[Unscientific Beast Taming](#)

Chapter 971: Time Element (4)

....

"Look."

After the contestants gathered, strange trees that looked like man-eating flowers spat out strange insects with juice in their huge mouths.

When they were just spat out, their bodies weren't big. They were at most a few meters long. However, as they fell to the ground, the bodies of the worms suddenly swelled.

"Zizizi..."

Moreover, indescribable sounds came from their bodies. In a short moment, the bodies of the largest worms swelled to dozens of meters tall.

Their forms were very strange, and the characteristics of the insects were only a portion of the bodies. Their bodies contained the organs of various animals and plants, and their bodies seemed to be pieced together by more than ten species. They were extremely terrifying.

In the outside world, the contestants and audience didn't sense much strong energy fluctuations from them, but the life aura comparable to a totem level enveloped their bodies like a vast sun.

There were a total of five totem-level Space Worms and 45 overlord-level Space Worms!

"So few!" After discovering that there were only 45 overlord-level Space Worms, less than 100, the remaining trial challengers of the totem country instantly felt that it wasn't enough.

The rubber divine tree looked over and felt that it was enough to stuff the gaps between its teeth.

However, if it contained life force, it didn't look that terrifying.

Even the five totem-level Space Worms didn't look as powerful as the Green Dragon Prince who had been insta-killed just now.

At this moment, when they discovered the "unsatisfied" expressions of the candidates, the corners of the mouths of the many gods led by the Boar God suddenly curled up.

"Hehe."

"They don't seem to know what they're facing..."

....

A moment later, a total of 20 contestants were teleported to different positions in the trial barrier.

At this moment, the Teleportation of the Eternal Divine Tree was very particular. Every cultivator who had just entered the trial barrier had a cosmic worm moving its body in front of them.

Their eyes were scarlet and dark green, and saliva dripped from their ferocious mouths, as if they were already hungry to the extreme. They were so hungry that they almost lost their minds.

"Space worm?"

Swoosh!!!

One by one, the overlord-level Great Light Flowers that had just entered released thousands of lights under the enhancement of the Beast Tamer's light-element strengthening talent, attacking the evil creature in front of them that had a cockroach as the main body and the characteristics of many races, such as gorilla, willow tree, dragon, and phoenix.

Boom boom boom boom!!!

Countless attacks landed. The Space Worm stood on the spot without moving at all. The moves caused a violent explosion on its body. In the rising smoke, it only continued to move its body and walked towards its prey with red eyes.

The pupils of the overlord and the Beast Tamer constricted.

"Ah!!!!!"

In a short moment, less than a few seconds after the trial began, a candidate was torn apart by the Space Worm and swallowed into its mouth.

"..." This scene made many spectators who were paying attention to the trial barrier in the outside world widen their eyes and cover their mouths.

This situation also happened elsewhere.

In an instant, two of the 20 groups of candidates who entered died and were eaten by the Space Worm.

This made the hearts of the Beast Tamers from the seven countries who didn't participate in the trial, as well as the Beast Tamers who had just left at the last minute, race.

After all, the first batch of Space Worms the trial-goers encountered was only at the overlord level. The five totem-level Space Worms were still searching for prey from afar.

"Quasi totem level." At this moment, the experts watching the trial had deep gazes as they judged.

The physical strength of each of the 45 overlord-level Space Worms here was comparable to the totem level. The attacks of ordinary overlords were no different from scratching an itch for them.

Perhaps even if a top-notch overlord wanted to defeat these Space Worms, it would have to pay a heavy price. This was even if these Space Worms didn't have any other trump cards.

"Hehe, because of the ability to devour and evolve, the physical strength of the Space Worm race is enough to crush dragons and has perfect Elemental resistance."

Seeing this, the Boar God said, "Although these revived Space Worms are in an extremely hungry Enfeeble state, in terms of strength, they are fully deserving ferocious beasts."

"If you underestimate them, wait for death. Oh right, it's worth mentioning that these Space Worms in front of us can only be considered soldiers in their huge race. They only have physical strength and don't master transcendent power. The really terrifying ones are those royal families..."

"Their abilities are all comparable to divine skills."

"I hope we won't encounter each other in the future."

Upon hearing that, the expressions of many experts from the factions changed.

At this moment, there were trial challengers who basically couldn't resist the Space Worm and could only escape.

There were also those who could barely fight the worms, and there were even those who could easily insta-kill overlord-level Space Worms.

For example, the rubber divine tree in the Origin Land had an advantage one level higher. In addition to the strengthening of the Beast Tamer, it was still easy to deal with an overlord-level Space Worm that wasn't at its peak.

"Thunder... Heavy Strike...!!"

With a boom, a rubber tree whip wrapped in lightning swung down in space, instantly smashing the centipede-like Space Worm in front of him.

After dealing with the Space Worm, it disintegrated into a huge amount of life force that surged into the person's body. At this moment, be it the Rubber Divine Tree or the Tree Sprite Carney, they felt that their lifespans had been strengthened for at least ten years, as well as more than a million life force points. It was very unbelievable.

Unscientific Beast Taming

Chapter 972: Time Element (5)

"Not bad, not bad." The rubber divine tree's eyes lit up. If that was the case, as long as he defeated most of the Space Worms and ate that ginseng baby, he might really have a chance to have the strength of a top-notch totem...

"We have to find that Shi Yu immediately."

The rubber divine tree was very worried that Shi Yu had provoked a totem-level Space Worm during the process of hunting the overlord-level Space Worm, causing that ginseng baby to be eaten by someone other than it.

If that was the case, it would be a huge loss.

"Where's Shi Yu?"

It wasn't just the rubber divine tree.

As the Teleportation continued, many people's gazes began to search for Shi Yu.

After all, everyone knew that many candidates definitely wouldn't let Shi Yu's trial go so smoothly.

"Yi."

"This is the Space Worm."

At this moment, Shi Yu, who was in the barrier, also saw the Space Worm near him.

It was a Space Worm that looked like a huge locust. Its body also contained the characteristics of various races. Bats, eagles, dragons... It was very strange. At the moment, it was staring at Shi Yu and the others with bloodthirst.

His entire body trembled.

This was excitement.

At the moment, the revived Space Worms only had the most instinctive desire to hunt and fight. Therefore, the only thing they could sense was whether the creature in front of them could provide them with huge nutrition after eating it.

Without a doubt, Shi Yu and the ginseng baby on his shoulder were rare supplements for the Space Worm in front of him. They were far more excited than the other Space Worms when they saw the other contestants.

"What will they do..."

At this moment, seeing that Shi Yu and Baby Ginseng had encountered a cosmic worm that even top-notch overlords found difficult to deal with, the audience of the various countries became serious.

If it were that green dragon, they believed that it should be able to win as easily as the rubber divine tree, but at this moment, Shi Yu only had Baby Ginseng as a plant-type pet...

"Baby Ginseng, Light Clearing Cannon."

Shi Yu stood on the spot. Baby Ginseng was still sitting on Shi Yu's shoulder. Everyone saw that when the Space Worm in front of them turned into an afterimage and flew over, Baby Ginseng also raised its hand.

Almost instantly, high-level skills such as the Time Fruit and Clear Sky were activated.

The sun in the starry sky was even more dazzling.

Baby Ginseng's level had also reached the overlord level. Moreover, under the enhancement of the max-level sunny day, it released an energy storage beam that was also at the Dao Proficiency proficiency.

A ball of light the size of a marble and containing terrifying power instantly appeared in front of Baby Ginseng's fingertip.

