

## Beast 691

### Chapter 691: First Totem Kill (3)

When Shi Yu heard that, his expression changed. Therefore, the end of the Iron-eating Beast race's inheritance was indeed caused by a race being afraid of the Iron-eating Beast's powerful potential and exterminating the Iron-eating Beast.

Shi Yu looked into the depths of the ruins.

"Wuu!!!" Eleven also looked into the depths of the ruins angrily.

Ji Mengzhu saw the expressions of Shi Yu and the others and said, "So I want to ask, the Iron-eating Beast race now..."

Shi Yu said, "Senior Ji, the Iron-eating Beast race hasn't been completely wiped out. Although there aren't many left, there's still a small number of them living in various places in Dong Huang. Unfortunately, their inheritance was broken in the war and they became ordinary transcendent races."

"Of course, because a genius archeologist appeared in Dong Huang and recovered the evolution method of the Iron-eating Beasts, the Iron-eating Beasts now have extraordinary status in Dong Huang."

"And the Iron-eating Beast cubs you teleported out are also fine. They're living normally nearby."

"Is that so?" Ji Mengzhu heaved a sigh of relief. This was also a blessing in disguise. At least their mission didn't fail, and the Iron-eating Beast race wasn't completely destroyed by the totems' genocide order.

However, Ji Mengzhu looked at Shi Yu and Eleven and still didn't understand. Didn't they say that the Iron-eating Beast's inheritance had been broken? This didn't look like the inheritance had been broken. This Iron-eating Beast was simply stronger than any Iron-eating Beast of the same level at the peak of its development.

She decided that it was no longer important.

She said, "Thank you for letting me hear such good news at the last moment of my life. You just said that you're here to investigate this ruin, right?"

Shi Yu nodded and said, "Yes..."

"This ruin is just as I said just now. There's nothing special about it. However, when we were fleeing, we brought a large number of Iron-eating Beast cultivation resources. Take these resources back to the country."

"From the current situation, the outside world is a totem country, and it might be very dangerous. You're not strong, so I'll try my best to activate the power of the sealed ruins and trap the totems and overlords outside for a while. Use this time to escape."

"If possible, it's best to take away the Iron-eating Beasts that I teleported out to the outside world too."

“Moreover, it looks like the Yun clan hasn’t been completely severed. Take these Iron-eating Beasts and those meteorite fragments and be careful of the Yun clan along the way. Just now, I sensed that you should still have a totem-level companion, right? It should be Dong Huang’s guardian? With its help, you don’t have to worry too much.”

Shi Yu was delighted. There were indeed iron-eating beast evolution materials!!!

“Wait, Senior Ji, what’s going on? You said this is the last moment of your life...” Shi Yu was stunned.

Ji Mengzhu smiled and said, “That Yun clan general might break free of the seal at any time and descend into the world again. I naturally can’t let it escape.”

“It’s breaking free from the seal. Strength will continue to deplete.”

“I’ll try to detonate the entire seal ruin at the weakest moment after the other party breaks free of the seal. Legendary sealing ruins, if detonated, can definitely completely kill the other party.”

“It’s because of this that I chose to become the array spirit to seal the ruins. You don’t have to worry about me. I’m already a dead person. To be able to avenge my dead companions at the last moment... I’ve also heard pretty good news from you. I no longer have any regrets.”

Shi Yu opened his mouth slightly and said, “Wait, Senior Ji, if you don’t detonate the ruins, can you still exist in the form of an array spirit without dying?”

“Huh?”

Ji Mengzhu said, “What are you planning?”

“I mean, if the Yun race general breaks free from the seal, so be it. Don’t care about it. As long as there’s life, there’s hope. After it breaks out of the seal, we’ll use other methods to kill it. Isn’t it the same? We don’t have to sacrifice you and the ruins.”

A legendary Iron-eating Beast cultivator and a legendary ruin... It would be a pity to detonate it!!!

If she didn’t want this ruin, she could give it to him.

Even without the sealing function, it was still an ancient legendary ruin...

Ji Mengzhu shook her head and said, “After it breaks the seal, it will definitely choose to destroy the ruins inside. Although it doesn’t have the ability to destroy the ruins, as the spirit of the ruins, I definitely can’t escape its attack.”

“Moreover, even if you can escape with me, this Yun race general isn’t that easy to kill.”

“Since you know Yun An, you should know its terrifying power. These meteorites are totems that were bestowed power by Yun An. They also hold that terrifying dark power. Even if you can defeat them, facing the terrifying self-destruction they do before they die, it’s definitely a fatal crisis.”

“Even if it’s a top-notch totem, it’s unwilling to face an ordinary Yun Race totem that was given power by Yun An.”

“Therefore, in order to reduce the casualties and take revenge on the outside world and Dong Huang after it escapes, it’s the best choice for me to send it off one last time,” Ji Mengzhu said. “If it recovers to its peak, it will definitely be a disaster for Dong Huang.”

“There’s a way,” Shi Yu said. “There should be enough reinforcements arriving next. They might even bring forbidden weapons. If there are forbidden weapons, there won’t be too many casualties if we kill this Yun Race general.”

“Forbidden weapon?” Ji Mengzhu was stunned. “What’s that?”

“A super lethal weapon that can instantly kill ordinary totems, top-notch totems, and even totem half-gods. The current Dong Huang relied on this weapon to end the totem war.”

## **Chapter 692: First Totem Kill (4)**

“The current Dong Huang is very powerful.”

“In the most recent totem war, the human alliance of the seven countries used a forbidden weapon to destroy three demigods. Therefore, not only in the east, the totem wars in the world have also ended.”

“Therefore, as long as this weapon arrives, you don’t have to worry about this Yun Race general causing too much damage at all. According to what I know, there should be a cleansing-type forbidden weapon in the country. It’s not difficult to cleanse radiation of this level.”

“At that time, when the Yun race general breaks through the seal, you can evacuate with the ruins. The Fallen Race general will be handed to the current Dong Huang to settle!”

Shi Yu looked at the radiation on the ground. A radiation of this level should be far inferior to Yun An. At most, it was stronger than that Poison Dragon Totem. There was no need to worry at all.

There was no need to let the gem cat and the butterfly god take the risk. They could wait for weapons!

If possible, he didn’t want this senior similar to Senior Panda to sacrifice herself.

“There’s such a thing?” Ji Mengzhu revealed a shocked expression.

“Yes, it shouldn’t be long before reinforcements arrive. Even if they don’t carry forbidden weapons now and return to get them, it shouldn’t be long. Two days should be enough,” Shi Yu said.

Ji Mengzhu suddenly felt that 2000 years in the future was extremely unfamiliar to her.

Forbidden weapons that could destroy three demigods?

How had Dong Huang developed after 2000 years?

Ji Mengzhu was a little tempted by Shi Yu’s words. If she could survive, she naturally wanted to see how the current Iron-eating Beasts were.

“Wuu!!!” Beside him, Eleven was extremely regretful.

