

## **Beast 671**

### **Chapter 671: Obtaining Six Overlord-level Puppets (1)**

In the huge pit, the green-scaled dragon was already on the verge of death.

The gem cat's power control was very good.

Not only did it ensure that the green-scaled dragon lost its ability to fight, but it also didn't completely die.

If it was completely dead, Shi Yu and the others wouldn't be able to transform the Green-scaled Flood Dragon into an undead puppet.

He had to use the bone sword or the Undead Revival to kill it!

The power of resources and skills would change the structure of the transcendent life form's soul the moment it was killed, allowing it to inherit the power of its body when it was alive to a certain extent and become a new undead race!

At first glance, the effect of the bone sword was actually similar to the Undying Fruit.

However, there was still a difference between one as a legendary resource and the other as a Mythical resource.

That was, the bone sword was only effective for lives below the totem level, while the Mythical resource, the Undying Fruit, was known to be effective for demigod-level lives.

As for whether it was effective against Mythical creatures, he didn't know.

Of course, if Chi Tong's Undead Revival skill reached transcendent and Dao Proficiency, it wasn't impossible for the skill effect to exceed the legendary resource, the bone sword.

"Buzz!!"

The huge mecha slashed down with its sword. The Green Scaled Dragon in the huge pit also died completely like the Ice-Eyed White Tiger and the Mountain Tortoise!!

Although they were already dead, their spiritual bodies had already been imprisoned by the bone sword.

At this moment, they were already puppets of the bone sword.

Through max-level possession, Chi Tong, who had already controlled the bone sword, immediately erased the remaining intelligence of the three undead through the power of the bone sword.

This way, it would be easier to control.

Be it the bone sword or Chi Tong's Undead Revival, after killing the enemy, the enemy's undead could still retain some of their consciousness from when they were alive.

Of course, if it was to control it as an undead puppet, it would be best if its mind was erased too.

Chi Tong could also choose to let them retain some consciousness. However, these three overlords looked very boring. There was no need.

With their death experience, if they retained some consciousness, they would definitely be crying, making a fuss, and being fierce in the bone sword!

“Roar...”

At this moment, Shi Yu and the others had already exited the mecha form. After all, this form consumed too much energy.

Chi Tong also returned to its sword spirit form and possessed the bone sword that had returned to the size of a fruit knife.

It began to summon the undead puppets they had hunted together!!!

“Roar...”

In the gray mist, a green-scaled dragon in the form of an illusory spiritual body, as well as a Ice-Eyed White Tiger and a Mountain Tortoise, were summoned by Chi Tong again!!

“Roar!!!”

The three undead overlords still looked majestic, but they submitted to the bone sword and Chi Tong.

< Name > Green Scaled Dragon Spirit

[Attributes]: Undead, Dragon

Energy Points: 53,150,000

...

< Name > Ice-Eyed Tiger Spirit

[Attributes]: Undead, Ice

Energy Points: 47,060,000

...

< Name > Mountain Tortoise Spirit

[Attributes]: Undead, Earth

Energy Points: 45,920,000

The moment they appeared, Shi Yu detected their approximate energy fluctuations through the index.

“What a pity.”

Seeing this, Shi Yu couldn't help but say regretfully.

“It's much weaker.”

At the side, the gem cat also landed and looked at the three huge undead that had submitted to the bone sword in front of it.

“Well, it’s the same as the effect of experimenting with commander-level and monarch-level ferocious beasts previously. It’s much weaker than when it was alive. Fortunately, most of the skills have been inherited, and the skill experience has not been lost much in the soul. It can still display overlord-level battle power,” Shi Yu said.

Although the power of the legendary bone sword was magical, the process of reviving the undead still couldn’t avoid losing most of its power.

However, Shi Yu was already very satisfied at this level. For example, the Green Scaled Dragon’s perfect super skill, the reverse scale, and the Ice-Eyed Tiger Spirit’s perfect super skill, Absolute Zero. These skill experiences were all preserved well.

It could be said that any one of these three undead could kill the Earth Abyss Demon Tree they had encountered previously.

As for that Earth Abyss Demon Tree, Baby Ginseng only defeated it with all its might.

Chi Tong controlled a total of three such undead.

In addition to the power of Chi Tong’s main body, if there was another team meeting, even if Buggy could use the legendary Dragon Ball, the first place wouldn’t be Buggy’s, but Chi Tong’s.

Even if Eleven erupted with the power of a Demon God, it was hard to say if it could defeat the current Chi Tong.

After all, Eleven had to erupt to the limit to have any hope of defeating each of these three overlord undead. Without the support of the ginseng baby, it was very difficult for Eleven to erupt for so long.

As long as Chi Tong controlled the undead behind him and played tag battle, Eleven would suffer.

“How long is the shelf life?” the gem cat asked again.

At the moment, these three undead were all remnant souls created by the bone sword. It was impossible for them to have such a long lifespan like complete overlord undead.

“Less than a year, but if I nurture them in the bone sword, they can always exist before the bone sword’s energy is exhausted. Moreover, they can be strengthened by the bone sword and become stronger. When the opportunity comes, they might even be able to turn from remnant souls into complete spirit bodies. There’s no need to worry about this.”

“However...” Shi Yu pondered. Why did he feel that in a year, they would look down on overlord undead of this level?

However, it wasn’t a big problem. When the overlord undead were eliminated, it wasn’t useless. He just had to let Chi Tong cut off and absorb it through the Spirit Release and transform it into nutrients for Chi Tong’s own growth. In the end, be it the power of the overlord undead or the power of legendary resources, they wouldn’t be wasted.

## Chapter 672: Obtaining Six Overlord-level Puppets (2)

“How nice.” The gem cat couldn’t help but be envious.

This looked much cooler than a clone.

“Mi ~!!!!” In the sky, Chi Tong was also asking excitedly and happily.

Therefore, when was the next team meeting to be held? Otherwise, it might as well be now.

“Wuu...”

Eleven, Buggy, Baby Ginseng, Susu, and the others looked at the sky.

Damn it.

Eleven, Buggy, and Baby Ginseng were the most envious. Now, not only did Susu and Ling have followers, Chi Tong also had them.

Moreover, they were three overlord-level sidekicks. This was too strong.

Previously, it was extremely difficult for Shi Yu and the others to take down these three overlords together. And with the help of the gem cat, they had all become Chi Tong’s puppets.

A long time ago, Chi Tong could rely on a big boss to lead the team to kill undead and farm experience to level up.

Why were there more big bosses now? Damn it.

“Mi ~” Chi Tong chuckled. Of course, for Chi Tong, it felt that there was a flaw.

Although it could form the Four Undead Holy Beasts with them, in its aesthetic sense, these three overlords weren’t the most perfect.