A dazzling light and surging energy suddenly spewed out, turning into an extended pillar of light that sent the flying cosmic worm flying!!

Crack!!!

With a sound of its body shattering, the body of the Space Worm in the air caved in. It was suddenly sent flying by this pillar of light, smashing several huge trees. Seeing this, the contestants of the seven countries widened their eyes.

This was a f*cking monarch-level supplement ginseng baby?

In a single exchange, it repelled the Space Worm, forming a sharp contrast to the overlord-level Big Light Flower that scraped the Space Worm just now.

However.

"Not enough!!!" Suddenly, some people quickly discovered that although the Space Worm was penetrated by a single attack and had considerable injuries on its body, it quickly flew up again without any major injuries.

It looked at Shi Yu and Baby Ginseng even more cruelly.

Seeing this, Shi Yu and Baby Ginseng pondered slightly.

Its physical strength was indeed strong.

"No, Shi Yu and the others' attacks can't deal a fatal blow to that Space Worm..."

"However, the attack power can already cause greater damage and is already stronger than most contestants. It shouldn't be difficult to defeat the Space Worm after a battle, right?"

If it were in the past, no one would have dared to guess that a monarch-level supplement pet could defeat an overlord-level Space Worm. However, at this moment, they actually felt that it wasn't that difficult to accept.

However, what stunned everyone was...

"Baby Ginseng, let's go."

It would take too much effort to solve it. It wasn't worth it.

He would wait to wipe them all out all at once.

Without another word, Shi Yu and Baby Ginseng activated the Earth Escape Skill and burrowed underground together. In front of this locust-type Space Worm... they ran away... They ran away...

They directly used Earth Escape to escape.

"Ji!!!" Seeing this, not only was the audience stunned, but even the Space Worm was stunned. Then, it chased angrily, using its shocking strength to hit the ground and its sharp claws to burrow into the ground to chase after the food.

But clearly, this worm wasn't good at digging holes, and it didn't have the genes of a race that was good at underground battles. It was more like an earthworm.

"He ran away?"

"What's going on?"

"Holy shit, what's going on?"

Shi Yu chose to avoid the battle when facing an overlord-level Space Worm, immediately stunning the contestants of the seven countries. It also made the contestants of the totem country look confused.

Wait a minute.

Please don't tell them that Shi Yu's strategy in this trial was to watch the other contestants fight the Space Worms. Then, he would hide underground and find an opportunity to pick up scraps.

At this moment, the legendaries of the other six countries even suspected that Divine Source was lying to them.

A moment later.

Under everyone's stunned gaze, Baby Ginseng's figure appeared on the ground again. However, Shi Yu's figure didn't appear again.

It seemed like... He was still underground.

Shi Yu had no choice. If he wanted to avoid the damage of the self-destruction but wasn't allowed to use equipment, he could only use Earth Escape and a certain safe distance from Baby Ginseng's main body...

[Unscientific Beast Taming](#)

Chapter 973: Time Element (6)

Fortunately, under Ling's prior calculations, there wouldn't be any problems.

At this moment, Baby Ginseng, who had let its clone slip away with Shi Yu, stood on the ground and looked at the starry sky.

"Yi..."

It had to be it after all!

Buzz!!! Buzz!! Buzz!!!

In the next moment, the ginseng baby, which was originally only the size of a radish, used the multiplication skill!!

Boom!!

Its originally small body instantly multiplied to more than a hundred meters tall.

At the same time, a shocking fragrance was released by Baby Ginseng!!

Hu!!

In an instant, this fragrance swept in all directions like a tornado.

"Wait..."

"What's that ginseng baby doing?"

"Where's Shi Yu??"

"Roar!!!" "Roar!!!" At that moment, demonic cries rose and fell in the trial barrier, making many people not believe their eyes.

This ginseng baby was taking the initiative to release its nourishing power to attract the enemy??

"This..." Those from the Dong Huang Region, White Brook, Gao Xuan, and the others who had watched the National League were not unfamiliar with Baby Ginseng's behavior at this moment.

However, it was precisely because they weren't unfamiliar that they were very shocked and confused.

Shi Yu was pulling monsters again???

Why!!

It was fine if they pulled monsters in the National League, but they were all low-level transcendent and commander-level monsters. Shi Yu and the others could easily defeat them with Eleven's deterrence.

But now, there were six totems and dozens of top-notch overlords here!

Was Shi Yu crazy, or was Baby Ginseng crazy?

Even with the Green Dragon's previous attack, it wasn't that easy to deal with so many enemies together, right?

Moreover, only Baby Ginseng could fight right now.

At this moment, not to mention the totem country and the various divine beasts, even Dong Huang's own people, apart from a very small number of people who knew, had no idea what Shi Yu wanted to do.

"Is he crazy?"

Originally, they were hoping that Rennes and the other hunters would quickly find Shi Yu's Tyrant Dragon King, Black Dragon Juggernaut, and Origin Tree God. When they saw Shi Yu's ginseng baby suddenly take the initiative to attract the enemy, they couldn't help but be shocked.

"Over there."

At this moment, as Baby Ginseng changed, dozens of Space Worms in the trial barrier looked in a direction with burning eyes.

Including the five powerful totem-level Space Worms. Although they were evaluated by the Boar God as little soldiers among the Space Worms, with the powerful strength of the overlord-level Space Worm just now as a comparison, no one dared to underestimate these guys.

Even if it was a rubber divine tree, could it deal with one alone? The audience outside had a lot of questions.

However, at this moment, this group of monsters, and even the group of totem country contestants, including the rubber divine tree, looked in the direction of Baby Ginseng's mutation.

They were all attracted by the fluctuations it released.

"Not good!!" Especially the rubber divine tree, Rennes. When it saw this scene, it accelerated in the direction of the ginseng baby, afraid that it would be eaten by those cosmic worms.

After releasing a wave of fragrance that filled the trial barrier and became the source of all hunger, Baby Ginseng quickly returned to its normal size. It began to hide underground, waiting for a large number of enemies to gather.

Such a strange scene made many factions' expressions solemn.

At this moment, they could only analyze that Baby Ginseng might want to attract a large number of enemies to fight a chaotic battle and reap the benefits.

As for the other possibilities, no one could analyze them.

"Do you want to win with tactics?" Even the divine beasts came to this conclusion.

No one would think in the direction where Baby Ginseng wanted to kill all the enemies alone.

"Aba Aba, oh no, oh no."

At this moment, when it saw a large number of Space Worms and so many totems and overlords gathering, the Prediction Owl was the most panicked.

It felt that Shi Yu's strategy of luring the enemy and guiding them to kill each other might fail!!

Because this was too similar to its prophecy. Baby Ginseng would be chased by a bunch of totems and overlords... Then, right on the heels of that... it would be eaten by a totem!!

This... If its prophecy was accurate, Shi Yu and the others would be in danger!!

No, he couldn't play like this. He would fail!!!

"What's wrong with you?" At this moment, the gem cat saw the pale pupils of its old friend beside it tremble.

"No, this strategy is too dangerous. You'll be eaten, eaten," the owl said nervously.

The gem cat: "Eh, it's stable because it has to be eaten!!"

The owl: ???

"It was eaten!! In my premonition, Shi Yu's ginseng baby will probably be eaten by the totem. It... is in danger!! It's going to die!!" The Prediction Owl shouted in shock.

It caused the surrounding Beast Tamers of Dong Huang to look at it one after another. Then, their expressions turned serious and their expressions changed.

