

## Beast 711

### Chapter 711: Lin Xiuzhu's Portable Grandma (4)

"This is all because of the 'quasi-divine skill' mastered by Yun An."

Ji Mengzhu told Legend Ke and the others about the situation in disappointment.

"Yes, I heard it from Senior Zhong Xuan," Shi Yu said.

"Can't Senior Emperor Wu fuse with the nine totems?" Ji Feng's expression was solemn.

Ji Mengzhu shook her head and said, "Although Lord Emperor Wu can mobilize the power of multiple totems to suppress Yun An through his top-notch Fusion Talent, in the face of a quasi-divine skill, he won't be able to gain much advantage after battle."

"The quasi-divine skill has already come into contact with the power of the natural order, and the damage caused by the power of the natural order, even if one were to use Mythical medicine, is very difficult to heal if the attributes don't match."

"Yun An's skill brings with it an incurable radiation injury that cannot be cleansed."

"Quasi-divine skill... That's super skills cultivated to the extreme, right?" Legend Ke muttered.

Even a legend like him had actually never come into contact with this level.

After all, the only life form Dong Huang could come into contact with that had mastered the prototype of a divine skill was the Dragon God.

Apart from Shi Yu, only President Lin and the Mechanical Legendary could come into contact with the Dragon God. Even for an expert like the Tyrannical Sea Legend, it was very difficult.

Unlike Ji Mengzhu, her father had even participated in the battle with Yun An, so she knew very much about this.

"Yeah."

"But according to Lord Emperor Wu, there are three conditions."

"When a super skill is cultivated to the extreme, it's just one of them."

"Every one of these three conditions is as difficult as ascending to the heavens. Even a legendary Beast Tamer like Lord Emperor Wu will find it very difficult to achieve. This is only a quasi-divine skill, let alone that unreachable Mythical Domain and complete divine skill."

Thinking of Emperor Wu's lonely expression at that time, Ji Mengzhu felt very uncomfortable.

"Let me tell everyone."

"The first is to cultivate super skills to the extreme. This difficulty is said to be ten times harder for an ordinary pet to cultivate itself to the totem level through super skills!"

Ji Feng, Qu Ling, and the others were speechless.

When super skills reached perfection, they would be at the totem level.

This difficulty stuck most of the Beast Tamers now.

There were less than ten legendary Beast Tamers on Blue Planet who could personally nurture a pet to the totem level.

And the difficulty of cultivating a quasi-divine skill was ten times higher than this?

“Senior Ji, what about the other methods?” Ji Feng couldn’t help but ask.

This was a good opportunity to broaden his horizons.

This time, he didn’t come for nothing.

Even the gem cat, a totem, couldn’t help but turn its head and listen.

“Lord Emperor Wu said that the second method is to rely on the bloodline inheritance. If the parents of a pet are a Mythical race, there’s a chance that it will have its own quasi-divine skill after birth, which is the prototype of a divine skill. As it grows and trains this skill, this skill will naturally become a ‘complete divine skill’, helping it cross to the Mythical level.”

“Therefore, a Mythical creature cub might have its own quasi-divine skill. However, if it’s already so difficult for overlords to reproduce, it should be even harder for Mythical creatures...” Ji Mengzhu said.

“Has Lord Emperor Wu seen Mythical creatures and young divine beasts??” Qu Ling said in surprise.

Ji Mengzhu shook her head. “I don’t know either, but that’s what Lord Emperor Wu said...”

“The third method is said to be a ‘combination’. Since it’s very difficult to rely on one skill to master a ‘quasi-divine skill’ and there’s not enough time to develop a skill to the extreme, one can rely on two, three, four, or even more super skills, more special power, and even the power of a Beast Tamer to form a powerful combination skill. It’s enough to touch the combination skill of the rules and optimize it to become a ‘quasi-divine skill’.”

“But in Lord Emperor Wu’s words, this isn’t necessarily easier than the first method. You need peerless talent and rely on talent to smooth out the time.”

“If it succeeds, that life form can already be called a ‘mythical race’. Like a demigod-level life form, like a divine beast cub, it has the foundation to grow to the Mythical level.”

Shi Yu said, “Can you be called a Mythical race just by mastering a quasi-divine skill?? You don’t have to master a divine skill??”

Ji Mengzhu said, “A quasi-divine skill is the prototype of a divine skill. It has the potential to grow into a complete divine skill. Apart from the skill level, divine skills also represent strength. Apart from Mythical races, life forms who have mastered a complete divine skill can already be called Mythical. And creatures who have mastered ‘quasi-divine skills’ are only Mythical races, not Mythical level.”

Qu Ling said, "Wait a minute, if the first method is to cultivate a quasi-divine skill, its battle power will definitely be at the demigod level. Then the second and third methods don't sound like there's a requirement for strength? It can be completed at any level?"

Ji Mengzhu smiled and said, "Probably. The second method requires a natural Mythical race. Even if it's the son of a divine beast, there shouldn't be a reason for it to be born at the Mythical level. Perhaps it also has to experience the growth levels of monarchs and overlords..."

"As for the third method, although it sounds like there's hope of developing and combining quasi-divine skills at any level, it's not that simple. Only at the totem level can transcendent life forms' development of skills be considered initial. And if a totem-level creature cultivates a quasi-divine skill, its strength will naturally be at the demigod level."

Ordinary totems, top-notch totems, and totem half-gods were all at the totem level. The three were not realms, but the division of battle power. Everyone instantly understood Ji Mengzhu's meaning.

Having a quasi-divine skill was basically demigod-level battle power. And if one wanted to have a quasi-divine skill at the monarch and overlord levels, they might have to be a cub of a Mythical creature. It was very difficult to complete after birth.

## **Chapter 712: Lin Xiuzhu's Portable Grandma (5)**

However, young people like Ji Feng and Qu Ling still had fantasies.

Although Ji Mengzhu said that there was only a small chance to develop quasi-divine skills only at the totem level, it didn't stop them from imagining it.

If a monarch-level pet mastered a quasi-divine skill, how strong would it be?

The description would be Mythical race, monarch level.

Could it fight weaker totems two levels higher?

If not, what about Mythical race, overlord level?

There shouldn't be a problem, right? After all, the Tyrannical Sea Legend's Giant Leviathan wasn't a Mythical race yet. It could already fight a totem level twice.

Quasi-divine skill, Mythical Race!

In an instant, Ji Feng's expectations were extremely high.

However, he also understood that he could only think about it. After all, it was said that none of even Lin Feng's pets had reached the Mythical race.

At the side, Shi Yu fell into deep thought...

“Of course, Lord Emperor Wu told my father about this. Then, my father told me. I don’t know the accuracy of this information either. After all, no one has really experienced the Mythical Domain...” Ji Mengzhu said.

“Then is there anything special about quasi-divine skills compared to super skills?” Qu Ling asked.

“Of course.”

