Chapter 771: The Reason for the End of the Mythical Era (3)

771 The Reason for the End of the Mythical Era (3)

Just like before Eleven fought, it had to condense a full Bean Bear. Before Chi Tong fought, it had to condense a full scapegoat. Before it fought, it had to condense enough Clear Sea Spirits.

“Ning!!!” Susu excitedly shared the power of these two skills with Shi Yu.

“Yes, you have to condense more.” Shi Yu nodded.

“Ning! (Right? Right?)”

“Yes, how many times you can add skills in the team before the world competition depends on whether your Sea Cleansing Spirit is powerful.”

“Let’s arrange Eleven’s superalloy first!”

Susu: “?”

The originally happy Susu’s heart suddenly skipped a beat.

It suddenly realized that the strongest effect of his Sea Cleansing Spirit was to cleanse negative emotions and pain.

When Shi Yu added points to his pet, the pet would receive super skill experience. It would be extremely painful and there was a risk of losing itself.

The longer the receiving time, the longer the additional points, and the greater Shi Yu’s consumption.

Therefore, its cleansing ability determined how much Shi Yu consumed.

If Shi Yu’s consumption decreased, the team’s increase in points could naturally increase.

Susu’s expression turned bitter. Wait, wait, was something wrong?

How was this its epic strengthening?

It was clearly an epic strengthening of the entire team.

Why did Baby Ginseng obtain powerful battle skills after evolution... And it, after finally accepting the inheritance, obtained the cleansing skill to assist the entire team...

“Ning...” Susu’s eyes were filled with tears again. It felt that after becoming a Blue Sea Sprite, it was still very bitter.

“Don’t worry, after we maximize Eleven’s superalloy, I’ll give you more points,” Shi Yu said with a smile.

“Ning!” Susu felt that this was more like it.

....

After Shi Yu and the others came out of the Blue Sea Ruins, they held the ruins water drop in their hands and looked at the Blue Sea Ruins in front of them. They could sense that they could teleport themselves to the projections of other Blue Sea Ruins with a thought.

However, each projection could only be teleported once for a period of time. It would take a long time to recover its energy, but these problems were not big. More than a hundred projection ruins could be used as a teleportation location, which was equivalent to them adding more than a hundred new escape opportunities. It was enough no matter what.

Also, after returning this time, Shi Yu could sense that he was not far from becoming a legend Beast Tamer.

The feedback from Ling's evolution and Susu's evolution was incomparably huge. After all, one was a Mythical race, while the other was the strongest demigod race. If he cultivated bitterly in the Blue Sea Ruins, Shi Yu felt that in less than a year, he could break through the strength of the Beast Taming Space to level seven.

This breakthrough speed would definitely be shocking.

"However, it's still a little lacking." After Shi Yu returned, he sighed. He still couldn't make it to the world competition. After all, that thing was only three months away, and during this period, it was impossible for him to keep cultivating and meditating.

If no new opportunities appeared, he could probably only rely on his identity as a level-six Beast Tamer to fight in the world competition.

However, even so, Shi Yu wasn't discouraged. Who said that a level-six Beast Tamer couldn't become the most valuable titled legend?

After returning, Shi Yu called the little white dragon over and sent it to invite the overlords of the Dragon Palace City's Environmental Protection Department who were willing to participate in the event in Tingxiang. As for himself, he was stopped by Ling to study the fossil dream together.

After the experiment, even with the enhancement of the good luck buff, the fossil of the Mythical creature still didn't let them into the dream.

However, as the good luck buff and the Mythical Revival skill improved, and as Ling and the Kirin fossil perfectly fused, Shi Yu and the others captured a lot of the dream information left behind by this fossil.

At the moment, Ling was seriously and carefully analyzing.

Ling, in the form of a Rubik's Cube, showed Shi Yu its research results in the form of a dream scene on the screen.

In the scene, it was still a Wind Kirin cub running away. Compared to the last time, the difference was that Shi Yu and the others saw the creature chasing after the Wind Kirin.

It was a creature that Shi Yu and the others had never seen before. Like those Mythical totems, its appearance looked to be made of many different species. It had a purple-red ant-like body and was extremely huge. Every hand and foot was like the limbs of a huge dragon. At the end were sharp dragon

claws, and its face was as ferocious as a demon. Under its blood-red eyes were rows of sharp white teeth that revealed green saliva.

Even on its back, four pairs of long and huge sharp purple-red thorns stretched out, looking extremely evil. At the same time, the originally barren world it stepped on was even stranger. The sky and ground were covered in purple-red, as if it had formed a domain.

“What’s this?” Seeing this monster, Shi Yu could sense a huge pressure even through the screen.

Ling said, “According to the dream information, this shouldn’t be a native creature of Blue Planet.”

“Alien life invasion?” Shi Yu asked.

“Do you have any speculations? Tell me, tell me.”

“Alright, Master.” Ling nodded and said, “According to the dream information, the Mythical Era was originally an era with very abundant natural energy. All races had a chance to become gods. The transcendent creatures of that era grew easier than our era and it was easier to reach the Laws of the world.”

“In the dream memories of the Wind Kirin, it has feelings that are extremely nostalgic for the beautiful life of the past. All of this ended with a sudden war. All the creatures on Blue Planet were swept into a huge battle, including Mythical creatures.”

Unscientific Beast Taming

Chapter 772: The Reason for the End of the Mythical Era (4)

772 The Reason for the End of the Mythical Era (4)

“Because of this battle, the Blue Planet space was shattered and countless genocides occurred. Because the battle frequently mobilized natural energy, the natural energy level of the entire planet also fell to the bottom, causing the entire world to enter a desolate era.”

“And the fuse of this battle shouldn’t be a battle between native creatures on Blue Planet, but a ‘foreign enemy’. Because in the Wind Kirin’s dream memory, the monster chasing it is an ‘invader’.”

“Therefore, I deduce that the Mythical Era of Blue Planet was originally an extraordinary era, but because the life civilization in the universe coveted the resources of Blue Planet and invaded, Blue Planet was forced to be involved in the war. Master, do you remember Susu’s sworn enemy, the Abyss Sea?”

“The Abyss Sea is also a faction inherited from the Mythical Era. Its power system comes from outer space, and its final goal is to pollute the Blue Planet’s ocean. I judge that the Abyss Sea should be one of the great enemies facing the Mythical Era at that time.”

“And there should be many enemies like this. The enemy that caused the extinction of the Kirin race should also be one of them.”

“This is an invasion. An invasion of a cosmic civilization against Earth.”

Shi Yu nodded and said, "Many archeologists have indeed made this guess. They think that the Mythical Era ended in a war, or in internal strife, or invasion."

However, no archeologist could produce evidence.