Although everyone knew that the premonition of the owl was unreliable, at this moment...

From the current situation, there was probably a high chance of verifying the prophecy the owl had just mentioned!

"No way." The expressions of Gao Xuan, Yin Zhengfan, and the others changed.

"Meow, meow, meow?" At this moment, Teacher Ying looked at the owl in shock. Wait, what did this old witch say?

Baby Ginseng that had predicted Shi Yu's pet... would be eaten??

Wait a minute, did the Future Prediction of the Owl feedback its strength every time it succeeded??

Suddenly, the gem cat looked at the Prediction Owl with a strange expression.

At the moment.

Soon, a huge group of Space Worms gathered.

Facing such a huge group of Space Mutant Insects, Rennes and the other contestants of the totem country didn't dare to get too close.

Unscientific Beast Taming

Chapter 974: Time Element (7)

After all, it would be bad if this group of Space Worms targeted them.

"Could it be that that bastard wants to use others to kill us and use the Space Worm to deal with us?" At this moment, the rubber divine tree, Rennes, thought of this possibility and couldn't help but be shocked and furious.

This was clearly their plan.

Shi Yu had actually made the first move.

However, weren't Shi Yu and the others worried about attracting death if they used Baby Ginseng to lure these Space Worms?

At that moment, with the five totem-level Space Worms in the lead, a large number of Space Worms had already gathered here.

However, when they looked at the source of the fragrance that suddenly disappeared, they couldn't help but be extremely irritable.

For the Space Worms that had no rationality and no transcendent power at this moment, although they had all their strength, it was still too difficult to find a ginseng baby that used the power of time and Earth Escape to hide its aura.

Therefore, if used appropriately, this group of Space Worms could indeed be used as a saber to solve many Difficult problems for Baby Ginseng.

However...

When it had the strength to destroy everything, it was very unnecessary to use someone else to kill him.

Just as all the Space Worms were looking for Baby Ginseng, Baby Ginseng suddenly appeared from the ground again.

On the ground, Baby Ginseng condensed wings of light and slowly flew up, looking around.

Moreover, it emitted a shocking fragrance again.

In an instant, the Space Worms rioted.

A hundred-meter-tall starry sky worm that looked like a natural disaster spider with dozens of dragon limbs quickly stepped on the ground and moved in the direction of the fragrance.

Behind it, a large number of Space Worms chased after it.

"Ya!!" Baby Ginseng turned into light wings and turned to run. It flew in the sky and directly exposed itself to the Space Worms.

At the same time, it also exposed itself to the Thunder Crown Rubber Divine Tree and the others.

"Don't fall for it!!!" Seeing this, the expressions of the Genesis Tree God and the others changed.

"That ginseng baby wants you to kill each other through itself. Don't fall for it."

At this moment, anyone with eyes could tell that Baby Ginseng was using itself to lure the enemy to the rubber divine tree.

The various factions were very surprised that Shi Yu, who had displayed invincible strength previously, would actually choose such a strategy.

However, there was nothing he could do.

Without the strength to crush everything, this seemed to be the best strategy.

"I won't be tricked!!!" Seeing this, the Thunder Crown Rubber Divine Tree revealed a disdainful expression and turned to leave first.

However, in the next moment, its expression changed.

A totem-level Space Flying Bug that looked like a shark directly overtook the huge spider at a shocking speed and approached Baby Ginseng.

It opened its huge abyss mouth, wanting to devour Baby Ginseng in one bite.

"Yi!!! (Help!!!)" In the sky, even if Baby Ginseng, who was waving the Wings of Light, used the Time Fruit to step into the overlord level, it still couldn't compare to the speed of the totem-level Space Worm.

It directly shouted for help at the Thunder Crown Rubber Divine Tree in the distance.

Beside it, there were five totem-level Space Worms and dozens of overlord-level Space Worms eyeing it covetously. In this situation, even if it was its biological father or even a contractor, they might not necessarily risk their lives to save Baby Ginseng.

However, under the rapid changes in the expression of the Thunder Crown Rubber Divine Tree, it still suddenly stretched out its huge rubber arm and grabbed Baby Ginseng.

No matter what, it didn't want such a delicious ginseng baby to fall into the mouths of these corpse worms.

However, the Thunder Crown Rubber Divine Tree dared to rely on its strength to stay behind at the last minute, but its allies were so frightened by the insect army that they suddenly retreated.

Because of Baby Ginseng, the Space Worms quickly approached the rubber divine tree, and Baby Ginseng was in the center of the battle between the two parties. The current situation was also extremely bad.

Life and death!

Boom!!!

The vine whip of the Thunder Crown Rubber Divine Tree was close to Baby Ginseng.

But in the next second, what made the Thunder Crown Rubber Divine Tree's gaze explode was that it was still a step slower.

The shark-like Space Flying Bug's sharp mouth had already enveloped the sky above Baby Ginseng.

....

At this moment, neither side could understand the development of this trial at all.

Everyone could basically confirm that the ginseng baby was the main body of the ginseng baby.

At that moment, Baby Ginseng was almost using its life to pull the monsters. However, before the two parties fought, it would die first!

This strategy of sitting back and reaping the benefits didn't seem very proficient.

"Snatch!!!"

The Genesis Tree God, who was still persuading the rubber divine tree not to fall into the trap just now, was immediately extremely anxious when it saw that Baby Ginseng was about to fall into the mouth of the Space Worm.

He cursed at the rubber divine tree, not understanding why its movements were so slow.

"Damn it, faster!!!" The fusion frequency of the rubber divine tree and the contractor had already reached the most intense moment, but their movements were still slower than the Space Worm.

Everyone saw that Baby Ginseng was about to be Devoured by the Space Worm.

The World Tree, the divine beast, the demigod, the Legendaries, and the contestants were all extremely serious.

"Ahhhhh!!!" At this moment, the owl cried out in horror.

It had predicted his friend's death. Bad luck, bad luck, bad luck, bad luck!!!

"What the hell are you shouting for!!" Beside him, the gem cat cursed.

"Just wait for the breakthrough."

When it finished speaking, countless people looked at Baby Ginseng.

It was about to be swallowed, this ginseng baby with extraordinary strength, this ginseng baby that didn't even have a Beast Tamer beside it. It suddenly smiled.

Unscientific Beast Taming

Chapter 975: Time Element (8)

Its aura rose steadily.

Energy Points: 99,990,000

Firstly, the Time Fruit was activated to the maximum.

A terrifying energy wave rose from its body.

This change didn't make the rubber divine tree and the others care. They only felt that the current ginseng baby's aura was even more tempting.

However, in the next moment, as the wood-element ginseng baby's entire body was filled with flames, its aura became strange.

Boom!!!

Energy Points: ???

It directly exceeded 100 million!!

Baby Ginseng, who used the Fire of Life to burn its life force, had its energy level increase instantly. It was even more terrifying than the energy fluctuations on Eleven and Buggy!!

At this moment, it was like an eruption before death, making everyone suddenly look over.

"It burned its life."

"You want to use this to escape???"

Be it divine beasts, demigods, or Legendaries, they discovered Baby Ginseng's power at this moment and suddenly approached the totem with incredulous expressions.

A monarch-level ginseng baby's strength could actually instantly reach the level of a totem. This was simply...

If it was the current power, it might really be able to erupt with stronger speed and escape the Devour of the Space Worm to let the Space Worm and the rubber divine tree meet.

However, what made many experts widen their eyes was that this ginseng baby that suddenly erupted with extremely strong energy didn't want to escape with this power.

