

Beast 541

Chapter 541: Crossing Worlds (8)

Dr Aqi snorted. "This is still alright. It's not that difficult."

At this moment, everyone could tell that Dr Aqi was stubborn. At the same time, they were extremely impressed by Gao Xuan.

"Gao Xuan is awesome."

"As expected of a super mechanical genius who was sucked into that place at the age of 13..."

As Gao Xuan finished showing it, be it the scientific research teams of Star Capital University or other universities, their expressions turned cold.

Unbelievable.

The most unbelievable thing was that Gao Xuan was only in his early twenties, but he had already developed this kind of technology that could move even legendary Mechanics. It was a transcendent initial skill chip!!

And it was a high-level concealment skill.

How much was Gao Xuan's mechanical proficiency?

After Gao Xuan got off the stage, the media quickly took action like hungry dogs. They felt that this ethereal bracelet could definitely cause a new wave like the previous green cocoon.

On the Internet, the Beast Tamers were envious again and wanted one.

"Not bad!!" On Imperial Capital University's side, after Gao Xuan returned, the old principal of Imperial Capital University laughed and said, "Just as Old Liu judged, the Gold Award of the Mechanical Conference will definitely be yours."

"Well, it's still hard to say." Gao Xuan was humble for a moment and said, "After all, there are still so many financial groups and research teams who haven't gone on stage."

"There's no need to be too humble. Your research is extremely meaningful even in the previous Mechanical Meetings," the old principal of Imperial Capital University said with a smile.

"The next display team is Ancient Capital University, right?" Gao Xuan took a deep breath and looked in the direction of Ancient Capital University.

"Well..." The old principal of Imperial Capital University also looked over in confusion. She naturally saw the interview and knew that Ancient Capital University was displaying it with Shi Yu as the representative.

"You're concerned about that Shi Yu. Don't worry, after this Mechanical Conference, you can definitely slowly surpass him," the old principal of Imperial Capital University encouraged with a smile.

Although it was a little difficult, it was definitely not a problem to gradually narrow the gap.

"I hope so..." Gao Xuan took a deep breath. He had an ominous feeling...

A moment later, it was time for the eighth place, Ancient Capital University.

The host was still introducing it.

"Then, let's invite the eighth team to showcase..."

"It's a new archeological machine brought by the archeology Department... A second-year student, Shi Yu."

After the host finished speaking, everyone present felt that this scene was familiar.

It seemed that someone had also participated in a certain meeting as an archeologist.

However, the last time was the Feeding Conference, and this time was the Mechanical Conference.

As a powerful Beast Tamer, Shi Yu had graduated from the high school Feeding Department. It was fine if he knew a little Feeding.

But this time, the mechanical domain had nothing to do with him.

"I wonder what kind of archeological machine it is..." However, everyone was still curious.

After all, Shi Yu was too famous.

On the Internet, pairs of eyes also became especially serious.

After the host finished speaking, Shi Yu walked to the arena under the serious scrutiny of Elder Liu, Dr. Mei, President Ma, and Legend Xiao.

At this moment, after Shi Yu went on stage, Bean Bears more than a meter tall also went on stage.

As heartless porters, they carried a huge machine. Apart from that, a Bean Bear carried a display cabinet filled with ancient fossils up. As for Ling, he ran underground to be in charge of connecting and assembling.

The huge machine was like an altar. In the center of the altar was a booth. Apart from that, there was nothing else. It was very simple.

Seeing this, everyone gulped. They didn't understand what this was. An archeological machine?

They looked at another glass display cabinet that the Iron-eating Beast had carried up. They recognized the things on it. Weren't those strange rocks fossils??

What was he doing?

After Shi Yu went on stage, he looked at the entire venue and the judging table.

"Hello, everyone." Shi Yu smiled and said, "As everyone can see, this is a machine used in archeology. Moreover, it's a machine for archeology through ancient biological fossils."

"This is also a research result that can change the current structure of the Beast Taming Domain and even the mechanical domain!!"

Whoosh!!!

When Shi Yu finished speaking, everyone was in an uproar.

Gao Xuan himself was stunned.

Was he deliberately looking for trouble???

“This is the super archeological genius ranked fifth under the age of 30 in Dong Huang?” Dr Aqi and the Legend Ju had also heard of Shi Yu’s famous name, but according to their understanding, this Shi Yu was a genius archeologist, not a Mechanic.

Now, what was going on?

A research result that could change the current Beast Taming Domain structure and even the mechanical domain structure??

Why was it the same tone as the super mechanical genius of Dong Huang just now?

What was going on!

What was wrong with the young people of Dong Huang!

“This...” President Ma and the others were stunned.

After all, logically speaking, Shi Yu was here to showcase an ordinary new archeological equipment. What was he saying?

At the same time.

Under the cameras of many media outlets, Shi Yu’s figure was spreading crazily.

Everyone’s gazes gathered on Shi Yu, wanting to see what this genius from the archeological world had come across the world to do.

Chapter 542: Crossing Worlds (9)

Looking at Shi Yu, he looked very confident...

At this moment, under the gaze of everyone, Shi Yu first walked to the counter filled with fossils and took out a Tyrant Dragon fossil.

“Everyone, look here first. This is a fossil of a Tyrant Dragon. The Tyrant Dragon is an earth overlord that has been extinct since the totem era. It’s a top-notch transcendent creature on the ground. At the moment, our archeological research on the Tyrant Dragon can only rely on fossils.”

Then, Shi Yu took out another Sea Dragon fossil and said, “This is a fossil left behind by the Sea Dragon, a top-notch transcendent creature in the sea of the totem era.”

He continued to take out a fossil and said, “This is a fossil left behind by the Wind God Winged Dragon, a top-notch transcendent creature in the sky of the totem era.”

Shi Yu held these fossils and said, “They all have one characteristic. They have completely disappeared from this world. We don’t have much to do with their archeological research anymore.”

“However, through this machine, we can restore their true appearance and even the state of the ancient world more clearly with these ancient fossils! Everyone, please wait and see!”

Under Shi Yu’s voice, everyone saw Shi Yu place the three fossils on the display table of the huge archeological machine.

Then,

The booth emitted light, and the light ball enveloped the three fossils.

Then, the entire altar-like archeological machine suddenly flickered!!!

An extremely illusory huge projection appeared on the altar.

This altar was like a virtual projection device. Through these fossils, it displayed a very magical scene.

On the altar was an extremely unfamiliar environment.

Some unknown special plants were everywhere, and the surrounding energy fluctuations were filled with natural wildness and ancient aura.

Seeing the projection, many people were stunned.

At this moment, Shi Yu’s voice slowly sounded. “In the fossils of powerful ancient creatures, there will be traces of time. These traces of time will record the state experienced by some ancient creatures in the form of fossil dreams.”