“The strongest thing about ‘divine skills’, according to Lord Emperor Wu, is that they have already mastered ‘laws and origin power’. Among them, quasi-divine skills are the stage where they first come into contact with laws. For example, Yun An’s quasi-divine skills are known as ‘incurable injuries’ because they have reached this level. If one doesn’t master corresponding abilities of the same level, they can’t resist.”

“Actually, my father has seen the battle between Emperor Wu and Yun An. He said that that’s not a battle that other low-level life forms can interfere in at all. In the battle, Yun An, who has mastered a quasi-divine skill, forms a world of its own with phenomena around him. Any power around it is completely suppressed, including the power of nature and the power of space. This is a higher-level method than borrowing the power of nature.”

“It can be said that once a quasi-divine skill is released, it can suppress all the surrounding powers that are not of the same level. All life forms who see a quasi-divine skill will have their bloodline tremble if they don’t master the same power. It’s like... like a transcendent-level Iron-eating Beast facing the deterrence of a monarch-level royal Iron-eating Beast. It will feel like its bloodline is being suppressed.”

“This is the difference between a myth and a non-myth. It’s an insurmountable difference. Therefore, it’s really impressive that Lord Emperor Wu could suppress Yun An and even kill it,” Ji Mengzhu said.

Everyone quietly listened to Ji Mengzhu, who had personally experienced the totem battle, explain.

They understood the power of a demigod again and the power of a legendary Beast Tamer.

Even if it was such a Yun An, Emperor Wu could suppress it.

Unfortunately, Emperor Wu didn’t have the ability to remove the other party’s Law Power. Otherwise, the historical direction might be new.

At the same time, Ji Feng, Qu Ling, and the other Dong Huang geniuses were also curious. The current Dragon God, who had always been on good terms with Dong Huang, was also at the demigod level. They wondered how its strength was compared to Yun An and what kind of power it had.

According to Emperor Wu, a half-god like the Dragon God and a half-god like Yun An could be considered a Mythical race?

Shi Yu thought that they were at most experts who had evolved to the extreme of the “quasi Mythical race”.

“Well, why do I feel that Ji Mengzhu’s father isn’t very reliable? I should ask the Dragon God another day,” Shi Yu muttered in his heart.

Ah, right, but the Dragon God seemed to have also said that the World Tree could be considered a Mythical race, but it wasn't at the Mythical level. It was only the strongest demigod. In that case, it was really possible that demigods could be considered Mythical races?

However, when they thought about it, the demigods didn't care about this racial title anymore. They were probably more concerned about when their growth level could break through to the Mythical stage, and not what the racial level represented their potential.

After a long time...

The gem cat said, "We're at Dong Huang."

....

After arriving at Dong Huang, no one relaxed. Next, they still had to continue working on this mission. Everyone first went to the headquarters of the tenth bureau.

As it concerned a demigod-level life form that threatened Dong Huang, Shi Yu also ran around with them. He didn't find it troublesome, but with the cat car, it really wasn't much trouble.

Fortunately, President Lin and the others also returned that day to preside over the overall situation. The Black Goat Totem was undoubtedly 'captured alive'. Of course, in the current state of the Black Goat, to put it nicely, it was 'captured alive'. To put it bluntly, it was 'not dead'.

As for the Black Goat Totem, it naturally couldn't be imprisoned in Dong Huang. It was directly transported to the deep sea prison of Dragon Palace City by the Sea Dragon King and the others. Only here could the totem be suppressed.

The Poison Dragon Totem was also locked here.

Dong Huang didn't have to make payment for using the underwater prison of Dragon Palace City. As long as the Immortal Dragon King didn't die after purification, the goat legs and lamb chop were for the dragon kings to eat as they pleased. In any case, the key was the information about the Yun race in the goat brain.

In fact, President Lin still had a lot to say to Shi Yu and Ji Mengzhu, about the Black Meteorite Yak. He wanted to ask Shi Yu how he dared to blow up a top-notch totem, even if it was weak.

However, at this moment, because he still had many more important things to deal with, he didn't have the time to care about Shi Yu. After chatting for a while, Shi Yu was completely liberated. He brought Senior Ji Mengzhu to Wu Ling City, where the ruins of the Iron-eating Beast Corps were.

"Aren't you going to deal with Yun An?" Seeing Shi Yu slip away from the headquarters of the Dong Huang Association without any reluctance, Senior Ji Mengzhu, who was in the ruins, said.

### **Chapter 713: Lin Xiuzhu's Portable Grandma (6)**

Shi Yu said, "Senior, I'm only a level-six Beast Tamer. I'm not even at the Legend level."

Ji Mengzhu : “...”

So this guy still knew that he was a level-six Beast Tamer?

That wasn't what the totem corpse lying in the ruins thought!

Shi Yu smiled bitterly, thinking that he really wasn't free.

Although Yun An was important, it was more important to seriously add points!

Because he had heard Ji Mengzhu's words previously, Shi Yu was even more concerned about the skill index's [Technique Fusion] function!!

After Ji Mengzhu mentioned the three conditions of the prototype of the divine skill, Shi Yu realized that training super skills to Dao Proficiency was not the only condition to reach the prototype of a divine skill.

It could also be done by relying on multiple super skills to form a perfect combination skill?

She should have said so earlier!

[Technique Fusion] could directly fuse the two skills into one skill. Was there a more perfect combination method than this?

In other words, through [Technique Fusion], continuously fusing super skills could develop quasi-divine skills?

And a pet that had mastered a quasi-divine skill was a Mythical race. In other words, the function of [Technique Fusion] was the key to making Eleven and the others a Mythical race??

In that case, it was even more necessary to obtain the blessings of the World Tree.

Shi Yu definitely couldn't activate super racial skills above the transcendent level. His Beast Taming level was too low, so he couldn't support Eleven and the others to break through to the totem level. This had to be done in the level-nine Beast Taming Space. Even if he contracted above his level, it would have to be at level eight, and he was only at level six.

However, if Eleven and the others could have “quasi divine skills” at the overlord level and become “mythical races”, it didn't seem bad? They might be able to fight totems!

Regardless of the preparation of the ancient information Ji Mengzhu mentioned, he believed it for the time being. He immediately became full of motivation.

How could he solve his worries? The only way was to increase points!

After dealing with Ji Mengzhu, Shi Yu decided to go back and start a new round of points.

Apart from that, the development of telepathy and the research of superalloy required time!

As for when he would go to Tingxiang and Rongguang to unlock the last 2/4 progress of the Space Beast Egg, he definitely had to wait for Baby Ginseng to condense another time mark and for the situation on Dong Huang's side to stabilize. Otherwise, he would probably only have the gem cat as a bodyguard again. He didn't feel safe.

Tingxiang and Rongguang were a little special.

If they were prepared for the worst, these two countries were even more dangerous than the eleven totem countries around Dong Huang and the Seven Islands.

