

Beast 501

Chapter 501: Shi Yu vs Emperor Kong (7)

Its body was covered in bear tattoos. Applause for the panda man!

Crack!!

In the face of a max-level army defense skill, the Space Slash first shattered the impregnable golden light membrane, and its power was reduced by a point. Then, it shattered the black hardening layer on Eleven's body, and its power decreased again.

The terrifying strength of the Void Mantis indeed made Eleven and Shi Yu fall silent. In just an instant, it directly shattered the strongest defense formed by multiple skills in a row. Moreover, the spatial cutting was still going deeper. The next step was to directly slash Eleven's armor!!

Fortunately, the body that had been strengthened by tempered steel and reinforced iron bones was not for show. In addition, Eleven's physique was originally comparable to a divine dragon. At this moment, the spatial slash finally couldn't take another step forward and stopped here. It only left a long and shallow wound on Eleven's armor. It couldn't continue and was absorbed by the deepest layer of the Overlord Body Armor.

At the same time, due to the existence of the Overlord Body Armor, Eleven didn't feel any damage or impact. Its body and mind could still react freely.

"Roar!!!" Up until now, no pet had resisted the spatial slash. Under Eleven's roar, the hardened iron fist that was a step slower than the Void Mantis's attack directly lingered with white spatial substance and smashed towards the Void Mantis in front of it!!

Although Eleven's Space Quake skill's proficiency was at most at the proficient level, this was a dual-element skill of metal and space. With the enhancement of Hardening, with deterrence wrapped around it, and with Eleven superimposing the full-level Giant Transformation on the Space Quake wave, the power of this originally proficient super skill was immediately not inferior to the Space Slash just now. It descended with a bang as the pupils of the Void Mantis constricted.

At this moment, the Void Mantis was indeed stunned, because this was indeed the first time its attack was defended against.

Since guarding this ruin, even if it encountered the pets of the Space Emperor's children, no one dared to face its spatial cutting head-on.

But now, this pet had done it. Moreover, after it took the attack head-on, its body didn't react at all. It connected a terrifying attack like flowing water!

Danger!

The Void Mantis sensed a threat. Its movements were indeed fast. Even if Eleven reacted in time, it still instantly teleported in the opposite direction of the attack. However, Eleven's reaction consciousness also reacted very quickly under the dual stimulation of super vision and lightning armor. It directly turned its straight fist into an upper vibration fist and performed an indiscriminate vibration!!

Boom!!!

The Space Quake skill, enhanced by the max-level Giant Transformation, directly shattered space like glass. Then, a terrifying spatial vibration swept in all directions indiscriminately. This kind of direct spatial attack was much more threatening to spatial pets than other attributes. After the Void Mantis teleported, it immediately used spatial control to repair space. The quickly spreading spatial vibration still instantly swallowed it!!

Bang!!!

The pupils of the Void Mantis constricted, and it directly turned into a black meteor that was smashed into the distance. However, with the perfect spatial control, the attack just now was indeed offset by it a lot. It didn't suffer much damage itself, but being attacked like never before, coupled with the full-level deterrence, stunned the Void Mantis. It felt that the guy in front of it was stronger than any opponent that came previously!!

Who was it!

Sequence 11?

Bullshit!

Chapter 502: Worldview Shattered (1)

At first, when the Void Mantis saw Eleven in the frost cleansing suit, it thought it was an ice-element ice block.

In the end, as Eleven broke through the ice suit and resisted the attack, the Void Mantis realized that this wasn't an ice block, but an iron block.

Its entire body was metal and hard.

It was the monarch-level creature with the highest defense it had ever seen.

It actually relied on the method of exchanging injuries to counterattack.

Moreover, it had mastered a super powerful large-scale spatial damage skill, which really shocked the Void Mantis.

If it weren't for the fact that Eleven's spatial attainments weren't strong and it had relied on brute force, allowing the mantis to neutralize much of the vibration under its spatial repair... The Void Mantis felt that it would have instantly fallen here.

Boom!!!

Just as the Void Mantis was still lamenting, in the distance, blue lightning flashed in front of Eleven's palm.

Space Quake Electromagnetic Cannon!

Boom!!

Metal cannonballs that had been given spatial attributes were fired by Eleven one after another, locking onto the flying Void Mantis.

The cannonball tore through space and flickered with lightning. Seeing this, the Void Mantis stabilized its body and teleported away from the cannonball.

However, on the other side, as Eleven shook its palms, the cannonball quickly changed its trajectory under the control of the electromagnetic force. Like an air cannonball, it continued to lock onto the Void Mantis that had teleported in another direction!

“Spatial Blade!!”

When the Void Mantis saw that the cannonball could still track the enemy, it directly waved its two blades. In the next moment, the spatial blade appeared in front of the cannonball without any warning, splitting the Space Quake Electromagnetic Cannon into two. Eleven’s super strong attack was instantly sliced open like tofu under the spatial blade.

“Roar!!”

However, this was only used by Eleven to attract the enemy’s attention. At this moment, with a flash of lightning, Eleven, who was wearing the profundities of the Thunder Armor, also appeared above the Void Mantis with the lightning. He raised his iron fist, wanting to heavily injure this guy again.

Giant Transformation, Space Quake!!

A fist descended from the sky!

A huge iron fist dozens of meters in diameter that swept through space descended with a bang.

The iron fist shook space, and deterrence swept through the sky. However, the reaction and speed of the Void Mantis was faster. Before the vibration affected the spatial stability of this place, it successfully teleported above Eleven, even more agile than the profundities of the Thunder Armor.

“So fast.” Shi Yu suddenly looked at the sky.

Swoosh!

The Void Mantis waved its two black blades again. This time, Space Slash, Space Blade, and Space Control gathered on the spatial blades that appeared and slashed at Eleven below.

Spatial Sword Dance!

Bang!!

The sword dance that filled the sky hit Eleven’s body and shattered the stacked impregnable and hardened armor again. This time, the injuries were even deeper, even directly splitting Eleven’s own armor, causing shocking injuries to appear on Eleven’s body under the armor.

If it were before it learned the Undying Golden Body and the Overlord Body Armor, the current Eleven would definitely have fallen to the extreme. However, with the support of these two skills, it was still very ferocious. It resisted everything and wanted to change its body to attack the enemy!!

