

Beast 491

Chapter 491: Ice Dummy Eleven (2)

As the reincarnation of the Blue Sea Sprite and the peak half-god of the Blue Sea Sprite, many people thought that it reincarnated from a half-god. What if it reincarnated from a Mythical level?

Shi Yu imagined it, but unfortunately, reality gave him a slap. These little guys had no divine power.

In the end, Shi Yu, who sighed, could only place his hopes on Ling.

He hoped that after it fused with the Kirin fossil, it could learn this skill. This way, even if it couldn't perfectly inherit the power of the Kirin fossil, it might be able to deduce a complete divine power later with the Mythical Revival.

Apart from that, Shi Yu also replicated the "Turning Misfortune into Luck" skill.

This wind-element skill could be taught to Ling. Shi Yu felt that it was very useful. After all, as a Mechanic type, it was very difficult for Baby Ginseng to have any healing effect on it. It was very troublesome for a Mechanic to suffer damage, but with the anti-injury skill "Turning Misfortune into Luck", Ling's defense ability after that would be greatly improved.

...

Next, Shi Yu gave Eleven sufficient time to rest and let it adjust its state to prepare for the additional points of the Undying Golden Body.

In the outside world, Shi Yu estimated that he couldn't defeat the Space Emperor Ruins for the time being, so he didn't pay much attention and left it to the others to deal with.

However, he was still more worried that someone would clear the ruins first. At that time, not only would the Space Beast Egg be gone, but even the cultivation opportunities inside the Space Emperor Ruins would be gone.

It was said that the cultivation effect inside was very good. Shi Yu didn't expect to be able to reach the level-seven Beast Taming Space in a short period of time. As long as he broke through to the level-six Beast Taming Space, he would be very satisfied.

At that time, it should be easier to increase his physique and add some super skills. Apart from that, he could also contract Ling. According to Ling's attribute feedback, it should be able to make him, a Beast Tamer, smarter.

At that time, with the memory water drop, Shi Yu felt that he could take the time to memorize the knowledge that he usually didn't have time to remember.

"Are you ready?"

A day later, Eleven recovered.

All of Shi Yu's pets were also adjusted to their optimal state.

Shi Yu began to decide to add points.

In the ruins space, as Shi Yu was about to give “rewards”, the pets gathered and looked at Eleven in envy.

One of the rewards of the internal competition, the pet that won the championship had the priority to add some super skills.

Therefore, now, Eleven was naturally the first to learn a super skill. This opportunity made Buggy beside him extremely envious.

“Wuu!!!” Panda King Eleven was wearing a “frost cleansing suit”. It turned into an ice block with a serious expression. It was ready!!

This frost cleansing suit was condensed from Susu turning itself into “Cleansing Water”.

It was an equipment that could “cleanse negative emotions”. It could effectively help Eleven increase the learning success rate of super skills.

Susu was the only pet in Shi Yu’s team that had experienced the additional points of super skills, so it knew what help a pet that received super skill experience needed.

With Susu protecting them, this was also why Shi Yu was at ease teaching Eleven and the other super skills with medium willpower.

“Chi Tong, possession, Baby Ginseng, heal me, Buggy, venue, Ling, record.”

As it was too difficult to add points last time, Shi Yu made more comprehensive preparations this time.

Chi Tong still possessed Shi Yu and increased his physique and recovery ability.

As for Baby Ginseng, it stood behind Shi Yu and held Shi Yu with one hand, as if it was “imparting strength”. It was preparing to transmit nourishing power to help Shi Yu later.

On the other hand, Buggy instantly modified the environment of the ruins into “earth and sunlight” that coexisted, creating rich earth and sun power to allow Baby Ginseng to take root and recover with Shi Yu.

Rubik Ling, on the other hand, analyzed the state of Shi Yu and Eleven’s bodies with a serious expression. It guarded the bottles and jars filled with “Water of Life” on the ground and did the safety guarantee. It was in charge of stopping the adding of points in times of crisis.

This time, it was foolproof.

Skill: Undying Golden Body

Status: Can be taught

[Teaching success rate]: Medium

[Teaching Risk]: Medium

“Let’s charge.” Shi Yu took a deep breath and stretched out his hand towards Eleven. A golden halo spread from his palm.

Unlike low-level skills, when teaching super skills, the color of the halo would change with the skill attributes.

For example, when he taught Susu Infinite Devour, the halo was blue. Now that he was teaching Eleven, it turned golden again.

“Wuu! (My strength was obtained through my own hard work. Beast Tamer, increase points!!)” In order to strengthen his indestructible heart and successfully withstand teaching, Eleven kept hypnotizing himself.

Even banks could borrow money, so what if it overdrew its hard work in advance? It just had to make up for it later. No one could deprive it of its right to be a bear!

It would definitely succeed this time!

Buzz!!

A golden teaching light pressed on Eleven’s head.

Eleven, who was wearing an ice stool cleansing suit, instantly felt that its body was about to crack. Its watery bear eyes widened and were filled with electricity.

Unlike teaching low-level skills, which was extremely comfortable and intoxicating, learning super skills was extremely painful.

In an instant, Eleven felt as if its body had been smashed into pieces by Baby Ginseng’s self-destruction. Then, it was reassembled and shattered again.

Its body was destroyed, recombined, destroyed, and recombined without limit. The pain time and time again was several times greater than the self-mutilating training it had experienced. Even Eleven, a crazy bear who didn’t care about its life when training, felt incomparable pain.

Chapter 492: Ice Dummy Eleven (3)

At the same time, Shi Yu was the same as last time.

The teaching speed of super skills was extremely slow.

His body began to wither, his hair and eyebrows began to turn white, and his life force quickly flowed away. He felt extremely weak as if he was about to die. Although he was already mentally prepared, the second time, Shi Yu still had the thought of never teaching super skills next time, unless he broke through.

...

Ten minutes.

For a full ten minutes.

It didn’t take long for him to teach Susu super skills.

But teaching Eleven this time took a full ten minutes.

[Teaching success rate]: Medium

[Teaching Risk]: Medium

In this, Shi Yu suddenly understood that it wasn't just referring to pets, but also to him.

The lower the level of the pet's will, the slower it was to absorb the experience of super skills. At the same time, Shi Yu had to continue teaching and consuming energy. The physical fitness and vitality he needed to pay was even greater!

The consumption of super skills was not fixed. It would change with the teaching situation. This discovery made Shi Yu curse.

The last time, he only taught it for a while before it killed him. This time, it was a full ten minutes. Shi Yu didn't know how he survived.