It didn’t put them at the same level as the mechanical Tyrant Dragon and the Duckbill Beast at all. Otherwise, it wouldn’t have erased the other party’s mind so readily.

In Chi Tong’s opinion, it was impossible for Shi Yu to take these three guys in as members of the second team.

Only undead puppets that could qualify as members of the second team were worthy undead puppets.

In Chi Tong’s aesthetic sense, it wanted an overlord-level frost dragon undead. It would be best if its energy level when it was alive was above 80 million. Only then could it recreate General Mu Huiyin’s lineup.

Of course, it was referring to other frost dragons. It definitely had no intention of offending Mother Dragon.

Moreover, a lackey without intelligence was slightly lacking...

Of course, if there was a better choice, it would also happily accept it! For example, the ginseng baby undead.

“Clean up the battlefield. Let’s go. We’ve been delayed for a day. It’s time to set off.”

Shi Yu looked at the messy battlefield and took a deep breath.

“Let’s go, let’s go. It’s a pity about these corpses.” The gem cat looked at the bodies of the three overlords.

Most of their strength had been extracted by the bone sword and given to the corresponding spirit body, so they could no longer plunder high-level resources from them. Unfortunately.

However, although it couldn’t be sold for much, it could still recover some HP!!

The gem cat planned to put away these resources and sell them when it returned.

However.

Shi Yu said, “It’s not a pity, not a pity. Buggy, quickly put it away.”

The gem cat: “?”

Buggy: !

Shi Yu said, “The corpses of three overlords are also good stuff. Although they can’t be sold anymore, the corresponding physical strength is still preserved.”

“That tiger might be a little weak, but it’s not a problem for the Mountain Suppressing Tortoise and the Green Scaled Dragon to beat up ordinary monarchs with their physical strength alone.”

“Moreover, the overlord-level body should still have a trace of affinity with the power of nature. Let Buggy use the worm silk parasitic thread to repair it with the ginseng baby. Just with the physical strength and the power of nature, the battle power of the three physical puppets might be able to be on par with that Earth Abyss Demon Tree! It’s worth collecting!”

“You can have the evil Undead Sorcerer and the evil Gu Master!”

Buggy was overjoyed. Could it have some too?

After all, even if it didn’t contribute to this battle, it had worked hard.

Eleven, Baby Ginseng, Susu, and Ling cried.

It was already too much to bring legendary equipment, and now they even had three overlord-level puppets?

The gem cat was also furious. What level of capitalist was this guy? It was fine if he extracted his soul, but why did its body have to be repaired and made into a puppet!!

Wasn’t that... six overlord-level puppets?!

Shi Yu was excited.

Although he had been delayed for a day, it was still worth it. With the six overlord puppets on him, he had a new alternate identity to play with on this trip to the Heavenly Fox Nation... He didn't have to worry about causing trouble for Dong Huang at all!

Under the totem level, it was invincible!

....

....

After Shi Yu and the others cleaned up the battlefield, they collectively entered the ruins space to rest.

The gem cat came to travel with the ruins ring.

Although the gem cat had discussed with Shi Yu to let Buggy be the driver before setting off, Buggy probably wouldn't recover without resting for two days.

This made the gem cat curse. If it had known, it would have helped Buggy in advance.

If it had attacked directly from the start, at least it wouldn't have to be a driver.

Unlike now, where it had to be a driver again.

Moreover, the original driver also intercepted the few spoils of war.

Unfortunately, there was no medicine for regret.

In this world, it was a lonely traveling cat.

Because it was going to pass by the totem country, for the sake of safety, it had to be vigilant at all times to avoid the enemy country totem noticing. The gem cat didn't dare to use its slightly weaker clone and could only do it itself.

At this moment, in the high-level ruins space, Shi Yu and the others had almost adjusted after a day of rest.

After all, Shi Yu had prepared a lot of supplements and resources in advance. Under the paywall battle strategy, there was no need to slowly recuperate.

Even the injured Buggy glowed with vitality again under the treatment of various supplements and ginseng babies.

After recovering, Eleven and Baby Ginseng began to panic.

This battle revealed many problems.

Buggy used legendary equipment, and although it was being beaten the whole time, it could fight a top-notch overlord for so long.

### **Chapter 673: Obtaining Six Overlord-level Puppets (3)**

If it were them fighting the Green Scaled Dragon alone, they would probably be defeated by the Green Scaled Dragon in less than three rounds.

If only Buggy was so strong, Eleven and Baby Ginseng could still accept it. But now, after the battle, Chi Tong's strength might even exceed such a Buggy. Eleven and Baby Ginseng only felt that it might be harder and harder to get first place in the team.

Three overlord puppets!

Damn it, no, there were six. Buggy also had one.

After that, Susu still had the evolution inheritance of the Blue Sea Sprite waiting, and Ling's mechanical intelligence advantage had gradually appeared. If it fused with the Mythical Kirin fossil, who knew how strong it would become...

It was too difficult, too difficult.

Eleven went to Ling. As the saying went, in a three-man team, there would definitely be an expert. As for Coach Ling, there was something it could help Eleven with.

At this moment, in Ling's laboratory, several Bean Bears and Nine Li Battle Beast clones were experimental subjects placed on the experiment table.

The goal was to study the compatibility method between the Iron-eating Beast and the superalloy skill.

From Shen Feng, Shi Yu and the others couldn't obtain the core technology of the superalloy, but from the perspective of the seven islands, they still successfully obtained the core technology of the superalloy and the alloy monster.

The reason was very simple. The Ke Yuan Financial Group had mastered such technology, and Dragon Palace City, the Seven Islands, and Dong Huang had directly confiscated the Ke Yuan Financial Group. It was undoubtedly very simple to divide some spoils of war.

Now, Eleven couldn't wait to undergo the next round of evolution. It ran over again to ask about Ling's research progress.

"Uh..." Ling said, "Don't worry, don't worry..."

Ling already had a specific idea. It was to modify Eleven's body and let a certain organ in its body be more similar to the alloy monster.

The risk of biological modification was undoubtedly very high. Even it had to carefully ensure that the success rate was 100% before it could help Eleven carry it out.

"Wuuu!!" Eleven was excited, its big eyes filled with hope.

When it fused with the power of light and darkness and evolved again, it would definitely be invincible in the world.

One punch, one overlord puppet!

"Yi..." In another part of the ruins space, Baby Ginseng wasn't idle either.

As Eleven was waiting for an evolution opportunity, it was also researching on its own and had been guarding the Sun Flame Flower Chi Tong had given it.

The power of the Sun Flame Flower was undoubtedly in conflict with the power of the ginseng baby.

