

## Beast 331

Chapter 331 Slime of the Overlord Race (2)

Ancient Capital University, archeology Department, third-year dormitory.

Zheng Yingjie, an archaeological Department student, was browsing the Ghost Beast Video in boredom. Then, he discovered the promotion of Ancient Capital University.

“Huh?” Zheng Yingjie clicked it.

A minute later, he opened his mouth slightly.

“Holy shit, what’s this?”

“Lost history? Meaning actual lost history?”

“The Ancient University certification is real?”

“Ice Dragon General under Emperor Shi? A mixed-blood Titled Beast Tamer? Really?”

“Who is this time traveler account?”

Under extreme shock, he quickly forwarded the video to a small group called the archaeological Seven Elites.

“Look, what does the school’s official account mean by forwarding this video?”

Apart from this, some students from the archeology Department and the battle department of the first year of Ancient Capital University also saw this video.

Unlike those who didn’t know the situation, as people who had personally experienced the heroic spirit ruins, they originally knew part of General Mu Huiyin’s situation!

It was just that due to the contract at that time, they couldn’t say what happened to the heroic spirit ruins.

But at this moment, when they saw the unknown account pushed by the school and the video of “Mu Huiyin Legend” released by the unknown account, their faces flushed. Holy shit, the news had been sealed for almost a year. Was this archaeological discovery finally going to be announced?

“At the same time, in other words, the news that Shi Yu contracted General Mu Huiyin’s heroic spirit won’t be hidden for long?” Wang Ling, Yu Shu, Miao Dongdong, and the others from the archaeology Department, who were born in the same batch as Shi Yu, had hateful expressions on their faces. Damn it, this time, Shi Yu could act cool again.

Eh? Time Traveler... F\*ck, it couldn’t be Shi Yu, right?

A well-made video became popular very quickly.

Even if it was a pure rookie production without any traffic, it could quickly ferment with the amount of passers-by. Moreover, Shi Yu had even gotten the Ancient Capital University’s official account to do this with.

In less than an hour, the number of views on this video exceeded 10,000. It first spread among the archeology departments of the nine major universities.

Imperial Capital University, archeology Department, second year class group.

This video was forwarded by a student here. The students instantly discussed.

(Look, everyone. The Ice Dragon General under Emperor Shi, a titled Beast Tamer that hasn't been recorded. Is this for real? It feels more like a preview of a big movie, but it's ridiculous if it's reposted and verified by Ancient Capital University. So, it's a real archaeological discovery?)

[Is the archaeological Association going to collapse? Why are the archaeological discoveries starting to be announced in Pyro?]

[F\*ck, where can I buy this production and movie tickets?]

(Ice Dragon General is so beautiful, Goddess Mu Huiyin. I want to be the dog of the Ice Dragon General! Step on me!)

Teacher: "Cough, cough."

This archaeology teacher's face darkened. What was going on? However, he also looked at the video and fell into deep shock. At the first moment, he also thought that it was a promotional video for a high-quality big movie. But soon, compared to the quality of the video, what attracted him more was the information revealed in the plot.

The number one general under Emperor Shi? A mixed-blood titled Beast Tamer?

In history, there had never been a record of such a super expert.

However, the end of the preview told the audience that it was a history that Mu Huiyin had taken the initiative to hide.

In addition, Ancient Capital University had certified...

In short, if it was true, it would definitely be the greatest archaeological discovery of the year. But why was it published in this way?

"The number one general under Emperor

Shi?!

At Imperial Capital University, Yin Zhengfan from the battle department also saw the video on his Moments. However, after he finished watching it, apart from the shock and amazement of the others, there was also a trace of confusion.

Why did he feel that apart from the difference in size, the form, color, and even voice of the Red Sparrow Sword in Great General Mu Huiyin's hand was almost identical to the sword spirit Shi Yu had contracted?

It was like the sword spirit Shi Yu contracted to act as General Mu Huiyin's sword.

“Look.” After Shi Yu did these things, he looked at Buggy and Chi Tong, who had become popular in the video, and was very excited.

After all, it was the result of their hard work for a day. This was much more tiring than training, especially Buggy. It felt that shooting a preview was even more tiring than fighting for three days and three nights!

Now, the video had rushed to the leaderboards in just a few hours. How could Buggy and Chi Tong not be surprised?

At this moment, there were more comments below the video.

[Are all newbies monsters?]

(Tell me, which big boss is it! Ancient Capital University... Could it be Dr. Lu Qingyi?)

(Why is it a preview—Without General Mu Huiyin I’m gonna die...]

(Vote cast, quickly update.)

Shi Yu chuckled. Speaking of which, he and Chi Tong had never fought in a relatively public competition.

The martial arts conference was considered half popular, but unfortunately, it had just begun and ended. He didn’t know if anyone would discover the relationship between Mu Huiyin and Chi Tong.

To be precise, someone had already discovered that White Brook, Lin Xiuzhu, and the others, who were more familiar with Shi Yu and had more contact with Chi Tong, had already begun to send private messages to confirm.

“Eh, are you awake?”

Suddenly, Shi Yu, who was paying attention to the video, temporarily looked away.

In the Beast Taming Space, Susu’s aura suddenly began to climb steadily.

Shi Yu understood that it had successfully swallowed the sea of fire core!

“Come.” Under Shi Yu’s summoning,

Soon, a Water Slime filled with Essence Energy appeared in front of Shi Yu.

“Ning!”

### Chapter 332 Slime of the Overlord Race (3)

After appearing, Susu slowly opened its blue eyes on the table.

“Mi!!!” Chi Tong greeted Susu and instructed Buggy to quickly show Susu the video.

“Wu... (Ah, battery is dead.)” Shi Yu and Susu : “...”

“Who cares about the video now?” At this moment, Shi Yu didn’t have the time to pay attention to the video. He looked at Susu in surprise.

“Ning!” Susu was excited.

After devouring the core of the Sea of Fire Sprite, it successfully evolved and mastered a new skill!

The newly awakened skill made it even more satisfied.

At this moment, Shi Yu felt very good looking at the energetic Susu!

< Name > Mutated Water Slime

[Race Level]: Low-level overlord

(Level of Growth): Commander Level

This time, after Susu swallowed the Flame Sea Sprite core, her race level finally broke through to overlord.

The skill it awakened also made Shi Yu feel invincible.

Skill: Holy Water Ring

< Introduction > It’s a super water-type skill. It creates a resistance water ring. When affected by negative effects, they are reduced and the water-type skill effects are increased!

“Perfect.”

Among the three treasures Dragon Palace City wanted, the first two didn’t allow Susu to awaken super skills and become an overlord race. In terms of regret, there definitely were some.

Whether it was the final power crystal of the overlord-level mermaid or the million-year-old protective shell created by the totem-level old turtle, the quality of the resources was definitely not low. It was not much inferior to the evolution materials of Eleven, Buggy, and Baby Ginseng. Therefore, the problem could only be solved with skills.

Shi Yu thought about it and guessed that it was because the proficiency level of Infinite Devour was too low.

Eleven’s was an evolution skill that had advanced into the Dao, and so was Buggy’s. Baby Ginseng’s, on the other hand, was a transcendent high-level evolution skill. In terms of effect, it was definitely stronger than the entry-level Infinite Devour, even if Infinite Devour was a super skill.