Boom!!

Eleven endured the attack and changed its body.

A fist smashed into the sky, causing the air to tremble. A rumbling spatial crack quickly spread.

Unfortunately, the Void Mantis was already prepared for Eleven's powerful defense. Compared to the first time, it was more agile and had long teleported to a sufficiently far distance, directly making Eleven's subsequent reaction miss.

"Roar ~!!!" Eleven roared in dissatisfaction.

"Lightning Rod."

Under Shi Yu's command, Eleven's gaze turned cold. It immediately gave its entire body lightning-attracting substance, hoping to absorb the lightning energy drifting in the ruins space to recover its physical fitness.

Boom!!!

After the Void Mantis left, Eleven started to recover. Seeing this, the Void Mantis naturally couldn't let Eleven succeed.

"You're too dangerous. I'm not playing with you anymore."

The spatial fragments fell like glass. In the distance, the Void Mantis took a deep breath. Because Eleven had indeed displayed a threat to it, it wasn't in the mood to play with Eleven like when it had encountered its previous opponents.

What would happen if this guy absorbed natural energy again!

In the end, it was still an insect. Its physical strength and energy level were not its strong points. If Eleven managed to land a perfect attack, it would be much worse than if Eleven was attacked by it.

Perhaps it really felt threatened, or perhaps the deterrence worked, but the Void Mantis was serious.

At this point, the Void Mantis directly used its strongest combination skill, Space Domain.

Buzz!!

With the help of spatial control, the powerful domain formed by the forbidden domain and spatial distortion, it immediately enveloped Eleven and the Void Mantis.

At this moment, Eleven immediately felt that the space was a little chaotic and it couldn't tell its direction. Its five senses couldn't control its body to carry out smooth movements. At the same time, it also felt that its control over its energy had decreased a lot. The lightning elements attracted by the Lightning Rod also instantly disappeared and were no longer controlled by the Lightning Rod skill.

Under normal circumstances, the forbidden domain could only prohibit the enemy from controlling natural energy. However, after the proficiency was high, even the pet's control over its own energy would be affected a little, making it even more difficult to control. It was said that when it reached the transcendent level, it could even directly make enemies weaker than it lose control of their energy.

In this domain, the spatial affinity of the Void Mantis also rose to another level. It directly attacked Eleven, who was trying to adapt to the new environment, on the spot!

Chapter 503: Worldview Shattered (2)

However, at the same time, the Void Mantis felt an incomparable threat!

Eleven raised its head. So be it. Its fierce eyes flashed.

Shi Yu also knew that an opportunity had come.

Domain skills had a characteristic, which was that they could only enjoy bonuses when they were in the domain. Only when they were in the domain could the domain creator control the domain better. At the same time, if the domain was shattered, the controller would also be affected to a certain extent.

Therefore, after spending a huge price to create the domain, the Void Mantis definitely wouldn't leave easily. After realizing Eleven's threat, it wouldn't easily remove the forbidden domain and let Eleven recover its physical fitness.

Therefore, the two pets were going to have a short collision in this spatial domain.

Of course, with the spatial attainments of the Void Mantis, the domain it created was not so easy to break.

With Eleven's attack just now, it was not enough to affect this domain much. The Void Mantis had also made a judgment before opening the domain.

The Void Mantis stood on the side of the domain and didn't dare to approach Eleven. It swung its two blades and fought through the far-reaching spatial blade. Eleven, who had judged the range of the domain, completely erupted at this moment.

It wanted to try directly using a large-scale indiscriminate skill to shatter the domain.

"Huh?" At this moment, after the spatial cutting blade that was several meters long swung over, the expression of the Void Mantis suddenly froze.

The Iron-eating Beast opposite suddenly erupted with an even stronger and more extreme power.

Eleven directly mobilized all the metal and lightning power accumulated in its stamina source in advance and superimposed them on itself beyond the limit. An even more violent energy wave intertwined with white and blue bloomed from its body!

At this moment, the Undying Golden Body couldn't barely maintain its balance like before. Eleven directly underwent the strongest eruption that exceeded the limit of the Undying Golden Body!

At the same time, Eleven's body suddenly enlarged. Unlike the previous enlargement that was added to the move, its body parts directly enlarged this time. It consumed more energy and had a higher load. However, in exchange, it also obtained stronger strength. Previously, because of the flexibility of the Void Mantis and the lack of a venue range, it was not easy for it to directly multiply, afraid of being kited. But now, in the same domain, Eleven directly unsealed it.

“Roar!!!” In the roar, the Space Slash slashed at Eleven again. It was the same defensive method, but this time, because the attack power of the Void Mantis was stronger, the batch of Bean Bears summoned at the start was completely killed in this round of attacks. They were exploded by the powerful shock wave. At the same time, a shocking wound crack appeared on Eleven’s body.

Black cracks marked that Eleven’s body was broken to an extremely high level.

However, what the Void Mantis couldn’t understand was that if it were ordinary pets with such injuries, they would have long lost their ability to fight. However, this guy’s injuries were actually still recovering at an extremely high speed. The recovery speed was simply faster than those supplement pets. This was what it found unbelievable.

At that moment, Eleven was in a daze and couldn’t determine the location of the Void Mantis at all. However, it didn’t need to determine at this moment because its target this time was the entire domain!

As Eleven instantly enlarged to a hundred meters, the Void Mantis on the other side was a little stunned. Then, another indiscriminate attack towards the domain!!

This attack consumed all Eleven’s strength.

The Void Mantis could also sense that the creature opposite was going all out.

It had become so huge and exceeded the load to erupt to this extent. After this attack, it was definitely dried up.

“I see. You want me to ‘wound myself up’ and defeat me in my domain?”

The Void Mantis smiled coldly. Although it admired Eleven’s strength, it underestimated it too much.

In the domain, it was invincible.

“Chains.” It waved its hand calmly, and the entire spatial domain instantly flickered with light. At the same time that Eleven punched out, countless small domains appeared in the large domain. They were like layers of spatial shackles that wrapped around Eleven, forming ten layers.

At the same time, the spatial shackles also produced countless sharp spatial shock waves that swept towards Eleven, who had erupted to the limit.