Ling said, "This war should have ended with Blue Planet's victory. However, the price of victory is too huge. The planet's energy has almost dried up because of the divine battle. Therefore, under the request of Blue Planet's will, the divine beasts that survived the war fell asleep one by one or left Blue Planet to find a new home and wait for Blue Planet's energy to recover to the level of the Mythical Era."

"At the same time, the will of Blue Planet left behind a clone that turned into a World Tree to supervise the ecology of the entire Blue Planet."

"The invasion of the cosmic civilization should be for something. We can treat it as a 'planetary resource' war, but because of this war, Blue Planet went from a planet with rich resources to a barren world. In addition to the power of the native divine beasts on Blue Planet, to a certain extent, it severed the thought of the cosmic civilization wanting to invade Blue Planet again. Because there are no benefits to be found, and there was no longer a battle of this scale in the totem era."

"However, planets can recover on their own. After enough time, Blue Planet will return to its previous state sooner or later. At that time, cosmic civilizations should invade Blue Planet again, and even the Abyss Sea. Perhaps the Abyss Sea is an inheritance left behind by a certain cosmic civilization to supervise the ecology of Blue Planet."

"Even Yun An might be an investigation soldier sent by a certain cosmic civilization. For billions of years, there have been many civilizations passed down from outer space on Blue Planet. The Western Abyss Sea and the Eastern Yun An Race are only a part of it. No one knows how many cosmic lives have already integrated into Blue Planet."

"And if the Mythical Era revives again, it means that Blue Planet's energy level is about to recover to the standard of the Mythical Era. At that time, not only will those meditating divine beasts awaken again, but Blue Planet will also enter the eyes of the invaders who are eyeing Blue Planet covetously. It's very likely that a new round of divine battles will happen around Blue Planet."

After Ling finished analyzing, Shi Yu fell into deep thought. He felt that it was extremely troublesome.

It was better to have another totem battle.

What Ling analyzed was actually various similar versions in the archeological world today. However, these claims couldn't be verified.

However, the conclusions Ling found through the biological dream of the Mythical Era could be proven in terms of authenticity and accuracy. If he used this discovery to participate in some archeological conference, he would for sure be able to obtain the Mythical resources. At that time, not only the seven countries, but even the other native totem countries would be extremely afraid of extraterrestrial factions like the Abyss Sea and the Yun An Clan.

For humans, the totem clans were enemies, but for the entirety of life on Blue Planet, the life forms of the universe were even greater enemies.

However, just this information was definitely not enough. It was probably very difficult to obtain recognition. He definitely had to showcase Ling, who had mastered a quasi-divine skill. Shi Yu felt that if he wanted to take this Mythical resource, it would probably be very difficult.

Apart from that, what made Shi Yu feel troubled was that Susu had already evolved into a Blue Sea Sprite. If it also wanted to participate in the World Tournament, there was a certain chance of revealing that the Blue Sea Sprite had been contracted by a human Beast Tamer. At that time, the Abyss Sea would probably target him.

Shi Yu cried. He felt that he had clearly done nothing, so why did he have so many potential enemies?

“Master, there’s no need to be sad. Think about it better. Perhaps I’m wrong.”

“But I’m still so angry. Let’s go beat up Duckie.”

[Unscientific Beast Taming](#)

Chapter 773: Seventh Pet (1)

773 Seventh Pet (1)

When Shi Yu was in Dragon Palace City, the legendary Beast Tamer of the Seven Islands, Ji Xiang and Jie Yi of the Phoenix Court arrived at Dong Huang.

Because their goal was clear and their destination was the Ancient Capital, Dong Huang was received by the former legend of the Ancient Capital, the principal of the Ancient Capital University, and the new legend of the Ancient Capital, Lu Qingyi.

“Teacher, do you think Shi Yu and Lu Bai are the same person?”

After Jie Yi of the Phoenix Court and Ji Xiang of the Phoenix Court arrived at Dong Huang, they were still very puzzled by this question.

Although no one in Dong Huang thought that Shi Yu and Lu Bai were the same person, they had different views after personally seeing Lu Bai crack the Phoenix Ruins.

In any case, Lu Bai was definitely not as simple as he looked. He was definitely not a Beast Tamer who was purely there to communicate. He should have been eyeing the Phoenix Ruins from the start!

In Dong Huang, the most likely to crack the Seven Islands Phoenix Ruins was the archeologist Shi Yu, who had contracted a hybrid spirit of the Phoenix Race. In addition, Lu Bai also had a similar pet...

“It’s no longer important, and we’ll know soon.” After arriving at Dong Huang, the two legends directly saw the legend of the Ancient Capital waiting for them.

“Welcome.” When Principal Feng saw the two legends of the Seven Islands, he immediately smiled and introduced himself.

“And this is the honorary president of the Dong Huang Archeological Association, Legend Lu Qingyi. She also has some understanding of the legend of Mu Huiyin and the history of the empress.”

Beside Principal Feng, Lu Qingyi nodded slightly.

“Hello, Legend Feng and Legend Lu,” the Phoenix Divine Master and Ji Xiang said.

“Aren’t Dr. Shi Yu and the others around?” However, what concerned the two of them was that Shi Yu and Lu Bai, who they had expressed to Dong Huang that they wanted to see the most, weren’t around.

“Shi Yu and the others have a mission and aren’t around at the moment. They might only return in a few days,” Principal Feng said.

Ji Xiang and Jie Yi were silent.

“Then can we know why Lu Bai can crack the Phoenix Ruins?”

“We’ve indeed studied this. We can tell the two of you.” Principal Feng nodded and said, “Let’s find a quiet place first.”

In order to rope in Ji Xiang of the Phoenix Court and the Phoenix Court, it was impossible to say nothing.

In a private room, Principal Feng and the two of them sat looking at each other and said, “According to our research, the reason why Lu Bai could crack the Phoenix Ruins back then and enter the ruins to take the inheritance without being injured by the Phoenix Ruins... Was because his pet’s bloodline is a direct descendant of the owner of the Phoenix Mystic Realm.”

“We’ve already guessed it,” Ji Xiang of the Phoenix Court said. “Therefore, the bet agreement of the Dong Huang exchange team has a certain goal from the start, right? Before coming to the Seven Islands, Lu Bai knew that he could definitely crack the Phoenix Ruins.”

Principal Feng smiled and didn’t say anything.

But it was equivalent to saying everything. If he didn’t have the confidence to win, why would he play a bet? Wasn’t that stupid?

“In other words, Dong Huang already knows the identity of the owner of the Phoenix Mystic Realm?” Jie Yi asked.

Lu Qingyi nodded and said, “The owner of the Phoenix Mystic Realm was an expert of the Phoenix Race named ‘Sun God Phoenix’ when it was alive.”

Sun God Phoenix...

Sun flames were indeed everywhere in the mystic realm.

The two legends of the Phoenix Court acknowledged it.

