

## **Beast 431**

### Chapter 431: Birth of a Mechanical Pet (1)

The Divine Wind Nation, also known as the Divine Eagle Nation, was also famous because they had successfully modified the local totem, the Wind God Eagle, into a half-god level mechanical divine eagle back then.

Apart from that, there were also rumors that the current legendary Beast Tamer of the seven islands was a “man-made person” involved in biological mechanical modification. Therefore, even without the power of a pet, her own battle power gave her the right to be called a Valkyrie.

After Dragon Palace City was invaded by the Poison Dragon Totem, without concrete evidence, the reason why they didn’t dare to make a confrontation directly and chose to investigate the evidence instead was simple. It was because the other party had the valkyrie presiding over them.

“Like the cyborgs in Dragon Ball?” Shi Yu muttered in his heart. This was all gossip from the Sea Dragon King of Dragon Palace City. There were no records of this in Dong Huang.

Or rather, it was not good to let ordinary Beast Tamers know.

“Alright, let’s do this.”

As Shi Yu took out a high-level smart chip from the ruins space and placed it in the groove of the experiment table, Dean Hao said.

Soon.

Under Dean Hao’s operation, three lights lit up and emitted red, white, and blue beams.

The three-body beam focused and covered the entire high-level smart chip.

Soon, the transparent glass-like smart chip was dyed in three colors. The three colors were like liquid as they began to flow and fuse in the mirror.

About a minute later, the color on the high-level smart chip began to fade, returning to the appearance of a transparent lens.

At the same time, the light from the three lamps slowly disappeared.

The gem cat watched eagerly.

“Alright!” Dean Hao chuckled and said, “Next, it’s time to assemble it and the Hundred Transformations Stone with an adaptability device.”

When Shi Yu heard that, he nodded and took out the Cube-like Hundred Transformations Stone.

The Hundred Transformations Stone wasn’t big, but it was made of 27 small cubes. It was like a Rubik’s Cube, and the middle could be turned like the Rubik’s Cube.

Depending on the attributes, its color was also different. For example, the wind-element Hundred Transformations Stone was white with a weak green halo.

As for the adaptability device, it was very similar to a high-level smart chip. If the high-level smart chip was like a hard transparent lens, then the adaptability device was a pile of transparent stickers.

Although it looked simple, Shi Yu and the others had used their super vision to carefully observe these mechanical materials. They realized that be it the smart chip or the adaptability device, there were countless dense codes on them. They were very complicated.

“The Hundred Transformations Stone is easy to awaken, easy to assemble, and easy to modify. You only need to paste the adaptive device on both sides of the smart chip, insert it into the Hundred Transformations Stone, and paste the adaptive device on the 54 small faces on the six sides of the Hundred Transformations Stone. Then, you can complete the assembly.”

“Alright.” Shi Yu immediately followed Dean Hao’s instructions. It was indeed simpler than he imagined. As expected of the most user-friendly mechanical material to newbie Mechanics.

Soon, Shi Yu completed the operation.

At the same time.

It was unknown if it was the Hundred Transformations Stone shining, the adaptive device shining, or the three reacting.

A green light instantly enveloped the entire Hundred Transformations Stone. It was very dazzling.

Seeing this, Dean Hao touched his beard and said, “This way, it’s completed.”

“Next, as long as you make physical contact with it and enter a meditative state for more than a minute, you can establish a mental connection with it and set the initial command.”

“After this is completed, it will be completely activated. It will complete the final evolution and become a real life form.”

“In addition, because it’s a high-level intelligent chip, it can have a certain understanding of the world when it just woke up. It has a certain amount of basic knowledge stored inside, like a professional encyclopedia. It can be seen as a super genius with a very good foundation. After that, no matter what you want to teach it, its acceptance can be very fast.”

“Among them, there’s also some basic mechanical knowledge. Even if you know nothing about the mechanical field, it can take better care of itself in the beginning. You don’t have to worry about it getting sick.”

“Of course, it knows a little about everything, but at the moment, it only knows a little about everything. For example, the knowledge in the archeological and Feeding directions is definitely not as rich as the knowledge recorded in your archeological index and Feeding index. Therefore, if you want to carry out subsequent upgrades to its data chip, you can also come to me. This will be faster than learning manually.”

“However, although it has a certain understanding of the world, in essence, it’s still a newborn. Its personality after birth is related to the initial command you designed. This process is also considered ‘early education guidance’.”

Dean Hao explained in detail to Shi Yu.

A moment later, Dean Hao finished speaking.

Shi Yu picked up the Hundred Transformations Stone and thanked him. "Thank you, Dean Hao. I'll go back and do the final awakening now."

"Huh?" Dean Hao was stunned and nodded.

"Meow?"

The gem cat was also stunned. It looked at Shi Yu and widened its eyes. "What initial command are you planning to set?"

"Let it wake up before going back."

Shi Yu refused. How could he let a cat know about such a private matter?

The gem cat was furious. It was certain that Shi Yu was definitely up to no good.

...

After returning to the dormitory of Ancient Capital University, Shi Yu immediately entered the mechanical research institute in the ruins space and shook off the curious gem cat.

In his research institute, Shi Yu sat on a stool and took out the Hundred Transformations Stone.

"Wuu!" "Wu!" "Yi!" "Mi!" "Ning!"

Chapter 432: Birth of a Mechanical Pet (2)

After Shi Yu returned, Eleven and the others surrounded the room and muttered and discussed.

They all knew that Shi Yu was creating a child inside.

"What do you think?"

After sitting and thinking for a while, Shi Yu opened the door and looked at the pets.

The reason why he returned was also to hear every pet's opinion.

Shi Yu's positioning of the sixth pet was an all-round machine.

It could study and was proficient in battle.

It would be best if it could study itself into a battle-type mecha that could accommodate multiple pets.

At that time, he would sit in the driver's seat, Chi Tong would be a weapon, and it would evolve into a Blue Sea Sprite. He could connect to the sea and the Susu with infinite energy points as energy. Eleven, Buggy, and Baby Ginseng would each do their own jobs. Wasn't this invincible?

Therefore, when setting the initial command, if he could integrate some of Eleven and the others' ideas... Perhaps everyone could cooperate better in the future.

Apart from that, in terms of daily life, Shi Yu also felt that he lacked a butler and assistant-type pet. He could squeeze in this aspect.

Now... it was equivalent to customization in games.

However, in games, it was about appearance. This was about personality, behavior, and dreams.

“Wuu—”

Outside the door, Eleven was the first to give a suggestion when it saw Shi Yu suddenly poke his head out.

It hoped that the little machine’s personality had elements such as hard work, self-discipline, and diligence.

“Alright.” Shi Yu nodded. Of course, that was not a problem.

Mechanics... As long as they didn’t die, they just had to fight to the death.

“Wu!! (Not afraid to work!!)”

Buggy also gave a suggestion that was similar to Eleven’s.

However, the corners of Shi Yu’s mouth twitched. He kept feeling that something was wrong.

Was it afraid that when it studied mechanical beasts with the little machine, the other party would squeeze him dry by lazing around?

“Yi!! (Knowledge changes fate!)” Baby Ginseng pushed its glasses.

It heard that the new little machine was a genius?

Heh, it looked like it had another assistant.

