent to harming

others and ourselves. Protecting the ocean environment is protecting yourself and our descendants. It's the common cradle for all creatures. Therefore, are any of you willing to take the responsibility of protecting the

ocean and protecting nature with me?"

Many water elemental life forms that had escaped to Qishui Island due to pollution felt the same way and were tempted.

In the blink of an eye, many water-element creatures expressed their willingness to follow Shi Yu and protect the sea with the Cleansing Water Sprite King.

"Very good."

"However, if you want to protect the ocean on the first line, you have to have the most basic ability requirement, which is to master the cleansing ability. If you don't have the cleansing ability, it's a pity..."  
As Shi Yu

finished speaking, the water sprites who had mastered the cleansing skill became very happy.

At the same time, a portion of the water elemental lives without the cleansing ability became very disappointed.

Before long, Shi Yu got the Cleansing Water Sprite King to start organizing water-type creatures with the ability to cleanse and with the intention of protecting the sea.

Shi Yu floated quietly in the sky and watched everything.

A moment later, Shi Yu smiled.

Under his request, most of the water-element creatures without the cleansing ability, even if they had the intention to protect the ocean, were dispersed by the Cleansing Water Sprite King, leaving only the water-element creatures with the cleansing ability.

However, there were always accidents.

Among the pile of high-level water elemental life forms, an ordinary water slime stubbornly stayed on the spot, unwilling to leave no matter what.

No matter how the commander under the Cleansing Water Sprite King chased it away, it refused to leave.

Compared to the other slow Water Slimes, this body was like a blue jelly. The petite Water Slime's gaze was extremely clear and determined, as if it was not the same race as other Slimes.

< Name > Water Slime

[Level of Growth]: transcendent

Skill: Infinite Devour

[Teaching success rate]: High

Seeing this, Shi Yu chuckled and asked the Cleansing Water Sprite King beside him, "What's wrong with that Water Slime?"

"This..." Seeing that this water slime didn't leave after a long time, the Cleansing Water Sprite King was also very helpless and surprised.

It said to Shi Yu, "This little guy is a little special. It's a little different from other Slimes. You might not believe me if I say it, but although it's just a Slime and doesn't have the cleansing ability, it's more concerned about

the ocean environment than any race on the island. Previously, Mud Island had also invaded several times. It was always in the frontline to resist the pollution environment. It even had several near-death experiences."

"Fortunately, it was very lucky... In the end, it relied on its powerful will to persist."

"I've paid attention to it. Its dream seems to be the protection of the ocean you mentioned, as well as a clean and clear home for all ocean life. However, due to the restriction of its race, it definitely can't cleanse the

ocean like other water sprites. I'll chase it away now."

The Cleansing Water Sprite King actually had a deep impression of a transcendent-level Water Slime on the island. This situation made Shi Yu's smile even wider. "Why chase it away?"

"Anyone is impressive with dreams."

Shi Yu patted the Cleansing Water Sprite King and said, "A mere cleansing skill. If it doesn't know it, I'll teach it."

[Recording successful.]

"I've decided. I'll also let it join the Environmental Protection Department. Just let it be my private secretary."

The Cleansing Water Sprite King:???

Below.

An ordinary Cleansing Water Sprite was persuading the Water Slime to leave. Without the cleansing ability, it was impossible for it to be taken fancy by the Environmental Department of a huge faction like Dragon

Palace City.

"Hu!!!" The Water Slime opened its stubborn big eyes and expressed that although it didn't have the cleansing ability, it could fight those bad guys who polluted the sea and also protect the sea.

"Ugh..." This ordinary Cleansing Water Sprite had a headache. Was the Water Slime very strong? Even if it broke through to the transcendent level, it was still very weak. This guy had been on the verge of death a few

times, didn't it know that? Why was it so stubborn?

This Water Slime was also considered a popular creature on Qishui Island. After all, the lives here still liked it very much for it to fight so hard against the invaders.

However, it was not that easy to enter the Environmental Protection Department of Dragon Palace City without talent potential!

"Do you want to protect the sea very much?" Just as the Water Slime was struggling to join the Marine Environmental Protection Department, a voice suddenly came from the side. Shi Yu had descended at some point

in time. He came to the front and looked at the Water Slime as he asked.

At this moment, the Water Slime was immediately stunned when it saw the Ocean Minister of Environment.

"Hu! (Yes.)" Then, it emitted a firm voice. Its voice was like the firm vow of a young female knight, appearing in Shi Yu's mind.

"I'll give you a test. If you can complete it, I'll give you the ability of cleansing and give you the ability to break through the limits of your race. I'll let you fight on the front line of protecting the ocean and follow beside

me to protect the ocean. How about that?" Shi Yu revealed a sunny and warm smile.

The Water Slime was slightly stunned. It didn't expect that it could be appreciated by such a big shot with similar aspirations...

Test... It would definitely pass..

## **Chapter 278 Contracting the Water Slime**

The Cleansing Water Sprite King was very puzzled.

It and the creatures who could cleanse had already been fired up by Shi Yu's words. They couldn't wait to follow the environmental department of Dragon Palace City to cleanse the larger ocean.

However, why did Shi Yu turn around and leave with a water slime??

At this moment, the Cleansing Water Sprite King suddenly suspected what Shi Yu was doing.

"Cough."

Sensing a bunch of hot-blooded gazes, Shi Yu, who was about to pull the Water Slime to talk, suddenly stopped.

He turned around and looked at the Cleansing Water Sprite King and the group of water-element sprites. He touched his chin and pondered for a moment.

"Well..."

The marine environmental department still had to be built.

Shi Yu had already helped Ice Dragon plan its future position in Dragon Palace City.

As for whether this position had any future? What a joke. With the support of the Blue Sea Sprite, how could there be no future?

At that time, the Ice Dragon King would be the strongest competitor of the new generation of the Dragon God.

And now, the companions of these Blue Sea Sprite Reincarnations were the first batch of members of the environmental department of Dragon Palace City. They couldn't be mistreated!

Shi Yu took out three nutritional fruits from the ruins' space and threw them to the Cleansing Water Sprite King. "These are spiritual fruits that can increase the life potential, race potential, and evolution aptitude of transcendent life forms below the

monarch level."

"You're the only monarch on this island, so it should be useful to them. Take these three spiritual fruits as a reward and hold an island meeting. A huge battle just happened on the island, and now many places have been polluted. Let's compete on

who cleanses the most."

“Of course, the goal isn’t for everyone to work hard to protect the environment for the reward, but if you work hard, there will definitely be rewards. Our Sea Environmental Protection Department is still very humane!”

In the next moment, the tempting fragrance of the nutritional fruit spread. Whether it was transcendent or commander rank water elemental life forms that stayed on the scene, when they smelled it, their breathing instantly became rapid, and they

stared intently at the nutritional fruit!!

This was...

A spiritual fruit that increased evolution aptitude and life potential?

There was actually such a thing?

Living in such a polluted environment, this group of water elemental life forms had never seen such high-quality resources.

Even the Cleansing Water Sprite King, who had obtained the nutritional fruit, instantly swallowed its saliva when it sensed the aura of the nutritional fruit at a close distance.

After all, even the nutritional fruits created by Baby Ginseng before it evolved could attract the overlord, the gem cat. Although the gem cat was suspected of being a foodie and that it was custom-made, it was enough to show the charm of Baby

Ginseng’s nutritional fruits.

Moreover, these were created after the ginseng baby evolved and learned plant control. Many elemental life forms present, including the little slime beside them, were instantly attracted, and water elements flowed out of the corners of their mouths.

“I, can I participate?” the Cleansing Water Sprite King asked.

Shi Yu: “...No, but you can be the judge. You’ll be rewarded with a spiritual fruit.”

After Shi Yu finished speaking, the next moment, the water sprites that could cleanse all ran crazily to various parts of the island and started the cleansing competition. Seeing this, the Little Water Slime opened its mouth slightly, and the Cleansing

Water Sprite King also opened its mouth slightly.

Was this alright?

If they had been so hardworking in the past, the neighboring Sludge Island would have long been occupied by them.

At this moment, seeing that the good peaceful island had been swept up by Shi Yu, Eleven and Buggy covered their faces at the side.

This Ocean Environmental Protection Department was established by Shi Yu with the backing of Dragon Palace City and the Blue Sea Sprite. Why did they feel that the sea beasts that polluted the ocean in the end would become very miserable...

They could already imagine that in the future, those creatures that polluted the sea would become walking bounty lists!

At the moment, the Water Slime definitely didn't have the ability to assist Eleven in evolution. It looked like it had to be nurtured slowly again.

Shi Yu roughly looked at its data.