In the east, due to the powerful strength of Dong Huang and Dragon Palace City, there were currently no demigod-level factions on land and in the sea, but for other countries, there were actually demigod-level factions eyeing them covetously...

In the Dark Night Forest outside Tingxiang, there was a demigod-level Dark Elven Empress who had always been at odds with the mixed-blood Elven Empress of Tingxiang.

The Demon Kingdom outside Rongguang was the greatest enemy of Rongguang. Both parties were in small-scale battles all year round. The leader of the Demon Kingdom was also a demigod.

The Dragon Empire in the west, the snow land in the north... There were demigod-level lives, even the Abyss Sea and the endless sea territory...

It could be said that if it weren't for the fact that there were still so many demigod-level factions outside the seven countries, the seven countries with Mechanic advantages would have long swept through the world.

From this point, the Seven Islands were actually considered lucky. Their geographical location was not bad. Because of the existence of Dragon Palace City and Dong Huang, there were no powerful demigod-level totem factions eyeing them covetously...

"Senior, does this place feel familiar?"

Shi Yu stood on the tall building and asked Ji Mengzhu.

Ji Mengzhu said, "I'm no longer familiar with it. 2000 years have already passed. Everything has changed. The world has changed. I'm afraid I still have to adapt to the current Dong Huang for a long time."

"Be it buildings, transport, or culture..."

Shi Yu smiled. "There's plenty of time. The Iron-eating Beast Ruins where Zhong Xuan is located is here. By the way, I still have someone to introduce to you..."

"Huh??" Upon hearing that Shi Yu had brought her to the Iron-eating Beast Corps' training ruins, Ji Mengzhu's expression was filled with anticipation. However, Ji Mengzhu was a little puzzled about the people Shi Yu had always said he wanted to introduce to her.

She didn't understand why this kid was so excited.

Who was it?

Could it be that Zhong Xuan wasn't dead yet?

Ji Mengzhu kept guessing.

....

In the ruins of Wu Ling City.

At the moment, this place had already been used as the training venue for the “Iron-eating Beast Corps”, “Green Silkworm Cocoon Corps”, and “Machinery Beast Corps”. As the New Army Tournament approached, these armies trained even harder in order to fight for military funds.

“You are...” At the entrance of the ruins in Wu Ling City, the expression of the Beast Tamer in charge of guarding the door changed when he saw Shi Yu. Shi Yu smiled, indicating that there was no need to make a fuss. After showing his identification, he directly entered the ruins.

After he entered the ruins, Ji Mengzhu’s figure immediately appeared beside him.

“As expected, it’s still the same,” Ji Mengzhu said happily. “I have good news for you.”

Shi Yu was stunned for a moment before saying, “What good news?”

“Wait, Senior Ji, why did you come out of the sealed ruins??”

Shi Yu was slightly stunned. Wasn’t Ji Mengzhu the spirit of the ruins in the legendary ruins? Previously, she had sensed the outside world in the ruins, so why...

Ji Mengzhu said, “This is the good news I want to talk about. Didn’t I tell you before that I participated in the modification of this ruin?”

“Yeah.”

“My authority over the ruins is still there. Give me some time. I can also become the spirit of the ruins in this ruin. Didn’t you say that the Iron-eating Beast Corps is currently training here? After I become the spirit of the ruins in this ruin, I can better control those training facilities.”

## **Chapter 714: Lin Xiuzhu’s Portable Grandma (7)**

Ji Mengzhu looked at Shi Yu and said, “After completing the transfer, I’ll give you the legendary ruins I’m staying in now. Although there’s no sealing effect, as a spatial equipment, it’s not bad as a cultivation place.”

“You should encounter a lot of danger in the future. It’s safer to bring such a high-level ruin. This is a treasure left to me by my father. I’ll leave the rest to you.”

“It’s also to thank you for dealing with the Black Meteorite Yak.”

Shi Yu was stunned. Although he had always wanted a legendary ruin, Ji Mengzhu’s sealed ruin as the spirit of the ruin clearly wasn’t suitable to carry with him because of its spirit, but now, the other party actually said that she could transfer it? Moreover, the legendary ruin could be given to him?

“This isn’t appropriate, right...” However, Shi Yu was still relatively shy.

Such a precious thing...

However, afraid that Senior Ji would regret it, Shi Yu said again, "Since it's Senior's good intentions, I'll accept it respectfully..."

After all, the gem cat seemed to like this ruin quite a lot. There would be more safety guarantees in the future!

Ji Mengzhu : "..."

Shi Yu was excited. Although the legendary ruins no longer had any special sealing effect, compared to the high-level ruin that Senior Lu had cracked, which he was using now, it was clearly better.

However, he had just moved less than two months ago and he had to move again. It was so tiring.

He decided to forget it and just move.

But in that case, he seemed to have four ruins... There seemed to be too many. It was useless to have so many. He would hand two over later and return the ruins stone to Senior Ji!

"Alright, who did you say you were bringing me to see?"

Shi Yu said, "Don't worry, Buggy, Instant Transmission."

"Looking for Eleven's big sister."

Shi Yu directly summoned Buggy.

"Wu..."

Even the number one in the team couldn't escape the fate of the tool worm.

....

Iron-eating Beast Corps camp.

The chief feeder, Lin Xiuzhu, had not even left the ruins for a long time. If there was nothing else, her food, drink, and accommodation were basically completed in the ruins.

Shi Yu had given her so many resources. She couldn't disappoint Shi Yu's expectations no matter what. She had to nurture the Iron-eating Beast Corps into the strongest army!

In the room, Lin Xiuzhu was doing the cultivation plan of the Iron-eating Beast Corps. She had the data of every Iron-eating Beast Tamer in the Iron-eating Beast Corps...

Knock, knock, knock.

"Please come in," Lin Xiuzhu said and looked out the door. With a look, her expression was slightly stunned. She saw a woman who looked even more like her than her mother walk in and look at her.

To be honest, Lin Xiuzhu had lived for so long. Even when Shi Yu and Eleven created miracles in succession, she had never been so stunned.

Similarly, Ji Mengzhu, who had been instigated by Shi Yu, also saw this girl and fell silent for a moment.

Obviously...

The two of them realized that the other party looked very much like them...

“Haha.” Just as the two of them were very stunned, Shi Yu laughed and followed Buggy in.

At this moment, when he saw Shi Yu, Lin Xiuzhu, who was wearing a black and white military uniform, was stunned. She kept looking at Shi Yu, Buggy, and the mature woman version of herself and finally discovered the problem. Then, she revealed an angry blush and said, “Shi Yu, you’re too much. Hurry up and get Buggy to remove the illusion.”

Lin Xiuzhu quickly realized that this mature version of “herself” didn’t look like a real person.

After seeing Shi Yu and Buggy, he directly determined that Shi Yu had made Buggy use illusions.

“Wait, wait.” Shi Yu was also stunned. He understood that Senior Panda must have misunderstood something. He hurriedly said, “What does it have to do with Buggy?”

