Chapter 871: Time Sprite (5)

However, who knew that in the future, the rules on Blue Planet were incomplete and the spacetime was unstable, causing the Time Sprite, as a Law Sprite, to be unable to adapt to the current environment. Its power gradually disappeared. Under pressure, the Time Sprite could only choose to constantly reincarnate and wait for the spacetime laws to recover.

The reincarnation life form it chose was the Nature Elf Race. This was because this race lived in the forest and was aloof from worldly affairs. They were carefree and free. Usually, they planted flowers and plants, and they reproduced on their own. It was very compatible with her lazing personality. At the same time, it prevented its reincarnation from encountering too many setbacks and tribulations. Apart from that, the physique of the Nature Elf Race was also very compatible with the natural power of law, making it convenient for it to recover as soon as possible. Next, it indeed spent its life naturally in the forest most of the time.

Through Mythical Revival, the Time Sprite kept receiving its memories. The memories of the Time Sprite and the memories of the reincarnations were all very beautiful.

At this rate, as long as she slacked off for dozens or hundreds of years and waited for the power of the blue planet's natural order to recover, she could recover her strength and memories and become a time sprite.

However, the Time Elf never expected that there would be a big problem with this reincarnation. It wasn't that the internal strife of the elves had caused the extinction of the natural elves. This wasn't important. Although the reincarnation this time couldn't live in the forest without worries because of the internal strife of the elves, reincarnation into a little princess of the royal family wasn't bad. Although it was a little useless, at least it could do whatever it wanted without worry.

Originally, spending a lifetime like this was also a good choice. As long as this generation of reincarnation quickly recognized reality, there would be no problem even if it was a nobody. It would also be a very happy life, but the Time Sprite never expected it.

At this moment, a great villain appeared.

First, it tricked its reincarnation out of the palace. Then, it threw demonic special training at it.

Her physical body passed through a snowstorm, her body endured heavenly lightning, and she jogged in the sea of fire. Even if she slept, she had to train in her dreams... In just dozens of days, the Time Sprite felt that the pain it suffered was more than all the hardships it had suffered since it was born.

Even after the destruction of the Mythical Era, it didn't suffer any grievances. It was very difficult for the Time Sprite to imagine that its heart and spirit would actually be so heavily injured in just dozens of days.

And the goal of all of this seemed to be for the other party to awaken her consciousness in advance?

It was angry, aggrieved, and dissatisfied. It could clearly directly obtain the power of the natural order to travel through space and time again when the power of the natural order recovered. Why did this guy use such a brutal method to awaken it?

After receiving the memories and figuring out the cause and effect, the Time Sprite opened its cherry-colored eyes and looked at Shi Yu with anger.

She would remember this.

Shi Yu: "?"

At this moment, Shi Yu was stunned. What happened? Why was Qi looking at him so angrily? Where was that obedient little elf? Shouldn't she be happy that she had obtained the power of a god...

—

Unscientific Beast Taming

Chapter 872: Living Mythical History

"I, the Time Sprite."

Facing Shi Yu's gaze, Qi's gaze was filled with grievance.

What a loss.

She finally knew what Shi Yu meant by having a lot of potential.

Mythical, law life form, Time Sprite.

As long as it could awaken its power, it would be the most unsolvable Mythical creature.

However, there was clearly an easier awakening method, but he chose the most difficult one...

Although she understood that Shi Yu was doing this for her own good, Qi still felt very uncomfortable.

After all, it had suffered more these few days compared to since it was born.

The deep painful memories, compared to the memories of lazing around, immediately left a huge psychological trauma on Qi.

"..."

At this moment, Qi was completely under pressure that she shouldn't be exposed to at this age.

It was like someone who had studied hard for more than ten years and worked hard for years to save up the down payment for a house, only to suddenly learn that he was a billionaire in the first place.

She sat on the ground like a confused little shark.

"Qi, you've awakened your memories?"

At that moment, Shi Yu also discovered Qi's abnormality and was slightly stunned.

Qi looked at Shi Yu.

"I've awakened, and I know that as long as the time is right, I can immediately obtain my original power." Qi had nothing to live for.

"Dozens of days of hard work were in vain... In vain..."

Damn.

Shi Yu was silent as he looked at Eleven and the others. Why was this salted fish tone so similar to the gem cat?

He seemed to know why although Qi was a reincarnation, its willpower at the start was still extremely low.

Perhaps she was also a hooligan when she wasn't a Time Sprite.

Otherwise, it was impossible for her to have such a deep grudge after just training for a few days.

"Yi. (When the time is ripe, it means the recovery of the world's laws.)" Baby Ginseng widened its green eyes and asked.

"There's also the recovery of the power of the Space-time Dragon Vein," Qi said.

She immediately revealed a determined expression and looked at Shi Yu. "Lord Shi Yu, I apply to stop training! Let's go find the Space-time Dragon Vein!"

Although her strength had yet to recover, she no longer wanted to train hard. It was too painful.

The most important thing now was to find someone powerful and bring her to the Space-time Dragon Vein to recuperate and wait for her to completely recover.

Qi looked at Shi Yu with sparkling eyes. Although Shi Yu was a little ferocious, she still acknowledged Shi Yu very much. He actually recognized her at a glance and even helped her awaken her memories in advance. He was even stronger than those demigods.

In addition, Shi Yu's team had two Mythical races. Even in the Mythical Era, Shi Yu was considered very powerful.

Most importantly, she only knew one expert now, which was Shi Yu. She wasn't even familiar with the Elven Empress.

Grandma Ge Lin was right. This Shi Yu was so mysterious.

"Wuu!! (At that time, can you recover to a Time Sprite?)" Eleven asked in anticipation.

Qi nodded again.

"Sob. (Then you can bring us to space-time travel.)" Eleven wanted to return to the Emperor Wu Era to see the Iron-eating Beast Corps and beg for some inscription metal to spend the remaining skill points.

After all, it could fuse skills later. Eleven thought that the more racial skills there were, the better.

"Mi!" Chi Tong wanted to go to the Time Emperor Era to see Mu Huiyin!

"Probably... As long as everyone doesn't reach the Mythical stage, I can bring everyone through space and time," Qi said.