Instead...

In the next second.

The energy on Baby Ginseng's body began to expand and explode.

Any creature present was very familiar with this familiar energy wave form change.

Self-destruction.

This ginseng baby actually started to self-destruct!

At this moment, the Black Dragon Juggernaut, the Tyrant Dragon King, and the Genesis Tree God were first stunned. Then, they revealed shocked expressions of disbelief.

The legends of the seven countries, the various divine beasts, and the various totem half-gods had shocked expressions. They couldn't believe the change they were seeing in front of them.

Wait a minute.

Why?

Why did this ginseng baby choose to self-destruct?

It was clearly not in a desperate situation at all.

Using the strength of burning life force, there was still a chance to escape.

After that, it could also replenish its life force through various resources.

In the end, a series of eruptions was just for the current self-destruction?!

[This guy... Could it be... Why...]

At this moment, the one who sensed the most was still the Thunder Crown Rubber Divine Tree near Baby Ginseng.

It looked at the ginseng baby that had become a sun with a shocked expression.

They felt a hot wave coming from afar.

The Space Worms closest to Baby Ginseng were also stunned. Their bodies were purely stiff from the huge energy fluctuations.

Especially the Space Worm that swallowed the ginseng baby. It felt that it had swallowed a hot light ball.

Baby Ginseng's domineering voice came from the light ball.

"Yi!!! (I'm the sun!!!)"

"Yi 1! (Sun and moon shining, explode!!!)"

First, through the super Skill Plant Control that was close to transcendent, it activated his potential to the maximum.

Then, it activated the maximum Time Fruit and the Fire Seed of Life and erupted with all his potential.

In the end, it ignited everything through the Moon Explosion Skill.

The strongest attack.

With a boom, Baby Ginseng fell like the sun. Endless strong light bloomed from the body that swallowed the Space Worm.

The entire body of the Space Worm was directly Devoured by strong light and flames. A terrifying energy wave shook the sky and earth, forming a spreading explosion. Everything in the range of the explosion instantly sublimated.

The entire sky first darkened. With a loud bang, it created a world that belonged to the night, changing the entire barrier phenomenon.

The dark sky and bright night moon made everything silent.

Right on the heels of that, a dazzling sun slowly rose and lingered with the moon.

Under the alternation of the sun and moon.

Boom!!!

The wave of the Moon Explosion swept out again.

Endless strong light spread in the surroundings. At this moment, the bodies of the nearby Space Worms suffered a destructive attack.

The rubber divine tree, which was relatively close, felt the fatal heat wave, and its eyes were still filled with an incomprehensible expression.

"Fire..." As it retreated crazily, the shocking flames in front of it still instantly arrived.

"What exactly is this..." At this moment, it still didn't understand what had just happened.

At the same time, they didn't understand why a monarch-level ginseng baby could release such a powerful wave when it self-destructed.

"I'm not eating anymore, I'm not eating anymore. Let me go..."

As it shouted in despair, its body gradually disappeared.

The group of Space Worms was undoubtedly instantly swallowed by the light.

The overlord-level Space Worms were almost instantly gone, and the totem-level Space Worms were also encountering an unprecedented impact according to their physiques.

As for the contestants from the totem countries who had left the battlefield at the start, they were still fleeing, but the huge explosion that inexplicably swept up from behind directly made them tremble to the extreme!!

They had no idea what was going on over there.

At this moment, their shocking desire to live made them accelerate again and escape into the distance with all their might.

However, the explosion spread even faster!

The light of the explosion directly enveloped most of the trial barrier with Baby Ginseng as the center. The destructive power caused by it completely destroyed everything in a breath.

The speed of the totem country contestants was not enough for them to escape such a powerful explosion. They were almost the batch of creatures who lost their lives the most pointlessly.

Unscientific Beast Taming

Chapter 976: Time Element (9)

At this moment, as the trial barrier created by the Eternal Divine Tree was enveloped in light, many gods opened their mouths wide. Many demigods watched all of this in shock, and the legends of the seven countries were even more stunned. They finally knew what Divine Source Legendary meant.

Self-destruction.

It was comparable to the self-destruction of a totem-level mechanical life form!!

This was the power of the top-notch forbidden weapon below divine restrictions!!!

Why!!

In the outside world.

The scene inside the trial barrier was extremely spectacular.

Cracks appeared on the trial barrier near the center of the explosion as an energy wave swept past.

When a deafening voice sounded, the energy barrier of the trial barrier directly collapsed. The flying energy light instantly filled the entire sky.

The nearby totems and overlords were shocked, their hearts almost jumping out.

At this moment, the entire island could see the huge explosive energy phantom that filled the sky in the barrier.

It was a white energy body that looked like a ginseng baby. It seemed to be ten thousand meters tall. It opened its round arms and had already broken through the barrier, as if it was hugging the sun and moon in the starry sky. It was very happy.

It was happy, but the audience was shocked by it. They were very shocked, and their ears didn't work.

"Lunatic!!! Lunatic!! Lunatic!!!"

At that moment, the demigod led by the Genesis Tree God shouted crazily.

It knew that it was definitely impossible for the rubber divine tree to survive this attack when it was weak to fire.

They felt that Shi Yu and that ginseng baby were crazy.

He didn't expect Shi Yu and the others to actually have such a self-destruction sure-kill skill.

Moreover, he actually sacrificed its life to obtain the divine inheritance for the Eternal Flower.

No wonder Shi Yu disappeared in advance. So he had run away.

However, was it really worth sacrificing a ginseng baby comparable to a divine-level resource for the Eternal Flower?

At this moment, the Genesis Tree God, the Black Dragon Juggernaut, and the Tyrant Dragon King also felt a sense of fear. They weren't afraid of enemies with extremely high potential, but they were afraid of such lunatics with extremely high potential.

For a divine-level resource, Shi Yu could sacrifice his pet. What else couldn't he do??

At that moment, everyone was stunned by the self-destruction strategy Shi Yu chose.

The strong wind of the explosion spread crazily. At a speed of hundreds of meters per second, it quickly affected the entire barrier, causing damage of different scales.

Although the destructive power caused continued to weaken, it instantly made the entire trial barrier into a mess. There were no longer any plants.

As the light dissipated, the participants of the totem country were clearly all extinct.

The overlord-level Space Worms was already gone.

There was only a huge totem incomplete corpse and four huge cosmic worms that only had the slightest life aura left, but they also looked miserable. They were relatively intact on the charred ground.

It self-destructed, killed two totems, and heavily injured four totems, causing them to fall into a near-death state.

After countless Space Worms died, life essence that filled the sky floated in the air.

Such a huge life essence made many spectators outside widen their eyes.

However, what shocked them even more was that a figure was standing on the charred ground like the totem corpses.

Who else could that figure be but Shi Yu?

Under the chaotic energy tide, Shi Yu's short black hair fluttered. He looked up at the corpses and the life essence that filled the sky and revealed a satisfied expression.

At the same time.

The Time Mark was activated.

Under the gathering of the power of time, under the stunned expressions of all the Legendary, demigod, and divine beasts, a seemingly unscathed ginseng baby with a hexagram of time flowing in its eyes gathered in the sky again.

Its petals ignited with the rich flames of life. It was in an excellent state, and its pupils were filled with invincibility.

"Yi." Then, it gently landed on Shi Yu's shoulder and looked at the life essence that filled the sky with him.

At this moment, the eyes of the originally shocked Black Dragon Juggernaut, the Genesis Tree God, and the other half-gods almost popped out.