The milky-white spatial shock wave intertwined with the transparent sword pattern shock wave produced by the spatial shackles.

Endless electricity shot out of Eleven’s sharp gaze.

“Roar!!!” It roared to increase its strength.

Bang!!!

A violent vibration exploded from the center of the domain. The impact wave swept in all directions.

At this moment, Eleven, who had already overdrawn to the limit, suffered huge injuries again due to the rebound of the Space Quake skill. Just like what the Void Mantis had judged, its body was completely dried up.

However, due to the Undying Golden Body, although the ratio of damage to life force was not high, this extreme eruption really made Eleven, who was in the enlarged state, still hang on to life and not completely lose consciousness.

At the same time, Eleven's attack rumbled and detonated the spatial shackles that the Void Mantis had superimposed with its spatial domain. One layer, two layers, three layers...

In the end, the Void Mantis heaved a sigh of relief. When Eleven's full-strength attack detonated the nine layers of spatial shackles, the vibration wave directly dissipated and the power wave turned into nothingness. Not to mention breaking the domain, even the spatial shackles formed by the Void Mantis with the power of the domain couldn't be perfectly shattered.

Chapter 504: Worldview Shattered (3)

The Space Quake Proficiency was still too low. Even with the enhancement of the power of enlargement and hardening matter, it was still not enough to face the strongest spatial power of the Void Mantis.

"You guys... aren't bad." At this point, the Void Mantis rather acknowledged Shi Yu and the Iron-eating Beast. As expected, it was as it had thought previously. The other party was the strongest opponent it had ever seen at the monarch level. Just as it thought about it and decided to allow the other party to cultivate in the Space Emperor Ruins for a few days, the expression of the Void Mantis suddenly changed.

"Roar!!!" Under the huge roar, stronger energy fluctuations erupted from the other side again. The huge fluctuations and the vibration of the surrounding spatial domain made the hair of the Void Mantis stand on end.

In the smoke opposite, Eleven, who should have been dried up, still had ferocious lightning flickering in its eyes. An incomparably sharp edge erupted from its body and from its potential will again, as if it had opened some restriction. It raised its huge fist again with a bang, and white spatial fluctuations lingered!!

"How is this possible!!!" Seeing this scene, the Void Mantis directly cursed in confusion. Wasn't that attack just now the limit??

How could it erupt with stronger power?!!

That attack just now was indeed the limit, but with the Undying Golden Body, it saved Eleven's life again. At this moment, what erupted was an unstoppable skill that could only be used in a desperate situation. With the support of the power of will, Eleven's body blossomed with a new light like a miracle, carrying out a second super eruption, shocking the Void Mantis opposite.

Boom.

The fist attacked. In the domain, the Void Mantis was already panting, but in order to receive this attack, it still tried its best to mobilize the power of the spatial domain, creating layers of shackles again to seal the violent beast inside.

It was still the spatial shackle at the limit of the tenth level, but this time, as Eleven threw a punch, the vibration power it erupted with this time was like a hot knife cutting through butter. One, two, three,

four... Soon, it even broke through the tenth level shackles and charged towards the domains in all directions. Seeing this, the expression of the Void Mantis changed drastically and revealed an excited expression.

“You guys are really not bad.”

“Among the opponents of the same level I’ve seen, I’m willing to call you the strongest!!”

After the Void Mantis sensed the power of this attack, it said in a hoarse voice of admiration. However, it still believed in its strength more. With a wave of its two blades, the entire spatial domain distorted, turning into an invisible hand that picked up the spatial power that was trembling in all directions like a black hole!!

Boom!!!

An unprecedented collision triggered another violent shock wave that could collapse space. This time, not only was Eleven swept into the rebound again, but even the Void Mantis itself was swept into the rebound. Large and small cracks instantly appeared in the entire spatial domain and began to sway.

However, it still didn’t shatter!

In the smoke, the Void Mantis floated in the air covered in injuries.

As for Eleven, its body had once again been overdrawn to the limit. It automatically started to shrink from its enlarged state and fell. Its eyes slowly closed. Although due to the Undying Golden Body, the backlash just now successfully gave it a trace of life again, but in terms of willpower and potential, it was no longer enough to support it to erupt again with Impregnable.

In the end, the proficiency of the Undying Golden Body and Impregnable was too low at the moment and couldn’t be used repeatedly.

Seeing this, the Void Mantis gritted its teeth.

Shi Yu, who was outside the domain, had a serious expression.

“You lost,” the Void Mantis said.

“What you said... is still early to decide.”

“We’ll be the ones winning.” Shi Yu didn’t expect the Void Mantis to be able to withstand two eruptions that exceeded the limit. However, they had also deduced this situation. They had already thought about it. If the two eruptions still couldn’t defeat the Void Mantis, what should they do next?

“Huh?” Shi Yu’s words stunned the Void Mantis, whose body was also at its limit. It didn’t feel good from the confrontation just now, but at this moment, it didn’t understand what Shi Yu’s words meant.

Boom!!!

In the next moment.

The Void Mantis’s gaze exploded.

Because in the direction Eleven fell, it suddenly erupted again. An incomparable energy wave was a very terrifying aura!!

After the second eruption, Eleven directly shrank to its normal state, and its body urgently entered the Absolute Sleep segment. Of course, due to the squeezing of potential by skills like Impregnable, the effect of Absolute Sleep was greatly reduced, and it was not enough to recover too much of Eleven's physical fitness. However, this didn't stop the skill from matching the effect before the Undying Golden Body, allowing Eleven to barely control its body again.

At this point, Eleven and Shi Yu were definitely unwilling to admit defeat and leave directly. At this moment, be it in terms of potential, willpower, or physique, Eleven had already reached the limit and couldn't continue fighting. However, for the sake of victory, they actually still had a trump card they could use. This was also a power that Eleven could control.

Eleven directly summoned the sealed power of the Demon God in the deepest part of the source of physical strength.

Although this power of meteorite wasn't enough for it to complete its evolution or awaken new skills, at this critical moment, it was the only power Eleven could borrow. It couldn't be fused, so it could be used as a one-time consumable. Just like the natural energy it absorbed, just like Buggy borrowing the power of its equipment!

