

Beast 551

Chapter 551: About the Top Four of the Sequence Becoming My Bodyguard (2)

With Dong Huang's resources, it wasn't impossible to pile Shi Yu up to the "titled level" and let Shi Yu break through the restrictions of the telepathy talent Beast Tamer to have the battle power of a titled level. It wasn't impossible for him to become the first legendary Beast Tamer with the strength of a titled level.

"In my opinion, let's not go. Although there are many Mythical ruins over there, it's not like our Dong Huang doesn't have Mythical ruins," Principal Feng said.

He had changed his mind again, mainly because he was excited by Shi Yu at the Mechanical Conference. Why didn't he study such an impressive system like the Mechanical Beast instead of going to the World Tournament!

"It's different. Inatella Island has only opened once in so many years. Who knows when the next time will be?" Shi Yu said. "Besides, I still have a reason why I must go."

"Apart from courting death in the ruins, what other reason can you have!" Principal Feng said.

"I do have a reason."

"Didn't Senior Lu want to go too? If I go too, I can at least protect Senior Lu and take care of each other," Shi Yu said seriously. This sentence directly made Principal Feng open his mouth wide. He didn't know how to refute. Bastard, using Lu Qingyi as a shield?

The big shots of the other bureaus were also slightly stunned before looking at Principal Feng.

Of course, Shi Yu's words were half true and half false. In fact, he had been studying the skill index these few days.

He had been studying that locked [Technique Fusion] ability.

In Shi Yu's opinion, this ability might be the most critical function to reach the Mythical domain.

Shi Yu tried many methods to unlock this ability.

After a while, although he didn't succeed, what made Shi Yu very silent was that he received the feedback of the index. Just like how he instantly knew the usage of the index when he first awakened it, he suddenly knew how to unlock this ability!

[Technique Fusion] (locked)

< Introduction > It can fuse two or more skills that have reached perfect proficiency into new skills. The higher the skill proficiency, the higher the compatibility between the skills, and the higher the success rate of fusion. The success rate of fusion will also depend on the physique of the Beast Tamer and the will of the pet.

[Unlock Condition]: Obtain the Blessing of the Planet's Will

It wasn't waiting for him to have reached the Legendary level, nor was his physical fitness insufficient... Instead, like the general teaching methods of those skills, it needed the power of the outside world.

Shi Yu was extremely silent. What else could he do?

"Let him go."

Just as everyone was expressing their views on Shi Yu wanting to go to the World Tournament, a young man's voice suddenly came from outside the room.

Everyone was stunned and subconsciously looked over. They saw a pair of slender hands push open the door. The first thing they saw was a woman in ancient clothes.

Her skin was fairer than snow, and her eyes were like a pool of clear water. When she pushed open the door and looked forward, she had an elegant and elegant aura, making people feel inferior and not dare to profane her. However, her cold, arrogant, and agile appearance was quite enchanting, making people unable to not dream about her.

Shi Yu looked at the woman in white ancient clothes with a sword at her waist and was very surprised. He felt that the other party's appearance was only below the Dragon God. It was enough to compete with Senior Lu in her elven form. Who... was this person?

"Legend of the Divine Bell, and President Lin?" Many big shots present exclaimed and stood up.

Behind the woman was a handsome young man in his twenties in luxurious clothes. However, the aura between his eyebrows was filled with vicissitudes, not like a person of this age.

Upon hearing Principal Feng and the others' surprise address, Shi Yu immediately realized and immediately stood up.

Sequence two, the descendant of the mechanical legend, the legendary Beast Tamer, Divine Bell!

The other was Lin Feng, a descendant of Legend Lin Feng who had succeeded the position of president of the Dong Huang Association after the legend of the divine source abdicated. Although he looked young, he was already more than a hundred years old.

He was the person with the most prominent status in Dong Huang apart from the mechanical legend. He could command the many totems left behind by Lin Feng, as well as the overlord and totems that had received Lin Feng's guidance.

When he saw two figures related to the legendary Beast Tamer, Shi Yu was instantly stunned. Why was the other party here?

But soon, he understood. It must have been him.

"You're Shi Yu, right?" President Lin looked at Shi Yu.

"I am, President Lin." Shi Yu looked at this "young man" with a calm expression.

President Lin Xiao smiled faintly and said, "Thank you for your contribution to Dong Huang. You just said that you wanted to participate in the World Tournament, right?"

The legendary Beast Tamer, Shen Ling, sized up Shi Yu with her beautiful eyes. She had naturally heard of Shi Yu. She only felt that Shi Yu was a very strange person. He had an ordinary background, but he quickly rose up. To have such achievements, even if it was a listening to historical talent, it was a little ridiculous.

Of course, Shi Yu also felt that the Divine Bell Legend in front of him was very strange. She was clearly a descendant of the founder of the Dong Huang Mechanic class, the Divine Source Legend, but she was dressed in ancient clothes and even wore an ancient sword... It was fine if she didn't inherit the family assets, but why was she becoming more and more backward?

"Yes." Shi Yu nodded.

"President Lin, you just said to let Shi Yu go??" Principal Feng blinked. You know that this guy contracted the Blue Sea Sprite Reincarnation, contracted the heroic spirit of General Mu Huiyin, contracted a bunch of overlord species pets, and even developed many shocking results such as the Green Silkworm cocoon and mechanical phantom beasts.

Why were they letting him go out instead of watching over him?

"Yes." President Lin nodded and looked out the window. "The awakening of the World Tree is not as simple as it looks. My ancestor once talked to the World Tree and was one of the few people who knew some secrets."

Chapter 552: About the Top Four of the Sequence Becoming My Bodyguard (3)

"According to my ancestor, every time it awakens, it means that we have accelerated the recovery of the myths, that we are closer to a mythical era. They are all signs of disaster. As for the Mythical Ruins on Inatella Island, they are clues that pass through history and are also hidden divine pathways."

He looked at Shi Yu and said, "Although you've only awakened your talent for a short period of time, to be able to obtain the recognition of the Blue Sea Sprite and the recognition of the Dragon God, you're already one of the best talents in Bureau 11. You can go to Inatella this time. The blessings of the World Tree are unimportant, but if you can obtain some clues through those Mythical Ruins, it might be helpful for Dong Huang to welcome the next disaster and era."

"Originally, I had expectations for Lu Qingyi in Bureau 11. The importance I placed on her is even higher than Ye Xing, Divine Bell, and the others. This is because as an archeologist with the talent to listen, it's easier for her to explore those Mythical ruins. But from the looks of it, you're a better candidate than her."

"From the various signs, the awakening of the World Tree this time should be the greatest change in the Beast Taming Era," President Lin said. "A change that hasn't happened in hundreds of millions of years."

Principal Feng's face fell.

However, at the same time, he was shocked.

The awakening of the World Tree was also related to the approach of the Mythical Era???

President Lin Xiao was the descendant of Lin Feng Legend. His words naturally had credibility.

Because Lin Feng was one of the few humans who had received the blessings of the World Tree.

