

Beast 91

Chapter 91: Ancient Inscription

“Achoo!”

In the mountains outside the suburbs of Ancient Capital.

A woman in a black and white exploration suit subconsciously sneezed and shook her head hard. She kept feeling that someone was talking about her behind her back!

“Sister Xiuzhu, did you catch a cold?”

“We’re enough here. Why don’t you go and rest for a while?”

Not far from the woman, a short-haired woman in a brown archeological suit said beside a stone wall of a ruin.

“Why would I? I’m fine skiing in my hometown’s snow mountain. No problem,” Lin Xiuzhu replied with a smile.

“That’s true.”

The short-haired woman patted her head. Everyone was a professional Beast Tamer now. Although it was a little cold here, it shouldn’t affect them at all.

This was the ruins of the iron-eating beast.

Currently, there were a total of eight archeological teams investigating this ruin.

There were five men and three women. Seven of them were students from the Archeology Department of Ancient Capital University. As for Lin Xiuzhu, she was a researcher of the Iron-eating Beast and had been invited here to assist in the investigation.

Everyone had already investigated this ruin for a period of time. The collection and sorting of some ancient tools, stone carvings, and other ancient artifacts had already been completed, but there was still a lot of special information at the scene that couldn’t be deciphered.

The ultimate goal of archeology was to restore the true history of that time. At the moment, these people clearly had yet to investigate the meaning behind this ruin.

Lin Xiuzhu looked at the archeological student who was investigating and fishing at the same time and sighed.

The only known information was that this was the ruins of a tribe that worshiped iron-eating beasts in the ancient times. There was nothing here at all.

Initially, she thought that she could find new discoveries related to the iron-eating beasts. It seemed that she was overthinking...

“Pops?”

Just as Lin Xiuzhu felt helpless, her cell phone suddenly rang.

After seeing the contact, her expression relaxed.

Dad came back from the snow mountain?

Hmph, this old man must have called immediately when he realized that she was still not at home because he missed her too much!

“Hello...”

Lin Xiuzhu left the site and picked up the phone. Lin Hongnian’s voice immediately came from the other side.

“Xiu Zhu, are you still investigating the iron-eating beast ruins with those juniors?”

“Yeah.”

“How’s the progress?”

“There’s no substantial progress, but I heard that the teacher from the archeology department will come to guide the scene in two days. There might be a breakthrough.”

“Father, aren’t you not very concerned about this ruin? Why are you suddenly asking about this?” Lin Xiuzhu curled his lips.

Back then, when her teacher informed her that the Iron-eating Beast Ruins had appeared in the ancient capital and invited her to assist in the research, Lin Hongnian was unhappy.

What was there to research about a broken ruin? Living in the past, it was better to train pets and pursue new breakthroughs.

The ancient people’s understanding of iron-eating beasts might not necessarily be stronger than that of modern Beast Tamers.

“Hehehe...” Lin Hongnian let out an awkward laugh. However, how could he have known that the Iron-eating Beasts actually had the so-called ancient bloodline? There were already traces of the Iron-eating Beast’s evolution in ancient times. This was really a slap in the face.

“The situation is different. Xiu Zhu, Shi Yu is also in the Ancient Capital now. I’ve already contacted him. Next, contact him again and get him to assist you in investigating this ruin.”

“Ah, why?” Lin Xiuzhu was stunned. Shi Yu?

What did Shi Yu have to do with this Iron-eating Beast Ruin?

“During the time that you weren’t in Ping Cheng, Shi Yu had already cracked the ruin that appeared in Ping Cheng. Because of some opportunities, his Iron-eating Beast even awakened an ancient bloodline through the evolution holy spring in Icefield City and captured the traces of evolution.”

“This is also why I suddenly value the iron-eating beast ruins you mentioned previously. In short, if you haven’t made any progress, perhaps you can invite Shi Yu to give it a try.”

“What!!!”

As Lin Hongnian finished speaking, Lin Xiuzhu couldn't help but shout.

This shout immediately made the others in the archeological team look at them in confusion.

What's wrong with Senior Panda?

Could it be that they had not investigated anything new for too long, causing Senior Panda to completely collapse?

"Yes, I understand. I'll contact him now!"

After Lin Hongnian explained it clearly, Lin Xiuzhu's eyes flickered, and her whole body glowed with vitality again.

After hanging up, she looked at the juniors who were trying their best to slack off and said,

"Everyone, there's new progress."

"I just received information from my father that the iron-eating beasts had an evolution form in ancient times. Next, we might be able to investigate in this direction!!"

"He hired someone to assist us in our research. He can rush over later."

"Really?!" When Lin Xiuzhu finished speaking, the group of archeology students were stunned, and then they revealed looks of joy.

They naturally knew who Lin Xiuzhu's father was. After all, he was a slightly famous master-level Beast Tamer.

Since it was information from Hall Master Lin, there must be some basis.

"Senior, when is the expert you mentioned arriving? Do you need us to meet him?"

Everyone was looking forward to it. Although this was just a small ruin and didn't seem to have any important information, if they could decipher the ancient evolution form of a pet, it would be a pretty good harvest. They estimated that they could earn a lot of credits.

"Wait a minute, I'll give him a call."

"Plus, I'm not sure if he is an expert anymore..."

...

After speaking to Hall Master Lin, Shi Yu was no longer sleepy.

He couldn't fall asleep at all, thinking about the so-called ancient Iron-eating Beast ruins.

A moment later, he received a call from Lin Xiuzhu.

"No need. Tell me the address. I'll take a taxi there."

Shi Yu could not help but find it funny when he heard the anticipation, nervousness, and anxiety in her voice.

He immediately imagined the helpless image of Panda senior standing outside the ruins.

“Alright, I’ll remember the address.”

Shi Yu quickly confirmed the address of the ancient Iron-eating Beast Ruins with Lin Xiuzhu and started packing.

At the same time, he didn’t forget the most important thing...

“Eleven!”

Shi Yu chuckled and pulled Eleven out of the space.

Eleven: o(≥□≤)o

It seemed to say, “What now?”

“Uh, how should I put it? Dig... no, look at the ruins of your ancestors? Together?!”

Eleven:???

Eleven was stunned before being tricked by Shi Yu.

The ruins weren’t that far away.

In less than two hours, Shi Yu arrived outside the mountain range of the suburbs of Ancient Capital.

After Shi Yu arrived at his destination, the group of students from Ancient Capital University had already come to welcome Shi Yu under Lin Xiuzhu’s lead at the entrance of the mountain.

“He’s here!”

As Lin Xiuzhu saw Shi Yu’s figure, she was pleasantly surprised. The group of archeology students also sized up Shi Yu.

Just now, they had already gotten a rough understanding of Shi Yu from Lin Xiuzhu.

He was from the same hometown as Lin Xiuzhu. He had an Iron-eating Beast that had awakened an ancient bloodline. He had also participated in the cracking of ruins!

However, he was a young Beast Tamer and not an expert.

This kind of information basically meant that they could only see what valuable information Shi Yu could provide next. The investigation work still had to be handed to them.

“Sorry to have kept you waiting.” Shi Yu took a few steps and came in front of the group.

At the same time, he sized up the others other than Senior Panda and immediately felt a sense of closeness.

Good lord, this group of people exuded a sense of peers from their spiritual aura. They didn’t have any vitality at all. They felt very old.

“No, no,” the students from Ancient Capital University said.

“It’s been hard on you,” said the panda senior. Then, she was quickly stunned.

Eleven, who suddenly noticed the hopeless expression on Shi Yu's shoulder, was stunned.

"This...???"

"Wuu!" Eleven greeted Big Sister Xiu Zhu.

"Eleven???" Lin Xiuzhu was shocked. What happened? Why did Eleven become so small!!

"Eh, that's an Iron-eating Beast?"

The others also looked at the little Iron-eating Beast on Shi Yu's shoulder and couldn't help but be slightly stunned.

This...

It didn't look like a cub, but a doll. What was going on?

"It's nothing. I taught it the multiplication skill. At the moment, it's just shrunken," Shi Yu said.

"Iron-eating beasts can learn multiplication?" As Shi Yu spoke, the other archeologists were immediately surprised.

Recently, because they were researching the iron-eating beast ruins, they naturally did a lot of homework on the iron-eating beasts.

Apart from some basic information about the iron-eating beasts, they also understood all the skills of other races that Iron-eating beasts could learn.

For example, the Iron-eating Beasts of Bamboo Stone Dojo were famous for being able to learn "Thunder Palm" and "Cannon Fist".

For example, a master's Iron-eating Beast was famous for being able to learn "Metal Shock". This was a metal-element sound wave skill that could make the body make metal noises at all times.

Apart from that, there were other unorthodox cultivation methods.

In short, their investigation of the iron-eating beasts should be considered comprehensive, but this was the first time they had heard of an iron-eating beast that could multiply.

"Is it because you've awakened an ancient bloodline??" Lin Xiuzhu asked.

"That's indeed a possibility. The size of ancient iron-eating beasts is much larger than now." Shi Yu nodded.

Eleven closed its eyes and fell into deep thought. Didn't Shi Yu teach it how to multiply it with his cheat hand?

However, Shi Yu didn't let it talk nonsense about this, so Eleven obediently shut up and pretended not to know anything.

The panda was playing dumb.

"Can you take me to see the ruins first?" Shi Yu asked.

“Alright.” Lin Xiuzhu nodded. The others also nodded.

Then, everyone started to walk towards the ruins of the mountain.

During this process, Shi Yu kept asking them about the ruins.

“Has the era of the ruins been confirmed?”

“About 4400 to 4,500 years ago,” said an archeologist.

Shi Yu nodded. This time was very delicate. It was one of the more serious periods in the history of this world.

“The main target of the current investigation is?”

“There’s a batch of artificial products, but they’re basically daily necessities.”

“Apart from that, I also found a relatively well-preserved metal fragment. After the initial complete appearance, it’s suspected to be a battle armor fragment from ancient battles.”

“The ones that carry the most information are the murals on the stone walls of the ruins and some strange symbols. However, these symbols aren’t like any of the ancient words known to date. They don’t match the popular words about 4,500 years ago at all. By the way, there are similar symbols on that metal piece.”

When the other party finished speaking, Shi Yu was slightly stunned. He said with a slightly expectant expression.

“Please bring me to see that armor fragment first.”

“Ah, alright.”

A few of them looked at Shi Yu who had just arrived strangely. This little brother was rather comfortable with them? He seemed to be even more interested in the Iron-Eating Beast Ruins than them!

Soon, Shi Yu followed them to the archeological camp established outside the ruins.

As they entered the tent, Shi Yu saw that the armor fragment they were talking about was actually a palm-sized metal piece.

In the glass container, the metal piece was lying quietly.

There was indeed a strange symbol on the metal piece.

“This symbol...”

Under everyone’s gaze, Shi Yu stared intently at the symbol.

Then, as if he had triggered some memory, huge waves rose in his heart.

Holy shit.

Shi Yu was shocked and immediately dumbfounded. He had completely recalled it.

Because he had seen this symbol before.

On Earth, the same symbol was recorded in the unpopular Mythical system that he and his teacher studied!

Chapter 92: Archeology Ruined My Life

The moment he saw this special symbol, Shi Yu made many connections. His feelings were especially complicated.

At this moment, he even started to suspect that his transmigration was not an accident.

However, what made Shi Yu feel the most complicated was not these messy things.

Instead, it was the fact that regardless of his previous life or current life, he didn't know what this symbol represented...

What a scam!

Shi Yu thought to himself that this was such a trap. If this symbol could be changed to Chinese, English, and Japanese, this would definitely be a fatal blow. Unfortunately, it wasn't.

Therefore, at this moment, Shi Yu did not feel any nostalgia or familiarity, and was not touched in the slightest.

In addition, it was still unknown whether this symbol originated from Earth or this world.

Shi Yu tried to use his telepathy [Voice of History] talent to try and see if he could discover anything else.

Unfortunately, the opportunity didn't come.

"Did you find anything?"

Lin Xiuzhu asked when he saw Shi Yu staring at the metal piece in a daze.

"Yes."

Shi Yu looked away and said the explosive news.

"This might be a fragment of an ancient iron-eating beast."

"What?" Everyone was confused.

Fragments of ancient iron-eating beasts? What did that mean?

They looked at Shi Yu in confusion, unable to understand how the armor fragment was related to the Iron-eating Beast.

"Because the evolved form of the iron-eating beast might be wearing such a layer of armor."

"No, it's not a layer of armor, but the two are one," Shi Yu said.

He definitely couldn't say that he had seen this symbol. Even if he did, he didn't know what the symbol meant at all. It was meaningless.

However, apart from this discovery, Shi Yu also discovered something else. That was the color material of the metal piece. It felt like it was similar to the evolution traces in the iron-eating beast bloodline.

“Are you serious?” Lin Xiuzhu looked at Shi Yu with a stunned expression.

“The iron-eating beast evolved into a battle armor??”

“That should be the case...” Shi Yu looked at the archeology students and said, “Has the composition of this metal piece been tested?”

“Not yet...” An archeology student said, “This might need to be used in the school’s laboratory, and the detection is relatively troublesome. It will take a long time.”

This alloy that contained extraordinary metal resources was far more difficult to detect than the ordinary alloys on Earth. At the moment, research had yet to reach this stage.

“It’s alright. Next, please test its specific composition.”

“If the metal element contained in it can be detected, it might be an important part of solving the mystery of the iron-eating beast’s evolution.”

Shi Yu looked at the metal piece. Perhaps the Iron-eating Beast needed to eat similar metal materials to complete its evolution?

This metal piece was a huge discovery.

“Little Lin, contact the school.” Lin Xiuzhu looked at the short-haired girl in a brown archeological suit.

“Yes.” Little Lin nodded.

Lin Xiuzhu quickly understood Shi Yu’s meaning. After all, she was also an expert in iron-eating beasts.

“You want to use the composition of this metal piece to deduce the evolution materials of the iron-eating beast?” she asked.

“Yes, but it shouldn’t be that simple.” Shi Yu nodded.

“I don’t think it can complete evolution just by eating... I’m not sure what that symbol means.”

At this moment, when he heard the word “eat”, Eleven woke up in a daze and looked at the metal piece in the glass container with bright eyes.

“Huh?”

Food?

“No!” Shi Yu denied.

“Please take me to see other ancient artifacts and the ruins outside,” Shi Yu continued.

“Oh, oh, I’ll bring you there,” the archeologist who explained the basic information of the ruins to Shi Yu at the start said.

In the blink of an eye, after Shi Yu issued a mission to everyone, he rushed to the next location.

In the tent.

The other archeology students looked at the metal piece in the glass container and fell into deep thought.

Wait a minute, why did it feel like they were being led away by the new arrival, Shi Yu?

Shouldn't it be Shi Yu who provided the information so that they could continue their investigation?

Why did it feel like Shi Yu was more concerned than them!

"I'll contact the school first," Little Lin said. Forget it, forget it. Let's do it according to what Ji Yu said first. The metal piece was suspected to be a part of the iron-eating beast's evolution form. It was indeed a bold guess that they had never imagined before.

.....

This iron-eating beast ruin was actually an underground ruin, and its integrity was not very high.

Shi Yu could only do a live investigation. However, it was more convenient that these people had already restored and organized some information.

"There are only pictures of ordinary iron-eating beasts in the murals, but no images of iron-eating beasts in battle armor??"

Shi Yu was slightly stunned after flipping through the information that had been organized.

Why?

Shi Yu decided not to think about the information that he could not confirm for the time being.

Then, he started to browse the special symbols recorded in those ruins.

Including the symbols on the metal piece, there were only nine special symbols added together.

However, because of the large number of repetitions, it looked a little more.

Six of the nine symbols looked familiar. He had definitely seen them on Earth.

As for the other three, they were a little unfamiliar, but from the style, these nine symbols were definitely a combination.

If that metal piece was really a part of the Iron-eating Beast's evolution, was there any special meaning for such a symbol to be engraved and branded on the armor?

"Senior..."

Shi Yu studied it deeply and even kept trying to use his talent to see if he could see any scenes in his head.

However, he didn't see the scene. Instead, he vaguely saw the panda senior.

Lin Xiuzhu had come to Shi Yu's side at some point in time.

"I didn't expect you to care so much about this ruin." Lin Xiuzhu looked at the focused Shi Yu and couldn't help but smile.

Previously, everyone thought that Shi Yu was here to provide information. However, who knew that after Shi Yu arrived, he was even more enthusiastic in researching ruins than these archeology students.

"Do you also want to understand the evolution path of the iron-eating beast?" asked the panda senior.

"I..." Shi Yu said, "Sort of."

In fact, he didn't have much of an obsession with the iron-eating beast's evolution. The reason why he was so concerned now was purely because he was curious.

He was curious about what this ruin represented and why there were symbols similar to those in a certain mythical system on Earth.

If he didn't figure this out, Shi Yu felt that he wouldn't be able to sleep well.

"Senior, you also want to know, right?" Shi Yu asked. One was Hall Master Lin Hongnian, while the other was Lin Xiuzhu. He felt that there was no one in Ping Cheng who wanted to know the evolution path of the iron-eating beast more than the two of them.

Lin Xiuzhu had a conflicted expression.

"Indeed, but after hearing you say that the Iron-eating Beast's evolution might be after wearing battle armor, I..."

"I feel that if that's the case, I won't be able to sleep on the panda bed in the future... It's a pity."

Shi Yu: "?"

Good heavens, he was actually conflicted about the same reason as her!

Was this his soul mate or something?!

As expected, different pandas, same usage.

"Wuu!" Eleven let out a protest on Shi Yu's thigh.

It had been hours since it last trained. It felt uncomfortable all over.

It had slept for several hours consecutively to accumulate physical strength, and now it urgently needed high-intensity training to release it.

No, it would be best if it was a battle!

"What's wrong? Eleven can't help but want to train again?" Lin Xiuzhu smiled. She knew Eleven very well.

Eleven: QAQ

"I actually came over to say that it's getting late. Thanks to the news you brought, everyone has a new research direction. They want to invite you to have a meal together," Lin Xiuzhu said.

Eat?

“Uh.” Shi Yu glanced at the time. It seemed to be getting late.

He clearly felt that it was time for dinner again after lunch.

“Of course...” Shi Yu rubbed his stomach.

Well, he couldn't continue researching even if he was hungry. Food was more important.

Then, Shi Yu stopped thinking and touched Eleven at the same time. “Let's go for a meal. After eating, I'll let you train.”

In fact, he had wanted to let Eleven train for a long time, but this was the ruins of an Iron-eating Beast after all. He felt that if he carried Eleven with him, there might be a magical buff.

But now, it seemed that Eleven, this mascot, was a little weak in that aspect...

Eleven: (σ` · d ·)σ “Then I'll accompany you for a while more.”