Chapter 505: Worldview Shattered (4)

To be honest, Shi Yu didn't want Eleven to use this power. After all, this power that had yet to be fused was different from the metal lightning power that could still be replenished. If he couldn't find Yun An, it was better to be using it less. However, with Eleven's evolution still far in the future, it was useless to let this energy stay there. It was better to use it here. When he obtained the cultivation right of the Space Emperor Ruins, he should become stronger as soon as possible. A portion of the current consumption wouldn't be a loss.

Boom!!!

"Eleven, Demon God form," Shi Yu shouted.

Black flames that filled the sky erupted from Eleven, who was falling from the sky. The Void Mantis opened its mouth wide. Although Eleven, who was in the form of a demon god, maintained the size of a normal iron-eating beast, the energy wave was not inferior to the huge eruption just now!!

The third round erupted, the power of a demon god!

Eleven, who was falling, suddenly opened its eyes. Its entire body was covered in black hardened material armor. The power of the Demon God turned into black lightning that lingered around its body. At this moment, the Void Mantis completely cursed.

Boom!!!

"Wuu!!!" Eleven enlarged again and became an incomparably huge monster. The angered Void Mantis crazily condensed a spatial blade and smashed it at Eleven. This time, Eleven only hardened simply. However, the hardening of the fused power of the Demon God was like Yun An's Demon God body. It

was incomparably hard. In addition, the spatial domain was unstable at this moment, and the power of the Void Mantis was already at its limit. It couldn't completely tear apart the current Demon God body.

In the form of a Demon God, Eleven's consciousness was very faint. With the power of a Demon God, Eleven activated Hardening, Giant Transformation, and Impregnable again. Moreover, the huge fist lingered with spatial fluctuations, sweeping up black flames and lightning that filled the sky, and punched at the Void Mantis in the domain!!

Boom!!!!

With a punch, the white spatial wave was also dyed black.

At the same time that a huge sound that could almost destroy the world appeared, the Void Mantis also felt a power that could destroy everything!

In the huge vibration sound, with a crack, the spatial domain directly shattered. The space of the Space Emperor Ruins was also like a broken mirror, and black lightning-like cracks kept appearing!!

Compared to ordinary hardening, the enhancement of the power of vibration was even greater. Even if it was brute force, brute force without skill in the eyes of the Void Mantis, it still made the technique focused style of the Void Mantis feel a huge threat!

In the blink of an eye, space shattered like a mirror. An attack that contained terrifying power directly shattered everything, sweeping with incomparable vibration power. At the same time, it swallowed the Void Mantis and sealed this unstable space, leaving it with nowhere to escape!!

"Are you monsters..." Because its domain had shattered, the temporarily stunned Void Mantis only wanted to curse.

"F*ck your Sequence 11."

Which damned creature could erupt three times in a row, and each time was stronger than the last?

Apart from monsters, it didn't know how to describe the pet opposite it.

"Spatial... Slash!!!"

Boom!!

The Void Mantis counterattacked again, but under the extremely sublimated spatial space, it couldn't offset this power.

With a boom, under the interweaving of the black spatial cracks, a huge spatial vibration power rushed into the sky, instantly tearing open a black natural chasm hundreds of meters long in the sky!!

During this process, in order to not make itself too miserable, the Void Mantis directly mobilized the power of the master of the ruins and used the power of the void in the ruins to protect itself!!

Boom!!

In the terrifying vibration, there was no longer any trace of the Void Mantis. On the other side, the incomparably huge Demon God Eleven looked at a void ball in mid-air through the smoke. In the next

second, the void ball turned into light spots and disappeared. Inside, a mantis with injuries not inferior to Eleven fell slowly from the sky with green blood flowing out of its body.

During the fall, the Void Mantis cried out in pain. It no longer had the ability to fight. It only felt that its body was broken and in extreme pain.

This big guy opposite didn't look any less injured than him. Didn't it hurt?!!

Bang!!!

A moment later, the Void Mantis fell to the ground and hissed.

Endless void power repaired its body crazily, but it still kept rolling around.

"This, does this count as my victory..." At the same time, Shi Yu's voice sounded, making the expression of the rolling Void Mantis turn cold. Its body suddenly stopped and it looked over.

"You win!! Aiyo!!! The last kid wasn't honest. Didn't they say that there weren't any stronger Beast Tamers? Was your Sequence ranking randomly ranked? Could it be that the higher the number, the stronger it is?" The Void Mantis continued to scream. It didn't cheat. Or rather, it was also hoping that someone could defeat it.

This way, it didn't have to carry out the mission left behind by the Space Emperor here. It could no longer suppress its level and got to break through to the overlord level. It could then search for the missing Space Emperor mentioned by the people outside.

"Monster, you're a monster. You're the most..." The Void Mantis was just about to say something when Shi Yu's blue summoning array appeared. It summoned a ginseng baby that quickly ran towards Eleven.

The Void Mantis didn't care about Baby Ginseng. Instead, it looked at the color of Shi Yu's summoning array.

Blue... Blue... Blue...

This guy wasn't a level-six Beast Tamer, but a f*cking level-five Beast Tamer!!

Realizing this, the Void Mantis opened its mouth wide in extreme shock. It looked at Shi Yu in disbelief and said, "You're a level-five Beast Tamer??"

Chapter 506: Worldview Shattered (5)

"Uh." Shi Yu was stunned. He looked at the collapsing expression of the Void Mantis and said, "It doesn't affect me much, not much. I have a telepathy talent. In any case, I can't contract an overlord-level pet. It's the same at level five or six. It won't affect my battle power."

The Void Mantis: ???

Telepathy... telepathy talent?

"Aiyo, ow, ow, ow..."

F*ck, when the Void Mantis screamed, it also suddenly noticed that it was true. Why didn't this challenger f*cking use his Beast Taming Talent?

In the end, it wasn't that he had forgotten to use it, but that it was because it was a telepathy talent that didn't increase the battle much, so it didn't show anything special?

The values of the Void Mantis were directly impacted. It cried in pain, feeling even worse than admitting that it had lost just now.

In other words, this Iron block had forced him into a desperate situation without the support of its Beast Tamer talent?

Thinking of this, the expression of the Void Mantis darkened. Its already dark face darkened even more.

