

## Beast Tamer 1331

### Chapter 1331: The Ultimate Return!

Bird Armor Puppet had just ascended to Legendary Quality and obtained the exclusive trait [Puppet Performance Theater] when Hu Tao informed Fang Mu of the effects of the exclusive trait.

Fang Mu had given the exclusive trait [Puppet Performance Theater] a very high evaluation at the time.

That's why Fang Mu mentioned that if Hu Tao used her Destiny Guardian Beast, Bird Armor Puppet, to duel in the Second World, her ranking would rise by at least two minor tiers from her current position.

However, Hu Tao had always considered her Destiny Guardian Beast to be her trump card and was reluctant to reveal it unless absolutely necessary.

Unlike other young fighters in the Second World who were eager to raise their own rankings.

Fang Mu saw this as a matter of Hu Tao's personality.

Hu Tao loved combat but was calm by nature, which made her well-suited to take on the defensive work of a team.

Her calm temperament, combined with excellent strategic vision, endowed Hu Tao with the demeanor of a great general at a young age.

Compared to parading her Destiny Guardian Beast before others, it was more advantageous to use it at a critical moment.

Only then could the value of revealing the Destiny Guardian Beast be highlighted.

Shortly after, the Bird Armor Puppet completed its ranking ascension, showing significant external changes upon advancing to the Platinum Tier, compared to its appearance in the Golden Stage.

Previously, the Bird Armor Puppet looked somewhat rustic, far from being as refined as it was now.

The current color of the Bird Armor Puppet's body was largely related to the color of the metal spiritual materials it had absorbed.

The six kinds of metal spiritual materials Hu Tao absorbed were very faint in color, generally leaning towards silver-blue, adorned with milky white and light shades.

These subtle metal color tones didn't make the Bird Armor Puppet appear heavy and instead gave it a lightweight impression.

Now, after having absorbed so many metal spiritual materials, even an Aggressive Type Guardian Beast at Diamond Rank would find it difficult to inflict damage upon the Bird Armor Puppet.

Fang Mu used the Fool's Shadow's Innate Divine Skill [Eye of Omniscience] to start examining the data of the Bird Armor Puppet.

[Beast Name]: Bird Armor Puppet

[Beast Species]: Puppet Family/Mechanical Gears Species

[Beast Level]: Platinum (1/10)

[Beast Element]: Puppeteer sect

[Beast Potential]: Diamond

[Beast Quality]: Legendary

#### Skills:

[Perfect Pentad Dance]: Perfectly integrates with a designated Bird Beast Master, providing energy and enhancing the Bird Beast Master's defense against physical, elemental, and curses, offering up to two death-averting effects during fatal attacks. After these two effects are used, it enters a dormant state requiring repair with Mechanical Gears.

[Performative Decapitation Dance]: Automatically detects an opponent's weak points in combat, consecutively slashing at them with a tearing attribute, transferring the defensive abilities of the slain target to itself.

[Shield Reflects Final Dance]: Reacts to an opponent's elemental attack by activating its Metal Attribute to absorb the attack, converting it into Golden Element Energy and returning it to the opponent. The energy exploded upon return transforms into a protective shield value for itself.

[Limits of Return Performance]: When energy is nearly depleted, sacrifices some Inferior Puppet Bodies to instantly activate Perfect Pentad Dance, Performative Decapitation Dance, and Shield Reflects Final Dance. All three dances concurrently attach all its Metal Attribute, enhancing the strength of the dances.

#### Exclusive Trait:

[Puppet Metallurgy Vein]: Absorbs various metal spiritual materials and uses their characteristics to amplify the attributes of the Puppet Body. The characteristics of the metal materials influence the future capabilities of the Bird Armor Puppet during the casting vein process.

[Bird Binding Performance]: Manipulates a bird's body, transforming it into a metal form to act as an extension of itself. These metallic birds possess certain offensive abilities, serving both as combat companions and damage absorbers for itself.

[Puppet Performance Theater]: Unleashes the contained metal energy to construct a theater made of metal energy over an area. Inferior Puppet Bodies appear beside every target in the theater, gaining enhancement over time.

Innate Divine Skill:

[Reversal Puppet Veil]: Fosters Inferior Puppet Bodies with restraint effects on the enemy, converting effects on allies into weakening effects on the enemy. When destroyed by an opponent, it triggers a dismantling effect on the targets within the Puppet Body.

A Destiny Guardian Beast has no Evolutionary Path, and one with the Innate Divine Ability is the innate possession of a Beast Master, eternally the core of that Beast Master.

The skill [Limits of Return Performance], gained by the Bird Armor Puppet upon ascending to Platinum Tier, is considered a Burst-type Skill; however, compared to the explosive skills of other Guardian Beasts, its Burst-type Skill is especially formidable.

[Perfect Pentad Dance] could often only be used once in a battle, and after protecting a Bird Beast Master from two fatal attacks, it must enter a dormant state and be repaired with Mechanical Gears.

The Bird Armor Puppet can produce Mechanical Gears on its own, but even upon reaching the Platinum Tier, the speed of producing Mechanical Gears remains slow.

[Limits of Return Performance] enables the Bird Armor Puppet to, through the skill [Perfect Pentad Dance], attach twice to a single Bird Beast Master or simultaneously attach to two Bird Beast Masters, totaling four death aversion effects.

Chapter 1332: This can easily change the situation in a battle.

“Performative Decapitation Dance” will target the enemy’s weaknesses and launch an offensive, plundering their defenses.

“Shield Reflects Final Dance” can absorb the enemy’s elemental attacks into the puppet’s body, converting the absorbed elemental damage into gold elemental damage that is returned to the opponent; moreover, the energy explosion caused by this will also serve as a protective shield value for the target.

With these three dances, the Bird Armor Puppet could easily surpass its previous limits.

Hu Tao's individual combat capability had not improved much, but in a team, the overall effect had at least quintupled.

Hu Tao had initially been somewhat self-pitying, fearing that she couldn't keep up with Fang Mu and Jiang Tuo.

Now, having been promoted to a Two-Ray Star Beastmaster and having strengthened all three of her Guardian Beasts rejuvenated Hu Tao's confidence.

Fang Mu took out two brocade pouches and handed them to Hu Tao and Jiang Tuo, each containing ten Heaven Fragrance Peony flower beads and a full thirty Scenery Fantasy Pearls.

The thirty Scenery Fantasy Pearls were created by Xi Xi in the Contemplation Hall based on the Mysterious Patterns comprehended by Hu Tao and Jiang Tuo, matching the most suitable scenes.

Due to limited time with Hu Tao and Jiang Tuo, and the fact that neither had recently comprehended any Mysterious Patterns,

Fang Mu could not have Xi Xi imprint the scene that appeared when either of them comprehended a Mysterious Pattern.

Otherwise, these scenes were the most suitable for Hu Tao and Jiang Tuo.

As it stood, Jiang Tuo and Hu Tao were already the talents of their generation; and once Fang Mu helped them comprehend more Mysterious Patterns to conjure a First-Class Mysterious Chapter, most likely no one among their peers could match Hu Tao and Jiang Tuo.

Although Hu Tao and Jiang Tuo lacked experience, they both fully understood the preciousness of the resources Fang Mu provided.