If Baby Ginseng ate it directly, there was only one outcome: it would be burned to death.

It wouldn't strengthen it to the overlord level.

If one wanted to rely on legendary resources to break through to overlord, there were two conditions for resources. One was that the resource was strengthening, and the other was that the resource and the user had to have strength and attributes compatible.

However, it was precisely because they weren't compatible that Baby Ginseng's mutation could be used. If the power was compatible, its mutation wouldn't be able to absorb the power of the Sun Flame Flower.

The so-called mutants basically had let their bodies come into contact with powers that were not compatible with them. They would mutate and gradually adapt to their physiques in unsuitable environments and powers!

The power of the Sun Flame Flower was very violent. To Chi Tong, it was a delicacy, but to Baby Ginseng, it was a ferocious plant that affected life activity!

It had only stored 1% of the Sun Flame Flower's power in its body, but it had spent a lot of effort. Its body was at its limit. If it wanted to perfectly absorb the power of the legendary Sun Flame to mutate, relying on transcendent-level mutations might not be enough. It would be very dangerous.

Unless it grew to the totem level and mutated with the legendary Sun Flame Flower.

But that was meaningless, because at the totem level, it had the ability to optimize its own race.

Although Baby Ginseng currently had a chance to revive and could brainlessly absorb and forcefully mutate to take a gamble, Baby Ginseng was still unwilling to act rashly.

Firstly, it would waste too much power of the Sun Flame Flower, and secondly, it would waste the opportunity to revive.

It wanted to study thoroughly how to maintain a success rate above 100% before mutating!

Moreover, this mutation had to awaken a skill that was meaningful to its battle power.

Mutations didn't mean success.

For example, if Baby Ginseng mutated and got a Sun Flame skill through the Sun Flame Flower... Although the mutation was successful, there were very few enhancements to its battle power.

The mutated skill had to be useful to it!

Different racial skills had different increases in strength.

It wasn't every time that it had the chance to bet on top-notch skills.

Because of this and the price of this failure, Baby Ginseng had to grasp this mutation opportunity by itself. It couldn't be a gambler anymore.

Although it was still a gamble in essence, if it made some preparations during the mutation process, it would be a little psychological comfort.

At this moment, Baby Ginseng was sitting beside the Sun Flame Flower, thinking about its conversation with Shi Yu...

Shi Yu: "It's best if the mutation this time can increase your attributes in all aspects. Your advantage is that your life force is huge. You can start from this aspect. Endless life potential is hidden in the life force. For example, when the overlord's will erupted, the power that far exceeds the limit was squeezed out of the life force."

"And the risk of doing this is that our life force will be consumed too much and we'll easily die young. If Eleven doesn't have the Undying Golden Body, and if you're not in the team, and if we don't have a huge number of life supplements that can allow Eleven and the others to quickly recover after erupting... I definitely won't dare to let Eleven and the others squeeze out their life potential frequently."

"But even so, the eruptions of Eleven, Susu, Ducky, and the others are only happening one at a time. These are all self-protection mechanisms of life. And your advantage is that the skill proficiency of the source of life might be very high in the future. The recovery of life force will be very fast. Even if you erupt improperly and die, you can still revive. Therefore, the battle method of infinitely squeezing out life potential might be very suitable for you."

"The Time Fruit will be obsolete sooner or later. Next, we have to find, study, and squeeze out the potential of the life force..."

At the moment, Baby Ginseng could maintain the advantage at the front of the team thanks to the Time Fruit.

However, the upper limit of the Time Fruit's increase was the overlord level. As everyone entered the overlord level, the Time Fruit didn't have any huge advantage.

Although at that time, the side effects of the Time Fruit had already been reduced to the lowest as the level of the ginseng baby increased, it was already impossible for them to fight above their level.

At that time, not only would Susu and Baby Ginseng give up on the Time Fruit, but they wouldn't use this as the tactical core.

Therefore, after the overlord level, Baby Ginseng had to have a new skill that could replace the Time Fruit and increase its battle power!

Only in this way could it maintain its advantage.

Therefore, the direction of the mutation this time was best if it was an explosive skill that could squeeze out life potential...

"Yi... (I want to plant a fire seed in my body. This fire seed can erupt with huge energy in the form of burning life force and stimulates my potential at any time.)"

Burning its life force was one way. There was another way, which was to establish the relationship between the Sun Flame power and the Moonlight Radiation during the mutation process. The Moonlight Radiation came from the Moonlight, and the Moonlight came from the Sunlight. If it could absorb the Sunlight at the same time during the Moon Explosion and transform the Sunlight into the Moonlight Radiation, the power of the Moon Explosion could be even greater!

Of course, this might also be possible to increase the proficiency of the Moon Explosion in the future. It was not the best choice. The best choice was still to burn its life force. After all, after erupting with life potential, its own strength would increase greatly. Then, it could self-destruct. It could also increase the power of the self-destruction.

Although Baby Ginseng understood Shi Yu's meaning, it was still not mentally prepared... After all, the price of failure was a legendary resource!! Dying was nothing, but wasting a resource would make it very sad. After all, it was given by Chi Tong out of goodwill.

Moreover, as Baby Ginseng thought about it, it cried. What the hell? It was a wood-element supplement plant, and its skills were either burning life or self-destructing. Could it still play happily?

#### **Chapter 674: Wind Rises, Heavenly Fox (1)**

After entering the forbidden zone of the Lost World from the border of Dong Huang and spending two days passing through the forbidden zone and the Divine Elephant Nation, Shi Yu and the others finally arrived at the Heavenly Fox Nation.

The Heavenly Fox Nation was very special. It was the only country among the eleven totem countries around Dong Huang that didn't have top-notch totems.

As for the Divine Tree Nation and the Divine Elephant Nation around Dong Huang, the controllers were all top-notch totems. Even the overlord of a huge totem country like the Dragonman Empire, the Tyrant Dragon King, had battle power limits close to the demigod level and had a chance of becoming the new totem king in the east!

"We're here!"

In the ruins space, Shi Yu was meditating with his eyes closed, studying his telepathy talent.

After eating the Undying Fruit, his telepathy talent had actually undergone some changes. As time passed, this change became more and more obvious. Shi Yu couldn't help but take the time to study it carefully.

At this moment, as a slight vibration occurred in the ruins space, Shi Yu opened his eyes and understood that the gem cat was knocking on the door, meaning to call them out.

Shi Yu stood up, ate the blueberry-sized Time Fruit, and started the initial transformation.

The Heavenly Fox Nation and even the surrounding totem countries were similar to the ancient times of Dong Huang. There was no technology here, and the clothes were mainly ancient clothes. If Shi Yu wore a modern panda battle suit and wandered around the streets, he would definitely be instantly exposed.