“Wu!!” Buggy also felt very innocent.

Ji Mengzhu looked at Lin Xiuzhu and smiled. She gradually understood and said, “Little girl, does your family have a family tree record?”

Lin Xiuzhu: “?”

Shi Yu said, “Senior, Senior Ji was a legendary feeder during the era of Emperor Wu Dynasty 2000 years ago. At that time, she was also in charge of the feeding of Emperor Wu’s Iron-eating Beast Corps...”

“You think I’m very similar to this little girl, so you think she’s a descendant of my race, right?” Ji Mengzhu said. “I do feel a bloodline connection. Interesting...”

Lin Xiuzhu: ???

At this moment, Lin Xiuzhu was a little panicked. The pen in her hand remained in midair. What, what...

## **Chapter 715: The Hopeful Panda Senior**

“That’s what happened...”

After arriving at Senior Panda’s office, Shi Yu pulled out a chair and sat opposite her, explaining the mission experience to her.

For things like fighting the Fox God, blowing up totems, and catching legends, Shi Yu chose to omit them, afraid that he would scare Senior Panda.

He mainly explained Senior Ji Mengzhu’s background to Senior Panda.

After Shi Yu finished speaking, Lin Xiuzhu’s entire face was still stunned. On the other hand, Ji Mengzhu quickly accepted this setting. She looked at the various iron-eating beast related models, ink paintings, and felt very emotional.

Although two thousand years had passed, the Iron-eating Beast Tribe still didn't separate from the Iron-eating Beast. Very good.

It seemed that the other clansmen who hid from the war were very lucky to have passed it down.

"You, you, in that case, are you really my ancestor?"

At this moment, Lin Xiuzhu felt that it was ridiculous.

She knew that Shi Yu was very powerful.

Even if Shi Yu cracked some Mythical Ruins one day, Lin Xiuzhu would not be surprised at all.

However, Shi Yu actually ran over and said that he would get an ancestor for herself. This kind of thing... would stun anyone!

Before Shi Yu explained, she almost thought that Shi Yu had gone to dig up the Lin family's ancestral grave.

But speaking of which, her ancestor was actually the Iron-eating Beast General under Emperor Wu?!

Titled legend expert?

During the era of Emperor Wu Dynasty, he was a Beast Tamer whose strength was only inferior to Emperor Wu?

Senior Panda couldn't believe it.

According to Lin Xiuzhu's understanding of Shi Yu, the other party shouldn't lie to her.

She imagined that Shi Yu might have wronged Shi Yu for letting Buggy transform into a mature version of herself to tease her...

"Perhaps."

Ji Mengzhu was very happy at this moment. She didn't expect to see a descendant of her own race apart from the Iron-eating Beast. She looked at Lin Xiuzhu and said, "But it's not important anymore."

"I heard from Shi Yu that your name is Lin Xiuzhu, right?"

"Yes, Senior Ji." Lin Xiuzhu nodded hard.

"How old are you? What's your Beast Taming level? What's the Iron-eating Beast's level?"

Lin Xiuzhu said in embarrassment, "25 years old, Beast Tamer level 5, Iron-eating Beast... It's still commander rank at the moment."

It was indeed a little low...

At the thought that her ancestor was the number one general under Emperor Wu, and had to see her family had become like this, Senior Panda was a little nervous.

"Sigh." After hearing that, Ji Mengzhu sighed slightly. She had already expected this situation just now.

What she learned was that the iron-eating beast only rose after Shi Yu discovered the iron-eating beast's evolution path two years ago.

During this period, the Iron-eating Beasts were only ordinary middle-level transcendent races that had only mastered hardening.

Although the Iron-eating Beast race wasn't completely extinct, the inheritance was almost broken.

In this situation, the descendants of the Iron-eating Beast Clan's Beast Tamer wouldn't be too strong if they were in charge of pets of a transcendent race.

She looked at Shi Yu and could imagine that it was all thanks to Shi Yu that Lin Xiuzhu and even the Iron-eating Beast could have such a status in Dong Huang.

"It's not too late at 25." She looked at Lin Xiuzhu and said, "From today onwards, I'll guide your cultivation and guide you in cultivating iron-eating beasts. In the next period of time, I'll teach you all my experience."

Lin Xiuzhu was slightly stunned.

"Do you want to guide me in cultivation? But I'm very stupid..."

Shi Yu was speechless. If she was stupid, how would others survive?

Senior Panda was talented. If not for Shi Yu, Senior Panda would be the number one genius in Ping Cheng.

Ever since she became a Beast Tamer, Senior Panda had displayed pretty good talent. However, in order to study the evolution of the Iron-eating Beast, she didn't put her mind on increasing her strength.

But even so, it was already extraordinary to be able to become a master at this age. Moreover, Lin Xiuzhu's cultivation talent was also maxed out. Not only did she develop the "Giant Transformation Teaching Manual" that allowed the Iron-eating Beast to master the Giant Transformation before it evolved, but she also developed the nurturing technique to increase the Iron-eating Beast's hardening proficiency. It could be said that she was much stronger than Hall Master Lin Hongnian.

After all, Lin Hongnian had only developed Thunder Palm and Cannon Fist... How could she say that she didn't have talent?

"No, you're very talented."

A cultivation form written by Senior Panda appeared in Ji Mengzhu's hand at some point in time. She smiled and said, "Next, I'll do my best to let you become a legend level Beast Tamer before the age of 30."

"Legend?!" Lin Xiuzhu was shocked.

Even Shi Yu, who was beside him, revealed a stunned expression. Wait, she wasn't kidding, right?

He felt that this Senior Ji thought more highly of Senior Panda than him.

Legends under the age of 30 could be counted on one hand even in Dong Huang...

It could no longer be described as a genius.

Ji Mengzhu said, "There's nothing impossible."

She said, "Although the person beside you is very outstanding, don't underestimate me. I personally helped choose Emperor Wu's Iron-eating Beast. Even the growth plan of that Iron-eating Beast to become Emperor Wu's strongest pet was made by me."

"Do you believe me?"

Lin Xiuzhu's face was red. She suddenly felt that this ancestor grandma, ah, no, this ancestor big sis, was a good person. If she could become stronger, who wouldn't be willing?

"Wait, Senior Ji, if you teach me, what about Shi Yu... Can you help him formulate the growth plan of the Iron-eating Beast like how you helped Emperor Wu? His Eleven's talent is also very good." Lin Xiuzhu immediately remembered Shi Yu and Eleven.

"Uh." Ji Mengzhu was silent.

## **Chapter 716: The Hopeful Panda Senior (2)**

Little girl, why mention that?

If possible, didn't she want to?

But the problem was that she only took a look at Shi Yu's Iron-eating Beast and could tell that the cultivation level of that Iron-eating Beast was even higher than Emperor Wu's Iron-eating Beast...

How could she teach anything?