“The awakening of the World Tree is related to the revival of the Mythical Era?” Shi Yu was stunned.

He also suddenly recalled the Dragon God’s words. The World Tree was the embodiment of the planet’s will. The real Blue Planet’s will had already fallen asleep with the end of the Mythical Era. The frequent awakening of the embodiment of the planet’s will represented something. It seemed to be possible.

At this moment, when they heard President Lin’s words, the others also revealed shocked expressions.

“That should be the case.”

“Moreover, no one can determine if the revival of the myths is a good thing or a bad thing. For example, my ancestor once had a pessimistic attitude, as if he understood something,” President Lin Xiao said calmly.

If the Mythical Revival was a disaster, then the Blue Sea Sprite, mechanical phantom beasts, national Beast Tamers, and stable evolution channels of overlord races would be nothing.

Gods and mortals would be completely different domains.

In the face of such a changing world, information, information, and all clues related to myths were the foundation.

“If you don’t want to go there, naturally no one will force you to go. But since you want to go to Inatella Island to explore the Mythical Ruins, Dong Huang will definitely give you some help,” Lin Xiao said.

“At that time, Ye Xing, Divine Bell, and the other contestants who have already become legendary Beast Tamers, Dong Huang, will protect you in the competition. You and Lu Qingyi will be the leaders. You don’t have to forcefully try and get the blessings of the World Tree, but it’s best to investigate as many clues about the Mythical Ruins as possible.”

Beside President Lin Xiao, the expression of the legendary Beast Tamer, Shen Ling, changed. She looked at Shi Yu. What, he wanted her to be Shi Yu’s nanny?

Principal Feng and the others were also very shocked and stunned.

Holy shit.

Let the top four legends of the Sequence be Shi Yu’s bodyguards to explore the Mythical Ruins?

This, this, this, this...

Shi Yu was also shocked by President Lin’s words. How could this be?

When everyone else was competing for the Sequence ranking, he directly became the target that all the top Sequence contestants needed to protect in the world competition?

However, President Lin’s expectations for himself seemed to only be to find some clues about the Mythical Era in the World Tournament through his listening talent to better welcome the changes in the future.

As for Shi Yu himself, he was relatively silent. Although he also wanted to explore the Mythical Ruins, he couldn't leave the skill fusion function unlocked, right?

If possible, he wanted all of them.

"I understand." Shi Yu nodded.

"Yes." President Lin also nodded and said, "Principal Feng previously wanted to apply for the legendary resources in the top five of the Sequence for you, right? The association will directly approve this. Although the chances of using the growth of pets to break through to the legendary level are not high, you don't have to worry about wasting them. Those legendary resources... just use them. It can more or less increase your strength."

"With your foundation and these legendary resources, you won't be much weaker than those overlord races in the World Tournament. Just be careful. Your safety can still be guaranteed."

"Apart from that, the association will also give you an additional five billion as resources. You should try your best to increase your strength."

He looked at President Ye and Dr. Mei and said, "At the same time, you can also use the fossils from the Mythical Era in the resource bank to study the mechanical phantom beast project. Just as Shi Yu said, this is indeed a way to explore myths."

"Yes." President Ye, Dr. Mei, and the others nodded.

After President Lin finished speaking, even the Divine Bell beside him was envious. However, she also knew that Shi Yu deserved it.

"Alright, that's enough," President Lin said. In the past few months, he had come into contact with many titled legends from other countries, some totem clans, and even some totem allies. This year's World Tournament was not a small matter. It might be a sign of the revival of the myths. If not for that, he would not be willing to send out a genius like Shi Yu.

Chapter 553: About the Top Four of the Sequence Becoming My Bodyguard (4)

In this world competition... The strategic significance of Lu Qingyi and Shi Yu in Bureau 11 might be greater than the other four legends.

"Wait, President Lin, there's one more thing," Shi Yu suddenly said.

"Is there anything else?" President Lin asked.

Shi Yu said, "I know the location of a ruin that might have Mythical resources and many legendary resources. It might be the resource mystic realm of the Phoenix Race that has already been eliminated. However, I don't know if there's any conspiracy behind this ruin, like what I know. Therefore, I want the Dong Huang Association to cooperate with me and complete the exploration before the World Tournament. This way, I can also strengthen Dong Huang's national strength again."

"Ah, I know about this. You want to go to the seven islands during this period, right?" President Lin said.

Shi Yu nodded. Apart from Principal Feng and the others, the big shots of the third and fourth bureaus were still stunned.

What, Mythical resources? Multiple legendary resources? Seven islands? Phoenix Race's resource mystic realm? What was going on!!

The Undying Dark Phoenix in the Undead Battlefield, which was suspected to be Chi Tong and the empress's biological mother, told Shi Yu about a Mythical resource mystic realm. It said that it wanted to use this to nurture Chi Tong's growth and let Shi Yu save it through Chi Tong. This mystic realm was on the seven islands.

Back then, because the Undying Dark Phoenix went berserk, Shi Yu had told Principal Feng about this. As for Principal Feng, he had definitely reported it to the higher-ups.

Therefore, Shi Yu was not surprised that President Lin knew about this. After all, the position of Division 13 was at the top of Dong Huang. There was only one superior, and that was the president of the Dong Huang Association, Lin Xiao.

However, because this mystic realm needed Chi Tong's bloodline to open, Dong Huang had never taken action. At that time, Shi Yu was still too weak and not suitable to explore the Phoenix Race's resource mystic realm.

"After a while, I'll invite the Tyrannical Sea Legend, the Guardian Goddess Ying, and the other members of Bureau 11 to form an exchange team to the seven islands. At that time, you can follow the team to the seven islands to explore."

Shi Yu said, "Then we have to watch the Undead Battlefield too. If that mystic realm is the key to unsealing the Undying Dark Phoenix, it'll be a big problem..."

President Lin said, "You don't have to worry about that."

Shi Yu added, "There's also the Space Emperor Ruins' Space Beast Egg. It also needs to go to different areas to hatch..."

President Lin was silent.

Why was this kid so troublesome???

"There will also be an exchange team and titled legends and guardians as your bodyguards."

"However, if you want to go abroad, you need to undergo a certain amount of disguise and change your identity and name. You can't go out to train as Shi Yu. If nothing goes wrong, your name will be on the totem clans' must-kill list soon," President Lin said calmly.

"What, the totem clans still don't know my name?" Shi Yu was stunned.

To think that he was worried previously, but in the end, the other party was so unprofessional?

However, one had to disguise themselves when going abroad. This could be used as a reference, but to be honest, Shi Yu couldn't trust Buggy's disguise skill.

It was better to use the skill index to disguise himself. As long as he added points to look white-haired and had an old and weak aura, who could recognize him? It was natural.

Everyone :”...”

“Since it’s alright, Little Ling, let’s go,” President Lin said.

“Alright, Grandpa Lin.” The divine bell’s voice sounded.

President Lin came and left quickly, leaving the big shots of Division 13 looking at each other and falling into deep thought. They also sensed the aura of some big events from these words.

....

After the Mechanical Conference ended, the impact of the Mechanical Conference continued to ferment.

