

## **Beast 81**

### **Chapter 81: Leader Eleven**

However, there was another problem.

Could the green worm eat the Ethereal Spirit Stone?

The answer was obvious. It definitely couldn't be eaten directly.

Even Eleven wouldn't be able to eat to its heart's content.

Could it be that the Ethereal Stone had to be soaked in water?

Or grinded to powder?

Shi Yu fell into deep thought for a long time. He felt that it was unreliable.

At the side, the Green Silkworm and Eleven had already run off to experiment with the magical effects of the Perfect-level Worm Silk.

The worm silk was extremely strong and sharp.

Although it had yet to reach the transcendent level, after adding dozens of points, the Green Silkworm's strength was not small.

Using this worm silk, he could easily cut ordinary rocks and trees.

With multiple entanglements, the power of the Worm Silk exceeded that of an arrow and could easily penetrate a large rock.

In terms of cutting power, the coverage of the attack would become greater after multiple entanglements, but it would also consume more physical strength.

In fact, with the current proficiency of the Green Silkworm towards the worm silk, it could even instantly weave a huge and complicated worm net to trap the enemy. It had already become more agile than humans.

Unfortunately, with its current attributes, it was only strong and sharp. There was nothing extraordinary about it, and it was still in the range of the insect class.

If he wanted to increase its power a little more and use the nature of the transcendent-level worm silk to absorb the attribute energy in the food.

On Shi Yu's side, he couldn't find out if the Ethereal Spirit Stone could be eaten at all. Just as he was about to ask Lu Qingyi, President Feng, and the others if they had any ideas, he suddenly slapped his head.

"Shi Yu, Shi Yu, being poor really made you dumb."

"Why don't you just buy space-type plants as food? Instead, you keep thinking about rocks."

Shi Yu had yet to change his mindset. He had not realized that he was already a rich person after obtaining a ruin.

It didn't seem wrong to sell an Ethereal Stone for money and buy a suitable spatial plant.

Even if there was a middleman who earned a difference in price, it wouldn't be much. It was better than letting bugs eat rocks.

If it ate the rock and it stuffed its body up, the Green Silkworm could directly ascend... Into heaven.

...

After figuring it out, Shi Yu opened the all purpose shopping website and searched for the spatial resource interface. The last time he was on that page, he quit right away.

[Ethereal Spirit Stone]: It can assist Beast Tamers in strengthening the level of the Beast Taming Space. (shortage)

Good lord, not only was it in a shortage state, but there was also no price tag. It looked like a rare item.

But it was also normal. This thing was the same as energy crystals, a universal resource.

Energy crystals could be used by any pet with corresponding attributes. Although the conditions for the birth of energy crystals with common attributes were quite harsh, it was not that impossible.

However, the Ethereal Spirit Stone was different. It could only be born in special places like mystic realm ruins.

Moreover, the need for the Ethereal Stone was far greater than for ordinary attribute materials. Just by being a resource to increase the level of the Beast Taming Space, it meant that any Beast Tamer needed it.

Moreover, it was the kind of thing that you couldn't have too much of.

After all, no matter how strong a pet was cultivated, it wasn't as strong as being strong yourself.

After the level of the Beast Taming Space increased, even if the Beast Tamer did not use his pet, he could still suppress powerful extraordinary creatures himself.

Firstly, every time a Beast Tamer's level increased, their physical fitness would undergo a qualitative change.

This qualitative change was more terrifying than the pet's feedback and Shi Yu's increase in points.

The improvement of the former was still in the category of normal people. The difference was at most the difference between ordinary people and national athletes.

However, the latter would become the difference between an ordinary person and a transcendent. Shi Yu estimated that only at that time would he dare to teach his pets super skills. At the same time, the weakening time for teaching low to high-level skills would also clearly decrease. Unlike now, where the timer would only decrease by ten minutes or so if he was feeling especially good. It was still in the same range.

However, this was not the most important thing. After all, even if one's body was strong, no Beast Tamer would be dumb enough to fight with a pet's physical body. This power up of the Tamer was, at most, to ensure the resistance of Beast Tamers in extreme environments.

No matter how strong a human's body was, it was very difficult to compare with a pet.

The most obvious and crucial aspect of the increase in Beast Tamer level was actually the strength of the Beast Taming Space.

A high-level Beast Taming Space was just like those magic weapons used to lock demons in xianxia novels, the master ball in Pokémon, and the sealing technique used to seal tailed beasts in Naruto. It could directly suppress transcendent creatures. A powerful Beast Tamer could control powerful pets with just the Beast Taming Space.

Of course, this wasn't the main killing method after all. It could only provide support.

But even so, it could be seen that the most important foundation of a Beast Tamer was not a pet, but the Beast Taming Space.

For some Beast Tamers who pursued the strength of the Beast Taming Space, bonds and cultivation were not important at all.

As long as the level of the Beast Taming Space was sufficiently high, he could directly control the powerful extraordinary creatures in the wild to fight for him.

[Space Crystal Fruit]: Level 1 spatial-type resource, a fruit that contains weak spatial power. It's produced in the mystic realm space.

Price: 500,000 per pill.

"Cough, cough, cough." Shi Yu choked.

This price was more than a hundred times higher than other resources of the same level.

Moreover, one fruit might not be enough for the green worm to eat.

However, perhaps a meal could last for days?

That was still very expensive. After all, it had only cost Shi Yu 400,000 yuan to increase the Green Silkworm's silk speed to perfection.

"...I'll buy it!"

Shi Yu steeled his heart. Space-element resources were indeed a little expensive, but the effects of nurturing them were also stronger than other attributes.

Nowadays, consumption was all about investment.

Moreover, one Ethereal Stone could probably be exchanged for many Space Crystal Fruits. He was currently worth dozens of Ethereal Stones, so there was no need to care about this little bit of money.

Shi Yu directly bought two.

After completing the next order, Shi Yu even felt that he could continue.

He looked at the Green Silkworm again.

At this moment, the Green Silkworm was trying its best to penetrate Eleven's hardening with the Perfect Level Worm Silk. However, it realized in despair that even after becoming so much stronger, it still couldn't defeat Eleven.

"Wuu!" Eleven looked down at the green worm, indicating that its efforts weren't enough.

Far from it. Far from it.

It couldn't just rely on the additional points of the Beast Tamer, but had to learn to work hard itself.

Only in this way could it obtain the same strength as it.

"Ji..."

The green worm looked at Eleven in admiration, its eyes filled with stars.

It suddenly felt that Eleven's image was very tall.

Of course, due to the language barrier, the two of them were gesturing blindly.

It was difficult for them to communicate successfully.

"Ah, this... I don't even need to mentor my pets anymore."

Shi Yu looked at the two beasts communicating. Eleven's lead role was good.

In the future, it would be the leader of the team. The core idea to be transmitted was that it couldn't rely on the additional points of the Beast Tamer. It had to work hard too.

However, Shi Yu felt that it was impossible to deepen the pet's impression of training if this was all that was happening.

He still needed some incentive policies...

"Maybe, when there are more pets contracted in the future, I'll make a hard work ranking. Whoever has more training every day will get more points on the same day."

"Then, I'll have another team meeting and let a bunch of pets fight. Then, I'll add points according to my strength ranking..."

This was it!

After becoming a master-level Beast Tamer, if he contracted new pets at every level, there would be at least five to six pets.

It was alright now, but with so many pets in the future, he definitely wouldn't be able to add more points for everyone. It was still necessary for the proactive rules of competition in the team.

Shi Yu felt that he was really a genius.

"Buggy, come here. I'll teach you Absolute Sleep."

“After learning this skill, your spiritual power should be able to increase. When the time comes, you can try to see if there’s any way to control dreams.”

Then, Shi Yu called for the Green Silkworm that was listening to Eleven.

The green worm crawled over silently. Faced with Shi Yu’s temptation, it shook its head and expressed that there was no need to increase its points first. It needed to rely on its own hard work.

“It’s not a big problem. The increase in points is related to hard work. You can get in the car first and catch up later. If you don’t believe me, you can ask Eleven.”

After Shi Yu finished speaking, the green worm looked at Eleven in confusion.

The Little Iron Eating Beast nodded shyly. This couldn’t be helped.

Beasts in the martial world had no choice.

Green Silkworm :” ...”

## Chapter 82: Worm of Imagination

After raising the Green silkworm’s worm silk to perfection, Shi Yu also taught it Absolute Sleep.

< Name > Green Silkworm

[Level of Growth]: Level 10 Awakening

[Skill]: Worm Silk (Transcendent), Absolute Sleep (Initiate)

The Green Silkworm’s attributes panel became like this in just a while.

At this moment, although the green worm was still very weak, its potential had already reached a very high level.

Even for those evolution researchers... Even Eleven, who had mastered a bunch of exaggerated skills, was not as valuable as the green worm at hand.

After all, the malleability of a transcendent-level worm silk was too strong, representing endless possibilities.

In fact, Shi Yu wanted to add a little more to see if there was any way to increase the level of the transcendent level Worm Silk.

But at the moment, he really didn’t have the energy... It was mainly because he didn’t want to face the fact that there might be a higher level of skill proficiency for the time being.

“Ji...”

After learning Absolute Sleep, the green worm was slightly surprised.

How could there be such a convenient skill?

Absolute Sleep could help pets fall asleep instantly, and it was a super deep sleep with extremely fast recovery speed. It was simply to its liking!

It could finally stay away from insomnia...

“Don’t think about insomnia first.”

“Do you feel that your mind and spirit have improved?”

Absolute Sleep was a spiritual-type skill. After teaching it, it would increase the mental strength of the Green Silkworm. When Shi Yu finished speaking, the Green Silkworm raised its head in confusion and looked at Shi Yu. Then, it nodded. Maybe...

“...” Why did Shi Yu have the feeling that he was a teacher and was asking a student a question, but the student wasn’t sure and couldn’t answer it?

“Then your next training mission is to practice lucid dreams.”

“Do you have the experience of repeating a dream a few times before realizing that you were dreaming?” Shi Yu asked.

The green worm nodded. Yes, yes, it had dreamed of being eaten by birds more than once.

Damn it, it remembered this grudge.

“Then after you realized it, did you struggle violently and awaken yourself?” Shi Yu asked again.

The green worm found it magical. Why did Shi Yu know everything!

Shi Yu chuckled. This was how everyone’s recurring nightmares were.

“Focus your imagination before sleeping and hypnotize yourself to review the dreams you often have. This is the beginning of a lucid dream.”

“If you encounter a similar dream again and realize that you’re dreaming, you’re already halfway to success. At this moment, you have to calm down and concentrate. Don’t think of breaking free. Instead, start imagining.”

“This is your own dream. If there’s no external interference, everything inside is actually controlled by you.”

“As long as the Psychic power in your subconscious is strong enough, the nightmare scene can disappear from your eyes at any time. You can easily do whatever you want to in the dream.”

Shi Yu might have to rely on the skill index to teach skills, but he understood how to teach this.

There was once when he was troubled by a nightmare. Shi Yu had relied on this move to successfully kill the female ghost. Unfortunately, that was the only time.

At this moment, the green worm vaguely understood. Beside it, Eleven was training and eavesdropping.

Oh, wasn’t it just a daydream?

It was too virtual and not suitable for it. It was meaningless.

At the same time, it also felt that since the worm couldn't handle it, it might as well wake up and work up a sweat!

Eleven chose to continue training hard.

At that moment, Shi Yu's skill index page was full again. Only by contracting the next pet could he increase the page count again, so he couldn't replicate any dream control skill. He could only let the Green Silkworm practice its lucid dreams first.

He also wanted to contract the Green silkworm immediately, but the level of the Beast Taming Space was not high enough.

However, before the green worm turned into a cocoon, Shi Yu definitely had to complete the contract.

There were two benefits to this.

Firstly, if the Green silkworm became his pet and encountered a situation where it failed to turn into a cocoon, Shi Yu could use the Beast Taming Space to ensure that it didn't die.

The pet contract was a magical power. Unless it was absolute annihilation, even if one of the Beast Tamers and their pets fell into a critical state, as long as one side was in a good state, the endangered side wouldn't directly die. It was equivalent to completing the blood lock with the other party.

Second, if the Green Silkworm completed its evolution under the contract state, Shi Yu, as a Beast Tamer, might also receive some benefits during the evolution, just like how the increase in the growth level of the pet could bring some benefits to the Beast Tamer.

"Ji!"

Then, Shi Yu explained some key points of dream control to the Green Silkworm. Not only information that he knew already, but also the relevant information found on this world's Internet.

This kind of dream control culture in the transcendent world seemed to be much more popular than on Earth.

"Ji!!"

After a moment, the green worm completely memorized this knowledge and immediately planned to train.

"Hey, wait." Shi Yu first yawned and then called for the Green Silkworm.

"I'm not done yet. Don't dream nonsense. There has to be a plan."

He took out his cell phone and opened a photo for the Green Silkworm to see.

[Picture]

< Name > Ice Dragon

[Race Level]: Medium overlord

"Didn't you dream that you had become a dragon before? Look, is it this kind of creature?"

Shi Yu searched for a picture of an ice dragon on the Internet. To be honest, the one he encountered in the ruins was different from this one.

The one they saw was more scaly, with only the part of the whiskers covered in hair. The Ice Dragon in the picture, on the other hand, had ice-blue hair all over its body, with the other half being the scales.

However, their temperaments were all the same. They were very impressive and domineering.

“Ji!!!”

Seeing Shi Yu take out his cell phone, the green worm looked at the picture curiously and shook its head.

It dreamed that what it had become was a green, wingless dragon that looked more like itself, not this one with wings.

“Green Dragon? No wonder.” Shi Yu more or less knew why the green worm dreamed that it had become a dragon.

It was most likely that he had seen the portrait of the Green Dragon before and had an impression of it.

The Green Dragon was a creature from ancient myths. Many places liked to use its statue and portrait to guard their houses. This was probably how the Green Silkworm saw it.

“Stop thinking about it. Look at this first.” Shi Yu pointed at the ice dragon in the picture.

“It’s this guy... or maybe his kind. It beat Eleven up in the ruins last time.”

“Look at it carefully a few times and try to dream it out. When the time comes, I’ll teach you the skill of manifesting a dream. You have a chance of defeating Eleven.”

“Ji?”

Really?

Green Silkworm: ✪ ω ✪

It looked at Eleven in training. Eleven was its spiritual leader. Defeating Eleven sounded like a great accomplishment!

Eleven, who was in training, vaguely felt that someone was defaming it.

It turned around and indeed saw Shi Yu and the green worm looking at it with ill intentions.

Eleven:???

What was wrong with it? Was it wrong to train hard?

Shi Yu smiled and placed his cell phone on the ground to let the Green Silkworm observe the ice dragon to its heart’s content.

Well... When he was free, he should go and print a picture. Otherwise, it would be too troublesome.

Indeed, Shi Yu planned to let the Green Silkworm play big at the start.

Using the dragon as a materialization target in a dream would definitely have a drastic effect at the start.

Perhaps the battle power of the thing that would be conjured afterwards would be like an awakened level-one Ice Lizard, but the skill of phantom illusions had to be slowly cultivated. They had to start somewhere.

“I can’t take it anymore.”

At the same time, Shi Yu’s eyelids grew heavier.

Shi Yu, who had added 48 Worm Silk consecutively as well as Absolute Sleep and ate five Divine Beans and some other supplements consecutively, felt that he really wanted to sleep. Even with the supplements, his condition had already reached its limit.

...

The next day.

Shi Yu was not woken up by the Green Silkworm or Eleven, but by a phone call.

“Hello, your parcel is here!”

“Wait a minute.”

When Shi Yu heard the voice, he got out of bed in a daze and walked out of the training villa in his cat slippers.