“And this Senior Sun God Phoenix is currently in Dong Huang. It’s the guardian of Dong Huang during the era of the empress dynasty, and it has a deep relationship with the empress.”

“What, it’s still alive?!” The two Phoenix Court legends were shocked.

No, if it was still alive, how could it leave its ruins mystic realm outside?

“Although it’s alive, it’s no different from death. I believe the two of you have also understood some of Dong Huang’s history before, right? The empress dynasty has been destroyed for a long time. The reason for its destruction is naturally because of the totem war. As an important guardian during the era

of the empress dynasty, it was the first to bear the brunt when the empress dynasty was about to be destroyed. It was cursed by the enemy and could only be forced to reincarnate.”

“However, because this curse involves the power of laws, it might have come from a demigod. Even after it reincarnated, it still carried a strong plague and a second curse. It was a living disaster. For this, the empress at that time could only seal it.”

“Unfortunately, the destruction of the empress dynasty was too sudden. Before it could be unsealed, Dong Huang was already on the verge of collapse.”

The expressions of Jie Yi and Ji Xiang changed slightly.

Lu Qingyi continued, “Although it was sealed, it still retained its consciousness. As time passed, the curse power on its body became weaker and weaker. Its own consciousness became clearer and clearer, and it told Dong Huang how to recover.”

“At the moment, Dong Huang is working hard to save and recover this senior.”

“The location and cracking method of the Phoenix Mystic Realm were also told by this senior. This is a treasure vault left behind before it was sealed. Some resources inside can be used to cleanse the curse on its body.”

“If the two of you really want to confirm the origin of the Phoenix Mystic Realm, you can come after we rescue this senior.”

“This makes sense...” Ji Xiang’s expression was complicated. She had also studied the Phoenix Mystic Realm very deeply and already believed half of Lu Qingyi’s words.

Principal Feng said, “Divine Master of the Phoenix Court, according to what I know, the Phoenix God Society mainly believes in this senior, and you, Divine Master of the Phoenix Court, only rose because of the mystic realm left behind by this senior. Why don’t you bring the Phoenix God Society and join Dong Huang?”

[Unscientific Beast Taming](#)

Chapter 774: Seventh Pet (2)

774 Seventh Pet (2)

“I heard from the Tyrannical Sea Legend that the guardian of the Red God Island at that time even attacked you because of the Phoenix Mystic Realm. This kind of thing definitely can’t happen in our Dong Huang.”

“Impossible.” Ji Xiang shook her head and said, “There’s no need to say anymore.”

She was alone, but many witches of the Phoenix God Shrine had families on the Seven Islands. Some people even came from large families. Leading the Shrine to go join Dong Huang was impossible.

“I don’t want to talk about anything else. I just want to know if there’s anything I can do to help save and recover this senior. I want to communicate with it with its clear consciousness as soon as possible.”

Principal Feng: "Why don't the two of you stay in Dong Huang first? Lu Bai has a deep connection with this senior. When he returns, we'll communicate in depth."

Principal Feng didn't think that he could successfully poach them directly. Everything had to be done slowly.

Principal Feng and the others didn't hide the Undying Dark Phoenix, because regardless of whether what the Undying Dark Phoenix said was true or false, it was no longer important.

So what if the Undying Dark Phoenix was an enemy?

In Shi Yu's words, Mother Feng was so generous that she had even sent over Mythical resources. Even if it was an enemy, he couldn't bear to hurt Mother Feng. Therefore, it was better to wait for Susu to become a demigod before rescuing the Undying Dark Phoenix. Even if the Undying Dark Phoenix had any schemes, under the purification of the quasi divine skill and the Sea Cleansing Spirit, it could still become the kind-hearted guardian of Dong Huang and become a good phoenix.

It could be said that from the moment Shi Yu contracted the Blue Sea Sprite that had mastered the strongest cleansing power, it had been checkmate.

Which proper Beast Tamer would use Sun Flame to cleanse the curse?

....

While the little white dragon helped run errands and form the Environmental Protection Department's exchange team, Shi Yu experimented with the Sea Cleansing Spirit.

The Sea Cleansing Spirit looked like a blue water spirit body. Its form was identical to the Blue Sea Sprite. It could possess other living or dead creatures like undead and complete cleansing.

After Susu used the Time Fruit to temporarily reach the overlord level, it tried its best to use the Blue Sea Contract to condense a maximum cleansing sea spirit.

At this moment, this was not just a Sea Cleansing Spirit. It could be said to be a combination skill of Purification+Time Fruit+Blue Sea Contract+Sea Cleansing Spirit!

After condensing, it fused into Eleven's body.

"Add more points!"

At the same time, Shi Yu's hand landed on Eleven's furry head and started adding points to the superalloy.

"Yi!" Beside him, Baby Ginseng tried its best to heal. Every pet did its own job. Chi Tong's possession and Ling's loading increased Shi Yu's condition as much as possible.

After some operations, Shi Yu looked at the [Cooldown Time] and fell into deep thought.

Cooldown Time: 12 hours

With the support of the entire team, it only took 12 hours to add some super skills to a pet with the will of an overlord. The time was halved!

“It’s stable!!”

After being stunned, Shi Yu was overjoyed.

This meant that before the world competition, he should be able to let the team have three transcendent skills!

Transcendent super skills were abilities that only totem level experts could master.

With three people on his side, even if the opponent was an invincible overlord and a totem level, it might not be impossible to fight.

Susu mastering the Sea Cleansing Spirit was indeed an increase in the team’s Epic level.

Initially, Shi Yu was in a hurry to develop his telepathy talent because he was worried that there wasn’t enough time to add points and that he wouldn’t be able to kill indiscriminately in the World Tournament and be forced to find new abilities.

But now, even if his talent had not been successfully developed, the chances of winning the championship had increased by at least 30%. It was stable.

“Ning ~!!” At this moment, the team started discussing who to add points to next.

Three opportunities for transcendent skills!

Eleven’s superalloy definitely had to take up one. After all, it was the skill with the closest proficiency to transcendent in the team at the moment. It would be a waste not to do it.

Although Eleven thought that it would be best to also activate its Undying Golden Body to transcendent and create a true immortal body, it was a little embarrassed to continue competing for favor since it had already been given points to.

Susu, on the other hand, felt that it should use its Heavenly Frost Cold Energy. Time-element skills that were both supportive and offensive could definitely shine and play a key role.

Baby Ginseng, on the other hand, felt that it should use its plant control. The Time Fruit modified from transcendent plant control would definitely be the best support tool in the team. It could increase the entire team greatly.

Perhaps it could allow Ling of the Mythical race to have stable totem-level battle power after eating it.

Ling, on the other hand, felt that although it didn’t have the will of an overlord, the cost-effective ratio of Mythical Revival was still very high. After all, it was a skill that could unearth the power of a god.

