Chapter 761: The Power of a Quasi Divine Skill (4)

761 The Power of a Quasi Divine Skill (4)

“You,” the Elven Empress said when she saw this not very smart little white dragon.

When Shi Yu saw this, he also felt that the little white dragon was a little unlucky. It had come at the wrong time.

Although the little white dragon’s current strength looked pretty good, compared to Ling, whose normal energy level was 20 million, the difference was not just a little.

It would definitely be tortured.

It was going to lose face in front of the Dragon God and the Elven Empress.

However, if the Elven Empress wanted to see Ling’s strength, Shi Yu couldn’t refuse. He looked at the little white dragon that had arrived and said helplessly, “Third Prince, long time no see. Let’s fight!”

The little white dragon: “?”

What was going on?

Why did he have to hit it the moment it arrived?

What did it do wrong?

The Dragon God said, “Try it. If your performance is not bad, I’ll give you a gift.”

The little white dragon: !!!

“Lord Dragon God...” The little white dragon was shocked and looked at Lord Dragon God. It didn’t expect Lord Dragon God to be so easy to talk to. It’d get a gift if its performance was not bad?!

If its parents and those bad friends knew that their Third Prince, the little white dragon, had obtained a gift of the Dragon God, wouldn’t it take off?

In an instant, the little white dragon was eager to give it a try. It looked at Brother Shi Yu for help, hinting for him to please hold back a bit.

Everyone would be able to develop peacefully.

Shi Yu: ...I’ll try my best.

With a battle target, Shi Yu fell silent. Ling walked out and looked at the little white dragon in the sky.

At this moment, the little white dragon also looked at the pet it had never seen before walking out of Shi Yu’s side with a serious expression.

A feeling of its bloodline being suppressed arose, making the little white dragon even more serious.

Wait, its opponent couldn’t be this one, right?

It wasn't Shi Yu's monster main forces??

Great!

Although it sensed that this pet was also extraordinary, at least it wasn't that radish, sword spirit, slime, and... It looked at Buggy. This worm!

If it weren't for these five, even if it felt its bloodline being suppressed, the little white dragon would have heaved a sigh of relief.

The little white dragon was clearly traumatized by Shi Yu's first five main forces.

Ling also looked at the silly little white dragon and analyzed its information.

"Little white dragon, you attack first," Shi Yu said.

In order to give the little white dragon a chance to perform, Shi Yu said this to prevent Ling from instakilling this guy.

"Wuhu, I understand!!" Upon hearing that, the little white dragon's eyes focused and it took a deep breath.

It was just about to condense dragon energy and attack Ling below, but at this moment, its dragon eyes suddenly widened, and the blood energy in its body surged. With a puff, it spat out a mouthful of dragon blood and quickly fell from the sky. The hidden injury from the ruins training... relapsed.

Bang!

It fell to the ground.

It directly lost its mobility.

Shi Yu, Ling, Buggy: ???

The Dragon God and the Elven Empress were silent.

On the ground, the little white dragon said with a weak expression, "It's over. It seems that the injuries left behind from the previous challenge have relapsed. After the challenge ended, I clearly received Doctor Shell's treatment. Wu wu wu, but I don't think it was completely treated, leaving behind hidden injuries."

Quack doctor, quack doctor!!

Just as they were about to fight, the internal injuries suddenly relapsed and it vomited blood and fell. At this moment, the little white dragon wanted to find a hole to hide in. It felt like it had lost face in front of the Dragon God and Senior Shi Yu.

Doctor Shell misled him!

Everyone: ...

The Elven Empress, Sylphra, was silent for a moment before looking at the little white dragon. Emerald-green energy immediately lingered around the little white dragon's body as she helped it treat it. At the same time, she said, "As expected of a quasi-divine skill. Looks like it can indeed be used in battle."

"Alright, I've already experienced the power of this move."

Little White Dragon: What, what?

Shi Yu and Buggy also looked at the innocent-looking Ling speechlessly. Ling was also very stunned. What did it do?

Don't tell it that this was all thanks to the Wind Blessing. It had just analyzed 4,399 victory methods through its top-notch intelligence, but it never expected that the little white dragon would fall before the battle even started... This didn't make sense.

Unscientific Beast Taming

Chapter 762: Ascending to the Sky (1)

762 Ascending to the Sky (1)

A moment later, the little white dragon woke up energetically under the treatment of the Elven Empress.

It looked at the beautiful green-haired woman gratefully and said, "Thank you, Senior."

Although it didn't know who this person was, she was probably a very powerful being able to stand beside the Dragon God.

"It's nothing." Sylphra smiled.

After the little white dragon recovered, it was silent for a moment before reacting. Just now, everyone seemed to have said that some quasi-divine skill could indeed be used in battle?

They had already experienced the power of this move?

What was going on?

It looked at Shi Yu eagerly and said, "What do you mean? Are... are we still fighting?"

Shi Yu took a look and said, "I don't think there's a need. You already lost just now."

The little white dragon: Huh??

"It has the skill to increase our luck. According to 'relativity', it's to make you even more unlucky."

"Just now, your hidden injury relapsed. Perhaps this skill was effective."

"I think it's better not to fight. This move is a little dangerous and uncontrollable... If you have some hidden incurable disease later, or if spatial turbulence suddenly appears in the Dragon Palace mystic realm and sweeps you to death, it won't be easy to clean up..."

The little white dragon's expression was stunned. A skill to increase its luck and make the enemy unlucky?

There was such a skill?

Its hidden injury relapsed just now because it was hit?

“How can there be such a terrifying skill?” The little white dragon was shocked.

It immediately looked around and then looked at the sky, afraid that a meteorite would fall from the sky and smash it to death.

Oh, this was the ocean mystic realm. There were no meteorites, so it was fine.

“Wu, wu!!” Buggy also said. That’s right, how could there be such a terrifying skill? Buggy had already started to imagine it.

In the future team competition, if it was fighting Ling, just as it teleported, spatial turbulence could suddenly appear and sweep it to death.

How could they fight?

It would lose for no reason.

“Let’s leave it at that for now. This move is indeed a little dangerous,” the Elven Empress said with a smile.

“But there’s no need to worry too much.”

“The reason why this little white dragon is so miserable is because it’s too weak and is more heavily affected by the power of the natural order.”

“If the opponent is very strong, this skill won’t be useful. I can feel that this weak law wave can’t affect me.” The Elven Empress smiled.

“If it wants to forcefully affect a life form with powerful luck, the backlash it suffers will also be very serious.”

“Therefore, it’s better for you to master this move as soon as possible.”

As the Elven Empress finished speaking, Shi Yu and Ling quickly nodded. They also understood what the other party said.

However, this move still looked very strong!

Shi Yu was already imagining it!

After that, Ling would still research various machines. Could it be that it would be lucky enough to succeed for no reason?

As everyone knew, research needed to be accompanied by a large number of experiments. If one was unlucky, it would be difficult to achieve results in their lifetime, but if one was lucky, it was completely possible to do it in one go.

Or in the World Tournament, if he encountered Beast Tamers who contracted pets above their level, was it possible that before the battle even started, the other party's body suddenly couldn't hold on and thus would result in their deaths?

Also, the current Ling should be considered to have Mythical potential.

Generally speaking, the upper limit of the Time Fruit depended on its racial potential. Most of the time, it was at the overlord level, but for Ling, who had Mythical potential, even if the side effects were too great and it couldn't reach the Mythical level, was it possible to temporarily unleash a totem attack?

