

## Beast 901

### Unscientific Beast Taming

#### Chapter 901: Not Being Human Again (6)

For a moment, Shi Yu arrived at the rock venue and attracted the attention of various parties.

Be it fellow preliminaries contestants, legendary contestants, or stronger totem life forms, they all paid attention to the situation in the rock arena.

Under their gazes, Shi Yu slowly walked onto the rock-element arena.

At the same time, he looked up at the huge beast on the other side of the arena.

"Can he win?"

"It's difficult, unless he also contracted an overlord above his level."

"Although he's the number one person below the legend of Dong Huang, it's only a telepathy talent after all. Even if he contracted an overlord above his level, I think it's barely enough."

There were discussions everywhere.

"It shouldn't be a problem, right?" Luo Yi and Hillia said.

"There's definitely no problem," Annie, the overlord sprite of Tingxiang who had fought Shi Yu, said.

After all, Shi Yu had already defeated her alone.

"Finally here."

On Rongguang's side, when Lucille saw that Rongguang's level-six Beast Tamer had no hope of passing the preliminaries, she had long paid all her attention to Dong Huang.

Seeing that Shi Yu, who had easily defeated her, had finally appeared, her expression relaxed.

"This guy..." At this moment, the eldest prince of the Demon Nation had a serious expression as he flew above the rock arena. In his opinion, the strength of this Earth Desolate Bear was only so-so, but Shi Yu... He couldn't see through him at all.

After learning that Shi Yu was actually the strongest archeologist in the seven countries, he understood that his perception at that time was right. This guy's strength definitely came from a source.

Next, he could finally see the strength of his pet.

He didn't think that Shi Yu wouldn't be able to pass the preliminaries. He only wanted to see how much of a threat Shi Yu could pose to him in the main competition.

"Roar!!!"

World Tree clone, legendary demigods, contestants of the seven countries, totem clans... Under countless gazes, on the rock arena, the Earth Desolate Bear roared!!

"Roar!!!"

As long as someone stepped onto the arena, these elemental life clones would immediately attack. This also meant that the battle had already begun!!

Boom!!!

The Earth Desolate Bear, which was more than ten meters tall, stood on the arena like a small mountain. Its rock-like body was incomparably heavy, containing the aura of history. A brown deterrence wave involuntarily released from its body.

The incomparably terrifying overlord aura instantly spread, and a huge hole instantly appeared in the sky. Cracks appeared on the arena that was repeatedly destroyed and repaired under this strong deterrence.

This was the starting move of the guardian overlord. Deterrence first. Although the level-six Beast Tamers who came to Inatella were all elites among the level-six Beast Tamers in the world, most people had already lost their ability to fight in the face of this deterrence.

Transcendent-level deterrence!

Coupled with overlord-level strength.

If there were no overlord-level pets in the team, it would really be difficult to resist.

Its willpower would probably instantly collapse.

At this moment, the deterrence of the Earth Desolate Bear attacked from all directions.

Shi Yu stood in the arena without moving at all and looked straight at the Earth Desolate Bear.

At this moment, everyone was stunned.

"Why didn't he call his pet?"

Under normal circumstances, the challenger would have already summoned his pet outside the arena.

Otherwise, just as he stepped onto the arena, he would also instantly summon his pet.

Shi Yu...

It didn't look like it was going to summon a pet at all.

Was he crazy?

Without the help of pets to resist, with the weak physique of humans, they would probably be instantly defeated by this deterrence wave. Be it their bodies or minds, they would collapse.

Boom!!!

A huge deterrence aura completely enveloped Shi Yu and the entire arena. Shi Yu's short hair and clothes fluttered because of this. However, what made everyone open their mouths wide was that under the deterrence of a top-notch overlord, Shi Yu's expression didn't change at all. He still stood in the arena without moving.

It was as if this deterrence couldn't affect him at all.

Weak.

Very weak.

At the moment, Buggy had mastered a deterrence that was enough to deter totem-level. After its mental feedback, Shi Yu's mental strength was almost immune to deterrence. For his overlord-level physique, spirit, and quasi totem-level soul power, this deterrence was indeed not enough.

"Deterrence... is ineffective against him?"

Before many spectators could react, Shi Yu moved.

Ignoring the deterrence, Shi Yu's figure flashed.

This speed was undoubtedly very fast, but life forms above the overlord level could see clearly.

However, it was precisely because they could see it clearly that they all revealed shocked expressions.

"Wait, what does he want!!!"

"Moreover... how is this possible?"

Bodywork.

Pure physical skills.

On the arena, Shi Yu purely relied on his physique that was strong enough to compare to an overlord-level dragon to move. His body disappeared from the spot like an afterimage.

His speed had even crushed most of the monarchs it had challenged previously.

In an instant, Shi Yu turned into a beam of light and ran out, leaving only the sound of wind exploding. His afterimage first moved on the arena. Then, like a broken line, he stepped on the ground and cracked it. He leaped up and instantly arrived in front of the Earth Desolate Bear with his small body.

He jumped to the height of its head.

Although he was fighting alone, Shi Yu could be said to have no worries. After all, even if he couldn't defeat it, so be it. In any case, his pets could save the situation at any time. This big guy couldn't cause him any harm.

### [Unscientific Beast Taming](#)

#### **Chapter 902: Not Being Human Again (7)**

As the saying went, confidence was at the peak. Shi Yu's battle without any worries directly erupted with incomparable potential.

The Earth Desolate Bear's strength and defense were not weak. Speed was its disadvantage. In the previous battles, it had exchanged injuries for injuries and resisted the attack. Shi Yu's speed still had some advantages.

He directly punched the Earth Desolate Bear's face in midair.

Boom!!!

An incomparably terrifying sonic boom, accompanied by an extremely compressed fist wind, directly hit the Earth Desolate Bear's face. Cracks instantly appeared on the rock on its face, and its entire head leaned back slightly.

Shi Yu's punch actually injured the Earth Desolate Bear!!

Although it was only an extremely light scratch that couldn't even affect the Earth Desolate Bear, at this moment, all the lives watching this battle were instantly stunned.

Initially, on Dong Huang's side, Divine Source Legendary, President Lin, and the others were still wondering why Shi Yu didn't send his pets.

Now, they realized that this damn child seemed to want to f\*cking do it himself?

"What the hell!!"

Ye Xing, Divine Bell, and the others, who had arrived at the scene, also looked up at the arena in shock.

They were all here to see Shi Yu's performance, but in the end, Shi Yu's actions directly made them unable to do anything.

"This..."

The contestants of the World Tournament who had challenged the Earth Desolate Bear previously were stunned at this moment. Their expressions were stunned as they doubted their eyes.

Those overlords looked at their weak level-six servants and then at Shi Yu, who had injured the Earth Desolate Bear in one hit on the arena.

"Ah..."

White Brook was incomparably stunned.

She felt that even if she entered the fusion state, she couldn't launch this attack.

At the side, Lu Qingyi and Lin Xiuzhu were stunned by Shi Yu's attack.

Legendaries and demigods... frowned together.

"Tch." Shi Yu sensed the reaction force coming from his body and looked at the Earth Desolate Bear that had only suffered light injuries and instantly healed itself. He was extremely silent.

As expected, with just physical strength, he could only be crushed by this guy?

"Roar!!!"

At this moment, after the Earth Desolate Bear suffered the attack, it was not affected at all. It angrily condensed the Rock Roar Cannon in its mouth and swept it at Shi Yu in midair.