It was cultivated by the Space Emperor after the legendary level. How could it lose to the black and white bear cultivated by a level-five kid with a telepathy talent? This didn't make sense.

"Yi! (Want to eat?)"

When the Void Mantis's world view shattered, a fragrance and voice woke it up. It saw a ginseng baby clone holding a fruit and walking to its side, handing it the fruit and asking.

The Void Mantis looked at this guy in silence and then at Shi Yu.

Why did such a powerful Beast Tamer contract a ginseng baby?

"No." The Void Mantis let out a cold and arrogant cry. It continued to use the void power of the ruins to repair and recover the damage on its body, making Baby Ginseng's clone purse its lips. This guy lost to its leader.

At this moment, Shi Yu asked with a smile, "Well, the Space Beast Egg... And I heard that after defeating you, I can cultivate in the Space Emperor Ruins. Is that true..."

Shi Yu rubbed his hands in anticipation.

The Void Mantis howled and said, "I know, it's so annoying."

With that said, it summoned a round, white egg the size of a football with purple patterns.

"For you..."

It casually threw it into Shi Yu's hand for him to catch. At the same time, a leather blueprint fell on the egg.

"It records the method to hatch and contract."

Shi Yu ignored the egg and looked at the blueprint. The words on the blueprint were from the Space Emperor Era. There were only a few changes from now, so Shi Yu still recognized them.

After taking a look at the blueprint, Shi Yu was not too concerned about the contract method. However, the hatching method stunned Shi Yu.

So troublesome.

It recorded that if one wanted the star pet egg to absorb enough nutrition to hatch, they needed specific star power.

Under normal circumstances, Beast Tamers had no place to look for the power of the stars. However, the Space Emperor had sufficiently prepared something for the lucky person who beat the mantis.

Because only specific geographical locations could attract specific star power...

In four places, he established four large arrays that could attract four different types of starlight.

Beast Tamers who obtained the egg could go there and borrow the power of the ruins array formation to help the egg hatch.

If that was all, Shi Yu didn't mind. However, when he glanced at the location of the four special ruins marked on the map, his expression immediately darkened.

This was f*cking crazy. One of the ruins was on the seven islands, the other was in Rongguang, the other was in Tingxiang, and the other was in the totem area. Emperor Kong was messing with people.

However, Shi Yu quickly understood. If it were during the Space Emperor era, this position was nothing because the Space Emperor had established the Continent Teleportation Array. It would take an instant to go anywhere on Blue Planet, but the problem was that the Teleportation Array could no longer be used now!

"Let's go out and take a look."

Before Shi Yu could complain too much, the Void Mantis couldn't help but chase him away. It said, "If you want to come to the Space Emperor Ruins to cultivate, do it from tomorrow onwards. For now, you guys leave first. I want to rest. Aiyo."

After facing challenges for several days in a row, the Void Mantis was exhausted after this battle. It suddenly wanted to sleep.

Before Shi Yu could react, he and Eleven, who was hugging Baby Ginseng in pain and joy, were teleported out of the ruins space.

....

In the outside world.

The people outside were also really bored.

The fifth in the sequence, Ji Feng, was clearly a mess at socialization. The others didn't know how he became a spy.

At this moment, under everyone's questions, he had no choice but to reveal the situation of his battle with the Void Mantis.

"The elemental lord's half self-destruction can't even work??"

"I knew it. Apart from the spatial element, it's very difficult for other elements to hurt this guy."

"But if it's a spatial element, it's undoubtedly showing off in front of an expert. There's no solution at all."

“Ji Feng, don’t be depressed. I understand you.” Seeing Ji Feng’s silent appearance, Heavenly King Zou was deeply touched. He also felt that that mantis was too uncomfortable.

“Don’t get close,” Ji Feng said after a moment of silence.

“I’m not depressed. After all, that’s a pet cultivated by the Space Emperor. Moreover, its strength is indeed very strong. Whether it’s me or Jiang Tianyang, whose overlord-level pet fought that Void Mantis, we might not necessarily be able to gain any advantage.”

Jiang Tianyang, fourth in the Sequence, legendary Beast Tamer. Ji Feng had once publicly challenged him, but he lost.

Everyone sighed. Yes, that Void Mantis could completely be seen as overlord-level battle power.

It had not broken through for a long time, so it was most likely holding back from breaking through. After all, the skill proficiency was extremely close to the standard.

“Unfortunately.” President Wang said regretfully, “Unfortunately, there are no Beast Tamers with ‘spatial strengthening talent’ among the top masters in our Dong Huang. Otherwise, we might be able to rely on the combination of Beast Tamers and pets and the targeted cultivation of the association to obtain the qualifications to fight that Space Mantis in the future.”

Chapter 507: Worldview Shattered (6)

“Use the attributes the other party is good at to defeat the other party.”

Time strengthening and spatial strengthening were both top-notch talents. They were very rare and very difficult to inherit. Dong Huang didn’t have a top-notch master with this talent now, which made the association very helpless.

“Speaking of which, why isn’t Shi Yu out yet?” Heavenly King Zou suddenly looked at the crack. It had been so long.

“Is it possible that Senior Shi Yu can defeat that Void Mantis!” Fang Lan said with anticipation.

“Little kid, don’t have unrealistic fantasies.” Heavenly King Zou smiled and looked at Fang Lan. “You might as well look forward to Shi Yu’s Beauty Mantis Strategy succeeding... Using the Beauty Mantis Phantom to exchange for a pet egg.”

Fang Lan: Wu...

“Perhaps that Void Mantis is playing around again.” Ning Tianming snorted, very unhappy with the Void Mantis’s arrogant and bad taste.

“That’s true...” Everyone had clearly been teased by that Void Mantis.

Buzz!

At this moment, a spatial ripple suddenly appeared. The figure of a man and two pets appeared in the outside world.

“Sob...” At this moment, Eleven was still hugging the ginseng baby and crying in pain. The three extreme eruptions were too painful. It was simply as painful as when it received the Undying Golden Body teaching. It didn't want the ginseng baby, it wanted the ice cleansing cloak.

Listening to Eleven's miserable cry, the hearts of many Beast Tamers in the outside world trembled. They subconsciously had the thought that the Void Mantis was ruthless this time.