“However, it’s very difficult to pry into this kind of fossil dream!”

“Only through the transcendent Dream Steal skill and a special meditation technique created by Emperor Shi can there be a 1% chance of spying!”

“Therefore, under normal circumstances, this kind of dream back to ancient times is impossible to achieve. Our research on ancient fossils also stopped here. However, through this machine, we can finally cross this step.”

“Moreover, it can even materialize them in reality in the form of a dream illusion!”

As Shi Yu finished speaking, a deafening roar came from the altar.

The environment became a scene of the sky and the ground coexisting.

In the sky, a streamlined Wind God Winged Dragon with a wingspan of 11 meters swooped down and directly grabbed the Tyrant Dragon cub below to bite and kill!!

Wind-element skill, Ripping Claw!

The overlord aura on its body was incomparably rich, shocking everyone. Its green sharp claws instantly divided the Tyrant Dragon cub into two.

After the Tyrant Dragon cub was killed and hunted, on the ground, an incomparably huge Tyrant Dragon phantom condensed. It raised its neck and let out an angry roar, releasing the Earth Domain. It used the earth element to condense the Space Splitting Sword and slashed at the sky.

Boom.

The overlord aura tore apart the surrounding sky and tore off the single wing of the Wind God Winged Dragon.

Gulp.

A moment later, the Tyrant Dragon and the Wind God Winged Dragon disappeared, and the illusion turned into the sea. The humid aura made everyone feel that it was really the deep sea in front of them. A lizard-shaped ancient creature, the Sea Dragon, slowly appeared.

It roared, and the deep sea immediately trembled.

“This is...”

Seeing the clear illusion of an ancient creature, many Mechanics widened their eyes.

Especially Legend Ju and Dr Aqi. They took a deep breath and were rather shocked.

Be it those Wind God Winged Dragons or Tyrant Dragons, the various countries only had fossils and uncertain images.

But now, Shi Yu actually directly used this archeological machine to display their three-dimensional forms and the environment they were in in ancient times through illusions?

On Imperial Capital University’s side, the old principal and Gao Xuan of Imperial Capital University were stunned. They suddenly recalled something. When Shi Yu challenged Imperial Capital University, the Butterfly of Imagination had conjured the phantom of the Tyrant Dragon!

That was the ability of the Butterfly of Imagination!

But now, Shi Yu had actually modified this ability into a machine?

“This guy.” Gao Xuan’s expression froze. He didn’t expect Shi Yu to have such talent.

But just this was not enough.

Changing the situation... Stop kidding.

At this moment, Shi Yu stood in the arena and smiled.

“Unlike the images and habitat environment of ancient creatures simulated by other machines, this machine can directly spy on the traces of time on the ancient fossil itself. In other words, the illusions in front of me are all scenes they really experienced when they were alive.”

“Through this machine, we can more accurately observe the full appearance of the ancient era.”

“From these illusions, we can clearly discover those lost skills we’ve never heard of, ancient resources we’ve never seen, and extinct creatures we’ve never come into contact with.”

When Shi Yu finished speaking, many Mechanics cast shocked gazes. They didn’t expect Shi Yu to really be able to develop something useful.

Chapter 543: Crossing Worlds (10)

In front of the television, archeologists and ancient scholars looked at the machine in shock. They found it unbelievable and immediately had a new opinion of Shi Yu's talent.

Even on Ancient Capital University's side, Principal Feng, Grandma Li, and the others were stunned. Wait a minute, wasn't he going to display the mechanical phantom beast? Didn't mechanical phantom beasts only materialize and create through the abilities of Shi Yu and the Butterfly of Imagination?

Why did Shi Yu suddenly create an ancient phantom materialization machine?

When did this happen?

"The illusion just now was indeed incomparably realistic. In fact, even super skills like the Earth Domain and the overlord aura could be displayed through the dream illusion. Unbelievable, this is a machine you developed??" Elder Liu looked at Shi Yu in disbelief. If it was developed by other mechanical masters, he would barely accept it. However, how was it possible for Shi Yu, an outsider younger than Gao Xuan, to do this?

"That's right. This is the machinery I developed with the ability of my Butterfly of Imagination as the blueprint," Shi Yu said with a nod.

As soon as he finished speaking, Xiao Shuang and Xiao Qin were extremely stunned. Shi Yu actually had mechanical talent?

At the same time, the spectators who were originally looking forward to Shi Yu's performance were also extremely shocked. They didn't expect Shi Yu to actually develop such a high-end machine.

However...

"There are also Beast Tamers who have mastered the ability you mentioned in the Shen Feng Nation. They're called Dream Stealers. This one of yours is indeed a very impressive invention. It can be considered a perfect combination of machinery and archeology. However, it's not enough to say that it's rewriting the structure of the Beast Taming and even the mechanical domain, right?" Dr Aqi asked.

Although this research result was indeed extraordinary, forget about rewriting the structure, it was even far inferior to Gao Xuan's research results. At most, it was slightly stronger than the dream training device of Star Capital University.

"I never said that I was done showing it." Shi Yu chuckled.

At this moment, under the control of Ling backstage, the machine once again conjured illusions through the three fossils.

In the next moment, accompanied by three roars, the huge bodies of the three ancient overlords appeared in reality again. They descended around Shi Yu in the form of illusions!!

Shi Yu slowly walked to the display cabinet containing fossils. He opened a drawer and took out three mechanical Soul Heart Fruits. These were made by the Soul Heart Fruits created by Baby Ginseng and the smart chip.

With the three Mechanical Soul Heart Fruits in hand, Shi Yu slowly walked back to the spot. At this moment, no one knew what Shi Yu wanted to do, but in the next moment, the three ancient overlords

suddenly opened their mouths. At the same time, Shi Yu threw the three Mechanical Fruits he had just taken out into their mouths!!

“This is...???”

“What’s going on? What did he feed those illusions?”

Shi Yu’s actions confused everyone.

However, what was even more confusing was still to come!

After eating the Mechanical Soul Heart Fruit, the auras of the three ancient overlords suddenly began to change.

A dazzling white light flickered on the three huge overlords. This scene that looked like the light of evolution directly stunned everyone!!

Under the flickering of the evolution light, the bodies of the three huge beasts began to change. They didn’t expand, but shrank as the light flickered.

Soon, their bodies shrank to more than a meter. Then, their full appearance appeared in everyone’s vision!!

It was more than a meter tall, and its entire body was yellow-brown, like a baby Tyrant Dragon. Its pupils flickered with light...

It spread its wings for more than a meter and was completely gray, but it still retained the posture of a Wind God Winged Dragon...

As for the young Sea Dragon, it was lying on the ground like a huge lizard...