Its ability was limited. Although it could bring other lives through, it was only limited to those below the Mythical stage. The stronger it was, the greater the consumption, including itself.

It was also because of this restriction that the Time Sprite didn't have much battle power. This was to better adapt to the rules of space-time travel.

"Then can we go to the Mythical Era?" Shi Yu's eyes flickered.

"No!" Qi immediately looked afraid and said, "I don't want to go back."

"Is it because the Mythical Era was invaded by creatures from outer space?" Shi Yu suddenly realized that Qi, who had awakened the memories of the Time Sprite, seemed to be a living Mythical history.

Damn, couldn't he just ask her directly about the Mythical Era!

"Yes!!!" Qi widened his eyes and said, "And they all want to catch me. If I didn't run fast, I would have definitely been caught."

At this point, Qi immediately became indignant again. It would remember this grudge.

Shi Yu was speechless. "Your mentality still has to change. Looks like the training still has to continue. You can't go to the dragon vein to recover directly."

Qi: "?"

"Even if you don't go to the Mythical Era, according to our speculation, the end of the Mythical Era isn't the end of the war. In the future when the Mythical Era is about to revive, Blue Planet will definitely encounter a disaster. At that time, the group of guys who want to capture you will make a comeback."

"Wouldn't you still be forced to escape?"

"It's endless."

"You have to learn to face it."

Qi's expression was slightly stunned. Again?

"Therefore, it's better to continue training," Shi Yu said. "Try to ensure that whether it be returning to the Mythical Era or the descent of future enemies, you have the strength to defeat them personally. This way, you don't have to keep running away."

"Most importantly, you've already trained for dozens of days and suffered so much. Wouldn't it be a loss to give up midway? You might as well go all out..."

"Turn grief and indignation into motivation."

Shi Yu's words were like the bewitchment of a demon that kept echoing in Qi's ears. The experience of training hard in Tingxiang Imperial Palace and suffering under Shi Yu's hands immediately made Qi feel more and more at a loss. The more she thought about it, the angrier she became. The reason why she fled for so long seemed to be because of that group of ferocious beasts from outer space.

"But," Qi said, "the stronger I am, the greater the burden of using spatial travel. Therefore, before that, I can only weakly mobilize the power of nature and don't have much battle power."

Unscientific Beast Taming

Chapter 873: Living Mythical History (2)

Shi Yu said, "We've analyzed it."

So far, the index still showed that it couldn't teach any skills.

It looked like this was the characteristic of the Time Sprite race.

However, it didn't seem to be a big problem.

Shi Yu pointed at the clothes on Qi's body and said, "Then carrying dead tools to transmigrate shouldn't consume that much energy, right? What if you can control an armor that's comparable to a god's battle suit?"

"That's the same. You can be considered to have powerful battle power."

Qi was slightly stunned and looked at the priest suit she was wearing.

She recalled his improvement in the past few days.

From a weak sprite, with its equipment, it was enough to split apart snow and lightning.

This was...

Qi was stunned. Oh, so this could happen?

It seemed... really possible?!

Qi's gaze suddenly flickered.

"Then, continue training?" Qi suddenly felt that it didn't seem that difficult to persist after so many days of hard training.

At least, compared to Eleven and the others' training, her training was already easy enough.

"That's right." The corners of Shi Yu's mouth curled up.

However, soon, Qi had another problem.

She asked eagerly, "Can there really be a battle suit comparable to a god?"

Before Shi Yu could answer, Eleven, Buggy, and Baby Ginseng cried out like wolves and tigers.

Simple.

As long as their main bodies had the strength to crush divine beasts, it was not a problem to jointly create a battle suit comparable to a god. He believed in them.

In fact, he could choose not to believe them, but he had to believe in adding points.

If it really didn't work, he would replicate a pile of skills to create equipment.

"That's fine."

Shi Yu also nodded. Simple. With Qi's spatial teleportation, he could have any resources he wanted.

With it around, the entire team could become stronger.

At that time, if the entire team became stronger, it would be equivalent to praying to become stronger.

"Then continue training!!" Qi's heart was immediately filled with fighting spirit. She didn't even notice how much her personality had changed in just dozens of days.

Buzz!

Qi immediately changed back into the Thunder God Set. She held the tachi and planned to continue training, but soon, she was stopped by Shi Yu.

"Wait, there's no hurry. Tell me more about the Mythical Era first..."

Shi Yu remembered. Damn, was there still an archeological Conference later? The more explosive the information obtained, the more resources there would be. There were a total of two myths and ten legends!

Initially, Shi Yu only had the Wind Kirin mechanical phantom beast. The reason for the end of the Mythical Era was these two archeological discoveries that could be used in this archeological Conference. But now, Shi Yu looked at the swaying Qi and suddenly realized that this living Mythical history might be a Mythical archeological cheat.

"About... the Mythical Era?" Qi said.

"Well, for example, what are the creatures that invaded Blue Planet like?"

Qi immediately became nervous and said, "At that time, I only remembered three races."

"One is a huge beast that can devour the laws of the planet, and a group of strange bugs that can devour life to complete endless evolution and master the devouring laws. Also, a group of monsters that like to spread pollution sources."

Giant beasts, bugs, pollution sources?

Shi Yu's expression was solemn. A race that liked to spread pollution sources, the Western Abyss Sea or Yun An's race? Or could it be that they belonged to a faction in the first place, including the guy who polluted the Elven Mother Life Tree? They were all one faction.

A group of strange bugs that could devour life and complete endless evolution?

Could it be the kind of monster that chased after the Wind Kirin? Devouring life, infinitely evolving, devouring laws... It reminded Shi Yu of the Infinite Devour skill.

In fact, Shi Yu immediately felt that the enemies he encountered in the Mythical Era seemed to be a little troublesome. From the sound of it, they were not easy to deal with.

But soon, his thoughts cleared.

Forget it, it was still far away.

There was still time to develop.

Perhaps when he died, the disaster still wouldn't have arrived.

"There's no need to be afraid." Shi Yu placed his hand on Qi's head and rubbed it to feel the feeling of touching the head of a Mythical creature.

