Chapter 801: Killing with the Umbrella of Time (3)

801 Killing with the Umbrella of Time (3)

If it was a level-five equipment with its own consciousness, it should be able to let Qi pass the first four levels, right? Or even the fifth level?

“This...” Administrator Liu Ke was shocked again.

“What’s wrong?”

“The Warhammer Giant in the fourth level was also insta-killed by an arrow,” Liu Ke muttered.

It was a giant cub of a quasi overlord race, but it was nearly ten meters tall.

But perhaps, in the eyes of the current Qi, it was a living target.

“What happened?” At the same time, more and more people noticed Qi’s crazily rising ranking and were stunned.

That Qi had passed the fourth level in less than a few minutes?

It had already defeated a transcendent-level opponent of a quasi overlord race?

“What’s going on?” The Beast Tamers and elves present had different levels, but at this moment, they were all attracted by Qi’s quickly rising ranking.

This wasn’t the end.

Soon, the fifth level was passed!

Even if the opponent’s strength reached transcendent race commander rank, inside the trial mystic realm, Qi still insta-killed with an arrow.

This stunned the other members of the royal family.

The sixth level, commander rank, seventh level, low-level monarch rank. As expected, there was still not much pressure. The arrow ended it.

Until she reached the eighth level. From this level, the guardian was unique.

The guardian of the eighth level was a spatial humanoid sprite of the quasi overlord race, commander rank. It was one of the new generation of guards in the palace. It looked at Qi in front of him in silence, not understanding how Qi, an Awakening-level elven girl, came here.

[Isn’t this the little princess who doesn’t know transcendent power?]

“Protector Lendi...” Qi also knew this young guard. After knowing that the other party was a spatial element, the longbow in her hand flickered and turned into a white tachi. The tachi was still very long, so it was more difficult for Qi to pick it up.

“What’s this?” Lendi was still silent. Seeing the other party’s longbow become a tachi, he felt a sense of novelty and muttered to himself.

Before he could think too much, a voice suddenly sounded.

“Idiot, deal with it with all your might. Don’t be careless!” This voice stunned Lendi, because this voice was the voice of the manager of the mystic realm, Old Master Liu Ke.

Lendi’s heart immediately skipped a beat. He looked at the pink-haired elven little girl in front of him in a white dress. He saw that after she transformed the weapon into a white tachi, she raised it above her head and slashed down at him.

It was as if it could swing a sword aura.

“Concealment!” Lendi was indeed not careless. He used the most shameless move of the spatial element, Concealment.

This move had another name on the legendary Beast Tamers, called Etherealization.

It was a move that could let one hide in the subspace. Under normal circumstances, only spatial moves could hit life forms in this state.

Of course, if the power of the move was strong enough to distort subspace, it could also affect it. This power had to at least be the power of an overlord’s attack. However, in such a strong attack, the consumption and reward were not proportional.

Therefore, the spatial element was really invincible at times.

After Lendi entered the concealed state, he looked at Qi again, but then a painful scene appeared. During the process of Qi slashing down the Space Splitting Blade, a white halo spread on it. Then, the space in front of the Space Splitting Blade shattered like a mirror. A shock wave swept up an incomparable spatial vibration power and attacked him in the concealed state.

During this process, Lendi seemed to see countless transparent spatial butterflies flying.

And around him, the chaotic space had already been locked, making him unable to move at all.

He looked shocked and panicked.

At this moment, Qi finally understood what Shi Yu meant by being confident.

Boom!

After the attack, she looked at the ruined world in front of her in silence and looked at the weapon in her hand, the Space Splitting Blade.

This was a weapon condensed by Eleven, who had the strength of an overlord, with Hardening and Space Quake. It was also enchanted by Buggy with the Space Butterfly Phantom.

“Ge Lin, how can her weapons and equipment still change forms!!”

“It’s actually a spatial weapon!”

“And this power is no longer as simple as a level-five equipment. Level-six, level-seven?!”

“Who exactly gave her the weapon?”

Master Ge Lin was also silent. She knew that she was wrong. It wasn't level five. Did this Dr. Shi Yu have divine ore at home!!

In the outside world.

As Qi passed the eighth level, it was already completely chaotic. The geniuses of the royal family looked at the name that jumped onto many people's heads in a daze, unable to understand.

“What exactly happened?”

The ninth level was already a monarch-level guardian.

Generally speaking, even the geniuses of the Tingxiang royal family found it very difficult to win above their level in this level.

Because the guardians of this level basically mastered “deterrence” with high proficiency.

Deterrence was usually a greeting gift for the guardians of level 9 to 12.

It was to test if the guardian was qualified to come to this level to guard it.

And for Qi, who had the Umbrella of Time, this level was even simpler than the previous levels.

The tachi turned into the form of an umbrella again. Qi walked into the ninth level step by step. Just as she stepped in, an overwhelming monarch aura swept over with an expert-level deterrence wave!

Boom!

Qi opened the umbrella, and a mini black and white metal accessory pendant appeared at the tip of the umbrella. Then, a terrifying deterrence that shook the world erupted from the opened umbrella shield!!

[Unscientific Beast Taming](#)

Chapter 802: Killing with the Umbrella of Time (4)

802 Killing with the Umbrella of Time (4)

Buzz!

The white substantialization of the deterrence wave that was like lightning instantly swallowed the deterrence of the guardian of the ninth level and squeezed over. Before the guardian of the ninth level could react, his eyes instantly turned white. He was knocked out by the backlash of Qi's mental defense equipment and the pendant.

The white substantialization of the deterrence wave that was like lightning instantly swallowed the deterrence of the guardian of the ninth level and squeezed over. Before the guardian of the ninth level could react, his eyes instantly turned white. He was knocked out by the backlash of Qi's mental defense equipment and the pendant.

At this moment, Qi was getting more and more excited. Was this really just defensive equipment?

This accessory was wrapped in a Dao Proficiency deterrence wave and contained Eleven's overlord will. Not to mention the deterrence of a monarch-level ferocious beast, it could even protect Qi from a standard overlord-level deterrence.

After all, with this full-level deterrence binding skill, Emperor Wu had created the Iron-eating Beast Training Ruins that had lasted for 2000 years. To this day, the deterrence fluctuations of the stone pillar still had its own consciousness.

...

At this moment, Shi Yu was still researching the possibility of the Time Sprite reincarnation with Ling. He had no idea that Qi had already started to kill indiscriminately at the royal trial in Tingxiang with the top-notch equipment they had given him.

Outside the trial mystic realm, a group of young royal geniuses looked at the eleven stars behind Qi's name and their mouths were already agape.

Qi didn't come out for a long time, which meant that she was challenging the twelfth level.

Under their incomprehensible and unbelievable calls, more and more geniuses of the Tingxiang royal family came when they heard the news. They looked at the name Qi on the Mystic Realm Ranking in shock.

How did Qi, an Awakening-level sprite who had never mastered transcendent power, reach the eleventh level?

How was this possible?

Even if she could control level-seven legendary equipment, it was impossible for her to defeat a monarch.