Outside, when Shi Yu followed Lin Xiuzhu out, the other seven people were already waiting.

Everyone prepared to eat at the hotel at the foot of the mountain. As for this place, they would leave it to the pets to watch over.

If contracting a pet was not for the convenience of slacking off, it would be meaningless.

...

Dinner gathering was a very good way to communicate. Initially, Shi Yu wasn't very familiar with everyone, but once he arrived at the dining table, he immediately communicated.

“What, you plan to apply to the Archeology Department of Ancient Capital University in the future?”

As everyone chatted, they talked about Shi Yu. Then, everyone finally understood why Shi Yu could be so focused in the afternoon.

So he was a future classmate, a junior with a clear goal.

“This faculty is a huge pit. Archeology ruins one's life. Have you heard of it?”

Zheng Yingjie, the archeologist who often took the initiative to answer Shi Yu's questions, said with a look of grief. He was the leader of this archeological team.

The other archeology students also nodded. Lin Xiuzhu wanted to laugh but didn't dare to.

“Ah? So tragic?”

“If you don't like it, why did you apply for this department...”

Shi Yu drank a mouthful of soup to calm himself down. He wanted to hear the suggestion of these seniors.

Lin Yu'er, who had the same surname as Panda, said, “Probably wasn't in my right mind?”

In fact, although the ultimate goal of archeology was to restore the truth of history, how many young people had such high thoughts?

Archeology was popular in this world because there were many secrets hidden in the ancient ruins, and even opportunities from the Mythical Era.

Because some lucky people obtained opportunities from these ruins and quickly rose, this industry immediately attracted many people who thought they were children of destiny.

There were very few people who really wanted to restore history to the truth.

Most people entered this industry hoping to get some benefits from the ancient ruins.

In addition, the Archeology Department was indeed the trump card specialization of Ancient Capital University. Its resource allocation was even higher than the Combat Department, so many people immediately applied for it on impulse.

However, after learning this specialization, they realized how difficult it was. How could ruins with opportunities be so easy to find?

Most of the time, they could only stare at the pile of antiques in a daze and learn some skills and knowledge that were useless in battle...

Because of this, although there were a lot of applicants to the Archeology Department of Ancient Capital University every year, the number of subsequent transfers to specializations was also very large...

“The Feeding Department is actually very good. It’s also very relaxed and comfortable. The Medical Care Department is also not bad. There are many young sisters. Although it’s a little tiring for the Combat Department and we have to train every day, strength is the capital of the Beast Tamer. In the future, if we can represent the school to participate in the national competition, that would be considered to have made it big. After all, it’s a competition that’s the focus of everyone in the country... No matter what, it’s better than the archeology department that deals with antiques and ancient tombs,” a fat student sighed.

The others also expressed their views separately, indicating that they regretted applying to the Archeology Department.

For these few people to successfully enter the ace specialization of Ancient Capital University, they must be very talented. Every single one of them was probably a professional Beast Tamer who became a Beast Tamer before 20 years old. However, it was just such a bunch of geniuses. At this moment, there was only regret in their hearts, extreme regret!

When Shi Yu heard that, he was immediately stunned. Good heavens, they were all guys who were unhappy with their profession.

Were archeology departments really that lousy?

“But in my experience...” Lin Xiuzhu said silently, “This state of yours is too common. Actually, the students from the Combat, Feed, Research, and Medical Departments who applied also feel that their specializations are not good...”

To put it bluntly, in essence, it was just liking the new and hating the old.

Lin Xiuzhu cursed in his heart. If you guys had been more serious when investigating the ruins, the research progress wouldn't have been so slow!

During the investigation of the ruins, this group of people had to spend half the time lazing around and training their pets. Their professionalism was not very good!

Lin Xiuzhu felt that if she was a teacher, she would definitely let them fail the subject.

"In any case, if I'm given another chance, I'll definitely choose the right battle department!" Zheng Yingjie sighed and said, "Let's see if there's a chance to change specializations in the future."

Shi Yu : "..."

Archeology was a tough profession.

If he didn't like it at all, it was normal for him to not be able to hold on.

"But I feel that if we find something from this ruins investigation, maybe we can stay in the Archeology Department?" A long-faced senior analyzed.

"Let's follow Junior Brother Shi Yu's train of thought first. Perhaps we might really gain something," said Lin Yu'er.

Zheng Yingjie nodded. "If we can really cooperate with Senior Lin to research the evolution of the Iron-Eating Beast, I feel that our university career is stable. We can even use this for our graduation research."

Listening to the discussion of the crowd, Shi Yu immediately overturned his views on the Archeology Department of Ancient Capital University.

He named the archeological team led by Zheng Yingjie "Archeological Seven Elites".

"In short, I have to thank Junior Shi Yu this time. Haha." Zheng Yingjie smiled and said, "When you come to Ancient Capital University in the future, we'll look after you."

Without the evolutionary information provided by Shi Yu, it was really difficult for them to carry out subsequent research.

"Thank you..." Shi Yu felt that it was unreliable.

He felt that although this group of people was the cream of the crop in dozens of second-tier cities around Ancient Capital, super geniuses,

But in Ancient Capital University, each of them would probably be a classic bad=grades student...

He felt that there was no future for him to cozy up to them after school, so he might as well cozy up to the beast-eared girl.

It was obvious that the vice president of the battle club was an influential figure in school.

“Junior, when do you plan to apply for the next year of the Ancient Capital University?” the chubby senior asked.

“I heard from Senior Lin that that Iron-eating Beast is your initial pet, but I think its growth level hasn’t reached transcendent?”

“No, I plan to participate in the vocation assessment this year.”

“There are still four months. It should be on time. Although its growth level is slightly low, its combat power is alright,” Shi Yu explained.

The fat senior was stunned. “You’re confident, pretty good! Speaking of which, what’s the difference between an Iron-eating Beast that has awakened an ancient bloodline and an ordinary Iron-eating Beast? The difference is only in the multiplication skill??”

“I’m a hundred million points curious. How about it? Do you want to have a friendly spar after dinner? I also have a new pet that hasn’t reached the transcendent level here. At the same time, let us understand the information of iron-eating beasts with ancient bloodlines. This way, we can also write more information in our homework...”

“Huh.” Fatty’s words stunned the surrounding archeology students. Oh right, this fatty was smart. He knew not to let go of any possible information for his university homework.

Shi Yu’s Little-Eating Iron Beast that had awakened an ancient bloodline was the entry point for the subsequent research of this ruin. It was definitely not wrong to want to understand it.

“Battle?” Lin Xiuzhu curled his lips and said, “Why do I feel that you want to bully your junior?”

A new pet cultivated by a professional Beast Tamer and a trainee Beast Tamer’s pet. Although they were at the same level, the cultivation level would definitely be completely different!

The fat senior had an innocent expression and said, “No, I purely want to perfect my homework. If my homework doesn’t meet the requirements, I’m going to fail this year... I’ll also guide my junior. The vocation assessment is very difficult now. I’ve been through this before.”

“Huh?” Before Shi Yu could say anything, Eleven suddenly stuck its head out of Shi Yu’s pocket.

It sensed the aura of battle.

Shi Yu looked down and was immediately speechless.

“It’s fine, it’s fine.” Shi Yu could only say, “My Iron-eating Beast has also slept for the whole day. I just want to move around. It’s not a problem to spar with senior later.”

Chapter 93: The Beginning of the Iron-eating Beast’s Increase in Value

“Look, even Junior doesn’t have any objections!”

The fat senior’s name was Wang Le, and he was also an unlucky fellow who had accidentally entered the archeology department.

After choosing this faculty, he realized that he didn't like it at all.

Beast Tamers from other faculties only needed to train their pets. They also had to learn various archeological knowledge and use various instruments. It was simply troublesome.

He never thought that he would have to face the threat of failing his subjects after entering university... He originally thought that it would be heaven after entering university, but who knew that it was the beginning of pain.

"There seems to be a battlefield on the way here," Wang Le said.

A big city was a big city. Even if it was just the suburbs, battlefields were still everywhere.

"Wu wu wu."

At this moment, Eleven had already climbed onto Shi Yu's shoulder in anticipation and looked at Senior Wang Le.

"Then let's fight."

When the other seniors saw that the cute little Iron-eating Beast was restless, they also smiled and cheered on. They wanted to see what was so extraordinary about the Iron-eating Beast that had awakened an ancient bloodline.

At the side, Lin Xiuzhu was speechless.

Forget it, since Shi Yu has agreed, it was fine as long as they were happy.

Since Shi Yu could conquer the ruins of Ping Cheng, his strength should not be weak... He wouldn't lose too badly.

It was obvious that the panda senior still didn't know the difficulty of the next few stages in the Ping Cheng Ruins. Otherwise, she definitely wouldn't be worried about Shi Yu...

...

At this moment, everyone was almost done eating. After dinner, it was time to relax.

Because they had a target, everyone started to head towards the battlefield.

"Wang Le, I think you should let your junior not use his Beast Taming Talent during the battle later," Zheng Yingjie said.

Apart from the difference in pet cultivation, the greatest difference in battle power between high-level and low-level Beast Tamers was the development of Beast Taming Talent.

It wasn't impossible for a high-level Beast Tamer who had the talent to strengthen and develop a perfect Beast Tamer to use his talent to increase the battle power of an Awakening Stage pet by several times.

Fatty Wang Le had clearly been a professional Beast Tamer for a while. His development and use of his Beast Taming Talent was definitely not something a newbie like Shi Yu could compare to.

“It’s alright, it’s alright,” Shi Yu said. “It’s fine as long as it’s a normal battle. My Iron-eating Beast’s strength isn’t weak.”

“Senior, if you underestimate us, be careful.”

Shi Yu had no intention of taking advantage of the situation. Firstly, he believed that Eleven wouldn’t lose to a pet of the same level. Secondly, he didn’t think it was necessary. After all, it wasn’t an important battle. Even if he lost, he would treat it as increasing his horizons and accumulating experience.

Be careful?

At that moment, when he heard Shi Yu’s words, Wang chuckled.

How was that possible? If he could fail in a battle with a newbie, he would directly retire on the spot.

The other seniors also smiled, thinking that Shi Yu clearly still didn’t know the difference between a high-level Beast Tamer and a low-level Beast Tamer.

“Don’t worry, I know what to do,” Wang Le said.

In a short while, the nine of them arrived at the nearby battlefield. There were really quite a lot of people here.

However, judging from their age, most of them were high school students. They had already entered the holidays, and many Beast Tamers liked to pile up on the battlefield to kill time and train themselves.

The renting of the battlefield area was very smooth. The venue also sent a judge. Although Wang Le and the others felt that there was no need to use any judge, this was an inevitable process.

“It’s actually a top student from Ancient Capital University. Why is he here to battle?” At this moment, the judge was still puzzled. Logically speaking, even he himself couldn’t defeat a student from Ancient Capital University. This judge was really feeling some pressure.

“Don’t worry, Brother. With us watching, there won’t be a problem. We’ll just borrow the venue,” said the head of the Archeological Seven Elites, Little Zheng.

Apart from Shi Yu, the nine of them were all professional Beast Tamers. Moreover, they weren’t ordinary beginner-level Beast Tamers. A battle in the Awakening Stage was completely trivial.

“Then I’ll leave it to you.” The judge smiled awkwardly.

At this moment, after renting the venue, the main owner, Wang Yue, and Shi Yu, arrived at the two sides of the venue. The others were watching from the periphery and even prepared to record the battle process. After all, these were precious homework materials.

The judge was in the middle. He looked at Wang Yue and Shi Yu on both sides. After moistening his throat, he said, “The rule is 1VS1 Singles Battle.”

“Then, please send out your pets at the same time. Listen to my command and start the battle!”

As the judge finished speaking, Eleven, who was on Shi Yu's shoulder, jumped down eagerly. It had never stayed in the Beast Taming Space, so it saved the summoning segment.

After clumsily walking onto the arena, Eleven's heart surged. It could finally exercise...

"Rock Rhino!"

It saved Shi Yu a lot of trouble. As for Senior Wang Le, he still had to summon it.

"Roar!!!!"

As the wind howled, the countless light dots in front of Senior Wang Le instantly connected into a huge summoning array that looked like a star map.

A shocked roar came from the array at the same time, attracting the attention of passers-by.

"White Summoning Diagram, Intermediate Beast Tamer!" At this moment, passers-by were immediately attracted by the situation here and were shocked.

Professional Beast Tamers were divided into primary, intermediate, and advanced levels. Just like the transparent texture of the summoning array that the Beast Tamer connected to the Beast Taming Space, the Beast Tamer's summoning array was also divided into different colors: gray, white, and green.

Therefore, when passers-by saw the color texture of the summoning array on Wang Le's side, they immediately deduced that the level of his Beast Taming Space was at least level three, and it could also be an intermediate-level Beast Tamer!

Rock Rhino!

As for the pet Wang Le sent, it was also very strong.

It was brown all over, like a giant rhinoceros standing on two feet. It was more than two meters tall. Be it its body, limbs, or huge tail, it looked strong and powerful. Its ferocious expression coupled with its rock-like body made it look very menacing.

< Name > Rock Rhino

[Attributes]: Earth

[Race Level]: Mid-level commander

[Race Skill]: Flying Rock (Low-level), Rock Transformation (Low-level), Earth Entanglement (Mid-level), Rock Explosion (Mid-level), Earth Collapsing (High-level)

The moment the Rock Rhino appeared, the hearts of these Beast Trainers shook.

A super pet of a middle-rank commander species!

This Beast Tamer was so rich!

"Junior, my Rock Rhino's current growth level is Level 10 Awakening," Wang Le said from behind the Rock Rhino.

"My Iron-eating Beast is also about to awaken level ten."

On Shi Yu's side, Eleven was already standing in the arena. However, because it was still in a shrunken state, the passers-by didn't notice it for a while.

Only when they carefully observed did the passers-by discover that there was indeed such a small Iron-eating Beast sitting opposite the Rock Rhinoceros.

"Why is that Iron-eating Beast so small... a cub?"

Iron-eating Beast, mid-level transcendent race... The race was a major level lower than the Rock Rhinoceros.

At this moment, although the passers-by discovered that Wang Le's level was very high, it seemed that both parties were training their new pets at the moment. The pets they sent had yet to reach the transcendent level.

Moreover, the state of this Iron-eating Beast was really a little strange. Because it was too small, it was a sharp contrast to the giant rock giant rhinoceros opposite.

This caused many Beast Trainers who passed by to have no idea what the situation of the battle was or what they wanted to do.

Even the judge on the battlefield didn't know what exactly these people were doing here.

However, they would know very soon. The judge started the battle!

"Junior, you guys attack first!" Senior Wang Le said politely.

"Then, Senior, we'll do our best." Shi Yu was not polite.

The Rock Rhinoceros of the middle-level commander species had at least mastered a high-level skill. Coupled with the command of an intermediate-level Beast Tamer like Wang Le, its strength was definitely not weak. They couldn't be sloppy on their side.

[Eleven, multiplication, full battle power!]

Shi Yu immediately commanded.

At this moment, the passers-by and other seniors, including Senior Wang Le and the Rock Rhinoceros, were still looking at the little Iron-eating Beast with a smile, not realizing the seriousness of the problem at all.

However, in the next second.

"Wuu!!!"

As Eleven let out a battle cry, its body continued to expand, expand, and expand. Under the surrounding ripples, it became a huge beast nearly ten meters tall in the blink of an eye!!

The Iron-eating Beast, which was as tall as a three-story building, looked at the Rock Rhinoceros in front of it with a deep gaze. Its long black and white hair fluttered without wind, and its entire body seemed to contain explosive power.

This change stunned the senior archeologist.

“Gulp.”

On the other side, the Rock Rhino felt the shadow and gulped.

The other passers-by were also stunned, not knowing what had suddenly happened.

What was going on? It... it became bigger?

“Do you have to be so fierce?” Wang Le was suddenly stunned!

F*ck! Why did it become so big!

He knew that Shi Yu’s Iron-eating Beast had mastered multiplication, but the skill of multiplication was actually very particular.

It was equivalent to a combination skill of shrinking and enlarging. There were two development directions.

One was to pursue shrinking it to recover physical fitness, and the other was to pursue enlarging it to increase battle power!

Pets would also consume different energy according to the different development directions.

Shi Yu’s Iron-eating Beast could shrink so much before it reached the transcendent level. Wang Le originally thought that Shi Yu and the others would first develop a shrinking form, so that it would be easier for their daily training.

As for the giant form, the physical fitness of a pet in the Awakening Stage could not support that kind of training consumption at all. Generally, trainee Beast Tamers would choose to develop it in the future.

After all, this was a high-level skill. How could it be so easy to get both?

However, who knew that when it came to Shi Yu, shrinking and expanding were delayed at all. They actually developed to an extremely high level.

This didn’t make sense. Multiplication was a high-level skill! Wang Le’s face darkened. Even his Rock Rhino hadn’t had the time to develop the proficiency of a high-level skill.

Could Shi Yu and his panda use it well??

“Eleven, harden!”

Shi Yu continued to give the order. In the next moment, the huge Eleven palm slammed towards the Rock Rhinoceros.

“Rock Transformation, Rock Explosion!”

Wang Le’s heart skipped a beat, and he immediately gave the order.

On the field, the Rock Rhino’s entire body was instantly covered in rock material. At the same time, it waved its stone palm covered in rock material and resisted Eleven’s huge palm.

Rock Transformation was similar to hardening, but it was an earth-type skill. This Rock Rhino had clearly developed this skill to expert level!

As for Rock Explosion.

[Rock Explosion]: Intermediate skill, Creating Explosion Rock, using the destructive power of the rock explosion to deal huge damage to the enemy!

On Wang Le's side, he chose the combination skill of Rock Transformation and Rock Explosion to face this combination skill of Giant Transformation and Hardening!

Bang!!!

However, the power of the two was completely different. The moment the eleven palms made contact with the Rock Explosion of the Rock Rhinoceros, a violent explosion was triggered from the point of contact. Then, accompanied by a wave of smoke, the Rock Rhinoceros was directly sent flying a few meters by Eleven!

Their strength was on a completely different level!

This was also normal. After all, although the Rock Rhino was strong, its strength and physical strength were far inferior to the ice dragons suspected to be overlords. Eleven could even fight against ice dragons of the same level, let alone a pet of a commander race.

"Damn, is Wang Le going to fail?"

At this moment, seeing that Wang Le's Rock Rhinoceros was sent flying by the Iron-eating Beast in a single exchange, Zheng Yingjie and the others widened their eyes.

How did this Iron-eating Beast develop its multiplication skill to such a high-level and perfect level!

Could this be the talent of the ancient bloodline Iron-eating Beast?

"Probably not..."