The more Shi Yu thought about it, the more excited he became. Impressive, impressive.

"Did you come to Dragon Palace City this time to prepare for the world competition?" The Dragon God saw that Buggy had also just returned from the Dragon God Statue, so she asked Shi Yu.

"Yes, I'm here to train hard." Shi Yu nodded. He indeed had the intention of coming to Dragon Palace City to challenge overlords to train.

"Well, all the best." The Dragon God nodded. In that case, after figuring out the reason for the change in this place, it was time to leave.

She looked at Sylphra, but at this moment, she smiled at Shi Yu.

"Oh? Then do you want to go to our Tingxiang to train?"

"You're still a genius archeologist of Dong Huang. Can your archeological ability and its luck enhancement also be used to crack ruins? Our Tingxiang still has a few important ruins that are difficult to crack. Do you want to go over and take a look?"

"If you gain anything, I won't mistreat you."

"Uh..." Shi Yu was stunned.

"It's alright. After a while, your Dragon God and some overlords of Dragon Palace City will go to Tingxiang. You just have to accompany them."

Shi Yu looked at the Dragon God. Was this for real? Why would Dragon Palace City go to Tingxiang?

"That's indeed the case, but if you don't want to go, you should cultivate in Dragon Palace City. Don't worry about her."

The Dragon God felt that it was better for Shi Yu to obediently use the Dragon God Statue to cultivate than to go to Tingxiang to train.

Shi Yu said, "I want to go, I want to go. I happen to have something to do in Tingxiang."

Wasn't this a coincidence? If he could go with Dragon Palace City, he wouldn't have to care about Dong Huang.

Dong Huang might not necessarily have as many bodyguards as Dragon Palace City.

The Dragon God was silent. She didn't expect Shi Yu to be seduced by the other party in a few words.

“Let’s go together. Don’t worry, I’ll ensure his safety.” The Elven Empress, Sylphra, smiled and said, “Ah Tian, don’t you believe me? Moreover, you’ll go over yourself. Are you afraid that I’ll eat him?”

“Fine then, in that case.” The Dragon God looked at Shi Yu and said, “Choose ten overlord-level dragons from the Environmental Protection Department of Dragon Palace City and head to Tingxiang together. You’ll be in charge of the exchange mission between Dragon Palace City and Tingxiang. Is there a problem?”

Unscientific Beast Taming

Chapter 763: Ascending to the Sky (2)

763 Ascending to the Sky (2)

“Exchange mission?” Shi Yu came to a realization. So Dragon Palace City and Tingxiang wanted to communicate?

However... he was leading the team?!

Although as the minister of the Environmental Protection Department, he could indeed command overlords, but... was it suitable?

“Alright... I promise to complete the mission...” Shi Yu said.

“Yeah.”

“Let’s go,” the Dragon God said to the Elven Empress. She no longer planned to stay here for long. However, before leaving, she looked at the little white dragon beside her and said, “When we go to Tingxiang, bring it along. As the Third Prince of Dragon Palace City, it’s a little weak.”

Little White Dragon: QAQ???

Ahhh, not only did it not mention the gift, but it was also scolded. The little white dragon immediately felt that it was so difficult. If it had known earlier, it would have gotten the Turtle Prime Minister to look for Shi Yu.

“Alright, let’s go.” The Elven Empress smiled. If she told Dong Huang, Dong Huang might not necessarily be able to let Shi Yu go to Tingxiang to train. It was easier to talk to her, her best friend.

However, to the surprise of the Elven Empress, this Shi Yu’s status in Dragon Palace City was so high?

Not only could he obtain the Mythical fossil from Dragon Palace City, but he could also command overlords. As the leader of an overlord-level dragon party, this treatment was simply no different from the totem dragon king of Dragon Palace City, right??

Even the eldest prince of Dragon Palace City didn’t seem to be able to do what Shi Yu did...

However, Shi Yu, who could contract a Mythical pet, seemed to really have this qualification. Although creatures with quasi-divine skills were restricted by the rules of the world, it was still as difficult as ascending to the heavens to break through to the Mythical stage. However, it was not difficult to grow to the demigod level.

Tingxiang had a good relationship with Dragon Palace City and Dong Huang. Sylphra was naturally willing to befriend such geniuses from Dong Huang and Dragon Palace. This was legendary potential!

After the two legendary level women left, the little white dragon sighed heavily and looked at Senior Shi Yu with a worried expression. It didn't dare to look at the ridiculous life form directly.

It was afraid that it would really be as Shi Yu said, that it would suddenly die!

"Senior Shi Yu..."

"Let's go to your father," Shi Yu said with a smile.

"Sigh, alright, but Senior Shi Yu, can you not tell my father that the Dragon God despises me for being weak..." The little white dragon felt aggrieved.

Shi Yu was silent. But it really was weak!!

As the son of a totem, even if it couldn't compare to the Void Mantis at the monarch level, it couldn't be too inferior, right?

"No, but Senior Dragon God has already named you. Come with me to Tongxiang to train later." Shi Yu was helpless.

"Ah!" The little white dragon was angry. It was not easy for a dragon to live.

It only wanted to be an old worm.

If it still wanted to work hard, what was the point of its father and mother's hard work?

....

Shi Yu did not expect to be personally invited to Tingxiang by the Empress.

This was also good. He saw that the Dragon God and the Elven Empress had a good relationship. Perhaps he could openly crack a few ruins on the way this time?

With the protection of the Dragon God and the Elven Empress, there was no need to care about safety. After all, the combination of these two might not be invincible on Blue Planet, but it was pretty much almost there.

Shi Yu had also learned and understood the culture of Tingxiang.

They were different from humans, but humanoid transcendent life forms that looked similar to humans. They were extremely strong, and their physical strength could compete with dragons or be contracted by Beast Tamers.

Dwarves who were proficient in forging and could forge various top-notch equipment were also transcendent humanoid life forms that could be contracted. Most of the Mechanics in Tingxiang would contract a Dwarf as their assistant.

Apart from that, there were various myths and legends.

Even the undead, elemental life forms, plants, and dragons were naturally different from the east.

As Mother Dragon's hometown, Shi Yu had long wanted to take a look, but before that, he had thrown An Chang to the Sea Dragon King.

It was very reasonable for the Sea Dragon King to take care of his disciple since he was taking care of its son, right?

"What, you just saw the Dragon God?!"

"And the empress of Tingxiang?"

Sea Dragon Palace.

The Sea Dragon King looked at Shi Yu, who had been called over by the little white dragon, and was in disbelief.

Did the Empress of Tingxiang come to Dragon Palace City?

Speaking of which, his Beast Tamer, Lin Feng, had once been beaten up by the Elven Empress in Tingxiang. If it weren't for the good relationship between the Elven Empress and the Dragon God, Lin Feng might not have been able to return. As for why, the Sea Dragon King didn't dare to ask. It only knew that there was also an elf in Lin Feng's team.

The water there must be very deep...

"Well, Lord Dragon God and the Elven Empress wanted me to bring some overlords of the Environmental Protection Department to Tingxiang to train. Oh right, Lord Dragon God saw that the Third Prince's growth speed was pretty good at that time. Compared to the last Dragon Palace banquet, it improved a lot. It also asked me to bring it along and felt that it had a lot of potential. It's worth nurturing. The future is promising."

