

## **Beast 651**

### **Chapter 651: Cultivation Results in Two Months (1)**

In the blink of an eye, two months had passed since Shi Yu returned from the seven islands.

For the past two months, Shi Yu had been in Ping Cheng and working overtime in Icefield City.

He cultivated wholeheartedly.

However, he didn't stop receiving information from the outside world.

During this period of time, Shi Yu was most concerned about the situation on the seven islands.

In the beginning, Dragon Palace City and Dong Huang had the absolute advantage in the negotiation.

The two parties still demanded from the seven islands according to the number of resources mentioned at the start.

Twenty legends, or two myths, and the right to explore the ruins mystic realm...

Until the legendary Valkyrie came out of seclusion and both parties engaged in a small-scale confrontation.

After a collision, Dragon Palace City and Dong Huang finally pulled back a bit.

After all, they still had to give the legendary level respect.

According to what Shi Yu understood, at that time, the Seven Islands Valkyrie was not at a disadvantage when staring down several totem dragons alone. She even had the upper hand. In order to avoid the conflict from escalating, Dragon Palace City and Dong Huang finally pulled back.

After all, the goal of both parties was only resources and not a war.

The conditions were so high because they were originally waiting for the seven islands to bargain.

However, after all, the seven islands had done something wrong. They still had to compensate.

However, the specific compensation had been discussed for two months. This made Shi Yu glad that he didn't stay there for long. Otherwise, he would have waited too long.

This kind of thing was indeed not something that could be negotiated in the short term.

It was as troublesome as when he applied for legendary resources.

The reason why they were still negotiating was that Dong Huang, the seven islands, and Dragon Palace City had currently placed their focus on investigating the Ke Yuan Financial Group and the totem faction behind it.

At the moment, the seven islands could basically confirm that the core higher-ups of the Ke Yuan Financial Group had betrayed the country and joined the totem country.

The reason was very simple. The core assets of the Ke Yuan Financial Group had long been secretly transferred.

This was not good news for the Seven Nation Alliance. Although the totem country had been plotting against the technological system of the seven countries for a long time, and this was not the first treason case, no matter what, the Keyuan Financial Group was still a super large financial group that started with technology in the seven islands.

For the other six countries, the betrayal of a large financial group of this scale was a wake-up call, making the seven countries supervise the forces in the country more strictly.

At the same time, Dong Huang understood that things weren't that simple this time because it involved a demigod, Yun An.

Of course, Shi Yu temporarily didn't have the energy or strength to interfere. His current priority was still to increase his strength and wait for the World Tournament to begin.

Now, there were still more than six months until the start of the world competition.

In Shi Yu's opinion, there was still plenty of time. This was because in the past two months, his strength and the strength of his pets had undergone a complete change. According to his current progress, he would definitely be invincible in another half a year.

Of course, apart from him, there were also some changes in the ranking of the Sequence battle, making Shi Yu very surprised.

There was no change in the top ten and top eight of the Sequence.

The top four were still those legends. The fifth was still him, the sixth was still Senior Lu, the seventh was still Ji Feng, and the eighth was Zheng Hai. However, the ninth and tenth were different.

Ning Tianming, this half ghost, as well as Tong Yan, the poison doctor of the Medical Bureau, were directly killed.

Heavenly King Zou became number nine.

Shi Yu didn't know what he had done. Perhaps he had pulled in an investment or had a fortuitous encounter. Every pet's strength had increased greatly.

The tenth became a guy that surprised Shi Yu. The fourth bureau, Gao Xuan.

Ever since Gao Xuan lost the National League, just like before, he still wasn't active in the Sequence battle. After being attacked by the Mechanical Conference, he was even less in the mood.

He didn't even appear when the Shen Feng exchange team came to Dong Huang, but in the past month, Gao Xuan had made a high-profile comeback.

Originally, according to his strength, it was not enough to enter the top ten of the Sequence if he couldn't use small forbidden weapons,

However, during this period, Gao Xuan might've been in seclusion. After coming out of seclusion, his Beast Taming level broke through from level five to level six. The strength of his awakening talent

increased, and his research ability increased. He even completed a new round of strengthening of his Ultimate Holy Dragon Beast.

In this ranking, he shocked the world and directly entered the top ten of the Sequence.

In terms of strength, it was even praised by the Beast Tamers on the Internet. It wasn't much worse than the number one person below the legend of the new generation of Shen Feng, Lun Di.

It could probably withstand a shot from Lu Bai.

This made Gao Xuan, who had just returned, fall silent again.

During this period, the most annoying thing was still Lu Bai. Lu Bai still didn't register for the Sequence Battle. This undoubtedly made the Beast Tamers on Dong Huang's side feel that it was a pity. It had been two months since they looked forward to Lu Bai vs Shi Yu, and there was still no news.

What they didn't know was that at this moment, today, Shi Yu and Lu Bai were finally going to fight...

....

In the ruins space, on the huge grassland, Shi Yu yawned. He looked at the pets that had become stronger after a round of points and smiled.

Eleven, Buggy, Baby Ginseng, Chi Tong, Susu, and Ling also looked at Shi Yu energetically.

"Alright, this round of points adding has already ended..."

"Two months have passed in the blink of an eye. More than half a year has passed since the last team meeting."

"After two months of adding points, you're almost on the same level. Why don't we hold another team meeting?"

## **Chapter 652: Cultivation Results in Two Months (2)**

"You haven't forgotten, right? Apart from Eleven, you all owe yourselves a championship because you enjoyed legendary resources in advance."

Six pets: !!!

"Wuu!" Eleven clenched its fists with fighting spirit. Its right arm waved and spun like a windmill.

Impossible. With it around, no one could think of getting first place in the team!

"Wait, wait!!" Buggy, Baby Ginseng, Chi Tong, and Susu all showed different expressions. As for Ling, it said excitedly, "Why did you call me over? Don't tell me you want me to participate too?"

Shi Yu was stunned. He looked at Ling and said, "What else?"

< Name > Ling

“Advanced Skill”: Hundred Transformations (Dao Proficiency), Advanced Intelligence (Dao Proficiency), Mechanical Space (Dao Proficiency), Loading (Dao Proficiency)

“Super Skill”: Wind Element Control (Expert), Divine Net (Expert), Turning Misfortune into Luck (Expert)

Energy Points: 4 million+

As for Ling, Shi Yu had finally taught it the “Divine Net” and “Turning Misfortune into Luck”.