The pair seriously inquired Fang Mu about the usage, afraid of wasting the Heaven Fragrance Pearls and the Scenery Fantasy Pearls.

After finished with these tasks, Fang Mu summoned She Wan to replace him in paying a visit to Shuoyang Grandmaster.

At Shuoyang Grandmaster's, people had visited Half Mountain Manor twice.

Since Fang Mu had not been at Half Mountain Manor previously, Liu Yi had refused the requests from Shuoyang Grandmaster to meet Fang Mu.

Now that Fang Mu had returned to Half Mountain Manor and had the time, he ought to respond to Shuoyang Grandmaster.

Fang Mu treated a Grandmaster Creator like Shuoyang with great respect.

Unlike Fang Mu, who had simply relied on his Destiny Guardian Beast, and the opportunities brought by it step by step, Shuoyang Grandmaster had fought hard at each step and after becoming a Grandmaster Creator, he did not just seek his own benefit, but acted as a stabilizing force for the Dragon Rising Federation, always catering to the federation's development.

If not for this, the Dragon Rising Federation would only have Sect Master Xiao Xiang, who preferred to seclude himself and focus on research, leading and thus would not have taken up presidency of the Creator's Guild.

It could be said that seven tenths of the high-end Grandmaster Creators produced by the Dragon Rising Federation were from Shuoyang Grandmaster's handiwork.

Fang Mu's family, being from the Dragon Rising Federation, had somewhat benefitted from Shuoyang Grandmaster's grace.

Fang Mu had guessed quite accurately the reason Shuoyang Grandmaster was looking for him.

Having always been designated as a Star Performer of the Dragon Rising Federation within, Shuoyang Grandmaster looking for him probably wanted him to stay in the Dragon Rising Federation.

Fang Mu, born and bred in Dragon Rising Federation, was willing to facilitate this situation.

If the Dragon Rising Federation had a Saint Creator stationed, it would inevitably bring unimaginable benefits to its development.

She Wan was somewhat surprised that Fang Mu had sent her to visit Shuoyang Grandmaster; for her, it was a tremendous honor.

She Wan had never dared to dream of meeting a prominent figure like Shuoyang Grandmaster, having grown up in Lu Dushe clan, and for her, Shuoyang Grandmaster held very special significance.

Surprised and excited as she was inside, when handling Fang Mu's matter, She Wan behaved extremely composed.

She Wan was very aware that in facing Shuoyang Grandmaster, she did not represent the identity of the She Clan's Noble Girl.

She represented the disciple of Saint Creator Fang Mu!

If she appeared too excited, it would undoubtedly undermine Fang Mu's dignity.

She Wan traveled to the Capital through the Teleportation Array of the Beastmaster Federation and proceeded to Dracoid Research Institute, where Shuoyang Grandmaster was stationed.

After revealing her identity, She Wan received VIP treatment, and Zheng Heng, a disciple of Shuo Yang Grandmaster, personally welcomed her and took her to the side of Shuo Yang Grandmaster.

Upon learning that Fang Mu had returned to the Dragon Soaring Federation, Shuo Yang Grandmaster immediately expressed a desire to follow She Wan and personally visit him.

Without much delay, Shuo Yang Grandmaster had taken to cultivating the Lotus Fish Life Lotus himself since he decided to gift it to Fang Mu.

He elevated the Lotus Fish Life Lotus to a Legendary Quality at the Copper Level.

Elevating a Guardian Beast to Legendary Quality at Copper Level was no easy feat, even some Grandmaster Creators would need to expend considerable effort.

Shuo Yang Grandmaster chose the Lotus Fish Life Lotus as a gift because he knew Fang Mu had the Sacred Relic, Sakura Fall Essence Carp.

The Lotus Fish Life Lotus could enhance the effects of the Sacred Relic, Sakura Fall Essence Carp.

Giving something genuinely beneficial to Fang Mu as a gift could undoubtedly draw closer the relationship between them.

Individuals of the younger generation like Fang Mu would surely want to rapidly increase their Beastmaster Star Level.

Even Shuo Yang Grandmaster felt some anxiety while elevating the Lotus Fish Life Lotus from Epic to Legendary Quality.

After all, there was only one Lotus Fish Life Lotus!

If the exclusive trait obtained at Legendary Quality was not good, the value of the Lotus Fish Life Lotus would be greatly reduced.

Shuo Yang Grandmaster had encountered a similar issue before but fortunately, everything had gone smoothly.

He felt that once Fang Mu indeed received the Lotus Fish Life Lotus, he might even be surprised by its exclusive traits at Legendary Quality.

This time, when Shuo Yang Grandmaster came to meet Fang Mu, he had two matters. For these two matters, he had prepared good reasons.

Being able to negotiate at least one of these matters would make Shuo Yang Grandmaster quite satisfied.

Although Fang Mu had not personally invited Shuo Yang Grandmaster, when he learned from She Wan that Shuo Yang Grandmaster was preparing to come right away, Fang Mu personally went to the door to welcome Shuo Yang Grandmaster.

From a distance, Fang Mu waved at Shuo Yang Grandmaster and then quickly stepped forward, smiling as he said,

“I have finally met you, Senior Shuo Yang!”

“I heard you sent invitations to me twice in the recent past, but I was assisting my master on a mission to the Sea Clan and was not in the Dragon Soaring Federation. Please forgive me!”

Shuo Yang worried that Fang Mu, carrying the identity of a Saint Creator disciple, would be arrogant.

It would be really difficult for Shuo Yang to get along with Fang Mu in such a case.

Being a Senior Creation Zenith Master, Shuo Yang could not possibly bow down and excessively flatter a young man not even eighteen.

Such undignified act was something Shuo Yang simply couldn't do.

After interacting with Fang Mu, Shuo Yang Grandmaster dismissed his concerns.

Fang Mu had an aura that was refreshing like a spring breeze.

This feeling allowed Shuo Yang Grandmaster to be comfortable in Fang Mu's company.

“Since you address me as a senior, I shall call you Young Friend Jianmu!”

“I have heard your name more than once, and meeting you today, it truly lives up to your reputation!”

Fang Mu and Shuo Yang Grandmaster entered the main residence side by side. After chatting for a while, Shuo Yang got straight to the point.

“Master Qixing should have already finished his seclusion and started clearing the Extraterrestrial Embryos, right?”

“Master Qixing is struggling for the survival environment of our humans, is there any need for help?”

“I have many Creators here who, although might not be of much help, could still do some manageable tasks.”

Upon hearing this, Fang Mu decisively shook his head and said,

“Master did indeed come out of seclusion and is currently clearing the Extraterrestrial Embryos, but there is no need for more manpower. I appreciate your concern, Senior Shuo Yang.”

Shuo Yang said this partly to flatter and partly to test the waters.

Shuo Yang Grandmaster had already determined that he would likely not get a chance to meet Qixing himself, so his invitation to Qixing would have to be conveyed through Jianmu!

Chapter 1333: Lotus Fish Ascending Lotus!

After making this clear, Shuo Yang would no longer steer the conversation towards such matters.

Persistently bringing up the matter after having received a refusal could very likely arouse Fang Mu’s displeasure.

If Fang Mu shared these words with Master Qixing, and they reached Master Qixing's ears, Shuo Yang was genuinely worried that Master Qixing might believe his visit had an ulterior motive.