At the side, the little white dragon was extremely touched. Yes, yes.

It also remembered that Lord Dragon God had said so.

"Lord Dragon God said that?" The Sea Dragon King was suspicious and looked at the little white dragon. What right did this kid have?

Or could it be that the Dragon God discovered potential on the little white dragon that it itself didn't see...

The Sea Dragon King was immediately happy. It didn't train this kid for nothing. It was actually chosen by the Dragon God. Not bad, not bad.

"Then I'll leave it to you, Shi Yu. When the time comes, supervise this kid well. As long as he doesn't die from training, train to the death!"

"No problem." Shi Yu nodded.

"You didn't come here just to visit me, right??" The Sea Dragon King's huge dragon eyes stared at Shi Yu. According to its understanding of this Shi Yu, this guy didn't come to Dragon Palace City for no reason. It was most likely because he had something to ask of it.

Unscientific Beast Taming

Chapter 764: Ascending to the Sky (3)

764 Ascending to the Sky (3)

“Hehe.” Shi Yu smiled and said, “I have a junior with a very good relationship. His initial pet is a Dragon Carp. With my help, it evolved into a monarch race Sea Dragon through the power of your Sea Dragon Scale, so I wanted to come and see if you can help guide me later, senior?”

“His talent is not bad. His second pet even obtained the blessings of Senior Butterfly God and evolved into an overlord race. He also has legend aptitude.”

“Huh?” The Sea Dragon King frowned. The Butterfly God had also helped train him? However, the initial pet that evolved with its strength was only a monarch race. Why was the second worm blessed by the Butterfly God an overlord race?

Although it didn’t mean anything, it kept feeling that it was inferior.

It said, “I understand, but my guidance is very strict.”

“It’s alright. As long as he doesn’t die from training, train to death!” Shi Yu also said!

The opportunity for the totem dragon king to be a teacher was rare. He believed that An Chang wouldn’t refuse.

“There’s no need to trouble you too much, Senior. Just give him some guidance and throw him to the Turtle Prime Minister. Isn’t there a few ruins mystic realms for newbies to train in Dragon Palace City? When the time comes, you can let him try them. Before we return from Tingxiang, let him stay in Dragon Palace City.”

“Alright,” the Sea Dragon King said. “It’s a small matter.”

“An Chang, come and meet Senior Sea Dragon King.”

At this moment, Shi Yu also pulled An Chang out of the ruins space.

The current An Chang had yet to react to the fluctuations of Ling’s awakening divine power and was a little stunned.

Seeing this strong and silly boy, the Sea Dragon King was slightly silent. His physical strength was very strong. His Fusion Talent was not bad, but he didn’t look very smart.

....

After Shi Yu dealt with An Chang, he returned to his Blue Sea Island easily.

He wasn’t in a hurry to go to the Environmental Protection Department to choose people to form a training team. Instead, he hurriedly returned to study Ling’s ability, wanting to study the Mythical Dream World in detail.

In the ruins, Eleven, Baby Ginseng, Chi Tong, Susu, and the others could be said to have complicated feelings.

“I’ll participate in the next team competition and take a look.” Ling displayed the demeanor of a big sister again.

The normal State was 20 million energy points. This was the power of a Mythical race!

In addition to the expert level Mythical Revival, its strength had tripled. It wasn’t necessarily inferior to other teammates after they had eaten the Time Fruit and used equipment.

At the thought of this, Ling felt that it had finally made it through. As expected, knowledge was power.

Sigh ~

During this period of time, although Eleven, Buggy, Baby Ginseng, and Chi Tong had all been strengthened at the epic level, Ling’s increase in strength and that ridiculous quasi-divine skill made Eleven and the others a little confused about Ling’s battle power.

This skill was too strange.

For example, Chi Tong was very worried that when it fought Ling, the interlocking power would suddenly be chaotic and misfire, causing it to be heavily injured by it...

Of course, the only thing it didn’t have to worry too much about was that there seemed to be Susu at the bottom. Chi Tong secretly glanced at Susu, who was shaking its head.

“Ning...”

At this moment, Susu, who was made of water, looked at Ling with tears in its eyes and asked if it could get some of this luck.

Susu felt that as a member of the team at the bottom continuously, its luck was the worst.

“This... This...” Ling was silent. How could they split it?

Although the Wind Blessing looked like a skill that could bless others, perhaps because its proficiency was too low, it couldn’t be used as an active skill at all.

“Ning! (Add points!)” Susu was excited.

It wasn’t afraid of low proficiency. It just had to add points.

Shi Yu had a headache. “No, a quasi-divine skill is probably a certain difference from a super skill. Forget it. Let’s try adding some quasi-divine skills after we become legend level.”

If it was said that maximizing super skills made it a quasi-divine skill...

Then when a quasi-divine skill was maxed out, it would probably directly advance into a divine skill.

Was the consumption the same? Even if he had yet to try, he felt that it was impossible.

He was afraid that after adding points, he would directly become a totem undead.

“Yes,” Ling suddenly said and had a bold idea. Therefore, top-notch intelligence was indeed top-notch intelligence. It directly used its loading skill to hug Susu and make both parties become one.

In that case, could they share the luck?

“Ning...”

Susu was stunned, but Shi Yu smiled and shook his head. “Even if the quasi-divine skill is very powerful, it’s definitely not as ridiculous as you think. Let’s get down to business first.”

Even if it was lucky, there had to be an “incident” to have a “good outcome”.

If they had somehow fused together so weirdly. It would be strange if there were any results.

“Ning!” However, just as Shi Yu finished speaking, Susu, who had become stronger through Ling’s loading and was comparable to an overlord, was suddenly stunned.

It sensed that something was wrong and took the initiative to activate the power of time, allowing its life level to also reach the overlord level.

At this moment, Susu, who was wearing a blue mechanical hat, widened its watery eyes and quickly looked at Shi Yu.

It seemed to have sensed the inheritance summoning of the Blue Sea Ruins!

Shi Yu: “?”

Chi Tong: “?”

The inheritance conditions of the Blue Sea Ruins were at the overlord level. Susu naturally didn’t meet the standard, but a long time ago, Shi Yu and the others wanted to try if they could use the Time Fruit to temporarily let Susu reach the overlord level and cheat to cause a reaction from the Blue Sea Ruins.

But clearly, it failed. The system of the Blue Sea Ruins was surprisingly perfect. There were no loopholes.

However, this time, Susu clearly sensed that after it stacked its overlord-level battle power through various methods, an obvious summoning guide wave appeared in the Blue Sea Ruins!

“Huh?”

Upon hearing Susu’s words, Shi Yu, Chi Tong, and the others were stunned on the spot. Don’t tell them that their luck was so good that they happened to encounter a bug in the Blue Sea Ruins and mistakenly treated Susu, who had obtained overlord-level strength by stacking buffs, as having reached the condition to reach the inheritance...

At this moment, Eleven, Buggy, Baby Ginseng, and Chi Tong were all crazy. They looked at the mechanical hat Susu was wearing.

No!!

How could there be such a cheating skill!

He could do whatever he wanted just because he was lucky?

When could he try fusing with them?

“This...”

Shi Yu also fell into a deep silence. He didn't know if they were lucky or unlucky. It was a good thing that the Blue Sea Ruins had reacted, but it was said that after the Blue Sea inheritance, the strength of the Blue Sea Sprite would quickly increase and quickly reach the totem level. Clearly, he couldn't control it.

