Chapter 811: Strong Enemy in the World Tournament (3)

811 Strong Enemy in the World Tournament (3)

Ling: "...I've preserved the data of the previous two light resources. As long as there are enough water resources summoned, I can try to study them."

"That's good. It's all up to you!!" Shi Yu's eyes were filled with tears. Fortunately, he had Susu and Ling. Otherwise, if the Starry Sky Egg couldn't hatch halfway, he would have to shut himself down.

Since he could do it, Shi Yu was relieved. He immediately summoned Susu and Ling and got Susu and Ling to load it together.

"Ning!" Susu, who was in the form of a Water Slime, wore mechanical glasses and an antenna mechanical hat and looked up at the sky.

The goal of doing this was firstly to let Susu benefit from Ling's luck enhancement and summon the water resources needed at once. Secondly, it could help increase Susu's strength and summon an even larger number of water resources.

Previously, absorbing all the resources required more than a day for the Space Beast Egg. The nutritional content it needed to completely hatch was probably not a small number.

"Let's begin."

Shi Yu took a deep breath and summoned Buggy again. He used the Imagination Domain to change the weather of the barren mountain here, covering the traces of them summoning the sea of stars. Then, he began to move.

This summoning... lasted for half a day. Shi Yu and the others summoned a lot of water resources. They were basically all level 5. When it was dark, it was only level 4.

Most of these resources didn't have high energy levels. They probably wouldn't be good either, because there were repetitions.

Could something that appeared repeatedly when drawing something be good?

After half a day, Shi Yu felt that he had suffered a huge loss. After all, Susu and Ling had even tried the Time Fruit just now, but they had only summoned level-5 resources. If not for the fact that Susu had unlimited energy, they would have suffered a huge loss.

Selling the Time Fruit directly was better than this.

"It's better than nothing. Perhaps it's these ordinary resources. After Ling studies them, they're the nutrients the Space Egg needs."

With this mentality, Shi Yu continued to develop telepathy at the side. It didn't delay his cultivation. Time was money.

Just like that... a day later.

The exchange competition had been going on for a day. On his side, there were still level 3 to 6 resources. He didn't like to sell them much. The most annoying time was when he only pulled down level 3 resources. Of course, the most impressive battle result also pulled down a level-six mutant water blob.

However, it was still lacking.

It made Shi Yu wonder if Ling's good luck bonus was really effective.

Forget it. As the Starry Sky Altar was gone, he didn't know when he would come to Tingxiang next. Shi Yu planned to summon it here for three days.

He summoned more strange water for Susu to study.

In the capital of Tingxiang, after a day, the overlord of Dragon Palace City and the contestants of Tingxiang had basically communicated.

In the end, there was no doubt that apart from the two Legendary-level masters in Tingxiang, the other three top-notch masters, even the number one person below the legend level of the new generation in Tingxiang, were beaten up by the overlord of Dragon Palace City.

Although top-notch masters had the strength to fight against overlords, it still depended on what overlord it was.

Among them, the two legends of Tingxiang fought alone with overlord pets. They were about evenly matched with the ordinary overlords of Dragon Palace City. Among them, Legend Roke challenged the Sky Penetrating Whale General, but even if seven pets attacked together, they were not its match.

Shi Yu had already known all of this through the Cube clone Ling had left at the exchange venue. In short, the exchange competition was relatively smooth, but Shi Yu's side was not very smooth.

The next day, Shi Yu did not even see a level-six resource.

Although the nutrients they needed had little to do with the level of the resources, there were no surprises after two days. It was inevitable that Shi Yu would sigh. If he wanted to pull down resources above level seven, he would probably have to wait for Susu to reach the totem level.

"I'm willing to sacrifice Yun An's 100 years of lifespan in exchange for a golden legend!" Shi Yu said casually to the sky after developing telepathy for two days.

At the side, Susu and Ling curled their lips. This was not sincere at all.

Huh?

However, a few seconds after Shi Yu finished speaking, Susu's expression suddenly froze. Ling, who was beside him, was also slightly stunned. They looked at the sky.

A purple light spot appeared in the deep sky like a star.

“What a strong energy wave...” Shi Yu was delighted when he observed the strange water through the contract with Susu and Ling.

Although he didn’t know if it had reached the level of a legendary resource, there should definitely be a level-eight resource.

“Susu, Ling, I wronged you guys. You guys are good.”

“Ning!!” Susu straightened its back.

It also felt that it hadn’t been easy.

Although it felt that this might be thanks to Ling’s Wind Blessing.

But soon, as the purple light in the sky became stronger and stronger, Shi Yu’s expression was slightly strange. He had an ominous feeling.

Ling’s expression was not very happy from the beginning to the end. It was very calm...

“Master, there won’t be good luck in the world for no reason.”

“The commotion of this strange water descending is gradually expanding. It’s even more dazzling than the water resources summoned just now.”

“It’s like a dazzling comet falling from the starry sky, as if it’s afraid that others don’t know that a rare treasure has descended and keeps scratching its head,” Ling said.

“Buggy’s Imagination Domain can’t cover its light at all.”

Shi Yu’s expression darkened. He felt that this was a scam.

He raised his head slightly and sighed. He only hoped that this unlucky water ball would land quickly... It was so slow...

....

Although he didn’t sense anything further away, in the nearest city of the three major factions on the battlefield of the three countries, something stirred.

Unscientific Beast Taming

Chapter 812: Strong Enemy in the World Tournament (4)

812 Strong Enemy in the World Tournament (4)

The experts inside undoubtedly discovered the abnormality in the sky and saw a purple meteor descending towards the battlefield area.

“Roar!!!”

In a mountain city in the Dragon Empire, a powerful overlord dragon slowly flew up and looked at the sky. It spread its fiery red wings and swept away the flames.

There was something strange, something fishy, and a treasure.

In another Forest City, a tall and handsome dark elf also hid in the darkness after seeing the phenomenon in the sky.

In the protective city of Tingxiang, the legend Beast Tamer, Jesse, frowned.

“I’ll go take a look. You guys pay attention to the changes.” After giving the order to his subordinates, he summoned a golden griffin and soared into the sky.

A treasure from outer space landed on the battlefield!

After discovering this, the three major factions immediately took action.

Although the few countries around Tingxiang had signed a peace agreement during the World Tournament, it was impossible not to fight for the descent of an extraterrestrial treasure.

Soon.

The Flame Dragon King from the Dragon Empire, Punkham, was the first to arrive. However, just as it arrived, its expression changed drastically.

It saw a totem ferocious beast.

It was an incomparably huge black yak, even larger than its Fire Dragon King body. Its entire body emitted an ominous aura of death. It was in the rolling black mist, and its eyes were dark blue flames.

It had sticky black flesh, a mouth dripping with mucus, and short distorted legs. At the end of its legs was a black hoof that could barely be called a “bull” hoof, making it emit a terrifying aura.

Its entire body emitted a faint deterrence!!!

This deterrence was only faintly revealed and not targeted at anyone, but just looking at this Black Meteorite Yak, this Fire Dragon King felt a huge pressure. It felt that the other party’s life level and deterrence level were definitely above its own!

How was that possible!