It wasn't just them. At this moment, no matter who it was, they couldn't accept that Baby Ginseng, who had just self-destructed and used its life as the price to unleash the Resplendent Strike, was actually unscathed at this moment. It appeared on Shi Yu's shoulder again without any effect.

If that attack didn't self-destruct at the cost of his life, how could it have such strong destructive power?

Those were six totems and dozens of top-notch overlords!!!

"Impossible, definitely impossible!!!" The Genesis Tree God shouted in shock. The Tyrant Dragon King's face was filled with disbelief.

As for the divine beasts, they also looked at Shi Yu and the others in the barrier in disbelief. They knew very well what had happened just now!!!

"Time Skill."

"After it self-destructed and died, it used a time-element Skill to reverse life and death and completed its revival!!!"

In the sky, the Boar God said in shock. Revival-type time Skill. Even if this skill was only super, its rarity far exceeded most divine skills. How could it appear on a ginseng baby!!

"Time Revival Skill???"

At this moment, as the Boar God was shocked, the entire Inatella looked at Shi Yu and Baby Ginseng in the center of the self-destruction with an extremely incredulous gaze.

It was difficult to accept and unbelievable.

There was such a Skill???

Even Emperor Shi's pet had never heard of a time-element revival skill.

How could this Beast Tamer, this ginseng baby...

At this moment, the contestants of the seven countries seemed to know what the life-and-death crisis their Legendary mentioned was.

That wasn't from the Space Worm or the totem country at all.

It came from Shi Yu, a demon who often used death as the price to let monarch-level pets self-destruct and destroy totems!!

He was a monster.

As for Shi Yu, he sensed the gazes of the entire island and understood that Baby Ginseng's time mark had been completely exposed.

However, it wasn't a big problem.

This kind of thing was the same as the Undying Fruit. If it was said, it might make the enemy more afraid.

He couldn't help but raise his head and look at the Boar God and the other gods in the sky. "As expected of Lord Boar God."

"My ginseng baby has indeed mastered a time-type revival Skill. It can revive itself countless times after self-destruction." Shi Yu smiled.

As Shi Yu finished speaking, the entire island trembled.

The pupils of the totems and overlords who still wanted to eat the ginseng baby constricted and they suddenly shut their mouths.

However, in the next moment, what shocked the entire island was...

Not only did strong time fluctuations come from the trial barrier just now.

At this moment, in the direction of Dong Huang, a blue owl suddenly rose steadily in confusion...

"Lord Owl..." The teachers and students of Imperial Capital University suddenly looked at it.

At this moment, the most stunned was still the owl cat. After being stunned, it laughed with tears in its eyes.

"Today, I, a time-element overlord, advance to the totem realm!!!"

"As expected of me!!!"

At this moment, the factions on the entire island were even more stunned. Dong Huang... had another time-element totem?!

[Unscientific Beast Taming](#)

Chapter 977: A Lot of Resources

Time element was known as the rarest attribute.

Even if the main Stats weren't time-element, as long as the secondary Stats contained the nature of time, a Skill could easily become the skill of the strongest tier of Stats.

It was like the Heavenly Frost Cold Energy that froze time...

It was because of this skill that the frost dragon could easily live for more than two thousand years at the overlord level, still like a virgin.

Just time-element Skills were already so powerful, and pets with time-element and time talent were even harder to find. It was as difficult as ascending to the heavens.

For example, in this world competition, among the more than a hundred factions, apart from Baby Ginseng, no transcendent life form's own Stats were time-element.

On Dong Huang's side, a ginseng baby that had mastered a time-element revival skill and a totem-level time-element life form suddenly appeared. How could the totem country not be shocked?

Boom!!!

A huge aura bloomed from the Prediction Owl. The gem cat beside it bit its handkerchief and felt sour.

Back then, when it broke through to the totem level... it had accumulated decades of savings and had to face the threat of the totem before barely breaking through.

In the end, this hooligan inexplicably relied on Future Prediction to break through and become a totem. It really made the cat unhappy.

Fortunately, after obtaining the nine-colored divine light, it was a cat of another level. It was fine if the owl in front of it broke through.

"Holy shit."

The situation at Imperial Capital University also shocked Dragon Palace City, especially the frost dragon.

What was going on...

Why was it that someone in the audience had broken through while Shi Yu was fighting to the death?

Logically speaking, shouldn't Shi Yu and the others break through after farming monsters and obtaining a large amount of EXP?

"Totem level!!!"

As the owl's aura suddenly increased, countless gazes looked at it.

A moment later, the imposing Prediction Owl opened its eyes, and the power of the totem was undoubtedly displayed.

"Why do I feel that its aura is even weaker than my aura after breaking through?"

At the side, the gem cat's surprised voice came.

Prediction Owl: ???

"Grandma, I'm not a battle-type pet!" the Prediction Owl shouted.

The totem countries did not react to the fact that the totem aura of the Prediction Owl was not strong.

They were still secretly shocked.

This was very normal.

It could be said that even if a time element appeared, its other aspects would be restricted because its ability was too BUG-like.

For example, the price of the Time Sprite mastering a divine skill like Space-time Travel was that its strength couldn't be too strong, or it would interfere with the Space-time Law.

For example, the Prediction Owl had mastered a time-element Skill like Future Prediction. Apart from that, it didn't have any other powerful attack methods.

It could only rely on Future Prediction to predict battles. It was almost impossible to destroy a city with a big move.

In the past few thousand years, be it the seven countries or the totem country, there seemed to be only one expert who could use the time element to explosive battle power.

Dong Huang's first Legendary Emperor, Emperor Shi.

Only his time-element pet really displayed the power of time.

Pioneers were often the most difficult. As the first legendary Beast Tamer to establish the human countries, the predicament Emperor Shi faced at that time was far more difficult than the other emperors. However, he still swept through the east. Among them, the contribution of the time element could not be said to be small.

As for the future... Even a powerful legend with time talent like the first principal of the Imperial Capital University only had a thing like the Prediction Owl.

However, these were all in the past.

Although the owl's aura had decreased, many gazes swallowed their saliva again and looked at the messy trial barrier.

Most people didn't expect that this pet that looked like a "ginseng baby" actually had a time element!!

At the moment, people could only call it Baby Ginseng.

Its race definitely couldn't be a ginseng baby.

Which ginseng baby's ginseng flower could ignite all its life flames like the Sun Flower?

Which ginseng baby's green eyes could have the pattern of a time hexagram?

Obviously, this was also a monster wearing a supplement race as sheepskin!!

Everyone could actually accept that such a race had mutated and evolved into a time-element race. After all, it was nothing for the time-element to give a supplement race.

However, what made everyone's teeth hurt was that the explosive skills of this supplement race were ridiculously high!

Moreover, it had mastered the self-destruction skill!

After a monarch-level pet in its initial state self-destructed, its power was actually comparable to the self-destruction of a totem-level life form? Was this reasonable?

"How exactly did he train the pet!"

Even the ancient senior, Ji Mengzhu, who had seen Shi Yu blow up a totem with her own eyes, couldn't help but be stunned again.

They felt that the power of this self-destruction was even greater than that time.

In the trial barrier, Shi Yu and the others were also very satisfied with the power of the self-destruction.

He felt that the Skill wasn't for nothing.

The Fire of Life that was close to perfect proficiency, plant control that was close to transcendent proficiency... This was the fundamental reason why Baby Ginseng's self-destruction power was comparable to the self-destruction of a totem-level life form!