“Heh heh” Shi Yu put on the gray robe he had prepared in advance and held a wooden walking stick in his hand. It was actually a tool to seal the bone sword’s energy wave. As the Time Fruit he ate took effect, Shi Yu’s hair turned gray and silver.

At the same time, his face quickly aged, becoming exactly the same as when his life force was sucked dry after adding some super skills.

Whoosh!

The gray robe trembled, and the gray-haired old Shi Yu emitted a twilight aura. At this moment, he was no longer Shi Yu, but the evil Beast Tamer who roamed the totem countries, Lin Ying, Old Demon Lin.

The names were from Senior Panda and the gem cat.

Although his appearance had become older, he still had a very elegant aura. If Lu Bai and Shi Yu were still a little similar, then Old Demon Lin and Shi Yu were completely different!!

“What’s wrong?”

Shi Yu appeared from the ruins space with a walking stick. At this moment, he appeared in an alley in an ancient city.

The gem cat hid in the alternate space and said, “We’re already in the Heavenly Fox Nation.”

“This seems to be the Moon City of some Heavenly Fox Nation. It’s one of the hatching locations marked on the map given by the Void Mantis. It’s in this city. I searched simply but couldn’t find it. It should be in a secret place or something. Next, you have to ask yourself.”

“Oh right, Moon City should be a relatively large city-state in the Heavenly Fox Nation. The ruler seems to be an overlord-level little fox. Although it’s not very strong, you have to be careful. Don’t attract the Fox God. I definitely don’t want to fight with the totems. In short, I’m lying down ~”

Shi Yu was silent for a moment, indicating that he understood. At the same time, he felt that it was extremely troublesome!!

Why was the second hatching place of the Space Beast Egg in such a big city?

If only it were still a small village like the Seven Islands. It would be extremely easy to find, but this side was clearly like a dragon’s pool or a tiger’s den.

Shi Yu sighed and walked out of the remote and dark street. Like an old beggar, he entered the street.

On the streets of Moon City, people came and went. Although it was a totem country, this country was still dominated by people. Even the status of human Beast Tamers was not low. Of course, the fox race had a higher status. Before Shi Yu came, he naturally came into contact with sufficient information.

In the Heavenly Fox Nation, the highest commander was the Fox God. Under normal circumstances, the Fox God didn’t appear in the world. The one who replaced the Fox God to manage the country was a

human female Beast Tamer called the “Heavenly Fox Saintess”. They were passed down from generation to generation and had legendary strength. They were the spokesperson of the Fox God.

As for the seven overlords under the Fox God, they managed the seven largest city-states in the Heavenly Fox Nation. At the moment, the Moon City Shi Yu was in was the city of the Moon God Fox under the Fox God.

Of course, under normal circumstances, the Moon God Fox didn’t show its face either. It was just the guardian overlord of Moon City. On the surface, Moon City was still managed by the “Moonlight Family”.

They were a human Beast Tamer family that specialized in helping the Moon God Fox nurture its clansmen. Their status was supreme in Moon City.

Beast Tamers who could contract the Moon God Fox Race were considered superior in Moon City. It could be said that in the Heavenly Fox Nation, they were basically the bosses of the fox race. As for the humans who served the fox race, they were number two, while the other life races were ranked lower.

The Heavenly Fox Nation was a totem country with a higher human status. Because the benefits were relatively good, being above all races below the fox race. They might be living more comfortably than in the seven countries.

This was also the reason why some humans were unwilling to join the seven countries after the totem battle. After all, joining a human ruled seven nations did not mean that they could have a high status as humans.

Generally speaking, if Beast Tamers who betrayed the Seven Nation Alliance wanted to join, they would only join such totem countries, not countries that treated humans as food and human pets. Of course, if Beast Tamers were strong enough and reached the Legendary level, no matter which totem country they joined, they could become distinguished guests like overlord-level creatures.

Depending on the national system, the status of all races in the totem country was also different.

The reason why Dong Huang arranged for Qu Ling to be a spy in the Heavenly Fox Nation was because the status of ordinary humans in the Heavenly Fox Nation was relatively high and not easy to discover.

## **Chapter 675: Heavenly Fox (2)**

If it was a place like the Dragonman Empire, although humans were also below the dragon race and above the myriad races, that was only limited to humans of mixed races. If they went there to spy, the pressure would be huge.

“If I hadn’t transmigrated to Dong Huang when I transmigrated, I wonder what would have happened when I transmigrated here.” After Shi Yu came out, he muttered in his heart.

His clothes were also prepared for the national situation of the Heavenly Fox Nation. He appeared on the busy street and didn’t pay much attention.

It was quite new for Shi Yu to come to the totem country for the first time. As he walked, he looked around. On the streets, there were cries of vendors and shouts. People like the candied hawthorn that Shi Yu was familiar with were also selling here. He even saw adults buying stuff for their children!

From the thriving scene on the street, it was impossible to tell that this was the ferocious and violent totem country described in the textbooks.

Shi Yu thought for a moment. This was also normal. After all, even in the totem era before the Beast Taming Era, there were also good totems and evil totems. For example, in the totem era, some of the Dong Huang humans survived under the protection of the divine dragon race. They all believed in divine dragons. Even in the current Dong Huang, although humans were the rulers, a large portion of them still believed in divine dragons.

According to historical records, the Heavenly Fox Nation was still alright. It had never directly participated in the totem battle with Dong Huang. The Fox God only hugged a bunch of big bosses' thighs everywhere the whole time, preventing the Heavenly Fox Nation from destruction. However, this didn't affect the fact that the Heavenly Fox Nation and Dong Huang were enemies now, because at the moment, the Heavenly Fox Nation's greatest backer was enemies with Dong Huang.

The friend of an enemy was the enemy.

"The Heaven Leaderboard has been announced..." Shi Yu had only taken a few steps when he heard the street suddenly become noisy. A large number of people gathered towards a wall. Shi Yu took a look and gave up squeezing through the crowd.

With a flick of his finger, Buggy's countless Dream Stealing Worms began to fly all over the city.

Soon, Shi Yu understood what the "Heavenly Ranking" was and learned a lot of local information.

When the World Tournament began, the Heavenly Fox Nation was also invited. However, apart from the Heavenly Fox Saintess, there were no powerful Beast Tamers in the Heavenly Fox Nation, let alone powerful Beast Tamers under the age of 30.

There was no legendary Beast Tamer under the age of 30 in the Heavenly Fox Nation! There were even very few level-six ones!

And if one wanted to participate in the World Tournament and have overlord-level battle power, that was the threshold.