But soon, when their gazes stopped on Shi Yu, they were completely stunned.

Because at this moment, Shi Yu was holding a pet egg. On the pet egg was a piece of parchment.

Egg...

Seeing Shi Yu holding the egg, Principal Feng, President Wang, Dr. Chen, Grandma Li, Lu Qingyi, Zou Yun, Ji Feng, Ning Tianming, Tong Yan, and the others were stunned. They looked at the pet egg in a daze and couldn't react for a moment.

The black crack passage in the sky began to close. At the same time, a familiar voice came from inside.

“The challenge has ended. The Starry Sky Pet inheritance has been sent out. The ruins for the time being... Oh my god, it hurts so much. Howl, damn it, how are your Sequence rankings even decided? It's ranked very horribly. You're not allowed to rank anymore next time. Close!!”

A cursing voice came from the ruins.

Then, everyone opened their mouths slightly and looked at the mature looking Shi Yu.

“As expected of a pet personally cultivated by the Space Emperor. I feel that it's not bad compared to overlord-level creatures. If it weren't for our skills being higher, we would be in danger.” Shi Yu sighed with lingering fear.

“If only I had a strengthening talent...”

Everyone: “?”

After the Beast Tamers present reacted, they suddenly cracked. Holy shit, wait, what did it mean? They suddenly revealed incomprehensible gazes!!! Don't tell them that Shi Yu defeated the Void Mantis!!

The top masters in the top ten of the Sequence and a group of old seniors were all shattered by that mantis.

In the end, Shi Yu, a Sequence rank 11, defeated the Void Mantis the first time he entered?!

“Fortunately, I didn't disappoint you.” Shi Yu patted the pet egg and revealed a gentle smile, making everyone open their mouths wide... It seemed to be true! It really arrived, making Ji Feng and the others in the crowd find it difficult to understand. They didn't understand how that Void Mantis was defeated. When it really arrived, Heavenly King Zou, who was ranked tenth, gradually had his expression distort and collapse...

Chapter 508: Fame in Dong Huang

Holy shit!

Seeing Shi Yu like this, everyone was stunned.

Shi Yu defeated the Void Mantis?!

Whether it was the pet egg in Shi Yu's hand, the suddenly closed ruins, or the howling Void Mantis, it seemed... to prove everything.

However, everyone was still a little stunned and felt that it was unreal.

This was because before Shi Yu entered, no one expected Shi Yu to succeed in the challenge.

Zou Yun and the other Beast Tamers in the top ten of the Sequence had gone in to challenge it themselves. Be it their trump cards or main forces, they were all defeated by the Void Mantis like a joke.

Top-notch masters like Grandma Li and Dr. Chen had also entered before and were mercilessly shattered by the Void Mantis.

The president of the Kong Association had received countless famous veteran top-notch masters nationwide. In the end, without exception, they all lost.

The conclusion they came to was that the pet cultivated by the Space Emperor was invincible. Under legends and overlords, it could not be defeated.

...

If there was, it might have to be a pet cultivated by big shots of the same level, such as Emperor Shi, Emperor Wu, Empress, Dragon Emperor, Evolution Legend, and Mechanical Legend.

Even Beast Tamers like Ji Feng and Tong Yan, who had battle records of killing overlord-level creatures, were not its match at all.

However, in reality, a Beast Tamer with only a level-five space and a telepathy talent had achieved a battle result that everyone judged to be impossible??

"How is this possible!" Everyone still subconsciously found it unbelievable.

Lu Qingyi's expression was subtle. She had fought Shi Yu recently. She was indeed very shocked by Shi Yu's growth speed, but in her judgment, Eleven was definitely still quite inferior to the Void Mantis.

Therefore, what kind of special training had Shi Yu and Eleven undergone this week?

Ji Feng, Tong Yan, Ning Tianming, and the others completely didn't expect that it would actually be Sequence rank 11, who they didn't pay attention to at the start, who defeated the Void Mantis.

Heavenly King Zou's mentality collapsed to the extreme. Holy shit, if it was true, didn't that mean that Shi Yu's Sequence ranking would increase again?

Now that Shi Yu was in the eleventh place, no matter how much he rose, when the time came, the one who fell to the eleventh place would definitely be him, Zou Tianwang.

He had finally made it into the top ten, but in just a few days, he was going to fall again before his butt warmed up. Heavenly King Zou's heart ached.

Something was wrong, something was wrong. When did Shi Yu start to counter him in every way? The two parties clearly didn't have much interaction, so why did he make him feel uncomfortable every time?

"You, you, you, you... really?" The principal of Kong University looked at the egg in Shi Yu's hand in a daze!!

"He really won?" Principal Feng was momentarily stunned. What, in other words, Shi Yu was stronger than Qingyi now?

"I knew it. Senior Shi Yu can definitely win," Fang Lan said excitedly. Shi Yu was more powerful than she imagined.

"Well, we've tried to develop Yun An's dark gold Demon God power these few days," Shi Yu said. "Unfortunately, Eleven can't perfectly control that power. Otherwise, it should be easier to win."

Sigh, after being done with this period of time, he would quickly help Eleven find a new evolution skill and open up a new evolution path. He couldn't waste the power of Yun An.

Continue gambling!

Crack.

Upon hearing that, everyone gritted their teeth. Apart from Principal Feng, Lu Qingyi, and a small number of people who could understand, the others couldn't understand much. However, just from Shi Yu's tone, it wasn't human language. What did it mean that it could be won more easily? What the hell?

"This..." Principal Feng was stunned before accepting it easier.

So that was the case. The Demon God Iron-eating Beast was Emperor Wu's trump card. Using Emperor Wu's trump card cultivation path to defeat a secondary pet cultivated by the Space Emperor... This way, it didn't seem impossible.

Although that was the case, it was still too ridiculous. Principal Feng looked at Eleven. This little guy was only two years old.

If Emperor Kong knew, no, Emperor Wu also knew, the two of them would cry in the toilet together, alright?

"The power of a demon god..." Lu Qingyi took a deep breath. Eleven didn't use that power in battle with her. Now that Eleven had mastered it, in other words, in a one-on-one situation, she would no longer be a match for Shi Yu and the others?

"So, this is that cosmic pet egg?" President Kong looked at Shi Yu's hand.