< Name > Water Slime

[Attributes]: Water

[Race Level]: Mid-level transcendent

[Level of Growth]: transcendent

Energy Points: 555

How should he put it? It was pitifully weak.

The skills were probably only multiplication and bubbles.

Not to mention the multiplication skill, but Bubbles, a low-level water-element skill, was also very useless.

It was just to slowly spit out a water bubble, and then the water bubble would explode when it touched the enemy. It was that simple.

It wasn't as useful as the water-element basic skill, the Water Spear.

The water spear shot out with a whoosh, and the bubble skill had to fly slowly.

The only advantage was that after the proficiency was high, it could still be used as a control skill to restrain the enemy.

In short, the Water Slime was very lousy now. Even if it was the reincarnation of the Blue Sea Sprite, apart from its extremely high willpower, there was nothing special about it. Perhaps it was even a little smarter than other Slimes.

At this moment, the Water Slime walked with Shi Yu, wanting to see what test the minister had given it.

Shi Yu walked in front with his hands behind his back. He said earnestly, "I acknowledge your determination, but determination and hard work alone aren't enough."

The Water Slime listened silently and couldn't refute.

"My test is very simple. I heard about you from the Cleansing Water Sprite King, so I acknowledge your determination and will."

"But just like I said, if you want to achieve a goal, determination and hard work alone aren't enough!"

“Therefore, the first thing I want to test is your wisdom. I want to test if you understand how to be flexible and change your mind.”

Wisdom?

The Water Slime was nervous.

“What do you think you need most to achieve your dream, apart from determination?”

“Hu? (Cleansing ability and strength?)” The slime answered carefully, afraid that it would answer wrong.

“Change your voice. This “hu” is silly and not very smart.”

Slime: “2”

“Wu?” The slime said.

“I’m tired of listening to that. Change again.”

Eleven, who was watching Shi Yu deceive the ignorant girl: ??

Their feelings had faded, so there was no love.

“Coo?” the slime said.

Shi Yu said, “It sounds like it’s easy to get beaten up. Do you have any vitality?”

Water Slime: “Ning!”

“Sure, that’s it. Back to the topic. You’re right.”

“To achieve a dream, the most important thing is ability and strength, not determination.”

“Your hard work and will shouldn’t only be used to cleanse the ocean, but also to increase your strength.”

“This isn’t for you to give up on your dreams, but because only with strength can you better protect the ocean. Do you agree with this?”

Shi Yu asked, causing the Little Slime to fall silent.

“With your current strength and ability, what can you do for your dream?”

“You should feel it yourself.”

“Even if you fight with all your might against those Sludge Monsters that pollute the environment, you can only end up on the verge of death.”

“On the other hand, the powerful Cleansing Water Sprite King can not only easily expel many Sludge Monsters, but it can also protect a weak little guy like you. The reason why it can achieve all of this is not because of its faith, but because of its

strength.”

“So, what do you think you should do now?”

“Ning! (Change of train of thought, work hard to increase strength first.)”

The Water Slime was still smart. As expected of the Sea Sprite Reincarnation Body, it was different from those low-level elemental monsters with low intelligence.

“That’s right! Improving your strength is the most important thing for you to achieve your dream now.”

“When you increase your strength to the totem level, you can cleanse the ocean however you want. No one can control you. The efficiency will still be very high, unlike now, where you struggle between life and death every time.”

“Therefore, before you become a totem level, let’s put aside the matter of cleansing the sea for now and focus on increasing your strength!”

The Slime nodded and felt that it made sense. It mainly felt that Shi Yu, the minister of the Ministry of Environment, wouldn’t lie to it.

After all, everyone had the same dream.

“Alright, the wisdom test has passed. Next, we’ll continue the next test.”

The Water Slime revealed a happy expression.

“Then what do you think is the fastest way to increase your strength?”

The Little Slime fell into deep thought.

It was a Slime... It didn’t know how to quickly increase its strength.

It couldn’t help but look at Shi Yu eagerly.

n

Shi Yu said, “Actually, your insistence on joining the Environmental Protection Department of Dragon Palace City is a very good choice. A choice that can increase your strength.”

“The strength of an individual is ultimately small. When it’s weak, it can only grow better by relying on a stronger group. For example, if you didn’t have the protection of the Cleansing Water Sprite King, it would definitely be very difficult for you

to grow to this level.”

“Look, those water-element sprites who can cleanse have joined the Environmental Protection Department. Now, not only can they cleanse the environment and complete their dreams, but if their cleansing is not bad, they also have a chance to obtain

treasures to increase their strength. This is the advantage of sucking up to others. No, I mean, joining the group!”

“Therefore, compared to working hard yourself and knowing how to exchange your hard work and talent for other people’s investment, it’s also very important.”

The Water Slime felt that it understood a little.

“However, if you want to win the investment, you have to show the value you deserve. Although you’ve figured out that you should work hard to increase your strength now, it’s not up to you to determine whether your determination is there or not.”

“Ning...” The Little Slime looked at Shi Yu firmly.

It was determined... It was just that its strength was a little weak and its race was a little inferior. In that case, could it obtain Shi Yu’s recognition?

It wanted to follow Shi Yu and increase its strength and abilities. For this, it was willing to pay any price!

“Looks like you’ve thought it through.”

Shi Yu was gratified.

“Do you know why I pay special attention to you?”

The slime shook its head.

“Because you have a very strong will. This is your talent, your shining point.”

“However, it’s very difficult to stimulate this determination and potential.”

“And I happen to have the ability to transform this will into power.”

“Are you willing to undergo the last test?”

“I admire your determination. Therefore, I’m willing to pay a huge price to bet on you. If it succeeds, you will have the power to change everything. In the future, I’ll even be proud of you. This minister of the Ocean Environmental Protection

Department can also be given to you, but if you don’t have the corresponding determination, both of us will have heavy consequences.”

Shi Yu revealed a serious expression.

“Ning!!” The Water Slime was unexpectedly determined and answered without hesitation.

It was willing to follow Shi Yu and had enough faith.

At this moment, Eleven and Buggy looked at each other.

It looked like the overlord’s will had nothing to do with intelligence... This blue jelly didn’t look very smart.

In a few words, Shi Yu baited it.

“Very good!”

Shi Yu smiled and stretched out his hand. A light blue halo appeared in his palm.

He said, “Come up first. This is a contract. After you sign a contract with me, even if the last test fails, you won’t be in too much danger.”

The Water Slime directly leaped onto Shi Yu’s palm, and Shi Yu instantly activated the contract.

He

However, during this process, as the cold Water Slime jumped into his hand, Shi Yu couldn't help but pinch it.

'Ning.' So soft, so cold, so springy.

Shi Yu's knead immediately made the Water Slime show a shy and angry expression.

"This is the necessary process of the contract..."

n

Shi Yu couldn't help but pinch it again.

A multiplied slime pillow and bed felt much more comfortable than the panda pillow.

Soon, the Water Slime turned into various shapes in Shi Yu's hand like rubber mud.

At the same time, the Water Slime also puffed up its face and accepted the contract.

After accepting the contract, the Water Slime instantly felt that its connection with Shi Yu had deepened.

With this connection, the water slime immediately felt that something was wrong.

It widened its eyes and looked at Shi Yu. It suddenly panicked.

It was said that Beast Tamers and pets would affect each other through contracts, making Beast Tamers more and more like pets, making pets more and more like Beast Tamers. Therefore, those Beast Tamers who contracted relatively ferocious pets

would have more and more irritable personalities. Of course, if Beast Tamers were stronger, the ones affected would be their pets.

At this moment, what made the Water Slime feel bad was that it suddenly realized that it seemed to have been tricked.

After contracting with Shi Yu, it kept feeling that an indescribable power was corroding its pure and firm heart.

The Water Slime was very panicked. It felt that Shi Yu, who seemed like a good person just now, had become a great demon king.

In addition, Shi Yu was still pinching and rubbing its body with both hands. This made the water slime even more panicked.

"Don't be afraid."

"This is also my test for you. Your heart is still a little shaken, so you have to undergo tempering often. If you can't even ignore this little impact, how can you become the guardian of the sea in the future?" Shi Yu said seriously.

Water Slime: !!!

“Ning!”

So that was the case.

It had wronged Shi Yu.

Shi Yu had spent too much effort to nurture it.

However, could he stop rubbing it...

“Alright!” Shi Yu hugged the Slime. The combination of red and blue was very unique. He smiled and brought the Slime into the ruins’ space. Then, he gathered everyone together.

In the ruins space.

Baby Ginseng could finally appear.

At this moment, Shi Yu also exited his possession form and placed the slime on the stone table.

“Wau!”

“Wu =”

“yi a”

“Mil!”

The four saintly beasts surrounded the little slime and looked at it with extreme curiosity.