It was a good thing for Susu, but not necessarily for him, a Beast Tamer.

"Forget it, I'll go take a look first. At most, I won't accept the power inheritance first. Apart from the power inheritance, there might be other inheritances. I'll see if you left any inheritances in your previous life, such as myths and legendary resources." Shi Yu was eager to give it a try, but he still couldn't resist the temptation of the ruins.

"Yes, yes, yes!!!" Susu was also extremely excited. Wow, it was taking off!

Ling, the eternal god!

[Unscientific Beast Taming](#)

Chapter 765: Don't Want the Blue Sea Sprite Inheritance (1)

765 Don't Want the Blue Sea Sprite Inheritance (1)

Clearwater Island.

In the Dragon Palace mystic realm, on the island where the Blue Sea Ruins was.

Susu temporarily became an overlord through the Time Fruit and used the Wind Blessing to create a bug in the Blue Sea Ruins. After mistakenly thinking that it had reached the inheritance standard, Shi Yu and the others immediately ordered Buggy to bring them here.

Looking at the water cube-like Blue Sea Ruins, Shi Yu, Susu, and the others were slightly nervous.

Could it really succeed?

Regardless of whether it could succeed or not, they were already here. If they didn't go in and take a look, Shi Yu and the others would definitely be indignant.

In the past, when Shi Yu and the others came into contact with the Blue Sea Ruins, they would be blocked and unable to enter. However, this time, they easily entered the Blue Sea Ruins like passing through water.

....

The Blue Sea Ruins had a spirit.

This Dao Spirit was more like a rule mechanism.

In order to ensure that the Blue Sea Sprite race could be passed down infinitely,

It was in charge of passing down the inheritance to every generation of the Blue Sea Sprite Reincarnation.

It was in charge of summoning every mature Blue Sea Sprite Reincarnation to receive the inheritance.

It was also in charge of ensuring that the Blue Sea Sprite Reincarnation could grow up and have enough strength to accept the inheritance mission even if an accident happened.

The spirit of this ruin was created by the first generation of the Blue Sea Sprite. It established a rules mechanism and was strengthened by the Blue Sea Sprite that accepted the inheritance every generation, ensuring that it could exist forever.

The form of the spirit of the ruins in the Blue Sea Ruins was similar to the first-generation Blue Sea Sprite. As an elemental life form, its entire body was made of water elements. It maintained a noble humanoid posture, like a mermaid. Its upper body was humanoid, but its lower body was like blue water waves.

Its entire body was surrounded by mist, and a thin mist covered its beautiful body. Coupled with the water refracting a faint halo, it gave it a hazy beauty...

The spirit of the Blue Sea Ruins that woke up from its sleep felt extremely strange.

It fell into a recall state. The last time it woke up seemed to be a year ago. At that time, a special telepathy woke it up.

This telepathy was very special, as if it was searching for traces of the Blue Sea Sprite.

The spirit of the ruins should have ignored this thought.

However, due to the special situation at that time, the spirit of the ruins made a difficult choice.

It wasn't too much to say that the first generation Blue Sea Sprite was a Mythical race. It had mastered two incomparably powerful quasi-divine skills and could be said to be the strongest demigod.

However, even if it was a demigod or an elemental life form, it was extremely difficult to withstand the wear and tear of time and become eternal.

However, in order to protect the sea, the first generation Blue Sea Sprite thought of the method of will reincarnation. It relied on the power of faith and the inheritance of will to constantly reincarnate and reproduce.

This way, as long as the faith continued and the inheritance continued, the Blue Sea Sprite race could exist forever.

However, there was also a certain risk. As the power of faith fell, as the strength before each reincarnation decreased, and as time continued to wear down, the racial potential after each reincarnation might fall.

From a quasi Mythical race to a high-level overlord, to a middle-level overlord, to a low-level overlord... In the beginning, this fall was still within the acceptable range of the Blue Sea Sprite.

However, countless years later, the race level of the Blue Sea Sprite Reincarnation fell to the transcendent race, and the inheritance mechanism of the Blue Sea Sprite could no longer be maintained.

A gap of 3,000 years appeared in the Blue Sea Ruins inheritance. During this period, it was the time when the Blue Sea Sprite Reincarnation died the most midway. It was getting harder and harder for the reincarnation to reach the strength standard to accept the inheritance.

The awakened spirit of the ruins realized that this might not be able to continue. It had to seek change. Otherwise, in another hundred years, there might be a situation where the reincarnation failed and the Blue Sea Sprite inheritance was completely severed. At that time, the Blue Sea Ruins and it would disappear together.

At this moment, a human Beast Tamer with special telepathy who could awaken it from its sleep appeared.

Therefore, the spirit of the Blue Sea Ruins decided to make a bold attempt.

It no longer let the Blue Sea Sprite Reincarnation grow on its own.

Instead, it handed the reincarnation of the Blue Sea Sprite to other life forms to nurture.

Although this might more or less affect the unformed thoughts of the Blue Sea Sprite Reincarnation, there was no other way.

Originally, there were many good choices in the Blue Sea Ruins. In the ocean, many totem factions had obtained the favor of the Blue Sea Sprite, such as Dragon Palace City.

If it were them, they would definitely be very happy to help the Blue Sea Sprite grow.

Unfortunately, every time it woke up, it was very difficult for the spirit of the Blue Sea Ruins. In addition, it couldn't strongly affect the outside world and couldn't take the initiative to contact those lives. In the end, it chose to awaken the "human Beast Tamer" who shamelessly spoke to it.

It actually despised this human Beast Tamer, but at that time, there was no better choice. Therefore, it helped this human Beast Tamer find this generation's Blue Sea Sprite Reincarnation, hoping that he could quickly nurture this generation's Blue Sea Sprite.

However, to the surprise of the spirit of the ruins, it didn't expect that in such a short period of time, in just a year, this human had cultivated the Blue Sea Sprite Reincarnation to the overlord level.

This made the spirit of the ruins heave a sigh of relief and confirm that its choice was right. At the very least, it didn't let the inheritance of the Blue Sea Sprite be severed because of this. As for whether the next inheritance could still be so smooth, it would have to rely on this generation of Blue Sea Sprites to grow into demigods and think of a way themselves.

[Unscientific Beast Taming](#)

Chapter 766: Don't Want the Blue Sea Sprite Inheritance (2)

766 Don't Want the Blue Sea Sprite Inheritance (2)

In a ruin that looked like a deep sea world.

The spirit of the Blue Sea Ruins stared at the Blue Sea Sprite Reincarnation that had been summoned and entered the ruins to receive the inheritance, as well as the human Beast Tamer it chose.

The spirit of the Blue Sea Ruins understood that it was time for the Blue Sea Sprite Reincarnation to separate from this Beast Tamer.

After accepting the inheritance, the Blue Sea Sprite Reincarnation grew into a demigod-level existence in an extremely short period of time and controlled the ocean again.

And after that, both parties might not be from the same world. Although they were very grateful to this Beast Tamer for helping this generation of Blue Sea Sprite Reincarnations grow, the mission of the Blue Sea Sprite was still in the sea. It couldn't follow beside this Beast Tamer forever.

"Huh?"

The spirit of the ruins looked at the Blue Sea Sprite and the human Beast Tamer who entered. Suddenly, its mood changed subtly.

Sensing the life fluctuations of the Blue Sea Sprite Reincarnation gradually decreasing to the monarch level, a huge question mark appeared in the mind of the spirit of the ruins.