What kind of species would a white purple pattern be?

This was difficult to determine, because it was definitely not a blue planet creature.

Could he determine its attributes? It was not easy...

Shi Yu also looked down again and nodded.

It was difficult for him to judge. White-striped... starry sky... For a moment, he could only think of the Cosmic Emperor, Frieza...

"This is," Shi Yu said.

"I'm envious." Tong Yan looked at the egg eagerly. Apart from the cultivation opportunity in the ruins, she was here for this egg!

The Space Beast Egg sounded very powerful.

How could a pet specially left behind by the Space Emperor be bad?

It might even be a high-level overlord race, or even a Mythical race.

The others were also secretly envious. Who didn't want such a rare thing?

"I wonder what race it will be... When can it hatch?"

Someone asked.

"This might not be easy. From what I understand, the conditions for this egg to hatch are extremely high. It requires a specific place. Without a year and a half, there should be no hope of hatching." Shi Yu shook his head.

"Ah, I'll talk to you later. I'm going to recover my pet first." At this moment, in the ruins space, Susu had already made the frost cleansing suit. Next, it had to cooperate with Baby Ginseng's treatment and recover Eleven well.

Chapter 509: Fame in Dong Huang (2)

Shi Yu estimated that after this battle, with the physique of the Iron-eating Beast King, Eleven's strength would definitely increase after it healed.

"Is there anything you need?" Seeing that Eleven's injuries were so miserable, even if Baby Ginseng continued to treat him, it was still very miserable. Principal Feng gulped and said.

"Oh?... Life supplements above level-seven, is that alright?" Shi Yu said casually. He had previously taught the Undying Golden Body and had used up all the supplements. He wanted more.

"The Kong Association has prep resources. Let's go there and get them," Principal Feng said bluntly.

Dong Huang and even the Kong Du Association had taken a pile of resources to conquer the Kong Emperor Ruins. Now that the exploration of the ruins was successful, these supplements would be sent back anyway. It was better to give them to Shi Yu and Eleven.

Soon, Principal Feng pulled Shi Yu and the others to run to get supplements, leaving everyone looking at the ruins in the sky in confusion and silence.

President Kong looked up at the sky. What kind of person was this...

However, the news that a Beast Tamer who was only 20 years old had defeated the legendary Beast Tamer, the Space Emperor, would probably change the entire Dong Huang.

At the same time, he looked at the silent Heavenly King Zou, Ji Feng, and the others. He also knew that the Sequence ranking was about to change.

“Ji Feng.” After a moment of silence, Lu Qingyi looked at the fifth Sequence, Ji Feng, and said, “Prepare yourself. Next, we’ll carry out the Sequence battle.”

...

....

On the other side, Shi Yu, who was going to get various supplements with Principal Feng, faced Principal Feng’s question again.

There were many people over there just now, but now, the two of them had reached the main point.

“What, you have to go to the seven islands, Rongguang, Tingxiang, and Heavenly Fox?”

When he heard Shi Yu say that he had to go to the designated Space Emperor Ruins to receive the baptism of the power of the stars, Principal Feng immediately became serious.

Shi Yu had conquered the Space Emperor Ruins. In theory, this egg belonged to Shi Yu.

However, it was simply too difficult to hatch this egg with Shi Yu’s personal strength.

“What do you plan to do?”

“I’ll hatch it myself. I originally wanted to go overseas to take a look too. Don’t worry, when the time comes, I’ll definitely bring Teacher Ying and even the Ice Dragon in Dragon Palace City. There won’t be a problem.”

“Uh.” Principal Feng couldn’t refute. Indeed, going abroad was extremely dangerous even for legendary Beast Tamers.

However, for Shi Yu, who could casually carry a totem bodyguard with him, it was no different from having a titled legend protecting him. It didn’t seem to be that dangerous. The premise was that he didn’t take the initiative to court death.

“This, this, this, this, this.” The old principal was conflicted again. Why did he still have to go overseas?

Whether it was Lu Qingyi or Shi Yu, he actually didn’t want the two of them to participate in the world competition and wander abroad.

However, Shi Yu and Lu Qingyi were clearly not idle. Now that there was another Starry Sky Egg that needed to be hatched at a designated location, Shi Yu had a reason to go out and play again.

“Don’t worry, it’ll be fine. I won’t run around without the ability to protect myself.”

“Moreover, before the Mechanical Conference began, I’ve already decided to cultivate in the Space Emperor Ruins and strive to break through to level six.”

“At that time, level-seven will be far in the future. It’s useless even if I stay. I might as well go train.” Shi Yu also knew that he wasn’t someone who could stay.

“Moreover, I also obtained the protective skill of the Dragon Palace City’s Dragon God. I’ll be fine.”

Upon hearing that, Principal Feng was stunned and his pupils constricted. Good lord, this guy even managed to get the Dragon God’s things.

Cozying up to a demigod? Damn! He should be the director of the first bureau!

After all, in the first bureau, no one could reach demigod level.

The Dragon God had never communicated directly with Dong Huang. Only evolution legends and mechanical legends had seen the Dragon God a few times.

“In that case... it’s indeed not that dangerous. The Heavenly Fox Nation is one of the less threatening countries in the totem country. As for the other three countries, if nothing goes wrong, the exchange team led by a Titled Legend in Dong Huang will go next. If you really want to go, you can also go with the team,” Principal Feng said.

At that time, he could still have another titled legend and a few more legends as bodyguards. It would be difficult to encounter danger.

It was not a bad idea to take advantage of the short peace between the Seven Nation Alliance and the Totem Alliance during the World Tournament to broaden his horizons.

Principal Feng sighed. Shi Yu could do whatever he wanted.

It was indeed very difficult for Beast Tamers who lacked experience to reach the legendary level.

“By the way.” Shi Yu suddenly thought of something and said, “After this, can my Sequence ranking reach the top five?”

“Didn’t they say that the top five of the Sequence Battle will obtain a legendary resource at the final settlement as a reward to assist the contestants in the world competition?”

“Speaking of which, can I borrow this reward in advance? Just treat it as an investment in advance... There’s no need to wait until the eve of the world competition...”

“Uh.” Principal Feng was stunned. There was such a thing, but what the hell was this advance payment? Moreover, he wasn’t even in the top five!