Initially, Shi Yu was still pretty confused when he woke up, but when he saw the familiar courier in front of him, he immediately woke up.

“Ah, this.”

The delivery man glanced at Shi Yu and then at the big villa behind. He suddenly understood something and revealed an envious expression.

A moment later, Shi Yu put away the two Space Crystal Fruits he had obtained and walked into the villa.

Shi Yu looked out the window and saw that Eleven seemed to still be training.

Its training method was very simple. Multiplication, Thunder Palm, Hardening, and super vision were activated at the same time to train its coordination ability.

This was taught by Shi Yu. After all, there was no meaning in practicing a single skill. It was better to go for the combination skill directly.

This method could train four skills at the same time and also train the most important coordination ability of the combination skill in the future. It was killing two birds with one stone.

“After I’m done with the evolution of the bugs, I’ll help Eleven perfect the profundity of the ‘Thunder Armor’.”

“I wonder how long the ‘electromagnetic cannonball’ will take.”

The former was a combination of Perfect Level Hardening and Thunder Palm, while the latter, Shi Yu estimated that it would at least need a transcendent level Hardening and Thunder Palm...

After greeting Eleven downstairs, Shi Yu quickly found the Green Silkworm.

At this moment, the green worm was sleeping in a potted plant in the training ground.

“Wake up.” Shi Yu used telepathy to call out to it.

Entry-level Absolute Sleep. It was not easy to sense the outside world when sleeping.

However, Shi Yu had telepathy, so he would definitely wake it up easily. It was better than any alarm clock.

“Ji...” The green worm opened its eyes in a daze and saw Shi Yu.

In the next second, it started chirping.

It was a Green Silkworm, a genius!

“Uh, you’re saying that your Dream Manipulation is pretty good? You can already roughly outline the image of the Ice Dragon?”

Upon hearing the green worm’s words, Shi Yu was clearly stunned. This talent was not bad.

Although this ability could even be trained by ordinary people, the Green silkworm was still a worm after all. To be able to approach the requirement of lucid dream overnight, it definitely had corresponding talent!

However, this was only the beginning. In this kind of dream, the image of the ice dragon that the green worm dreamed of would definitely be very vague.

The quality of the materialized illusion was also related to the authenticity of the illusion. If the Green Silkworm wanted to perfectly materialize the Ice Dragon, it had to at least dream every hair of the Ice Dragon clearly.

It was equivalent to requiring you to dream of a cat and clearly count the fur of the cat in the dream. Only then would it be considered a success.

This was undoubtedly very harsh, especially for pets without the dreamland talent. But in order to complete virtual illusions, this step had to be trained.

Let’s see if we can replicate related skills in the future...

“Eat something first.” Shi Yu took out a transparent glass-like Space Crystal Fruit and handed it to the Green Silkworm.

“Ji...”

Although the green worm didn’t know what it was and didn’t smell any fragrance, since it was given by Shi Yu, it must be something good.

“Ji.”

The green worm let out a cry and crawled to the side. It popped its head out and took a small bite.

Gulp.

After swallowing the fruit, the Green Silkworm didn't feel any taste nor did its body feel anything.

"Finish it first," Shi Yu said.

Just like that, the green worm started to work hard to eat the Space Crystal Fruit in front of it.

The academic big boss, who had researched the Ice Phoenix Moth and cultivated the Green Silkworm until it had a transcendent skill, had published an open paper on insect silk.

Although the Green Silkworm's transcendent worm silk could change its attributes through food, the change in this nature didn't last long.

If it wanted to maintain a certain nature, he had to eat the same food every day.

If food was changed one day, the old nature of the worm silk might be covered by a new nature.

From this, it could be seen that the Green Silkworm's transcendent-level worm silk had perfectly inherited the unique characteristic of different evolutionary materials.

Unfortunately, this big boss didn't specifically announce the nature of all the attributes materials. He only gave two examples.

Previously, the Green Silkworm ate level-one Dragon Whisker Grass. This was a resource used to strengthen the sharpness and toughness of silk-type skills.

And now, as it finished eating a Spatial Crystal Fruit, although the green worm didn't sense any changes in the worm silk, soon, the skill index in front of Shi Yu changed.

Skill: Illusionary Phantom

Skill Level: Advanced

Status: Can be taught

Shi Yu: "!!!"

Sure enough!

The compatibility criteria of the skill index could be changed, two days after getting it!

"Ji..." At this moment, the green worm didn't even know what was going on as it looked at Shi Yu, who suddenly revealed a pleasantly surprised expression.

"I... Forget it, experiment with the nature of the current worm silk first."

"Ji!" The Green Silkworm immediately nodded, then condensed the worm silk into a white arrow and shot it towards the ground in the distance!

Whoosh!!!

In the eyes of the green worm, there was no difference from before.

In the end, with a bang, the arrow pierced into the ground and a crack appeared in the ground. The process was still ordinary.

That wasn't really accurate, however. The sharpness of the worm silk seemed to have increased again.

After all, the venue here was specially made for training. The previous worm silk couldn't reach this level of power.

"Ji..." The green worm was at a loss. It seemed to have become stronger, but it didn't feel that it was particularly powerful.

It looked at Shi Yu, who was looking at the cracks in the training ground in silence.

"You condensed the worm silk into an arrow and shot it?"

The green worm nodded. Yes, yes.

Shi Yu : "..."

He rubbed his eyes and wondered if there were some problems with his eyes.

"One more time."

A moment later, another crack appeared in the training ground.

"One string, put it on the ground."

Then, Shi Yu made the Green Silkworm spit out a worm silk on the ground.

Shi Yu squatted down and gently touched it with his hand. Finally, he confirmed it.

Apart from being sharper, the core property of the spatial worm silk might be invisibility.

In fact, undead, spiritual, and light classes could do this. These could deceive people's spatial perception in different ways.

As for this ability, Shi Yu was slightly silent. He just didn't know if the spatial deception method was easier to crack than the other attributes.

If it wasn't easy to crack, it would still be alright. But if it was easy to crack, it would be too lousy. After all, if he wanted to maintain this kind of worm silk, he couldn't stop buying the Space Crystal Fruit for 500,000 yuan each. As expected, it was far from the expectation that it could one day cut through space...

Sigh, after all, it was only a level-ten Green silkworm and a Space Crystal Fruit that contained weak spatial power... He shouldn't have too much hope.

"The key is not the worm silk, it's mainly this."

Shi Yu reached out his hand and prepared to teach the Green Silkworm the "Illusionary Phantom" skill.

The reason why he gave the worm silk a temporary spatial attribute was not to strengthen the worm silk, but to increase the compatibility between the Green Silkworm and the spatial system.

“Teach.”

Before the green worm could react, Shi Yu pressed his finger on its head.

The green worm lowered its head slightly.

At the same time, a large amount of white light gathered in its body and changed its physique.

In a short instant, countless experience and knowledge about illusions appeared in the green worm’s mind, giving it a splitting headache.

“Ji—”

A moment later, the green worm received and understood this super complicated skill with a shocked expression.

It looked at Shi Yu, who was stuffing divine beans in one hand and drinking the unknown liquid in the other. Just as it was at a loss, Shi Yu’s voice entered its heart.

[Absolute Sleep, dream quickly, manifest the Ice Dragon illusion.]

[From today onwards, you are no longer a green worm, but a worm of imagination.]

The Worm of Imagination that could summon dragons just by daydreaming!

“Ji!!” Receiving the Beast Tamer’s order. The Green Silkworm’s blood boiled, and it fell asleep confidently. After all, it had practiced all night yesterday.

It was very confident of success.

Then... Shi Yu stood there for about five minutes. Nothing happened. The Green Silkworm seemed to be sleeping soundly.

“...”

Dumb worm, if this was a battle, you would have died a hundred times. Who gave you five minutes to chant the skill?

Shi Yu was speechless, but when he recalled that it was essentially a green worm and not a dream beast, and that it had just learned its skill, he waited patiently.

Another five minutes passed.

Hu hu hu ~ ~

In front of Shi Yu, the space around the green worm’s body seemed to have distorted. The image of the green worm lying down and sleeping gradually disappeared and was replaced by an ice dragon... But it didn’t look like it at all. In fact, it was only about two meters wide. Something that looked like a blue lizard appeared in front of Shi Yu.

It spat out cold air and flapped its wings, its gaze revealing an extremely overbearing aura.

This was not a traditional illusion, but a corporeal illusion. This was a creature from the green worm’s dream. It had used the power of space to project itself onto itself and had successfully materialized!

Frost Lizard, go!

Shi Yu was speechless.

It seemed like it still had to train... Otherwise, it couldn't even replicate its appearance 100%, let alone its strength. It couldn't even scare people with its fake dragon might.

"Ji!"

"The Frost Dragon" roared.

At this moment, it felt invincible... Its strength had indeed grown much stronger than when it was the Green Silkworm!

"Well, you're invincible. Go. Eleven's over there. Challenge it." As Shi Yu finished speaking, the Frost Lizard suddenly looked at the Panda King Eleven in training and charged over!

"Huh?"

"Ji!!!"

### **Chapter 83: Ancient Capital University**

In the training ground, Eleven, who was originally training well, suddenly felt a cold hostility around him.

Eleven:!!!

Without needing to turn its head, it used its super vision to see the situation in the distance.

The sleeping Green silkworm turned into an ice lizard for no reason, and then it strangely charged at it.

Because it was a substantial illusion, it was no different from a physical body, so even proficient super vision couldn't tell anything wrong with it.

"Ji!"

Ice Lizard Roar! Let's decide the winner, leader!

"Huh?"

This was the green silkworm? Eleven was in confusion.

[Be gentle,] Shi Yu said quietly.

Eleven was confused. Then, the Ice Lizard, which was twice as tall as Eleven, rushed over and swept its huge tail at Eleven!

Although the Ice Dragon in the sixth level of the ruins only knew Deterrence, Ice Splitting Claw, and Cold Breath, it still had some skills.

If the Green Silkworm transformed into this false Ice Dragon, it would probably only know how to fight in close combat.

But even so, it made the green worm inflate.

Phantom Illusion was a high-level skill after all. Even at entry-level, the feeling when it was used was completely different from the worm silk.

After transforming into the Ice Dragon Phantom, the Green silkworm felt that its physical strength had indeed become much larger. This was a feeling that it did not have when it used the worm silk.

However,

Bang!

The expanded Green Silkworm felt its huge tail hit a huge iron lump. Then, its tail was grabbed by someone, and its whole body was lifted up. It was directly thrown more than ten meters away and hit the training ground wall.

Eleven sighed...

Green Silkworm:... @\_@||||

The huge impact made the materialization of the Green Silkworm disappear directly, and in its place, a worm stuck to the wall and slowly slid down...

“Ji...”

The Beast Tamer lied. It couldn't defeat it at all.

“Wuu—” Although Eleven didn't know what happened, it still encouraged the Green Silkworm.

Actually, it was not bad!

Not bad, not bad. You've become a little stronger. Perhaps you can fight the country bumpkins and create havoc in the wild boar forest alone. You're no longer that weak worm!

“It's all fluff and no content... Report the Green Silkworm for feeding kills...” Shi Yu said.

In fact, he didn't have many requirements for the Green Silkworm at the moment. He didn't require strength. It was already very good if it could replicate the appearance of the Ice Dragon 100%.

At that time, he would teach the Green Silkworm another deterrence skill, the appearance of a dragon, and the might of a dragon. Wouldn't that be enough! He could totally use it to scare people away.

At that time, he could also cosplay as an invincible Dragon Tamer.

“Ji...” The Green Silkworm slowly crawled up, feeling a huge blow to its heart.

In order to not let the green worm lose confidence, Shi Yu also knew how to play. He said, “Eleven, transform into your smallest form and practice with the green worm.”

The smallest form of Eleven was only about ten centimeters. At this moment, it was even smaller than a twenty centimeters green silkworm. At the same time, its strength would decrease greatly.

Facing the Green silkworm with the transcendent-level Invisibility Worm Silk, it was really worth exploring the outcome of the battle.

“Eh?”

Eleven didn't understand the meaning of this order.

“Howl ~!” However, Eleven naturally carried out the Beast Tamer's orders perfectly.

A moment later, it became more than ten centimeters tall and stood short on the huge training ground.

In the distance, after the Green Silkworm recovered its consciousness, it looked at Eleven, who was smaller than it, in a daze. Its small body was greatly puzzled.

Then, the two pets started the second battle...

To Shi Yu's surprise, the green silkworm actually had the upper hand in such a battle.

Eleven, who had proficient super vision and could see through illusions, couldn't see through the invisible worm silk at all.

Obviously, the spatial deceiving effect brought by the spatial silk of the transcendent level completely suppressed the expert level super vision.

At the same time, under the shrunken state, most of Eleven's strength was sealed. Even Perfect Level Hardening couldn't completely defend against the transcendent level spatial silk.

Although it could defend against most of the power, Eleven's body would still be injured after being sliced. It needed to heal at a high speed to barely resist.

“Ji!!!”

As it looked at the pocket leader carefully dodging under its pursuit, the Green Silkworm felt that its worm life had reached its peak.

“Wuu!!!”

At the same time, Eleven's desire to live was stimulated. He planned to defeat the worm in front of him in his smallest form.

“This seems to be... very effective?”

Looking at the two evenly matched little guys, Shi Yu fell into deep thought. Forget it, forget it. I'm so tired. I'll sleep again.

He had just taught an illusion skill, and now he wanted to rest again.

“You guys continue, I'm going back to sleep.”

“There's enough food and recovery items on the training ground. Eleven, if the Green Silkworm is injured, help treat it.”

“Wuu!” “Ji!”

After giving the instructions, Shi Yu turned around and went back to rest. As for the baby bear and the little worm, they seemed to have opened the door to a new world.

Eleven, in particular, felt invincible and lonely normally. But now, it couldn't even suppress a worm in its shrunken state. This made Eleven find a new way to train himself.

Use the shrinking to restrict its own power and fight the enemy! Experience the joy of battle! Give yourself pressure!

If the enemy was strong enough, perhaps then would it earn the right to fight it at full power!

It hoped that the ice dragon transformed by the silkworm would be as strong as the ice dragon in the ruins... Only then would it be interesting.

At the same time, Buggy's confidence returned. It planned to defeat the leader bit by bit, starting from the pocket version!

...

"Ah, sleep."

Shi Yu pulled open the curtains and lay on the bed. Through the glass, he could see the situation of the training ground below.

Seeing that Eleven and Buggy were very hardworking, he felt that he had taught them well.

Just as Shi Yu was about to fall asleep, his cell phone rang again...

[Caller: Lu Qingyi]

Shi Yu was slightly stunned and chose to answer.

Then, he waited quietly for the other party to speak.

"I was outside previously."

"Oh, oh."

Shi Yu felt that communicating with this fellow required reading and understanding.

Previously, Shi Yu had reported the good news of clearing the ruins to Lu Qingyi and asked about plant-type pets.

However, Lu Qingyi only replied simply and perfunctorily before disappearing.

So what she meant was that because she was outside, the reply was relatively simple?

Shi Yu expressed his understanding. After all, in his previous life, when he went to explore the deep mountains and forests, even if there was still a signal, it often delayed him from replying to others.

"First of all, congratulations on cracking that small ruin."

"It's faster than I imagined. I heard that the difficulty of that trial ruin isn't low. Looks like your listening talent has helped a lot, right?"

Lu Qingyi was gratified. Shi Yu's talent was indeed not bad.

This was a trial-type ruin. Even if Shi Yu had 10,000,000 starting funds, she didn't think Shi Yu could clear it quickly. After all, the iron-eating beast back then was still very weak.

Therefore, Lu Qingyi judged that Shi Yu most likely relied on his special talent to find clues to obtain the right to control the ruins.

Shi Yu : "..."