Therefore, if the Heavenly Fox Nation wanted to participate in the battle, they could only choose the extreme method, which was to take a step back and choose level-five and level-six Beast Tamers who were willing to participate.

The chosen candidates had a chance of being chosen by the seven overlord fox clans under the Fox God to fight in the world competition as temporary contractors.

A contract above their level!

At that time, it would definitely be mainly the overlord fox race. As for those human Beast Tamers, if they wanted to contract above their level, they would definitely have to pay a heavy price, just like the Beast Tamers of the Divine Tree Nation Shi Yu had encountered previously.

However, from the dream memories of the people here, the young Beast Tamers of the Heavenly Fox Nation didn't seem to be rejected. Most of them were willing to sacrifice themselves and contract the overlord fox race at a huge price to fight in the world competition, as if this was a supreme honor.

Shi Yu also discovered an interesting point. In the seven countries, people called the competition organized by the World Tree a world competition, and in the totem countries, more people seemed to call it the "battle of countries". It was an opportunity for their country to rise.

"The power of faith is very strong..."

Shi Yu didn't find it strange. If these humans couldn't provide the fox god of the Heavenly Fox Nation with a huge amount of power of faith, it was impossible for them to have such a high status.

"Miss Yue'e is indeed on the Heaven Leaderboard."

"Yes, yes, it's completely unexpected. After all, she's the pride of our Moon City."

"Lord Yue hasn't searched for a contractor for nearly 20 years. I wonder if Miss Yue'e can be chosen by Lord Moon."

On the street, there was a flurry of discussion. The discussion about Beast Taming was not low in Dong Huang. Even ordinary people participated in the discussion excitedly.

However, this was not what Shi Yu cared about. In his opinion, what else could such a person who contracted an overlord above his level be if not cannon fodder??

Unless that Moon God Fox had the strength of a top-notch overlord that wasn't inferior to the Green Scaled Dragon.

But even in Dragon Palace City, there weren't many such top-notch overlords, let alone the Heavenly Fox Nation.

Shi Yu held his walking stick and continued to search for the "hatching altar".

....

Before long, Shi Yu used a similar method to let Buggy fly to various places in Moon City through the Dream Stealing Worm to collect information and determine where the Starry Sky Altar might be.

"Are you sure??" In the alternate space, the gem cat muttered.

Shi Yu thought to himself, "I've gathered the memories of many people and even let Buggy infiltrate the City Lord Manor of the Moonshine Family. It shouldn't be wrong."

The gem cat was surprised. "Your efficiency is pretty fast."

It felt that even if it came to investigate, it might not necessarily be faster and more stable than Shi Yu.

Shi Yu chuckled and thought to himself, "Isn't this all thanks to Buggy's dream stealing and phantom skills?"

The combination of phantom illusion and max-level dream stealing made Shi Yu more suitable than most Beast Tamers to be a spy who stole information.

Shi Yu felt that he and Buggy should at least have a place in the tenth bureau's Intelligence Bureau!!

Of course, Shi Yu's current boldness was also related to the overall strength of the Heavenly Fox Nation and Moon City being too lousy.

There was no legend in the entire city, only an overlord. Buggy alone could fight the entire city and steal as it pleased!

### **Chapter 676: Heavenly Fox (3)**

If it were other targets, Shi Yu definitely wouldn't dare to be so bold. For example, in the Shen Feng exchange team at that time, Shi Yu definitely wouldn't dare let Buggy invade Dr Aqi's dream to look for mechanical knowledge.

After Beast Tamers reached the legend level, they had too many methods. Apart from Beast Taming Strengthening, there was also Etherealization, space manipulation, and sealing techniques. Some Legend Beast Tamers even knew Instant Transmission, Soul Out of Body, and Spirit Deterrence. They were already life forms on another level.

Although Hua Xiajin Legend just had a few overlords, that wasn't an accurate representation of her strength. In a real life and death battle, legends had a huge advantage over non-legends, especially experienced legends.

The gem cat said, "So what's the situation?"

Shi Yu said, "This depends on the history of the overlord of Moon City, the Moon God Fox."

"It was originally an ordinary white fox. It didn't have much of a presence in the fox race of the Heavenly Fox Nation. However, one day, it accidentally discovered an altar. There was nothing special about the altar at the start, but this fox slept right there, leaning against it.

"Who knew that at night, the power of starlight was especially rich where the altar was? In addition, by chance, this white fox was there for a special astronomical phenomenon. It was lucky to directly mutate and become a star fox."

"However, this is only an accident. Apart from when there's a special phenomenon, this is just an ordinary altar. However, the mutated star fox still thinks that this altar hides a big secret."

"However, this is only an accident. Apart from when there's a special phenomenon, this is just an ordinary altar. However, the mutated Celestial Fox still thinks that this altar hides a big secret."

"In the past hundred years, in order to study the altar, the Moon God Fox has invited various capable people to crack it together more than once. It even invited the Fox God to study it. However, there were no results."

"I guess that the altar that made the Moon God Fox mutate is the altar left behind by the Space Emperor to hatch the Space Beast Egg. Of course, the Moon God Fox mutation was purely a coincidence, like a

blind cat bumping into a dead mouse. The contribution of the altar is there, but it's not big. It's mainly because of the special phenomenon. The altar is at most a coordinate, the most suitable coordinate to absorb the power of that starlight, so it just seems like the altar is responsible."

The gem cat said, "The investigation is very good, but next time change your 'blind cat' metaphor to something else."

"In addition... if it's really as you investigated, you mean that we should go to the habitat of the Moon God Fox and fight for the altar?!"

Shi Yu fell into deep thought and said, "If the Moon God Fox is guarding its home, this is the only way..."

"The most troublesome thing is that the pet egg needs 1 to 2 days to absorb the starlight..."

"Teacher Ying, do you have a way to instantly kill it without anyone noticing?"

"Directly fighting would attract the attention of the outside world and easily attract the Fox God, wouldn't it?"

The gem cat: ???

"How is that possible!!" the gem cat said. "I can't insta-kill it, you do it yourself."

"Can't??"

"Its habitat is in this city. It's impossible to destroy the layers of barriers without anyone noticing. It will definitely attract the attention of many people," the gem cat said angrily.

"Moreover, just because it's a totem country doesn't mean that it's a backwater place. Who knows if they have long-range communication methods."

Shi Yu: ...

"Forget it, forget it."

"Wait, as long as we are nimble enough and let Buggy materialize the Moon God Fox Phantom to deceive the people outside and pretend that nothing happened... Just let it say that it's testing out some skills!" Shi Yu said.