Flame Dragon King Punkham was shocked. It had mastered transcendent-level deterrence!!

However, although the deterrence level of this monster was only slightly revealed, it gave it a feeling that it was enough to crush it.

This... was probably not a totem-level monster!

The Flame Dragon King, Punkham, suddenly looked at the person on the Black Meteorite Yak. For the time being, he was considered a human.

He was wearing a gray robe, and his beard and hair were gray. His body emitted a twilight aura, and his eyes were sunken.

This person slowly raised his head and looked at the Flame Dragon King, Punkham, “Little guy, what’s the matter?”

“You’re disturbing my master.”

Shi Yu spoke slowly in dragon language and used the Psychic enhancement to enter the heart.

Dragon language!

Seeing that the other party had even mastered the Dragon language, the Flame Dragon King, Punkham, became even more cautious.

This was a dark-element totem. This human was its servant!

How unlucky!

They actually encountered such a monster.

The Fire Dragon King felt extremely unlucky.

It looked like this treasure was not easy to take.

[Damn it, where did this guy come from? Why is he so strong?] At the same time, Shi Yu cursed in his heart.

[Race Name]: Flame Dragon King

[Attributes]: Dragon, Fire

[Race Level]: High-level overlord (Quasi Mythical)

[Level of Growth]: Overlord

Energy Points: 90,130,000

Shi Yu felt that it was a scam. This was probably a dragon with strength comparable to General Whale.

Fortunately, Shi Yu had expected that an overlord would be attracted over in advance. He had Eleven, Buggy, Baby Ginseng, and Chi Tong put on makeup for the Black Meteorite Yak Puppet in advance.

At this moment, the Black Meteorite Yak's puppet looked no different from a real totem life form. This was also the reason why the Flame Dragon King, Punkham, was afraid.

Of course, if they really fought, Shi Yu and the others would probably fall into a bitter battle when facing this guy. It was completely uncertain if they could win.

If Eleven was already at the overlord level, Shi Yu was confident, but now, facing a top-notch overlord...

Even if he could win, the price would be very heavy. If possible, Shi Yu was unwilling to fight.

After all, he wasn't here to cause trouble.

"Who are you?" In the face of the totem, although the Flame Dragon King, Punkham, was afraid, he wasn't too afraid.

Shi Yu smiled faintly and ignored him. Instead, he looked into the distance.

At this moment, as a black wind swept over, a dark-skinned white-haired elf with pointed ears also appeared in midair.

He also looked at the Black Meteorite Yak and Shi Yu in silence before looking at the Fire Dragon King.

Obviously, they were all experts attracted by the purple strange water descending from the sky. The speed at which they arrived was faster than Shi Yu imagined!

[Race Name]: Dark Elven King

[Attributes]: Dark

[Race Level]: High-level overlord (Quasi Mythical)

[Level of Growth]: Overlord

Energy Points: 89,110,000

Shi Yu felt that it was indeed a little dangerous overseas.

If he had known earlier, he would have brought the cat. He would have been more confident.

At the same time, what made Shi Yu feel intrigued was that the index of the new Intelligence Bureau he had joined also had new information about the two overlords.

The Fire Dragon King and the Dark Elven Prince were suspected to be the representative overlords of the demigod faction, the Dark Night Forest, and the Dragon Empire, participating in the World Tournament. Their strength was extremely dangerous!!

Apart from that, the two of them each had a legendary hybrid Beast Tamer as a contracted servant. Because their bloodlines were the same and they specialized in contracts, they could provide a powerful battle power increase.

In the Intelligence Bureau index, it reminded them to be extremely careful of these two overlords. At the same time, they had to obtain more information about them when the conditions allowed.

“Ridiculous,” Shi Yu thought to himself. He hoped that these two guys wouldn’t be ungrateful and obediently leave the purple strange water to him. He hoped they didn’t cause trouble. Otherwise, even if he couldn’t deal with them now, they would have a good time during the World Tournament!

[Unscientific Beast Taming](#)

Chapter 813: Target: Totem

813 Target: Totem

“Looks like I came at the wrong time.”

After the Fire Dragon King and the Dark Elven Prince, the legend of Tingxiang also rode his griffin to descend here.

He looked at the scene solemnly.

The mysterious totem Beast Tamer, the enemy top-notch overlord of the Dark Night Forest and the Dragon Empire!

It looked like the purple starlight in the sky had attracted a lot of commotion.

“Another one,” Shi Yu muttered in his heart.

< Name > Golden God Gryphon

[Attributes]: Metal, Wind

[Race Level]: Mid-level overlord

[Level of Growth]: Overlord

Energy Points: 79,110,000

This legend from Tingxiang should be a general guarding the border of Tingxiang. His strength looked pretty extraordinary.

Although the pet attributes didn't seem to be comparable to the Flame Dragon King and the Dark Elven Prince, if the Beast Taming Talent and the support of other pets were included, they weren't necessarily much weaker.

It was one of the few legends Shi Yu had seen with strength. It was much stronger than Aunt Hua's 50 million butterflies.

It was so annoying.

“You guys...” Shi Yu's voice in the form of Old Demon Lin became deeper and deeper.” Don't tell me you're here for that thing in the sky.”

“When a treasure descends, the capable should take it.” The dark elven prince smiled warmly and sized up the Fire Dragon King, Shi Yu, and the general of Tingxiang in an unfriendly manner.

He was naturally familiar with the Fire Dragon King and General Tingxiang. He felt that they were very difficult to deal with.

As for this mysterious totem Beast Tamer, he made the dark elf prince the most afraid. He was a dark-element Beast Tamer, so he could clearly feel the deepness of the terrifying dark power on the Black Meteorite Yak.

However, even if the opponent was a totem, if the resources that descended were very precious and reached the legendary level, he would still try to fight for it.

Although he might not be a match for the totem, he also believed that he wouldn't be defeated easily.

“Nicholas, do you want to snatch the treasure from me?” The Flame Dragon King, Punkham, looked at the Dark Elven Prince and said.

“Lizard, don't be too arrogant.”

Boom!

The deterrence of the Dark Elven Prince and the Fire Dragon King erupted with a bang, instantly tearing apart the sky. Red and black deterrence waves collided.

Crack!!!

The powerful deterrence even affected Shi Yu and the others.

Shi Yu was expressionless. They were all transcendent-level deterrence fluctuations... The strongest overlords of these large factions were really troublesome, and they didn't have any respect for the totem level...

From the looks of it, they were going to snatch it from him?

"These guys are really crazy." Tingxiang's general fell silent.

They actually wanted to snatch something from the totem.

Just as well.

The reason why Tingxiang was the weakest of the seven countries and could still be passed down despite being threatened by the Dark Night Forest and the Dragon Empire was firstly because the Elven Empress was strong enough. Secondly, Tingxiang was in the Seven Nation Alliance and was protected by the alliance. Thirdly, the Dark Night Forest and the Dragon Empire were not allies, and their relationship was not very good.

It could be said that if the totem factions in the world were united, then the humans had nothing to do.

In nature, the conflict between some races was even greater than the conflict between them and humans.