If Shuo Yang did have an ulterior motive, being misunderstood would be fine.

The crucial point was that Shuo Yang truly didn't have many thoughts in that direction, he simply wanted to make Fang Mu's acquaintance and show his face at Master Qixing's.

As for whether other matters could be discussed, Shuo Yang didn't have any extravagant hopes.

Master Qixing, now present within the Dragon Rising Federation, had already brought tremendous benefits to it.

Because of Master Qixing's presence in the Dragon Rising Federation, many powers started cooperating with the Federation.

Many powers that had once eyed the Dragon Rising Federation covetously were now actively courting favor with the Federation.

Such shifts in attitudes of these powers towards the Federation, Shuo Yang surmised, were actually not greatly related to himself.

If this affair were related to him, the aforementioned powers and the Federation wouldn't dare to entertain designs on the Dragon Rising Federation any longer.

"If Master Qixing doesn't need manpower over there, I can rest assured," said Shuo Yang.

"Master Qixing is in the Dragon Rising Federation working on something that benefits the entire human world. If there is any shortage of manpower while dealing with issues that concern the entire human world, I truly wouldn't be able to rest easy!"

Having stated what needed to be said, Shuo Yang, the Grandmaster, then took out the gift he had prepared for Fang Mu—a white lotus in a porcelain bowl appeared in front of Fang Mu, carrying a faint and ethereal fragrance.

“Little friend Fang Mu, this lotus flower is specially prepared for you, I believe this Fish Beast lotus should be quite useful to you.”

As Shuo Yang, the Grandmaster, spoke, Fang Mu had already used the Innate Divine Skill [Eye of Omniscience] bestowed by Fool’s Shadow to investigate the white lotus.

[Beast Name]: Lotus Fish Life Lotus

[Beast Species]: Nelumbonaceae/Flower Lotus Genus

[Beast Level]: Copper (10/10)

[Beast Element]: Wood

[Beast Potential]: Silver

[Beast Quality]: Legendary

Skill:

[Lotus Endowment Fish]: Makes use of its unique nature to establish connections with Fish Beasts; upon connecting with a Fish Beast, it will stimulate the functional aspect of the associated Fish Beast. When at the same stage level as the target’s, the enhanced effect can consistently reach double potency. If its stage level is lower than the target’s, its enhancement capability will diminish (if its stage is higher than the target’s, it might cause acute harm).

Exclusive Traits:

[Healing Fish Knot Lotus]: The lotus roots it forms have the effect of restoring the origin of Fish Beasts. When healing a Fish Beast that it has connected with, the healing effect will see a proportional increase.

[Pure Water Lotus Powder]: The pollen produced by the blooming flowers can purify the body of water, making it an ideal environment for aquatic creatures, and the pollen can also perform a diagnostic check on the water. If the water is contaminated and the pollen is unable to clean it, the deteriorated pollen will emit a fish-like stench.

[Nirvana Lotus Seed]: The lotus fruit it bears will not grow lotus seeds. If it senses no connection with the associated Fish Beast, it will enter a state of Nirvana, reverting back to the form of a lotus seed and severing its connection with the original Fish Beast.

Evolution Directions:

1. Lotus Fish Ascending Lotus, 2. Arrow Water Fish Lotus, 3. Abundant Fish Green Lotus.

Fang Mu was astounded by the abilities of the Lotus Fish Life Lotus upon investigating it.

Fang Mu immediately understood why Shuo Yang, the Grandmaster, said the Lotus Fish Life Lotus would be useful to him.

A few months ago, when Fang Mu strived to obtain the Sakura Fall Essence Carp, it was with an assistant under Shuo Yang, the Grandmaster, that he had competed.

Competing for supplies with an assistant to a Grandmaster Creator had placed great pressure on Fang Mu.

Fang Mu was not worried that he couldn't match the resources on hand with the Grandmaster Creator's assistant, but rather that the assistant wouldn't take Fang Mu's crafted identity seriously and cause trouble.

Had Shuo Yang, the Grandmaster's assistant, really caused trouble, there would have been no good way for Fang Mu to deal with it then.

Fortunately, the Sakura Fall Essence Carp had been secured by Fang Mu at the time, significantly aiding the enhancement of his strength.

Otherwise, even with the Crescent Moon Pendant at his chest and daily consumption of Brilliant Golden Honey, Fang Mu would not have been likely to become a Two-Ray Star Beast Controller.

Originally, Fang Mu's fondness for Shuo Yang, the Grandmaster, stemmed from the Grandmaster's contributions to the Dragon Rising Federation; now, Fang Mu held an even greater appreciation for him.

The gift from Shuo Yang, the Grandmaster, equated to assisting Fang Mu on his rapid ascent on the path to prominence.

By associating the Lotus Fish Life Lotus with the Heavy Cherry Washing Carp, which had evolved through bloodline evolution, using the Copper Level Skill [Lotus Endowment Fish].

If the stage level of the Lotus Fish Life Lotus could be elevated, the daily enhancement of spiritual power by the Heavy Cherry Washing Carp would double.

Generally, the effects of Sacred Relics couldn't be stacked, hence Beast Masters born into large powers prefer to choose those of an exceptional caliber when selecting Sacred Relics.

Truth be told, the Sakura Fall Essence Carp isn't considered the pinnacle of Sacred Relics. There are others, such as the Sky Wave Stacked Cloud Bird unique to the Ten-thousand Nations Federation. Its self-produced cloud vapors refine spiritual power far more superbly than the Heavy Cherry Washing Carp!

Chapter 1334: Lotus Fish Ascending Lotus!\_2

Fang Mu valued the Heavy Cherry Washing Carp so much firstly because Fang Mu didn't have many good options to replace the Heavy Cherry Washing Carp.

Everyone knows Sacred Relics are desirable, but truly outstanding ones are exceedingly difficult to find.

Secondly, Fang Mu highly regarded the ability of the Heavy Cherry Washing Carp to consume its own essence, enhancing spiritual power only at intervals due to its cooldown.

It was precisely because of this ability that Fang Mu steadily became a Two-Ray Star Beast Controller, ahead of Jiang Tuo and Hu Tao.

The amplifying effect of the Lotus Fish Destiny Lotus Skill “Lotus Endowment Fish” also worked well with the spiritual power-enhancing skill of the Heavy Cherry Washing Carp.

This made the Heavy Cherry Washing Carp leap to the forefront as a pinnacle Sacred Relic in every aspect.

The Lotus Fish Life Lotus fundamentally enhanced Fang Mu’s foundation—something Fang Mu didn’t need to overtly show his gratitude for, but he definitely owed it to Shuoyang Grandmaster.

The exclusive characteristics of the Lotus Fish Life Lotus, “Healing Fish Knot Lotus” and “Pure Water Lotus Powder,” were basically of no use to Fang Mu.

First of all, under Fang Mu’s multiple layers of protection, the essence of the Heavy Cherry Washing Carp wouldn’t be damaged, and if it actually were, the Blood Aged Wine would surely be more effective than the lotus root produced by the Lotus Fish Life Lotus.

If Fang Mu could ensure that the essence of the Heavy Cherry Washing Carp would not be damaged, he could naturally also ensure the purity of the water habitat of the Lotus Fish Life Lotus.