At this moment, when they saw the three huge illusions suddenly shrink, everyone couldn’t react for a moment. But in the next moment, the detection device on the huge screen was activated.

Everyone was naturally familiar with this detection device.

Previously, a team had created new mechanical pets and used detection devices to test energy and other data.

This was a device specially used to detect the various attributes and energy information of transcendent creatures. It was one with this exhibition venue.

At this moment, under everyone’s incomprehension, several rows of words appeared on the huge screen.

[Race Name]: Mechanical Tyrant Dragon

[Attributes]: Machinery, Earth

[Race Level]: Low-level monarch

[Level of Growth]: Transcendent

[Race Skill]: Advanced Intelligence, Earth Domain

Energy Points: 3143

...

< Name > Mechanical Wind God Winged Dragon (Machinery Beast)

[Attributes]: Machinery, Wind

[Race Level]: Low-level monarch

[Level of Growth]: Transcendent

[Race Skill]: High-level intelligence, Ripping Claw, Wings of the Wind God

Energy Points: 3019

...

< Name > Mechanical Sea Dragon (Machinery Beast)

[Attributes]: Machinery, Water

[Race Level]: Low-level monarch

[Level of Growth]: Transcendent

[Race Skill]: High-level intelligence, Water Dragon Bite Explosion, Water Dragon Bullet

Energy Points: 3080

[Machinery Beast Revival successful!]

At this moment, the entire place suddenly fell silent. Everyone's brains couldn't react for a moment.

They looked at the three smaller creatures that were identical to the Tyrant Dragon, the Wind God Winged Dragon, and the young Sea Dragon. For a moment, their breathing was a little rapid. They looked at the words on the screen in confusion.

Chapter 544: Crossing Worlds (11)

Elder Liu was suddenly stunned. Dr. Mei widened her eyes. President Ma's mouth opened slightly. Legend Ju from the seven islands took a deep breath. As for Shen Feng's Dr Aqi, he directly faced Shi Yu.

"Dr Aqi, this is the real result."

"Supplementing it with a special mechanical Soul Heart Fruit, the greatest use of this research result is to perfectly materialize the illusions of ancient creatures. Then, with the mechanical system, these illusions will be revived in the modern era in the way of mechanical phantom beasts."

"Although they will lose most of their power after reviving, they can still preserve a portion of their power. As everyone can see, these three mechanical phantom beasts that revived in the form of mechanical lives each preserve a super racial skill."

“Straightforward research on mechanical phantom beasts will be more convenient for archeological exploration of the totem era.”

As Shi Yu finished speaking, the legendary Mechanic from Shen Feng had already widened his eyes and revealed an incredulous expression. “How is this possible!!!”

At the same time, Gao Xuan, who was sitting in the Imperial Capital University seat, also shouted with his mouth open. He stared at everything and said, “How is this possible!!!”

How could an ancient creature phantom become a mechanical life form? With that mechanical fruit just now, with this machine?

How was this possible!!

At this moment, all the Mechanics present widened their eyes. They really couldn’t believe this scene, but in order to make them believe, Shi Yu chose to continue the experiment.

He looked at the audience, at Legend Xiao Shuang, and in the direction of General Xiao Qin. At this moment, Legend Xiao Shuang, a genius Mechanic, also widened her beautiful eyes in disbelief. This was because her mechanical index had also detected the life fluctuations of these mechanical phantom beasts.

What Shi Yu said was true. These mechanical phantom beasts were real life forms!!

“It’s very simple to verify.” Shi Yu smiled and said, “Now, which audience is willing to contract these three mechanical phantom beasts and give it a try??”

Shi Yu’s words resounded in the audience like a bolt from the blue.

In the direction of Ancient Capital University, Dean Hao was the first to run down. He had been waiting for this moment. He said excitedly, “I still have a contract slot.”

Ancient Capital University, Mechanical College, Dean Hao!

Everyone knew this old man. Although he wasn’t a top-notch Mechanical Master in the mechanical field, he was still very capable to be the dean of one of the nine major universities.

At this moment, Dean Hao came down excitedly and walked onto the arena. Then, under Shi Yu’s nod, he excitedly contracted the mechanical Wind God Winged Dragon of the three mechanical phantom beasts!!

A purple contract halo appeared. Under the silence, the mechanical Wind God Winged Dragon blinked its clear eyes like a cub and accepted the contract of the old man in front of it without any resistance!

In the next moment, it was a scene that all Beast Tamers were extremely familiar with. The Wind God Winged Dragon that was just an illusion was directly contracted by Dean Hao into the Beast Taming Space in the form of a pet life!!

The purple light dissipated, and the Wind God Winged Dragon disappeared from the scene. Then, it was summoned by Dean Hao again. With a cry, it flew into the sky, and its wings emitted a green dragon-

shaped light. It directly used the super skill that had been lost for tens of millions of years, the Wind God Wings!!

“As everyone can see, this is the skill that has been lost for tens of millions of years, the Wings of the Wind God.”

“Through this method, the lost skill can also appear again.”

Shi Yu’s voice echoed throughout the venue.

“I don’t believe it!!!”

At this moment, Gao Xuan couldn’t sit still in his original seat. He widened his eyes and wanted to get up, but he was immediately pressed down by the equally shocked principal of Imperial Capital University.

“Little Xuan, what are you planning to do?”

“I want to hit the wall and see if I’m dreaming.”

At this moment, Gao Xuan’s heart was beating crazily, and tears welled up. He looked at this scene in disbelief.

What... was going on?

At this moment, everyone was shocked. They looked at Dean Hao and the Wind God Winged Dragon in disbelief, and at the same time, at the Tyrant Dragon cub and the Sea Dragon cub.

How was this possible?

How could an ancient creature revive?!! Was this a miracle?

No, this was a miracle!!!

Everyone looked at the machines on the arena in confusion and at the people and beasts on the arena.

Mechanics, archeologists, and Beast Tamers watching the live broadcast all over the country had their eyes glued to the screen. They hugged the screen and observed in disbelief.

“This, how is this possible...” Even the legendary big boss of the fourth bureau, Old Master Liu, spoke in disbelief, unable to understand this phenomenon.

“How exactly did you do it?” The legendary Mechanic Mei Xiuying said in shock.

“I, I don’t understand.” The Mechanic from the seven islands felt that this world was so unfamiliar.

“...” Dr Aqi of Shen Feng didn’t know how to evaluate the thing in front of him. His words were stuck in his throat.

“This is what I want to show. The Ancient Beast Revival System can revive ancient creatures into the modern era in the form of mechanical lives through fossils.”