As too many people were looking for him, Shi Yu decided to disappear.

Among them, the two mechanical legends of the seven islands and Shen Feng wanted to come into contact with Shi Yu the most. Shi Yu had given them a chance, but they weren’t rare.

Shi Yu asked them if there were any pets that knew superalloy, but they said no.

Then he decided to talk when they knew more.

After the Mechanical Conference, Shi Yu basically handed over the mechanical phantom beast technology.

However, without the help of Baby Ginseng, Dong Huang would probably have to digest it for a while. Shi Yu and the others were the most comfortable with the mechanical phantom beast system. If others used it, they would have to spend more effort.

Among them, the revived mechanical phantom beasts on Shi Yu’s side had also been thrown to the Mechanic class of Ancient Capital University to study, leaving only a mechanical Tyrant Dragon.

In other words, the guy they personally created at the start with Eleven’s hardening substance.

After all, Ling still had to continue researching the Mythical mechanical phantom beast. There had to be one to experiment with as the little white mouse. The mechanical Tyrant Dragon had already been used, so it would continue to stay in the dragon enclosure in the ruins space.

At the moment, Shi Yu had already successfully joined the fourth bureau and obtained the mechanical index. Moreover, he had also obtained 5 billion+5 billion in resources.

Among them, 5 billion was used by the Dong Huang Association to nurture Shi Yu. The other 5 billion was the mechanical materials funds of the Mechanical Bureau. It was specially prepared for Shi Yu, the winner of the Mechanical Conference’s Gold Award.

The day Shi Yu obtained it, he spent it all. According to Ling’s request, he exchanged for three Hundred Transformations Stones (Wind) and two billion mechanical materials to upgrade Ling.

This was what Ling deserved. After all, it had contributed greatly to the research system of the mechanical phantom beast. Apart from that, Baby Ginseng also contributed greatly. However, its reward was a legendary resource. It was the legendary resource of the Sequence ranking that Shi Yu had always wanted to apply for in advance. With President Lin's nod, it was successfully applied.

Chapter 554: About the Top Four of the Sequence Becoming My Bodyguard (5)

Although... The effect was a little unsatisfactory.

However, Shi Yu also knew that legendary resources relied purely on luck. There was nothing to choose from.

For example, Eleven's legendary resource. He originally wanted a legendary metal-element resource to strengthen life or energy, but in the end, it gave him a metal-element and lightning-element resource that could strengthen the physique and have a chance of awakening the white lightning.

On Baby Ginseng's side, what Shi Yu wanted the most was earth-element and light-element resources that contained the power of mutation stimulation. Of course, time-element resources were definitely better, but it was impossible for there to be. In the end, on the association's side, there was only one earth-element legendary resource to increase life force for Shi Yu to choose from.

< Name > Divine Earth of Life

[Attributes]: Earth

[Level]: Level 9 (Legendary-level)

< Introduction > It's a soil that contains strong life force. Even if an ordinary tree is planted on it, it might bear a Fruit of Life after a long time.

Obviously, what Shi Yu obtained was an earth-element resource that increased life force. It was definitely useless for Baby Ginseng's mutation and evolution. Of course, it didn't mean that it was useless for Baby Ginseng. It was just like Eleven's situation last time. The association was still very kind. This resource was also very suitable for Baby Ginseng.

After all, supplement races relied on vitality and energy.

His ginseng baby had the source of life skill, and the source of life was a physique skill. Its proficiency could be increased by absorbing life resources. With this divine earth of life, it was estimated that without Shi Yu adding points, after completely absorbing it, it could directly let the proficiency level of the source of life reach perfect level. Apart from that, its own life attributes would also undergo a qualitative change.

Shi Yu thought about it and felt that it was not bad. After all, after Baby Ginseng's vitality increased, it would be easier for him to add points. After contracting an overlord pet, its endurance would also be higher.

This legendary resource could be used!

As for the evolution resources, he would talk about it in the future. Perhaps when he went to the Phoenix Race's mystic realm on the seven islands, he could casually find them and pick them up.

Apart from that, the association also gave an additional legendary resource. To be precise, it was distributed to the Environmental Protection Department and specially given to Susu. It looked like this World Tournament was really unusual. The association directly accelerated the cultivation progress.

< Name > Cold Sky Drop

[Attributes]: Water, Ice

[Level]: Level 9 (Legendary-level)

< Introduction > It can give second attributes to water and ice-element pets and strengthen the attributes of water and ice-element pets to the limit.

It was still a relatively ordinary resource. It was considered a strengthening-type resource, but it was better than nothing. In any case, it was just a monarch breaking through to overlord. It didn't need any good resources. It was already not bad if it was useful.

After all, in the entire world, there shouldn't be many Beast Tamers who would give their pets a legendary resource to lay the foundation for them when they broke through to the overlord level at the monarch level.

At this point, Eleven's Aurora Magnetic Gold, Buggy's Green Sky Divine Dragon Ball, Baby Ginseng's Divine Earth of Life, Chi Tong's Bone Sword, and Susu's Cold Sky Droplet were all in place.

As for Ling, it had the fourth bureau index, the Wind Kirin fossil, three Hundred Transformations Stones, two billion top-notch mechanical materials, and the fourth bureau mechanical materials warehouse.

For Mechanics, knowledge was a resource. If Ling could fuse with the Wind Kirin fossil and quickly develop a Mythical Phantom, this wouldn't be inferior to any legendary resource.

In addition, just as Grandma Li had said, there was also a Mythical fossil in the Dong Huang Resource Bank, but it was said that its race was unknown. It only had the power of a god. Shi Yu didn't want this fossil, but left it for the third, fourth, and eleventh bureau.

This was an opportunity for the three bureaus to work for him.

After all, Ling couldn't study the two Mythical fossils either. And if they were placed over there, there would be a bunch of legendary Mechanics in the fourth bureau to help study the Mythical Beast. After the progress was out, they could also share the knowledge with Ling. This way, Shi Yu didn't believe that Ling couldn't make huge progress in a short period of time.

Now, Shi Yu could be said to be rich.

He returned to Ancient Capital University and planned to continue his seclusion to increase his points while waiting to go to the seven islands. However, just as he returned, the gem cat came looking for him.

" ~" The gem cat looked at the rich Shi Yu in front of it and drooled. Damn it.

“How’s the matter we talked about last time? How is it?”

“Let’s form a company together and earn big money!!”

“You’re in charge of contributing, I’m in charge of bringing the goods.”

“The company’s name will be Shi Yi Group. It suits your and Eleven’s names.”

Shi Yu glanced at the gem cat in front of him and shook his head. “There’s no need. I don’t lack money for the time being. Let’s talk about it after the world competition.”

The gem cat: ???

Why didn’t he keep his word!

“How much can a level-five or six resource be sold for? It’s even difficult for Eleven and the others to accumulate a legendary resource after tiring themselves out. Why don’t we wait until the world competition and they break through to the overlord level? It’ll be easy to earn.” Shi Yu smiled and said, “Moreover, Teacher Cat, prepare yourself. We’ll go to the Phoenix Race mystic realm mentioned by the Undying Dark Phoenix later. It’s said that Mythical and legendary resources are everywhere. Isn’t this faster than selling resources!”