It was indeed more charming than rubbing pandas and slimes.

"I'm not afraid." Qi's gaze contained lightning. She held the tachi and said, "I really want to obtain powerful battle power now and transmigrate back to the Mythical Era. When those guys invaded Blue Planet, I'll defeat them one by one and shock everyone who knows me."

Shi Yu: "?"

Something was wrong with her.

He was just giving him a simple encouragement. Why was she even more serious than Eleven?

Was she reliable...

....

After President Lin was done, he immediately contacted Shi Yu, wanting to know what was going on with the green dragon change in Dong Huang.

In the back mountain of the White Rose family, Shi Yu sat on a stone chair and said, "It wasn't much. I just succeeded. A quasi Mythical race, with two faith skills, so I mobilized the power of faith."

President Lin: "... " 〇〇 'It wasn't much'?

He called the evolution that caused the changes in the Green Dragon's faith items worldwide nothing much?

"Where are you now!!!" On the other side of the screen, President Lin shouted with his eyes wide open.

It actually... really succeeded?

He couldn't understand Shi Yu's team configuration anymore.

Pandas and Kirins of Mythical races, Green Dragons and Blue Sea Sprites with faith skills, ginseng babies that could self-destruct and revive totems, and an ancient heroic spirit that could control several overlord undead and possess Beast Tamers to increase Beast Tamers' battle power greatly.

[Unscientific Beast Taming](#)

Chapter 874: Living Mythical History (3)

To be honest, back then, when he saw Shi Yu participate in the National League, President Lin originally thought that Shi Yu's team was already luxurious enough. Who knew that in less than a year, the team had completed an epic evolution?

"I'm using the Starry Sky Altar to hatch that pet egg on the White Rose family's side."

"White Rose family..." President Lin was stunned. "Is there enough time? Don't delay the archeological Conference. "

Shi Yu smiled. "Don't worry, it won't be delayed."

Moreover...

There would be a big surprise.

He had obtained many secrets of the Mythical Era from Qi.

It was definitely shocking enough. It was definitely explosive enough to shake the seven countries.

At that time, he would credit it by saying it was in Ling's memories where they had spied on this info in the fossil dream.

He wondered how many resources he could get.

At the same time, the White Rose family learned of Shi Yu's arrival. Legend Fu's wife, Legend Lucille's father, and two more legends returned to the family.

The configuration of a family of four legends could be said to be quite luxurious. No wonder it was a super big family in Rongguang.

That night, Shi Yu was invited to participate in the White Rose family's banquet. Although he couldn't be bothered to go, it was difficult to refuse the other party's hospitality. Shi Yu could only go and enjoy Rongguang's big meal.

"Hahaha, Dr. Shi Yu, cheers." The patriarch of the White Rose Family, Legend Lucille's father, said happily, "Heroes really come from young people. I heard that Dr. Shi Yu's expression didn't change when he faced Aldrich of the Demon Nation today and even scared him away?"

"Dr. Shi Yu, are you only a level-six Beast Tamer?"

Shi Yu smiled and said, "It's not that exaggerated. It's just that this is Rongguang's territory, and that fallen angel doesn't want to cause trouble."

"Dr. Shi Yu, your strength is definitely outstanding." Fu Dian's mother, a brown-haired beautiful woman, smiled and said, "I heard that this girl, Lucille, even challenged you, Dr. Shi Yu?"

Shi Yu looked at the golden ponytailed woman who was also looking at him.

If Shi Yu remembered correctly, the other party's pet at that time... was a type of unicorn.

< Name > Holy Lightning Beast

[Attributes]: Light, Thunder

[Race Level]: Mid-level overlord

[Level of Growth]: Overlord

Energy Points: 68,120,000

It was barely enough to be a top-notch overlord.

It was neither strong nor weak.

"Yes." Shi Yu nodded and said, "Can we do it tomorrow afternoon? The pet egg can be hatched tomorrow afternoon."

He would fight before leaving. Otherwise, if he beat her and still stayed in her house, Shi Yu would feel uncomfortable...

"No problem," Lucille said. "Dr. Shi Yu, you decide the rules."

Shi Yu smiled and said, "Then let's fight 1VS1 with our strongest pets."

"Sure." Lucille had no problem with it. Then, she recalled the information she knew about Shi Yu.

Shi Yu's strongest pet... Which one was it?

Fu Dian was wishing that she'd fight that iron-eating beast.

In the blink of an eye, it was the next day.

Shi Yu didn't sleep the whole night. He meditated and accompanied Ling to study the Space Beast Egg. At that moment, Ling had already completely confirmed the three starlight nutrients needed for the Space Beast Egg. The hatching progress of the pet egg was also about to approach 3/4.

If it was said that it was still a little difficult to deduce what the remaining nutrients needed from the previous 2/4, then from the 3/4 deduction, it was relatively easier for Ling.

"Ling, do you think the one hatched from this egg is one of the three monsters Qi mentioned?"

The possibility of a huge beast devouring the laws of the planet shouldn't be high. According to Ling's description, this huge beast was larger than any divine beast. When it appeared, it covered the sky and covered the sun. It might be able to destroy a country with a stomp.

It was impossible to hatch from such a small pet egg, right?

Insects that also mastered the devouring power? That was indeed a possibility. Considering that the Space Emperor had asked the Void Mantis to look after the egg, the possibility was not small.

Apart from that, there was also a mysterious race that might be related to the Abyss Sea, Yun An, and the Dark Mother Tree. This race was good at pollution, mainly poison and dark elements.

Considering that the purple patterns of the pet egg were very compatible with the poison element, it didn't seem impossible. However, if that was the case, Susu would be furious after wasting so much effort to hatch. It might as well have listened to the cat and sold the egg.

"We can't rule out these possibilities, but it's also possible that it's outside the three," Ling said. "After all, the power of starlight it absorbs is very gentle. It's very difficult to connect it to these three creatures."

"Alright, alright. If you're done researching, prepare to fight later."

Ling: ???

"Why is it me, master!" The white-haired girl in the Rubik's Cube was immediately stunned. It knew that Shi Yu and Lucille had a battle, but it never expected that Shi Yu would actually let a working girl who had worked hard all night to fight. Even capitalists weren't so black-hearted!

