

Beast 471

Chapter 471: Ruins of the Kong Capital

“He... is exhausted too!”

Shi Yu’s change immediately attracted a heated discussion.

However, at this moment, Legend Katavi was even more depressed about his disciple being defeated.

Beside him, Ming Hua’s Legend Fade was also very silent.

Amy Rui’s strength could definitely rank in the top five among the younger generation of Ming Hua.

In the end, she lost to such a young Beast Tamer in Dong Huang so easily?

Now, the two Ming Hua Legends were gnashing their teeth in hatred.

Even if there was a problem with Dong Huang’s Sequence ranking, it couldn’t change Shi Yu’s age and his spiritual talent.

Seeing their genius being educated in a different country, the two legends didn’t know how to feel for a moment.

Twenty years had passed. Could it be that there was still such a huge difference between Ming Hua and Dong Huang?

“Shi Yu... is exhausted too?” On the other hand, President Xia also said in confusion.

It was probably true...?

After all, that sword spirit had erupted with such strong power.

After Shi Yu was possessed in the National League, he also ate supplements crazily.

Generally speaking, the consumption was very large and reasonable.

“Looks like it. Both parties are doing their best.”

Director Zhong said. Who cared if it was real? He only knew that Shi Yu definitely didn’t want to continue fighting.

“Director Zhong, what kind of undead is that?”

“It’s clearly only at the monarch level, but it actually erupted with such strong strength without any Beast Taming Talent.”

“Clone, Possession, Giant Transformation, and that Yin Yang Interlocking Sword Pressure. What’s even more ridiculous is that a phoenix spirit phantom actually appeared!”

Legend Katavi and Legend Fadir exploded.

Why did it feel that this sword spirit was even fiercer than the so-called quasi-mythical iron-eating beast just now?

Ming Hua was a country of undead, but she had never seen such a strange undead.

Sword, Phoenix, flames that were perfectly fused with extreme Yin and Yang, and that ridiculous profundity...

Was this Shi Yu a Beast Tamer or a Spirit Medium? Why was he so proficient in controlling undead!

“What exactly is this Shi Yu’s identity? Which legendary disciple, which family’s disciple?”

Five overlord races, and from the looks of it, they weren’t low-level overlords. They even believed that Shi Yu was the illegitimate son of a Dong Huang legend!

“Don’t misunderstand.”

“Shi Yu doesn’t have a luxurious background. I remember saying just now that he’s an archeologist. Be it that Iron-eating Beast, this undead, or to be precise, a heroic spirit, they were all successfully contracted by Shi Yu himself,” Director Zhong said with a grin.

The two Ming Hua Legends were stunned.

“He’s a grassroots genius.”

At this moment, Director Zhong suddenly understood why General Mu Huiyin’s heroic spirit was even stronger than in the National League.

He suddenly remembered something. Ancient Capital University had taken out the school’s trump card.

Could it be that Ancient Capital University used the school’s trump card of the undead department on Shi Yu?

It was indeed possible. After all, Shi Yu’s resume was too ridiculous. It was worth it for Ancient Capital University to nurture him like this.

How extravagant!

Using legendary resources to strengthen monarchs, no wonder it was so fierce.

With Shi Yu’s current strength, it was definitely not a big problem for him to be ranked in the top ten of the Dong Huang Sequence. It looked like he had to update his ranking after this.

[Let’s see how Zou Yun performs next. If he’s inferior to Shi Yu, we’ll replace him.] Director Zhong glanced at the relieved Zou Yunwang.

After replicating the skill, Shi Yu immediately slipped away.

Chi Tong pulled him down to recuperate.

“It’s already very exaggerated to be able to do this.”

A quasi legendary Spirit Medium of Ming Hua said, “He’s only a level-five Beast Tamer. After enduring the possession of that sword spirit and without the enhancement of special talent, his body is probably riddled with holes.”

“The proficiency of that sword spirit’s possession skill is definitely above transcendent. Fortunately, it’s not a Fusion Talent. Otherwise, the double enhancement of possession and fusion would definitely be even more terrifying...”

After saying that, the quasi Legendary Ming Hua fell silent. Monster...

Amy Rui and Shi Yu retreated.

In the Dong Huang audience seats, after Shi Yu returned, Zheng Hai, Zou Tianwang, and the others asked in concern, “Are you alright?”

“It’s alright... I’ll leave the rest to you. Cough, cough.” After Shi Yu sat back down, he took out a nutritional fruit.

The fragrance of the nutritional fruit made them swallow their saliva.

They looked at Shi Yu, whose face was suddenly flushed before he even ate the fruit, and were stunned.

Damn it, was he actually hurt or not?

Just as the few of them were about to continue asking, Shi Yu’s figure suddenly disappeared into thin air.

At the same time, a telepathic message was transmitted to President Xia and Director Zhong.

“I’m Dong Huang’s guardian, Ying.”

“I have something to talk to Shi Yu about. I’ll take him away first. You guys continue.”

The sudden appearance of this voice stunned President Xia and Director Zhong.

“It’s her.” They quickly reacted. It was the new guardian of Ancient Capital University.

The new guardian of Dong Huang was not announced on a large scale. It was only spread among the legendary upper echelons.

However, although it was passed down, very few people knew how this guardian overlord of Ancient Capital University advanced.

This also caused the guardian overlords led by the guardian overlord of Imperial Capital University, the owl, to grit their teeth in anger when they heard that the darn cat had broken through to the totem level.

“This...”

As the gem cat appeared and suddenly took Shi Yu away, President Xia and Director Zhong, who originally thought that Shi Yu was really “exhausted”, suddenly felt a little suspicious.

Wait a minute, was Shi Yu really exhausted? Or did he have something on at the last minute and didn’t want to fight anymore?

With the precedent of the Iron-eating Beast, it was very difficult for them to believe Shi Yu.

“Huh?” At the same time, the two legends, Ming Hua, suddenly realized that Shi Yu had disappeared from the contestant area.

“Director Zhong, that contestant just now...”

“Don’t worry about him. He consumed too much energy and fainted. He’s been sent to recuperate.”

....

In the park not far from the Demon Capital Arena.

Shi Yu’s figure was teleported over by the gem cat.

Shi Yu sat on the flower bed and stared at the gem cat in front of him. “Eh, you used a day to travel?”

He had already informed the gem cat yesterday, and the gem cat immediately set off. In theory, the gem cat should be able to reach Demon Capital soon.

Why did it only come here after a day?

“Didn’t you say you still have to be busy for a day? What’s the use of being fast?” The gem cat curled its lips.

Then, it looked in the direction of the ancient capital and said, “It’s nothing. When I was rushing over, a ruin appeared in the Kong Capital. I took a few looks from the side.”

“Ruins?” Shi Yu was stunned. Then, he said, “What level of ruins?”

Although there were many ruins in Dong Huang, the new ruins were still worth paying attention to.

If it was a ruin above high-level, its value would be great.

Ruins were also divided into levels, usually divided into four levels.

The most ordinary ruins were the kind of ruins that appeared in Ping Cheng. They were modified by legendary Beast Tamers.

Then, there were high-level ruins, such as the Ice Dragon Ruins and the Pirate King Ruins. They were all left behind by totem-level creatures that had been modified by Titled Legends or had mastered spatial abilities.

Another step forward was the legendary ruins. They were left behind by legendary Beast Tamers or demigod-level creatures who had mastered spatial power, such as the Blue Sea Ruins.

Finally, there were the Mythical Ruins. They came from the distant Mythical Era. There were many secrets of the Mythical Era inside. For example, the Dragon God Ruins in Dragon Palace City were Mythical Ruins, and the ownership ruins obtained by the Dragon Emperor were all like this.

When Shi Yu heard that there were ruins, he immediately asked.

“How would I know? The time is too short.” The gem cat yawned and said, “But its level shouldn’t be low. At least high-level.”

“I sensed that the spatial attainments of the owner of the ruins should be stronger than mine.”

“There’s also a restriction on entry levels. Humans and pets above the legendary overlord level can’t enter. When I left, the local association had already organized a group of Beast Tamers to explore, but the results aren’t out yet.”

“The ruins of the Kong Capital... I wonder what era it is,” Shi Yu said.

Kong Capital was one of the nine major cities of Dong Huang. It was the headquarters of Dong Huang’s air force. The local Beast Tamers were extremely good at aerial battles.

“Forget it, let’s go to Dragon Palace City first. When we return, there might be news. It’s just a high-level ruin. It’s definitely not as valuable as the treasures in the Dragon God Ruins!!” the gem cat urged.

“Alright, let’s talk about it when we get back.” Shi Yu licked his lips. The ruins couldn’t run away from there. It was more important to eat and pull in investments first!

...

After Shi Yu sent President Xia a message, he followed the cat into the East Sea.

Because it had been to Dragon Palace City several times, the gem cat already knew the route.

At the overlord level, it was restricted by its strength. Even if it knew the route, it couldn’t pass. But now that it was at the totem level, it could bring Shi Yu over itself.

As soon as the Gem Eye turned into water-element, the gem cat immediately obtained the water escape ability.

At the same time.

In a courtyard of Ancient Capital University, a spatial crack tore open out of thin air.

In the crack, a purple-eyed woman in a white long dress with long silver-white hair and stars lingering around her stepped out of the wind.

Fairy Possession Form, Lu Qingyi!

As Lu Qingyi cultivated out of the legendary ruins space, soon, a figure rushed over.

“Grandpa,” Lu Qingyi shouted when she saw this figure. When Principal Feng saw that Lu Qingyi had finally come out, he immediately smiled and said, “Qingyi, how is it?”

“No, I still can’t break through space.” Lu Qingyi shook her head.

“What about the pets?”

“The pets are alright. The newly contracted Courtyard Sprite also has top-notch monarch battle power,” Lu Qingyi said.

“It’s good that you didn’t break through. You came out at the right time.”

“It’s alright if the Beast Taming Space doesn’t break through. It’ll be over if you had broken through,” Principal Feng said excitedly.

“Huh?” Lu Qingyi was confused.

“The ruins suspected to be related to the Space Emperor have appeared in the Kong Capital. Only those below the Legendary level can enter the ruins. There are guardian beasts inside the ruins. According to the existing information, it’s suspected to be a trial-type ruin left behind by the Space Emperor. Now, two members of Bureau 11 have already gone over. I’m also preparing to take a look.”