They all wanted to eat their lives. The ginseng baby race didn't think that other races were any cuter than humans. This kind of check and balance was one of the important reasons why humans could rise.

"Coming." Suddenly, the dark elven prince and the Flame Dragon King stopped facing each other and looked at the sky.

The purple water ball descended faster and faster, already descending ten thousand meters into the sky.

The Dark Elven Prince and the Fire Dragon King focused their attention and strength, preparing to snatch it. At the same time, they were secretly wary of the mysterious totem Beast Tamer.

But in the next moment, they were stunned.

Because as the purple strange water ball approached, the energy fluctuations on its body were clearer.

Although its power was not small, its energy level was only level eight.

It was not a legendary resource.

For a moment, Nicholas and Punkham hesitated, wondering if they should fight over a level-eight resource.

After an intense battle, the consumption and damage caused might not be something a level-eight resource could make up for.

Just as they hesitated, the gray-robed Shi Yu snorted. The air began to hum and vibrate. Almost corporeal spiritual power formed a blue outline around Shi Yu.

After entering the Psychic state that increased with Buggy, his mental strength level immediately reached the level of a top-notch overlord, not much inferior to the Dark Elven Prince and the Fire Dragon King. He opened his blue eyes and looked at the sky.

A powerful Psychic wave bloomed from his body and shot into the sky to grab the strange water.

“On account of your elders, I forgive your rudeness, but I want to see who wants to snatch it from me,” Shi Yu said coldly. Level-eight resource!

Damn it, it wasn't at the legendary level. However, even if it was only a level-eight resource, Shi Yu definitely couldn't let others snatch it away.

Was it easy for him?

No, forget about level-eight, even level-one resources couldn't be snatched away from him! It was his!

Moreover, this resource came from outer space. Although its energy level was only level eight, the quality of the resource might have reached a higher level. He couldn't give up. It might be a key resource to hatch the Starry Sky Egg.

Boom!

The Psychic power that shot into the sky stunned the general of Tingxiang, the Prince of Dark Elves, and the Fire Dragon King for a moment. Their pupils constricted together as they looked at the gray-robed old man on the Black Meteorite Yak in disbelief.

[Unscientific Beast Taming](#)

Chapter 814: Target: Totem (2)

814 Target: Totem (2)

Because they could clearly sense that this power wave erupted from this old man.

A mental wave at the level of a top-notch overlord.

Who was the other party?

“A hybrid?” The dark elven prince's heart trembled. After all, even his legendary hybrid servant didn't have such a terrifying mental wave. It wasn't even one-tenth of Shi Yu's.

“Who exactly is this guy?”

The Fire Dragon King didn't attack either. It was similarly shocked by the changes in Shi Yu's body. This was the use of the max-level Psychic skill, Psychic Link. It was very rare. What was rare was that both parties had to be connected and master the max-level Psychic power.

Perhaps for top-notch totem creatures, mastering this Psychic skill was not difficult, but for humans, even hybrid humans, it was too difficult.

Shi Yu's move was peerless in the world, shocking the two top-notch overlords present again. At the same time, the deterrence on the Black Meteorite Yak seemed to have become stronger. Its indifferent

ghost fire eyes revealed the concept of death as they landed on the Dark Elven Prince and the Fire Dragon King.

Boom!

Although it was very weak and didn't affect them much, a deterrence skill that directly hit the bloodline in their hearts made them even more serious. This max-level deterrence skill was undoubtedly very brilliant, letting the Dark Elven Prince and the Fire Dragon King know that this was a warning to them.

[We can't be enemies with it.] In an instant, the dark elven prince and the fire dragon made a judgment.

Making an enemy of a totem and his mixed-blood Beast Tamer servant for a level-eight resource was not a wise choice, especially at a critical moment like the World Tournament, even if they weren't afraid.

General Tingxiang naturally didn't attack either. He supervised the dark elven prince and the fire dragon the whole time. In the end, Shi Yu's Psychic power locked onto the purple strange water ball and wrapped it up before putting it back into the ruins space!

Unknown resource!

But it contained strong star power.

He should know the effect after letting Ling study it later.

The other strange water balls summoned were also in this step.

Seeing that the strange water had been completely taken away by Shi Yu, the three parties were in a stalemate.

"In that case, I'll give this totem senior some face." The dark elf prince was the first to smile and give up fighting. At the same time, he said, "Senior, you look unfamiliar. You shouldn't be an expert from the Tingxiang Continent, right? You're a guest. Do you want to come to our Dark Night Forest to sit?"

After giving up the competition, the dark elven prince wanted to rope in the mysterious Black Meteorite Totem and Shi Yu.

"What's there for you to go to the Dark Night Forest? Come to our Dragon Empire." The Fire Dragon King spat out a mouthful of flames. Clearly, it had also given up fighting. It wasn't worth offending the totem for a level-eight strange water that it definitely didn't need.

Throughout the whole process, General Tingxiang didn't dare to interrupt, because he knew that the gray-robed old man who recognized totems as the master was definitely not on the same team as the Seven Nation Alliance.

At this moment, Shi Yu had a strange expression. Alright, these guys sure know how to follow the wind.

Seeing that it was only a level-eight resource, it immediately didn't want to snatch it anymore.

Shi Yu heaved a sigh of relief. He didn't want to fight them either.

The other party's race level, growth level, and skill proficiency were not inferior to Eleven and the others. Even if he could obtain the help of General Tingxiang, it would be a battle where both parties would suffer. He didn't want to fight.

He would talk about it when he returned in two months.

"Sure, this is my master, the Great Dark Heavenly Saint Meteorite Bull God. We came to Tingxiang this time with the intention of visiting the two races," Shi Yu said. "I'll naturally visit later."

Upon hearing that, the expression of General Tingxiang beside him changed drastically. Shi Yu was silent. He felt that this alternate identity was becoming more and more like a villain.

Unfortunately, he was too weak. Otherwise, he really wanted to go to the Dark Night Forest and the Dragon Empire as a guest.

"I say..." At this moment, seeing the change in the situation, the general of Tingxiang also spoke.

His expression was unfriendly as he said, "This area has been Tingxiang's territory since ancient times. Aren't you too disrespectful to Tingxiang by being so presumptuous in Tingxiang's territory?"

He spoke domineeringly, and the deterrence of the Golden Divine Griffin under him finally revealed itself, attracting the disdainful gazes of the Dark Elven Prince and the Flame Dragon King.

This battlefield was indeed the territory of Tingxiang, but now...

Just as they were about to counterattack, their expressions suddenly changed. They looked into the distance and turned to leave.

Shi Yu was stunned on the spot.

A moment later, a high and mighty creature with long green hair that looked like a goddess descended. She looked at the gray-robed old man on the battlefield and frowned.

"Your Majesty!" General Tingxiang was delighted to see the Elven Empress descend. The reason why he was so arrogant just now was because he knew that reinforcements had arrived.

In other countries, legendary-level experts rarely appeared and were all cultivating bitterly. However, because Tingxiang was the weakest country and was surrounded on all sides, the Elven Empress had no choice but to appear stronger. Even if there was the slightest movement, she would appear and let the enemy feel threatened.

Although she rarely attacked, it was indeed useful and had a deterring effect.