Everyone continued to watch. The Rock Rhinoceros's defense was indeed powerful. At this moment, it could actually continue to stand up. Under Wang Le's nervous orders, countless flying rocks condensed around it, and more than ten rock cannons that were like cannonballs smashed towards the huge Eleven!

With Eleven's size, even if it had super vision, it couldn't dodge at this moment.

However, there was no need to dodge. The advantage of Perfect Level Hardening immediately appeared. The Hardening Material flowed on Eleven's huge body at a high speed. Whichever part of Eleven's body the Flying Rock hit, the body part would immediately harden and undergo perfect resistance.

Bang! Bang! Bang! A few flying rocks shattered when they touched Eleven's body, but Eleven was still unscathed.

Eleven used its super vision to determine the landing point of the attack and completed the resistance of the attack with the smallest consumption. At the same time, during the resistance, it also launched the next round of attacks under Shi Yu's command.

"Thunder Palm!" Shi Yu ordered.

As soon as he finished speaking, Eleven's hardening substance flowed and superimposed on the huge palm. With a sizzling sound, the black substance of the huge palm and the blue-white dazzling lightning formed a very dazzling combination skill.

"Perfect Level Hardening, what the f*ck???"

At this moment, after discovering the abnormality, Wang Le was completely stunned. He didn't understand why an Iron-eating Beast had such a high proficiency skill.

It wasn't just him. Lin Xiuzhu was also at a loss.

Because only she knew how old Eleven was... a year old, and a perfect level racial skill?

What a joke!

What had Shi Yu and the others experienced during the month when she wasn't in Ping Cheng?

At the same time, the most terrifying thing was that Eleven had also completed the combination skill with Perfect Level Hardening as the core. This scene made Wang Le subconsciously use his Beast Taming Talent.

If he didn't use it now, he would be destroyed!

In fact, at this moment, Wang Le even wanted the Rock Rhinoceros to use high-level skills to fight the enemy. However, the reality was that high-level skills usually awakened very late. Moreover, with the physical fitness of pets in the Awakening Stage, it was impossible to support the training of high-level skills. Therefore, they had yet to start practicing the skill called Landslide!

"F*ck." Wang Le gritted his teeth and used his maximum Earth Strengthening talent to help the Rock Rhinoceros strengthen its strength.

Countless earth elements surged around him, transforming into a brown light that connected him to the Rock Rhinoceros.

Boom!

Under the shocking fluctuations, the Rock Rhinoceros's aura rose steadily, and sand and rocks filled the surroundings.

The next moment, the rock transformation skill that was comparable to or even exceeded perfect hardening instantly covered the Rock Rhinoceros's entire body. Moreover, with a roar, the Rock Rhinoceros continued to use Rock Explosion to fight the enemy.

However, facing Eleven, who could tear apart dragons of the same level with its bare hands in its current state... Even if Wang Le used his Beast Taming Talent, the Rock Rhino still couldn't seem to withstand this powerful attack.

"Roar!!!"

Under the struggling roar of the Rock Rhinoceros, even if its own attributes were very resistant to lightning, its body was still instantly flattened the moment it came into contact with Eleven. The ground

under its feet almost instantly cracked. Accompanied by a huge explosion, the dazzling power of lightning covered the Rock Rhinoceros's entire body, turning its whole body black!

Thump.

In the next second, the Rock Rhino's entire body fell numbly onto the shattered arena, losing its ability to fight!

Victory and defeat had been decided!

No one expected that the battle between a middle-level transcendent iron-eating beast and a middle-level commander rank rock giant rhinoceros would actually be such a one-sided situation.

Shi Yu had an innocent expression. He had already said not to look down on the iron-eating beast. They should have been more serious from the start and gone all out.

As the Rock Rhino fell to the ground, Wang Le was stunned.

The expressions of the other archeology students also changed a hundred million points.

The passerby and judge were even more shocked. This was a f*cking Iron-eating Beast?

What was going on in this battle? Why couldn't he understand the accompanying moves??

Just now, Wang Le seemed to have used his Beast Taming Talent? Even so, he was still smashed by this Iron-eating Beast?

Holy shit.

Everyone looked at the little Iron-eating Beast that had shrunk back again like it was leaking air and had a satisfied expression. They were confused.

The senior from the archeology department was speechless. This was an Iron-eating Beast that had awakened its ancient bloodline??

It was too strong.

Was it too late to contract an Iron-eating Beast to nurture it now???

If they could awaken his ancient bloodline too, he would be rich!

How was this like a pet of a transcendent race? Even a monarch's pet was only so-so!

"Wang Le seems to be stunned on the spot."

"I knew that he would fail. He lost to a Beast Tamer intern. He probably has to give us a large sum of hush money. His intestines must be green with regret now. He regrets why he went for a fight..."

"Senior Lin, do you still sell your Iron-Eating Beasts at the dojo?"

The panda senior watched and listened in silence. Why was this outcome different from what she had expected...

Although she didn't know what had happened, she felt that her Iron-eating Beast's price was about to increase.

Chapter 94: The Benefits of Privilege

Translator: Atlas Studios Editor: Atlas Studios

The battle ended. Before Wang Le could react, his surroundings were already noisy.

A group of passers-by pointed at the smaller iron-eating beast!

What was going on!

They felt that they had seen a shocking scene just now, but when they recovered, they no longer knew how to explain the unscientific battle process just now.

Everyone looked at the battlefield and cursed in their hearts This was caused by the aftermath of a battle between awakened pets?

They would believe it if it was said to be a transcendent battle!

"Junior, what's wrong with your little Iron-Eating Beast!"

Opposite Shi Yu, the fat on Wang Le's face twitched. He looked like he was about to cry, and he had a faint smile on his face. He looked especially "happy".

"Senior, I told you not to look down on it... I've spent at least ten million's worth of resources on it."

What else could Shi Yu say? He hoped that saying this would make Senior Wang Le feel a little better.

He was right. The supplements alone cost more than a million points.

A resource like the evolution holy spring would cost more than seven digits, right?

If one considered that the cost-effective ratio of supplements to points was higher than those rare cultivation resources, it was not wrong for Shi Yu to say that he had smashed eight digits on the little Iron Eating Beast.

Even if an ordinary Beast Tamer really threw so much money, they might not necessarily be able to throw out such an Iron-eating Beast.

Of course, no one would do that. With this amount, they could even buy a commander-type pet cub with potential and outstanding talent.

Therefore, although Eleven's strength was ridiculous, it was indeed created by combining the three elements of paywall, cheating, and hard work.

"Ten..."

Wang Le was speechless. What else could he say? He could only say that Shi Yu was rich, even richer than him!

Spending ten millions worth of resources on a pet of a middle-level transcendent race was either money or true love!

No, an Iron-eating Beast that had awakened an ancient bloodline was probably not as simple as a mid-level transcendent anymore.

“What the f*ck...”

Senior Wang Le silently withdrew the Rock Rhinoceros and looked around. He said in a low voice, “I lost, I admit defeat. Let’s go!”

“Alright.” Shi Yu smiled and nodded. The two of them quickly left the battlefield.

Lin Xiuzhu and the other seniors were silent for a moment before following the two of them out.

After the nine of them gathered together, before anyone could say anything, Wang Le immediately said, “Cough, I lost. Junior has something special. Looks like Junior has passed the vocation assessment steadily this year.”

The others smiled and looked at him. So?

You’ve failed.

Everyone also saw Wang Le’s distress. Although they wanted to laugh, they considered his feelings and changed the topic in a friendly manner.

“Junior, your little Iron-eating Beast is a little ridiculous... It raised its racial skills to perfect level during the Awakening Stage. Is this also due to the ancient bloodline?”

Zheng Yingjie sighed with emotion. “I’m really curious about its battle power after entering the transcendent level. It will definitely experience a qualitative change.”

“Actually, it’s thanks to its own efforts.”

Shi Yu turned his head to look at Eleven on his shoulder and praised Eleven.

1

“Sob!” Eleven nodded seriously.

Eleven’s current strength was all thanks to its own hard work!

Cough... It would slowly repay the little effort Shi Yu had put in.

“Damn it, the more I think about it, the more ridiculous it seems.”

At this moment, no one mentioned Wang Le, but Wang Le himself couldn’t hold it in anymore. He said, “I’ve decided to study this ruin well and try to develop the evolution of the iron-eating beasts.”

“A little Iron-Eating Beast that has only awakened its evolution bloodline is already so strong. If it really still has an evolution form, wouldn’t it be a high-level commander race? It’s even possible for it to be at the monarch level.”

“If we really develop it, we’ll be famous!”

Everyone nodded when they heard him. Their motivation to explore the iron-eating beast ruins was completely aroused.

“Senior Lin, let’s study it together. Lead me.”

Lin Yu’er knew that Lin Xiuzhu was a researcher who studied the evolution of iron-eating beasts, and she couldn’t help but want to cozy up to him.

“Alright...”

Lin Xiuzhu saw that the seven people who had been lazing around previously suddenly had motivation, and didn’t know whether to laugh or cry.

However, she was also very confused in her heart. She looked at the calm Shi Yu and Shi Yu’s shoulder, where Eleven was acting dumb like usual, and felt that something was wrong.

She kept feeling that the strong one was not the Iron-eating Beast’s evolution form, but the combination of Shi Yu and Eleven. They definitely had some secret.

“Cough, I’ll go with you guys too,” Shi Yu said to the archeological seven heroes.

At the same time, he felt a little guilty.

If they really developed the evolution of the Iron-eating Beast and realized that it couldn’t defeat Eleven in its basic form, it would be awkward.

Eleven was so strong not because it had awakened an ancient bloodline.

The benefit of it awakening its ancient bloodline was actually just a doubling of its physical fitness. This was also the standard ability of the Evolution Holy Spring. There were no changes in other aspects...

Multiplication, Hardening, Thunder Palm, Super Vision... Be it the skill or the proficiency, they were all added together.

“Sure, we will definitely warmly welcome Junior Shi Yu to come and be our advisor.”

Zheng Yingjie smiled. Although this didn’t follow the rules, it wasn’t a big problem.

Finding someone to do homework on behalf of them... No, to put it nicely, wasn’t it too common for students to ask questions that they didn’t know how to answer?

“But it seems to be late. Do you plan to stay here or go back first?” Lin Xiuzhu asked Shi Yu.

“Let me see.” Shi Yu took out his cell phone and looked at the time. It seemed to be getting late.

It was definitely not suitable to continue investigating today.

Shi Yu was silent for a moment. He suddenly felt that it wasn’t easy.

He undoubtedly wanted to investigate deeper into this ruin, but there was still a half a month’s time-limited training card at Ancient Capital University. He didn’t have to let down the beast-eared girl, but the two places were a little far away. It was almost two hours...

“Let me see the situation tomorrow. I’ll go and return to the hotel now,” Shi Yu said.

...

That night, Shi Yu took a taxi back to the city. Along the way, Shi Yu thought about it and finally decided to take all of them. He would go from both ends.

In the morning, he would go to the Ancient Capital University to use the training card to train his etherealization abilities. In the afternoon, he would go to the iron-eating beast ruins in the suburbs to do research.

The road in the middle was indeed a little far, but if he took a taxi, he could totally meditate and cultivate in the car. It didn't seem like he would lose much time by going all in. It was just that the taxi fare was a little too much, but he had money, so it was fine.

"It's decided."

With the plan of running both ways, Shi Yu decided not to check out. After returning, he took a hot shower and slept happily on the hotel bed.

As for Eleven, it returned to the ruins bead and continued training.

Wang Le was very shocked at how Eleven could multiply, harden, and connect the Thunder Palm so proficiently. This coordination ability was unbelievable on a pet at the Awakening Stage. The reason was all because of this.

With absolute sleep, as long as Shi Yu didn't stop him, Eleven would dare to eat and train for more than 20 hours. The training content was all a combination of multiplication, hardening, and thunder palm plus super vision. In addition, the basic proficiency of these skills wasn't low, so how could Eleven not connect smoothly?

In fact, Eleven hadn't even used its full strength yet. If it used deterrence to control its opponent in battle, the Stone Rhino probably wouldn't even have a chance to fight back.

Even if it wasn't insta-killed by deterrence, the short hesitation was enough to defeat it in ten seconds. It wouldn't give the Rock Rhino any chance to use a skill.

Just like when he fought against the Ice Dragon Phantom.

The next day, Shi Yu woke up very early.

After washing up a little, he didn't disturb Eleven and the Green Silkworm in the ruins pearl. After eating breakfast, he headed to the training facility of the Beast Tamers at Ancient Capital University.

"Granny, you're playing games again..."

This time, Shi Yu entered by using his time limit card. After entering, he realized that the familiar granny was still playing games. He couldn't help but be a little speechless.

But then again, this place was quite cold and cheerless. Didn't other teachers and seniors bring their juniors here to experience it?

Shi Yu thought about it carefully. Compared to other training facilities, the cost-effective ratio of coming here to experience it seemed to be quite low. After all, not everyone had Ruins Beads like him.

“Oh, it’s that little classmate from yesterday.” The granny soon stopped playing and noticed Shi Yu.

Then she continued, “It’s still the same level as yesterday. I’ll help you activate it. You can go by yourself.”

“Thank you, Granny.” Shi Yu thanked her.

This time, after a day of thinking, Shi Yu was no longer delusional enough to challenge pets alone.

His goal was much lower. He decided that as long as he could survive until the end without getting injured.

After changing targets, the training this time was very targeted. Moreover, Shi Yu specially decided to activate the supplements today to practice a few more times...

About noon, the beast-eared girl also arrived. After she entered the training facility, she walked to the granny and said, “Granny, is Shi Yu here today?”

“He’s inside. Eh, it’s been almost two hours, but he’s still here??” The granny didn’t even raise her head and just glanced at the time to express her surprise.

Sigh, I was too obsessed with playing games. I didn’t realize that this little classmate was so hardworking!

“Is that so?” White Brook was surprised. What a coincidence.

She had just finished her work. She had originally planned to call Shi Yu, but because it was on the way, she directly came over to take a look.

He didn’t expect that Shi Yu was really here.

Moreover, two hours??

Not bad, he was talented and hardworking. No wonder Senior Lu admired him.

“Then I’ll wait.”

White Brook nodded and guarded the second floor.

About three minutes later, Shi Yu walked out of the training room with a weak expression. No, he was beaten out.

For the whole morning, he still couldn’t withstand the group fight of ten ferocious beasts. It simply made his lungs explode.

Persisting for nearly three minutes was his current limit.

Shi Yu was not satisfied. He hoped that he could last five minutes within half a month.

No, it would be best if it was more than ten minutes.

With his rich experience in etherialization, only then could he ensure that nothing happened when he encountered danger in the future. Only then could he be at ease and court death.

“He’s out?”

Senior White Brook leaned against the wall and followed Shi Yu downstairs. She turned her head to him.

“Uh, senior, why are you here?”

At this moment, Shi Yu also noticed White Brook and looked at her in surprise.

“I just came by to take a look. I didn’t expect you to be here too. I heard from the granny that you’ve been here for two hours?” White Brook’s expression was strange.

“How did you do it?”

Logically speaking, Shi Yu’s physique wouldn’t last for long.

“Oh, I relied on this.”

Shi Yu took out the three-piece set of Divine Beans, Honeydew Water, and Ginseng Root from the Ruins Bead and said, “I probably have a supplement absorption physique or something, so I recover very well after every practice. It’s alright to practice a little more.”

White Brook:???

She looked at the supplement in Shi Yu’s hand in confusion.

So after returning yesterday, did Shi Yu go to prepare supplements?

Or could it be that these supplements were brought with him in the first place?

“You’ve worked hard...”

White Brook was silent for a moment. He didn’t know what to say, so he could only nod and acknowledge Shi Yu.

Usually, Beast Tamers would only use some supplements when they were extremely weak after a big battle.

Under normal circumstances, they would recover naturally through meditation and rest. Firstly, it was healthier. Secondly, high-level supplements were not cheap. With this money, it was better to buy resources for pets. The cost-effective ratio was higher.

Shi Yu really dared to spend money on himself.

However, come to think of it, what was the “easy to absorb supplements” physique?

White Brook was puzzled. She had heard of elemental affinity physiques, undead affinity physiques, plant affinity physiques, but she had never heard of the ‘supplements absorption’ physique.

She had seen it all now.

“Are you free this afternoon? I’ll take you to the archeology department to take a look.” Senior White couldn’t figure it out, so she decided not to think about it.

“Yes.”

Shi Yu nodded. Then, he suddenly thought of something and said, "By the way, Senior, I heard that an Iron-eating Beast ruin appeared in the ancient capital. At the moment, it seems that the Archeology Department of the Ancient Capital University is in charge."

"Do you know which teacher is in charge? I want to investigate this ruin too."

"Iron-eating Beast ruins?" White Brook was completely unaware.

This was also normal. It was related to the Iron-eating Beast and had been dug up underground. It was destined that this ruin wouldn't receive much attention. Otherwise, it wouldn't have been handed over to a group of students to investigate and research.

"I don't know, but I can go and ask," White Brook said.

"Why, is this ruin very important? Eh, I almost forgot, your initial pet is an Iron-eating Beast..."

Shi Yu shook his head and said, "Not only that, I feel that the investigation priority of this ruin is a little low. The hidden historical value isn't as simple as it looks."

In his opinion, the most important information hidden in this ruin was not the evolution of the iron-eating beast, but the meaning of the nine special symbols.

After all, this was a special symbol that crossed two worlds.

Even if this ruin was really very ordinary, the history behind it was definitely not ordinary.

The archeology department of Ancient Capital University had completely underestimated the true value of this ruin.

Shi Yu was very certain about this.

Shi Yu hoped that Ancient Capital University would take this ruin seriously. It would be best to give some support and cooperation, such as detecting the composition of the metal piece. It would be best if the priority was higher.

He had heard from the Archeological Seven Elites that the laboratory positions of the Archeological Department were very tight. The ruins of investigation and research had priority. Things like the Iron Eater ruins were not in a hurry.

"Is that so?" White Brook nodded and said, "Then I'll bring you to ask in the afternoon. You're a reserve member of Bureau 11, right? When the time comes, you can just talk to the people over there. It's more useful than my words."

"Uh." Shi Yu was stunned. The beast-eared girl knew everything, but she actually knew about the Ruins Bead and Bureau 11. It looked like she and Senior Lu were very good friends.

Moreover, the beast-eared girl herself was probably not simple either. She might even have a legendary Beast Tamer senior? Otherwise, she wouldn't be carrying a spatial storage device with her.

...

In the afternoon.

White Brook brought Shi Yu to the southern campus. Unlike the northern campus, this was the headquarters of the archeology department. There were more libraries, museums, and laboratories than training facilities.

“We have to ask who’s in charge of that Iron-eating Beast Ruins, right?”

“Let’s go directly to the dean...”

The beast-eared girl had a clear goal. If she wanted to ask, she would ask the person in charge.