However, this was not Ling’s greatest gain. Its greatest gain was that it completed its evolution through its own upgrade.

During this period, he turned the teaching skills “Divine Net”, “Machinery Space”, and “Loading” into racial skills.

In other words, Ling’s race level had also increased to an overlord race because it had two super racial skills.

Among them, because of the speciality of the “Divine Net” skill, its strength was comparable to a spatial skill. It was not a problem to say that Ling was a “medium-level overlord mechanical race”.

This was thanks to the powerful intelligent research and self-leveling ability of the Divine Net skill.

It was also because it had learned Divine Net that Ling could be busy with various research projects at the same time.

Otherwise, it would have to study the “Fusion Mecha”, the “Qilin Revival”, and the “Super Alloy Iron-eating Beast”. Even if it had full-level high-level intelligence, it wouldn’t be able to handle it.

At this moment, although Ling had yet to successfully fuse with the Kirin fossil and learn Mythical Revival, Ling’s mecha form already had a prototype.

It was just that he couldn’t fuse the power of the entire team yet. At most, he could perfectly fuse the power of the three parties like the sniper form at that time.

However, with the mechanical space and various equipment, in Shi Yu’s opinion, it was already considered initial battle power.

“No, no, no.” In the Rubik’s Cube, the white-haired loli shook her head crazily, resisting.

Although its strength had also improved greatly in the past two months, but...

It looked at Eleven, Buggy, Baby Ginseng, Chi Tong, and Susu and fell silent.

After its top-notch intelligence, expert level Divine Net skill analysis, its chances of winning against the five of them were below 0.1%...

Usually, as the team’s instructor, Ling would seriously supervise the training of every pet, like a big sister.

If it got last place in the team meeting, it probably wouldn’t be able to hold it in.

Its persona would directly collapse. Ling thought for a moment. It couldn’t fight!

It was very scientific for a good trainer to not be strong.

“I, I’ll be the judge!” Ling said quickly with a red face!

“Contestants: Eleven, Buggy, Baby Ginseng, Chi Tong, Susu.”

“It’s not that I don’t dare to fight, but that it’s boring.” Ling turned around, very nervous.

Its mecha form and its Kirin form had yet to be developed. There was not much meaning in participating in such a competition... It would talk about it in the future.

“Wu?” “Wuu...” “Yi...” “Mi!” “Ning?”

Not participating?

The other five looked at Ling with burning gazes, making its heart shiver.

“Then next time.” Shi Yu smiled.

Shi Yu and the others didn’t expose Ling’s thoughts.

Indeed, compared to the other five, Ling’s cultivation level was not very high. Shi Yu thought for a moment and decided to let it be the judge with him first.

“You’re not participating in the individual battle, but remember to participate in the team battle later,” Shi Yu added without allowing Ling to refuse.

Ling wanted to cry.

“Also, the second team meeting has to be updated to a certain extent compared to the first team meeting.”

“Apart from the team battle after the individual battle, I also plan to add a new system this time.”

Among the six pets, Eleven showed an invincible expression.

It was still very confident. No matter what, it was still very stable!

< Name > Eleven

“Super Skill”: Inner Power (Expert+1), Lightning Rod (Expert), Space Quake (Expert), Bean Soldier (Expert), Impregnable (Expert+1), Undying Golden Body (Expert+1), White Thunder (Expert)

Normal Energy Points: 9 million+

In the past two months, Eleven had successfully awakened the White Thunder skill through the “Aurora Magnetic Gold”.

Moreover, after Shi Yu added points to the expert level, the power of its lightning skill increased greatly!

At the start, Principal Feng judged that the chances of the dark-element affinity Eleven awakening White Thunder were not high, but he had underestimated Eleven’s other thunder-element skill proficiency.

Under the lead of the high proficiency of other basic thunder-element skills and the electromagnetic control power of Dao Proficiency-level electromagnetic levitation, Eleven absorbed the power of the “Aurora Magnetic Gold” very smoothly.

Not only had it learned a new skill, but its physique had also increased greatly because it used the legendary resource “Aurora Magnetic Gold”. Of course, the reason why it became stronger so quickly was also related to its two months of self-mutilating demonic training.

The only pity was that the “super alloy” skill replicated by Shi Yu did not have enough Iron-eating Beast compatibility and could not be taught directly.

### **Chapter 653: Cultivation Results Two Months Later (3)**

However, it wasn’t a big problem. Shi Yu had already gotten Ling to study how to increase the Iron-eating Beast’s compatibility with superalloy skills.

Even if it had yet to evolve through the super alloy, with such an outstanding combination and overlord will, Eleven was very confident.

How could it lose!

Seeing Eleven so confident, Buggy, Baby Ginseng, Chi Tong, and Susu had heavy expressions... This guy was indeed not easy to fight.

Shi Yu smiled and said, “This time, I’ve decided to add a new equipment system!”

“Therefore, in this team meeting battle, you can rely on external forces. After all, weapons and equipment are also a part of strength.”

“Your future enemies won’t fight you fairly. They will have preparations.”

“Our Dong Huang also relied on external forces like forbidden weapons to dominate until now. It’s very reasonable to have an equipment system.”

When Shi Yu finished speaking, Eleven’s confident expression froze.

When Shi Yu finished speaking, Eleven’s confident expression froze.

Equipment system?

“Wu!!!” On the other hand, Buggy was extremely happy.

Equipment system?!

Seriously?

It could bring equipment to battle? It could kill indiscriminately?!

There were two special existences in Shi Yu’s team.

One was Buggy, and the other was Susu.

The latter could store a large amount of nutrition from food in the body space through the Infinite Devour skill and temporarily transform it in battle.

Through this skill, Susu could use Baby Ginseng's Time Fruit at a smaller price and high efficiency at any time.

As for Buggy, because of the speciality of skills like Phantom Illusion and Dragon of Imagination, it could use "dragon-element equipment" to increase its strength.

If the utilization rate of Eleven and the others using equipment was 10%, then Buggy was 100%. Its compatibility with equipment was extremely high.

This advantage was unique to Buggy in the team. Of course, Future Ling might also have it.

Therefore, when it heard that equipment could be used in this team meeting, Buggy immediately became excited.

Eleven's face immediately fell.