It hated itself for being too weak. Otherwise, how good would it be if it could deal with this Yun race general and even the black goat outside?

“If it’s really as you say...” Ji Mengzhu said.

Shi Yu smiled and said, “There’s definitely no problem. At the moment, Dong Huang has even rebuilt the Iron-eating Beast Corps. A female feeder is also in charge of nurturing it. She obtained some of the cultivation methods of the Iron-eating Beast from Senior Chong Xuan. When the time comes, you will definitely be very surprised to see her...”

This was a powerful feeder who had nurtured iron-eating beasts for Emperor Wu 2000 years ago, and it was suspected to be Senior Panda’s ancestor. Shi Yu felt that if the two of them met, Senior Panda should be able to take off. It would be best if she became a disciple!

He couldn’t let her commit suicide.

When Ji Mengzhu heard Shi Yu’s words, she smiled. However, at this moment, with a boom, a huge dark-element energy erupted from afar.

The entire sealed space rumbled and trembled.

The radiation in the entire ruins space was even stronger.

This scene made Ji Mengzhu smile and shake her head with a regretful expression. “Thank you, but it might be too late.”

“It’s about to break free of the seal. I’m afraid it won’t take two minutes. This is a ruin stone containing the iron-eating beast’s evolution resources. Next, I’ll teleport you out of here. Leave it to me to settle.”

“We can’t let it have any chance to escape. I don’t know if Yun An was completely killed by Lord Emperor Wu. Yun An has the ability to revive. The power on these meteorites is very good revival nutrients for Yun An, so you can understand, right?”

“I have a reason why I can’t let it escape from here, no matter what,” Ji Mengzhu said.

A ruin stone appeared in Shi Yu’s hand. At the same time, his expression suddenly changed. Why was it so fast?

Not to mention forbidden weapons, even the first batch of reinforcements might not be able to arrive in time.

According to Ji Mengzhu, it was unrealistic to rely on the gem cat and the butterfly god, because there were still the companions of the Yun general in the outside world.

In a battle, the casualties would definitely be incomparably huge.

“Leave it to me.”

He looked at Ji Mengzhu’s determined attitude, who was determined to sacrifice herself and kill this Yun clan general here.

It was impossible for Shi Yu to understand. Because Ji Mengzhu had grown up in the era of Emperor Wu, she knew better than anyone the threat of Yun An's strength and the Yun clan. Therefore, she was unwilling to let this Yun clan general have any chance to escape.

In her opinion, if the Yun An faction made a comeback because of the breakthrough of this totem, it would be a huge threat to the entire human race and the entire east.

She didn't understand the power of forbidden weapons, but she knew the power of the Yun Race very well. After all, her home was destroyed by them.

"Huh???" Eleven also looked at this auntie who was similar to Lin Xiuzhu. Was she going to sacrifice herself to destroy the sealed monster?

It also had an anxious expression. No, when it grew to the totem level, it could defeat it.

"Senior Ji, where are the artifact of this ruin? Give it to me. I'll take it and bring you away first. Don't care about this guy."

Ji Mengzhu smiled and said, "It's alright."

With that said, she was about to teleport Shi Yu and Eleven. Shi Yu was really frustrated at such a woman who didn't listen to reason.

Seeing that the teleportation wave had already enveloped Shi Yu, Shi Yu suddenly shouted, "Wait."

He used the ruins ring to enter an ethereal state to block the teleportation. At the same time, he said,

"Senior Ji, the inside of this legendary ruin should be able to withstand power enough to destroy totems, right?"

"According to what I know, unless it self-destructs, only demigod-level power can destroy the legendary ruins space."

"You just said that the Yun Race general can't destroy the ruins. He can only break free and leave after dealing with you."

### **Chapter 693: First Totem Kill (5)**

"Then as long as I kill this Fallen Race general inside the ruins, there won't be a problem, right?"

Shi Yu's baffling words stunned Ji Mengzhu.

[Yi! (Leave it to me.)]

Baby Ginseng's voice echoed in Shi Yu and Eleven's minds.

[Yi. (It's just a totem.)]

[Yi! (With the power of the Sun Flame Flower, I can self-destruct and display power comparable to a forbidden weapon. The power of the Sun Flame can instantly cleanse these radiation curses. At the

same time, I can also use this opportunity to try to evolve. Even if I fail, it's not useless. At least I can trade my life for a Yun Race totem. After that, I can also revive in the Beast Taming Space.]

According to its calculations and Ling's calculations, there was no problem.

Baby Ginseng's voice sounded, first stunning Shi Yu and Eleven. Then, they were pleasantly surprised.

Baby Ginseng!

He had almost forgotten that there was still Baby Ginseng.

After using the Time Fruit, the self-destruction of the overlord-level ginseng baby could instantly exceed 100 million energy points. If the power of the Sun Flame Flower was added, it would counter the power of the curse radiation.

Perhaps he could try to deal with a weak totem...

As expected, in such a desperate situation, he still had to rely on Baby Ginseng.

At this moment, Shi Yu was very helpless. "Senior Ji, can you believe me this time? Leave this totem to me to kill."

"What nonsense are you talking about?" Ji Mengzhu looked at the level-six Beast Tamer in confusion.

A level-six Beast Tamer threatened to deal with a Meteorite Totem?

She no longer had time to deal with Shi Yu, but at this moment, Shi Yu summoned another pet.

A ginseng baby less than half a meter tall.

Seeing this ginseng baby, Ji Mengzhu was completely stunned. She didn't understand what Shi Yu was doing.

At the same time, this ginseng baby was holding a resource that Ji Mengzhu completely didn't understand!!

That was...

Something that contained solar energy, it was at least a legendary resource!!!

"Believe me!" Shi Yu said.

Believe in Baby Ginseng!

"Yi!!!"

After thinking for a long time, Baby Ginseng decided to give it a try. At the moment, Eleven, Buggy, and Chi Tong were already stronger than it. If Susu and Ling caught up later, after everyone reached the overlord level, Baby Ginseng could already predict that it would definitely be at the bottom of the team!!

This wouldn't do!

Evolve as soon as possible!

If it failed now, it could still have more time to condense the time mark. But if it killed this totem, its battle results would increase. If it dawdled for a long time before trying and failing again, it would drag on even longer. Moreover, failure had no value!

It made a prompt decision!

Moreover, it might not necessarily fail.

Baby Ginseng held the Sun Flame Flower and looked at Eleven.

Its gaze was firm. It meant that it would deal with the great enemy of the Iron-eating Beast Race!

Don't underestimate the third place in the team!!

The mutation this time was different from the last time. It should be very painful. Whether it could withstand the mutation power of the Sun Flame Flower was the key to whether Baby Ginseng could succeed.

It had already endured the impact of adding points to super skills, so it definitely could this time!

Moreover, because there was a reason why it had to succeed this time, Baby Ginseng felt that there was no problem.

It was the first pet in the team to kill an overlord, and it would also be the first pet in the team to kill a totem!!