This little guy was the Blue Sea Sprite Reincarnation Body. Did it have the will of an overlord?

It was too unbelievable, too unimaginable.

“Ning...” At this moment, being stared at by a group of big shots, even if it had the will of an overlord, the slime was still very nervous.

However, due to the contract with Shi Yu, it could also feel that Eleven and the other pets had no ill intentions towards it.

“This is Eleven, and his race is the Panda King.”

“Wuu.”

“This is Buggy, and the race is butterfly.”

“Wu =”

“This is Chi Tong. His race is a heroic spirit, and his current form is a sword spirit.”

“Mi ~”

“This is a ginseng baby, the race is a ginseng baby.”

non

After entering the ruins space, Shi Yu introduced his companions in the team to the slime one by one. At the same time, he said, "For the next period of time, you guys will be companions who become stronger and help each other."

"Ning!" The Slimes turned around and greeted everyone.

"Yi!" Baby Ginseng corrected. It wasn't a ginseng baby, but an Undying Ginseng.

"So, are you ready next? The last test."

"If you can pass, you can learn the super skill Infinite Devour. You can open up the devouring space in your body and rely on devouring and digesting everything to increase your race level and complete endless evolution."

"At that time, as you evolve infinitely, your strength will also become stronger and stronger. You will also be able to obtain more cleansing abilities."

After Shi Yu finished speaking, the Water Slime revealed a happy expression again.

Infinite evolution?!

It sounded very strong.

"Wuu!" "Wu!" "Yi!" "Mi!" The Water Slime had just finished rejoicing when it suddenly discovered that the four pets surrounding it covered their mouths and looked at it with envy with tears in their eyes.

After a long time, the first pet that could be taught super skills was a newcomer. This was too exciting.

Fortunately, Fifth Sister was a big boss. When they thought about how they still had to rely on Fifth Sister to treat any unsolvable poison in the future, Eleven and the others were relieved.

Water Slime:???

"For safety's sake, Chi Tong, possession, Baby Ginseng, get ready."

After Shi Yu finished speaking, Chi Tong entered Shi Yu's body again and let Shi Yu enter a possession state.

Although the skill index could always accurately extract strength from Shi Yu's body and Chi Tong couldn't share the consumption, it was also good to have more recovery abilities under the possession state.

As for Baby Ginseng, it also took out a basket of nutritional fruits and prepared to give Shi Yu emergency treatment.

This was the first time he had added points for a super skill.

No one knew how big the risk was.

"Are you ready?" At this moment, seeing that Shi Yu and the others were so serious, the Water Slime swallowed its saliva and nodded.

"Come here." Shi Yu stretched out his hands.

Slime:???

Pinch?

At the same time.

Skill: Infinite Devour

Status: Can be taught

[Teaching success rate]: High

[Teaching Risk]: Low

[Note]: The teaching of super skills will not only consume the Beast Tamer's physical fitness and energy, but also the Beast Tamer's life force. It's extremely dangerous.

[Note]: Pets have to have a firm willpower to absorb the experience of super skills. If their conditions don't meet the requirements. There's a risk of becoming a slave of strength and losing your mind, causing the teaching to fail!

Shi Yu judged that the teaching success rate should still have a category of "extremely high" and 100%.

As for the teaching risk, there should still be an extremely low and almost zero.

However, that was too rare. Shi Yu did not pursue it for the time being.

"Come on." Shi Yu stared at the Slime at this moment, his hands filling with a dark blue halo.

As soon as this halo spread, it immediately triggered the rich water element and spatial power. The light emitted a deep sensation.

"Ning..." Seeing this, the Water Slime's gaze shone, and it was immediately attracted by the light in Shi Yu's hand.

However, when it thought of what Shi Yu had said, that this process tested its will and determination, it instantly focused all its attention and moved towards Shi Yu's hands.

A moment later, the Water Slime jumped onto Shi Yu's hands again.

"Teach."

Right on the heels of that, Shi Yu muttered. In the next moment, the inheritance power that represented infinite devour instantly flowed from Shi Yu's hands to the Water Slime he was holding!

Unlike teaching low-level, mid-level, and high-level skills, the flow of super skills' teaching light was very slow. However, every second that it flowed, Shi Yu felt a huge amount of physical strength and life force being extracted, and his condition

plummeted.

He was extremely tired.

Extremely tired.

His body entered an unprecedented weakened state.

His vision began to decrease, his hearing began to decrease, his memory began to decline, his skin became dull, his reaction to temperature changes became weaker, and his body became stiff... Slowly, as the nutrition in his body was extracted, Shi

Yu's skin began to contract. A wrinkle that shouldn't have appeared appeared everywhere in Shi Yu's body. He started to change from a young and energetic image to an old state.

"What the f\*\*k?"

This change made Shi Yu curse in his heart.

Did it have to be so ruthless?

This stupid talent, what was it thinking?

Couldn't it just let him nurture totems casually? Couldn't it??

At that time, if he broke through, it could also level up. It's a win-win for everyone. Isn't that good?

"I... am... dead..." Shi Yu felt like he was going to die.

Seeing this, Eleven and the others were shocked.

Baby Ginseng also swallowed its saliva crazily, knowing that this was a sign that his life force had been extracted.

"yill!"

Fortunately, this was the unnatural loss of life. It could be replenished with life-type resources the day after tomorrow.

Although the price of life-type resources was a very expensive resource, it just so happened that it could be manufactured.

In addition, Shi Yu's life level was not very high. At the moment, he was only a master-level Beast Tamer. The nutritional supplements it made were still useful to Shi Yu.

"Mi..."

A moment later, due to the drastic decrease in Shi Yu's bodily functions, his body became extremely weak. His possession was directly interrupted, and Little Chi Tong was forced to separate from Shi Yu. He was ejected from midair and looked at

Shi Yu helplessly as his black hair gradually turned gray.

[It can't be interrupted yet.]

The consumption of super skill teaching exceeded Shi Yu's imagination. At this moment, as the burden on his body became greater and greater, Shi Yu even felt that breathing had become difficult. However, at this point, he was definitely unwilling

to give up halfway. As long as his body didn't reach its limit, he would continue to persist.

Water Slime perspective.

At this moment, the Water Slime was also extremely shocked.

As the halo flowed into its body, its physical fitness and upper limit of energy suddenly began to increase. Its body seemed to be undergoing an unimaginable transformation.

Under the inner vision of the Water Slime, a huge island-sized space was opening in its body.

However, this process was also extremely painful for the Water Slime. The transformation process of its body was as if it had undergone countless inhumane training. Its body had been destroyed and squeezed to the extreme countless times before

sublimating and rebirth.

At the same time, in the confusion, the Water Slime also felt that it had obtained countless skill experience. The influx of this skill experience made its mind, will, and spirit suffer a huge test and destruction.

It was like locking a middle school student in a small black room and giving him a “Foreign Language Dictionary” to memorize it day and night for a few years. During this period, he could only do the same thing. It would completely drive a normal

life form crazy. Even if the Water Slime had high-level willpower, it was still on the verge of a mental breakdown.

“Ning...” Soon, the Water Slime showed signs of not being able to hold on anymore. However, perhaps because it had activated the overlord’s will, under the border of mental collapse, its endless potential seemed to have been dug out. Its mental

strength, mental will, and soul power instantly underwent a qualitative change because of its willpower, and its growth level suddenly increased to commander rank.

At the same time, its willpower seemed to have its own cleansing effect, washing away the thought of giving up, making the Water Slime continue to persist on the edge of a mental breakdown.

Whoosh!

After a long time, the distorted Water Slime directly turned into an unstable water element. Then, the water emitted a faint deterrence.

[Teaching success]

In a moment, the Water Slime felt like it had been reborn.

Success?

It panted and opened its eyes.

After a moment of confusion, it was overjoyed.

Success!

“Ning!”

It was just about to tell Shi Yu happily that it had persevered and survived. It had learned Infinite Devour, but it suddenly realized that Shi Yu opposite it was already weak and thin.

With gray hair, he no longer looked like a young man, but like an old man. Although he was still handsome, his mentality had become much weaker.

Shi Yu was already so tired that he couldn't open his eyes. However, he also knew that the teaching had succeeded. This result couldn't help but make Shi Yu extremely excited, and his mouth couldn't help but overflow with a smile.

This change stunned the Water Slime on the spot. As Shi Yu's pet, it could clearly sense Shi Yu's state and know how serious his consumption was.

Initially, the Water Slime didn't know what Shi Yu meant by paying a huge price, but now, seeing Shi Yu become like this, the Water Slime immediately became nervous.

“Ning...” It called Shi Yu softly, its eyes tearing up.