Because it didn't have any usable equipment. Aurora Magnetic Gold? It couldn't increase its battle power at all!

And that worm had a legendary dragon ball in its spatial pocket...

Under the enhancement of the legendary Dragon Ball, Buggy's strength erupted to a top-notch overlord, an invincible overlord, and even totem level. It was not a problem. It purely depended on the limit Buggy could withstand.

This was even fiercer than the Time Fruit.

"Wuu!!!" At this moment, when it heard Shi Yu say that it could use equipment, Buggy felt that it could stand up.

< Name > Buggy

"Super Skill": Imagination Domain (Expert+2), Dragon of Imagination (Expert+8), Space Control (Expert+2), Anti-Demon Domain (Expert), Ultimate Absorption (Expert)

Normal Energy Points: 5 million+

In terms of super skills, be it racial skills or teaching skills, Buggy had also reached expert level and above.

Among them, the Dragon of Imagination skill was even closer to perfect level because Buggy was constantly training with the "Space-element Legendary Dragon Ball". It almost didn't rely on additional points.

When Buggy used dragon-element equipment to use the Dragon of Imagination, it was also a process to train the Dragon of Imagination's skill proficiency, so its increase in this aspect was very fast.

In fact, as long as Shi Yu gave the Dragon of Imagination four more points, Buggy could complete its evolution and break through to the overlord level with its dragon transformation.

For example, Shi Yu only stopped when it reached expert level in the Imagination Domain and Space Control. The subsequent proficiency was increased by Buggy itself through training and resources.

Although there weren't many skills, because of the equipment mechanism of this team meeting, Buggy felt that it could challenge the position of leader!

"Wu!!!"

"Wuu!! (So be it, who's afraid!)" Eleven was still very determined.

This new system was the most beneficial to Buggy.

Shi Yu wasn't biased towards anyone, but in a real life and death battle, who cared if one used equipment or ate supplements?

The Gem Cat usually carried a pile of life-saving equipment with it. Absolute fairness didn't exist at all.

He still didn't know the rules of the World Tournament. If they could bring equipment, those totem country opponents would definitely be fully armed. Shi Yu had to prepare in advance.

Being able to perfectly borrow equipment was also the effect of Buggy's skill. Before the world competition... he definitely had to go to Dragon Palace City more.

"Yi!!!" At this moment, Baby Ginseng became nervous and asked Shi Yu.

Then, self-destruction and revival... could it be used?

Eleven, Buggy: ???

Shi Yu: "?"

"Do you want to kill Buggy or Eleven?" Shi Yu's mouth twitched as he asked.

Baby Ginseng sighed. As expected, it still couldn't be used.

"Wu wu wu." Baby Ginseng let out Eleven's aggrieved voice. Buggy could rely on rules to increase its strength, but it was restricted by rules. It suspected that there was a conspiracy and something fishy!

After two months, Baby Ginseng successfully condensed a new time mark.

< Name > Ginseng Baby

"Super Skill": Source of Life (Expert+11), Time Mark (Expert), Moon Explosion (Expert), Plant Control (Expert+2)

Normal Energy Points: 9 million+

After two months of adding points, Baby Ginseng took the least super racial skills and recovered to the highest normal energy level in the team, exceeding Eleven again.

The reason was very simple. Under the lead of the legendary resource “Divine Earth of Life”, its source of life skill level increased faster than Buggy’s Dragon of Imagination.

#### **Chapter 654: Cultivation Results Two Months Later (4)**

Apart from that, the greatest change in Baby Ginseng was that after Shi Yu leveled up the “time mark” to expert level, it finally accelerated and condensed a new time mark.

In other words, Baby Ginseng had obtained the ability to revive again.

Unfortunately, this combination skill of “Self-destruction+Resurrection” was directly destroyed by Shi Yu in the team competition.

Baby Ginseng thought about ginseng life... It suspected that it had been targeted by a conspiracy, and Buggy had definitely bribed Shi Yu.

“Mi...”

“Ning...”

Chi Tong and Susu also looked at each other.

Although they were at the bottom in the last team meeting, this time, both Chi Tong and Susu wanted to advance a little.

“Mi!!” Chi Tong looked at Shi Yu eagerly.

The greatest problem now was that it had yet to find a suitable undead puppet.

< Name > Chi Tong

“Super Level”: Interlocking Sword (Expert+5), Sun Flame (Expert+2), Spirit Release (Expert+5), Undead Revival (Expert+2), Demon Blade Curse (Expert)

Normal Energy Points: 7 million+

On Chi Tong’s side, it was actually the most comfortable, because in the team, it was the only one with three legendary resources!

On its side, Shi Yu still didn’t add many points. He only pushed the Demon Blade Curse and Undead Revival to expert level.

However, because of the power of the two Sun Flame Flowers and the enhancement of possessing the bone sword, its Sun Flame Proficiency and its Dead Revival Proficiency increased very quickly.

This was the power of legendary resources!

This was even when it only possessed the Sun Flame Flower and only absorbed power and didn’t completely eat it.

If it completely ate one, he would probably immediately break through to the overlord level.

This made Shi Yu sigh. As long as the Beast Tamer was rich enough and had enough suitable legendary resources, the increase in skill proficiency might not be slower than adding points.

Unfortunately, although he had tested the power of the Revival of the Dead with the ferocious beasts on the snow mountain, Chi Tong had yet to find a suitable undead puppet. If he could have the support of an undead puppet with good battle power, Chi Tong felt that its chances of winning could be greater!

“There’s no other way.” Shi Yu shrugged and said, “In the country, it’s basically impossible for there to be suitable ferocious beasts for you to kill.”

“Let’s talk about it after we go abroad. At that time, we’ll raise the Revival of the Dead to perfect level and directly take an overlord undead as our little brother! For now, pretend that you don’t have this skill.”

Chi Tong: Mi? QAQ

“Ning!!” Susu comforted Chi Tong.

At this moment, Susu was actually a little nervous.

The last time, even if it had the will of an overlord, it was still a little traumatized. It was very worried that it would still be at the bottom this time.

As for Ling, it would directly slip away and not participate. Now it was definitely impossible for it to be at the bottom. Now that Sister Chi Tong had also been destroyed, in Susu’s opinion, it was a good thing. Susu felt that it was a little further from the bottom now. Great.

Now, Susu, who had learned the Heavenly Frost Cold Energy, felt that it was still very strong.