At this moment, a rare treasure and a mysterious totem Beast Tamer had appeared in the battle area of the three countries. The general of Tingxiang naturally reported it immediately, but he didn't expect Her Majesty to personally come to the scene.

Although the various countries were currently in the midst of a peace agreement, and the Dark Elven Prince and the Flame Dragon King wouldn't be killed by the demigods of Tingxiang, they were clearly still unwilling to face this Elven Empress directly and left immediately.

“I didn’t expect that the heirs of the Dark Night Forest and the Dragon Empire would actually be deceived by this pretense.”

Unscientific Beast Taming

Chapter 815: Target: Totem (3)

815 Target: Totem (3)

Just as she descended, the Elven Empress saw that the Black Meteorite Yak was strong on the outside but weak on the inside. Her gaze landed on “Lin Ying”.

She was also very puzzled. Where did this old man come from?

“Your Majesty, the treasure that descended from the sky just now was taken by this old man.”

“He claims to be under the Great Dark Heavenly Saint Meteorite Bull God,” General Tingxiang said.

It meant that he didn’t look like a good person. She should kill him.

Shi Yu : “...”

Sensing the Elven Empress’s gaze, Shi Yu panicked.

Wait a minute.

[Cough, cough, cough. Your Majesty, Your Majesty, it’s me. Don’t attack. I’m Shi Yu, on the same team.]
Seeing this, Shi Yu coughed dryly and immediately said telepathically to the Elven Empress.

He opened his green eyes and looked at the Elven Empress.

[Disguise, it’s a disguise to scare the totem countries.]

He immediately explained that he didn’t want to be slapped to death by his own people.

Elven Empress Sylphra: ...

[You brat...]

Sylphra was silent. She looked at the gray-robed old Shi Yu with a little stomach ache and was momentarily stunned. She carefully observed Shi Yu. Just now, her attention was all attracted by the Black Meteorite Yak. She could tell at a glance that it was a fake trick on the Black Meteorite Yak and ignored this human.

From the looks of it, the traces of time on his body were also very strong. It didn’t look normal.

Shi Yu?

Seeing this, the Elven Empress Sylphra was speechless.

Why didn’t this kid preside over the Dragon Palace City exchange in Tingxiang but instead came to the border to scare their city guardian general?

She now knew why the Dragon God didn’t want Shi Yu to run around recklessly.

“I understand. You can leave first,” Sylphra said to the general.

“Yes!” The Tingxiang general immediately nodded and left according to the order.

Then.

The Elven Empress looked at Shi Yu again. Shi Yu also looked at her in embarrassment. He really wanted to say to the Empress that she was so free. She even descended personally for such a small matter.

....

At the same time, the Dark Elven Prince and the Flame Dragon King quickly returned to their territory with shocked expressions. They didn't know if that Great Dark Heavenly Saint Meteorite Bull God could successfully leave under that woman.

“Investigate the totem of a gray-robed old man and the Great Dark Heavenly Saint Meteorite Bull God.”

After they returned, they immediately got their subordinates to investigate the information about Shi Yu's alternate identity. They were a little concerned about this outsider who had come to Tingxiang.

At the same time, after explaining the cause and effect of hatching the Space Emperor's pet egg to the Elven Empress, Shi Yu was pulled back to Tingxiang by the Elven Empress.

“It's very dangerous outside. There will be many situations like that just now. I promised the Dragon God to protect you, so you should stay obediently in Tingxiang.” Sylphra looked at Shi Yu with a headache.

She didn't expect Shi Yu to run out of Tingxiang and almost fight the heir of the Dark Night Forest and the Dragon Empire.

“Alright, alright.” Shi Yu nodded.

“In addition, you should have seen the Dark Elven Prince and the Flame Dragon King, right? They're the heirs of the Dark Night Forest and the Dragon Empire. Their status in this faction is comparable to the eldest prince of Dragon Palace City, the Golden Dragon Prince, and their strength won't be much inferior. Therefore, little guy, you have to be careful during the World Tournament. Don't show off too much. Such guys won't be rare in the World Tournament.”

“In fact, it's not impossible that even a totem might appear.”

The Elven Empress reminded Shi Yu.

In the world competition, the totem countries had an advantage over the seven countries.

Their contestants were mainly transcendent lives, and human Beast Tamers were servants.

The World Tournament only limited the age of human Beast Tamers.

Therefore, there were no strict restrictions on the battle power they could fight.

After all, servants could be changed at will. It was not difficult to nurture a legendary servant under the age of 30 against such a demigod totem faction.

However, the contracts of the seven countries were mainly human.

It was very difficult to directly contract an old top-notch overlord. It was basically a pet cultivated by him, and its strength was restricted.

Of course, it couldn't be ruled out that some legends of the seven countries would choose to break a contract slot and cooperate with some old guardian overlords in the country to fight in the world competition. However, such old overlords in the seven countries basically had Beast Tamers. It was just that the Beast Tamers were dead, so it was very difficult to accept a new master. This condition was very difficult to achieve, unless the two generations of Beast Tamers were related by blood, or the top-notch overlord was an exclusive mechanical overlord built by the country at a huge cost. There was still a certain possibility.

In addition, the news of the World Tournament came too suddenly. There was only a year of preparation time, so it might not be enough time to train.

However, the seven countries also had a certain advantage. The Beast Tamers of the totem country basically only served one master. They were basically one master and one person. They opened up a special exclusive Beast Taming Space. On the Beast Tamers' side, most Beast Tamers of the seven countries cultivated a lot of pets. If a battle happened, the number of pets would definitely have an advantage.

"Yes, I saw it. It's indeed very strong." Shi Yu nodded.

This kind of top-notch overlord with invincible aptitude had even cultivated high-level deterrence to perfection. Just like when Shi Yu faced the Void Mantis back then, it was not something he could match at his current stage. It was even fiercer than the Void Mantis. On his side, he indeed didn't seem to have any advantage at the moment.

He could only continue to add points and take it one step at a time.

However, Shi Yu's expression was solemn.

There would be totems?

Was she serious?

At that time, he would have a certain amount of confidence in an overlord like the Flame Dragon King, but a totem level...

Even if Baby Ginseng self-destructed, it definitely couldn't be killed so easily in the face of a totem in perfect condition.

[Unscientific Beast Taming](#)

Chapter 816: Target: Totem (4)

816 Target: Totem (4)

No, he had to strictly ask Eleven and the others.

Before the world competition, everyone had to have totem battle power!

“Next, you can move around in Tingxiang.” Lu Qingyi cracking the ruins had brought considerable gains to Tingxiang. The Elven Empress felt that Shi Yu shouldn’t be bad either.

“Alright,” Shi Yu had just replied when his expression changed slightly.

Some information appeared in front of him.

From the tenth bureau index.

He had already joined the Intelligence Bureau. The index of the tenth bureau could actually share a lot of important information. Apart from that, the index of the tenth bureau had been specially modified and had a very powerful function.

It was that he could ignore some restrictions and communicate. For example, using a normal cell phone, he couldn’t communicate with the people in Dong Huang in Tingxiang at all, but through the tenth index, he could.

At this moment, in the country, a message was sent to him through the tenth index.