“Ah, this.”

Big Sister White Brook walked in front while Shi Yu followed behind her. He felt that she had a very strong aura.

Soon, White Brook brought Shi Yu to a building. At the same time, he said to Shi Yu, “I wonder if he’s around, but during the opening day, the leaders should be pretty packed.”

“Let’s take a look first. If they’re not around, we can ask other teachers.”

As she muttered, she brought Shi Yu to the Dean’s office and knocked on the door.

Shi Yu and White Brook’s luck was pretty good. After knocking twice, a “please come in” voice came from inside.

White Brook smiled and nodded at Shi Yu. Then, he pushed open the door and entered.

Director Li from the Archeological Department looked like a kind, middle-aged, big-bellied man. At this moment, he seemed to be working. He was a little different from the Archeological Department Director Shi Yu had imagined...

When he saw someone enter at this moment, he couldn’t help but raise his head and cast a puzzled gaze.

However, as he saw White Brook, he immediately smiled.

“President Bai, why is it you? Aren’t you training today?”

“Director Li, I’m not the one looking for you. I brought someone here too.” White Brook looked at Shi Yu.

At this moment, Shi Yu also walked forward and greeted the other party. “Hello, Director Li.”

“Hello friend, you are?” Director Li looked confused.

“My name is Shi Yu. I’m planning to apply for the Ancient Capital University’s Archeology Department this year,” Shi Yu said.

“I see, welcome, welcome!!” Chief Physician Li laughed and immediately understood. So it was White Brook who brought her relative or friend over to greet him in advance.

“Director Li is a big boss. You have to remember him!” White Brook said with a smile.

“He was brought to Ancient Capital University by your Dr. Lu after much effort.”

“Huh?” Director Li was stunned.

“Dr.... Dr. Lu Qingyi??”

“Yes.” White Brook nodded.

The way Director Li looked at Shi Yu changed instantly.

The people White Brook brought and the people Lu Qingyi invited to apply for Ancient Capital University were two different concepts!

The former would make him someone he needed to only show friendliness to, while the latter meant a lot.

After all, Dr. Lu Qingyi was a big boss who could rank in the top 20 of the Dong Huang in terms of contribution to the country. She was the pride of Ancient Capital University.

Even some legendary Beast Tamers were very respectful to Dr. Lu Qingyi. None of the members of Bureau 11 were simple.

“Student Shi Yu, what’s your relationship with Dr. Lu?” Director Li asked curiously.

Shi Yu said, “There’s no special relationship. Uh, I suppose you could say she led me through the door to the archeology world?”

If it was this world, it was indeed so. Shi Yu had originally wanted to develop steadily, but in the end, Lu Qingyi came straight to his door and used 10 million to smash him back into the archeological world. Shi Yu remembered this “favor”. It was a good memory.

“Oh?” Director Li’s interest was aroused.

At this moment, Shi Yu also wanted to get to the point quickly. He said, “Director Li, did you discover a ruin related to iron-eating beasts in the ancient capital? At the moment, it seems like our archeology department is in charge?”

“Iron-eating Beast?” Director Li thought for a moment and nodded. “There is indeed such a new ruin. At the moment, it seems to have been handed over to the students to investigate and research. What’s wrong?”

Shi Yu said, “I feel that this ruin isn’t as simple as it looks, so I want to take over and investigate. I also want to cooperate with Ancient Capital University to study it. I wonder if it’s possible...”

He started communicating with Director Li according to what White Brook taught him.

“Huh? You’re taking over?” Director Li was stunned, not understanding what it meant for a moment.

“This is my identification.” Shi Yu took out a small notebook from his pocket and handed it to Director Li.

Director Li took it blankly and flipped to the first page. At the top was the profile picture of his handsome face.

Below was Shi Yu’s role as a reserve member of the Homeland Ruins Strategic Investigation and Backup Security Bureau.

At this moment, as he saw this certificate and the last seal, Director Li was stunned.

He immediately became excited, and his breathing became rapid. He felt like he couldn't breathe.

His face was flushed red. Beside him, White Brook saw his appearance and thought it was funny.

Even though Bureau 11 was a reserve member, its status was very high. In terms of archeology, its power was at least on the same level as the Archeological Association and the Nine Elite Universities.

It was no wonder that Director Li was so excited.

Although the trump card of Ancient Capital University was the Archeology Department, in recent years, there had indeed been no new results worth mentioning in the Archeology Department of Ancient Capital University. It was time to urgently need fresh blood, especially people with true archeological talent.

Shi Yu's arrival was simply timely!

To be absorbed by Bureau 11, there was no need to say anything about Shi Yu's talent. He was almost guaranteed to be a new star in the archeological world in the future.

At this moment, Director Li finally understood why Lu Qingyi would become the guide of this young man in front of him and let him enter Ancient Capital University to study. This was simply giving treasures to the Archeological Department of Ancient Capital University!

"Student Shi Yu, you... really gave me a fright..." Director Li held Shi Yu's identification documents and finally calmed down before laughing.

Great, after next year, their archeology department would take off again!

"You're saying that the iron-eating beast ruin isn't as simple as it looks? I understand. Next, you'll be in charge of the development and investigation of this ruin. Ancient Capital University will also cooperate fully." Director Li believed in Shi Yu's judgment. In this aspect, Shi Yu was also a professional.

"Uh, thank you."

Shi Yu was stunned before falling silent. Was this the feeling of being a privileged dog? It felt a little good...

Wait a minute, after such a series of actions, wouldn't Senior Panda and the archeological Seven Elites be very stunned? After all, he had suddenly become their in-charge.

Chapter 95: Listening to the Voice of History Again

Translator: Atlas Studios Editor: Atlas Studios

Then, Shi Yu and Director Li chatted a little more.

After getting his contact information, he bade farewell.

After all, both Director Li and the beast-eared girl should be very busy, so Shi Yu didn't want to disturb them.

"Senior, thank you."

After leaving the office building, Shi Yu thanked White Brook.

"No problem."

White Brook stretched.

As expected of the beast-eared girl who could tear apart pets with her bare hands. Even her stretching looked very powerful. Shi Yu secretly took a look.

"Then do you still need me to show you around?" White Brook asked.

"There's no need. Next, I want to mainly investigate this iron-eating beast ruin. It won't be too late to explore the other facilities after I enter the school," Shi Yu said.

After chatting with the archeological Seven Elites, Shi Yu realized that the archeological methods of the two worlds were really different.

After all, this was a world with transcendent power. He might really have to learn from the beginning, just like what Lu Qingyi said.

The Archeology Department of Ancient Capital University was a good entry point.

"Eh, alright. In that case, contact me if you have any questions." White Brook nodded.

...

After Shi Yu and White Brook left, Director Li began to search for information related to the Iron-eating Beast Ruins. Then, he found the supervisor in charge of the ruins.

"Director Li, you were looking for me?"

The mentor of the Archeological Seven Elites came to the director's room in confusion.

"Little Ding, your students are in charge of the Iron-eating Beast Ruins, right?" Director Li said with a smile.

"Yes." Mentor Ding nodded.

"Next, the investigation priority of this Iron-eating Beast Ruins will be raised to the highest. I've arranged for another person in charge here. When the time comes, you have to cooperate with me fully."

"Huh?" Mentor Ding was confused.

Wasn't it just a small ruin of a tribe that worshiped iron-eating beasts? Could it be that there were new discoveries?

"Which supervisor is it?"

“Not a mentor. A reserve member of Bureau 11 introduced by Dr. Lu Qingyi. A young man. You just have to keep it in mind.”

“He should have made contact with your group of students now. He seems to have discovered a deeper value to this ruin.”

When Director Li finished speaking, Mentor Ding’s pupils constricted. Bureau 11?

“Yes.” He hurriedly nodded.

...

At the iron-eating beast ruins.

On a new day, Senior Panda and the archeological seven elites were very motivated.

They had already devoted themselves to researching for the whole morning. Just the relevant information they flipped through was more than 100,000 words.

This was an unimaginable motivation for the archeological seven elites who had been skiving previously.

It couldn’t be helped. The potential Eleven displayed was too strong.

It gave the illusion that as long as the iron-eating beast evolved, it would be invincible.

In the Beast Taming Domain, it was very impressive if one could develop the evolution method of a pet.

For example, those researchers who had researched different evolution paths for the Green Silkworm had already gained fame and fortune, walking to the peak of their lives.

Although the iron-eating beast wasn’t as popular as the green worm, it wasn’t bad either.

If they could figure out the evolution of the iron-eating beasts through archeological research, not only would they be rewarded by the school, but they would also be heavily rewarded on their resume.

At this moment, Zheng Yingjie was comparing the similarities between ruins and other ruins from 4500 years ago.

A phone call made him stop what he was doing.

“Mentor Ding?”

“What, the person in charge of the project is going to be changed?”

After saying a few words on the other end of the phone, Zheng Yingjie was stunned.

His conversation immediately attracted the attention of the others.

Change in person-in-charge?

The archeology seniors were stunned. No way!

At the moment, the person in charge of this ruin was their supervisor.

They had a good relationship with their mentor, and Mentor Ding even promised to assist in the investigation in two days.

This sudden change in person-in-charge definitely didn't make it convenient for them, after all, they were already familiar with this mentor.

"I know the new person-in-charge?"

"He's already come into contact with us? Who?"

Zheng Yingjie looked confused. Then, his expression suddenly changed drastically. He was stunned!

"This..."

After hearing the name of the new in-charge, Zheng Yingjie was confused.

A moment later, Zheng Yingjie hung up.

Lin Xiuzhu and the other six elites surrounded him and asked what was going on.

"What change in person-in-charge? What's going on?" Wang Le said.

"Will it affect the research route we've already confirmed?" Lin Yu'er asked.

Zheng Yingjie was still confused. "Probably not."

"Because..."

"Mentor Ding said that the in-charge of the Iron-eating Beast Ruins is Shi Yu. You didn't hear wrongly. It's that Junior Shi Yu from yesterday."

"What??"

After Zheng Yingjie finished speaking, he wasn't the only one who was stunned. Everyone else was.

Wang Le stuttered, "Wh-what's going on?"

The others were also very stunned. He was just a junior who had yet to enroll in school. Why did he suddenly become the person in charge of the Archeological Department of Ancient Capital University?!

This leap was a little too big!

"Senior Lin?" Zheng Yingjie looked at Lin Xiuzhu.

At this moment, Lin Xiuzhu also had a puzzled expression and felt that he seemed to have heard wrongly.

"Who exactly is this Junior Shi Yu?" they asked.

In Lin Xiuzhu's words, Shi Yu was introduced by Hall Master Lin and was from the same hometown as Lin Xiuzhu.

It was such an ordinary identity and background, how did it suddenly become related to Ancient Capital University?

He was in charge of an homework project and was at least at the level of a university teacher.

“You’re asking me but, who should I ask?” Lin Xiuzhu crossed his arms and couldn’t figure it out.

Shi Yu’s identity was indeed very strange. At the start, she also felt that Shi Yu was very ordinary.

But for some baffling reason, Shi Yu was nurtured as a personal disciple by his father...

This was before Eleven awakened its ancient bloodline.

There were so many iron-eating beasts, but why did Eleven have to awaken an ancient bloodline?

This was also the reason why Lin Xiuzhu felt that Shi Yu was extraordinary. It wasn’t that the ancient bloodline had formed Shi Yu and Eleven, but because it was Shi Yu that Eleven could awaken the ancient bloodline.

“He should come over later. When the time comes, I’ll personally ask him what’s going on...”

Shi Yu was indeed on his way to the Iron-Eating Beast Ruins.

During the car ride, Shi Yu was in a daze as he meditated.

So slow...

In the future, it looked like he had to contract a flying pet that was proficient in speed.

However, even if he didn’t contract it, he could still rely on bugs to transform.

The skill, Illusionary Phantom, was simply an all-purpose tool skill. Worms also seemed to be all-purpose tool pets. In the future, everything could change.

For example, if it transformed into a frost dragon, it could also fly.

Of course, although the frost dragon could fly, it wasn’t known for its speed. Moreover, being a Dragon Knight in a city was too ostentatious.

It was easy to be shot down as an unknown flying object.

In addition, the ability of the substantialized phantom was definitely a little inferior to the main body.

At least, at the moment, the ice dragons formed by the bugs could not even defeat pets of the same level of growth as high-level transcendent races, let alone real frost dragons of overlord races.

...

Soon, Shi Yu arrived at the iron-eating beast ruins.

When Yu came over, he realized that Senior Panda and the archeological seven elites were looking at him strangely.

“Uh.” Shi Yu was slightly stunned.

“Junior, what’s going on? Why have you suddenly become the main person in charge of this ruin...”
Zheng Yingjie smiled bitterly, very confused.

"I felt that there wasn't enough attention on this ruin, so I contacted your Director Li through a friend." Shi Yu smiled.

"Huh?"

The few of them looked at Shi Yu in confusion. What friend was so powerful?

He could actually directly use his connections with Director Li.

"In short, this is a good thing," Shi Yu said. "Next, the school will probably cooperate with us to investigate this ruin. The composition analysis of the metal piece might be completed in two to three days."

The few of them looked at each other.

"Alright..." Seeing that Shi Yu didn't intend to talk about it in detail, everyone tactfully stopped asking.

However, at this moment, they didn't dare to treat Shi Yu as an ordinary junior.

This was clearly a super relation in Ancient Capital University!

After he entered university, it was still uncertain who would look after whom.

"Does my father know this friend you're talking about?"

After everyone dispersed to work, Lin Xiuzhu leaned beside Shi Yu and asked softly.

She remembered that her father had also said that Shi Yu was entrusted by an acquaintance to study at Bamboo Stone Dojo.

"I think so," Shi Yu said. This friend had two interpretations. One was Senior Lu, while the other was the beast-eared senior. As for the former, Lin Hongnian definitely knew her.

"I see." The panda senior nodded and smiled. "Alright, I didn't expect you to become the person in charge of this project after a day."

Shi Yu grinned. "It's our duty to revive the glory of the iron-eating beasts."

"Speaking of which, if we really develop the evolution of the iron-eating beasts, will the price of the iron-eating beasts in the Iron Bamboo Breeding Base increase?"

Lin Xiuzhu was stunned. He did not expect Shi Yu to have thought of this either.

Generally speaking, if a pet was discovered to have a new evolution, or if a certain Beast Tamer used a certain type of pet to kill in major competitions, it would affect the price of this pet to a certain extent.

"According to the market demand, it's really possible..."

She fell into deep thought. So, should she let her father catch more wild iron-eating beasts in the wild to enrich the number of iron-eating beasts in the breeding base?

Lin Xiuzhu felt that if the iron-eating beasts in the breeding base were to be bred normally, the supply would be insufficient. Sigh, why couldn't the iron-eating beasts be willing to make babies on their own? She blushed slightly.

...

Although he had become the in-charge of the Iron-eating Beast Ruins, Shi Yu was still like a junior most of the time.

He had many things to consult with the Archeological Seven Elites.

These people looked like bad students, but it wasn't like they didn't have any real talent. After all, they had been studying in university for a while.

In contrast, the knowledge accumulated by Shi Yu's previous life seemed to be of little use here. There were still many new things to learn.

After confirming the research direction, everyone began to study it step by step.

About two days later, Mentor Ding arrived at the Iron-eating Beast Ruins.

For the past two days, he had been assisting in analyzing the elemental composition of the metal sheet at the school. Now that he had worked overtime, he finally had a result.

"Nice to meet you, Student Shi Yu."

Mentor Ding was a middle-aged man in his thirties. He was gentle and elegant, and his expression was kind.

This was the first time he and Shi Yu had met, but both parties had long heard of each other.

"Hello, Mentor Ding."

Shi Yu and Mentor Ding shook hands.

"Mentor Ding."

The seven archeological elites were also very excited that their mentor had come.

This meant that there was some progress in this research.

"After two days of analysis, we can already confirm that this metal piece is mainly composed of six types of metal elements."

Tutor Ding took the information and communicated with everyone.

"Among the six metal minerals, there are two level-five metal resources, three level-six metal resources, and one level-seven metal resource."

Various cultivation resources could be divided into ten levels.

For example, pets in the Awakening Stage usually corresponded to level 1 resources.

Resources above level five were basically mainstream resources used by master-level Beast Tamers and even legendary Beast Tamers.

This alloy piece contained the composition of six high-level metal resources. It made everyone excited but also within expectations.

They were excited because if this metal piece was really a part of the Iron-eating Beast's evolution form, then the species level of the Iron-eating Beast's evolution form might not be low. After all, it had used so many high-level metal resources.

It was within expectations because Eleven was already so strong even before evolution. It was natural for it to be unstoppable after evolution.

Mentor Ding took out the information on every metal resource and said,

"Among them, they are respectively level-five metal mineral resources, Golden Jade, and Green Heart Sand."

"Level-six metal mineral resources, Mysterious Purple Copper Mine, Heavenly Silver Iron, Blue Gray Pure Gold."

"Level-seven metal mineral resource, meteor iron."

"Thank you for your hard work," Shi Yu said.

"Not at all." Mentor Ding laughed and said, "Next, are you planning to study these resources?"

"These resources are expensive. If there's no accurate experimental research route, it might cost a lot of money."

"But the school has some reserves for these resources. We can still afford a certain amount for now. We have to buy more."

At this moment, Lin Xiuzhu and the Archeological Seven Elites were stunned. Indeed, there were too many high-level resources. Ordinary people couldn't afford to experiment at all!

If they really wanted to study it in depth, the research funds would probably reach hundreds of millions.

"There's no need for the experiment. Let's start with the nature of these materials," Shi Yu said.

After confirming the composition of the metal piece, he also understood that it might be very difficult to spend money to study the evolution of the iron-eating beast.

It was better not to test it blindly without a concrete plan. Shi Yu did not want to waste tens of millions or hundreds of millions of yuan.

Usually, when researchers studied the evolution of pets, they would first summarize the feasible theories, analyze the success rate, and then conduct experiments. Very few people directly fed and tested the materials blindly. Money wasn't obtained from thin air.

"Alright." Mentor Ding nodded and said, "If you need anything, just tell me."

...

Next, Shi Yu and the others had an additional research mission.

It was to study the nature of the six metal minerals and analyze the different combinations of reactions between them in theory.

This homework that was focused on research was not Shi Yu's main focus for the time being. He handed it to Lin Xiuzhu and the others to do.

What he was most concerned about was what the nine special symbols represented.

Shi Yu checked a lot of information about that era and realized that this symbol only appeared on the iron-eating beast ruins. There were too few clues...

With insufficient clues, Shi Yu could only place all his hopes on his special talent.

"Lu Qingyi said that the activation of the talent of 'listening to the Voice of History' requires a certain opportunity."