It was the number one in the team!

"Wu wu wu!!" Eleven was stunned.

"Yi!!"

Baby Ginseng turned around.

It took a deep breath.

Under Ji Mengzhu's shocked expression, it stuffed the Sun Flame Flower into his mouth.

A ginseng baby... ate the resource that contained the legendary power of the sun!!!

Buzz!!

At this moment.

The legendary resource in Baby Ginseng's body, the Sun Flame Flower, directly emitted a hot light.

Then, Baby Ginseng began to absorb the power of the Sun Flame Flower through the mutation...

Flames suddenly appeared on Baby Ginseng's body.

Its fair and tender skin immediately looked like it had been roasted red.

A tempting hot fragrance spread.

This time, Baby Ginseng directly absorbed the power of the Sun Flame Flower to the greatest extent. With the mentality that it would die if it didn't succeed, it wasn't as timid as before!!

At the same time, it activated the power of the Time Fruit and entered its peak state!!

The form it displayed was a body becoming redder and redder, and its expression became more and more frozen. Then, with a boom, Baby Ginseng's entire body was wrapped in Sun Flame flames.

The flames that shot into the sky swallowed Baby Ginseng's entire body, making Ji Mengzhu open her mouth wide.

Baby Ginseng was ignited!!

But the key was that Baby Ginseng was a wood-element pet. It wasn't a mainstream strategy!

Moreover, as she sensed the rising aura of this ginseng baby, Ji Mengzhu was even more shocked!!

Overlord level!!!

No, its aura even exceeded a top-notch overlord!!!

"It's alright."

Shi Yu said solemnly.

Although Baby Ginseng was ignited, the mutation was still holding on. The flames didn't cause fatal damage to Baby Ginseng.

"Yi..." In the flames, Baby Ginseng forced its eyes closed with a painful expression.

Eleven was already in a lot of pain when it used the Tempered Steel skill and the Sun Flame to train its physique.

And now, Baby Ginseng, who had modified its body through the mutation and the legendary Sun Flame power, was in more pain than Eleven.

However, this was only the initial stage!

At this rate, even if it succeeded, it would be equivalent to a gamble. No one knew the direction of the mutation.

Therefore, Baby Ginseng had to consciously control the mutation direction next.

Of course, the price of doing this was that the risk of failure would be higher. Now that the mutation had failed, perhaps there was no need to die, but if it made that attempt and the mutation failed, there was only death.

## **Chapter 694: First Totem Kill (6)**

However, it didn't want to survive this time!

“Yi—!!”

As Baby Ginseng shouted, the flames on its body became stronger and stronger.

At this moment, Baby Ginseng’s body began to emit red and green energy. A large amount of juice came out of its body. Then, the flames on its body seemed to have undergone a qualitative change, instantly evaporating the sweat flowing down Baby Ginseng!

It had already begun to control the power of the sun through the mutation to burn its life force during the mutation.

It hoped to use this to erupt with greater evolution potential!

Boom!!!

In just an instant, although it had yet to mutate successfully, Baby Ginseng could already feel the huge potential exchanged for burning its life force. At the same time, the intense pain also made Baby Ginseng faint!

The Sun Flame Flame flames that spread more than ten meters tall outside its body erupted with power under the enhancement of the light and heat that dispersed during the burning process, shocking Eleven beside it.

The one with the most direct view was Shi Yu. At this moment, although Baby Ginseng had yet to successfully mutate, its energy level had already begun to increase drastically because it was burning its life force!!

“99,990,000!!” It doubled!

“It’s about to exceed 100 million!!!”

This wasn’t the energy value after Baby Ginseng evolved and used the explosive skill, but the energy that erupted from its burning life force. Although it wasn’t as high as the increase in the Time Fruit, this was a completely different increase.

After Baby Ginseng reached the overlord level, eating the Time Fruit wouldn’t increase its strength much. However, through the Sun Flame burning its life force, even if it reached the overlord level, the totem level, and the Mythical level, it was still effective!

Moreover, as it grew, advanced, and evolved, the increase would be higher and higher! The duration would also increase! It was not something that could be compared to a one-time eruption.

Moreover, it could also multiply the increase of the Moon Explosion! At the moment, it could also multiply the power of time!

Shi Yu thought for a moment. If Baby Ginseng had 50 million normal energy points after advancing to an overlord, then after burning its life force and erupting, its energy level could instantly exceed 100 million. Then, it could detonate through the expert level Moon Explosion. That would be 300 million units of self-destruction!!

It was not inferior to ordinary forbidden weapons at all!

Entry-level Moon Explosion could double the energy when Baby Ginseng self-destructed.

Expert level, three times.

A 300 million-level energy eruption was comparable to a forbidden weapon. It heavily injured totems and even killed weaker totems!!

If Moon Explosion reached transcendent, it could strengthen its energy more than ten times like the Seven Islands Giant Ape Totem. That would be more than a billion levels of self-destruction!!

Of course, whether this kind of battle strategy could succeed depended on the subsequent mutation of Baby Ginseng.

This time, it only relied on the power of legendary resources to forcefully burn its life.

Shi Yu and the others looked at Baby Ginseng and became nervous.

Especially Shi Yu, who had a contract connection with Baby Ginseng. At this moment, he also felt the heat all over his body, the heat in his brain, and the heat in his soul.

This burden was even stronger than when Chi Tong possessed him.

“Ning...” Susu’s water couldn’t help Baby Ginseng. It could only appear beside Shi Yu and help him cool down.

At this moment, Baby Ginseng had also reached the most critical moment. It was like a plant that had been thrown into the sun. Its life had almost turned into ashes.

“It has to succeed.” At this moment, as long as Shi Yu communicated telepathically with Baby Ginseng, his soul and spirit would be extremely hot and incomparably painful. However, during Baby Ginseng’s mutation, Shi Yu was still talking to Baby Ginseng at all times because he could sense that if Baby Ginseng couldn’t sense the situation outside, its consciousness would probably have already disappeared.

“Yi...”

At this moment, Baby Ginseng’s consciousness was scattered. It was only relying on its instincts to let its body modify and fuse with the power of the sun that was burning its life.

Success? Failure?

Baby Ginseng no longer sensed anything, because under the burning of the Sun Flame’s power, its life seemed to have reached the end. Baby Ginseng was very familiar with this feeling. It was the feeling of death.

It had already experienced it the first time it self-destructed.

It also knew very well what would happen next.

As it died, his consciousness would be reborn on the time mark and revive, but...

At this moment, Baby Ginseng thought a lot.

If it failed, it was nothing. It could still be revived.

However, it would have completely missed the opportunity to become stronger and even wasted a legendary resource.

At the same time, no one knew how long it would take for the next mutation evolution.

But if it succeeded, it could destroy the totem and become Eleven's idol, the strongest battle power in the team!

It was definitely going to get this honor!!!

Boom!!!