If not for Baby Ginseng's continuous life support and Chi Tong's possession, Shi Yu might really have died midway.

Eleven was the same. It had endured the destruction of its body countless times. Its miserable cry spread throughout the entire ruins space, making Buggy, Baby Ginseng, Chi Tong, and Ling Sese tremble.

Even Eleven, the tough guy in the team, was so miserable. Could they really withstand the pain of super points?

For a moment, the little guys were a little afraid.

In these ten minutes, Shi Yu wanted to stop teaching and give up every minute and second.

When his physique improved and Eleven's will broke through, he would teach it like this. It might be the same as teaching Susu last time. Although it was also very painful, it wasn't unbearable.

However, when he thought about how giving up now meant that his previous efforts had been in vain, Shi Yu gritted his teeth and persevered.

They had no idea how these ten minutes passed. In the later stages, both Eleven and Shi Yu almost lost consciousness.

Chi Tong had already been taken out because Shi Yu's state was not enough to withstand the possession. Susu was also lying at the side like a limp jelly because it had consumed all its strength to support Eleven.

Only Baby Ginseng and Ling were still staring with their eyes wide open. Just as they judged that Shi Yu and Eleven's state really couldn't continue and had to be interrupted, a powerful aura suddenly erupted from Eleven!

The golden teaching light slowly faded.

[Teaching successful]

The wrinkles on the old Shi Yu twitched as he smiled.

"Wu!!!" "Yi!!!"

“Mi?!” “Ning!!” “Wa!!”

At this moment, everyone who suddenly realized something took a deep breath and looked at Eleven in front of Shi Yu with burning eyes.

[Undying Golden Body, teaching successful!]

Although the changes in other aspects weren't very obvious, as Eleven learned the Undying Golden Body, its physique indeed underwent a qualitative change again.

In terms of strength, it was impossible to determine, but in terms of recovery power, it might not be inferior to Chi Tong and Baby Ginseng at this moment. Just like how the source of life skill changed Baby Ginseng's physique, and the Spirit Release skill changed Chi Tong's physique, the Undying Golden Body also changed Eleven's physique.

It made Eleven feel that even if injuries appeared on its body at this moment, the automatic healing speed of those injuries wouldn't be much slower without the high-speed healing skill. This was only the basic effect brought by the Undying Golden Body. The stronger effect was naturally the use of the skill core.

Transforming the damage it endured into vitality!

Coupled with skills like Inner Power, Giant Transformation, Space Quake, and Overlord Body Armor that could easily cause damage to the body, Eleven finally walked on its invincible path.

More ferocious, fiercer, and stronger.

If it fought with the Wind Demon Lion again, Eleven could at least erupt with two more rounds and crush the enemy.

Eleven slowly opened its eyes, revealing an invincible expression amidst its fatigue. It let out a cry at Shi Yu in front of it.

The Void Mantis was definitely going to lose. It was useless even if the Space Emperor came! If it really came, forget it.

Gulp.

Buggy, Baby Ginseng, Chi Tong, and the others also suddenly realized that the complete Panda King Eleven was finally born at this moment.

The difficulty of defeating Eleven increased again.

Shi Yu smiled again like a toothless old man. He said with difficulty, “Cut... Cut the crap. Baby Ginseng, heal...”

“Wu wu!!!” Eleven hurriedly waved at Baby Ginseng. Why wasn't it healing but staring at it instead?!

“Yi!!”

At the same time, Eleven looked at Susu and asked with a psychological shadow if it could use the cleansing water to condense a frost cleansing suit for it...

Eleven still had a trauma from learning the Undying Golden Body just now. It hurt when it closed its eyes. It estimated that it would take a while for it to recover. In order to prevent nightmares, it felt that it was better to wear a frost cleansing suit.

....

A few days later.

As Shi Yu finished eating the Water of Life he had obtained from Dragon Palace City as well as the Vortex Demon Beast's roasted meat was completely eaten. During this period, he even let Baby Ginseng constantly enter the overlord level through the Time Fruit to heal him. Only then did he recover.

However, even so, there were still some after-effects of the weakening. The weak-looking Shi Yu lay in the ruins space with a dry cough. At this moment, he didn't even have the mood to maximize Susu's low-level skills.

Chapter 493: Ice Dummy Eleven (4)

In the short term, he no longer wanted to add points, even if it was a low-level skill.

"I'm almost recovered... It's time to challenge the ruins..."

"Eleven!"

In the outside world.

The matter of the Space Emperor Ruins had already spread. To be precise, it spread among famous top-notch masters.

Legendary-level Beast Tamers couldn't enter the ruins, so they naturally wouldn't pay too much attention. But for top-notch masters, the Space Emperor Ruins was an opportunity for them to enter the legendary domain!!

Sequence number eight, Tong Yan, Sequence number nine, Ning Tianming, and Sequence number ten, Zou Yun. These geniuses whose Beast Taming levels were still at level six were all invited by the Dong Huang Association to the Space Emperor Ruins to try to break out of the situation. If they could succeed... Even if they didn't succeed, if they were suddenly liked by the Void Mantis, they might be allowed a few more days to cultivate there. In the Space Emperor Ruins for a few days... This was not a small benefit.

After all, the meditation efficiency here was even higher than Lu Qingyi's legendary ruins.

Almost all of the top ten in the Sequence, apart from the first four legends and Zheng Hai the quasi legend, had been invited by the Dong Huang Association. It was obvious that the Dong Huang Association really wanted these young people to break through to the legendary level here. After all, it concerned the battle power of the World Tournament.

At this moment, in a camp outside the Space Emperor Ruins, a few young people were leisurely drinking afternoon tea.

"Fight my ass, I'm not fighting anymore."

Heavenly King Zou, who had failed several consecutive challenges, lost his mind.

He sat back down and sighed.

His trump card battle pet, "Black Demon Rat", could reach 20 million energy points under his strengthening and explosive skill. It could even fight against weaker overlord-level pets, but it couldn't even last three moves against that mantis. How could he fight?

This was f*cking monarch level?

"Heh, none of us ranked at the top are his match. Zou Yun, stop struggling." The feminine man, Ning Tianming, took a sip of tea and chuckled.

"It's just that the initial ranking is high. No one has fought before. It's really uncertain who's stronger," Zou Yun said in disdain.

Sequence 9 Ning Tianming came from Bureau 12. He was a special hybrid human with two souls in one body. He had the bloodline of a ghost god in his body. His bloodline came from the guardian ghost of Dong Huang because the first patriarch of the family and the guardian-level ghost spirit had become partners.