However, after devouring so many nutritional fruits, time fruits, and various high-quality resources, the proficiency increase was surprisingly fast. Coupled with Absolute Sleep, it quickly had the effect of proficiency. Therefore, this time, Susu swallowed the Sea of Fire Sprite core and instantly obtained a super skill. Its race level naturally reached the overlord level.

Holy Water Ring

This skill didn’t look much, and perhaps it didn’t look like Buggy’s phantom image or a high-level skill like Baby Ginseng’s Time Fruit, both of which were stronger, nor could it compare to skills like the Imagination Domain and the Time Mark... However, this skill was undoubtedly the most suitable for Susu.

With the Holy Water Ring, no matter what poison, curse, or pollution it was, as long as it didn't exceed the endurance level of the Holy Water Ring, it could directly become its nutrition, in turn increasing the effect of its water-type skills!

Purification was also a water-element skill. The stronger the poison, the better the cleansing effect. This directly countered the enemy!

Moreover, as a super skill, even in harsh environments like extreme heat and extreme cold that could completely change Susu's life form, the Holy Water Ring was also effective. It could also increase the power of Susu's water-type skill, and its nature was similar to the Interlocking Sword.

The Sea Fire Sprite core had made a huge contribution. Shi Yu immediately felt that he had chosen the right resource.

With this skill, when it received Chi Tong's Possession, Chi Tong could not only rely on Susu's water-element power to increase the effect of the Interlocking Sword, but Susu could also rely on Chi Tong's Sun Flame power to increase the effect of the water-element skill. Both parties could block each other's BUGs and instantly increase to the upper limit of their endurance. This was an invincible super combination skill.

"Susu, next, I'm going to increase your skill proficiency with all my might. Are you prepared to break through to the monarch level?" Shi Yu couldn't wait to upgrade Susu's racial skills. It had a bunch of racial skills. After maximizing them and adding the overlord's will, it was easy to break through to the monarch level. There was no need to get stuck.

At that time, when he fused with the monarch-level Chi Tong, it was not impossible for his energy to exceed ten million. Shi Yu would be invincible below the overlord level!

"Mi!" Chi Tong was pleasantly surprised.

"Wu wu wu wu?" Buggy was stunned by the side. Susu was only at the transcendent level previously, but it was going to break through to the monarch level so quickly? In other words, was Buggy going to be the fourth person in the team to break through to the monarch level?

It was clearly the first overlord race in the team...

### Chapter 333 Baby Ginseng Wants to Self-Explode

On the huge arena, trees lined the ground, and the green grass was like a carpet. Countless young figures were sweating on it.

In the corner of the training ground, an energetic figure walked to the white wall and leaned against it slightly. She stretched her white legs and arms.

White Brook wiped the sweat on her face and neck with a blue sports towel and took out her cell phone from the ruins space.

After returning from Dragon Palace City, she returned to the supervisory team of Ancient Capital University to train. After all, the National League was around the corner.

Just now, the battle club instructor of Ancient Capital University had just come to the training ground to inform everyone about the changes in the rules of the National League.

Because of the world competition, there would be a certain change in rules in the National League this year and next year. It was mainly to cater to the world competition and even the domestic Sequence battles. Even the rewards had increased.

Unsurprisingly, in this year's National League, the schools would work abnormally hard and crazily throw resources at the students in the last half a month.

"What are you doing?"

After the call was made, White Brook yawned tiredly and asked.

"Work overtime for training," a voice came from the other side of the phone.

"Ning! (Beast Tamer, increase points!)"

"Oh... It's cultivating that water slime..." White Brook understood.

Although he wasn't at Ancient Capital University, it looked like Shi Yu was pretty hardworking. With Shi Yu's strength, he was even stronger than her. There was indeed no need for him to train with the school team.

She was already looking forward to the scene of Shi Yu and Susu killing everyone in the National League.

"No, the rules have changed this year. I might also be the target of getting killed." White Brook's face suddenly darkened.

"What's wrong, Senior?"

"The rules of the National League have changed. This year, it's going to be divided according to strength."

"Beast Tamers below the master level are to participate in the team competition. Master-level Beast Tamers are not allowed to participate in the team competition anymore. In contrast, only master-level Beast Tamers can participate in the individual competition this time."

"It's still divided into two titles: National champion team and individual national champion."

Shi Yu: "Eh, isn't that change not so big? It's just that Masters aren't allowed to participate in the team competition anymore, while the individual competition has a threshold for strength." White Brook: "No, it's very big. This National League reduced the reward ratio of the team competition and increased the reward ratio of the individual competition. Therefore, only the two of us can participate in the individual competition in Ancient Capital University this year. Moreover, the changes in the rules of the individual competition are the most ridiculous."

"What about the specific rules of the individual competition?" Shi Yu asked.

"This is the most scamming thing. The team competition is still the same as in the previous years. A bunch of people are obediently playing in the arena, but this individual competition..."

“It’s very similar to the survival trial in the vocation assessment. It’s said that all the participants are thrown onto a huge island filled with ferocious beasts and then they let these people fight indiscriminately.”

“The condition to advance to the next round is to eliminate two master-level Beast Tamers from other schools or their own schools on the island and successfully survive until the end of this competition.”

“In the end, the contestant who advances will go into the competition for the national championship in the second round.”

“However, this doesn’t mean that one person can only eliminate two people on the island. The more people each candidate eliminates, the more rewards will be divided.”

“Of course, if the contestants on the island are eliminated to only one person at the end of the competition time, there’s no need to carry out the next round. The person left behind in the end is the national champion.”

“This process will also be broadcasted nationwide.”

“...” After White Brook finished speaking, Shi Yu was stunned.

Damn, they really prepared for the world competition in advance.

Wild battles were much harder and more dangerous than proper arena battles.

Shi Yu said, “Then what if I’m attacked by more than ten people, especially Imperial Capital University? What if the three masters team up to fight me?”

White Brook was stunned. “You shouldn’t be that hated... right?”

After hanging up the call with the beast-eared girl, Shi Yu rubbed the Water Slime on his thigh and fell into deep thought.

A battle in the wild.

It meant that if he could use a few pets, the Beast Tamer himself could also participate in the battle. Of course, equipment that exceeded his level definitely couldn’t be used. In this situation, it tested the overall quality of the contestants.

For example, if you couldn’t defeat someone, you could run fast. It’s also an advantage if one couldn’t be eliminated.

For example, if the other two were fighting, it was also in line with the rules for one person to jump out and take advantage of the situation when the other party was injured.

For example, Shi Yu could get Baby Ginseng to create a clone and lure the wild ferocious beasts to Gao Xuan’s side. Letting Gao Xuan suffer the attacks of monarch-level ferocious beasts was even more of a battle strategy that conformed to the rules!!

Such rules were much worse for performance, but it was understandable. At that time, the world competition would definitely be even more dangerous than this. They wouldn’t even care about life and

death. The various competition versions were also to give the young Beast Tamers of Dong Huang a warning in advance. In the next year, there would probably be more and more such competitions.