It had already been reborn since the last team meeting.

< Name > Susu

“Super Skill”: Holy Water Ring (Expert), Water/Ice Elemental Control (Expert+2), Wave Cannon (Expert), Infinite Devour (Expert), Heavenly Frost Cold Energy (Expert)

Normal Energy Points: 6 million+

Compared to other pets, Susu’s situation was relatively normal.

Its legendary resource, “Cold Sky Drop”, didn’t help it much in terms of skill proficiency. It only added some changes to its water elemental control.

It was as proficient in controlling the ice element as the water element. This was also thanks to the fact that ice was a form of water.

Because of the existence of the overlord’s will, Susu was also the most suitable for Shi Yu to add points. He basically finished it in a few days.

Unlike when he added points to Buggy, Chi Tong, and the others, he had to rest for two days every time he added points.

“Mi ~” After being comforted by Susu, Chi Tong stuck to Susu. Good sister.

“Come on, come on.” Shi Yu smiled and said, “A new team meeting!”

....

Two days later.

In the ruins space, accompanied by a rumbling vibration and an energy storm, Shi Yu sat calmly at the judge’s seat and looked at the pets in the battle.

Beside him, a Rubik’s Cube floated with lingering fear.

At this moment, Shi Yu’s physique was almost maxed out. After two months of points and recovery, his physique had undoubtedly reached the limit of level six.

After using Buggy’s phantom experiment, it was probably not a problem for Shi Yu to fight a monarch-level dragon of an overlord race with his bare hands.

Shi Yu’s physical strength increased very quickly. He could even fight weaker masters like President Feng and Commander He in Ping Cheng with his bare hands.

If he were to retake the ordinary master license, Master Qu Jie’s Ox-Headed Beast King might not need Eleven to take action. Perhaps Shi Yu could do it himself without sending his pet.

Unfortunately, apart from being able to withstand greater pressure when possessed by undead and mechanical armor, making his overall strength stronger, and being able to withstand more pressure when adding points... It didn’t seem to be useful.

After all, his current opponents were no longer ordinary master-level and monarch-level. They were all legends and overlords.

Even Eleven and the others couldn’t withstand an overlord-level skill, let alone him.

The increase in his physique made Shi Yu feel more comforted. It was the icing on the cake. At least, the chances of him dying from the aftermath of the battle were even smaller.

It was still unrealistic for him to deal with the opponent he was about to face himself.

## **Chapter 655: Cultivation Results in Two Months (5)**

At the moment, the team meeting was already coming to an end.

On the arena, with an indignant and aggrieved roar, a huge panda fell down aggrievedly under the excited and teary gaze of the green divine dragon.

After the cruel battle and the upgrades, the strength ranking in the team changed a hundred million times.

First, Buggy, second, Eleven, third, Baby Ginseng, fourth, Chi Tong, fifth, Susu.

As the saying went, there was a different king each generation. Due to the enhancement of the equipment system, Buggy won every battle with an absolute advantage.

When it carried the legendary Dragon Ball and turned into a divine dragon to fight, its energy level was basically maintained at “over 50 million” and it could continue fighting. Its physical strength was not inferior to Eleven’s. A dragon claw that could tear through space... Even Eleven’s expert level Undying Golden Body and Eleven’s army skills couldn’t withstand more than a few hits.

As for the consecutive eruptions of Eleven, who was in a desperate situation, its power was also greatly weakened under Buggy’s “Demon Suppression Domain”. It couldn’t pose a fatal threat to Buggy. Moreover, Buggy also mastered the “Ultimate Absorption”. Its physical endurance wasn’t much inferior to Eleven.

After a fierce battle, although Eleven became the opponent who posed the greatest threat to Buggy, Buggy still barely defeated it. This made Buggy extremely excited, and it also made Eleven deeply understand the dangers of the world.

“Roar!!! (Leader, thank you!!!)” In the sky, Buggy, who had transformed into a green divine dragon, shouted in gratitude. Although it had borrowed external help, it had still beat the leader once.

“Sob...” Eleven, who had fallen to the ground, looked indignant. It wanted to fight again because it couldn’t bear to use the power of the Yun An Demon God just now. Because it was the team meeting, it couldn’t bear to use this almost one-time-use evolution resource. After all, it was still waiting to cooperate with White Thunder and the superalloy to evolve.

It wasn’t convinced!!!

Wuu—!—!

It wanted to see if Buggy still dared to fight it after it evolved!

“Hoho.” Shi Yu smiled as he watched. Eleven finally knelt once.

Eleven had already worked hard enough. He hoped it wouldn’t go overboard in training now that it lost to Buggy...

At the side, Ling looked at the playful Shi Yu and suspected that Shi Yu planned this all along...

Second place, Eleven. Although it was one move away from losing to Buggy, the other pets still posed a relatively small threat to Eleven. Only Baby Ginseng was a little scarier.

In the beginning, Baby Ginseng hid underground and Eleven flew into the sky. The classic scene reappeared. Eleven and Baby Ginseng couldn’t do anything to each other.

However, after Eleven was forced into a corner, it directly self-mutilated and entered a desperate situation. It exceeded the limit of multiple eruptions. After every electromagnetic cannon touched the ground, it produced an effect comparable to the “Perfect Level super skill Earthquake”. It directly stunned the weak ginseng baby underground, causing it to have a concussion.

In third place, Baby Ginseng was inferior. Its time mark was restricted, and it was destined to be unable to unleash a dazzling attack.

In fourth place, Chi Tong. Chi Tong won very dangerously because if it wanted to erupt with powerful strength, it could only rely on the Myriad Sword Convergence, the Interlocking Sword, and the Demon Blade Curse to stack various buffs. And these few skills had a huge burden. Its two scapegoats were not enough at all.

Time was tight in the team meeting. During this period, Chi Tong definitely didn't have time to condense a new scapegoat. There were a total of four opponents, so the scapegoats weren't enough.

Therefore, Chi Tong chose to fight passively against Buggy, Eleven, and Baby Ginseng. It left the two scapegoats to Susu. Only then did it use the two scapegoats as the price of dying and being injured under the extreme eruption of the Myriad Sword Convergence and the Interlocking Sword to successfully let Susu be at the bottom. Otherwise, it would be really dangerous to face the stronger Susu.

As for Susu, who had been schemed against by the plastic sister again... It was completely depressed, making Ling's heart ache... Fortunately, I didn't participate.