"Well... I gave up anyway."

"My poison can't touch it at all... There's no time to develop a new poison. I'm leaving tomorrow. All the best."

Tong Yan from the 13th Bureau of Medical Care held her face and spoke. She was a genius doctor and also a poison master. Most of the pets she contracted were poison-type. She had once used a combination of strange poison to kill an overlord. Just like her name, she was like a young girl with a very innocent appearance.

These geniuses from all over the world gathered in the Space Emperor Ruins to challenge the Void Mantis, but unfortunately, they all failed.

As geniuses, these people were also familiar with each other. Although the world was very big, at a certain level, the world was very small. As time passed, every genius would more or less have some interaction. Of course, freaks like Shi Yu, who had risen to this level in a year, were an exception.

"I heard that Ji Feng will also come in the afternoon. Lu, what do you think?" Tong Yan smiled and looked at the silent Lu Qingyi beside him.

A few years ago, the archeological genius of Ancient Capital University, Lu Qingyi, and the genius of Imperial Capital University, met in the finals of the National League. The two of them won the championship and the runner-up. Lu Qingyi was defeated, and Ji Feng won.

After graduation, Ji Feng joined the tenth bureau, the Intelligence Bureau's undercover totem area. He had just returned recently. The strength of both parties was already worlds apart from back then. With Tong Yan's understanding of Lu Qingyi, she would most likely want to challenge the number one spot from him.

“He won’t be a match for that Void Mantis either.” Lu Qingyi shook her head and said, “The Void Mantis has mastered the ‘Demon Restraining Domain’, which can restrict the flow of all natural energy. In other words, pets can only fight with their own strength and can’t rely on natural power. This completely counters Ji Feng’s ‘Myriad Affinity’. He can’t compete with the Void Mantis in the ruins, right?”

“But that guy’s talent is All Things Affinity. Perhaps he can get intimate with the Void Mantis and directly pass,” Heavenly King Zou said. “Of course, the chances aren’t high. That Void Mantis is very stubborn. It won’t even allow me to take a photo with it and post it on social media...”

Damn it, he missed another trending opportunity to take a photo with the Space Emperor pet.

“Eh, right, didn’t Shi Yu come?” Heavenly King Zou, who had only arrived recently, asked in confusion. With his understanding of Shi Yu, it was impossible for him to be absent from such an occasion. Shi Yu, who was at the fifth level of Beast Taming, should want to increase his level more than everyone present.

Moreover, in Zou Yun’s opinion, Shi Yu’s strength was not weak at all. He was definitely not much inferior to everyone present. He could totally give it a try.

Shi Yu...

Upon hearing this name, apart from Lu Qingyi, Tong Yan and Ning Tianming were stunned. Clearly, they also knew this super genius who had shocked Dong Huang in the past year. Their reputation belonged to the kind that had been established a few years ago. As for Shi Yu, he was a new super genius who had advanced in the past year. His rise was very fast. Now that he was already 11th in the sequence, his strength was probably not much inferior to theirs. Moreover, in terms of achievements and potential, they were only inferior to Shi Yu.

“Shi Yu? He arrived much earlier than you guys,” Lu Qingyi said in boredom.

Chapter 494: Ice Dummy Eleven (5)

Not only did he have to arrive earlier, but he also fought with her.

“Huh? Then he also challenged the ruins, right? He failed, right?” Zou Yun was amused. He felt that this was the happiest thing he had heard today.

“No, he hasn’t challenged yet. Instead, he ran to undergo special training. I haven’t seen him in a few days.” Lu Qingyi shrugged. Shi Yu really treated her and the Wind Demon Lion as battle units. After fighting them and knowing that he wasn’t their match, he directly ran to train hard. He definitely wouldn’t fight a battle he wasn’t confident in.

“Shi Yu is so sneaky.” Zou Yun was stunned. What was with the special training before even going in to challenge?

“Who are you calling a dog?” Suddenly, a voice sounded, attracting Lu Qingyi and the others’ attention. They saw a young man in a frost cleansing suit sitting on his shoulder walking over from afar.

“Shi Yu...” Seeing this person, Zou Yun grinned. F*ck, he was really here.” I didn’t say you were a dog, I said ‘sneaky’.”

“Huh?” At this moment, Lu Qingyi looked at Eleven in surprise. The archeological glasses in front of her showed Eleven’s energy value. 6.2 million. It had increased by more than 100,000 in a week. It was already very fast. However, Lu Qingyi felt that the most special thing about Eleven at the moment was not the increase in 100,000 energy points, but other aspects. However, she couldn’t say it. She only felt that Eleven had become much stronger!

In the field, only Heavenly King Zou Yun didn’t have an energy value detection device. The other three geniuses from the thirteen divisions of Dong Huang had the top-notch detection index distributed by the officials. This was exclusive to members of Division 13.

“This guy...” At this moment, Ning Tianming from Division 12 and Tong Yan from Division 13 also saw Eleven’s energy attribute immediately, just like Lu Qingyi.

Their expressions immediately changed. This Iron-eating Beast’s normal energy level was 6.2 million. What a joke.

This energy value had already exceeded the normal energy value of their pets.

It was fine if those top-notch monarchs who had lived for an unknown period of time had high energy levels, but why did Shi Yu, this young Iron-eating Beast, also have such a terrifying basic energy level?

“You’re Shi Yu?” The short-haired Tong Yan was stunned for a moment before looking at Shi Yu and saying, “You’re pretty handsome. My name is Tong Yan. Hello.”

“Hello.” Shi Yu immediately ignored Zou Yun and greeted her with a smile. This girl had good taste. Wait a minute, this name... Sequence eight, Tong Yan?

Shi Yu knew this girl... The other party was one of the leading figures of the country’s poison-element Beast Tamers. There was only one person who was proficient in the poison-element legend, Dong Huang. Apart from him, there was only one other top-notch poison-element master like Tong Yan.

“I’m Ning Tianming.” The young man who emitted yin aura also looked at Shi Yu with interest.

Shi Yu looked over and said, “Hello.”

“Wu wu wu.” Eleven also greeted everyone, but most of their gazes were glanced at the huge black cross crack in the sky!!

This time, it had emerged at the same time as Shi Yu, who had almost recovered to shatter the Space Emperor Ruins.

“Your Eleven... why is he wearing this?” At this moment, Lu Qingyi was most concerned about Eleven’s equipment. If her index wasn’t wrong, this should be... a frost equipment condensed from cleansing water?