“Whatever rules you like, then. I’ll just add points.” Shi Yu sighed.

As the National League approached, he just had to add some points.

Strength was the most important thing in dealing with all rules!!

A day later.

In the ruins space.

At this moment, Eleven was training the Bean Bears daily.

“Wu wu wu wu wu!!!”

Eleven, who had enlarged, was holding several bean bears in its palm.

The Bean Bears, who knew its fate, cried.

#### Chapter 334 Baby Ginseng Wants to Self-Explode (1)

When they used the “impregnable” group defense skill together, Eleven even used electromagnetic control.

As everyone knew, after its defense reached an indestructible level and gave it extreme speed, it could also be converted into super strong attack power.

Eleven opened its palm and activated the combination skill “Super Electromagnetic Bear”. It directly shot out indestructible Bean Bears wrapped in impregnable iron as cannonballs!!

Boom!!!

The super Electromagnetic Bear turned in the magnetic field and bounced back. Its target was actually Eleven itself.

With a bang, ten lightning bolts hit Eleven from all directions, immediately causing a violent explosion.

The smoke dissipated, and the hardened substance fell from Eleven’s body layer by layer. Shocking wounds covered Eleven’s entire body.

But soon, a white halo of light “healing” wrapped around these injuries.

Coupled with the racial talent of the Panda Royal Family, which was the buff to increase strength after being heavily injured, it didn’t take long for Eleven to increase its energy value from the 4.04 million basic energy it had just broken through to 4.07 million. Its various abilities had improved greatly.

However, Eleven was not satisfied and felt that the increase was not big enough.

Generally speaking, the more serious the injury, the better the increase in effect after recovery.

However, the problem was that the heavier the injury, the longer the recovery time would be. This

would cause other training to be delayed. This gave Eleven a headache. Otherwise, it could do even more cruel training.

Of course, it was fine with the cooperation of Baby Ginseng. Unfortunately, Baby Ginseng was very busy at the moment and was being squeezed dry by Shi Yu and Susu.

Without a doubt, Eleven was currently firmly sitting on the throne of top 1 as a solo combatant in Shi Yu's team.

As for the second one, it was Chi Tong, who had just broken through. After breaking through, Shi Yu gave Chi Tong a mission to let it choose low, intermediate, and high-level skills that it liked.

Compared to the other fancy teammates, Chi Tong had the least skills. Shi Yu felt that he should teach Chi Tong more skills.

After all, after Chi Tong learned the skill, the cost-effective ratio was still very high.

For example, after it learned super vision and possessed Shi Yu, Shi Yu could also use super vision himself. Such a common skill was very valuable.

As for the way Chi Tong chose skills, it was also very simple. It was through various Beast Taming Movies. In a day, it had already made many records. It was just waiting for Shi Yu to replicate and teach it.

[Chi Tong's laptop]

(Skill 1: Red Fire Armor, Flame Forms Armor]

[Skill 2: Soul of Fire, protected by the Soul of Fire.]

(Skill 3: Protective Flame, a protective flame that can predict danger.]

[Skill 4: Soul Protection...]

[Skill 6: Holy Soul Qin Shield...]

They were all high-level defensive strengthening skills. Chi Tong felt that for the sake of Shi Yu's safety, it should learn more defensive skills, preferably buff defensive skills.

After possessing him, it would first stack more than ten defense buffs with transcendent proficiency on Shi Yu. This way, it could fight without any worries.

At that time, there shouldn't be any big fool who would fight a fully armed turtle. It could let Baby Ginseng attract the enemy's firepower. In any case, Baby Ginseng could be revived after it died.

"Regarding the fact that as long as all the skills are given to the Beast Tamer with some defense, the Beast Tamer won't die." Chi Tong felt that it was very awesome.

On the other hand, Shi Yu still didn't know that his role had already been arranged appropriately.

He was still working overtime with Baby Ginseng in one hand and Susu in the other.

"Ning!!"

Susu, who was on Shi Yu's thigh, was in a happy mood. It was like a docile cat that had already accepted the fate of being rubbed every day. It should become stronger with every pinch. It really couldn't refuse such a good thing. For some reason, this feeling of leveling up while lying down made Susu feel very relaxed, as if the thousands of years of training had finally been cleansed.

No one could refuse the temptation of additional points.

Not even the overlord's will.

If there was, it would definitely be because the points added were not super skills. Otherwise, if half-gods went straight for adding points, the totems wouldn't be able to hold on.

"Yiya..."

Shi Yu added points to Susu, Baby Ginseng added points to Shi Yu.

Looking at the rising aura of Susu, Baby Ginseng was very worried.

Eleven was a monarch, and the level of Chi Tong was monarch. Susu, this little fellow without any worries about suppressing its level, could even reach the level of a monarch at any time.

In other words, it and Buggy might be the last two to break through to the monarch level in the team?

Buggy did not want to be the last to break through in the team, but Baby Ginseng also didn't want to either.

However, in the team, Buggy and Baby Ginseng were the busiest and most labor intensive.

At this moment, Buggy imagined a few of its clones. Some were making the Ice Dragon Badge, some were filming movies, and some were training the Dragon Skill of Imagination to visualize the Dragon God's will in the dream. It was very bitter, and Baby Ginseng was not much better off. It commanded a group of clones to enrich its inventory.

Dragon Palace City had pretty much consumed all the Time Fruits and Nutrition Fruits. Now that Shi Yu was about to activate a new round of points, it couldn't rest for a moment.

In this situation, Baby Ginseng felt that it was very dangerous.

Although it had the Time Fruit and could have monarch-level battle power at any time, this wasn't as fragrant as the Normal State Monarch level.

Therefore, as he provided supplements to Shi Yu, who was adding points, Baby Ginseng also thought about how it could reach mid-level willpower first and become a monarch.

According to the current situation, Buggy that had visualized the Dragon God Statue was probably the first to break through. This was very bad.

"Alright, the purification and poison resistance are all full."

A long time later.

Skill: Poison Resistance (Dao Proficiency)

Skill: Purification (Dao Proficiency)

After completing the additional points of these two skills, Shi Yu stretched comfortably.

“Ning!!” Beside him, Susu transformed into two big words of thanks and hopped in front of Shi Yu and Baby Ginseng.

“You’re welcome, but after you break through to the monarch level, it’ll be time for you to work.” Shi Yu smiled.

The purification was already maxed out!

At the maximum level of purification, apart from the effect of cleansing poison and curses, even some negative emotions could be cleansed.

For example, if a pet was in an extremely angry, afraid, and desperate state, then once the cleansing was released, the other party’s anger and fear would slowly disappear.

This effect was very suitable to assist Eleven, Buggy, and Baby Ginseng in training their overlord willpower. After all, the overlord will is gained through overcoming negative emotions like fear and despair.

Apart from that, after Susu broke through to the monarch level, Shi Yu felt that he should be able to let Eleven absorb the Meteorite Fragment. At that time, with the protection of the Blue Sea Sprite Reincarnation that had mastered max-level cleansing, evolution shouldn’t be a problem.

“Ning!!” Susu returned to a ball of water, indicating that he should leave it to it.

“Yiya!!” At the same time, Baby Ginseng secretly poked Shi Yu.