“At the moment, there are two major systems in the mechanical field. Smart life forms and biological modification. I think mechanical phantom beasts can completely form a three-way structure with the

first two. This is because they have the common advantage of the two. The Mechanical Soul Heart Fruit contains intelligent chips that can allow them to infinitely increase their intelligence like intelligent life forms. At the same time, their bodies have inherited the power of ancient powerful creatures. Moreover, due to the speciality of the phantom body, the risk of mechanical modification is much lower than that of living creatures. In fact, at the phantom stage before revival, they can already be modified without harming the safety of the creature.”

Chapter 545: Crossing Worlds (12)

“We’ve already carried out strict experiments on this.”

With that said, Shi Yu summoned the mechanical phantom beasts that had been modified in the ruins space. If the three that had just revived still retained the complete appearance of ancient creatures, then the ones Shi Yu summoned now, while retaining the appearance of ancient creatures, were all mechanical weapons!!

“Roar!!!”

Under everyone’s stunned expressions, mechanical winged dragons in armor, mechanical sword dragons holding mechanical swords, and mechanical armored dragons carrying mechanical shields and cannons appeared in front of everyone.

It attacked everyone’s values again, making them open their mouths wide.

This wasn’t the end. Shi Yu said, “Apart from archeology, this device can also mass-produce ancient mechanical phantom beasts through high-level fossils that contain a large amount of energy, creating a batch of new mechanical pets with potential and extraordinary strength. Just like now, they can be contracted.”

“But this way, it will continue to consume the energy of the fossil. Of course, it can also directly give the power of the entire fossil to a mechanical phantom beast. This way, the power it can inherit will be stronger.”

With that said, Shi Yu summoned another mechanical Tyrant Dragon. This mechanical Tyrant Dragon was wearing hardened armor. It was several meters tall and especially domineering!!

Boom!

An incomparable aura erupted from its body. It was the Tyrant Dragon that Shi Yu had experimented with at the start. Now, it had been completely studied by Ling.

“Roar!!! (I am the king of the earth!!!)”

Under its roar, its information appeared on the screen.

[Race Name]: Mechanical Tyrant Dragon

[Attributes]: Machinery, Earth, Thunder

[Race Level]: Low-level overlord

[Level of Growth]: Transcendent

[Super racial skill]: Earth Domain, Earthquake

Energy Points: 7114

“In fact, as long as the level of the fossil is high enough and the mechanical modification materials are top-notch, it’s not impossible to revive an overlord race’s mechanical phantom beast.”

Shi Yu’s words were like a thunderclap in everyone’s ears.

Mechanics looked at the venue one by one.

At this moment, these legendary Mechanics and ordinary Mechanics were already completely stunned.

The audience on the Internet gradually lost their ability to think.

However, what made them numb was that Shi Yu was still talking and stimulating them.

This beast...

“In general theory, if the ancient fossils of the totem era can be revived, then the Mythical Creature fossils of the Mythical Era might be able to be revived. Although there have been no successful cases now, I believe that as long as we invest the money and continue researching, reviving divine beasts and materializing Mythical creatures into the Beast Taming Era to revive in the form of machinery, it might not be impossible.”

Shi Yu said, “I’m done.”

As soon as he finished speaking, the entire place continued to be dead silent.

[This is also a research result that can change the current structure of the Beast Taming Domain and even the mechanical domain!!]

Initially, everyone still felt that Shi Yu’s words were ridiculous, especially Dr Aqi from Shen Feng. But now, this was more than mere changing. This was simply tearing apart and rebuilding!!

The mechanical legends of the fourth bureau looked at Shi Yu in shock. They looked at this archeologist who had suddenly come to participate in the Mechanical Conference for no reason and the members of Bureau 11 who had come to participate in the Mechanical Conference and were a little stunned. Who told them what was going on?

It was fine if he came to participate, but was this result serious?

What the hell was this research result? How could it even create an overlord race mechanical pet!!!

What was even more ridiculous was that this guy wanted to revive a mechanical divine beast??

“What’s wrong with this guy?” Legend Xiao Shuang said in shock. Wasn’t this guy still a mechanical noob previously? Why did he suddenly become even more strange than a group of super mechanical masters in the fourth bureau?

This was something that a mechanical noob could develop?

At the side, General Xiao Qin was also extremely confused, but her gaze stared at the mechanical Sea Dragon with yearning.

There were Beast Tamers staring at those mechanical phantom beasts with yearning everywhere. Fang Lan's red face was filled with urgency. She wanted it so much~

"This..." The host looked at the judging table and kept feeling that the scene was a little out of control. He kept feeling that everyone was already stunned by the results.

On the judging table, many big shots were silent. Even the Shen Feng Legend, who was extremely arrogant just now, cracked at this moment. He suddenly felt that Dong Huang was a little ridiculous.

Damn, an archeologist researched an archeological machine??

What a joke!!!

Were the people of this country serious!!!

e National Science and Technology Exhibition Center.

A silent aura filled the entire place, and countless people looked at the venue.

Many legendary Mechanics on the platform wanted to say something but hesitated.

Mechanical phantom beast!

Collect the common merits of intelligent life and biological modification?

How ridiculous!!!

The advantage of intelligent life machinery was that it could fuse with intelligent chips and constantly increase its learning ability. It could be used to assist in various jobs and had a rich skill pool.

As for biological modification, it could make up for the racial shortcomings of some pets through the mechanical system and specifically strengthen their merits, making them stronger!

The two couldn't be combined, because there was a conflict between the smart chip and life intelligence. However, what this mechanical phantom beast meant was... not only could it inherit the powerful race of ancient creatures and modify it, but it could also make the smart chip its intelligence core?

This, this, this... A path that had always been imagined but never realized!

The thing was there was more!

Most importantly, he used just a portion of the power of the three fossils to create three mechanical creatures of monarch races?

Using an entire fossil could potentially create an overlord race?

What was even more ridiculous was that it actually said that there was hope of reviving a divine beast?

Fortunately, Shi Yu didn't really successfully revive the divine beast at the conference. Otherwise, he would probably directly become the fuse for the next totem battle!

“...Da da da.” Old Liu, who was in the Fourth Bureau, clicked his old teeth.

Obviously, he was shocked to the extreme.

At this moment, he had completely forgotten about his student, Gao Xuan, and the Mechanical Conference. He only wanted to satisfy his curiosity.

He said, “Then, those three fossils are all level-seven fossils, right? How many of these mechanical phantom beasts can be created with these level-seven fossils? Apart from fossils, what’s the cost of this machine?”

Shi Yu looked at Elder Liu and said, “A level-seven fossil can be revived with this device. With mental energy and spatial energy as energy, it can probably create about 100 mechanical phantom beasts of monarch races or mechanical phantom beasts of overlord races.”