“Space Emperor...” Lu Qingyi was slightly stunned. “I’ll go too.”

“That’s why I said you’re lucky.”

“Unlike that kid, Shi Yu. I was just about to contact him when I realized that I couldn’t. He should have gone to Dragon Palace City with Teacher Ying.” Principal Feng shook his head.

Chapter 472: Returning to Dragon Palace City

The gem cat was the first to inform Principal Feng of the appearance of the ruins in Kong Capital.

Unfortunately, after the first batch of members from the exploration team brought out the news, Principal Feng wanted to inform the gem cat and Shi Yu that these two had already disappeared.

“Uh...” Upon hearing her grandfather’s words, Lu Qingyi felt that Shi Yu was quite unlucky.

If she missed the opportunity to explore the Space Emperor Ruins immediately, with her understanding of Shi Yu, he would probably roll on the spot and cry.

“When are we leaving?” Lu Qingyi couldn’t wait anymore.

Emperor Shi, Emperor Wu, the Empress, Dragon Emperor, Space Emperor... As the last legendary emperor of Dong Huang, Emperor Kong, the Space Emperor, had also left many legends.

It was said that the Space Emperor was the Beast Tamer closest to the tenth-level Beast Taming Space. Because he had the spatial strengthening talent, he was quite knowledgeable about the level of the Beast Taming Space.

It was said that the general Beast Taming levels of the subordinates of the Space Emperor were very high. In the Space Emperor Era, it was the dynasty with the most legendary Beast Tamers. The reason was very simple. The nine spatial-type totem pets of the Space Emperor all had the ability to condense spatial resources. These spatial resources could greatly accelerate the leveling speed of the Beast Tamers under the Space Emperor.

Apart from these aspects, the Space Emperor had also crossed the ocean and established an intercontinental spatial teleportation array with a great divine power. He was the first mighty figure on Blue Planet to successfully establish an intercontinental teleportation array. Although these teleportation arrays gradually lost their effectiveness because the Space Emperor died and they didn’t have enough energy, this didn’t stop the Space Emperor from leaving a deep mark in the history of Dong Huang.

The appearance of ruins suspected to be related to the Space Emperor was clearly an extremely important matter.

Although this ruin couldn't possibly be the Beast Taming Space of the Space Emperor himself, with such outstanding spatial attainments, the ruins he left behind were definitely much more precious than the ruins left behind by a titled legend.

"Perhaps there's an opportunity for you to break through to the Legendary level in this ruin!"

Principal Feng said to Lu Qingyi.

Spatial resources were extremely rare for others.

For example, the Space Crystal Stones Shi Yu obtained one after another did not have much stock in Dong Huang at all. They were very rare.

However, according to archeological discoveries, resources like the Space Crystal were no different from other energy crystals of the same level during the Space Emperor Dynasty. The Space Emperor built a dynasty with an extremely high average level in the Beast Taming Space in history with his own strength.

Among them, it wasn't like Emperor Shi had never rewarded his subordinates with legendary spatial cultivation resources.

"Let's talk about this later," Lu Qingyi said. "I'm not in a hurry. There's still a long time until the world competition."

"I'm more concerned about the Space Emperor..."

She looked at the sky.

Legend had it that the Space Emperor wanted to build a spatial teleportation array between Blue Planet and the Moon. He had tried to break through the restrictions of Blue Planet many times and reach the starry sky, but he had failed.

Until one time, the Space Emperor disappeared during this process.

Some also said that the Space Emperor succeeded, but he encountered a disaster in the universe and died.

Later.

With the birth of the modern Mechanic class, the human Beast Tamer had the ability to break through the restrictions of the planet with technology and successfully arrived at the starry sky. Even if there were really "traces of civilization" on the moon, there were no traces of the Space Emperor.

Therefore, the outcome of the Space Emperor was still a mystery.

Compared to spatial resources, Lu Qingyi wanted to see more if there were any relevant clues left behind by the Space Emperor in this ruin, although the chances were not high...

After all, she heard just now that it was... a trial-type ruin?

...

Half a day later, East Sea, Dragon Palace City.

The gem cat spent a lot of effort before finally bringing Shi Yu and the others here.

“General Shi Yu!”

“Minister Ying!”

After Shi Yu and the others arrived, the shrimps and crabs guarding the periphery of Dragon Palace City immediately greeted them.

As the minister of the Marine Environmental Protection Department of Dragon Palace City, Shi Yu’s status was equivalent to that of a general of Dragon Palace City. As the deputy minister of the Environmental Protection Department, the status of the gem cat was not low, not to mention that it was now a totem.

“Minister Shi Yu, Minister Ying, Lord Ice Dragon King has been waiting for a long time.”

Just as Shi Yu and the others arrived, a Turtle Prime Minister flew out of the mystic realm of Dragon Palace City and shouted with a smile.

“I’m the Turtle Prime Minister assisting Lord Ice Dragon King. The Turtle Prime Minister assisting Lord Sea Dragon King is my big brother. Greetings, Minister Shi Yu, Minister Ying. Ahem, actually, we’ve met at the Dragon Palace City banquet. I wonder if the two of you still remember.”

“I don’t remember at all!”

The gem cat and Shi Yu confirmed. With so many beasts, who would remember an old turtle?

However, after Shi Yu glanced at the data of this Longevity Turtle, he felt very emotional. The Turtle Prime Minister Race was really impressive.

< Name > Longevity Turtle

[Race Level]: High-level monarch

[Level of Growth]: Monarch Level

Energy Points: 7,770,000

Very impressive, even higher than Baby Ginseng’s normal energy level.

However, it was still a little inferior to the Sea Dragon King’s Turtle Prime Minister with 9.96 million energy points.

“Where’s Bingbing?” the gem cat asked.

Ever since it also broke through to the totem level, it didn’t have to consider its seniority with the Ice Dragon anymore. It could do whatever it wanted.

“Cough, I’ll bring the two of you to Lord Ice Dragon King now,” the Turtle Prime Minister said.

A moment later, under the lead of the Turtle Prime Minister, Shi Yu and the gem cat followed it into Dragon Palace City and arrived at the Ice Dragon Palace Hall that the Ice Dragon had built for itself.

“Generally speaking, at this time, Lord Ice Dragon King is sleeping...”

"I didn't sleep today!" Before the Turtle Prime Minister could finish speaking, an impatient voice came from the hall.

"Alright, alright, you old turtle, go down."

Then, a cold wind blew out, directly blowing the Turtle Prime Minister out of the Dragon Palace hall with a cry. At the same time, when it heard this familiar voice, the gem cat's eyes lit up.

"It's Bingbing."

"Maomao, you're here." Mother Dragon's voice came from inside.

"..." Beside it, the corners of Shi Yu's mouth twitched. He felt disgusted.

One was more than a hundred years old, and the other was more than two thousand years old. They looked like young girls calling each other "iceice" and "catcat".

In the next moment, cold wind rose from all directions in the palace. A huge ice dragon slowly flew out. As it flew out, it laughed and said, "I've been waiting for you for a long time. The Sea Dragon King and the Azure Dragon King insisted on you coming before they were willing to eat the octopus tentacles. I'm so hungry."

"So you want to eat it yourself, right, Mother Dragon?" Shi Yu said helplessly.

"What are you talking about? I'm also thinking about you guys," the Ice Dragon's whiskers fluttered as it said in all seriousness.

"Mother Dragon, speaking of which, what treasures did you obtain from the Dragon God Ruins? Didn't you send a message saying that you wanted to casually send us a few useless legendary resources?" Shi Yu rubbed his hands with an expectant expression.

Compared to eating the octopus tentacles, he looked forward to this more.

Ice Dragon: ???

"Huh???"

Ice Dragon was stunned. It was saying that it would casually give them a few useless treasures. Who gave it the "legendary" prefix?

It looked at Shi Yu and locked onto this fellow who was full of bad ideas. "You bastard, stop asking for too much."

"I don't have enough legendary resources for myself, why should I give them to you!"

Shi Yu knew that it wasn't that simple. He said, "Investment, investment, treat it as an investment. After we become stronger, we'll return to show you respect."

"Mother Dragon, look. Didn't Teacher Ying let us show respect it all the way until it became a totem?"

"Including this octopus tentacle, weren't we the ones also hunting hard to show our respect to you?"

“Uh.” Ice Dragon was stunned. It was just about to refute, but it realized that it couldn’t. He seemed to be right.

The gem cat broke through to the totem level in more than a hundred years. Compared to its two thousand years, it was indeed fast. During this period, it was all thanks to Shi Yu cracking the Pirate King Ruins and finding the legendary gem.

“Hmmm...” Ice Dragon still felt that it was unreliable.

Shi Yu could also crack the Mythical Ruins and bring back Mythical dragon-element resources to show its respect.

“Didn’t you ask me to pay attention to the traces of the Sea Serpent God? I couldn’t find it in the Dragon God Ruins, but there are two level-eight dragon-element resources suitable for you. There’s nothing else. You can forget about it.”

In the Ice Dragon’s opinion, giving Shi Yu two level-eight resources was already very kind. If not for the fact that it had really reaped a harvest this time, it wouldn’t have even been willing.

“Any level-nine resource you don’t need is fine,” Shi Yu said.

Two level-eights definitely couldn’t compare to a level-nine!

Ice Dragon gritted its teeth. If it didn’t need it, it could exchange it with other Dragon Kings. What was the point of throwing it away if it didn’t need it?

“Sigh ~” Beside him, the gem cat sighed. It knew that Shi Yu would target Ice Dragon’s treasure vault.

Unless the Ice Dragon could transfer Shi Yu’s attention somewhere else, it would definitely suffer a huge loss.

As expected.

Shi Yu’s next words made Ice Dragon unable to hold it in anymore. It saw Shi Yu say, “It’s really a stable investment. I plan to participate in a year... To be precise, in less than a year, I’ll be first in the World Tournament and be able to obtain the blessings of the World Tree. One of the legends of Dong Huang, Lin Feng, obtained the blessings of the World Tree, so he spent two years to break through two levels consecutively and become a legendary Beast Tamer from an ordinary legend.”

“In other words, as long as I can get first place, I’ll be a legendary Beast Tamer in five years at the latest. At that time, with my ability to listen to the Voice of History, the Mythical Ruins can be solved casually. At that time, there will be legendary resources, Mythical resources, everything. Now, Mother Dragon, you only need to sponsor me with one legendary resource. In five years, we’ll take off together.”