Weapons and equipment were just icing on the cake.

It could make up for the shortcomings of some pets and Beast Tamers, such as letting low-level lives withstand the deterrence of high-level lives and let their attributes be more comprehensive, but it would definitely not be too ridiculous. It would not exceed the enhancement of the Beast Taming Talent, and the strength of an equipment would not exceed the transcendent life form's own transcendent ability.

Otherwise, equipment would have long been mainstream.

"I don't understand."

"I don't understand either."

"Don't tell me that Qi has a legendary weapon or divine weapon in her hand!"

"Stop kidding. Where did she get that kind of thing? I believe that the mystic realm is broken."

The guardian of the twelfth level was a top-notch monarch that could temporarily match overlords. It was very difficult to defeat.

Its normal energy level reached eight million. Its race was the huge tree of war, the overlord race, the monarch level.

In a 1VS1 situation, there were only four people in the new generation of Tingxiang who defeated it.

In the forest area of the twelfth level, it was undoubtedly very difficult to defeat it, but at this moment, an unimaginable scene occurred.

“Da da da da!!!!”

The opponent in the twelfth level was indeed very strong. Qi also fell into a bitter battle.

She was carrying a heavy huge machine gun. On the machine gun, dazzling light bullets kept condensing, spewing light energy at the rate of thousands of light bullets every minute.

This machine gun was created by Baby Ginseng and Ling together. Using mechanical theory and plant-type knowledge, it could directly photosynthesize. Through the energy storage beam, it could condense light bullets in places with light and shoot.

The artifact spirit was Baby Ginseng.

The reason why she took out this weapon was because the Giant War Tree was too strong. The entire forest was its hands and feet. The attacks came from all directions, and it was very difficult to resist with other weapons.

“F*ck, what’s wrong with this kid?”

At this moment, the huge war tree hidden behind the scenes cursed in its heart. Seeing the plant army it controlled being destroyed by that exaggerated weapon, its heart turned cold.

It condensed a vine with all its might and wanted to penetrate this machine gun from the cover like a bullet or tie up the short pink-haired elven girl. However, when the vine approached the other party, a cold aura quickly rose around the other party’s body!

It shattered the vines and protected the little girl.

Susu’s protective water mutation ability!

At the moment, it was protecting Qi with the pendant in the form of a water drop accessory. It was also a protective skill that had been tempered to have its own consciousness.

“I don’t understand!” The Giant War Tree, which rarely had a match among monarchs, looked at this Awakening-level elven girl in confusion. It didn’t understand why she could pass the twelfth level and why she could control so many weapons and equipment.

“The Umbrella of Time is indeed very strong!” Riding the machine gun, Qi’s expression was red. Her chubby face was filled with madness and excitement. Her cherry petal-like delicate lips were tightly pursed, and she had gradually entered a state.

....

Of course.

At this moment, the most stunned person was still Master Ge Lin, who had watched Qi grow up.

At the start, it was alright, but when Qi started to instantly kill the spatial sprite in the eighth level, everything became wrong.

The guardian of the ninth level of the monarch level still lost his battle awareness in a single move.

Until now, Qi was fighting the veteran top-notch monarch war tree in Tingxiang.

“I don’t understand at all!!” Master Liu Ke, the administrator who had been watching the situation in the mystic realm, was speechless. As a top-notch master who could resist overlords, as a friend of a legendary dwarf and a legendary Mechanic, he couldn’t understand the weapon in Qi’s hand at all.

It was fine if it could transform.

It was fine if it involved multiple attributes.

It was fine if it contained a conscious artifact spirit.

It was fine if an Awakening-level little girl could easily control it and suppress a top-notch monarch.

Unscientific Beast Taming

Chapter 803: Killing with the Umbrella of Time (5)

803 Killing with the Umbrella of Time (5)

But how was that possible!

He widened his eyes and saw that Qi realized that she couldn’t take down the huge tree of war. She began to try to control multiple weapons at the same time.

She even took out a landmine that knew Earth Escape.

...

Ten minutes later.

The royal geniuses gathered outside the royal trial ruins looked at the name that ran to the top floor in silence and saw that her clearance record had become full stars.

The royal members who were called over because this matter was too ridiculous realized that what they saw was even more ridiculous than what they had heard.

Qi.

Who didn’t know her? It was that Awakening-level little girl without transcendent power. She was only a child now. How could she pass the twelfth level!!

After all, among the elves who had passed the 12 levels in the past few years, one was the current royal archer, Chang’an Nice, and the other was the royal librarian, Lil. Both had overlord-level strength and were the strongest geniuses among the royal elves.

As for Qi... How was that possible?

At this moment, the royal members far away, Annie, Lil, Luo Yi, Hillia, and the other geniuses, were waiting outside the natural ruins with the Elven Empress and President Auland.

The natural ruins were also in the capital of Tingxiang. Lu Qingyi had been in there for a while.

Finally, light flashed. Lu Qingyi and Lian came out of the natural ruins.

They looked very excited.

“How is it?” The Elven Empress, Sylphra, smiled at Lu Qingyi and Lian.

He didn’t expect Shi Yu to bring an impressive girl along. She actually contracted the daughter of the ancient guardian Wendy.

In theory, she should be able to obtain a lot of resources from the natural ruins.

After all, over the years, the resources in the natural ruins had grown faster than the rate they were being taken out.

“As expected, there are a total of two legendary resources, six level-eight resources, 19 level-seven resources, and several low-level resources.”

“So many!!!” Annie, Lil, and the others were shocked.

With this many resources, it might be a little difficult to create a totem, but it was definitely not difficult to pile up a few overlords.

“Two legendary resources!” President Auland was also very surprised. This was a huge gain.

“Not bad.” When the Elven Empress, Sylphra, heard that, her expression was not bad, but she sighed in her heart. It looked like she had waited for nothing. There were no Mythical resources.

She had mastered many special abilities, so Lu Qingyi couldn’t lie in front of her.

“Your Majesty, is it 50-50 according to what we said at the start?” Lu Qingyi said.

Even if this gain was 50-50, it was a huge sum of money to her. After all, it included a legendary resource.

Sylphra smiled and nodded without much thought. She knew that Lu Qingyi and Shi Yu had a good relationship.

“Just take what you need first.”

“Alright, thank you very much.” Lu Qingyi nodded.

In fact, the most important thing was still legendary resources.

There were a total of two.

One was a level-nine Wind God Flower, and the other was a level-nine natural fruit.

The Wind God Flower was a wind-element legendary resource. It could be used to strengthen wind-element pets. It was a strengthening resource.

As for the Nature Fruit, it was also a strengthening resource. It could increase the control of transcendent life forms over natural energy, but its usage conditions were even stricter than the Wind God Flower.

As long as the pet was wind-element and had wind-element skills, the Wind God Flower could be used to strengthen it.

However, the Nature Fruit was only effective for the elves.

In the end, Lu Qingyi chose the Wind God Flower and not the Nature Fruit.