Fang Lan had disappeared and was suspected to have been sucked into a special ruin. At the moment, the ruin couldn’t be cracked, and the risks inside were unknown.

Fang Lan, the trainee member of Bureau 11 who summoned the Space Emperor Ruins.

Obviously, something had happened to her. As Fang Lan’s guide in the bureau, Shi Yu definitely had to receive the news first.

“What’s wrong?” Seeing Shi Yu’s expression change, the Elven Empress said.

“Your Majesty, something happened in Dong Huang. The situation of a junior from Bureau 11 falling into the ruins and we don’t know her situation. She’s only a Beast Tamer intern. She might be in danger. I have to rush back immediately to take a look.”

At this moment, he couldn’t care less about strolling around the Tingxiang ruins. The safety of the members of Bureau 11 was definitely more important.

The Elven Empress didn’t say anything. She only nodded and said, “Then you deal with it.”

Since Shi Yu had already chosen a sprite, the Elven Empress felt that it didn’t matter if the ruins were cracked or not. In any case, with Qi’s relationship, Shi Yu would come to Tingxiang often in the future. There was no hurry.

“Yes.” Shi Yu nodded and immediately prepared to return to the country.

At this moment, the Dragon Palace exchange had yet to end. It could be said that it was still early. Apart from the battle, the overlords of the Dragon Palace naturally had to travel around Tingxiang. Shi Yu definitely couldn’t wait.

Unfortunately, he couldn’t contact Senior Lu and the gem cat at this moment. Shi Yu could only drag Qi away. After informing Ice Dragon, he returned to the country.

...

Dong Huang, Space Capital.

This was the second time Fang Lan had come into contact with ruins.

However, this time, it was a little sudden.

At this moment, Fang Lan's parents were extremely anxious.

If Fang Lan's strength could already take charge, they wouldn't be so anxious. However, Fang Lan was only a high school student and had just become a Beast Tamer. Her pet was only at the Awakening level. With this strength, she couldn't resist at all when she encountered danger.

Because of this, Principal Feng also came to the place where Fang Lan disappeared. He also called the other members of Bureau 11 to try to communicate with the ruins and crack them.

Just like when Shi Yu disappeared in the ruins of Emperor Wu, these archeological big shots mobilized.

Unfortunately, no matter who it was, they couldn't find Fang Lan, who had been missing for several days.

Helpless, Principal Feng could only ask Bureau 10 to contact Shi Yu to see if he and Lu Qingyi had any ideas.

There weren't many members of Bureau 11 to begin with, so Fang Lan, a future member, couldn't have something happen to her during the internship stage.

"How's the situation?"

Shi Yu returned to Dong Huang very quickly. After he arrived, he immediately contacted Principal Feng.

"You're back, Shi Yu."

"Do you remember Fang Lan's two entry missions?"

Shi Yu nodded and said, "One is to complete all the mechanical and archeological knowledge from high school to university in two years."

"One is to investigate why she can hear the voice of the Space Emperor Ruins and whether she has anything to do with the Space Emperor."

"Yes." Principal Feng nodded and said, "This girl disappeared here when she was investigating more information about the Space Emperor."

"There was originally an ancient battlefield ruin here. It was a protected area. I originally thought that it was just an ordinary ruin, just like the iron-eating beast ruin in the Ancient Capital, but who knew that there was also a ruin here that was summoned by Fang Lan, who came to investigate."

"Then, she was sucked in, and the current situation is still unknown."

"There's no entrance to the ruins?"

"No, the ruins are currently in a completely closed state. The level of the ruins isn't low. It should be a high-level ruin," Principal Feng said.

“I’ll try to find it.”

Shi Yu nodded. At this moment, he was the core of Bureau 11.

At the moment, Shi Yu, who had mastered the full-level Psychic power and could connect to Buggy’s mind and transform into a human overlord, was incomparable to the ordinary legends in Bureau 11, be it the development of telepathy or his affinity for the ruins space and mystic realm space.

It was because of this that Principal Feng quickly called Shi Yu back after they couldn’t resolve it.

“Ling.” At this moment, only the Dragon God, the Elven Empress, and the others knew that Ling had successfully evolved into a Mythical race. At that moment, when he encountered such a thing, Shi Yu decisively summoned Ling, planning to let it possess him and increase his luck.

However, before Shi Yu could plan to fight, a spatial ripple suddenly appeared in the sky.

In the outside world, Principal Feng, Shi Yu, Grandma Li, and the others were stunned. In the camp, Professor Fang and his wife were also stunned.

Right on the heels of that, everyone saw light and shadow materialize. Fang Lan and her mechanical Tyrant Dragon came out of the ruins.

Shi Yu : “...”

[Unscientific Beast Taming](#)

Chapter 817: Target is Totem (5)

817 Target is Totem (5)

“I feel useless coming back,” Shi Yu said.

Ling: “Master, is it possible that this is also our good luck bonus?”

“You...” Shi Yu fell into deep thought. He felt that he couldn’t take credit for anything in the future. It was too easy for Ling to take credit for itself. No, he had to cut it. This way, he wouldn’t be able to experience his intelligence and talent.

“Lanlan.” After Fang Lan came out, everyone ran towards her, worried about her.

At this moment, Fang Lan also had a look of realization. She felt like a lifetime had passed.

“Dad, Mom, Grandpa Feng, Grandma Li, Senior Shi Yu.” She looked at the crowd surrounding her and immediately knew how much commotion her disappearance had caused.

“Sorry to have made you worry.”

“Little Lan, what happened? Did you encounter any danger?” Principal Feng said.

Fang Lan shook her head and said, “No, no. It’s just... I encountered a remnant array spirit of the ruins.”

She looked at Shi Yu happily and said, “Senior Shi Yu, I understand why I can summon the Space Emperor Ruins.”

“Has Bureau 11’s assessment mission been completed?”

“Yes.” Shi Yu nodded and said, “What’s going on?”

“That array spirit seems to have said that I’m the descendant of Senior Space Emperor. It also woke up because it sensed my bloodline.”

“What!” When Fang Lan finished speaking, Principal Feng was shocked.

Fang Lan’s parents were also shocked and immediately looked at each other.

Their family was the descendant of Dong Huang’s fifth legendary Beast Tamer, the Space Emperor??

“As expected.” Although Shi Yu was also very shocked to receive confirmation, this seemed to be the only explanation why Fang Lan, who knew nothing about archeology back then, could summon the Space Emperor Ruins where the Void Mantis was.

She really had the Space Emperor bloodline.

Grandma Li was rather shocked. “You should be the first descendant of an emperor, right?”

Mechanical legendary and Lin Feng legendary were relatively close to the modern era, so it was not strange for them to leave behind descendants. However, the five legendary emperors were relatively far from now. After experiencing the chaotic totem world, their descendants were definitely the number one target of the totem clans. It was very difficult to pass them down.

Among them, when they learned that Fang Lan had the bloodline of the Space Emperor, everyone was shocked and felt that it was acceptable.

Because the Space Emperor was the latest legendary emperor. Moreover, it was said that the Space Emperor had the most children.