At the same time, the huge palm slapped at Shi Yu.

As for Shi Yu, his movements were not restricted at all in the sky.

In order to be agile, he directly maxed out his Psychic power.

At this moment, the air around Shi Yu began to hum and vibrate. Substantial spiritual power formed a blue outline around Shi Yu.

It let him fly freely in midair.

At this moment, Shi Yu's pupils were instantly dyed in an incomparably deep blue. He raised his hand, and an ocean-like spiritual power instantly formed a torrent that intercepted the brown light pillar Rock Roar Cannon!!

Under the impact of the Rock Roar Cannon, Shi Yu's body was quickly pushed in the sky, but the form of the Rock Roar Cannon also kept distorting under the pressure of Psychic power!!

Boom!!!

Finally, under Shi Yu's hard work, he suddenly raised his arm. The Rock Roar Cannon directly changed the direction of the attack and was sent flying into the sky by Shi Yu's Psychic power.

Until this moment, everyone had completely lost their ability to think. The Beast Tamers of the totem country were extremely confused.

"This is... Psychic power?"

Apart from his physical strength, the mental strength that erupted from Shi Yu's body again stunned many totems.

It was fine if a human's physique was so strong, but why did he also master psychic power!!

This Shi Yu was also a mixed-blood?

No, there were not many hybrid Beast Tamers present. There were even hybrids who had reached the Legendary level and mastered extraordinary power. However, all of them watched everything solemnly. This was no longer a matter of hybrids.

This guy was a humanoid overlord ferocious beast!!

However...

"It's a super skill. The super skill of the Earth Desolate Bear."

However, at the same time, the Earth Desolate Bear's huge palm also descended. This super huge palm that could flatten a mountain directly charged at Shi Yu.

Shi Yu directly felt the threat of death from this huge palm.

Even if he had the physical and mental strength of an overlord, due to the restrictions of humans, he could only scratch the top overlords like the Earth Desolate Bear.

It couldn't cause any damage to the other party that could affect the outcome.

Fortunately...

He was sufficiently prepared.

"That's it?"

Under the pressure of life and death, the blood in Shi Yu's body boiled.

An incomparable potential erupted from his body.

Pseudo overlord will, activate!

Because of the existence of the Undying Fruit and the mind domain, countless potential was also hidden in Shi Yu's body.

At the same time, because he kept adding points, if Shi Yu was a transcendent life form, his willpower level would have long been tempered to the level of an overlord's will.

However, what he lacked was a method to erupt with potential.

With the help of Susu's memory water drop, Shi Yu studied for a day and took turns to understand the experience of Eleven and the others erupting with overlord will. Now, he had some success.

He could erupt with more potential.

When the human body broke through the limit, it could also be very dazzling.

Boom!!

Shi Yu's strength was like the eruption of a small universe, like the opening of a genetic lock, constantly increasing!

It was directly strengthened!

Boom boom boom boom boom boom boom!!!

In the next moment, Shi Yu stood in the sky and punched out again!!

It smashed out of thin air.

Suddenly, the air howled!!!

The moment he punched, Shi Yu used his physical strength and mental strength to squeeze the air and create fist wind, forming a wind-element move that combined into a terrifying air cannon.

This move also took shape under his guidance through Ling.

Fake Wind Element Control!

Through wind, it countered earth!

The Air Cannon was like a huge fist shadow several meters tall, displaying the extreme speed of light. As the white fist shadow moved, it directly emitted a vibration sound that resounded through the arena!!

Bang!!!

The terrifying fist wind turned into a wind dragon and carried out a dragon roar, directly colliding with the huge palm of the Earth Desolate Bear.

In the next moment, the pupils of the Earth Desolate Bear constricted.

In an instant, countless traces of rocks eroding and shattering were instantly left on its palm and arm.

Boom!!!

The Earth Desolate Bear, which had defeated many monarchs and overlords, directly took a few steps back under the powerful fist wind. Its figure was swallowed by the surging and violent fist wind, and the entire arena rumbled.

"Unfortunately, the damage isn't enough? Again!" Shi Yu sighed.

Everyone revealed shocked expressions.

The space where the demigods were suddenly trembled with the change in their mood.

"Impossible, this is a human?"

"What exactly is he doing!"

Even the World Tree clone recovered its confused expression at this moment. It kept feeling that something was wrong with the way it unfolded.

### **Unscientific Beast Taming**

#### **Chapter 903: Son of the Stars**

At this moment, the overlords and totems present doubted their eyes.

This human Beast Tamer named Shi Yu actually didn't send out his pet and walked onto the arena himself. He gave the Earth Desolate Bear with the strength of a top-notch overlord two punches?

They were very certain that Shi Yu's "self" was not in a fusion state.

The key was that the Earth Desolate Bear, which had displayed a domineering posture when facing opponents of the same level previously, was actually really forced back.

The first punch looked like a scratch, but the second punch, the fist that swept spiritual power and compressed air, actually directly suppressed the super skill of the Earth Desolate Bear. The terrifying fist wind instantly swallowed the Earth Desolate Bear!

Boom!!

The Earth Desolate Bear's ten-meter-tall body tilted backward in front of Shi Yu's tiny body, making everyone in disbelief.

"I think Shi Yu... will have some trouble! The opponent is a top-notch overlord after all." Before the battle, the Prediction Owl had predicted this outcome for the Beast Tamer of Dong Huang.

It didn't hide anything and told the teachers and students of Imperial Capital University about the results of its premonition, such as the old principal of Imperial Capital University, Yin Zhengfan, and the others.

However, at this moment, the old principal of Imperial Capital University, Yin Zhengfan, Gao Xuan, and the others, were very confused. Their gazes were filled with confusion. With a rumbling vibration, they looked at the Prediction Owl. Was this what he meant by Shi Yu being in a little trouble?

If Shi Yu sent his pet to obtain an advantage, it wasn't that they couldn't accept it. After all, Shi Yu was the number one person below the legend of Dong Huang. He should perform better than the level-six Beast Tamers of the other seven countries, but...

"Buzz!!!"

Just as everyone was shocked, the owl was also at a loss.

In the next moment, the feedback of the premonition power made its level loosen a little.

In the prophecy scene, it saw Shi Yu himself being attacked by an overlord. It originally thought that Shi Yu was already an arrow at the end of its flight and that his pets had all lost. Even if there was a deviation, the outcome wouldn't be good. In the end, it was told that Shi Yu was fighting an overlord one-on-one?!

So, the problem wasn't the prophecy, but it?

"What's wrong with this human Beast Tamer..."

Under the confusion of the various factions, the Earth Desolate Bear lay on the ground and let out a roar that resounded through the world.

"Roar!!!"

The power of the earth continuously surged into its body. The places where its body was shattered were repaired again. Moreover, deeper-colored rock armor kept superimposing on its body.

Just as Shi Yu had sensed just now, although his attack was already very strong and definitely not a problem to deal with ordinary overlords, one hit was not enough to deal with a top-notch elemental overlord.

He had to continue attacking!

If Shi Yu had only "serious punched" just now...

Then now, he raised his arms and used "Consecutive Serious Punches".

In a protracted battle, Shi Yu couldn't compare to the Earth Desolate Bear, so he could only erupt.

His current state was established on the foundation of "Will Explosion", transferring the potential of "totem-level Ghost God Shi Yu" to his current human body.

Under the enhancement of the totem-level potential and the overlord's will, his explosive power would temporarily exceed the limit.