Shi Yu was stunned. "Isn't it because I like you better?"

Ling: "..."

It was actually speechless.

Was he sure it wasn't because he couldn't be bothered to inform and summon a new pet? It was more convenient to use the pet beside him, wasn't it?

"Alright, alright." Ling resigned to its fate.

Around four in the afternoon.

After the Space Beast Egg finished absorbing the starlight, Shi Yu called Lucille over.

Soon, Lucille, who was wearing a white golden-striped Knight of Glory suit, came to the back mountain energetically. She looked at Shi Yu energetically and said, "Dr. Shi Yu, are you done here?"

[Unscientific Beast Taming](#)

Chapter 875: Living Mythical History (4)

"Yeah."

"Then let's go to the family arena? The defense facilities of the overlord rules can be activated over there."

As a legendary family, a battle venue that could withstand overlord-level battles was necessary.

Shi Yu smiled and said, "Sorry, I suddenly have something urgent to do because I still have to participate in the archeological Conference tomorrow. If you don't mind, how about coming to my ruins space to fight? Mine is a high-level ruins space and can also withstand overlord-level battles. Why don't we do it here?"

Lucille was stunned. Originally, her family had even told her to call them when they fought.

However, seeing Shi Yu in such a hurry, Lucille hesitated. Shi Yu didn't even give this girl time to react. He directly opened the teleportation passage of the legendary ruins and signaled Lucille to come in.

...

In the legendary ruins, Lucille, who had entered for no reason, had a headache. Forget it, after the battle ended, she would review it for her father and the others.

Standing in the flat legendary ruins, Lucille observed her surroundings and determined that this was a relatively high-level ruins space. She couldn't help but sigh at Shi Yu's heritage.

"Dr. Shi Yu, this is the pet I want to use to fight."

Lucille directly sent out her trump card pet, the Holy Lightning Beast.

Under the surrounding light, a pet that looked like a white horse with a spiral horn on its forehead and wings appeared with white lightning patterns on its huge body!

"Wu ~" Its eyes lit up as it looked at Shi Yu.

"My pet is this." Shi Yu gestured to Ling, who was floating beside him, that it was his battle target.

At this moment, Lucille was silent as she observed Ling.

The energy value... was still more than 20 million.

A day ago, she observed that this mechanical life form had more than 20 million energy points, and now, it was still this value.

If this was the explosive state, she felt that it was a little unreasonable.

Which pet maintained a battle power eruption state at all times? The burden was too great.

Therefore, don't tell her that this energy value that was at the overlord level was only its normal state!

[It does seem possible. This Dr. Shi Yu developed a mechanical phantom beast. With the support of Dong Huang, his attainments in the Mechanic class are definitely the strongest. This pet has reached more than 20 million normal energy points at the monarch level. It must be Shi Yu's trump card.]

[Looks like this Dr. Shi Yu didn't choose to contract an overlord above his level with a level-six body like the Beast Tamer of the totem country. Instead, he chose to strengthen a monarch comparable to an overlord. This way, there's almost no burden on his body.]

Lucille kept analyzing in her heart.

However, if that was all, how could Shi Yu scare the fallen angel away!

Lucille was at a loss.

Although 20 million Normal Energy Points was extremely rare at the monarch level, and this was the first time she had seen it, at this level, forget about shocking the fallen angel back, it was even a problem if it could defeat her.

Could it be that Shi Yu had relied on other external forces to make the fallen angel retreat?

But before Lucille could think too much, her expression suddenly changed.

This was because the mechanical life form that looked like a Rubik's Cube suddenly turned into a whirlwind and wrapped around Shi Yu's arm. Then, a huge sniper rifle nearly two meters long appeared in Shi Yu's hand.

High-level Mechanic skill, loading! Armed!

Beep beep...

At this moment, Lucille's expression changed drastically. This was because the mechanical life form with more than 20 million energy points just now had increased to 73 million energy points as it possessed Shi Yu!!

"This increase!" She suddenly looked at Shi Yu. This move was similar to possession and Fusion Talent. The increase depended on the skill proficiency and the physique of the Beast Tamer. But no matter what, raising the energy value of a monarch-level pet to the level of a top-notch overlord at once was still a little unacceptable to Lucille.

"Come and fight." Shi Yu had already aimed his gun at the Holy Unicorn.

He had already made it easy enough for her. It was just a fusion. He had yet to let Ling use the Mythical Revival. His physique was indeed a little stronger. After all, he had received feedback from the Mythical Iron-eating Beast and the power of the Green Dragon when he reached his limit.

At this moment, a dazzling light condensed at the muzzle of the huge sniper rifle. Apart from green, this light also had orange, red, blue, and golden colors. There were four powers: wind, fire, water, and lightning.

Apart from its own wind power, when Ling was researching the Fusion Mecha, it also modified and upgraded itself. Its body had the ability to carry other attributes, although it wasn't as powerful as the wind power.

"Four elements!" At this moment, seeing Shi Yu crazily control the power of the four elements at the same time, Lucille immediately felt threatened.

She immediately had a very serious expression and said, "White Thunder!"

Boom!

The Holy Lightning Beast, which had already mastered the power of white lightning, fused with Lucille's power of white lightning, immediately increasing the strength of the Holy Unicorn's white lightning by a level. It took a few steps forward from perfection to transcendent proficiency.

The destructive power enhanced by the White Thunder alone was even stronger than the thunder-element strengthening talent.

"Wu ~ ~ ~" A white lightning sword condensed on the horn of the Holy Lightning Beast.

Holy Lightning Sword!!

It should be enough to deal with it, Lucille thought.

However, in the next moment, her expression changed again.

At this moment, seeing the power of the Holy Lightning Sword, Shi Yu and the others actually ignored the stability of their moves. Under the fusion of the Wind Spirit Bead, the four attribute powers were overloaded by Ling. They were about to explode. Even from afar, Lucille could sense the violent, chaotic, and destructive energy fluctuations at the muzzle of the mechanical sniper rifle.