"The deeper the user's contact with that historical environment, the deeper the exploration, the deeper the obsession, and the deeper the understanding, the easier it is to listen to the voice of history."

It was precisely because of this that Shi Yu stared at the metal piece every day and even carried Eleven to look at the murals.

It looked a little silly, but they all hoped to establish a connection between themselves and this ruin.

Just like that, half a month had passed since Shi Yu arrived at the ancient capital.

He went to practice phantom transformation in the morning and came here in the afternoon to investigate. Time passed quickly.

For the past half a month, Shi Yu had mainly been meditating on his own. He didn't give Eleven and the Green Silkworm any additional points. They were all training on their own.

"Wuu." Eleven didn't even care if he added points.

In the past half a month, it had been training especially hard. This was because Shi Yu had stopped increasing its points, giving it a chance to catch its breath. It could finally make the best use of its time to repay the debt.

However, what confused Eleven was why Shi Yu always carried it to look at murals and metal pieces every day!

Shi Yu had no choice. He didn't plan on treating it as a mascot!

He hoped that he could hear the voice of history through the connection between Eleven and the iron-eating beast ruins.

However, after half a month, there still didn't seem to be any substantial effect?

Even Eleven advised Shi Yu to give up.

"Wu wu!!!"

What lousy evolution form? It was fine even if it didn't want it. Even so, it could still become the strongest!

Eleven laid on Shi Yu's shoulder and squirmed for a moment. Then, she stood up and climbed onto Shi Yu's head. It said confidently.

"As long as I'm sincere, it'll work! Be good!" Shi Yu educated him. It made sense, but shouldn't this panda show some respect and save some face for its ancestors!

Crack!

However, just as Eleven finished speaking, a small crack appeared in the stone wall in front of Shi Yu and the others, scaring Eleven and Shi Yu.

"Damn, what's going on?" Shi Yu took a step back with a shocked expression.

It cracked?

Why did this situation feel so familiar?

"Sob." Eleven spoke carefully on Shi Yu's shoulder. Did it say something wrong?

Shi Yu fell into deep thought. He suddenly felt that his heart was beating abnormally and his mind was in a daze.

In short, he seemed to have sensed it.

He was gradually resonating with this ruin.

"No, that's right. Perhaps this ruin is special, so we have to use agitation."

Shi Yu took a deep breath and said to the ruins through telepathy, "The Iron-eating Beast's evolution is only so-so."

Crack, the crack deepened a little.

"It probably isn't a powerful evolution form. Otherwise, it wouldn't have been lost."

Boom!

After saying this, the stone wall of the ruins trembled slightly and dust fell. Shi Yu's brain rumbled.

He seemed to have entered the special state when he explored the ruins and saw a historical image.

Shi Yu was stunned...

"F*ck, I think I've found a new way to listen to the Voice of History? I thought that it would work only if I was sincere? Why didn't you follow the routine, stupid wall!"

1

Chapter 96: Evolution of the Iron-eating Beast Armor

Translator: Atlas Studios Editor: Atlas Studios

Shi Yu was speechless.

He paid his respects obediently and sincerely for half a month. In his heart, he kept repeating, "It's our duty to restore the Iron-eating Beast's glory". The ruins did not react at all.

On the contrary, after slightly denying the iron-eating beast's evolution, the 'spirit' in the ruins immediately couldn't sit still.

What was going on?

It was not as easy to talk to as the stone statue in Ping Cheng.

Perhaps the 'spirits' born from different ruins, ruins, and ancient artifacts had different personalities?

If he had known this would happen, he would have shouted on the first day he came here, "The Iron-eating Beast doesn't have any evolution form at all. Come and convince me!"

...

This time, the historical scene Shi Yu saw was still very short.

He saw a tribe filled with fire furnaces.

In the tribe, there was a group of muscular men with bare arms.

They were just like blacksmiths, using batch after batch of rare metals that Shi Yu found familiar.

Boom! Boom! Boom!

The sound of iron striking constantly entered Shi Yu's ears.

Then, the alloy battle armor was worn by a group of iron-eating beasts.

After the Iron-eating Beasts put on their armor, they seemed to be using Perfect Level Hardening. They released Hardening Material to wrap the armor, causing the armor to completely become one with them.

There were many types of armor. Some iron-eating beasts wore perfect armor, while others only had huge alloy claws equipped on their arms. There were even iron-eating beasts who picked up shields. They had different appearances, but they all used Perfect Level Hardening to connect themselves to the armor.

During this process, as they fused with the armor, their aura seemed to have been raised astonishingly, and their bodies kept growing under a wave of light.

A moment later, hundreds of Iron-eating Beasts wearing various battle armor appeared on the screen. They were arranged in an orderly manner, and it was extremely shocking. This group of Iron-eating Beasts was like a well-trained army preparing to go out to battle.

At the end of the scene, the iron-eating beasts used their hardened claws to inscribe special symbols on the armor. At this moment, their bodies flickered with light again...

The scene stopped.

...

In reality.

Eleven looked at the silent Shi Yu and did not understand what was going on.

At this moment, Shi Yu's mood was very complicated.

He didn't know what to say to express his current mood.

No wonder Bureau 11 directly absorbed him into the organization without a word when it encountered a Beast Tamer with the talent to listen to the Voice of History.

This ability was indeed a little buggy.

While other archeologists were still exploring the mysteries of ancient times, archeologists with this talent directly pried into history like watching a movie. If this wasn't cheating, what was?

"So those metals aren't for eating?" Shi Yu fell into deep thought.

It was actually to build an alloy battle armor and equip the Iron-eating Beast, then use the Perfect Level Hardening connection.

Don't tell him that this was the evolution method of the iron-eating beasts.

In the scene, Shi Yu also saw the materials needed to forge the alloy battle armor.

From the looks of it, it felt like the metal that they had found.

If that was the case, the iron-eating beast's evolution method was easier than Shi Yu imagined.

However, it was still unknown if modern forging and processing technology could turn those metal minerals into alloy battle armors like in ancient times.

Then, what should this evolution method be called?

Armor evolution?

It wasn't like there weren't any armed evolution in existing pets.

The evolution method of artificial mechanical lives was mostly armed evolution.

However, there was still a little difference between the two.

"Wait, that's not the point!"

He only saw the evolution method of the iron-eating beast, but Shi Yu kept feeling that he had not seen the full picture of history.

This group of Iron-eating Beasts wore battle armor and completed their evolution. What were they going to do? War?

What did the different symbols they carved on their bodies mean?

Why was there such a symbol on Earth?

In the end, Shi Yu felt that he knew something, but he didn't completely know...

Forget it... He decided to start researching the evolution of the iron-eating beast first.

...

“What happened?”

As Shi Yu listened to the Voice of History, the stone wall seemed to have exhausted its “life” as many cracks appeared.

The “boom” just now also directly attracted Senior Panda and the archeological seven elites.

After they came over, they immediately saw the cracked stone wall and Shi Yu, who had his back to them.

Ahhhhhhhhh!!!!

Everyone: w (◦Д◦) w???

So, what happened!!!

“Wuu.”

Before Shi Yu could turn around, Eleven, who was on Shi Yu’s shoulder, turned around first and revealed an innocent expression.

If it said that they only hit the stone wall twice and the stone wall exploded, would they believe it??

“Damn, what’s going on?”

The stone wall exploded, and the brains of Zheng Yingjie and the others also exploded.

Although the iron-eating beast ruins weren’t very important before, it was their basic responsibility to keep this ancient item intact. But now... something big had happened.

They looked at Shi Yu, who was slowly turning around. Could it be that Shi Yu couldn’t figure out anything even after half a month? He finally broke down and smashed the stone wall?

“Don’t panic.”

At this moment, Shi Yu turned around and looked at the panicked crowd. He comforted them.

Calm down.

“I got something.” Under everyone’s stunned expressions, Shi Yu chuckled.

“I think I know what the evolution method of the iron-eating beasts is.”

“What?!!”

Upon hearing Shi Yu’s words, everyone was more shocked than seeing the stone wall crack. They widened their eyes and looked at Shi Yu.

Was this for real?

“Yes, let’s go out first,” Shi Yu said.

Then, everyone arrived outside in the wide space.

They looked at Shi Yu with anticipation and excitement.

So, what exactly had Shi Yu discovered?

“The six metal components detected by that metal piece are indeed the key to the evolution of the iron-eating beast.”

“What we guessed most previously was to let the iron-eating beasts eat these metals. Actually, the actual situation is similar.”

“The iron-eating beast’s evolution method should be to make these six metal minerals into alloy battle armors, then equip the iron-eating beast with them. Finally, let the iron-eating beast use the transcendent level racial skill Hardening to perfectly wrap and integrate the power of the armor.”

“The iron-eating beasts’ hardening substance and this alloy should produce a special reaction that can assist them in increasing their level of life.”

The few of them were clearly stunned.

Lin Xiuzhu said, “What’s the principle?”

Shi Yu: “Why does that matter?”

“Then how are you sure?”

“Uh...” Shi Yu was stunned. “Instinct?”

Everyone was stunned. They felt that Shi Yu didn’t say anything.

To put it bluntly, it was still a guess. On the basis of their previous guesses, there was another one.

“Can those six metals really be made into alloys?” Zheng Yingjie was at a loss.

“We’ve been researching and analyzing their nature these days. There’s nothing in common.”

Lin Yu’er said, “In the end, this method still requires transcendent hardening...”

Everyone looked at Lin Xiuzhu.

Among the known Iron-eating Beast Tamers, there were really not many Iron-eating Beasts who had mastered transcendent Level Hardening.

Back then, Lin Xiuzhu had said that her father, who was also Hall Master Lin Hongnian, had trained the Iron-eating Beast for 21 years before training this skill to transcendent.

As for Lin Xiuzhu, she started growing up with her Iron-eating Beast when she was 10 years old.

Although there was no contract at that time, he had started to cultivate feelings with the Iron-eating Beast since young and then underwent initial training to familiarize himself with it.

In the end, ten years later, today, her Iron-eating Beast's hardening skill was established under her father's training experience. It was only at the perfect level, and it was far from reaching the transcendent level proficiency.

If one of the evolution conditions of the iron-eating beasts was really hardening at full proficiency, then this condition seemed to be a little difficult to achieve.

The Green Silkworm's worm silk reaching proficient level was enough for it to evolve, but the Iron-eating Beasts actually required full-level racial skills... It was simply a scam.

Moreover, the evolution materials of the iron-eating beasts were basically rare metals above level five. The price of using these metals to forge a set of armor was obvious.

It could be said that even if the evolution method of the Iron-eating Beast was publicized, there seemed to be very few Beast Tamers who could fulfill this evolution condition.

Everyone's stomach hurt. Was Shi Yu's deduction reliable?

"Well, why don't you just believe me?"

Shi Yu actually wanted to experiment too.

Unfortunately, he didn't have evolution materials, and he didn't know how to turn these materials into alloys. There were technical difficulties.

In addition, Eleven's skill proficiency hadn't reached the standard yet.

Moreover, he had yet to decide whether he should let Eleven evolve. In the future, he would feel that it was very strange to have an iron lump on his shoulder, and it was also very heavy. Sooner or later, he would get a shoulder disease.

"Even if it's true, where are we going to try forging alloy battle armor? Where are we going to find Iron-eating Beast experiments with transcendent proficiency..." Zheng Yingjie said with a headache.

Although there was a concrete experimental route, it still sounded like a huge project with hundreds of millions of research funds...

"It's alright. It's a good thing that we can find a breakthrough."

The panda senior thought for a moment and looked at Shi Yu. "I believe you. Do you want to study it? Our Bamboo Stone Dojo will bear the cost of the evolution materials. Iron-eating beasts with transcendent Level Proficiency can also use my father's Iron-eating Beast as a guinea pig."

Shi Yu:...

Everyone called her a filial daughter.

Senior Panda was a good father.

"It's mainly because at the moment, only my father's Iron-eating Beast fulfills the conditions. In order to study the evolution of the Iron-eating Beast, he has invested a lot of money. This time, it sounds more reliable than his previous mess." The panda senior shook her head.

“If he knew, he would definitely be willing. He might even take the initiative to come and cooperate.”

Shi Yu was silent for a moment before saying, “Then I’ll ask if Ancient Capital University can provide some technical help.”

“In terms of forging alloy battle armor, there should be someone more professional at the university.”

Shi Yu and the panda senior looked at each other and nodded. They immediately agreed.

Shi Yu contacted the Ancient Capital University to seek technical help.

Senior Panda contacted her father to experiment as a lab rat.

Whether the Iron-eating Beast race could soar into the sky and raise their prices depended on this wave.

Chapter 97: The Iron Eater Has Really Evolved

Icefield City, Ping Cheng.

Hall Master Lin Hongnian was meditating in the martial arts hall.

Suddenly, a call interrupted his cultivation.

“Xiu Zhu?”

Seeing the caller, Lin Hongnian was slightly stunned.

For the past half a month, he had taken the initiative to call Lin Xiuzhu every day to ask about the investigation progress of the iron-eating beast ruins.

And the news they received was not very good. There was no progress.

Today, his daughter actually took the initiative to call. Did she gain anything?

Lin Hongnian picked up the call with a nervous heart.

On the other side, he was pleasantly surprised.

“Dad, Shi Yu has confirmed the iron-eating beast’s evolution method, but he requires the iron-eating beast to master transcendent Level Hardening. Do you want to give it a try?”

Whoosh!

Hall Master Lin suddenly got up and widened his eyes.

“Really?”

He asked with anticipation.

“Yes, but the experimental fee for evolution materials might be a “bit” expensive.”

“Can you bear to?” Lin Xiuzhu asked.

Level-five resources matched ordinary master-level Beast Tamers.

Level-six resources matched top-notch masters.

Level-seven resources matched legendary Beast Tamers.

The evolution materials of the Iron-eating Beasts included two types of level five, three types of level six, and one level seven resource. The price could be easily imagined.

Moreover, as the first batch of people to try, if something went wrong midway, the experimental fee would definitely be considerable.

“There’s nothing to be reluctant about. Money is just for spending.”

“In any case, this little savings of ours will all be your dowry in the future. At most, the dowry will be gone. Xiu Zhu, you have to rely on yourself in the future.” Hall Master Lin was quite honest.

Panda:???

He was right. After all, Lin Xiuzhu was an only child...

“It doesn’t matter!” After a moment of silence, the panda senior said.

She didn’t need these things either. The evolution of the iron-eating beast was important!

Bamboo Stone Dojo and Iron Bamboo Breeding Base were both businesses of Lin Xiuzhu’s family.

Apart from that, they also had the ownership of two energy crystal mines.

As for some additional food-related industries they were part of, they were supplementary. They were purely icing on the cake.

Although Hall Master Lin was only an ordinary master-level Beast Tamer, he was far richer than other Beast Tamers of the same level. He could be said to be the richest person in Ping Cheng.

After all, their family had been running the Iron-eating Beast Breeding Base for several generations, and they had wealth.

But because of this, he had an unusual obsession with the iron-eating beast.

If it were an ordinary master-level Beast Tamer, they would have long eliminated the Iron-eating Beast from the team.

But Lin Hongnian’s family was different. Instead, they invested a large amount of cultivation resources on the iron-eating beast.

Generally speaking, race level determined the upper and lower limit of growth.

For example, if a creature’s species level was at the transcendent rank, with sufficient nutrition and good growth, it really wasn’t difficult for it to fully reach the transcendent level. It was just a matter of time.

However, when the growth level exceeded his race level, it was very difficult to continue growing. The growth difficulty would gradually increase.

At that time, the resources needed to be invested in training would increase by several times. It was much more expensive than the cost of training high-level pets.

However, under such restrictions, Lin Hongnian actually cultivated the iron-eating beast of a middle-level transcendent race to nearly the level of a monarch.

If it weren't for the racial restrictions, Lin Hongnian would even be willing to spend a lot of money to smash the iron-eating beast to the level of a monarch.

After all, a pet that grew to the level of a monarch was the standard for a normal master-level Beast Tamer.

Before deciding on a feasible plan, Hall Master Lin had already dared to smash so many resources on the iron-eating beast. Now that he had a concrete plan, he naturally dared to invest even more resources.

"That's good. I'll go to the ancient capital now!"

At the moment, nothing was more important than the Iron Eater's evolution.

...

In the suburbs of Ancient Capital, at the ruins of Iron-eating Beasts.

After informing her father, she fell into deep thought.

"How is it?"

On Shi Yu and Panda's side, they completed the interrogation at almost the same time.

"Director Li said that Ancient Capital University will provide us with some technical support."

"We will invite experts to help us forge alloy battle armor," Shi Yu said.

Those metal ores were all high-level resources with very strange attributes. It was not easy to forge alloys.

At least, students like Shi Yu and the others definitely couldn't operate it alone.

"My father also said he would rush over immediately."

"In that case, as long as the evolution method is correct, it's basically stable?" Zheng Yingjie asked.

Everyone looked at Shi Yu.

Therefore, after speaking for a long time, it still depended on whether the evolution method was reliable.

"Don't worry, history won't deceive people."

Shi Yu was rather confident.

However, if the ruins dared to deceive him, he would definitely come here and say strange things for a month before leaving.

He would get revenge.

"It's getting late. Let's go eat," Shi Yu said as he touched his stomach.

Everyone: “Seconded!”

...

That day, Hall Master Lin arrived at the ancient capital.

It was unknown if he used the master-level privilege to jump in line or flew over with his flying pet.

After everyone arrived, Shi Yu, Senior Panda, the Archeological Seven Elites, Mentor Ding, Director Li, and Hall Master Lin gathered in one of the lecture rooms of Ancient Capital University.

Apart from them, there was also an expert invited by Director Li at the scene. He was a Mechanic.

For a powerful Mechanic, being proficient in materials science and forging was also a basic skill. For example, those mechanical life pets were all created by them.

For them, as long as they had the materials, it wasn't difficult to create a Gundam with their bare hands.

High-level Mechanics were elite talents even rarer than Dragon Tamers. Usually, the rarity of a Mechanic was at least one level higher than a Beast Tamer who specialized in other pets.

“This is Dean Hao, the dean of our Ancient Capital University's Mechanical College, a top-level Mechanic.”

Director Li introduced them very politely.

“Nice to meet you, Dean Hao!”

Hall Master Lin was flattered. He didn't expect that the research on the iron-eating beast's evolution this time would actually be made into such a big scene by Shi Yu, Lin Xiuzhu, and the others.

One was the dean of the Archeology Department of the Ancient Capital University, the other the dean of the Ancient Capital University's Mechanical College. Even if all the presidents of the associations in Icefield City were added together, they wouldn't be as impressive as the two of them.

“Master Lin, you're welcome.”

Dean Hao was in his thirties, but he didn't look old. He smiled and looked at everyone, especially at Shi Yu, who was sitting with Lin Xiuzhu, the Archeological Seven Elites, and the others.