Moreover, when she thought of how Shi Yu could even nurture a monarch-level ginseng baby to destroy totems two levels higher, Ji Mengzhu felt that she was even more unqualified to teach Shi Yu.

She even suspected that that ginseng baby was a Mythical race...

After thinking about it, she still felt that it was easier to impart all her knowledge to Lin Xiuzhu, a little girl who looked very much like her.

"I can't teach him. His Iron-eating Beast is already more outstanding than Lord Emperor Wu's Iron-eating Beast at the same level." Ji Mengzhu shook her head.

"Uh." Lin Xiuzhu was stunned. She opened her mouth slightly and turned to look at Shi Yu.

This was because Shi Yu was a pioneer in the field of Iron-eating Beast cultivation. Although Lin Xiuzhu and the others knew that Shi Yu's Iron-eating Beast was strong, very strong, so strong that it had evolved several times, they still didn't have an accurate concept of how strong Eleven was.

According to Shi Yu's archeological discoveries, the Iron-eating Beast was even the trump card of the legendary Beast Tamer Emperor Wu!

Then Lin Xiuzhu and the others naturally thought that Emperor Wu's Iron-eating Beast should be the strongest Iron-eating Beast.

After all, that was a legendary level Beast Tamer, not even just a mere legend level.

However, this was the first time Lin Xiuzhu had heard that Eleven was even stronger than Emperor Wu's Iron-eating Beast at the same level. Moreover, these words came from the feeder who cultivated Iron-eating Beasts for Emperor Wu...

Instantly, Senior Panda was rather shocked. Lin Xiuzhu looked at Shi Yu in confusion. Wait a minute, wasn't it a little ridiculous for him to be stronger than a Emperor Wu trump card of the same level...

It was fine if they defeated the Space Emperor's secondary pet, but why was he now being compared with the legendary Beast Tamer's trump card...

"Is that so?" Shi Yu also scratched his cheek innocently. Was he that powerful? That made sense. After all, even if it was Emperor Wu's Iron-eating Beast, it couldn't maximize all the racial skills such as Giant Transformation, Deterrence, and Impregnable at the monarch level...

Of course, apart from these, there was also a pile of body forging skills... Even the Overlord Body Armor and the Undying Golden Body...

"By the way, Senior Lin, your Iron-eating Beast hasn't evolved yet, right? You can let Senior Ji plan it," Shi Yu said.

"Yes, yes." Lin Xiuzhu nodded.

Ji Mengzhu also nodded and said, "In that case, I'll carry out the transfer first. It'll take about a day."

Ji Mengzhu wanted to move from the legendary ruins to the Wu Ling Ruins. Shi Yu naturally had to wait for this day.

After all, they were still waiting to take over the legendary ruins.

"During this period, bring me to see the Iron-eating Beast Corps in the ruins and receive a new batch of Iron-eating Beasts." Ji Mengzhu looked at Lin Xiuzhu and smiled.

"Alright!" Lin Xiuzhu was full of motivation.

At the same time, he said, "Shi Yu, you should come too."

"Forget it." Shi Yu hurriedly rejected.

Compared to seeing how his three armies were doing, he still wanted to study the Control Talent Bead as soon as possible!

In the face of Senior Panda's invitation, he decisively took the memory crystal of Legend Bai Chuan's experience in using the Beast Taming Talent and ran to develop the telepathy talent.

Apart from that, Ling also held the memory crystal of Legend Bai Chuan regarding biological modification technology and continued to study the "tenth inscription" in detail.

Eleven naturally cooperated with Ling.

The other pets were also busy.

Baby Ginseng had just evolved and was very smug, but it was quickly arranged by Shi Yu to study the “Phoenix Fruit”.

Now that Baby Ginseng had fire-element, the difficulty of researching the Phoenix Fruit should have decreased a little. This was the key to joining the mixed-blood bureau!

As for Buggy, it was using the worm silk and phantom illusion to modify the corpses of the three overlords and the Black Meteorite Yak as puppets!

However, looking at the totem-level corpse, Buggy felt that it was boring.

It felt that even if it was repaired, it would only be so-so. After all, Baby Ginseng was the one who blew it up.

It was better to go to Baby Ginseng and replicate a dream illusion. Then, it would imitate and would condense a Baby Ginseng illusion every day and store it in its spatial pocket.

Although the self-destruction power of Baby Ginseng’s phantom was worlds apart from Baby Ginseng’s main body...

However, if the power was not enough, could it be made up with numbers?

It seemed feasible to save 600 billion ginseng baby phantoms and let them line up to self-destruct?

However, the greatest problem was that the maintenance of the “forbidden ginseng baby weapon” also required a lot of energy. Buggy didn’t have time to maintain so many “trump cards” at all times. This was so difficult to solve...

After thinking about it, Buggy could only helplessly look at the totem corpse again.

Chi Tong was staring at its three overlord undead. The more it looked at them, the more it disliked them.

Their battle results were too lousy.

Ever since it controlled these three undead, they had never had a good battle result.

Apart from pulling the corpse, there didn’t seem to be any other use.

Chi Tong was thinking about when to kill them and change to a powerful new undead.

Unfortunately, Shi Yu definitely wouldn’t allow it. After all, if it killed them, the proficiency of the Spirit Release skill would definitely directly reach perfect level, allowing Chi Tong to break through to the overlord level.

Obviously, Shi Yu definitely wouldn’t let Chi Tong be the first to break through.

Skill proficiency, legendary resources, and overlord will. This was the threshold to break through in Shi Yu’s team.

Apart from the proficiency points to be added, only Eleven, Baby Ginseng, and Susu had the corresponding conditions to reach these thresholds.

Among them, Shi Yu was not in a hurry to let Baby Ginseng and Susu break through because they could use the Time Fruit to reach the overlord level at any time. The impact of breaking through was not very big.

### **Chapter 717: The Hopeful Panda Senior (3)**

Therefore, the most suitable to break through was undoubtedly Eleven, who wasn't very compatible with the Time Fruit. At the monarch level, Eleven could defeat Baby Ginseng and Susu, who had used the Time Fruit. After breaking through to the overlord level, it would definitely be stronger.

Apart from that, it was also to take care of the initial pet and the most hardworking Eleven in the team.

....

The pets were busy with their own things. Even the Tyrant Dragon and the Duckbill Beast were training themselves crazily. It had been two months, but they still couldn't defeat the transcendent-level Green Silkworm!!

They were very hateful.

< Name > Green Silkworm Phantom

[Level of Growth]: Transcendent

[Skill]: Worm Silk (Dao Proficiency), Absolute Sleep (Expert), Illusory Phantom (Perfect), Deterrence (Proficient), Super Sight (Expert), High Speed Healing (Proficient), Space Shackles (Perfect), Instant Transmission (Expert), Concealment (Expert)

[Energy Points]: 4399

Of course, this was also related to the skill proficiency and skill accompanying moves of the transcendent-level worm. It was indeed too ridiculous...