Shi Yu was a little embarrassed.

He only observed the first stage seriously for a while. Then, he relied on increasing points to reach the end...

"Well... I still have much to learn," Shi Yu said humbly.

"How were the gains?" Lu Qingyi pointed to the gains in the ruins.

Shi Yu said, "The pets grow very quickly because of some special resources in the ruins. Now, their strength is very strong."

"For example, the Iron-eating Beast. Not only is it about to reach level ten, but it has also learned new, rare skills."

He secretly shifted the cause for Eleven and the Green Silkworm's strength back to the ruins.

It was reasonable for pets to receive huge opportunities after successfully cracking the ruins.

Although it was true that Buggy had some resources because of this ruin.

"Well... From the looks of it, your chances of passing this year's vocation assessment are even higher. I'm actually calling you to talk about what happens after this."

"I want to invite you to study at the Archaeology Department of Ancient Capital University after the vocation assessment. This is also the school I studied in previously."

"What do you think? Are you interested?"

Although Shi Yu had the talent to listen to the Voice of History, this talent was too random. As a member of Bureau 11, it was better for Shi Yu to have some basic and even advanced archeological knowledge.

This was also more beneficial for Shi Yu to investigate the history of Icefield City. At the same time, it would also help Shi Yu become her assistant in the future!

"School???" Shi Yu was stunned before looking conflicted.

Good lord, this girl was going to be his senior? Another senior?

"You hate school?"

"That's not..." It was just that going to college twice felt a little strange, although the universities in this world were probably different from his previous life.

That was a top-level institute for Beast Tamers above the professional level to further their studies. The college entrance examination was a vocation assessment.

“The enrollment day of Ancient Capital University is after the vocation assessment, right? There are still four months left,” Shi Yu asked.

“Yes, but at the moment, the Beast Tamers of the various faculties in the ordinary high schools have basically graduated.”

“Therefore, the entire month of September is the opening day of Ancient Capital University. If you’re interested, you can take a look in advance and come into contact with the Beast Tamers in big cities. Otherwise, if you’re not prepared at all, I’m really worried that you won’t be able to pass the vocation assessment in Ancient Capital City...”

“Go and take a look. When the time comes, you can decide whether to participate in the vocation assessment in a first-level city or stay in Icefield City to participate in the vocation assessment.”

After all, the Beast Tamer domains in Ping Cheng and even Icefield City were too backward.

Although with Shi Yu’s talent, he could directly transfer classes and enter university through connections, Lu Qingyi still hoped that Shi Yu’s strength wasn’t too poor. It would be best if he could enter Ancient Capital University through the normal process. It was because of this that she recommended Shi Yu to go to a first-level city for the vocation assessment.

“Alright... September, right? I’ll take a look when I’m free.”

In other words, there were still two to three days?

“Well, as for the plant-type pet you mentioned before... I’m looking forward to it.”

Beside Lu Qingyi was a Pet Encyclopedia..

“It’s not that urgent...” Shi Yu said. “We can talk about it after the vocation assessment.”

The greatest and most convenient use of the ruins space was still spatial equipment. With this, Shi Yu could bring many things with him. For example, before contracting the Green silkworm, he could store the Green silkworm here.

When he went to the wild and encountered danger, he could also hide in the ruins. If he didn’t encounter enemies who were proficient in space, he would be invincible. At the same time, staying here was safer than outside.

In addition, he could also carry the food worth a few months with him. He didn’t need to pack big or small bags wherever he went. On the contrary, farming only added an additional value to the ruins. It was indeed not a very urgent project.

“Alright.”

“Then I won’t disturb you anymore.” Lu Qingyi hung up and completed her notification.

At the same time, Shi Yu put down the phone and lay on the bed looking at the ceiling.

Ancient Capital... One of the nine major first-level cities of Dong Huang, which was also the nearest first-level city to Icefield City. It had legendary Beast Tamers and mythical level creatures presiding inside. It was a super metropolis, and there were many ancient ruins. It was a holy land for archeology...

Ruins? Archeological Holy Land?

Forget it, it was fine to go take a look in a few days. He had never left Icefield City, so he would just treat it as a trip.

### **Chapter 84: Buggy Standing Up**

After hanging up, Shi Yu slept until four-thirty in the afternoon.

He realized that after eating more snacks and tonics, his daily routine had become a little messy.

A rumble.

Shi Yu touched his stomach with empty eyes.

“So hungry...”

He had had dinner yesterday, but he didn’t eat breakfast or lunch today.

Boom! Boom! Boom!

Shi Yu, who was hungry, knocked on the window and shouted at Eleven and the Green Silkworm who were still fighting below, “Stop!”

Eleven and the Green Silkworm looked up.

Ah, Shi Yu was finally awake.

“We’re going on a long trip next month.”

“The two of you, go to the warehouse and distribute the food you need in advance. A week... No, half a month’s worth.”

“Wuu!!”

“Ji!”

When the two pets heard about travel, they were stunned and quickly nodded.

They didn’t know what travel was or what moving was, but they knew what preparing food meant. That was enough.

Shi Yu took out the ruins bead. He had already cleaned it up a while ago and had completed his initial research.

The space inside was very large, but apart from a pile of Ethereal Spirit Stones and a pile of ice-element energy crystals, it was completely deserted.

Since they were going on a long trip, all their luggage would definitely be placed here.

In fact, after arriving at the ancient capital, he didn’t even need to find a hotel. He just needed to find an empty place and enter the ruins bead.

However, in this case... he definitely had to build a house inside. Shi Yu chose to buy a portable tent or something before he left.

Apart from that, the other places would be barren for the time being. When the time came, he wouldn't take Eleven back into the Beast Taming Space either. He would directly let it and the Green Silkworm train in the ruins bead.

Although it had been abandoned for too long, it was still the Beast Taming Space of a legendary Beast Tamer no matter what. There were many benefits to training pets inside.

"Let's make something for ourselves to eat first." Shi Yu turned around and successfully got out of bed before entering the kitchen.

Soon after, he left the kitchen and opened the fridge.

After a few seconds of silence, he closed the fridge and muttered to himself,

"Maybe I'll go out and eat as a reward."

"That's not right. It doesn't matter if I eat or not. The main thing is to help the Green Silkworm print pictures of the Ice Dragon from various angles!"

"It's best to see if there are any toy shops selling Ice Dragon models..."

If he didn't remember wrongly, because of the legends in Icefield City, there were quite a lot of Ice Dragon toys here!

"Sigh, as expected of you, Shi Yu. You're going out when it's so late, all for your pet. It's been hard on you!" Shi Yu put on his mask to claim credit.

After deciding to go out to eat, Shi Yu ran to see Eleven and the others' work progress.

They were done already, quite efficient.

In the preservation warehouse of the villa, Eleven took out large bags of bamboo, iron heart wood, and energy crystals in bags. The Green Silkworm also prepared a bag of Dragon Whiskers Grass for itself.

Shi Yu was silent. Not bad. Both pets knew what kind of shameless eaters they were, but they had prepared a lot of food.

"Is there anything else you need?"

"Wuu!" Eleven shook its head.

"Ji!" The green worm shook its head.

"Then I'll pack this amount when we leave." Well, it would save me the trouble of buying food later.

"Then you guys can continue?" Shi Yu took out the ruins bead and said, "Continue the battle here. I'm going out to eat."

Eleven and the green worm were stunned.

At this moment, Shi Yu didn't know if the ruins bead in his hand looked like a broken pot held by a traveler or like a pokeball.

...

August 28, night.

Shi Yu walked out of the huge villa area and took a taxi to the prosperous business street.

The neon lights in the city were dazzling at night. Countless fluorescent bugs flew in the sky, making the night here beautiful.

< Name > Firefly

[Race Level]: Low-level transcendent

[Race Skill]: Glowing

[Introduction]: Transcendent creatures active at night. They like to use their abilities to light up the night for other creatures.

This was a relatively harmless creature, and it basically didn't have any natural enemies. The weaker ones were really similar to the effect of light bulbs. Only the stronger ones emitted strong light that could damage others. However, light shining was a no-level skill. Using the worm silk of the Green Silkworm as a reference, if he wanted to use it in battle, it had to at least be at the perfect level.

It was precisely because they were harmless that the fluorescent bugs could freely appear in different places in the city.

Such things appearing on commercial streets, squares, and parks were always more likable than mosquitoes and flying bugs.

Shi Yu extravagantly spent 288 yuan to eat a bowl of ramen made of spiritual plants. Then, he began to walk on this business street and search for the store he needed.

He first found a store that specialized in transcendent biological models and spent 1,500 yuan to buy an exquisite ice dragon model.

Then, he planned to find a random store that could print photos and print out the few pictures he had found... But at this moment, Shi Yu was attracted by a young man sitting by the street under a street lamp and countless fluorescent bugs.

A teenager in a school uniform who looked like a high school student was sitting by the roadside with a paintbrush. He was calmly painting in his world amidst the noisy crowd. On the drawing board in front of him was the scene of fluorescent bugs flying in the sky. Shi Yu passed by and took a look. It was really pretty.

The fluorescent bugs in the painting flickered. They were vivid and lifelike, just like living creatures.

Beside the student who was drawing, there was also a plant-type pet, Rainbow Light Mushroom, wearing a multicolored big mushroom hat. The young man seemed to treat the various colors of its big mushroom hat as dye, and he would dip it with a paintbrush at any time.

< Name > Rainbow Mushroom

[Race Level]: Low-level transcendent

[Race Skill]: Luminous, colorful spores

[Introduction]: A plant that can emit a lot of light. Spores of different colors have different effects. At the same time, there is a magical substance on its body that can be used as a top-notch fluorescent dye.

Faced with relatively common transcendent creatures, Shi Yu didn't even need to scan it with his cell phone to know its specific information.

Perhaps because Shi Yu had been standing there for too long, the student raised his head and glanced at Shi Yu.

Shi Yu pointed at the box beside him. On it were the words, "Price for painting, 100-1000 yuan for one."

"Can you help me draw a few paintings?"

"What do you want to draw?" the student asked in a young voice.

"Four pictures of Ice Dragons from different angles." Shi Yu originally planned to print them directly, but he changed his mind. This student's drawing skills were not bad, even better than those official artists in the workshops. This painting looked like it was real, or maybe it was the magic of the Rainbow Mushroom. In any case, it looked more real than the picture.

Why not just get someone to draw a few ice dragons for the Green Silkworm to observe? The paintings had special effects, so it wasn't too much to ask the Green Silkworm to materialize a dragon with some snowy effects.

"Ice Dragon? I can draw it, but it might take some time..."

"How long will it take?"

"Three days, three days is enough."

"Alright, do you have a cell phone?" Shi Yu asked.

The student shook his head.

Shi Yu : "..."

He was as poor as Shi Yu was before! From the looks of it, Chen Kai and the others were still pretty rich. Otherwise, they wouldn't have caused such a stir in Ping Cheng's supplements industry.

"Then I'll give you money first. I'll come back here in three days to take the painting," said Shi Yu.

"No, it's alright. I'll draw first," the student said. "After I'm done, you can decide the price."

"You want me to decide?" Shi Yu smiled. It looked like the other party was very confident in his paintings.

The little painter also smiled and nodded. Then, Shi Yu chatted for a while more and understood the other party's identity. The other party had learned painting-related specializations and seemed to have

good results. His dream was to become a big painter, so he contracted the Rainbow Light Mushroom as a pet, planning to use it to assist in his painting.

Not all Beast Tamers contracted their pets for battle. In this world, pets had long integrated into all walks of life.

Shi Yu decided to place the order. However, in the end, because the other party didn't have a cell phone, Shi Yu could only run to print out pictures for the other party to observe. At the same time, he forcefully handed the other party a 1,000 yuan deposit.

It was not easy for this little student to come out and rely on himself at such a young age. He was worth supporting. If he had not met rich lady Lu, he might be like him now. However, he earned money by selling paintings, and he earned money by selling silk...

After entrusting the four Ice Dragon paintings, Shi Yu felt tired.

"I'm tired again."

"I clearly slept for a day and didn't do anything. Why am I tired again?"

Shi Yu felt that it was ridiculous.

Alright, let's go home and stop wandering around.

...

After Shi Yu returned home, Eleven and the Green Silkworm in the ruins were still very energetic.

Shi Yu was envious.

With nutritious food and the support of the ruins, the rapid recovery of absolute sleep, even if the two of them were exhausted, they could quickly recover after a short nap. It was really enviable.

"If only the skill index could be used on myself."

"High-speed healing, absolute sleep, these have to be arranged."

Shi Yu knew that his Beast Taming Talent would increase as his Beast Tamer level increased. Even the abilities of certain special talents would undergo a qualitative change.

Shi Yu was very curious. Apart from increasing the page count, was there any possibility of changes in other aspects?

Logically speaking, since there was such a talent as "sharing" and "fusion", humans should still have some unknown potential...

However, there were also people who guessed that humans with this strange special talent might be born from mixed blood between humans and other transcendent creatures...

"When I take the vocation assessment, I should be able to see all kinds of Beast Taming Talent. I wonder if I can meet the beast-eared girls." Shi Yu still couldn't forget about it and was very curious about the unknown.

However, the most important thing now was to continue nurturing Eleven and the Green Silkworm.

< Name > Iron-eating Beast

[Level of Growth]: Level 9 Awakening

[Skill]: Hardening (Perfect), Thunder Palm (Expert), High Speed Healing (Expert), Super Sight (Expert), Deterrence (Expert), Absolute Sleep (Expert), Multiplication (Expert)

< Name > Green Silkworm

[Level of Growth]: Level 10 Awakening

[Skill]: Worm Silk (Transcendent), Absolute Sleep (Initiate), Illusory Phantom (Initiate)

On Eleven's side, the various skills were enough for now, and its proficiency was basically qualified. Therefore, Shi Yu planned to ignore it for the time being and let it train on its own. Then, it would use a large amount of food and training to increase its growth level.

As for the Green silkworm, considering that it was also very hardworking, Shi Yu planned to give it Absolute Sleep until it was proficient and increase its training efficiency.

At the same time, he also wanted to level up the illusion skill to expert level. This way, he felt that the Green Silkworm's battle power could be initialized.

It might be difficult to fight a tenth-level commander-type pet, but he felt like they could fight against opponents of the same level as transcendent races.

Apart from that, the foundation for its evolution was also done.

At that time, the Green silkworm after the cocoon transformation would basically be in a sleep state. The other Green silkworms would be in ordinary sleep at this time, but this silkworm would be using absolute sleep. The benefits it would obtain would definitely be more, because it could absorb more nutrition. Then, when the cocoon broke out, the Green silkworm with phantom illusion as a skill only needed to project the phantom image from the dreams onto itself, and the cocoon could break out however it wanted.

Whether it wanted to become a butterfly or a worm that leaped through the dragon gate or a phoenix that underwent nirvana, it was up to it.

Of course, for safety reasons, Shi Yu would definitely teach it a few more skills before it turned into a cocoon. For example, high-speed healing, deterrence, and multiplication could actually be taught as well.

Whether or not the transcendent-level worm silk could still be upgraded depended on when Shi Yu had the energy.

After deciding to go to the Ancient Capital in July, Shi Yu temporarily only set his small goal to upgrade Absolute Sleep and Phantom Illusion to expert level before setting off. He would leave the other plans for later.

"Buggy, this is for you."

In the ruins, Eleven and the Green Silkworm suddenly discovered Shi Yu, who had entered.

Shi Yu walked over slowly with an ice dragon model and a photo bag.

“Wuu!!!” Eleven took a closer look and was disinterested when it realized that it wasn’t a real Ice Dragon.

As for the green worm, its eyes lit up.

“Ji!!!”

So cool!!