Boom boom boom boom boom!!!

Just as the Earth Desolate Bear's eyes caught up, in the sky, a violent fist wind that was like a rainstorm descended with violent natural power.

"I have to let you leave the ground."

Under this attack, the weather in the sky changed, and dark clouds gathered. Shi Yu's powerful mental strength had already affected the weather. Raindrops fell one after another, mixed in the fist wind, making the fist wind that filled the sky like a storm devour the Earth Desolate Bear again!

Water Wind Psychic Combination Skill!

"Roar!!!"

The expression of the Earth Desolate Bear, which was just about to get up, changed. It resisted with all its might.

However, the descending fist wind was like a terrifying super storm or a super tsunami that swept for thousands of miles. It contained fatal power. The moment it came into contact, the Earth Desolate Bear felt that its entire body had suffered countless impacts and was about to fall apart...

Bang!!

It was suppressed back again and smashed back to the ground with a bang. The armor on its body shattered!

In the arena, a huge pit appeared. Shi Yu directly created an artificial lake with his Psychic power.

Whoosh!!!

In an instant, the ground cracked, the arena rumbled, and a rainstorm descended from the sky. Scattered mental strength scattered in all directions, and the Earth Desolate Bear slowly sank into the newly formed small lake with a tragic expression.

At this moment, every punch of Shi Yu's affected nature because of his powerful superpower. His continuous attacks did not stop. After all, when his soul couldn't withstand such an eruption, he would wither, so he had to work hard.

Crack.

Under the influence of his superpower, the temperature of the rain that swallowed the Earth Desolate Bear first plummeted and instantly froze, turning it into an ice sculpture. Then, Shi Yu's fatal attack followed and directly descended on the Earth Desolate Bear that had turned into an ice sculpture. The collision of ice and earth directly made the Earth Desolate Bear's defense even weaker, and its body shattered with a crack under the fist wind.

This scene had completely exceeded the scope of people's understanding. Suppressing the Earth Desolate Bear? They widened their eyes. A... Beast Tamer with the battle power of a top-notch overlord?

Indeed, some mixed-blood Beast Tamers and Beast Tamers with special talent were also very strong in battle, but they definitely wouldn't exceed their level restrictions!!

How could Shi Yu, a level-six Beast Tamer, display overlord-level battle power!!

No matter how one looked at it, this didn't make sense.

## Unscientific Beast Taming

### **Chapter 904: Son of the Stars (2)**

Shi Yu's attack made the spectators experience what it meant to be in a storm. They experienced what it meant to use pure physical and mental strength to trigger the power of nature.

From a physical overlord to a spiritual overlord to an overlord that could trigger the power of nature, Shi Yu directly crushed the Earth Desolate Bear crazily as if he wasn't human!

"Roar!!!"

When everyone reacted, accompanied by a wail from the Earth Desolate Bear, its body was already riddled with holes from the attack. Countless water ice fragments flowed out of its body, and countless wind marks covered its body. Under the influence of various natural powers, it was mixed with the restrictions of Shi Yu's Psychic power. In just a moment, this huge monster gradually lost control of its body. It was very difficult to recover its body with the power of the elements.

Its body was like a small mountain that had been blown up in front of the naked eye. It kept collapsing and shattering with a boom.

In the sky, Shi Yu's attack suddenly stopped.

He took a deep breath and tried his best to adjust his strength.

He was excited. This was the power feedback of the two Mythical pets!

Shi Yu no longer dared to imagine how strong he would become when he contracted a team of Mythical races.

At this moment, seeing that Shi Yu had really done it, totem after totem, overlord after overlord looked at the arena in disbelief.

The legendary Beast Tamers of the seven countries, the legendary Beast Tamers of the totem country, those who had known Shi Yu and fought Shi Yu directly had stunned eyes. Their values were almost shattered. They didn't understand why Shi Yu could tear apart an overlord with his bare hands after not seeing him for a while.

What exactly was wrong with the power on his body!!!

"Is he still human?"

"Won, won?"

"The feedback of the Mythical race?" The Elven Empress looked at the Dragon God beside her.

Not to mention outsiders, even their own people were extremely shocked.

Otherwise, it was impossible to explain this power.

"There might be another reason," the Dragon God said.

Undying Fruit.

Divine Source Legendary and President Lin didn't want to talk anymore. They knew that Shi Yu had been preparing for three days. In the end, it turned out that it was for him. They hadn't seen this coming at all.

Most importantly... Shi Yu really succeeded! Was the increase brought by the Undying Fruit and the contracted Mythical race that strong?

Even Divine Source Legendary and President Lin couldn't make a judgment.

As expected, he shouldn't have believed that Shi Yu, who would play the Iron-eating Beast Knight in the vocation assessment, could compete normally in the world competition!

He just didn't know what the World Tree... would think.

After Shi Yu's battle ended, the entire Inatella fell silent.

Suddenly, a huge pressure descended between heaven and earth. With a hum, a thick branch suddenly stretched out from a towering tree closest to the earth-element arena.

At the end of the branch, the green tree worm-like World Tree clone descended with a serious expression.

It finally couldn't sit still anymore.

In its opinion, this human Beast Tamer was extremely ridiculous, completely exceeding its understanding.

As the World Tree clone appeared, everyone was numb.

Only then did they remember that the World Tree clone was paying attention to every arena at all times. Then, it would give the Beast Tamer who passed the preliminaries a reward on the spot.

The Beast Tamers of the totem country who had passed at the moment had all obtained a World Tree leaf from the World Tree. The energy level of the leaf was level eight, and its quality was between legend and myth. It could be called a quasi legendary resource. It had the power to increase physique, life force, spiritual power, soul power, and various other attributes.

For the contestants of the totem country, this reward was very useful.

After all, the previous level-six Beast Tamers were all contracting overlords above their level. Their bodies were very weak. The strengthening effect brought by the World Tree Leaf could better let them welcome the next Mythical Trial.

And this time, this human named Shi Yu actually broke through the arena without sending his pet. For a moment, it was impossible for the various factions to determine what rewards the World Tree would give.

However, to everyone's surprise, the World Tree clone didn't directly distribute the rewards this time. Instead, it questioned Shi Yu first.

"Human Beast Tamer, where's your pet?" the World Tree clone said.

He looked at this archeologist who had told the seven countries about the Mythical Era in advance and at this broken arena. He kept feeling that a variable seemed to have appeared in this world competition.

A freak that it didn't expect in advance.

At this moment, as the World Tree appeared and confirmed that Shi Yu was fighting a top-notch overlord in the Beast Tamer's main body, many factions fell silent.

"You said that using one pet to defeat the enemy is better than using two. Then I think it might be better not to send a pet to win the battle," Shi Yu said.

World Tree clone: ???

This was how he calculated?!

"Moreover, if a Beast Tamer is only a burden to his pet and doesn't have enough hard strength, he can't be considered outstanding, right?" Shi Yu said.

These words directly made the scalps of the level-six Beast Tamers who had participated in the preliminaries go numb.

It also stunned the legendary Beast Tamers who didn't participate in the preliminaries.

Was this human language?

However, no one could refute what Shi Yu said. The Beast Tamers of the totem countries just now were examples.

They were all burdens of overlord creatures.

It was the same for the seven countries. Beast Tamers were too weak and still had to be protected by their beasts. They were also burdens to their pets.

Although it could also buff the pet, they also needed the pet to be distracted to protect themselves.