Baby Ginseng, whose entire body was flickering with flames, erupted with a terrifying speed, turning into a fiery red flash. It relied on its instincts to rush towards the sealed location of the Yun Race General.

At this moment, it was like Eleven, who had opened its lightning armor. Its speed was incomparably fast, and it was wearing the Sun Armor. In a flash, the surrounding radiation power was almost instantly burned clean by the Sun Flame and purified.

Seeing this scene, Ji Mengzhu was completely stunned. She couldn't think straight now.

She didn't understand why a level-six Beast Tamer's contracted ginseng baby would erupt to the overlord level.

After erupting to the overlord level, it could also erupt with power comparable to totems.

## **Chapter 695: First Totem Kill (7)**

And now, what was this Sun Baby Ginseng going to do??

"Senior Ji, now's not the time to be in a daze. Next, listen to my instructions..."

"Take me... to the edge of the ruins!!!"

Ji Mengzhu looked at a gray-robed old man in a daze. The other party's series of actions made her, a legend level Beast Tamer, a little confused. Were all future Beast Tamers like this?

....

In the outside world.

It had been a while since the mutation of the ruins.

The Fox God, the Black Goat, and the others looked at the ruins with shock.

At this moment, a crack appeared in the door of the ruins. The dark-element radiation power spreading from it became stronger and stronger, making the Fox God's expression extremely serious!!

Perhaps the sealed creature inside was really going to break through!!

At this moment, the Fox God's expression was unfriendly, while the Black Goat's expression was ecstatic.

"Senior, break the seal!!!"

"At that time, we'll revive the king together!!"

"Listen to my command, everyone retreat!!" At this moment, as the ruins changed, the radiation power became stronger and stronger. The Fox God immediately instructed all his subordinates to retreat. Otherwise, this radiation power would cause indelible damage to those weak Heavenly Fox Beast Tamers.

"Wu ~ ~ ~"

"Wu ~ ~ ~"

Under the Fox God's command, the overlord foxes swept up the Heavenly Fox Army below and quickly retreated.

Even the Fox God left with the Heavenly Fox Saintess. Now, it had already expected the situation to be bad. If the monsters inside broke through the seal, the Heavenly Fox Nation would probably be in danger. Not to mention obtaining legendary resources, it would be good enough if they didn't lose resources.

It had to call its bootlickers over to help as soon as possible.

Only Black Goat and Bai Chuan stayed!

"Will there be meteorite fragments inside?" Ke Yuan's Bai Chuan Legend's gaze was burning with anticipation.

However, at this moment, the most painful thing was still the gem cat in the alternate space. It didn't leave. Instead, it returned and searched for Shi Yu's traces, but no matter how hard it searched, it couldn't find him!!

The only possibility was that Shi Yu, this unlucky thing, had fallen into the ruins!!!

Now, as the ruins mutated, the gem cat was even more certain!!

"Ahhh, you unlucky thing."

"However, you have two pieces of protection, so you should be fine..."

....

Inside the sealed ruins.

In a huge sealing crystal that connected to the ground of the ruins, a huge black yak kept emitting a dark aura. This huge crystal that sealed it for more than a hundred meters was surrounded by dark traces.

Countless dark power spread from it. The originally transparent crystal had already been dyed black 99%.

Crack.

Countless cracks cracked from the seal crystal. Inside, a huge black yak more than a hundred meters tall opened its eyes with difficulty.

So tired, so sleepy, so hungry, so fragrant...

What exactly was with this fragrance...

Its body rejected it, but it was also extremely tempting...

“Finally, it’s finally broken... Human, I won’t let you off!!!”

“Roar!!!!” Accompanied by a terrifying vibration, the entire seal crystal completely cracked!!!

At the same time, the huge black yak directly opened its eyes. In an instant, it recalled the cause and effect.

During the process of chasing after the Iron-eating Beast race, it was sealed by a human with a legendary sealing space!!

However, compared to its huge anger, what made the Black Meteorite Yak suffer even more was that it was so hungry, so hungry. Although time had almost stopped flowing, the power it consumed to break free from the seal was also incomparably huge.

At this moment, it was even hungrier and crazier than the Vortex Demon Beast that had broken through the seal of the Chaotic Sea.

At this moment, an energy wave that made it extremely disgusted and excited arrived beside it.

What he hated was the power of the Sun Flame, and what he was excited about was Baby Ginseng’s pure life force...

At this moment, the crazy Black Meteorite Yak no longer cared about anything, but under extreme hunger, it could only accept it.

Eat it and it could immediately recover some strength!!!

“Yi... (You, are already dead.)”

At this moment, Baby Ginseng, who was close to the Black Meteorite Yak, had an indifferent gaze towards life and death.

The next was Yun An. If Eleven couldn’t solve it, it could only let the towering emperor do it.

Baby Ginseng’s original idea was to absorb the power of the Sun Flame. If the evolution failed and it couldn’t withstand it, it would directly self-destruct and detonate its power and the power of the Sun Flame Flower to kill the Black Meteorite Yak and revive.

And if the evolution was successful, it would also directly self-destruct, kill the Black Meteorite Yak, and then revive.

Regardless of whether the evolution mutation was successful or not, it had to self-destruct beside the Black Meteorite Yak and revive.

Originally, when Baby Ginseng arrived, it had already realized that the mutation evolution might have failed.

However, at the most critical moment, under the burning of the Sun Flame, its will level advanced to the overlord will. Under the stimulation of the overlord will potential, it successfully controlled the power of mutation.

Evolution, success!

The time mark automatically updated its current state.

Of course, what awaited the Black Meteorite Yak was still the same outcome.

With a boom, Baby Ginseng fell like the sun. The sky seemed to have changed drastically, and the entire sky first darkened. With a loud bang, it created a world that belonged to the night.

The dark sky and bright night moon made everything silent.

Then, a dazzling sun slowly rose and lingered with the moon.

### **Chapter 696: First Totem Kill(8)**

Under the alternation of the sun and moon.

Boom!!!

Endless strong light spread in the surroundings. At this moment, the Black Meteorite Yak was instantly awakened from its madness, its eyes filled with indescribable shock.

In the next moment, its entire body was directly swallowed by strong light and flames. A terrifying energy wave shook the sky and earth, forming a spreading explosion. Everything in the range of the explosion would directly sublimate.

“What exactly is this!!!” The Black Meteorite Yak had just woken up and broken through the seal. At this moment, it didn’t know what was going on at all. Its gaze was filled with fear, and it felt that a power that threatened its origin was corroding its weak body.

Bit by bit, its body slowly turned into dust and floated away under the flames.

The explosion spread very quickly!

It directly caused a strong vibration in space.

If it weren’t for the fact that the legendary ruins could withstand demigod-level attacks...

At this moment, the entire ruins space would have probably collapsed.

But even so, the terrifying power of the self-destruction was extremely terrifying.

For example, the current spirit of the ruins, Ji Mengzhu, was quite terrified.