Firstly, Lian had already used a legendary resource to reach the overlord level. She and Lian discussed it and wanted to give the new legendary resource to other pets to use and add a second overlord to the team.

Secondly, Lian was no longer a complete elf. Although it still had affinity with natural energy, the effect of using the Nature Fruit was definitely inferior to using it by elves with flesh and blood. The cost-effective ratio was not high.

Therefore, after consideration, Lu Qingyi chose to hand the Nature Fruit to Tingxiang.

After obtaining the Nature Fruit, President Auland was still overjoyed.

The Elven Empress, Sylphra, didn't mind a legendary resource. At her level, legendary resources were rarely effective against her. She had already reached a bottleneck in the cultivation of natural power and it was no longer something a natural fruit could help her with.

"Nature Fruit. If that little brat Shi Yu contracted the Courtyard Sprite, let's give this to him as a gift. This friendship shouldn't be small, right?" Sylphra thought.

Contract Sprite+Nature Fruit should be able to completely tie Shi Yu, a super genius who would definitely become a legend in the future, to the chariot of Tingxiang.

However...

She looked at the envious expressions of Annie, Lil, Luo Yi, and the other elven geniuses speechlessly.

Why did these guys come to visit her after losing Shi Yu?

Was it really alright...

At this moment, Lu Qingyi, President Auland, and the others were dividing their gains on the spot. However, at this moment, President Auland received an important message.

"President Auland, in the royal trial, a new elf passed the twelfth level!"

On the other side, President Auland's elven secretary was shocked.

"What?!! Who is it?" President Auland was also shocked. She didn't remember anyone else having that potential.

Perhaps Luo Yi could in the future, but she was with her right now.

“It’s Qi, that Qi without transcendent power.”

“How is that possible?” President Auland said.

Unscientific Beast Taming

Chapter 804: Killing with the Umbrella of Time (6)

804 Killing with the Umbrella of Time (6)

She only felt that the secretary was teasing her.

“Auland, what’s wrong?” Sylphra looked at Auland.

Auland said, “Your Majesty, my secretary said that Qi... that elven girl without transcendent power passed all 12 levels of the royal trial.”

“Huh?” The Elven Empress was stunned. She felt that this name was a little familiar.

There was no transcendent power... Back then, the elves indeed had a special elven baby without transcendent power.

However, she couldn’t see any problem with the other party either. She only treated it as a special case of mixed blood.

“Qi?! She shouldn’t be very old.”

President Auland’s words not only surprised the Elven Empress slightly, but Annie, Lil, Luo Yi, and the others were even more shocked.

Qi? That Qi who was still practicing archery on the training ground just now? How was that possible?

“Strange.” The Elven Empress pondered slightly. She had confirmed that it was impossible for Qi to awaken transcendent power. Even if she helped the other party optimize their race, it was very difficult. In this situation, unless she used suitable legendary resources to change her fate, there was a trace of hope of awakening transcendent power.

However, it was impossible for Tingxiang to use a legendary resource that had a chance of strengthening totems on a little girl.

Moreover, suitable resources were not so easy to find.

Therefore, Qi’s situation was unsolvable. How did this Qi pass the 12th level of the trial? She had personally built the mystic realm, so she still knew the difficulty.

“Is it over?” The Elven Empress, Sylphra, looked at President Auland, Lu Qingyi, and the others.

She planned to go to the trial mystic realm to take a look at Qi’s situation.

....

At this moment, outside the mystic realm, Qi walked out happily and excitedly.

She passed!

12 levels!

She was still not proficient in the use of the Time Umbrella. Even so, only four young people had passed the royal trial in the past ten years!

[I'm still too weak. If I had a higher affinity for natural energy, the power of these weapons could be greater...] Qi Xin thought.

The physiques of the elves were very close to natural energy, so they were like fish in water when using these weapons and equipment that mobilized natural energy.

Although she couldn't awaken skills, Qi felt that Shi Yu's reminder was right. In the future, she could major in natural physiques to increase her proficiency in controlling weapons and equipment.

The elves were born with a natural physique. It could be seen as having half an All Things Affinity talent. Ordinary pets could only have a physique like the elves when they reached the overlord level.

Totems like the Vortex Demon Beast were like this. Even if it was so weak back then that it didn't have a trace of energy, just its physique that could mobilize the power of nature could create a monstrous tsunami and force Shi Yu and the others into a desperate situation.

"Qi!"

As soon as Qi came out of the mystic realm, she discovered countless people looking at her outside.

Even the two royal Beast Tamers from Tingxiang who were going to participate in the world competition came.

This scene instantly shocked Qi, making her hug the white Time Umbrella in her arms tightly.

At this moment, these people were extremely puzzled. Qi looked like she was still at the Awakening level. How could she pass the 12th level?

"Little girl, what's with your weapon...?"

At this moment, Master Liu Ke couldn't wait to walk out and ask Qi about this umbrella.

He asked Ge Lin. This dwarf didn't say anything. Although Ge Lin knew that it was given by Shi Yu, she wasn't willing to talk nonsense without the agreement of Qi and even Shi Yu himself. Her temper was very stubborn.

Weapon?

Everyone looked at the white umbrella in Qi's hand.

"Master Liu Ke, you're saying that Qizhen really relied on equipment to pass level 12??"

They were completely stunned and couldn't understand.

"Is that a divine weapon?"

"This..." At this moment, Qi immediately became nervous. She suddenly realized that she seemed to have caused trouble.

She had definitely caused a huge commotion by passing the 12th level.

Although Shi Yu had said that he didn't mind her casually using this umbrella and letting her use it to challenge the levels, Qi instantly didn't know what to do after being noticed by so many people.

"Qi, let's go back first." Master Ge Lin walked out and walked to Qi's side.

But at this moment, everyone suddenly held their breaths and looked at a spot.

Because, with a spatial ripple, a few extremely noble people arrived.

Be it the royal Beast Tamers, elves, or outsiders like Ge Lin who came to work, their breathing stopped. They looked at the Elven Empress who appeared in front of them, President Auland, Annie, and the others beside her.

"Your Majesty."

In an instant, all the members of the royal family present bowed and greeted. Qi was no exception and immediately bowed nervously.

"No need for formalities," Sylphra said, then looked at Qi in the crowd. She was surprised, but she didn't feel that she had become stronger.

It was still an Awakening-level energy wave...

"Qi, right? I just heard from President Auland that you passed the 12 levels of the trial?"

At this moment, everyone around looked up in surprise. They didn't expect that passing the 12th level would attract the empress.

Incredibly, even when Annie, Lil, and the others beside the empress passed the 12th level, the empress didn't pay much attention, right?

However, Qi's situation was indeed a little special.

"Yes, yes, Your Majesty." Qi's face was red as she looked at the Elven Empress nervously.

"Huh?" This mystic realm was established by the Elven Empress. Although she had handed the mystic realm to others to manage, after coming here, she instantly saw all the history that had happened in the first half a day inside the mystic realm.

At this moment, the Elven Empress's expression changed slightly. She looked at the weapon in Qi's hand and felt a little strange. Why was the artifact spirit of this weapon so similar to the butterfly she had seen in Dragon Palace City and Shi Yu's butterfly's power form?