Buggy and Chi Tong also had some thoughts. For example, Chi Tong wanted undead revival to reach perfection. That way, it could control totem-level undead and its battle power would also increase greatly.

Buggy also had a small idea. A transcendent-level anti-magic domain could directly cripple 99% of overlords and make them unable to control the power of nature... It was also super cost-effective.

“Wu...” Shi Yu also had a headache. At this moment, his best method was actually to temporarily give up on adding points to superalloy. After all, Eleven’s potential and strength after evolution were unknown. It was equivalent to a bet.

However, the proficiency of the superalloy was already so high. If it didn’t continue, it would be a waste.

In any case, with the enhancement of good luck, Shi Yu decided to continue gambling. Perhaps he could rely on transcendent-level evolution skills to bet on a Mythical race.

Unscientific Beast Taming

Chapter 775: Seventh Pet (3)

775 Seventh Pet (3)

With the remaining two main positions, Shi Yu fell into deep thought and finally decided to give it to Baby Ginseng and Susu.

They all had the will of overlords, so it was easier to add points. As for who followed, it depended on the situation.

“Wu ~ ~” Shi Yu’s gains were huge. After confirming the additional points plan, the little white dragon ran back excitedly.

“Shi Yu, Shi Yu, the ten dragons have been gathered ~”

There was no need for too many overlords to go to Tingxiang this time. Ten was already a lot.

Choosing ten from the Environmental Protection Department, which had nearly a hundred overlords, was naturally easy.

The little white dragon flew over quickly, and Shi Yu walked out of the room.

“Have you gathered them? Who are they?” Shi Yu asked.

“Uncle Hei Ge... Second Brother... Doctor Shell... Sister Ice Dragon...”

Shi Yu nodded. There were some familiar faces.

Uncle Hei Ge, the Sky Penetrating Whale, a top-notch dragon-element overlord. Its energy level was nearly 90 million, so it should be able to defeat that green-scaled dragon.

The legend contestants of Tingxiang would probably be crying.

‘Second Brother’ probably referred to the Second Prince, the Primordial Thunder Dragon. It had been beaten by Eleven. Wasn’t this guy at the monarch level? It looked like it had broken through.

Doctor Shell... At that time, the overlord healer in charge of treating the Poison Dragon Radiation. Although it wasn’t a dragon, it was very normal for the exchange team to bring healers.

“Who’s Sister Ice Dragon?” Among them, only this title stunned Shi Yu.

“The Ice Feather Dragon is Senior Ice Dragon King’s adopted daughter. Senior Shi Yu, don’t you know?”

“Ah, this.” Shi Yu was stunned. He really didn’t know!

Having another sister for no reason?

It looked like Ice Dragon had also stabilized itself in Dragon Palace City and started to take in adopted daughters. A few overlords should have already gathered under it.

“Speaking of which, isn’t your crown prince also an overlord? Didn’t you call him?”

Seeing that there was no Crown Prince on the little white dragon’s list, Shi Yu asked curiously.

The little white dragon’s face darkened. “How would I dare? Moreover, that guy is a cultivation fanatic. He trains in the ruins of the Dragon Palace all year round. If he wants to break through to the totem level as soon as possible, he shouldn’t be interested in exchange activities.”

“I see.” Shi Yu nodded. The eldest prince of Dragon Palace City was a nine-clawed golden dragon. He should be the strongest dragon below the totem dragon king of Dragon Palace City. As expected of the eldest prince, it was more promising than the third prince.

After the exchange team was gathered, Shi Yu saw that it was about time. He said, “I’ll call someone else. Then, we’ll prepare to set off.”

“Alright ~!!” The little white dragon agreed repeatedly.

As for Shi Yu, he directly summoned Susu and let it bring him back to the sea.

On the East Sea, after leaving the Deep Sea Mystic Realm, Shi Yu took out his cell phone and called Senior Lu.

A moment later, Senior Lu’s voice came from the other side. “Shi Yu?”

“Senior, I’m almost done preparing here. Are you free? We can set off now.”

“On my side...” Lu Qingyi’s face darkened. “The legend of the Phoenix God Society has arrived.”

“That Seven Islands Legend called Jie Yi of the Phoenix Court even pestered me to ask if Shi Yu and Lu Bai were the same person. When we communicated with the Phoenix pet, she said that she could sense it. My Green Phoenix also ate the Phoenix Fruit and they asked if Lu Bai gave the Phoenix Fruit to me.”

“Well... She still wants to fight me. Shi Yu, Shi Yu... Did you say something nonsense to them?”

“And your alternate identity... Why do I feel that anyone can guess it?”

Shi Yu : “...”

He had almost forgotten about the two legends of the Seven Islands.

“Cough, it’s mainly because at the end, I don’t want to hide it anymore. In any case, I’ve already obtained the resources and the Dragon Palace City army has arrived.”

“Forget about them for the time being. Let Principal Feng receive them. Let’s go to Tingxiang first.”

“Huh?” Lu Qingyi asked. “Aren’t we waiting for Dong Huang to form an exchange team?”

“Let’s not wait anymore. Dragon Palace City happens to be forming a team to go to Tingxiang. We’ll go with Dragon Palace City.”

“If you’re done over there, come over quickly with Teacher Ying.”

“Alright.” Lu Qingyi nodded.

....

After receiving the news from Shi Yu, Lu Qingyi, the gem cat, and the Void Mantis set off for Dragon Palace City in the ancient capital.

Shi Yu remembered that the Elven Empress seemed to have said that the Dragon God would also go to Tingxiang, but in the past few days, there had been no movement from the Dragon God and the Elven Empress.

After throwing the exchange mission to him, there was no more news.

So should they go together or separately?

Or had the two legendary big shots left?

Shi Yu couldn’t help but be curious, so he encouraged Buggy to ask.

Above the Dragon God Palace, when Buggy went to the Dragon God Statue to train, it passed by and asked carefully, “Wu, wu, wu.”

It told Senior Dragon God that the Beast Tamer and the others were preparing to go to Tingxiang soon. Should they go together or go separately?

In the Dragon God Palace, the Dragon God and the Elven Empress had been exchanging cultivation insights for the past few days.

The Dragon God was a demigod-level life form, and the Elven Empress, as a hybrid Beast Tamer, had the Beast Taming Talent similar to Emperor Wu. She could borrow the power of nine contracted elves to temporarily become a demigod-level life form and master quasi-divine skills.

The two legends were both experts who had come into contact with the power of laws, and they both involved wind-element laws, so they naturally had a lot of experience to exchange. When the two parties invested in the exchange, a few days passed in the blink of an eye.

“Looks like they’re ready,” the Elven Empress said.

“Then let’s go,” the Dragon God said.

“What do you think about letting Shi Yu go to that Mythical Ruins with us?” the Elven Empress said.