### [Unscientific Beast Taming](#)

#### **Chapter 905: Son of the Stars (3)**

Shi Yu displayed a completely different appearance, telling everyone what a super Blue Planet person was.

"You've consumed Mythical resources?"

The World Tree clone looked at Shi Yu and asked.

Apart from that, it was very difficult for him to imagine that Shi Yu's physique could reach this level just by training and the feedback of his pets.

Shi Yu said,

"I've eaten the Undying Fruit."

"This shouldn't be against the rules, right..."

Don't tell him that the unactivated Undying Fruit was also considered equipment.

As Shi Yu finished speaking, the expressions of the legendaries, demigods, and totems changed.

Undying Fruit?

That Undying Fruit that could at least turn one into a totem-level undead and live a second life after death?

An Undying Fruit that could increase soul power to the limit?

How could a mere level-six Beast Tamer like him come into contact with such resources!

The Valkyrie of the Seven Islands had an even more unfriendly expression. This Mythical resource... was it really not taken from the Seven Islands?

"He's indeed Lu Bai." The legendary master and disciple of the Phoenix Court of the Seven Islands looked at Shi Yu with a burning gaze.

Mythical resources weren't that common. Lu Bai had obtained a Mythical resource on the Seven Islands, and Shi Yu had eaten a Mythical resource. If it weren't for one, they wouldn't believe it even if they were beaten to death.

"Shi Yu actually said it!"

The Dragon God and Dragon Kings of Dragon Palace City were relatively calm... They quickly reacted. This time, the Beast Tamers of the totem country would probably have to tiptoe when fighting Shi Yu.

When other beasts fought, pets needed to carefully protect Beast Tamers.

As for the Beast Tamer fighting Shi Yu, he would probably have to carefully remind his pets not to hurt Shi Yu.

If Shi Yu was killed and turned into a totem, no one could leave alive.

This was a dilemma.

The juniors of the totem country and the seven countries didn't know what the Undying Fruit was at the start.

But as they asked the elders, their expressions exploded.

"He'll become a totem after killing him?!"

"Why?"

How could there be such a resource? Wasn't this cheating!!!

"I wasn't wrong at that time. This human is indeed a monster." The Fallen Angel Prince's expression froze.

As Shi Yu revealed that he had eaten the Mythical Undying Fruit, even demigods and legendaries were instantly stunned.

Their faces were beyond disbelief.

Why should such a human brat enjoy such a resource?

"Undying Fruit..."

The World Tree clone was also silent for a moment.

As expected, Shi Yu's power was strengthened from the inside out.

At this moment, everyone finally understood why Shi Yu's battle power was so ridiculous.

A level-six Beast Tamer like him had actually eaten Mythical resources.

Of course, since Shi Yu was so strong, the Undying Fruit only played a support role, but outsiders didn't know that due to the mystery of the Mythical resources, they subconsciously believed that the reason why Shi Yu's main body's battle power was so strong and why he could even activate his spiritual power was because of the Undying Fruit.

"What kind of heaven-defying opportunity is this!"

"Dong Huang can't be so generous. In other words, he obtained it himself?"

"Don't forget, he's an archeologist and even investigated the history of the Mythical Era... I'm afraid the number of ruins cracked exceeds three digits, and there are even Mythical Ruins."

If it was said that the totem factions didn't know the value of the strongest archeologist of the seven countries just now, then now, they completely knew.

They understood that Shi Yu, who had cracked the secret of the Mythical Era, was currently the strongest archeologist on Blue Planet. His foundation might be quite rich.

"In the future, if you encounter Shi Yu, be careful. Don't care about him. Just attack his pet."

"After eating the Undying Fruit, this human's strength might be even stronger than its pet. If he dies, it will be even more troublesome. Not only will he cause trouble on the spot, but the killer will also suffer the revenge of Dong Huang and Dragon Palace City later."

The leading totems of the weak totem countries told their contestants.

If possible, they wouldn't touch this Shi Yu.

If one really couldn't avoid it, one would only attack the pet and not hurt it.

What the hell? This guy was the most troublesome existence to the totem country so far!

A Beast Tamer who might be stronger than his pet's battle power, and one couldn't even attack him! If he was killed, he could even become stronger. How could they fight!

"You... passed." The World Tree clone didn't dwell on this matter for long.

Although Shi Yu's performance made its stomach hurt a little and exceeded its expectations...

However, without a doubt, Shi Yu's potential had completely obtained its recognition.

The previous level-six Beast Tamers of the totem country were too weak. They had no potential to speak of.

What it wanted to find was Shi Yu.

The reason why he had to support a level-six Beast Tamer first was to avoid missing a genius who had yet to break through to the legendary level because of his age.

Although Shi Yu was only at level six now, his strength exceeded most legends!

After nurturing it a little, he could also compete for the Mythical Trial and champion position with other legends!

"Legendary resource, World Branch Liquid."

The World Tree clone spoke.

A branch with liquid flew towards Shi Yu.

"After using it, it can accelerate the speed at which you strengthen the Beast Taming Space. It's a cultivation-type resource."

"If you accumulate enough, you can rely on it to break through to level seven during the World Tournament."

"I look forward to your subsequent performance."

It was a top-notch cultivation resource that didn't exist in the Seven Nation Alliance at the moment!

Initially, Shi Yu thought that there was no hope of breaking through to legend level before the world competition. He didn't expect that he could really obtain cultivation resources in the world competition.

### [Unscientific Beast Taming](#)

#### **Chapter 906: Son of the Stars (4)**

This time, the World Tree suddenly had an additional Mythical Trial. If other Beast Tamers obtained the divine inheritance, then Shi Yu's championship might be unstable.

If he could break through, it would undoubtedly be even more perfect.

"Legendary-level cultivation resource!"

At this moment, when they saw that the World Tree clone had rewarded Shi Yu with legendary-level cultivation resources, the expressions of the other contestants changed. Shi Yu was already so strong at level six. If he broke through to the legend level, what would happen?

Only Dong Huang's Divine Source, President Lin, and the others were pleasantly surprised.

Shi Yu was already a step away from the legend level. In addition to Shi Yu's powerful pet strength, as long as he broke through to the legend level, the world competition champion could be said to be completely without any suspense.

In the Mythical Trial, he could definitely obtain more opportunities!

The gift from the World Tree was completely timely.

"Wait... Shi Yu really needs our protection?"

Among the legendary contestants of Dong Huang, Divine Bell and Ye Xing watched in silence the whole time. They had no idea when Shi Yu had eaten the Undying Fruit, nor did they know how Shi Yu had obtained such strong strength.

As long as one wasn't stupid, they could tell that if the Beast Tamer himself was strong, the pets would definitely be stronger than the Beast Tamer. Just the Undead Possession could directly double Shi Yu's battle power again.

They looked at President Lin and saw that he had a calm expression.

"More like take care of each other..."

President Lin was also very helpless. How would he know that this kid's strength had increased so quickly!

Ye Xing and Divine Bell had complicated expressions.

At this moment, the World Tree clone had already retreated. The rock arena automatically repaired, and a new Earth Desolate Bear gradually condensed.

In the arena, Shi Yu held the branch and felt the surrounding gazes. He was slightly stunned.

Then, he tightened his grip on the branch and smiled in all directions.

"See you in the main competition."

"I will become a new world legend."

As Shi Yu finished speaking, the expressions of the overlords and their servants gathered around changed.

"This guy..."