The strong wind of the explosion spread crazily. At a speed of hundreds of meters per second, it quickly spread for more than ten kilometers before gradually slowing down.

Although the destructive power continued to weaken, it instantly made the entire legendary ruin into a mess. Of course, during this process, the power of the sun surprisingly burned and cleansed most of the dark radiation inside the ruin!!

At this moment, under Shi Yu's suggestion, Ji Mengzhu, who had run to the edge of the ruins with Shi Yu, was still filled with incomparable shock.

She looked at the gray-robed old man as if he was looking at a monster.

"Tch, it's not easy to absorb moonlight here. Seems like this is the biggest explosion it can get?" Beside Ji Mengzhu, Shi Yu curled his lips and chuckled, making this woman from 2000 years ago's worldview collapse a little.

What happened just now?

At this moment, as the spirit of the ruins, she could clearly sense that be it that ginseng baby or the sealed Black Meteorite Yak, their life auras had already disappeared!!

Self-destruct?

However, although the self-destruction didn't reach the maximum power, because the power of the sun countered the dark power, in addition to the fact that the Black Meteorite Yak was extremely weak, Baby Ginseng still seemed to have succeeded.

However, although the Black Meteorite Yak's life aura had disappeared, it wasn't that miserable. It wasn't absolutely incinerated. Of course, only a small portion of its body was left, but it was inevitable.

At the same time, a mini ginseng baby was gathering in Shi Yu's Beast Taming Space.

After the Time Mark reached the expert level, it was much more convenient than before. It could directly gather its body in the contractor's Beast Taming Space, and the contract didn't have to be broken.

At this moment, the new ginseng baby was still not much different from before, but to be honest, its ginseng flower emitted a light like the sun and was extremely hot.

It was as if a sun flower had bloomed on the ginseng.

< Name > Undying Sun Ginseng

[Race Level]: High-level overlord (Quasi Mythical)

[Level of Growth]: Monarch Level

[Super Skill]: Source of Life (Expert+11), Time Mark (Expert), Moon Explosion (Expert), Plant Control (Expert+2), Life Fire Seed (Initiate)

[Life Fire Seed]: A super wood and fire dual-element skill. Burn life force and stimulate potential!

Energy Points: 14,880,000

....

In the outside world.

The huge door of the ruins was still completely cracked.

The Black Goat Totem and Legend Bai Chuan looked here in anticipation. As the crack grew larger and larger, a huge body fell from the ruins.

It was a roasted cow that looked like it had been roasted by flames. Its body had already turned into charcoal, and there were no longer any signs of life. Even the radiation on its body was burned clean by an unknown power.

From the energy fluctuations, it looked like it had just been burned to death.

The terrifying fluctuations spreading in the crack could be clearly sensed even in the outside world!

With a boom, it fell from the ruins.

The pupils of the Black Goat Totem and Legend Bai Chuan constricted in confusion.

Their expressions were full of shock.

What happened...

In the distance, the Fox God, the Gem Cat, and the Butterfly God looked at the totem body that fell from the legendary ruins as if it had been roasted. Their gazes were shocked, not understanding what had happened!

At this moment, two undead suddenly appeared in the crack of the ruins. It was a tiger spirit and a dragon spirit. They roared and rushed out. Under everyone's shocked gazes, they quickly dragged the huge totem corpse back into the ruins. Then, the crack of the ruins quickly repaired, making everyone even more stunned.

## **Chapter 697: Evolution of the Undying Sun Ginseng**

The ruins were extremely hot.

Baby Ginseng's self-destruction of the Snake Lord and the Earth Demon Ape was purely wood-element and light-element damage.

And this time, apart from wood-element and light-element damage, there was also some fire-element damage because it burned its life force after eating the Sun Flame Flower.

Because it had yet to completely digest the power of the Sun Flame Flower at that time, it was not purely fire-element damage, but fire-element damage similar to Chi Tong's Sun Flame.

Sun Fire had a fatal restraining effect on curses, plagues, darkness, and poison.

In addition, when the Black Meteorite Yak broke through the seal, its state was extremely poor and it was unable to resist at all. It was instantly destroyed by Baby Ginseng's unprecedented explosion.

Life Fire+Moon Explosion+Sun Flame Flower+Time Fruit+Weakened opponent. It wouldn't work if one of them was lacking!

First totem kill!

The legendary Feeder of the Emperor Wu Era, Ji Mengzhu, looked at the scene in the ruins in shock. As the spirit of the ruins, she was very clear about the power of that attack just now!!

That was what a level-six Beast Tamer's pet could do?

What a joke!

A totem attack was only so-so!

Although the Black Meteorite Yak's strength had fallen to an extremely low level because it had been sealed for 2000 years, the Black Meteorite Yak was still one of the 12 totem war generals under Yun An. Top-notch strength!

A starving camel was still bigger than a horse. No matter how poor its condition was, it was still a totem-level life form. There was a difference in the level of life. How could it be instantly killed by a monarch-level pet summoned by a level-six Beast Tamer...

Moreover, that pet was an extremely ridiculous ginseng baby...

The race of ginseng babies was also very common in ancient times. During the era of Emperor Wu Dynasty, Beast Tamers valued martial arts, so supplements and recovery-type pets were also mainstream. Ji Mengzhu was naturally extremely familiar with ginseng babies.

But now, after 2000, she wasn't familiar with Baby Ginseng anymore...

What mutated species was it?

After the shock, Ji Mengzhu reacted. The life aura of the ginseng baby had also completely disappeared.

She carefully recalled the scene just now.

Baby Ginseng ate the legendary resource and then emitted a huge power, creating a huge explosion. Then, the enemy and its life aura completely disappeared...

No matter how Ji Mengzhu thought about it, this situation looked very much like self-destruction!!!

If it was self-destruction... Although it was still very difficult to understand how a level-six Beast Tamer's pet used self-destruction to kill a totem, if a legendary resource was added, it might be possible? But...

She looked at Shi Yu beside her and said, "Where's that ginseng baby..."

“In that case, you might as well let me detonate the ruins... That’s your pet!”

His contracted pet should be more important than her.

Was this old man in front of her crazy?

He could have left directly...

Wait...! She looked at Shi Yu in silence. She didn’t care much previously, but from the looks of it, this old man’s aura and style... he didn’t look like a good person.

“Senior Ji, don’t think too much. I only do things within my ability.” Shi Yu chuckled. In front of him, the purple summoning array appeared again.

As the light outlined, Ji Mengzhu’s eyes widened. This was because the figure that appeared on the summoning array was Baby Ginseng, who had just eaten the Sun Flame Fruit and ran to the Black Meteorite Yak to self-destruct!!

At this moment, the ginseng baby had a ‘it’s lonely at the top’ expression. There was still a weak fire burning on the ginseng flower. It raised its hand and wanted to give Shi Yu a thumbs up, meaning that it didn’t disappoint, but unfortunately, it didn’t have a finger.

“This...”

“How is this possible!!!”