It looked at the exquisite ice dragon model and recalled the thing in its dream. Compared to it, it immediately felt that what was created in its dream was quite dumb...

“Observe and imagine carefully. It’s accompanying you to sleep tonight.” Shi Yu chuckled. The reason why he let the bug use the Ice Dragon as the first transformation template was mainly because he had quite a number of ice-element energy crystals and an unknown Ice Dragon’s Whisk. These things could be very good props to increase the quality of the phantom.

“And this.” Shi Yu also handed the printed photo to the Green Silkworm. He printed two copies, one for the little artist to use as a reference, and the other for Worm to see. This was cheap, and it was only a few yuan.

“And your own pictures.”

Apart from that, Shi Yu took out a stack of photos. This time, the images in the photos were Eleven in training and the sleeping Green Silkworm.

Shi Yu distributed the photo to Eleven and the Green Silkworm. The Green Silkworm was alright, seeing it as an ordinary surprise. As for Eleven, it looked at its photo and was quickly stunned.

“Huh?”

“I took this secretly during your training. It’s a memento.” Shi Yu chuckled.

“Wu!!!” Eleven looked at the photo and was touched. It even acknowledged itself.

It turned out that the scene of his hard work in training could still be recorded?

He had to treasure it!

Eleven wanted to store the photo, but unfortunately, it didn’t have a pocket. It could only squeeze it between its furry arm and body.

At this moment, Eleven suddenly looked at Shi Yu.

Since the scenes during hard training could be recorded...

What about the heroic bearing scenes during battles?!

The panda widened its eager eyes and looked at Shi Yu seriously.

“Wuu!!!”

Could he film it? At that time, it would definitely be very handsome and cool.

Victory moments should be recorded more than training moments.

One represented the process, while the other represented the outcome. Eleven felt that this photo was really good. With this record, it felt like the gains from hard work had doubled.

Eleven always felt that there was something lacking after every training and battle. Now, he had finally found it. It lacked a record player!

Shi Yu :” ...”

F\*ck, I was just casually recording my life. You want me to film a battle too?

Other Beast Tamers command with all their might, and even have their talent increase... Why would he start taking photos with his cell phone? He'd get beaten to death!

Shi Yu shuddered. Under his influence, this panda seemed to be starting to have a narcissistic tendency...

“I don't know. I'm not sure. I don't understand. I'm going to bed.”

Shi Yu decisively brushed it off and ran to sleep, leaving the confused little bear behind.

...

August 29.

With the good principle of having one high-level skill a day and being healthy, Shi Yu planned to spend six days to upgrade the two high-level skills of the Green Silkworm to expert level.

For the remaining time, he had to take some time to meditate and study.

With a large number of Ethereal Stones, leveling the Beast Taming Space within four months shouldn't be a problem. Now, Shi Yu should be anxious about the written test in the vocation assessment!

The vocation assessment was divided into four parts: the basic test, written test, survival in the wild, and the ranking battle.

The basic test was to test if the Beast Tamer's level did not meet the standard or the pet's level did not meet the standard. It was easier to test with a machine, so it was placed in the first test.

Next was the written test that all the candidates detested. A professional Beast Tamer was definitely not a reckless person who only knew how to fight. It required very high professionalism. Although the appearance, skills, and race of thousands of common pets could not be said to be bad, they had to at least answer 95% of them to qualify.

In addition, there were also comprehensive questions about the habits, weaknesses, and battles of common pets. Often, a bunch of people could be eliminated in this round.

In order to not fail this assessment, Shi Yu seemed to have returned to his high school life.

Fortunately, he felt that this thing was much better than memorizing English words. Most importantly, he was interested. In addition, his mental strength and memory were much stronger than in his previous life.

In this state, the learning efficiency would definitely be high, provided that he added fewer points. Otherwise, the learning efficiency would quickly decrease...

“Control... control...”

As he shouted for control, Shi Yu made the Green Silkworm’s Absolute Sleep go to the proficient level.

With the increase in the level of Absolute Sleep, the Green Silkworm’s spiritual power and sleeping state also increased. In addition, after staring at the Ice Dragon photo and model for a long time, the Ice Dragon that it had manifested looked a little like yesterday.

August 30th.

Shi Yu started to level up the phantom illusion skill.

The entry-level phantom image identification could simply materialize the phantom from its dream.

On the other hand, apart from the increase in the quality of the materialized illusions, the proficient level phantom image could already conjure more complicated illusions. For example, like the fourth and fifth levels of the ruins, the illusions of dozens of creatures could be summoned.

However, the amount of materialization did not mean much to the green worm. After all, Shi Yu planned to let it take the elite route. What was materialized required the quality of strength.

In terms of the Green Silkworm, it was still developing steadily. What really changed the quality of the Green Silkworm was the expert level phantom image.

Shi Yu had investigated the phantom illusion skill. There were very few creatures who had mastered this racial skill, and their origins were very impressive.

The ones closest to people were the Nine-Tailed Illusion Fox of the monarch race. The others were like the overlord race’s Dream Shells and the Lord of Nightmares. Ordinary people couldn’t come into contact with them at all.

Shi Yu estimated that the shell in the ruins was the Dream Shell. It was a super rare creature that had appeared in the records of various countries less than ten times.

Because there were very few creatures who had mastered this skill, the relevant information was also very difficult to find. Shi Yu had even found it in a paid paper, so the subscription fee was a large sum.

At the proficiency level, the pet could rely on external forces, such as props, to perfect the quality of the phantom. At that time, if it transformed into an ice dragon again, those ice-element energy crystals might be useful. Even more extreme was to use the dragon whiskers.

At the same time, on this day, the victory of Little Eleven and the Green Silkworm’s competition completely leaned towards the Green Silkworm...

Phantom illusion, in simple words, was an ability to strengthen the power in reality through mental and spatial abilities.

As long as one's mental strength and spatial attainments were strong enough, there was hope of rewriting reality.

After reaching the proficient level of Absolute Sleep and proficient level of Illusion, Shi Yu developed a dream mode for the green worm.

This was the combination skill of Absolute Sleep and Illusory Phantom. First, enter a sleeping state. Then, dream about yourself and project your phantom onto yourself to trap the baby.

In this way, the worm was equivalent to wearing a layer of the Green Silkworm Phantom Illusion. Because it was affected by spiritual and spatial power, in this dream mode, the power of the Green Silkworm's transparent worm silk and the strength of its body would be greatly improved.

At the same time, because it had been in an absolute sleep state, its physical recovery speed could be said to be very fast in this state.

In the ruins bead, Buggy showed its might and chased after Eleven.

"Ji!!!"

Buggy finally stood up. There was no pressure to suppress Eleven!

"Wuu!!!" Eleven's lungs exploded in anger. It didn't understand why he couldn't even defeat a worm.

Facing the Worm of Imagination in dream mode, pocket eleven could be said to be in indescribable pain and felt immense pressure.

Therefore, it could only become a bit bigger and instantly kill the Green Silkworm.

Green Silkworm: Ji... QAQ???

Eleven: Sob, in order to punish itself, the training volume today would be doubled...

## **Chapter 85: Before Leaving**

After spending a few days adding points to the Green Silkworm, Shi Yu felt that the effect was pretty good.

Although it might not be able to defeat the Lunar Flame Beast, which was used by newbies in various districts and counties in Icefield City, it should be difficult to defeat Chen Kai casually.

This was already a very good result for the green worm, which could only rise after evolution, with a weak body.

It was night September 1st. It was still the same old place on the commercial street. Shi Yu had obtained the four Ice Dragon Paintings he had requested.

"...If there's anything you're not satisfied with, you can still modify it."

The students were acting really humble.

Shi Yu looked at the painting. Although he had a few ideas of changing it, he decided to forget it after thinking about it.

He was afraid that he would still be unsatisfied and want the original version back.

“No, that’s it.” Shi Yu looked at the painting carefully. The Ice Dragon’s expression, dragon might, and even the supreme ice power that was enough to cause a violent snowstorm were completely lifelike under the miraculous power of the Rainbow Mushroom Dye. The Ice Dragon seemed to have really come alive in the painting.

This had already exceeded Shi Yu’s expectations.

If these paintings were in his previous life, it was simply a pipe dream to buy them for a few thousand yuan. However, here, the price was indeed very cost-effective, and it was very difficult to imagine that it came from a student.

In short, with such a vivid painting as a reference, and then upgrading the Green Silkworm’s Absolute Sleep and Phantom Illusion to expert level, it should be very easy to materialize an ice dragon...

“We can work together again in the future. What’s your name again...”

“My name is Ma Liang.”

Next, Shi Yu paid the remaining amount and left directly. He could not wait to add more points.

...

< Name > Green Silkworm

[Skill]: Worm Silk (Transcendent), Absolute Sleep (Proficient), Illusion (Proficient+1)

Today’s additional upgrading had yet to begin. In order to study and meditate normally during the day, he decided to do it later in the evening.

“Ji...”

In the ruins bead, the green worm that had been beaten up by Eleven until it suspected its life. Suddenly, it was summoned by Shi Yu.

It felt that its leader didn’t keep his word.

It clearly said that it would train its strength in a shrunken state, but why did it “accidentally” become a big version every time?

Could this world be any friendlier?

“Here, this is for you.”

After releasing the Green Silkworm, Shi Yu took out four very realistic ice dragon portraits. All kinds of special effects seemed to be able to release the cold air in the paintings, immediately attracting the Green Silkworm’s gaze.

Green Silkworm: Ji! ㊗️! So cool!

It looked at the portrait carefully, hoping to imprint this image deeply in its mind.

“Hehe.” Shi Yu smiled. Duh, he bought this for thousands of yuan. It was even more expensive than that model!

Speaking of which, why weren’t there any models with special effects made with special materials? Otherwise, it would be completely feasible to buy one back.

Following that, Shi Yu did not delay any longer and directly completed the additional points for the day.

[Skill]: False Phantom (Expert)

After Shi Yu’s operation was completed, the green worm absorbed and digested it for a long time before reacting. Then, endless battle intent shot out of its eyes.

In the ruins bead.

The pinnacle battle between the Iron-Eating Beast and the Green Silkworm was about to begin.

This time, the Green Silkworm changed its previous attitude and did not go into battle lightly. It specially brought along a tool with Shi Yu’s support.

Level-one ice-element energy crystal!

The green worm was at the side of the arena, hugging the cold energy crystal and sleeping peacefully.

Opposite it, Eleven had already started to do warm-up training. It had to do it. The Green Silkworm needed a few minutes to prepare. Its transformation was too slow. If it just waited around, it would be a waste of time.

After an unknown period of time, the green worm seemed to have completed the construction of illusions in its dream.

Hu hu hu ~ ~

The illusory light enveloped itself and its ice crystal pillow.

Right on the heels of that, cold wind rose from all directions, and the power was especially strong.

At this moment, Shi Yu, who was studying with a textbook in the distance, looked up with a slightly happy expression. Eh, felt pretty good this time.

“Roar!!!”

In the snowstorm, the roar of a dragon could be heard. After Shi Yu used his cell phone to constantly play the “Dragon Roar”, the green worm seemed to finally understand that the dragon was not a creature that chirped. It had improved.

“Roar!!”

With another roar, Shi Yu and Eleven saw the full appearance of the creature projected by the green worm under the snow.

It was about two meters tall and in an ice-blue color. It looked like the combination of a dinosaur and a Western Dragon standing with its strong feet. Its entire body was covered in blue hair that looked like ice spikes. Its domineering aura wasn't inferior to the ice dragon conjured by the shell.

Moreover, this time, the Green Silkworm did especially well in its expression. The bright blue color of the Ice Dragon's eyes and the pitch-black membrane were perfectly restored by it. Although there were still some flaws when looked at carefully, the Ice Dragon this time was already showing the appearance of a dragon.

Of course, in terms of size, it was definitely still a little small. Apart from that, Shi Yu didn't know how powerful this ice dragon could be.

"Wu wu wu!!!"

At this moment, seeing that the green worm's transformation was so successful for the first time, Eleven wasn't sleepy anymore. It started rubbing his palms together and preparing for a big battle.

"Wuu!!" Eleven rushed forward, scaring the Ice Dragon so much that it turned and flew away.

Green Silkworm wasn't pleased. "You haven't become smaller, are you a sore loser!!!"

The Green Silkworm quickly withdrew from the Ice Dragon form and didn't fight Eleven.

Eleven:???

The two pets stared at each other and were stunned on the spot.

"Huh?" Eleven asked.

"Ji!" The green worm indicated that it could fight, but Eleven had to shrink first.

Shi Yu : "..."

Well, neither pet was willing to have a disadvantage.

"Don't worry, Green Silkworm, perfect your skills a little more. You guys can practice later." Shi Yu smiled and got up. "I'll find you a few videos of Ice Splitting Claw and Cold Breath."

"With the ice-element energy crystal as the energy source, this low and intermediate skill should be easy to simulate. Although the proficiency won't be high, it's enough for initial battles."

It was impossible for a conjured phantom to have skills with high proficiency unless the Green Silkworm itself mastered similar skills.

For example, if Shi Yu's teaching gave it deterrence and leveled to a very high level, then the Green Silkworm could simulate high-quality dragon might.

However, it was a little difficult for it to use high proficient level Ice Rending Claw and Cold Breath.

The prerequisite skill was also an aspect that determined the quality of the phantom. The pet that used the phantom image must have mastered many skills that were compatible with the transformation and summoning target, deciding the quality of the phantom. This was also the reason why the Green Silkworm's projection of the Green Silkworm could display a lot of battle power.

“Wuu!” Eleven called out in boredom. What a bummer. To think it had warmed up for so long...

...

On September 2, Shi Yu began to book a two-day flight to Ancient Capital on September 4.

At that time, it would also be time to upgrade the Green Silkworm’s absolute sleep to expert level. It could be said that he had achieved his small goal before setting off for the ancient capital.

Shi Yu did not know how long he would spend on this trip. However, when he was outside, he did not plan to increase any skill points. Instead, he planned to leave his free time to meditate and increase the level of his Beast Taming Space.

“I’ve booked a ticket for September 4th. I should be able to reach the Ancient Capital Airport on the same day.”

Because Lu Qingyi had said that Shi Yu should tell her when he went to the Ancient Capital, Shi Yu sent his itinerary over.

Soon, Lu Qingyi returned with a mysterious number for Shi Yu.

“87237387, when you’re preparing to visit the Ancient Capital University, you can call this number. I’ve gotten someone from the school to show you around. Of course, if you want to wander around on your own...”

“Alright.”

As soon as Shi Yu saved the phone number, he began to look forward to the day after tomorrow.

According to what he knew, the planes in this world were all mechanical lives.

They were all piloted by their Beast Tamers.

It was precisely because of this that the ticket price was very expensive.

However, even if the plane tickets were expensive, ordinary people didn’t have a choice.

Apart from this method, there weren’t many other ways for ordinary people to head to another big city from a big city. After all, most of the wilderness areas were still occupied by wild extraordinary creatures. It was difficult to move forward without the escort of powerful Beast Tamers.

In fact, the situation in the country was relatively good. Even if there were transcendent creatures in the wild areas between cities, they were low-level and weak creatures. Things were completely under the country’s control.

For example, the wild areas between countries were the truly dangerous places that were difficult to cross. Probably only legendary Beast Tamers were confident of steadily moving from one country to another. Even master Beast Tamers couldn’t easily cross countries alone.

Because of this, there was very little interaction between the seven countries on Blue Planet at the moment. Apart from some important trade activities, such as introducing the special pets of the two countries or hosting some world-class competitions, they basically did their own thing.