At this moment, the entire venue was shocked. The contestants with the strength of invincible overlords who didn't participate in the preliminaries and could directly participate in the main competition had unfriendly expressions.

They all felt mockery.

A mere level-six Beast Tamer who had only eaten a Mythical resource. Wasn't he a little too arrogant!!

Did he think that he had the strength to win the championship just like that?

Not to mention the contestants of the totem country, even the expressions of the contestants of the seven countries changed slightly. They didn't understand why Shi Yu was so brave.

Didn't he know that saying this would directly become the number one target of the totem country...

"Holy shit, kid, you can choose not to talk if you don't know how to talk." After Shi Yu finished speaking, the gem cat had already enveloped Shi Yu with its Psychic power and teleported him. Shi Yu directly disappeared from the earth-element arena and was teleported back to the Dong Huang area.

"Haha, what's the matter?" Shi Yu laughed and said, "Giving myself some pressure."

"Let's not talk about it anymore. Teacher Ying, I'll go cultivate first."

Now that the preliminaries had passed, Shi Yu only had one thought. He had to hurry up and use this world's branch liquid to cultivate.

He didn't want to pay attention to the changes in the outside world for the time being. Breaking through his strength was the most important thing!

"Eh." The gem cat was just about to say something when Shi Yu couldn't wait to study the World Tree Branch Liquid.

At this moment, storms instantly rose in the seven countries because of Shi Yu's performance. Zou Yun, Gao Xuan, Ji Feng, and the other level-six Beast Tamers' expressions never recovered their calm from the beginning to the end.

The Beast Tamers of the other six countries also looked in Dong Huang's direction in a daze.

The totem country exploded.

Shi Yu, Shi Yu. This name had made them especially concerned a few days ago, and now, their concern had increased by several levels.

He actually passed the preliminaries without even sending his pet. If he sent his pet and cooperated with his pet, how strong would he be?

Most importantly, this guy was only a level-six Beast Tamer.

Now that the World Tree had given him the resources to break through, before the main competition... could he break through?

"Ignore him."

"The key is the opportunity in the Mythical Trial."

The totem giants hidden in the dark echoed softly.

The rules were already very obvious.

Whoever could obtain the inheritance in the Mythical Trial was most likely to become the final winner.

No matter how strong Shi Yu's battle power was, it was only a telepathy talent. It couldn't make the pet's strength undergo a qualitative change.

The real outcome still depended on the strength of the transcendent creature.

In the alternate space, Divine Source Legendary, the Dragon God, and the others had long expected Shi Yu to attract huge attention in Inatella. This was only the beginning. At that time, Yu's Wind Kirin and the

other pets had no choice but to participate in the battle. At that time, Shi Yu would directly become the center of the storm.

"I hope he can successfully break through to legend."

At this moment, in Shi Yu's ruins space.

Holding the World Tree Branch Liquid, Shi Yu was filled with joy.

However, as he sensed the power of the World Tree Branch Liquid, someone seemed to be even happier than Shi Yu.

In the ruins space, the Ling Research Institute, the Space Beast Egg Hatching Room.

At that time, when Yu entered the ruins with the World Tree Branch Liquid, suddenly, the Space Beast Egg that was originally lacking a nutrient and had yet to hatch in Ling's research suddenly flickered and erupted with a shocking light.

A powerful energy wave shook the sky, causing the legendary ruins to tremble, making Shi Yu's expression suddenly change.

This light seemed to be indicating that it was extremely hungry for the World Tree Branch Liquid.

"What's going on?"

At this moment, Shi Yu couldn't help but teleport to the side of the Space Beast Egg and stare at the egg.

At the same time, he put away the World Tree Branch Liquid, afraid that this guy would snatch resources from him.

At that moment, as it resonated with the World Tree Branch Liquid, the Space Beast Egg directly had an obvious change.

The remaining traces of time on it that even Shi Yu couldn't see clearly began to make Shi Yu's listening talent, which had not reacted for a long time, hear voices again.

The voice was extremely young, like a baby.

"I want."

At the same time, listening to his historical talent made Shi Yu see exaggerated scenes on the egg.

In the vast starry sky.

A purple-white planet that was about to shatter disintegrated into countless fragments.

Fragments shot in various directions in the starry sky of the universe.

At this moment, apart from Shi Yu, Ling, and the others in the ruins, the creatures outside didn't sense the change in the Space Beast Egg. It was far from the impact of the sound of laws brought by the quasi-divine skill.

However, this special wave made the World Tree clones in various places in Inatella look up in confusion.

"Why would a Son of Stars appear on Blue Planet?"

"Who brought it back?"

The Son of the Stars, the prototype of a life planet and the prototype of a world's consciousness. As the clone of Blue Planet's will, the World Tree Worm immediately sensed that a member of its race had appeared on Inatella.

It crossed space effortlessly and arrived at the independent space where the Son of the Stars was. Then, it silently saw a scene.

The Beast Tamer who had just been rewarded with the World Tree Branch Liquid was holding the egg of the Son of the Stars and looking cautiously at it, which had suddenly barged into the ruins.

Shi Yu was shocked. He sensed that someone had barged into his ruins and thought that it was a demigod.

In the end, it was a green tree worm.

World Tree clone!

At this moment, the tree worm was looking at him solemnly.

"Where did the egg you're holding come from?" the World Tree clone said.

Shi Yu was stunned for a moment. "What's wrong with it??"

The World Tree clone said, "You're holding a cub of a planet's will."

Shi Yu: "?"

Huh?

A planet cub?

There was such a thing?

Shi Yu was momentarily stunned.

The egg that the gem cat had always wanted to fry was a planet?!

Then what it wanted just now was the World Branch Liquid from Blue Planet. It was... Shi Yu's expression was strange. It was breast milk?

### [Unscientific Beast Taming](#)

#### **Chapter 907: Space Egg Hatching (1)**

Shi Yu hugged the Space Beast Egg.

He had thought that this thing would hatch an Abyss Evil God.

It had also thought that this thing would hatch a Space Worm.

Apart from the fact that it was a little impossible for it to be a cosmic beast, the other two races that invaded Blue Planet might hatch!

Of course, it was also possible that it was some other strange cosmic life form.

After all, it was impossible for the huge universe to only have three races, "Space Beast", "Space Worm", and "Abyss Evil God".

However, no matter what Shi Yu thought, he didn't expect that this thing was actually a "planet cub".

Shi Yu naturally didn't doubt the World Tree clone.

Because its main body was Blue Planet's clone.

As a planet, it was very normal for it to recognize its own race.

At this moment, Shi Yu's first thought was that the Space Emperor had suffered a huge loss.

It was an insane loss.

He remembered that back then, Senior Lu had said that because the contract slot was full, the Space Emperor had given up on contracting this pet egg and the idea of contracting a cosmic beast.

He planned to experiment on others first.

If the Space Emperor knew that there was a cub of a planet's will in the egg, would he cry?

Planet... If a planet had a race, its level had to be divine, right?

Wait.

Something was wrong.

The Space Emperor might know that this was a planet cub.

If Shi Yu remembered correctly, the information Senior Lu obtained from the Void Mantis was that when the Space Emperor went to the starry sky, he accidentally entered a starry sky mystic realm and saw "many starry sky beasts" inside.

It wasn't just one egg, but many lives.

In addition, if the Space Emperor didn't know what this was, how did it know its hatching and contract method?

Shi Yu suddenly recalled the scene he had seen through his listening talent.

A purple and white planet seemed to have exploded, splitting into "countless" fragments.