At that moment, Baby Ginseng completely modified itself into the strongest forbidden weapon.

Hu hu hu...

Under the energy tide, Shi Yu and Baby Ginseng were between a pile of huge corpses.

Life essence floated in the sky.

These were all condensed by the Space Worms that had been modified by the Eternal Divine Tree.

"Tough."

At this moment, Shi Yu revealed a difficult expression in the face of so many nutrients.

[Unscientific Beast Taming](#)

Chapter 978: A Lot of Resources (2)

The energy of this life essence that filled the sky was huge.

But he didn't know if he should absorb it or not.

After absorbing this, with Baby Ginseng's current situation, it would definitely break through to the overlord level like absorbing Legendary resources.

In fact, even overlords couldn't withstand it.

There was the life essence condensed by five totem-level Space Worms here. After absorbing their life essence, there was a high chance that Baby Ginseng would leap into the totem level.

At that time, Shi Yu would definitely explode.

If he had known, he would have brought his senior in too.

This way, with her sharing some of the burden, it shouldn't be a problem for her monarch-level Imperial Concubine Flower to be strengthened to the invincible overlord level.

"Wait, maybe we can pack it up and take it away."

Shi Yu looked at the EXP filling the sky and fell into deep thought.

"Lord Eternal Divine Tree." Shi Yu looked in the direction of the Eternal Divine Tree through the broken barrier and asked, "Excuse me, can I not absorb these first and takeaway?"

The Eternal Divine Tree was silent.

Motherf*cker...

This was like asking if he could pack up if he ate a buffet.

Be a human.

The Boar God, Xuan Ming, Demon King Dragon, and the others were silent.

Damn, what was wrong with this kid?

They were originally looking forward to this trial.

Looked forward to the future's creatures being killed by the Space Worms and chased after by them.

Although these Space Worms were only small soldiers, in their opinion, they were more than enough to deal with these guys.

Even if that totem tree could resist the overlord-level Space Worm, it was definitely not its match if it fought the totem-level Space Worm.

However, to the surprise of many gods, the trial ended not long after it started.

With the help of the self-destruction and time-element revival Skill, Shi Yu, along with the cultivators, directly wiped out all the targets!!

This was a situation that these gods didn't expect before the trial began!!

"Up to you."

At this moment, the Eternal Divine Tree didn't want to say anything at all. It even regretted taking out so many Space Worms.

As a result, at this moment, it could only watch helplessly as that ginseng baby used plant control to create a huge tree.

"Yi!!" Baby Ginseng pressed its palms together and bowed gratefully in the direction of the Eternal Divine Tree.

Thank you for the big meal, Grandma Eternal Divine Tree.

It packed it up and took it away.

These things... If they could be packed, Shi Yu and Baby Ginseng would be overjoyed.

It could be sensed that this life essence was very nourishing, especially for life force.

What did this mean?

After collecting it, Shi Yu had supplements that added points to quasi-divine skills and supplements that fused skills!!

Boom!!!

The huge tree began to absorb the life essence that filled the sky. Green fruits grew from the huge tree.

Plant Control+Mutated Fruit+Nutrition!

"Baby Ginseng, finish him off."

At the same time, Shi Yu didn't forget to let Baby Ginseng completely kill the four cosmic worms that hadn't been completely blown up.

The physical strength of this group of Space Worms was still strong.

Shi Yu felt that the physical strength of some totem-level Space Worms was almost catching up to Buggy and Eleven.

This was very rare among totems.

After all, totems like the cat might not even have one-tenth of Eleven and the others' physical strength.

Buzz!!

Fruits condensed one after another.

"Yi... (Die.)"

At the same time, Baby Ginseng attacked the totem worms that weren't completely dead.

The physiques of these totem worms were very strong, and when they were in perfect condition, it might not necessarily be able to break through their defense even if they were attacked by the form of ginseng baby's Time Fruit. Now that they had almost exploded, it was easier to sprinkle salt on their injuries.

Baby Ginseng only let countless branches spread out of the huge tree and stab into their bodies in the time state. Then, it easily ended their life activity through nutrient plunder and absorbed life nutrients.

At this moment, all the contestants of the totem country looked at the trial barrier with fear.

The brains of the few totem country contestants who realized the danger and withdrew from the competition at the last minute rumbled. Their faces were pale and they were filled with lingering fear.

Looking at the tragic situation in the trial barrier, they couldn't help but be afraid. All the overlords weren't even left with dregs.

Even at the totem level, two had been blown up. The four that barely survived were also experiencing miserable slaughter.

So scary...

If they had any hope at that time, they would probably have become a wisp of soul.

"Not bad."

At this moment, as more and more fruits condensed, Shi Yu became happier and happier.

The life essence condensed by every overlord-level Space Worm was comparable to a level-eight resource of Legendary quality, and the life essence condensed by the totem-level Space Worm was completely equivalent to a Legendary resource.

Therefore, Baby Ginseng's explosion directly exploded five Legendary resources and more than 40 quasi Legendary resources.

If he included the Eternal Flower gifted by the Eternal Divine Tree later...

Shi Yu thought for a moment. After researching it, he would definitely eat the Eternal Flower.

This way, his physique would be further strengthened. Then, it would be easier to add some quasi-divine skills.

This trial could be said to have completely blown up all the supplements Shi Yu might need to add some quasi-divine skills next.

This was more like it.

Shi Yu felt that this was the correct way to self-destruct.

There had to be benefits!

It could be imagined that after he accepted the Blessing of the World Tree and broke through to the legend level, he could directly use these supplements to complete a huge increase in strength first.

Unscientific Beast Taming

Chapter 979: A Lot of Resources (3)

The foundation for adding points had increased.

After that, he could be a heartless adding machine.

At that time, his strength would be passable. He was still a little lacking now. Shi Yu looked outside, as if he wanted to look at the Black Dragon Juggernaut, the Tyrant Dragon King, and the Genesis Tree God who had ill intentions towards him through the Void.

For the time being, he definitely couldn't defeat them...

"Damn it."

When it met Shi Yu's gaze, the Genesis Tree God's heart skipped a beat and it was shocked.

As a nine-lives demigod, he was actually frightened by a level-six Beast Tamer.

"Berserk Dragon King, Black Dragon Juggernaut!!!"

At this moment, the most furious was still the Genesis Tree God. It was extremely regretful in its heart and didn't understand why it had boarded the pirate ship of these two dragons.

Shi Yu had clearly displayed so much unscientific battle power previously, so why did it still have to rely on luck?

It didn't feel that the rubber divine tree was dead, but it was worried that Shi Yu would target the origin place because of this. The potential and strength Shi Yu had displayed so far were enough to make them demigods afraid.

The stronger one was, the more afraid they were of death.

Moreover, the opportunity to revive the Mythical stage was right in front of them.

Without the divine inheritance, the World Tree Blessing would definitely be out of reach. They even offended such a monster. It was a complete double loss.

It was so silly, really...

"Roar!!!" The Black Dragon Juggernaut directly hid in a deeper space. The Tyrant Dragon King even looked at Shi Yu's figure with a wavering gaze.

It completely didn't expect that at this point, it still couldn't affect Shi Yu at all.

"Now, no one can stop him at all." The Tyrant Dragon King's pupils constricted. It felt that it was even harder for it to affect Shi Yu under the multiple protections of Dragon Palace City and Dong Huang.

The champion of the World Tournament would most likely be Shi Yu.

Was there a need to continue this world competition???

The two greatest favorites to win the championship, the totem-level contestants, were directly killed before they could last until the main competition.