It widened its green eyes and looked at Shi Yu.

“What?”

“Yi!! (I want to experience true life and death once.)” Seeing that Buggy wasn’t here, Baby Ginseng secretly said to Shi Yu.

“Huh??” Shi Yu was stunned.

“Yi!! (Applying for permission to self-destruct once and then revive!)” Baby Ginseng said.

Even a life form with the overlord’s will had never died in the true sense of the word. If it really died once, then revived and experienced life and death, even if it couldn’t train the overlord’s will, it shouldn’t be a problem to train it to a medium will!

At that time, it could break through to the monarch level before Buggy, and wouldn’t be at the bottom of the team.

“Ah...?” Shi Yu fell into deep thought before saying, “Have you thought about it?”

“Yi!!” Baby Ginseng nodded in anticipation.

It had thought about it.

It had never used its full strength after learning these two skills. It had long wanted to use them once.

“Alright.” Although Shi Yu wanted Baby Ginseng to keep it since the time mark was difficult to recover, Shi Yu was also very supportive since it was Baby Ginseng’s own idea. The earlier Baby Ginseng broke through to the monarch level, the better it would be for the team to add some super skills.

“Yiya, Yiya, Yiya!!!” After obtaining Shi Yu’s permission, Baby Ginseng jumped up in surprise. “But it’s rare to self-destruct. It’s a pity to self-destruct without any practical use. I feel that it’s better to self-destruct in battle.” Shi Yu touched his chin and said, “If only there were any strong enemies. Self-destructing once can at least provide more benefits... I can also observe the effects of the self-destruction more directly. It’s easier to use in the future.”

Baby Ginseng looked at Shi Yu eagerly. A strong enemy?!

Fishing for strong enemies!

### Chapter 335 Gem Cat’s Breakthrough Wish

“I know where to go.” Looking at Baby Ginseng, Shi Yu chuckled. Baby Ginseng wanted to self-destruct, but it definitely couldn’t self-destruct in the city.

After all, the power of its self-destruction was probably not much different from the small forbidden weapon that Gao Xuan had thrown.

Although it was only a commander rank now, it would die either way. Before it self-destructed, it would definitely be filled with buffs.

For example, the Time Fruit ability that stimulated the greatest effect.

In general, in order to not bear the side effects of the Time Fruit, the effect of the Time Fruit it created was not maxed out, be it the food it ate or the Time Fruit it gave Eleven and the others.

The Time Fruit with the greatest effect could theoretically raise the pets of these overlord races to the overlord level in an instant.

However, the side effect was definitely ten times greater than Shi Yu teaching super skills. If it dared to try, it would die.

However, since Baby Ginseng was already determined to self-destruct, there was no need to consider the side effects of the Time Fruit.

It was about to die, why would it be afraid that the fruit is poisonous?

Therefore, the self-destruction of Baby Ginseng was directly equivalent to the self-destruction of an overlord-level “ferocious beast”.

Even if they were also overlords, they would probably tremble in fear when they saw it.

Perhaps only top-level overlords like the Dragon Palace City’s General, the Sky Penetrating Whale, and the Tyrannical Sea Legend’s mutated Leviathan could face it calmly.

Other ordinary overlords would either die or be heavily injured. A killer move of this level could even ambush an overlord. It had to be used in the right place...

Shi Yu glanced at the cell phone message and said, "It's Saturday today, right?"

"Then the assistant Principal Feng and the others mentioned should be here today..."

Although the news of the World Tournament had now swept through Dong Huang, the matter of Shi Yu cooperating with the Ice Dragon to establish an Environmental Protection Department with Dragon Palace City as the center also attracted high attention.

In order to strengthen their cooperation with Dragon Palace City, the Dong Huang Association decided to also establish the Marine Environmental Protection Department in Dong Huang and lay the foundation for them to befriend the Blue Sea Sprite Reincarnation. As for the headquarters of this Environmental Protection Department, Shi Yu confirmed the address to the sea area near the Ice Dragon Snow Mountain in Icefield City.

At that time, Legend of the Sea Tyrant, Principal Feng, and the others said that they would send an assistant to assist Shi Yu in establishing it. The so-called assistant would reach Icefield City today and from the sea.

"I remember. It seems to be the Dong Huang Navy?" Shi Yu said. "They will drive a battleship to assist us and build an environmental base on the sea."

Shi Yu said, "I have a driver. I know where to

*go.*"

Boom! Boom!!

Just as Shi Yu was filled with bad ideas, the outside world suddenly trembled.

Seeing this, Shi Yu scratched his head.

"Alright, the bodyguards are in position. We're even safer now." Outside the training villa, a hungry white big cat ran back to Ping Cheng from the ancient capital with a yawn.

In any case, it was just sleeping at Ancient Capital University. It was better to come back and eat and drink.

Eastern Sea.

A silver battleship 200 meters long and more than 20 meters wide was slowly sailing in the direction of the Ice Dragon Snow Mountain.

On the battleship, two young men and a young woman in white navy clothes were looking at the snow mountain in the distance.

Among the three, there were two men and a woman. They didn't look very old and couldn't be more than 30 years old. From the badges on their uniforms, the highest military rank of the woman among the three was a standard general. The other two were major and were all officers.

Among the three major units of the Beast Tamer Troops, be it the air force, the navy, or the army, having certain military ranks basically meant that they had master-level strength.

"We're almost there." The leading female general looked fiercer. Half of her face had huge burn marks, and she was holding a cigarette.

"General Xiao Qin, we've already contacted Minister Shi Yu. He said he'll wait for us at the edge of the snow mountain," the major said.

"I understand." The brigadier general named Xiao Qin nodded.

She recalled the order she received two days ago.

Dong Huang Navy headquarters.

In the office of the legendary general, Xiao

Hai.

"The Dong Huang Association has recently established a Marine Environmental Protection Department. From today onwards, you will be transferred to work there. This is the document." Xiao Hai handed the document to the female general in front of him.

"I don't understand. Didn't I say I wanted to participate in the world competition? Why did you transfer me to such a strange place?"

The woman glanced at the document and patted the table. "Dad, what do you mean to do? What's this Marine Environmental Protection Department?"

The Environmental Protection Department didn't sound like a proper place.

As a top-notch master, she should have been fighting at the front line, but in the end, she went to the environmental department?

"The meaning is very simple. You're not qualified to participate in the world competition. If you were half as outstanding as your sister or that Ye Xing, I wouldn't be so worried about you," the legendary Beast Tamer Xiao Hai said.

"Go. This Environmental Protection Department isn't simple. You can obtain better training here," Xiao Hai said. "Moreover, with your mechanical attainments, it won't take you much effort to help build an ocean base there."

"Alright." Xiao Qin frowned and glanced at the document. "But there's no key information written on this at all. I want to know what this Marine Environmental Protection Department does exactly. Who's in charge? Don't tell me I'm only going to help build a sea base."

"As the name suggests, the Ocean Environmental Protection Department is the department that protects the ocean environment."

Xiao Qin: "?"

“The minister is Shi Yu. At the moment, he’s the only one in the entire Marine Environmental Protection Department.”

Xiao Qin: “?”

