

## Beast 911

### [Unscientific Beast Taming](#)

#### Chapter 911: Taking Someone Else's Path and Leaving Someone Else With No Way Out

The investment in the World Tree Branch Liquid was not a loss!

At the moment, the only thing that Shi Yu felt was a pity was that the Son of the Star was the same as the Time Sprite. He couldn't teach other skills at all.

The racial restrictions were serious. Perhaps before it grew up, it could only increase its racial skills to lead its growth.

Also, its level was too low at the moment. Its inner world was not enough to support the entry of life forms "at the transcendent level and above".

As a result, even if Shi Yu and the others wanted to help it shape the world laws such as Yin Yang, they were unable to complete it.

Shi Yu decided.

After he broke through to the legendary level, he would first contract the Son of the Star and replicate its three racial skills. He would keep teaching it and let it become an overlord quickly.

At that time, it and the entire team could complement each other and quickly become stronger. At that time, with its power, he should be able to quickly break through to level eight and legendary...

"I'll call you Little Zi. Meaning Little Purple."

"Mi..."

After the entire team gave the Son of the Star a name, Shi Yu and the others watched as Little Zi fell asleep.

It had just been born and it had already given Shi Yu a world blessing. Little Zi was clearly very tired.

"Wu..."

After Little Zi fell asleep, Shi Yu looked at Baby Ginseng and the others.

"Sob."

"Yi."

"Ji."

At this moment, Eleven and the others put away their smiles from playing with Little Purple just now.

Their expression was extremely serious.

Ridiculous.

It was very ridiculous.

Especially the three innermost brothers in the team, their expressions were extremely serious.

They felt that the guys who joined the team later were each more heaven-defying than the other.

Chi Tong, the power reincarnation of a Titled Legend, Susu, the strongest sea demigod reincarnation, Ling, the inheritance of a Mythical creature. In the end, another spatial law sprite and planet cub came.

Was there any way to stay in this team!

How far did they have to fight to maintain the advantage in the team?

"Well, it's decided."

At this moment, Shi Yu suddenly clapped and said.

"When the World Tree Fruit of the Alliance arrives, let's see if it can be used as an evolution material for the ginseng baby to evolve in the direction of the World Tree."

"Undying Sun Ginseng Evolution, World Ginseng."

"When we win the world championship, let the World Tree help advise."

"At that time, you and the Son of Star will be biological siblings of the same mother."

This way, it and the Son of the Star might be able to support each other better.

"Yi!" Baby Ginseng's eyes lit up.

World Ginseng!

It sounded good.

"Jiu!!" Beside him, Chi Tong, who looked like a little red sparrow, immediately looked at Shi Yu eagerly.

Didn't they agree to let it evolve after the world competition...

Why did Baby Ginseng obtain a Mythical evolution resource?

This was not scientific.

"Don't worry, don't worry. Don't worry, I'll definitely arrange the strongest evolution for you," Shi Yu said to Chi Tong with a smile.

"The kind that can slash open a world with a sword."

"I'll inform them now. Ah, no, President Lin, please. Those legendary resources are all undead and fire-element."

Chi Tong:!!

Ling: Another big show.

....

In the outside world, the preliminaries were still in full swing.

On Shi Yu's side, after he was done with the hatching of the Son of the Star, he immediately ran over to look for President Lin anxiously.

At this moment, President Lin was still paying attention to Zou Yun and the others.

He even asked some old friends to give them temporary special training.

Although Shi Yu passed the preliminaries easily, it was still too difficult for other ordinary level-six Beast Tamers.

Shi Yu didn't rely on pets and broke through the preliminaries himself. This was an extraordinary blow to Ji Feng, Gao Xuan, Zou Yun, and the others.

However, they were helpless. They could only comfort themselves with the fact that Shi Yu had eaten Mythical resources.

After all, the resources they used in their lifetime might not even be worth a tenth of the Undying Fruit. Thinking of this, they forcefully felt relieved.

"President Lin, is there any news of the resources from the alliance?"

"Legendary resources, can you give me fire-element or undead-element resources?"

In front of Shi Yu, President Lin said, "Didn't we say that we could talk about faculties previously?"

"It's used to strengthen Mu Huiyin's heroic spirit?"

President Lin was slightly stunned. It was difficult to imagine that Shi Yu's current physique was even stronger than his, a titled legend. After all, he didn't neglect training at all.

He instantly understood Shi Yu's thoughts.

Shi Yu's own physique, including his quasi totem-level soul power. If he was possessed by a powerful undead, wouldn't his battle power... be even more ridiculous?

Totem-level battle power?

For a moment, President Lin was speechless. It was fine if Shi Yu had the two totem-level battle power, Eleven and Buggy, but he actually wanted to strengthen the third totem-level battle power... In other words, his and Chi Tong's possession combination.

"Yes." President Lin's thoughts were actually right.

However, there was actually no need to strengthen it anymore. At the moment, the combination of Shi Yu and Chi Tong was already quite powerful. Fortunately, the Undying Fruit had strengthened Shi Yu's soul to the quasi totem level. After combining with Chi Tong, this advantage could be even more obvious.

At the moment, the combination of Chi Tong and Shi Yu usually also had the battle power of an invincible overlord. If they used several undead puppets as scapegoats to slash out the strongest sword, it would be a proper totem-level sure-kill skill.

"It's indeed better to have another trump card."

"I'll ask Senior Divine Source to urge them," President Lin said.

"In addition, I'll transmit you a piece of information."

"This is the information on the contestants of the totem country that has just been concluded from the seven countries."

### Unscientific Beast Taming

#### **Chapter 912: Making Others Have No Way (3)**

"Very important."

"You came at the right time."

"Alright." Shi Yu nodded.

Shi Yu's index immediately received the information. At the same time, President Lin said,

"According to statistics, there are a total of 99 totem countries participating in this world competition. Including the seven human countries, there are 106 factions."

"There are a total of 702 contestants. Among them, there should be 136 Beast Tamers who have reached level seven."

"Almost every totem country has a legend Beast Tamer participating."

"At the moment, most level-six Beast Tamers in the totem country have contracted overlord lives above their level. 70% are low-level overlords of monarch races and overlords, 25% are ordinary overlords, and 5% are top-notch overlord battle power."

"You don't have to worry too much about this. It shouldn't be very likely for a contestant to threaten you among level-six Beast Tamers."

"What you have to care about is the trump cards of the nine demigod-level factions in the 99 totem countries."

"Every one of them is almost an invincible existence among overlords. They have 'quasi totem-level battle power', and their battle power is enough to threaten totem-level lives."