“The seven countries...” Regarding the other six countries, Shi Yu only knew that the other countries seemed to be different from Dong Huang. They didn’t have the same Mythical system. In ancient times, they had different Mythical creatures as their beliefs. There were also differences in whether they were transcendent creatures. Creatures like Slimes and sprites were rare in Dong Huang. Even dragons like ice dragons weren’t local. They had all migrated from afar. However, like Dong Huang, there were gaps in the history of various countries. The gods were in a collective state of disappearing...

“There must be a big secret!”

There was a light in Shi Yu’s eyes, but it quickly dimmed.

“Sigh, Shiyu, Shiyu, be honest. Don’t talk about your country. You don’t even know the history of this city. Why are you thinking about the myths of other countries...” Shi Yu patted his face and tried to return to reality.

## **Chapter 86: Beast Tamers in Big Cities**

Time was something that depended on fate.

Sometimes, it felt that it was especially fast, and sometimes, it felt that it was especially slow.

For example, during the enriching process of adding points, Shi Yu felt that time was especially fast.

After adding some points, reading books, and sleeping, Shi Yu felt that he had yet to do anything. In the blink of an eye, it was already the fourth of September.

Shi Yu got up before dawn. After all, he had to catch the morning flight. Ping Cheng was quite far from the Icefield City airport. He could only sacrifice some sleep time.

“Ha...” In the villa, Shi Yu, who was yawning, started to pack his luggage, his eyes sleepy.

When he was done packing, the express car he had reserved was already waiting for him by the side of the road. After getting into the car, Shi Yu narrowed his eyes and took a short rest.

“Handsome, handsome, we’re here.”

He didn’t know how long had passed. Shi Yu was originally using meditation to offset his sleepiness, but when he heard the driver call out to him, he was no longer sleepy.

Seeing the honest look on the driver’s face, he understood that the other party was most likely speaking from his heart.

“We’re here? Thank you, Master.”

Shi Yu smiled and paid the fare. Then, he got out of the car with his luggage and waved goodbye to the driver.

Although it was called luggage, it was actually a small backpack. It contained some identification documents and a bottle of water. As for more things, it was thrown into the ruins bead...

Shi Yu glanced at the time. It was half past eight in the morning. He felt that he could still eat something?

He looked around and realized that there was already a crowd at the airport. As for what he could eat, Shi Yu only saw egg pancakes, meat wraps, grilled sausage, and boiled corn... As it was still early, Shi Yu bought a cup of soy milk and a meat wrap to deal with it.

[You guys settle it yourselves,] Shi Yu said to Eleven and the Green Silkworm in the ruins bead hanging around his neck.

Then, he began to rush to the airport. Now, before Shi Yu boarded the plane, he had a question. If the plane was a mechanical life, whose responsibility was it for the passengers to go to the bathroom? Even if it was a removable internal environment, any clean freak Mechanic might not be able to be a pilot...

...

Half an hour later, Shi Yu completed a series of registration procedures and successfully passed the security check. Initially, he was worried that the ruin bead might be some kind of prohibited item, but it seemed like he didn't detect anything.

Poor reviews for this airline's safety!

What if someone stuffed a bomb into their invisible storage equipment and brought it onto the plane?

Uh... It didn't seem to be that troublesome. After all, Beast Tamers were mobile bombs.

"The flight to the Ancient Capital Airport is about to take off..." In the waiting area, Shi Yu heard a broadcast. He had already begun to take out his cell phone and the scanning function.

< Name > M-50 Thunder

[Attributes]: Machinery

[Race Level]: Mid-level commander

[Level of Growth]:???

[Race Skill]:???

[Introduction]: Artificial mechanical life, used for battle, transport, and reconnaissance.

Looking at the information on the plane, there were too many slots. Shi Yu didn't know where to start. However, thinking about it, he shouldn't have encountered any bird collisions on such a plane, right? Even if it was a transcendent bird, it might be shot down before it could even get close to the plane.

"This index doesn't record the detailed information on the plane's skills... But that's normal. If there were too many public details, what if there's a hijacking?" Shi Yu's mind filled with thoughts. He couldn't let something happen to the plane.

"Sigh, let's prepare to set off." Shi Yu got up from the seat and looked outside the glass window. He touched the ruins bead on his neck and took a deep breath.

Icefield City, Icefield Airport.

Soon, this mechanical life plane called M-50 Thunderbolt slowly took off. After boarding, Shi Yu still did not discover any difference between it and an ordinary plane. Perhaps after encountering danger, it would be able to show its true extraordinary qualities as a mechanical life form.

Although Shi Yu really wanted to personally experience how the Mechanic pilot and this plane reacted to the harsh weather and the flying beast's cockpit, he couldn't cause this plane to get into trouble. He wasn't some elementary schooler who caused trouble wherever he went.

A beautiful white plane streaked across the blue sky, splitting the sky in two. Even when Shi Yu heard the notification that the flight was about to end, everything was still calm.

Shi Yu exited from his meditation and looked out the window. An unfamiliar city appeared in his eyes. Countless buildings quickly got closer.

...

At the Ancient Capital Airport.

After arriving at the destination, Shi Yu quickly left the dense crowd. He didn't like crowded environments.

After leaving quickly, Shi Yu took out his cell phone and started navigating the route to Ancient Capital University.

The total area of the various campuses and training sites of Ancient Capital University was comparable to the size of the entire Ping Cheng District. It was very large. To be precise, the area of the nine great academies of Dong Huang was very large.

Because of this, the opening days of these schools lasted about a month. Otherwise, with fewer days, those candidates who came from afar to prepare might not necessarily be able to walk around completely.

Shi Yu did not plan to finish walking around on the first day. Today, he was going to familiarize himself with the paths first.

"The battle specialization of Ancient Capital University isn't very good, nor is the Feeding specialization. Only the archeology specialization seems to be better?"

Shi Yu muttered in his heart as he navigated, recalling the gossip summary on the Internet.

However, this failure was also relative to other top-notch universities. It was very normal for every institute to have their own trump cards.

Moreover, even if it was an unpopular specialization, it was actually not weak. There were also many elites gathered internally. The students were basically professional Beast Tamers around 20 years old. The teachers were also at the start of the master level, their strength was indisputable.

"The nearest is the northern campus, the battle department's territory. Let's go take a look here first." After confirming the location, Shi Yu planned to slip over.

[Do you guys want to come out for a breather?] At the same time, Shi Yu asked Eleven and the Green Silkworm in the ruins bead.

“Wuu!” “Ji!”

However, the answer he got was no. Eleven was busy eating because it had just finished training and was very tired. The Green Silkworm, on the other hand, was staring at the portrait of Ice Dragon intently to deepen its impression.

“Alright.” Shi Yu shrugged helplessly. He could only go himself first.

Shi Yu did not know how long he had been gone for. In any case, he soon arrived at the north gate of Ancient Capital University.

Because it was coincidentally the opening day, the number of people gathered here was naturally a lot. The huge door that was more than 100 meters tall was lined up in a row. It was magnificent and elegant. Outside the door, the young Beast Tamers and their pets looked at the name “Ancient Capital University” above with anticipation, their hearts surging.

This group of Beast Tamers looked very much like parents who brought their children to visit universities. Of course, their children were pets.

“...” Shi Yu looked at the other Beast Tamers with their pets following them, while he was alone. He immediately felt uncomfortable.

In his previous life, when he went out to play with his friends, everyone else had a girlfriend following them, but he didn't. That was fine.

Now, it was no longer popular to show off his girlfriend. It was popular to summon his rare pet and show it off beside him.

Shi Yu also wanted to show off his panda, but unfortunately, this panda thought that strolling around was a waste of time and refused to come out no matter what. It told him to call it when there was a battle.

“Then let's find a fight!” Shi Yu estimated that with so many young Beast Tamers here, there must be places to battle in the university. He couldn't help but take a step forward.

It was unknown if it was a coincidence or something, but before he took two steps, a luxuriously-dressed young man suddenly shouted with a selfie stick,

“School battle! Is there anyone who wants to fight? I'm invincible, you guys can do whatever you want.”

His shout immediately attracted the attention of many people, making many people look at him in discussion.

Normal young people really didn't dare to shout like that, afraid that they were afraid it wouldn't look good.

However, when everyone saw him holding the broadcast device, they immediately understood why he was so brave.

“Heh, streamer?” Many people smiled, finding it a little interesting.

Shi Yu also found it interesting, but the other party’s next words made him turn and leave.

“Requirements, quasi vocational. Both pets should be transcendent. Fight two-on-one. Low levels, do not disturb.”

Good heavens, goodbye!

Shi Yu felt his stomach hurt. What kind of person was this? Was there anyone who really wanted to take this kind of standard?

However, not long after the other party spoke, a young man about Shi Yu’s age said with interest, “I’ll do it.”

Shi Yu :”...”

Quasi vocational meant that he was a Beast Tamer who had left the probation period but didn’t pass the vocation assessment.

Generally speaking, the young people visiting the school here weren’t professional Beast Tamers yet. After all, everyone was here for the enrollment next year.

However, if one wasn’t a professional Beast Tamer, there were usually two levels.

One was that the Beast Taming Space like Shi Yu was level one, and the pet was a newbie in the Awakening Stage.

The other was a quasi vocational that had reached the second level of the Beast Taming Space and whose pet had reached the transcendent level but had yet to participate in the assessment.

Obviously, among this batch of young Beast Tamers who planned to apply to Ancient Capital University, there was already a batch of geniuses whose Beast Taming Space had reached level two and had cultivated two transcendent pets.

“There are still four months. There’s no hurry, no hurry. When the time comes, Eleven and Buggy should be transcendent too.”

Shi Yu comforted himself.

“Friend, do you want to battle?” As expected, the Beast Tamers who came to the northern campus to stroll weren’t idlers. After one of them took the lead, another person came to invite Shi Yu to battle.

Shi Yu glanced at him and asked, “What level is your pet at?”

“Low-level transcendent,” the boy said very naturally.

Shi Yu said, “Alright, I should barely be able to...”

The boy asked, “What about you?”

“Level 9 Awakening?”

Guy: ( \_ )

He rolled his eyes and turned to leave. He felt that fighting Shi Yu was a waste of time, leaving behind a confused Shi Yu.

Hello! Hello! Hello! Who are you looking down on?!

So what if I'm at the awakening level? It's not like I can't fight with a level-nine Iron-eating Beast!

"Ah, this..." In short, Shi Yu was speechless as he watched the other party leave.

Then, Shi Yu analyzed it. The current Iron-eating Beast might be able to fight real transcendent-level creatures at a higher level.

Of course, the premise was that the other party's skill proficiency wasn't high, and his race level wasn't high. At the same time, the opponent shouldn't have a strengthening talent...

Eh, it seemed a little unsafe.

"Forget it, forget it. I won't fight anymore. I'll take a look." Shi Yu yawned. He decided to walk around and go back to sleep!

...

In the northern campus of Ancient Capital University, there were quite a lot of battlefield halls.

During the opening day, the school also supported the young Beast Tamers who came to visit to compete.

As for the judges, they were naturally the seniors who had stayed in the school to volunteer. As long as the school gave them some credits, there were still many people who were willing to stay and act as NPCs.

"F\*ck, so fierce."

As Shi Yu strolled around, he arrived at a battle hall. The scale of the battle hall was even larger than the one competing for the evolution holy spring that day. It was divided into several venues, and at this moment, it was extraordinarily lively.

He had just arrived at the edge of a field when he heard someone cry out from the side.

Shi Yu looked at the arena. Two Beast Tamers who might not be much older than him were fighting.

One of the pets on both sides was the Blackwater Crocodile Tortoise, and the other was the Ground Rock Lizard. The growth levels of both pets had reached the transcendent level, so the power of their moves was abnormally strong.

This was because after a pet entered the transcendent level from the awakening stage, its energy level would undergo a qualitative change.

If the energy of an Awakening Stage pet was like a weak air current, then the energy of an extraordinary pet was like a thin stream, with a higher quality.

The change in energy brought about by the pet skill was the increase in the power of the skill!!

A boom sounded.

In the arena, the wind and sand raised by the Lava Lizard formed the Sand Wall. Although it was a low-level skill, judging from the condensation speed and wall structure, its proficiency had already been trained to expert level.

“Roar!!!”

However, it was precisely such a wall of sand that was easily penetrated by the water cannon condensed in the Blackwater Crocodile’s mouth, successfully allowing the skill to hit the Rock Lizard.

Intermediate-level skill, Water Cannon!

From the looks of it, its skill proficiency had yet to reach expert level, but due to the restraint of its attributes, it still gave the Rock Lizard a heavy blow.

However, unlike the trainee level battles that were often short and small, the battles here were very long. After the Rock Lizard was thrown a few meters away, it immediately stood up as if nothing happened and looked at its opponent angrily.

“Water Strengthening Talent, Elemental Resistance Talent...”

During the process of the two attacks, countless water-elemental fluctuations surrounded the Blackwater Crocodile Turtle’s Beast Tamer. This was a very common water-elemental talent that could be used to enhance the water-elemental skills of the Blackwater Crocodile Turtle. Although it was a proficient water cannonball, after the enhancement just now, in terms of power, it was probably not inferior to the expert water-elemental cannonball without the water-elemental talent.

As for the Beast Tamer talent on the Rock Lizard’s side, it was even simpler and cruder. It was known as the talent for Elemental Resistance in the Strengthening System. It could let pets have a certain resistance to any elemental attack. So even if the Rock Lizard faced the water cannonball that countered it, it still directly resisted it. Its condition looked like it could still fight for 300 rounds.

Quasi-vocational and professional-level fights were indeed starting to become a talent based thing.

“Thankfully, I don’t have a combat talent.” Looking at their battle, Shi Yu chuckled inwardly.

After this battle, these two Beast Tamers would probably be weakened for a while. It was unknown if they had prepared any tonic.

His skill blueprint was still the best. As long as he added some points in his daily life, he could just command them as he pleased in battle. There was no need for the other Beast Tamers to expend so much effort. They also had to invest a lot of stamina and energy.

On the other hand, when Shiyu encountered such a Beast Tamer with a strengthening talent in the future, he might suffer a little. At that time, the outcome would depend on the effect of his points on the pets. Whether it was comparable to the effect of others using enhancement talent on the pets’ battle power would depend on the effect.

“If it’s at this level, I think Eleven can fight. However, he probably has to fight with all its battle power and successfully kill it in one hit, like with that dragon...”

Shi Yu quickly determined the difference between Eleven and the two pets on the field. However, this was also because the races of these two pets were not high. They were not commander races. Furthermore, their growth levels were just at the initial transcendent level. Otherwise, if the other party's attributes were a little stronger, Eleven might not have a chance.

Following that, Shi Yu continued strolling.

He discovered that the pets that dared to stand out and fight here were at least transcendent level.

However, this was normal. There were still four months until the vocation assessment. At this time, the pets that had yet to reach the transcendent level wouldn't have much of a chance of entering this university.

At the same time, Shi Yu also discovered that this group of extraordinary pets had at least one proficient skill. Occasionally, he could even see two simple combination skills. This made Shi Yu sigh with emotion. These young Beast Tamers who were preparing for the professional assessment were indeed something...

His opponents four months later wouldn't seem to be the same people as when he was competing for the Evolution Sacred Spring.

Like him, those people had yet to meet the requirements to participate in the vocation assessment.

If he participated in the professional assessment at the Ancient Capital Association, he might be facing a group of Beast Tamers who had reached the second level of the Taming Space and were qualified to have two transcendent pets...

Furthermore, because the professional assessment was once a year, some second-generation royal children could advance two levels in a year. They might even contract three pets. As for those with commander level pets, it should not be rare anymore...

"I understand. Although they're all newbies, this is like the chunin Ninja Examination in Naruto. There were people in the lowest genin class who could do some insane things, like opening tai gates or using a tailed beast's power..."

As everyone knew, genin were the strongest.

Similarly, it was not impossible for a group of monsters to be hidden in the vocation assessment.