“Which legend is Shi Yu? Why haven’t I heard of him? A new legend? Or is he a top-notch master? Is there such a figure in the navy?” Xiao Qin asked.

### Chapter 336 Gem Cat’s Breakthrough Wish (1)

“He’s not a legendary Beast Tamer or a member of the navy,” Xiao Hai said. “He’s a freshman in Ancient Capital University.”

Xiao Qin: “?”

“What?”

“But he’s also an official member of the third and eleventh bureau. Oh, the first bureau too, I suppose. That should be soon. It’s very normal that you haven’t heard of his name. You don’t really pay attention to the situation on land, but you should know this. The Green Silkworm cocoon, this special evolution form of the Green Silkworm that’s about to be promoted in the army, was developed by him.”

Xiao Qin still frowned and suddenly had an impression.

She knew about the Feeding Bureau, the Archeology Bureau... the Green Silkworm cocoon. However, Xiao Qin didn’t understand. How could such a genius Beast Tamer of a research type, science type, and exploration type be related to the Marine Environmental Protection Department? Moreover, he actually wanted her to be a subordinate or even help build a base. It was ridiculous.

“I don’t understand,” she said.

“I don’t understand either.” Xiao Hai looked at his daughter and said, “In fact, an Ocean Environmental Protection Department has also been established in East Sea Dragon Palace City. Dong Huang’s Environmental Protection Department is actually established to correspond to the department of Dragon Palace City. You just have to know that this Shi Yu is also the minister of the Ocean Environmental Protection Department of Dragon Palace City. According to reliable news, there are more than 50 overlords of Dragon Palace City joining the Sea Environmental Protection Department of Dragon Palace City. The Sea Dragon King, the Azure Dragon King, and the descendants of the Thunder Dragon King have also joined. Many descendants of overlords and monarchs are only ordinary members among them. Apart from that, there are even tens of thousands of monarchs and commanders inside. So, do you understand now?”

On the other side, Xiao Qin’s pupils dilated slightly.

“In short, there’s nothing wrong with you joining this department. If it weren’t for the fact that it’s unsuitable for me, Even I want to go see what’s going on.” Xiao Hai pushed out the documents.

At the same time, General Xiao Qin said in disbelief, “How is this possible?”

This person called Shi Yu led dozens of overlords? Tens of thousands of monarchs and commanders?

How was this possible? Unless he was the son of the Dragon God.

No, even if it was the son of the Dragon God, it was too ridiculous.

“He also has a deep relationship with a totem ice dragon that survived from the Time Emperor Era. That ice dragon has already joined Dragon Palace City and become the eighth Dragon King of Dragon Palace City. Shi Yu himself has even obtained the honor of being a general of Dragon Palace City. With the relationship between Dragon Palace City and Dong Huang, his identity and status are not a problem for him to be a general of our navy. Letting you temporarily become his subordinate is in accordance with the rules. This is all the information I know. As for whether there are more secrets, you can explore them yourself.”

“I hope you can grow a little in the Marine Environmental Department that has a deep connection to Dragon Palace City. Do you still have any questions?”

“...” Xiao Qin had yet to recover from her shock. After a moment of silence, she said, “Apart from me, is anyone else going this time?”

“Huang Qi, Qin Mingzhi.”

Xiao Qin said, “The two of them... By the way, did the two of them get a chance to go to Dragon Palace City this year?”

These two people were also genius warriors in the navy. Their results in the Marine Beast Tamer’s military arena were very good.

“Well, they should have seen Shi Yu long ago and are the first batch of Marines to know about the Marine Environmental Protection Department.”

“Is this Shi Yu really as powerful as you say?”

“He easily defeated the Second Prince of Dragon Palace City with the Iron-eating Beast and used a Water Slime to defeat the heir of an overlord...”

On the battleship driving towards the snow mountain, Xiao Qin licked her lips and asked Huang Qi and Qin Mingzhi, the two majors beside her.

The tall, thick-browed, and big-eyed Qin Mingzhi sighed and said, “Although we didn’t come into contact much in the past few days, from the situation at the Dragon Palace banquet, Minister Shi Yu’s strength is very unfathomable.”

“I’m not sure about other things. That Nine Li Battle Beast is a monster. Its strength and ability crushed the Thunder Dragon Crown Prince. A hundred-meter-tall beast... It’s even larger than the totem dragons. It’s so scary. I’m definitely not its match,” Huang Qi said with a tsk.

Xiao Qin said, “Then I have to meet this Minister Shi Yu later.”

The Beast Tamer, who was still strong, talented, and had a very mysterious experience, was about to become her superior. She wanted to fight him and take a look.

“Ah, this.” The other two smiled bitterly. No way, did they have to fight...

The battleship was getting closer and closer to the glacier. Xiao Qin, Huang Qi, and Qin Mingzhi, the three navy Beast Tamers sent by the Dong Huang Association to assist Shi Yu, suddenly discovered a super floating ice.

On the floating ice, a figure was sitting on a chair fishing

On his body, a Water Slime sat on his head. The Water Slime became a bird’s nest, and a little bird spirit was lying on it. On the young man’s left shoulder was a panda, and his right shoulder was a butterfly. The most unbelievable thing was that there was a ginseng baby on the fishing pole. “Coming.” Apart from these pets, there was also a gem cat beside the young man. It yawned and slowly spoke.

**e was**

At the same time, Shi Yu looked up at the battleship in the distance.

“Shi... Shi Yu.”

On the other side, holding a telescope and looking at this figure from afar, Qin Mingzhi took a deep breath and said, “How enjoyable. Is this the life of a big boss?”

“Not a bad battleship.”

“Unfortunately, it doesn’t look like it can fly.”

< Name > Silver Sea Warship

[Attributes]: Machinery

[Race Level]: High-level Monarch (Quasi overlord)

(Level of Growth): Monarch Level

Energy Points: 20.6 million

As the battleship approached, Shi Yu put away his pole and slowly got up.

## Chapter 337 Gem Cat’s Breakthrough Wish (2)

It was a super battleship with special energy enhancements. It was expensive to build, right?

However, although the energy of this kind of battleship was huge, it was basically used to maintain its function. It was actually very tiring to fight. It was best at super long-range attacks. If it was boarded by the enemy, the countermeasures weren’t that strong.

A moment later, the silver sea battleship stopped not far from Shi Yu. Xiao Qin and the other two stood on the battleship, and the four of them looked at each other.

“We meet again.” Shi Yu smiled and greeted the two soldiers.

Huang Qi and Qin Mingzhi nodded. At that time, the Tyrannical Sea Legend had suggested that they join the Environmental Protection Department. They didn't expect there to really be a chance. They hoped to obtain the Ice Dragon Badge too!!

As for the Time Fruit, as long as he worked hard for Shi Yu, he should have a chance to become a core member, right??

"I'm Xiao Qin, quasi general of the Dong Huang Navy's Dong Hai Fleet. Later on, because of my injuries, I've been recuperating in the mechanical army. This is the first time we meet, Minister Shi Yu." Xiao Qin looked at Shi Yu. Because it was the first time they met, she took the initiative to introduce herself.

"General Xiao Qin, hello." Shi Yu also nodded. He had obtained some information about the other party from Principal Feng.