The gem cat was angry. Then, its entire body went limp. Forget it, it made sense.

“Right, right?” Shi Yu chuckled. Who knew that he would become rich so quickly after the Mechanical Conference? If he had the time, he should let his pets train their willpower more. He wondered if he could get the overlord’s will before the world competition.

However, he could take the time to create some, but not to sell them. For example, he could get some skill water drops and give them to Senior Lu to increase her strength.

It was already very obvious now. The core of this world competition was clearly him and Senior Lu, the two archeologists. They were fifth and sixth in the Sequence. As for the four legends in the top four of the Sequence, they were just bodyguards who explored the Mythical Ruins.

Archeologists were indeed a good profession. The top four of the Sequence became his bodyguards!

Chapter 55: The Three Armies Under Shi Yu (1)

March 14.

A day after the Mechanical Conference ended, Shi Yu had already started his “leisure” life at Ancient Capital University again.

It wasn’t attending class or anything. It was just adding points and resting...

Of course, with the memory water drop, Shi Yu was no longer afraid of the exam.

Even Fang Lan could perfectly self-study all the classes in high school+first year and second year in just two months, let alone him.

However, if he wanted to learn, what he, Baby Ginseng, and Ling should learn now should also be transcendent biological knowledge and world history from abroad.

After all, it wouldn't be long before they had to leave Dong Huang and train abroad.

Now, Shi Yu had already advanced to his second year.

Perhaps Ancient Capital University knew that it was impossible to expect Shi Yu to attend normal classes and graduate, so they directly awarded Shi Yu the title of doctorate in archeology, Feeding, and Mechanical Science.

Wasn't that enough!

Moreover, who dared to question the value of these titles? The country had already verified it immediately!

From now on, Lu Qingyi wasn't the only genius archeologist under the age of 30 in Ancient Capital University. There was also Dr. Shi Yu, who was proficient in archeology, feeding, and machinery.

Apart from that, there was a larger change that had been decided a long time ago.

After the beast-eared girl, White Brook, and the other older students graduated, the battle department of Ancient Capital University was completely "out of stock".

Apart from Shi Yu, there was actually no master-level student.

After school started, Shi Yu was forced to become the president of the battle club and the captain of the school team.

Although it was only in name, and Shi Yu had never paid attention to that side, this wasn't for the long term. Shi Yu still hoped that his juniors and seniors could stand up quickly.

However, this situation should improve quickly. After all, the education funds of Ancient Capital University this year were really a lot. It should be easy to pile up one or two more masters.

Shi Yu recommended more resources to nurture the Dragon Tamer Yu Shu, the Spirit Medium Wang Ling, the Gu Master Miao Dongdong, the Elemental Envoy Zhang Qianyi, and the other second-year students who participated in the same vocation assessment as him.

There was also the first-year genius new student of An Chang's batch. This way, the older students wouldn't graduate just as they finished nurturing them.

Of course, Shi Yu didn't care if the school listened to his suggestion. He just wanted to increase his points quickly.

At the same time, Shi Yu also entrusted the gem cat to him to buy various resources, such as high-level water-element energy crystals, wood-element energy crystals, and life supplements.

These were all necessities to increase points.

The additional points of a super skill, be it Shi Yu, Baby Ginseng, or Susu, would all fall to the extreme.

Although they could slowly recover by relying on natural recovery, this required a lot of time and a suitable environment.

The efficiency was completely not faster than directly using resources and supplements.

Shi Yu looked at the five billion in his pocket and felt that it was useless to leave it there. It was better to use resources to increase efficiency. After all, there were only eight months left in the world competition. There was no time for them to slowly go to various places with abundant natural energy to spend a lot of time recovering natural energy.

After returning to his leisurely life, Shi Yu continued to add points to Eleven.

At the moment, Eleven still had three skills that weren't expert level: Space Quake, Lightning Rod, and Undying Golden Body.

Shi Yu chose to add the Undying Golden Body first. After the Undying Golden Body reached expert level, the changes would be very huge.

If it was said that the entry-level Undying Golden Body converted 10% of the damage into vitality, then the expert-level Undying Golden Body converted 25% of the damage into vitality, allowing Eleven's endurance to become even fiercer.

After adding another point to Eleven and increasing the Undying Golden Body from (Proficient) to (Proficient+1), Shi Yu used all the supplements he could use, the treatment of the ginseng baby, and the purification of Susu. The cooldown was finally reduced to 48 hours and no longer changed.

These 48 hours were no longer physical factors. There were also side effects of mental, life, and time corrosion.

Whether it was Eleven or Shi Yu, the additional points of super skills had a huge impact on their bodies and minds. If not for Susu, they would probably really be reduced to slaves of power like the warning in the index.

"Wuu..." After adding points, Eleven lay on the ground tiredly.

"Hu..." Shi Yu, Baby Ginseng, Susu, and the others also lay down tiredly.

After adding points, the entire team rose to the sky.

Judging from the current increase in points, if he continued to increase points in the World Tournament now, he should be able to catch up. At that time, he still had the ability to fight those overlords.

As for how far it could reach, it still depended on the experience after obtaining the first overlord-level pet.

Although Shi Yu judged that with his level-six space and current physique, it shouldn't be a problem to contract an overlord-level pet above his level, if it was two or three, it would probably be a big problem.

Therefore, he wanted to see how many overlords his physique could withstand.

If he could become an overlord, why would he be afraid of the world competition?

Of course, this situation was probably very difficult to achieve.

However, even if there were only one or two, Shi Yu believed that no matter which one it was, as long as Eleven and the others stepped into the overlord level, they would be outstanding among ordinary overlords. Their battle power would even be comparable to top-notch overlords. It was not a problem for them to fight alone.

After a short rest for the entire team, Shi Yu left the ruins space. He had to combine adding points and relaxing so that he could be in a better state to add points in the next round.

Chapter 556: The Three Armies Under Shi Yu (2)

During the break, Shi Yu chose to head to the Ancient Capital's Undead Battlefield and bring Chi Tong and Susu to kill the undead and cleanse them to relieve the pressure!

If he wanted to reduce the cooldown now, he didn't rely on supplements or purification. Instead, he had to make his heart happy in order to effectively sublimate his state.

What could make him happy?

Shi Yu thought for a long time. Apart from eating and drinking, probably only resources, cracking history, and showing off himself could do the trick.

Therefore, Shi Yu chose to come to the Undead Battlefield and transform into "Sword God Shi Yu". He wanted to experience the thrill of punishing demons and killing ghosts to relieve his boredom.

...

Ancient Capital, Undead Battlefield, stationed army.

Commander Xu, Master Xu Kai, guarded here day after day, working diligently every day.

It couldn't be helped. A few months ago, the top-notch totem here, the Undying Dark Phoenix, had just "gone berserk" once. The entire ancient capital was under a lot of pressure.