The Space Emperor came from the spatial-type Beast Taming Family, the Wang Family. His family presided over the spatial-type, and a member of that family was a Titled Legend. Even in troubled times, such a powerful family could stand tall, so the Space Emperor could be said to have been born with a golden spoon in his mouth.

It was said that when the Space Emperor was 15 years old and had just become a Beast Tamer, he had his first child with his family’s marriage partner.

In ancient times, marriage was generally earlier, and people were encouraged to have more children in order to strengthen the human race.

According to the records, the Space Emperor had a total of 23 children and was the legendary emperor who could give birth the most. Therefore, it was understandable if he left behind a bloodline.

However, because the level of the Spacetime Emperor was not high, and the talent of the various beauties was not the same, the talent of the heirs of the Space Emperor was not top-notch. Of course, this was also compared to top-notch geniuses. Compared to ordinary Beast Tamers, they were definitely still geniuses. They all had legend’s aptitude.

“Do you know which son of the Space Emperor was your ancestor?” Principal Feng asked.

Fang Lan nodded and said, "That array spirit senior said that it's the eighth son of the Space Emperor, Wang Mian. He's my ancestor."

"This array spirit is also related to Ancestor Wang Mian."

Wang Mian... Principal Feng and Grandma Lin looked at each other. They knew that because of the Void Mantis, Lu Qingyi had revealed all the assets of the Space Emperor's children.

The eighth son of the Space Emperor, Wang Mian, finally reached the Legend level. He didn't inherit the Space Emperor's spatial talent and inherited his mother's light-element strengthening talent. He was considered a relatively transparent prince.

"Good daughter." At this moment, seeing that his daughter was fine, Professor Fang was relieved. He immediately said, "Good daughter, did our ancestor leave any inheritance or anything?"

Principal Feng, Grandma Li, and Shi Yu were silent. It was too real.

That made sense. If they were descendants of legendary emperors, they would definitely covet their ancestor's inheritance. That was a legendary.

It didn't make sense without a few Mythical resources.

Fang Lan nodded. "Senior Formation Spirit taught me a set of formations created by the Space Emperor. It's an army skill."

She took out a formation map and said, "The cultivation method is recorded in this aspect. It seems to be a light-element skill that's related to stars."

Fang Lan showed everyone the blueprint.

It recorded the materials and methods needed to cultivate this kind of "Four Symbols Star Formation".

With a rough look, Principal Feng and the others confirmed that it was an important lost army formation. Fang Lan had gained a lot this time.

....

After confirming that Fang Lan was fine, Shi Yu felt much more relaxed. Next, when she completed another assessment mission, he could officially let her become a member of Bureau 11.

This girl was really not simple. She was actually the descendant of the Space Emperor. This made Shi Yu sigh. The Space Emperor was a super second-generation heir. It was said that he rarely lost in his life. After becoming a Beast Tamer, he displayed shocking talent and grew quickly under the protection of his titled legend grandfather. Later on, he was even protected by the Dragon God and finally became a legendary expert.

It could be said that in that era, be it other human geniuses or totem clans, they lived under the shadow of the Space Emperor.

Like every legendary emperor, he was the favorite of the era.

At the thought of this, Shi Yu not only looked forward to it, but he also had the urge to meet these legendary emperors.

Ever since the Dragon God asked him to explore the Time Dragon Vein in the future, Shi Yu had this urge.

And now that he had encountered Qi in Tingxiang, Shi Yu's urge was even stronger. If Qi really mastered Time Travel, would he have a chance to return to ancient times and spar with Emperor Shi, Emperor Wu, Empress, Dragon Emperor, and Space Emperor?

"Haha, it was a false alarm. It's good that you're fine. I made you run back. Do you still want to return to Tingxiang next?" After everyone realized that Fang Lan was fine, Principal Feng said to Shi Yu.

As for Shi Yu, he was speechless. Good lord, if he went over again and returned, it wouldn't be too much.

"Forget it," Shi Yu said.

In any case, with the relationship between Qi and the Elven Empress, he could go to Tingxiang anytime he wanted in the future. There was no hurry.

"No, I'll go into seclusion to cultivate." Shi Yu sighed.

Seeing a totem country world competition contestant like the Dark Elven Prince and the Fire Dragon King, he felt a little pressured. Moreover, according to the Elven Empress, there might even be a mixed-blood legend who contracted a totem above his level.

For the blessings of the World Tree, he had to work harder.

"Alright, by the way, study the array Fang Lan brought back when you're free. You can send it to your armies to see if it's useful," Principal Feng said.

Shi Yu nodded to indicate that he understood. He ignored Tingxiang and Dragon Palace City and directly chose to return to Ping Cheng with Qi in the ruins space, preparing to introduce her to the local customs of Dong Huang.

Right on the heels of that, it was time to enter seclusion to increase points. This time, he planned to increase superalloy to perfection in one go and let Eleven evolve and break through. He was still short of more than 40 points, about a month. However, in addition to the fact that the skills of the other pets had yet to be maxed out, there was not much time left for him. He had to ensure that at the start of the World Tournament, he had the battle power to match the weakest totem and defeat the invincible overlord.

[Unscientific Beast Taming](#)

Chapter 818: Evolution of God Eleven

818 Evolution of God Eleven

Hmph, hmph, hmph~

After returning from Kong Capital, Shi Yu returned to Ping Cheng happily.

He no longer wanted to go all the way to Tingxiang.

Running back and forth made it easy to get carsick.

Before returning, Shi Yu had brought Qi along. He had expected that he couldn't be bothered to go back.

At this moment, Qi was in the ruins.

Shi Yu threw her in early in the morning and let her get to know the other members of the team first.

However, when Shi Yu took the time to look at the ruins, he saw that Qi's face was a little pale.

At this moment, the 1.2-meter-tall Qi hugged the Time Umbrella and was extremely nervous.

Who knew what she saw after entering?

She saw the nine suns and a black and white bear "warming up" in the sun.

Even from afar, the hot temperature instantly made Qi feel that her body was about to melt.

She also saw a butterfly welcoming the lightning with its body and constantly bathing under the terrifying white lightning.

The lightning tore through the ground with just a trace.

She even saw a ginseng baby sitting cross-legged in the snowstorm, meditating and concentrating.

The violent snowstorm seemed to have frozen time, and the trace of cold air it revealed froze her thoughts.

Qi panicked.

She understood what Shi Yu meant by "it will be very bitter to cultivate with me".

"What do you think?" Shi Yu arrived at the ruins and asked for Qi's opinion.

Qi's face was pale.

She felt that he probably wouldn't last a day under this training.

However...

At the thought that Shi Yu's pets could persist, she... she definitely could too.

"I believe I can," Qi said with a serious expression.

"I can definitely do it," she encouraged herself.

Shi Yu was surprised. "You're so confident? I originally wanted you to start from the foundation, but since you're so confident, I'm relieved. Let's directly undergo willpower training."

Qi: ???

Her cherry blossom-like eyes were filled with confusion.

"Ling, help Qi formulate three meals a day, daily routine, and training plans."

“Yes, Master.” The green and white Rubik’s Cube condensed in midair and appeared beside Shi Yu.