Unscientific Beast Taming

Chapter 776: Seventh Pet (4)

776 Seventh Pet (4)

The Dragon God glanced at her and said, “He’s not even a legend. Do you want him to die?”

The Elven Empress smiled and said, “How could that be? Forget it then. I just feel that he might be able to help. Then, it shouldn’t be a problem to let him torment those low-level ruins in Tingxiang, right?”

The Dragon God said, "As long as it's safe."

"Don't worry, I can't bear for anything to happen to him either. This is a little genius who contracted a Mythical race." The Elven Empress smiled and said, "If he's as unreliable as that Lin Feng, I'll have a headache. After all, I'm prepared to entrust him with a royal sprite."

Back then, Lin Feng took a genius royal elf valued by the Elven Empress from Tingxiang. In the end, not long after, Lin Feng disappeared. The Elven Empress was so angry that she gritted her teeth.

The Elven Empress felt that she had not learned her lesson. This time, when she saw Shi Yu's talent, she actually had the thought of letting Shi Yu contract a Courtyard Sprite. It could be considered to be something that deepened the connection between Shi Yu and Tingxiang.

The Elven Empress was half human and half elf. Her family, which was now the royal family of Tingxiang, involved three races: humans, elves, and half-elves. Among them, the elven royal family could be contracted.

However, it was still different. Lin Feng took the initiative to go to Tingxiang to abduct elves, while on Shi Yu's side, the Elven Empress took the initiative to befriend Shi Yu. In the Elven Empress's opinion, Shi Yu's talent was even stronger than Lin Feng's. After all, Lin Feng didn't even nurture a Mythical pet with an evolution talent, but Shi Yu did.

Although Shi Yu was an archeologist and this profession was very dangerous, and it was very likely that he would disappear in the future after exploring ruins like Lin Feng, Shi Yu should not be that unlucky with the protection of the Wind Blessing.

Therefore, after careful analysis, the Elven Empress felt that it was very necessary for Shi Yu to contract a Courtyard Sprite to deepen the connection between the two parties.

Especially in such a revolutionary era, having one more trump card meant one more way out. Although Shi Yu was very weak now, no matter how one looked at it, contracting a Mythical race would definitely make him a legend in the future.

"He might not be willing to contract the elves on your side," the Dragon God said.

Shi Yu came to Dragon Palace City and directly contracted the Blue Sea Sprite Reincarnation.

Now, there was another Mythical pet.

Even that worm was not simple. If the power of imagination mastered was cultivated into a quasi-divine skill, it would undoubtedly be the strongest power of law. It was a creation-type and creation-type laws had extraordinary potential.

She felt that the Elven Empress was having one-sided thoughts.

"Now this is something you don't understand. Why do you think Lin Feng is thinking about the elves? Is it because the elves have extraordinary potential and outstanding talent?" the Elven Empress said.

As a humanoid life form, the beautiful elves, like the mermaids and dragon girls of Dragon Palace City, happened to have human aesthetics. Sometimes, what attracted Beast Tamers was not necessarily strength, potential, or appearance.

Moreover, the Elven Empress was still very confident in the talent potential of her elves. They were a group of sprites so arrogant that even the local genius legend Beast Tamers weren't up to their standards.

"Did we forget to reply to that worm?"

"Looks like it."

....

The result of Buggy's question was not ideal.

After staying near the Dragon God Palace for a while without any response, Buggy immediately ran back.

"Wu, wu!"

Buggy stammered as it spoke to Shi Yu in the air.

"Not there?"

Shi Yu shook his head. Forget it, forget it. Let's go directly.

When Senior Lu and the others arrived, they would gather the environmental department and set off!

"Are you looking for us?"

On Blue Sea Island, not long after Buggy returned, the figure of the Elven Empress appeared in the sky, scaring Shi Yu and Buggy.

Didn't it say they weren't around!

Buggy: "Wu..." (Damn it, they weren't replying).

"Your Majesty." Shi Yu immediately looked over and said, "It's alright, it's alright. I'm just asking when we're leaving."

Sylphra said, "We can set off when you're ready."

"In addition, you're a level-six Beast Tamer now, right?"

"Yes." Shi Yu was stunned. What was wrong?

"You shouldn't be far from becoming a legend Beast Tamer, right?"

"Well... In another year or two, it feels about right," Shi Yu conservatively estimated.

Sylphra said, "Not bad. Do you have any thoughts about the seventh contract slot?"

"The seventh contract slot?!" Shi Yu was stunned. Why was the Elven Empress asking this?

"Well, on this trip to Tingxiang, are you interested in contracting an elf?" Sylphra asked with a smile.

The elves!

Shi Yu was very surprised. "If there's a suitable partner, I'm naturally willing. However, I might not be able to contract it in the short term. Even if I find a suitable partner, I'm afraid I'll have to wait a long time."

Shi Yu's initial idea was to have one pet of all types.

Animals, plants, elements, undead, machinery, humanoids... At the moment, it seemed that there was indeed a lack of humanoid pets!

Sprites, mermaids, dragon girls, angels, demons, and so on were actually not bad choices. Now that the Elven Empress had taken the initiative to chat with him, Shi Yu directly abandoned the other options.

The Elven Empress clearly took a fancy to his potential and wanted to befriend him!!!

After contracting the sprite, everyone would be family!

Of course, the premise was that he could find a suitable partner. After all, he currently had very strict requirements for the pets of the first team. The positioning had to be beneficial to the entire team.

Shi Yu calculated that if he could become a legendary in the future, he still had three contract slots.

Shi Yu indeed didn't have any thoughts about the seventh pet. His original idea was to see what the Space Beast Egg could hatch. If it was suitable, he would contract it. If not, it would be the second team. But now, he seemed to have another choice.

"These are small matters," the Elven Empress said. "Before the contract, just treat it as training. If you don't get along, there's no need to continue the contract."

"In that case, when we reach Tingxiang, I'll introduce you to a few elves."

Unscientific Beast Taming

Chapter 777: Ancient Kingdom of Tingxiang

777 Ancient Kingdom of Tingxiang

The Elven Empress left.

Before leaving, Shi Yu's heart was hooked.

She wanted to introduce sprites to him.

Why did it feel like a blind date?

Shi Yu sighed.

He recalled the situation in Tingxiang.

The predecessor of Tingxiang was originally a huge elven country.

They believed in the Mother Tree of Life.

It was said that the Mother Tree was formed by a plant-type god who had fallen in the Mythical Era.

Now, it no longer had the power of the past. It was only equivalent to a Mythical resource.

The elves were born under the nurturing of the Mother Tree.

As for the elves, they naturally took on the responsibility of protecting the Mother Tree.

However, such a resource would naturally attract many covetous eyes.

However, because of the power of the elves, although the elven country often fought with external enemies, it was basically fine. Every time, it ended in victory.

But there was no such thing as eternal prosperity.