He knew that this group of people had gathered here because of Shi Yu.

He came because of Shi Yu's identity.

When Dean Hao heard that this project was led by a small member of Bureau 11 who would join Ancient Capital University in the future, he immediately decided to help without a word.

Although at his level, everyone was equal even when facing official members of Bureau 11, this didn't stop him from doing this small member a favor.

Besides, Director Li had also asked him for help. It was common for the departments of Ancient Capital University to cooperate with each other, so there was no need to refuse.

Everyone quickly got to the point.

“If you have that metal piece as a reference, it’s not very difficult to forge these six materials into alloy equipment.”

“If it goes smoothly, it should be completed in three days.”

“But the wisdom of the ancients is really impressive. After all, even if they use modern technology, it’s not easy to complete such a process.”

Dean Hao immediately reassured everyone.

Anything that an ancient blacksmith could do, they, the modern Mechanics, could do too!

“The problem now is what kind of equipment Master Lin plans to create.”

Everyone looked at Shi Yu and Hall Master Lin. After all, according to the information provided by Shi Yu, the evolution of the iron-eating beast had no requirements for the style of the armor.

Even a pair of sharp claws and a shield could assist the Iron-eating Beast in its evolution.

However, according to the way a normal person thought, they would definitely feel that the more materials they used, the greater the potential after evolution.

In fact, they would even feel that the rarer and higher the level of the materials used, the greater the potential of evolution.

The latter was clearly unreliable. Many pets needed specific materials to evolve. A slight difference might lead to failure.

The same food provided completely different nutrition to humans, animals, and plants. Compatibility and needs were the most important.

There had been countless cases of evolution failures due to the random filling of high-level materials in evolution experiments.

Now that he had confirmed the evolution materials, trying to innovate would be wasting his effort.

However, the current situation was that the types of evolution materials didn’t need to change, but the number of evolution materials seemed to be able to change. The point of quantitative change causing a qualitative change seemed to be feasible.

Shi Yu had already told Hall Master Lin about this.

Regardless of the scale of the battle armor, it could assist in evolution. Everything depended on Hall Master Lin’s choice.

Hall Master Lin said, “Then let’s be fully armed. From top to bottom, head, body, limbs, and claws, we’ll be fully armed.”

He decided to play it big.

After all, the amount of evolution materials might affect the Iron-eating Beast’s potential after evolution.

“In this way, judging from the already confirmed alloy ratio, there are a lot of materials used.” After thinking carefully, Dean Hao estimated a value and said it.

A minimum of nine digits might require evolution materials worth hundreds of millions.

When such a huge amount was said, Shi Yu, Senior Panda, and the seven archeological heroes felt their hearts bleed.

If the evolution failed, would it all go down the drain?

“Why don’t we try a claw?” Shi Yu rubbed his nose. This way, even if we fail, we won’t lose much.

Lin Hongnian: “Then can it still wear new equipment after evolution?”

“Uh.” Shi Yu was stunned and felt that it was impossible.

“That’s it!” Hall Master Lin also gathered his courage. He felt that the family business passed down by his ancestor would probably be completely squandered by him and Lin Xiuzhu to study the evolution of the iron-eating beasts.

However, in order to restore the Iron-eating Beast’s glory, everything was worth it.

Moreover, even if he failed, the alloy battle armor he forged could still be used.

Even if it couldn’t be an evolution tool, it could just wear it like that. It was equivalent to buying a shirt for the iron-eating beast.

Judging from the material of this metal piece, after the Iron-eating Beast wore it, it felt that there was no problem resisting the monarch-level creature skills.

He convinced himself that it wouldn’t be a loss.

At this moment, Shi Yu felt the craziness of the father and daughter and couldn’t help but turn around to look at Eleven on his shoulder.

Good heavens, he was still lamenting the price of the green worm’s evolution materials.

In the end, Eleven’s isn’t cheap either!

Eleven: Sob.

...

Next, with the help of the Mechanical College to forge armor, Shi Yu and the others temporarily placed their focus on researching the evolution of the iron-eating beast.

Not to mention the original team, even Director Li and Mentor Ding came to the scene of the iron-eating beast ruins to investigate again.

The reason was very simple, because the evolution materials of the iron-eating beasts were expensive enough!

Generally speaking, the evolution materials of this level had to be at least at the level of a monarch, right?

If it was successful, this news would appear.

“The Archeology Department of Ancient Capital University had discovered the “method for Iron-eating Beasts to evolve into a monarch race” through archeology. This was undoubtedly big news. Director Li and Mentor Ding had to pay attention.”

“I feel that it’s at least at the low-level monarch level.”

“It’s even possible for it to be at the middle class monarch level.”

“I’ve long felt that the race potential of the Iron-eating Beasts is low. After all, their basic qualities aren’t bad either. Now, it seems that they’re just like the Green Silkworm. They both need to train their race’s prerequisite skills to a certain extent before they can completely unearth their race’s potential through the evolution opportunity.”

Everyone discussed.

Lin Hongnian even smiled the whole time, as if the iron-eating beast had successfully evolved.

Lin Xiuzhu said, “Perhaps it’s the racial potential determined by the number of evolution materials used. For example, if it’s only armed with sharp claws, its species rank might only be commander rank after evolution, but if it’s fully armed, it might be able to reach monarch rank.”

Her point of view was approved by Hall Master Lin. That had to be the case. Otherwise, wouldn’t their money be wasted?

“Shiyu, what do you think?” Hall Master Lin smiled at Shi Yu.

“I think it’s at least the Mythical level,” said Shi Yu.

Everyone: “?”

Eleven:??

Shi Yu: “I’m just kidding.”

Everyone:...

Shi Yu smiled.

However, although it was a joke, was it really a joke?

It had been discovered that there was some connection between this ruin and Earth myth.

In that case, was it possible that the saying that the Iron-eating Beast was Chi You’s mount?

The evolution of the Iron-eating Beasts was almost evolved using various weapons and armor.

Shi Yu felt that this evolution method somewhat matched Chi You’s title of “Armament Master”.

At the same time, it was also recorded in the history of Earth that Chi You was the first to do this. The tribe that forged armor for the iron-eating beasts was also very good at forging alloys.

Therefore, if the two histories were really related, he felt that it wasn't too much for the Iron-eating Beast to have Mythical potential.

Of course, this potential was definitely not triggered by just a single evolution.

"I actually have another question."

Shi Yu immediately said.

"That is, what the special inscription on the metal plate means."

"Could it be a medium to activate a certain skill, or even a requirement for second-stage evolution?" Shi Yu asked.

In the scene he saw, after the iron-eating beasts carved special inscriptions on their bodies, their postures felt like they had undergone a second stage evolution.

It was really hard not to be suspicious.

"This kind of inscription is indeed strange. It's the first time I've seen it, but it's more likely to be the exclusive symbol of their own tribe," Director Li said as he looked at the symbol on the mural.

"If a symbol can allow a pet to awaken its skills and evolve again, it's a little unscientific."

"Well, it has to be like what Student Shi Yu said. Unless it's traces are carved with some rare resource, only then can it be possible." Mentor Ding also judged. "But there are no other components of energy detected on the metal piece."

It was either other resources or its own claws!

It had to be said that if Shi Yu had not seen the operation of the iron-eating beasts, he would have also thought that what Director Li and Mentor Ding said was scientific.

It was very normal for a tribe to have their own symbol.

Instead, it was unscientific to rely on drawing on oneself to evolve.

"It's not ugly anyway. When the time comes, if the Iron-eating Beast can really evolve, let it try carving one too. It'll be a memento," Lin Hongnian stared at the stone wall and said casually.

Everyone smiled. That was fine too.

They would treat it as thanks that this ruin provided an evolution method.

"The path became wider." Shi Yu was stunned.

...

Time flew.

In just a day, the Mechanical College had made an alloy battle armor according to Hall Master Lin's request.

This speed was something Shi Yu and the others did not expect.

Therefore, three days was still a conservative estimate.

Everyone was pleasantly surprised.

It seemed that it was always right to set a few more days to complete an executive task.

It could be a surprise if it was completed in advance.

If the creator didn't want to rush it, they could take things slow as well.

"How is it, haha!"

In a huge display room of the Mechanical College in Ancient Capital University, an exquisite set of armor was hung on the wall.

The material of the battle armor was more like bronze, its color deeper than bronze, and it was darker than dark green. No, it was more suitable to describe it with dark green.

If one didn't look carefully, it was actually a black armor.

"Perfect, it feels like the material is exactly the same as that metal piece," the Archeological Seven Elites exclaimed.

Director Li and Mentor Ding also looked at the armor with interest.

The panda senior's beautiful eyes even flowed with anticipation as she imagined the scene of the Iron-eating Beast wearing this armor.

Although the panda bed was gone, she felt that it would be very handsome in battle?

"Do you want to experiment with the evolution method you guys are talking about now?" Dean Hao laughed.

He had personally made this armor.

He also wanted to see how this armor could evolve the Iron-eating Beast.

"Hall Master Lin." Shi Yu looked at Hall Master Lin Hongnian.

At this moment, Lin Hongnian was more nervous than anyone.

Of course, Shi Yu was definitely very nervous too. He asked Eleven on his shoulder telepathically, "How is it? Do you feel handsome?"

"Uncle Lin is using his Iron-eating Beast as an experiment for your future development path."

"Sob." Eleven bit its hand and looked at the armor. It kept feeling that eating it was better than wearing...

"Foodie!"

Shi Yu was speechless. "Aren't you afraid of breaking your teeth!?"

"Let the Iron-eating Beast wear armor and then use the transcendent Level Hardening Fusion Armor, right?" Under everyone's gaze, Hall Master Lin took a deep breath and nodded. "Then let's give it a try."

Then, he started to summon his Iron-eating Beast.

Hu hu hu ~ ~

In the transparent blue circular summoning array, an extremely strong iron-eating beast with a serious expression walked out.

“Wuu!!!”

After it came out, it immediately greeted the big shots present according to the Beast Tamer’s instructions.

Everyone looked at the Iron-eating Beast that had been cultivated to the limit of its species and nodded.

As expected of an iron-eating beast cultivation expert. Ordinary Beast Tamers probably couldn’t nurture this iron-eating beast.

“Put it on yourself.”

Lin Hongnian ordered the Iron-eating Beast. At this moment, the Iron-eating Beast also looked at the battle armor hanging on the wall, and its heart tightened for some reason.

Lin Hongnian had long taught the iron-eating beast how to evolve.

Therefore, at this moment, when it saw this fitting battle armor, the Iron-eating Beast didn’t hesitate much. It directly draped it over itself according to the Beast Tamer’s orders.

Under the sound of metal colliding, the Iron-eating Beast put on its armor and was fully armed. It originally looked very impressive, but now, it looked even more impressive.

“It looks a little like the rune battle bear in World of Warcraft?” Shi Yu looked at it and muttered in his heart. However, the bear in the armor had changed to a panda.

“Wuu!!!”

At this moment, under everyone’s gaze, Lin Hongnian’s Iron-eating Beast continued to follow the operation step by step.

After putting on the battle armor, it began to use Transcendent Level Hardening.

Buzz!

In an instant, the hardening substance covered all the armor. This was one of the signs of transcendent hardening. Apply it and apply the hardening substance to other objects.

After this operation, the color of the armor became even darker.

Right on the heels of that, the Iron-eating Beast started the next step. It used the second property of the transcendentX Level Hardening and released it. That was, it released the Hardening Material to fill the gap between itself and the armor, allowing the armor to completely merge with itself through Hardening!

After this operation, in the eyes of everyone, the Iron-eating Beast seemed to have really become one with the armor. Both parties were incomparably coordinated!

At this moment, an exciting scene appeared.

“Wuu!!!”

The Iron-eating Beast was first stunned. Then, its body began to emit a powerful aura!

Everyone took a step back and looked at it in shock.

Following that, the iron-eating beast’s body began to suffuse a white light, undergoing growth and transformation. It could also be said to have broken through!

No, while it was growing and transforming, it was still evolving!!

“Wuu!!!” With a roar, the Iron-eating Beast’s body kept growing and enlarging under the cover of the light. In the blink of an eye, even its previous battle armor became nearly three meters tall!!

The light faded, and the three-meter-tall Iron-eating Beast appeared in front of everyone. The unscientific thing was that not only did the Iron-eating Beast become bigger, but its armor also became bigger in proportion!

“Success???!”

Everyone looked at the iron-eating beast with shocked expressions.

Especially Dean Hao, Dean Li, Mentor Ding, and the others, they all sensed the current state of the iron-eating beast!

It had broken through to the monarch level!

It was very difficult for a pet of an extraordinary race to break through to the level of a monarch. Right now, the greatest possibility for it to break through so smoothly was that the iron-eating beast had successfully completed its evolution. The increase in race level led to the increase in growth level!

The power just now was... the deterrence skill that was awakening!

Everyone looked at Hall Master Lin. At this moment, only Hall Master Lin Hongnian, who was contracted with the iron-eating beast, could understand its state the best.

“It really evolved...”

“Monarch level!”

Lin Hongnian was stunned for a long time. Then, he was overjoyed. He wished he could kiss Shi Yu, who had provided him with the evolution method!

“Not only did it evolve, it also broke through. Apart from awakening deterrence, it also awakened three new skills!!”

Chapter 98: Iron-eating Beast’s Second Stage Evolution Method

“What skill?!”

As Lin Hongnian spoke, everyone was stunned and then quickly asked.

Good lord.

Apart from the deterrence skill that would definitely be awakened when its growth level reached the monarch level, it had actually awakened three new skills in one go. It seemed that the evolution this time had improved the Iron-eating Beast’s race by a lot!

The key now was the level of these three new racial skills.

After a pet evolved, one of the most direct ways to determine the pet’s new potential was to see if its newly awakened racial skills were strong!

“1...”

As he received the feedback from the iron-eating beast, Lin Hongnian was so excited that he couldn’t say anything.

“Three new skills, one mid-level, one high-level, and one super!”

Things were taking off!

“Stop beating around the bush! Tell me!” Lin Xiuzhu couldn’t help but glare at her father.

“Intermediate-level skill is Giant Transformation!”

Skill: Giant Transformation

Skill Level: Intermediate

< Introduction > It’s a special ability. It can expand the body. Under the enlarged state, the energy consumption will increase and the strength will increase.

Everyone: “?”

Shi Yu: “?”

This mid-level skill was actually not bad. Lin Hongnian was very satisfied at the start.

However, as he saw the strange expressions of everyone, he suddenly realized that something was wrong.

He looked at the shrunken Eleven on Shi Yu’s shoulder and fell into deep thought.

Eleven: Sob (¬_¬)?

“Wait!!”

Lin Hongnian suddenly said, “Why can Iron-eating Beasts who have awakened their ancient evolution bloodlines learn the multiplication of the high-level version of Giant Transformation, while Iron-eating Beasts who have truly evolved can only awaken Giant Transformation??”

He discovered the blind spot.

Everyone also looked at Shi Yu and Eleven, causing Shi Yu to fall into deep thought.

Amazing...

Senior Panda and the others had been imagining the ancient evolution form. In the end, the Iron-eating Beast really awakened a similar skill?

What was this evolution up to, going so half hearted with the giant skill?

“Perhaps Eleven’s talent is better? Hall Master Lin, you can bring the Iron-eating Beast to soak in the holy spring when you have time,” Shi Yu suggested.

If the Ancient Life Tree let him.

Lin Hongnian was silent.

“What about high-level and super-level skills???” Lin Xiuzhu asked.

Lin Hongnian no longer thought about the trouble of enlarging and multiplying. He took a deep breath and said, “High-level skill, Impregnable, of the metal element. Super-level skill, Inner Power, of the metal element!”

Skill: Impregnable

Skill Level: Advanced

[Introduction]: A metal-type skill. The user is protected by the metal-type power, increasing resistance to all types of skills.

This was a hardening upper-level skill.

Hardening usually only had a relatively good resistance to physical attacks, but Impregnable was different. Along with various elemental attacks, control skills, and skills targeting the spirit and soul, it had an extremely high resistance effect.

It could be said that it was a comprehensive skill that increased the Iron-eating Beast’s ability to take hits.

Skill: inner Power

[Skill Level]: Super Level

< Introduction > It’s a metal-type skill. It can enter a reserved state and assess the source of its power. It can accumulate power that exceeds its own limit and won’t affect its own state. Under the sharp state, it can multiply the power accumulated and increase its attack power by several times, but it will pose a certain burden to the body.

“Holy shit.”

After Hall Master Lin finished speaking, Dean Hao, Dean Li, and Mentor Ding were still alright, but Qi Yingjie was immediately shocked.

“He actually awakened the skill of Inner Power?” Zheng Yingjie opened his mouth wide.

This skill could be said to be a divine skill of the metal element.

Firstly, this skill could maximize the improvement of the pet's physical fitness!

Ordinary pets would be full after eating one energy crystal and wouldn't be able to eat anymore. But after mastering the skill of converging sharpness, it was completely no problem for pets to eat ten or a hundred energy crystals.

In addition, the pets would not be unable to digest it, nor would they waste the power of the energy crystal. Instead, they would store this energy steadily in their bodies.

In battle, be it mobilizing this stored power slowly or erupting in one go, it could be done.

This was the most classic battle skill. Not only could it allow pets to have hidden physical fitness that far exceeded creatures of the same level, but it could also give pets the power to fight above their level!

"Hardening, Giant Transformation, Impregnable, Inner Power..."

"After the Iron-eating Beast evolved, it was simply a super battle beast born for battle, no, for war," Dean Hao sighed. Director Li and Mentor Ding agreed deeply.

At this moment, the Archeological Seven Elites rubbed their hands in envy.

Senior Panda was also a little excited. Her body trembled continuously.

Awakening a super skill after evolution meant that the current iron-eating beast's racial potential level was definitely above the monarch level.

Could her Iron-eating Beast become so strong in the future?

"Wuu!!!" Lin Hongnian's Iron-eating Beast was also very excited. It felt that endless power was bursting out of its body!

It glanced at Eleven, wanting to feel the envy of its own kind...

"Sob." However, Eleven shook his head.

It just had three more skills. Eleven had nothing but skills! He had too much!

Iron-eating Beast:...

At this moment, the happiest person was Lin Hongnian himself.

"Inner Power."

He smiled and looked at the iron-eating beast.

The Iron Eater nodded.

Then, under everyone's gaze, it returned to its previous appearance before evolution.

The armor on his body disappeared, and its body size returned to normal.

This was the reserved effect of a transcendent skill's ability to restrain its edge, which was to put away its own edge.

“Can one return to their pre-evolution state?!”

Shi Yu had been silent all this while, but at that moment, he was suddenly stunned. His eyes widened.