The genius ginseng looked up at the starry sky.

It had already imagined himself wearing fighter armor and destroying a Bean Bear with each shot.

Shi Yu nodded. Of course.

Machines that couldn’t learn and research themselves weren’t good machines.

“Mi!! (Girl!)” Chi Tong strongly suggested.

“Oh...?” Shi Yu raised his eyebrows. Could this be set?

It seemed like it could?

But why did it have to be a girl!

Was it trying to adjust the level of Yin and Yang in the team?

Of course, this was even less of a problem. Even if Chi Tong didn’t say it, he still planned to do it.

The female voice definitely sounded better than the male voice.

“Ning.” Susu’s thoughts were the simplest.

It hoped that the little machine liked pollution-free energy.

After all, its hometown, the Rainbow Islands, was polluted by the power of the forbidden machinery of the seven islands.

“Yes.” Shi Yu nodded.

The Hundred Transformations Stone (Wind) used wind as the main energy source. In the future, when it fused with Susu, it could also use the energy of the sea as a power source with the “Blue Sea Contract” of the Blue Sea Sprite. Wind power and water power were both pollution-free energy sources.

Shi Yu would naturally consider this. Otherwise, it would be bad if Susu and the little machine fought in the team.

“Alright, alright, you guys go train.”

After hearing the pets’ thoughts, Shi Yu chased them away and returned to the research institute.

It began to build a mental connection with the mechanical pet and set up the initial command.

In the bright room, Shi Yu sat in anticipation. He played with the Cube in his hand and closed his eyes to enter a meditative state.

A minute later...

Shi Yu seemed to have entered the virtual online game space of a VR game. His mind was connected to the Hundred Transformations Stone’s machinery, and his surroundings were like a cosmic tunnel. The mechanical Rubik’s Cube filled the sky as it circled around him.

[Firstly... gender, female.]

[Setting: Butler, Assistant, Secretary.]

[As for personality, it’s hardworking, diligent, not afraid to work, likes to study, and has rock-like willpower. It has a very strong sense of responsibility for work and missions...] Shi Yu set it for a few minutes.

[Treat Eleven, Buggy, Baby Ginseng, Chi Tong, Susu as companions... Admire and worship the most handsome and outstanding ‘Creator Shi Yu’ in the world as an idol...]

Shi Yu coughed dryly.

[The dream is, or rather, the main storyline is to become the most powerful all-purpose machine and assist Beast Tamer Shi Yu and his companions in becoming stronger.]

Shi Yu kept customizing the machinery in the spiritual space. The initial setting of the little machinery was being perfected bit by bit.

In the room, Shi Yu held the Hundred Transformations Stone and muttered.

Outside the house, Eleven and the others looked at each other. Why didn’t they come out yet?

Obviously, none of them went to train. They were all waiting for the results.

After a long time...

[Completed!]

After customizing for a long time, Shi Yu finally exited the mental connection state.

At this moment, the high-level smart chip was completely activated.

The nine squares on one of the six sides of the Hundred Transformations Stone directly transformed into a smooth mirror, just like a cell phone screen!

At the same time, because it was a high-level smart chip with a human language, the Hundred Transformations Stone directly said its first words in a human voice.

At this moment, the Hundred Transformations Stone Machine was like a smartphone. One side of the screen lit up, and a virtual profile picture that was automatically synthesized according to the existing information and Shi Yu's settings appeared on the cube's screen.

It was a girl about ten years old with long white hair, a chibi type. Her long hair was tied into a ponytail at the back of her head and naturally hung down. There was a stray bouncy strand of hair at the top of its head. It slowly opened its eyes and let out a clear, experienced, and pleasant female voice. "Are you... my master?"

Chapter 433: Birth of a Mechanical Pet (3)

"Huh?" Shi Yu frowned and looked at the chibi on the screen..

"Why is it a chibi..."

"You... are my master?"

"So be it if it's a chibi, but... why is it still a pixelated version?" Shi Yu looked at the blurry profile picture on the screen that looked like countless small boxes and was speechless. Which era's high-level intelligence chip was this?

"You... are my master?"

[Teaching success rate]: Medium

However, what delighted Shi Yu the most was that the success rate of super skills taught to high-level intelligent life forms was actually medium??

It was medium at the start. Was it that good?

"You... are my master?!"

"That's right, I'm your Beast Tamer." Shi Yu revealed a thick smile.

"My master is the most handsome and outstanding Beast Tamer in the world. You..." The new little machine let out a puzzled voice, making Shi Yu's heart skip a beat. Was there a bug?

Was he not handsome? Was he not outstanding? Even if he wasn't, it had to think so!

Wait, or did it mean that even if the initial command was set, it had to be guided slowly?

Dean Hao seemed to have said that high-level mechanical lives were different from ordinary machines. They weren't low-level machines that rigidly carried out procedures. They also had a certain level of self-thinking ability. The initial command only had a certain impact. If he wanted the mechanical life to believe it, he still had to have a long-lasting strengthening setting...

"It's me," Shi Yu said firmly. "I'm the most handsome and outstanding Beast Tamer in the world, Shi Yu."

The profile picture on the Cube screen hesitated for a moment before nodding and choosing to believe it for the time being.

High-level mechanical lives were actually similar to heroic spirit soul seeds. They would have a certain mental connection to the person who set up the initial command.

Therefore, even if there was no contract for the time being, it would still treat Shi Yu as its master.

Of course, he still couldn't enjoy the various benefits of the contract for now.

"I'll give you a name next." Shi Yu looked at the shining Rubik's Cube and said, "Well... Let me think. In the future, you have to complete a research mission. Use a dream illusion of a Kirin fossil to transform yourself into a mechanical Illusion God. This is also the evolution direction in the future. Then, let's find a name from this direction."

"Why don't I call you Rubik's Cube?"

"?" The little machine's profile picture disappeared and turned into a pixel question mark.

It could understand the meaning of the name, the meaning of the mission, and the meaning of evolution. Even for a divine beast like the Kirin, its basic information had simple records. It knew that this was an auspicious divine beast from the Mythical Era.

In short, it could understand every word Shi Yu said, but after connecting them, it didn't understand why its name had become "Rubik's Cube".

"Well... It does seem to be alright. It's so difficult."

"Maybe I can call you Lin directly?"

In the myths on Earth, the male Kirin, "Qilin", was known as Qi, and the female Qilin was known as the Lin. It was similar to the male Phoenix and the female Phoenix being called "Feng" and "Huang" respectively. Although there was no such thing in the Phoenix Race in the Mythical System of Planet Blue, Shi Yu still followed this saying and studied names for the virtual assistant.

"Not good... The name doesn't sound like a girl's."

The little machine: "..."

Wait, why not, Yaoguang?

Shi Yu fell into deep thought. The light of the Big Dipper represented auspiciousness, and the Kirin was also an auspicious beast. Moreover, this name felt pretty compatible with a mechanical life form...

Wait, after pronouncing it carefully, Shi Yu felt that this name was a little like a villain. It was not intimate.

It gave people the feeling that it would kill its master and destroy the planet.

It was not auspicious at all.

The profile picture in the Cube said seriously, "Master, please think carefully..."