“Legendary resources can’t have their value rise in five years anyway. It must be more cost-effective to invest.”

“On the other hand, if we lack this piece of investment, Chi Tong and I might die in the world competition...”

Shi Yu paused for a moment. The gem cat beside him almost believed him. Putting aside the truth, it really felt that what Shi Yu said made sense.

However, the problem was, could Shi Yu get first place?

“You brat, you want to participate in the world competition???” When Shi Yu finished speaking, the ice dragon indeed widened its eyes.

It had also studied the knowledge of the outside world, so it naturally knew the terms World Tournament and Lin Feng.

“Aren’t you only level five? Why are you participating in the world competition in a year?”

“In a year, you’ll be at most level six! Everyone else is a legend, how are you going to fight?”

“So you have to invest!!”

“As long as Buggy is given a dragon-element legendary resource, it can create a miracle!”

“We can crush overlords at level five. It’s not a problem for us to crush totems at level six. Besides, there aren’t any totem contestants in the World Tournament, right?”

“I’m afraid that you’ll die over there even if I invest. You’re not allowed to bring Chi Tong there!”

“No, the Dragon God is still waiting for me to help her explore the spatial ruins after my strength increases. The Blessing of the World Tournament is the best opportunity to increase my realm. At that time, as long as Dragon Palace City also participates in the World Tournament, with a bunch of you totem dragons protecting me, I want to see who dares to touch me!”

Ice Dragon: “...You... You’re a dog!!”

“Eh...” Shi Yu, who was bargaining with Mother Dragon, was suddenly stunned.

“Huh?” Mother Dragon was also stunned.

“What’s wrong?”

“I’m fine...” It seemed like Susu had woken up and successfully evolved again.

Chapter 473: Susu Didn’t Stand Up

The matter of pulling in investment had temporarily come to an end.

Shi Yu planned to give Ice Dragon sufficient time to consider.

This deal was definitely worth it.

During the time they were in Dragon Palace City, it wouldn’t be too late for the legendary resources to be sent over.

He hoped that Mother Long could understand quickly. If she missed this opportunity, there wouldn’t be another one.

Shi Yu temporarily settled down in Dragon Palace City and waited for his meal.

As for Ice Dragon and Gem Cat, they went to see the situation of the Vortex Totem.

If the whiskers of a totem-level magical beast were to be fresh, they had to be removed at the last minute.

This was not easy to unload. The totem dragon kings needed to personally operate it.

Apart from that, cooking a totem was also very particular.

While waiting, Shi Yu couldn't help but enter the ruins space to take a look at Susu's situation.

This guy woke up in time. It was time for dinner.

In the space, on an island in the middle of the lake.

A water-blue jelly-like creature opened its dark blue eyes.

A powerful aura involuntarily emitted from its body.

Eleven, Buggy, Baby Ginseng, Chi Tong, and Ling, who were doing different things in all directions of the ruins, raised their heads and looked in this direction.

"Damn it."

Shi Yu also arrived above Lake Heart Island. He sensed the change in Susu and felt sad and excited.

He was excited that after Susu swallowed a pile of rare resources to evolve, it had indeed obtained relatively powerful skills.

However, the sad thing was that a pile of rare resources only allowed Susu to awaken a super racial skill, and it was a relatively ordinary super skill.

Shi Yu didn't know if he had succeeded in this bet.

However, Shi Yu was quite gratified that it had woken up so quickly after sleeping for less than a month after swallowing so many resources.

It was probably thanks to the transcendent Absolute Sleep.

It was also possible that it was related to Susu's overlord will, making it easier to evolve.

Otherwise, according to Shi Yu's understanding, even if it was a pet that swallowed relatively ordinary resources and mastered Infinite Devour, it would have to sleep for a long, long time.

Swallowing resources that exceeded its level and sleeping for a year or two to digest was common. Susu was really fast.

"Ning!! (Sob, there's only one super skill.)"

At this moment, Susu looked up at Shi Yu with tears in its eyes.

"It's alright, we don't lack resources. We'll bet in the future." Shi Yu smiled calmly.

< Name > Susu

[Race]: Mutated Water Slime

[Race Level]: Mid-level overlord

[Level of Growth]: Monarch Level

[New Race Skill]:

“High level”: 1. Blizzard (Ice-element skill)

This skill was very unexpected for Shi Yu.

Because previously, Susu had basically awakened water-element racial skills. This was the first time it had awakened ice-element racial skills.

Shi Yu judged that this must have awakened after devouring the Ice Dragon Whiskers and a pile of Ice Dragon badges.

Initially, Shi Yu’s goal was the ice-element Heavenly Frost Cold Energy, but from the current outcome, it was completely wishful thinking.

Be it the Ice Dragon Whiskers or the Ice Dragon Badge, neither was enough for Susu to master racial skills like the Heavenly Frost Cold Energy. In the end, it probably had to rely on the skill index or swallow a Dragon Mother.

Although this snowstorm could, like Rain Prayer, borrow the power of nature to change an area almost permanently into the corresponding natural forbidden zone, and was an ice-element ultimate move, it was not very useful to Susu.

However, it was better than nothing. Opening up the ice-element path was not bad either, laying the foundation for the future Heavenly Frost Cold Energy!

2. Star Sea (High-level water-element skill, can establish its own connection to the water-element star in the sky, and recover its energy through the power of the star).

This was probably converted from absorbing “water-element stars”.

From the looks of the effect, it was still a boring skill...

In the universe, water was widespread. That was right, but the nature of this skill was actually no different from Baby Ginseng’s storage beam, the skill that borrowed the power of the sun.

Borrowing natural power from the universe was definitely not faster than directly recovering physical fitness from the blue planet with natural energy. The recovery effect was probably inferior to the combination skill of rain and water elemental control.

Moreover, after Susu inherited the power of the Blue Sea Sprite, it could contract the sea through the “Blue Sea Contract” skill and obtain almost endless energy. The use of this skill was really not big.

However, unlike Blizzard and Star Sea skills, this was the first time Shi Yu had heard of them. There were no records in the index either.

Shi Yu still didn't know what the effect of the sea of stars above transcendent proficiency would be. Perhaps he could look forward to the effect after filling it up. It was something he could look forward to in the future.

What if it could allow Susu to awaken the ability to "summon comets" and fish some "mutated water resources" from the universe to use...

3. Memory Water (High-level skill of both water and time, a water drop that can temporarily strengthen the memory ability of a life form!)

"With this, it won't be a loss!"

If it was said that Shi Yu was not too excited about the effects of Blizzard and Star Sea skills, then when it came to the memory water drop, Shi Yu was simply overjoyed!

This skill was the same as the Time Fruit. Emperor Shi's pet also knew it!!

Moreover, it was the skill mastered by the creator of the memory crystal!!

The effect of the memory water drop below perfect proficiency was to increase memory ability. This was actually very powerful.

To be able to directly turn a bad student into a genius, although it was only the kind of straightforward memorizing... Even so, it could make many people dream of having this skill.

Especially for feeders and Mechanics, it was very rare for them to be able to memorize a pile of knowledge firmly in their minds. Even if they didn't know how to use it agilely, it was useful.

Moreover, this was only an ordinary effect. After the memory water droplet was trained to perfection, it was said that it could also give birth to branches of the ability to "wash away memories" and "memory transfer".

Dong Huang's water and time guardian used the derived ability of "memory transfer" to create a memory crystal.

The memory crystal recorded its experience in controlling the water element. It could be used by other water-type creatures to cultivate. It was a cultivation ability.

Moreover, with this skill, perhaps even if Susu reincarnated in the future, it could escape the fate of all its memories disappearing.

No matter what, it was also a rare time skill. Shi Yu looked forward to the effect of the memory water drop reaching the maximum level.

"Super level":

Wave Cannon (Water-element super skill, can condense a water cannon containing wave power to attack).

The only super skill was most likely from the lowest-level elemental core.

"It's alright," Shi Yu said.

Although some skills were of the same level, under the same level, skills were indeed divided according to attributes, positioning, and effects. This was inevitable.

There were no trash pets, only trash Beast Tamers, no trash skills, only trash users. These words were all lies to children.

The Wave Cannon was relatively conventional among water-element super skills.

Fortunately, the Wave Cannon was only relatively ordinary. It was purely because Shi Yu and the others had seen too many super skills with stronger effects. Under normal circumstances, its power was not bad among water-type attack skills. However, it could only be used in battle, so its effect looked relatively simple.

In the short term, Shi Yu probably wouldn't use this skill. He could only leave it to fate.

Normal Energy Points: 5.5 million

Susu had awakened a total of four new skills. Its energy level had even reached 5.5 million. This way, in Shi Yu's team, only Buggy's normal energy level had yet to reach 5 million. It was still struggling at 4 million.

"How do you feel?"

"Ning... (I feel that I'm still at the bottom of the team.)" Susu analyzed a little and widened its round eyes. It came to a conclusion and looked at Shi Yu.

Shi Yu : "..."

What could he do? The skills he gambled back were definitely not as strong as the skills specifically replicated...

Fortunately, it was a racial skill. After maxing out its energy level, it could become extremely high!

At least its energy level would completely crush Buggy!

If Susu wanted to stand up completely, it was better to wait until it obtained the Blue Sea Sprite inheritance. If Shi Yu wanted to tailor-make combination skills for it like Eleven and the others, he would definitely have to wait until it learned the two core skills of the Blue Sea Sprite and customize them around it. After all, this was Susu's foundation. It was definitely stronger than researching combination skills around other skills.

Chapter 474: Buggy Standing Up

Soon, Shi Yu came out of the ruins space.

At the same time, the frost dragon and the gem cat happened to return from the Dragon Palace kitchen.

"How's the Vortex Totem? When can we start?" Shi Yu immediately said when he saw them.

"In half an hour."

Ice Dragon bared its teeth.

“Soon. Mother Dragon, how are your thoughts on the legendary resources?” Shi Yu came over and massaged Ice Dragon.

Ice Dragon was speechless.

This kid was never going to stop.

“No means no.”

“If you say that you’re giving the legendary resource to Chi Tong, I can still grit my teeth and bear the pain. I’ll feel like I’m losing out if I give it to that worm.”

[Buggy: ???]

[Buggy: Sobbing...]

“Pfft.” Beside him, the gem cat chuckled.

Shi Yu : “...”