“The cost of the machine isn’t high, and the energy cost of materializing illusions isn’t very high either. However, the creation of the Mechanical Soul Heart Fruit is a little troublesome, but I’ve already completed a stable manufacturing channel. It can be used on a large scale.”

“Ba.. Ba...” Old Liu was shocked.

A fossil could actually create so many mechanical phantom beasts??? This system was actually so perfect?

There weren’t many fossils, but there were definitely a good number. In various places, it wasn’t a rare resource. The collection value was greater than the use value, but such a pile of collection resources could actually be converted into so many pets with powerful potential?

The initial stage was a low-level monarch race... After all, the greatest characteristic of Mechanics was that the replication of upgrades and evolution was extremely high. In addition, mechanical phantom beasts had the merits of intelligent life and biological modification. It was not wrong to say that their potential was huge.

Moreover, the significance of an overlord species pet was much greater than 100 monarch species!!!

Even if it was a one-time use, if there were hundreds of mechanical phantom beasts of overlord races, Dong Huang’s national strength would greatly increase.

“You said that this machine referenced skills like Dream Steal and Phantom Illusion...”

“Then, if we don’t rely on machines and use skills like Dream Steal and Illusory Phantom to materialize the dream illusions of living overlord-level and totem-level creatures, can we also transform them into mechanical phantom beasts?!” Dr. Mei asked with rapid breathing, suddenly thinking of this possibility.

Below, Shi Yu was stunned. He said regretfully, “I’ve thought of that too, but unfortunately, reviving mechanical phantom beasts requires the power of time. Only the ancient phantom with traces of time conjured from the ancient fossil containing traces of time and the mechanical Soul Heart Fruit that contains the power of time can allow the ancient phantom to revive in the modern era.”

“However.” Shi Yu looked up with a smile and said, “However, as long as we perfectly preserve the bones of the powerful creatures now, many years later, they might also contain traces of time. At that

time, they can be like the heroic spirit ruins in the ancient capital, passing the power of the powerful guardian of our era to the future to form a stable mechanical phantom beast system.”

Shi Yu’s answer made the mechanics present curse.

A stable... overlord race cultivation channel???

Although the time span was a little long, as long as it lasted for ten thousand years, it seemed like... it could really be formed?

Keeping the body parts of powerful creatures was much easier than letting overlord creatures give birth to a child!

Shi Yu’s invention was even more impressive than Emperor Shi’s heroic spirit ruins.

“Of course, not every powerful creature can accept such a method, but the fossils that this world has preserved for hundreds of millions of years are enough for us to develop this system,” Shi Yu said.

Blue Planet was different from Earth. Ancient creatures were also transcendent creatures. It was easier for them to leave traces. Therefore, on Blue Planet, there were many fossils of ancient creatures, especially fossils of powerful creatures.

Therefore, even if fossils were consumables, the fossils accumulated over hundreds of millions of years on Blue Planet were still a considerable number. Compared to worrying about not having enough fossils, it was better to worry about the production consumption of the Mechanical Soul Heart Fruit... After all, without the support of the ginseng baby, it was still quite troublesome to nurture it on a large scale.

Chapter 547: The Fourth Bureau, Shi Yu (2)

In short, next, it might start the fossil fever in the country. A large number of Beast Tamers would devote themselves to the Mechanic excavator specialization and dig rocks everywhere.

“Yes, that’s indeed the case.” Dr. Mei was dazzled as she looked at the young man in shock.

She was very familiar with Shi Yu. Her two daughters had come into contact with Shi Yu, but she never expected that the genius Beast Tamer her two daughters mentioned could one day cause such a huge impact on her in the mechanical field.

“I...” President Ma of Star Capital originally thought that the shock from watching the battle between Shi Yu and Ji Feng was big enough. At that time, when he heard that Shi Yu wanted to participate in the Mechanical Conference, he didn’t think too much about it. However, he didn’t expect that Shi Yu didn’t follow the routine... He didn’t follow the routine!!

Was he still human? It was fine if his battle power was so impressive, but archeology and feeding were also so powerful. The key was that now, his mechanical achievements had also become epoch-making results. How could he be like this? What would other geniuses think!

Of course, the most shocked were still the two foreign friends.

Regarding the annual Mechanical Conference of Dong Huang, they had originally come with the mentality of watching a show.

But now, they gradually realized that their brains weren't enough.

The legendary Beast Tamer of the seven islands, Madam Ju Qian Yao, suppressed her trembling heart and felt that it was ridiculous. It was difficult to imagine that she had only come to Dong Huang to exchange and learn symbolically at the request of the higher-ups. During this process, she actually encountered such an epoch-making invention?

Moreover, such an epoch-making invention was invented by a 20-year-old young man from another country?

What did Shi Yu say he invented it for? Yes... archeology... He called this an archeological machine?

He wanted to understand the Mythical Era and directly revive the divine beast and ask it directly, right?

"This person has to be remembered..." Legend Ju Qian Yao looked at Shi Yu carefully and thought that she definitely had to transmit the news of Shi Yu and the mechanical phantom beast back to the country. This person was simply a super genius that only appeared once in a hundred years. If only she could dig him to the seven islands.

At the moment, the seven countries were in an alliance. Unlike the totem clans who wanted to destroy the geniuses of the seven countries, the seven countries were relatively harmonious on the surface. If a large-scale totem battle occurred in a country, the other countries would even send more troops. In this context, the seven countries usually used various methods to poach the geniuses of other countries to their countries to serve their countries.

Ju Qian Yao saw that Shi Yu was young and should be at the stage where he was facing countless temptations. No matter how much it cost, it was worth it to dig up such a talent.

"Why, why would such a genius appear in Dong Huang? Is it really just an archeologist?" Dr Aqi of Shen Feng also fell into a deep silence. At this moment, he didn't know what to say, because with his shallow mechanical knowledge, he actually couldn't understand how this mechanical phantom beast revived.

Forget about this machine, what was that so-called Mechanical Soul Heart Fruit??? Spiritual energy, spatial energy, and the power of time that Shi Yu mentioned just now. How could such a little kid play with the technological system of space and time?

Dr Aqi didn't understand.

At this moment, the entire venue was still in a strange atmosphere.

Everyone stared intently at the mechanical phantom beast on the arena and the fossils on the stage.

They actually... didn't want Shi Yu to leave at all.

The skill training machine and the Ethereal Bracelet didn't give them much of an impact, but this so-called "archeological machine" simply filled them with curiosity. Tell them more, tell them more, introduce more.

There were still so many fossils!!! Revive more for them to see, don't stop!!

The first two were only effective in fixed domains. The skill training device was for low-level Beast Tamers with superior family backgrounds who were willing to work hard. The latter was for master-level Beast Tamers who often carried out dangerous missions and could afford the Ethereal Bracelet, or for Beast Tamers in the army to distribute it uniformly. It had little to do with them.