If a fragment represented an egg, then this purple and white planet had more than one egg.

How could a planet give birth so easily?

"Lord World Tree..." At this moment, Shi Yu knew that only the World Tree clone in front of him could solve his confusion.

"This egg... was brought back by a senior from the starry sky and given to me."

"Son of the Stars, the cub of the planet's will, does such a thing really exist?"

"Also... why did you come in..."

"..." The World Tree was silent.

It suddenly realized that he seemed to have barged into someone else's independent space.

Shi Yu was also very silent.

Even if a demigod wanted to barge into his space, it would probably take some effort.

In the end, the clone of the World Tree entered just like that.

At this moment, with the change just now and the intrusion of the World Tree clone,

In this layer of space, the King Eleven, the Green Dragon Buggy, the Undying Ginseng Baby, and the others in training also quickly arrived. They were only a step slower than Shi Yu, who teleported through the authority of the master of the ruins, and the World Tree clone that suddenly barged in.

A shocking change naturally attracted their attention and attracted them over.

"Roar!!!" The Green Dragon Buggy was the first to arrive. Just as the World Tree clone was about to talk to Shi Yu, it saw the one-meter-long little green dragon fly into the research institute.

With a look, the World Tree clone was stunned and a little incredulous. It sensed extraordinary power that exceeded invincible overlords like the "Flame Dragon King" and the "Fallen Angel Prince" on this strange dragon-type creature.

And the life level of this creature seemed to be at the overlord level?

The second to arrive was the owner of the research institute, Ling. A violent wind blew, and Ling, who had turned into a Wind Kirin, looked at the shining Space Beast Egg and the World Tree clone that had entered the ruins solemnly.

"What's wrong, Master?"

At this moment, the World Tree clone's gaze landed on Ling again.

"Wind Kirin, no, it's a mechanical life form, but, not completely." With a look, it frowned. It actually couldn't see through the life form of this creature at all. It looked like a mechanical life form created by humans, but it didn't look like it either. At the same time, it sensed an incomparably mysterious potential from Ling. Was this... a mechanical phantom beast?

"Mi." "Ning!"

Chi Tong and Susu followed closely. The normal power of the two pets far exceeded that of ordinary monarchs and was close to overlords. Their arrival also made the World Tree clone raise its eyebrows slightly. First, it sensed the power of a hybrid on Chi Tong, from humans and phoenixes. Then, it sensed a familiar wave on Susu. It kept feeling that it had seen this guy somewhere.

"Yi!!!" Baby Ginseng was late. It crawled out of the ground and came over. The Sun Flower swayed on its head and it looked at the World Tree clone with its green eyes.

At this moment, Baby Ginseng and the World Tree clone looked at each other. On Baby Ginseng, the World Tree Worm first judged that it was a supplement race. Then, it actually sensed many powerful powers such as life and death and time on it.

"Boom!" The last to come was Eleven, who was the furthest away. Its training location was assigned to the furthest place by Ling, mainly because its training was too brutal. Ling was afraid of it hurting the bypassers.

"This is..." At this moment, the World Tree clone was stunned again. It looked at the flying over with the electromagnetic levitation and actually felt power comparable to the totem level from it.

How was this possible?

"Sob." At this moment, Eleven and the others looked into the room and asked Shi Yu what was wrong.

"It's alright. Lord World Tree simply... came over as a guest," Shi Yu said.

"They're your pets?" At this moment, the World Tree clone suddenly realized something.

### Unscientific Beast Taming

#### **Chapter 908: Space Egg Hatching (2)**

Two overlords comparable to totems and six monarchs comparable to overlords. These creatures were all pets of this human called Shi Yu?

He, a level-six Beast Tamer, contracted two overlords above his level?

Moreover, they were all so strong?

"..." However, when it recalled Shi Yu's abnormal physique, the World Tree clone suddenly felt that it was normal.

Even legendary Beast Tamers who weren't proficient in body forging weren't as strong as this Shi Yu.

With such a physique, it was understandable for him to contract two overlords above his level.

No, Shi Yu's strong physique might also be because of the feedback from these pets! It was mutual achievement! It focused on the Iron-eating Beast and the little green dragon with monster-like physical strength.

What race were these two guys?

The World Tree clone wanted to trace the origin and see the secrets of Eleven, Buggy, and even Ling clearly, but because the main body of the World Tree was still sleeping, it was also possible that the power on the other party had already exceeded its perception. What made the World Tree clone silent was that it actually couldn't see through them.

It would be fine if Eleven and the others were demigods, but their life fluctuations were clearly not above the overlord level.

Most importantly, what surprised the World Tree clone was that the traces of life on their bodies were terrifyingly short.

They were basically not older than five years old!

"They... are indeed my pets." Shi Yu nodded.

"You actually contracted two overlords above your level."

At this moment, the World Tree clone was completely interested in this human Beast Tamer named Shi Yu!

A few days passed. The World Tree clone also understood Shi Yu a little.

He developed the fossil revival and mechanical phantom beast system. From there, through this system, he revived divine beast fossils and mobilized dream memories to spy on the Mythical Era.

The birth of the Mechanic class had already surprised the World Tree, and someone had relied on the Mechanic class to create a new phantom beast race that traced back to the Mythical Era, making it even more surprised.

The World Tree Branch Liquid was extremely precious, but at this moment, the World Tree clone didn't regret giving it to Shi Yu at all. If this guy broke through to the legend level and relied on these pets, he would completely be a champion.

Even if it had already learned that there were two freaks who contracted totems above their level in this batch of contestants, it was still very likely that Shi Yu would do it.

As long as Shi Yu could obtain pretty good gains in the Mythical Trial...

Of course, it wouldn't favor anyone. Whether it was the human that was the main battle power or the beast that was the main battle power, it was still verifying which of the two paths was better.

The two Beast Tamers who contracted totems above their level were both hybrids with special talents. Be it their bloodlines or Beast Taming Talents, they were tailor-made to contract specific lives. The restrictions were extremely strong, but it was undeniable that they had created a miracle.

Even the World Tree clone sighed. The totem clans were also advancing with the times. Their development of humans had reached an exaggerated level.

Contracting a totem-level life form was originally the patent of a level-nine legendary Beast Tamer.

However, it was reduced to level seven by the transcendent life form through modifying human bloodlines, talent, and modifying the contract method.

As for the human countries, the World Tree clone felt pretty good. For example, the appearance of a mechanical life form... was an extremely powerful battle power.

At the same time, this Shi Yu had also created a miracle.

"Of course," the World Tree clone said.

"And it can be said to be the most common race in the universe."

Shi Yu, Ling, and the others were slightly stunned as they looked at the World Tree clone.

"In the starry sky of the universe, there are countless planets. There are a few planets that will give birth to consciousness by chance. When the planet gives birth to consciousness, it has the initial qualifications to nurture divine-level life forms."

"Although the lifespan of a planetary life form is very long, there's still a limit. When the lifespan of a planetary life form reaches the end, it will break down and turn into countless children of stars that fly in all directions of the universe."

"A planet might nurture more than a million Sons of the Stars. However, more than 99% of the Sons of the Stars will fail to hatch because they can't absorb enough nutrition in the universe. As for those lucky ones who successfully hatch, they have to survive a relatively long weak period and grow quickly in danger to have the ability to protect themselves in the starry sky."

"After all, the Son of the Stars is also food that many cosmic life forms like."

At this moment, Eleven, Ling, and the others looked at the Space Beast Egg in shock.