“Yi...” At this moment, Baby Ginseng also started to work quickly nervously. It directly held a nutritional fruit in each hand and used the plant control to break their nutritional content into green nutritional fluid that dripped into Shi Yu's mouth.

However, the effect was very small, and the recovery effect was limited.

“Wuu!!” “Wu!!!” “Mill!”

Under the urging of Eleven, Buggy, and Chi Tong, Baby Ginseng directly used its clone skill to transform its clone into a Fruit of Life and jumped into Shi Yu's mouth to turn into Vitality Fluid.

If this still didn't work, it could only jump into Shi Yu's mouth itself and revive with the time mark skill.

Fortunately, the full-level clone of Baby Ginseng's source of life super skill was still useful. As the top-notch life supplement, it continuously jumped into Shi Yu's mouth and turned into the life clone of the Vitality Serum. Soon, Shi Yu's body glowed

with life again.

Then, Baby Ginseng even ate a Time Fruit and temporarily became a monarch, creating a higher-level life clone.

After that, Shi Yu's skin began to become full again.

His physical functions began to recover steadily in various aspects.

Soon, Shi Yu's tired eyes slowly opened, but he still felt that his body didn't belong to him. He was as tired as a dog.

This state made him feel like he had returned to the side effects of teaching high-level skills when he was still a Beast Tamer intern...

No, it was even more serious than that. Super skills were simply not taught by humans!

He swore that unless he was a top-notch master, he definitely wouldn't touch super skills.

"I'm dead... Baby Ginseng, heal me..." Shi Yu said weakly.

"Yi! (I'm dead too.)" Baby Ginseng took root and absorbed the light as it tried to continue condensing its life avatar.

"Wuu!!" "Wu!!!" "Mill!"

At the side, Eleven, Buggy, and Chi Tong tried their best to cheer for Shi Yu and Baby Ginseng.

Try harder.

The Water Slime watched eagerly and was a little confused. It looked at Shi Yu, who was constantly recovering, nervously, afraid that Shi Yu wouldn't be able to recover.

After all, Shi Yu had become like this to help it.

If there was still a little doubt previously, then now, the Water Slime had completely acknowledged Shi Yu and thought that he was a good person.

"Ning..." It also started to cheer for Baby Ginseng and Shi Yu.

About ten minutes later, Shi Yu calmed down a little.

However, even if its life force was replenished, it couldn't easily restore it to its original state. After Baby Ginseng felt that its life essence couldn't be digested by Shi Yu anymore, Shi Yu was still very weak, and his hair was still gray.

Shi Yu glanced at the skill index.

Skill: Infinite Devour

Status: Cannot be taught

Cooldown Time: 30 days

Shi Yu: "Son of a b\*tch..."

Seeing this, Shi Yu knew that Baby Ginseng had already tried its best. After all, it was still holding back from evolving and its potential had yet to be completely unearthed.

"It's enough." Shi Yu made Baby Ginseng stop for a moment. At the same time, he slowly stood up and said, "Your Life Clone's level is too low. It can't replenish vitality."

Ginseng Baby: QAQ?

Human language? To think it worked so hard.

"Yi..."

Baby Ginseng suggested that it directly break through to the monarch level.

This could definitely restore Shi Yu perfectly.

“No, I’ve already recovered my mobility. I’ll wait for natural recovery.” Shi Yu said. “Your level still has to be stuck.”

Even if the success rate was high, it was still so difficult to teach. They couldn’t stop training their willpower!

At the same time, he couldn’t stop increasing his level!

Although he was a little tired and a little weak, he could indeed move freely now. As long as he didn’t fight intensely, it shouldn’t be a problem.

After telling Eleven, Buggy, Baby Ginseng, and Chi Tong not to worry, Shi Yu smiled at the Water Slime.

Water Slime : (+\_+)?

“Congratulations on passing the test. From now on, you’re the great Slime Demon King who can devour everything.”

“Yes, you’re a little small, but it’s not a big problem. You have multiplication.”

“The bigger the slime, the stronger the great demon king.”

Water Slime: (.@°V”@)

“Ning! Ning!” The Slime nodded heavily. It, who had learned Infinite Devour, had already sensed the power of this skill!

< Name > Water Slime

[Attributes]: Water

[Race Level]: Mid-level transcendent

[Level of Growth]: Commander Level

[Race Skill]: Multiplication (Proficient), Bubbles (Expert)

[Professor Skill]: Infinite Devour (Initiate), Deterrence (Initiate)

Energy Points: 30333

Very good!

After contracting with Shi Yu and learning devour, the strength of the Water Slime underwent a tremendous change.

Although there was a huge difference from Eleven and the others when they were commander rank, don’t forget that it was still a Slime.

“Apart from awakening deterrence with your will, you should have also awakened your racial ability elementalization, right?” Shi Yu asked the water slime.

Elementalization was not a skill, just like how birds could fly and fish could swim. It was the universal racial ability of elemental life forms, but it required awakening.

After awakening, the body could split into corresponding elements and be immune to purely physical attacks.

“Ning!!!” The Water Slime nodded. In the next moment, its body split into several water balls, and then it split into water droplets that floated in midair.

Right on the heels of that, the water droplets condensed. The Water Slime relied on its elementalization ability to transform into the appearance of Eleven, Buggy, Baby Ginseng, and Shi Yu one after another. Although its entire body was still made

up of water elements, it still looked pretty decent. In the end, it returned to the form of the Water Slime.

Being able to change various forms through elementalization was the greatest characteristic of elemental life.

“Not bad.”

“Then, let’s try the ability of Infinite Devour,” Shi Yu said with a smile.

He couldn’t wait to see the results of his teaching.

“Ning!” The Water Slime immediately nodded.

“Just swallow that.”

Shi Yu looked at the box of nutritional fruits Baby Ginseng took out.

The level of these fruits was too low. Before it finished using them just now, Baby Ginseng directly went to using its clone.

This was also the kind Shi Yu gave the Cleansing Water Sprite King and the others. It could increase the evolution potential and life potential of pets below the monarch level.

Since Infinite Devour could increase the race level by devouring everything, theoretically speaking, this should be the most efficient devouring these to increase the race level.

“Go.” Shi Yu pointed at the remaining ten nutritional fruits in the box.

“Ning!!!” Under Shi Yu’s command, the Water Slime immediately turned into water elements and leaped up, pouncing at the nutritional fruit.

Seeing this scene, Eleven, Buggy, and Chi Tong looked at Baby Ginseng.

Who else couldn’t fly!

Baby Ginseng:??

Damn it!

It directly condensed a pair of Leaf Wings through plant control and flew up. Then, it looked fiercely at Eleven and the others.

However, no one was looking at it anymore. Their gazes were all attracted by the water slime.

“Ning!” On the other side, the Water Slime had already multiplied and combined with the elementalization to become a huge water screen. In one go, it swallowed the ten nutritional fruits and wooden boxes into the digestive space in its body.

It didn’t have to worry about the food being too high-level to digest.

It could store things temporarily in the space opened up in the body infinitely. It didn’t have to be digested instantly.

Of course, if the Water Slime wanted to quickly digest the nutritional fruits, it wasn’t impossible.

At least, it didn’t feel any pressure if it wanted to devour and digest resources of the same level.

Because it was also a commander rank, it happened to correspond to a fourth-level resource. In addition, the Nutrition Fruit was a high-quality resource that specialized in increasing its life potential. The side effects were extremely low, so it digested

this very quickly.

## **Chapter 279 I’ll Protect This Island**

Shi Yu raised the Water Slime and stared at its blue body as he pondered slightly.

“Ning? (Name?)”

At the side, Eleven, Buggy, Baby Ginseng, and Chi Tong also looked over.

It was time for the exciting naming segment again.

“What do you guys have in mind?”

Shi Yu asked everyone.

“A more casual and cute nickname.”

“Wuu! (Call it 15!)”

Eleven was the first to speak.

“No, it’s too casual.”

Shi Yu retorted.

Eleven:???

So its name was not casual?!

Although it had indeed been called Eleven since it was born...

The panda hammered the table with both fists, very unhappy.

“Wu ~ (Call it Watery.)”

Buggy suggested.

“Yi! (It should be called Water Baby.)”

Baby Ginseng also suggested.

“Wal” “Vil”

Then, Buggy and Baby Ginseng argued non-stop.

“Mi...”

Chi Tong was conflicted. What was going on?

The Water Slime was also very silent when it heard this.

It felt that calling it a water slime seemed pretty good.

“If you want to recite it smoothly, you definitely have to stack the words,” Shi Yu analyzed.

Buggy and Baby Ginseng were overjoyed.

Was Shi Yu going to accept their suggestion?

However, clearly not.

Shi Yu stared at the Water Slime and planned to act freely.