Unscientific Beast Taming

Chapter 876: Living Mythical History (5)

How could this energy wave be controlled?

In fact, this was the effect Shi Yu and Ling wanted.

Boom!!!

Through top-notch intelligence calculations, within the acceptable range, the fusion of the four powers indeed exploded. However, it didn't hurt Shi Yu and the others at all. Instead, through the skill "Turning Misfortune into Luck", it converted the damage it suffered into stronger attack power and reflected it back at the opponent!

This was an attack method with top-notch intelligence as the core strategy.

Boom!

Initially, Lucille was still judging if this attack would cause the machine to explode, but in the next moment, an even greater energy wave than before attacked, instantly stunning Lucille.

The four-colored pillar of light directly collided with the Holy Lightning Sword that slashed over. Two violent shock waves instantly lingered, stirring up energy tides that filled the sky and devouring both parties.

At this moment, just the aftermath of the collision of moves made the Holy Lightning Beast quickly condense a light screen to protect itself. As for Lucille, she instantly entered an ethereal state to avoid the damage.

However, during this process, what made the ethereal Lucille unable to understand was that Shi Yu's figure opposite directly endured the impact of the aftermath and raised the sniper rifle again.

"Shoot it, Ling." As Shi Yu finished speaking, the entire sniper rifle's body kept extending and lengthening at an unbelievable speed against the shock wave. Soon, this mechanical sniper rifle turned into a sniper rifle dozens of meters long as Lucille turned ethereal and couldn't move.

The muzzle was directly pressed against Lucille's forehead in the ethereal state.

For Shi Yu and Ling, who had such physiques and mastered turning misfortune into luck, trying to dodge the damage would be the greatest disrespect to this skill. Moreover, using the Heart Strike, super vision, and top-notch intelligence, Ling could also quickly analyze the weakest spot of the aftermath of the move and attack.

Throughout the entire battle, Ling carefully calculated, including the angle and power of the first attack. In order to let the Holy Lightning Beast withstand the most important aftermath and not have the time to care about the Beast Tamer, they could take advantage of this gap to snipe the Beast Tamer herself in the easiest way and end the battle.

"You lost. Its bullets are enough to penetrate the void." At this moment, holding a sniper rifle dozens of meters tall, Shi Yu spoke to the female knight whose expression had frozen in her ethereal state.

"I..." At this moment, Lucille felt that she had lost for no reason the whole time. She looked at the gun in front of her and trembled.

At the side, the Holy Lightning Beast also looked at the Beast Tamer and the enemy in shock, at a loss.

"Miss Lucille, although your strength is not bad, your battle experience is a little poor. You might encounter a lot of danger in the World Tournament. Please pay attention to protecting yourselves next time."

Shi Yu smiled. The super long sniper rifle turned into a breeze and disappeared. However, the enemies of the World Tournament might not necessarily have Ling's reaction speed and control over the situation.

However, it was rare for the other party to let him use the Starry Sky Altar. Shi Yu still emphasized on reminding her. Perhaps he could make the other party be more careful and avoid a disaster.

"You guys..." At this moment, Lucille's heart was still beating. She looked at the calm Shi Yu opposite her and suddenly understood the feelings of the fallen angel, Aldrich. Her woman's intuition told her that the real Shi Yu was ten thousand times more terrifying than what she was facing now.

Although he was only level-six, the other party was definitely not as simple as a level-six Beast Tamer! She had never seen such a calm and relaxed level-six Beast Tamer facing a legend! It was as if the other party was standing at a higher realm, a realm that was enough to dominate the life and death of totems, looking down at her.

[Unscientific Beast Taming](#)

Chapter 877: Shi Yu Telling Myths

After the battle, Shi Yu slipped away.

The confused contestants of the Rongguang World Tournament were left in a daze at the back of the mountain.

At the same time, at Dong Huang's residence.

Shi Yu, who had a worm/dragon looking thing in his pocket, teleported back to his residence.

Rongguang arranged separate villas for the personnel of every country according to the list provided by the various countries. Shi Yu was naturally no exception.

After arriving at the destination, Buggy was put back by Shi Yu.

Buggy was in a hurry.

It even had an arm-wrestling battle with its leader.

Just as he was about to start, Shi Yu called him over to be a driver.

It had consumed a lot of physical strength... If it lost, it would definitely be because it wasn't at its peak state.

"Eh, you're finally back."

When Shi Yu returned, he didn't expect the gem cat to be here.

From the looks of it, it seemed to be waiting for him in his residence!

"Teacher Ying, long time no see." Shi Yu chuckled.

"Huh?" The gem cat was stunned. It frowned and said, "You look like you have ill intentions."

"No."

In fact, Shi Yu just wanted to know if the current Eleven and Buggy could defeat Teacher Cat.

The gem cat didn't seem to know that Eleven and Buggy had already evolved...

"I just want to ask you if you want to eat turtle meat, tiger meat, dragon meat, and beef!"

"Huh?" The gem cat was stunned. Why did it sound so familiar?

"Those puppets?" The gem cat's face darkened. You've been using them for so long, and they're not fresh anymore. What the hell am I supposed to eat!

If it were at the overlord level, it would have to try it no matter what, but it was already at the totem level. The gem cat didn't plan to let itself suffer anymore!

"No, no, no, I still have something to do. I heard that when you came here yesterday, you had a conflict with the eldest prince of some demon country??"

"I even heard that you scared the other party away with just a look. Is this for real? Is it that exaggerated?" The gem cat muttered and looked at Shi Yu.

It had asked around. An invincible overlord!

It was close to a totem!

At least it had the power of this cat at the overlord level.

"That bird person? It's real. Teacher Ying, do you want to know why?" Shi Yu chuckled and said, "Do you want to fight!"

"Huh?" The gem cat was stunned. What did he mean?

This guy was too arrogant.

The gem cat's impression of Shi Yu was still from the battle in the Heavenly Fox Nation.

However, looking at Shi Yu's smug expression, the gem cat's heart skipped a beat. It realized that Shi Yu had probably improved greatly again.

At this moment, Shi Yu opened the door of the legendary ruins.

The gem cat was stunned for a moment before entering.