So, the egg that Teacher Cat had always wanted to eat was a planet?

Therefore, Teacher Cat was also a cosmic life form?

Star cat...

"Can the Son of the Stars be contracted like ordinary pets?" Shi Yu asked.

According to the contract method provided by the Space Emperor, this kind of cosmic life form might be very strange. Just like heroic spirits, it would be bound to Beast Tamers in a special way.

Shi Yu felt that the Space Emperor might have come into contact with other Sons of Stars and had done a certain amount of research.

However, it was unknown if the Space Emperor knew that these Sons of Stars were cubs of a planet.

"In theory," the World Tree clone said. "The Beast Taming Space of human Beast Tamers is created by simulating a planet. The growth of the Son of the Stars is the growth of the Beast Taming Space. The two will complement each other."

"However, the complete growth difficulty of the Son of the Stars is also the highest in all lives."

"The difficulty is equivalent to a Beast Tamer cultivating the Beast Taming Space from level nine to level ten."

"The growth of the Son of the Stars is the process of shaping the laws of the world. They need to build a complete world in their bodies. It's the same if Beast Tamers want to reach the Mythical stage. They need to shape the Beast Taming Space into a small world that contains laws."

### [Unscientific Beast Taming](#)

#### **Chapter 909: Space Egg Hatching (3)**

"After completing this step, the life contracted by this Beast Tamer can easily comprehend the power of the natural order and break through to the Mythical stage."

"Of course, these are still very far from you."

Shi Yu looked surprised.

Legendary to Mythical meant to... mold the Beast Taming Space into an independent small world with laws?

Legendary Beast Tamers had the ability to modify the Beast Taming Space. Therefore, after they died, the Beast Taming Space could transform into ruins and mystic realms. Shi Yu could still understand this, but how to mold the Beast Taming Space into a world that contained laws... Shi Yu was really...

No.

Shi Yu took a deep breath. Damn it.

Did his mind domain, such as the Taiji Domain, contain some kind of law?

The special environment of the spaces of those legendary Beast Tamers most likely came from their Beast Taming Talent.

Then in the future, could he integrate his mind domain into the Beast Taming Space? Create a world where Yin and Yang alternated?

"It has already absorbed a lot of nutrients, right?" The World Tree clone looked at the Space Beast Egg and said.

"Yes, it has already absorbed a lot of nutrients, but it should still be a little lacking... Just now, the World Tree Branch Liquid made it mutate. It seems to want to absorb the World Tree Branch Liquid very much."

The World Tree clone was silent.

"This is also very normal. The World Tree Branch Liquid is the purest world energy on Blue Planet. It's even more precious than the nutrients it absorbs that wander in the starry sky of the universe."

"After absorbing it, its growth will be even smoother."

"But you look like you want to hatch it very much, but you can't bear to part with the World Tree Branch Liquid."

The World Tree clone said.

Shi Yu : "..."

Since it knew, it should give him another one!!!

Wasn't it good for them to raise this child together?

Didn't it see that it liked its mother's milk very much!

Shi Yu indeed wanted to hatch it.

If it was a Space Worm or an Abyssal creature, he wouldn't be so interested.

After all, the Space Worm was basically a worm that had mastered an Infinite Devour skill.

Abyss Race... To put it bluntly, they were ducks.

There was nothing strange about it.

But the Son of the Stars.

Shi Yu really wanted to hatch it and see what skills it had.

"There's nothing to be reluctant about."

"Then I'll give it to it. It doesn't matter if I break through or not. Even if I'm level six, I can still become a world legend," Shi Yu said.

After all, he was originally also here to win the world competition with level-six.

World Tree: "?"

"You seem very confident in your strength."

The World Tree clone said.

It looked at Eleven and the others surrounding Shi Yu.

"Of course." Shi Yu smiled.

At the same time, Shi Yu was puzzled.

Could the World Tree clone not tell the strength of Eleven and the others?

Including quasi-divine skills... faith skills...

Or rather, the World Tree clone didn't even accurately judge his "self" strength at the start.

Otherwise, he should be like Divine Source Legendary and President Lin, determined that he could become the champion.

It was worse than he imagined.

Or could it be that the World Tree clone knew his strength, but there were stronger contestants?

"However, your choice was right."

"I just said that the Beast Taming Space of human Beast Tamers is opened up by simulating a planet. The growth of the Son of the Stars is the growth of the Beast Taming Space. The growth of the Beast Taming Space is the growth of the Son of the Stars. The two will complement each other."

"After you use the World Tree Branch Liquid to hatch it, even if you haven't completed the contract, its ability can still assist you in increasing your cultivation speed."

"After contracting it in the future, when the Mythical stage revives, it might be easier for you to break through to the Mythical stage than other Beast Tamers. The premise is that you all successfully grow up."

After the World Tree finished speaking, Shi Yu was slightly stunned. He said happily, "Really?"

"Then I'll hatch it now."

"Think about it yourself." The World Tree Worm stopped talking. A void vortex appeared behind it, as if it was about to leave.

It still had a mission. After figuring out the reason for the appearance of the Son of the Stars, it had no intention of staying on Shi Yu's side anymore.

However, when the World Tree Worm was about to leave, someone panicked.

For example, Shi Yu.

"Wait, Lord World Tree, aren't you going to see it hatch together?"

This was a child who had grown up after drinking its milk. Why was it leaving directly?

"I hope you don't raise it to death."

"In the Mythical Era, there were divine-level life forms who raised Sons of the Stars, but they all failed."

"But I've never seen a human nurturing a Son of the Stars." Before the World Tree clone left, it glanced at the Space Beast Egg. The Son of the Stars could be said to be the most difficult race to grow into.

It didn't know if Shi Yu could successfully nurture it.

The World Tree clone left.

Only Shi Yu and the others were left on the spot in silence.

He looked at the Son of the Stars Egg that was still crying for food.

"I... want..."

Shi Yu heard the voice of the Son of the Stars through telepathy again.

Want... want to drink milk?

"Forget it, I'll give it to you." Shi Yu took out the World Tree Branch Liquid and used it to come into contact with the Space Beast Egg without hesitation.

In the next moment, a drop of white and green liquid in the World Tree Branch Liquid was directly absorbed by the white and purple-striped Space Beast Egg!

"Wuu?" "Ji?" "Yi!"

Eleven and the others widened their eyes and looked at the Space Beast Egg.

Ling's expression also froze.

No wonder it couldn't figure out anything no matter how it studied it.

Relying on its current intelligence level, it was ridiculous to research what the planet's cub needed.

The Space Emperor... should have learned the hatching conditions from the Son of the Stars that he had already hatched?

At this moment, not only Ling, but even Shi Yu was more and more curious about where the Space Emperor had gone after disappearing into the starry sky.

In addition, he didn't know if the mystic realm the Space Emperor accidentally entered was still around. Could it be that he disappeared after entering that mystic realm the second time?

The Space Egg didn't shatter.

Instead, the light was even more dazzling.

It was as if it had evolved. At first, the light was dazzling, then the light disappeared. A new species that replaced the Space Beast Egg appeared in front of Shi Yu and the others.

"This is..."

Shi Yu and the others looked at the Son of the Stars who was trying its best to open his eyes.

It had a white spherical body and a pair of purple "cat ears" on its head, but in fact, at a glance, one could only see its upper body. The lower part and the surroundings of its back were wrapped in a rolling light purple gas. White starlight flickered from time to time in this gas. It was very beautiful.