“Since your whole body is made of water elements...”

“Then I’ll call you Susu. The name is Susu.”

“Just nice, vegetarian. It also has the meaning of original, primordial, and true colors. It can also represent your dream to let everything that has been polluted return to its original color.”

“Huh?” The Water Slime was stunned.

Susu...

The Water Slime read it out loud and nodded happily.

It indeed sounded a little more reliable than Watery. This was it.

“Then, Susu.”

Shi Yu grinned.

At this moment, Eleven, Buggy, and Baby Ginseng were comparing this name to their own. Which was better?

After comparing, they gave up.

Shi Yu was bad at names...

Qishui Island.

After a period of time, the Cleansing Water Sprite King's cleansing competition ended.

The champion and runner-up were each won by a commander rank Cleansing Water Sprite.

The Water Elemental Sprite, the Cleansing Water Sprite, and the Cleansing Water Sprite King were all water elemental creatures. There was also a certain evolution chain between them.

Among them, the Cleansing Water Sprite was a water-element creature that led races and mastered the cleansing ability. It was very normal for them to snatch the crown.

Not long after the Cleansing Competition ended, Shi Yu's figure appeared on the island again.

At the same time, Susu, Chi Tong, Eleven, Buggy, and Baby Ginseng followed beside Shi Yu.

As usual, he had favoritism toward new pets, so Shi Yu left the most conspicuous spot for Susu.

Although Susu didn't want to be carried either... Shi Yu hadn't squeezed enough.

"Infinite devour can only evolve around 'water'..."

"I wonder what will happen if you swallow more seawater."

After coming out, Shi Yu looked at the blue sky and the sea.

Before coming out, Shi Yu and the others tried to let Susu devour something.

Then, he realized that Susu couldn't evolve other attributes and awaken racial skills of other attributes.

It could only awaken racial skills related to "water".

It was unknown if it was the skill effect restriction or the proficiency restriction.

For example, if they let Susu devour ice-element energy crystals, Susu could only awaken the "freeze water" skill!

Or for example, if they let Susu devour fire-element energy crystals, Susu could only awaken the "Boil Water" skill!

For example, the Sea Dragon King Phantom that Buggy created... They let Susu devour it and could only awaken the high-level water-element skill "Water Dragon Tornado"!

Even the "poison resistance" and "lightning resistance" were established under the purification ability of water and the insulation ability of pure water.

As for powerful resources like the "Fruit of Time", it was unknown if it couldn't be digested by infinite devour or if the compatibility was insufficient. In short, no skills could be converted. This was very annoying.

< Name > Mutated Water Slime

Attributes]: Water

Race Level]: Low-level Monarch

Level of Growth]: Commander Level

Race Skill]:

Low-level: Bubble (Expert), Lightning Resistance (Initiate), Poison Resistance (Initiate)

Intermediate: Water Regeneration (Initiate), Boil Water (Initiate), Freeze Water (Initiate), Cleanse (Initiate)

Advanced: Water Dragon Tornado (Initiate), Multiplication (Proficient)

Super level: Water Elemental Control (Initiate)

[Taught Skill]:

Advanced: Deterrence (Initiate)

Super level: Infinite Devour (Initiate)

Energy Points: 33,113

Now, after coming out of the ruins space, Susu had already been reborn.

Apart from the Cleansing Water Sprite King, probably no native on this island was stronger.

However, although its abilities looked complicated, it was actually not complicated.

Because apart from deterrence and infinite devouring, the effect of all the low, intermediate, and high-level racial skills of Susu were basically covered by the control of the water element.

To put it bluntly, its current ability was to control water.

Water Element Control was the high-level skill of these skills.

Even without those skills, through the control of the water element, Susu could reduce the water temperature to freezing water and raise it to boiling water.

It could also purify the water and achieve the effect of resisting lightning.

It could also control the water and repair its body.

However, this kind of skill separation was actually pretty good. Compared to super skills, Shi Yu could easily add points to low-level skills and let it form battle power as soon as possible.

Although the control of the water element was stronger, apart from these abilities, it could also pray for rain, create water bodies, and transform into various low-level water-element skills. However, it was too difficult to add points, so it seemed boring.

However, although it was difficult to add points, Shi Yu would definitely level them up as soon as he recovered.

After all, when Susu was cultivated to the overlord level, it could receive the inheritance of the Blue Sea Ruins and evolve into a quasi-mythical Blue Sea Sprite.

This was the final goal!

And adding some super racial skills was the most perfect way to let it reach the overlord level.

“Infinite Devour is not a racial skill after all. It can’t lead to an increase in growth level. It’s better to wait until super skills are less draining before adding it.”

“Let’s focus on the super racial skill ‘Water Element Control’ first!”

At the moment, the entry-level Infinite Devour should have reached the limit by raising Susu’s racial level to the monarch race.

If he wanted to increase its level, it had to devour higher-level resources.

The control of the water element was due to Susu’s own elemental race and the ten nutritional evolution fruits. But now, after reaching the monarch race, it was already very difficult for resources of the same level to

increase Susu’s race level. It was impossible to rely on ordinary resources to increase it to an overlord race.

However, even if Shi Yu and the others obtained high-level resources, with Susu’s current growth level and unlimited devouring proficiency, she probably couldn’t digest and transform them.

However, even if Shi Yu and the others obtained high-level resources, with Susu’s current growth level and infinite devour proficiency, it probably couldn’t digest and transform them.

However, it was not impossible to increase its race level in advance and without having to add points to Infinite Devour.

If he could find high-quality and low-level resources like the Sea Serpent’s Dragon Ball, there was still a chance. However, Shi Yu didn’t have such resources in his hands now. He didn’t know if Dragon Palace City had

them...

Therefore, it was time to return to Dragon Palace City quickly.

“Mil!”

After Shi Yu and the others came out, the Cleansing Water Sprite King came immediately.

However, after coming over, the Cleansing Water Sprite King looked at Shi Yu, who was holding the Water Slime, and was immediately stunned.

It wasn’t because Shi Yu was carrying the Water Slime.

It was because Shi Yu’s hair was completely gray. He looked like a different person from before.

“It’s alright, it’s alright,” Shi Yu said.

The Cleansing Water Sprite King wanted to say something but hesitated. It looked at Susu again.

Apart from Shi Yu's change, it also sensed that the water slime's change was abnormally big.

"...(You...)" It looked at Susu in confusion.

"Ning... (I'm just a water slime, I don't know how to explain it either)," Susu said.

The Cleansing Water Sprite King : "..."

"Its talent is not bad. Next, it'll follow beside me to train!" Shi Yu rubbed it.

"Ning!" Susu struggled with all its might, indicating that this was all to become stronger.

The Cleansing Water Sprite King was silent.

Ah.

It immediately felt that the fruit Ginseng Baby gave it wasn't so good anymore.

Therefore, the Water Slime... now had Shi Yu as a backer?

Clearly... it was the strongest cleansing sprite on the island...

Why... Why did Shi Yu favor the Water Slime so much...

It, the Cleansing Water Sprite King, also wanted to be the deputy minister of the environmental department!

The thought of the Water Slime eating nutritional fruits every day pained the Water Sprite King.

"How's the competition?" Shi Yu asked.

"Zhu!! (The Purification Competition has ended...)"

"Then you should distribute the rewards according to the results."

"Well... By the way, do you know... the direction of Dragon Palace City?"

The Cleansing Water Sprite King:??

Susu: "2"

Weren't they from Dragon Palace City?

"Mil!"

Although it felt that something was wrong, the Cleansing Water Sprite King shook its head. It was really not very sure. It only knew that Dragon Palace City was in the deep sea.

"Sigh!" Shi Yu sighed. It was really useless.

As expected, he couldn't give the position to him.

It looked like he still had to take a look at the Blue Sea Ruins first.

This time, there was the Sea Sprite Reincarnation. Perhaps the Blue Sea Ruins was willing to open the door.

If it still didn't work, he could only go to other islands to ask for information.

If he really couldn't, there seemed to be pirates nearby...

"Then let's go," Shi Yu said to Buggy. At the same time, he said to the Cleansing Water Sprite King, "We'll return to Dragon Palace City first. If nothing goes wrong, we should still come. During this period, you just

have to stay on the island."

"Or do you want to go with me?"

If they left together, Shi Yu could store the Cleansing Water Sprite King and the others in the ruins space.

"Mil!"

The Cleansing Water Sprite King shook its head.

At all times, there were water sprites who escaped to Qishui Island to seek protection. If they left, the Rainbow Islands would not have any pure lands anymore.

"Alright... How about this? Before we leave, I'll leave you a sea calming rod to protect Qishui Island!"

