

## Beast Tamer 100

### Chapter 100: Fang Mu's Big Harvest!\_I

One could say that during this period, Fang Mu was most anxious about the condensation of the Covenant Blood Essence.

If the Covenant Blood Essence is not condensed, Fang Mu would not be able to form contracts with the Descendant Star Messenger and Eden Greenfield, thereby enhancing his strength.

But now, with the increase in blood injection into the Blood of Abundance...

Fang Mu could shorten the condensation period of the Covenant Blood Essence.

Previously, Fang Mu was constantly using Needle Mosquitoes with a Blood Pouch scale of a hundred milliliters.

Now, Fang Mu needed to replace them with a new batch of Needle Mosquitoes with larger Blood Pouch capacity.

As usual, after giving blood, Fang Mu made himself a cup of Blood Replenishing Tea.

While sipping his Blood Replenishing Tea, Fang Mu was pondering what kind of frog life soul and cicada life soul to choose, to match the Ling Poison Dark Lotus.

Then, he heard a sucking sound in his ear.

"Fang Mu, Su Su has finished absorbing the delicious food you gave me!" "Fang Mu! Fang Mu! Su Su really likes these snacks it's never eaten before!" Fang Mu reached out to pinch Su Su's handle and said with a smile.

"Su Su, as long as you quickly enhance your strength, become stronger and stronger..."

“Then the level and quality of the food you eat will naturally be upgraded!” Hearing Fang Mu’s words, Su Su was overjoyed!

Using gears, it kept simulating laughter, expressing its emotion to Fang Mu with no reservation.

It ran around the entire factory with Fang Mu after being excited, finally calming down.

Fang Mu sighed softly.

He and Su Su truly were two foodies! The only difference was that Su Su was picky, but he was not!

As usual, Fang Mu took out the Bronze Spirit Artifact Fragments to give Su Su a meal supplement.

It was quite interesting when Su Su ate these Bronze Spirit Artifact Fragments. It deliberately ate the lower-grade bronze spirit artifact fragments first.

Then it reserved the higher-grade bronze spirit artifact fragments, hesitating to eat them at the end!

It was very much like Fang Yuan in Fang Mu’s childhood impression.

Only Su Su can enjoy the feast that has been purposely saved until the end, but most of what Fang Yuan had saved was secretly eaten by Yan Wood!

Fang Yan, in her childhood, was even more mischievous than most boys!

While Su Su was eating these Bronze Spirit Artifact Fragments, Fang Mu cleaned up Su Su’s storage space for various crystals.

After picking up the single hundred -percent purity Water Element Crystals,...

Fang Mu fed all the Toxic System Crystals to the just summoned Clean Water Spirit.

Su Su purified a special toxin crystal from absorbing the venom sac of the Black Nightmare Snake, named the “Poison Crystals (Cell Toxin)”.

“Poison Crystals (Cell Toxin)”: A toxin specifically designed for a designated cell (lymphocyte). Once the designated cell is infected with this toxin, it will lose its original effect and experience necrosis!

Fang Mu was not surprised by the name of this Toxic System Crystal.

Lymphocytes are one type of immune cell in the body, so being called a Cell Toxin is fitting.

Looking at the pure milky white Toxic System Crystal, Fang Mu could anticipate how many nightmares the Clean Water Spirit would become for countless Guardian Beasts!

Some Guardian Beasts have strong resistance to toxins. This does not mean that toxins have no effect on these Guardian Beasts.

Because they can use their strong immunity to resist the toxin’s damage to themselves.

These types of Guardian Beasts are usually referred to by Beast Masters as “Toxin Nemesis”.

But after the Clean Water Spirit absorbed the “Poison Crystal (Cell Toxin)”.

These so-called “Toxin Nemesis” Guardian Beasts will no longer be able to resist the toxins of the Clean Water Spirit.

Once the “Cell Toxin” of the Clean Water Spirit invades the opponent’s body, the lymphocytes which will react first and foremost will lose its function immediately.

Then “Mold Poison”, “Psychic Toxins”, “Blood Poison”, and other toxins will commence a massacre within the host body.

Fang Mu said earnestly to the still clueless Clean Water Spirit.

“Once I get the one hundred kilograms of Deep Pool Heavy Water tomorrow, I will have you immediately elevated to the Silver Peak!”

“As for whether your quality can be upgraded to Legendary Quality, it depends on your own fate!”

Fang Mu has no mental burden on nurturing the Clean Water Spirit.

Fang Mu has always been nurturing the Clean Water Spirit using 100 percent Pure Water Elixir.

No one else in the world could afford such a luxury!

Since he provided the best conditions for the Clean Water Spirit, it naturally wouldn’t disappoint him!

The Extreme Electric Cloud Leopard from the Lionheart Brigade was constantly roaring in its iron cage within the Purple Ice Crystal Ring space.

Fang Mu did not pay attention to the Extreme Electric Cloud Leopard. The Extreme Electric Cloud Leopard was the Guardian Beast that Fang Mu intended to give Fang Yuan.

Therefore, Fang Mu should not expose the Blood Aged Wine in front of the Extreme Electric Cloud Leopard.