On its white body, it had big clear eyes like a baby and a round mouth. Just as its blue-purple eyes opened, they were filled with endless curiosity about this world.

It really... hatched.

However, Shi Yu originally thought that it would be a ball. He didn't expect it to be a ball wrapped in a nebula. Moreover, it had eyes and a mouth.

"Mi..." The Son of the Stars's mouth trembled slightly. It looked at Shi Yu and the others before revealing a timid expression.

Its body retreated slightly with the purple nebula.

Without a doubt, there was no information about the Son of the Stars in the index.

If he wanted to know its situation, he had to understand it himself.

Shi Yu took a deep breath and stretched out his hand, trying to communicate with the Son of the Stars through telepathy.

He smiled and said,

"Little guy, come here and let Daddy see you ~"

Eleven, Buggy, Baby Ginseng, Chi Tong, and the other pets: ???

They suspected that he wanted to take advantage of the World Tree!!

"Mi ~" The Son of the Stars hesitated for a moment and didn't dodge Shi Yu's hand. Then, it revealed a happy expression. Its entire body wrapped around Shi Yu's hand and flew. Not only was the purple nebula a gas, but its white body seemed to be able to turn into gas too!

Shi Yu immediately discovered the speciality of the Son of the Stars.

At this moment, the Son of the Stars had no defense in its heart and mind. It was like a newborn baby. Shi Yu easily established a mental and spiritual connection with it and sensed its specific situation.

"Wu..."

Under Shi Yu's perception, the physique of the Son of the Stars seemed to be especially special!

In its body, like Buggy's spatial pocket, Susu's Infinite Devouring Space, and Ling's mechanical space, there was also an independent space.

However, unlike Buggy and the others, the evolution process of this space seemed to determine the abilities and forms awakened by the Son of the Stars next.

"I understand," Shi Yu said.

The World Tree said that the growth of the Son of the Stars was the process of shaping the rules of the world. They needed to build a complete world in their bodies...

In other words, the process of nurturing the Son of the Stars was the process of creating the world in its body?

### [Unscientific Beast Taming](#)

#### **Chapter 910: Taking Someone Else's Path**

"Awesome!"

No wonder the World Tree said that the Son of the Stars was difficult to nurture.

This was the rhythm of letting the cultivator become the "Creation God".

If it wanted the Son of the Stars to take shape, its interior had to contain a complete set of laws that could support the operation of the world.

How much power of the natural order was needed?

It was already very rare for a more powerful divine-level life form to master three to four nomological divine skills, while a planet god needed even more than that.

"Earth, Blue Planet..."

Shi Yu quickly thought of various similar rules on Earth and Blue Planet.

But soon, he shook his head.

Too small, too small.

He had only seen what he had come into contact with, but he understood so many creation myths. Why didn't he broaden his horizons?

For example, shaping the "world" into the "Three Realms of Dao", based on the theoretical support of Yin Yang, naturally produced the three spaces of heaven, earth, and man.

For example, molding the "world" into the "World of Six Dao Reincarnations" and using the karma when he was alive as the foundation of the main world to create the Six Dao.

There was no need to be restricted to the technological world and the Beast Taming World.

As long as the rules were suitable, was it possible to create a "Immortal Cultivation World" and "Magic Battle Aura World"?

According to the World Tree clone, the complete standard of the Son of the Stars was that the inner world had the qualifications to create a "divine-level life form".

Different divine-level lives could be created according to the different laws in the body.

In the beginning, Blue Planet had clearly taken the path of nurturing divine beasts, but now, it planned to nurture divine-level Beast Tamers.

Shi Yu looked at the Son of the Stars. He didn't plan to let it take the same path as Blue Planet, but he hadn't thought of what world to open up.

At the same time, the white ball with purple cat ears hid in the purple nebula and looked at Shi Yu strangely.

"Hehe." It didn't understand why Shi Yu was looking at it with a silly smile.

Although he had not completely thought about it, Shi Yu confirmed in a moment how to nurture this Son of Star.

Putting everything else aside, he definitely had to have the "faith law mechanism".

How could it be easier to plunder the power of faith on Blue Planet than to create a world himself and become the only faith in this world?

At that time, Baby Ginseng would directly enter the body of the Son of the Stars and transform into a "World Tree". Buggy would directly transform into a "Creation God Dragon". The other pets would be the same. They would become the first batch of Creation God Spirits and the primitive gods of that world to obtain faith. Logically speaking, their strength should be able to increase greatly.

Similarly, when he nurtured Baby Ginseng, Buggy, and the others to the point where they could use the power of the natural order, it would be easier for the Son of the Stars to open a complete world with their help.

Shi Yu judged that the Mythical creatures of Blue Planet and the Mythical Era should also have this relationship of mutual achievement. However, Blue Planet might be a little higher than the Son of Star. It was an awareness born directly from the form of a planet.

If Blue Planet was a mother, then the son of a star was a daughter.

"Mi..." Just as it was born, the Son of the Stars looked extremely tired. Shi Yu could clearly sense that this guy was hungry.

"Food."

Shi Yu looked at Baby Ginseng and Susu beside him.

The two of them were stunned. One took out a level-one Tree Fruit, and the other took out a diluted level-one Starry Sky Strange Water.

It was afraid that this newborn Son of Star couldn't digest it if it was too high-level.

"Mi!"

Seeing the food, the Son of the Stars's eyes lit up. It didn't refuse anyone and didn't care what it was. It directly flew over and swallowed it in one go.

Swoosh, swoosh, swoosh.

After eating, the Son of the Stars stopped and landed on the table. Shi Yu saw its satisfied expression.

"Stop training first."

Shi Yu smiled at Eleven and the others.

"Let's play with it for a while."

As there was no contract, if they wanted to understand more about this new son of a star, Shi Yu and the others could only personally play with it and slowly come into contact with it.

...

< Name > Son of the Stars

[Attributes]: Space

[Race Level]: High-level overlord (Quasi Mythical)

[Level of Growth]: Transcendent

[Race Skill]: Inner world (Super skill, the body has a growth-type world. The growth of the world determines one's growth and evolution.)

World Force (Super skill, can mobilize the laws, nature, faith, and other powers in the inner world to attack).

World Blessing (Super skill, can rely on the world itself to give other life blessings. The effect of the blessing depends on the world's ability).

[Energy Points]: 10,000

After Shi Yu and the others studied it, they roughly understood the situation of the Son of the Stars.

Although he didn't know if this was the limit of the Son of the Stars, from the abilities he had learned so far, the potential of the Son of the Stars was very strong.

Among them, the World Blessing was an ability similar to the World Tree Blessing.

The World Tree clone didn't lie to him.

After the Son of the Stars blessed Shi Yu through this skill, Shi Yu could clearly sense that the speed of strengthening the Beast Taming Space had become faster.

Perhaps it was because the Son of the Stars had absorbed the World Branch Liquid that its blessing effect had a similar ability.

In fact, during the blessing period, the cultivation effect was comparable to his cultivation in the Space Emperor Ruins.

After all, the Son of the Stars was only at the transcendent level!

If it grew to the demigod level, wouldn't its blessing effect be comparable to the blessing of the World Tree?

Moreover, under the blessed state, Shi Yu discovered that this enhancement completely didn't conflict with the enhancement effect of the legendary ruins and the Blue Sea Ruins. His cultivation efficiency directly multiplied!

At this moment, Shi Yu was overjoyed.