Thinking that it was very easy for Qishui Island to be coveted, Shi Yu decided to let Eleven and Buggy create a weapon wrapped in deterrence and lightning to stay here.

## Chapter 280 Returning to Dragon Palace City

Poison Fang Island.

That island with the sea ruins.

Shi Yu and the others used the Lightning Rod, Hardening, Deterrence, and Illusory Phantom to leave behind a Sea Calming Rod with the awareness of friend and foe on Qishui Island before leaving.

This Sea Calming Rod was created with Eleven's strength as the core. It was easy to intimidate monarch-level sea beasts with more than 1 million energy points.

With this to protect Qishui Island, if another enemy like the Sludge Dragon came, the Cleansing Water Sprite King could easily crush it with the help of the Sea Calming Rod.

"Ning..." This was the first time the Water Slime Susu had left Qishui Island.

As Shi Yu rode the "flying bed" conjured by Buggy to Poison Fang Island, its obsessive-compulsive disorder immediately acted up.

This place was too dirty!!! It needed to be cleansed!!!

"Next time, next time!"

Shi Yu persuaded Susu. There was something urgent at the moment.

He pulled the angry and reluctant Susu and finally returned to the Blue Sea Ruins.

“Ning?”

The Blue Sea Ruins was still very special. Seeing that there was actually such a clean building on this polluted island, Susu was stunned.

In an instant, huge Blue Sea Ruins filled his vision.

It didn't know why, but when it saw this huge water cube, it felt an indescribable sense of closeness.

“Ning...” It asked Shi Yu what this was.

“Well...”

“This is called the Blue Sea Ruins. It was built by a great existence called the Blue Sea Sprite.” “Ning?? (Blue Sea Sprite??)” Susu kept feeling that it had heard of it somewhere.

After recalling it, it was immediately stunned. This was because back in the ruins space, Shi Yu had said that after it reached the overlord level, it could evolve into the Blue Sea Sprite...

“The Blue Sea Sprite is a water-element creature born in the ocean because countless sea creatures want to have a clean home.”

“In a sense, the Sea Sprite is the guardian of the sea, the cleaner of the sea.”

“For example, it has mastered the strongest cleansing skill, the Spirit of Sea Cleansing.”

“This ability can cleanse and wash away all filth. Even the ‘evil thoughts’ that exist in the heart of a life can be completely converted into ‘good thoughts’.”

“In the past, there were many monsters tens of thousands of times stronger than the Sludge Monster who wanted to pollute the sea. However, in the end, they didn't succeed. Instead, under the purification of the Sea Sprite, they washed away their ambition and became the guardians of the sea.”

Shi Yu explained the background of the Blue Sea Sprite to it.

Susu was stunned.

It was already pretty impressive that Shi Yu had those water sprites try their best to cleanse the sea. That Blue Sea Sprite could actually let the Sludge Monster protect the environment?

“Yeah, it's even said that the ‘self-cleaning ability’ of the ocean was given to the sea by the sea sprite through this skill.”

“Apart from that, it also mastered the strongest water-type skill, the Blue Sea Contract.”

“With this skill, no matter where it is, even if it's land or sky, it can communicate with the sea at any time because it has already signed a contract with the sea. Its body is connected to the entire sea. It can mobilize the power of the sea at any time. This is the top-level skill to control the power of nature.” According to Shi Yu's understanding, the Blue Sea Sprite only had two super racial skills.

The Spirit of Sea Cleansing and the Blue Sea Contract.

However, even if it only had these two skills, because these two skills were too heaven-defying, its strength and potential were rarely comparable to creatures.

There was no need to talk about the Spirit of the Sea Cleansing. It was the basic skill of the Blue Sea Sprite to become the cleanser of the sea. In essence, it used the power of the entire sea to cleanse everything, and it also involved the use of natural power. As for the Blue Sea Contract, it was the source of the strength of the Blue Sea Sprite.

It could sign a contract with the sea, and its body was connected to the sea. What kind of concept was this?

It meant that it almost had endless energy. As long as the sea didn't dry up, its energy was endless. This was also why the Blue Sea Sprite could make even half-gods submit to it.

It could be said that because of the existence of the Blue Sea Contract, the Sea Sprites was the race that could mobilize the power of the sea the easiest..

After learning the Blue Sea Contract, an ordinary water spear could use the effect of a tsunami.

Its cleansing power became extremely powerful because of this.

"Ning..." Susu's eyes immediately lit up.

So strong!

"However, because it has been cleansing those negative powers, its own consumption is also very serious. It can only obtain new life through continuous reincarnation."

"In the Blue Sea Ruins, the incomparable purification power and Inner Sea Contract of the Inner Sea Sprite are stored. Only the reincarnation of the Inner Sea Sprite can inherit it."

"Ning!!"

Upon hearing that the Blue Sea Sprite was actually so great and powerful, Susu immediately felt respect.

Idol!

"Oh?" Shi Yu smiled at Susu.

Susu immediately turned into water and used the water to condense a question mark.

Susu: E(°4 °|11)\_!!!

It suddenly realized something.

The water trembled as it condensed an arrow and pointed at itself.

"Yes."

"Ning??!!"

Susu was shocked. Shi Yu meant that... it was the reincarnation of the Blue Sea Sprite??

How was this possible...

How could such a great existence... reincarnate into a slime?

“The matter of the Blue Sea Sprite’s reincarnation becoming a Slime is completely unscientific!”

“I’m also very surprised, but it should be you.”

“Although you’re very weak.”

“But you’re so weak, and you actually have such a powerful will to cleanse the filth. If it wasn’t you, who else could it be?”

Shi Yu looked at the Sea Ruins and said to Susu, “Are you excited to know that you were such a great existence in your previous life?”

Susu was at a loss.

“Are you worried that you don’t have the right to inherit the power of the Blue Sea Sprite and don’t have the determination to become the guardian of the sea?”

Susu’s body stiffened. It nodded slightly and shook its head again.

Even with its super willpower, it was still a little confused to suddenly hear such an incomprehensible thing.

The overlord’s will was not the greatest will. Although the overlord will was very impressive, in the world, there might be a lot of lives with the overlord will.

However, to be able to protect and cleanse the sea like the Blue Sea Sprites for hundreds of millions of years and have the determination to protect the sea even after countless rebirths... It could be said to be a mythical will.

At the moment, Susu was less than three years old. Even if it was determined, she couldn’t tie herself to the Blue Sea Sprite for the time

being.

“Forget it.”

“It’s better not to think too much.”

“You’re only a water slime now. You don’t have to feel too much pressure, nor do you have to care too much about the inheritance of the Blue Sea Sprite. Perhaps inheriting the power of the Blue Sea Sprite isn’t your end.”

Shi Yu pulled it into his hand and said, “It’s not necessarily a good thing to have too much responsibility. It’s tiring. In short, before the overlord level, just upgrade here with me easily and happily. Just like I said, you’re still very weak. You can think about the future.”

“Perhaps I can easily help you break through to the Mythical stage when the time comes. It’s fine if you don’t want to be a mere Blue Sea Sprite. Just be a Blue Sea Goddess!”

Upon hearing Shi Yu's words, Susu was immediately very touched.

Beside them, Eleven, Buggy, Baby Ginseng, and Chi Tong, who had been silent the whole time, were used to it. This was because Shi Yu had also bragged to them. Everyone had a Mythical Dream, and they were all aiming for the Mythical stage.

After all, the dream of Shi Yu, a Mythology Scholar who had transmigrated from Earth, was to find a real myth.

Since the Mythical Era had disappeared, he would open a new Mythical Era himself. Fuu!!

Just as Shi Yu finished showing off, a suction force suddenly came from the Blue Sea Ruins in front of him, causing Shi Yu and the others' faces to immediately distort.

"Holy shit, I'm in the middle of something! Ambush! I haven't chatted with you or asked you to teleport!"

Dragon Palace City. Clearwater Island.

Blue Sea Ruins.

At this moment, the atmosphere was especially serious and solemn.

In the sky, lightning flashed and thunder rumbled.

Four huge creatures were gathered here, staring at the Blue Sea Ruins.

Among them was a huge white dragon.

There was a huge green-blue divine dragon.

There was an ice-blue dragon.

And a light blue sea dragon with coral-like wings.

Apart from them, there was also a human figure and a cat figure. "Lord Sea Dragon King, Lord Azure Dragon King, Lord Ice Dragon King, Lord Immortal Dragon King, Lord Tyrant Sea Legend, Lord Ying, Sir Shi Yu really disappeared here..."

The Turtle Minister wanted to cry.

Who would have thought? It only brought Shi Yu to Clearwater Island to take a look... Shi Yu was gone, just like that. "Blue Sea Ruins..."

Tyrant Sea Legend looked at the ruins in front of him solemnly.