"The Dark Elven Prince of the Dark Night Forest, the Fire Dragon King of the Dragon Empire, the Fallen Angel of the Demon Kingdom, the Infinite Sea Region, the Void Court, the Arctic Icefield, the Eternal Desert, the Ghost Sea..."

"Among them, what you need to pay the most attention to is the Origin Land and the Dragonman Empire."

Shi Yu was stunned, wondering if he had heard wrongly.

The place of origin needed to be taken seriously. He could understand this.

This place was actually a totem alliance that surpassed eight totem countries. It was the largest rainforest and forest area on Blue Planet, and also the area with the richest races. It was a huge faction that was not inferior to Dragon Palace City.

It was said that the current demigod, the Origin Tree God, had already undergone nine reincarnations. Every time it reincarnated, it could stand at the peak of the Origin Land again.

It was very normal to value this totem faction, but the Dragonman Empire...

The Dragonman Empire was the largest totem country in the vicinity of Dong Huang apart from Dragon Palace City. The commander was the Tyrant Dragon King. Although it was known as the strongest below the demigod level, it wasn't a demigod yet. Therefore, the strength of the Dragonman Empire should be a little different from these true demigod factions.

"Could it be..." Shi Yu was stunned.

"They have totem levels?"

He quickly mobilized the information on the contestants of the totem country that he had just downloaded. Then, his expression changed.

As expected.

"Yes." President Lin nodded and said, "The Origin Land, the Dragonman Empire, these two factions seem to have completed contracting totems above their level."

"The totem of the Origin Land is the wood and lightning dual-element Thunder Crown Rubber Divine Tree, a plant-type life form."

"And the totem of the Dragonman Empire is the son of the Tyrant Dragon King. It's a dragonman hybrid, known as the most perfect dragonman hybrid."

"The information on their contractor talent is unknown at the moment. It's very secret."

"But even if you ignore Beast Tamers, these two totems undoubtedly have the strength to crush overlords. They're your great enemy. Whether you can win the championship depends on the outcome of the battle with them."

"Of course... You also need to take the trump cards of the other demigod factions especially seriously. Each of them is only a step away from the totem level. Previously, they couldn't break through, so they might just be accumulating their foundation. Now that they haven't broken through, they might be worried that their contractors can't withstand it, but if they obtain huge gains in the seven Mythical Trials, there might be hope of breaking through to the totem level."

"At that time, they will also become your great enemy."

"In fact, it's even more threatening than the two totems I mentioned."

"For example, the son of the Tyrant Dragon King is only known as the most perfect dragonman hybrid, but the Fallen Angel Prince of the Demon Kingdom is known as the most perfect hybrid. If it breaks through to the totem level, its battle power will probably be close to a top-notch totem."

Shi Yu nodded. He had also noticed it.

For example, the Dark Elven Prince and the Fire Dragon King he had seen a few months ago. Initially, they only had about 90 million energy points, but when Shi Yu observed them again in Inatella, he realized that their energy levels were already nearly 100 million.

Even the normal energy value of the fallen angel with two souls had already exceeded 100 million, reaching the same "???" level as Eleven and Buggy.

These guys completed another round of strengthening before the World Tournament began.

"It's indeed a little dangerous for them to obtain the inheritance in the Mythical Trial..." Shi Yu said, "I wonder what requirements the seven Mythical Trials have for the candidates. "

"Looks like I have to get Ling to apply a Wind Blessing to me."

"The pet attributes and types in my team are still very comprehensive. They involve various major attributes and major life forms. If I'm lucky enough to participate in all seven trials, it'll be stable."

"As long as I round up the seven Mythical Trial rewards, the contestants of the other totem countries won't be able to obtain the rewards. If they can't obtain the rewards, they won't be able to become stronger, and they won't be able to threaten me."

Shi Yu fell into deep thought. If that was the case, it would be perfect.

Taking other people's path left others with no path to take.

President Lin: ...?

After a moment of silence, President Lin said, "Don't forget, there are still the seven countries. Among the seven countries, the trump cards of the various countries, including Ye Xing, have also been heavily nurtured by the various countries. With all their strength, they might not necessarily lose to the trump cards of these demigod factions. If you want to cover the rewards, the legends of the other six countries will probably have to grit their teeth at you..."

It was better to be a human. It wasn't as easy as he thought. It was impossible for him to use pandas and green dragons to kill all seven trials.

Shi Yu: ...

### [Unscientific Beast Taming](#)

#### **Chapter 913: Beginning of the Mythical Trial (1)**

At this moment, not only did Shi Yu obtain the information of the contestants of the totem country, but the other contestants of the seven countries also obtained it.

The moment they obtained the information, the legendary contestants of Dong Huang and the others were extremely solemn.

The background and names of the invincible overlords of these demigod factions alone were very oppressive.

Moreover, the Origin Land and the Dragonman Empire were actually suspected to have Beast Tamers who contracted totems two levels higher?

What the hell!

Could they still play happily together?

"This world competition is the most ridiculous one I've ever watched."

Zheng Hai accompanied his master. The Tyrannical Sea Legend looked at this information and said in a low voice, "Looks like I still underestimated the cruelty of this world competition. Even if you break through to the legend level, it's still filled with danger."

"Even if I deal with these contestants, including the two totems, it might take some effort."

Zheng Hai said, "It's alright, I'm a satisfied person. It's fine as long as Ye Xing and the others can achieve good results on behalf of Dong Huang."

"Well, it depends on what's going on with this so-called Mythical Trial inheritance. If it's a test of battle power, it won't have any advantage for most contestants, but if it's a test of other things, there might still be hope."

The various totem countries also obtained the information on the legend contestants of the seven countries.

Although various countries kept it a secret, it was impossible not to leave any traces. About 60% of the information could still be detected.

Among them, the legend of Dong Huang's army, Ye Xing, the legend of Xue Yuan's army, Andre, the legend of Shen Feng's army, Qiao Sen, and the Holy Maiden of the Divine Church of Light, Amelia, were all regarded by the totem country as having "Titled Legendary battle power".

In other words, with their entire team added together and the Beast Tamer's Beast Taming Talent, they had the strength to temporarily resist the totem level and could be said to be invincible among overlords.

The trump cards of the Seven Islands, Ming Hua, and Tingxiang of the lower three countries were relatively weaker in the eyes of the totem countries. This was also because these three countries had never entered the top four in the first three world competitions.

However, this world competition was extraordinary after all. The totem country also thought highly of these three countries and thought that their trump card had the battle power of an "invincible overlord" at full strength.