Shi Yu also closed his eyes and cultivated.

He held the "Control Talent Bead".

Just like the "Awakening Mirror", when Shi Yu used this "Control Talent Bead", it consumed physical strength.

The difference was that the awakening talent level contained in the Awakening Mirror was very low. It could only awaken creatures of transcendent races, so it didn't consume much physical strength at all.

As for the "Control Talent Bead", Shi Yu had plundered it from the legend Beast Tamer. The other party's development of this talent had already reached a very high level, so when Shi Yu used it, it consumed a lot of physical strength.

The talent level plundered depended on the Beast Tamer's Beast Taming level and development level!

However, considering that the Yue Maiden was only at the legendary level herself, the toy she created shouldn't be able to plunder the talent of a legendary Beast Tamer. She probably had to do it herself.

The talent of a level-seven and level-eight Beast Tamer might be the limit of the plundering of this bead.

A level-seven Beast Taming Talent. If other level-six Beast Tamers used this Beast Taming Talent, they would probably instantly squeeze the other party dry.

However, Shi Yu really didn't feel any pressure when using it. Soon, half an hour passed.

As he didn't have anyone to compare him to, Shi Yu didn't know if he was a genius.

He opened his eyes, and blue spiritual waves spread in his eyes. In the next moment, the rock in front of him was directly controlled by his spiritual power to float. Then, it was crushed with a bang!!

Stone fragments flew!

In just half an hour, he used Bai Chuan's development experience to develop the use of spiritual power with the "Talent Control Bead".

In terms of power, it wasn't very strong. It was only used to deal with commander-level pets.

His mental strength level was still inferior to his physique level.

Combat Department Shi Yu... Evolution... Combat Department, Spirit Department Shi Yu!

It was another icing on the cake, a dispensable skill+1.

It could be used to turn on the lights and get drinks.

After learning Psychic power, Shi Yu put down the Talent Bead again. Unfortunately, after leaving the Talent Bead, he couldn't use Psychic power anymore. His control over his body was immediately much weaker.

However, Shi Yu could sense that as long as he trained hard and constantly let his body become proficient in this use experience, he would sooner or later leave the Talent Control Bead and could easily use Psychic power.

"Wait, I've also learned Psychic power now. Even if I can't use the skill index to add points, can I increase the experience of using Psychic power through the Psychic Memory Water??" Shi Yu fell into deep thought.

He felt that if he could master Dao Proficiency Psychic power, even if the telepathy development didn't succeed, it didn't seem to be a loss?

No, no, no... He was no longer a child. He should want all of them!

"Speaking of which..." Shi Yu looked at the Talent Control Bead and was already completely certain that this was a good thing.

This talent was not wrong.

This Control Talent Bead could completely be passed down as a family heirloom and sect treasure.

What Beast Tamers lacked was the ability to control their strength, and the Legendary-level Talent Control Bead completely made up for this flaw.

If he successfully developed his telepathy talent through this Control Talent Bead and made his telepathy stronger, could others, such as Senior Lu, use this Control Talent Bead to imitate him and develop his talent?

If Emperor Shi could create a special time meditation technique for others to learn, and the Iron-eating Beast General could develop a massage technique to strengthen the metal-element talent to help the Iron-eating Beast become stronger, then he, Shi Yu, could definitely open up a new mental school.

Create a new spiritual talent usage that was different from an “archeologist”!

Shi Yu suddenly had the thought of becoming a master and felt that it was quite interesting.

Just like creating the Green Silkworm cocoon system and the mechanical phantom beast system, it was very interesting.

If the future Beast Tamer with the gift of telepathy in Dong Huang had battle power stronger than a strengthening-type Beast Tamer, that would be awesome.

At that time, the telepathy talent could wash away the humiliation of the “weakest battle power talent”.

Perhaps... it wasn't limited to the telepathy talent.

For example, was it possible for the beast-eared girl to use the Control Talent Bead to develop the Fusion Talent so that her body could fuse with multiple pets at the same time like Emperor Wu? In that case, it would be awesome.

“Cultivate! Cultivate!” However, the most important thing now was to quickly develop his talent and prove the feasibility of all of this.

## **Chapter 718: Creating a Super Sect**

The next day, Ji Mengzhu successfully transferred and became the spirit of the iron-eating beast ruins.

After the transfer was successful, she gave the legendary ruins to Shi Yu according to the agreement.

As for Shi Yu, he returned the other party's ruins stone.

Although that was the case, Senior Ji would probably leave it to Senior Panda. After all, she didn't need spatial equipment as a ruin spirit.

Among them, there was also a large number of iron-eating beast evolution resources. Shi Yu had no use for them, but it was suitable to nurture the iron-eating beast army.

As for the ten meteorite fragments, Shi Yu took them away first and strengthened them in the rest of the Spirit Accumulation Jade. He gave Eleven priority for the evolution resource to avoid insufficient resources.

Shi Yu estimated that there would be some left in the end. If he used the rest and sent it back to the Iron-eating Beast Corps, he would try to save two pieces for his senior!

The best situation was that Dong Huang could catch Yun An as soon as possible. Even if they couldn't, blowing up a leg was enough for a bunch of Iron-eating Beasts to evolve into second stages.

However, ordinary Iron-eating Beasts didn't have an overlord level will. If their willpower didn't reach above medium level, it would probably be very difficult to control the power of the Demon God.

After that, Shi Yu stayed in Wu Ling City for two more days.

In the past two days, Lin Hongnian, the beast-eared girl, White Brook, and the others from the Iron-eating Beast Corps gradually learned of Ji Mengzhu's existence. They were shocked to the extreme. They were very confused about Shi Yu digging out an ancestor.

However, once they accepted the setting, no matter who it was, they liked this ancestor from 2000 years ago very much. They asked her all kinds of questions about the Emperor Wu Dynasty. Lin Hongnian was like this, and so was the beast-eared girl. Of course, Shi Yu was no exception.

For example, he had asked about all the skills corresponding to the remaining inscriptions.

Among them, the Iron-eating Beast that evolved with the meteorite fragment could awaken a skill called "Demon God Body".

This skill was both metal and dark element. The skill effect was simpler than Shi Yu imagined.

It was an Iron-eating Beast that could transform its body into a Demon God Body with extremely high affinity for the dark element. The Iron-eating Beast with the Demon God Body could automatically produce the power of the dark element Demon God in its body. It could mobilize the power of the Demon God to perfectly integrate into any metal-element skill and increase the effect of the skill in all aspects.

For example, it could allow the dual-element Space Quake to be upgraded to a skill of the metal, space, and dark elements!

It could allow the lightning needles of the metal and lightning elements to be introduced into the lightning in the body and upgraded to special black lightning of the dark, metal, and lightning elements.

It was similar to the effect of the Demon God form that Eleven entered with the power of the Demon God in the source of physical strength.