However, the results Shi Yu brought were completely to open up a new domain. It could lead to a new industry and let countless people dig up fossils. It could also lead countless Mechanics to devote themselves to the research of the mechanical phantom beast domain. It could even let a powerful race like the mechanical phantom beast attack the current Beast Taming structure and form a complete chain.

At that time, traditional Beast Tamers, feeders, archeologists, and Mechanics would all go crazy.

Moreover, Shi Yu even drew a big picture and said something about reviving divine beasts...

The Mythical Domain was the common pursuit of Beast Tamers for millions of years, the highest pursuit.

"Lost, completely lost." Professor Mo Qing of Star Capital University smiled bitterly with shock. When Gao Xuan went on stage, he originally wanted to struggle, but Shi Yu's research results directly crushed everything.

He originally thought that it was just a dream device, but... materializing a dream or reviving a dream illusion was simply a legendary method.

Such an invention would probably even alarm that mechanical legend.

"Shi Yu..."

At Imperial Capital University, Gao Xuan still couldn't calm down. Shouldn't the Mechanical Conference be the stage for him to display his results? Shouldn't the normal script be for him to win the Gold Award of the Mechanical Conference and leap into the sky with this? Why, why did Shi Yu, an archeologist, also come to interfere and do this?

He felt that the Mechanical God was joking with him.

Chapter 548: The Fourth Bureau, Shi Yu (3)

Suddenly, Gao Xuan thought of something and recalled a comment on the Internet. That silly guy called [I'm not Buggy] predicted that Shi Yu would develop a new mechanical faction. Initially, Gao Xuan looked at this comment like he was looking at a fool, but now, he was suddenly a little confused and felt that reality was a little unreal.

He quickly took out his cell phone and went to the blacklist to find that [I'm Not Buggy], but he suddenly realized that [This account has been deleted]...

Gao Xuan: "?"

At this moment, although no one wanted Shi Yu to leave the stage, it still had to end.

Ling, who was in the form of a Rubik's Cube, had already come out from backstage and floated beside Shi Yu's shoulder. It was being crazily photographed by the media with him.

At this moment, Xiao Qin and Xiao Shuang's mother, the legendary Mechanic Mei Xiuying, took a deep breath and asked Shi Yu, "One last question. Did you really develop such a device just for archeology?"

Shi Yu was stunned. "Not entirely. Speaking of which, when I was young, my greatest dream was actually to be an astronaut and ride the machinery I created to the starry sky. Unfortunately, at that time, I didn't have the financial conditions to go pursue the Mechanic class..."

"Becoming a Beast Tamer and an archeologist is something for the future. My greatest dream when I was young was to be a legendary Mechanic."

"Now, half of my dream has been fulfilled." Shi Yu sighed. Who didn't have the dream of being a space person and a scientist when they were young?

Upon hearing that, many Mechanics were silent and sighed bitterly. Yes, if they remembered correctly, although Shi Yu was a genius, he seemed to be an orphan.

Mechanics were indeed not something that such a family could come into contact with. Only after Shi Yu rose through his archeological talent could he return to fulfill his dreams.

Dr. Mei was also extremely emotional... Unfortunately, if only Shi Yu had come into contact with the Mechanic class from the start.

No, it wasn't too late now. She wanted this person in the fourth bureau!

However, at the same time, many spectators had strange expressions, such as Dr. Zuo, Xia Qingwei's family, and President Ye of the third bureau of the Feeding Bureau, who were watching the Mechanical Conference before the live broadcast. Wait, wasn't your childhood dream to be a legendary Feeder??

How many dreams did he have!!! Can he say them all at once and let them be mentally prepared?

....

At this moment, because the Mechanical Conference was broadcasted live on the Internet, the country was already in an uproar.

In Ancient Capital University, the Mechanic students were also paying attention to the Mechanical Conference.

A portion of the Mechanics of Ancient Capital University were forced to accept transfers here. A portion of them really liked machinery, but because their results were poor, they only got into the Mechanic class of Ancient Capital University and didn't get into Imperial Capital or Star Capital University.

After coming to Ancient Capital University, although the Mechanic class of Ancient Capital University was more than enough to teach them, and the Mechanic knowledge of Ancient Capital University couldn't be learned even after ten years... Every time they saw any extremely influential mechanical results from other schools, they looked at their own schools and the archeological machine research projects they participated in. The Mechanic students of Ancient Capital University couldn't help but sigh.

It was at the bottom of the professional food chain of the major universities.

But today, they watched the entire Mechanical Conference in a daze.

In the end, they were simply impressed.

They all blushed. They understood that the Mechanic class of Ancient Capital University was about to take off this time. Just like the Feeding Department and the Battle Department, it was about to take off. Moreover, it was the same person who brought them up. This person was Big Boss Shi Yu from the archeology Department next door!!

Of course, at this moment, the students from the archeology Department and the Battle Department of Ancient Capital University, such as Yu Shu, Wang Ling, and the others who had seen the Mechanical Conference, also had strange expressions. It was difficult to understand!! Shi Yu, this beast... was he still human!!

Soon, as the display of Demon Capital University was completed, it barely struggled under the light. It was also time for the Mechanical Conference to take a break. During this process, the news of the mechanical phantom beast spread and fermented like a tsunami!!

Aqi, the legendary Mechanic from Shen Feng, left almost immediately and came to his room.

He took a deep breath and took out a machine with a mechanical fruit logo. This machine was like a large cell phone or a small computer.

Dr Aqi directly activated the machine.

At the same time.

On the other side of the ocean, in a very special communication room in this country with many titles such as the Nation of Divine Wind, the Nation of Divine Eagle, the Nation of Machinery, the Nation of Technology, and the Nation of Freedom, a young woman with wine-red hair and white skin was surprised and picked up the communication.

“Dr Aqi, what happened?”

At the moment, due to the totem area and various restrictions, the seven countries couldn't communicate normally with technology at all. However, what Dr Aqi was using now was the latest research results of the Divine Wind Nation. Even if it crossed two countries, it could still communicate for a short period of time, but it would consume a lot of energy.

At this moment, the contact person in charge of contacting Dr Aqi saw Dr Aqi, who was communicating and learning in Dong Huang, suddenly activate this device and immediately realized that something big might have happened.

“Judy, listen to me first. Inform the association to collect ancient fossils from all over the country. I'll send you the specific reason after sorting it out.”

Chapter 549: The Fourth Bureau, Shi Yu (4)

“Eh??” The person named Judy was very surprised. “Dr Aqi, what exactly happened?”