"Forget it, then let's call you 'Ling', changing the word 'Lin'," Shi Yu said. "Ling, be serious. Treat your work seriously. When you become a mecha later, it's best if you're also majestic."

The profile picture was silent for a moment before accepting it silently again.

It looked at Shi Yu and then outside the room. After a moment of silence, it said, "From today onwards, I will set strict learning and training missions for Master and your pets."

"Now, I'm gathering basic information. Master, how long do you meditate every day?"

"Uh, meditation? If I'm free, I meditate a little. If not, I play. Everything will depend on fate. We'll see if we're free that day."

Ling: !!!

"According to scientific research, the best meditation time for a Beast Tamer every day is eight hours, so in order to let Master sign a contract with me as soon as possible, you have to maintain a strict eight hours of meditation time every day."

Shi Yu had a strange expression. Wait a minute, did something go wrong when setting the initial command? Why was it related to his own work?

"I'll formulate a training plan as soon as possible. Next, I want to collect the daily training of my companions." With that said, it wanted to go out and find Eleven and the others.

"No hurry, no hurry..."

"No, it would be my fault for wasting too much time."

"Ah..." Shi Yu looked at the Magic Cube that had turned around like a confused little shark and looked at the ceiling. He kept feeling that something was wrong with the design this time.

It seemed like he had designed a troublesome kid. How could he slack off now? Was there a need to be so serious?

In the outside world.

As the mechanical life came out, Eleven, Buggy, Baby Ginseng, Chi Tong, and Susu immediately surrounded it with curiosity.

At the same time, Mechanical Ling also observed its companions in the settings seriously.

Iron-eating Beast... Mid-level transcendent race. Unknown butterfly, presumed to be bug-type. Ginseng Baby, high-level transcendent race. Unknown spiritual body, probably undead-type. Water Slime, high-level transcendent race!

Its main mission was to help its master and companions become stronger. In addition, it was hardworking, diligent, not afraid to work, and had rock-like willpower. It had a very strong sense of responsibility for its work and missions... Therefore, it immediately asked about Eleven and the others' current training missions, wanting to formulate a more detailed and scientific training plan for them.

It thought it could do it well!

The moment it saw its companions, the basic information of Mechanical Ling quickly arranged and assembled a theoretically scientific training plan.

“Wuu!” “Wu!!”

In the face of their new companions' questions, Eleven and the others naturally answered seriously.

“Wu wu wu!! (It's the willpower training stage now. I have to turn into a young form and swim in the volcano, jumping down from a height of ten thousand meters...)”

“Wu!! Wu!! (Recently, I've been talking to the generations of Dragon Gods in Dragon Palace City in my dreams... Putting together their racial merits and sticking them to myself.)”

“Yi! (I've been researching the concept of 'samsara' and 'reincarnation' recently. For the Time Fruit, I wonder if it is possible to summon the power of a reincarnation life form's previous life?)”

Shi Yu followed closely behind, but he was still a little late.

In the outside world, the mechanical screen had already blurred. The expression on the profile picture had become “@. @” blurred eyes, as if its thinking was a little overloaded. Beside it, Eleven and the others looked panicked.

It only explained the daily training situation. How did it become like this!

Ling: “Analysis failed... Restart... Restart...”

Shi Yu :”...”

It was better to increase Ling's intelligence first.

At the current intelligence level, it was probably very difficult to understand Eleven and the others' daily behavior logic.

Forget about researching epic missions like mechanical phantom beasts and fused mechas, even newbie missions would probably be very difficult to complete now.

< Name > Ling

[Attributes]: Machinery, Wind

[Race Level]: High-level monarch

[Level of Growth]: Level 1 Awakening

[Race Skill]: Hundred Transformations, Advanced Intelligence, Wind Element Control

Shi Yu touched it twice.

[Teaching successful]

[Advanced Intelligence (Initiate) has been upgraded to Advanced Intelligence (Proficient)]

At this moment, Ling's gaze instantly became a little more intelligent, but after sensing the upgrade of his intelligence, it was still more confused.

"I can't understand..."

Seeing the dumb mechanical Ling, Eleven and the other pets shook their heads. Mechanical lives weren't very smart either. Was this really a genius?!

Chapter 434: Master, Increase Points

In Ling's understanding, as a mechanical life form, with high-level intelligent skills as an example, there were only two ways to increase the level of this skill.

First, increase intelligence through continuous self-learning.

Second, use other top-grade mechanical materials to upgrade the smart chip.

The former required a lot of time, while the latter needed rarer mechanical materials and high-level mechanical skills.

However, Ling shockingly discovered that his master had only touched it twice before his intelligence level increased.

This, it couldn't understand at all.

At the same time, what was even more incomprehensible was the daily training reported to it by its master's pet, its other companions.

It completely didn't match the information it had analyzed.

A ginseng baby should have obediently strengthened its life force and earth-element affinity. With this training mission as the core, it should strive to evolve into a "ginseng fruit tree" with wood and earth attributes and stronger life force as soon as possible. This was the scientific training route.

In the end, what was the concept of samsara and reincarnation? What was the Time Fruit?!

Mechanical Ling realized that it couldn't understand what its companion was saying at all. Under its forced analysis, it even almost got a fever and fell sick...

"Baby Ginseng, heal me..."

Shi Yu's weak voice came from the side.

Under the chaotic gaze of mechanical Ling, its high-level intelligence level went from entry level to expert level.

At this moment, Ling's profile picture was still staring at Baby Ginseng and Shi Yu in confusion. It still didn't understand the mechanism of this operation.

This was because Shi Yu and Baby Ginseng's combination skill of adding points and nourishing didn't look like a Mechanic's normal upgrade of a mechanical life form.

"I still have to continue..."

Beside him, the voices of Shi Yu and Baby Ginseng could be heard.

He added more points and continued.

Ling still didn't look very smart.

"Yi!"

Soon, as the level of the high-level intelligence began to increase from expert level to perfect level, mechanical Lin was finally not so confused.

Gradually, it had some clear understanding.

Ling said, " 卍 (oΔo) Master, you... cheated?"

Shi Yu and Baby Ginseng paused.

It couldn't be said to be a mistake.

"This is called adding points. You can understand it as my second Beast Taming Talent."

"Second... Beast Taming Talent? I can't understand..."

"It's alright, understand slowly."

"Wait, wait, wait, wait. I want to check if there are any safety hazards first," Ling said nervously.

This sudden upgrade made it feel uneasy...

It stopped him from adding points.

Beside it, Eleven silently liked it.

Buggy, Chi Tong, and Susu looked at each other.

As for hidden dangers... Maybe addiction?

However, for a new partner to be able to calmly analyze a problem just after birth, to a certain extent, it was still impressive.

"Alright, we can rest too." Shi Yu and Baby Ginseng panted.

"Yi..."

Next, Shi Yu prepared to upgrade Ling's Hundred Transformations and high-level intelligence points.

This way, Ling could use the Hundred Transformations to create various mechanical tools to do research and upgrade itself.

At the same time, it could also obtain better learning and analysis abilities to assist Eleven and the others in training.

A moment later.

Ling didn't seem to find anything wrong.

Moreover, through self-analysis, it discovered that the so-called additional points were all beneficial. There was no disadvantage.

This shocked Ling.