Wait, wait, didn't it sense that the Blue Sea Sprite Reincarnation had reached the overlord level?

It woke up again because of this.

Why did it return to the monarch level!

Was it still dreaming?

At this moment, the spirit of the Blue Sea Ruins fell into deep thought.

At this moment, they finally arrived at the Blue Sea Ruins. Looking at the holy and noble "Blue Sea Saintess" who was the "Spirit of the Ruins" in front of them, Shi Yu and Susu were also very excited.

"I knew it. There's indeed a 'guardian spirit' in the Blue Sea Ruins." Shi Yu had an 'as expected' expression. He knew it. If not for the guardian spirit, how could the Blue Sea Ruins have handed Susu to him so accurately?

At this moment, Shi Yu and Susu were quite excited to see this humanoid elemental life form.

However, the spirit of the ruins was very silent at this moment.

It kept feeling that something was wrong.

Why was what it saw with its own eyes different from what it had just sensed?

What exactly blinded its perception?

Forget it, it wasn't important anymore.

"Hello, this generation's Blue Sea Sprite and its guardian."

The spirit of the ruins emitted a gentle voice.

Shi Yu and Susu: ...

What guardian?

Why did it feel that the style of this ruin spirit was different from theirs?

Was this how they called Beast Tamers in the totem era?

“Senior guardian, you summoned us, right?”

“Can it already accept the inheritance now?” Shi Yu said.

“Ning ~!”

The spirit of the ruins looked at Shi Yu and the others and nodded calmly. It carefully observed the Blue Sea Sprite Reincarnation and discovered that although it had yet to reach the overlord level, it was already fast.

With the help of its will, it could break through to the overlord level at any time. The foundation was enough.

It was naturally impossible for the spirit of the ruins to admit that it had sensed wrongly just now, so it felt that it seemed feasible to let the Blue Sea Sprite break through to overlord on the spot and accept the inheritance.

“Yes, it’s only a step away from the standard to accept the inheritance. If it breaks through with its will now, it can accept the inheritance.”

The spirit of the ruins nodded.

“This... Does it have to break through?” When Shi Yu heard that, he was originally quite happy, but now, he immediately wilted.

“But my Beast Taming level isn’t enough to support the overlord level... Moreover, I feel that its foundation isn’t very strong.”

The spirit of the ruins said, “Just break the spiritual contract. After accepting the Blue Sea inheritance, the Blue Sea Sprite will recover its peak strength in an extremely short period of time. At that time, no matter what, the contract can’t continue to be maintained. As for the rest, don’t worry. During the inheritance process, its race will constantly be optimized.”

“Remove the contract...?” After the ruins spirit finished speaking, Shi Yu and Susu were stunned.

Shi Yu was speechless. As expected, just as he had understood, after accepting the inheritance, Susu would probably quickly recover its demigod-level strength. At that time, the contract would definitely not be able to be maintained.

“Ning...”

Susu also looked troubled. It didn’t want to break the contract, afraid that Shi Yu wouldn’t want it after it was broken.

After all, the second team still had an Abyss Sea demigod eyeing the first team’s position covetously.

And it happened to be at the bottom of the team.

“Breaking the contract doesn’t mean anything. After accepting the inheritance, it will still be it. The experience you guys have spent together won’t disappear, so there’s no need to worry. This is only for the Blue Sea Sprite to grow faster.”

The spirit of the ruins said calmly, “Ten years pass in the blink of an eye. At that time, it will become the new master of the sea. This is the best choice for Lord Blue Sea Sprite and the entire sea.”

Shi Yu and Susu: “?”

“Ten years? What do you mean?”

The spirit of the Blue Sea Ruins said, “The acceptance process only requires ten years to let it recover the peak power of the Blue Sea Spirit.”

Susu: “?”

“Ning.” Susu turned to look at Shi Yu. Why don’t they leave? It didn’t want this Blue Sea inheritance anymore.

After ten years?! The flowers would have withered already!

Susu made a simple calculation.

It took a day to add points to a super skill, and 256 to reach “Dao Proficiency”.

In other words, it could obtain a quasi-divine skill in less than a year.

In ten years, that would be more than ten quasi-divine skills!

Although it also took time to consider the fact that Shi Yu needed to add points to other pets, the problem was that Shi Yu’s level would also continue to increase. When the time came, the time needed to add points would also decrease.

Ten years. Susu felt that when the time came, the second team would be at the Mythical stage.

[Unscientific Beast Taming](#)

Chapter 767: Don't Want the Blue Sea Sprite Inheritance (3)

767 Don’t Want the Blue Sea Sprite Inheritance (3)

And meanwhile, it would still be accepting the inheritance.

This was unacceptable.

If it didn’t accept the Blue Sea inheritance, it could still protect the sea.

At that time, it would cooperate with Duckie from the inside and out. It would take down the Abyss Sea first.

Shi Yu: ...

“Too slow,” Shi Yu said with a frown.

Ten years, wasn’t this a scam?

How many decades did life have?

The spirit of the ruins: “?”

The spirit of the ruins originally thought that Shi Yu would consider the big picture and give up the contract for the future of the Blue Sea Sprite to let the Blue Sea Sprite accept the inheritance and return to the peak.

As for the Blue Sea Sprite, in order to protect the will of the sea, it would also obtain and inherit stronger power.

However, the conversation between the Blue Sea Sprite Reincarnation and this human Beast Tamer directly stunned the spirit of the ruins.

The Blue Sea Sprite Reincarnation didn't want to accept the inheritance anymore?

Its Beast Tamer said that becoming a demigod in ten years was too slow??

What was going on!

Were these guys crazy or was it crazy?

“Don't you understand how strong the peak power of the Blue Sea Sprite is?” the spirit of the ruins said.

“At the peak of the Blue Sea Sprite, it was one of the few lives that had mastered the prototype of two divine skills. It could be said to be the strongest below the Mythical stage.”

“This realm is something that countless lives have difficulty cultivating for millions of years.”

“And now, it would only need to sleep for ten years during the acceptance period to recover the strength at its peak...”

“Ning... (It's still too slow.)” Susu was extremely aggrieved. It originally thought that the Blue Sea Ruins would be the start of its counterattack, but it didn't expect this inheritance to be so scammy.

It actually had to be passed for ten years.

How was it lucky?

It was clearly extremely unlucky.

Why did it have to know such a bloody truth so early?

In Shi Yu's ruins space, Chi Tong and the others were also paying attention to the situation outside.

Upon hearing that it would take ten years to accept a demigod inheritance and obtain two quasi-divine skills, Eleven, Buggy, Chi Tong, Baby Ginseng, and the others rolled on the ground with laughter.

They felt that Susu was extremely pitiful.

“Why don't we not accept the power inheritance first, Lord Protector... Apart from that, are there any other resource inheritance...” Shi Yu asked shyly.

The spirit of the ruins: “?”

“What a joke!” The spirit of the ruins was immediately angry. What was going on? Why was this batch of Blue Sea Sprite so difficult to lead? Why was it different from the previous batches of Blue Sea Sprites?

Was this the disadvantage of handing the Blue Sea Sprite Reincarnation to other life forms to nurture?

Instantly, the spirit panicked.

It felt that things had exceeded its expectations, making it not know what to do.