Why did they all like to hurt Buggy?

Buggy was so cute, what was wrong with strengthening Buggy?

“For Chi Tong though, it’s fine?” However, Shi Yu suddenly discovered a blind spot.

As expected, Mother Dragon was still close to Chi Tong.

Buggy was purely a child picked up from the streets, not its biological son.

“That’s true. Back then, for me, Mu Huiyin killed her way into the totem country and snatched legendary resources to strengthen me. Now, I’m giving her a legendary resource to accelerate her growth. Sigh, unfortunately, I don’t have legendary resources of the undead and fire elements here. I don’t have suitable resources for the other Dragon Kings either. I can’t even exchange items.”

“Eh, heh, why don’t we do this? I’ll give it to you when I have it.” Ice Dragon chuckled.

Shi Yu made an empty promise. It could also do it too!

“You...” Shi Yu’s serious expression turned to joy. “This is a coincidence. I happen to have a legendary undead resource here. Exchange the dragon-type legendary resource with me, then take that legendary undead resource and give it to Chi Tong. How about that?”

“We both won’t lose out, it’s a trade.”

“It’s decided then. Dragon Mother, you’re not allowed to regret it. I’ve recorded it. I’ll let the other Dragon Kings hear it at the banquet and let them know that you’re a good dragon who values relationships.”

Ice Dragon: “?”

Ice Dragon: ???

Gem Cat: ←.← Meow, the more you talked, the more mistakes you made. Why play mind games with someone like this, you were bound to fail.

...

Ice Dragon felt that it was extremely unlucky to have encountered such an unlucky person like Shi Yu.

Its own Beast Tamer was such a cold and powerful person. Why did it choose Shi Yu as his contractor?

“F*ck, so be it!!”

A moment later, Ice Dragon cursed.

Putting aside the truth, Shi Yu was right. With his potential and the protection of the Dragon God, he would become rich sooner or later.

Investing in this guy now... It wouldn't lose out.

However, it had only obtained two legendary resources from the Dragon God Ruins this time. It felt a little painful to give half of them to Shi Yu at once.

After all, there was not a single legendary resource in the inheritance Mu Huiyin left it.

Of course, if one had to say, the value of Mu Huiyin's ruins space was still not inferior to other legendary resources.

“Hurry up and thank Mother Dragon.”

As Ice Dragon agreed, Shi Yu was immediately overjoyed. Great.

“Hurry up and kowtow for the new year.” He even summoned Buggy immediately and let Buggy thank him personally.

Buggy : “...”

“Wu...” After Buggy came out, it looked at the ice dragon with tears in its eyes. Its little head was like a sewing machine, flying crazily in the air to worship the ice dragon.

At this moment, Buggy was so touched that tears streamed down its face. Really? Was it really going to have legendary resources?

As the only creature in the team that could use equipment above its level and display pretty good effects, the difference in Buggy's strength was too big.

The more similar equipment one carried, the higher the strength of the illusion.

One could imagine how strong it would be if Buggy carried a dragon-element legendary resource and imagined a divine dragon.

It wasn't a problem to defeat an ordinary overlord above its level. It wasn't impossible to consume legendary resources to forcefully erupt and unleash a totem attack.

Even the increase in Buggy from the Time Fruit was not as powerful as legendary dragon-element resources.

Buggy was very excited.

However, Shi Yu secretly glanced at it.

It was too early to be happy. When the resources arrived, it would definitely be him, the Beast Tamer, to keep them first.

He would give it to Buggy when it grew up.

When it was first in the team, then they could talk. This would stimulate its motivation.

“Stop thanking me, stop thanking me. Damn it.” Ice Dragon was angry.

“Mother Dragon, what resource is this?” Shi Yu asked in anticipation.

Ice Dragon gritted its teeth and said, “I originally wanted to use it to exchange resources with the other Dragon Kings. You guys got lucky.”

With that said, it summoned a green dragon ball from the ruins space.

The Dragon Ball emitted a rich power, and the lingering fluctuations seemed to be surrounded by a green divine dragon.

Upon seeing this dragon ball, Buggy’s eyes immediately turned red and it couldn’t help but drool. Shi Yu also gulped and suddenly realized something impressive.

“Space element!” Shi Yu said in shock.

“That’s right. The owner of this legendary Dragon Ball was left behind by a certain generation of spatial Dragon Gods in the totem era!”

Ice Dragon said, “Be it the Dragon God of Dragon Palace City or the Dragon King, when their lifespans are about to end, they will choose to challenge the Dragon God Ruins and undergo a life and death trial. It’s said that the Dragon God Ruins contains the secret to the myths. If the challenge succeeds, their strength will increase greatly when they come out. They will defy the heavens and change their fate. If they fail, they will naturally die inside. However, a portion of their bodies will be recorded in the Dragon God Ruins and passed down to the descendants of Dragon Palace City.”

“Until now, no Dragon God has successfully challenged and broken through to the Mythical stage, but many Dragon Kings have succeeded and broken through to the demigod level. They changed their fate and became the new Dragon God, living for a second life.”

“The owner of this dragon ball is the Dragon God who died in battle in a challenge to the Dragon God Ruins. Its race is called the Green Sky Divine Dragon. It’s a dragon and spatial dual-element dragon. There’s a rumor that after this Dragon God reached the demigod level, it tried to modify its bloodline to the Mythical Green Dragon, so it got its name. In short, it’s letting you off easy. Space and dragon-element, these are simply comparable to two legendary resources! Remember to return me two in the future!” Ice Dragon cursed.

It had obtained two legendary resources, one of which was an ice dragon-type. It happened to be able to use it, and the other was a spatial dragon-type. Its compatibility with it was not very high. It originally planned to exchange it for something else, but now, it had benefited Shi Yu.

“Green Sky Divine Dragon...” Shi Yu and Buggy looked at each other. It wasn’t from the Dragon God Statue.

“By the way, Mother Dragon, did you challenge that life and death trial?” Shi Yu asked.

He felt that the aura of the ice dragon didn’t seem much stronger than before.

Ice Dragon: “Are you crazy or am I? Why would I challenge that, it’s not like I’m bored or anything? Just a newbie gift bag through the newbie trial.”

Shi Yu and the gem cat : “...”

As expected?

However, were all the newbie gift bags so luxurious?

“Buggy.” In short, he finally saw the legendary dragon-element resource. Shi Yu swallowed his saliva and immediately let Buggy receive it into the spatial pocket. During this process, Ice Dragon was also very envious.

“Cough, cough.”

Looking at Ice Dragon in this state, Shi Yu was embarrassed to ask if the two level-eight resources that Ice Dragon had originally planned to give were still included...

Forget it, let it keep it for its retirement. He didn’t want to push it...

A level-nine item was even more precious than ten level-eight items. Two level-eight items were fine.

“Wu—” At this moment, just as Buggy was lamenting that it was finally going to stand up, Ice Dragon spoke again.

“Wait, that worm, this time, follow the method of pinching the Ice Dragon Badge and squeeze a bunch of Dragon God figurines for me before leaving!” Ice Dragon kept feeling that it couldn’t lose out too much, so it shouted, “Just treat it as a deposit.”

Buggy was speechless. “...Wu (Damn it, I have to work again!!)”

Chapter 475: Dragon God Protection

After Ice Dragon gave the “Legendary Dragon Ball” to Shi Yu and the others in resentment, it seemed to have aged ten years.

However, the subsequent barbecue banquet healed its heart very well...

At another “private” Dragon Palace banquet.

The Sea Dragon King, the Azure Dragon King, the Ice Dragon King, the Little White Dragon, the Sky Penetrating Whale, the Gem Cat, Shi Yu, and the others from the Dragon Palace, who had participated in the crusade of the Vortex Demon Beast, gathered together excitedly.

On the huge grill were a few huge and energetic octopus tentacles.

At the side, the overlord of Dragon Palace City, the Crystal Dragon, was specially invited to cook.

Although these Dragon Kings ate raw food, as a human, Shi Yu definitely had to eat them cooked. Moreover, they needed to specially deal with the negative energy attached to the octopus tentacles. Otherwise, it would definitely not be healthy to eat them.

In order to accompany Shi Yu, these Dragon Kings decided to try cooked food this time.

“This is a good supplement...”

Crystal Dragon Chef thought to itself that this was quite the masterpiece.

“These tentacle whiskers contain rich nutrients that can increase immunity, promote the growth of life, and also increase the physique for physical fitness.”

“There are also nutritional supplements that promote reproduction, health supplements for beauty and skincare, and strong life force that can resist aging...”

The Crystal Dragon Chef used the super Strange Fire skill “Crystal Flame”, which was not afraid of water, to combine various materials to cook the Vortex Demon Beast’s whiskers while introducing its nutritional value.

Upon hearing that it could promote reproduction, the little white dragon frowned and looked at its parents. It suddenly felt a sense of danger.

“Cough.” The single Dragon Mother looked up at the sky. It had been alone for more than 2000 years. Why did it need this effect?

“Not bad,” the Sea Dragon King and the Azure Dragon King said.

Although the level of the Vortex Demon Beast’s whiskers wasn’t very high and only between level seven and eight, and although it wasn’t like the Sea Dragon Kings had never eaten resources of this level before... They couldn’t help but feel tempted by this fresh food. It was their first time eating this type.

“Little White, eat more when the time comes,” the Sky Penetrating Whale said.

“Little White, eat more when the time comes,” the Sky Penetrating Whale said.

For them, the Vortex Demon Beast Whiskers was still very useful.

“Eh... Brother Shi Yu, aren’t your pets coming to eat?” The Sea Dragon King realized that Shi Yu didn’t summon his pets and couldn’t help but ask.

Such nutritious food, it was not a problem to give a monarch-level pet more to eat and add hundreds of thousands of energy points.

“They...” Shi Yu found it difficult to say. He had also called Eleven and the others.

However, Eleven was not interested in meat food. It liked to eat metal the most, followed by fruits.

Buggy was the same. It only ate plant fruits, let alone the ginseng baby. It rarely ate even fruits. As for Chi Tong, it was more interested in eating the soul of the Vortex Demon Beast. It didn't like meat either.

Ling... just needed to chill. It couldn't eat either.

Susu, the only one who could get some benefits through Infinite Devour, was still full. After all, it had eaten a lot of good things in one go previously.

"They're not eating. I'll just pack one for Susu later, I'll remember to take away a bit more," Shi Yu said.