“Yeah, this is the magical thing about this super skill.” Director Li chuckled.

“It’s simply a divine skill to “pretend to be a pig to eat a tiger”. Speaking of which, if it’s used in combination with the shrinking of your Iron-eating Beast, will it have any miraculous effect?”

After being stunned, Shi Yu’s emotions finally fluctuated.

Damn, this restrained state could actually devolve?

Was it that good?

“Great!” At the same time, Lin Xiuzhu could not help but shout.

In this way, wouldn’t the Iron-eating Beast have two forms??

In the future, she seemed to be able to let the iron-eating beast evolve without any worries.

Only, it was a pity that the Iron-Eating Beast would only expand after evolution and not shrink. She was very hungry for Eleven’s multiplication skill.

“Looks like we don’t have any worries anymore...”

Shi Yu also had the same thought as Lin Xiuzhu.

At this moment, even if it evolved, there was still the Panda Accessory and the Panda Bed!

It was indeed a divine skill!

Shi Yu hinted at Eleven on his shoulder. He felt that he still had to spend money and add points...

Eleven: Sob.

At this moment, everyone looked at Hall Master Lin’s iron-eating beast with mixed emotions.

Perhaps this was the first iron-eating beast to evolve in this era?

Lin Hongnian Hall Master was about to be famous. Shi Yu, who had discovered the Iron-eating Beast’s evolution path, was also going to be famous!

Everyone was filled with emotions, but at this moment, Shi Yu suddenly thought of something and felt that the matter wasn’t over.

“Wait!”

Shi Yu suddenly looked at Hall Master Lin and said, “Do you want to try carving a special symbol on a metal-eating beast?”

“I still feel that the inscription symbol is the key to the iron-eating beast’s transformation again, and not as simple as the tribal mark.”

Stunned, Hall Master Lin nodded and chose to believe Shi Yu.

“But how should I carve it?”

Shi Yu suggested, “Hardened claws.”

When everyone saw that Shi Yu was so determined, they couldn’t help but raise their spirits again.

Could it be that there was something special about that symbol?

“Then let’s try it according to Shi Yu.”

Now that the evolution method Shi Yu had confirmed had been proven, trusting Shi Yu again didn’t seem to be a big deal.

Director Hao brought over a metal piece.

The Iron-eating Beast also returned to its huge armed form.

At this moment, the Iron-eating Beast looked at the special symbol on the metal piece and then looked at its armor, falling into deep thought.

Were they really going to carve this thing?

“Let’s give it a try.” Lin Hongnian laughed and said indifferently. Whether it was successful or not, carving it was nothing.

“Wuu!!”

The Iron-eating Beast nodded and hardened its claws. As if copying it, it followed the special symbols on the metal plate and started to carve symbols on the armor...

Screech!

However, in the next second, an unexpected scene appeared.

The iron-eating beast’s sharp claws, which had been enhanced by Transcendent Level Hardening, actually couldn’t leave any marks on the armor at all!

One had to know that the current armor had not been hardened and strengthened.

“It’s that hard?” Director Li was slightly shocked.

This defense...

Without using any skills, its body’s strength had exceeded transcendent?

Was it going to compete with a giant dragon in physical fitness?

Screech!

“Wuu!!”

The iron-eating beast’s expression changed. It tried again, but it still couldn’t carve it at all.

“Looks like I have to carve it with something harder.” Dean Hao fell into deep thought.

While everyone was shocked by the defensive power of the iron-eating beast's armor, only the iron-eating beast, Lin Hongnian, and Shi Yu's expressions were wrong.

"No, that's not right." Lin Hongnian's expression was solemn.

"No, the strength of the Transcendent Level Hardened Claw is clearly above the armor."

"The Iron-eating Beast said that there seemed to be a repulsive force between its claws and armor, preventing it from leaving a mark on the armor!"

"What?"

As soon as Hall Master Lin finished speaking, everyone was stunned.

What was this, a self-protection mechanism?

"Could it be that this inscription really has some mysterious magic power?"

Previously, everyone thought that the special symbol didn't have any special meaning. Now, as they discovered this strange phenomenon, anyone who wasn't a fool could sense that something was wrong.

This was not a matter of whether the claws were hard enough.

Instead, why would there be a rejection reaction between the hardened claws and the armor?

Everyone frowned. Could it be that Shi Yu was right?

What was so special about that inscription?

Otherwise, if it was just a simple inscription, why couldn't the Iron-eating Beast engrave it!

Shi Yu fell into deep thought.

That shouldn't be the case.

In the historical video he saw, that group of Iron-eating Beasts had used their super hard claws to carve inscriptions on their armor. There was definitely no mistake!

The iron-eating beasts' drawing movements were like flowing water. No matter how one looked at it, it didn't look like there was any obstruction.

At that moment, Shi Yu kept feeling that he had not noticed the key points. What was wrong... Slowly, as Shi Yu looked at Master Lin Hongnian's Iron-eating Beast, he was stunned.

Skill: Hardening

Status: Can be taught

Just like facing the transcendent-level worm silk of the Green silkworm, even though Master Lin Hongnian's Iron-eating Beast had mastered transcendent-level racial skills, the skill index still showed that it could be taught!

After being stunned for a moment, Shi Yu said soberly, "Speaking of which, could it be that the proficiency of hardening isn't enough?"

“Is there any higher proficiency above Transcendent Level Hardening...”

“I feel that the breakthrough in racial skills again and the qualitative change might be the key to the Iron-eating Beast’s transformation again! Perhaps, when the time comes, the inscription won’t have any rejection reaction.”

This time, Shi Yu’s train of thought immediately opened up. He had a feeling that something was wrong and that his deduction was definitely correct!

It might be the key to the Iron-eating Beast’s evolution!

Monarch level was just the starting point!

The future was really legendary!

When Shi Yu finished speaking, everyone’s expressions were odd.

Dean Hao explained, “Entry, proficient, expert, perfect, and transcendent. Although the names of each level are different in various eras, the ability of the pet seems to be these five levels from the beginning to the end. Perfection represents the peak of skill. Transcendence means that it has broken through the original upper limit of the skill.”

“As for higher levels, there’s no such thing. There hasn’t been any record of it since ancient times... nor have any Beast Tamer pets reached that level.”

“This isn’t realistic. Why don’t we try carving with other tools?”

The corners of Lin Hongnian’s mouth twitched. He didn’t know if he should believe Shi Yu.

At this point, why didn’t he say that the Iron-eating Beast could evolve again after eating Venus, then?

Even if it was true, it was impossible to achieve.

Using such an unscientific evolutionary condition to entice him to have expectations for the evolution of the Iron-eating Beast’s form, wasn’t this taking his life, making him and the Iron-eating Beast train non-stop for the next 24 hours?

As everyone refuted the unscientific, Shi Yu fell silent.

He still stubbornly believed that his deduction was right.

Moreover, was it very difficult to reach transcendent in the first place?

Chapter 99: Name of Evolution

“I should use other tools to see if I can carve it.”

Dean Hao and the others were interested.

He had originally thought that the Iron-eating Beast’s first evolution was the end. From the looks of it, it was really as Shi Yu had said. There were still other secrets hidden on the Iron-eating Beast!

“I can help.”

A small summoning array appeared in Dean Hao’s palm.

He reached out and pulled out a tool in the shape of a sword hilt. Then, a pale yellow laser suddenly appeared on the hilt.

< Name > Laser Sword

[Attributes]: Machinery, Light

[Race Level]: High-level commander

[Introduction]: Artificial Light Sword Lifeform.

“Damn, so handsome.”

Seeing Dean Hao with the laser sword in hand, Zheng Yingjie and the other boys widened their eyes and drooled.

Was this not more amazing than the beast-eared girl?

As expected of a top-notch Mechanic, he really knew how to play. He actually contracted a lightsaber.

Shi Yu glanced sideways. Good heavens, there was actually such a mechanical life form.

He was quite curious now. If Beast Tamers had a combination talent and contracted a laser sword, would they need other pets?

How envious.

“Do we use this?” Seeing that Dean Hao took the initiative to help, Hall Master Lin nodded.

“Alright, please.”

The Iron Eater looked at the laser sword in confusion.??

It felt alright to make a move by itself, but wasn’t it a little too much to use a sword!

“Don’t worry, it won’t hurt.” Dean Hao laughed.

“Wuu...” The newly evolved iron-eating beast was still a little nervous, but it still nodded in pain.

Then, with a flash of sword light, the laser sword left a scar on the iron-eating beast’s armor without any resistance.

The scar was the special symbol on the metal piece.

This time, neither the Iron-eating Beast nor the laser sword felt any obstacles during the carving process.

But similarly, after carving the symbol, the Iron-eating Beast didn’t change at all.

This made everyone fall into deep thought.

Therefore, the current suspicious point was indeed the rejection reaction between hardening and the armor.

Then, Hall Master Lin instructed the Iron-eating Beast to make a few more attempts.

No matter what, the outcome was still the same.

“From the looks of it, the symbol shouldn’t be as simple as the battle emblem and symbol of the tribe.”

“If you just want to carve a battle emblem, you can totally carve it through other things like Dean Hao.”

“And according to my investigation, this special symbol should have been carved by the iron-eating beast with its hardened claws.”

“Since it’s so difficult for iron-eating beasts to carve marks on themselves, why do they still insist on carving such symbols on their bodies?”

Shi Yu crossed his arms. He still wanted to know what these symbols represented.

“Wuu!!!” Hall Master Lin’s Iron-eating Beast also suffered from obsessive-compulsive disorder.

It tried its best to leave marks on its body, but it couldn’t do it.

Hall Master Lin was also conflicted. What was going on?

Originally, the evolution of the Iron-eating Beasts and the awakening of new racial skills was double the joy.

Why did such a question that couldn’t be verified appear again? It made him feel very uncomfortable.

Shi Yu’s words triggered everyone’s discussion.

“No matter how I look at it, this is another new problem...” Director Li fell into deep thought.

Discovering an evolution method of the Iron-eating Beast through the metal piece seemed to be just the tip of the iceberg of this ruin.

What to explore next was the secret of the iron-eating beast’s evolution and the secret of the inscription.

No wonder Shi Yu said that this ruin was not simple.

The evolution of the iron-eating beasts into a monarch race was actually just the starting point of research?

The corners of Lin Hongnian’s mouth twitched. “Don’t tell me it’s really like what Shi Yu said, a racial skill with proficiency above transcendent?”

Shi Yu chuckled and said, “It’s definitely impossible to confirm this at the moment, but we can’t eliminate the possibility.”

“The iron-eating beast has just evolved, so it must have a lot of secrets. If I want to be completely sure, I must explore it step by step.”

“Why don’t we form a metal-eating beast research team and study it together?”

Shi Yu suggested that he study the route of proficiency above transcendent himself. The other possibilities were left to Senior Panda and Hall Master Lin to explore.

The division of labor was clear!

It was very normal for a new pet race to appear with a large amount of unknown information.

At the moment, the thousands of creatures known to human Beast Tamers were also researched and researched by predecessors.

Now that the iron-eating beast had just evolved, it was not strange for it to have unsolved mysteries.

If it were Shi Yu himself, he definitely wouldn’t have the energy to explore completely, but in this aspect, Hall Master Lin should be very energetic. After all, this was his true passion.

Mentor Ding said, “Sure, count me in? Actually, we’re already very lucky.”

“At least, it discovered an exploration route just after it evolved.”

Chief Li also said, “I’m also quite curious.”

“Does Hall Master Lin want to cooperate with Ancient Capital University to study the evolution of the iron-eating beasts?”

“You’re welcome.”

Hall Master Lin said, “I should be the one thanking all of you for your help.”

Dean Hao laughed and said, “Count me in too.”

In a few words, the few master-level Beast Tamers confirmed that they wanted to explore the secret of the iron-eating beast’s evolution.

Senior Panda and the archeological Seven Elites were beside him and couldn’t say a word.

Their seniority was too low, so they felt that they couldn’t be of much help.

“Forget it, why don’t we put the inscription matter aside first? We’ll study it in the future. This shouldn’t be something that can be explored in a day or two. Speaking of which, shouldn’t the iron-eating beasts have a new race name after evolution?”

“This is the most important thing now...”

Usually, when pets completed their racial evolution, it was a tradition to change the name of a new species.

Although the Iron-eating Beast could still recover to its original form with its skills after evolution, it was already a little unsuitable to call it an Iron-eating Beast.

“If we want to announce the new evolution form, we do need a new name.” Dean Hao nodded.

Hall Master Lin looked at Shi Yu and said, “How about handing this naming right to Shi Yu?”

Although his Iron-eating Beast was the first to complete its evolution, Shi Yu seemed to be the most suitable person to name it after its evolution.

After all, this time, it was the evolution method provided by Shi Yu.

“Me??” Shi Yu was stunned.

Although there was a saying that good names would make a person become great... His naming skill was horrible.

Was he really going to let him do this?

“What do you think?” At the mention of naming, the panda senior was interested.

Shi Yu fell into deep thought and said, “Armored Iron-eating Beast? Armed Iron-eating Beast? Amor Iron-eating Beast? Mega Iron-eating Beast? Primordial Return to Iron-eating Beast?”

Everyone :” ...”

Hall Master Lin: “Let’s think about it together.”

Everyone nodded in unison.

Master Lin’s Iron-eating Beast and Eleven also nodded.

For the future reputation of the Iron-eating Beast race, it was better not to give this difficult task to Shi Yu.

Shi Yu was helpless. Damn, he might as well call them giant pandas or Panda Kings. Apart from being a little out of character, everything else was fine.

“How about the gold-eating beast? After all, the price to evolve once is not small.”

Only then did Hall Master Lin feel some pain.

He seemed to have paid a lot of money this time. This name was very artistic.

“It’s not nice.”

Lin Xiuzhu was the first to object. Besides, wasn’t that her dowry?

“Iron-Swallowing Beast?”

“Iron-eating Monarch?”

“Iron giant beast?”

“ ... ”

Everyone offered their names, but the more they discussed, the more ridiculous it became.

Only then did Shi Yu realize that he wasn’t the only one who had horrible naming skills.

These names didn’t sound as good as his.

“Forget it, I’ll do it.”

At this moment, after careful consideration, Shi Yu had another suggestion.

“After the Iron-eating Beast evolved, its appearance changed from its previous gluttonous and lazy appearance. Then, it must change to a name that suits its temperament. How about battle beast? Battle beasts that are specially born for war and battle. Then, add a prefix to the front of battle beasts.”

“We found nine special symbols in this ruin. Perhaps it’s related to the iron-eating beasts. In addition, the alloy color of the alloy they used for evolution is dark, and the word ‘Li’ means black. Why don’t we call it ‘Nine Li Battle Beast’?”

Nine Li Battle Beast?

Upon hearing Shi Yu’s words, everyone was stunned. To be honest, they felt that the aura matched with the iron-eating beast in armor.

“Although it’s a little forced, it sounds pretty good?” Master Lin nodded.

It was better than the Armored Iron-eating Beast Shi Yu had mentioned previously...

“...” Shi Yu smiled. This was not direct, but had great meaning!

Nine Li was the tribe of Infantry Master Chi You. Legend had it that the Iron-eating Beast was Chi You’s mount. The Iron-eating Beast to evolve into a Nine Li battle beast. It was purely to commemorate the myths on Earth.

In addition, it was equivalent to hoping that the iron-eating beasts in this world really had mythical potential.

“If you can’t think of anything better, let’s do this.” Senior Panda stroked her chin and pondered. Wasn’t there a cute name?

“Not yet, pending, pending.”

Everyone discussed for a while and felt that the name of the Nine Li War Beast was feasible. However, there was no hurry to name it at the moment. That was after the evolution was announced. The subsequent publicizing process, just the procedures alone, would probably take at least a few months.

In this world, Beast Tamers had two choices regarding the evolution method.

One was to treat the evolution method as his own and pass it down in the way of family and master and disciple, not publicizing it.

Generally, this kind of evolution method was explored personally.

One was to directly publicize the evolution method to the country and apply for a patent to become an honorary evolution planner of this evolution path in exchange for fame and benefits.

90% of Beast Tamers who had mastered evolutionary knowledge chose the former, and a small number of Beast Tamers chose the latter.

Most of the people who chose the latter had a monopoly on certain evolution resources or pets. There were greater benefits to be had.

Or, that person was an expert who got paid by the country.

Whether it was Bureau 11 or Ancient Capital University, they were clearly national institutions. The discovery of the iron-eating beast's evolution was the result of everyone's hard work. It had to be announced.

At that time, once the iron-eating beast evolution paper was published, regardless of whether it was Shi Yu, Hall Master Lin, or Ancient Capital University, they could obtain huge fame and benefits.

Especially Shi Yu, who had confirmed the evolution method. At his age, he would probably instantly become a new star in the archeological research world.

"Looks like I have to stay in the ancient capital for a while..." Hall Master Lin sighed.

The process of applying for the evolution patent was very complicated. They would probably be busy next.

"I'll leave this matter to everyone." Shi Yu smiled and said, "I don't have any experience, so I won't interfere. I'll leave the study of the iron-eating beast's evolution to everyone first."

Everyone: "?"

Aren't you the person in charge of this project?

What was the meaning of this? Was he going to let go of his responsibility?

"There are still three months before the vocation assessment. I haven't even reached the passing line for registration. I plan to cultivate seriously for a period of time..."

"Otherwise, I feel like I'll have to wait until next year."

Shi Yu gave a reason, but most of it was because he wanted to go back and explore the proficiency above transcendent himself.

This was a huge project, and also a relatively important research route... He needed to have sufficient time to recuperate. In addition, he needed to meditate to increase his Beast Taming level, so he couldn't find the time to study the Iron-eating Beast's evolution with everyone.

It was more suitable for him to wait for the ready-made research results and gains.

"Uh, vocational assessment?"

Director Li and the others were stunned. They had almost forgotten that Shi Yu was still a Beast Tamer intern.

"It's alright. Your own development is the most important." Hall Master Lin nodded.

Shi Yu's Little Iron Eating Beast was still very, very far away from evolution. It was indeed not important for it to upgrade itself by investing so much energy into researching evolution forms so early. He should do the research first.

Hall Master Lin felt that when Shi Yu's Iron-eating Beast reached the evolution criteria, he should be able to help Shi Yu plan the most perfect evolution method.

He had to thank Shi Yu for successfully evolving the iron-eating beast. The best way to thank him was to help Shi Yu perfect the evolution path and provide him with convenience in the future.

"The vocation assessment happens once a year. Missing it will indeed have a greater impact."

"Moreover, if I take the normal admission route, my professional identity is also necessary..."

After Shi Yu confirmed that he wanted to be a boss who left everything to others and concentrate on preparing for the vocation assessment, no one had any objections. They even agreed very much.

Everyone's attention was quickly attracted by what happened next.