"Who gave you this umbrella?" the Elven Empress said.

"It's Lord Shi Yu..." Qi said.

Shi Yu!

When this name came out of Qi's mouth, Lu Qingyi, Lian, Annie, Lil, and the others beside her were immediately stunned. They looked at the umbrella in Qi's hand.

What was going on?

What was going on?

“As expected, it’s him.” The Elven Empress was silent and looked at Qi. Then, she turned to look at the more mature Annie and Lil. She was a little confused. Where did they lose?

What was Shi Yu thinking when he shook off the more mature and beautiful Annie, Lil, and the others to get weapons and equipment to get this elven kid?

At this moment, President Auland suddenly looked at Annie and the others. At this moment, these elven geniuses had blank expressions and had yet to react to what was going on.

“So... Qi really relied on this umbrella to clear level 12?!”

At that moment, even the empress asked about this umbrella. The surrounding Tingxiang geniuses began to find it even more unbelievable.

What exactly was this? They couldn’t defeat an Awakening-level elven girl? She defeated a top-notch monarch with this thing?

Shi Yu gave it to her?

Wasn’t Shi Yu the number one person below the legends of Dong Huang who had led Dragon Palace City to Tingxiang today!

They had heard a lot of Shi Yu’s experience at the banquet today, but they suddenly realized that they were not familiar with this guy at all. What was wrong with this guy? He gave an Awakening-level sprite an umbrella, and her strength was comparable to the current four geniuses of the new generation of the royal family?

They had yet to pass the 12th level. Didn’t that mean that they were inferior to Qi?

At this moment, the group of Tingxiang geniuses was completely stunned.

Moreover, why would Shi Yu give the umbrella to Qi...

“What exactly is Shi Yu doing?” Lu Qingyi’s face darkened. She felt that Shi Yu wasn’t someone who knew his place and always caused trouble. As expected, while she was entering the ruins, Shi Yu directly guided a little girl to clear the royal trial in Tingxiang...

[Unscientific Beast Taming](#)

Chapter 805: The Weakest Overlord Qi

805 The Weakest Overlord Qi

At that moment, everyone knew how Qi cleared the 12 levels.

Relying on weapons and equipment.

However, apart from a few people, most people still didn’t understand why Qi could clear the trial so quickly with just one piece of equipment.

For a moment, a knowledgeable librarian like Lil couldn't think of equipment that could help Qi pass the 12th level so easily among the various legendary equipment collected by the elves.

Whether it was low-level or high-level, it was impossible for an Awakening-level Qi to control it.

It was impossible for a level 1 sprite to wear level 100 equipment.

Even some equipment with artifact spirits couldn't recognize an Awakening-level sprite so easily. Although the conditions to use it after obtaining their recognition would be much lower, the owner recognition process was also a huge test for the user.

In an instant, Shi Yu became even more mysterious among these royal geniuses.

It wasn't scary that he was strong. What was scary was that he could actually casually make an Awakening-level elf comparable to them through a piece of equipment.

This extremely mysterious image made the two Tingxiang geniuses present who were about to communicate with Dragon Palace City tomorrow feel a huge pressure.

"As expected of you." Lu Qingyi looked at the umbrella in Qi's hand and fell into deep thought.

As one of the people who understood Shi Yu the most, Lu Qingyi was the first to know what was going on.

Perhaps there was a phantom created by Buggy as the artifact spirit in that weapon.

Shi Yu often used this strategy. For example, in the martial arts conference, Shi Yu used an Ice Dragon Blade to summon the Ice Dragon Artifact Spirit Phantom to assist him in battle. He cooperated with the Artifact Spirit Phantom to lead and defeat monarchs above his level.

For example, in the National League, he even let Chi Tong activate Mu Huiyin's artifact spirit phantom on its own and form a combination skill that crossed a thousand miles with Buggy. It used the Interlocking Sword to crush Gao Xuan.

For the people around Shi Yu, it was no longer a secret that Shi Yu had mastered a set of skills to use phantom illusions as artifact spirits.

If this method was used, it could indeed allow this little girl to easily pass the 12th level.

Lu Qingyi was silent. She naturally knew the battle power of that butterfly. Whether her overlord-level sprite could defeat the divine dragon phantom it created with all its might was a problem.

Letting these illusions be equipment artifact spirits, wasn't this a dimensional reduction attack? It was up to Buggy to do anything it wanted.

Lu Qingyi even suspected that even without this little girl holding a weapon, it wasn't impossible for Shi Yu to let the weapon clear the level itself. No, it wasn't impossible to let the artifact spirit leave the equipment to clear the level.

Lu Qingyi was immediately amused. It was right that the surrounding people couldn't understand. After all, they didn't know the power of Buggy's imagination.

This ability was definitely a skill that dwarf blacksmiths dreamed of.

“Alright, you guys can leave.”

After knowing what was going on, the Elven Empress began to chase people away. After she spoke, although most of the Tingxiang geniuses gathered still had many questions, they still couldn't bear to leave under the Elven Empress's orders.

As for the Elven Empress, Sylphra, she looked at Qi and said, “Follow me to Shi Yu.”

In the Elven Empress's opinion, Shi Yu's behavior was definitely up to no good. This equipment was extremely ridiculous. To be able to make many legendary dwarves fight crazily to study it, Shi Yu definitely wouldn't give it to Qi for no reason. Therefore, she wanted to figure out what Shi Yu meant.

....

“...” Shi Yu didn't expect the Elven Empress to bring Qi to him so quickly.

Wasn't the Elven Empress visited by Annie and the others to study some natural ruins?

“Your Majesty.” After Sylphra arrived, Shi Yu immediately welcomed her.

Beside the Elven Empress, Qi, who was holding the umbrella, was very careful and didn't dare to say anything.

“Shi Yu, did you give her that weapon?” the empress asked.

Shi Yu glanced at Qi and said, “Yeah, what's wrong?”

“She took this and cleared the 12th level of the royal trial, causing quite a stir.” The Elven Empress looked at Shi Yu.

Among this generation of Tingxiang geniuses, only four people could normally pass the 12 levels she had established.

In the end, Shi Yu relied on equipment to help an Awakening-level elven girl pass. She suspected that Shi Yu was targeting her.

“Ah... Haha, is that so?” Shi Yu smiled in embarrassment.

It was indeed him who encouraged Qi to establish more confidence.

It was impossible to train her willpower like before.

He had to establish confidence and shatter it again. Then, he would establish it and shatter it again and again.

“Then why are you giving such a precious thing to her?” Sylphra asked with a smile.

“I haven't had time to tell you.”

“I want to help Qi cultivate,” Shi Yu said. “This might be a weapon, but every weapon can help her better affinity with natural energy or help her train her physique during the use. It's equivalent to a training tool.”

“Your Majesty, let Qi follow me to Dong Huang to cultivate.”

As expected...