Xiao Qin, the daughter of the legendary Beast Tamer Xiao Hai in the Beast Tamer Troops. After she became an adult, she directly joined the army and grew into a quasi general all the way. She was a Beast Tamer with the strength of the navy. However, later on, she fell into danger due to the harsh weather when she was crusading against pirates. In the end, she was seriously injured. It was said that in order to recuperate, she withdrew from the front line.

When Shi Yu saw the scar on the other party's face, he knew that it might be true. As for the other two, they were also well-known figures in the younger generation of the navy. Otherwise, it would be impossible for them to obtain a spot in Dragon Palace City that occurred once every five years. They were both master-level Beast Tamers who had contracted several monarch-level sea beasts. Shi Yu remembered that Huang Qi seemed to have contracted another monarch-level sponge life form in Dragon Palace City this time, while that Qin Mingzhi had contracted a monarch-level Dragon Claw Octopus. "Did you contract this battleship?" Shi Yu asked Xiao Qin.

Xiao Qin shook her head and said, "No, this Silver Sea battleship is the subsidiary of a super battleship of the navy's mechanical army. It's similar to a clone, and it can't be contracted. However, I can rely on commands to command it for the time being. Next, I'll use this battleship as the core and modify it into a sea base of the Marine Environmental Protection Department."

Shi Yu was slightly stunned. They wanted to use this big guy to modify it into a sea base for the Ministry of Environmental Protection.

Not bad.

However...

"There's no hurry. This thing is very fast, right?"

"Do you have the coordinates of the Chaos Sea? How about we take a look over there?" Shi Yu smiled.

When he returned from the Rainbow Islands in the Dragon Palace City, he asked the Ice Dragon and the Sea Dragon King to help him recover the Rainbow Islands. The Sea Dragon King indeed promised to send troops there later.

Shi Yu didn't know what the situation was over there either. He wanted to take a look.

The Multicolored Archipelago belonged to the Chaotic Sea at the border of the Dong Huang Sea and the Seven Islands Sea. It wasn't too far away. Susu had yet to return home after following him out. Now that it had mastered the maximum level of cleansing, it wasn't bad to go back and train.

On the way, he sent the badge to Ice Dragon in Dragon Palace City.

Most importantly, after leaving the range of Dong Huang, the Multi Colored Islands were all near the totem area. Perhaps he could find targets suitable for the bombardment of Baby Ginseng.

As for danger... Shi Yu looked at the gem cat fishing on the ice beside him. With the protection of the overlord cat that could teleport, what was the danger? For the gem fruit, the gem cat returned not long after returning to Ancient Capital University... It was impossible for it to put Baby Ginseng in danger.

"Chaotic Sea Region?" Xiao Qin raised her eyebrows and said, "That place is already far from the Dong Huang Sea Region. Pirates are everywhere there. Why are we going there?"

"Don't tell me it's also for the treasure left by the Pirate King."

"Huh?" Shi Yu was stunned.

"What did you say just now?" This girl also transmigrated? How did she know about the Pirate King and One Piece?"

Was it a misunderstanding?

"One Piece is... real?" Shi Yu probed.

"What one piece?" Xiao Qin was confused.

"What's with the Pirate King and the big secret treasure you just mentioned..." Shi Yu sighed and asked.

"And, what's this Pirate King?" Shi Yu asked again.

"Don't you know?" The corners of Xiao Qin's mouth curled up. "I thought you knew."

Eleven, Buggy, Baby Ginseng, and the other pets hung on Shi Yu and shook their heads secretly.

How could Shi Yu know this info? This fellow had already been tortured by adding points and meditation to the point where he didn't have time to study. He was hanging on by the index's search function.

As for the index, it only included information in the country. It would be strange if Shi Yu wasn't confused about things from abroad.

"The Chaotic Sea Region is the paradise for pirates. These pirates mainly prey on the merchant ships between the seven islands and the Dragon Blood Beast cubs of the East Sea. They don't belong to any force, but because they're wanted by Dong Huang, Dragon Palace City, and the seven islands, they're mainly stationed in the various totem countries and sell their goods."

"Since entering the modern era, there have actually been very few pirates, and even fewer powerful pirates. However, in ancient times, the profession of pirate was very popular. There were even many legendary Beast Tamers who ran rampant on the sea, calling themselves the overlord of the sea. The so-called Pirate King was a titled-level pirate who appeared on the seven islands during the era of the Sky

Emperor Dynasty. It was said that he roamed the world as a pirate and plundered the treasures of many countries, completing the dreams of many pirates. Before he died, he even announced that the Beast Taming Space had been modified into a mystic realm, leaving behind a legendary resource that was sealed in a certain place in the East Sea, waiting for the fated to find it.”

### Chapter 338 Gem Cat’s Breakthrough Wish (3)

“But after a long time, no one really found the so-called big secret treasure, but some time ago, news of the Pirate King Ruins suddenly spread, and many pirates started to party again. The Dong Huang Navy also secretly paid attention to this matter, but I don’t know if it’s a rumor or if it’s true.” Xiao Qin put out the cigarette and said.

“It’s ridiculous.” Shi Yu took a deep breath.

Speaking of which, it was good to have strength. One could travel the world as a pirate and even plunder treasures from other countries...

“What legendary resource?” Shi Yu asked again.

“It’s said to be a legendary gem snatched by the Pirate King in the Gem Kingdom. Why, are you interested?” Xiao Qin said.

“That’s not it. It’s just that I’m meeting a member of the Environmental Protection Department of Dragon Palace City in the Multi Colored Islands in the Chaotic Sea,” Shi Yu said.

However, just as he finished speaking, the gem cat beside him almost fell into the water with a shocked expression!

Gem Kingdom?

Was it the totem country that believed in the Gem King Beast?

That was the best place to produce the Cat’s Eye Gem needed for the evolution of the gem cats.

Legendary-level gem?

“Huh?”

Suddenly, the gem cat looked at Shi Yu.

“Huh?”

Shi Yu also looked at the gem cat.

The gem cat stared...

Damn...

Damn Shi Yu, how could he not be interested!

If there was really a gem, it could successfully break through to the totem level with the gem and become a better bodyguard!!

“Huh?”

Shi Yu was stunned. He suddenly remembered that the gem cat seemed to have been thinking about the Legendary-level gem resource and wanted to rely on this to break through... Could it be that the gem cat was interested in the ruins of the Pirate King...

However, if he remembered correctly, the gem cat seemed to have used a legendary gem to try to break through.

Unfortunately, it failed.

Although Legendary-level resources could almost 100% allow monarch-level pets to break through to the overlord level...

However, there was less than a tenth of a chance for an overlord-level pet to break through to the totem level.

Using this to break through was too extravagant.

Now, Teacher Cat actually wanted to break through again?

But even if he obtained the gem, the success rate of this breakthrough was also worrying.

Shi Yu: “In any case, even if there are really ruins of the Pirate King, aren’t there so many pirates? Isn’t it a little dangerous...”

(Do I have to disguise Baby Ginseng as a gem and kill a bunch of them first?)

Gem Cat: “Just lead the way. I’ll think of a way.”

The man and cat communicated secretly.