"And this Shi Yu..." Apart from the legendary contestants of the seven countries, the totem countries focused on Shi Yu. However, there was even less information about Shi Yu.

Apart from the title of the number one person below the legend of Dong Huang and the founder of the mechanical phantom beast, the totem country had not even investigated Shi Yu's pet information.

Some totem countries with connections actually only investigated the so-called battle results of the National League... This thing could be used as a reference. The championship was not as valuable as the title of number one person below the legend level.

But the number one person below the legendary level... The various totem countries basically ignored this title in the past.

The information on the legendary contestants of the other seven countries was investigated more comprehensively because the totem country had started investigating very early. As for Shi Yu, his rise was too fast. Previously, he was still unknown. In addition, after becoming famous, the information was protected too well by Dong Huang, so the totem country had no way to start.

However, considering the terrifying battle power of Shi Yu's main body and his identity as the strongest archeologist, not many people dared to underestimate Shi Yu.

In addition to his arrogant championship declaration... If he didn't have hard strength, he definitely wouldn't dare to talk nonsense.

For the time being, the various totem countries regarded Shi Yu as the legend battle power of the seven countries' trump cards... Although Shi Yu had yet to reach the Legend level.

At this moment, Shi Yu still didn't know that he had already been especially valued by the totem country. However, even if he knew, he didn't mind. This was because no matter how the totem country investigated, it was impossible for them to know all his trump cards.

Chaos Green Dragon Buggy, Wind Kirin, mind domain, self-destruction ginseng... Go investigate!

As for Shi Yu, he didn't believe that there was a Beast Tamer's foundation above his in the totem countries and the seven countries.

The preliminaries were still in full swing. Shi Yu didn't pay attention to Senior Lu, Gao Xuan, and the others. Without thinking, he knew that they were all undergoing temporary special training.

After knowing the information about the contestants of the totem country, they naturally had to prepare for battle. It was probably the same for the totem country. The various countries were at odds.

It was about the same for him. In the next two days of the Shi Yu preliminaries, one was to adjust his state, and the other was to work hard in meditation to see if he could break through to the legend level quickly.

Just like that, the preliminaries were coming to an end.

On Dong Huang's side, it was very worth celebrating. Be it Gao Xuan, Zou Yun, or Ji Feng, they passed the preliminaries after seven days of hard work.

Gao Xuan received the guidance of the Mechanical Legendary. The Ultimate Holy Dragon Beast and other mechanical pets completed the fusion evolution and loaded a super-scale weapon developed by the Mechanical Legendary. Only then was he lucky enough to pass the preliminaries.

In the end, Ji Feng used the paywall battle strategy every time in accordance with the rules and barely passed the preliminaries with the help of more than ten battle experience.

Zou Yun had it the most difficult. The financial group that cultivated him was unwilling to see Zou Yun lose the preliminaries. They invested a lot of money in dark-element legendary resources. After Zou Yun's pile of dark-element pets used them, they obtained the ability to increase their battle power

greatly in the night. He worked hard for seven consecutive nights and only fought in the night every day. Only then did he barely win against a guardian.

It had to be said that major competitions could often stimulate one's potential more. Although the guardian overlords of the preliminaries had low intelligence and a single battle pattern, and their incomplete life forms weren't real life forms, their battle power was still incomparable to ordinary overlords. And now, it wasn't just Dong Huang. Seven days later, level-six Beast Tamers from the other six countries also passed the preliminaries through various methods.

### Unscientific Beast Taming

#### **Chapter 914: Beginning of the Mythical Trial (2)**

In the end, including the contestants of the totem country's preliminaries, a total of 120 of the nearly 600 level-six Beast Tamers passed the preliminaries.

Moreover, more than half of these 120 people had received the rewards of the World Tree.

Of course, the best reward was still Shi Yu's World Tree Branch Liquid. Ever since then, there had been no reward that exceeded the level of the World Tree Leaf.

This was similar to what President Lin said. Among level-six Beast Tamers, there were no contestants that Shi Yu needed to care about.

Shi Yu's real enemy was still the trump card of those demigod factions.

...

After the preliminaries ended, President Lin immediately informed Shi Yu that the resources rewarded by the archeological Conference had arrived.

Shi Yu stopped cultivating. He was still a little far from level seven. He couldn't help but feel that it was a pity, but when he heard that the resources had arrived, he was immediately overjoyed.

Shi Yu came out of the ruins and came to President Lin.

"Two Mythical resources. They're the World Tree Fruit and the Soul Pearl."

"There are also two legendary resources. They're the undead-element Spirit World Fragment, Fire-element Hollow Flame."

"Spirit World fragment, Space Crystal Flame?" Shi Yu looked at President Lin and asked, "What are these?"

Shi Yu naturally knew what the World Tree Fruit and the Soul Pearl were.

However, Shi Yu was very surprised by the two legendary resources President Lin brought.

He vaguely remembered that it seemed to be a spatial resource. He didn't know if he remembered wrongly.

"These two resources can be said to have been specially found for you."

President Lin smiled and said, "The Spirit World Fragment is actually a spatial fragment of a ruin called the Spirit World. This ruin is at the Mythical stage. It shattered for unknown reasons, and a total of seven core fragments were separated. Every one of them is a legendary resource. After refining it, it can allow the soul attack of undead-type creatures to have its own tearing effect and increase spatial attainments. Apart from that, it can also give undead-type creatures the physique to travel through space."

"You often explore ruins and mystic realms. Resources with spatial effects are more useful to you."

"The Heart Flame is also a similar resource. After refining it, not only can it strengthen fire-element power, but it can also increase the user's spatial attainments, allowing its fire moves to burn the spatial crystal wall more easily. It's considered a spatial-element Strange Fire seed."

"I remember that General Mu Huiyin's heroic spirit is proficient in mastering the power of the soul and the sun, but it's not proficient in spatial power."

"Indeed." Shi Yu nodded.

Against spatial enemies, he was already used to using Eleven or Buggy.

As for the other pets, they basically relied on equipment or brute force.

For example, if Chi Tong wanted to crush a spatial pet, it just had to possess a hardened iron sword enchanted with the Space Quake effect. It was enough to kill indiscriminately.

Therefore, he didn't let them specialize in spatial power cultivation.

It was mainly because there was a shortage of skill bars at the moment. Shi Yu couldn't let every pet take care of everything.

When it reached the totem level, it could optimize his skills itself.

"Next is the ruins trial. Let Mu Huiyin's heroic spirit refine it and take a look. Even if it can only refine 10% of its strength, it's not bad."