Regardless of whether Susu ate it or not, it was not bad for him to keep some as snacks. Although it was not a pure supplement, it at least had the effect of replenishing vitality. It was very suitable for eating and playing after adding some super skills.

"No problem," the Sea Dragon King agreed.

Then, it said, "Brother Shi Yu, eat more too. From the looks of it... you have to nourish yourself well."

Shi Yu nodded. He had to nourish himself well. Before coming out, he had specially given points to Susu's three new high-level skills randomly just for this meal.

Buzz...

At the same time, the octopus tentacles made a sound. Drops of hot oil slowly slid down the tentacles, and the bent and shining octopus tentacles emitted an alluring fragrance.

The various spices traded with Dong Huang were sprinkled on by the crystal dragon.

...

"Burp ~"

Half an hour later, Shi Yu lay on the soft sponge seat in satisfaction.

Not bad. It was tender and crispy, and the more he chewed, the more fragrant it became. Unfortunately, although his appetite was greater than other Beast Tamers of the same level, it was still much inferior to totem-level beasts like the gem cat. He let them eat most of the food.

"Senior Shi Yu, didn't you say just now that you wanted to participate in some world competition?" The little white dragon tugged at its octopus whiskers, its mouth filled with oil as it spoke unclearly.

"Yeah." Shi Yu touched his round stomach and said, "By the way, I remember that when I left Dragon Palace City after the last banquet, I also saw an envoy from the World Tree coming here. Is Dragon Palace City also participating in the world competition?"

The totem faction could also participate in the rules of this world competition. As one of the largest totem factions, it was not strange for Dragon Palace City to be invited.

"Ah." The little white dragon didn't know.

“No, although I was invited, Dragon Palace City won’t participate in this world competition. For Dragon Palace City, the blessings of the World Tree aren’t as attractive as the Dragon God Ruins and other Dragon Palace ruins,” the Sea Dragon King said. “Dragon Palace City has a stable path of advancement from awakening to demigod. It doesn’t have to run to the outside world to compete with other factions.”

“Ah, this.” Shi Yu was envious. What! Dragon Palace City wasn’t participating?!

At that time, who would protect him?

Just the cat totem wasn’t enough.

“Meow.” The gem cat held the food quietly, not wanting to care about worldly things.

Ice Dragon was silent. It was worried again if Shi Yu would die in the world competition and cause the investment to go down the drain.

“...Even if you don’t participate, how about your Dragon King team go and see the competition?” Shi Yu looked at the sky.

As he looked, he suddenly realized that a figure slowly appeared in the sky.

Suddenly, the totems and overlords present held their breaths.

The figure in the sky stared down quietly.

“Lord Dragon God!!” After a moment of silence, the Sea Dragon King, the Azure Dragon King, and the other totems exclaimed. They didn’t understand why the Dragon God had suddenly come and greeted them.

The overlord chef, the Crystal Dragon, was also stunned. It was so scared that it immediately raised its claws and tried to pass the food to the Dragon God...

“Yes.” The Dragon God nodded and slowly landed. Then, she looked at Shi Yu.

Shi Yu immediately stood up cautiously.

“You’re saying that you want to fight for the blessing of that tree?” the Dragon God said.

“Lord Dragon God, do you know about the World Tree?” Shi Yu said.

The Dragon God said, “It’s considered the embodiment of the blue planet’s will, and also the strongest existence on this planet at the moment.”

“Mythical level?” Shi Yu said.

The Dragon God shook her head and said, “If it’s purely the will of Blue Planet, it might be called Mythical, but it’s just the embodiment of will. It can’t be considered that.”

“But even so, its power is extraordinary. Just like how the Blue Sea Sprite is known as the top existence among demigods because it can control the power of the sea, the World Tree is stronger and can control the natural power of the entire planet to a certain extent.”

Shi Yu opened his mouth slightly. and this still wasn't at the Mythical stage?

"Every Mythical creature is a life form that can transcend the restrictions of Blue Planet. They will be stronger," the Dragon God said.

"However, the race level of the World Tree might be considered a Mythical race. After all, it can also be seen as the son and embodiment of Blue Planet."

"Blue Planet's true consciousness might have already fallen asleep with the end of the Mythical Era. The World Tree is equivalent to a clone it chose at the last minute."

Shi Yu was stunned. "Then this World Tree's Blessing... is it a divine skill?"

The Dragon God looked at Shi Yu and said, "I can't tell. Do you want to increase your cultivation through the blessings of the World Tree?"

Shi Yu's expression fell. "Yes, my cultivation is too slow. When I thought that my level might not be enough to help you, Lord Dragon God, I couldn't rest well all night. Then, I happened to hear that the Blessing of the World Tree could quickly help Beast Tamers reach the legendary level. I decided to take a gamble and go to the World Tournament to take a look."

"Although it's indeed a little dangerous... We're not too weak either. We think we can give it a try."

Ice Dragon and Gem Cat : "..."

If this wasn't a scumbag playboy, what was? Was this really his goal??

The Dragon God said, "Alright."

With that said, she casually swung her hand, and the green water condensed into a bead that flew towards Shi Yu.

"The Blessing of the World Tree is indeed the fastest way to increase your strength. Do your best."

"This bead is for you. It's condensed from the 'Protection Water' skill. It can protect your life at the critical moment."

Ice Dragon and Gem Cat: "!!!"

Lord Dragon God, he just wanted to trick someone into giving him treasure!!

However, putting aside the truth, what Shi Yu said just now didn't seem wrong from a different perspective?

Or rather, as long as the outcome was the same, the Dragon God didn't care about Shi Yu's true goal at all.

At the same time, Shi Yu, who had received the water droplet, was extremely surprised. He was even more surprised than when he obtained the legendary resource.

Water of Protection!

Susu had also mastered it. Like Chi Tong's Flame of Protection, it was a skill that could predict danger to a certain extent and automatically protect the holder.

After training to a high proficiency level, one could even go past the user and give it to others.

It was the core of a top-notch protective equipment. Shi Yu even had several on him at this moment.

Although Shi Yu had several, could what Susu gave him compare to what the Dragon God gave him?

Through the protective water condensed by the Time Fruit, Susu could barely withstand an overlord's attack.

But it wasn't too much for him to expect surviving a demigod's attack if it were the Dragon God who gave this to him, right?!

In other words, it should be able to block the attack of a top-notch totem. It was probably even easier for ordinary totem-level attacks. It might be able to block several times!

Could a mere overlord-level attack cause ripples to this?

This was simply a consumable legendary top-notch defensive equipment.

Shi Yu suddenly felt that he could be more confident in doing some things.

Initially, he was still a little hesitant to go abroad to train and go to the World Tournament, but now, he heaved a sigh of relief and instantly felt that he had several more lives.

"Thank you, Lord Dragon God!" Shi Yu quickly thanked.

At the side, the little white dragon watched in envy. So good. In comparison, the method it used where it summoned its parents to be reinforcements was too slow. When its parents arrived, its ashes were scattered.

"Don't disappoint me." After the Dragon God sent the protective water bead, she slowly turned and left, as if she had appeared this time to let Shi Yu stop courting death.

Chapter 476: Ruins Left Behind by the Space Emperor

A few days later.

Shi Yu had been enjoying himself in Dragon Palace City for several days. In the past few days, he had been very happy to be served delicious food every meal.

Apart from that, Buggy was also very happy, because it went to the Dragon God Statue to visualize for a few days.

This time, after breaking through to the monarch level and visualizing it after having a medium will, Buggy clearly obtained more benefits than before.

Its normal energy level had reached 4.21 million. Although it was still pitifully low, it was a huge breakthrough for itself.

Apart from that, the proficiency of the Dragon of Imagination had also reached expert level. It was much faster than letting Shi Yu increase his points. Although super skills were the most difficult skills to train, it wasn't impossible to quickly increase them when the proficiency was low.

For example, the "memory crystal" sent by Dong Huang was a cultivation tool that quickly increased the proficiency of the super skill Water Element Control. There was also the source of life skill of the ginseng baby. It could also quickly increase proficiency by using a large number of resources to strengthen life force.

Various skill teachers had cultivation methods to quickly increase skill proficiency.

The Dragon God Statue was clearly a visualization object with a very obvious effect on the increase in the Dragon of Imagination's skill. After all, this was a training venue specially chosen by the Dragon God for Buggy. It was to let Shi Yu quickly charge into the training venue chosen by the legend. The effect couldn't be bad.

"I really want to raise you in Dragon Palace City..." Shi Yu muttered. There was no one else with this cultivation speed. Although this greedy behavior was not very good, it saved him trouble.

"Wu wu wu." Buggy shook its head crazily. No, it felt that the visualization effect had decreased again. It was purely the visualization effect caused by breaking through to the monarch level and the breakthrough in willpower. Compared to staying here to visualize, it was still more concerned about the legendary Dragon Ball and the "Ultimate Absorption" that Shi Yu had taken away.

"Forget it, let's go. We've stayed long enough."

On this trip to Dragon Palace City, he had taken a pile of tentacle whiskers of the Vortex Totem and even obtained a legendary Dragon Ball, a top-notch defensive tool, and let Buggy's Dragon of Imagination reach expert level. At this moment, under the strengthening of the Dragon of Imagination, Buggy's energy level could instantly reach ten million. Unlike the increase of Eleven and Chi Tong, Buggy's increase would almost never cause any damage. If it was in the field of imagination, the increase would be even higher.

As for Susu's three new high-level skills, as they were eating while lazing around and adding points, all of them had reached transcendent level and could be considered evenly matched.

Among them, only the Star Sea skill was worth mentioning, because it was extremely deceptive. In the mystic realm of Dragon Palace City, Susu didn't have the ability to recover his energy with the power of the water element from outer space at all. It was like having a water-proof wall. From entry level to perfection, it was all trash skills. It couldn't sense the corresponding power, and it was similar to the skill of absorbing sunlight.

Only after reaching transcendent did the sea of stars become a little useful. Even in the mystic realm space, it could feel the power of the water element outside, although it was only a little.

On this day, Shi Yu and the gem cat had already planned to leave Dragon Palace City. After all, they couldn't stay on this side forever. It was mainly because the Vortex Demon Beast's whiskers had almost been finished. They had to let the Vortex Demon Beast regenerate longer.