Shi Yu had been missing for a day. As the legend leading the team, he naturally received the news immediately.

It was indeed scientific for members of Bureau 11 to disappear before the ruins, but...

"Damn it, where did this kid go?" Ice Dragon cursed.

It went out for a while and he was gone?

“Don’t tell me he really entered the Blue Sea Ruins,” the Sea Dragon King pondered.

“Sir Shi Yu was indeed very interested in the Blue Sea Ruins. He asked us a lot about the Blue Sea Ruins.” Apart from this group of totem big shots, there were also overlord sea beasts like Doctor Shell beside them.

At this moment, the Holy Healing Light Shell, the Pink Sea Immortal Spirit Water Jellyfish, the Heavenly Blue Star Coral, and the other sea beasts also had bitter expressions. They didn’t understand why the Sea Dragon King’s honored guest had suddenly disappeared.

And he had been missing for so long!

“Doctor Shelly, describe the situation again,” the Sea Dragon King said to the Sacred Bei.

This Shi Yu was the one guy who shouldn’t have disappeared...

It and the Ice Dragon had just returned from a complete victory. This Senior Ice Dragon had just helped Dragon Palace City a lot, but in the end, Dragon Palace City lost the Ice Dragon’s son. How could the Ice Dragon settle in Dragon Palace City and become a queen now?

Moreover, Shi Yu was also Dong Huang’s genius and was valued by his old friend, the Divine Feather Phoenix Butterfly. He definitely couldn’t lose him.

“At that time, Sir Shi Yu judged that the Poison Dragon Totem was related to some half-god, Yun An. He thought that the Ice Dragon King and the Sea Dragon King would be in danger and that the Immortal Dragon King might not be able to cleanse the poison of the Poison Dragon Totem...”

“Hmph.” Although the Immortal Dragon King, who had coral-like wings, didn’t know Shi Yu, he immediately didn’t have a good impression of him when he saw that this kid didn’t trust him.

It was just radiation poison. It had just returned to Dragon Palace City and helped the injured heal.

“Well...” The Sea Dragon King and Ice Dragon nodded silently. Although it was relatively easy for them to deal with the Poison Dragon Totem, Shi Yu was concerned about them and had good intentions.

“Then, as we chatted, we talked about Lord Blue Sea Sprite.”

The Immortal Dragon King said, “If there is poison that I can’t cleanse, only the legendary Blue Sea Sprite can.”

After all, this was the true guardian of the sea that stood above the Dragon God of Dragon Palace City.

“In short, Sir Shi Yu seems to want to see the Blue Sea Sprite very much, but because the Blue Sea Sprite hasn’t appeared in 3,000 years, he glanced at the Blue Sea Ruins... and said...”

“Since the Blue Sea Ruins can summon the reincarnation of the Inner Sea Sprite, the Blue Sea Ruins definitely knows where the reincarnation of the Inner Sea Sprite is. Why don’t we ask the Blue Sea Ruins?”

The Three Dragon Kings and the Tyrannical Sea Legend : “...”

This kid looked like he was dreaming.

In the hundreds of millions of years, no creature other than the Blue Sea Sprite had been able to communicate with the Blue Sea Ruins.

Ice Dragon pondered and said, "Do you think there's a possibility that this kid really activated the Blue Sea Ruins and was teleported into the ruins?"

"To be honest, I think this kid has some skills in communicating with ruins. If I were the spirit of the ruins, I definitely wouldn't be able to sit still!"

"This..." The Dragon King's wife, the Azure Dragon King, said, "But the Blue Sea Ruins is an inheritance ruin that inherits the power of the Inner Sea Sprite. Why is it teleporting a human Beast Tamer?"

"Firstly, we can eliminate the possibility that Shi Yu is the reincarnation of the Blue Sea Sprite." Beside him, the gem cat was tired.

It was also very afraid of losing Shi Yu. It wouldn't be able to explain to Ancient Capital University when it returned.

However, the current situation made it feel like it was similar to the time in the Emperor Wu Ruins.

Shi Yu must have done something again.

Sigh...

Just as most of the big shots in Dragon Palace City surrounded the Blue Sea Ruins and discussed Shi Yu's situation, a wave of ripples suddenly appeared in the Blue Sea Ruins.

This change immediately attracted their attention.

Their large eyes looked in the direction of the Blue Sea Ruins.

Then, a slightly painful scene appeared. The Blue Sea Ruins was like a bed of bullets, and a bunch of creatures suddenly popped out.

One human, one panda, one butterfly, one ginseng baby, one sword spirit, one water slime... Who else could it be other than Shi Yu and the others? "Eh." After coming out, Shi Yu was still a little stunned.

He was already used to Buggy's Instant Transmission, but he was a little dizzy from the teleportation of the Blue Sea Ruins.

"Hu..." Shi Yu and the pets rubbed their eyes and looked over.

This look stunned Shi Yu instantly. He looked at the huge four dragon kings, as well as the Tyrannical Sea Legend, the gem cat, and the Turtle Prime Minister on the ground with a stunned expression.

"Uh, seniors, this is..."

"Look, look!! He really entered the ruins!" the Ice Dragon King said proudly. The prophecy was right! However, Shi Yu's hair... What was going on?? "You, what's going on?" After a moment of silence, Tyrannical Sea Legend also asked Shi Yu.

Shi Yu looked around and looked at everyone before looking at the Water Slime.

“I didn’t go to the inside of the Blue Sea Ruins.”

“But if I say that because the Blue Sea Ruins found the growth of the Blue Sea Sprite Reincarnation too slow, so it entrusted me to take care of the Blue Sea Sprite Reincarnation in this lifetime and teleported me to the location of the Blue Sea Sprite Reincarnation... Would you believe me??”

“Well, it’s the reincarnation of this lifetime’s Blue Sea Sprite.” Shi Yu bent down and picked up the cute Water Slime.

“To seniors... Eh, no... Well, forget it. Just treat them as seniors and greet them.”

“Ning!”

Everyone: “?”

“???”

Huh???

This guy actually managed to get an answer from the ruins??

The Sea Dragon King, the Azure Dragon King, and the Immortal Dragon King and the other totems, along with the three healers, widened their eyes and looked at Shi Yu and the Water Slime.

However, he wasn’t f\*cking kidding, right?

The Blue Sea Sprite had reincarnated into a water slime?

Susu: (2\_C)

It looked at this pile of big shots that was countless times larger than itself and was abnormally nervous... This was... This was... Dragon Palace City? In short, now, even the three Dragon Kings who were totems and the legendary Tyrannical Sea were completely unable to understand what Shi Yu had just said.

Boom.

Thunder rumbled in the sky, representing the mood of the big shots.

“What exactly is going on...” The Sea Dragon King asked with a hoarse voice.

It looked at the Water Slime and said, “It’s the reincarnation of the Blue Sea Sprite??”

Shi Yu nodded and said, “Yes.”

Many Dragon Kings were shocked still. They couldn’t connect the Blue Sea Sprite to the Water Slime in Shi Yu’s arms no matter what.

However, with the reaction of the Blue Sea Ruins as proof, they didn’t know where to start suspecting

Damn, no way.

“As expected of you.” The gem cat looked at Shi Yu and was extremely excited. It was the first to believe him.

You easily did what Lu Qingyi didn't do five years ago!

"The current situation is..." Tyrannical Sea Legend asked.

"I signed a contract with it to nurture it to the overlord level before it accepts the inheritance of the Blue Sea Ruins," Shi Yu said.

Holy shit.

As Shi Yu finished speaking, the Turtle Minister and the other creatures were even more shocked. You f\*cking signed a contract with the Blue Sea Sprite Reincarnation??

What was wrong with him!

How was this possible! He had never heard of a Blue Sea Sprite following a human Beast Tamer in its lifetime.

This...

At this moment, the totems and overlords present were shocked because they knew very well what the name "Blue Sea Sprite" meant. Although the Blue Sea Sprite had a large number of enemies, at the same time, as the guardian of the sea, the Blue Sea Sprite had countless believers and countless followers. It was an existence even more honorable than the Dragon God of Dragon Palace City.

Even Dragon Palace City had received the favor of the Blue Sea Sprite several times.

They really couldn't imagine that such an existence would actually sign a contract with a human Beast Tamer.

For a time, these totems and overlords couldn't help but pant. Legend Sea Tyrant was even more stunned and felt that it was ridiculous.

They came to participate in the Dragon Palace banquet to obtain the recognition of the heir of the Dragon Palace City's overlord- this was their final goal.