"I'll also give you the World Tree Fruit. Use it if you can. It can be used to increase the skill proficiency of the Chaos and the Green Dragon. Although they're powerful, they've just evolved. Their racial skill proficiency is still too low. It might become their shortcoming in fighting other invincible overlords and even totems."

"As for the Soul Pearl, according to you, it'll be safeguarded at the Dong Huang Association first."

"Alright." As President Lin and Shi Yu chatted, the change in the sky of Inatella Island happened quietly.

On the island, countless green worms flew into the sky and gathered.

Under the combination, a gorgeous green eagle was born.

Right on the heels of that, an eagle cry that shook the forest and stopped the clouds suddenly appeared.

Buzz!!!

Under the cry of the eagle, Shi Yu and President Lin felt the surrounding space tremble.

"It's the World Tree clone."

Seeing this, President Lin and Shi Yu looked up.

"Don't tell me the Mythical Trial is about to begin so soon," Shi Yu said.

The preliminaries had just ended less than two hours ago. Wasn't this giving them merely two days to prepare?

However, just as Shi Yu and the others thought, the green eagle flew in the air and circled for a while. After attracting the attention of all the lives on Inatella Island, its voice sounded again.

"The Mythical Trial is about to begin. All contestants of the World Tournament, head to the location of the 'fire-element arena' during the preliminaries. I will awaken the divine-level creature of the Mythical Era, the 'Boar God', here."

"The first Mythical Trial will be set by the 'Boar God'."

Boar God!

At this moment, the hundreds of factions on Inatella Island were stunned.

They had never heard of this name.

Although the Mythical Era had ended, because humans in the future had never given up on archeology, the later generations still had a little understanding of the Mythical Era. For example, the Dragon, Phoenix, and Kirin were the three Mythical races in the east. These were all known to people.

However, countless archeologists and legendary demigod experts present had never heard of what kind of god the Boar God was.

"Isn't the fire-element arena Dong Huang's side?" Shi Yu said.

President Lin nodded and said, "Yes."

Dong Huang was already in a heated discussion.

Although they didn't know what kind of god the Boar God was, everyone took a deep breath and understood. A divine beast that had existed since the Mythical Era was about to be awakened by the World Tree!!

They were going to see a true god.

This world competition was not in vain.

### [Unscientific Beast Taming](#)

#### **Chapter 915: Beginning of the Mythical Trial (3)**

"What will a real god look like?" The demigod legendaries in the alternate space opened their eyes and looked in the direction of the Fire Arena.

At this moment, the green eagle continued, "The Boar God is a fire-element god. In the Mythical Era, it once destroyed countless Space Worms and made them into food to share with the gods. It gave them a taste of their own medicine. It's very powerful."

Holy shit!

When the World Tree clone finished speaking, not only were the lives of the various countries stunned, but even Shi Yu was slightly stunned.

They had seen the Wind Kirin's dream.

Even the Wind Kirin had to escape from the hunt of the Space Worms. This Boar God actually made the Space Worm into food?

Although the Wind Kirin was only a cub and the laws it mastered were not good at battle, the strength of the Space Worm was definitely very strong. This Boar God could survive until the end of the invasion war and use the invaders as food. Obviously, it was strong to the point of explosion.

"This Boar God must be the main battle power in that war."

"It's just... I wonder what form its inheritance will take."

Everyone discussed. At the same time, the fire arena where the fire python overlord previously existed buzzed and vibrated. The surrounding space was directly red.

Boom!!!

In an instant, the entire fire-element arena instantly turned to ashes. The shocking red light seemed to have burned through this space, causing another space to descend into the world.

At this moment, on the ground in the entire outside world, spiral flames directly formed a domain in a large area. Under the burning of the void in the center, a huge figure dozens of meters tall slowly formed.

Dong...

The moment its figure was outlined, it was as if the island had trembled, and an incomparably deep sound of laws appeared. The spatial power and natural power on the island were all suppressed. Even the demigods in the alternate space felt the violent vibration around them. Moreover, it was as if their necks were being strangled. It was very difficult to breathe, and they felt their bodies heat up.

"This law strength..." The demigods were extremely shocked. Legendary Beast Tamers' gazes were solemn to the extreme. This was the first time in their lives that they had felt such a terrifying pressure.

This Boar God gave them a feeling that although the strength in the other party's body was very weak, if they fought, they would also be in extreme danger.

Swoosh!!!

Under the sound of laws, all the creatures on the island, including Shi Yu and the demigods who could be called Mythical races, felt the suppression from their realms.

As the voice echoed, when the living beings present reacted again, the entire island had already become a fiery red world. The sky and ground had all turned red.

"I slept for a long time." In the center of the flames, the full appearance of a huge creature appeared in the flames. It had a humanoid body. Its legs, abdomen, and arms were filled with black muscles. A few messy dark red bristles stained its body, forming fire-like patterns.

Its head shocked many factions, because it was a pig head. Although its face had demon-like fire patterns and its long fangs were filled with deterrence, its iconic pig nose made people recognize its race at a glance.

Among the many totem countries, an inconspicuous group of pig-headed people stretched out their arms with trembling bodies and looked at the huge monster. No one expected that the very powerful Boar God in the mouth of the World Tree clone was actually a god similar to a pigman.

"Lord Boar God, according to the agreement, I'll leave the rest to you." At this moment, in the sky, the green World Tree Giant Eagle faced the Boar God.

"I understand, little guy." The Boar God glanced at the green eagle and said loudly.

The conversation between the World Tree clone and the Boar God shocked everyone again.

Wait a minute, wasn't the World Tree the clone of Blue Planet's will? Logically speaking, shouldn't its status be very high?

Even if it was a god from the Mythical Era, it should have been born on Blue Planet...

Everyone kept feeling that there were secrets they didn't know.

The Boar God looked at the World Tree clone. The others didn't know, but as a batch of gods who had made a deal with the will of Blue Planet and were sleeping in Inatella, how could it not know?

Although the World Tree was said to be a clone of Blue Planet, it was actually just a spokesperson created by Blue Planet to accelerate the revival of the Mythical stage. Compared to a clone, it was more like a child who had inherited some of Blue Planet's will and power. In terms of status, it was just a junior of their group of divine beasts that had experienced the invasion war.

After all, if it weren't for them protecting Blue Planet together, Blue Planet would have long been completely destroyed, and the World Tree wouldn't have been born.

"Are these the so-called human Beast Tamers?" At this moment, the Boar God looked at the 100,000 lives surrounding it and at the demigod experts hidden in the alternate space, revealing an interested expression.