"Dean Hao, is there a suitable battlefield here? I want to see the current strength of the Iron-eating Beast," Hall Master Lin said with anticipation.

Dean Hao laughed and expressed his understanding. "Of course."

"You're not the only one. We want to see it too. Let's go."

...

In the mechanical school, Dean Hao activated the technologically advanced steel arena to use on the battlefield for Hall Master Lin.

At this moment, apart from the Iron-eating Beasts present, Hall Master Lin summoned his nominal trump card that helped him become a master-level Beast Tamer, a pet that had grown into a monarch-level pet, the Diamond Ape King.

"Monkey, the Iron-eating Beast has finally evolved."

"Come, test its strength."

"Wait, it's not a battle. Don't move first. Try its attack power first."

The Diamond Ape King: "?"

On the battlefield, the huge Golden-Furred Ape King fell into deep thought.

It looked at the impressive and domineering armed Iron-eating Beast in front of it. It immediately understood that this day had come.

Their feelings for each other had faded.

His Tamer was going to change his trump card.

New things were always better than old things.

Chapter 100: Shi Yu's Breakthrough and Contracting Buggy

18th September.

Half a month had passed since Shi Yu arrived at the Ancient Capital.

In this time, Shi Yu had gained a lot.

Although the strength of the two pets did not clearly improve, he had gained quite a lot.

Firstly, he had learned the ability to turn ethereal.

With the help of the beast-eared senior and the internet addict granny, he could now jump around among a group of low-level pets for a few minutes. Things were going well.

This ability was very useful to Shi Yu!

Secondly, by exploring the ruins of the iron-eating beasts, he had discovered the evolutionary form of the iron-eating beasts and enriched Eleven's future path along with his own.

At the same time, Shi Yu began to take this world's legends and history seriously.

What was the connection between this place and Earth?

"Putting aside the pause in the transformation, the Impregnable skill is much more comprehensive than the hardening ability... Most importantly, the two techniques have different principles and can be overlaid! It's simply making the iron-eating beast harden even more."

"However, the strongest skill is still the Inner Power skill. Among the five elements of metal, wood, water, fire, and earth, every attribute has its own special nature. The nature of metal is heavy, murderous, restrained, sharp, and so on."

"The ability to restrain one's sharpness using Inner Power perfectly contains two special properties. It's completely a core technique of the metal element. As expected of a super level technique."

On the plane, Shi Yu recalled the battle between Master Lin Hongnian's Diamond Ape King and the iron-eating beast, and his heart surged.

The Iron-eating Beast had just evolved and broken through. It wasn't familiar with its skills yet, so it was definitely not a match for the veteran monarch-level creature, the Diamond Ape King.

Normally speaking, that was the case, but through the super skill of Inner Power, Master Lin Hongnian only provided some metal-element energy crystals. After the iron-eating beast accumulated enough energy, the battle situation was almost reversed in an instant.

The Diamond Ape King was actually directly suppressed by the Iron-eating Beast's sharp outburst!

"This skill is suitable for rich Beast Tamers."

Shi Yu looked at the blue sky and white clouds outside the window. He felt that he couldn't afford to play around with this skill at the moment.

Inner Power. It was nothing more than the crooked words "paywalls".

There was nothing wrong with paying money for a metal-element super skill.

"Sigh."

As he sighed, Little Eleven and the Green Silkworm also looked out the window.

At this moment, they were all released by Shi Yu to sense the feeling of flying.

Thinking that the two pets had never taken a plane, Shi Yu simply let them come out and experience it too.

At the moment, they were on the way back to Icefield City.

Although the ancient capital was good, Shi Yu really couldn't stretch out outside and couldn't cultivate in peace. As expected, he still liked to stay home and cultivate.

It was more comfortable to lie at home during recuperation.

Therefore, after handing the research on the iron-eating beast's evolution to Master Lin Hongnian and the others, he slipped back first.

Shi Yu had originally planned to stay in the Ancient Capital for half a month, but it was about time now. If he stayed there to fool around, he would definitely miss his vocation assessment.

As for the research on the evolution of the iron-eating beasts, it was not urgent, because it was useless to be anxious... After he maximized Eleven's hardening, he would study it together.

"Wuu."

"Ji!"

At this moment, Eleven and the Green Silkworm were discussing something fiercely.

About "flying".

Although the green worm was an insect, it would definitely fly after transforming into a butterfly or a moth.

Even now, it could fly with its phantom ability.

However, in the face of the insect's question, the stronger leader, Eleven, fell into deep thought.

How could it fly?

Metal Wings? Electric magnetic levitation? No way...

Maybe one day it would learn a flying skill...

...

That day, Shi Yu returned to Ping Cheng.

Because he had left for more than half a month, he definitely had to clean up the villa when he came back to stay this time.

Shi Yu handed this difficult task to Eleven and the bugs to train their life abilities.

Pets that were only good at battle weren't good enough. Pets had to develop in all aspects. It would be best if they could wash, cook, and earn money to support the family.

As for himself, he made a call and reserved Eleven's food from the Bamboo Stone Dojo.

"Hall Master Lin seems to have paid a lot of money this time. Can Bamboo Stone Dojo still afford to feed so many people?"

Shi Yu fell into deep thought. However, the problem didn't seem big?

Soon, the price of the iron-eating beasts would increase, especially the iron-eating beasts in the Iron Bamboo Breeding Base!

After all, Hall Master Lin's iron-eating beast was the first iron-eating beast to evolve. Could the iron-eating beasts sold or found elsewhere compare to the iron-eating beasts raised by Hall Master Lin's family?

Although the real difference might not be much, sometimes, the brand effect was just so unreasonable.

Assuming that the price of the iron-eating beasts increased from the original hundreds of thousands to one million, the eight hundred-plus iron-eating beasts in the Iron Bamboo Feeding Base would be eight hundred million. In addition, they could also sell some accompanying food or even secret manuals for iron-eating beasts. Their assets would probably exceed ten digits.

"How nice..."

When Shi Yu recalled how good Senior Panda was at controlling the family and even wanted to sell him the panda costume, he immediately felt that the Iron Bamboo Feeding Base would definitely make a killing.

As expected, he was the only one who was poor.

Shi Yu thought about his little vault silently. The 10,000,000 yuan that Senior Lu had given him, together with the 1,000,000 yuan that the Ping Cheng Association had given him, was a total of 11,000,000 yuan. Now, there was less than 6,000,000 yuan left.

In addition, in the aspect of supplements, as he added some points to Eleven and the Green Silkworm, together with the consumption of practicing etherealization for the past half a month, there was almost none left.

Shi Yu immediately felt that he was being too extravagant.

In the past two months, he had actually eaten four million yuan just by eating supplements.

The other million was to buy the Space Crystal Fruit for the worm to increase its spatial compatibility.

In just a few months, whoosh, five million was gone.

This was even under the circumstances that Bamboo Stone Dojo had always provided Eleven with food.

Shi Yu felt that at this rate, unless he married into the Bamboo Stone Dojo, the remaining money might not be enough for him to spend...

"There's no hurry. The ice-element energy crystal in the ruins bead is dispensable. It can be exchanged for other resources."

“But it still doesn’t feel enough. Looks like in the end, I still have to sell the worm silk?”

Shi Yu turned his attention to the worm again. The spatial-type super worm silk could definitely be sold for a good price.

After all, it was the only one in the world. It wasn’t excessive for one to cost tens of thousands, right?

Shi Yu looked at the insect that was cleaning the fallen leaves.

Buggy shuddered and turned around.

Shi Yu: (๑•̥̥̥)งั้

Green Silkworm: ̄▽̄?

...

If necessary, he would definitely have to sacrifice Buggy.

But now, it wasn’t very urgent.

Shi Yu felt that he wouldn’t be using supplements for the time being.

Seeing his funds decrease, Shi Yu became smarter.

He planned to use the Space Crystal to cultivate first and raise the level of the Beast Taming Space to level two. Then, he would add points to Eleven and Buggy.

After the Beast Taming Space level rose to level two, his physical fitness would increase noticeably and take a qualitative leap.

Unlike the previous quantitative change, this time, it was a qualitative change.

It was roughly equivalent to breaking through to the transcendent level during the Awakening Stage!

At that time, the cooldown time after the addition of points should be significantly reduced. He could probably save a lot of supplements.

At the same time, after his Beast Tamer level increased, he could also contract the worm. Moreover, the page number of the skill index could finally increase again.

Therefore, after weighing the pros and cons, Shi Yu decided to prioritize increasing his level.

This time, whether it was to save money, to take the vocation assessment, to contract Buggy, or to update the skill index, he had to step down and meditate!

With a goal, everything was easy.

“Eleven, next, you should mainly train your coordination ability, which is the continuous superposition of combination skills.”

“Buggy, on the other hand, you continue to train the speed of Building Dreams. You’re too slow to activate the illusion.”

After the two pets cleaned the room, they ran over to accept the mission from him.

It was still the same training content as before, but the two pets were very enthusiastic. They howled and ran to train.

This couldn't help but make Shi Yu sigh with emotion. Having Eleven taking a leading role was quite comforting for his Beast Tamer's heart.

After simply arranging the training content for Eleven and the Green Silkworm, Shi Yu also started cultivating from tonight onwards.

Normal people would take at least a year to upgrade the Beast Taming Space from level one to level two, even if it was just a single element.

If he wanted to contract a second pet like Shi Yu and create a good growth space for the pet, he would have to consider the size and environment of the Beast Taming Space. It was not enough to increase the strength of the space alone.

This way, the amount of energy needed to be invested was even greater. Even if it was a person with extremely outstanding beast taming talent, it was impossible to achieve it in three months or so.

Fortunately, Shi Yu had enough Ethereal Stones to support his accelerated cultivation for a long time. This way, it became a possibility.

In fact, among the 10,000,000 initial funds provided by Lu Qingyi, not only was there a portion for Shi Yu to take out to train pets, but also a portion for Shi Yu to purchase his own cultivation resources. This way, Shi Yu could very well catch up to this batch of vocation assessments.

But Lu Qingyi would never have thought that in the end, this batch of money would all be used by Shi Yu to buy supplements...

Next, Shi Yu began to cultivate silently. Occasionally, he would even pick up the questions for the vocation assessment over the years and start to answer them.

Apart from meditation, he, the Green Silkworm, and Eleven had to do two sets of papers every day. After all, this was also a level that couldn't be avoided in the professional assessment.

It wasn't just to deal with the assessment. There was definitely no harm in accumulating more knowledge. Although he still felt that it was more comfortable to slack off, apart from courting death, Shi Yu still had the self-control he needed in other aspects.

Just like that, in the blink of an eye, a month passed.

During this period, apart from Lin Xiuzhu and the others needing some information from Shi Yu, Shi Yu was surprisingly not disturbed by other things. His cultivation was especially smooth.

A month after Shi Yu cultivated and meditated with the Ethereal Spirit Stone, half of his transparent Beast Taming Space barrier began to turn gray under his meditation enhancement.

This meant that the strength of his Beast Taming Space had already touched the threshold of level two!

Shi Yu was overjoyed and continued to cultivate in peace.

At the same time, in addition to the spatial strength, he began to take into account the scale and environment of the Beast Taming Space.

During Shi Yu's cultivation process, Eleven's growth level also successfully reached level ten. In terms of growth level, it finally caught up to Buggy.

However, whether it was Eleven or Worm, it was not so easy to break through to the transcendent level.

Buggy was limited by race.

Eleven, on the other hand, was restricted by the level of Shi Yu's Beast Taming Space.

Therefore, in order to let Eleven grow to the transcendent level without any restrictions, Shi Yu had to quickly increase the level of the Beast Taming Space.

November 28.

It had been more than two months since Shi Yu began meditating and cultivating.

After more than two months, Shi Yu really wanted to curse!

It was too difficult!

It was so easy to raise the level of the pet, and all he had to do was add some points. Why was it so boring and tiring for his own leveling up?

This was even under the situation where he didn't randomly add points to make himself fall into a weakened state. He wholeheartedly devoted himself to meditation cultivation!

If he added more points, it would probably be slower.

"Although it's a little painful, I finally made it..."

In the room, Shi Yu sat on the bed and observed the changes in the Beast Taming Space while meditating.

With a large number of Ethereal Spirit Stones, Shi Yu finally succeeded in using two months to raise his Beast Taming Space level to level two.

The strength of the spatial crystal wall in the Beast Taming Space had reached level two. When the color turned gray, it meant that Shi Yu could already contract and control extraordinary pets normally.

The size of the space also increased, meaning that Shi Yu could contract a second pet.

At this moment, the growth environment of the pets in the space was more perfect. This meant that extraordinary pets could also get a good growth acceleration inside.

Shi Yu opened his eyes, got out of bed, and stretched his body. At the same time, he felt that his current physique had completely exceeded the scope of an ordinary person.

"Hahahaha, damn you!!!"

This time, Shi Yu was like a prisoner who had been cooped up in prison for a long time. He was immediately released and his mind relaxed greatly.

“Eleven, Buggy!”

Shi Yu laughed and shouted for the two pets who had been self-reliant for the past two months.

“Huh?”

“Ji!”

Eleven and Buggy came out in confusion and then looked at the crazy Shi Yu in confusion.

~ (T □ T)σ What was wrong now...

After cultivating for so long, had he finally gone crazy?

For the past two months, Shi Yu, Eleven, and Buggy had been cultivating hard.

However, in the eyes of Eleven and Buggy, it was clearly abnormal for Shi Yu to work so hard.

After all, lazing around was Shi Yu’s style.

However, these days, it was rare for Shi Yu to not slack off. It kept giving them a bad feeling.

From the looks of it... it had finally happened...

“...”

The corners of Shi Yu’s mouth twitched as he looked at Eleven and Buggy, who were letting their imagination run wild.

“I finally broke through.”

He chuckled and said, “Do you know what this means?”

“Huh?”

“Ji!”

The two pets were stunned. A breakthrough?

Eleven clumsily took two steps forward and sensed carefully before being shocked.

As it had a contract with Shi Yu, it immediately sensed Shi Yu’s change after sensing him carefully.

Eleven:!!!

After being stunned for a moment, it stood on the spot and raised its arms in surprise.

“Wuuu ~”

Shi Yu had finally broken through!!

It immediately circled around Shi Yu like a child and cheered.

Its Beast Tamer had finally grown up. He had finally grown through hard work!!

Tears!!

Eleven felt a sense of accomplishment after witnessing the growth of a human who only knew how to laze around.

After the surprise, Eleven was stunned again. It kept feeling that its relationship with Shi Yu was a little different... It stood on the spot in a daze and recalled its relationship with Shi Yu...

“Ji, Ji??” The green worm’s reaction was slower.

However, it soon widened its eyes, revealing its starry eyes.

Shi Yu had broken through. Did that mean that it could also be contracted by Shi Yu like Eleven??

“Yeah.” Shi Yu smiled.

“I can finally officially contract it...” He sighed.

It was not easy for them to coexist peacefully for so long without contracting a worm that they had been raising for months.

Without a contract, throwing millions of yuan at wild pets... Probably not many Beast Tamers would dare to do it like Shi Yu.

In the end, telepathy was forever a god skill.

“Cut the crap. Come on.” At this moment, Shi Yu closed his eyes and muttered in meditation.

He was already familiar with Buggy, so there was no need to be polite. Come in!

At this moment, Shi Yu looked at the Beast Taming Space in his brain.

It was a world with a gray crystal wall and clouds inside.

Hu hu ~ ~

As Shi Yu communicated with the Beast Taming Space, a breeze blew outside. The curtains were blown up.

Countless light spots flickered in front of Shi Yu. Two circular formations that looked like star maps appeared above the green worm!

In the next second, countless weak light spots flowed out of the formation and wrapped around the green worm, as if they wanted to cover it!

“Ji!”

The Green Silkworm let out a cry. As the two parties had gotten used to each other, it very naturally accepted the contract. Its entire body was directly enveloped by white light before gradually turning into fluorescent light, disappearing from the outside world and entering the Beast Taming Space!

The second pet, the Green Silkworm, had successfully contracted!

< Name > Green Silkworm

< Name > Iron-eating Beast

[Skill]: Worm Silk (Transcendent), Absolute Sleep (Expert), Illusory Phantom (Expert)

Shi Yu opened his eyes in joy.

He felt that his physique had improved again. At the same time, the greatest change was the skill index. As he contracted his second pet, the Green silkworm, like when he contracted Eleven, five new blank pages were immediately added!

“Wu!!!”

At this moment, as Shi Yu contracted the Green silkworm, Eleven also sensed some changes beside it.

Not only Shi Yu, but Eleven also had more contact with the Green Silkworm.

After all, they were under the same Beast Tamer. After this, although Eleven and the Green Silkworm’s communication wasn’t as easy as Shi Yu’s telepathy, it wasn’t as difficult as before.

Beast Tamers were also the bonds between different pets.

“Ji!”

After the contract was completed, the green worm was summoned by Shi Yu again.

“Stop training tonight. Everyone, take a day off.”

“No, two days!”

Shi Yu chuckled as he looked at Eleven and the Green Silkworm. They immediately became salty again, causing the two pets to reveal disappointed expressions. The training had only lasted for two months!

“What do you guys know? It’s time to work overtime soon!”

“It’s only right to rest for two days.”

The two pets were stunned. Adding points? Was it coming again!!

Shi Yu nodded. It had not been easy to reach this stage.

There was still a month left until the vocation assessment. Next, it was time to work extra hard.

Firstly, Eleven had to prioritize increasing the hardening of its racial skills so that it could break through to the transcendent level with the help of its racial skills.

As for the Green Silkworm’s Worm Silk, it was still the best skill at the upper limit of the experimental skill proficiency.

At this moment, Shi Yu only had one question. If it continued to upgrade the Green silkworm’s worm silk, was there any hope of it breaking through to the transcendent level with the form of the Green silkworm??

Transcendent-level Green silkworm, this didn’t seem to have been cultivated by Beast Tamers...

The Green Silkworm was classified as a low-level transcendent race, which meant that there was hope of breaking through to the transcendent level in this state. However, no Beast Tamer was so bored as to do this.

Because it required too much time, the life span of the Green Silkworm was insufficient. If it wanted to do it, it had to spend a large amount of resources. That kind of cost-effective ratio was not high, so it was better to directly evolve during the Awakening Stage to save trouble. Someone must have verified this before, so they came to a unified conclusion.

Shi Yu had a strange expression. He felt that the chances of the Green Silkworm evolving in a month weren't high. Instead, it relied on the worm silk to increase its points. The chances of it breaking through to the transcendent level were not small.

Therefore, if he summoned a transcendent Green Silkworm in the vocation assessment, and it was a transcendent Green Silkworm with pretty good strength, would his opponent's values be shattered? No matter what, he couldn't just use only Eleven in the vocation assessment.