However, if there were really legendary-level resources that needed to be snatched by force, Shi Yu and the others were really very relaxed.

As the minister of the Ministry of Environmental Protection of Dragon Palace City, the various Dragon Palace overlords owed him a favor. With a call from him, he could pull dozens of overlords over. Even if the Pirate King revived, he would be scared to death, let alone a group of small pirates. “We can go to the Chaotic Sea,” Xiao Qin said indifferently. In any case, there was a battleship.

“But before we go there, Minister Shi Yu, I wonder if you can give me some guidance. Of course, it’s alright to refuse. I just heard the two of them talk about the magical deeds of Minister Shi Yu’s pets and wanted to experience it if possible.”

Xiao Qin’s gaze, which contained battle intent, landed on Shi Yu’s cute pets. She was very curious why these cute pets were so scary in the mouths of Huang Qi and Qin Mingzhi.

After recuperating in the mechanical department for so long, it had been a long time since she had fought with experts. The World Tournament was imminent, and Xiao Qin, who hoped to enter the top ten, didn’t want to miss any opportunity to challenge experts.

“Battle?” Shi Yu didn’t expect the subordinate sent by the association to challenge him. He was momentarily stunned.

If he remembered correctly, the other party was level-six, while he was only level-five. Wasn’t this bullying him?

If he lost, how could he be happy as this person’s superior?

“Yes, it can be done with single 1vsi.” As Xiao Qin finished speaking, with a thought, a purple summoning array appeared in front of her. In the summoning array, a red sea star that was completely naked, covered in black holes, two meters tall, and had human features appeared.

< Name > Demon Sea Star

[Attributes]: Water, Spirit

(Race Level): Low-level overlord

(Level of Growth): Monarch Level

Energy Points: 2,8800,000 “Tsk tsk...” After this terrifying red star appeared, it smiled at its Beast Tamer and waved at the other three. In the end, it looked at the panda, ginseng baby, butterfly, and red bird spirit on Shi Yu’s body.

Boom!

At the same time, energy surged on Xiao Qin’s body. Her short hair fluttered as she activated her strengthening talent.

< Name > Demon Sea Star

Energy Points: 6.9 million

The rising aura of the red star made Eleven and the others look serious.

“Not bad.” Seeing that Xiao Qin’s development of the Beast Taming Talent had actually reached this level, Shi Yu’s gaze was stunned.

As expected of a top-notch master of Marine strength.

“You’ve already summoned your pet. How can I refuse?” Then, Shi Yu said helplessly. At his signal, Chi Tong, in the form of a bird spirit, slowly flew up.

“Screech ~!” It met the gaze of the Demon Sea Star, and burned.

Since this person would be assisting him, then why not a friendly battle.

“Huh?” At this moment, when it saw Shi Yu and this girl who weren’t anxious at all nor afraid that the gem would be taken by others first... Not to mention they were even about to fight here... The gem cat beside them was immediately anxious. These guys could fight when they came back! What about its breakthrough opportunity...

## Chapter 339 Shi Yu vs the Admiral

Demon Sea Star!

What Xiao Qin summoned was a very strange pet.

Of course, for Shi Yu and the others, this Demon Sea Star was not strong alone.

However, as a super genius with a top-notch master title who raised her Beast Taming level to level six, coupled with her strengthening talent, this Demon Sea Star was quite extraordinary. If it weren't for the fact that Shi Yu had two talents that could solidify the foundation of the pet through the skill index and train the skill level to a very high level... Relying on telepathy alone as he leveled up would make it really difficult for him to fight these Beast Tamers with enhancement talents.

A master-level Beast Tamer with the strengthening talent could increase the pet's energy level by a million, depending on the development of the strengthening talent.

As for top-notch masters like Heavenly King Zou and Xiao Qin, once the strengthening talent was activated, it wasn't impossible to strengthen millions of energy points.

And to reach ten million, that was exclusive to legendary Beast Tamers.

The reason why the pets cultivated by Beast Tamers were stronger than wild ferocious beasts was largely dependent on the support of Beast Tamers.

"Forget it, you guys can fight if you want. As soon as possible."

Seeing that Shi Yu and Xiao Qin had already reached the point of hostility, the gem cat sighed helplessly and gently placed its paw on the ground.

In the next moment, its gem eye turned ice-blue, and a cold aura blossomed from its cat claws. With a hum, in a short second, the thousand-meter range with it as the center quickly turned into hard glacier land. Even the Silver Sea battleship was frozen inside.

"Huh?"

In fact, Xiao Qin had long noticed this gem cat. However, there was no information about the gem cat in Shi Yu's team information. At this moment, seeing this gem cat casually erupt with such a powerful strength, she instantly recalled something.

"You're the cat that followed Lu Qingyi to the Dragon Palace banquet five years ago?" Xiao Qin said subconsciously.

"Little girl, your memory is pretty good." The gem cat didn't have a deep impression of Xiao Qin, but after hearing what Xiao Qin said, it estimated that Xiao Qin had also gone to the Dragon Palace banquet.

"General Xiao Qin, this Teacher Ying is the guardian overlord of Ancient Capital University, the deputy minister of the Marine Environmental Protection Department."

Huang Qi and Qin Mingzhi, who had been to the Dragon Palace banquet, quickly explained.

Hearing this, Xiao Qin nodded speechlessly. The blue energy wave surging around her body slowly fused into her body.

After taking a deep breath, she leaped gently onto the glacier. When she landed, a stream of water appeared out of thin air under her feet, slowing the impact of her jump and allowing her to land steadily!

“Heh!!!” However, the Demon Sea Star’s movements were much more domineering. It bent its legs and flashed, instantly appearing in front of Xiao Qin. A crack was even stepped onto the glacier under its feet.

“My pet is this.”

At the same time, Shi Yu also took a few steps forward with one hand in his pocket. At this moment, Chi Tong, who was in the form of a bird spirit, flew in front of Shi Yu noisily.

“Wu Wu Wu Wu!!!” Seeing this, the little panda Eleven, who was left on the stool, couldn’t do anything. Although it also wanted to fight, it had just finished self-mutilating in the ruins space before leaving. It was still in the resting stage and had yet to recover. It could only hand it to Chi Tong first. After all, the opponent didn’t look weak.

“Wuwuwu.” “Yiya!!” Buggy and Baby Ginseng expressed that it was fine to watch the show. A battle of this level was not something they could participate in. Even if they used the Time Fruit, it would be difficult. After all, the time it took to erupt was too short.

“Ning.” Susu lay on Eleven’s head and was curious why the increase in the strength of that starfish was so big all of a sudden, even greater than the Fruit of Time.

It had just arrived in the outside world not long ago, and it was still not very clear about the various situations of Beast Tamers.

“Yiya!!” The team’s knowledgeable ginseng baby quickly explained. This was a water-element strengthening talent. Although it was a common talent, this woman’s cultivation was abnormally powerful!

However, there was no problem. Although Chi Tong’s energy might not necessarily be higher than the other party, its skill proficiency was high. Moreover, it could use Shi Yu as a strengthening equipment with the same effect!

“A bird spirit? Why do I remember it’s a sword spirit?”