That’s why Fang Mu planned to make the Extreme Electric Cloud Leopard eat the Sleep Moss to induce sleep after receiving it.

Then, he would inject the Blood Aged Wine into the Extreme Electric Cloud Leopard to assist it in its metamorphosis!

Just as Fang Mu was feeding poison crystals to the Clean Water Spirit, Fang Mu's personal communication account received several messages from Feng Lin.

[Feng Lin]: I'm sorry, I just went to inspect a newly established medical organization, and didn't see your message in time!

[Feng Lin]: "Scavengers" have always had the habit of collecting spiritual materials produced by magical beasts, so naturally we would have the hearts of high-level Blood Tribe members!

[Feng Lin]: I have the authority to allocate such resources, how much do you need, Fang Mu?

The content of Feng Lin's reply was both within Fang Mu's expectations and pleasantly surprised him.

Having connections can allow Fang Mu to easily obtain various high-level resources, and each connection has completely different functions.

If Feng Lin did not belong to the "Scavengers", as well as being a Green Screen Knight.

There was no way Fang Mu could have so easily obtained the heart of a high-level Blood Tribe member.

As for the things that could enhance his Destiny Guardian Beast's quality, the more the merrier!

[Fang Mu]: My teacher didn't specify how much is needed, but he is currently doing some experiments now, so a large quantity will probably be needed!

[Fang Mu]: Aunt Fang, why don't you help me get as many high-level Blood Tribe hearts as you can!

[Fang Mu]: When the time comes, I will give you part of the high-star Creator resources my teacher gives to me as a reward!

Fang Mu didn't need to explain too much to Feng Lin.

Since Feng Lin was willing to help him, she wouldn't care too much about his purpose.

Furthermore, since his reason was that his teacher, who was a Grandmaster Creator, needed it, there was no way Feng Lin would demand a detailed explanation!

Fang Mu was very clear on how to communicate with others and knew what Feng Lin most wanted to hear.

Since he promised the high-star Creator resources to Feng Lin, Feng Lin would naturally do her best to help!

Upon hearing the notification from her phone, Feng Lin immediately opened her personal social account.

Seeing Fang Mu's reply, Feng Lin's face beamed with joy.

From the nearly a month of interaction, Feng Lin felt more and more comfortable spending time with Fang Mu.

There were a lot of things she didn't need to say, quite simply because Fang Mu could understand them!

Since Fang Mu was doing things for his teacher, helping Fang Mu was equivalent to indirectly helping the Grandmaster Creator behind him.

Even if she hadn't had any contact with the Grandmaster Creator, at least she could leave a good impression.

Feng Lin's finger touched the screen, replying.

[Feng Lin]: At present, Jinghai's "Scavengers" department has three Blood Count hearts, and one Blood Duke heart.

[Feng Lin]: I'll use my merits to exchange for these four high-level Blood Tribe hearts from the Merit Hall.

[Feng Lin]: If you need them now, I can immediately command someone to deliver them to you!

Feng Lin would never use her position to earn favors from Fang Mu using the public resources of the Scavengers.

On one hand, this conformed to her beliefs.

On the other hand, she wanted to show Fang Mu that their relationship was personal, and she did not represent the entire "Scavengers".

Moreover, Feng Lin did not tell Fang Mu the value of these four high-level Blood Tribe hearts.

In her view, Fang Mu, needing such resources, would naturally be clear about its price!

Fang Mu was overjoyed at Feng Lin's reply.

The Jinghai branch of "Scavengers" actually had such a high stock!

Fang Mu estimated that after feeding these four high-level Blood Tribe hearts to the Blood of Abundance.

There is a high probability that the Blood of Abundance, whose quality has just been upgraded to elite, could be promoted to perfect quality in one go.

Whether it's a Destiny Guardian Beast or a common Guardian Beast, it's not difficult to improve the quality to perfect and gain the first exclusive characteristic.

The hard part is progressing from perfect quality to epic quality!

As for the progression from epic quality to legendary quality, its difficulty was extremely high!

There were many Guardian Beasts that had already achieved sequence, but in terms of quality, they were still stuck at epic and couldn't step into the legendary realm.

This was also why Fang Mu spent so many Water Elemental Potions with a purity of 100% to foster the Clean Water Spirit.

But he was still unsure if the Clean Water Spirit's quality could leap from epic to legendary.

[Fang Mu]: Aunt Fang, there's no need for you to trouble your people to deliver it! I'll come and fetch it directly!

As a Beast Master, Fang Mu naturally hoped that his Destiny Guardian Beast could improve as soon as possible!

Fang Mu did not hide his eagerness, in fact, he even further expressed his anxious sentiment.

This better fit the image of a Grandmaster Creator's disciple!

After all, any disciple of a Grandmaster Creator, while enjoying their status, has to learn how to please their master!

Fang Mu hoped that when he returned from the "Scavenger" branch, Fool's

Shadow would have finished absorbing the remaining Shadow Eye Stones.

For some reason, Fang Mu had a vague feeling in his heart!

Perhaps after Fool's Shadow was promoted to elite quality, it would bring him greater improvement than the Blood of Abundance!