Dead before they could win the competition.

At the thought of its carefully cultivated descendant dying in Shi Yu's hands just like that, at the thought that Shi Yu was the culprit behind snatching its believers, the Tyrant Dragon King found it unbearable.

It really wanted to transmigrate back to ten years ago and kill Shi Yu in his child form in advance.

Of course, those totem countries that had listened to the bewitchment of the Black Dragon Juggernaut and the Tyrant Dragon King but didn't have their origins turned pale when they saw their contestants die tragically...

At this moment, when many contestants from the totem country saw Shi Yu, their legs had already gone weak. Even the trump cards of demigod factions like the Dark Night Forest and the Demon Kingdom had pale expressions. They had no idea how to participate in the next world competition.

Infinite self-destruction revival and meteorite falling from the sky, what was the point of fighting?

This wasn't even counting the ridiculous Blue Sea Sprite and Shi Yu himself, who was also terrifyingly strong after possession!

Moreover, how could the Wind Kirin of the Mythical Race be weak?

Didn't they see that a wind of luck made the divine beast bleed slightly?

If it was said that the various countries still had hope previously, but at this moment, when they saw Shi Yu kill two totems in succession in an instant, they were completely afraid!!

They felt that this world competition wasn't f*cking for overlords to participate in!

Only at the totem level would there be an admission ticket.

Moreover, there was a high chance of being insta-killed by passing monsters. What the hell!

At this moment, the corners of the mouths of the demigods of the totem countries and the legends of the human countries twitched. Their hearts trembled. Not only were their citizens stunned, but they also found it very difficult to accept.

They didn't understand why Dong Huang had such a monster. Why was every pet of Shi Yu so strange!!

At that moment, if there was anyone who was more excited and wanted to fight Shi Yu, it was probably the Golden Bull God.

At this moment, the Golden Bull God's gaze was burning. Initially, it was still worried that the Green Dragon's meteorite wouldn't be able to satisfy it in the subsequent trial, but if this self-destruction that contained the power of fire and light was included... It felt that its blood was already boiling.

As expected.

It looked at Shi Yu. This person should be the one who could let it fight to its heart's content after waking up.

At the thought of Shi Yu's strength, the Golden Bull God couldn't help but stretch its muscles.

A moment later, Shi Yu finished collecting all the Fruits of Life.

He brought Baby Ginseng out of the barrier politely and looked at the Eternal Divine Tree.

"..." The corners of the Demon King Dragon's mouth twitched. It didn't expect that the sixth trial would still be taken by Shi Yu.

This made it feel that the seventh one was most likely still Shi Yu. No, or rather, among them, only Shi Yu could make that cow acknowledge him.

"Take it."

"Your performance... is not bad..."

Looking at the messy trial, the Eternal Divine Tree took out a seven-colored Eternal Flower that contained strong life force and threw it at Shi Yu.

"Thank you."

Buzz.

When the Eternal Flower landed in Shi Yu's hand, Shi Yu immediately felt comfortable.

Eat it and its lifespan would immediately increase by 10,000 years!

One had life force comparable to a divine level.

One would never Decrepify and maintain its peak state.

However, he only wanted to know if the eternal power of this divine-level resource could offset the additional points of the divine skill?

[**Unscientific Beast Taming**](#)

Chapter 980: Ancient God Golden Bull (1)

"Hey, hey, hey, isn't it my turn next?"

After the Eternal Flower landed in Shi Yu's hand, the Golden Bull God in the sky could no longer hold it in.

It was a battle ancient god to begin with. The moment the World Tree woke it up and asked it to undergo the trial, Ancient God Golden Bull had already thought about it.

It would personally fight the creatures of the future and see how far they could please him!

It stood in the sky, its eyes burning with flames.

At this moment.

Many factions suddenly looked at the Golden Bull God, still recovering from the shock brought by Shi Yu just now.

So there was another trial...

Dark clouds lingered above the heads of many factions. At this moment, they were no longer interested in this trial.

It felt like it was prepared for Shi Yu again.

What was the Golden Bull God's trial again?

It seemed like... it wanted to fight and wanted the participant to please it?

In other words, it was still a battle of battle power...

Many factions actually didn't doubt Ancient God Golden Bull's strength.

This was because Western archeologists had once archeologically cracked a ruin from the Mythical Era.

This Mythical Ruins was built by the followers of Ancient God Golden Bull.

It recorded Ancient God Golden Bull's powerful battle results.

Ancient God Golden Bull had once attacked a god with a non-divine body.

It had never stopped fighting and liked to fight. After entering the God Realm, he even had the battle record of defeating dozens of gods.

He was a real powerhouse.

Therefore, the West called it the battle ancient god.

Facing such a god, even invincible overlords like the Fallen Angel couldn't imagine how they could please this god better than self-destructing and meteorites.

The World Tree clone also looked at Ancient God Golden Bull with a headache.

The other gods knew that they were weak now and recuperated obediently.

This Ancient God Golden Bull was still so stubborn.

However, the World Tree clone knew a lot about Ancient God Golden Bull's talent and strength.

It should be considered a god ranked in the first tier of divine beasts left on Blue Planet at its peak.

Although it was still inferior to those top-notch gods who had left Blue Planet, it was considered one of the best among the new gods.

At this moment, everyone looked at Ancient God Golden Bull, who had erupted with might, and looked at Shi Yu.

It was obvious that Shi Yu would definitely participate in this trial.

A battle with Ancient God Golden Bull.

With the exaggerated performance of the meteorite and self-destruction, it could definitely make this Ancient God Golden Bull happy.

After all, Ancient God Golden Bull himself had said just now that his hand was itching to smash a few meteorites to warm up.

Presumably, it had already targeted Shi Yu.

As for Ancient God Golden Bull's words, no one doubted it.

After all, it was a battle ancient god that had stepped into the God Realm.

Not to mention a divine-level, even if it was a demigod who had mastered a quasi-divine skill, they wouldn't be afraid of Shi Yu's Green Dragon and Baby Ginseng if they suppressed them to the same level and relied on their Skill proficiency.

Perhaps, through Ancient God Golden Bull's trial, they could see Shi Yu's limit...

The Black Dragon Juggernaut and the other demigods thought with deep gazes.

At this moment, Ancient God Golden Bull indeed passed by the figures of the other contestants and landed his gaze on Shi Yu.

"Human, you definitely won't miss my trial, right?"

"I look forward to fighting you."

"However, you've fought consecutively several times just now. I'll give you some rest."

"When the rest is over, you can fight me again!"

"Actually, there's no need to rest..." Shi Yu looked up at Ancient God Golden Bull and said, "The battle just now didn't consume much of our strength. "

"Since Lord Divine Spirit wants to fight, let's fight directly."

Everyone: "?"

Human language???

After dealing with two totems in a row, he said that there was no consumption?

"Little brat, just rest if I tell you to. Why are you talking so much nonsense!!" At this moment, when he heard Shi Yu's words, Ancient God Golden Bull frowned and said.

It was rare to encounter a good opponent. It didn't want to be unable to fight Shi Yu at his peak.

In that case, it would feel unhappy.

Shi Yu: ...

There was really no need.

The moves Buggy used were saved in advance. After Baby Ginseng revived, it was immediately full.

Most importantly, Shi Yu had no intention of letting Buggy and Baby Ginseng fight.

However, Ancient God Golden Bull didn't agree with this.

At this moment, the Golden Bull Ancient God forcefully let Shi Yu rest, and its gaze landed on the countless invincible overlord contestants present.