After this battle, it was obvious that Eleven and the others had obtained a terrifying increase in strength compared to the first team meeting. Although they were still at the monarch level, it was basically no problem for Eleven and the others to fight weaker overlords above their level.

Unfortunately, although Shi Yu had pulled the super skills of his main pets to above expert level in two months, be it Buggy, Chi Tong, Baby Ginseng, or Ling, none of them could upgrade their willpower like Eleven during the painful super skills. It looked like Eleven's talent was still unique.

Shi Yu still hoped that they could have the overlord's will quickly. After all, apart from having a huge increase in strength, the greatest difference between mid-level willpower and overlord's will was that after the one with overlord's will added points and various supplements were added, Shi Yu would recover for about a day. The burden was lighter, while mid-level willpower needed him to recover for about two days.

At this moment, the strength of each main pet was already passable. While waiting for the pets to recover and for the team battle, Shi Yu was also thinking if it was time to get an overlord-level pet.

After thinking about it, Shi Yu confirmed it. Next, he started over and added points to Eleven.

He added all of Eleven's super skills to perfect level. Then, with the legendary resource "Aurora Magnetic Gold" and the overlord's will, he let Eleven break through to perfect overlord level.

Two months of silence had made Shi Yu much thinner. After all, he had either added points or learned various foreign historical knowledge. He had already been forced to the limit...

## **Chapter 656: Cultivation Results in Two Months (6)**

However, because the results of his hard work could receive obvious feedback and with Susu cleansing his heart, Shi Yu could still hold on. They were already considered good here. The really miserable ones were the mechanical Tyrant Dragon and the Duck Beak Beast.

It had been two months. The mechanical Tyrant Dragon and the Duckbill Beast had yet to defeat the transcendent-level Green Silkworm in the first level, even if they worked together...

Shi Yu could testify that Buggy really didn't cheat. That was really its strength at the transcendent level.

It was purely because the transcendent-level Green Silkworm was ridiculously strong to begin with. Not only did it master spatial skills, but it could also materialize an ice dragon... Everyone knew how to fight as a duo.

The overlords of the earth and the ocean were destined to be unable to defeat the green worm.

After resting for half a day, Shi Yu was preparing to carry out the team battle of "Shi Yu vs Lu Bai". He planned to casually take a photo and post it on the Internet to entertain himself and reduce the cooldown time. However, a call interrupted his movements.

It was President Lin.

In the video call, President Lin's young face appeared. Shi Yu suspected that President Lin had also eaten some special legendary resource. Otherwise, it was impossible for him to look younger than him at 100 years old.

"Shi Yu." As soon as the call connected, President Lin said, "Didn't you say before that you wanted to go to the Heavenly Fox Nation?"

Shi Yu was stunned and immediately nodded. "Yes, what's wrong? The Space Emperor's Space Beast Egg has an incubation point over there."

"Are you free now? If you want to go over, you can consider carrying out an additional special mission," President Lin said.

"What?"

President Lin said, "A legendary ruin descended in the Heavenly Fox Nation. According to our spies, this ruin might have come from the Emperor Wu Era and is related to the Iron-eating Beast."

"The location of the ruins is a remote village in the Heavenly Fox Nation, and a large number of iron-eating beasts live near this village."

"This is the first iron-eating beast trace discovered outside Dong Huang."

"The other situations are still unclear. At the moment, this ruin has already been controlled by the 'Heavenly Fox Nation'. It shouldn't have been cracked yet. Next, we'll send a few people to infiltrate the Heavenly Fox Nation and take over this ruin. You're an expert in the archeology of the iron-eating beasts. If you participate, it might be much smoother."

"Moreover, there's a guardian in the country who used the prophecy ability to determine that there might be iron-eating beast evolution materials in this ruin. It's just that we can't be sure if it's an evolution material or a second-stage evolution material."

"Of course, apart from accepting this ruin, you also have to bring the Iron-eating Beast race that wandered in the Heavenly Fox Nation back to Dong Huang."

Shi Yu was stunned. "The Heavenly Fox Nation... has an Iron-eating Beast Race?!"

"There might be iron-eating beast evolution materials in the ruins?"

"Well, that's right." President Lin nodded and said, "Of course, for you, the most important thing is your own safety and hatching of the Space Beast Egg. Then comes the task of bringing back the Iron-eating Beast Race, and then cracking and bringing back the ruins. If there's no progress in the ruins, you can give up. After all, that place is already strictly controlled by the totem country..."

"Although the power of the Heavenly Fox Nation isn't strong, and their fox god is only comparable to the guardian cat Ying, it's still an extremely dangerous place..."

Shi Yu fell into deep thought. From the looks of it, he couldn't continue to stay cooped up and increase points. It was better to increase points as he walked. When he heard that there were ruins, and they were iron-eating beast ruins, the blood that Shi Yu had cooled down for two months immediately burned. As expected, exploring ruins was youth...

## **Chapter 657: Hunting An Overlord (1)**

On the icy plain, the cold wind blew like a blade and hit Shi Yu.

Shi Yu held the phone and asked President Lin, "President Lin, when are we leaving? Apart from me, who else is there?"

On the other side, President Lin said, "Apart from you, the other candidates haven't been confirmed."

On the other side, President Lin said, "Apart from you, the other candidates haven't been confirmed."

"Because I just received the news, the first person I contacted was you," President Lin said.

"However, I have almost an idea about the other candidates."

"For example, Ji Feng from the tenth bureau."

"Although his strength is a bit weaker, his All Things Affinity talent can not only be close to natural energy, but also to all things."

"In the gaming terminology of you young people, it means that he has a favorable affinity while in the enemy territory... It's very suitable for infiltration operations. This is also why he can enter the Intelligence Bureau."

"Although he's not strong, Ji Feng has also infiltrated the totem country]ies many times to carry out missions. He can definitely help you."

"For example, Ke Yingzong from the eleventh bureau. You guys have formed a team to explore the Phoenix Mystic Realm. You might be very compatible with each other. He's also an experienced person. He's a legend who has gone to the totem country many times to carry out archeological missions."

“Of course, the most important thing is still the guardian of Ancient Capital University that you have a good relationship with.”

Shi Yu: “Mm.”

Was this lineup really alright?

Didn't their Dong Huang have any other guardians? Why did they always pull a cat around?