No wonder Lu Qingyi said that the professional assessment of the Ancient Capital Association was challenging and that he should use the ruins bead to develop faster...

As far as the universe knew, the annual class assessment did not have a set standard for passing. Instead, it was done according to the ratio. Therefore, it was not guaranteed that one could pass the assessment just by reaching the pro level and owning a transcendent beast.

It was also because of this that the vocation assessments in these big cities were even more difficult than those in small cities. This was because if one passed the vocation assessment in big cities, there was a higher chance of being selected by top colleges and top corporations.

This was actually the same on Earth. A top 500 corporation wouldn't recruit just anyone from any school. However, the graduates of Qingbei could be fought over by various corporations. The professional assessment was also so realistic.

This model also created a strange phenomenon.

People who could have easily passed the vocation assessment in a small city didn't give up and tried applying for several years in a big city. The strength of these people was probably ridiculous. After all, the vocation assessment had no age or number of tries restrictions. Their accumulation time was clearly higher!

It was even possible to meet an 80-year-old elder in the vocation assessment.

Of course, although it was encouraging for such an old man to participate in the vocation assessment, probably no school or company would think well of him... Even if he obtained the first place in the current year, he didn't have much potential. For example, the Ancient Capital University had a certain limit on the age of the applicants.

Therefore, although strength was important, the potential and talent displayed were also important.

"No problem, no problem..."

Although Shi Yu felt a sense of pressure, as he had started much later, he still felt that there was no problem.

All he had to do was add some points, and there was no hurry. Anyway, he didn't want to be first place in the same cohort. Passing the test would be considered a victory!

...

For the entire afternoon, Shi Yu was watching the battle, mainly to see the performance of the various Beast Tamers' Beast Taming Talents. He would not admit that he was looking for some Beast-eared Lady.

Unfortunately, after watching for the entire afternoon, he discovered that these Beast Tamers basically had enhancement-type talent. He didn't see any special combat talent at all. This couldn't help but dampen Shi Yu's spirits.

As evening approached, Shi Yu left the battlefield in the northern campus and headed for the ten-star hotel he had reserved in advance.

Although he could live in the pearl, since he was rich, it was not a bad idea to enjoy it.

That night, Shi Yu had a huge meal in the hotel. He only returned to his room after he was satisfied. He lay on his bed and began to meditate with an ethereal stone.

After playing for a day, it was time to work hard...

Moments later, Shi Yu opened his eyes.

"I didn't add any points today. I feel so good. One piece of ethereal stone doesn't seem to be enough for me anymore. I feel that with my current focus, maybe I can use both pieces at the same time!"

“No, three!”

“Wait a moment, there are dozens in the inventory. Three feels pretty bad. Damn it, if only I could set up a Spirit Gathering Formation like the spirit stones in the Xianxia novels!”

### **Chapter 87: The Beast-eared Lady Is Here**

The next day.

Shi Yu woke up feeling refreshed.

This was the most comfortable sleep he had in the past month.

It was more comfortable for him to cultivate himself than for his pets.

“Today...”

After washing up, Shi Yu switched on his phone and looked at the number Lu Qingyi had given him.

Shi Yu thought for a moment. Since Lu Qingyi had entrusted someone to show him around the school, it was a waste not to.

If he were to wander around by himself, he would really be confused. He might be stuck in the same place for the entire afternoon like yesterday without any gains.

“87237387...” Shi Yu dialed and planned on finding this guide for himself.

A long time later, a clear and experienced female voice sounded.

“Who is it?”

“Hello, this number was given to me by Senior Lu Qingyi...”

Just as Shi Yu was about to continue explaining, the other party immediately understood and said, “I understand. You plan on visiting Ancient Capital University?”

“Yes.”

“In an hour, I’ll wait for you outside the battlefield hall at Northern Campus District No. 18.”

Shi Yu scratched his head and could only agree silently.

Sigh, the other party didn’t give him a chance to say anything. Forget it, he’d ask later.

“Eleven, come out and rest!”

Just as he was about to leave, Shi Yu thought of something and shouted for Eleven, who was in the ruins bead. Without giving it a chance to refuse, he teleported Eleven out with his identity as the master of the ruin.

In the room, Eleven looked at Shi Yu in confusion.

“Wuu!”

This couldn't do. If it didn't work hard, it wouldn't even be able to defeat Buggy.

"It's alright, then I'll also stop it from working hard."

Shi Yu summoned the sleeping Green Silkworm and threw it into his backpack.

At the same time, he reminded the Green Silkworm, "Don't go materializing illusions. Just sleep and dream today."

Green Silkworm: "Zz..."

Eleven was silent. It still felt off, but Shi Yu's hand had already grabbed the back of its neck.

After being grabbed by fate, Eleven revealed a bitter expression. It could only be forced to shrink to the point where it could lie on Shi Yu's shoulder. Shi Yu threw it onto his shoulder.

"Training is very important, but so is increasing one's horizons!"

"Do you know how many exciting battles you missed yesterday?" Shi Yu educated Eleven.

Eleven pricked up its ears and listened.

"As the saying goes, knowing one's enemy and oneself is the only way to win a hundred battles. Growing experience is also a way to increase strength. From tomorrow onwards, you take two hours to train and memorize the Pet Encyclopedia with me."

Eleven: Huh???

Eleven was confused. Wasn't it enough that pets could fight? Why did they have to memorize books!

Isn't that what Beast Tamers should do?

"You have to develop in all aspects!" Adding points saved Eleven a lot of training time. It wasn't too much to ask it to memorize the information of thousands of pets.

With enough energy, it was definitely not a bad thing to develop fully without shortcomings.

It was way more convenient for Eleven to know the details of the enemy instead of letting him tell it.

In short, he could also let Eleven memorize it. Shi Yu felt that if he encountered questions he didn't know how to do during the exam, he might even be able to ask Eleven.

As expected of him. This was the cultivation idea that was 80 versions ahead of this era.

...

Just like that, Shi Yu hung the baby bear on his shoulder and went out.

This was the first time Shi Yu had Eleven show up in such a manner, but it didn't matter because the passers-by didn't say anything as he walked past.

In such a big city, there were too many rare pets. Mutated pets, multicolored pets, pets wearing clothes, pets with a layer of makeup on by their owners, there were a bunch of strange pets that were rarely seen in Ping Cheng.

In contrast, the shrinking of Eleven on Shi Yu's shoulder made many people directly treat it as an iron-eating beast cub that had developed pretty well in various aspects. It was just that simple.

He bought two ice creams by the roadside, one for himself, and eleven. Then, Shi Yu headed for the destination he had arranged with the other party.

He arrived 20 minutes earlier than yesterday. Although it was early in the morning, there were already many people outside the battlefield hall of Ancient Capital University.

[How is it? Do you feel that the pets nearby are all very strong?]

When they were bored, Shi Yu said to Eleven on his shoulder telepathically.

“Wuu.”

Eleven kept looking around and indeed discovered that there were many pets beside Beast Tamers with powerful energy waves.

However, Eleven didn't know the exact strength, but perhaps it could be detected with expert-level deterrence?

[If you don't want us to be beaten up, you better not do this.]

Good heavens, using group deterrence in such a place, wasn't this a provocation? He would get beat up.

Shi Yu held his cell phone and checked the surrounding energy fluctuations. He couldn't detect it at all.

This meant that the pets nearby were basically all above the transcendent level. Very few of them had Awakening Stage.

What did this mean?

Did this mean that the Beast Tamer level in the big city was very high? No, it meant that he should change his cell phone.

Although he had just bought this cell phone not long ago, it seemed to be insufficient at this time. If it was the next one... At least, it had to bring a higher-level combat power detector.

As for this phone, he would leave it to the Green Silkworm and Eleven!

They could do whatever they wanted with Ice Dragon movies or selfies.

Just as Shi Yu was considering whether he should change to a cell phone with a value above seven digits, his lousy cell phone rang.

“I'm under the streetlamp.” After Shi Yu picked up the call, a voice came from the other end.

“I see it.”

Shi Yu looked around and immediately saw a girl in combat shorts, short sleeves, and knee guards under the streetlamp nearby.

The other party wasn't tall. She had short black hair, fair skin, and a small figure. It was a standard fitness figure without any extra fat.

It was this person?

Shi Yu walked over. The other party also saw Shi Yu and revealed an assessing gaze.

“You’re that Shi Yu that Senior Lu introduced?”

Shi Yu nodded and said, “Hello.”

The combat girl nodded and said, “Hello, I’m a student of Ancient Capital University’s battle department, Bai Xi. At the same time, I’m also a reserve member of Senior Lu’s archeological team. Since I’ve promised Senior Lu, I’ll show you around Ancient Capital University in the next two days.”

With that, she looked at Eleven, who was staring at her with dark circles under its eyes, and fell silent.

“You still seem to be a Beast Tamer trainee?”

“Yes, is there a problem?”

“No, but do you have a place you thought of visiting?” Bai Xi asked.

“How about I give you a suggestion?”

Shi Yu was stunned and nodded.

“Then come with me.” Bai Xi smiled and said, “Actually, it’s not my suggestion, but Senior Lu’s suggestion.”

“Huh?”

“She said that if you come to me, I don’t have to bring you to the archeology department’s territory first. Instead, I’ll help you increase your strength.”

“My strength??”

Bai Xi didn’t say much. Instead, she quickly brought Shi Yu to a training ground on the side of the battlefield hall that wasn’t open to the public.

Then, she walked away from Shi Yu step by step. At the same time, a huge summoning array appeared, appearing not far from Bai Xi and Shi Yu.

“Wu’er!!!”

After a high and bright cry, a transcendent creature that looked like a fox, more than a meter tall, appeared. It was covered in white hair, had a pair of blue eyes, a proportionate body, and appeared noble and elegant. Six long and smooth tails surrounded it.

< Name > Six-tailed White Fox

[Attributes]: Light

[Race Level]: High-level commander

“Not the strength of your pet commanding, but the strength of your own body when facing the threat of your pet.”

As Bai Xi finished speaking, a white pillar of light condensed in the mouth of the six-tailed white fox she summoned. With a boom, it attacked Bai Xi under the stunned expressions of Shi Yu and Eleven!

Intermediate-level skill, Destruction Ray.

In an instant, Bai Xi's entire body was swallowed by the light. A violent explosion occurred where he was, and even the ground exploded. Dust and strong wind were suddenly lifted, forcing Shi Yu, who was not far away, to take a step back.

"F\*ck." "Wu wu!!" The six-tailed white fox shook its tail and glanced at Shi Yu and the others, giving Shi Yu and Eleven a fright.

What happened?

"Just like this, in the face of the attack of supernatural creatures, as a Beast Tamer, do you have enough strength to protect yourself?"

At this time, from the smoke, Bai Xi's voice came from the shattered ground. She directly withstood the Six-tailed White Fox's Destruction Ray with her body. Her surroundings were in a mess, and she didn't seem to have suffered any injuries at all.

"My Beast Taming Talent is ' Fusion ', so I can fuse with my pet to obtain a physical fitness that exceeds my own and that of my pet. It's fine if you don't have this Beast Taming Talent, but no matter what, a Beast Tamer has to master at least one type of pet in battle and can also ensure their own safety in combat skills."

"In fact, protecting myself is only a part of the foundation. I can also have the strength to fight against pets. That's the real safety. For example, in my current state, I can tear apart commander-level creatures with my bare hands."

"Senior Lu said that you should apply to the Archaeology Department. Then, do you know that the most important thing in the Archaeology process is not professional archeology, but strength? Various ruins are filled with danger. Archeologists themselves don't have enough strength. Even if they have more bodyguards, they can't enter the door of this industry. This profession might not necessarily have lower requirements for overall strength than traditional professional Beast Tamers."

As soon as she finished speaking, Shi Yu had already opened his mouth slightly. It was not because this strange woman had really resisted the pet skill, but because of her current appearance...

Her short black hair had completely turned into furry white short hair, and her eyes had also turned blue. There were also two more things that looked like cat ears or tiger ears!!

Special Fusion Beast Taming Talent?

This was the beast-eared girl?!

Chapter 88: Regarding the Life-Saving Ability of Beast Tamers

Translator: Atlas Studios Editor: Atlas Studios

Shi Yu's gaze could not move away immediately. After all, this was the first time he had seen this Beast Taming Talent. It felt very novel!

Moreover, in the intense explosion just now, it was one thing for Bai Xi's body to be enhanced, but why were her clothes so sturdy?

Shi Yu was purely curious. Was there any battle suit that could resist energy? He wanted to buy two sets too!

"Have you seen enough?"

At this moment, Bai Xi saw that Shi Yu and the Little Iron Eating Beast were staring at her. Her figure disappeared directly and she came behind Shi Yu. She patted Shi Yu's shoulder and picked Eleven up.

"So fast."

Shi Yu's heart skipped a beat. Eleven was already being held by the other party. Eleven subconsciously wanted to resist, but the other party's strength was unexpectedly strong. Eleven couldn't break free at all.

"Wuu!" Eleven immediately felt that it had returned to the days when it was dominated by Big Sister Lin Xiuzhu.

This fellow's strength was even more ridiculous than Sister Lin Xiuzhu!

"Sorry... This is the first time I've encountered this talent."

"Don't you need to summon your pet to use this talent?" Shi Yu looked at the six-tailed white fox at the edge and then at Bai Xi's transformation characteristics.

Although it was also white, it clearly didn't match with the Six-tailed White Fox.

"No need. The Fusion Talent is relatively special. It can directly fuse with the pets in the Beast Taming Space. My current fusion target is another tiger-type pet."

Bai Xi picked Eleven up and stared at it carefully before handing it back to Shi Yu.

"So it's the multiplication skill..."

At the same time, her beast characteristics slowly disappeared, and she returned to her previous appearance.

"Do you understand what I mean now?"

Bai Xi said, "The battles you previously engaged in should all be battles where Beast Tamers are in relatively safe conditions. Otherwise, it would be formal competitions, or else you would be under high protection..."

"The professional level is actually a threshold. After stepping into the professional level, the comfortable environment will greatly decrease."

"Because of this, one of the first two pets of the Beast Tamers will basically be perfectly compatible with themselves to protect themselves."

“Of course, you’ll definitely think that it’s easier for me to do this because I have the talent of fusion, but that’s not the case. There are countless similar techniques, and it depends on whether the Beast Tamer will dig them up.”

“Xiao-Xiaobai, come here.” Bai Xi shouted for the Six-tailed White Fox, and the fox immediately walked over.

“Circle Dance,” she said.

In the next second, the six-tailed white fox waved its six tails, forming a dazzling light that swept towards Bai Xi.

Bang!!!

Shi Yu and Eleven were shocked again. This Senior White was really a tiger! She let her pet hit her all the time. Although it was to show him, it was so scary.

This time, Bai Xi didn’t fuse into a body. However, the six-tailed white fox’s tail stopped in midair.

This was because during the process of it sweeping towards Bai Xi, countless streams of water gathered out of thin air, forming a water shield in front of Bai Xi. The Six-tailed White Fox’s Circle Swing skill directly hit the water shield, but it couldn’t break through.

Splash!!

When the water shield disappeared, Bai Xi said, “It’s my other water-element pet. It has mastered the ‘Water Shield’ skill and also majored in this skill. It has already trained its skill to the proficiency of automatically sensing danger and defending, so it can help me block the damage at the moment the danger approaches me.”

“Well, in battle, I actually prefer to change my form and let it transform into the form of a high-pressure water saber to fight...” Bai Xi licked her lips.

Shi Yu and Eleven were speechless.

Then, Eleven looked down at Shi Yu. Why did his Beast Tamer retreat whenever he could in battle?

The difference between people is indeed huge!

“Alright, it’s time to talk about you guys. Do you have similar thoughts?” Bai Xi asked.