“Cough, cough, cough, Lord Protector, does it have to be at the overlord level? Does it have to be passed down for ten years?” Shi Yu said. “I roughly understand what you mean.”

“You mean that the Blue Sea Sprite probably has to be at the overlord level to have enough ability to receive the two skills, ‘Sea Cleansing Spirit’ and ‘Blue Sea Contract’. During the inheritance process, the proficiency of these two skills will increase with time, until it touches the rules and becomes the prototype of a divine skill.”

“Therefore, is there a possibility that it will only accept a portion of the inheritance? It’s fine as long as it learns these two skills. There’s no need to reach very high proficiency.”

“This way, can the time used be shorter? Can it receive the inheritance at the monarch level?”

“Ning! (In any case, I won’t break the contract. In any case, I won’t accept ten years of inheritance.)” Susu was aggrieved and had a very strong attitude.

The spirit of the ruins: ???

“If you don’t reach the overlord level, even the will of the Blue Sea Sprite will find it very difficult to withstand the power of the inheritance. I’m afraid you’ll get lost.”

“Once the inheritance is opened, if it’s interrupted midway, it might cause the inheritance power to be lost. At that time, even if it loses a trace of power, it won’t be able to let the Blue Sea Sprite master the ‘prototype of a divine skill’. It might cause its strength to be unable to reach its peak in this lifetime.”

“If it can’t reach its peak, it can’t leave behind an inheritance that allows the next generation of Blue Sea Sprites to reach their peak.”

“Therefore, it will cause the inheritance mechanism of the Blue Sea Sprite to be severed.”

“So, do you know how simple your thoughts are?”

“In other words, it can?” Shi Yu said. “As long as it can withstand the inheritance of two skills at the monarch level, as long as it doesn’t care about the loss of the inheritance power, it can complete the inheritance in a short period of time, right?”

“You don’t understand at all!” The spirit of the ruins was angry.

Shi Yu and Susu were quite talented to be able to anger a seemingly noble and holy spirit of the ruins into anger.

“Ning. (Lord Protector, I think this is alright!! Let’s only accept a portion of the inheritance first!)” Susu said.

Ruins Spirit: @!#@¥#¥

“Give me a reason!” The spirit of the ruins was a little regretful. It had handed the Blue Sea Sprite Reincarnation to the human in front of it to nurture.

In any case, it couldn't understand the thoughts of the Blue Sea Sprite Reincarnation and the human in front of it.

“Reason...”

Shi Yu was silent for a moment. He looked at it and said, “Ten years is too long. Let it accept a portion of the inheritance. Even if it has just mastered the ‘Sea Cleansing Spirit’ and the ‘Blue Sea Contract’, I’m confident that I can restore it to its peak strength or even stronger in three years.”

“Is this reason alright?”

The spirit of the ruins wanted to refute, but it felt that Shi Yu was a little arrogant. Shi Yu had previously said that he could nurture the transcendent reincarnation of the Blue Sea Sprite to an overlord. It was willing to believe this because it wasn't that difficult.

[Unscientific Beast Taming](#)

Chapter 768: Don't Want the Blue Sea Sprite Inheritance (4)

768 Don't Want the Blue Sea Sprite Inheritance (4)

However, Shi Yu actually said that he could nurture a Blue Sea Sprite to peak strength? Moreover, three years?

“Ning!” Before the spirit of the ruins could refute, Susu replied trustingly. It believed it.

The spirit of the ruins was completely confused. It only felt that Shi Yu and the Blue Sea Sprite Reincarnation had gone crazy.

“Why don't you guys leave?” The spirit of the ruins gritted its teeth. It didn't want to waste any more effort with them.

It was better to wait for this generation's Blue Sea Sprite Reincarnation to die and hope that the next generation's Blue Sea Sprite Reincarnation could be more normal.

In any case, the inheritance mechanism definitely couldn't be broken.

“No, no, no.” Shi Yu knew that he could accept part of the inheritance at this moment. How could he leave so easily?

He smiled and said, “Lord Protector, please believe us this time.”

“Believe us this time. Perhaps this generation of Blue Sea Sprites can become eternal and mythical.”

“To completely escape the fate of endless reincarnation.”

The spirit of the ruins: “?”

At this moment, Susu condensed a memory water drop and handed it to the spirit of the ruins.

The spirit of the ruins received the memory water drop.

Then, it saw unbelievable scenes.

“Ning! (Shi Yu, increase points!)”

A Water Slime was touched on the head and mastered the Infinite Devour that could devour everything to evolve.

“Ning! (Shi Yu, increase points!)”

A Water Slime. Its head was touched. It had mastered the Heavenly Frost Cold Energy that could freeze time. As it added points, the skill proficiency increased quickly.

“Ning! (Shi Yu, increase points!)”

A Water Slime that had just learned purification only took a day to be added to full proficiency.

“Master, increase points.”

In its memory, under the gaze of the spirit, a Rubik’s Cube touched the law of luck with a bang and stepped into the Mythical Domain.

“Wuu! (Beast Tamer, increase points.)”

“Yi! (Add points!)”

As the points were added, the spirit of the ruins saw many ridiculous phenomena.

At this moment, the spirit of the ruins was a little silent.

Infinite Devour. Wasn’t that the strongest water-element skill that could be traced back to the Mythical Era, comparable to the “Sea Cleansing Spirit” and the “Blue Sea Contract”?

How could the Blue Sea Sprite Reincarnation learn it?

Heavenly Frost Cold Energy. How could the Blue Sea Sprite Reincarnation master such a dual-element skill of ice and time before accepting the Blue Sea inheritance?

Also, why could these skills quickly increase proficiency as the human Beast Tamer touched the head of the Blue Sea Sprite Reincarnation?

From the memories, the so-called super skills improved almost effortlessly with Shi Yu’s help.

It was even a quasi-divine skill. The human Beast Tamer also helped his pet master it.

At this moment, the spirit of the ruins felt that it was a little unscientific.

At the same time, it seemed to know why this generation of Blue Sea Sprite Reincarnation could grow so quickly.

At the same time, it understood why it was so against the word ten years.

It was difficult to go from extravagant to frugal...

Therefore, they were really confident that they could help a transcendent life form cultivate a quasi-divine skill in a short period of time?

What was this?

The spirit of the ruins was extremely confused by Shi Yu's skill index talent.

A real divine skill?

"Senior Protector, you should believe me now, right? As long as it masters these two skills, I can let it grow to its peak in a shorter period of time."

"It can even surpass the peak and become a true Mythical life form."

At this moment, Shi Yu indeed hoped that Susu could accept the inheritance in advance.

With the "Blue Sea Contract", the cleansing power of the "Sea Cleansing Spirit" was definitely much stronger than the cleansing of mid-level skills.

At that time, with these two skills, he could add points to the entire team. Perhaps the cooldown time could be much shorter.

Obviously, this was a skill that could increase the efficiency of adding points. The earlier he obtained it, the better.

For this, he even showed the spirit of the ruins the growth experience of Susu and the others.

With a look, the spirit of the ruins was indeed silent. It looked at Shi Yu in confusion and at the human Beast Tamer in front of it.

It fell into deep thought.

"You guys, experiment in front of me. That 'point increase' just now."

....

A few days later.

Under the magical power of points, after witnessing an inheritance that was even more ridiculous than the Blue Sea inheritance, the spirit of the Blue Sea Ruins was convinced.

It was willing to let Susu try accepting some of the Blue Sea Sprite inheritance in this state.