“Do as I say!” Dr Aqi said. Although Shen Feng had yet to master Shi Yu’s technology at the moment, Shi Yu’s invention had provided them with an idea. With the technological power of Shen Feng Nation that was so much stronger than Dong Huang’s, it might not be impossible to replicate!

Judy was first stunned, then she suddenly thought of something and said, “Dr Aqi, can you... tell me about it first?”

“What exactly did you discover?”

“Why are you talking so much nonsense!” Dr Aqi panicked.

Judy was stunned. “Because, because the Dong Huang exchange team that came to Shen Feng previously bought a huge batch of ancient fossils from us to use as a friendly memorial for Dongfeng. It’s quite a big batch...”

While buying a large number of mechanical materials, Dong Huang also used other rare resources to exchange for relatively low value fossils. Shen Feng was naturally happy to see this.

“???”

“Gfft!!” Dr Aqi’s vision darkened and he almost spat out a mouthful of blood. To hell with being friendly. Was this something a human could do?

“This, this, how can you guys give them away!!” He was furious.

“Those are core resources that are enough to impact the current structure of the mechanical field, a new mechanical faction!!”

“What?!!” Judy was stunned.

Dr Aqi sighed and said, “A Dong Huang person named Shi Yu. He developed a new mechanical faction called the Mechanical Beast. Through the ancient fossil, he revived ancient lives. The core resource used is ancient fossils!!”

“It’s alright. It’s impossible for the other party to completely buy everything. Moreover, if it really doesn’t work, we’ll start a war with the totem country and snatch some,” Dr Aqi said with a deep breath.

Judy was still stunned and didn’t react. She didn’t understand what it was that made Dr Aqi, who looked down on the mechanical field of other countries, have such a high evaluation.

“Shi Yu?? Who is this? A legendary Mechanic from Dong Huang? Also, reviving ancient lives?” She was deeply confused and shocked. God, was this not a miracle?

Dr Aqi shook his head and said, “This person... is just a 20-year-old archeologist.”

That day.

In Shen Feng Nation, many legendary Mechanics were shocked. This was the first time Shi Yu’s name had spread overseas in an extremely influential manner.

This also gave Dr Aqi, who was in Dong Huang, an important mission. He had to rope in and befriend this mechanical genius named Shi Yu, as well as exchange this technology with Dong Huang. The Shen Feng exchange team would immediately head to Dong Huang!

...

At that moment, during the intermission, Shi Yu was so busy that he exploded.

Because Legend Xiao Shuang, General Xiao Qin, Fang Lan's parents, and Fang Lan had all come to find him to see the mechanical phantom beast.

Principal Feng, Dean Hao, and Grandma Li were naturally overjoyed the whole time.

For Principal Feng, it was because Ancient Capital University was about to take off again. For Dean Hao, it was because the Mechanic class was about to take off. In addition, he had contracted a mechanical phantom beast. According to Shi Yu, the Wind God Winged Dragon fossil+machinery phantom beast sprout+his own modification... This could completely reach the overlord race in the future! This was even his first pet with overlord potential!

As for Grandma Li, or the greatest winner, she was originally the person who collected the most fossils in Dong Huang. She was the highest authority in the fossil field. More than 60% of the rare fossils in Dong Huang were in her hands. Two months ago, she also bought a large number of foreign fossils through the Dong Huang exchange team. This wave also took off directly.

Of course, they had obtained benefits. Since Shi Yu was the founder of this domain, there would definitely be many benefits in the future.

"Little Lan, do you have any thoughts in the future? When the time comes, I'll revive a mechanical phantom beast of a transcendent race for you first. This way, it'll be easier for you to contract it. In any case, you can still modify and upgrade it in the future." In the preparation area of Ancient Capital University, Shi Yu smiled at Fang Lan.

"Sister Xiao Qin, do you want one? Don't you also know mechanical modification? I remember you still have a contract slot, right?"

Shi Yu was naturally not stingy with his own people. Well, in the future, he would also arrange for mechanical phantom beasts for Senior Lin, everyone in Ping Cheng, An Chang, and every member of the Environmental Protection Department. A monarch race could definitely attract people.

"..."

Shi Yu kept promoting these mechanical phantom beasts to his acquaintances and gave them to the Yu family.

"Thank you, Senior Shi Yu. I want the Tyrant Dragon. Roar." Fang Lan almost hugged Shi Yu's thigh. Fortunately, she was stopped by her parents.

At the same time, Father Fang and Mother Fang advised her earnestly. The Tyrant Dragon was famous, but it couldn't fly. Their family studied aerial machinery. Was this appropriate?

Xiao Qin was also rather embarrassed, but it was difficult to refuse. After all, it was a pet with overlord potential, and the Mechanical Sea Dragon looked pretty good. It was very compatible with her navy identity... It looked like she had to work hard for Shi Yu to repay her debts.

The Environmental Protection Department was so fragrant.

“Shi Yu.” Legend Xiao Shuang looked at Shi Yu with a deep gaze, very confused.

She said, “You should understand what your research results mean, right?”

Shi Yu also looked at Legend Xiao Shuang in the fourth bureau and nodded heavily. “It means that Sister Xiao Shuang, we can become colleagues soon.”

Xiao Shuang : “ ... ”

Xiao Shuang opened her mouth slightly, but she couldn't refute because the fourth chat group had already exploded.

Many mechanical big shots who had not appeared for a long time, and even some retired mechanical big shots, appeared one after another to discuss the mechanical phantom beast.

This research result was undoubtedly worth the research of the entire country, just like the green cocoon system.

Dr. Mei Xiuying had even recommended to the bureau to let Shi Yu join the fourth bureau and integrate the resources of the fourth bureau to open the research of the mechanical phantom beast domain.

[The telepathy talent is very suitable to command the mechanical army and become the core. Why was such a talent and genius suitable for the Mechanic class intercepted by Bureau 11, the third, and the first bureau first? It shouldn't be.]

[But it's not too late now.]

[He has already displayed such mechanical talent. It's indeed suitable to absorb it into the fourth bureau to nurture. It's a pity to waste this good talent.]

[Machinery phantom beast, a genius idea, and it actually succeeded. Impressive. By the way, who's Shi Yu?]

[Elder Hu, you're already 150 years old. Don't interfere in these things and retire in peace.]

[Bastard, I'm not old yet. Moreover, aren't we encouraging old people to be agile and find jobs again now? This mechanical phantom beast is quite interesting. I want to help!]

[...]

Gao Xuan was silent in the group chat. He trembled and didn't dare to say a word. He should be the protagonist today... This was too much. Was this forcing him to develop a mechanical domain even more impressive than a mechanical phantom beast!!

...

“Sister Xiao Shuang, are you here to invite me to join the fourth bureau?” Shi Yu looked at the black-haired beauty in front of him.