On the Cube screen, Ling hesitated for a moment and raised its head slightly. After confusion, thinking, and analysis, it came to the final conclusion.

It looked at its Mechanic in admiration and worship.

"Master, add points!"

It admitted that it had misjudged previously. Its master was indeed very outstanding.

Now, it could add points and add points. Only by quickly increasing its intelligence could it better formulate a strengthening plan for its master and companions!

Shi Yu : "..."

Eleven, Buggy, Baby Ginseng, and the others : "..."

"Wuuu!!"

At the same time, seeing that their new teammate had finally become smart and said, "Beast Tamer, increase points!" The five little ones cheered loudly to welcome their new teammate into the team.

...

In the next two days, Shi Yu began his "seclusion" life again.

Hard work and recuperation coexisted.

Ling's skill data was also reborn.

< Name > Ling

[Level of Growth]: Transcendent

[Race Skill]: Hundred Transformations (transcendent+1), Advanced Intelligence (transcendent+2), Wind Element Control (Initiate)

Under Shi Yu's points, Ling's Hundred Transformations and high-level intelligence quickly reached transcendent and advanced to the maximum level.

Apart from Hundred Transformations and high-level intelligence, Shi Yu had nothing else.

He wanted to activate the “loading” skill first and experience the feeling of fusing with machinery, but the problem was that he couldn’t.

He had replicated a total of three mechanical skills from Legend Xiao Shuang’s Black Wing Demon God, which were “Divine Net”, “Loading”, and “Machinery Space”. Among them, only the super skill “Divine Net” was in a teachable state.

As for “loading” and “machinery space”, they both showed insufficient compatibility and couldn’t be taught.

Shi Yu roughly understood this.

Mechanics might have a higher compatibility requirement for skills.

If he didn’t have the corresponding “machinery equipment”, it would be very difficult to learn the corresponding “mechanical skills”. If Shi Yu wanted to teach Ling the two skills of “loading” and “machinery space”, he had to further upgrade Ling’s own race. He needed to upgrade the corresponding mechanical parts.

Chapter 435: Master, Increase Points (1)

On the contrary, the top-notch intelligence, the Divine Network, was described as only splitting into multiple intelligent brain areas to form a complicated neural network system. There was no need to upgrade the configuration. It just needed to upgrade through points on the existing high-level intelligence chips.

Shi Yu didn’t find this discovery troublesome. When Ling’s intelligence increased, he would just have to provide the materials and let Ling upgrade itself.

It had to be said that after raising the Hundred Transformations and high-level intelligence, the change in Ling was very big. It was so big that Shi Yu could feel good now.

“Ling.”

In the ruins space, Shi Yu held the Cube. Under Shi Yu’s command, the Cube in his hand changed quickly with a conflicted expression. In less than a second, it turned into a multi-barrel rotating Green Machine Gun that was held in Shi Yu’s hand.

Black and green, very cool.

In the next moment, endless wind elements gathered. As Shi Yu pressed the switch, the muzzle of the machine gun began to produce air bullets compressed by the wind element!

Tut tut tut...

A minute later, nearly ten thousand bullets hit the mountain in front of them, turning the entire mountain into a hole.

This wasn’t the end.

Shi Yu was having a lot of fun.

“Master, I think this is meaningless...”

“Just change.”

“...”

In the next moment, Ling turned into a silver sniper cannon. Shi Yu held it in front of him. As the wind elemental power condensed and aimed, with a boom, a single-target stronger wind pressure cannonball directly turned the small mountain in front of him into powder.

Machine guns, sniper cannons... and mechanical swords. At this moment, Ling, who had transcendent-level Hundred Transformations and high-level intelligence, could quickly transform!

Of course, it was a pity that at the moment, it was only “shapeless”. Apart from being able to use the different uses of “Wind Element Control” better, different forms had no other functions. In other words, it was still just for show.

If he wanted to really upgrade these forms into strategic trump card forms, he had to gather mechanical materials around these forms and upgrade them in a targeted manner.

For example, in the form of a sniper rifle, if it was equipped with abilities such as “vital lock-on”, “full-level super vision”, “loading fusion”, and “energy solidification”, Shi Yu could use the sniper rifle to greater effect. From 800 miles away, it wasn’t a big problem for him to kill an enemy above his level with one shot.

Of course, these were all just for fun. The most important thing was still the “mecha form” with the most comprehensive ability.

However, this form was very difficult to complete with Ling’s current ability. It wasn’t that its intelligence level and Hundred Transformations level weren’t enough, but that its main body was only a Hundred Transformations Stone. Without enough growth level, it didn’t have enough volume to break down and assemble into a mecha...

This was also the most difficult thing about the Hundred Transformations Machine. If it wanted to assemble into a larger mechanical life form, it needed to continue fusing more Hundred Transformations Stones. It was all small money.

Of course, this difficulty was actually easy to solve on Shi Yu’s side because he could teach Ling the “clone” and “multiplication” skills.

Therefore, as long as it was given the blueprint, it could still turn itself into a mecha after a certain amount of time.

However, the performance of this mecha was different. The mecha that was forcefully created, be it battle power or endurance, was definitely much more inefficient and mismatched than a comprehensive mecha like Legend Xiao Shuang’s... Which was completely made of real Hundred Transformations Stones.

But it didn't matter if the configuration was perfect or not. It didn't matter if it didn't have special abilities. It didn't matter if it changed into an empty shell. At the moment, being handsome was enough.

As for how to become handsome and useful, that was a question that Ling should consider itself. Otherwise, wouldn't it be even more meaningless for its high-level intelligence to be added so high?

"Alright, today's gun test is over..."

"Let's go back and continue to increase points."

"..."

A few days later.

Ling's Hundred Transformations and high-level intelligence were all maxed out by Shi Yu.

At this moment, the Hundred Transformations skill had already reached an extremely exaggerated level. In terms of decomposition, it could already break the Cube-sized body into countless super small cubes that couldn't be seen with the naked eye. Shi Yu didn't know if it had reached the atomic level. In any case, even with super vision, it was very difficult to determine the number of bodies after Ling's decomposition.

As for the combination ability, it corresponded to the decomposition ability. It could control these countless small cubes at the same time and quickly assemble new objects.

With the current precision level, the new machinery it turned into was definitely one of the best among mechanical lives. It belonged to the type with a very strong foundation. In the future, after adding other mechanical materials to upgrade, with this precision as the foundation... It would be very difficult for flaws and loopholes to appear.

As for how strong a max-level high-level intelligence was, Shi Yu couldn't judge. In any case, all the mechanical equipment he had bought previously and placed in the Mechanical Research Institute could already be "quickly disassembled" and "quickly assembled". He was like a legendary Mechanic.

Moreover, from Ling's calm appearance, it probably already had some clues about the "Machinery Phantom Beast Plan" and the "Mecha Plan".

Outside the Mechanical Research Institute.

Mechanical Lin that was already in the posture of a big boss floated in the air. It looked at the mechanical Tyrant Dragon running in the dragon circle and said, "Leave it to me. I'll try to complete the mechanical phantom beast plan in three months."

"As for the 'Fusion Mecha Plan' and the 'Mythical Phantom Mechanical Plan', it might be after this."