But if it used skills, the consumption and side effects would definitely be smaller, and the increase would be greater.

This skill was a key skill that could increase the overall strength of the Iron-eating Beast. It could allow the Iron-eating Beast to obtain a perfect second or third element.

Apart from that, the other four inscription skills also had their own characteristics, but unfortunately, there was no metal!

Even if there was metal, Shi Yu had no skill slot. The Iron-eating Beast race was really inconvenient.

Two days later, Shi Yu still decided to return to Ping Cheng.

“Aren’t you staying for longer?”

Seeing that Shi Yu was about to leave, Lin Xiuzhu said.

“No, there are other things.”

Shi Yu realized that it was easy to be distracted if he stayed here.

He stayed here and always wanted to see the situation of his three armies from time to time.

With a look, he would discover that the cultivation speed of the Beast Tamers and pets in the three armies was too slow, causing Shi Yu to panic.

In his anxiety, he wanted to help and provide some help, causing his focus to be delayed.

It was better to return to the cold icy plain to train hard. Out of sight, out of mind.

Although Senior Panda, the beast-eared girl, and Senior Ji Mengzhu could chat from time to time, there were too many external things, causing him to be unable to concentrate all his energy.

Of course, there was another reason. It was because Shi Yu had already inquired about the history of the Emperor Wu Dynasty from Senior Ji Mengzhu through two days of chatting. There was no need to stay any longer.

“Alright.”

Lin Xiuzhu said, “By the way, do you want to take a look at the military martial arts competition later?”

“This will definitely come.” Shi Yu smiled. Seeing the Panda Army defeat other soldiers, how could he not come?

Of course, he would also cheer for the Buggy Army and the phantom beast army...

“Alright.” Lin Xiuzhu also smiled excitedly. She felt that with Senior Ji’s help, there would definitely be no problem. What Green Silkworm cocoon, what mechanical phantom beast? They would all lose to the Iron-eating Beast Corps this time!

“Don’t worry and go.” At this moment, Senior Ji Mengzhu was like Lin Xiuzhu’s personal grandmother, guiding Lin Xiuzhu with all her might. She smiled and nodded at Shi Yu. She believed that the next time Shi Yu came, he would definitely be shocked by the changes in the Iron-eating Beast Corps!

....

Icefield City, Ping Cheng, Ice Dragon Snow Mountain.

Perhaps it was his hometown, but Shi Yu still felt that cultivating here was the most interesting.

There was only half a year left. Shi Yu made up his mind to be serious and not slack off.

After returning to the icy plain, just like two months ago, Shi Yu called all his pets over to move again...

Then, he began his painful cultivation life.

Shi Yu had two goals for this bitter cultivation.

First, he would let Eleven's super racial skills reach perfect level. With the help of the Aurora Magnetic Gold, it could break through and become a perfect overlord. Then, it would work hard towards evolution.

Shi Yu felt that the skill of the Demon God Body was not bad. He decided to let Eleven master it before the evolution of light and darkness. However, according to Senior Ji Mengzhu, the more meteorite fragments it swallowed, the stronger the evolution of the Demon God Body. Shi Yu decided to let Eleven devour and evolve after the overlord level. After all, the overlord level was definitely stronger than the monarch level's devouring and digestion.

## **Chapter 719: Creating a Super Sect (2)**

In any case, the meteorite fragments were in ample supply now. There were ten of them. When the time came, he didn't know if he could control a few fragments in one go.

Finally, he would increase the height of the superalloy and white lightning points and evolve the light and darkness through the combination of the power of the Demon God and the power of the white lightning!

If the conditions allowed, it was best to find another light-element legendary resource!

Second, prioritize adding some points to Ling's top-notch intelligent divine net to increase its research ability again. After all, this ability concerned the progress of many researches such as superalloy, fusion mecha, and Kirin phantom beast.

Shi Yu was very familiar with adding points.

Although it was still painful every time, practice made perfect.

Unfortunately, he couldn't look at his own will level. Otherwise, Shi Yu felt that he had to have an overlord's will no matter what.

At that moment, Shi Yu was happy and in pain.

The happy thing was that he could actually use the Psychic memory water drop created by Buggy and Susu.

He could learn the experience of Buggy using Psychic power, the Dao Proficiency level Psychic experience!!

It was an export transfer.

From being able to use Psychic power to turn off the lights and get water, to using Psychic power to create a mental barrier defense, to controlling a stone to fire a cannonball-like attack, to using Psychic power to create a perception domain... Shi Yu's development of mental power increased at lightning speed!!

This made his mental strength level quickly as terrifying as his physique.

Now, with the skill, although Shi Yu only had one low-level skill, with his physique, he could finally say to a monarch-level pet, "Come, one-on-one."

Of course, it was only limited to ordinary monarchs below the level of the National League.

Letting Shi Yu challenge monarchs like Eleven and Baby Ginseng alone was definitely purely looking for trouble.

Apart from that, there was also a surprise. As his Psychic proficiency increased, the burden of adding points was much smaller.

The pain he endured when adding points was even smaller. After adding points, his recovery speed was even faster!

Physical control talent was indeed not a wrong choice!

In fact, at the transcendent level of Psychic power, Shi Yu could already leave the Talent Bead and use Psychic power on his own.

Regarding the development of mental strength, Shi Yu was undoubtedly a huge success.

However, regarding the development of soul power and telepathy talent, Shi Yu suffered every time.

In this aspect, there was no experience to reference. After all, Bai Chuan himself had only developed one transcendent ability, Psychic.

He followed his previous thoughts and used his soul power as a shell, his telepathy as a bridge, and his mental and physical energy as energy to condense a substitute to condense a Nascent Soul on his pet. He kept trying, but in the end, he undoubtedly failed.

It didn't work at all.

As expected, cultivation was not that easy.

Shi Yu began to try other ideas.

But none of them succeeded.

It was only when Shi Yu raised the proficiency of his Psychic power to the Dao Proficiency level through the memory water drop that a new usage of max-level Psychic power made up for Shi Yu's pain.

This new usage was mental strengthening.

Through the max-level Psychic proficiency, it could strengthen the spiritual power of other life forms.

Buggy had long known this move, but the tactical meaning was not great and it was useless. After all, it was the only one in the team who played the spiritual element.

However, if this skill appeared on Shi Yu, the difference would be different.

Shi Yu had yet to successfully develop his telepathy talent. Firstly, through the "Body Control Talent" and the "Psychic Memory Water", he developed a low-level mental strengthening talent.

This made Shi Yu not know whether to laugh or cry. He didn't know if he should be happy or what.

Because his intention to establish a sect seemed to be completed in a short period of time?

"I have the experience method to use the 'Control Talent Bead' to develop spiritual power here. I also have the 'Max Level Psychic' memory water drop here. Through these three combinations, I seem to be able to let a Beast Tamer have the 'low-level second talent, spiritual strengthening'?"