The undead riot was a small matter. If the Undying Dark Phoenix came out, it would be over!

And all of this started from a student...

"Dr. Shi Yu', why are you here again? Don't tell me you want to enter the Undead Battlefield? This isn't fun!!"

Today, Commander Xu received a kid who often gave him nightmares. When he saw Shi Yu visit, his face immediately turned bitter and his mood was unstable.

"Aha, Instructor Xu, long time no see."

Shi Yu looked at Commander Xu, who was in charge of their "Heroic Spirit Ruins" training, in embarrassment.

“You’re right. I’m just going in to take a look. It’ll be fine. Now, the entire Undead Battlefield has been locked onto.” Not only was it locked onto by the gem cat, but it was also locked onto by the mechanical intelligence of the reincarnation of the divine source legend.

“What?” If Shi Yu wanted to enter, Xu Kai naturally couldn’t stop him. However, what did Shi Yu mean?

“In a while, Dong Huang will have a higher-level defense force coming here. You should be able to receive the news soon, I’m just revealing it to you in advance,” Shi Yu said.

He wanted to explore the Phoenix Mystic Realm on the seven islands. In order to prevent any connection between the two, he definitely had to strictly control the Undead Battlefield.

“What happened?” Master Xu Kai’s expression turned cold.

“It’s not a big deal,” Shi Yu said. “By the way, when I just came over, I realized that the new students of Ancient Capital University are training in the heroic spirit ruins over there again, right?”

Initially, he wanted to go in directly, but because of an unexpected discovery, he came to see Master Xu.

“Yeah, there are many good seedlings in Ancient Capital University this year. If we don’t count you, the quality is even higher than the newbies last year,” Master Xu Kai said as he looked at the monster, Shi Yu.

“There’s a student called An Chang, right? Has he obtained the recognition of the heroic spirit?” Shi Yu asked.

“Yes, this year’s top scholar of the Ancient Capital. However, he hasn’t ascended the altar yet, but it shouldn’t be difficult for him to obtain the recognition of the heroic spirit later on,” Master Xu said. “This kid’s performance in the vocation assessment this year is even more exaggerated than yours!!”

The opponent in second place was directly insta-killed by An Chang in the fusion state of the flood dragon. It was too exaggerated.

Another super genius.

“I see. Then train him hard during the military training. Don’t hold back.”

“Uh.” Master Xu Kai looked at Shi Yu. They had a grudge?

“I nurtured him. I’ve invested a lot of resources in him, so it’s always good to experience some training.” Shi Yu chuckled.

It was normal to be strong. Hundreds of millions of investment funds, a pile of level-seven resources! At the start, even he himself only had ten million.

If An Chang couldn’t become a legend, Shi Yu would feel that he had suffered a huge loss. Although he had also obtained two family heirlooms from him... he definitely hoped that An Chang could successfully grow up.

“What, you nurtured him??? What do you mean?” Master Xu Kai was shocked. What was going on?

You're only a f*cking second-year student. Don't tell me you took in a first-year disciple... Although, Shi Yu can't be treated as a normal student...

The number one person below the legendary level.

This title made Master Xu understand that Shi Yu's current battle power could easily kill him.

"It's good that you know... Just help train on the highest scale." Shi Yu scratched his cheek. If An Chang grew up quickly, he could get rid of his lousy position of president of the battle club that he couldn't get any benefits from.

"Set more tests for him. After it's over, help me give this to him."

Shi Yu took out a drop of "Buggy Silk Memory Crystal" in a water bottle. It was An Chang's second pet. He had contracted the Green Silkworm given by Ancient Capital University that had mastered the transcendent Worm Silk. According to Shi Yu's understanding, the worm had yet to evolve, so this thing seemed to be useful.

"Alright..." Master Xu Kai was stunned before nodding.

"Thank you," Shi Yu said with a smile.

It was pretty good to have a top-notch master like Xu Kai helping with the military training for a while.

"By the way, I also brought you tea!"

Shi Yu took out a bottle of special fruit tea brewed by Baby Ginseng and drank it happily with Commander Xu as a reward.

This thing was very nourishing to middle-aged men.

...

After chatting with Commander Xu, Shi Yu stood on the ancient capital city wall and prepared to enter the Undead Battlefield to kill monsters to relieve the pressure.

But at this moment, his cell phone suddenly rang.

It was Lin Xiuzhu.

Shi Yu was stunned. The call went through. Lin Xiuzhu saw that Shi Yu had picked up the call and said in surprise, "Are you busy?"

"I'm already done."

"That's good." Lin Xiuzhu heaved a sigh of relief.

Two days ago, she naturally paid attention to the Mechanical Conference, but she was worried that Shi Yu would be very busy at this time, so she didn't disturb him.

Chapter 557: The Three Armies Under Shi Yu (3)

She only called after the Mechanical Conference ended.

“Senior Lin, what’s wrong?” Shi Yu smiled.

He was just about to look for Senior Lin after killing the monsters when the other party called first.

“I’ve seen the Mechanical Conference. How did you develop a mechanical phantom beast? It’s too powerful.” Lin Xiuzhu was very excited.

“I was lucky, I was lucky,” Shi Yu said.

“Well, I want to ask if it can revive the fossil of the iron-eating beast ancestor!!” Lin Xiuzhu said excitedly.

“I remember that the Iron-eating Beast ancestor appeared ten million years ago in the totem era, right!”

Shi Yu was stunned. As expected, Senior Panda was still thinking about pandas.

Shi Yu said helplessly, “We indeed have the fossil of the Iron-eating Beast ancestor here, but the Iron-eating Beast ancestor is just a very ordinary bear-type carnivorous transcendent creature. It’s not even metal-element. It only evolved into metal-element later. There’s no research value.”

“The true stage of the Iron-eating Beast race’s development was when a certain faction developed an evolution form through Yun An and various special metals thousands of years ago.”

Even Emperor Wu only inherited the evolution system of the mysterious faction in that totem era.

Unfortunately, at this time, no iron-eating beast fossils were born. Moreover, after Emperor Wu Dynasty, the iron-eating beasts seemed to have been wiped out, producing history and inheritance gaps, and their numbers decreased greatly.

“Wow.” When the panda senior heard this news, she was immediately worried.

No.

She had waited for nothing.

“Alright... By the way, I broke through to the master level.” After complaining, Lin Xiuzhu immediately reported the good news to Shi Yu.

In the beginning, Lin Xiuzhu was only a high-level Beast Tamer. Because she was in the Feeding specialization, she didn’t care much about cultivation. Her chances of breaking through to the master level weren’t high in the short term. However, as the Iron-eating Beast’s status rose, the Lin family rose from the richest family in Ping Cheng to the richest family in Icefield City. The Lin family had more resources to nurture heirs.

Senior Lin directly used a pile of cultivation resources to reach the master level.

“Really?” Shi Yu was stunned and immediately congratulated her. Then, he asked, “Senior, where are you now? I have a gift for you.”

“Gift? What is it?” Lin Xiuzhu was curious.