“Ah, this...” Shi Yu turned his head and glanced at Eleven, who was still wearing the cleansing suit created by Susu.” The mental pressure of preparing for battle is too high. It’s to cleanse its heart. After the battle, it can take it off.”

Eleven: Go, go, go!

Shi Yu also looked at the crack in the sky. At that time, he could dispel his resentment. He hoped that he and Eleven didn't suffer the pain of teaching the Undying Golden Body for nothing. They could succeed in one go!

Chapter 495: Shi Yu vs Emperor Kong (1)

Myriad Mountain.

At this moment, this place had already become the most lively place in Kong City.

The president of the Kong Association, the legendary Beast Tamer Wang Lin, had been guarding here for several days.

Ruins appeared in Kong. According to the rules, the Kong Association had the priority to explore and attack.

Unfortunately, the Beast Tamers in Kong City were disappointing.

None of them were a match for the Void Mantis.

President Wang was angry, cold, and trembling.

Therefore, the Dong Huang Association gradually invited top-notch masters from other places to attack.

"That's..."

In the camp directly below the Space Emperor Ruins.

The Beast Tamers of Kong, Principal Feng, Dr. Chen, the archeologists of Bureau 11, and even Fang Lan, who was living here temporarily, looked up at the sky.

The sky suddenly darkened. With a bird cry, a huge brown bird with feathers filled with a rock texture slowly descended.

< Name > Ancestral Rock Wings Bird

[Attributes]: Wind, Earth

[Race Level]: Low-level overlord

[Level of Growth]: Monarch Level

As this huge bird appeared, the Beast Tamers below were slightly stunned. Then, they saw the figure on its body.

"He's here?" The legendary Beast Tamer Wang Lin, the principal of Bureau 11, and the others spoke in unison when they saw this figure.

Sequence five, Ji Feng, was also the highest ranked top-notch master in the Sequence battle.

...

"This pet..."

At the same time.

In another camp, a huge bird appeared in the sky.

Seeing this huge bird, Heavenly King Zou was stunned. "This is the Ancestral Rock Wings Bird! It's Ji Feng's pet!"

"That guy is indeed here."

On this side, Shi Yu was chatting with Senior Lu and the others about the process of them challenging the Void Mantis these few days.

Before entering, Shi Yu naturally had to make full preparations, including understanding his opponent's information.

Although he had already obtained a lot of information a week ago, there was no such thing as too much.

Among them, what gave Shi Yu the greatest headache was actually the skill, Demon Restraining Domain.

After this skill was activated, the natural energy in the outside world would be completely restricted in a spatial range.

Skills that were strengthened, attacked, and recovered through external energy would all fail.

In other words, Eleven's Lightning Rod, Baby Ginseng's Earth Chain, and energy storage beams, skills that relied on natural energy, were all crippled.

Unless it could cover or break the forbidden domain.

However, considering the spatial attainments of the Void Mantis, Shi Yu felt that this possibility was very small.

The other party's demonic domain proficiency was close to perfect level, while Buggy's spatial domain skill was far inferior to the other party's proficiency. Its basic strength was also poor, so it was already considered a good situation if it wasn't covered by the other party's domain.

As for Eleven's Space Quake, its proficiency was actually very low. Its high power was all superimposed by physical strength and other skills. It was also unknown if it could affect and shatter the demonic domain.

Therefore, Shi Yu had to be prepared to completely rely on the pet's own strength to crush the enemy.

"But can this guy do it? I remember his talent..." Shi Yu also saw the person.

He knew this Ji Feng.

The other party's "All Things Affinity" talent was very powerful.

It could allow oneself and their pets to have extremely strong natural affinity.

When his pets were at the monarch level, their control over natural energy was comparable to a group of overlord-level pets.

If it was a home ground battle and the environment was suitable, after a battle, one could easily defeat opponents of the same level with the power of nature without even consuming much energy.

His most famous battle result was that at a certain totem country's overlord creature banquet, in front of several overlords, he used the natural array he had set up in advance to "assassinate" an overlord above his level and retreat unscathed.

In short, Ji Feng's valiant battle results relied on his pets borrowing natural energy. He ate up the environment very well.

No matter how he thought about it, the Space Emperor Ruins with thin natural energy and the forbidden domain of the Void Mantis were very counter to his talent.

"Ji Feng is here. Let's go take a look too," Ghostman Ning Tianming said as Ji Feng arrived.

After all, Ji Feng was currently the highest ranked among the top masters. Everyone present wanted to see the results of his challenge.

"Together." Tong Yan also stood up.

"Then let's go take a look. By the way, when are you challenging?" Lu Qingyi looked at Shi Yu.

"Me?" Shi Yu was stunned.

"Wuu!" Eleven cried.

Damn it, why was this Ji Feng ahead of him again?

Forget it, the other party probably couldn't defeat it anyway.

"Let's try it today," Shi Yu replied.

"Alright." Lu Qingyi smiled, looking forward to it.

As soon as he finished speaking, the few of them rushed down the Space Emperor Ruins.

At this moment, the long-haired Ji Feng was communicating with Legend Wang and the others.

"I've already understood the information about the Void Mantis. I'll try to crack this ruin," Ji Feng said.

Not only to complete the commission of the Dong Huang Association, but also to allow his level to break through.

"Little Feng, have you thought of how to face its forbidden domain?" President Wang chuckled. He was familiar with Ji Feng's father, so he asked this junior warmly.

Ji Feng shook his head and said, "No, but I have a pet that can store natural energy in its body through skills as a backup energy source. We made some preparations before coming, so maybe we can give it a try. It shouldn't be able to restrain the natural energy in its body."

Chapter 496: Shi Yu vs Emperor Kong (2)

"Alright, but... be prepared. That Void Mantis is indeed very strong." President Wang Lin nodded.

To be honest, he didn't have much hope for Ji Feng...

He didn't have much hope for any top-notch master in the country.

The Void Mantis was too strong.

In the past few days, everyone had already deeply realized the invincibility of this Space Emperor pet.

Ordinary monarchs, top-notch monarchs... There should be one more title above this, the invincible monarch title!

The Void Mantis allowed the outside world to challenge infinitely.

After all, most opponents couldn't exhaust it at all.

Only when it felt that it needed to rest would it temporarily close the ruins and use its identity as the owner of the ruins to absorb the void energy in the ruins to recover.

"I understand."

Upon hearing that, Ji Feng nodded and looked at the black crack in the sky.

But soon, he looked in another direction and saw Shi Yu and the others slowly walking over from afar.