The Elven Empress knew that Shi Yu must have chosen Qi to make such an equipment with such importance. However, what she didn't understand was why Shi Yu chose Qi despite leaving so many elven geniuses behind.

“Why?” the Elven Empress asked.

Why... Didn't she say that she wanted him to contract a sprite? Shi Yu complained in his heart.

“Firstly, it's because even if Qi doesn't have extraordinary power, she works very hard to train herself with various weapons and equipment. I like her personality very much. Secondly, her physique shouldn't be as simple as it looks. The reason for the flaw might be because her potential is huge.”

Unscientific Beast Taming

Chapter 806: The Weakest Overlord Qi (2)

806 The Weakest Overlord Qi (2)

Shi Yu looked at the Elven Empress and said, “She's very similar to my other companions. In the beginning, they more or less had some problems. Therefore, I want to try and see if I can help her change her fate.”

At the side, Qi's gaze flickered as she looked at Shi Yu gratefully. As for the Elven Empress, she nodded.

Thinking that Shi Yu had discovered something special about Qi that even she didn't discover, the Elven Empress felt that it was nothing. There were specializations in various fields, just like how even she couldn't develop mechanical phantom beasts and Mythical mechanical phantom beasts. It was very normal for Shi Yu to have some unique insights.

She wanted to see how far Shi Yu, this legendary genius, could nurture this flawed elven girl.

“Qi, are you willing to follow him?”

The Elven Empress looked at Qi and asked for her opinion.

Although it was different from what she had imagined at the start, as long as Shi Yu could choose a Courtyard Sprite, a Tingxiang Elf, she would have achieved his goal.

“Yes, yes, I want to follow Lord Shi Yu.” Qi nodded.

“Then from today onwards, you can cultivate with Shi Yu. I'll announce this later,” the Elven Empress said.

If the sprites of the Tingxiang royal family were contracted by outsiders, they had to be announced to the public. It was also a form of diplomatic relations.

At the same time, because they had left the royal family, the identities of these elves would also change slightly. Moreover, when they left, the royal family would also give them blessings and gifts.

...

After getting Qi from the Elven Empress, Shi Yu was much happier.

Regardless of whether Ling's research results were right, it was definitely true that Qi had the power of a god in her body.

At the moment, Shi Yu's plan was to let Qi, who had inherited the natural physique of the elves, continue to train her natural power. When she became stronger, her willpower level might increase.

The natural power from the outside world was different from the transcendent power in the body. It could be cultivated, but the difficulty was a little higher. After all, that was a skill that only overlords began to cultivate.

After the Elven Empress left, Lu Qingyi returned and found Shi Yu.

"In the library, you said you had something important to do. It's to get the little elven girl in the training ground."

The moment Lu Qingyi arrived, she had a smile on her face. However, this smile made Shi Yu feel a little guilty.

"How could that be?" Shi Yu said perfunctorily, but it was difficult to say about the Time Sprite.

Before the dust settled, he wouldn't tell anyone, especially the Dragon God and the Elven Empress. That would only add a lot of trouble.

After all, traveling through space and time was too much of a bug.

After passing through space and time, he didn't know if it would change the [Future] through the [Past] or create a new [Parallel Space].

Moreover, if teleportation was a divine skill, the cost of using it would probably be very high.

It was better to take it one step at a time and nurture it first.

"Don't tell me you want to contract that elven little girl." Lu Qingyi felt strange.

After she contracted Lian, she didn't feel like she was raising a pet at all. Instead, she found herself a best friend.

Regarding this, White Brook was envious, jealous, and hateful. She expressed that she also wanted to be contracted by Senior Lu...

If it was this little elven girl, Lu Qingyi felt that it was no different from raising a daughter.

"It's hard to say, but I've agreed with the Elven Empress that Qi should cultivate beside me next. This Qi's physique shouldn't be as simple as it looks. I'm more concerned about this. Her future achievements are definitely immeasurable."

"Senior, what's with that expression?"

Lu Qingyi was speechless. "I'm just worried that you can't take good care of her."

"She doesn't have transcendent power herself, so she can't train like other pets."

“I naturally know this. There’s no problem. Senior, how’s the harvest from the natural ruins? From the looks of it, you should have just returned, right?”

At the mention of the gains from the natural ruins, Lu Qingyi smiled and said, “It’s naturally very sumptuous. Since you want to nurture sprites, I’ll give you some natural resources. By the way, in the next two days, I don’t want to watch and participate in the Dragon Palace City exchange competition. I plan to bring Lian to see other Tingxiang ruins. Previously, I’ve already made an appointment with President Auland.”

Shi Yu was amused. “I don’t plan to watch either. I’m going to the Space Emperor Ruins to hatch the egg first. I’ll leave this to Senior Ice Dragon to preside over. By the way, Senior, when you go, bring Teacher Ying along. It’s safer.”

“It’s better to let Teacher Ying follow you. Not many people here know me at all, but you...”

“From the situation of Tingxiang being enemies with the Dark Night Forest and the Dragon Empire all year round... you’re the one in more danger. Don’t forget the relationship between the Dragon Empire, Dragon Palace City, and Dong Huang.”

The Dragon Emperor was the fourth legendary emperor of the Dong Huang Dynasty. Ever since he ascended the throne, Dong Huang and Dragon Palace City had always been on good terms.

A thousand years ago, the Dragon God was already a demigod-level expert.

Logically speaking, with the protection of the Dragon God, even if the Dragon Emperor died, the Dong Huang Dynasty wouldn’t collapse again.

In fact, that was the case. Under the protection of Dragon Palace City, although the Dragon Emperor died, the Dragon Emperor Dynasty didn’t collapse. Instead, under the protection of Dragon Palace City, it continued to be passed down for a long time.

However, if Dragon Palace City couldn’t even take care of itself, and if the Dragon God didn’t have the energy to protect Dong Huang, the Dragon Emperor Dynasty would be in danger.

At that time, the eastern totem countries directly joined forces with the Western Dragon Empire and other factions. At the same time, a totem war occurred against Dong Huang and Dragon Palace City. Because Dragon Palace City wanted to fight the Dragon Empire, which also had a demigod life form, it had no time to protect Dong Huang.

[Unscientific Beast Taming](#)

Chapter 807: The Weakest Overlord Qi (3)

807 The Weakest Overlord Qi (3)

This battle lasted for hundreds of years, creating a new round of totem chaos.

Only when the Space Emperor rose and became the new legendary Beast Tamer of Dong Huang in the chaotic world did the chaotic world end again.

The Space Emperor even relied on his own attributes to become the most influential legendary emperor on Blue Planet. This was because he had established a spatial teleportation array that covered Blue

Planet at that time and could instantly let the Dong Huang and Dragon Palace City armies reach various places on Blue Planet.

Therefore, as an invader from the West and defeated by Dragon Palace City and Dong Huang, it was normal for the Dragon Empire to have a bad relationship with Dragon Palace City and Dong Huang.

As the leader of the Dragon Palace City exchange, Shi Yu might have already been targeted by the Dragon Empire.

Therefore, Lu Qingyi felt that it was better to let the gem cat go to Shi Yu's as a bodyguard.