“The level of hardening that can allow your Iron-eating Beast to have a huge increase in resources again. After using this, you should be able to let it complete its evolution. At that time, your metal-element strengthening talent and nurturing method, together with the Nine Li Battle Beast of a high-level monarch race, will make you even more powerful.” Shi Yu smiled.

Hardening Memory Water!

Although when they were together, Eleven would help Senior Lin’s Iron-eating Beast increase its hardening level whenever it was free, it was still too slow. However, now that he had the memory water drop, the speed could increase greatly.

On the other side, Lin Xiuzhu was stunned before being pleasantly surprised.

The reason why she was already at the master level and wasn’t in a hurry to let the Iron-eating Beast evolve was firstly because she wanted to save more money to buy evolution materials. Secondly, because the skill level of her Iron-eating Beast had yet to reach the limit Shi Yu mentioned.

“I’m not in Ping Cheng now. I’m in Wu Ling City, not very far from the ancient capital. Why don’t I go find you?” Lin Xiuzhu said.

“Eh? What are you doing in Wu Ling City?”

Lin Xiuzhu said, “Iron-eating Beast Corps.”

“The Iron-eating Beast Corps has already started to form. It has officially become one of the seven new pet armies supported by Dong Huang this year. My father is Commander, and Junior White Brook is Deputy Commander. Oh right, she has also contracted an Iron-eating Beast. It’s also a royal. After fusing, it’s very cute.”

“And I’m the chief feeder of the Iron-eating Beast Corps.”

“By the way, by the way, one of the seven new pet armies Dong Huang is supporting this year is related to you. It’s the Green Silkworm Army. Well... To be precise, it’s the Green Silkworm cocoon army. Legend Hua Xiajin is the commander, and Dr. Zuo Jiangyun is the chief feeder.”

“These two armies are both under your command, although I don’t know how the Beast Tamer Troops arranged it...”

“This...” Shi Yu held the phone with a surprised expression.

“Belong to me? Why didn’t I know... Forget it, I’ll ask later.”

Was someone deliberately letting him enter the military?

It seemed normal. He still had a general position in Dragon Palace City.

However, compared to the person in charge of the Green Silkworm cocoon army, the person in charge of the Iron-eating Beast Corps was a little low.

Well... That made sense. This was still normal. After all, the Green Silkworm cocoon system had been perfected, and it could definitely form battle power.

As for the Iron-eating Beast Corps, it was at most an investment at the current stage. After all, the evolution materials were too expensive, and Yun An had yet to be caught. It was better to use the Green Silkworm cocoon army.

“But I feel... from the current situation...” Senior Lin said, “Why do I feel that the country will add another mechanical phantom beast army to the pet army that is heavily supported this year...”

She had a strange expression. At that time, Shi Yu would be the commander-in-chief of the three armies?

“Haha, if that’s the case, that’s interesting,” Shi Yu said.

In Dong Huang, the overall weight of the Beast Tamer Troops was even higher than Division 13. They were the core power to protect Dong Huang. If a war happened, they would definitely be at the front line.

Back then, if it weren’t for the orphan benefits and the successful loan to buy the Iron-eating Beast, Shi Yu might have joined the army and waited to be assigned pets.

However, although he didn’t successfully join the army, Shi Yu was also very emotional because he had given birth to three special soldiers.

The Iron-eating Beast Army, the Green Silkworm cocoon Army, and the mechanical phantom beast army.

“I’ll look for you later. I want to see what this Iron-eating Beast Army looks like,” Shi Yu said.

“Alright ~ Then you have to come and let Eleven teach them a lesson. Let them know how to work hard like the three little Iron-eating Beasts of Ancient Capital University.” Lin Xiuzhu had a headache. “Soon, there’s still the New Recruit Tournament. In their state, I feel that they will definitely be last.”

“Alright.” Shi Yu smiled. Wasn’t it just a mental seal?

Let Eleven use max-level deterrence to wash their minds and immediately become a hardworking panda.

As the future national treasure army, its thinking couldn’t fall. Moreover, this army was still under his name, so they couldn’t drag him down.

Chapter 558: Changing Fate (1)

Ancient Capital, Undead Battlefield.

A young man holding a longsword cut the undead one by one.

After cutting fodder for a while, Shi Yu heaved a sigh of relief. He felt that the pressure had been lifted, but not completely.

He held the spatial sword that combined hardening and space vibration and felt that being strong was lonely.

In the end, the opponent was still too lousy.

At this moment, Shi Yu's weapon was updated again.

Because the Ice Dragon Blade was swallowed by Susu, it was useless and thrown away.

As the lightning was not easy to control, Shi Yu often electrocuted himself. He was not used to it and threw it away.

This longsword was actually not very useful.

It was mainly because the rebound of space was not small. Every time he slashed, Shi Yu would feel dizzy.

If it was used too many times, it would be like motion sickness.

Shi Yu directly stabbed it into the ground and buried it deeply. He didn't want it anymore. He would give it to a fated person. In any case, the shelf life wasn't long.

"Jiu ~ ~"

Beside him, a dark blue little sparrow with flaming tail feathers was also chattering unhappily.

Too weak, too weak. Not only did Shi Yu not slash them to his heart's content, but it also did not burn them to its heart's content.

There was no increase in proficiency at all...

At the moment, Chi Tong should be the pet with the highest proficiency in super skills in the team...

Its Interlocking Sword and Spirit Release skills were about the same (Expert+5). It was normal that they couldn't increase.

The former was due to the fact it had digested the Gemini Silver Armor, and the latter was because it had swallowed the soul pearl of the overlord of the Undying Race...

"It can't be helped. The powerful undead were either killed by the Undying Dark Phoenix last time or hid and didn't dare to come out..." Shi Yu shrugged and looked at Little Chi Tong.

Chi Tong: QAQ!!

"Ning!!!" Shi Yu and Chi Tong were not very happy, but Susu, who was beside them, was very happy.

The Undead Battlefield was a place filled with curses and plagues. It was very relaxing to cleanse it.

He just hated that he was too weak and couldn't cleanse it perfectly.

Although it had purified a large area of flawless land along the way, it would probably be corroded by plague and curses soon after leaving.

Purification was not easy. Susu sighed.

It shook its ice-blue body with the frost crown. After its excitement was endless loneliness.

Now, Chi Tong and Susu looked a little strange.

For example, Chi Tong had changed from the bird spirit form of the orange-red sun to the bird spirit form of the blue ghost fire.

Susu, on the other hand, changed from its jelly-like water slime form to the form of the Ice Slime King with a frost crown.

This was a new form that Shi Yu had recently developed for them.

The principle was also very simple.

Chi Tong's bird spirit form was originally mainly to release the power of the sun. Then, as long as it restrained and suppressed the power of the sun and used the Nether Cold Fire as the power displayed, its appearance would naturally change.

Be it undead or elemental life forms, it was quite easy to change their appearance.

As for Susu, it was because it had stored the Cold Sky Water in its body.

Although it had yet to devour it, this legendary resource had also given it a second attribute, ice.