“I'm not asking you to fight. It's a secret mission, so the number of people isn't the key,” President Lin said.

“Don't expose your identity in this mission. After all, we're in a special contract period now. The Heavenly Fox Nation has also signed a world competition contract. In theory, we can't invade the sovereignty of the Heavenly Fox Nation.”

Shi Yu smiled in embarrassment.

“Of course, in order to ensure safety, apart from Guardian Ying, I'll also ask another guardian to go with you.”

Shi Yu expressed his understanding.

Two guardians, that was fine.

Low profile.

“There will also be a member of the tenth bureau in charge of picking you up in the Heavenly Fox Nation. I'll send you her specific information later. After this mission, you have to bring her back safely. This is also her last mission.”

The last mission?

Why did it sound a little wrong...

Shi Yu nodded. He understood. He wasn't going to fight, but to do something sneaky.

President Lin said, “You and the gem cat are a team. Set off alone. Go and hatch the Space Beast Egg first. Be at your destination in seven days.”

“The other infiltration team will set off alone. They will arrive before you and collect information. You and the gem cat will be their backup.”

“They're in the light, but you and the gem cat are in the dark.”

....

After receiving the mission from President Lin, Shi Yu immediately received the information about Dong Huang's spies in the Heavenly Fox Nation and the other guardian that President Lin planned to send.

Shi Yu fell silent.

Members of the tenth bureau, Qu Ling.

Why did this name sound so familiar?

Wasn't this... Master Qu Jie's daughter???

He had previously heard that Master Qu Jie's daughter was a little genius and stayed in the tenth bureau. Master Qu Jie was also promoted because his daughter's performance in the mission was outstanding. He didn't expect to meet her in this way...

Apart from that, President Lin also sent Shi Yu the information on the guardian who had gone to be a bodyguard for another infiltration team.

Shi Yu fell silent again.

Dong Huang's guardian, Divine Feather Phoenix Butterfly.

Wasn't this... the butterfly god that helped Buggy evolve??

One of the members of the second team of Lin Feng Legend.

Was he going to be woken up by President Lin not long after holding the Butterfly Meeting?

As the descendant of Legendary Lin Feng, President Lin seemed to be able to persuade the pets that this Legendary left behind. The Sea Dragon King seemed to have a good relationship with President Lin too.

"Then there's no problem." Shi Yu nodded.

In addition to the gem cat, there were a total of two guardians. If they went to the weakest totem country, the Heavenly Fox Nation, and also remembered to keep a low profile, it wouldn't be a problem...

....

Shi Yu called the gem cat and informed it to come over to travel together. The cat cursed and hung up.

Apart from the gem cat, Shi Yu originally wanted to find the Void Mantis and Senior Lu.

Because his original plan was to call them when he went to places like the Heavenly Fox Nation to travel.

However, due to the sudden addition of a mission, Shi Yu thought for a moment and decided to forget it. He still had to ask President Lin. It was too troublesome.

Women would only delay his speed of cracking the ruins...

Eh? Wait a minute, Senior Lu was also an archeologist. It didn't seem to delay the speed of cracking the ruins. There could even be an additional effect...

But it was still troublesome. It was a pity that he couldn't experience the speed of the mantis car.

He was quite satisfied with the speed of the cat car and the bug car. He wondered how the Space Emperor's mantis car felt.

While waiting for the cat to come, Shi Yu did not stay idle. He summoned all his contracted pets.

"Wuu!" "Wu!!" "Yi?" "Mi!" "Ning?!"

After Eleven and the others were summoned, apart from Ling, they looked at Shi Yu in anticipation.

Maybe a team battle was about to be held?

“No, after Teacher Cat comes, we have to go to the totem country to carry out a mission. We have other things to do during this period, so we can’t waste too much energy,” Shi Yu said.

“Yay ~” Ling’s originally depressed face suddenly became happy.

“But I’m free now anyway...” Shi Yu smiled. Suddenly, Ling had a bad feeling.

## **Chapter 658: Hunting An Overlord (2)**

As expected... Shi Yu let Chi Tong possess him and split into two.

A blue-haired Lu Bai clone and a red-haired Shi Yu clone.

Shi Yu looked at the two clones and nodded. He chuckled and said, “Let’s fight. Eleven, Ling, you guys also go and split into clones to help them.”

His main body didn’t have the energy to fight anymore. Let Lu Bai’s clone fight Shi Yu’s clone for fun.

Eleven, Ling: ???

Lu Bai and Shi Yu’s clones: ???

Then, under the gaze of Shi Yu and his pets, a world where only the clones were injured appeared.

The battle between the Shi Yu clone+Eleven clone+Buggy clone+Baby Ginseng clone+Chi Tong clone vs the Lu Bai clone+Ling clone+Susu clone+Chi Tong clone was about to begin.

As there was an additional clone on the left, in order to balance the battle power, Shi Yu only let the Chi Tong clone on the left have the power of a level-one awakened beast. It was purely used as a cosmetic.

The outcome was also very tragic. Baby Ginseng’s clone self-destructed and directly blew up both parties, forcing a draw.

The main bodies shook their heads repeatedly.

As expected, it was right to ban Baby Ginseng’s self-destruction in the team competition...

Although both parties had died, Shi Yu’s goal had been achieved. He held his cell phone and looked at the battle photo of [Red-haired Sword God Shi Yu vs Blue-haired Spear God Lu Bai]. He was very satisfied.

In the scene, the red-haired Sword God, Shi Yu, held a fire sword spirit, and the blue-haired Spear God, Lu Bai, held a sniper rifle. The battle between the sword light and the impact cannon was extremely spectacular.

“Sigh, boring.”

Shi Yu directly got Buggy to post a status through the [Time Traveler] account and send the photo.

Shi Yu and the others only posted Mu Huiyin's video before turning it down. This was the only account where netizens could find Shi Yu, so many people tagged this account to ask about the results of Shi Yu and Lu Bai's battle.

The reason why the audience was so eager to know was that Lu Bai's battle results in challenging the champion on the seven islands had been exposed.

It wasn't exposed by Dong Huang's own people.

It was exposed by Lendi of the Shen Feng exchange team in embarrassment.

Because he lost to Lu Bai, a group of people ran over to criticize him, so he investigated Lu Bai. Then, he exposed the battle results of Lu Bai instantly killing the number one person under the legends of the new generation of the seven islands on the path to champion. He wanted to show that it wasn't that he was weak, but that this guy was too abnormal and not a regular human.