"Don't worry about me," Shi Yu said. "Don't forget, I have the protection of the Dragon God."

"Moreover... Susu has already accepted the Blue Sea inheritance and inherited the Blue Sea Ruins. With my identity as the owner of the Blue Sea Ruins, I can teleport to any projection of the Blue Sea Ruins at any time. No one can stop me."

Just like how the protective water created by Susu could help Qi easily resist overlord-level attacks before its energy was exhausted...

The protective water created by the Dragon God could also help Shi Yu block the totem's attack.

With such equipment and the Blue Sea Ruins that could be teleported at will, it was extremely difficult for even a demigod to keep Shi Yu.

It could be said that if Shi Yu couldn't escape with these equipment on him, then letting the gem cat protect him would be equivalent to just throwing an extra cat for whatever this insanely powerful opponent was.

At this moment, Shi Yu had completely escaped the weak period where he needed bodyguards.

The world was a place that he could go alone.

"Wait?!" At this moment, when she heard that Susu had already accepted the inheritance of the Blue Sea Ruins, a trace of confusion appeared on Lu Qingyi's exquisite face.

"Isn't that... Isn't that an inheritance that can only be accepted by overlords? You let it break through in advance for the world competition?"

"Is your body alright?"

Contracting an overlord above his level would drain him dry.

However, when she thought of Shi Yu's monster physique, Lu Qingyi felt that her worries were unnecessary.

"No, no. It's just that through the Time Fruit, Susu temporarily reached the overlord level and awakened the Blue Sea Ruins. In essence, it's still at the monarch level. It won't cause much burden."

"In addition, because of strength, I didn't completely receive the inheritance. I only received a portion and inherited the entry-level Blue Sea skill."

Lu Qingyi: "?"

Was the Time Fruit for him to abuse like this...

Shi Yu smiled. "Senior, you should believe me now, right? With the Dragon God Protection and the Blue Sea Ruins, nothing will happen to me."

....

That night, a big event was also announced in the Elven royal family.

The elven royal girl, Qi, was about to leave the palace and cultivate with the Beast Tamer of Dong Huang, Shi Yu.

As soon as this news was announced, everyone in the royal family of Tingxiang could be said to be extremely shocked.

Shi Yu's name was already very famous in the royal family because of the banquet at noon.

Leading the ten overlords of Dragon Palace City, the founder of the mechanical phantom beast system, the number one person below the legends of Dong Huang... Not to mention this problematic girl without transcendent power, even whether those overlord royals were worthy of him was a problem.

As the news of Qi clearing the royal trial with the equipment Shi Yu had given her in the afternoon spread, some people who were originally very puzzled instantly fell silent. Then, they found it unbelievable and were shocked by Shi Yu's actions.

Perhaps... this Big Boss Shi Yu really didn't care about Qi's state. After all, he had only given her one piece of equipment, and Qi's battle power had leaped into the top ten of the new generation in Tingxiang.

Since he could strengthen this Awakening-level sprite that didn't know any skills to this extent... How strong was Shi Yu himself?

In an instant, the royal family of Tingxiang was even more curious about the true strength of Dong Huang, the number one person below the legendary level.

"Qi, you have to cultivate well with Lord Shi Yu. Don't miss this opportunity. You have to be obedient," Master Ge Lin instructed.

At this moment, she already knew the power of the Umbrella of Time. This equipment could completely be called a legendary level-seven equipment. Perhaps only the legendary dwarves in the history of [Tingxiang Continent] could be forged.

In the 2000 years of history of [Tingxiang Ancient Nation], no one could create such equipment anymore. If this equipment was not obtained by chance by Shi Yu, but because Shi Yu had a forging channel, then if Qi followed Shi Yu, even if she couldn't use extraordinary power in his life, her future achievements couldn't be low.

"Alright!" Qi was full of energy.

Tonight was destined to be a sleepless night, especially for Qi, Annie, Lil, Luo Yi, and the other elven geniuses.

As the royal family announced that Qi was about to leave with Shi Yu, Annie, Lil, and the others could be said to be extremely stunned.

They finally understood why Her Majesty and President Auland looked at them like that in the afternoon.

[It was clearly me first...]

President Auland was also stunned because Her Majesty wanted her to take out the legendary resource [Nature Fruit] from the natural ruins as a farewell gift.

If it weren't for the fact that the empress was supreme, President Auland would even think that the empress was crazy.

Legendary resources could almost 100% nurture an overlord. Even transcendent races might rely on legendary resources to strengthen themselves to an overlord. There was even a 10% chance of strengthening an overlord to a totem.

Unscientific Beast Taming

Chapter 808: The Weakest Overlord Qi (4)

808 The Weakest Overlord Qi (4)

Moreover, it was a legendary resource that matched the elves like the [Nature Fruit]. It had to be given to Shi Yu and Qi?

"Just do it," Sylphra said calmly.

It was just a legendary resource.

It wasn't anything precious.

Moreover, Tingxiang didn't lose anything. The fruit was obtained for free.

....

The next day, before the Dragon Palace City exchange banquet began, President Auland brought Qi to visit Shi Yu. At the same time, she handed Qi and the Nature Fruit to Shi Yu.

"This is..." Shi Yu held the pomegranate-like green natural fruit and instantly recognized what resource this was through the third index.

He was extremely surprised. Wasn't this one of the two legendary resources obtained in the natural ruins that Senior Lu mentioned yesterday?

Due to the initial agreement, she returned it to Tingxiang and only kept the Wind God Flower.

"This is the legendary resource, the Nature Fruit. It's a farewell gift from Her Majesty to Qi to leave Tingxiang. It can increase Qi's affinity and control over natural energy. This is a physique strengthening resource. Even if she doesn't have any transcendent power, she can still use the Nature Fruit. It can be said to be one of the few resources suitable for her," President Auland said.

At the side, Qi was stunned. She didn't expect that when she left, the empress would give her legendary resources.

Although everyone in Tingxiang usually took good care of her, the care level of legendary resources was clearly something Qi couldn't enjoy previously.

Although Qi was a child, she was also very smart. She knew that these changes were brought about by Shi Yu.

"Thank Her Majesty for me. I'll take good care of Qi." Shi Yu didn't stand on ceremony and also accepted the Nature Fruit.

This was indeed a good thing.

If it went smoothly, he might be able to use this to strengthen Qi to the pseudo overlord level.

As for why it was a pseudo overlord, it was because if she completely digested the Nature Fruit, although she might not be able to obtain overlord-level battle power, she should be able to master natural power attainments that far exceeded ordinary overlords.

After all, although she didn't have any transcendent skills, the natural affinity of the elves was preserved.

After a monarch-level life form broke through to the overlord level, its physique would welcome a rebirth and become an affinity natural physique.

Even if they didn't use the transcendent power in their bodies to form skills, they still had the ability to mobilize the power of nature to form elemental attacks.

Therefore, most overlord-level lives would choose to cultivate the power of nature.

Mobilizing the power of nature to cooperate with skill attacks was the battle mode of most overlords.