Among the three exclusive characteristics, what Fang Mu valued the most was “Nirvana Lotus Seed.”

Fang Mu now heavily relied on the Heavy Cherry Washing Carp, but this did not mean that he wouldn’t encounter Fish Beasts of greater strategic importance than the Heavy Cherry Washing Carp in the future.

If Fang Mu really obtained those Guardian Beasts more precious in strategic significance than the Heavy Cherry Washing Carp, the Lotus Fish Life Lotus could then use its exclusive characteristic “Nirvana Lotus Seed” to amplify other Fish Beasts.

Thus, he wouldn’t always have to be bound to the Heavy Cherry Washing Carp.

Fang Mu very much wanted to cultivate the Lotus Fish Life Lotus, but clearly, now was not the time to do so.

“Grandmaster Shuoyang, I am extremely grateful for the Lotus Fish Guardian Beast you gifted me. If my strength further improves in the future, I will definitely repay your generosity!”

Fang Mu’s words caused Shuoyang’s expression to freeze unexpectedly.

Shuoyang’s surprise was not at the intrinsic value of the Lotus Fish Life Lotus, but that Fang Mu could see the worth of the Lotus Fish Life Lotus at a glance.

This meant that in the realm of creators, Fang Mu must possess extremely high expertise!

Creators below the intermediate level could not have such insight; could it be that Fang Mu had reached the standard of an Intermediate Crafting Master at the mere age of seventeen or eighteen!?

Shuoyang considered himself exceptionally talented as a creator, yet he only became an Intermediate Crafting Master after the age of twenty-two.

Shuoyang had always been proud of having so many capable assistants and disciples around him.

However, if he were to compare them, not one among his disciples and assistants could match Fang Mu.

A look of surprise fleetingly crossed Shuoyang’s face.

“Spiritual objects are mere externals; it won’t have much to do with a Lotus Fish Life Lotus when young friend Jianmu’s strength increases, and you become a significant figure.”

“Talent is important, but so is one’s temperament.”

“Among the younger generation I know of, even the new disciple recently taken in by Lord Han Ming cannot compare to you!”

Shuoyang’s words were not flattery aimed at pleasing Fang Mu but were a genuine expression of his thoughts.

Shuoyang really had no need to offend another Saint Creator just to curry favor with a disciple of a Saint Creator.

Seeing that Shuoyang had not gotten to the main topic for a long time, Fang Mu seriously addressed Shuoyang.

“Grandmaster Shuoyang, you must have something important to discuss since you have come here.”

“If there is anything I can assist you with, I will do my utmost to help!”

Grandmaster Shuoyang had always been searching for the right opportunity. Fang Mu’s initiation provided Grandmaster Shuoyang a way out.

Otherwise, Grandmaster Shuoyang truly wouldn’t have known how to directly persuade Fang Mu to convince Saint Creator Qixing to stay in the Dragon Rising Federation.

Seizing this chance, Shuoyang said earnestly.

“Jianmu, as a native of the Dragon Rising Federation, how do you view the Federation?”

Fang Mu had never really thought that the Shuoyang Grandmaster would ask him such a question, and for a moment Fang Mu didn't know how to answer.

In this life, being a person of the Dragon Rising Federation, Fang Mu had come to regard it as his home; nobody normally spends time considering how to evaluate their own home.

Had Fang Mu never left the Dragon Rising Federation, his assessment of it would surely have been very biased.

However, Fang Mu had seen the world outside the Federation, and compared with other federations outside the Dragon Rising Federation, it could be called a cozy nest sheltered from the wind and rain by others.

Before Fang Mu became a Beast Master, he had always been under the protection of the Dragon Rising Federation.

Who knows how many people had to bear heavy burdens and march forward to allow Fang Mu to live a stable life for seventeen years in JA City.

Even when the Evil Heart Sect and the Blood Race targeted JA City, causing several Dimensional Rifts to open up in the city,

the various powerhouses of JA City chose to stand in front, allowing tens of millions of residents to survive.

At the very least, Fang Mu knew of two Hexagram Beastmasters who possessed Sequential Guardian Beasts who had fallen in this calamity.

"For me, the Dragon Rising Federation can serve as a peaceful sanctuary. I think Grandmaster Shuo Yang has come this time with perhaps the intent to persuade my mentor to stay in the Dragon Rising Federation."

"If that's the case, Grandmaster Shuo Yang, you needn't speak further; even for me, my mentor will at least remain in the Dragon Rising Federation for the next ten years."

Shuoyang Grandmaster highly approved of Fang Mu's evaluation of the Dragon Rising Federation and took pride in it.

For this appraisal from Fang Mu was precisely the goal for which Shuoyang Grandmaster had been striving all these years; Fang Mu's words were an affirmation of the Grandmaster's efforts!

However, the latter part of what Fang Mu said made the Grandmaster tense up, thinking that Fang Mu had cleverly perceived his purpose and was about to reject him.

If Saint Creator Qixing, being a Saint Creator, chose to leave the Dragon Rising Federation, then the benefits that the Federation were currently receiving from Qixing would instantly vanish.

This kind of loss was something the Dragon Rising Federation could hardly bear, as they had already provided a substantial amount of resources in advance for these collaborations.

The rest of Fang Mu's statement completely eased the Grandmaster's mind, even bringing about a feeling of tears welling up.

From Fang Mu's response, the Grandmaster could feel his attachment to the Dragon Rising Federation.

Even if Saint Creator Qixing truly had to leave the Dragon Rising Federation one day, in the ten years that Qixing spends accompanying Fang Mu's growth, the overall foundation of the Dragon Rising Federation will at least double!

Even people from the Ten-thousand Nations Federation had come to the Dragon Rising Federation more than once to buy land and operate businesses.

With Fang Mu's promise, Shuoyang Grandmaster's purpose for this visit was now thoroughly fulfilled.

After inviting Fang Mu to visit the Dracoid Research Institute when he had time, the Grandmaster left Half Mountain Manor.

As Fang Mu was preparing to go to the cultivation room to cultivate the Lotus Fish Destiny Lotus, Lu Jifeng found him through She Wan.

The specially requested cultivation room was completed by Lu Jifeng overnight.

Although Fang Mu had not made any specific demands, as the designer, Lu Jifeng had still added some thoughtful details while fulfilling Fang Mu's requirements.

Upon seeing the room filled with Purple Magnet Crystals, Fang Mu's face revealed a satisfied expression.

Before Lu Jifeng left, Fang Mu made a point of having She Wan give him a bottle of Life Elixir as Lu Jifeng's compensation.

When Fang Mu asks others to perform tasks, he always ensures a fair quid pro quo, disliking to owe anyone favors.

After returning, Lu Jifeng would likely be recalled to headquarters by Keystone Construction.

Fang Yuan was almost ready to discuss designs for the second world with Keystone Construction.

Mu Commerce Association had land and shops in all four Mega Cities and the Sacred City, making the task for Keystone Construction exceedingly arduous.

Keystone Construction would surely seek collaboration with other friendly forces such as Origin Construction.

Once Keystone Construction completes the construction for the land and commerce association of Mu Commerce Association, Fang Mu considers allowing Keystone Construction to undertake the construction for the land of the Infinite Tower.