Chapter 436: Master, Increase Points (2)

"Why three months?" Shi Yu asked.

"Because three months later is the start of the new Mechanical Conference in Dong Huang. If you can successfully develop an ancient phantom machine, Master can consider whether to participate in this conference. If you can win the championship, it will be very helpful in researching the more difficult

'Fusion Mecha' and 'Mythical Seed Machinery'." Ling analyzed. "The Mechanical Conference is the same as the Feeding Conference and the National League. There are records in my initial information, but Master, you didn't notice."

"Machinery Conference?" Shi Yu was stunned. Then, his expression gradually became happy. "There's such a conference? All the best."

"Let's take the championship back first. At that time, we'll get a mechanical index of the fourth bureau. It'll indeed be easier for you to level up yourself."

In his archeological index and Feeding index, there was various high-end archeological information about Dong Huang. In theory, the fourth index should have mechanical information, right?

"Yes." Ling nodded.

In Ling's current research difficulty judgment, the ancient mechanical phantom beast was the easiest to study. The difficulty of the entire team's fused mecha followed closely behind. The hardest was to modify himself into a Mythical phantom beast machinery.

"I'll work hard, but please meditate hard, Master. If you can contract me, my learning, calculations, and research ability can still increase again," Ling urged.

"Alright, alright. Tell me if you have any needs in mechanical materials and mechanical knowledge. I'll help you buy materials and find teaching materials," Shi Yu said.

"(✿◡◡) Alright."

"At the moment, the basic mechanical theory knowledge is enough. All mechanical systems can't do without the foundation. There shouldn't be any mechanical theory information about mechanical phantom beasts now, so there's not much need for other mechanical knowledge at the moment. What I need to do now is to design a new mechanical system, but during this period, I might need the help of Eleven, Buggy, Baby Ginseng, Chi Tong, and Susu."

After reaching the maximum level of high-level intelligence and being updated on Eleven and the others' information, Ling no longer found Eleven and the others' situation that difficult to understand.

Among them, Eleven was the armory, the illusions of Buggy, Baby Ginseng's time fruit and the Fruit of Life, Chi Tong's soul exchange ability, and Susu's mental cleansing ability, Ling felt that they might be of help during the research of the mechanical Tyrant Dragon, so it needed the support of its teammates.

"Alright!"

At this moment, Shi Yu was very relieved.

Sure.

The mechanical phantom beast project could finally make progress. If it went smoothly in three months, it might even get first place. Moreover, he didn't have to worry about it. Great.

He should have done this long ago. It looked like his capitalist skills had yet to reach Dao Proficiency.

"Master, it's time to meditate."

“...” Shi Yu.

Shi Yu: \_{(π`J 4)}\_

“Principal Feng is looking for me for something. Meditate... I’ll definitely do it tomorrow.”

“The mission list has been updated. Today’s meditation mission has been reasonably assigned to the next three working days.”

Shi Yu: “Ah...”

....

Principal Feng was indeed looking for Shi Yu.

To be precise, Principal Feng and the gem cat were looking for Shi Yu.

“Sigh, Teacher Ying, why do I feel that this is a little inappropriate?”

Principal Feng looked old.

At the moment, Ancient Capital University only had two legendary resources. They were the school’s cornerstone treasures.

This time, the gem cat applied with the might of a new totem and its old veteran experience.

With Principal Feng and the totem cat working together, their right to speak was indeed not something the core higher-ups of Ancient Capital University could compare to.

With one slap, the assets of Ancient Capital University were all gone.

“How could that be? Those two legendary resources are useless. Resources are good resources only when used. When Shi Yu and Qingyi grow up, it’s all worth it,” the gem cat said confidently.

Principal Feng had a strange expression. As a guardian overlord, this cat directly emptied Ancient Capital University right after breaking through. There was no one else.

However, after being bewitched by the gem cat, Principal Feng still subconsciously stood on the gem cat’s side.

The reason was very simple. The gem cat was applying for legendary resources for Shi Yu and Lu Qingyi, the two most outstanding students of Ancient Capital University in recent decades. Principal Feng also thought quite highly of these two, so he supported them.

Otherwise, just him and the gem cat alone definitely couldn’t decide the ownership of the school’s cornerstone treasure. Of course, the most important factor was that the gem cat had advanced to a totem. Not to mention two legendary resources, even five of them couldn’t compare to a totem in its peak state.

“Cough, this is all for the good of Ancient Capital University,” the gem cat confirmed again. It wouldn’t say that this was the best way to protect its gems.

However, it was indeed useless to just collect these legendary resources. It was better to give them to new generation Beast Tamers with potential.

At the start, Ancient Capital University collected a total of three legendary resources.

The three legendary resources came from the mystic realm of the Undead Battlefield.

A hundred years ago, under the dual effects of the Undying Dark Phoenix Rampage and the appearance of the mystic realm in the totem era, an undead disaster occurred. Although this disaster caused huge losses to the Ancient Capital, the Ancient Capital also obtained countless treasures in the mystic realm. These three legendary resources were part of the treasures obtained by the Ancient Capital University.

One of the undead gemstones was used by the gem cat itself. It was a waste...

The remaining two were also legendary resources of the undead element. The gem cat had calculated them and planned to hand one of them to Shi Yu.

In its opinion, this resource was very suitable for Shi Yu's Little Chi Tong. It would definitely be useful.

< Name > Bone Sword

[Attributes]: Undead

[Level]: Level 9 (Legendary-level)

< Introduction > The Sword of the Dead can revive the life it killed in the form of an undead and control its will.

Chapter 437: Another Great Harvest and Shi Yu's Ambition

Ancient Capital University.

In a classic courtyard.

This was Principal Feng's residence.

At this moment, Principal Feng and the gem cat were leisurely drinking hot tea.

Soon, a tired figure rushed over.

"Principal Feng, bone sword, bone sword, bone sword, let me see."

After Shi Yu arrived, he asked Principal Feng and the gem cat in anticipation.

His own people were more reliable after all.

Legendary-level resources were applied for just like that.

Unlike the Dong Huang Association, who were slow like snails.

Good thing he had made so much news.

"Yes, yes, I can't lose it." Principal Feng smiled.

At the side, the gem cat was elegant and calm. "Where's Little Chi Tong?"

The legendary undead resources this time were very useful to Little Chi Tong.

Shi Yu said calmly, "What Chi Tong? How can I give it to it directly?"

"When it gets first place in the team competition, I'll give it to it."

"How can you get the bone sword without experiencing storms?"

Principal Feng and the gem cat : "..."

It didn't know if it was a good thing or unlucky to be his pet.

When Beast Tamers obtained legendary-level resources, they couldn't wait to use them immediately to strengthen their pets. But this guy was treating it as a reward?

Wait, what was the team competition?

This guy was not human anymore...

"In any case, my level isn't high enough now. I can't maximize the effect of the legendary resource even if I use it," Shi Yu said.

Generally speaking, legendary resources were used when monarchs broke through to the overlord level, when overlords broke through to the totem level, or when totems strengthened themselves.

Under the restriction of Shi Yu's spatial level, even if Chi Tong's growth level was strengthened by legendary resources, it was impossible for it to break through again.

He definitely had to use it at the right time.

"It's alright," the gem cat said.