This time, its expression was extremely shocked.

In the legendary ruins, a ten-thousand-meter-long green dragon circled in the sky. It had two golden horns on its head and was covered in green scales. Golden flames of spiritual faith burned in its eyes and tail, and its image was extremely shocking.

At this moment, this huge divine dragon stretched out its claws and collided with another huge beast opposite. It was an Iron-eating Beast, an Iron-eating Beast more than a thousand meters tall. Its entire body also emitted a terrifying aura. It stretched out its bear paw and squeezed with the other party's dragon claws.

There were no fancy skills. It was just the collision of pure physical strength. Under the collision, the entire legendary ruins space kept shaking.

The gem cat was familiar with this legendary ruin space. It was from Ji Mengzhu, the one where Baby Ginseng self-destructed. However, at this moment, the gem cat was shocked to discover that the two huge beasts only collided with their physical strength. The entire ruin space experienced a vibration close to that self-destruction!!

Boom!!!

In fact, to be precise, it wasn't that the two weren't using skills at all. It was just that these skills had become normal and turned into physiques. Eleven had various body forging skills and physique skills, while Buggy had already integrated the concept of the Perfect Dragon and the Green Dragon into its new body through evolution. It was equivalent to the normal state being the state where the Dragon of Imagination strengthened its body to the limit.

Boom!!

At this moment, the two pets almost shook the space with their physical strength alone. With a crack, the gem cat also heard the sound of bones breaking along with the vibration. The huge green dragon's dragon claw seemed to have been broken in an instant. Then, Buggy's huge body was sent flying by the opposite with a palm wind that squeezed the air!

"Roar!!!" Buggy was extremely indignant. Damn it, just relying on physical strength, it was still inferior to the leader.

"Roar!!" Eleven roared excitedly. Again!

"This..." Looking at the collision of the two huge beasts, the gem cat beside him was slightly stunned. It was difficult to imagine that this was purely physical strength! Moreover, if it used skills like "Thunder Palm" and "Space Quake", how terrifying the destructive power would be?

"That's Eleven... and Buggy?!!!" The gem cat couldn't accept it.

What was going on!

Why did Eleven and Buggy become like this after a while!!!

Overlord level!

Without a doubt, both pets had reached the overlord level!!

It looked at Shi Yu and completely didn't expect that after returning from Tingxiang, Shi Yu would actually contract two overlords above his level!

Moreover...

The gem cat opened its blue gem eye and could clearly determine that Eleven and Buggy's energy level was already a fraction of its own. It definitely exceeded 100 million.

In terms of physique, it even exceeded it, especially Eleven. Apart from those totem levels that specialized in body tempering, such as the Destructive Divine Mammoth of the Divine Elephant Nation, it was probably difficult to find a match for it even among the totem levels!

Chapter 878: Shi Yu Telling Myths (2)

This...

"For the World Tournament, I cultivated hard for a period of time and made some small progress. Teacher Ying, do you want to give them sudden training before the World Tournament?"

The gem cat: "?"

"I still have something to do. I still have to help Qingyi train her mental strength. I'm leaving." The gem cat directly crawled out of the door and left the legendary ruins.

It was indignant.

It didn't understand why it couldn't keep up with the version after just running around exploring ruins with Lu Qingyi.

It could tell that Shi Yu wanted to use it as a whetstone. It wouldn't fall for it!

"Eh." Shi Yu was stunned. Why was it running? He was serious. He really wanted to know how big the difference between Eleven and Buggy was from a real totem now... Forget it, it was better to continue preparing for the archeological Conference.

Time was tight. He still had one last important thing to do.

...

At this moment, the archeologists of the seven countries were preparing for the archeological Conference tomorrow.

In fact, there was nothing to prepare for battle. He just wanted to think about how to showcase his archeological results tomorrow. The most important thing was to let the judges determine that the archeological results were real. This was the most important thing. Otherwise, anyone could brag.

As one of the prep personnel of Dong Huang, President Lin and the others didn't disturb him. In the blink of an eye, it was the next day.

The so-called World Archeological Conference was actually a private discussion. Only a small number of elites of the seven countries could participate.

On the surface, the judges were the presidents of the Beast Tamer Association of the seven countries, such as President Lin Xiao of Dong Huang and President Auland of Tingxiang. In secret, the final decision was made by the legends of the seven countries to decide the distribution of the twelve Mythical resources.

Apart from these 14 heavyweight judges, there were no other unrelated people waiting. The scene was filled with archeologist representatives from various countries, elite figures in the archeological field of various countries.

On the day of the archeological Conference.

The archeological teams of the seven countries sat down one after another. In fact, there were only dozens of people added together. Among them, Dong Huang's was naturally the members of Bureau 11. Shi Yu, Principal Feng, Lu Qingyi, and the others were all there.

As for the elites of the archeological world in other countries, apart from Legend Xiao Yuan, who he had met once in the Phoenix Ruins on the Seven Islands, Shi Yu had never come into contact with any of them.

Of course, this was Shi Yu's perspective. In the Snowfield country, two old men in archeological clothes looked at Dong Huang solemnly. At that time, they had also seen the phenomenon of Buggy just evolving in the starry sky. However, these two Snowfield archeologists still didn't know where the green dragon came from.

"The legends... should be present too."

Shi Yu sat on the chair and inexplicably felt a sense of pressure.

He took a deep breath and adjusted.

He looked at the surrounding void.

He had shocking beast instincts that far exceeded ordinary legends.

"This kid seems to be able to sense us."

The Elven Empress, Sylphra, smiled.

In another space, at this moment, the seven legends were each watching the archeological Conference from different directions.

This was also part of the information exchange between the seven countries. As the true rulers of the seven countries, they naturally wouldn't be absent.

"Is he Shi Yu?"

The mechanical legendary of the Shen Feng Nation, the founder of the Mechanic class in history, Z, spoke slowly. He was like a robot, covered in two-meter-tall humanoid armor, blue, red, and white. Or rather, this was his current main body.

In the most recent totem battle, four Mechanic geniuses rose one after another from four different countries.