The decline of the elven country came from the Mother Tree mutating into the Dark Mother Tree for unknown reasons, infecting a large batch of elves into dark elves.

Because of this change, the elves split.

The infected races that had become dark elves were still willing to believe in the Dark Mother Tree, but the elves who weren't infected thought that the Mother Goddess had encountered a dark invasion.

This caused internal strife among the elves.

The humans of Tingxiang relied on this time to rise. The final outcome of the internal strife ended with the dark elves having the advantage.

The Holy Land of the elves, the Forest of Life, was also renamed the Dark Night Forest.

Some of the orthodox elves had fled further into the Nature Forest or the depths of the ocean, while others relied on the help of humans to fight against the Dark Forest, which was the current Ancient Kingdom of Tingxiang.

The first ruler of Tingxiang was a legendary Beast Tamer who contracted a sprite.

However, as the relationship between the humans and this portion of the elves grew closer and closer, the hybrid half-elves finally became the core royal family of Tingxiang.

Of course, even if the current ruler of Tingxiang was a half-elf, the bloodline was still mainly human. Otherwise, it was impossible for them to join the Seven Nation Alliance.

After all, the Seven Nation Alliance was an alliance formed by humans.

The reason why it could accept hybrids was that the legendaries in power in other countries were also not very normal.

The mechanical legendaries of Shen Feng and Dong Huang had already modified themselves into mechanical lives.

The legendary of the Seven Islands was a modified person with the human side as the main body. It was also not a normal human.

The legendary of the Ancient Kingdom of Ming Hua was only contracted undead pets, which also made himself look neither human nor ghost. Shi Yu estimated that it relied on the full-level undead possession to change its bloodline and soul. Through this method, he delayed his life force and increased his strength.

Therefore, no one said anything.

“Humans have limits.”

I have to hold back and not be like then... Shi Yu thought.

However, after eating the Undying Fruit, he seemed to be destined to not be a normal person anymore. His eyes were filled with tears.

Which normal person could still become a totem-level undead after dying?

....

“Coming, coming!”

Soon, the gem cat brought the Void Mantis and Lu Qingyi to Dragon Palace City.

Apart from that, Lu Qingyi also had an overlord-level sprite beside her.

She was more than 1.6 meters tall. Her long silver-white hair and purple gem-like eyes were extremely exquisite.

She was wearing a low-cut white robe formed by the wind elements, with gorgeous purple light decorating it.

Its illusory figure meant that it was an undead race and not a normal sprite.

Obviously, when Senior Lu entered the possession state, all the changes were inherited from this elven girl.

“Yo, little girl, you’re going home soon. Looking forward to it?”

Shi Yu smiled and looked at the elf sprite beside Senior Lu.

As Shi Yu finished speaking, the sprite hid behind Lu Qingyi nervously. Then, it revealed an angry expression and said, “In terms of age, I’m older than your great-great-great-grandmother.”

“But aren’t you just a child among the elves at your age?” Shi Yu was amused.

“Alright, alright, Lian, whatever he says.” Lu Qingyi said helplessly, “You’re like a child anyway...”

The sad Courtyard Sprite thought that these guys were bullying her together.

“Come to me. I’ll get your teacher to bring you to various places in Dragon Palace City to play,” Shi Yu said with a smile.

He had naturally seen this wind-element Courtyard Sprite long ago. In addition, because she had used Chi Tong’s memory water drop to learn possession, theoretically speaking, Chi Tong was still her teacher.

As for this sprite, he didn’t know how it was when it was alive, but after it turned into an undead, it lost a lot of its memories. It was basically no different from a child.

Although Eleven, Buggy, and the others weren't very old either. If this sprite was considered a child, then Eleven and the others should be considered babies and cubs.

"Why don't you bring me to play too?" the Void Mantis said. Although the Space Emperor had come to Dragon Palace City, this was its first time!

Dragon Palace City seemed to still have the teleportation array established by the Space Emperor. Unfortunately, without the maintenance of the Space Emperor, it shouldn't be able to be used anymore.

"Let's go, let's go. I'll take you to see Bingbing," the gem cat said happily.

The Void Mantis: "What's Bingbing?"

"It's nothing. Just a senior from the Emperor Shi Dynasty."

The Void Mantis: !!!

"How can there be someone so experienced!" The Void Mantis was shocked. How could it still be alive?

"Time element, you understand."

"This..." The Void Mantis was envious and jealous. Its sense of superiority in space disappeared in front of time.

Chapter 778: Tingxiang Ancient Nation (2)

778 Tingxiang Ancient Nation (2)

....

After Senior Lu and the others arrived, Shi Yu simply received them. Then, he began to inform the little white dragon to confirm the departure time.

A day later, the large group of Dragon Palace City gathered.

The leader was a level-six Beast Tamer, Shi Yu.

Bodyguard, totem level frost dragon and gem cat.

Among the members of the exchange, there were ten overlords of Dragon Palace City led by the general of Dragon Palace City, the Sky Penetrating Whale, and the Second Prince, the Primordial Thunder Dragon.

The accompanying people were Lu Qingyi, the Courtyard Sprite Lian, the Void Mantis, and the Third Prince, Little White Dragon.

It could be said that the lineup was quite luxurious.

With this lineup, it was not a problem to fight the Heavenly Fox Nation, even if the Fox God was a top-notch totem.

And this was only the tip of the iceberg of the Dragon Palace City faction. It was enough to see how powerful Dragon Palace City was among the totem factions.

Shi Yu felt that in fact, soon, Dragon Palace City should have a new totem dragon king.

Because now that Susu had already accepted the Blue Sea Sprite inheritance, it wouldn't be long before it could cleanse that Poison Dragon Totem.

At that time, Shi Yu could barely give it a position as a general of the Environmental Protection Department and make it become his underling. It would enjoy extremely high treatment. He hoped that it wouldn't fail to appreciate his kindness.

After all, he had saved his life!

"The dragons are all here, right?" On an island very close to the entrance of the Dragon Palace City's mystic realm, Shi Yu looked at the eleven Dragon Palace City members in front of him and said.

"Minister Shi Yu, everyone is here," the Sky Penetrating Whale agreed.

Apart from those who were more familiar with Shi Yu, the other overlord dragons were paying more attention to Shi Yu.

For example, the Ice Feather Dragon that the frost dragon had taken in. It was an overlord-level ice-element divine dragon with extraordinary strength. It looked at Shi Yu and worshiped him very much.

It was endlessly curious about Shi Yu, who could make its foster mother mumble all day and never forget him, and who could be chosen by the Dragon God to lead over a hundred overlords in Dragon Palace City.

"I wonder how far Lord Blue Sea Sprite has grown," Doctor Shell muttered quietly

"With my current strength, I should be able to crush it, right? The exchange in Tingxiang this time is not so important. I have to find an opportunity to take revenge." The Primordial Thunder Dragon was also muttering.