"..." The gem cat said, "Do you want to gamble on that? There's only one chance. Moreover, if the Moon God Fox and the Fox God have some mental connection, the Fox God will also sense it after it dies. Wouldn't it be over? Generally speaking, there's a close faith connection between the totems and overlords of the totem country. If that gets the Fox God out and it interrupts the hatching of the pet egg... Unless we kill the Fox God, it's impossible to successfully hatch. "

"Ah..." Shi Yu was like a little shark that had lost its dream.

"Then lure the Moon God Fox out for two days," Shi Yu said. "Moon City is quite far from Fox God City and the location of the legendary mystic realm. As for the Fox God, it should be in its Fox God City or the legendary mystic realm at the moment. As long as we don't cause a big commotion, it shouldn't attract its attention."

“After all, it’s not like the Moon God Fox would contact the Fox God for every little thing that happens.”

“How??”

“Can we use the ‘mystic realm’?”

“Huh?” The gem cat was stunned. “What do you mean?”

Shi Yu said, “Use the power of space to open a small mystic realm space nearby. We’ll use the ‘Energy Fruit created by Baby Ginseng that’s filled with the fragrance of the moon’ to attract the Moon God Fox Race over and let the Moon God Fox be obsessed with cracking the mystic realm and not pay attention to its hometown.”

“If it wants to leave, seal it!”

The gem cat grinned and said, “There will definitely be mechanisms in ordinary overlord-level habitats. The kind that can be sensed the moment someone enters. Perhaps that Moonlight Family will also guard outside the altar.”

“Moreover, what if the Fox God’s spatial perception is pretty good and I’m sensed when I open up the space? This commotion is much greater than Instant Transmission. Moreover, its statues are everywhere in the Heavenly Fox Nation. Don’t underestimate these statues...”

#### **Chapter 677: Heavenly Fox (4)**

Shi Yu rolled his eyes and said, “There’s the spiritual connection with the totem fox god, and there’s mechanisms in place since we’re in its territory. You’ve already blocked off all the options, let’s stop caring so much. Let’s just do it directly.”

“You’re just too cautious. When the time comes, things will always work out. When I do archaeology, it gets to my head and I never consider the risks!”

“Damn!” the gem cat muttered. It also felt that it was quite troublesome to think too much. Perhaps the Fox God wasn’t that free!

Just as they finished communicating, a terrifying aura suddenly came from the core of Moon City. A deterrence that shot up circled in the sky, tearing a huge moon mark there.

In Moon City, most of the Beast Tamers and foxes suddenly looked over, as that was the holy land of the Moon God Fox overlord!!

As the wind and clouds changed, a huge fox more than ten meters long with light golden hair and starlight lingering around it stepped on the air and soared into the sky, leaving Moon City.

“Lord Moon God!!!”

Seeing this huge fox appear, many mortals and Beast Tamers in Moon City bowed.

< Name > Moon God Fox

[Attributes]: Light

[Race Level]: Mid-level overlord

[Level of Growth]: Overlord

Energy Points: 61,110,000

Shi Yu was stunned for a moment. He looked at the Moon God Fox that was getting further and further away and pondered for a moment.

Although he didn't know what had happened, the Moon God Fox... seemed to have left its hometown??

"See, everything will work out when the time comes. The Moon God Fox left on its own." Shi Yu thought to himself, "There's no one to watch its house now. Teacher Ying, are you confident that we can sneak to the altar without causing any commotion?"

The gem cat was also silent for a moment before saying, "Let's give it a try."

....

At the same time.

Moon City, City Lord Manor.

In a hall, a middle-aged man in an ancient suit with a moonlight symbol was pacing back and forth.

Soon, a beautiful woman in the same clothes entered the hall. When she saw the middle-aged man, she bowed slightly and said, "Father, you were looking for me."

"Yue'e, you saw the Moon Lord leave the city just now, right?"

The genius Beast Tamer of the Moonlight Family, Yue'e, nodded and said, "Father, did something happen?"

The head of the Moonlight Family said, "Lord Moon Master said that there was a problem with the mystic realm that descended in the south. In order to fight for the ownership of the mystic realm, other factions entered the Heavenly Fox Nation. At the moment, the ruins mystic realm seems to be in a confrontation stage. Lord Moon Master was summoned by Lord Fox God to help."

"Who is it?" Yue'e's expression changed.

"I'm not sure..."

"However, with Lord Fox God and the Holy Maiden present, there shouldn't be any problems..."

The Moonlight family head said, "Yue'e, before Master Yue left, she said that you can enter the Holy Land to cultivate in a day. This means that Master Yue should have chosen you!!"

"Really!!" Yue'e's expression revealed joy. The so-called holy land was the habitat of the Moon God Fox. The moonlight energy there was rich, and the spatial fluctuations were strong. Not only was it suitable for the growth of the fox race, but it was also very suitable for meditation. If she could go there to cultivate, her strength would definitely improve!

“Yeah, this is a rare opportunity!!” The Moonlight family’s master also said with an excited expression, “This is a token left behind by the Moon Goddess that lets you in the holy land!”

....

Shi Yu was very high now. Although the gem cat teacher always looked very unwilling before doing anything and looked like it was very, very difficult, every time he did it, everything seemed to turn out very smooth in the end!!

With the help of the gem cat, they successfully entered the holy land where the Moon God Fox lived. Although there were layers of barriers and restrictions outside the holy land, under Teacher Cat’s powerful spatial attainments, it was like “picking a lock”. They entered very smoothly!!

After entering, the gem cat was already drenched in sweat. It wiped its sweat with its claws and said, “Fortunately, my spatial control doesn’t lack training. Otherwise, it would really be a little difficult.”

“This is it!!” At the same time, Shi Yu had already arrived at the most conspicuous altar in the Holy Land. It was this, identical to the Starry Sky Altar in the countryside of the Seven Islands!!

Shi Yu quickly took out the Space Beast Egg. After absorbing the power of the starlight here, the hatching progress was two out of four...

....

South of the Heavenly Fox Nation.

Outside the legendary mystic realm that had descended not long ago.

Legend Ke and the others, who had already arrived and infiltrated the vicinity, had already made contact with Qu Ling. They also learned something from Qu Ling, who was currently among the Heavenly Fox Guards!

They only felt that it was extremely troublesome, especially Legend Ke himself!!

He didn’t expect that apart from Dong Huang, there were also people eyeing this Iron-eating Beast Ruins.

What shocked Legend Ke the most was that the leader of the other factions who led the negotiation with the Heavenly Fox Nation was actually the controller of the Seven Islands Ke Yuan Financial Group!

Dong Huang, Dragon Palace City, and the Seven Islands searched for a long time but couldn’t find the legendary Beast Tamer of the Seven Islands who used the power of Yun An to carry out biological experiments!

Why would they care about this ruin?