"I know your level is low. The bone sword isn't a traditional strengthening-type resource. You can use it at any time."

"It's considered a strengthening and special fusion resource."

"Firstly, it has the ability to revive and control the lives it kills in the form of undead."

"It can be said that it's an ability that can help other lives change their race."

"Of course, after becoming an undead, most of them will have remnant souls, similar to the dragon remnant soul of your classmate, Yu Shu. Their racial abilities will definitely decrease."

"However, it's also an excellent soul container. Although it can only store spiritual bodies inside, it shouldn't be a problem to store dozens or millions of them. Be it the undead it creates or other undead, as long as they enter the bone sword, they will subtly strengthen the bone sword. This is permanent strengthening."

"Especially through the possession skill, the effect will be better. The higher the level of the possession skill, the better the strengthening effect."

"Therefore, in theory, it can not only be used as a strengthening-type resource to strengthen undead creatures, but it can also be like a special-type resource, allowing pets to obtain some new abilities. If it

completely absorbs the power of the bone sword, it might be able to master its ability to create undead races.”

“Most importantly, it’s different from pure strengthening-type resources. Strengthening is subtle. The effect isn’t that fierce, and it won’t be like common strengthening-type resources where it can’t stop and explode the user in an instant,” the gem cat said.

“Well, that’s about it. Ancient Capital University has two legendary resources. One is the bone sword, and the other is a traditional strengthening-type resource. Among them, the effect of the bone sword is especially suitable for you and Chi Tong.”

Principal Feng sighed. “Didn’t it master the Spirit Release skill? The Spirit Release skill is only effective against formed undead lives. It’s useless to kill other types of lives, but if we have the bone sword...”

“When your ginseng baby cripples a few more overlords one day and uses the bone sword to stab them, they will become undead puppets. Not only can they be fighters, but they can also be nutrients for its Spirit Release.”

Shi Yu was stunned. Good heavens, they had already calculated it.

Recycling.

If there was such a good thing, they should have taken it out earlier.

“Also, if you’re desperate one day and your body suffers an incurable injury, your soul will be fine. Take the bone sword and stab yourself. Perhaps you can also die in the form of a soul. Although human spiritual bodies are the easiest to disappear, you should still have a few years of consciousness. It’s better to live than to die.” The gem cat chuckled.

Shi Yu :”...”

“Where’s the bone sword?”

“Here.”

The gem cat teleported a black box over and opened it.

A small white sword that looked like a fruit knife appeared in front of Shi Yu.

The bone sword was smaller than Shi Yu imagined. It was clearly a “dagger” about the size of a Mini Chi Tong. How could this be called a sword?

“What kind of bone is this...”

The bone sword was quite beautiful, like white jade, but after Shi Yu took a look, the feed index didn’t react at all. He couldn’t analyze its material.

Even the material of General Mu Huiyin’s Gemini Silver Armor could be detected in an instant by the Feeding index, but this one didn’t react.

“I’m not sure, but it should be made of the bones of a demigod-level totem.” Principal Feng stroked his beard and said, “The mystic realm that this was obtained from came from the totem era.”

“The dragon ball I obtained, which is the one Buggy used, was also obtained from the derived mystic realm of this mystic realm,” the gem cat said.

Shi Yu nodded. The totem era...

Although the Beast Tamer culture of the totem era might not necessarily be as strong as the ones from the Beast Taming Era, the time span of the totem era was really too long.

In this long period of time, more than a hundred Dragon Gods had changed in Dragon Palace City. It was obvious that there were also many Beast Tamers among humans.

Chapter 438: Another Great Harvest and Shi Yu’s Ambition (1)

Shi Yu recalled the owner of the Awakening Mirror, Yue Maiden.

The other party was undoubtedly also an expert of the totem era.

Stealing the Beast Taming Talent of other Beast Tamers was too much...

Although he was curious about the totem era, Shi Yu was also quite glad. Fortunately, he didn’t transmigrate to the totem era at the start and instead transmigrated to the modern era. Otherwise, his days would be bitter. He wouldn’t even be able to play with his cell phone, let alone his mecha.

“Thank you.”

Shi Yu put away the bone sword and laughed. “Ancient Capital University will always be my home.”

Principal Feng and the gem cat sighed.

This was what it felt like to be a mother.

“Although it’s about the same for me,” the gem cat muttered in its heart.

“Principal Feng, Teacher Ying, is there anything else? If not, I’ll go meditate first.”

It was better to do the meditation mission today. Otherwise, it would be even more uncomfortable to distribute it tomorrow and the day after.

“Yes, don’t worry. There’s still a bunch of things.”

Principal Feng rubbed his head and said, “There are still a few things for you.”

He took out two identification documents and a data chip from his ruins space.

“Official member ID of the first bureau.”

“The data chip of the first index.”

“Although the legendary resources have yet to be approved, you’re already a member of the first bureau.”

The gem cat raised its head. If one befriended a totem guardian and had the ability to make a totem guardian take action could enter the first bureau.

Now, it was basically no problem for Shi Yu to let Ice Dragon and Gem Cat take action, so he naturally obtained the documents for the first bureau.

Shi Yu was already immune to the handsome photos on the documents. At this moment, he was more curious about the difference between the data chip of the first bureau and the information contained in the third and eleventh bureau.

The third bureau's feed index recorded various cultivation information. Bureau 11's index recorded various archeological information. Then, what about the first bureau?

"Could it be that various secret skills are recorded on this?" Shi Yu picked up the chip in deep thought.

"How is that possible!" Principal Feng said.

"On this, it records the information on the known totem-level creatures in the world gathered by Dong Huang. Be it friend or foe, including the totems in the totem area, the totem information of the other six countries can be found. Because generally speaking, when it's up to the members of the first bureau, the incident will basically involve totems."

Shi Yu nodded. So that was the case.

However, it didn't feel as useful as the third and eleventh index...

Forget it, with this, he would know which totem was easy to bully in the future. He would have to avoid whichever totem he saw. It was alright.

"What's this?" Shi Yu looked at another certificate curiously.

He picked it up and took a look. So it was an identification card from the Environmental Protection Department. Boring.

"This certificate is special. Unlike the one General Xiao Qin and the others have obtained, the rights they can exercise are equivalent to the members of the other 13 divisions of Dong Huang. They can prioritize using and developing ocean resources. If necessary, they can mobilize the legendary power of the navy, the navy's military weapon."

"Of course, you're the only one who has this certificate at the moment. As for whether the Marine Environmental Protection Department can become Bureau 14 of Dong Huang, it depends on the subsequent development. After all, you're the only one qualified to have this certificate. It's very difficult to establish Bureau 14 alone."

Principal Feng had a strange expression. There was no one else.

Shi Yu now had a bunch of titles. He was afraid just looking at him!

Was he trying to gather Bureau 14 documents and summon a mechanical legend?

"This is good!" Shi Yu's eyes lit up as he put away his Environmental Protection Department identification documents.

In the next moment, he was stunned. "There's more?"

“There’s more.”

Principal Feng continued to take out three resources.

“Although the legendary resources have yet to be approved, these few water-element resources came with the Environmental Protection Department documents. Didn’t you say last time that you wanted high-quality water-element resources for the Blue Sea Sprite to use?”