Its huge fangs revealed light, and its red eyes revealed curiosity.

Because it had slept for a long time, the power in its body was already very weak, equivalent to the overlord level. Because the laws of the world were incomplete, its divine skill had fallen to a quasi-divine skill. However, the pressure it gave the outside world was still very powerful.

After all, with the blood of a god, even a demigod couldn't determine the strength of this Boar God at this moment.

"Roar..." A weak hot wind blew from its mouth. After sweeping its gaze, it said, "Compared to other things, it's indeed better to look at strength. "

### Unscientific Beast Taming

#### **Chapter 916: Beginning of the Mythical Trial (4)**

The huge Boar God raised its thick arm. White flames condensed and gradually formed a flaming saber. On the saber that was dozens of meters long, white flames that looked like liquid started rising with layers of life aura, spreading a shocking vitality.

Boom!

The Flame Blade was stabbed into the ground by the Boar God.

"This..." At this moment, all the demigods were shocked.

Because this move of the Boar God completely defeated them. In terms of control over the power of the natural order, they were completely inferior to this Boar God. The other party... actually casually condensed a fire blade suspected to be a Mythical resource that contained quasi-power of the natural order?!!

"Next, here. With humans as the main body, you can only send fire-element creatures to battle. You guys will decide the strongest. The strongest can obtain my former weapon. It contains the law of life."

"It's called the 'Spirit Ascension Blade'. With a slash, it can make a dead object give birth to a soul, turn a seed into a divine plant, and let the soul shape the body. It was my weapon at that time. Although it's already broken, it's still a rare treasure for creatures who have never mastered a divine skill. Come, let me see your strength. Who can take away the Flame Blade that contains the 'law of life' and take away the Life Fire?" It laughed and looked at the many lives.

Mythical resources!

At this moment, all the Beast Tamers with fire-element pets in the seven countries felt their hearts heat up. The eyes of all the fire-element overlords of the totem countries were filled with heat. Even the totems and demigods leading the teams looked at this "Spirit Ascending Saber" with fanaticism.

Without a doubt, this was a Mythical resource that had a huge increase in effect even for demigods.

The value of this resource was even worth a totem changing its attributes and evolving towards the fire element for it!!

"I, Punkham, want this resource!!!" At this moment, the heir of the Dragon Empire, the Fire Dragon King, who thought that it was the strongest fire-element creature in this world competition, had greedy flames in its dragon eyes.

Hahahaha, the heavens were helping it.

He didn't expect that the first Mythical Trial required fire-element creatures.

The strongest fire element?

Wasn't this referring to it?

The totems of the Origin Land were wood and lightning dual-element. The son of the Tyrant Dragon King of the Dragonman Empire was a pure dragon-element. The dragon-element contained some wood and water properties, not fire dragons, but evolution towards the green dragon.

Neither of these two totems was qualified to compete. Ye Xing mainly cultivated the power of the stars, and his pet's attributes were spread across various elements. Although there were fire-element pets that cultivated the power of the sun, they weren't trump cards. They were definitely not its match. Xue Yuan's Andre's was an ice-element pet, Shen Feng's Qiao Sen was a Mechanic, and Rongguang's Amelia was also a light-element pet.

The trump cards of the other demigod factions didn't major in fire either. The Dark Night Forest and the Demon Kingdom were dark-element, the Endless Sea Region was water-element, the Ghost Sea was undead-element, the Arctic Icefield was ice-element, the Void Court was spatial-element, and the Eternal Desert was earth-element. From the looks of it, no one could compete with it at all.

Hahahaha.

It had the strength of an invincible overlord. Coupled with the "Armored Transformation" talent of its contracted servant, it was definitely invincible among overlords and fire-element creatures.

Even if this Life Fire didn't look like something that could increase its battle power in the short term, as long as it obtained this, this world competition wouldn't be a loss. Even if it couldn't win the final championship, it wouldn't be a loss.

This could at least ensure that it stepped onto the path of a god after the Mythical Revival. This was clearly the inheritance of this Boar God!!

"Holy shit, fire-element."

At the same time, the Flame Time King was as excited as the Flame Dragon King.

"Hehehehe." Excited laughter also came from beside President Lin's side. Shi Yu's eyes burned with flames as he said, "Fire element is good, fire element is good. What a good start."

"This, I can give it to Chi Tong too! Otherwise, it'll say that I'm biased every day."

He and Chi Tong cooperated. No matter what, they had to take this resource. Mine, mine, it was all mine.

--

## [Unscientific Beast Taming](#)

### **Chapter 917: Kill Until No One Dares to Fight (1)**

After the boar's words, all the fire-element creatures were extremely excited.

All the non-fire-element creatures and Beast Tamers' expressions darkened.

As expected...

Just as the World Tree clone had said, these divine-level life forms actually restricted their attributes when choosing heirs.

Shit!

"Why does it have to be fire-element!"

The tree sprite of the Thunder Crown Rubber Divine Tree,

The Green Dragon Prince of the Dragonman Empire's gaze froze, revealing a dissatisfied gaze.

They were at the totem level. They had a huge advantage in the World Tournament, and there was a high chance of them finally obtaining the blessings of the World Tree.

But if other contestants obtained the inheritance in the seven Mythical Trials and broke through, their advantage would disappear.

This Living Fire that contained the Laws of Life was clearly a good thing.

Seeing others obtain it was even more uncomfortable than losing resources.

"Fire element!"

However, after the fire-element creatures were excited, they quickly calmed down.

Among the 106 factions present, there were actually many fire-element overlords.

Among them, even after cooperating with the Beast Tamer, there were many fire-element creatures with the strength of top-notch overlords.

But at this moment, their hearts were no longer as hot as flames.

They looked in the direction of the Dragon Empire, at the domineering Fire Dragon King.

They looked in the direction of the Lava Empire, at the powerful and domineering Lava Beast.

These two fire-element creatures should be the strongest among them.

The Dragon Empire was a demigod-level faction. As its heir, the Fire Dragon King's strength was naturally without a doubt.

As for the Lava Empire, it was located in the largest volcano on Blue Planet and had a rich foundation.

There were many lava countries, including a lava country near the Seven Islands.

However, there was only one Lava Empire. Their territory was larger, their race was stronger, and it was even the only Lava Nation that cultivated and raised humans.

Commanders, like the Tyrant Dragon King, were close to demigods.

At this moment, the Lava Beast of the Lava Empire also stood on the ground and looked at the Life Fire with a burning gaze.

Boom!!