This made Shi Yu and Lu Bai's match very sought after...

And now, everyone had finally gotten what they wanted.

This update of Buggy could be said to have shocked all of Dong Huang...

Because apart from a picture of Shi Yu vs Lu Bai, there were also three words attached to the account:

"I won."

Holy shit!

Shi Yu vs Lu Bai, Shi Yu won!

Apart from Director Zhong, Principal Feng, Legend Noble Gui, Legend Xiao Shuang, Legend Ke, and the others, most people were shocked.

Lu Bai's battle results were already strong, but Shi Yu could actually win!

How strong was Shi Yu?!

As he looked at the comments praising him, Shi Yu was happy and in a good mood. The cooldown time for adding points immediately decreased because of his good mood...

....

"What are you doing?"

Ping Cheng, in Shi Yu's big villa.

The gem cat rushed over and said, "We're going to the Heavenly Fox Nation, just the two of us??"

It looked at Shi Yu, who was playing with his cell phone, and said, "You should... want a few more bodyguards, right?"

The corners of Shi Yu's mouth twitched. "Why are you even more cowardly than me?"

"It's not just the two of us. There's also a guardian..." Shi Yu quickly repeated what President Lin had told him to the gem cat. When it heard that the butterfly god was around, the gem cat immediately nodded in satisfaction.

That was alright.

"You don't understand. It's dangerous outside." The gem cat looked serious and said, "For example, if we want to go to the Heavenly Fox Nation, the road is very dangerous."

"Have you seen the map?"

"If we want to go to the Heavenly Fox Nation, we first have to pass through a forbidden area of an unknown size. Many overlords over there have established themselves and occupy mountains as kings. It's considered a chaotic area. Some overlords aren't necessarily weaker than that whale."

"Then, after leaving the forbidden zone, you have to pass through either the 'Divine Tree Nation' or one of the countries in the 'Divine Elephant Nation' to reach the 'Heavenly Fox Nation'."

"The controller of the Divine Tree Nation is a divine tree with the strength of a top-notch totem. The plants everywhere in the country might be its eyes. No one knows where its main body is."

"And the controller of the 'Divine Elephant Nation', the Destructive Divine Mammoth, is also a top-notch totem. It has mastered the 'Perfect Undying Golden Body'. It's difficult for a demigod to kill it."

"I know." Shi Yu nodded. He naturally understood this.

"So let's go from the 'Divine Elephant Nation' to the 'Heavenly Fox Nation'. It's safer this way. I'll directly hide in the ruins space. You can teleport me over. In the blink of an eye, I'll reach my destination," Shi Yu said with a smile.

"I reckon that the Butterfly God and the others should have also used this method to infiltrate."

The gem cat: ???

"Let Buggy do it!!" The gem cat said, "I have to be vigilant of my surroundings at all times to protect your safety. Traveling is too tiring."

Shi Yu said, "Then let Buggy do it!"

It was first in the team, wasn't it? The capable ones did more work.

### **Chapter 659: Hunting Overlords (3)**

Did it really think it was so easy to first in the team?

[Buggy]: ???

"Alright ~" The gem cat was much gentler after that.

"When are we leaving?" The gem cat couldn't wait anymore.

Legendary-level ruins!

Just now, Shi Yu had said that this was a legendary ruin!

If there was a gem inside, it would be given priority.

Even without the gem, the salary would be a lot, at least not less than the Divine Feather Phoenix Butterfly's.

"As soon as possible, but President Lin asked us to go later. Let the others investigate the situation first. Safety first," Shi Yu said.

"What do you think?" the gem cat said.

"Safety first. Let's go prepare first. We'll change our appearance in the forbidden zone and increase our trump cards before hatching the pet egg. Finally, we'll meet the main group."

"How do we prepare??"

"Of course, it's better to change my appearance simply and change my pet to increase my battle power."

The gem cat: "?"

"What other pets do you have to exchange?? Don't tell it's that duck."

"Yes, have you forgotten Chi Tong's Undead Revival skill? It has already learned this skill through the bone sword."

"Although Chi Tong's Undead Revival hasn't reached perfect level and it can't control overlord-level undead puppets, doesn't this still have legendary resources? As long as Chi Tong possesses the bone sword and kills overlord-level creatures through the bone sword, the effect is the same. It can control overlord-level undead."

"Let's hunt two to three overlord-level creatures in the forbidden zone of the Lost World first and turn them into undead puppets to control in the bone sword. At that time, won't my new identity be created?"

"Legendary Spirit Medium... Undead Calamity... Undead Master..."

"An evil Undead Sorcerer exploring ruins in the Heavenly Fox Nation. It will feel completely different from Shi Yu and Lu Bai."

Lost World Forbidden Zone.

It was considered the buffer area between Dong Huang and the totem country.

This... was also Baby Ginseng's hometown.

The environment was very dangerous. The ferocious beasts inside were far stronger than the ferocious beasts in Dong Huang.

Of course, the strongest was only an overlord. With the gem cat leading the way, transmigrating was easy.

Apart from that, this was also the place where Dong Huang produced the most beast tides.

There would definitely be undead puppets suitable for Chi Tong.

Chi Tong had always hated why it wasn't sufficiently prepared before the second team meeting. Otherwise, if it possessed the bone sword and killed a few overlords first, this equipment system would also be beneficial to it. Buggy might not necessarily be first!

The gem cat fell into deep thought.

After some thought, he came to a conclusion and looked at Shi Yu with a burning gaze.

"You... Don't tell me you want me to be your fighter and help you fight overlords!!"

Shi Yu smiled and said, "How could that be? Let's try it ourselves first. We'll treat it as practice before the world competition. If we can't defeat it, you can come again..."

The gem cat: !!!

So it was still it who had to do it!

The gem cat's face fell.

"Confirm with me before you choose which overlord to fight..."

"No way, even totems have to choose weak targets when fighting overlords?"

"What do you know!"

....

Dong Huang, border area, White Mountain Town.

This place was the same as Icefield City. It was at the border of Dong Huang's land, but Icefield City was next to the ocean. This place was next to a huge mountain range, and this mountain range contained many forbidden areas of the Lost World inside. It was a natural danger zone that isolated Dong Huang, the Divine Tree Nation, the Divine Elephant Nation, and the other totem areas. It was very difficult to cross.