Could it be that... this ruin was not only related to the Iron-eating Beast, but also Yun An?

## **Chapter 678: Shi Yu vs Fox God**

Moon God Fox Holy Land.

At this moment, the pet egg on the Starry Sky Altar was absorbing the faint golden light.

Under the illumination of the faint golden light, the white and purple-striped pet egg continued to emit a halo.

Shi Yu remembered that the last time he was on the Seven Islands, the starlight that connected the altar to the starry sky seemed to be white.

And this time, it turned pale gold.

What was the science behind this?

Both Shi Yu and the gem cat were very curious.

Unfortunately, they didn't have much research on the power of the starry sky. Even Susu, who had mastered the Star Sea skill, couldn't analyze what was going on with this starlight.

"Forget it, I'll just follow the inheritance left behind by the Space Emperor."

Shi Yu gave up on researching. Instead of wasting time on this, it was better to continue researching telepathy.

In the two months of bitter cultivation in Icefield City, the increase in physique was not what Shi Yu cared about the most in the past two months.

What concerned him the most was the other changes in his body after he ate the Undying Fruit, which increased his soul power!

After his soul power increased, he felt that his telepathy talent was more useful.

Using Baby Ginseng and Ling's description, it was just an ordinary conversation when Shi Yu used telepathy to talk to them previously.

However, recently, Shi Yu had used telepathy to talk to them. It was as if the power of the heart could touch their hearts like invisible hands.

It was as if Shi Yu's spiritual power had materialized.

This discovery surprised Shi Yu.

At the moment, in the world, the highest record for Beast Tamers with the gift of telepathy was level eight. The records regarding level-seven telepathy and level-eight telepathy after level six were quite comprehensive.

They had only expanded the range of their telepathy. There were no other special changes. A situation like the one Shi Yu's pet sensed didn't exist at all.

Shi Yu tried using the mechanical Tyrant Dragon and the Duckbill Beast again. Unfortunately, they didn't experience the same feeling as Baby Ginseng and the others.

This made Shi Yu certain that only the six pets he had contracted could sense the change in his telepathy talent.

This speciality was like a Beast Tamer with a “fire-element strengthening talent”. The strengthening power could only be added to the pet he contracted.

[After the soul power is strengthened, it can allow the telepathy talent to undergo some special changes.]

Of course, this enhancement was probably not something that simple pet feedback strengthening could do.

Otherwise, the Spirit Medium Beast Tamer who had contracted many undead would have long discovered this change.

Obviously, the Undying Fruit’s strengthening of Shi Yu’s soul power was very huge.

Right on the heels of that, the strengthened soul power and telepathy produced some unknown changes.

For Shi Yu, this novel thing was completely worth spending time exploring. In any case, he was free while waiting for the cooldown time and the hatching of the pet egg.

Shi Yu sat in the holy land of the Moon God Fox and meditated, his imagination running wild.

“We can try to develop the telepathy talent...”

“Ordinary Fusion Talents can only fuse with one pet. Ordinary telepathy Talents can only talk to life, but Emperor Wu’s Fusion Talent can fuse with multiple pets. As for the archeologists of Bureau 11, not only can they talk to living creatures, but they can also listen to the voice of everything.”

“Every Beast Taming Talent is definitely not as simple as it looks. As the individual is different, as the Beast Tamer develops deeper, it’s possible to develop new usage methods or even mutate.”

“I ate a Mythical resource, and after I die, I can even become a totem-level undead. Then, it’s impossible for me to not change at all when I’m alive. The Undying Fruit is already slowly strengthening my soul power... And such strengthening clearly caused some mutations in my telepathy talent!”

“According to the description of Baby Ginseng and the others, it was an ordinary conversation previously, but now, it’s like I’m using both hands and a mouth? It feels real?”

Just from this description, Shi Yu had many thoughts...

At the moment, apart from the pets he contracted, other pets like the Tyrant Dragon and the Duckbill Beast couldn’t experience this feeling. But, as he developed his telepathy, was it possible for them and even the pets contracted by others to experience it?

Generally speaking, telepathy was not mandatory. Only when one’s life opened their mind could they communicate. For example, when some Beast Tamers fought Beast Tamers with telepathy talent, no matter what opponent they fought, they would seal their pets’ and their own minds to avoid external interference.

They only retained the right to communicate telepathically with their pet and tried to concentrate the most.

Therefore, Shi Yu was wondering if it was possible for his telepathy to ignore the other party's mental seal and forcefully enter the communication space to apply his thoughts to the other party.

It could even imitate the telepathy of the Beast Tamer of the other party's pet and give the wrong fatal command to the pet?

If this could be done, Shi Yu felt that it would be very annoying. In high-level battles, an instant of absent-mindedness was almost fatal.

Of course, Shi Yu felt that this kind of "dirty trash talk" battle method was meaningless. It didn't match his handsome style at all.

He was still wondering if there were any other ways to train telepathy into a battle talent apart from this method.

## **Chapter 679: Shi Yu vs Fox God (2)**

Since ancient times, there had never been a Beast Tamer with too powerful a telepathy talent. It was because the telepathy talent didn't have much achievements in the battle direction.

If he could develop the function of the telepathy talent in battle more, Shi Yu felt that his battle power could still go up another level.

His train of thought was also very simple. Most strengthening talents strengthened the power of pets by consuming the power of Beast Tamers.

Because of this, many Beast Tamers would be very weak after battle.

During this strengthening process, there was a special "connection" between Beast Tamers and pets.

If Shi Yu wanted to use "telepathy" to strengthen his pet, he would definitely have to build this "connection".

This connection was closer to a "materialized connection". If it were before, telepathy that could only be used as an "ordinary conversation" ability would definitely not be able to achieve a deep connection. However, now that the telepathy had mutated, Shi Yu felt that he could give it a try.

However, he had been experimenting for a long time. At the moment, there were no good effects.

And because it wasn't anything important, he didn't trouble Ling to start a research project alone. After all, Ling was busy enough at the moment. Every project was important.

At the moment, Ling was trying to study a "skill alloy" and "new inscription". In Ling's research, the armor of the Nine Li Battle Beast was inextricably linked to the body structure in its body.

By eating different metals and carving special patterns on the armor, it could combine the metal it ate to change the body structure of the Nine Li Battle Beast and let it complete its evolution.

The evolution of the Nine Li Battle Beast for the first inscription and the second inscription relied on this. Even the Demon God Iron-eating Beast relied on this mechanism.

Therefore, Ling had been using this racial mechanism to create a special alloy food according to the superalloy technology. It planned to cooperate with the inscription method to change Eleven's compatibility with the "superalloy" skill.

The tenth inscription!