Be it the Fire Dragon King or it, there was a shocking deterrence eruption on their bodies. It had actually reached transcendent.

Seeing them, the hearts of the other fire-element overlords immediately felt like they had been doused with cold water.

These two were recognized as strong in the various totem countries. How could they compete with them...

Wait!

Was there a chance to watch from the sidelines?

Let the Fire Dragon King and the Lava Beast fight first and wait for both of them to suffer?

Many fire-element creatures had this thought.

Otherwise, directly fighting and competing with them was no different from courting death.

The chances of victory were too small.

"Ye Xing." In the Dong Huang area, Divine Bell shouted for Ye Xing.

As for Ye Xing, he shook his head. "My Red Sun Rock, together with my Beast Taming Talent, is already at the limit to fight top-notch overlords. The chances of defeating them with a single pet are very small."

After a moment of silence, Divine Bell said, "My Fire Plume Fan is the same."

Although she was a descendant of a Mechanical Legendary, Divine Bell's Beast Taming Talent was very strange. That was, the more ancient the contracted pet, the stronger the power it could display.

Therefore, she basically contracted some antique sword-type undead.

However, she was not very interested in archeology. With her identity, she could obtain such a pet as long as she made a request. There was no need to search for it herself.

"Jie Yi."

In the direction of the Seven Islands, Jie Yi of the Phoenix Court was also extremely silent. Beside her, Legend Ji Xiang of the Phoenix Court pressed her shoulder and let her watch for the time being.

It was very difficult for a young man who had just broken through to the legend level to compete for that living fire.

At this moment, everyone was extremely afraid.

The rules of this Mythical Trial were very simple, to the point of being simple and crude.

Whoever was the strongest fire-element would obtain the Living Fire.

However, it was such a rough rule that made many fire-element overlords and fire-element Beast Tamers' heads hurt.

It was better to do some complicated trials that tested talent or potential.

Comparing battle power... was that appropriate!

Wasn't this clearly not giving anyone a chance?

"No one?"

At this moment, a huge square fire domain was formed on the red ground under the Boar God's feet. The flames that rose surrounded a fire arena.

It said, "Those who are confident in their strength can come and defend the arena. There's no need to worry about consumption. As long as you obtain a victory, I'll bathe your entire bodies in this Life Spirit Fire, producing the fire power you consume and the injuries you suffer. Before sunset, you can finally obtain this Life Spirit Fire in this domain."

"The process of bathing in the Life Fire is also the process of strengthening yourself. Therefore, even if you can't stand to the end, as long as you win a battle, you can also be strengthened. The premise is... that you can survive the next battle."

"Similarly, if you clearly have strength but don't come up for a long time, this fire will decrease greatly under continuous consumption. Even after obtaining it, it won't be complete."

"So if any of you are interested, come up quickly. Stop dawdling."

The mythical boar fell.

Everyone's hearts tightened.

This was clearly not comfortable.

"President Lin, my luck is pretty good. I'll win this trial."

"I'll go first. If I don't go soon, I'll be used by others."

At this moment, Shi Yu stared at the Boar God, the Life Fire, and the Fire venue and smiled.

"Shi Yu, you..."

"Although your strength is very strong after Mu Huiyin's heroic spirit possesses you, won't it be a little risky? After all, it's only at the monarch level."

### [Unscientific Beast Taming](#)

#### **Chapter 918: Kill Until No One Dares to Fight (2)**

"It's alright."

At the same time, on President Lin's side, his heart tightened as he looked at Shi Yu, who flew to the Fire Arena without thinking.

Shi Yu... had gone to defend the arena!

As for Shi Yu's fire-element pet, Chi Tong seemed to be the only one. Chi Tong was only at the monarch level!

Although after possessing Shi Yu, it might have battle power comparable to an invincible overlord, the burden would definitely be very high. It would probably be very difficult to resist an invincible overlord like the Fire Dragon King.

Moreover, the Fire Dragon King also had a Beast Tamer.

Was it really alright to be the first to defend the arena just like that?

From Shi Yu's anxious appearance, it seemed like he was afraid that others would use some of his Life Fire.

[No problem.]

As Shi Yu flew, his heart was firm.

The Boar God had said it.

It was a fire-element battle with human Beast Tamers as the main body.

In other words, if a human Beast Tamer contracted seven fire-element creatures, seven could be used in battle.

Others might not know, but Shi Yu knew that Baby Ginseng had also obtained a weak fire attribute after evolution.

Although it was the last attribute, it indeed had a fire body. In other words, he could use Chi Tong and Baby Ginseng as two pets.

In such a situation, regardless of whether it was the Fire Dragon King or the Lava Beast, even if it was at the totem level, Chi Tong, Baby Ginseng, and his own combination might be able to fight.

Since the attributes matched him, he had to take this trial.

Living Fire...

The Law of Life...

Not bad.

When Chi Tong's few undead skills were trained to the extreme, it might be able to touch the law of death. With another law of life, it would be the Great Dao of Life and Death.

In fact, Shi Yu felt that there was no need for the fake fire-element ginseng baby.

As long as the opponent wasn't a totem, he and Chi Tong could kill indiscriminately!

...

After the Boar God said this, both the Fire Dragon King and the Lava Beast couldn't sit still anymore.

They planned to be the first to go up and defend the arena.

However, the Fire Arena was the closest to Dong Huang after all. One person's speed was faster than the others.

Everyone looked at the human figure flying under the Psychic wrap in shock.

He was wearing a dark red trench coat, and his clothes and short hair fluttered in the wind. That familiar face immediately reminded the people of the various factions of the figure who shamelessly announced the championship declaration in the preliminaries.

"I will become a new world legend!"

This kid wasn't just saying.

In the Mythical Trial of battle power, he really dared to be the first to stand out, as if he could really defeat those invincible overlords.

"Shi Yu..."

"Shi Yu, he..."

At this moment, as Shi Yu flew to the arena and slowly landed in the fire arena, he raised his head and looked at the Boar God. Everyone was shocked.

Even the World Tree clone immediately looked at Shi Yu in silence.

This kid...

If it remembered correctly, Shi Yu's bear and dragon were indeed very strong, but fire-element...

His fire-element pets seemed to only be at the monarch level?

How did he dare to accept this Mythical Trial?

The relationship between the totem countries and the seven countries had always been incompatible. In this competition, it was impossible to hold back.

If anything went wrong, he would die.

Although... Shi Yu might not be afraid of death.