“This...” Shi Yu thought for a moment. In the future, Buggy might be able to materialize into pets with similar skills, or it could directly materialize into armor to protect himself?

However, he couldn’t explain this to the beast-eared senior in front of him.

“Looks like you don’t have any ideas.” Bai Xi smiled and said, “I’ll give you a suggestion.”

“I know two master-level Beast Tamers with iron-eating beasts that do this.”

“What?” Shi Yu was stunned. Iron-eating beast?

Bai Xi said, "One of the symbols of the Iron-eating Beast's racial skill, Transcendent Level Hardening, is to apply it. It can apply the Hardening Material to other objects, including life forms. At that time, you can hang it on your shoulder and let it give you a layer of Hardening. If you do that, you can also have the skill to resist and tear your pet apart with your bare hands."

"When your Beast Taming Space upgrades and your physique undergoes an extraordinary transformation, you might be able to give it a try."

"Of course, the premise is that you can cultivate Hardening to transcendent level. This isn't easy."

"!!!" Shi Yu and Eleven looked at the smiling Bai Xi. Ten thousand Green Silkworms crawled across their hearts. Could hardening be done in this way? Shi Yu and Eleven had never thought of it.

Was this how they played in the city?

Shi Yu: I can also use Armament Haki Hardening?

However, this definitely had to be given up. Eleven was an ace. How could it always be a bodyguard on his shoulder?

But it was really an idea.

High-speed healing could even be used to heal Beast Tamers, so it was completely fine to apply other skills to Beast Tamers.

"Of course, the above are all off-topic. The goal is to give you a warning. Remember to think about this yourself as much as possible in the future direction of pet training. After all, you, the Beast Tamer, are the most important," Bai Xi said.

"These are still far from where you are now. Senior Lu said that if you come to me, I can teach you a special skill that you can use right now."

"She originally planned to teach it herself... But she's been rather busy recently, so she entrusted it to me. Of course, if you didn't come to me, she might have taught it to you herself later."

Shi Yu asked, "What skill..."

Bai Xi crossed her arms and looked at the fox. The six-tailed white fox once again swung its tail.

This time, Bai Xi displayed her third life-saving skill. The first was the Fusion Transformation, which came from her Beast Taming Talent. The second was the Water Shield, which came from her pet's skill, and the third...

Its six tails swept across. This time, it was as if it had hit an illusion. It directly passed through Bai Xi's body, causing Shi Yu to fall into confusion again.

"This skill is called 'Etherealization'. Beast Tamers can use their willpower to transfer their bodies into alternate spaces to avoid damage. In theory, in that state just now, I was no longer in this space."

"The conditions you would need to harm me in that state are very restricted."

Shi Yu: "?"

Beast Tamers mastered spatial skills?

“This is an ability that only legendary Beast Tamers can master, but...”

Bai Xi pointed at the ruin bead hanging on Shi Yu’s neck and said, “But people who have a legendary Beast Tamer’s relic can also use this ability with special spatial tools. Although there are some restrictions, it is enough to protect their lives in low-level battles.”

When she finished speaking, Shi Yu subconsciously touched the ruins bead.

“Don’t be surprised, it was Senior Lu who told me. She said you successfully cracked a ruin, but you probably don’t know the best way to use this spatial tool, right?”

“The best usage method is what I showed just now. It allows ordinary Beast Tamers to have the same ethereal ability as legendary Beast Tamers in advance.” Bai Xi waved the bead on the chain and said, “Do you want to learn it?”

“Most people only know that the growth enhancement of spiritual plants and pets in the mystic realm ruins is the most valuable. They don’t know that the space left behind by a legendary Beast Tamer can be used like this. You’re lucky.”

Shi Yu was stunned. He looked at the bead in the other party’s hand. This was also a rich lady!

The Ruins Bead was also called the Mystic Realm Bead!

This Bai Xi actually had one!

Super second-generation heir???

“Yes,” Shi Yu said subconsciously. With this skill, what was there to be afraid of?

He thought that the ruins bead could only be used to hide in times of danger. It turned out that it could be used so easily? It could directly etherealize its body outside?

No wonder Beauty Lu said that this ruin bead was his best cheat before he became an official member of Bureau 11.

He had completely gathered all the spatial storage, cultivation enhancement, and life-saving divine skills.

“Well, then you should learn from me first,” Bai Xi said. “There’s a place in the school that specializes in training the life-saving abilities of Beast Tamers.. I’ll take you there to take a look first.”

## **Chapter 89: Time to Let loose**

During the opening day, although the campus of Ancient Capital University was open to the public, there were actually very few training facilities that could be used by passers-by. Probably only battle areas could be completely open to the public.

As for training facilities that required energy to be activated, they were at most introduced to the visitors to evoke their yearning.

If it really opened all of them, Ancient Capital University would probably suffer a huge loss in a month.

However, nothing was absolute. There were privileged people everywhere. Next, Beast Ear Lady Bai Xi brought Shi Yu to a huge high-level building in the northern campus.

Bai Xi walked in front while Shi Yu and Eleven followed behind her. The other party took out a school card and swiped it briefly before they successfully entered.

“Granny, are you there?”

After entering, Bai Xi looked in the direction of the counter. On the other side, a white-haired old woman was typing on the computer. She seemed to be working and was very immersed, completely ignoring Bai Xi and Shi Yu who had just entered.

Then, Bai Xi and Shi Yu walked closer to take a look and immediately fell silent.

“When I’m done playing this round, immediately.” The granny stared at the game interface, her wrinkles trembling.

In the video, the sound of people being attacked kept coming out. “Uh, uh, uh!! Ah, ah, ah!”

How modern, Granny!

After lamenting, Shi Yu and Bai Xi watched quietly by the side. After a long time, the granny smashed the keyboard in anger before returning to a kind expression. “Ah, it’s Little Bai Xi. Why are you here?”

“Granny, help me set up a time-limit card and open a prep room. There’s a junior who hasn’t entered school who wants to experience this facility.”

“Oh, oh.” The granny glanced at Shi Yu and the Little Iron Eater and nodded with a smile. “How long will it take?”

There was a hidden policy in Ancient Capital University. All the teachers and visitors brought by the students had the right to temporarily use some training facilities in the school, and they had different treatment from the students who came to visit.

Bai Xi glanced at Shi Yu and said, “Half a month.”

“Alright.” The granny nodded.

Then, Bai Xi said to the administrator, Granny, “Granny, help us open the most basic pass now. I’ll bring him to prepare first.”

After Bai Xi finished speaking, the granny expressed her understanding. She began to lead Shi Yu to the preparation room on the first floor.

...

In the lounge, Bai Xi got Shi Yu to sit down and began to transform into a teacher.

“You definitely know the basic ability of using the Ruins Bead to store items and take out items.”

“At the same time, you must have mastered how to enter the ruins bead yourself. This is the foundation to master the ability of ‘etherealization’.”

“And if you want to use the ability that only this legendary Beast Tamer can master in advance, the key is to establish the connection between your Beast Taming Space and the space storage.”

Then, Bai Xi began to teach Shi Yu a special method to control the ruins bead.

There were too many secrets hidden in the Beast Taming Space. Sometimes, Shi Yu was also very curious why the evolution direction of the humans in this world just happened to be Beast Taming. If it were any other world, they would have long become super mighty figures.

As he explained, Bai Xi constantly added,

“Using this ability isn’t without cost.”

“Every second of etherealization consumes a lot of physical strength. In fact, in a sense, this ability can be seen as a second life-saving Beast Taming Talent that can only be awakened at the Legendary level. There’s nothing wrong with that saying.”

“I understand...” Shi Yu looked like he had seen through life.

Previously, he was still glad that he didn’t have to consume his physical strength to command the battle.

It had only been a day, and he immediately had a virtualization ability that consumed physical strength to activate.

This ability was simply deliberately appearing to bait him into courting death. Etherealization... This ability really had two meanings...

Next, Shi Yu spent about half an hour to understand how to first establish the connection between his Beast Taming Space and the Ruins Bead with his mind before completing the etherealization. Although the steps were a little complicated every time, it was said that once the proficiency was high, it would only take an instant.

It was indeed important to have a good teacher to guide him. Bai Xi explained everything in detail to Shi Yu.

“Try it out?”

As Shi Yu finished meditating, he opened his eyes. Bai Xi was smiling in front of him.

“Yes.” Shi Yu nodded and focused. It was as if lightning flashed in his mind.

Spatial secret skill, Etherealization!

In an instant, with a “Wuu!!!”, Shi Yu’s figure seemed to have turned into an illusion and disappeared from this world for a second. At the same time, Eleven, who was resting with its eyes narrowed, woke up abruptly and fell to the ground!

Eleven: ㄣ|`O’|ㄣ Wuu!!

What was going on!!!!

It didn't hurt, but it scared the panda. What happened just now?

"Did it really succeed?" After turning incorporeal for a second, Shi Yu quickly recovered with a pleasantly surprised expression.

Eleven looked over in confusion.

Faced with Eleven's confusion, Shi Yu naturally explained the etherealization to it happily.

"Very good. Then let's practice in actual combat." Bai Xi smiled.

"I've organized a time-limited card for you for half a month. You can come here to practice your abilities in half a month."

"Follow me."

Bai Xi's way of doing things was swift and decisive. She did not give Shi Yu any time to catch his breath. She immediately left the lounge and came to the old lady administrator.

"Are you ready? The basic level has already been opened. You can enter at any time," the granny said.

Bai Xi looked at Shi Yu and signaled for him to come closer. He looked at the computer screen.

On the computer screen, an environment had already been displayed. At the same time, various extraordinary creatures appeared around it.

Wind Crystal Butterfly, Fear Bear, Gold-Eating Mouse, Poison Dart Frog, Ice-Armored Beast, Skeleton Soldier...

When Shi Yu saw the scene, he felt that something was wrong. He had a bad feeling.

"These transcendent creatures are all energy bodies formed by machines. There's no difference between their battle patterns, skills, forms... compared to real creatures. The only difference is that their strength has been weakened to the minimum. Even if an ordinary person receives the skill, they will only feel some pain and not be injured."

"There are a total of ten transcendent creatures in the basic stage. What you need to do next is to last ten minutes while dodging the danger as much as possible here."

"Oh right, you don't have to bring your Little Iron-eating Beast with you. In any case, the skills you need to train don't need pets. You can rely on yourself."

As Bai Xi finished speaking, Eleven was stunned. It gave Shi Yu an encouraging look. Good luck, you can definitely do it.

Shi Yu: "???"

Shi Yu pointed at himself and said, "Me alone?"

"Yes." Bai Xi nodded and said, "It's alright. This is only one of the most basic obstacles. It mainly trains the Beast Tamer's own reaction speed and ability to deal with danger."

“If you bring your pet in together, the effect on your training will be lower. After all, your life-saving skills don’t need the help of your pet.”

“Alright...” Shi Yu nodded. Then, under Bai Xi’s guidance, he headed to a room on the second floor nervously.

...

On the second floor, in the huge room, ten transcendent creatures were distributed in various corners of the room. After discovering that the space was very large, Shi Yu heaved a sigh of relief. At least this way, he wouldn’t be immediately beaten up...

However, he was still too naive. Not long after he stepped into the room, the ten monsters in the room immediately attacked at the same time!!

The Butterfly directly waved a wind blade, and the Poison Arrow Frog also shot a poisonous arrow. In the distance, the skeleton soldiers had already raised their bone swords and charged at Shi Yu...

The ten transcendent creatures attacked at almost the same time, scaring Shi Yu into hurriedly entering the ethereal state.

Fortunately, he had turned incorporeal. Otherwise, Shi Yu felt that even if he brought Eleven along, it would definitely not be able to help him block all the attacks unless it used deterrence to instantly kill all the enemies.

Perhaps only by reaching transcendent in Hardening and adding a layer of buff to himself would he have a chance of resisting.

Swoosh! Swoosh! Swoosh! Swoosh!

Shi Yu completed the etherealization and those skills missed.

In the outside world...

The granny administrator, Bai Xi, and Eleven were using their computer monitors to look at the situation inside the checkpoint.

“It’s actually etherealization...” The granny saw the life-saving technique Shi Yu used and immediately looked at Bai Xi.

“This little classmate you brought doesn’t have a simple background, right?”

Bai Xi nodded. How could a newcomer that Senior Lu liked be simple?

He had cracked a ruin during the trainee period and obtained the ruins bead. On the other hand, those top second-generation heirs were only so-so.

“He just mastered the ability to turn incorporeal. With the physique of a Beast Tamer intern, supporting the ethereal state for about half a minute is the limit.”

“If he can’t use this ability reasonably, he will quickly fall into danger and fail the challenge,” Bai Xi said as she looked at Shi Yu on the screen.

She looked speechless. It was too wasteful!

Etherealization was not a permanent buff. It had to be activated at a critical moment. This Shi Yu, it would save him trouble if he kept it on, sure, but was his physical fitness cost-free?

Did Shi Yu understand the purpose of this training!

“After all, it’s his first time. He would have to adapt slowly...” The granny was experienced and said very considerately.

In the scene, Shi Yu still maintained his ethereal form, making the ferocious beasts attack like headless flies, but they couldn’t hit Shi Yu.

Just like that, 30 seconds passed.

40 seconds passed...

After 45 seconds, the expressions of the granny and Bai Xi gradually became strange!

“How could he etherealize for so long?” Bai Xi didn’t understand. She had also mastered the ability to etherealize during the intern period. She knew very well the approximate time to maintain it at various levels and states.

However, when it came to Shi Yu, something seemed to have gone wrong?

“Sob!” At this moment, Eleven silently looked at the scene and analyzed their thoughts through the expressions of Granny and Bai Xi.

Eleven looked calm, as if to say, “Don’t make a fuss. Didn’t Shi Yu show extraordinary stamina?”

Eleven wanted to say that actually, it wasn’t that Shi Yu’s physical fitness exceeded other Beast Tamers of the same level by a lot, but that he had rich experience in “etherealization”.

Shi Yu, who could remain calm even after falling into a weakened state for dozens of hours after points were added... So what if he overdrew his physical strength and turned incorporeal for a while? It was very reasonable!

“This doesn’t make sense.” Bai Xi stared at the image.

At that moment, in the room, Shi Yu fell into deep thought.

He felt that this couldn’t continue. He felt that he couldn’t hold on anymore.

This etherealization consumed more physical energy than he imagined!

“Hu hu hu hu!!!”

As Shi Yu was thinking about how to crack this level, the skeleton soldier’s large bone sword kept waving in front of Shi Yu’s eyes, making him feel vexed.

“Wait a minute, since this level isn’t as dangerous as I imagined, maybe I can take the initiative to counterattack?”

“Senior Beast Ear also said that a truly outstanding Beast Tamer has to have the ability to face extraordinary creatures bravely.”

Shi Yu was stunned. A certain suicidal soul hidden in his body that was paired with archaeology suddenly woke up.

At this moment, he recalled the opportunity for him to step into the archeological field.

In fact, the first time Shi Yu came into contact with archeology on Earth came from an animated film.

“Dragon Adventures”!

The story tells how archeologists, martial arts expert Jackie Chan, explore various mysteries around the world.

At that time, Shi Yu, who was young, was haunted by his “eighth-grader syndrome”. He felt that Cheng Long was very handsome and even had a copycat career.

Not only did he study archeology, but he also frequently danced and touched his feet, wanting to restore Jackie Chan’s difficult movements.

In the end, Shi Yu got into the ambulance.

This made him understand that the cartoons were all fake.

However, a person’s dream would never end. When he grew up, Shi Yu studied many other skills.

He knew a little of all kinds of combat skills and fighting styles, but only a little. It was this experience that made Shi Yu die a little later.