"Qingyi!!" Seeing Lu Qingyi and the others, Principal Feng was stunned. His gaze finally landed on Shi Yu.

This kid was finally willing to come out of his ruins space.

Ji Feng's gaze also stopped on the few of them. He recognized their identities at a glance. After all, the photos of the Beast Tamers at the top of the Sequence had long been trending on the Internet.

"I'll go first." Perhaps he couldn't be bothered to socialize. Seeing that someone his age was coming, he directly chose to enter the ruins.

"Oh? He went in just like that? In such a hurry?" Seeing Ji Feng enter the ruins in the blink of an eye, Heavenly King Zou and the others, who had just arrived, were speechless.

"Hahaha, the few genius top-notch masters in the next sequence are all here." Seeing this, President Wang also laughed.

Unfortunately, even these top geniuses couldn't pass through the Space Emperor Ruins.

This couldn't be helped. After all, the Void Mantis was cultivated by the Space Emperor, and it was cultivated by someone at the legendary level. It would be strange if these top-notch master monarch pets could defeat it.

The only hope of victory wasn't impossible. Perhaps the challenger could use his Beast Taming Talent to strengthen his pet and defeat the Void Mantis through this point.

"Senior Shi Yu!!" At this moment, Fang Lan, who was following beside Principal Feng and the others, was overjoyed to see Shi Yu.

Memory water, memory water, Shi Yu had yet to give her the bottle of memory water!!

"Fang Lan," Shi Yu said. In order to investigate his relationship with the Space Emperor Ruins, Fang Lan had been living here for the past few days. Unfortunately, she had yet to discover anything.

In order to investigate clearly, she, a little girl who didn't contract a pet and couldn't even be considered a Beast Tamer intern, even entered the ruins once.

She directly asked the Void Mantis if she had the Space Emperor Bloodline.

Then, she was chased out by the Void Mantis.

It didn't matter.

It had destroyed many princes and princesses back then.

It didn't even care about Emperor Kong's own son and daughter.

Of course it wouldn't care about a descendant hundreds of years later.?

Moreover, the Void Mantis couldn't determine this thing either, so the process was awkward again.

Even though Fang Lan forcefully said that she might have summoned the Space Emperor Ruins and that the Void Mantis woke up because of her, the Void Mantis still didn't give her any face.

Stop talking nonsense. If she wanted to use the Space Beast Egg she had to defeat it!

Such an unsolvable problem made Fang feel pain.

"You're Shi Yu!!!" At this moment, someone was even more passionate than Fang Lan.

In the crowd, the beard of the old principal of Kong University fluttered, and his nose was smoking from anger.

He naturally knew Fang Lan. She was the genius daughter of a professor in his school. She would most likely enter Kong University in the future.

In the end, one morning, he directly saw Principal Feng walking around with Fang Lan. They were as close as grandfather and grandson. What was going on? What was going on!

Listen to the Voice of History?!

The old principal of Kong University completely didn't expect that the one who summoned the Space Emperor Ruins would actually be this little girl, Fang Lan.

However, what made him extremely uncomfortable was that Ancient Capital University was actually ahead of him. When Fang Lan told him that his future dream was to enter Ancient Capital University and become an archeologist, the old principal of Kong University was directly stunned.

He tried to persuade her again and again that Kong University also had an archeology department. Their mechanics were even more impressive than Ancient Capital University's. However, it was useless. It was also useless to persuade Fang Lan's parents. Even until now, he didn't know the reason.

After all, Shi Yu had temporarily kept the ancient mechanical phantom beast project a secret.

Therefore, the greatest motive for Fang Lan to join Ancient Capital University was suspected to be Shi Yu.

After all, Shi Yu had shattered the most talented Mechanic in the National League as an archeologist.

“Cough, cough, cough. Principal Xie.” Seeing the sparse hair of the old principal of Kong University, Shi Yu greeted him guiltily. After all, he might have to be a colleague in the eighth bureau in the future. He had to be friendlier.

“Sigh!!” Principal Xie sighed at this little brat. Damn it, wasn’t he just a little handsome? He didn’t know what the little girl was thinking now. She actually had to do it for such a shallow reason...

“President Wang...” As it was Shi Yu’s first time here, he greeted the big shots he had never seen before. These big shots also smiled and replied.

“The special training is completed?” Among them, Principal Feng looked at Eleven and what it was wearing. It was sitting on Shi Yu’s shoulder, though he didn’t understand what kind of special training Shi Yu had done to make the iron-eating beast like this. However, he narrowed his eyes and indeed sensed Eleven’s change. It was indeed stronger...

Chapter 497: Shi Yu vs Emperor Kong (3)

“It’s completed. I’ll challenge the Space Emperor Ruins later.” Shi Yu looked up.

“Then there’s a good show to watch today,” Zou Yun said with a chuckle. First was Ji Feng, then Shi Yu. Two newbies wanted to challenge the Space Emperor Ruins. He had already expected the appearance of the two of them returning in defeat.

Zou Yun firmly believed that that Void Mantis was definitely not something a monarch-level pet could defeat.

Not only did Zou Yun believe this, but the other Beast Tamers who had challenged it also believed it.

The Void Mantis had a total of four super racial skills, and their proficiency was all close to perfection.

There were many low-level racial skills, all perfect and transcendent.

It was still a strange spatial element.

The basic energy value was even strengthened to ten million by the Space Emperor with various spatial resources.

In this situation, unless someone threw a legendary resource on a monarch-level pet to strengthen the basic attributes, and then the number, quality, and proficiency of the skill weren’t too far behind, and it happened to be good at dealing with the spatial element, along with a powerful talent bonus of a Beast Tamer... There was no hope of winning.

However, it was basically impossible for the top-notch masters in Dong Huang to have such a foundation. Those with such a foundation had long broken through to the Legendary level. Who would still be a top-notch master?

The Dong Huang Association actually knew too. Therefore, the Dong Huang Association was already considering whether they should gather the power of the association to help a certain master create an invincible monarch-level pet to challenge the Void Mantis. After all, the star pet egg was also very attractive and worth researching for the Dong Huang Association.

...

Space Emperor Ruins.

“Are you the challenger this time?”

“You know the rules, right? One-on-one. Both parties aren’t allowed to use external props, but you’re allowed to use your Beast Taming Talent.”

“There’s no limit to the competition time. Defeat me and you’ll pass the test.”

In the darkness, a two-meter-tall, pitch-black creature holding two large sabers walked out and looked at the long-haired young man in front of it.

“I know.”

Ji Feng nodded. They weren’t allowed to use external props. This was actually for the sake of the challenger.