Just as Fang Mu was about to plant the Blue Curse Orchid in the cultivation room, he discovered that the Orchid Gift had undergone another anomaly!

Chapter 1335: Sublimation Flash Scale!

Fang Mu saw that Lan Li, already the size of a fist, had extended seven or eight tentacles, with the one in the center as thick as Fang Mu's wrist.

These tentacles, apart from being golden, were also lined with many purplish-red patterns, which carried a kind of eerie beauty; the rest of the tentacles were the same as Lan Li's previously pure golden ones.

Fang Mu directly addressed Lan Li with a question,

"Lan Li, why is this happening to you?"

"Hadn't you already undergone a transformation with the Blood Aged Wine before?"

Lan Li replied somewhat embarrassedly,

"Master, I did indeed undergo a transformation through the Blood Aged Wine, but at that time, much of the wine's energy was stored in my body and couldn't take effect."

"After spending some time settling over these past few days, that energy from the Blood Aged Wine helped my bloodline advance further!"

While saying this, Lan Li was afraid that Fang Mu might misunderstand him.

When Lan Li faced the bloodline promotion, he didn't think too much and just tried to absorb as much Blood Aged Wine as possible to aid his transformation.

It was Lan Li's first encounter with Blood Aged Wine, and he had no idea that the unabsorbed wine would have such a potent effect.

Lan Li feared that Fang Mu would see him as a greedy creature deliberately absorbing too much Blood Aged Wine to further strengthen himself.

Truth be told, Lan Li harbored no such thoughts.

Fang Mu and Lan Li were bound by Covenant Blood Essence, allowing Fang Mu to gauge Lan Li's general thoughts according to the contract.

Fang Mu knew Lan Li didn't intentionally absorb too much of the Blood Aged Wine.

In fact, even if Lan Li had such a thought, it posed no problem to Fang Mu at all.

Because Fang Mu intended to invest a considerable amount of resources in Lan Li, aiding his bloodline transformation and power enhancement.

Due to Lan Li coming from a Higher Dimension World, he held a very high status in Fang Mu's heart.

Otherwise, Fang Mu wouldn't have remodeled the entire cultivation chamber specifically for Lan Li.

Upon hearing this, Fang Mu spoke,

"Lan Li, it's excellent news for me that your bloodline can advance further."

"The environment here should be quite suitable for your enhancement, right?"

Upon hearing this, Lan Li leaped from Fang Mu's hand, jumping into the remodeled cultivation chamber.

The tentacles extending from the seed acted as Lan Li's limbs, and soon Lan Li chose a spot in the center of the cultivation chamber, piercing through the laid Purple Magnet Crystal with its tentacles to root itself in Restoration Soil.

Feeling the depth of the soil layer, Lan Li exclaimed with joy,

“Master, thank you so much for creating such an ideal environment for me!”

“In an environment like this, I could grow to full size without having to switch spaces!”

“Just place the other seeds directly in this cultivation chamber; they will move on their own to root themselves!”

Fang Mu raised an eyebrow at this, which saved him the time of planting the Blue Curse Orchid Seeds himself.

Fang Mu dumped the Blue Curse Orchid Seeds, now under Lan Li’s control, into the room, and in less than two minutes, the Blue Curse Orchids found suitable spots to root themselves.

Following Liu Yi and Liu Er, Fang Mu had Liu Xi create some helpers.

Fang Mu would have Liu Xi arrange for personnel to be in this cultivation chamber, providing resources for the Blue Curse Orchids as per Lan Li’s instructions.

After seeing to the Blue Curse Orchids, Fang Mu went to the training room.

To let Jiang Tuo and Hu Tao enjoy the power enhancement from the Sacred Objects: Heavy Sakura Cleansing Carp, the large porcelain vat containing them had been left inside the training room.

At this moment, Hu Tao and Jiang Tuo were not in the training room; they had followed He Deen to the Contemplation Hall.

Whether it was the Scenery Fantasy Pearl or the Flower Beads from the Heaven Fragrance Peony, they were most appropriately used inside the Contemplation Hall.

The Heavy Cherry Cleansing Carp, which Fang Mu had yet to contract, had managed to ascend to Diamond Rank during its time in the training room.

Had Fang Mu not previously used the Heavy Cherry Cleansing Carp's skill "Sakura Festival," it might have risen to Diamond Rank even sooner.

Since the Heavy Cherry Cleansing Carp was not under Fang Mu's contract, it could not benefit from the life transference of the Covenanting Blood.

Therefore, even though the Heavy Cherry Cleansing Carp was at Platinum Tier, its quality remained at the Epic Quality level.

Now that it had ascended to Diamond Rank, the quality of the Heavy Cherry Cleansing Carp had been upgraded to Legendary Quality.

A slight regret was that during the rank promotion, the Heavy Cherry Cleansing Carp's bloodline didn't undergo a transformation to evolve into a Heavenly Cherry Forging Koi.

But all this was within Fang Mu's expectations.

For the Heavy Cherry Cleansing Carp to advance its bloodline further, even if Fang Mu were to use the Covenant Blood Essence, it might only have a chance upon ascending in tier, and the probability was slim.

Before acquiring the Lotus Fish Life Lotus, Fang Mu had planned to foster the Heavy Cherry Cleansing Carp, this fish-class Sacred Relic.

Now with the Lotus Fish Life Lotus in hand, Fang Mu naturally placed even greater emphasis on nurturing the Heavy Cherry Cleansing Carp!

The Heavy Cherry Cleansing Carp swam freely within the porcelain vat, and upon seeing Fang Mu, the fish raised its tail decorated with cinnabar cherry spots and gently waved at Fang Mu as a greeting.

Without stirring a single ripple!

Usually, when facing someone other than Fang Mu, the Heavy Cherry Cleansing Carp would never engage in such behavior.

Chapter 1336: Sublimation Flash Scale! \_2

Hu Tao and Jiang Tuo did not receive such treatment.

Now the Heavy Cherry Washing Carp had grown to about one meter two in length, its shape elegant and its fins slender, each fin nearly half as long as its body.

Among all the koi-type Guardian Beasts, the Heavy Cherry Washing Carp was recognized for its outstanding appearance.

Fang Mu used the Eye of Omniscience to inspect the data of the Heavy Cherry Washing Carp,

[Beast Name]: Heavy Cherry Washing Carp

[Beast Species]: Carp family/Koi genus

[Beast Level]: Diamond Rank (5/10)

[Beast Element]: Water System/Spirit Series

[Beast Potential]: Diamond

[Beast Quality]: Legendary

Skills:

[Fin Dance]: Moves its seven fins to stimulate the target, eliminating their feeling of fatigue.

[Cherry Healing]: Sacrifices its cherry blossom-like scales to restore the target's wounded spiritual power.

[Sakura Festival]: Sacrifices part of its own bloodline, putting the target in an accelerated essence cleansing state, wherein the target's spiritual power will rapidly increase.

[Surf Tail Strike]: Leaps high in the water using its tail to create a massive wave, striking at area targets, with a chance to stun the targets.

[Shattered Sakura Water Area]: If there are cherry-type plant-type beastmasters in its environment, its bloodline advancement speed will increase and the effect of refining its spiritual power will be slightly enhanced.

Exclusive traits:

[Tempering Swim]: While swimming, it creates a force field centered on itself, refining the life energy and spiritual power of beings within this force field. (The more life forms in the force field, the weaker the individual refinement effect).