The white-haired loli inside looked at the pink-haired loli in front of her and said, “Qi, right? From today onwards, I’m your instructor.”

“Just call me Ling.”

“Yes... Teacher Ling.” Qi felt that she had to finish her boast even if she cried.

“Let Qi train with Little Ji and Duckie first,” Shi Yu said.

“Little Ji, Duckie?” Qi revealed a confused expression.

“My second team pets.”

Shi Yu smiled and said, “Now, our big family is divided into teams one and two.”

“Among them, the members of the first team include Eleven, Buggy, Baby Ginseng, Chi Tong, Susu, and Ling.”

“Their strength is uniformly at the monarch level. However, no matter who it is, they have the strength to defeat overlords above their level.”

“Oh right, those equipment of yours were made by the six of them. For example, the huge sword is the power crystal of Eleven’s hardening skill and the Lightning Rod skill. For example, the bow and arrow are the power crystals of Baby Ginseng and Ling...”

“The dozen or so pieces of equipment are all toys created by them through their skills. The artifact spirit among them is also Buggy’s phantom ability.”

Qi opened his mouth slightly. Toy?

“That’s right, it’s a toy. At the moment, the strength of Team One is like this. Even if they don’t attack themselves, they can be invincible among monarchs with their clones.”

Qi: ∑(⊃°Д°;) ⊃ what!!

Her first thought was that it was ridiculous, but she suddenly recalled what Big Sister Annie said in the exchange competition.

Shi Yu’s Iron-eating Beast... Monarch-level Iron-eating Beast... easily crossed one level and shattered her.

Therefore, this might all be true...

Not only was the monster that Iron-eating Beast, but everyone else in the first team?!

“I’m currently a level-six Beast Tamer. I only have six contract slots. At the moment, I have a contract with all the members of the first team.”

“As for the members of the second team, an ancient Tyrant Dragon, mechanical phantom beast of middle-level overlord race, and Duckie, an abyss half-god reincarnation. They are transcendent races that have the will of overlords and can easily break through to the overlord level in the future.”

Qi was stunned again.

Mechanical phantom beast.

As she had been chosen by Shi Yu, she naturally learned about Shi Yu's achievements from Master Ge Lin and the others.

A mechanical phantom beast that had fused the power of the overlord race, the Earth Dragon, and the ancient overlord race, the Tyrant Dragon?

Could mechanical phantom beasts still fuse two biological illusions?

Just the dragon race was powerful enough. The Dragon Empire was still the great enemy of Tingxiang, and the ancient Tyrant Dragon was said to be the ruler of the land during a certain period of the totem era... The combination of the two powers was unbelievable.

Apart from that, a demigod... reincarnated?

Qi was at a loss again. Was it really demigod level? The demigod whose strength matched that of the Elven Empress...

"Little Ji and Duckie are both commander rank at the moment. Their potential is not bad, but their strength isn't enough to enter the first team. They can only be the second team. Next, train with them."

Qi: (*+_+*) ~ Team Two, Team Two?

"Yes, next, you can be considered a member of my second team. You have to wait for me to break through. However, you can't casually contract with me after breaking through."

"It depends on the competition spots for the second team."

"I can still fuse more phantom beast power next. Duckie was a demigod-level expert in its previous life and is currently trying to control the power of its previous life. They all want to enter the first team, so you have to work hard."

"Compared to them, you have a huge advantage, which is that you still have a legendary resource. After the first team slots are opened, you can try to challenge the members of the first team to advance."

[Unscientific Beast Taming](#)

Chapter 819: Evolution of God Eleven (2)

819 Evolution of God Eleven (2)

Shi Yu said with a smile.

Roll it up.

Qi clenched the Time Umbrella and shook her head crazily in her heart.

No.

She had to enter the first team.

However... Qi was slightly stunned. She suddenly realized that the Time Umbrella in her hand didn't seem to be that fragrant anymore.

The standard to enter the first team was to challenge the members of the first team. However, how could she defeat the members of the first team with a toy created by those same seniors?

“As for how to surpass yourself, it depends on your subsequent efforts.”

Qi: o_o...

“Ling, bring Qi to her address and introduce her to Little Ji and Duckie.”

....

After arranging Qi, Shi Yu also asked Ling to continue studying the Space Beast Egg and the strange water summoned.

He was worried.

At the same time, Shi Yu took out Fang Lan’s gains again to take a look.

[Four Symbols Star Formation]

At first glance, Shi Yu thought that it was related to the totem holy beasts of the four faiths, Green Dragon, White Tiger, Vermillion Bird, and Black Tortoise.

In the end, he realized that it had only borrowed a name.

This was only a high-level light-element skill.

The reason why it was called the Four Symbols was that it needed at least four users to use it.

Even a single pet couldn’t use this move at all.

Of course, unless he used his all-purpose clone.

However, the effect was definitely not as good as using it together with four pets of similar strength.

[Four Symbols Star Formation], a high-level light-element skill. After four pets activated it together in four directions, it could summon starlight to form a light barrier that trapped the enemy. Whether outsiders wanted to enter or internal enemies wanted to leave, they would suffer strong light-element damage from the barrier.

Gone.

Shi Yu sighed. No matter what, Fang Lan’s ancestor was a descendant of the Space Emperor, but she was only left with this little inheritance.

If he were Fang Lan, he would be too embarrassed to say it.

This was simply worse than An Chang...

Sigh, if one had to talk about it, it wasn’t very bad. At least, the inheritance Fang Lan obtained had the specific cultivation method of the [Four Symbols Star Formation] that exceeded transcendent. It might be Dao Proficiency.

In addition, it was like impregnable. It was an army skill. If the user was multiple of “four”, its power could still increase greatly.

For an army, it was a rare treasure skill.

This skill was developed by the Space Emperor and rewarded to his son. Then, it was used in the army. It shouldn't be bad.

However, compared to trapping the enemy, Shi Yu still preferred more proactive battle tactics.

Shi Yu made a backup copy and sent it to Senior letting her do it first.

As for Shi Yu himself, he began to work overtime.

....

During the half a month Shi Yu added points, he kept feeling that he had forgotten something.

Only when Principal Feng reminded him did Shi Yu remember that he had yet to deal with the master and disciple of the Phoenix God Society. He had not even brought An Chang back.

However, it wasn't a big problem, because it was already too late.

During the few days he was in Tingxiang, the master and disciple of the Phoenix God Society suddenly had something to do and returned to the Seven Islands. It seemed that the Seven Islands Valkyrie wanted to see them.

This made Principal Feng feel that something was wrong. It was originally very promising to poach the Phoenix Shrine, but if the Seven Islands Valkyrie came into contact with these two, Dong Huang's hope would be slim.

Apart from that, An Chang was also brought back to the Ancient Capital by the gem cat and the others who had returned to Dragon Palace City from Tingxiang.

It wasn't a big problem. The former would be discussed in the world competition, while the latter...

Shi Yu did not pay attention to why his sea dragon had evolved under the guidance of the Sea Dragon King. Instead, he continued to add points to cultivate.

It had to be said that with the Sea Cleansing Spirit, which reduced the burden of adding points, Shi Yu's efficiency in adding points increased exponentially.