During this period, Shi Yu felt that it was a pity that apart from the inheritance power, the previous generation Blue Sea Sprite had left nothing behind.

Apart from that, it was a pity that the basic "Sea Cleansing Spirit" and "Blue Sea Contract" were different from the Wind Blessing. They were not natural quasi divine skills.

It needed to be raised to the extreme and touched the laws before it could be upgraded to a quasi-divine skill.

According to Zhong Xuan, every super skill was the embryo of a quasi-divine skill. Obviously, there were good embryos and ordinary embryos.

For example, if the control of the water element was cultivated into a quasi-divine skill, it would definitely come into contact with the law of water.

And for example, if the time mark cultivated into a quasi-divine skill, it would definitely come into contact with the time life and death law.

The use involved after cultivation was naturally different.

The reason why the Blue Sea Sprite was so strong was because it had cultivated these two skills into quasi divine skills.

And when these two skills were combined, they could undoubtedly display an effect comparable to a divine skill.

Just like ordinary time marks, they didn't have any destructive power, but when combined with self-destruction, it wasn't too much to say that they were divine skills.

The combination quasi-divine skill of the Blue Sea Sprite had a similar effect.

< Name > Blue Sea Contract

< Introduction > It's a water-element and spatial super skill. Contract with the sea. No matter where you are, you can directly mobilize the power of the sea and obtain endless energy.

This skill could directly give Susu "infinite energy value".

From this description, it wasn't too much to say that it was a quasi-divine skill, but there were shortcomings.

Although it could mobilize endless energy, due to the difference in skill proficiency, the "quantity" that could be mobilized in an instant was also different.

Even if a water pipe could flow forever, it was impossibly difficult to drown a city.

However, the eternal rainstorm that continued to sweep through the world could destroy land.

This was the effect of the Blue Sea Contract with different proficiency. It could be said to be a super skill with very strong potential.

With this skill, Shi Yu's team should not lack energy anymore.

Apart from that.

< Name > Sea Cleansing Spirit

< Introduction > It's a water-element and spiritual-element super skill. It can create a spiritual body that cleanses everything. The more energy it provides when creating the cleansing spirit, the greater the cleansing strength.

At first glance, it was an "ordinary" cleansing skill, but with the Sea Cleansing Spirit and the Blue Sea Contract with endless energy, even if both skills were entry-level, as long as they were combined and given enough time, the Blue Sea Sprite could also use the endless sea energy to create the strongest cleansing spirit that could cleanse the Abyss demigod.

It was said that the first generation Blue Sea Sprite used the power of the entire sea to create a cleansing spirit and fused with the sea. Only then did the sea produce the ability to cleanse itself.

When these two skills were combined, it was the foundation of the Blue Sea Sprite as the strongest tier demigod.

Both skills were indispensable. If it lacked one, it wouldn't be a Blue Sea Sprite.

Just like Baby Ginseng's Moon Explosion and Time Mark, if it lacked one, it wouldn't be a self-destructing ginseng that could destroy totems above its level.

At this moment, Shi Yu was waiting for Susu to complete the initial inheritance. As long as it learned the Sea Cleansing Spirit and the Blue Sea Contract, as long as the target of the Purification Spirit's possession was added points, the entire team's ability to withstand the pain of adding points could receive an epic increase.

As long as the pet didn't waste too much time, the additional points Shi Yu needed to spend would be much less. In addition, the Spirit of the Sea Cleansing could also cleanse his fatigue. Perhaps before the World Tournament, the skill level of the entire team would be higher than expected!

[Unscientific Beast Taming](#)

Chapter 769: The Reason for the End of the Mythical Era (1)

769 The Reason for the End of the Mythical Era (1)

In the dark blue Blue Sea Ruins.

A water pillar connected heaven and earth.

Inside the water pillar, Susu in the form of a Water Slime had been sleeping for a long time.

It was accepting the power inheritance of the Blue Sea Ruins.

During this period, Shi Yu accompanied him.

The meditation effect in the Blue Sea Ruins was really good.

It was much better than the ruins left behind by the Space Emperor for the Void Mantis.

It wasn't too much to say that it was a Mythical cultivation ruin.

Initially, Shi Yu could not forget the ruins of the Void Mantis.

But now, it felt like it wasn't a big deal.

After Susu finished accepting the Blue Sea Sprite inheritance, the control of the Blue Sea Ruins fell into Susu's hands.

It meant that it fell into Shi Yu's hands.

Shi Yu was already looking forward to the scene of walking around with the Blue Sea Ruins.

Although he and Susu said that they didn't even want the Blue Sea Inheritance, the Blue Sea Ruins was still good stuff.

The powerful thing about this ruin was not just the meditation effect.

Instead, there were more than 100 projections of this ruin worldwide.

For example, the Blue Sea Ruins in Dragon Palace City and the Blue Sea Ruins in the Rainbow Islands were all projections of the main body ruins.

And through the Blue Sea Ruins, they could teleport between these projection ruins!

In other words, if Shi Yu obtained the Blue Sea Ruins, he would have a spatial teleportation array that covered the world.

Shi Yu naturally knew what this meant.

He would be invincible.

For example, at the Seven Islands, if he had the Blue Sea Ruins, even if he didn't have any bodyguards and obtained Mythical resources in front of everyone, the totems and legends present couldn't do anything to him.

This was because Shi Yu could instantly teleport himself to Clearwater Island in Dragon Palace City through the Blue Sea Ruins or instantly teleport himself to Poison Fang Island in the Rainbow Islands to escape.

Just like how the Blue Sea Ruins teleported him in order to let him find the Blue Sea Sprite Reincarnation.

It was probably very difficult to interrupt this teleportation without being at the demigod level. After all, this was a ruin created by the Blue Sea Sprite at its peak.

As for the strength of the Blue Sea Sprite at its peak, it was probably only inferior to the World Tree clone. After all, it had gathered the faith of the entire ocean at that time.

"The willpower of this generation's Lord Blue Sea Sprite is stronger than I imagined..."

The spirit of the Blue Sea Ruins originally thought that with Susu's monarch-level strength, it would be a little difficult to receive the inheritance of super skills, but it realized that it was wrong.

Susu slept very comfortably the whole time. It had really trained. After all, when it was at the transcendent level, it had already started to constantly experience the baptism of super skills on Shi Yu's side.

"Thanks to my good training."

The spirit of the ruins: ...

"How's the progress?" Shi Yu asked.

The spirit of the Blue Sea Ruins said, "The reception is very smooth. The initial evolution can be completed immediately."

"Is that so..." Shi Yu looked at the water pillar in anticipation.

As expected, with the reminder of the spirit of the Blue Sea Ruins, Susu in the form of a Water Slime quickly had blue evolution light lingering around its body. Its life form began to change.

Every generation of the Blue Sea Sprite Reincarnation would evolve towards the primitive race of the Blue Sea Sprite, which was the form of the first generation of the Blue Sea Sprite.

At this moment, under the entanglement of the blue evolution light, Susu's figure began to change, outlining its mermaid-like form. The water formed a long blue hair, bright blue eyes, beautiful appearance, and plump upper body. Its lower body was a blue fishtail that kept flowing like a wave.

Its entire body was made of water. It was similar to the humanoid ice elemental life form Shi Yu had transformed into when he challenged the Seven Islands with his Lu Bai alternate identity. However, its aura was more noble and it had an otherworldly aura. In the form of a dreamy ocean sprite, it revealed a holy cleansing wave.