At that moment, Baby Ginseng’s appearance once again pierced through the values of this “old woman” from 2000 years ago. She was stunned and couldn’t understand why Baby Ginseng, who seemed to have made an incomparably huge sacrifice just now and was suspected to have killed a totem two levels higher, was still so lively now, as if it didn’t have any injuries...

No, it even looked stronger than the first time it appeared??

Was this really reasonable?

Why did she feel that the thing in front of her was even more ridiculous than the incurable injury brought by Yun An’s prototype divine skill!

“Senior Ji, times have changed,” Shi Yu said with a faint smile.

Ji Mengzhu’s expression was messy. Have the times really changed?

Beast Tamers after 2000 years could actually kill totems at level six?

Although she didn’t know what was going on... It looked like... she didn’t have to die.

Ji Mengzhu was silent. This way, wouldn’t she be able to take a look at Dong Huang 2000 years later?

However, at that time, she definitely couldn’t show her fear. She definitely couldn’t be like this, like someone who had never seen the world.

[Even a level-six Beast Tamer in 2000 years in the future might be able to kill totems! Remember, remember!]

At the same time, Shi Yu looked at Baby Ginseng.

< Name > Ginseng Baby

[Race]: Undying Sun Ginseng

[Attributes]: Wood, Time, Light, Fire

[Race Level]: High-level overlord (Quasi Mythical)

[Level of Growth]: Monarch Level

In this mutation evolution, the ginseng baby's race was undoubtedly stronger.

Fortunately, the Sun Flame Flower was a mutated evolution resource this time and not a strengthening resource. Otherwise, Baby Ginseng might have directly broken through to the overlord level during the evolution process. Shi Yu was completely unprepared for that.

According to the changes in its body, the current ginseng baby's body contained four attributes at the same time. This situation was very rare.

Of course, in nature, it wasn't as if the more attributes transcendent creatures had, the better. The more attributes they had, the easier it was for their bodies to have problems. At the same time, the term "miscellaneous" was more suitable for them.

## **Chapter 698: Evolution of the Undying Sun Ginseng (2)**

Why was the dragon family so powerful, and could even be singled out as a department?

Because dragon attributes were very special. One attribute contained two or more attributes.

For example, in the dragon element of the Eastern Divine Dragon, it basically contained the nature of wind and water elements. Some of them also had the nature of lightning. As for the dragon element of the Western Dragon, it basically contained the nature of lightning and fire elements. At the same time, there was a chance that it had the nature of wind.

This was also one of the reasons why the dragons were powerful. A dragon type could be used as a multi-element. Moreover, due to their racial talent, they could perfectly control this type.

Therefore, if it had the ability to completely control these powers, it would definitely be able to play more tricks than with just a single attribute.

Shi Yu could add points, so he didn't have to worry about Baby Ginseng's skills being too complicated, or if he might be causing the effect of the supplemental skills to worsen. He just had to add points to the source of life.

At the moment, Baby Ginseng's attributes were mainly wood and time, while light and fire attributes were the third and fourth attributes. They were actually negligible.

The reason why the attribute changes in Baby Ginseng's body were a little complicated was not only because the power of the Sun Flame Flower's effect on the monarch-level ginseng baby was too domineering, but also because of the three newly awakened racial skills.

During this mutation evolution, Baby Ginseng awakened three racial skills again!

"Life Fire Seed", a super life-burning explosive skill of wood and fire elements, was one of them.

This was also the most important ability obtained by Baby Ginseng during its mutation evolution. It was a skill that Baby Ginseng took the initiative to fight for through the mutation process.

It was only at the monarch level, but like the totem level, it tried to take the initiative to develop skills, and it was a huge success!

However, the other two skills were very ordinary.

The second was the Energy Storage Beam. Baby Ginseng originally knew this mid-level light-element skill, but it had taught it previously, but after this mutation, the restriction bottleneck of this skill naturally broke on Baby Ginseng and became a racial skill.

The third was a high-level light and fire dual-element skill, Clear Sky!

This was a type of weather skill. Similar to weather skills like Rain Prayer, it could increase the strength of the sun's power, thereby increasing the power of the corresponding attribute moves of all fire and light pets.

Chi Tong, the reincarnation of the Sun God Phoenix bloodline, didn't even learn Clear Sky, but Baby Ginseng did.

These two skills were the icing on the cake for Shi Yu and the others. It was less important than Fire of Life.

After the totem level, it was all about super skills!

Apart from that, it was not strange for Baby Ginseng's normal energy level to reach 14.88 million. Although the Sun Flame Flower did not give Baby Ginseng the power of a strengthening resource, it was still a legendary resource.

After maximizing Clear Sky and Storage Beam, Baby Ginseng's normal energy level could reach more than 15 million if nothing went wrong. This was definitely extremely rare among monarchs.

It also had an overwhelming energy advantage in the team!

And there was something else that excited Shi Yu this time, which was that Baby Ginseng's will level had reached high-level.

This way, there were only three overlord wills in the team. It was even easier to add points.

"Yi..." Baby Ginseng used Shi Yu's telepathy to pull up the team voice chat to indicate when the new team meeting was.

The Time Fruit+Fire of Life, a double dazzling eruption. Even if it didn't self-destruct... Legendary equipment? Overlord puppet? It would break it with a punch...

Eleven, Buggy, Chi Tong, Susu: Beast Tamer, look at it, look at it...

Shi Yu chuckled.

However, Eleven, Buggy, and the others weren't in a hurry.

Damn it, let Baby Ginseng be arrogant for two days first...

After everyone reached the overlord level, Baby Ginseng's advantage would be gone.

Eleven had already calculated it. At that time, it would let Shi Yu add some more points to Bean Bears and the Undying Golden Body to himself first. At that time, the Ten Thousand Bears Army's skill would cooperate with the transcendent Undying Golden Body to tank the forbidden weapon!!

At that time, it would let Baby Ginseng self-destruct as it pleased.

Buggy had also calculated it. It would let Shi Yu add some Anti-Magic Domain to itself first. At that time, even if the rules couldn't stop Baby Ginseng's self-destruction, it could still use the anti-magic domain to anti-Moon Explosion for Baby Ginseng!

In the Anti-Magic Domain, without the enhancement of the Moonlight Radiation, Buggy felt that it could resist Baby Ginseng's self-destruction with the Dragon of Imagination. Everyone, wait and see.

Chi Tong and Susu also began to study the self-destruction technique of the art of Anti-Baby Ginseng. Otherwise, with the self-destruction prohibited, even if they defeated the ginseng baby in the future, they would feel that it was an unfair victory.

The entire team directly used Baby Ginseng's self-destruction as an imaginary enemy!

A new round of crazy rolling began.

Boom.

While Baby Ginseng was immersed in joy, the sealed place was also the center of the explosion. Because of the strong energy wave, the ruins space was directly torn apart.

At this moment, it was already not bad if half of the hundred-meter-long yak's body was left. Its entire body was charred as it was sucked away by the spatial crack.