When they heard that Shi Yu and the others were leaving, the Ice Dragon King, the Sea Dragon King, and the others immediately sent Shi Yu and the others off!

...

“Wuu.” After a long time, Shi Yu and the gem cat finally came out of the sea.

After coming out and seeing the real blue sky, they immediately felt refreshed.

“Cat, let’s go back to the ancient capital,” Shi Yu shouted. “That kid An Chang’s vocation assessment seems to have started. I still want to see his performance.”

“Ah, return to the ancient capital?” The gem cat was stunned. “Aren’t you going to the Space Capital to take a look? Didn’t I say that a ruin appeared there previously?”

Shi Yu: “!!!”

The gem cat showed a disdainful expression and said, “How are you an archeologist? Are the ruins no longer attractive to you?”

Shi Yu’s expression darkened. “I forgot. There are many ruins. The Mythical Ruins corresponding to the ruins crystal and the Phoenix Race ruins mentioned by the Undying Dark Phoenix are all more attractive, but we can’t go there at the moment.”

“Wait, maybe I can go take a look at the Phoenix Race ruins when I’m free. You’re also at the totem level. Now, you still have the protective equipment gifted by the Dragon God... When the time comes, I’ll call Mother Dragon along...”

The gem cat’s eyes lit up and felt that it was alright.

“Besides, isn’t Dong Huang also planning to establish an exchange team and go to the other six countries? We can still hitch a ride.” Shi Yu chuckled.

“At that time, there will definitely be Titled Legends and many Legends leading the team.”

“Then it’s settled!” The gem cat nodded crazily.

“It’s a deal.”

Shi Yu took out his cell phone and subconsciously glanced at the time. Then, he discovered a pile of missed messages.

He first flipped through them one by one before being stunned.

“What’s wrong?” the gem cat asked.

“Wu...” Shi Yu’s expression gradually turned serious.

“I think we can ignore that kid, An Chang. When the time comes, we can just casually look at his news on the Internet. We indeed have to go to this Kong Capital...”

“Huh?”

“The ruins that appeared in the Kong Capital... Principal Feng sent me a message to say that it’s a trial-type ruin left behind by the Kong Emperor.” Shi Yu turned to look at the gem cat and said, “That legendary Emperor Kong left it behind.”

“What!” The gem cat was shocked.

Emperor Kong?

No wonder the spatial attainments of the owner of the ruins were above its ability to run away. It was actually the Space Emperor.

“What’s the situation in the ruins there?” the gem cat asked.

Shi Yu continued to browse the information. Then, combined with the new archeological discoveries in the country that had been updated on the archeological index, he kept summarizing.

“The ruins are trial-type ruins. It’s similar to the one I cracked in Ping Cheng. There is a guardian in the ruins. Beast Tamers who enter can fight the guardian.”

“According to the guardian, those who can defeat it can learn a secret left behind by the Space Emperor. It’s also an inheritance that concerns the starry sky.”

“Only those below the legendary overlord level can enter the ruins space... Senior Lu is also there, but so far, even Senior Lu hasn’t been able to defeat the guardian. No Beast Tamer in the past has been able to defeat the guardian.”

“It’s related to the starry sky?” the gem cat said in surprise.

Shi Yu looked up at the starry sky and was also very surprised.

“Is there any other information?”

“Yes,” Shi Yu said. “This ruins space is very special. Before and after every challenge, the challenger can prepare for a period of time. Then, the Beast Tamer who enters realized that the meditation speed in this ruins space is almost several times faster than in the outside world.”

“Senior Lu even determined that the efficiency of meditation in this ruins space is even faster than legendary ruins. As expected of ruins modified by the Space Emperor.”

“Unfortunately, the time one can stay is still too short. Only the Beast Tamer recognized by the guardian who is qualified to defeat it can stay inside longer.”

Shi Yu’s gaze flickered. Increase in meditation efficiency? Even if this wasn’t related to the Space Emperor, he had to take a look.

Secretary Ling kept urging him all day, almost making his ears calluses.

He would directly explore a ruin and break through in two to three days. He would directly display an unscientific breakthrough speed and see what it was like.

“No wonder you’re so excited,” the gem cat muttered.

“Is there any other information?”

“Well... Yes. Do you know why this ruin appeared in Kong Capital?” Shi Yu looked at the gem cat.

The gem cat was stunned. “I don’t know. When I saw it, it had already appeared.”

Shi Yu said, “According to the judgment, the Space Emperor Ruins might have been accidentally summoned by a Beast Tamer with the talent to listen to history. However, this Beast Tamer isn’t a member of Bureau 11. So far, Bureau 11 hasn’t found any traces of him or her...”

“It’s not on the updated information in the archeological index. I don’t know the specifics.”

“In other words, another archeological genius like me is going to appear in Dong Huang...”

“The initial ruins summoned by this person is the Space Emperor Ruins. This guy has something. He’s even fiercer than me back then.” Shi Yu sighed. He had only summoned a ruin left behind by a legendary Beast Tamer and the Dream Shell, unlocking the main storyline of the Frost Dragon, General Mu Huiyin. This guy was good, directly creating the Space Emperor Ruins. It was an epic-level dungeon.

“Ancient Capital University will love this.” the gem cat said.

“What if it’s a 70 to 80-year-old old man?”

“...”

“Forget it, let’s not care so much. Let’s go to Kong Capital to take a look at the situation first. Senior Lu has also come out and is over there. There’s also Principal Feng and Grandma Li.”

“Let’s go, let’s go.” The gem cat grinned anxiously and said, “Do you think there can be spatial gemstones inside...”

...

A storm was brewing in the capital, but business elsewhere had to be carried out.

Ancient Capital.

The examiner team led by Master Qu Jie was carrying out the wilderness survival trial of the vocation assessment in Ancient Capital with the help of the Eye of Heaven.

“This year is the last vocation assessment presided over in the ancient capital... After that, we’ll go to the capital,” Master Qu Jie sighed.

The promotion came too quickly.

“Master Qu Jie, why do I feel that there’s something wrong with that super dark horse this year...” Suddenly, an examiner shouted.

“What’s wrong?”

“Look at the editing of the Eye of Heaven.”

Master Qu Jie hurriedly came over and looked at the video.

In the video, a young boy was holding a wooden spear and riding a monarch race sea dragon. He directly stabbed out with a "spear light". A cold light enveloped a hundred meters and easily defeated the enemy in front of him.

Although he wasn't holding a wooden sword, Master Qu Jie and the other examiners felt that this scene was similar. "..."

"He has the Fusion Talent. It's quite normal for him to fight alone..." Master Qu Jie said.

"That's the problem. He's not in a fusion state now. The special effects of the spear light are all simulated by the pet... Isn't this like taking off his pants to fart? Isn't it unnecessary? It's better to just directly let the pet fight."

"Master Qu Jie... He's not the only one like this. He's relatively normal. Look at this Pig Knight and this Dog Knight. They all let their pets pull special effects in their own battles as they fight on their own... The geniuses this year are a little abnormal."

Eye of Heaven: nodding crazily. It felt that it was most likely the fault of the Iron-eating Beast Knight last year. One person became popular and everyone followed suit.

Master Qu Jie looked up at the sky. "...I don't care. In any case, I'm about to be promoted. The future of the ancient capital is in your hands..."

Chapter 477: Space Beast Egg (1)

On the weekend, the sky was clear.

After leaving Dragon Palace City, Shi Yu and the others headed in the direction of the Kong Capital.

Under the continuous Instant Transmission of the gem cat, transport such as planes were completely destroyed!

"Holy shit!"

Suddenly, Shi Yu's cry of surprise came from the continuous flashes.

The gem cat was stunned. It suddenly braked and looked at Shi Yu, who was holding his cell phone.

"I'm moving so fast, how can you still look at your cell phone in peace?"

"What's wrong now?"

Shi Yu said, "I discovered big news again. My Sequence ranking suddenly increased a lot and I came to 11th place."

"It seems to be because of the battle exchange with Ming Hua a few days ago."

"Huh?" The gem cat was stunned.

Sigh, it thought it was something big.

It was just a small matter. What was there to be shocked about? It wasn't first place.

11th place, not even a level-eight resource reward...

“I’m just lamenting why it’s 11 again...”

Shi Yu looked at the ranking and said in surprise. The one in front of him was Zou Tianwang...

In the beginning, Heavenly King Zou was originally 11th, but he defeated the tenth place and successfully advanced.

Therefore, Shi Yu was also considering whether he should openly challenge Zou Tianwang and enter the top ten to play.

As expected of me. I didn’t do anything at all. My ranking rose really quickly, Shi Yu thought.

However, it actually couldn’t directly replace Heavenly King Zou in tenth place. In that case, Heavenly King Zou’s performance in the subsequent exchange was even stronger than his?

Shi Yu turned around suspiciously and looked in the direction of Demon Capital. Was Heavenly King Zou so strong?

At this moment, in the recuperation room of the Dark Club in Demon Capital, Heavenly King Zou, who had ended his exchange, was lying on the bed to rest. His face was pale, and he was still weak.

He had known from the start that the ranking of this exchange would be changed according to performance. Therefore, after seeing Shi Yu’s cheating performance, in order to not let Shi Yu successfully destroy him, he went all out in the subsequent battles.

Shi Yu was clearly fine and pretended to be weak, while he had clearly overused his Beast Taming Talent and overdrawn himself, but he pretended to be fine and protected his ranking.

“Damn it, if I don’t level up soon, I’m going to be blown up by Shi Yu.”

At this moment, on the Internet, Shi Yu and the others were representing Dong Huang to fight the Ming Hua exchange team. Ming Hua vs Dong Huang had won the exchange event completely, and the trending topic of Shi Yu’s ranking rising to eleven had already been on the Internet for half a day.

Zou Yun was extremely envious. So many people had clearly fought with the Ming Hua Beast Tamer, but in the end, only Shi Yu was on the trending list. He hated it.

Was this fair? Was this reasonable? Of course, Zou Yun also knew that this was related to the others’ rankings not changing, and Shi Yu’s ranking suddenly increasing.

At this moment, what made Zou Tianwang the most uncomfortable was that there was also a discussion that was about to go on the trending list. It was discussing when Shi Yu would challenge him... Later, it might go on the trending list in this way. Zou Yun didn’t know if he should be happy or sad.

...

Shi Yu’s sequence ranking changed again. It could be said that many Beast Tamers of Dong Huang fell silent.