In addition, it had mastered the Dao Proficiency Blizzard, the expert level Water Element Control, and ice water. It was very simple to change its elemental form into an Ice Slime.

Even the index could be deceived.

In fact, it wasn't a lie. Susu, who was now a middle-level overlord race, was no longer a water slime. It was just that it had been maintaining its water slime form previously.

In fact, it wasn't a lie. Susu, who was now a middle-level overlord race, was no longer a water slime. It was just that it had been maintaining its water slime form previously.

Soon, he would be going abroad. Shi Yu naturally chose to listen to President Lin's suggestion and decided to change their image.

As for himself, he just had to change his clothes a little with white hair.

Apart from him, the pets also had to change appearance and appear in a new manner.

This way, not many people could recognize him.

Chi Tong often appeared in the form of a sword spirit. Very few people had seen it in the form of a bird spirit. Moreover, its strength system had changed from the Sun Flame that countered undead to a pure ghost fire. Its image and aura had changed drastically, and it was impossible for anyone to recognize it.

As for Susu, it went from an ordinary Water Slime to the Ice Slime King. It also looked brand new.

Apart from that, Ling knew the Hundred Transformations skill. After completing its evolution, it would also look new.

On this trip abroad, Shi Yu planned to use the three of them as the main force so as to train these three. As for Eleven, Buggy, and Baby Ginseng, he would seal them first.

Compared to Chi Tong, Susu, and Ling... Eleven, Buggy, and Baby Ginseng were more representative.

Moreover, according to the order of adding points, the three of them were also the first to add points. They just had to wait for the automatic upgrade in the ruins, but there was no need for training.

“Roar!!! (I am the overlord of the earth!!!)”

Of course, apart from the few of them, Shi Yu also had a burden.

It was a Tyrant Dragon cub nearly two meters tall.

< Name > Mechanical Tyrant Dragon

[Attributes]: Machinery, Earth

[Race Level]: Low-level overlord

[Level of Growth]: Transcendent

[Race Skill]: Basic Intelligence (Intermediate Mechanic Skill, Entry), Space Splitting Sword (High-level Earth Skill, Entry), Earth Domain (Earth Super Skill, Entry), Earthquake (Earth Super Skill, Entry)

Energy Points: 7116

It held a long rock sword in each of its short hands, playing the dual-blade style.

This was the Tyrant Dragon that Shi Yu, Ling, and the others had been experimenting with. At this moment, its form was no different from that of a normal Tyrant Dragon cub.

The excess mechanical modifications were all taken down by Ling, and the skills such as lightning and storage lightning were naturally forgotten.

Chapter 559: Changing Fate (2)

The reason why they did this was because Ling and the others realized that it was not easy for the modified body to recall its previous skills.

However, even if it abandoned the equipment other than the smart chip, the mechanical Tyrant Dragon only awakened the Space Splitting Sword, an earth-element skill that increased the damage to flying pets.

Tyrant dragons like the overlord aura, brute force, and desolate body... Because its body was essentially an illusion and not a physical body, it couldn't successfully recall it at the moment.

“The data collection is complete,” the white-haired loli on the green Rubik's Cube screen said crisply beside the mechanical Tyrant Dragon.

< Name > Ling

[Attributes]: Machinery, Wind

[Race Level]: High-level monarch (Quasi overlord)

[Level of Growth]: Monarch Level

[Race Skill]

“Advanced”: Hundred Transformations (Dao Proficiency), Advanced Intelligence (Dao Proficiency)

“Super Level”: Wind Element Control (Expert)

[Teaching Skill]

[Intermediate]: Super Sight (transcendent)

“Advanced”: Clone (transcendent), Multiplication (transcendent), Absolute Sleep (transcendent), Deterrence (transcendent), Loading (transcendent), Mechanical Space (transcendent)

Energy Points: 3,610,000

!!!

After using the three new wind-element Hundred Transformations Stones to upgrade himself, Ling successfully broke through to the monarch level and improved her all-round qualities.

The greatest change was the Wind Element Control skill. Because of the lead of the Wind-element Hundred Transformations Stone, it had reached expert level.

At this moment, there was actually a large amount of mechanical materials left in the ruins space. Ling planned to use them to modify the loading and mechanical space into racial skills. Apart from that, he also had to use those mechanical materials to study the Wind Kirin fossil and the mecha form. These were not things that could be completed in a short period of time.

“Then let’s stop here. We’ll go to Wu Ling City.” Shi Yu stretched.

Don’t let Senior Panda wait too long.

“Also, when are you going to upgrade its intelligence? Its basic intelligence doesn’t look very smart...” Shi Yu said.

The mechanical Tyrant Dragon widened its eyes.

Ling shook his head crazily and said, “If it’s too smart, it won’t cooperate with my research.”

“Next, I plan to evolve it into an ‘earth-element dragon’! This is a very important experimental process before fusing with the Wind Kirin fossil.”

The mechanical Tyrant Dragon still widened its eyes.

“Roar! (Is that... still the overlord of the earth?)”

Ling comforted it and said, “Don’t worry, I won’t give you wings.”

The mechanical Tyrant Dragon roared happily.

Change, change. When it became stronger and stronger, it would take back all the pressure it had suffered these days!!

Let Shi Yu and the others understand who the real king was!

The mechanical Tyrant Dragon immediately imagined the scene of it ascending to the throne and commanding the Iron-eating Beast Army to dominate the ground under the respectful expressions of Buggy, Baby Ginseng, and Shi Yu.

“Roar...” The Tyrant Dragon continued to roar.

Shi Yu, Chi Tong, Susu, and Ling frowned. Compared to high-level intelligence, basic intelligence was indeed inferior.

This was all Shi Yu’s fault. In the beginning, he didn’t have the money to get high-level intelligence and only gave it basic intelligence...

....

As Shi Yu headed to Wu Ling City, he called Principal Feng.

In Ancient Capital University, the busy Principal Feng was stunned. In fact, he was a little afraid of Shi Yu’s call, afraid that he would accidentally cause trouble again... Fortunately, it was just a question this time.

“Principal Feng, what’s going on with the Iron-eating Beast Army and the Green Silkworm cocoon army? I heard they’re under my name?” Shi Yu’s curious voice came from the other side.

“Yes, it was appointed by you when you were cultivating in the Space Emperor Ruins. Be it the Iron-eating Beast Army or the Green Silkworm cocoon army, they’re all related to you. In the end, they will all belong to the Dong Huang Environmental Protection Department. They’re in charge of the ecological protection of the Dong Huang Sea, the Continent, and the Space Regions.”

“I see. In other words, Legend Hua, a legendary Beast Tamer, is also my subordinate??” Shi Yu was slightly shocked, but he suddenly felt that something was wrong.

“Sort of... Legend Hua is very interested in the Green Silkworm cocoon system.”

“Apart from these two legions, it’s said that under Dr. Mei’s suggestion, the Mechanical Beast Army is also about to be established. General Xiao Qin is the commander and chief Mechanic, who is also under your Environmental Protection Department.”