This time, Baby Ginseng's self-destruction was undoubtedly more powerful than the last time. Unfortunately, because the physique of the Black Meteorite Yak was too strong, as well as the spatial and venue strength of the legendary ruins being too high... From the looks of the damage caused, it wasn't as strong as the first self-destruction.

This was the only thing that Baby Ginseng felt uncomfortable about. Otherwise, it felt that it shouldn't be a problem for it to instantly blow up that moon city or whatever.

However, there were also benefits, which was that the Black Meteorite Yak still had more than half its body!!

Whether it was letting Buggy repair it and make it into a half puppet or letting Susu cleanse it into a roasted steak, they were both good choices!!

### **Chapter 699: Evolution of the Undying Sun Ginseng (3)**

Although these Yun creatures also had the power of dark radiation, they were after all bestowed by Yun An. They weren't as domineering as Yun An's main body, so it wasn't impossible to cleanse them.

Their life essence was also different from meteorite life forms like Yun An. They were still animals. Therefore, Shi Yu felt that they should be edible after purification... right?

Compared to roasted octopuses, he honestly liked to eat cows more.

"It can't fall out. There are still enemies outside..." At this moment, seeing that the Black Meteorite Yak was about to fall out of the ruins, Shi Yu was directly anxious. He immediately waved his walking stick, and under Ji Mengzhu's shocked expression, three overlord-level undead flew out!!

The movements of the Dragon Spirit and Tiger Spirit were very fast!!!

However, the Mountain Tortoise Spirit had been summoned for nothing. The huge totem corpse had already fallen out of the crack. Before it could catch up to the Dragon Spirit and the Tiger Spirit, it was directly left behind. Even if it used Earth Escape, it couldn't catch up to the other two's speed.

Fortunately, the Mountain Tortoise Spirit didn't have consciousness... Otherwise, Chi Tong could understand its feelings.

It cursed. Why was this ground so hot and hard...

The Black Meteorite Yak's corpse fell out of the ruins and came out of the crack...

But the Dragon Spirit and Tiger Spirit followed closely behind.

Soon, with a boom, the huge totem corpse that fell out was brought back by the dragon and tiger spirits again.

At this moment, Shi Yu said to Senior Ji Mengzhu, who was still stunned beside him and couldn't understand why there were still three overlord undead following this level-six Beast Tamer, "Senior, quickly repair the ruins. Don't let the guys from the outside world in."

"Otherwise, it'll be a little troublesome to deal with totems in perfect condition."

Ji Mengzhu: A little troublesome?

....

In the outside world.

The various factions were very stunned when they saw the half-crippled roasted yak fall.

Black Goat and Legend Bai Chuan couldn't react for a moment.

According to what the Yun Race had left behind, Senior Black Meteorite Yak was sealed by a legendary ruin with weak lethality.

If the lethality of a seal-type ruin was strong, the seal effect would definitely be poor. If the seal effect was strong, the lethality would definitely be poor.

It was very difficult to be perfect... At that time, the Yun Race couldn't break through this ruin, and there was the totem war, so they simply gave up on the Black Meteorite Yak.

Because Yun An died, everyone pressed onward against them. The Yun clan was almost exterminated by other totems. No one liked these Yun clans that had been given power by Yun An. The Yun clan also disappeared like the Iron-eating Beast race.

Only when 2000 years passed and Yun An was about to revive did the Yun clan reappear. In order to accelerate the revival of the king, they thought of various ways.

Just as Ji Mengzhu had said, the dark power of the creatures that had been given power by Yun An could accelerate Yun An's revival. Therefore, this was also why Ji Mengzhu was unwilling to let the Black Meteorite Yak go.

At the same time, it was also the reason why the sealed ruins were on the verge of losing its effectiveness. The Yun Race immediately locked onto it.

It was to find the Black Meteorite Yak and revive Yun An together.

But now...

Looking at the Black Meteorite Yak that had lost all its dark aura from the explosion, the Black Goat was stunned. This didn't make sense. At the start, the ruins clearly emitted a strong Yun Race aura...

"Lord, what should we do next?" Bai Chuan was also very confused.

What happened in front of him was really a little unexpected.

He asked Black Goat and the others if they wanted to follow and take a look.

From the repair speed of the crack in the ruins, it should take a while for them to enter.

"Alright."

"Send a pet to take a look first."

When the Black Goat saw the miserable state of the Black Meteorite Yak, it felt a little afraid. It was a little afraid of this legendary sealed ruin. Even if a crack passage appeared, it didn't dare to act rashly at this moment.

"I knew it..."

Bai Chuan's expression darkened. He knew that they would send him. He had also seen the three overlord undead just now. He knew very well how dangerous this investigation was.

However, he was also sufficiently curious about this ruin. In that case, he would send a pet to take a look.

....

“This is the Yun Race general that that goat mentioned?”

The fox god, who originally thought that the black goat was coming to help, had a subtle expression and immediately felt relieved.

Otherwise, it would really despise having to face two dirty things.

However...

The fox god’s expression froze. Did it see the dragon spirit and tiger spirit somewhere before??

A wave of anger rose from the fox god.

Old thing, you want to invade the city-state of the Heavenly Fox Nation and the ruins mystic realm, right??

Now, the Fox God was completely confused. The incident in Moon City had clearly not happened for long. How could the traces of that gray-robed old man appear in the ruins!!

They had clearly been guarding the ruins!

How did he enter...

...

“Little girl, can you tell me what’s going on?” In another alternate space, the gem cat gave Qu Ling, the undercover agent of the tenth bureau, video access. Through the alternate space, Qu Ling looked at the scene that had just happened in a daze and was a little confused.

At that moment, the gem cat was relieved, because it had just seen the Dragon Spirit and the Tiger Spirit.

He realized that Shi Yu had indeed fallen into the ruins!

Sending out the Dragon Spirit and the Tiger Spirit was to tell him that he was safe.

However, it didn’t understand what happened after that.

What was with that half crippled and seemingly roasted well-done black yak??

Now, the only one who might know was Qu Ling, who was a spy here.

The gem cat looked at Qu Ling with big and puzzled eyes.

## **Chapter 700: Evolution of the Undying Sun Ginseng (4)**

Qu Ling didn’t know where to start. “According to what I know, that should be an ancient totem sealed in this ruin... However, is it a dead totem that was sealed?”

The gem cat turned around in silence and looked at the scene in front of it. It understood. Was it a dead totem sealed? Perhaps not, but it should be dead now.

As for what happened in the ruins, it didn't dare to guess or think.

"This kid... In short, I'm not worried about him anymore. He should have fallen into the ruins," the gem cat muttered.

Ah... If Shi Yu had the ability to destroy totems, wouldn't its status plummet??

At this moment, Qu Ling finally recovered from the life-and-death crisis. She said, "Senior, thank you for saving me."

"That senior just now, is he... is he really alright?"