< Name > Susu

[Race]: Blue Sea Sprite

[Attributes]: Water, Ice

[Race Level]: High-level overlord (Quasi Mythical)

[Level of Growth]: Monarch level

[Race Skill]:

“Super Level”: Holy Water Ring (Expert), Water/Ice Elemental Control (Expert+2), Wave Cannon (Expert), Blue Sea Contract (Initiate), Sea Cleansing Spirit (Initiate)

[Teaching Skill]:

“Super Level”: Infinite Devour (Expert), Heavenly Frost Cold Energy (Expert)

Energy Points: 8,010,000

Under Shi Yu's gaze, Susu's opened eyes also looked outside the water pillar.

At this moment, sensing that Susu had inherited a new skill, Shi Yu could be said to be extremely excited. However, he also had an incomparable headache. He couldn't wait to break through to the legendary level and obtain a new skill slot.

Or, he felt that he should maximize the skill points of the superalloy and other skills and delete them to make room for new skills.

However, it wasn't a big problem not to replicate the Blue Sea Contract and the Sea Cleansing Spirit.

Because the Blue Sea Ruins contained all the Blue Sea Contract and Sea Cleansing Spirit experience from entry level to Dao Proficiency.

Susu just had to constantly receive inheritance from here.

And when there was no need, it could be interrupted.

Although it was a little lower than adding points, it would be a waste not to.

Now, as it evolved, the figure of the ruins spirit beside it kept dimming, while Susu was completely awake.

“What a waste...” Its figure became dimmer and dimmer, and the spirit of the ruins couldn’t help but mention it.

This inheritance was clearly safer to completely receive in one go. And now, Susu had only received a portion and interrupted the inheritance. This would definitely cause the loss of the inheritance power.

If this continued, it was already difficult to rely on the inheritance power to cultivate a quasi-divine skill normally.

Unscientific Beast Taming

Chapter 770: The Reason for the End of the Mythical Era (2)

770 The Reason for the End of the Mythical Era (2)

However, it looked at Shi Yu. With the help of this Beast Tamer, it would be fine to lose some of its inheritance power.

After all, if they didn’t do this, the reincarnation of this generation of the Blue Sea Sprite wouldn’t accept the inheritance no matter what.

They should be able to successfully cultivate the lost parts themselves...

Just as it was about to fall into a deep sleep, the spirit of the ruins felt aggrieved. It felt that it had purely brought this upon itself by finding a father for the Blue Sea Sprite.

If it could do it again...

“I hope everything goes smoothly...” The spirit of the ruins was silent.

Shi Yu smiled and said, “It’ll go smoothly. When it reaches the demigod level, we’ll wake you up.”

“At that time, I’ll let you witness it become a myth. If we can’t break through, we’ll also ensure that the mechanism of the Blue Sea inheritance continues.”

The Blue Sea Ruins, the Blue Sea Sprite, and the spirit of the ruins were symbiosis.

Opening the inheritance consumed the power of the ruins spirit. It would also fall into a deep sleep because of this. Only when the new generation of Blue Sea Sprites grew to the peak could it give it consciousness again through its ability and let it be in charge of the next reincarnation.

During this period, the Blue Sea Sprite would take over the right to control the Blue Sea Ruins.

After completing the mission, it was unknown if there was a next reincarnation for the ruins spirit. However, it hoped that Shi Yu and the others could really succeed and let the Blue Sea Sprite reach the Mythical stage.

After all, if there was a next reincarnation, the race level of the Blue Sea Sprite would probably decrease. At that time, it was unknown if the reincarnation would be so lucky to grow up.

The Blue Sea inheritance method had to change. Otherwise, the Blue Sea Sprite race would really be extinct.

If Susu was the reincarnation of the will of the Blue Sea Sprite to protect the sea, then the spirit of the ruins was the will of the Blue Sea Sprite to ensure that its race could continue.

“I hope so...”

After obtaining Shi Yu’s promise, the ruins spirit nodded and slowly turned into a sea-blue water drop.

Shi Yu took the ruins water drop and understood that this was the controller of the Blue Sea Ruins.

Usually, after the Blue Sea Sprite accepted the inheritance, it would devour the ruins water drop and become the new owner of the ruins. However...

“You’re still young. I’ll hold it for you first. I’ll give it to you when you reach the demigod level,” Shi Yu said to Susu in the sky.

Susu : “...”

“Ning!!” Susu was interrupted from the inheritance. It returned to its Water Slime form and still felt that this form was more convenient and comfortable.

Although the other form was stronger, it kept feeling uncomfortable using it.

In battle, the Blue Sea Sprite form, in daily life, still the Water Slime form.

At that moment, Susu watched helplessly as Shi Yu took the ruins water drop away. It couldn’t say anything.

Blue Sea Ruins... Its Blue Sea Ruins...

Forget it, it wasn’t important anymore!

Susu then revealed an excited expression.

It had already sensed the power of the two new skills.

Initially, Susu was worried about whether its strength could increase after accepting the inheritance.

But now, after sensing the power of the new skill, it was no longer worried.

Infinite energy!

At this moment, it already had unlimited energy!

Perhaps it was a little exaggerated to say this, but the energy of the entire sea was something that no number of demigods could compare to. With the energy behind Susu being the entire sea, it was completely no problem to say that it was infinite energy.

Susu could feel that it could already multiply the maximum level as its normal state without any consumption!

Could Eleven do that?!

Susu could also feel that as long as it was given enough time, it could condense 600 billion water clones in the infinite space in its body.

Baby Ginseng couldn't condense 600 billion clones to self-destruct because it was limited by maintenance and energy, but Susu, who had endless energy, could completely do it.

At that time, with 600 billion clones exploding together, Susu would already feel that a beautiful future was waiting for it.

Apart from that, the skill Sea Cleansing Spirit had no level upper limit at all. It was not restricted at all when it was created. As long as it created the Sea Cleansing Spirit and outputted enough water-element power, even if it was at the monarch level now, it could still create the Sea Cleansing Spirit that could cleanse the Poison Dragon Totem, the Black Goat, the Black Yak, and even Yun An!!

As long as it was used with the infinite energy of the Blue Sea Contract, it could be done.

Of course, limited by the output power of the entry-level Blue Sea Contract, it would probably take a year and a half to create a totem-level Sea Cleansing Spirit. It would probably take decades to create a demigod-level Sea Cleansing Spirit. This was something Susu couldn't wait for... It felt that it was even harder to condense than a time mark.

However, if it was only a Sea Cleansing Spirit that could cleanse overlord-level poison-type creatures, it could easily condense it.

As for the Sea Cleansing Spirit, it could also be condensed and stored in advance. Just like the Bean Bear, the Sea Cleansing Spirit not only had the power to counter poison, curse, and plague, but it could also cleanse will and emotions.

For example, if the enemy was chasing after Shi Yu and it sent a sea spirit over, the enemy would think about why they had to fight and kill. Wasn't it good for everyone to be friendly?

If Susu was fighting Eleven, its Sea Cleansing Spirit would instantly cleanse Eleven's battle intent. It would feel that the team shouldn't be so chaotic. It should give in to Fifth Sister and take the initiative to surrender.

After experiencing the power of the Sea Cleansing Spirit, Susu couldn't wait to start the next team meeting... Ah, wait, it had to use a month to prepare for battle.