Otherwise, in this ruin personally created by the Space Emperor, if the Void Mantis used the power of the ruin and its identity as the owner of the ruin, even if a totem-level pet came, it might not necessarily be able to gain any benefits from the ruins.

Without the help of external forces, the Void Mantis was still considered a monarch. Although its strength was ridiculous, it was still a monarch. However, if it borrowed the power of the ruins, it was no different from the Butterfly of Imagination using legendary resources to explode. It was no longer a power that belonged to it.

Of course, natural energy, which wandered in the natural world, was still allowed.

“Elemental Lord.” Facing the Void Mantis, Ji Feng summoned his pet.

The elemental lord had many attributes. The elemental lord of a middle-level overlord race had three attributes. The elemental lord of a high-level overlord race even had four attributes!

Ji Feng’s humanoid elemental lord, was made of red, green, and gold. Its body was filled with the power of fire, wind, and light. It was an extremely rare three-element pet.

Seeing this pet, the Void Mantis shook its head in boredom.

In the next moment, the figure of the Elemental Lord disappeared and turned into a beam of light. It instantly appeared beside the Void Mantis and had already condensed a winding Flash Burning Blade to slash at the Void Mantis.

At the same time, an elemental vibration reaction appeared on the Burning Blade, causing the surrounding space to become unstable. The air was wailing. Through the elemental vibration, it restricted the surrounding spatial stability and the Void Mantis’ hidden ultimate move!

Boom!

The Wind Burning Light Blade slashed open the Void Mantis, but this Void Mantis was distorted like an afterimage.

“Here.” With the effect of Space Deception, which was close to perfect proficiency, it easily dodged the attack. The Void Mantis that appeared beside the elemental lord also swung a slash, and a black spatial blade instantly attacked.

In the face of the enemy’s attack, the elemental lord also didn’t dodge. As the spatial blade hit its body, the energy of the elemental lord’s body began to expand. With a boom, it exploded and self-destructed.

A huge elemental vibration suddenly spread out under the stunned expression of the Void Mantis. Then, the Void Mantis revealed a pleasantly surprised smile and quickly waved its two blades!

Buzz!!!

Under the violent explosion, the energy tide rolled. Accompanied by a spatial distortion, the endless energy fluctuations seemed to have been swallowed by a black hole and quickly disappeared. In the sky, an elemental core recombined and condensed into a new elemental lord through the natural energy stored. The Beast Tamer looked at the Void Mantis that was unscathed under the elemental eruption with a serious expression.

“It’s useless.” In the distorted space, the Void Mantis’s calm dual-blade sword danced.

In the next moment, a spatial blade appeared out of thin air around the elemental lord. In the blink of an eye, its elemental body was torn apart.

Only the elemental core turned into a beam of light and escaped into the distance at the critical moment.

“As expected, it can’t be attacked...” Seeing this, Ji Feng frowned.

According to the information, since the appearance of the Space Emperor Ruins, nearly a hundred top-notch masters had fought the Void Mantis, but none of them had been able to injure the Void Mantis. Initially, Ji Feng was doubtful, but now, he finally saw the flexibility of the Void Mantis.

“Again.”

With the talent of All Things and the skill of the Elemental Heart, the Elemental Lord had accumulated 100 million units of energy in its body in advance. Because this energy could only be extracted bit by bit, every time it was taken out, it couldn’t exceed its own limit. It couldn’t allow the Elemental Lord to increase its attack power greatly. However, it could allow it to have “infinite energy” through the combination of various skills. For elemental creatures, infinite energy was similar to an immortal body.

Chapter 498: Shi Yu vs Emperor Kong (4)

The elemental lord carried out a super long endurance. Through this endurance, Ji Feng kept dealing with the Void Mantis.

However, a few minutes later, after repeated failures, Ji Feng realized that this Void Mantis was simply playing with him because it was bored. From the beginning to the end, due to the crushing of skills, the Elemental lord was in the other party’s rhythm. He also tried to use his talent to let the elemental lord borrow the natural energy in the ruins, but the natural energy of fire, wind, and light was too thin. On the other hand, the other party’s demonic domain was activated almost instantly, cutting off everything.

“Can you be more serious?” Ji Feng looked at the Void Mantis holding two sabers in mid-air and floating back leisurely under the continuous attacks of the elemental master.

“Are you in such a hurry to lose?” The Void Mantis said in boredom, “You’re still considered not bad. I’ll play with you longer.”

“Let me think. Your strength can probably be ranked third among the challengers who entered. Not bad.” The Void Mantis flashed and arrived beside the Elemental lord. It casually waved a spatial slash. In the next moment, the Elemental lord’s body collapsed again. Only the core barely escaped. Ji Feng asked extremely seriously, “Who are the other two?”

“A female Beast Tamer with a big white dog and a green phoenix is ranked second.”

“There’s also an old man with a fire dragon, ranked first.”

Upon hearing that, Ji Feng instantly knew who the other party was talking about. Wasn’t one of them the Sequence seventh Lu Qingyi? The other was a senior among the top masters in Dong Huang.

It was fine if it was that senior, but when he heard that the defeated Lu Qingyi was even stronger than him in the eyes of the Void Mantis, Ji Feng was instantly confused. However, he had fought Lu Qingyi in the National League a few years ago. He didn’t know how Lu Qingyi’s strength was now.

“Are there no more powerful Beast Tamers?”

The Void Mantis didn’t seem to want to play anymore. This time, it didn’t give the Elemental Lord a chance to recover. Without being able to see its movements clearly, cracks immediately appeared in the elemental core that flew out.

Boom!

The elemental core was smashed beside Ji Feng, making his expression change.

“Even Master Yan lost to you. Perhaps not.” Seeing that he had lost, and he had been crushed the whole time, Ji Feng gave up struggling.

The Master Yan he was talking about was the old man with the fire dragon the other party mentioned. When Master Yan was young, he was known as a super genius with the aptitude of a titled legend. He wasn’t necessarily inferior to the current top five sequences. Unfortunately, when the other party was a top-notch master, he was heavily injured because of a disaster, causing his strength to be unable to advance anymore and he stopped at the level-six Beast Taming Space.

Such a top-notch master could be seen as a state that geniuses like them had accumulated in this realm for decades. Although their physical fitness had fallen at that time and the effect of their Beast Taming Talent might not necessarily increase much, with the experience displayed, even the other party was no match for this Space Emperor pet. Ji Feng couldn’t think of a way to crack this ruin for the time being.