“Ji Feng can’t defeat the Void Mantis. You’ve defeated it. In theory, it’s a very good comparison, but in reality, this is still 1VS1 after all. It can’t be seen as the overall strength of the Beast Tamer. Moreover, his talent is countered by the Void Mantis. Therefore, I can’t say for sure if the Sequence Competition Committee will use this battle result as a judging standard...” Principal Feng said.

Shi Yu smiled and said, “Didn’t you say that the association was prepared to take out a batch of resources to nurture an invincible monarch to challenge the Void Mantis? Now that the challenge has succeeded, this resource is saved. Why don’t you combine it with the ranking reward for the Sequence Battle and give me a legendary resource in advance?”

Chapter 510: Shocking Dong Huang (3)

“If possible, I might as well announce my battle results of killing two overlords in the Chaotic Sea and count it in. I’ll directly jump to fifth place. After a period of time, I feel that I shouldn’t be afraid of other people’s challenges.”

“Good lord, you wish.” Principal Feng was stunned.

Eleven’s legendary resources, in addition to the legendary resources of the Sequence ranking, and the future Blue Sea Sprite Reincarnation breaking through to overlord... Shi Yu definitely wouldn’t give up the opportunity to apply for legendary resources. Shi Yu had his eyes on the Dong Huang legendary resource bank!

“But...” Principal Feng pondered for a moment and felt that it didn’t seem impossible. He said, “I’ll fight for you.”

“Thank you, Grandpa. I want time-element.” Shi Yu was filled with anticipation.

“Bullshit, how is that possible!!” Principal Feng was angry.

“Then wood and light elements... They’re all passable...”

He had Eleven’s legendary resources, Buggy’s, Chi Tong’s, Susu’s, and definitely Susu’s. He thought of a way from the Mechanical Conference. If the Sequence ranking could be done, he would give it to Baby Ginseng.

This way, all the legendary resources were achieved!

Next, as long as they found an opportunity to temper their will into the overlord will and pull the super skill situation to perfection, they could undergo an invincible breakthrough. They would strive to make every one of them not inferior to the Void Mantis.

...

At the thought of having several top-notch overlords by his side soon, Shi Yu was filled with happiness.

“Of course, if there are legendary spatial cultivation resources, the kind for Beast Tamers to use, that’s fine too...” Shi Yu added.

....

Shi Yu and Principal Feng calculated Dong Huang’s legendary resources.

Shi Yu also took a pile of top-notch supplements for Eleven and Baby Ginseng from the preparation area of the Space Emperor Ruins.

After that, Principal Feng suddenly realized something and said, “By the way, Qingyi seems to have made a battle appointment with Ji Feng...”

After being stunned, Shi Yu suddenly thought of this.

Immediately, the two had strange expressions.

Just now, he was still planning to apply for legendary resources in advance through Sequence rank five.

But if Lu Qingyi defeated Ji Feng, wouldn't the fifth place be Lu Qingyi's?

At that time, Shi Yu would not be fighting Ji Feng, but Lu Qingyi.

Shi Yu immediately had an innocent expression...

"It can't be that scammy..."

Soon after, in the Myriad Mountain, Ji Feng and Lu Qingyi indeed started a battle.

Principal Feng and Shi Yu ran over to be spectators.

Heavenly King Zou and the others stayed behind to watch this battle.

The battle between the fifth and seventh ranks was still very attractive.

Shi Yu, Eleven, Buggy, Baby Ginseng, Chi Tong, Susu, Ling, and the entire Shi Yu team stood at the top of the mountain and quietly watched below.

Boom!!!

On Ji Feng's side, there were six pets proficient in controlling natural power. The three overlord races and the three quasi overlord races all had the ability to injure overlords under his meteorological affinity.

With the six of them working together, forget about temporarily resisting an overlord, they could even suppress ordinary overlords.

Ji Feng indeed had the battle record of using the natural advantage to kill overlords.

Ordinary overlords referred to ordinary overlord-level creatures with about 50 million energy points, low levels of natural power cultivation, and transcendent racial skills that didn't exceed perfect proficiency. For example, the Snake Lord and Earth Demon Ape Shi Yu encountered were all like this.

Invincible overlords like the Dragon Palace City's Sky Penetrating Whale, a famous top-notch overlord in the East Sea overlord circle, and the Tyrant Sea Legend's mutated Leviathan that could fight against totems naturally weren't included.

On Lu Qingyi's side, there were five. Wind Demon Lion, Green Phoenix Bird, Imperial Concubine Flower, Mermaid Princess, and Hurricane Demon who had mastered the perfect-level teaching skill "Mythical Revival". Each of them didn't have high basic energy, but through the Mythical Revival skill, they could reach more than 20 million energy points, equivalent to half an overlord.

In addition, although Lu Qingyi's new contracted Courtyard Sprite didn't have a Mythical Revival, it had absorbed half of the legendary undead resources of Ancient Capital University. Its strength wasn't much inferior to the other few. Under the possession of its natural spirit, the other few pets' already very strong strength increased again.

After the Wind Demon Lion and the Green Spirit Wind Bird were cultivated and evolved by Lu Qingyi, her lineup was also three overlord races, three quasi overlord races.

It could be said that apart from the four who had already become legends, the two of them almost represented the strongest battle power of the younger generation of Dong Huang. They were the pillars of Dong Huang's legendary battle power in the next few decades.

The peak battle between the two directly made the gazes of Zou Yun and the others solemn to the extreme, feeling the difference.

"Wuu." "Wuu." "Yi." "Mi." "Ning." "So impressive..." Shi Yu and the others were also in deep thought.

If it was a team battle, these two people were indeed very scary.

"It's not a big problem." Shi Yu took a deep breath. Apart from Eleven, it was indeed not easy for his other pets to deal with the other main forces of the other party alone. However, due to the existence of the Time Fruit and Eleven's current overwhelming strength, it was not impossible to win a team battle. It was just very difficult, but this situation wouldn't be long.

Next, when he broke through to level six and Eleven and the others' super skill proficiency increased, he would really be invincible below the legendary level.

Before that, for the sake of legendary resources, he would take a seat at fifth place first...

...

The next day.