Dong Huang had come. Qu Ling knew this. However, Qu Ling was still very shocked that the other party could save her from the fox god. She felt like she had survived a disaster and was very grateful to these seniors.

Moreover, that old man actually successfully entered a ruin that even the Fox God couldn't enter??

She didn't know this Senior Cat and that old man before she came to the Heavenly Fox Nation to become a spy. Now, Qu Ling only wanted to know their identities. If she could go back, she would definitely thank them well when she returned and bring her entire family to thank them for saving her life.

....

Inside the ruins.

Shi Yu also realized that the repair speed of the crack was a little slow.

Forget it, so be it.

The gem cat should be able to determine that he was inside the ruins from the dragon and tiger spirits.

If there was danger entering... Then the gem cat had to save him.

Shi Yu acknowledged the gem cat's spatial attainments.

Although it didn't have a transcendent skill yet, the proficiency of spatial super moves was definitely close to transcendent. Otherwise, it was impossible for that fox to not be able to do anything to it.

Perhaps only totem creatures who really relied on spatial skills to cultivate could deal with this cat. This was very safe.

Ji Mengzhu nervously repaired the crack in the ruins, while Shi Yu looked at the half of the cow body protected by the three overlord undead with a burning gaze.

Good stuff!

"..." Baby Ginseng was silent for a moment before suddenly realizing a problem...

This corpse was already in such a state. Could it be that Buggy could also create a puppet??

Even if it was only half a totem-level physical puppet, it was still several stories tall... It had to be better than the three overlord corpses from before.

Moreover, Baby Ginseng also looked at the ruins stone Shi Yu was holding...

Why did it feel that Eleven and Buggy, who had just evolved, were also going to be strengthened at the Epic level?

“I’m here to see what’s here.”

At that moment, Shi Yu no longer cared about the yak because there was something more attractive to him, the ruins stone Ji Mengzhu had given him.

Obviously, this was also a spatial tool.

Inside was the iron-eating beast evolution resource the other party mentioned.

This ruin stone was not the controller of this legendary sealed ruin. It was an independent new ruin. From this point of view, Shi Yu should have finally obtained a “complete ruin space”.

At that moment, with the help of the ruins stone, Shi Yu checked the evolution resources inside the ruins with ease. With a look, Shi Yu was overjoyed!!

One, two, three, four, five... A total of ten meteorite fragments!!!!

Although in terms of quality, it was a little inferior to the one that Quan Xuan had given them... But there were ten meteorite fragments!!

They were all taken from the demigod-level Yun An!

At this moment, if it could eat all of them, Eleven would definitely evolve into a Demon God Panda. Even if its foundation was very strong now, ten meteorite fragments would definitely be enough.

Of course, he had already studied the superalloy research. Shi Yu also had new ambitions now. He felt that it was lacking to only evolve into a Demon God Panda. It was meaningless to imitate the path of Emperor Wu and even his predecessors.

It wanted to wait and see Ling’s research results. If it succeeded, it would combine the Dark Thunder and the Light Thunder and take a new evolution path. If the research didn’t succeed, it would use a backup, the pure dark element.

“These are...”

Apart from that, Shi Yu also discovered a large number of low-level metals!

Level-five metal, golden jade, green heart sand!

Level-six metal mineral resources, Black Purple Copper Essence Mineral, Heavenly Silver Iron, Blue Gray Pure Gold!

Even level-seven metal mineral resources, meteor iron!

They were all materials for the iron-eating beast’s first stage evolution!!!

As for numbers...

One pile, two piles... three piles... It was a really big number!

Shi Yu looked at the low-level evolution resources of this scale and took a deep breath.

With so many resources, it was completely no problem to evolve 100 Iron-eating Beasts into the Nine Li Battle Beasts of monarch races!

Of course, it was a low-level monarch.

If one wanted to evolve after multiplying like Eleven, this little resource definitely wouldn't be able to withstand 100 beasts.

Shi Yu finally understood why there were so few Iron-eating Beasts and second-stage evolution materials in the country. It was definitely for those Feeders of the Emperor Wu Dynasty to monopolize and hide in secret...

Seeing these resources, Shi Yu was undoubtedly very excited. Dong Huang had originally taken advantage of this seven-nation trade to buy a large number of iron-eating beast evolution resources from other countries. In addition to these, there was a chance for a panda army the size of hundreds of monarch races, all Nine Li Battle Beasts.

If the Nine Li Army of this scale collectively mastered impregnable above the expert level, they would be invincible below the totem level, and even overlords would be crushed, even if above their level!

"Senior Ji... Is there no high-level metal for iron-eating beasts to carve inscriptions in this ruin stone..." However, although there were many low-level evolution resources that were worth being pleasantly surprised, Shi Yu also discovered that apart from the meteorite fragment, there was no other level-eight metal for inscriptions in the ruin stone...

As Ji Mengzhu repaired the ruins, she said, "These first-stage evolution materials are all prepared for the Iron-eating Beast cubs I brought over, and those high-level metals that can evolve in the second stage are left for the army."

"Only the number of meteorite fragments is enough. We got a portion of it..."

Shi Yu was silent. That made sense.

However, how many fragments had been beaten off of Yun An by Emperor Wu?

Shi Yu sighed. Forget it, he had to be satisfied. With the meteorite fragment, it was already perfect. At least, no matter what, Eleven could complete a new round of evolution.

Shi Yu was filled with joy. Then, he was even happier.

Because he saw a pet that also entered the ruins from the outside through the crack.

This was an overlord-level pet.

It was three to four meters tall, had the black lower body of a horse, the black upper body of an ape, and black wings that looked like eagle wings!!

The hands on his upper body were also loaded with weapons that looked like black light swords!!

“No, the repair speed can’t keep up...” At this moment, seeing an overlord-level ferocious beast enter, not to mention it being a strong overlord-level ferocious beast, Ji Mengzhu took a deep breath and frowned.

She didn’t forget Shi Yu’s words.

This was a totem country.

Shi Yu was here to carry out a mission.

If the overlords and totems of other totem countries came in, it would be as difficult to clean up as the Black Meteorite Yak!!

However, to Ji Mengzhu’s surprise, after seeing this Black Winged Horse Ape, not only was Shi Yu not worried, but his eyes also lit up with starry light.

This... wasn’t this one of the overlord modified beasts of the Seven Islands Ke Yuan Financial Group, of Legend Bai Chuan? Legend Ke had said so previously.

“Why are you the only one in? Where’s your Beast Tamer...” Shi Yu’s eyes became happier. He suddenly recalled that the matter had yet to be completed. He still had to plunder this Legend Bai Chuan’s Beast Taming Talent!!

With his rich experience, totems like the Fox God and the Black Goat wouldn’t rashly enter the ruins after seeing the scene just now. Instead, they would let their subordinates be the vanguard.

It would be best if Bai Chuan came in alone!

Now, Shi Yu really wanted to meet a real legend in the ruins. He had several bold ideas regarding his “body control” talent.