At the Dragon Palace City banquet, after being tortured by Eleven, the Primordial Thunder Dragon was very annoyed. Although it had really joined the Environmental Protection Department after that, it was actually aiming to challenge Shi Yu!

Although the Primordial Thunder Dragon was a little more reliable than the Little White Dragon, the Second Prince, who came from a superior and pampered family, it had never cultivated crazily like the eldest. It was mainly because with its identity, even if it challenged an overlord above its level in Dragon Palace City, the other party would still hold back a little out of consideration.

It had never suffered the treatment of being crushed and countered.

Therefore, it remembered Eleven and Shi Yu a few more times.

Now, after some hard work, it went to ask his top-notch totem father for a legendary resource. The Second Prince had already been reborn. With the proficiency of super skills and a thunder-element legendary resource, it broke through to the overlord level in both aspects!

Invincible.

"87, 71, 66, 58..."

At this moment, Shi Yu's gaze also swept across this batch of exchange members. Among the combatants, the Sky Penetrating Whale's energy level was definitely the highest. Next was the Second Prince's 66 million.

Shi Yu felt that it had probably used some strengthening legendary resource that could specially strengthen its energy level when it broke through. Otherwise, how could it have such a high energy level when it had just broken through?

The others were relatively average. Apart from Doctor Shell, who was a healer at 71 million, the others were all about 60 million. Apart from the Sky Penetrating Whale, no top-notch overlord battle power came. Even the Sky Penetrating Whale was probably here to watch over the little white dragon.

That was true. For top overlords like General Luosha, the Mermaid Queen, and even the strongest overlords like the Crown Prince, an exchange event was not worth them making a big fuss about.

However, although there was no top-notch battle power or weak chicken, and although the energy value didn't mean anything, none of the energy values were lower than 55 million. This already explained the problem.

It was suitable to communicate with the contestants of the World Tournament in Tingxiang.

"Since we're all here, let's go," Shi Yu said with a smile. "For the sake of efficiency, I'll put you into a ruins space next. I'll call you out when we reach our destination."

"It's boring on the way. I've already prepared special drinks and fruits in the space. Everyone can chat and communicate there first."

"Thank you, Minister Shi Yu ~" The Black Flood Dragon overlord and the others said politely. This was the father of the Black Flood Dragon Baby that Zou Yun had contracted. Shi Yu felt that it wasn't as strong as the Green Scaled Dragon.

"Then everyone, come in first." Shi Yu nodded.

He now had a total of four ruins spaces. One was the Blue Sea Ruins Water Droplet. It was only used for Susu to accept inheritances and for it train with him. It could be regarded as an exclusive Mythical cultivation resource and also as the eye of a super teleportation array.

One was a legendary ruin card. As Eleven and the others' daily training, it could also be used as equipment to strengthen spatial sealing moves.

Next was the ruins ring, which was used by Baby Ginseng to study various spiritual fruits. It was the Shi Yu family's granary. If the food ruins and training ruins were put together, it would be a little dangerous.

Right on the heels of that was the ruin bracelet. It was eliminated by Shi Yu and was prepared by Bureau 11 to be used as a gift for Fang Lan to enter the bureau.

These guys were all overlords, so Shi Yu naturally welcomed them into the high-level ruins equipment, the ruins ring. Baby Ginseng had already prepared various spiritual fruits that water and dragon-type creatures liked, enough for them to squander all the way.

Unscientific Beast Taming

Chapter 779: Tingxiang Ancient Nation (3)

779 Tingxiang Ancient Nation (3)

As for Ice Dragon and the gem cat, they were both playing cards with the Void Mantis, Lu Qingyi, and the others in Ice Dragon's own ruins space.

When everything was ready, Shi Yu summoned Susu and set off.

Even without this pile of bodyguards, Shi Yu could be said to have the capital to cross countries.

Transnational strength was originally a positioning for Legend-level. However, it was also very easy for Shi Yu, who had mastered various ridiculous full-level skills.

Initially, Susu had a headache being a driver, but after learning the Blue Sea Contract, it didn't matter. Infinite energy points were capricious.

On a ship, it depended on the waves.

....

Tingxiang Ancient Nation, capital, Rogue Lance.

The peak of Ting Xiang's power was naturally the Elven Empress. However, usually, the president of the Beast Tamer Association in Ting Xiang would handle the trivial matters of the country on her behalf.

Auland, an old granny in her sixties. The Seven Nation Alliance had given her the title "Qingtian", meaning 'holding up the sky'.

Her strongest battle result was defeating a giant totem with strength enough to hold up the sky. Coincidentally, her main contracted pet was also a humanoid creature, from the Giant Race. Her trump card was an invincible overlord, the Earth Giant.

That was why her title was so domineering and legendary!

At this moment, President Auland had already gathered the contestants of this year's Courtyard World Tournament, two young legends under the age of 30, and five top-notch masters who could fight overlords.

These five people were all the contestants Tingxiang had decided to send to participate in the world competition. They could only take out these contestants because the others would also be cannon fodder if they went. These could at least obtain some benefits in the overlord battle.

Not every faction was aiming for first place. When the World Tournament began, mythical and legendary ruins were everywhere. There would also be endless opportunities.

In the previous world competitions, it wasn't like there weren't people who obtained huge benefits and broke through to the Legendary level at the last minute in Inatella. They even obtained legendary and Mythical resources.

In terms of results, Tingxiang had some impressive results. After all, they had already been at the bottom three consecutive years.

“In a day, the overlord team of the East Sea Dragon Palace City will arrive at Tingxiang. The battle power of the dragons in the Dragon Palace City is valiant, and their strength is even above the Dragon Empire. They are very good candidates for you to test your strength before heading to Inatella.”

“In recent years, the conflict between us and the Dragon Empire has been expanding. In the World Tournament, you will definitely be targeted by them. Our Tingxiang doesn’t have many local dragon overlords. This time, we specially invited the overlords of Dragon Palace City to communicate. You have to cherish this opportunity well.”

“Yes, President Auland.”

There were five young people, three men and two women. There was also a man of mixed blood with sharp ears. He looked like a male half-elf.

The elves were one of the few transcendent races without reproduction isolation from humans. For example, those dragons, phoenixes, and humans were actually transcendent life forms who injected the power of their bloodlines into humans and forcefully changed the formation of their bloodlines. Then, those hybrids reproduced and strengthened among the hybrids.

However, elves and humans could directly reproduce. However, the chances of reproduction were really not high. Moreover, in most cases, it was not to reproduce geniuses, but hybrids with many flaws.

Although it was easy to create flawed races if the technology was not mature, compared to directly reproducing, the cost of trial and error was much lower. It was easier to form and find a stable method.

“President Auland, you were looking for us.”