“This is the first batch selected to be suitable.”

Shi Yu immediately looked over.

They were respectively level-two, level-six, and level-seven resources.

Although the energy levels were different, the most important thing was their quality.

Their predecessors were all legendary-level resources.

Principal Feng pointed at one of the water-blue elemental cores and said,

“During a certain period in ancient times, because of the eruption of an underwater volcano, the eastern hemisphere encountered an unprecedented super tsunami. Moreover, the tsunami obtained life and became an elemental life form. It was born as a totem. At that time, it wreaked havoc in the east, but just as it was about to encounter the Dong Huang Continent, it was jointly killed by land creatures.”

“This is its elemental core. Because it contains a powerful wave power, it’s also called the Sea Wave Stone. However, because it’s been too long, many creatures might have fought and used the Sea Wave Stone. Now, its energy level has fallen to level two.”

“However, although it no longer contains powerful water-element power, the branded wave super profundity is worth comprehending for water-element pets.”

Then, Principal Feng continued to point at another fist-sized dark blue meteorite and said,

“Water-element planet. In ancient times, a meteorite containing water-element power fell on Blue Planet. Generally speaking, when a meteorite falls here, unless it’s especially large, it’s very rare for it to pass the high temperature test of the atmosphere. However, this water-element meteorite is very special. It’s not big, but due to its special structure, it’s not afraid of high temperatures and successfully fell in a certain place in Dong Huang.”

“It’s also very special. In the beginning, it was a legendary-level resource. It fell to level six because of time. Its effect is to contain the power of a ‘star’. When you hold this meteorite, the water-type pet can feel the natural power of the water-type from outer space. It’s very magical.”

Chapter 439: Another Great Harvest and Shi Yu’s Ambition (2)

“The last level-seven water drop is called the Memory Crystal. It’s a late special water-element and time-element totem of our Dong Huang. It’s a tool that stores the control experience of the transcendent water-element power. At the start, it was also a legendary resource, but because it was used many times, most of the skill experience has been digested. There’s not much skill experience left, and the energy level naturally fell.”

“But even so, it’s still a rare treasure for water-element life forms below the overlord level. One can quickly increase the proficiency of water-element skills while carrying the memory crystal. Under the lead of the memory crystal, the skill proficiency of the Blue Sea Sprite’s reincarnation will increase very quickly. At that time, under the lead of the skill level, it’s not difficult to break through to the overlord level.”

“This is the most suitable resource for the current Blue Sea Sprite Reincarnation. In fact, there are many water-element resources in the national resource bank. You can also search through the third bureau’s index. If the Environmental Protection Bureau has any special needs, you can satisfy them later,” Principal Feng said.

“For example, when the limit is close to the overlord level, water-element legendary resources... Ahem, it should be possible.”

The memory crystal guaranteed the stable growth of the Blue Sea Sprite Reincarnation. Communicating with the power of the water outside the skies was a special power that the Blue Sea Sprite had never possessed when it was alive. The Sea Wave Stone guaranteed the battle skills of the Blue Sea Sprite Reincarnation. In the eyes of the Dong Huang Association, these three low-level legendary-level resources could turn the Blue Sea Sprite Reincarnation into a powerful overlord. It was not a problem.

As long as the Blue Sea Sprite needed true legendary resources, the Dong Huang Association wouldn’t be stingy.

In the eyes of the Dong Huang Association, quickly nurturing Susu to the overlord level and accepting the Blue Sea Sprite inheritance was the most important thing.

Of course, they didn’t dare to help it grow too much. It wasn’t a good thing to level up too quickly. This way, they wouldn’t be able to befriend the Blue Sea Sprite in time. Shi Yu and the Blue Sea Sprite Reincarnation had been together for too short a time, and it wasn’t conducive to establishing bonds.

The Dong Huang Association still wanted stability.

“Alright.” Shi Yu was satisfied.

Not bad.

Although this Susu could use and involve itself in water elemental control, it was indeed not proficient. The power of a star? That was even less involved. As for the memory crystal, to be honest, it was the one Shi Yu was the most interested in.

It wasn’t because it might save Shi Yu the effort of adding some water-element control skills a few times. Instead, it was created by time-element skills. What if Susu mastered a similar ability after swallowing it?

“What a harvest.” Beside him, the gem cat’s face was filled with envy.

Damn it, damn it, damn it. This damn tycoon, Shi Yu, was countless times richer than it. He even pretended to be poor all day.

“It’s alright, it’s alright.” Shi Yu chuckled.

“Also.” Principal Feng wasn’t stopping.

“There’s more?” Shi Yu was stunned.

“This is dispensable to you. It doesn’t mean much.” Principal Feng took out another license.

“Top-notch Beast Tamer license, top-notch master. The requirement is that the Beast Tamer’s battle power can temporarily resist overlord-level creatures. Apart from being able to undergo the assessment at the association’s headquarters, some proven battle results can also be used as the assessment judging criteria. Because of your performance in the National League, the Dong Huang Association’s headquarters directly issued you a top-notch master license, and you’re exempted from the advancement assessment.”

“Our Ancient Capital doesn’t have the right to issue the top assessment. It’s easier now. You don’t have to take the assessment in the capital anymore.” Principal Feng chuckled and said, “Speaking of which, because we’ve presided over your three assessments, as well as the fact his daughter’s made some achievements, our Ancient Capital Association’s Master Qu Jie seems to have also received a promotion opportunity from the capital. He can go to the capital headquarters to work at any time.”

“I wonder if he’ll go...”

“The opportunity to be assigned to overlord-level colleagues and teammates to become a legendary examiner for top-notch masters and legendary Beast Tamers is rare.”

Shi Yu had a strange expression. Master Qu Jie was going to be promoted to the headquarters. Pretty good.

Unfortunately, he already had a top-notch license. There was no need to look for him for the assessment.

“Eh, Master Qu Jie has a daughter?” Shi Yu suddenly discovered a blind spot.

Forget it, it had nothing to do with him.

“Sorry to trouble you.” After Shi Yu reaped his harvest, he thanked Principal Feng.

Then, he asked carefully, “This time... there shouldn’t be anything left to attend to, right?”

This made him a little expectant. He hoped that there would be more things to do. Once something happened, resources and documents would come. Who could withstand it?

“No more!” Principal Feng chuckled.

“Speaking of which, hasn’t Senior Lu come out of seclusion yet?” Shi Yu asked.

Principal Feng was fine, but he had something to do.

Ever since Lu Qingyi decided to participate in the Sequence Battle, she had started to enter seclusion to cultivate hard. She wanted to break through to the legendary level and had yet to come out. Senior Lu still didn’t know that Shi Yu had blown up two overlords and become the national champion.

The cultivation location was a legendary ruins space left behind by a legendary Beast Tamer from the totem era that Lu Qingyi had obtained herself. Shi Yu was very envious.

In short, Shi Yu missed Senior Lu after not seeing her for so long. The Mythical Revival skill that Senior Lu had obtained from archeology was known as the strongest grade super skill. At first, Shi Yu didn't mind, but as he wanted to study the Mythical Beast Kirin fossil, Shi Yu wondered if this skill could help in his research. He planned to replicate it and see if he could teach it to Ling.