"Shi Yu..." At this moment, as Shi Yu appeared, Senior White Brook, and the others' expressions turned cold. No outsider knew that Baby Ginseng had evolved into a fire element. Therefore, in everyone's impression, Shi Yu only had Chi Tong's fire element.

The advantage of the Beast Tamers of the seven countries was to contract multiple pets. At this moment, Shi Yu clearly didn't have this advantage. What could he use to compete with the Beast Tamers of the totem country who specialized in cultivating overlords one-on-one?

"It shouldn't be... a problem, right?" Lu Qingyi took a deep breath. She felt that Shi Yu didn't seem to be someone who would attack when he wasn't confident.

In addition, even if the opponent was a totem country, they shouldn't kill Shi Yu. After all, if Shi Yu died, no one would have an easy time.

"It's that human archeologist."

In the alternate space, the demigods' gazes were deep, while the legends of the seven countries suddenly frowned. Even if it was the Divine Source Legend, it was the same. He acknowledged the strength of the Chaotic and the Green Dragon, but he really didn't know much about Chi Tong.

General Mu Huiyin's heroic spirit reincarnation... sounded very powerful.

But which demigod faction's heir didn't have titled battle power at this moment?

Was Shi Yu really that confident?

At that moment, Shi Yu stood on the arena, surprising the Boar God. It said, "I thought humans didn't have transcendent abilities, but it turns out that they can use Psychic power. Forget it, then let me see your strength."

Shi Yu smiled and said, "A hybrid human has some transcendent abilities, but I'm not a hybrid. I'm using Psychic power developed with special resources."

With that said, he looked around.

To be honest, Shi Yu didn't want to fight a tag battle.

Even if it was himself, Shi Yu didn't want to consume some Life Fire first.

He wanted to take back the complete Life Fire and keep it for research.

Therefore, in order to avoid endless challenges, just as Shi Yu arrived, he said to everyone, "Sorry, I want this Life Fire."

"I hope everyone can give me face."

"Swords have no eyes. I can't guarantee that the challenger, especially the challenger of the totem countries, can end the battle alive."

Boom!!

With that said, a spiritual wave comparable to an overlord bloomed from Shi Yu's body, making everyone's hearts skip a beat.

They were shocked by Shi Yu's words.

The fire-element overlords of the totem country instantly revealed anger.

### [Unscientific Beast Taming](#)

#### **Chapter 919: Kill Until No One Dares to Fight (3)**

Was this human threatening them?

At this moment, all the fire-element overlords with battle power above top-notch overlords, especially the Lava Beast and the Fire Dragon King, had mocking smiles on their faces.

This human had only eaten one Undying Fruit. Wasn't he too arrogant?

Did he really think that no one dared to kill him?

So what if a human revived into a totem? It was just the weakest totem.

For invincible overlords like them who could resist ordinary totems, resisting was really not a problem.

At this moment, after Shi Yu went up, many top-notch overlords were tempted.

Although Shi Yu had defeated a top-notch overlord alone, the guardian overlord of the preliminaries was only the weakest top-notch overlord. Many of the overlords present had the will of overlords, energy values above 80 million, and the enhancement of Beast Tamers. They were confident that they could instantly kill the guardian overlord of the preliminaries.

Therefore, when they saw Shi Yu appear, they wanted to meet him first.

At least this guy was much easier to deal with than invincible overlords like the Fire Dragon King.

As long as they could freeload on the Flame of Life once, it wouldn't be a loss.

At most, when they encountered stronger experts next, they would directly admit defeat.

At the thought of this, many fire-element creatures jumped up excitedly.

In the west, an Undying Bird covered in blue flames suddenly flew towards the arena.

In the south, a lion covered in flames ran towards the arena.

They all had a young Beast Tamer on them, but their master and servant identities were obvious.

Shi Yu looked at these overlords and his heart turned solemn. Their energy levels were all above 80 million. There was also the will of overlords and even legend Beast Tamer servants... Their energy levels could probably easily erupt to more than 100 million. No wonder they dared to challenge him.

However...

"Roar!!!!!"

Like Shi Yu, the Flame Dragon King, Punkham, also soared into the sky. At the same time, a transcendent-level dragon might enveloped the sky and earth and directly crushed the Undying Bird and the Holy Flame Lion.

Obviously, it didn't want anyone to beat it to it. It wanted to use its Life Fire first.

Both Shi Yu and the Fire Dragon King wanted to obtain the complete Life Fire.

Therefore, it was impossible for them to let others determine the winner on the arena first, even if was just taking a bit of life fire.

< Name > Fire Dragon King

[Attributes]: Dragon, Fire

[Level of Growth]: Overlord

Energy Points: 96,990,000

Compared to the power of the Undying Bird and the Holy Flame Lion, the dragon power of the Fire Dragon King was clearly more violent.

Under the envelopment of its dragon might, the expressions of the Undying Bird, the Holy Flame Lion, and their contractors changed, and their movements instantly froze.

Their movements froze for a moment, and they couldn't move forward at high speed anymore.

Because their rationality told them that if they continued forward, they might be waiting for the Fire Dragon King to attack first.

Boom!!!

The dragon might of the Flame Dragon King, the heir of the demigod faction, the Dragon Empire, enveloped the world. Its strong body seemed to be made of tempered red steel. Its scales were like molten iron water watered by flames, and the color was dark red and golden. Its entire body was extremely hot, and the end of its dragon tail was even burning with dragon flames.

Not only its body, its neck, head, long tail, sharp claws, and fangs, its four strong feet, as well as its pair of fire wings, were all extremely domineering images. Just looking at them, they contained supreme power.

"Roar!!!!!"

In the distance, the Fire Dragon King flew over. On its body, a man in red armor was like an unconscious puppet. As the Fire Dragon King arrived, he actually turned into a red light and fused into the Fire Dragon King's body.

Buzz!!!

In an instant, a layer of reddish-brown armor appeared on the already very strong body of the Fire Dragon King. Moreover, the aura of the Fire Dragon King rose steadily, reaching an even more ridiculous height.

Energy Points: ???

Shi Yu looked at the flying Fire Dragon King with a burning gaze. He was very impressed by the Dragon Empire's technology of nurturing hybrid humans. This legendary servant of the Fire Dragon King could actually transform into battle armor and equip the Fire Dragon King's body.

As for the Beast Tamer of the Thunder Dragon General, he had the reverse fusion talent. He could also integrate himself into the Thunder Dragon's body.

They were all beasts as the main body.

[If we want to defeat this guy, we might have to pay a relatively high price.]

[However, at the same time, as long as we defeat this guy, the cost will be made up.]