Only a very small number of overlord lives didn't cultivate with the power of nature. Of course, this was also because they might have mastered stronger special powers, such as the power of imagination of Buggy, the power of life and death of Baby Ginseng, and the power of the Void Mantis.

Among them, the elves were born with natural affinity. When they were just born, they could sense the power of nature like other overlord-level life forms and the elemental particles floating in the air. Qi was no exception.

However, when they were weak, they couldn't mobilize them like real overlord lives.

After the elves reached the overlord level, they didn't need to specially cultivate at all. Their control over the power of nature was comparable to the years of bitter cultivation of ordinary overlords.

If Qi ate the Nature Fruit, she should also have an overlord-level natural physique. Although she didn't have any skills, she could easily mobilize the power of nature to attack.

This battle mode might be more dependent on the arena. When it encountered the ability of the Anti-Demon Domain, it would immediately be blinded. It could be considered the weakest overlord, and the restrictions were even greater than the pure overlord physique.

However, the benefit was that if Qi mastered the power of nature, the equipment, the Umbrella of Time, should be able to display greater effects in her hands.

Weapons, the natural physique of the elves, and the artifact spirit could mobilize the power of nature to a greater extent to form an attack, displaying power that far exceeded the upper limit of the Time Umbrella.

However, since Qi had already joined the team, Shi Yu felt that he could return to the furnace to rebuild rough products like the Umbrella of Time that had been rushed out at the last minute and let Ling and the others spend more effort to process them.

President Auland left to prepare for the exchange competition. As for Qi, she stayed behind nervously and happily and looked at Shi Yu.

“It’s very bitter to cultivate with me. You have to be mentally prepared.”

“In addition, I’m currently a level-six Beast Tamer. My contract slot is already full, so I can’t sign a contract with you for the time being.”

“Since this fruit was given to you by the Elven Empress, you should eat it when you find an opportunity. At that time, you should be considered an overlord, right?”

Overlord level!

Qi said, “Can I directly reach the overlord level from the Awakening level?”

Shi Yu smiled. “Probably not. You have to digest it slowly. Moreover, it’s not that your energy level and life level have reached the overlord level, but that you have an overlord-level physique. Note that it’s a physique. You can only have control over the power of nature that’s not inferior or even far exceeds most overlords, but it’s very likely that you still don’t have any transcendent skills. Therefore, in theory, you can be considered the ‘weakest overlord’.”

Qi: QAQ

“But at that time, you should be able to better display the power of the Time Umbrella.”

The affinity of the elves with the power of nature was comparable to an elemental life form. It was top-notch. Moreover, it was an elf who would be eating a legendary exclusive resource like the Nature Fruit.

At that time, the cultivation speed of the natural power should be enough to reach the level of a top-notch overlord like the Sky Penetrating Whale.

“In the next few days, you don’t have to train in a hurry. Relax first. From today onwards, Dragon Palace City and your Tingxiang will have an exchange. I’ll bring you over to watch the battle. You come and broaden your horizons first and see the battle between true experts.”

“Alright!!” Qi nodded and listened to Shi Yu.

She didn’t realize at all that Shi Yu couldn’t be bothered with her at this moment and wanted to walk around the Tingxiang ruins as soon as possible. After all, time was tight...

Unscientific Beast Taming

Chapter 809: Strong Enemy in the World Tournament (1)

809 Strong Enemy in the World Tournament (1)

After Qi arrived, Shi Yu briefly told her about the future training plan.

Moreover, he had to let Qi understand his advantage first.

“My advantage?”

Qi said in confusion and shook her head.

She felt that she didn't have any advantage...

“I can't think of anything, but I'll work hard!”

Shi Yu smiled and said, “If hard work is useful, there won't be so few experts in this world.”

“In the records since ancient times, no legendary expert has relied on hard work to reach the peak, and no creature has relied on hard work to surpass overlords.”

“Bloodline, opportunities, resources, talent, direction... These are all more important than hard work. Hard work is just support.”

“Ah...” Qi was stunned.

“Let me tell you.”

“Your advantage is in your 'bloodline'. You're an elf. Although you look very ordinary in Tingxiang, especially among the royal family, you'll know when you leave Tingxiang. Compared to the many species in the natural world, the natural physique of the elves is a huge advantage.”

“After familiarizing yourself with the power of nature, it can allow you to better control some equipment, such as the partial form of the Umbrella of Time. Under normal circumstances, after you use it a few times, its energy will be exhausted and it can't be used again. But if you master powerful natural energy, you can replenish their energy yourself.”

“Apart from that, your advantage is still in the deeper 'potential'. It's this potential that suppresses your transcendent ability.”

“Then... what should I do?”

“You already have the resources. Thanks to your royal bloodline and your background, you obtained the natural fruit given by Her Majesty.”

Qi nodded silently. Yes, and because she had encountered Shi Yu, this should be considered an opportunity.

“Although you can't become a top expert after eating the Nature Fruit, it's not a problem for you to not be inferior to other royal geniuses.”

“But it’s just a legendary resource. It’s nothing. If the goal is a higher domain, you still have to develop the hidden potential to suppress your transcendent power.”

“Hidden potential?!” Qi opened his eyes.

Did she really have any hidden potential?

“Right.”

“If we can unearth this potential, it’s equivalent to hundreds of years of hard work by others.”

Qi gulped.

“Then I...”

“What you have to do is work hard.”

Qi: “?”

The little girl’s big pink eyes were filled with confusion, so should she work hard?

“I’m just letting you differentiate between priority and priority. I’m letting you know that your hard work is meaningful, because after you work hard, you can obtain a hundred times the reward. Of course, I’m referring to targeted training. Remember this. This is an important faith for you to be able to keep calm and not collapse in the next devil training...”

Qi understood, but she was even more afraid.

Therefore, what exactly was Shi Yu doing to her?

What kind of training did she have to undergo...

What bad thoughts could Shi Yu have?

He just wanted Qi to undergo a few rounds of the demonic training that Eleven and the others had experienced at that time.

The body passed through a snowstorm, bathed in magma, jumped down from the sky, swam in the deep sea, danced in a minefield...

Apart from that, this was only the foundation.

Previously, Qi had already established confidence. It was time to deal a blow.

The Umbrella of Time definitely had to be improved. Although this equipment was already the essence of the entire team’s strength and had used all the rare materials that could be used during forging, the details could still be optimized.

Apart from being offensive and defensive equipment, equipment could also be used as training equipment. Shi Yu was prepared to arrange for the Anti-Magic Armor and Dream Training Necklace.

When training Buggy and the others, Shi Yu’s psychological burden was relatively low, but Shi Yu really couldn’t bear to train an elf like this.

Sigh, it couldn't be helped. Even a demigod reincarnation had its own overlord will, but an existence suspected to be the reincarnation of a Time Sprite actually had an extremely low will. He couldn't be blamed.

For the sake of a beautiful future, he'd fight!

....

Before the storm arrived, Shi Yu gave Qi one last happy time to watch the exchange match. As for Shi Yu himself, he had already set off for Tingxiang to hatch the altar.