In short, Earth couldn’t fulfill its dreams for various reasons. Now, an opportunity had come.

Now that he also had a magic-like ability and his physique had improved, it immediately made Shi Yu’s courage increase greatly. With a ruthless gaze, he withdrew from the ethereal state and kicked the skeleton soldier in front of him who was waving his swords around. He immediately kicked it over and the bone sword fell to the ground.

Shi Yu picked up the bone sword and waved it nervously, aiming at the remaining nine ferocious beasts.

He was going to let himself go!

“Feels okay?” This might be his first step to becoming a super Earthling!

## **Chapter 90: Iron-eating Beast Ruins**

With a sword in hand, Shi Yu immediately felt heroic.

He felt that this was the correct way to transmigrate. Wasn’t being a swordsman more handsome than being a Beast Tamer?

In the outside world, following Shi Yu’s sudden action, the administrator, the Beast-eared Lady Bai Xi, and the Panda King, Eleven, were all stunned.

“Huh? Σ (° Δ °III)”

Eleven looked at the image in confusion.

It was thinking, “Shi Yu, what are you doing? Shi Yu, calm down!”

You’re not cut out for that!

“Looks like he understood.”

After a moment of silence, Bai Xi said, “A true Beast Tamer must have the courage to face transcendent creatures on their own.”

“Although I’ve already expected him to get beaten up next, this will undoubtedly become a very precious experience for him...”

As the human and panda expressed their views, Shi Yu’s figure had already been swallowed by a group of ferocious beasts. There was only a bone sword left on the spot...

...

“Oww!”

“It hurts.”

Let some other earthling become a swordsman. In the future, he would add points at the back and watch his pets fight!

Soon, Shi Yu was beaten out.

When Yu came out, the beast-eared woman, Bai Xi, was looking at him with a faint smile.

“Sob.” Eleven covered its face and asked Shi Yu if he needed it to help take revenge.

Just now, Shi Yu couldn’t be cool for even three seconds. He was directly beaten up by a group of ferocious beasts and could not get up. He even relied on his etherealization to escape.

“I haven’t seen such a brave youth in a long time.”

The manager, Granny, also had a smile on her face. All the negative emotions from losing the game had disappeared, and she was in a very good mood.

From this, it could be seen that Shi Yu was a Beast Tamer who was good at bringing joy to others.

“I feel like I almost had it.” Shi Yu looked disappointed.

The main reason was that there were too many enemies. He had died before he could even use the sword skill he had learned on Earth...

Although there was no harm, the slight pain was still present. Shi Yu felt indescribable pain.

Sigh, when would he be as skilled as Uncle Jackie Chan...

Bai Xi said, “There’s no need to worry. The most basic levels here are also prepared for Beast Tamers above the professional level.”

“It’s very normal that you can’t react. If you’re not ethereal, with the physique of a Beast Tamer intern and not relying on pets, it’s actually a miracle that you can last for a few seconds.”

Shi Yu :”...”

In other words, he was just challenging a fight above his level?

Why didn’t she say so earlier? If she had said so earlier, he would have changed his method of challenge and gone straight to the end!

Falsezation+supplements, he could directly endure until the energy of this training facility dried up!

Of course, this was just bragging...

Then, just as Bai Xi was about to say something, her phone suddenly rang.

She took out her cell phone and answered the call. Then, she immediately nodded and said, “Alright, I’ll be there in a while.”

After hanging up, she looked at Shi Yu apologetically and said, “I suddenly have something on. I’ll show you around another day.”

“My suggestion is that you use the training facilities here to practice your etherealization first.”

“After you become proficient in etherealization, partial etherialization, and instant etherealization can be done. In that state, you can use other Beast Taming Talents to command, summon, and retract your pets. It’s faster and more convenient than hiding in the ruins when you encounter danger.”

“In a Legendary Beast Tamer-level battle, Beast Tamers are basically in an ethereal state the whole time. Otherwise, Beast Tamers won’t be able to enter a battle of that level at all.”

“You have the Ruins Bead and can experience this power in advance. You won’t be at a disadvantage if you practice earlier. It’s considered a foundation for you to become a legendary Beast Tamer in the future!”

“Alright.” Shi Yu nodded and said, “Then, Senior Bai, you go do your errand first.”

This etherealization ability indeed needed to be trained. It was completely a life-saving skill.

“Well, that’s it then. By the way, for the other training facilities, if you’re doing this to increase the strength of your pet, I think you can put it aside for the time being. Anyway, you have the Ruins Bead. The training efficiency of the pet in other training facilities might not be as good as in the mystic realm space of the ruins.”

“The level of the training facilities with obvious effects is too low for you to enter. Those without obvious effects are inferior to the Ruins Bead... It’s a waste of time to go.”

Bai Xi clapped her hands and said, “But it all depends on your wishes. Well, I’ll leave first. I’ll contact you later to take you to the archeology department.”

With that said, Bai Xi entrusted Shi Yu to the manager, the granny, and left in a hurry.

“Little Bai Xi is the vice president of the battle club at Ancient Capital University. She’s preparing for the National League recently, so she might be a little busy.” The administrator, Granny, looked at White Xi’s departing figure and explained with a smile.

“How is it? Do you want to continue challenging?”

The granny didn’t ask about Shi Yu’s identity either, directly treating him as an ordinary student from Ancient Capital University.

“No, Granny, I plan to go back and study it carefully.”

“I’ll come another day. Thank you, Granny.” Shi Yu looked at the administrator, Granny, and said.

If this granny could be an administrator in such a place, she was probably at least a master-level Beast Tamer.

“Alright, then you guys should leave quickly. I’m going to continue playing games,” the granny said.

Shi Yu, Eleven:???

Why did Shi Yu suddenly feel that Ancient Capital University had no future...

...

Then, Shi Yu left the training facility with a stunned expression.

After coming out, Shi Yu shook his head and sighed.

“I feel like I have something to do.” He took out the time-limited trial card Bai Xi gave him and felt depressed.

During the half-month time limit, he could use that training facility to train his phantom transformation.

It would be a waste not to.

He should use it. He had to go and get beaten by transcendent creatures every day. It was so complicated.

“Forget it. Only by suffering can I be above others!” Shi Yu gritted his teeth and decided to fight it out.

Although he could also train his Etherialization in private, it definitely wouldn’t be as effective as the training in that urgent but safe environment.

“Wuu!”

On Shi Yu’s shoulder, Eleven felt that it made sense. Only by suffering could one be superior!

Eleven: o(— <—+)o So, when can Shi Yu let it go back to training?

Shi Yu only trained hard himself, but he didn’t let Eleven work hard too. It was too evil of him!

Shi Yu :”...”

What was this competition?

It seemed like Eleven would never experience the joy of lazing around in this lifetime.

“It’s already noon.”

At the same time, Shi Yu glanced at the time and touched his stomach. He decided to have a meal and take a nap.

It was too tiring to etherealize.

After eating some supplements and waking up, he would decide where to go in the afternoon.

He had troubled himself this morning.

...

In the hotel.

After Shi Yu was full and allowed Eleven and the Green Silkworm to fulfill their wishes and enter the ruins to undergo special training, he started to hug his pillow and prepare to sleep.

However, it was as if the heavens didn’t want Shi Yu to rest well. The loud and clear electric sound immediately made Shi Yu get up.

“Who is it!”

Not many people knew his phone number.

Apart from the delivery men, there were only the three rich ladies, Hall Master Lin, and President Feng.

Good heavens, now that he thought about it, the proportion of rich women in his contact list seemed a little high...

Shi Yu looked at the caller ID guiltily and surprisingly discovered that it was actually Hall Master Lin.

“Eh...”

“Hall Master Lin?” Shi Yu picked up the phone.

On the other side, Hall Master Lin was silent for a moment before saying, “I heard you went to the ancient capital?”

Shi Yu: “Yes.”

Before he went to the ancient capital, he communicated with the members of the dojo and President Feng.

As for Hall Master Lin, when he set off, he seemed to still be on the snow mountain expedition.

“By the way, you’ve been to the snowy mountain recently, right? How’s the situation over there?”

“They’re just a group of wild beasts. They’re not worth mentioning. Commander Wang Meng and I have already cleared the periphery of the snow mountain. The situation is already within control,” Lin Hongnian said. “I heard that you cracked that trial ruin?”

“After I came out, Old Feng had already told me everything.”

Back then, he did suggest that Shi Yu could go there to train, but he completely didn't expect Shi Yu to be able to break through the sixth level and grow so quickly.

Eleven had just started learning the Thunder Palm when he decided to go to the snow mountain for the expedition...

However, after he came out of the snowy mountain, he heard ridiculous information from President Feng.

A combination skill of expert level Thunder Palm and expert level Hardening?

A little metal-eating beast that mastered expert-level deterrence?

The Iron Eater suspected to have awakened an ancient bloodline after coming out of the sacred lake?

The sixth level of the ruins was the Ice Dragon Phantom? Shi Yu even defeated it?

After hearing this, Lin Hongnian suspected that he was still in the snow mountain and hadn't come out. Some snow maiden in the snow mountain had cast an illusion on him.

In short, President Feng's story was ridiculous.

It was as if he had been out for several years.

However, this was not important. After all, Shi Yu was introduced by Lu Qingyi, a genius who had reached the master level in his early twenties.

With Lu Qingyi's help, it was normal for Shi Yu to be a little ridiculous.

Lin Hongnian was most concerned about the evolution holy spring and the ancient bloodline of the iron-eating beast.

He originally wanted to look for Shi Yu personally to ask, but Shi Yu was no longer in Ping Cheng, so he could only give Shi Yu a call.

"I heard that your Iron-eating Beast gained something from the Evolution Sacred Spring. It seems to have awakened some ancient bloodline?" Lin Hongnian asked with a heavy tone.

"Can you tell me about it?"

On the other end of the line, Shi Yu fell silent for a moment before saying, "I think that should be an ancient bloodline. It might be what the iron-eating beasts looked like thousands or even tens of thousands of years ago."

"Actually, the form isn't much different from now. It's like an Iron-eating Beast wearing a set of armor, but it doesn't feel like it's as simple as a transcendent Level Hardening skill."

The transcendent Level Hardening symbol was that the Hardening Material could be released to form weapons and equipment. In addition, it could also attach the Hardening Material to other objects.

At the moment, only Master Lin Hongnian's Iron-eating Beast in Icefield City had reached this proficiency.

Logically speaking, one could create an armor suit with Perfect Level Hardening. However, the feeling that his bloodline awakening gave Eleven at that time was not as simple as Hardening. It was indeed a completely new life form.

“Battle armor...” Lin Hongnian fell into deep thought.

“It’s possible to form battle armor with transcendent hardening, but if you don’t think so... Then is it possible that transcendent hardening is one of the evolution conditions for the iron-eating beast?” Hall Master Lin guessed.

“It means that using transcendent Level Hardening to form a similar weapon and then stabilizing this form in a certain way... Is the evolution method of the iron-eating beast?” Shi Yu said. “Isn’t it a little too perfunctory...”

If that was the case, even if the evolved Hardening skill could still be added to armor and become double Hardening, it didn’t feel like there was any future.

A commander rank was the limit, in this scenario.

“It’s just a guess.” Lin Hongnian also felt that it was too simple. He couldn’t help but laugh and leave it at that.

“However, in short, it’s an experimental direction.”

“By the way, did any other changes happen after your Iron-eating Beast awakened its ancient bloodline?”

“Apart from having a better physique and slower growth, there are no other changes.”

Ordinary iron-eating beasts that had reached level nine of awakening should be a little taller than Eleven, but Eleven was a little short.

However, compared to the ancient bloodline, Shi Yu felt that it should be because the evolution holy spring had strengthened Eleven’s life force.

“I see...” Lin Hongnian was silent. Unfortunately, Shi Yu’s Iron-eating Beast had only awakened a weak ancient bloodline. If only it had evolved directly...

This way, he might be able to study the evolution path of the iron-eating beasts more clearly.

At this moment, Hall Master Lin said again, “You’re going to the Ancient Capital this time, probably to take a look at the Ancient Capital University, right?”

“Yes.”

“When are you free? I’ll get Xiu Zhu to look for you. She’s also at Ancient Capital University.”

“Huh??” Shi Yu was stunned and did not react.

“Xiu Zhu is a student from the Ancient University’s Feeding Department. He’s also been over there for the past month. You’ll be interested in the research project she’s researching, for sure.”

“What?”

“A ruin related to the iron-eating beasts was discovered in the ancient capital. Currently, students from the Archaeology Department of the Ancient Capital University are researching it.”

“Because the main research topic of hers is the Iron-eating Beast, she was invited by the teacher to be a consultant.”

“At first, I didn’t pay attention to this news. After all, it’s just a ruin related to the iron-eating beasts. But after hearing that the iron-eating beasts have ancient bloodlines, my thoughts changed. Perhaps the ancient iron-eating beasts really are special.”

“I think you need to go.”

Iron-eating beast ruins had appeared in the ancient capital, and there were suspected to be traces of ancient iron-eating beasts.

Initially, Lin Hongnian didn’t mind, but after Shi Yu discovered that the iron-eating beast’s evolution path was ancient, the ancient iron-eating beast information immediately had value for reference.

In addition, Shi Yu had cracked the Ping Cheng Ruins and was related to the archeological world’s new star, Lu Qingyi. Moreover, his Iron-eating Beast had awakened its ancient bloodline. Therefore, no matter how he looked at it, Hall Master Lin felt that Shi Yu had to investigate this Iron-eating Beast Ruin.

“Are you free to go? I can get Xiu Zhu to pick you up over there.”

“It’s a pity that I still have something to do. Otherwise, I would definitely have gone along.”

Lin Hongnian’s mood was good. This was the first time he felt so close to discovering the evolution of the Iron-Eating Beast!

The dream of this father and daughter was to unearth the possibility of the iron-eating beast’s evolution.

Everyone in Ping Cheng knew this, and so did Shi Yu.

“It shouldn’t be a problem.” Shi Yu nodded with a surprised expression.

The evolution direction of the iron-eating beast? He was also confused. Now that a ruin related to the iron-eating beast had appeared, it was indeed worth looking at. Moreover, it happened to be in the ancient capital. How could he miss it?

“You just said that the Archeology Department of Ancient Capital University is in charge of this ruin?” Shi Yu had a strange expression.

If he also entered the Archeology Department of Ancient Capital University, would these people be considered future seniors?

Lin Hongnian said, “Well, they should be considered juniors of Xiu Zhu. After all, it’s just a small ruin related to the Iron Eater and not a ruin space. Not many people take it seriously.”

Shi Yu nodded and said, “By the way, Senior Lin also participated in the vocation assessment at the Ancient Capital Association, right? Hall Master Lin, how were her results at that time?”

Only after coming to Ancient Capital University did Shi Yu realize how intense the competition here was. Senior Panda was able to pass the vocation assessment here at the age of 18 and was even accepted by Ancient Capital University. It felt very strong.

“Her?” Hall Master Lin said, “When she participated in the vocation assessment, the Iron-eating Beast was just a beginner transcendent. It mastered the combination skill of proficient level Thunder Palm and expert level Hardening.”

“Apart from that, there’s also another transcendent creature with pretty good strength contracted.”

“However, there’s no point in using her as a reference. She participated in the assessment a few years ago. The difficulty of the vocation assessment is increasing every year.”

“But don’t worry. You’re stronger than her. The vocation assessment isn’t a big problem for you.”

Shi Yu :”...”

Why did he feel that he was the real son of Hall Master Lin? When it came to Lin Xiuzhu, Hall Master Lin only treated him like this, not his daughter. When it came to him, he clearly didn’t have a transcendent pet, but this mister directly appointed him stronger than Lin Xiuzhu.

He felt like Panda Senior would cry when she heard this...