“Sigh, each generation is worse than the last. Master’s sons are still the strongest.”

The Void Mantis expelled Ji Feng in boredom and said, “Rest for a while, then next.”

...

“After we enter later, we’ll mainly communicate. Although that mantis is very stubborn, what if...”

In the outside world, Principal Feng, Dr. Chen, and the others guided Shi Yu, who wanted to enter the ruins.

No one thought that Shi Yu could defeat the Void Mantis, nor did they think that Ji Feng could defeat the Void Mantis.

It had been several days. The strength of the Void Mantis had long been figured out by the Dong Huang Association. It was not something the current top-notch masters could defeat at all.

“I think we can use Senior Shi Yu’s Butterfly of Imagination to create a beautiful Void Mantis to seduce it,” Fang Lan suggested.

Shi Yu’s face darkened. Wasn’t this girl supposed to be a genius? This is what a genius’s head was filled with?

Her parents just left, and she was already like this?

“No one has tried this method! I’ve already tried delicacies. It didn’t work, but we can try this,” Heavenly King Zou agreed.

Ning Tianming, Tong Yan, and the others nodded thoughtfully. Heroes couldn’t resist beauties. They could try.

Now, everyone no longer thought about defeating the Void Mantis with their strength. Instead, they started to think of various strange strategies.

“I wonder how Ji Feng’s battle situation is.”

In the outside world, President Wang Lin looked up at the spatial crack.

At the side, the old principal of Kong University shook his head and said, “Don’t think about it. Even Old Yan isn’t his match. These young brats are in an even more difficult situation to deal with it. Moreover, the natural energy in the Space Emperor Ruins is also insufficient. The Void Mantis also has a forbidden domain, so its strength can’t be completely displayed.”

Buzz!!!

As the few of them chatted, with a spatial ripple, Ji Feng appeared in the outside world silently. Everyone’s gazes instantly shot towards him.

In the face of everyone’s gaze, Ji Feng shook his head.

Seeing this, President Wang Lin and the others sighed. As expected.

“I knew it.” Heavenly King Zou also shook his head.

Seeing this, Lu Qingyi and the others didn’t find it strange. It was already extremely difficult for them to face that Void Mantis. Even if Ji Feng’s Sequence ranking was a little higher, as long as he was a top-notch master and his pet was still at the monarch level, there was a limit.

“Then, is it my turn next?”

Chapter 499: Shi Yu vs Emperor Kong (5)

After Ji Feng came out, Shi Yu immediately stood up and looked at the sky. However, in the next moment, the crack in the sky suddenly closed, stunning Shi Yu and Eleven.

“Wu wu!!!” Eleven waved its palm angrily. What was this?

“Uh.” Seeing this, Principal Feng said, “The Void Mantis is going to rest again. It’s about five to 30 minutes each time. Wait.”

Shi Yu sat down again. What else could he do? He would wait.

Ji Feng looked at Shi Yu and Eleven. After his gaze kept lingering on Eleven for a long time, he turned to President Wang and said, “Uncle Wang, I don’t plan to try other pets anymore. I shouldn’t be a match for that Void Mantis in the short term. I’ll come again after a while.”

“Then let’s wait a while. Oh right, the association seems to be preparing resources to strengthen pets to conquer the Space Emperor Ruins. After a while, you can try to apply,” President Wang said.

“I understand.” Ji Feng nodded.

At this moment, Lu Qingyi, who was sitting beside Shi Yu, said, “Ji Feng, it’s rare for you to come over. How about carrying out a public ranking battle?”

Ji Feng looked at Lu Qingyi and took a deep breath. “Sure.”

He wasn’t very convinced that the Void Mantis said that his strength was inferior to Lu Qingyi.

“Eh?”

“Sequence battle?”

Seeing that the two of them suddenly wanted to fight a Sequence battle, Principal Feng and the others beside him rubbed their heads helplessly.

Enemies were bound to meet on a narrow road. Lu Qingyi clearly planned to carry out a revenge battle.

Shi Yu also glanced at Senior Lu. Looking at her calm expression, he guessed that Senior Lu was probably thinking that if she couldn’t defeat the ruins, couldn’t she defeat Ji Feng? Since he was already here, he had to gain something.

“Oh.” Seeing this, Tong Yan looked forward to it. “Alright, I hope to see the changes in the top ten.”

“It’s actually very simple if you want to see it. You just have to accept my challenge.” Ning Tianming looked at Tong Yan.

“Get lost. Your undead counters my poison. I won’t fight, I won’t fight. If you have the ability, go and challenge Lu Qingyi, Zheng Hai, and Ji Feng in front of me directly.”

“Up to you. In any case, you have to forcefully accept the challenge between the top ten after a while. Let’s see what you do then.” Ning Tianming wanted to crush the weak first, directly making Tong Yan reveal a fierce expression.

At the side, Zou Tianwang sat leisurely. No one planned to challenge him in the short term. It was mainly because he felt that it was unstable. He didn't want to lose the battle. Although he had a lot of fans, he also had a lot of anti-fans. When the time came, he would be criticized again. Although the celebrity route earned more, he wanted to casually earn money! Therefore, before he was 100% confident, he felt that tenth was pretty good.

As long as Shi Yu didn't cause any trouble, his tenth place should be very stable. After all, he had fought his way up.

"When?" Ji Feng asked.

Lu Qingyi said, "Rest first."

"I want to finish watching his challenge."

Lu Qingyi looked at Eleven. From the situation of the Wind Demon Lion and Eleven's battle previously, she felt that Eleven's chances of winning against the Void Mantis were not high. However, Lu Qingyi kept feeling that in terms of attribute restraint, Shi Yu countered any ruins space. Perhaps other accidents would happen.

"Shi Yu?" Ji Feng looked at Shi Yu again. After returning to the country, he had clearly heard Shi Yu's name often. He was very interested in this rising star who had suddenly appeared and beaten his alma mater.

"Hello, Senior Ji." Shi Yu smiled, making Ji Feng feel that this guy was a little dangerous.

He was smiling cheekily. It was obvious that he was a troublemaker.

Buzz!

Just as Shi Yu finished asking, the huge spatial crack that led to the Space Emperor Ruins slowly appeared in the sky again. Seeing this, Shi Yu stopped smiling and got up again to look.

It rested so quickly?

"I'll give it a try," Shi Yu said. In the next moment, everyone continued to do whatever they wanted. They continued to talk about the possible battle results of Ji Feng and Lu Qingyi. No one cared about Shi Yu's challenge process at all.

Shi Yu : "..."