The advancement speed was too fast.

For example, Gao Xuan from Imperial Capital University, after seeing the change in ranking, focused on researching in the new mechanical field. He planned to take a different approach and rely on the resources of the Mechanical Conference to surpass Shi Yu and catch up.

...

At this moment, the Ming Hua Beast Tamer, who was a stepping stone, was the most autistic.

All of them were very dissatisfied with Shi Yu's ranking!!

The Beast Tamers of Dong Huang... were very strong. This, they had already acknowledged. In the subsequent battle exchange, contestant Ming Hua still lost completely.

There was no need to talk about the disciple of the Tyrannical Sea Legend, Zheng Hai. He himself had the strength to suppress the two quasi legends, Ming Hua. No one could defeat a Giant Leviathan.

As for Zou Yun, although he looked gentle and elegant, who would have thought that he would be even fiercer than Shi Yu in battle? His eruption was especially ruthless, and it felt like he was going all out.

That was not all. The most tragic thing was that Ming Hua's contestant accidentally saw Shi Yu's video in the National League.

They originally thought that Shi Yu's performance during the exchange match was already his limit.

However, when they saw in the video of the National League, Shi Yu's more than a hundred-meter-long Nine Li Battle Beast instantly killed 100,000 ferocious beasts with one deterrence and displayed shocking strength, they were immediately stunned.

The Iron-eating Beast during the exchange event wasn't like this!

There was also the final attack of the fight with Gao Xuan. That sword swing of Shi Yu's, and the fact that he was withstanding all the power of his pets on his own body... The commotion looked much greater than when he endured Chi Tong's pet possession alone during the exchange activity. With so many pets' power augmenting him in the National League, Shi Yu just chilled and ate fruits slowly. Why did he immediately faint during the exchange activity? Who was he kidding??

After seeing this, contestant Ming Hua's values were impacted. They kept feeling that Dong Huang was very unorthodox. When they saw Dong Huang give Shi Yu this new ranking, he felt that it was even more unorthodox.

Wasn't this just confusing the exchange teams of other countries if they didn't put this monster in the top ten??? The sinister Dong Huang people!

...

The Kong Capital.

On a huge mountain called "Myriad Mountain".

The "Space Emperor Ruins" around the mountain had already been heavily sealed by the Beast Tamer Troops.

In the temporary archeological camp, forces from all over the capital were gathered. Of course, there were also high-level organizations like Bureau 11.

Principal Feng of Ancient Capital University, Lu Qingyi of Ancient Capital University, Li Lianping, who specialized in the fossil domain, and Chen Yuan, an archeologist who studied ancient legendary emperors.

Chapter 478: Space Beast Egg (2)

These big shots arrived at the scene.

Once the Space Emperor Ruins appeared, many members of Bureau 11 looked over.

Unlike small ruins like the Ping Cheng Ruins, the Space Emperor Ruins was very important and received very high-level attention.

In the camp, Lu Qingyi also discovered the updated sequence ranking.

She sighed silently with a conflicted expression.

At this moment, she already knew what had happened during her seclusion.

For example, Shi Yu had gone out to sea and crushed two overlords, or Shi Yu had brought the gem cat to break through to the totem level, or Shi Yu had won all the national championships in one go... She knew all of this, so her mood was very complicated.

Her original plan was to let Shi Yu go to university to learn something. After graduation, he could have some ability to do hard work for her, investigate some ruins, and be an archeological assistant. Why was he doing all of this only in his first year? Not only did Shi Yu's archeological achievements surpass her in all aspects, but his strength had even caught up to hers.

This wasn't her initial plan!

"Senior Lu!"

"Little Qing ~"

Lu Qingyi stood on the ground and looked at the black cross-shaped spatial entrance in the sky. Just as she was thinking nonsense, two familiar voices suddenly entered her ears, stunning her.

She quickly turned around and discovered the afterimage of a man and a cat. They appeared not far from her and were looking at her happily.

"Shi Yu, Teacher Ying." Seeing them, Lu Qingyi was stunned. "You're back from Dragon Palace City."

"Yes," Shi Yu said. "I saw the messages Principal Feng sent me. Senior Lu, this is the entrance to the Space Emperor Ruins, right?"

After Shi Yu arrived at the first scene, he immediately looked up at the black cross spatial crack in the sky.

"Yes," Lu Qingyi nodded and said.

“No one can crack it yet?” Shi Yu was surprised.

“Is the guardian really that strong?”

Lu Qingyi looked at Shi Yu with a helpless expression and said, “If you have the chance to enter, you’ll know when you fight.”

...

At this moment.

In the ruins of the Space Emperor.

A top-notch master in his fifties was currently challenging the ruins as the vice president of the Beast Tamer Association.

Although the Space Emperor Ruins specified levels, it didn’t specify age. Therefore, some middle-aged and old Beast Tamers who had more accumulation than young people could also challenge it.

Compared to the top masters ranked under the age of 30, these top masters were older. Their development of talent was stronger, and their pets were cultivated more.

The pet sent by this master was a quasi overlord race creature with a normal energy value of 6 million. Under the enhancement of his strengthening talent, its energy value instantly reached 14 million.

This pet was of the light element and was famous for its speed. It shuttled through the ruins battlefield, and light and shadows intertwined in the air. However, bean-sized beads of sweat flowed down the forehead of the vice president of the Kong Capital Association. Opposite him stood a two-meter-tall, pitch-black transcendent life form similar to a mantis. In front of it were two “black saber” organs.

Swoosh!!

The figure of the Floating Light Eagle flashed and turned into a beam of light that stretched out its sharp claws to tear at the mantis life form, but the mantis life form seemed to be very indifferent.

With a gentle wave of the saber, the invisible spatial blades that filled the sky formed a sword domain. Under the tearing of space, accompanied by a miserable cry, the feathers on the entire body of the Floating Light Falcon were sliced off. It fell from the sky in a bloody mess, making the top-notch master’s face immediately turn pale.

“Weak, weak, weak, next,” the mantis life form said in boredom.

...

“Void Mantis, quasi Mythical race, spatial element. It’s a pet personally cultivated by the Space Emperor.”

“Its status to the Space Emperor is equivalent to the status of the Sea Dragon King and the Butterfly God to the evolution legend Lin Feng.”

“And it’s very likely that it’s a pet cultivated by the Space Emperor after he became a legendary Beast Tamer.”

“Although this Void Mantis is only at the monarch level, its battle power is comparable to some weaker overlords. It’s even the master of this ruin.”

“The normal energy level exceeds ten million, and all skills below super level are transcendent. The proficiency of the four super skills is all close to perfect... And it’s a spatial skill. In a one-on-one battle, probably no one can win.”

“This...” Shi Yu was stunned. Listening to the description, he felt that even Eleven and the others were under a lot of pressure.

Lu Qingyi slowly said beside Shi Yu, “It’s said that when the Space Emperor was exploring the starry sky, it accidentally fell into the Starry Sky Mystic Realm. Many extraterrestrial lives are different from Blue Planet live there. The Space Emperor once stayed there and obtained an egg of a cosmic beast and brought it back.”

“At that time, the Space Emperor’s contract slot was already full. He no longer had any intention of contracting a new pet. Even for a top-notch race like the Void Mantis, he only cultivated it as a secondary pet.”

“However, the Space Emperor values this Space Beast Egg very much, because there’s a certain difference in the life structure between the Space Beast and the extraordinary life forms on Blue Planet. It’s a new life form different from animals, plants, elements, and undead. Moreover, every Space Beast is ridiculously strong.”

“The Space Emperor wanted to see what changes could happen to both parties after the Beast Tamer contracted the cosmic beast. At least at that time, there was no precedent for the Beast Tamer to successfully contract a cosmic life form. For this, the Space Emperor sealed this egg and set a test, planning to reward it to the geniuses of the dynasty.”

“As long as a Beast Tamer genius can defeat the Void Mantis he cultivated, he can obtain this egg and inherit the hatching and contracting method of the Space Beast Egg he concluded.”

Chapter 479: Space Beast Egg (3)

“Unfortunately, before anyone could defeat the Void Mantis, the Space Emperor himself was suspected to have fallen in the starry sky. And because this challenge ruin is inextricably linked to the Space Emperor himself, there were also changes, causing the ruin to seal itself. The Void Mantis inside had no choice but to fall into a deep sleep. It was only awakened today hundreds of years later.”

“This is almost all the information I got from that mantis when I went to challenge the Space Emperor Ruins.” Lu Qingyi shrugged.

Shi Yu opened his mouth slightly.

Emperor Kong’s secondary pet?

An egg of a cosmic beast?

“Didn’t the Void Mantis show anything when it learned that the Space Emperor was dead?” Shi Yu asked.

“No, because it said that Emperor Kong didn’t die and the mystic realm space didn’t completely collapse. That’s the best evidence.” Lu Qingyi looked at Shi Yu with a burning gaze.

“It said that it wants to continue carrying out its mission and wait for the Space Emperor.”

These words made Shi Yu’s heart skip a beat.

What, the Space Emperor wasn’t dead?

Although the Space Emperor was the emperor of the last dynasty of Dong Huang, he should be hundreds of years old.

Even if no accident happened, time would naturally pass. It was time to die.

Unless... it was in a special place! Or he had broken through to the Mythical stage!

“The Space Emperor Dynasty has been destroyed, but this mantis still plans to continue the mission left behind by the Space Emperor?”

“Well, it looks like it. Although this mantis is quite strong, it doesn’t seem to be very smart. It’s also relatively simple-minded. It should have been cultivated with the Space Emperor since it was born and doesn’t have any understanding of the outside world, such as the Space Emperor Dynasty.” Lu Qingyi had a headache. “I wanted to trick the pet egg over, but it didn’t fall for it and insisted that I defeat it according to the rules.”

“In its understanding, everything is about the rules. Defeat it and you can get the egg. If you don’t follow the rules, it will use its identity as the owner of the ruins to expel those who don’t follow the rules.”

Shi Yu : “...”

Senior Lu has changed. How could she try using lies?

“I’ll give it a try.” Shi Yu looked at the crack in the sky.

Lu Qingyi said, “Huh? I feel that... you can’t either.”

Shi Yu curled his lips. She lost, so she didn’t want to believe that others could win, right?

“Senior Lu, if you can’t, I might not necessarily can’t either. By the way, Senior Lu, when are we going to fight?”