Since ancient people could develop nine inscription evolution paths and figure out the evolution path of the iron-eating beasts without any scientific research conditions, Ling believed that it could do it too.

Shi Yu let Ling study it. As for the development of telepathy, before Ling was busy, he could only rely on himself to explore blindly.

"Since telepathy is mutated through the strengthening of the soul..."

"Perhaps I can strengthen my pet through the method of a 'spirit body'."

"What's the most common strengthening method for spiritual bodies? Obviously, 'possession'."

"If I can use my soul power as a shell, my telepathy as a bridge, and my mental and physical energy as energy, I can condense a substitute and possess my pet. Perhaps my pet's strength can also be strengthened."

"I don't think there's such a Beast Taming Talent, right?"

"Condense your body's energy and transform into a pure energy body, which is a shrunken version of yourself. Possess your pet and let yourself become one with your pet."

"Then here's the problem. What should I do?" Shi Yu muttered. He couldn't mobilize his soul, spirit, and physical energy... let alone condense a Nascent Soul.

But according to what he knew, mixed-blood Beast Tamers could mobilize some extraordinary power.

For example, some mixed-blood Beast Tamers could awaken mental deterrence after reaching the Legendary level.

Some Beast Tamers with mixed blood could even try to let their souls leave their bodies after reaching the Legendary level.

But this had nothing to do with pure-blooded human Beast Tamers.

Could it be that he really had to stop being a human to play the game happily?

No... No!

Now, Shi Yu had a new idea every day. Today, he even wanted to condense a "Nascent Soul".

Beast Taming Immortal Cultivation!

“Stop dreaming.” As Shi Yu was engrossed in his fantasies and experiments, a day passed in the blink of an eye. Before the current Space Beast Egg could finish absorbing the energy, the gem cat kicked Shi Yu awake and said, “Stop dreaming. The barrier has been opened. Someone entered.”

“F\*ck.” Shi Yu suddenly woke up and said, “Why is the Moon God Fox back so quickly?”

He took a quick look at the egg and heaved a sigh of relief.

“But it’s not a big problem. The egg will be finished absorbing in a while!”

“This time, even if the Fox God comes, we have to hold on!!”

Now, the light of the egg had gradually dimmed. According to his previous experience, it would take less than half an hour.

“Don’t worry, it’s not that Moon God Fox. It seems to be a human. It’s not very strong. You settle it yourself, ha ~”

Just as the gem cat’s sleepy voice fell, the surrounding spatial power fluctuated. A woman in white ancient clothes and a monarch-level Star Moon Fox were teleported into the Moon God Fox Holy Land and not far from Shi Yu and the others.

At this moment, just as they descended, the eldest daughter of Moon City, Yue’e, was filled with joy. Beside her, the Star Moon Fox was also filled with joy.

After all, it was too rare to enter such a holy land to cultivate.

However, their expressions suddenly stiffened. They saw Shi Yu, who had disguised as an old man with a sinister aura, sitting beside the Moon God Fox’s altar and looking at them with empty eyes.

“Who are you...” Yue’e was immediately shocked when she saw Shi Yu.

There shouldn’t be anyone else in the Moon Master Holy Land. She had been chosen by the Moon God Fox to cultivate, but she had never heard of anyone else being here.

< Name > Star Moon Fox

[Attributes]: Light

[Race Level]: High-level monarch

### **Chapter 680: Shi Yu vs Fox God (3)**

[Level of Growth]: Monarch Level

Energy Points: 1,660,000

When Shi Yu saw the other party, he instantly determined her identity. He and Buggy had investigated many memories and recognized her at a glance as the eldest daughter of Moon City. She was also the only Beast Tamer in Moon City who had reached level six under the age of 30.

It was a little weak. Not to mention comparing it to the Beast Tamers in the top 100 of the Dong Huang Sequence, even compared to those guys in the National League, this girl wasn't strong.

According to the information gathered by Shi Yu, the elite Beast Tamers of the Heavenly Fox Nation basically only cultivated spatial strength and environment. They didn't go bigger in scale. They only contracted one fox in their lives and didn't contract a second pet. From a certain perspective, they were also dedicated.

However, this was also normal. The fox race was supreme in the Heavenly Fox Nation. How could they let their poop pickers serve other foxes at the same time?

"Jiejiejie, since you've discovered us, stay..."

Shi Yu's hoarse voice sounded. Under the other party's panicked expression, a gray mist appeared above them!!

In the gray mist, dark blue eyes lit up. Accompanied by a terrifying deterrence, a huge tiger spirit that emitted an evil aura appeared.

Overlord-level, Ice-Eyed Tiger Spirit.

At this moment, the gem cat couldn't help but complain beside the alternate space. F\*ck, this guy was even addicted to cosplaying now? What was with that laugh?! Seeing this evil Necromancer cosplay, it decided to give full marks!

"Don't kill them. Their social status isn't low. Search their souls first and see if there's any valuable information." Shi Yu gave Chi Tong an order in his heart. The Tiger Spirit was controlled by the bone sword, the bone sword was controlled by Chi Tong, and Chi Tong was controlled by him. This layer of nesting dolls made Shi Yu feel that it was quite troublesome.

Chi Tong: ...

Wasn't this just searching their memories? What did this guy mean when he changed it to the "searching of souls"... With the director experience of filming a few movies, Chi Tong also gave Shi Yu full marks. The next time Legend Mu Huiyin started filming, it would invite Shi Yu to be the villain.

The person who came was only a weak chicken. Shi Yu and the gem cat didn't mind, but this little genius of Moon City and the Star Moon Fox were extremely frightened.

Overlord-level undead!

Legend level Spirit Medium!!

They were in trouble!

Moon City... Moon Master Holy Land... An invader had appeared!!!

Unfortunately, it was too late. Under the perfect deterrence of the overlord level, the human and fox's consciousness were already on the verge of fainting. A huge crisis lingered on their bodies.

However, just as Yue'e and the Star Moon Fox thought that they were about to die, suddenly, in the center of Moon City, a huge fox statue suddenly lit up and similarly erupted with a huge might!!

Buzz!!!

This power directly acted on Yue'e and the Star Moon Fox. The powerful force was even stronger than the Ice-Eyed Tiger Spirit. In an instant, it sent the Ice-Eyed Tiger Spirit flying.

At this moment, Shi Yu and the hidden gem cat's expressions suddenly changed. They felt an overlord-level power. This power was even stronger than the Ice-Eyed White Tiger and even the Mountain Tortoise when they were alive!!

As for the Star Moon Fox and Yue'e, who had been saved by the mysterious power, their faces were pale and they were drenched in sweat.

"Wu ~ ~ ~" Her Star Moon Fox let out a miserable cry.