After President Auland finished instructing, the five Beast Tamers left and waited for the Dragon Palace to arrive. Soon, four beautiful elves arrived. Three of them were pure-blooded elves, and the other was a half-elf. Among them, the half-elves dominated with the elven bloodline and mastered extraordinary power. They couldn’t open up the Beast Taming Space, but they could be contracted.

Of the four elves, two were overlords. They were tall and had extraordinary auras. As for the other two, including the half-elves, they were like girls. They were slightly shorter, one monarch rank and one commander rank.

They were all members of the royal family in Tingxiang.

Their talent was very good, especially the two overlord elves.

Unfortunately, they were restricted by their race and were destined to not be able to participate in the world competition alone.

Be it the seven human countries or the totem country, they were very puzzled about why the planet’s will, the World Tree, loved humans.

Things like the Blessing of the World Tree had always been given to humans.

In the beginning, competitions like the World Tournament were only held for the seven human countries.

Even if it was opened to the totem country, only human Beast Tamers under the age of 30 were allowed to participate. If other transcendent lives wanted to participate, they could only sign a contract with humans. Be it a contract with transcendent lives, an equality contract, or a contract with humans, they had to sign a contract.

Because of this, many people even guessed that humans were doted on because they were a race created by the World Tree.

However, it was undeniable that ever since the rise of the Beast Tamer profession, be it the factions mainly made up of humans or the totem factions that squeezed humans dry as nutritional supplements, they had developed quickly. Human Beast Tamers were like a catalyst for the rapid development of Earth's civilization.

For example, the elves and dragons originally grew slowly. If they didn't eat a large amount of resources, it would take a long time to grow naturally. However, as long as they cooperated with human Beast Tamers and entered the Beast Taming Space, their growth speed would undergo a tremendous change. Then, they would have more time to break through the racial limit.

Unscientific Beast Taming

Chapter 780: Ancient Kingdom of Tingxiang (4)

780 Ancient Kingdom of Tingxiang (4)

The appearance of the Beast Taming Space and Beast Taming Talents greatly increased the upper limit of the growth of transcendent lives.

"Well, I called you over also because of the Dragon Palace City exchange team." President Auland nodded.

"Are we also participating in the exchange?" Among the four elves, the leader was a mature female elf in leather armor with a fiery figure and long red curly hair. She had a puzzled expression.

"No, but it's also related to this matter." President Auland looked at the four elves and said, "There will be a Beast Tamer from Dong Huang in the exchange team of Dragon Palace City this time. Your mission is for one person to obtain his recognition and contract with him."

"What?" As soon as President Auland finished speaking, another overlord-level elf with long golden hair, a white princess dress, and sky-blue eyes said, "President Auland, you're not kidding, right?"

"Sign a contract with Dong Huang's Beast Tamer?" The young half-elf also widened her blood-red eyes and said in confusion.

"Why are we doing this?" The last elven girl with four pairs of transparent light wings and emerald green hair also asked in confusion.

After all, their status in Tingxiang was extraordinary. Even if it was those legend geniuses in Tingxiang who were enough to fight in the world competition, as long as they were unwilling, the other party was not qualified to enter an equal contract with them.

In terms of race level, the four of them were all high-level overlord races. Although they wouldn't necessarily become totems, they had a high chance of charging at the totem level. As for the overlord level, the end point of other creatures would only be their starting point.

"This isn't my intention, but Her Majesty's." President Auland shook his head and said.

Her words shocked the four elves opposite her.

Just like how the sons and even totems of Dragon Palace City didn't have much chance to see the Dragon God, in Tingxiang, the Elven Empress was also a mysterious and high and mighty existence. Even in Tingxiang's royal family, not many people could see her.

And such a high and mighty Elven Empress actually took the initiative to ask them to contract a human, a human who wasn't from their country?

Who exactly was the other party to make the empress take him so seriously?

"Her Majesty said that this is also for your own good. She won't force you. She only provided you with an opportunity. Whether you can grasp it depends on yourselves." President Auland was actually very incredulous at this moment, but after all, it was said by Her Majesty herself. She didn't have the right to speak at all.

"Grandma Auland, who is this person?" The only hybrid, the Blood Elf girl, said in a daze.

"Ye Xing? Divine Bell?"

The fiery female sprite was very knowledgeable. She directly locked onto the two most talented Beast Tamers of Dong Huang and asked.

"It should be the divine bell. It's said that she's a descendant of the Dong Huang Divine Source Legend."

If it were her, it seemed to be understandable. This divine bell was extremely mysterious, and was even a legendary's descendant. She was also a genius legend. If she stood in the common interest of Tingxiang and Dong Huang, the deep alliance between the two would be beneficial to both parties.

In addition, she had two overlords, so they definitely had to be at the Legend level to be qualified to contract them.

If it was Divine Bell, the identities of both parties were really on the same level. No, they would actually be the ones looking upwards.

After all, they weren't directly related to the Elven Empress, and the Legend Divine Bell was a descendant of the Divine Source Legend.

"Divine Bell?" President Auland shook his head and said, "It's not her."

"She's just a legendary's descendant. It's not worth Her Majesty's attention. Her Majesty said that the Beast Tamer of Dong Huang she mentioned will definitely become a legendary himself in the future."

Definitely become a legendary?!

The four elves were shocked. Was this evaluation serious?

There were less than three legendary Beast Tamers even since the founding of Tingxiang.

Who exactly was it that received such a high evaluation from the empress?

“I don’t know if you’ve heard of his name,” President Auland said. “Shi Yu, a genius archeologist of Dong Huang. It means that he has developed the mechanical phantom beast system. At the moment, he’s the number one person below the legends of Dong Huang, a level-six Beast Tamer.”

To be honest, although Shi Yu’s name had a huge impact on the machinery and archeology of the seven countries, his name was really not very familiar to this group of genius elves. After all, the most popular topic in the seven countries recently was still the World Tournament.

And the ones with the highest discussion in the World Tournament were undoubtedly the geniuses from various countries who had already reached the legend level, as well as the legends of the totem country.

For example, Ye Xing and the Divine Bell were a group of people who received a lot of attention.

As for the title of number one person below the legend level, he was in an awkward position.

Even if he was the number one person below the legend level, he wasn’t a legend after all...

As for the world competition, legends should be the threshold to compete for the championship.

As they didn’t know much about machinery and archeology, the four elves didn’t know the meaning of this name very well.

However, the name Shi Yu still shocked them very much, because President Auland said... that the other party was only a level-six Beast Tamer?

A level-six Beast Tamer...

The two overlord-level elves looked at each other. How did the empress see that the other party had legendary potential?

“Her Majesty didn’t tell me the specific reason, but Her Majesty must have her reasons for saying this. It’s worth mentioning that this Shi Yu is the leader of the Dragon Palace City exchange team this time. He also has a high status in Dragon Palace City.”