Shi Yu was silent. He would take note of it in a small notebook.

It was called the "superpower school".

Not only could he obtain superpowers, but he could also use them to strengthen pets!

"Control Talent Bead", "Memory Water for Psychic Development Method", and "Memory Water for Psychic Full Proficiency" were indispensable.

After gathering these three things, he could obtain the low-level second talent!

Just imagining if Senior Lu, who was already very strong, had learned the "mental strengthening skill" ...

It was simply so strong that it exploded!!!

Shi Yu was excited!

Unfortunately, its limitations were greater.

One would need him to provide the Experience Water and Talent Bead.

Moreover, not everyone could use the Talent Bead. Considering the consumption of this Talent Bead, Shi Yu's initial judgment was that it had to be at least a level-six Beast Tamer to barely develop spiritual power.

Apart from that, compared to the mental strengthening talent of Beast Tamers of the same level, the consumption was greater and the effect was smaller.

This point destined that superpower schools could only be used by Beast Tamers with non-strengthening and non-combat talent. For example, it was very suitable for Beast Tamers with telepathy talent.

As for those Beast Tamers who had battle-type talent, it was definitely impossible for them to choose not to use their main talent for a second talent.

After all, the stamina of Beast Tamers was limited. They couldn't activate two strengthening skills together.

Even Beast Tamers with telepathy talent probably wouldn't be willing to use it on anyone, such as Shi Yu.

When Chi Tong possessed him, he needed to invest a lot of physical strength and energy to pilot the mecha. He didn't have the energy to use mental strengthening at all. Unless he pursued instant eruption or used it when sending Buggy out in 1VS1, the cost-effective ratio wasn't very high.

### Chapter 720: Creating a Super Sect (3)

But even so, Shi Yu felt that he had unintentionally created an epoch-making invention.

It was better than nothing. Even if it was a legendary Beast Tamer, they probably wouldn't refuse the opportunity to obtain superpowers.

If he established a sect, he would probably be able to crush Brother Zheng Hai's Binhai Training Hall in minutes and become the most popular Beast Taming Sect in Dong Huang.

After all, there were still a bunch of Beast Tamers with non-combat talent in the country. There were especially many of these people in Bureau 13 of Dong Huang.

For example, all the members of the Feeding Bureau, all the members of the archeological Bureau, Gao Xuan of the Mechanical Bureau, and even Legend Yin and his son in the ancient capital... None of them had battle-type talent.

They were already talented. If they had the chance to obtain a mental strengthening talent, even if it was a low-level version, who wouldn't want it??

Their battle power would undoubtedly increase greatly!

Even Beast Tamers with battle talent would probably be very curious about superpowers. After all, they didn't have to strengthen their pets. They could use them for fun.

"Susu, eternal god!! Skill memory water drop, eternal god!"

This discovery made Shi Yu's disappointment that he had not successfully developed the telepathy talent disappear. He had a stronger motivation to continue developing the telepathy talent.

However, he felt that he had to change his train of thought.

His telepathy mutation was caused by the Undying Fruit and by his soul power.

But clearly, his use of soul power was inferior to mental power.

As for the control skill of the soul, Bai Chuan didn't successfully develop it either. He only developed mental strength, mental power, various life-nourishing skills, and physical strength skills. From this, one could tell the specialness of soul power.

Therefore, Shi Yu was thinking that since Bai Chuan had no experience in developing soul power, could he reference the experience of others?

For example, he could directly use Chi Tong's "Possession" and other soul skill memory water droplets to cultivate with the "Talent Bead" to increase his understanding of soul power.

For example, he could go to the mixed-blood bureau and get a set of soul cultivation manuals... Then, he would think of a way to increase the proficiency of this skill!

The previous failures all stemmed from insufficient proficiency!

With enough proficiency, he didn't even want to develop the mental strengthening talent. The talent would have already come out on its own.

Memory water drop... was undoubtedly a good thing!!!

It looked like he had successfully found a way to exploit the system.

Using the memory water drop, he felt that he was one step closer to developing the strongest Psychic talent that combined mental, soul, and physical strength.

....

Handsome people were pretty lucky. In most cases, they were happy.

After Shi Yu successfully developed the superpower school and had a clearer development path, not long after, good news came from Baby Ginseng.

At this moment, it was shaking its leaves proudly. It didn't waste much energy at all before successfully researching the cultivation method of the Phoenix Fruit.

Shi Yu looked at the fiery red Phoenix Tree and the two fresh Phoenix Fruits on it with a happy expression.

"Yi." In the words of Baby Ginseng, the Phoenix Fruit that contained the characteristics of phoenixes, flames, and plants that could modify the bloodline of the human body was indeed very difficult to nurture, but this time, they encountered this talented research ginseng.

Baby Ginseng just had Chi Tong use its full-level possession to possess it. Through the mutation, it personally comprehended the power of the Phoenix and directly used its flames and plant characteristics to find a large number of ways to nurture the Phoenix Fruit.

Moreover, it created two Phoenix Fruits to prove its success. As for the first one, it had been dissected already.

"As expected of you guys."

"Mi!" "Yi!" Chi Tong and Baby Ginseng expressed that there was no need to celebrate. This was all basic.

Go, use the Phoenix Fruit to show off!

Shi Yu was very grateful to Chi Tong and Baby Ginseng for helping him join another bureau.

After mastering the planting method of the Phoenix Fruit, it meant that Shi Yu could also establish a "Phoenix God Shrine" in the country and create a "Phoenix Family". With this condition, it was easy to join the mixed-blood bureau.

Shi Yu was actually quite curious about the benefits of the mixed-blood bureau...

"I understand." Shi Yu smiled readily. In the next moment, his expression changed again.

Three blessings all at once!

He quickly came to Ling's side.

On Ling's side, the tenth inscription was finally successfully developed.

In the Mechanical Research Institute, Shi Yu personally watched Eleven eat the "superalloy" created by Ling. Then, he hardened his body and carved a new inscription that was different from the previous nine inscriptions, completing the evolution again.

However, what made Shi Yu's balls hurt was why this new inscription looked so much like the Chinese word "void"?

The evolution this time was very small. Eleven's entire body was filled with the light of evolution for a moment before it ended. Eleven didn't awaken any new skills because of this, but its energy level increased to more than ten million.

However, this didn't affect anything. Through the skill index, Shi Yu could clearly confirm that the current Eleven could already learn superalloy through the skill index!

"Wuu!!" Eleven looked at Shi Yu nervously and excitedly.

As for Ling, it had an affirmative expression.

"It can be taught." Shi Yu nodded.

"Wuuu!!!"

Eleven cheered excitedly.

Evolution! Evolution! Return to first place! Return to first place!

"This is already the limit. The difference between the Iron-eating Beast Race and the Alloy Monster Race is still too big. It can only cooperate with a small evolution to increase the skill compatibility and use your talent to learn superalloy." Ling sighed.