[Essence Grinding Disk]: Additionally forms a stand, letting two stands overlap and grind the spiritual power of the target repetitively, removing impurities attached to the spiritual power in the process.

[Sublimation Flash Scale]: Special flash scales grow on its fishtail, using which can enhance its skill effects, at least doubling the effect of the skills.

Evolutionary Path:

1: Heavenly Cherry Forging Koi, 2: Snow Cherry Extreme Cold Koi, 3: Flame Cherry Red Ground Koi.

Among the skills and exclusive traits, what most attracted Fang Mu about the Heavy Cherry Washing Carp after it had advanced to Legendary Quality was the exclusive trait [Sublimation Flash Scale].

Currently, there were no special changes on the fishtail of the Heavy Cherry Washing Carp, indicating that the flash scales had not yet grown.

The flash scales growing on the tail of the Heavy Cherry Washing Carp could allow it to specifically amplify one of its skills, enhancing the effect of that skill until all the flash scales were consumed.

Among the five skills of the Heavy Cherry Washing Carp, including [Shattered Sakura Water Area], which it acquired upon advancing to Diamond Rank, Fang Mu felt that only [Sakura Festival] was worthy of enhancement.

The speed at which the Heavy Cherry Washing Carp's tail was condensing flash scales surely wasn't fast; otherwise, having been at Diamond Rank for some time, it should have already grown its flash scales.

[Sakura Festival] was the skill Fang Mu valued the most in the Heavy Cherry Washing Carp; enhancing the effect of Sakura Festival could greatly increase the amount of spiritual power Fang Mu obtained in one go.

This could accelerate the speed at which Fang Mu's Beast Master star level increased!

Especially when facing barriers, a [Sakura Festival] amplified by flash scales could potentially help Fang Mu to successfully overcome the barrier.

The advancement in quality of the Heavy Cherry Washing Carp brought great delight to Fang Mu.

[Shattered Sakura Water Area], as a skill Ji fluency acquired upon reaching Diamond Rank, was an enhancement-type skill for itself.

As long as cherry-type Guardian Beasts were cultivated in the living waters of the Heavy Cherry Washing Carp, it could enhance its own bloodline advancement speed.

What's more, it could also slightly enhance the effect of refining spiritual power.

There were many cherry-type Guardian Beasts in the world, and even the precious ones could easily be obtained by Fang Mu.

By using these cherry-type Guardian Beasts to enhance the effect of the Heavy Cherry Washing Carp's spiritual power refinement, it elevated the functionality of the Heavy Cherry Washing Carp.

The greatest role of the presence of the Heavy Cherry Washing Carp was its effect on refining the spiritual power of the Beast Master.

It seems that the Heavy Cherry Washing Carp is no longer suitable to be kept in this tiny ceramic vat.

Fang Mu planned to build a training room outside the nursery and construct a pond that covered at least 150 square meters within it, making it the new home for the Heavy Cherry Washing Carp.

Although the Heavy Cherry Washing Carp couldn't radiate across the full 150 square meters, a cool pavilion of about twenty square meters could still be placed at the center of the pond.

Usually, while enhancing spiritual power within this pavilion, no matter where the Heavy Cherry Washing Carp swam within the pond, the effects of spiritual refinement could reach every corner.

Just after Lu Jifeng had left Half Mountain Manor, Fang Mu immediately had She Wan bring him back.

Fang Mu explained to She Wan his requirements for constructing the pond; she would just need to discuss these with Lu Jifeng.

Fang Mu himself did not need to appear in person again.

Fang Mu next needed to cultivate the Lotus Fish Life Lotus, aiming to elevate it to Diamond Rank to maximize its amplifying effect on the Heavy Cherry Washing Carp.

He placed the ceramic bowl containing the Lotus Fish Life Lotus into the large ceramic vat, and immediately its lotus leaves extended outward.

Since there was only one Fish Beast, the Lotus Fish Life Lotus had no choice.

And it seemed that the Lotus Fish Life Lotus highly valued the Heavy Cherry Washing Carp, as it instantly formed a bond with it.

The moment they bonded, not only did the shape of the lotus petals of the Lotus Fish Life Lotus change, each petal resembling the loftily curved tail of the fish, but their color also shifted to a pale pink, adorned with scattered cinnabar cherry spots, giving the Lotus Fish Life Life Lotus a rather bewitching look.

Cultivating the Lotus Fish Life Lotus was extremely simple. It only required pure Water Elemental Energy and Life Energy, sparing Fang Mu much effort.

Fang Mu focused more of his attention on the Original Blood Nuwa Female and the Hundred-life Carp.

The Original Blood Nuwa Female had been feeding on Blood Aged Wine within the Blood of Abundance's interior and had successfully advanced to Platinum Tier.

During the process of advancing to Platinum Tier, the Nuwa Carp had awakened the bloodline transformation within and became the Original Blood Nuwa Female.

Due to the particularity of the Original Blood Nuwa Female's bloodline, it could not reach Diamond Rank in a short period.

Fang Mu could not rush the growth, fearing that forced growth might impact the evolutionary potential of the Original Blood Nuwa Female.

At the moment the Nuwa Carp's bloodline transformed and advanced to become the Original Blood Nuwa Female, its intelligence significantly improved.

The Original Blood Nuwa Female was fully capable of engaging in earnest communication one-on-one with Fang Mu.

The Hundred-life Carp too had reached the critical point of rank advancement and bloodline elevation.

Fang Mu first called out the Original Blood Nuwa Female from the Blood of Abundance.

Blood Mist surged outward with Fang Mu at its center, and the Original Blood Nuwa Female slowly emerged from an ancient blood-red well.

This manner of appearance was both horrifying and eerie.

Yet upon seeing the real form of the Original Blood Nuwa Female, Fang Mu's eyes brightened.

The Original Blood Nuwa Female had exquisite features, with long, straight black hair that fell to her waist.

Her skin was a pale yellowish-white, giving her a healthy and delicate appearance.

Below her waist was a long tail, fundamentally different from a mermaid's but not quite like a serpent's either.

Ordinary Serpent Beasts simply did not possess the saintly aura exuded by the long tail of the Original Blood Nuwa Female.

Upon meeting Fang Mu, the Original Blood Nuwa Female bowed, clearly aware of who had been caring for her daily.

"Master, thank you for nurturing me during this period. Here is a gift from me!"

With that, the Original Blood Nuwa Female handed a dark red crystal towards Fang Mu.

As to how to address Fang Mu, the Original Blood Nuwa Female had given it serious thought, ultimately feeling that calling him master was most appropriate.

Subconsciously, the Original Blood Nuwa Female already saw herself and the Blood of Abundance as a unified whole.

Long before becoming the Original Blood Nuwa Female, when still an All-Kinds Carp, she had absorbed Fang Mu's blood, transforming into a Life creature of the Blood Series and thereafter being nurtured at the base of the Blood of Abundance.

It could be said that in the heart of the Original Blood Nuwa Female, Fang Mu was the closest being to her in this world.

Chapter 1337: Thousand-Year-Long Prosperity!

Looking at the dark red crystal held in the hands of the Original Blood Nuwa Female, Fang Mu reached out and took it.