Among them, the geniuses of Shen Feng and Dong Huang became legendary Mechanics. The mechanical genius of Snowfield was the first to develop a mechanical life form that ascended to the starry sky. As for the genius doctor of the Seven Islands, she was a modified person who had developed the potential of a demigod. As a titled Mechanic, she was the "mother" of the current Seven Islands Valkyrie.

At that moment, the mechanical legendary of Shen Feng looked at Shi Yu with a burning gaze. It was very unhappy with this dishonest kid, the dishonest Dong Huang.

It was fine if he developed a mechanical phantom beast, but he actually bought all the ancient fossils of Shen Feng...

However, the mechanical legendary of the Shen Feng Nation didn't care about the mechanical phantom beast. After all, although the mechanical phantom beast was not bad, after careful research, he discovered that the flaws weren't small.

Apart from needing to use fossils, the recovery energy was also a huge expense. Although it was much more practical than normal reproduction of high-level pets, the upper limit of the lifespan of mechanical phantom beasts was also far lower than other mechanical lives and normal flesh lives.

For the mechanical legendary of Shen Feng, who stood at a certain height and had even modified a demigod-level mechanical life form, mechanical phantom beasts were worth Shen Feng's attention, but it was not worth Shen Feng giving up other important domains to study with all its might.

Unless, it was really as Shi Yu had imagined at the Mechanical Conference, that it could revive Mythical fossils, but the Shen Feng Mechanical Legend knew that this was impossible.

It stood at the height of the legendary level. A hundred years ago, it had tried to touch the God Domain through various technological methods, including researching Mythical fossils, but it had all failed. He concluded that in this world where the laws were incomplete, the path of technology couldn't be divine. Otherwise, he would definitely already be a Mythical Mechanic.

"Z, restrain yourself. Do you have any objections to Shi Yu?" At this moment, seeing Shen Feng Legendary Z staring at Shi Yu and even emitting a faint pressure, the mechanical legendary frowned.

Z: "?"

Z looked at Shi Yu and understood what he meant.

Chapter 879: Shi Yu Telling Myths (3)

At this moment, Shi Yu's face was pale... It was getting paler and paler...

Z: "..."

The Shen Feng mechanical legendary said, "What has it got to do with me? It's his own problem."

"This brat contracted an overlord above his level, right?"

"It's the same as the Beast Tamers of those totem countries."

Weak.

He wouldn't go so far as to release pressure on a little kid who wasn't even his age. The other party's face was pale, and it wasn't because of him at all, alright?

The Elven Empress and the other legendaries smiled and didn't say anything. They naturally knew that the Divine Source was deliberately messing with the Shen Feng legendary.

These two people had never gotten along.

"Shi Yu, you look so pale today."

On Dong Huang's side, Lu Qingyi was speechless when she saw Shi Yu looking like he was about to die on such an important occasion today.

Shi Yu's physique was clearly very strong... But why was it like this every time?

"..." Shi Yu was helpless.

Wasn't this for the archeological Conference? He had been researching hard these two days.

Including yesterday, he stayed up late again.

Originally, when Buggy evolved, Shi Yu quickly recuperated. However, from the looks of it, it was all fake!! He was completely strong on the outside but weak on the inside. He couldn't stay up late and work overtime like before. If he wasn't careful, he would suddenly die.

Next, be it the Psychic connection skill or the mind domain, they couldn't be used casually. They could only be used as trump cards.

Otherwise, unless he ate the ginseng baby, it would be very difficult to heal.

Shi Yu sucked on the sachet and didn't want to stay any longer in the archeological Conference. He planned to be the first to appear later and leave immediately after that.

"Looks like everyone is here."

At this moment, the seven presidents of the associations were sitting at the judges' table. The void tore open, and a burly man in golden armor came out of an alternate space and looked at the many archeological elites present.

His expression was dignified, and he looked like a king.

Legend of Rongguang, Hero King!

In the Rongguang area, the main enemy of the last totem battle was the Demon Kingdom.

The Rongguang at that time was purely the colonization of the Demon Kingdom.

In that chaotic world, Rongguang gave birth to many heroic figures. Among them, the Hero King was basically the king of all heroes. He led many heroes to end the chaotic world in the Rongguang area and established the Rongguang Kingdom.

"Welcome to Rongguang. I'm the Hero King, Dilan."

"The meaning and goal of this World Archeological Conference is to hope that the Seven Nation Alliance will use history as a reference. The history of the Blue Planet's human race is a disaster history. Only by understanding the historical laws can we better open the future. Therefore, I hope that everyone can communicate freely next. For archeologists who have obtained information beneficial to the human race of the seven countries, the Seven Nation Alliance will reward resources according to the importance of the information."

"There are no restrictions on this exchange meeting. You can go on stage yourselves, but only one person is allowed each time."

Everyone knew this model in advance. Under this rule, they definitely had to communicate first. The reason was very simple. If the archeological results collided, it would definitely be first come, first served.

"I..." Shi Yu had already stood up, but someone was faster than him, making the corners of Shi Yu's mouth twitch.

It was an archeologist from Snowfield, an old man in an archeological suit.

He was clearly old, but his hand speed was that of someone who had been single for decades!

At this moment, the Hero King had already left and returned to the alternate space. At the judges' table, President Lin smiled and said, "There's no hurry. Let this archeological master from Snowfield exchange his archeological results first."

The archeologist from the snowfield glanced at Shi Yu and smiled. Then, he walked onto the booth.

"It's Gufu, an archeologist from the snowfield. He's a level-six master. He has ascended to the starry sky many times with the help of Snowfield and mainly studied the starry sky ruins," Principal Feng said beside Shi Yu.

At that moment, the gazes of the presidents of the Seven Nation Associations landed on Shi Yu, who had sat down again, and Dr. Gufu, who had just gone on stage. They were not unfamiliar with Shi Yu and Gufu. The presidents of the associations and archeologists of other countries had already guessed most of the archeological results Shi Yu wanted to show.

He had most likely obtained some secrets about the totem era through that fossil archeological machine.

As for Gufu's archeological results, apart from the legendary of Snowfield and the president, the others could only determine that it was related to the starry sky.

After Old Gu Fu went on stage, he coughed three times. His body already looked a little weak, but he looked very excited.