Since this Fire Dragon King was unwilling to give him face, Shi Yu would not show mercy.

Boom!!!

The Fire Dragon King in huge armor landed on the fire arena.

At this moment, the Boar God narrowed its eyes and looked at the Flame Dragon King.

"Dragon race..."

"Also, is this the Beast Taming Talent?"

"It's indeed very interesting. You're very strong."

Even the god from the Mythical Era praised the overlord-level Flame Dragon King when it saw its aura.

In the Mythical Era, not all of them were Mythical creatures. At that time, there were also many overlords, monarchs, and even commanders and transcendent.

In the eyes of the Boar God, the current state of the Fire Dragon King was considered the second tier of the overlord level even in the Mythical Era.

As for the first tier, it was those Mythical race overlords.

After all, the laws of the Mythical Era were very complete. And now, this Fire Dragon King could achieve such an achievement in the era before the Mythical Era revived. In the eyes of the Boar God, its talent was indeed alright.

### [Unscientific Beast Taming](#)

#### **Chapter 920: Kill Until No One Dares to Fight (4)**

In comparison, apart from Psychic power, that human who could use Psychic power had yet to show anything special. He wondered what his contracted creature looked like...

"Flame Dragon King... Punkham."

When the Fire Dragon King ascended the arena and finished looking at Shi Yu, the expressions of the Beast Tamers from all over Dong Huang froze as they looked at the two parties facing each other solemnly.

The expressions of the Dragon Empire's great enemy, Tingxiang, and Dragon Palace City, also suddenly darkened.

Enemies were bound to meet on a narrow road...

Boom!!!

Compared to the tiny Shi Yu, the aura of the Fire Dragon King was incomparably terrifying like an erupting volcano. This made the Lava Beast in the distance fall silent. To be honest, it wasn't confident of defeating this guy.

The Fire Dragon King of the Dragon Empire was undoubtedly very powerful.

However, even in the face of such a powerful Fire Dragon King, Shi Yu stood in the sea of fire without moving at all. Under the gaze of thousands of gazes, he looked at the Fire Dragon King and said,

"I've already reminded you."

"I believe you've already realized it before coming up."

"Huh??" Flames shot out of the Fire Dragon King's huge nostrils, and its fiery red dragon eyes looked at Shi Yu in disdain.

"Kid, are you serious??"

"Did you have some misunderstanding about your strength?"

"Idiot," At this moment, on the Demon Kingdom's side, the Fallen Angel Aldrich said in a low voice. As for Shi Yu... He felt that he had yet to reveal his strength. Back then, the dragon might displayed by Shi Yu when he looked at him was much more terrifying than the dragon might of the Fire Dragon King in Aldrich's opinion.

He still didn't know what was going on with that dragon might.

Although that didn't look like a fire-element dragon might, there must be a reason why an expert like Shi Yu dared to stand out. If the Fire Dragon King was careless, it would definitely suffer greatly.

Back then, Shi Yu and Aldrich looked at each other and he used the Green Dragon Domain to connect to Buggy's mind at the same time. It was indeed powerful. As for now, since the Boar God wanted a fire-element battle, it would be a fire-element battle...

"Unfortunately, I'm very clear about my strength."

Shi Yu sensed the Flame Dragon King's current state and said very calmly.

Weaker than Eleven, weaker than Buggy. Much weaker.

In that case...

"Chi Tong."

Shi Yu said directly.

Right on the heels of that, a purple summoning array surrounded by orange flames appeared beside Shi Yu.

Shi Yu stretched out his hand and directly reached for the summoning array. Then, he slowly pulled it out in the air. A shocking heat wave spewed out, and a red divine sword was slowly pulled out of the Beast Taming Space and appeared in Shi Yu's hand.

"Holy shit, he's only a level-six Beast Tamer!!!"

Seeing the color of Shi Yu's summoning array, many people were stunned.

Initially, be it the seven countries or the totem countries, they thought that Shi Yu was so brave because he had used the World Tree Branch Liquid to break through to the Legend level.

In the end, after seeing the color of Shi Yu's summoning array, everyone realized that this kid was still a level-six Beast Tamer.

Not to mention the other factions, even Dong Huang was stunned.

That was because it wasn't just Shi Yu's level. The level of the pet Shi Yu summoned also made them rather speechless.

The sword spirit that was slowly pulled out by Shi Yu.

It was a fire-element and undead-element pet.

The overlords and totems present were very certain that they had sensed correctly.

From the energy fluctuations... monarch level.

The fire sword spirit in Shi Yu's hand was only a monarch-level life fluctuation.

"If I remember correctly, Shi Yu only has one fire-element sword spirit. The other pets... aren't fire-element."

"In other words, this guy plans to rely on a monarch-level sword spirit to fight the invincible Dragon King with the support of a legend Beast Tamer?! What a joke!!"

At this moment, the Beast Tamers of the seven countries who were familiar with Shi Yu's information were stunned.

Even if Shi Yu's main battle power was very strong because he had eaten the Undying Fruit, they really couldn't imagine how a combination of a level-six Beast Tamer and a monarch-level fire-element pet could defeat a combination of a level-seven legend Beast Tamer and an invincible dragon-element overlord.

"Hm?"

The Boar God was similarly puzzled. It could also clearly sense that Shi Yu and the others were much weaker in terms of levels.

Want to fight above his level?

It wasn't impossible for geniuses to beat normal powerful people.

However, the Fire Dragon King opposite was also a top-notch genius.

"Huh??"

At that moment, the Fire Dragon King wanted to laugh the most. It originally thought that Shi Yu had broken through to the legend level, but this guy was only a level-six Beast Tamer?!

"Divine Source, what is your kid trying to do?"

The legendaries of the other six countries panicked when they saw Shi Yu go up to fight the Fire Dragon King just like that.

Especially countries like Shen Feng. After all, Shi Yu had agreed to share the mechanical phantom beast system after the World Tournament ended.

If Shi Yu died in the world competition, would this promise still be effective?

"I'm not sure, but... believe him," Divine Source said silently. Shi Yu's main body was so strong. In theory, after the undead possessed him, he couldn't be weak.

However, because he didn't know Chi Tong's strength and the opponent was too strong, Divine Source wasn't very confident at this moment.

"Kid, I'll let you see the difference clearly."

"Roar—!!!"

Without hesitation, the Fire Dragon King directly attacked.

First was deterrence.

Punkham opened his mouth and suddenly let out a dragon roar that resounded throughout Inatella.

A huge dragon roar swept up the dragon might, almost making all lives below the totem level cover their ears, their hearts trembling.