“I heard from Dr. Mei that your Environmental Protection Department is idle. General Xiao Qin and the other two members have nothing to do all day. Why don’t you train your soldiers and strengthen the foundation of the Environmental Protection Department?”

“If you’re free, you can take the time to give guidance. After all, if this kind of heavily supported new recruits want to fight for more military funds, it still depends on actual results and battle power.”

“You should be very good at guiding iron-eating beasts, green cocoons, and mechanical phantom beasts. After all, you were the one who created them.”

“For example, the current first-rank Ye Xing’s ‘Star Army’ has won the honor of being the number one unit in the army for three consecutive years. It’s also because he’s number one in the army’s martial arts competition and the army he brought is the number one in the army that he’s so strong. They’re all invisible resources!”

“Cough, cough, cough. Of course, I also know that you’re not free. I was just saying.” Principal Feng laughed. At the moment, it was more important for Shi Yu to increase his strength as soon as possible.

After all, President Lin had already appointed Shi Yu and Lu Qingyi to participate in the world competition. Principal Feng could only sigh and express his support.

Chapter 560: Changing Fate (3)

“Ah...” Shi Yu also sighed and asked, “Have you confirmed the specific departure time of the seven islands exchange team?”

“It’s about half a month later. After all, going out requires a lot of manpower and financial resources. During this period, we definitely have to prepare more transaction materials. By the way, the reason why the establishment of the Iron-eating Beast Corps is on the right track this time is also because the Dong Huang exchange team bought a lot of first-stage evolution materials for the Iron-eating Beast in other countries. Unfortunately, the second-stage evolution metal needed to carve inscriptions was only found with a piece of Divine Space Iron. You don’t need it.”

Shi Yu indeed had no use for the Divine Space Iron, a level-eight material that was used to awaken the Space Quake skill.

After being stunned, Shi Yu said regretfully, “Looks like the path is completely cut off.”

He still had to study it himself.

“Principal Feng, I’m hanging up first. I’ve arrived.”

“Huh??? Aren’t you at Ancient Capital University? Where did you go!” Principal Feng asked.

“Wu Ling City, came to take a look at the Iron-eating Beast Corps. Before going abroad, I’ll give them some pointers. Perhaps they’ll be first in the army competition.”

Principal Feng: “?”

....

At the same time that Shi Yu arrived at Wu Ling City, the Iron-eating Beast Corps recruits from all over the country also gathered in the new recruit camp outside Emperor Wu Ruins.

There were more than 1,000 people in the entire team. All of them had contracted Iron-eating beasts.

Among them, there were three master-level Beast Tamers. Commander Lin Hongnian contracted a monarch-level Nine Li Battle Beast, Deputy Commander White Brook contracted an awakened-level royal Iron-eating Beast cub, and Feeder Lin Xiuzhu contracted a commander-level Iron-eating Beast.

The remaining 1,000 ordinary soldiers all contracted transcendent Iron-eating Beasts. Those who didn’t reach commander rank. After all, the Iron-eating Beast’s race level was only transcendent. If it wanted its growth level to break through the racial restriction and reach commander rank, it wasn’t something that ordinary people could do in the short term.

In the new recruit camp, a female soldier in her twenties was looking for a place to stay.

Zhuang Yue.

Quasi professional Beast Tamer, Ping Cheng.

Because the Iron-eating Beast was too cute and its racial attributes were not bad, in addition to the discount for the locals of Ping Cheng, she chose the Iron-eating Beast as her initial pet.

However, the cultivation difficulty of the Iron-eating Beast was much higher than she imagined.

It took her a long time to nurture the Iron-eating Beast to the transcendent level and participate in this year's Icefield City vocation assessment.

Unfortunately, because her strength didn't meet the standard, she still couldn't pass.

Although the family didn't say anything, Zhuang Yue herself couldn't accept this outcome when she thought of the investment her family had made in her all these years.

Although she could still continue taking the exam next year, when she thought of her talent and the daily savings at home, Zhuang Yue understood that her future was already destined.

Choosing the Iron-eating Beast... was it the wrong choice?

If she had chosen other pets back then, would she have already passed the vocation assessment?

Along the way, Zhuang Yue had originally complained a few times in her heart. However, from the beginning to the end, there was a figure guiding her forward.

This person was Shi Yu.

That day, she and her friend passed by the public training ground and saw Chen Kai, a top student in her class, commanding his Ice-Armored Beast to fight a Beast Tamer who commanded iron-eating beasts.

That Iron-eating Beast was very strong. It instantly killed the "unhindered class" Ice-Armored Beast. The Iron-eating Beast's Beast Tamer also attracted her attention.

Soon after, she coincidentally went to the countryside with Shi Yu to carry out the association mission to eliminate the Earth Mice. She once again saw how extraordinary Shi Yu's Iron-eating Beast was. It was self-disciplined, hardworking, and powerful. If her Iron-eating Beast was also like this, how good would that be?

However, it was naturally impossible for pets to be completely the same. Zhuang Yue's situation didn't improve until...

The archeologist named Shi Yu became the top scholar of the vocation assessment in Ancient Capital and discovered the evolution of the iron-eating beast. Once this news was announced, it could be said to be a pleasant surprise for the Beast Tamers who contracted iron-eating beasts all over the country.

Iron-eating beasts had the evolution form of a monarch!!

After that, Zhuang Yue was filled with motivation again. Not only did she successfully reach level two, but the Iron-eating Beast was also cultivated to the transcendent level. During this period, Shi Yu

became the national champion and discovered that the Iron-eating Beast had undergone a second stage evolution. The information that the Iron-eating Beast suspected to be Emperor Wu's trump card battle pet had been dug up by Shi Yu, and they tried their best to encourage the Iron-eating Beast Tamers.

Unfortunately, under this motivation, Zhuang Yue still failed the vocation assessment even in a second-level city like Icefield City. She was discouraged again and realized the difference between Beast Tamers.

Even at this point, Zhuang Yue was actually still very grateful to Shi Yu. Because of Shi Yu's experience, the current rarity of the Iron-eating Beast had long exceeded that of a monarch pet cub. It was no longer something ordinary people could afford.

Not only did it require a large amount of money, but it also needed a recommendation spot. And these lucky people who had contracted iron-eating beasts very early were clearly lucky.

It was as if they had just bought a house cheaply and the property price immediately increased tenfold.

Now, Beast Tamers who had contracted iron-eating beasts, even if they were ordinary employees at the Iron-eating Beast Amusement Park in Ping Cheng, or if they had some acting talent and cooperated with the iron-eating beasts to perform some shows... They could get a pretty good salary.

Because of this, Zhuang Yue fell into deep thought. She wondered if she should recognize her ordinary self and not pursue illusory dreams. She might as well do an ordinary profession and subsidize her family, but at this moment, surprise came again.

The Iron-eating Beast Corps was established and recruited Beast Tamers under the age of 30 who had contracted Iron-eating Beasts.

As long as she joined the army, the benefits and treatment would correspond to high-level professional Beast Tamers. The country would cover the cost of cultivating the Iron-eating Beast!!!