Chapter 440: Another Great Harvest and Shi Yu's Ambition (3)

"Qingyi... not yet." Principal Feng shook his head and said, "We have to wait for her to come out before giving her that legendary resource... After strengthening that courtyard sprite, maybe it can help her."

Among the six pets Lu Qingyi contracted, the newly contracted Courtyard Sprite didn't have the Mythical Revival skill. It was the weakest, but if it had the school treasure of Ancient Capital University, it might be able to become a short-term trump card.

"Why are you looking for Qingyi?" Principal Feng asked in anticipation.

Could it be that Shi Yu...

"Well, I feel that my strength is enough. I want to challenge Senior Lu."

"It's alright, it's alright. Aren't you in a hurry to leave? Hurry up and leave," Principal Feng said with a raise of his eyebrows.

"Ah... tell me when Senior Lu leaves seclusion..." Shi Yu said.

He would defeat Senior Lu, replicate a skill, and increase his ranking in the wave ranking competition. He just didn't know if he could defeat her...

...

After making a trip to Principal Feng, Shi Yu had a huge harvest of resources again.

After returning, Shi Yu heaved a sigh of relief.

He began to prepare the "strengthening plan".

For the sake of the Sequence battle, Senior Lu was charging at the Legendary level. That was because her Beast Taming Space had already reached level six. Her pet's strength was not weak either, and she even had the legendary ruins space to carry with her to assist in her cultivation.

As for Shi Yu's strength strengthening plan, it had to be combined with his own situation.

Next was summer break. He planned to take advantage of these two months to travel the entire Dong Huang and go to various places to replicate some low-level top-notch skills. At the same time, he would upgrade some super skills.

After returning, he would let the gem cat bring Chi Tong and Susu to the Undead Battlefield to train. At that time, he would also stay in Ancient Capital University and concentrate on meditation to break through to level six in the Beast Taming Space.

The skills to replicate, such as Baby Ginseng's Earth Escape and the strengthening buff skills chosen by Chi Tong, had to be replicated.

Apart from that, Susu didn't need to replicate skills. It just needed to devour. However, a new batch of top-grade water-element resources had just arrived. If it swallowed them, it would probably sleep for a long time. Also, Shi Yu was prepared to let Susu devour resources like the Ice Dragon Whiskers and the Ice Dragon Badge to prepare for teaching the Heavenly Frost Cold Energy skill.

He hoped that after the trip ended, Susu could finish digesting it.

Of course, Eleven and Buggy weren't without benefits on this national trip.

It could even be said that this national trip to replicate skills was prepared for Eleven and Buggy. It was prepared to make up for their shortcomings. They were the core of this cultivation.

For example, Shi Yu had carefully chosen four skills for Eleven. It needed to go to various places in Dong Huang to find corresponding ferocious beasts to replicate. It might not necessarily be able to find them in the ancient capital.

The four skills chosen for Eleven were three high-level and one super-level.

Reinforced Iron Bones: High-level skill, metal-element. It can increase the physique by taking a beating. It is a slow accumulation and permanent increase. The upper limit of the increase depends on the skill proficiency.

Tempered Steel: High-level skill, metal-element. It can obtain the ability to temper the body with fire. Using fire to strengthen the body is also a permanent increase, similar to the former.

Overlord Body Armor: High-level skill, metal-element. It can create a layer of armor. The armor can easily exceed the limit and accumulate damage, preventing external damage from affecting the pet's own movements. However, after the armor reaches the upper limit of its endurance, the damage will be applied to the pet in one go.

Also, a super metal-element skill that could transform the damage it suffered into vitality to recover from injuries.

Shi Yu didn't know if he could successfully find these four skills, but he had to go.

In his opinion, was the Nine Li Battle Beast strong? Strong.

However, every skill of the Nine Li Battle Beast belonged to the extreme explosive type. It was too harmful to the body. Emperor Wu's body was not good as well. Apart from Yun An's incurable injuries, Shi Yu estimated that it was also related to the pile of self-mutilating skills of the Nine Li Battle Beast...

Zhong Xuan had also mentioned this. Giant Transformation, Inner Power, Impregnable, and Lightning Rod could easily overload one's body. Even skills like Space Quake and the spatial rebound would put a certain burden on the Nine Li Battle Beast that wasn't spatial element in the first place.

As for the Iron-eating Beasts, they weren't the kind of race that was good at healing skills. Although they were ruthless, they were also injured.

Therefore, Shi Yu prepared to nurture a completely different Nine Li Battle Beast. It could transform the damage it suffered into vitality, a ferocious Panda King with the strongest physique. Of course, the premise was that he could successfully find the super rare super skill recorded in the index...

This way, it was easy for Eleven to surpass Emperor Wu's Iron-eating Beast.

As for Buggy... To be honest, although it had the Imagination Skill to make up for its racial shortcomings and increase its endurance, Shi Yu felt that it was not enough.

Therefore, Shi Yu targeted a bug-type super skill.

Ultimate Absorption.

This bug-element super skill could absorb the enemy's life force and energy points through attack to recover its injuries and physical fitness.

If Buggy could learn this skill and form a combination skill of "Ultimate Absorption" and "Illusionary Phantom" with the support of high proficiency...

In that case, under the configuration of its "Instant Transmission" and "Ethereal Concealment", Buggy could let the endless illusions attack the enemy. At the same time, it could also recover its health and mana, allowing Buggy's racial advantage to be displayed.

If everything went smoothly, even if Eleven, Buggy, and the others didn't reach the overlord level, they would probably have the strength to resist the overlord level for a short period of time. They would purely rely on various disgusting skills to fight head-on!

This was Shi Yu's ambition. He wanted Eleven and the others to be able to rely on their skill advantage to fight and crush overlords at the monarch level.

However, there were drawbacks to Shi Yu's cultivation of Eleven and Buggy.

That was, it was easier for them to make the next team meeting... even more complicated.

"There are a lot of places to go to to replicate these skills, but it's just fine. I can also travel around Dong Huang. After transmigrating for so long, I haven't been to many places," Shi Yu thought to himself.

And before leaving... It was time for Eleven to try absorbing the meteorite fragment.

...

At the same time.

As the National League ended and the vocation assessment approached, Beast Tamers from all over the country began to head to big cities with vocation assessment aptitude.

Among them, countless genius rookies were gathered in the nine first-level cities.

At the Ancient Capital Airport.

On the flight from Wu Ling City to Ancient Capital, a Beast Tamer trainee walked down the plane. He took a deep breath and looked in the direction of Ancient Capital University.

If Shi Yu were here, he would definitely be able to recognize this youth. It was surprisingly An Chang, who had given him his family heirloom, the Awakening Mirror. He was also the one who had successfully evolved the Dragon Carp into a sea dragon with Shi Yu's help.

“I wonder if I can see him...” An Chang was nervous.

After all, he was just a small figure, while Shi Yu...

Although he knew that Shi Yu was very powerful, he didn't expect Shi Yu to be so powerful. He had seen the National League. Shi Yu was simply a god who had descended into the mortal world. This made An Chang, who already regarded Shi Yu as his idol and benefactor, worship Shi Yu even more. Apart from participating in the vocation assessment and seeing the Ancient Capital University he was about to enter, An Chang's main goal this time was to find Shi Yu.