He said, "I'm Gufu. Just half a month ago, I ascended to the starry sky again."

"We cracked it. A legendary ruin established on the moon, a legendary ruin numbered '12' by our Seven Nation Alliance!!"

As soon as Gu Fu finished speaking, apart from the archeologists in Snowfield, everyone was in an uproar.

Shi Yu was no exception. He was slightly stunned. There were a total of 13 ruins on the moon. Ever since humans ascended to the moon, they had only successfully cracked one empty ruin. They couldn't crack the others. Did Xue Yuan successfully crack another one?

Gu Fu said excitedly, "This is a legendary ruin left behind by a demigod-level life form from the totem era a million years ago!!"

"After it reached the totem level, it kept evolving into a cosmic life form. After cultivating to the demigod level, it finally obtained the ability to survive and travel freely in the starry sky. It's called a 'star beast'."

"This will be the first post-era life form to land on the moon after the end of the Mythical Era."

"After our deciphering, according to the information it left in the ruins, there's a very important message!"

[Unscientific Beast Taming](#)

Chapter 880: Shi Yu Telling Myths (4)

"Everyone should know that the champions of the World Tournament who have received blessings have all obtained information when communicating with the World Tree. At the moment, the laws of Blue Planet are incomplete, and it's very difficult to break through to the Mythical stage, even with its blessings. And we discovered another path to the Mythical stage in this ruin!"

"The further away from Blue Planet, the easier it is to touch the power of the natural order and escape the incomplete restraints of Blue Planet. This is the message left behind by that demigod. It once spent 500 years exploring the starry sky and came to such a conclusion. However, the most regrettable thing is that it couldn't break through to the Mythical stage in the end and reached the limit of its lifespan. If it was given another 100 years, it might really have a chance."

"Therefore, it's not wrong for us to explore the starry sky. Developing technology and reaching the depths of the starry sky is the foundation for us to step into the Mythical stage. Therefore, I think that the Seven Nation Alliance working together to develop the cosmic fleet and attack the starry sky is the future of the Beast Taming Era. We can even open a new era of starry sky pets!"

Gufu's words caused a thousand waves. A person's imagination was infinitely big. What he said had actually been imagined by archeologists and scientists. They thought that outer space was the key to breaking through to the Mythical stage, but there was no evidence.

And now, with the excavation of this cosmic ruin from the totem era a million years ago, the verification of a demigod-level life form that had explored the cosmos for 500 years undoubtedly added some truth to this statement.

Gufu used the technological device on the communication platform to simultaneously display the information they had explored in the cosmic ruins as evidence.

"Even if it's true, Master Gufu, do you know how much resources it takes to build a battleship that can continuously shuttle through the universe and reach the depths of the starry sky? Do you know how much money is needed to support its navigation? With such resources, with the fact that a life form might break through to the Mythical stage, not to mention hundreds of years... Isn't the investment too unstable?" an archeologist from Shen Feng said.

"But this is also a path, isn't it?" Master Gufu looked over.

In the alternate space, many legendaries remained silent. This was indeed a path, but at least their generation definitely couldn't afford to wait.

There were actually rumors about those who had gone to the depths of the starry sky to break through. However, this time, Xue Yuan had used archeological methods to produce more concrete evidence.

Around this topic, many archeologists and presidents of the various associations present immediately discussed and argued.

Among them, what Shi Yu was concerned about was the "Star Beast Demigod" of this totem era. It was really powerful. It actually broke through the restrictions of Blue Planet at the totem level and headed into the depths of the starry sky to explore.

He just didn't know how many lives there were apart from it. It should be the kind of native life form on Blue Planet that returned after exploring the starry sky. Was there anyone who didn't return? Or even... got lost?

After an unknown period of time, President Auland said, "This topic ends here. After the conference, the jury will analyze and collect evidence of this research result. Next, please let the next archeological master who wants to exchange the results go on stage."

As President Auland finished speaking, everyone's gazes landed on Shi Yu, who had not participated in the discussion just now and was sitting at a side.

Shi Yu indeed didn't have the energy to discuss it. He had half-closed his eyes the whole time and was resting... He was so tired...

But after it was his turn, Shi Yu perked up and walked onto the arena calmly in his white research suit.

After walking onto the arena, he looked around like a big boss.

"Actually, I agree with what Senior Gufu said just now."

"The future of Beast Tamers is in the starry sky."

As Shi Yu finished speaking, everyone was in an uproar. Master Gufu, who had just gone down, looked at this young man from Dong Huang in surprise.

However, Shi Yu's next words made the corners of his mouth twitch.

"However, there's no need for us humans to explore the starry sky yet, not until thousands of years have passed."

"This isn't the way to break through to the Mythical stage."

"I'm Shi Yu." The corners of Shi Yu's mouth curled up. "According to my judgment, if nothing goes wrong, in about seven years, the laws of Blue Planet will be completely perfected. At that time, the Mythical era will revive. From then on, Blue Planet won't have any restrictions that can't break through the Mythical stage."

"What!!!"

When Shi Yu finished speaking, all the archeologists present were stunned.

The seven presidents sitting at the judges' table and the legendary experts guarding the alternate space were stunned.

Even President Lin and the mechanical legendary were very shocked.

Where did Shi Yu find this explanation?

Didn't they agree on a disaster that would end the Mythical Era?

In the end, he predicted the time of the Mythical Revival the moment he came up and even predicted the exact year?!

"Dr. Shi Yu, you're not kidding, right? Do you have any evidence?" The person who asked was the president of the Shen Feng Association. This white-bearded old man looked at Shi Yu with a scrutinizing expression.

Shi Yu also looked at him.

This was actually told to him by Qi.

Before the power completely dissipated, Qi speculated the specific recovery time of the Law Force.

It was seven years later.

At that time, when the laws revived and the world changed drastically, Blue Planet's main body would awaken, and the natural energy would be more abundant.

Originally, only at that time would she awaken her memories. Shi Yu's balls hurt now. He originally thought that he still had time, but after chatting with Qi, he realized that the Mythical stage was only seven years away from reviving.

He didn't know how strong he could be before that.