Xiao Shuang was speechless. How could he be so direct?

However, judging from the discussion in the bureau, there was an 80% chance that the fourth bureau would accept Shi Yu. They even had to beg Shi Yu to come. After all, such a big project would undoubtedly become a national project. As the founder, Shi Yu couldn't not have the corresponding identity.

In order to better carry out this project, the seniors in the fourth bureau definitely hoped that Shi Yu would know more about the Mechanic class and accept the system's mechanical training like Gao Xuan.

At the same time, they could also obtain more information on mechanical phantom beasts from Shi Yu.

Xiao Shuang wanted to say something but hesitated.

“I understand. The responsibility will also be greater if I add more departments, but I'm already prepared.”

Shi Yu had a serious expression. It couldn't be helped. The greater the ability, the greater the responsibility. In order to expand, scale, and standardize this project, he had to guide these Mechanic seniors.

“Talk in detail... talk in detail...”

This time, it was epic strengthening!

In the fourth bureau, he could choose any of the top-notch mechanical materials in the mechanical index and Dong Huang's mechanical warehouse. It was just a matter of time for Ling to research himself into a quasi Mythical race!!! Super mecha, starry sky battleship, mechanical illusion god, he could have them all!

Chapter 550: About the Top Four of the Sequence Who Became My Bodyguard (1)

The Mechanical Conference would last for several days.

But next, both the judges and the audience felt that it was boring.

The Mechanics all entered sage mode after the shock.

Although there were also inventions comparable to dream training devices later, in the eyes of the audience, they were only so-so.

Mechanical phantom beasts were forever gods!

At this moment, the nine major universities and many research teams weren't thinking about how to apply for more funds with their inventions.

Instead, they were thinking about how to get intimate with Shi Yu and sit on the mechanical phantom beast, the ride that led to the future Golden Road!

If they caught this wind, even pigs could take off, let alone the elites that they were. They had to catch up.

For example, Star Capital University gave a plan that made the gem cat clone cry.

Star Capital University wanted to cooperate with Ancient Capital University. They would let their pets train normally during the day and let their pets train in their dreams at night. When their pets died and their corpses were preserved, they could still revive them to continue training, fighting, and working countless years later.

This was simply a perfect cooperation. The world would become better and better.

Of course, Shi Yu naturally ignored such an inhumane method.

Right now, he only wanted to receive the fourth bureau's resources in peace.

He had already learned the benefits of the fourth bureau from Legend Xiao Shuang.

First was the mechanical index. This was definitely there.

Just like how the archeological index was filled with archeological knowledge and the Feeding index was filled with Feeding knowledge, the Mechanical index was naturally filled with Mechanical knowledge.

For Ling, this was the most important thing to make it stronger, not inferior to the legendary resources of the Mechanic class.

After all, knowledge was a resource in the Mechanic class.

Apart from that, it was the right to apply to activate forbidden weapons after becoming a member of the fourth bureau.

Just like how Gao Xuan could take a small forbidden weapon to destroy the Ice Dragon Snow Mountain, if Shi Yu had reasonable needs, he could also apply for the right to use the forbidden weapon.

Naturally, it was definitely only an ordinary or even a small forbidden weapon, and it needed to pass the joint vote of multiple departments.

Moreover, the members of the fourth bureau were qualified to come into contact with some control mechanical materials in Dong Huang. Moreover, they had a certain amount of funds every year and could directly exchange mechanical materials.

After hearing this, Shi Yu was overjoyed. Everything was better.

...

Because of the mechanical phantom beast, in the third, fourth, and eleventh bureau, many big shots gathered and discussed this project.

After all, mechanical phantom beasts were not a matter of the Mechanical Bureau. The archeological Bureau and the Feeding Bureau were not inferior to the Mechanical Bureau in terms of curiosity about ancient overlords.

In a conference room in Star Capital.

Principal Feng, Grandma Li, President Ye of the third bureau, Dr. Mei of the fourth bureau, Legend Xiao Shuang, and the others gathered.

“The mechanical phantom beast system indeed requires cooperation.”

The three parties had already reached a consensus.

Bureau 11 had the most ancient fossils, so it definitely couldn't be lacking.

Secondly, the cultivation difficulty of the Soul Heart Fruit was very high. If there was no ginseng baby, it could only rely on the joint efforts of the legendary feeders in the third bureau to form a stable cultivation channel.

In the end, it was the combination of the smart chip and the Soul Heart Fruit, the modification of the mechanical phantom beast. These were the core skills of the mechanical phantom beast.

This needed the Fourth Bureau.

Therefore, Shi Yu had already decided to share the various technologies of the mechanical phantom beast system with Bureau 3, 4, and 11, which was equivalent to handing it to Dong Huang.

In the conference room, the big shots of the three bureaus looked at the plan concluded by Ling in their hands with serious gazes.

Then, Legend Xiao Shuang revealed a puzzled expression and looked at Shi Yu. “Why aren't you in these cooperation plans?”

“Uh.” Shi Yu was stunned.

The other big shots also looked at Shi Yu.

Yes, why?

But this was very simple. Shi Yu didn't want to do it anymore!

“Cough.” The president of the Feeding Association and a member of the fourth bureau, President Ye Hui, had a strange expression. He kept feeling that this scene was a little familiar.

It seemed that after someone developed the green cocoon system, he immediately threw it to Dr. Zuo, Legend Hua, and him.

Again?

“Because I'm already at a technical bottleneck and can't overcome it in the short term. And I still have to prepare for the world competition. I'm helpless,” Shi Yu said with a shrug.

What a reasonable reason to slack off.

World Tournament...

Everyone was silent as they looked at Shi Yu speechlessly.

What world tournament?!

Although it was already very impressive for Shi Yu to reach Sequence fifth in such a short period of time, the lowest threshold for survival in the World Tournament had to be at least legendary.

There were still eight months. Shi Yu, who had just broken through, couldn't catch up no matter how anxious he was.

Moreover, legends were only the lowest threshold of the World Tournament.

Countless legends and overlords went to compete for the title of "World Legend" and the blessings of the World Tree.

Therefore, it was basically difficult to win the championship without a titled legend's battle power.

Be it Lin Feng Legend back then or the Divine Wind Beast Tamer 20 years ago, when they won the championship, their battle power was close to the titled level. They could temporarily match totems. This was how they won the championship.

Shi Yu was really too far behind that standard.

Moreover, the difficulty of this year's world competition was even higher because of the participation of the totem country.

It would be fine if Shi Yu didn't have so many halos on him. He could just go and treat it as training and gambling his fate. Even if he couldn't win the championship, there might be other benefits. However, with the pile of achievements on Shi Yu, there was no need for him to take the risk in the World Tournament.