Shi Yu chuckled.

Lu Qingyi was immediately angry. This was too much. The little guy she dug up a year ago was going to challenge her now?

“Let’s fight later.”

“Alright.” Shi Yu was energetic.

However, if the opponent was the pet of the Space Emperor, he felt that it was indeed not easy to deal with. Shi Yu was silent for a moment. He planned to teach Eleven the Undying Golden Body first before taking a look. Well, he would replicate a Mythical Revival skill from his senior. The more the better.

At this moment, the two of them suddenly noticed that the gem cat beside them was looking at the crack eagerly.

“Teacher Ying...?”

The gem cat: “What do you think the taste will be when it’s fried?”

Lu Qingyi and Shi Yu: !!!

Shut up!

...

Shi Yu’s arrival also alarmed Principal Feng and the others.

Principal Feng, Grandma Li (who had given Baby Ginseng to Shi Yu), and Dr. Chen Yuan, an archeologist who studied ancient legendary emperors. Shi Yu also saw them. These were all familiar faces. Even Dr. Chen Yuan, who usually had a relatively low presence, had actually contacted Shi Yu a few times and asked him about Emperor Shi, Emperor Wu, and other related matters. After all, Shi Yu’s archeological achievements involved these aspects. This Dr. Chen Yuan still admired Shi Yu very much.

“Found it.”

Principal Feng didn’t mind too much when Shi Yu arrived, because the situation in the Space Emperor Ruins had already been explored. If Lu Qingyi couldn’t defeat the Void Mantis, he didn’t expect Shi Yu to either.

At this moment, Principal Feng was most happy that he had already locked onto the archeological genius who had summoned the Space Emperor Ruins.

Five members of Bureau 11 gathered in the conference room.

Principal Feng said with a smile, “Through some time-element transcendent skills, I’ve already locked onto a candidate who might be the Beast Tamer who summoned the Space Emperor Ruins through predictions.”

“Our Ancient Capital University wants this kid. Old Li, Old Chen, alright?” Principal Feng smiled at Grandma Li and Dr. Chen.

“Haha, you’re quite greedy.” Grandma Li shook her head.

“Hahaha.” Dr. Chen also shook his head.

This Ancient Capital University had Lu Qingyi and a genius archeologist like Shi Yu for free. Now that another Beast Tamer with the talent to listen to the Voice of History has appeared, they still wanted him?

Lu Qingyi said, “Grandma Li, Grandpa Chen, why don’t you let me come into contact with this person? I think my experience in leading newbies is quite rich.”

After Shi Yu went rogue, Lu Qingyi planned to switch a target to nurture.

Grandma Li and Dr. Chen were speechless. They kept feeling that Lu Qingyi was unreliable, but they couldn't refute it. Because Shi Yu was really brought out by Lu Qingyi, wasn't he? Although they didn't know what role Lu Qingyi played in this...

Shi Yu sat at the side and watched.

"So who exactly is it? Old Feng, stop beating around the bush," Dr. Chen urged. "From the sound of it, it's a young person?"

He revealed an envious expression.

Among these people, apart from Principal Feng, who had reached level seven in the Beast Taming Space, the other three were all at level six. They had entered the ruins and were also shattered.

Although Senior Li and Senior Chen were big shots of Bureau 11, because they realized their listening talent was too late, they had already missed the optimal meditation age when they joined Bureau 11. Even after various resources were thrown at them later, they had yet to reach legendary.

Not every historical talent was as lucky as Lu Qingyi and Shi Yu to have been unearthed and nurtured very early.

Upon hearing that this newbie was young, they immediately felt that this person was extremely lucky. He had been unearthed by Bureau 11 so early and could receive very good cultivation. They didn't dare to say that he could become a Titled Legend, but there was still a high chance of him becoming a Legendary.

Principal Feng didn't keep him in suspense and immediately said,

"His name is Fang Lan, a junior high school student. She's a local of Kong Capital and has talent in telepathy. His parents are teachers of the Mechanic Department of Kong Capital University."

"And this Fang Lan herself is also a small mechanical genius. She has been cultivated as a Mechanic since she was young and is very interested in machinery. She even won the first prize of the National Junior High Mechanical Competition. She's almost a genius internally decided by the Mechanic class of Kong Capital University. There's also a small chance of her going to Star Capital University. Therefore, it's still quite difficult to persuade her to come to Ancient Capital University... After all, our Ancient Capital University's Mechanic class... Anyway, Qingyi, are you confident?"

Lu Qingyi was stunned. With such a family background, it was indeed not easy for her to change his profession to an archeologist and go to the Ancient Capital University where Mechanics weren't the best. However, if he didn't specialize in archeology, it would be a waste of this talent. It would be good even if he studied both machinery and archeology.

"Senior Lu, Senior Lu," Shi Yu whispered beside them.

"What's wrong?"

"Do you need help?" Shi Yu asked softly.

A little genius interested in machinery? Wasn't this easy to deceive?

If she was given a mechanical Tyrant Dragon to ride, wouldn't she come to Ancient Capital University eagerly? When the Mechanic Department of Ancient Capital University established the Mechanical Beast specialization, her parents would have to jump ship...

Chapter 480: Archeologists Who Don't Want to Be Mechanics Aren't Good Archeologists

In the conference room.

Five members of Bureau 11 gathered.

After discovering that he had a new historical talent, Principal Feng decisively wanted to poach him to Ancient Capital University.

Strike the iron while it was hot and build Ancient Capital University into a super institute comparable to Imperial Capital and Demon Capital University!

As for Lu Qingyi, she also decided to take action personally.

However, from the information provided by Principal Feng, the other party might not be as easy to deceive as Shi Yu back then.

Back then, Shi Yu was born an orphan and was covered in debts. He was even interested in archeology and had experienced the beatings of society. He knew that living off a woman was much more profitable.

Even if it was just ten million yuan, for Shi Yu, forget about archeologists, he could even continue to go to the Feeding Base to be a poop picker.

However, this newbie was different. He was still underage and had a superior family. He definitely wasn't as realistic as Shi Yu in terms of material things. In terms of mental strength, he might not necessarily be interested in the archeological field. After all, he liked the Mechanic class.

If he wanted to persuade others to study archeology, it wasn't a matter of convincing one person, but a family.

The other party's father, a professor of Mechanics at Kong Capital University... A top-notch Mechanical Master. It was said that he was a candidate for the next dean of the Mechanical College of the University. His mother was also a Mechanical Master, a professor at the same University... Even his grandparents were Mechanics.

Of course, Lu Qingyi didn't feel that it was too difficult. After all, Bureau 11's status was here.

If he was given a chance to enter Bureau 11, would he not want to?

Shi Yu was already so rich now, but he still wanted to add up the thirteen bureaus and earn a living from all of them.

However, Lu Qingyi also knew that persuading him to join was not the goal. The goal was to let him sincerely step into the archeological field.

“Help? How do you want to help?” Lu Qingyi said.

“Forget it, forget it.”

Upon hearing Shi Yu say that he wanted to help her pull in newbies, Lu Qingyi rejected.

It was fine as long as Shi Yu didn't cause trouble. She was afraid that Shi Yu would give the newbie some wrong lead role.

Even the members of Bureau 11 had to understand most of the historical situation according to a pile of clues before they had a chance to listen to the Voice of History.

However, according to Lu Qingyi's judgment, Shi Yu didn't seem to need to do this at all.

The number of times he successfully listened to it could already be ranked in the top three in Bureau 11. In just a year, it exceeded the results of many seniors for decades.

If a newbie came into contact with Shi Yu and thought that he could listen to history like him successfully and easily, it would be useless if he didn't study hard.

He couldn't learn from Shi Yu. Shi Yu was a freak! It was better to take it slow and steady.

Not everyone could achieve results in various fields like Shi Yu. Generally speaking, specialization was more stable.

“Perhaps there will be a miraculous effect if Shi Yu goes. According to what I know, those young Mechanics worship Gao Xuan. Shi Yu defeated Gao Xuan in the National League. Doesn't this mean that archeologists have a better future than Mechanics?” Dr. Chen Yuan laughed.

“Speaking of which, after Dean Hao's granddaughter from the Mechanical College watched the National League, she kept complaining about giving up being a mechanic. Haha, Dean Hao has muttered to me many times,” Principal Feng said.

Shi Yu grinned and said, “There's no need, no need.”

“Archeologists and Mechanics don't conflict.”

“There's no need to make the little girl choose in a dilemma. What era are we in now? You should make her 'have it all' happily before she really likes the archeological field.”

“Huh?” Shi Yu's words confused the few big shots.

“What do you mean?” Senior Lu asked.

What was he trying to do again?

Shi Yu said, “Think about it, isn't Grandma Li researching ancient fossils?”

Grandma Li smiled and nodded.

“If using mechanical technology can transform the process of researching ancient fossils into a method that can strengthen the strength of Beast Tamers, wouldn't this be a perfect combination of archeology and machinery?”

“For example, extracting traces of ancient creatures from fossils and reviving them through technological methods. In this way, not only can they understand ancient history better through reviving them, but they, who have been revived by technology, can also be equivalent to a different kind of mechanical pet for Mechanics to contract. A new mechanical pet system can also be born. These mechanical pets might have skills and abilities that have been lost. They can definitely create huge innovation in the existing Beast Taming Domain.”

“Here, killing two birds with one stone. You’ve both done archeology and studied machinery.”

“At that time, mechanical technology will no longer be a tool purely to assist archeological research, but something that helps each other.”

Lu Qingyi, Principal Feng, and Dr. Chen : “...”

Why was this kid so delusional?

Grandma Li, who was studying fossils, had a strange expression. She vaguely remembered that Shi Yu had once asked her if the fossils could still be alive.

Why did Shi Yu’s question level up again?

“How is this possible...” Dr. Chen studied ancient legendary emperors and was a relatively traditional archeological Beast Tamer. Therefore, when he heard Shi Yu’s strange idea, he first felt that it was unbelievable.

But Lu Qingyi, who was beside him, suddenly froze as she thought of something very important.

Why was Shi Yu suddenly obsessed with the combination of archeology and machinery? She remembered that when Shi Yu was in Wu Ling City... he obtained an Awakening Mirror...

“Wait, don’t tell me you’ve already developed something,” Lu Qingyi said.

“Almost. Speaking of which, I have to thank Grandma Li’s Tyrant Dragon fossil...”