The crystal was warm and smooth to the touch, possessing a very comfortable, glossy texture.

Fang Mu felt that this texture was even more comfortable than touching the ancient jades with thousands of years of heritage from his previous life.

Fang Mu used the Innate Divine Skill [Eye of Omniscience] of Fool's Shadow to examine the Original Blood Nuwa Female.

[Beast Name]: Original Blood Nuwa Female

[Beast Species]: Carp Family/Nuwa Carp Genus

[Beast Level]: Platinum (3/10)

[Beast Element]: Blood

[Beast Potential]: Diamond

[Beast Quality]: Legendary

Skill:

[Blood Suck]: Sucking the target's blood, draining the energy from the target's blood and condensing it into a special Essence Of Blood.

[Purifying Blood Blessing]: Removes substances in the target's blood that is not inherent to their bloodline, while also enhancing the target's blood metabolism capabilities.

[Koi Blood Regeneration]: Absorbs the target's blood and combines it with one's own Heart of Koi, then feeds the enriched Nuwa Blood back to the target, with the effect of unlocking the target's genetic template and inducing the regeneration of the genetic template.

[Wa Blood Purification]: Injects one's own Nuwa Blood into the target's body, where the Nuwa Blood will bind with negative substances in the target's bloodline and expel them from the target's body, thereby purifying the target's bloodline to a certain extent.

Exclusive Traits:

[Blood Creation]: Increases the creativity of blood, allowing one to use their own pure Blood Energy to replicate blood, with replication time depending on the quality of the blood.

[Heart of Koi]: When using blood for creation, production capacity greatly increases, and the increase of one's own rank will further enhance this effect.

[Blood Leap]: Combining one's Nuwa Bloodline with Blood Aged Wine to condense a substance called Blood Origin Crystal, which has a strong effect on promoting bloodline leaps, helping the target organism break through bloodline barriers.

Evolutionary Path:

1: Blood Mother Wa Lady, 2: Blood Sea Dragon Carp, 3: Dirty Wave Wa Lady.

Before Fang Mu could further examine the dark red crystal in his hand, he heard the Original Blood Nuwa Female speak with unusual seriousness.

"Master, this is a Blood Origin Crystal condensed from my newly acquired exclusive trait. This crystal can induce transformation in the bloodlines of all flesh-and-blood creatures."

"Used normally, its effect is stronger than that of the Blood Aged Wine because the Blood Origin Crystal is also condensed after absorbing Blood Aged Wine."

"However, the real utility of the Blood Origin Crystal lies not in everyday use, but in its ability to stimulate and promote bloodlines at critical moments."

"At the crucial moment of a Guardian Beast's bloodline transformation, what Blood Aged Wine cannot do, the Blood Origin Crystal might be able to achieve."

Fang Mu was not at all surprised by the words of the Original Blood Nuwa Female.

The Original Blood Nuwa Female usually soaked in the blood pool at the bottom of the Blood of Abundance, always having the opportunity to absorb Blood Aged Wine.

It made perfect sense that the Original Blood Nuwa Female used Blood Aged Wine to condense Blood Origin Crystals, a substance even better than Blood Aged Wine.

Initially, Fang Mu valued the exclusive trait [Blood Creation] of the Original Blood Nuwa Female, as it could help Fang Mu create more Blood Aged Wine.

Now that Fang Mu had acquired the Exhausted Blood Flower Spirit, he was able to produce enough Blood Aged Wine.

However, the value of the Original Blood Nuwa Female was not diminished.

With the skill [Koi Blood Regeneration] and the exclusive trait [Blood Leap], producing Blood Origin Crystals, the Original Blood Nuwa Female would become Fang Mu's best assistant in cultivating Guardian Beasts going forward.

Fang Mu's Covenant Blood Essence was for contracting beasts, not for cultivating them.

When some of the foundation-level beasts encountered thresholds during bloodline advancement, even if they did not need a contract, Fang Mu would always consider using Covenant Blood Essence to assist with their bloodline transformation.

But now with Blood Origin Crystals produced by the Original Blood Nuwa Female's exclusive trait [Blood Leap], even if those foundation-level beasts in Fang Mu's possession encountered bloodline restrictions that couldn't be broken through smoothly, Fang Mu still had a way to resolve it.

Lian Dai, the king of the Han Yang Empire and now Fang Mu's Dao Protector, Fang Mu had seriously considered purifying her bloodline.

Initially, Fang Mu's method was to provide Lian Dai with high-purity Spiritual Energy and Blood Aged Wine. If Lian Dai were a mermaid below the Gold Stage,

Fang Mu's method would be very effective.

But Lian Dai's level was too high, and while pure Spiritual Energy could indeed help purify Lian Dai's bloodline, with Blood Aged Wine assisting in this purification,

beyond a certain height, these methods would not be so effective for Lian Dai!

Now with the skill [Wa Blood Purification] of the Original Blood Nuwa Female, Nuwa Blood can be injected into Lian Dai, directly absorbing and peeling out impurities from within her body.

This would allow Lian Dai's bloodline to be endlessly elevated, truly tracing back to the mermaid legends of five or six epochs ago.

In this regard, the significance of the Original Blood Nuwa Female's skill [Wa Blood Purification] is not much less than the exclusive trait [Blood Leap].

"Original Blood Nuwa Female, since you've gained high wisdom, you must have already chosen a name for yourself by now," he said to her.

Hearing this, the Original Blood Nuwa Female spoke softly to Fang Mu,

"Master, the name I've chosen for myself is Blood Spirit, but if you dislike my name, you may change it at any time."

Chapter 1338: Thousand-Year-Longevity, Vast Prosperity!\_2

Fang Mu knew that the Blood Spirit said this to show respect for him; the Blood Spirit surely liked the name very much.

Highly intelligent creatures definitely wouldn't decide on their name carelessly; the Blood Spirit respected Fang Mu, and naturally, Fang Mu also respected the Blood Spirit.

"The name Blood Spirit is very pleasant. From now on, continue to stay within the Blood of Abundance and feel free to use the Blood Aged Wine to condense Blood Origin Crystals and strengthen the Nuwa Bloodline."

"I will inevitably need your help in the future!"

The Blood Spirit was extremely pleased with Fang Mu's praise of its name.

"Master, whenever you need me in the future, call on me, and I will be at your service at all times!"

Among the three evolutionary paths of the Original Blood Nuwa Female, Fang Mu hoped that the Original Blood Nuwa Female would evolve into the Blood Mother Wa Lady as soon as possible.

Fang Mu wouldn't consider the other two evolutionary paths, whether it be the Blood Sea Dragon Carp or the Dirty Wave Wa Lady.

The former wasted the Original Blood Nuwa Female's Nuwa Bloodline, while the latter would change the properties of the Original Blood Nuwa Female from the Blood Series to the Water System.

This would change the existing skills of the Original Blood Nuwa Female and waste the abilities of the current Blood Series.

Fang Mu preordered some Nuwa Blood from the Original Blood Nuwa Female, who eagerly said to Fang Mu,

"Master, I will deliver three hundred milliliters of Nuwa Blood to you in seven days."

After finishing his conversation with the Original Blood Nuwa Female, Fang Mu had the Original Blood Nuwa Female return to the Blood of Abundance.

Fang Mu entered the nurturing room and began to cultivate the Hundred-Life Carp.