In the end, he came and directly took away a life that was even more impressive than the Dragon God of Dragon Palace City? Originally, when the Tyrannical Sea Legend had heard that someone had contracted the heroic spirit of General Mu Huiyin, he had sighed with emotion that the younger generation would surpass the older generation. Now, as Shi Yu contracted an even more ridiculous Blue Sea Sprite, he no longer knew how to express his emotions.

Beast Tamers and pets often had achievements together.

Although he didn't know what kind of Beast Tamer Shi Yu would become in the future, the status and identity of the Blue Sea Sprite was already placed here. The Blue Sea Sprite was almost guaranteed to become a super life form at the demigod level. In that case, wouldn't Shi Yu definitely have legendary talent?

Even if the Blue Sea Sprite broke through to the overlord level and left Shi Yu after accepting the inheritance, because of this contract experience, Shi Yu would definitely become a friend of the sea. It

might even affect the Dragon Emperor, who was on good terms with Dragon Palace City at that time. "What's with your hair..." This was also what the Tyrannical Sea Legend wanted to ask.

At this moment, in their opinion, Shi Yu looked like he was about to die.

Shi Yu was stunned. "Perhaps it's the necessary price to listen to the voice of the Blue Sea Ruins and contract the Inner Sea Sprite... I'm so tired... Sea Dragon King, is there any high-level resource to replenish life force in Dragon Palace City?"

With that said, he retracted Eleven, Susu, and the others with a weak expression.

"Next, I might need to rest for a while..."

"Uh, yes, yes! Prime Minister Turtle, quickly retrieve resources for him!!!" Seeing Shi Yu's appearance, the Sea Dragon King immediately said to Prime Minister Turtle.

Following that, Shi Yu also sat on the ground.

He was indeed very tired.

Shi Yu's sitting immediately frightened the Sea Dragon King and the other totems.

If they had to prevent anything from happening to Shi Yu in the past, that was even more so the case now!

Because they had seen Shi Yu enter and leave the Blue Sea Ruins with their own eyes, they finally chose to believe Shi Yu.

Shi Yu... was chosen by the Blue Sea Sprite and became the Beast Tamer of the Blue Sea Sprite!

This was a huge matter.

In short, if Dragon Palace City could assist the growth of the Blue Sea Sprite in this lifetime, Dragon Palace City could also obtain countless benefits.

The Sea Dragon King and the other totems were very clear on this.

Therefore, at this moment, they didn't dare to slight Shi Yu. To be precise, they didn't dare to slight the young Blue Sea Sprite that Shi Yu had contracted.

"By the way."

Just as Shi Yu sat down, he suddenly recalled something and looked at the Immortal Dragon King, Ice Dragon, and Doctor Shell in confusion.

"Wait, seniors, you're all here. Does that mean that the Poison Dragon has been resolved?"

"Yes, but not completely," the Sea Dragon King was stunned and said.

"That guy is a sore loser. If it can't win, it will enter an armorized state that can't be broken through. It continues to release poison. I can only freeze and seal it first," Ice Dragon said. "After all, if it self-destructs, everyone will be finished. Dragon Palace City's sea area is the worst."

Shi Yu was stunned. "What about the sea beasts affected by the poison?"

Doctor Shell: “Fortunately, Lord Immortal Dragon King has already successfully cured them.”

Shi Yu and the Immortal Dragon King looked at each other.

If it was said that the Immortal Dragon King found Shi Yu less pleasing to the eye just now now that Shi Yu had obtained the recognition of the Blue Sea Sprite, it found Shi Yu pleasing to the eye again.

“I’ve already healed those poisoned people, but my ability is indeed limited. Because these injured people weren’t deeply poisoned, it’s easier to heal and cleanse them. But that Poison Dragon Totem that lost its mind because of the poison... my ability isn’t enough to cleanse it,” the Immortal Dragon King said.

“However, now that the Blue Sea Sprite has returned, that Poison Dragon Totem can definitely be purified.”

Shi Yu heaved a sigh of relief when he saw that Mother Dragon was not injured and that the poisoned sea beasts had recovered.

Now, Susu had yet to receive the inheritance of the Blue Sea Sprite and had yet to grow up. It really didn’t have the ability to cleanse powerful poison.

Since everything was settled, that was good. “By the way, if possible, please, Sir Shi Yu. When the time comes, help that Poison Dragon Totem cleanse the negative power in its body with Lord Blue Sea Sprite,” the Immortal Dragon King said.

“That Poison Dragon Totem also became like this because it was corroded by the mutated power. Perhaps it wasn’t the culprit behind all of this. When I touched it, I could clearly hear the cries and struggles in its heart.”

“It must be those bastards from the seven islands,” the Sea Dragon King cursed. “Unfortunately, there’s no evidence, but if we can restore that Poison Dragon’s rationality, there might be evidence.”

“When the time comes, let’s fight together and find a reason.” The Sea Dragon King and the others didn’t kill the Poison Dragon Totem. After all, it was a totem and a dragon. The other party was also a victim. If possible, they would naturally turn the enemy into a friend and find a common enemy to maximize their benefits. At that time, if there was evidence, there would be a reason to attack. They could go and kill the seven islands.

However, without sufficient evidence, with only knowing that the Poison Dragon Totem came from the direction of the seven islands, it was really difficult for Dragon Palace City to fall out with the seven islands.

It was mainly because Dragon Palace City didn’t know if the legends of the seven islands had died.

**sev**

If that female Martial God didn’t die, the battle power of the seven islands was still strong.

None of the seven countries that could escape the control of the totems was weak. At least at that time, there was a legendary Beast Tamer.

The Sea Dragon King looked at Shi Yu.

At this moment, Shi Yu fell into deep thought.

That Poison Dragon couldn't be cleansed yet?

He still wanted to understand Yun An's situation through this poison dragon. "I understand. I'll nurture the Blue Sea Sprite to the overlord level as soon as possible. At that time, it'll help cleanse that Poison Dragon."

Shi Yu estimated that he should be able to raise the Blue Sea Sprite to the overlord level in a year.

With the talent to increase super skills, it was that fast.

Even if Dragon Palace City tried its best to nurture a Water Slime, it was impossible to do it faster than Shi Yu.

"Do you need our help?" the Sea Dragon King asked.

Shi Yu was stunned and said, "Yes, do you have that kind of water-element resource? One that's very high quality, but its level is very low..."

"Perhaps it can be used to accelerate the growth of the Blue Sea Sprite."

The Sea Dragon King was stunned and said, "I can get the Turtle Prime Minister to look for it in the treasure vault later."

"Is there anything else? Why don't you stay in Dragon Palace City, Sir Shi Yu? We'll definitely use all our resources..."

"No!" At this moment, the Tyrannical Sea Legend said indifferently, "Dong Huang's resources are also sufficient. It's better for Shi Yu to return to the ground."

The Sea Dragon King curled its lips. Damn old

**man.**

They were all family, and this guy...

The Immortal Dragon King said, "I think that since the Lord Blue Sea Sprite has returned, Dragon Palace City needs to establish an Oceanic Environmental Protection Department to protect the Lord Blue Sea Sprite. I think Sir Shi Yu is very suitable to be the in-charge of this department."

Shi Yu: "?"

Holy shit, how did it know what he was going to say?

Well, he did say it back on that island...

The Azure Dragon King nodded and said, "My child is pretty smart. He can help run errands."

The Sea Dragon King smiled in embarrassment. Son of a b\*tch, a day ago, it still felt that Shi Yu's historical listening talent wasn't enough for its son. Now, its wife had sold their son to Shi Yu as an errand boy??

Damn, listening to history talents could be used like this? It could even casually contract the Blue Sea Sprite???

It didn't understand!

"That makes sense. I'll announce it at the Dragon Palace banquet the day after tomorrow. Congratulations to Senior Ice Dragon for joining Dragon Palace City and for the establishment of the Dragon Palace Ocean Environmental Protection Department. Little Friend Shi Yu, you should also come to the Dragon Palace banquet with Senior Ice Dragon," the Sea Dragon King said politely. After all, the reappearance of the Blue Sea Sprite after 3,000 years was important. They even estimated that the Dragon God would be shocked soon. The tortoise prime minister: "What you say makes sense..."

At this moment, Ice Dragon was beside him. It suddenly felt more and more uncomfortable.

Wait a minute. He, a totem, had joined Dragon Palace City and had just helped to solve a big enemy.

Logically speaking, shouldn't the totems of Dragon Palace City revolve around it!

Why did they all run to curry favor with Shi Yu now??

Roar!!!

Was this scientific!

At this moment, Shi Yu was also flattered. This was too blissful.

He sighed. Being a beast tamer really meant cuddling up to others. Even their own beasts...

Next, he could also follow the totem dragon king to the Dragon Palace banquet as the minister of the environmental protection department of Dragon Palace City. He wondered what Yu Shu and the others would think of him... It was annoying.