For example, the Dark Elven Prince of the Dark Night Forest, the Fallen Angel Prince of the Demon Kingdom.

Its voice was like a furnace. "Although you're a little weak, you can make do."

"Come and warm up with me first."

"What?" Upon hearing that, the dark elven prince, the fallen angel prince, and the others felt extremely humiliated.

He paid special attention to Shi Yu and regarded him as a key opponent. In the eyes of the Ancient God Golden Bull, they could only be considered warm-up tools.

This was simply too much.

"Stop dawdling."

"You're all overlords, right?"

"I've suppressed my level to the monarch level. If you can force me into a disadvantage in this state, you can tell me what you want," Ancient God Golden Bull grinned and said domineeringly.

Upon hearing that, the expressions of the Dark Elven Prince, the Fallen Angel Prince, and the other contestants changed again.

...

At that moment, the trial had already reached the last round. Shi Yu was chased out by the Ancient God Golden Bull to rest. It pulled the Dark Elven Prince, the Fallen Angel Prince, and the other contestants to warm up.

At this point, it was no longer difficult for many factions to determine that the final inheritance of Ancient God Golden Bull was definitely still given to Shi Yu.

After all, everyone had seen Shi Yu's strength. He should be the strongest among all the contestants at the moment.

This made the various factions very helpless. At the same time, they wanted to know how the World Tree would arrange the next world competition. Was there a need to fight?

"Shi Yu, well done."

"And Baby Ginseng too."

After Shi Yu returned to Dong Huang, President Lin, the gem cat, and the others were extremely excited.

The power of Baby Ginseng's self-destruction was simply too strong.

Even the barrier known to the Eternal Divine Tree almost shattered completely.

"Rest well. As long as we fight that Ancient God Golden Bull again, the trial will all be over," President Lin said excitedly.

The seven trial inheritances had all fallen into Dong Huang's hands. Who else was left!

"Alright." Shi Yu smiled and said, "So be it. I can take this opportunity to see Ancient God Golden Bull's strength."

Ye Xing, Divine Bell, Zheng Hai, and the others had complicated expressions.

Was it still necessary?

No matter how strong it was, the other contestants were definitely not as strong as it.

In the end, the trial inheritance would definitely still be his!

Among them, only President Lin noticed the fighting spirit that also rose in Shi Yu.

He was suddenly stunned. "Shi Yu..."

"Don't tell me you're here to see its strength with the intention of defeating Ancient God Golden Bull?"

President Lin's words shocked the surrounding Tyrannical Sea Legend, the gem cat, Ye Xing, Divine Bell, and the others.

Wait a minute, what did President Lin say?

Shi Yu wanted to defeat this god?

What a joke.

That was a god.

Even a demigod was an unreachable existence.

That was a god!

Their expressions changed drastically as they looked at President Lin in disbelief, not understanding why he said that.

Although Shi Yu's Green Dragon and Baby Ginseng were very strong, it wasn't enough, right?

The power of the Green Dragon's meteorite made those gods block it very easily. Although Baby Ginseng's self-destruction had broken the barrier, that barrier was probably only one of the many insignificant methods of the Eternal Divine Tree.

They had yet to show their true divine skills.

As a battle ancient god, the Golden Bull God definitely had a supreme battle divine skill that exceeded all creatures in the modern world.

It was impossible to defeat.

In fact, being able to injure the Ancient God Golden Bull a little should be a huge achievement.

"President Lin, how do you know?" Shi Yu was extremely surprised. "You've also seen it. Because those gods have slept for billions of years, in addition to the incomplete laws of the world, their states are very weak."

"The divine skill must have been suppressed and become a quasi-divine skill."

"It should only be equivalent to a Mythical Race at the overlord level..."

"Lord Lie Shan was even affected by the Wind Kirin's luck skill."

"If we really fight, their current strength might not necessarily be comparable to demigods."

"Perhaps..."

This was crazy!

At this moment, Ye Xing, Divine Bell, and the others felt that Shi Yu was crazy.

Zou Yun, Gao Xuan, Ji Feng, and the others widened their eyes and looked at Shi Yu, who was analyzing seriously, in disbelief.

What did this kid say? He... really wanted to defeat a god?

And using the current strength of the gods might not necessarily be better than demigods to prove the possibility of victory?

What a joke!!

"Hahahaha!!!"

At the same time, on the battlefield, the Dark Elven Prince, who was pulled up by the Ancient God Golden Bull first, was receiving a miserable beating.

The huge Ancient God Golden Bull turned into the form of a bullman. Its entire body was like burning metal water, and its muscles were ferocious.

Golden light wrapped around its body. As an invincible overlord, the super profundities of the Dark Elven Prince landed on the Golden Bull God that suppressed its strength at the monarch level, but it actually didn't cause any damage at all.

However, on the contrary, the Golden Bull Ancient God only slapped out with a golden palm. The shockwave produced by the huge golden light instantly seemed to be spatial vibration, ravaging the dark elven prince's body until it was riddled with holes, making its pupils turn white and its body broken. It directly smashed into the ground and created a huge pit!!

"How is it?"

"My Metal Control Divine Body."

"This is even without activating the power of the natural order. Why did you fall before I even used any strength?"

"Ugh..." In the huge pit, the dark elven prince spat out blood crazily, shocked.

When this scene fell into the eyes of all the spectators, they could only have stunned expressions and doubt the authenticity of Ancient God Golden Bull's words.

Suppressing strength to the monarch level?

Monarch level... Facing the big move of an invincible overlord, nothing happened. In fact, it could heavily injure an invincible overlord in one hit??

Plop.

At that moment, as the Dark Elven Prince was flattened by the Golden Bull Ancient God's palm, the legendary human Beast Tamer in charge of strengthening the Dark Elven Prince not far away saw the gaze of the Golden Bull Ancient God and his expression immediately froze. He sat on the ground.

"No, don't kill me..."

"So weak." At this moment, Ancient God Golden Bull exercised his fists and feet in boredom, very dissatisfied with the strength of the Dark Elven Prince.

At this moment, everyone finally understood why the Ancient God Golden Bull could still show a calm expression in the face of such a meteorite and self-destruction.

Monster-like strength...

Even if it was suppressed to the monarch level, it could still defeat invincible overlords.

"Golden Bull, you're too much of a bully." In midair, Lie Shanjun, Boar God, Xuan Ming, and the other gods couldn't help but say.

"He even used the prototype skill of a divine skill."

The Metal Control Divine Body was the prototype skill of the divine body skill mastered by the Golden Bull Ancient God.

It was similar to the nine-colored divine light of the Holy Divine Deer.

It could be said to be the strongest skill below the Golden Bull Ancient God Divine Skill.

It had an indestructible attribute and an invincible attack damage ability.

It could be said that it was the metal-element physique Skill closest to the metal law.

"Sorry, I don't have the habit of using other skills. I've dedicated all my cultivation to this body of mine."
The Golden Bull Ancient God grinned and said, "That's why I suppressed my level to the monarch level."

"I've already taken good care of these little brats."

"Next." Ancient God Golden Bull laughed and looked in the direction of the Demon Kingdom, at the pale Fallen Angel.

"Kids, don't be afraid."

"If you can't even defeat me in this state, how can you face the future crisis?"

"How about this? Be it a stronger state or a divine skill, as long as you can force one out of me, you win.
Come on!"

In the face of Ancient God Golden Bull's challenge, the invincible overlords of the totem factions took a step back with wary expressions. Get lost!! This was clearly bullying!!