Even legendary Beast Tamers were unwilling to go deeper. Of course, because the forbidden zone contained rich resources, there would still be Beast Tamers who took the risk from time to time to enter the inner area to hunt and search for treasures.

For example, back then, Grandma Li only caught Baby Ginseng because she came here to explore a fossil mystic realm.

They were about to go home. In Shi Yu's team, Baby Ginseng was as excited as Chi Tong.

Chi Tong was excited that it would soon have an overlord undead puppet...

As for Baby Ginseng's passionate suggestion, it would first hunt those monsters that it had memories of. It wouldn't be too late for Baby Ginseng to take revenge. It was back!!

### **Chapter 660: Undying Sun Ginseng (1)**

Shi Yu and the others didn't stop in White Mountain Town. Instead, they directly teleported into the Lost World forbidden zone and smuggled out of the country!

The complicated natural environment here was like a maze, and the interior was extremely dangerous. Even if a legend stepped in, there was a chance of death, so it was called Lost World.

Now, the place where Shi Yu and the others were was a dark forest that was difficult to see through. The huge trees were all dozens of meters tall, and the atmosphere was extremely oppressive. From time to time, the roars of ferocious beasts would come from the surroundings.

At the moment, Eleven and the other six pets were all outside, hanging on Shi Yu scatteredly. It was difficult to discover them without careful observation.

For example, Eleven was lying in his pocket, like Chi Tong, who was hanging in front of his chest like a sword-shaped accessory.

Among them, Ling had even turned into a pair of glasses through the Hundred Transformations skill. Shi Yu put it on his face and it cooperated with him to observe the situation in all directions.

Due to the speciality of the Mechanic class, the glasses that Ling had turned into had number one reconnaissance ability in Shi Yu's team.

Shi Yu could clearly see the changes in all directions with himself as the center through the glasses and super vision skill.

Through this method, they could also avoid getting lost to the greatest extent... and avoid some meaningless battle consumption.

"Baby Ginseng, we're not there yet?" Shi Yu asked.

"Yi!! (I don't know, I, we seem to be lost...)" Baby Ginseng stuck its head out.

As expected! It had forgotten the way home!

Shi Yu slapped his forehead. It was unrealistic to expect Baby Ginseng to lead the way. At that time, it was only an transcendent-level supplement. Then, it was brought out by Grandma Li. How could it know the way inside!

During the process of passing through the forbidden zone, Shi Yu and the others also wanted to pass by Baby Ginseng's hometown.

Firstly, he wanted Baby Ginseng to return home in glory, and secondly, he wanted to find an undead puppet for Chi Tong.

Regarding the undead puppet, Shi Yu and the others' first goal was the overlord of Baby Ginseng's hometown, the Green Scaled Dragon.

Baby Ginseng still had a fresh memory of this guy. Although it had never met the Green Scaled Dragon directly, Baby Ginseng had often heard of the ferocious name of the Green Scaled Dragon.

The Green Scaled Dragon liked to let its subordinates collect various spiritual herbs and spiritual fruits to enjoy. Many supplements that Baby Ginseng knew were captured because of this. If it weren't for the fact that it was lousy at that time and had to be fattened up before being killed, it would probably have already become a meal.

"Yi..." Baby Ginseng expressed its childhood trauma.

"Wuu!!" "Wu!!" "Mi!!"

Eleven, Buggy, and Chi Tong made Baby Ginseng calm down. When the time came, they would attack together. Whatever Green Scaled Dragon or Dark God Chicken this was, they would all become undead.

"Yi! (I'll try it myself first. If I can't defeat it, you guys attack!)"

Baby Ginseng chuckled. If it could self-destruct, Baby Ginseng was a little confident, but if it couldn't self-destruct, so it still felt that it was a little dangerous.

And a trump card like self-destruction... naturally couldn't be left to the green-scaled dragon.

Shi Yu and the others already had an idea where to use this revival...

"Let's search again and see if we're lucky... Well, wait."

As Shi Yu walked, he suddenly frowned and discovered the mess in the distance.

It was as if a huge battle had happened not long ago and it had already become ruins.

They rushed over and saw a place filled with corpses and dark red blood.

There were human corpses and pet corpses here. Of course, they were already almost gone. Mostly eaten.

"It should be a Beast Tamer from Dong Huang who came here to take the risk," Shi Yu said. "He died in the past two days."

"It wasn't done by wild ferocious beasts. It was done by human Beast Tamers." At this moment, the gem cat that was yawning in the alternate space appeared. Its gem eyes seemed to be able to see the past and the future.

It said, "We're already considered to have gone deep into the forbidden zone. This is the border between Dong Huang and the totem area. These Beast Tamers who came here to explore might die in the hands of ferocious beasts, or they might die in the hands of the Beast Tamers in the totem area."

"After all, entering this place is a matter of life and death. Even if you die, no one will investigate."

"I've already discovered that person. The other party isn't far away." The gem cat looked into the distance.

Shi Yu said, "What level?"

"Ah, how should I put it?" the gem cat said. "The Beast Tamer should be at level six, but the pet is at the overlord level."

Shi Yu was stunned. "A contract above their level?"

"Yes."

"I understand." Shi Yu nodded. Pets relied on squeezing out the life potential of Beast Tamers to grow. It was an old tradition in the totem country.

"Then let's go over there and take a look." Shi Yu revealed an expectant expression.

"What?" the gem cat said. "You want to take revenge for this group of people?"

Shi Yu grinned and said, "That's not it. Be it here or there, they should have been prepared to die before entering such a place. I'm just going to check on their Beast Taming Talent. You've reminded me that when I reach the totem area, I can also find suitable Beast Taming Talents."

Shi Yu was quite open-minded about this kind of thing. Humans hunted ferocious beasts, and ferocious beasts hunted humans. In his opinion, it was quite normal for the seven countries and the totem country to fight for resource territories. He wasn't an ideal and great young man. The benefits of himself, the people, pets, and factions related to him were the greatest.

For example, pursuing world peace and equal life was impossible.

"You brat." The gem cat recalled that Shi Yu had told it that apart from the Awakening Mirror, he had also obtained a talent bead created by a Yue Maiden that could replicate the Beast Taming Talent from An Chang. Therefore, Shi Yu had even asked the gem cat to protect An Chang in Ancient Capital University.