Eleven : "..."

Damn it.

.....

Space Emperor Ruins.

After Shi Yu and Eleven entered, they waited for a long time in the space that looked like dusk approaching night.

In their vision, the Void Mantis had been lying down and resting not far away.

Shi Yu and the others didn't call it the Void Mantis either. They just observed it silently.

Energy Points: 10,010,000

This was the monarch-level pet with the highest basic energy level that Shi Yu had ever seen.

Fortunately, according to Shi Yu's understanding, this Void Mantis didn't master any explosive skills.

But even so, this didn't mean that the Void Mantis was easy to deal with.

Because its super skill proficiency was ridiculously high, and every one of them was ridiculously high. It was just a step away from the overlord level.

Moreover, when other monarchs broke through to the overlord level, it was just that one racial skill had to reach perfect proficiency, while this guy had four super racial skills that were already close to perfect proficiency.

Moreover, skills like the Space Blade were actually equivalent to using the sharpness of space to attack the enemy. It was similar to borrowing the power of nature. It was wrong to underestimate it because of the energy value.

In this situation, even if Eleven's pile of low-level racial skills was at the maximum level, there was still a lot of pressure. After all, Eleven's super racial skill proficiency was basically at the proficient stage, and it hadn't even reached the expert level.

Therefore, the key to defeating the Void Mantis was still the combination profundities of low-level skills and special fighting styles.

Chapter 500: Shi Yu vs Emperor Kong (6)

" ~ ~"

A moment later, the Void Mantis spoke.

"You know the rules, right? One-on-one. Both parties aren't allowed to use external props, but you're allowed to use your Beast Taming Talent."

"There's no limit to the competition time. Defeat me and you'll pass the test."

As it spoke, the Void Mantis got up and said lazily.

"I know." Shi Yu nodded. Then, Eleven on its shoulder jumped down with a roar. It grew bigger and bigger step by step, becoming more than a meter tall. It broke through the frost cloak battle suit and looked at the Void Mantis with battle intent.

Emperor Kong's pet!

Sometimes, Shi Yu would also wonder if this battle was considered his battle with Emperor Kong.

Facing the pet of the legendary emperor, Shi Yu took a deep breath. He wanted Eleven to test how far the two parties could fight. The rest could be discussed later.

“Eh...” At this moment, the Void Mantis looked at Eleven in surprise. It kept feeling that this bear was not simple.

However, it didn't mind too much.

Because Shi Yu was too young, ridiculously young. Among those who had come here to challenge in the past few days... He was the youngest. Of course, in the eyes of the Void Mantis, that little girl who came to talk nonsense was not a challenger.

“Are you also in that sequence thing?” the Void Mantis asked.

In the past few days, it had clearly chatted with the challenger and actually had some understanding of the outside world.

“Yes.” Shi Yu nodded.

“Which place?”

“Number 11,” Shi Yu said.

The Void Mantis sighed. Another weakling.

“Alright, let's begin,” the Void Mantis said.

Shi Yu was waiting for this sentence. As the Void Mantis spoke, in the arena, Eleven's gaze was filled with ferocity. It was time to test the results!

“Wuu!!!” Eleven shouted and directly started the battle!

Boom!!!

An incomparably terrifying deterrence bloomed from Eleven.

Apart from that, an invisible white flash of flames erupted from Eleven, who was covered in white light, like an erupting volcano. Blue electric arcs flickered in the huge flames that were several meters tall, following Eleven into a sharp state!!

Boom!

Under the lightning and thunder, Eleven's body suddenly increased to three to four meters tall in the blink of an eye and entered the sharp form of the Nine Li Battle Beast. At this moment, this form was its original appearance. At that moment, Eleven took another step forward and stimulated the metal and lightning power stored in its body!

Although he couldn't store hundreds of millions of energy points in his body like Ji Feng, Eleven's stored power could be used to strengthen its body, so the meaning was completely different. With a boom, Eleven's energy level instantly rose to 13 million.

This state would cause a certain amount of damage to Eleven. However, due to its strong physique, the Overlord Body Armor, and the Undying Golden Body, the damage was too small, close to zero.

And this wasn't Eleven's limit. However, Eleven didn't choose to continue erupting. It was mainly because this current state was the most comfortable and convenient. At the moment, it wasn't the time to erupt to the limit.

"This deterrence..." At this moment, the Void Mantis, which had originally underestimated the enemy, also changed its attitude. It wasn't that the energy Eleven erupted with was very strong, but this deterrence, the full-level deterrence wave, suddenly reminded it of the main pets of the Space Emperor.

It had been a long time since it had seen deterrence of this level. Eleven might not be the one with the strongest energy fluctuations among the opponents it had encountered previously, but it was definitely the one with the strongest deterrence fluctuations.

For a moment, the Void Mantis's mind was affected a little. Fortunately, as its transcendent deterrence wrapped around its entire body, it immediately became serious.

"You attack first," Shi Yu invited.

"Oh? Are you sure? I'll attack first, but there might be nothing else after that," the Void Mantis said.

In the previous challenge, it was just playing with the challenger. If it really wanted to end the battle, it would only take a few seconds for it to take the initiative to attack.

"You... are really likable." Shi Yu grinned. What kind of personality did Emperor Kong's pet have? Was it so arrogant? It was exactly as Senior Lu and the others had described. It was arrogant, but he liked it.

"Let's go."

"In that case, let's see how thick your defense is."

The Void Mantis looked at Eleven's thick armor and revealed a bloodthirsty smile. Its body disappeared!!

At this moment, Eleven, who was in a sharp state, couldn't determine where the enemy was with its super vision. It only felt a huge threat appear in its mind. At that moment, it seemed to have predicted the future and its entire body trembled!!

There was no time to dodge!

Swoosh!

A light that seemed to have broken through the darkness swung over and directly cut Eleven from its chest. When its black saber wrapped around the super skill Space Slash and attacked the enemy with the power of space, the Void Mantis had already expected the outcome.

If nothing went wrong, this guy's armor would instantly shatter.

An irreversible huge wound would appear on its entire body. It would directly lose the ability to fight and needed to be dragged down for emergency treatment.

Thinking of this, the Void Mantis was stunned in the next moment.

Although it felt that its black saber was cutting things crazily, the shocking thickness stunned it.

“Wu wu wu wu wu wu wu wu...” At this moment, bean bears formed by clones and bean soldier combination skills were embedded in Eleven’s armor like flat tattoos. Every bean bear used impregnable, hardening, and superimposed on Eleven’s main body to cooperate with its defense.