For this, he directly chose to cooperate with the inheritance of the Blue Sea Ruins and help Susu pull the Sea Cleansing Spirit first (Expert+11).

Two months after Shi Yu returned from Tingxiang.

The attributes of every pet underwent another earth-shattering change under the continuous addition of points.

Firstly, all the super racial skills of the six pets in the team had been added to (Expert+11). They were only a step away from reaching the perfect level and breaking through to the overlord level.

Among them, Eleven was already at the stage of working hard to suppress its level.

Apart from that, it wasn't just Eleven's White Thunder and Undying Golden Body. Buggy, Baby Ginseng, Chi Tong, Susu, and Ling's non-racial skills, such as Space Control, Plant Control, Undead Revival, Heavenly Frost Cold Energy, and Mythical Revival, had also been added to perfect level by Shi Yu.

It could be said that although they had yet to reach the overlord level in terms of growth level, their skill proficiency was not inferior at all.

In fact, Shi Yu even got Eleven to teach Buggy and the others the full-level deterrence skill through the memory water drop card bug.

The same method allowed Ling to modify itself and evolve, researching the clone skill into a racial skill. Then, through this method, Eleven and the others' clones became full-level skills.

At the same time, including Susu's full-level multiplication, everyone could master it through this method.

Deterrence, Clone, and Multiplication. The proficiency of Team One had reached Dao Proficiency.

Of course, this was not the most important thing. Most importantly, [Super Alloy] became the first super skill in Shi Yu's team to reach [Transcendent Proficiency].

Eleven was about to evolve.

At that moment, there was less than a month until the world competition.

Even the ranking of the Sequence Battle had completely ended not long ago.

The legendary resources in the top five had already been distributed and were given to the top five to use and digest them themselves.

[Unscientific Beast Taming](#)

Chapter 820: Evolution of God Eleven (3)

820 Evolution of God Eleven (3)

Shi Yu was still ranked seventh, the number one person below the legend level. Ji Feng, Zou Yun, and Gao Xuan tactfully didn't challenge him.

Therefore, the list of contestants for the World Tournament of Dong Huang had already been completely confirmed.

Among them, the legendary Beast Tamers were called "Team One" by the domestic Beast Tamers.

As for the remaining four, they were called [Team Two] by the Beast Tamers in the country.

Shi Yu, who was ranked seventh, was in neither a high nor low position. After all, there was no real overlord level.

However, at this moment, Shi Yu finally didn't have to tolerate it anymore.

He had cultivated bitterly for two months for today.

Now, his team of pets could be said to be full.

All non-racial skills were above perfect proficiency, and the limit of all racial skills was close to perfect level. They were stuck at a limit.

If he wanted to improve again, it was also Shi Yu's initial plan to reach transcendent with the teaching skill points of some pets. However, he had also discovered that even with Susu's Sea Cleansing Spirit, there was still not enough time. It was only enough to reach transcendent with Eleven's superalloy.

No, there was still half a month left. Perhaps he could reach perfection with one skill point.

In short, that was later. Shi Yu had already decided to let Eleven breakthrough to overlord and let him have an overlord-level pet above his level!

At the same time, he let Eleven complete its evolution through the transcendent superalloy.

After all, the evolution outcome was unknown. He still needed some time to adapt. The last adaptation period of a month was suitable.

Now, although all the members of the first team were at the monarch level, each of them had the strength to defeat ordinary overlords. It could be said that they had [Top-notch overlord battle power].

After all, Buggy had three perfect super skills now, Chi Tong had two, and Susu had two... In addition, their racial skill proficiency was not low. Ordinary overlords were definitely not as stacked as this.

As for Baby Ginseng and Ling, who only had one perfect super skill, one was a time-element and the other was a Mythical race. It was naturally easy for them to defeat ordinary overlords above their level.

Just as Shi Yu had expected, after adding points for two months, he would not be afraid if he encountered that Dark Elven Prince and the Flame Dragon King again.

Of course, in a one-on-one battle, there might still be some pressure. Although it had the battle power of a top-notch overlord, there were also differences in strength. The weak ones were like the Green Scaled Dragon, and the strong ones were like the Sky Penetrating Whale, the Dark Elven Prince, and the Flame Dragon King. Shi Yu was not sure if they had never fought.

However, Shi Yu didn't nurture so many pets to fight one-on-one.

For example, Ling's fusion mecha was completely perfect now.

Shi Yu felt that with all the members together, it shouldn't be a big problem to be invincible below the totem level.

Although it was only a few minutes.

[This isn't enough.]

Although this was already very strong, Shi Yu still felt that it wasn't enough.

After all, the Elven Empress had said that there was suspected to be a totem level participant in this World Tournament.

After that, Shi Yu investigated through Dong Huang's channels. Although he didn't find anything, he still arranged for the totem to be an imaginary enemy.

Ignoring the other totems, Shi Yu was currently not confident of defeating the gem cat that relied on resources to break through.

Because at the moment, no matter how hard they tried, they couldn't launch the attack where the cat instantly killed the Green Scaled Dragon.

If it was a totem that had mastered a transcendent-level racial skill and had the will of an overlord, it would be even more dangerous.

Perhaps it could rely on Baby Ginseng's self-destruction, but it wasn't very stable. After all, there was only one chance.

Therefore, the process of Eleven breaking through to overlord and completing perfect evolution seemed very important.

If it could have [Invincible Overlord Strength] like [Dragon Palace City's Crown Prince] and [Tyrannical Sea Legendary Mutated Leviathan] after breaking through and evolution, the pressure would be much lower if all of them joined forces to fight ordinary totems.

"Are you ready?"

It was already October 179 of the Alliance calendar. Shi Yu had stayed in Ping Cheng for more than two months. These two months were extremely boring, but watching his pets become stronger bit by bit made him happy.

The only regret was that the second development of telepathy still didn't succeed. This also made Shi Yu completely give up. He first lent the Talent Bead to Senior Lu to use for a period of time and taught her how to learn Psychic power step by step.

Now that Eleven was about to break through and evolve, it was the greatest comfort for Shi Yu to relieve this sad matter.

Eleven: "Wuu () ~!" Charge! I'm ready.

On the rock ground, Eleven was overjoyed. Its black and white hair fluttered, and it was especially happy.

Who knew how long it had waited for this day?

Apart from Eleven, Shi Yu, and the members of the first team were also present.

As for the members of the second team, they weren't around. It was mainly because the energy fluctuations of the first team, be it training, breakthroughs, or evolution, were too strong. From time to time, a little deterrence could affect the members of the second team and they weren't suitable to train together.

"Wu ~" Beside him, the butterfly with a dreamy body in midair curled its lips.

It was too early to be happy.

Generally speaking, the earlier one evolved and broke through, the weaker they were.

Being the first to break through to overlord might not be a good thing.

Buggy had a painful understanding of this.

As the only one in the team who wasn't above a high-level overlord race, it was simply too difficult. If it weren't for the fact that the power of imagination was strong enough, it would have been reduced to the same level as Little Ji.

"Yi." Baby Ginseng shook the Sun Flower elegantly with an indifferent expression. Even if Eleven evolved into a Mythical race, it was still invincible in the world.