At that moment, Xiao Qin looked at Chi Tong who flew out and said slowly. Although she and the Demon Sea Star could sense that this cute, harmless, and pigeon-like little bird spirit was not simple, if she remembered correctly, Shi Yu’s information recorded that he contracted a fire sword spirit!

“It’s just the different forms of the same pet,” Shi Yu said with a smile.

“Jiu!!”

At the same time, a fire spirit sword appeared under Chi Tong’s tender feet.

Swoosh! Swoosh! Swoosh!

As it flew, it grabbed the fire sword spirit with its claws and swung out a few fire sword auras. Little Chi Tong revealed a calm expression as if it's an alternate account.

"Interesting." Seeing this, Xiao Qin showed a very interested expression. This was the first time she had seen such an undead race that could switch forms between sword and bird.

However, it was not important. There were too many strange pets in this world. As a Marine, she was especially profound about this. After all, almost every day, there would be new deep sea species updated in the navy's database.

"End the battle quickly!" At this moment, as the gem cat urged, Xiao Qin and Shi Yu nodded and entered battle mode at the same time.

Water flowed in Xiao Qin's eyes. Because the strengthening process required a high level of tacit understanding with the pet, on the glacier, the Demon Sea Star slowly raised its fingertip. When it aimed at Chi Tong in the sky, Xiao Qin also made a finger gun posture and aimed at Chi Tong in the sky.

#### Chapter 340 Shi Yu vs the Admiral (1)

Bang!

Bang! Bang! Bang! Bang! Bang! In an instant, several spinning water balls completely made of red liquid shot out from the fingertips of the Demonman Planet like water cannons, turning into red meteors that locked onto Chi Tong in the sky.

Super skill, Wave Cannon.

Swoosh!

At the same time, in the sky, Chi Tong, who was holding the sword spirit with both feet, also threw the sword spirit away. It used the Sun Flame as a fuel and activated the Light Flame Sword skill. The moment the sword spirit was thrown out, it erupted with a speed faster than the red wave cannon. It also turned into similarly many sword lights in the sky, wanting to block the red wave cannon!

"So fast," Huang Qi exclaimed.

"However, its power is a little weak," Qin Ming said.

The max-level Light Flame Sword was incomparably fast. Unfortunately, it was a fire-element skill after all, countered by water.

In just a single exchange, countless red wave cannons swept up heat waves amidst the "bang" sound of collision, devouring the sword light and continuing to attack Chi Tong.

Seeing this, Chi Tong was so scared that it hurriedly spread its wings and ran. The Demon Sea Star chuckled and moved its hands. These wave cannons actually followed Chi Tong like gas bombs.

However, the total number of sword lights just now seemed to be one more than the wave cannon. After the collision that filled the sky, a sword light fell from the gap and continued to descend. Seeing this, Xiao Qin's gaze froze. After the Demon Sea Star reacted, it instantly made a blocking posture.

"Yi!" The substantialized Psychic wave condensed into a shield in front of Demonic Man Star and instantly pinched the sword light that escaped the net. "Be careful." At the same time, Shi Yu reminded Chi Tong appropriately. However, there was no need for him to remind him. Chi Tong, who had super vision, was already flying quickly in the sky, trying to dodge these wave cannons that were constantly chasing it through its super reflexes.

"This isn't a simple wave cannon."

"It's a combination skill."

However, as Huang Qi and Qin Mingzhi gulped, something unexpected happened.

As they approached the bird spirit, Chi Tong, these wave cannons had no intention of hitting it directly. Instead, they collided with each other. Then, a tsunami-like water wave power swept in all directions, locking the agile Chi Tong in a huge area.

Seeing this, with a boom, orange flames erupted around Chi Tong, trying to resist for the last time. However, the impact of these water waves was much stronger than its strength. It instantly swallowed the flames and turned into a tsunami that swept up Chi Tong's entire body. At the same time, a red Psychic wave invaded its body!

"High-level psychic skill, mental control. This is a combination skill of the Water Wave Cannon and mental control. As long as the attack comes into contact with the enemy, it can control the other party's mental power." Huang Qi and the others immediately thought solemnly when they saw this.

Just as they thought, the moment the water touched the bird spirit, mental waves instantly invaded its body. A trace of redness instantly flashed in the bird spirit's eyes, and its mind was controlled, turning it into a puppet of the Demon Sea Star.

However, just as the two of them thought that Shi Yu and Chi Tong were in trouble, suddenly, the roar of the Demon Sea Star came from the battlefield.

"Roar!!"

The two of them looked over in surprise, only to see that the Demonman Sea Star, who had condensed a mental shield, was still in a stalemate with the Light Flame Sword. No, to be precise, it was in a stalemate with the main body of the Light Flame Sword and the sword spirit.

"So this is the main body." After Xiao Qin shouted, the bird spirit in the sky gradually disappeared.

The bird spirit, which had been controlled and successfully attracted the firepower of the super skill, was instantly given up by Shi Yu because it was Chi Tong's clone. At the moment it condensed a sword spirit, the relationship between the bird spirit and the sword spirit's main body had already been changed.

Crack!!!

At this moment, Chi Tong, who had successfully approached the enemy's main body, was in a lock. Although its strength was inferior to the other party... It was also using all its strength to release stronger attacks.

It swept up the Sun Flame and burned its soul power. The Interlocking Sword formed by the Soul Sword and the Sun Flame Sword wrapped around a strong deterrence wave and directly slashed out.

Boom!

The gray sword that contained a hot aura slashed over. The Psychic Shield created by the Demon Sea Star instantly shattered, and the shocking sword light was about to hit the Demon Sea Star.

"Wave Cannon." Xiao Qin was neither anxious nor slow. She instantly made the Demon Sea Star understand the Beast Tamer's tactical intention.

It immediately condensed a huge blue water wave in its mouth to resist.

The wave cannon condensed in front of the Demonic Man Star, directly acting as a second shield to withstand the sword light slash. As Xiao Qin expected, the sword light directly detonated the wave cannon, and the energy explosion wave that swept over again instantly swept Chi Tong and the Demonic Man Sea Star flying!!

A shocking explosion caused serious damage to Chi Tong and the Demon Sea Star!!

"Crazy woman." The corners of Shi Yu's mouth immediately twitched when he saw that the other party's young lady actually liked to exchange injuries.

Huang Qi, Qin Mingzhi, and the others also realized this brigadier general's valiance again.

However, Eleven, Baby Ginseng, and the others not far away, liked it.

Unfortunately, this move was useless against Shi Yu's pets. In this day and age, who didn't know a recovery skill?

"Mi!!!"

The huge explosion instantly blew Chi Tong away, but it didn't affect anything. In the smoke, during the process of Chi Tong flying backward, under the wrapping of the Flame of Regeneration, its injuries and physical strength recovered almost quickly.

It hurt, but it wasn't a big deal. After all, it was the main attacker. The core of the explosion was even closer to the Demon Sea Star!

"Ah!!!" On the other side of Chi Tong, the Demon Sea Star, which had several cracks all over its body from the explosion, shouted and cried out. However, seeing that Chi Tong was fine, it immediately stopped crying and revealed a dissatisfied expression. The damaged parts all over its body quickly regenerated and instantly recovered to normal. Soon, no injuries could be seen.