That day, the overlord of Dragon Palace City and the geniuses of Tingxiang gathered. President Auland also personally arrived at the scene to watch the exchange competition.

After what happened yesterday, this group of Tingxiang geniuses was even more curious about Shi Yu than the dragon-element overlord of Dragon Palace City!

Even the elven geniuses like Annie and Lil, who originally didn't plan to participate in the exchange, arrived and sat at the side.

"Sister Annie..."

At this moment, Qi, who was sent to the scene by Shi Yu, was directly caught by Annie, Lil, and the others and pulled to the courtyard area to watch the battle.

At the same time, Qi didn't understand why the way Sister Luo Yi and the others looked at her was so complicated...

"Qi, where's Dr. Shi Yu? Why don't I see him at the scene?" Hillia said.

Qi shook her head. She didn't tell her where Shi Yu had gone.

"Are you Qi?"

On Tingxiang's side, there were only more than ten people. There were five contestants of the Tingxiang World Tournament and some royal spectators from Tingxiang. The structure was very simple. Their attention was all on Qi.

Among them, a human young man observed this pink-haired loli curiously. Clearly, he had already heard the news that the royal elf of Tingxiang, Qi, was contracted by Dr. Shi Yu of Dong Huang.

[Unscientific Beast Taming](#)

Chapter 810: Strong Enemy in the World Tournament (2)

810 Strong Enemy in the World Tournament (2)

"Isn't Dr. Shi Yu around?"

He looked around and said,

"Compared to challenging a dragon-element overlord, I still want to challenge Dr. Shi Yu."

After all, Shi Yu was the number one person below the legends of Dong Huang, and he was the number one person below the legends of the new generation in Tingxiang... They were both number one people. They could spar.

“Qi, how’s Dr. Shi Yu’s strength compared to mine?”

A legendary mixed-blood male elf said. As the strongest contestant in this year’s Tingxiang World Tournament, he was also very curious about Shi Yu’s strength.

As for Qi, she might be the person who understood Shi Yu the most at the moment.

In his opinion, the value of Shi Yu, the number one person below the legend level, was definitely stronger than the idiot beside him. One was the number one person below the legend level of the new generation, and the other was the number one person below the legend level of the entire Dong Huang. How could they compare?

In his opinion, even if Shi Yu was not a legend, he was not necessarily weaker than a real legend.

“Very strong,” Qi said. In fact, she didn’t know much about Shi Yu’s strength.

Although Shi Yu had taken out such a weapon and equipment, Qi had never come into contact with Shi Yu’s strength.

However, Qi believed that Shi Yu was the most powerful. Even if he wasn’t now, she wouldn’t disappoint Shi Yu. When she unearthed her potential, she had to be able to help Shi Yu.

“Very strong.”

When the mixed-blood male elf heard this abstract answer, he smiled and shook his head.

“Rogue, I think it’s better if you don’t participate in the world competition.”

“Qi is right.”

At this moment, when she heard this group of people ask about Shi Yu’s strength, Annie seemed to have thought of herself yesterday.

“Annie, what do you mean? You seem to know something,” Rogue said.

“I just feel that with your strength, you’ll be in danger in the World Tournament.” Annie curled her lips and said, “I fought Dr. Shi Yu yesterday. I’m completely not his match.”

“What?” Annie’s words immediately attracted the attention of the five world competition contestants. They looked at Annie uniformly.

Annie, an overlord-level Fire Elf. In terms of strength, she wasn’t weaker than Rogue in his single pet state. She was the commander of the royal archer regiment in Tingxiang and had extraordinary strength.

She had fought Shi Yu?

“Sister Annie, you’ve fought Lord Shi Yu before?” Qi immediately looked at Annie beside him. She had just learned of this.

“Yeah, Lil, Luo Yi, and the others were all present at that time.” Annie nodded.

At the side, Lil and the others had complicated expressions. That battle...

“At that time, Dr. Shi Yu only sent out a monarch-level pet and didn’t go all out. He easily defeated me above his level.”

Annie looked at Rogue and the others mockingly and said,

“I feel that his full strength isn’t necessarily weaker than that Dark Elven Prince or that Flame Dragon King.”

The Dark Elven Prince and the Fire Dragon King were known participants of the World Tournament in the Dark Night Forest and the Dragon Empire. They were both top-notch overlords with the bearing of invincible overlords.

“Looks like our Tingxiang’s generation is really not very good.”

“You guys should wash up and sleep,” Annie said heartlessly.

At this moment, the few contestants of the World Tournament had stunned expressions. They couldn’t believe what Annie was saying. Shi Yu... only sent a monarch-level pet to defeat Annie, who had extraordinary natural attainments?!

How was that possible?

At the side, Qi was slightly stunned. She felt that Big Sister Annie didn’t seem to be lying. Was Shi Yu so powerful?

“You’re not kidding, right, Annie?” Rogue’s expression froze.

That Dr. Shi Yu defeated the overlord sprite of Tingxiang with a single pet? Was he sure it was a single pet and not all of them attacking together?

....

At the border of Tingxiang.

Shi Yu had already arrived according to the guidance of the map. Although the location of the map was on Tingxiang, Shi Yu realized that to be precise, its geographical location was on a battlefield.

A battlefield where the three major factions of the Dragon Empire converged in the Dark Night Forest, Tingxiang, and Ancient Nation.

This was no longer the territory of Tingxiang, but a land without an owner, a buffer zone for three countries.

It could be said that it was a relatively dangerous place, but after thinking about it, Shi Yu still came over himself.

It was just the time to hatch an egg.

However, after arriving, what made Shi Yu's balls hurt was that he didn't find the so-called Starry Sky Altar after searching around!

As he lingered in midair, Shi Yu's heart could be said to be cold and extremely complicated!

The thing he was most worried about had indeed happened.

The Starry Sky Altar was not an indestructible thing. It was established hundreds of years ago by the Space Emperor.

Too many things have happened in the past few hundred years. In addition, this place had become a battlefield. The Starry Sky Altar had probably been destroyed in the war.

"F*ck!!!" In mid-air, Shi Yu cursed. He even wanted to destroy the Dark Night Forest and the Dragon Empire.

Why did the three of them have to fight here!

It was over.

The ruins were gone.

How could it hatch next?

He would die before he could succeed.

The egg would turn cold before hatching.

"Ling, Ling." Shi Yu immediately asked the omnipotent Ling for help.

Ling: "..."

"To be precise, the hatching of the Starry Sky Egg only requires nutrients from the starry sky, right?"

"Since the Star Prayer Formation built by the Space Emperor can attract nutrients, can we absorb it with Susu's Star Sea skill?"

"At the moment, the most important thing is that the nutritional starlight absorbed by the Starry Sky Egg the first two times is not the same type. The starlight summoned by this geographical location is definitely not the same type. Moreover, what Susu summoned is definitely water resources. The difference from the form of light resources is huge. Can you figure out what the Starry Sky Egg needs? When the time comes, can you change the light water?"