The bloodline of the Hundred-life Carp had already reached the threshold of promotion.

Fang Mu hadn't urgently cultivated the Hundred-life Carp for two reasons. First, he was simply too busy and didn't have much time.

Secondly, it was also greatly related to not having enough high-purity Life Elixirs at hand.

The Hundred-life Carp evolved from the All-Kinds Carp after absorbing pure Life Energy; during the process of evolving from the Ten Longevity Carp to the Hundred-life Carp, Fang Mu used a large number of high-purity Life Elixirs.

Recently, Fang Mu's consumption of Life Elixirs had been so great that his supply of high-purity Life Elixirs was somewhat insufficient for his needs.

Once the evolution of the Hundred-life Carp began, it couldn't be stopped.

Fang Mu certainly didn't want to face a situation where the stage advancement of the Hundred-life Carp failed to due insufficient resources on hand.

Now that Fang Mu had a sufficient stock of high-purity Life Elixirs, he was ready to attempt a breakthrough for the Hundred-life Carp!

Fang Mu took out the porcelain basin holding the Hundred-life Carp from his Purple Ice Crystal Ring.

The appearance of the Hundred-life Carp was entirely different from that of the Heavy Cherry Washing Carp; the seven fins of Heavy Cherry Washing Carp were broad and its shape was elegant.

However, the Hundred-life Carp was a genuinely plump fellow, with a fat and short body, and its fin tail resembled a small round fan.

On the front-end of the fish head, the nostril flowers unfolded in the water like two green peonies, with long fish whiskers even longer than the body of the Hundred-life Carp.

Had it not been for the Hundred-life Carp's quick movements, Fang Mu would have doubted whether the small fan-like fin tail could drive the body of the Hundred-life Carp.

Fang Mu had not shortchanged the Hundred-life Carp regarding the absorption of Life Energy. The Hundred-life Carp successfully transformed into Legendary Quality at the Golden Stage.

Now, it has been promoted to level ten of the Platinum Tier.

Throughout the process of climbing through stages and quality, the newly acquired skills and exclusive traits of the Hundred-life Carp weren't of much use.

The two survival-type exclusive traits were hardly used by the Hundred-life Carp.

Unless necessary for Fang Mu to utilize the abilities of the Hundred-life Carp to increase the lifespan of other beings,

the Hundred-life Carp would largely remain in the Purple Ice Crystal Ring.

For the strong, lifespan is the most precious, compared to the resources needed to enhance strength.

This was confirmed by Shu Liangjun and Jun Feng.

Those lacking lifespan would fall into madness; even if the person concerned didn't become insane, their family and friends would go to great lengths to save their lives.

Once the Hundred-life Carp was exposed, even with Saint Creator Qixing and Lian Dai, a Divine Domain Level expert as his Dao Protector,

Fang Mu still couldn't guarantee absolute safety!

Actually, whether it be the Platinum Tier skill [Water Fusion Illusion] or the exclusive trait [Fish Bone Regeneration] of the Hundred-life Carp, they both excelled in survival abilities!

Although it was of no use, the Hundred-life Carp essentially possessed one less skill and exclusive characteristic.

However, as long as the Hundred-life Carp maintained its unique traits [Life Calculation] and [Comprehension Longevity Scale], it would always be an irreplaceable top-tier foundation item.

Fang Mu had used the [Comprehension Longevity Scale] on Jun Feng when he was restoring Jun Feng's lifespan with the Hundred-life Carp.

In the future, Jun Feng's Comprehension Power during his life would resonate with the [Comprehension Longevity Scale].

No matter who used the [Comprehension Longevity Scale], they could enhance their own Comprehension Power by bestowing upon themselves a portion of Jun Feng's.

Moreover, the use of the [Comprehension Longevity Scale] would not produce any negative effects on Jun Feng himself.

As Fang Mu watched the Hundred-life Carp swimming happily in the porcelain vat, he poured bottle after bottle of the high-purity Life Elixir into it.

After fifty bottles, Fang Mu's actions finally slowed down.

The intelligence of the Hundred-life Carp was extremely low, making it difficult for Fang Mu to communicate directly with it without a contract.

What could you ask of a carp, after all?

Fang Mu could only use this simple and direct method to help the Hundred-life Carp understand his intent.

Indeed, the Hundred-life Carp immediately grasped Fang Mu's purpose and began to absorb the pure Life Energy.

The scales on the Hundred-life Carp glowed like green jade, each one lighting up in sequence.

A whirlpool of Life Energy rapidly formed in the small, 1.5-meter diameter porcelain basin, with the Hundred-life Carp at its core.

Within less than two minutes, the Life Energy from the fifty bottles of Life Elixir was almost completely absorbed by the Hundred-life Carp.

Fang Mu simply threw the unprocessed Life Crystals directly into the vat.

After a full half-hour, just before Fang Mu's reserves of Life Elixir and Life Crystals ran out, the Hundred-life Carp finally ceased absorbing the Life Energy.

This allowed Fang Mu to breathe a sigh of relief.

Regardless of the emerald luster of the Hundred-life Carp's scales obscuring its form, Fang Mu directly used the Eye of Omniscience to examine it.

[Beast Name]: Thousand-Lifespan Carp

[Beast Species]: Carp family/Koi genus

[Beast Level]: Diamond Level (1/10)

[Beast Element]: Water Series/Life Series

[Beast Potential]: Diamond

[Beast Quality]: Legendary

Skills:

[Bubble Therapy]: Emit bubbles to heal the target's injuries. After healing, the injury can heal a second time if it takes damage shortly thereafter.

[Whisker Whip]: Strikes with fish whiskers will burn away the target's lifespan.

[Life Mark]: Temporarily imprison the target's lifespan, preventing any unnatural loss of lifespan during this period.

[Water Fusion Illusion]: Stimulates inner energy to merge with water, separating numerous illusions in the water with Life Energy. These illusions have no attack capability, but each time one is destroyed, it increases the carp's velocity slightly.

[Life Blessing]: Select a target for a permanent blessing. The blessed target can heal from injuries rapidly and use the carp's Life Energy to replenish its own in the event of a fatal injury.

Exclusive Traits:

[Life Calculation]: If the target's lifespan is less than 100 years, it can guide Life Energy to replenish the target's lifespan to 100 years.

[Comprehension Longevity Scale]: During the lifespan restoration process, the comprehension gained during this extended lifespan is absorbed into the scales. Using the scales can part bestow a portion of this comprehension onto a designated target.

[Fish Bone Resurrection]: In cases of severe injury or near-death, all energy is stored in the fish bones. Once the danger has passed and the Life Energy in the bones is activated, the body can be reconstructed, allowing for regeneration.

Evolutionary Path:

① Ten Thousand Life Carp, ② Sea Surge Carp, ③ Light of Day Moon Carp.

Chapter 1339: Fiery Yan Luo!

Seeing the Hundred Longevity Carp smoothly evolve into the Thousand-Lifespan Carp, Fang Mu's heart finally settled, and a radiant smile appeared on his face.

After the evolution of the Hundred Longevity Carp into the Thousand-Lifespan Carp, Fang Mu, with the exclusive attribute [Longevity Calculation] of the Thousand-Lifespan Carp, could directly restore a millennium of lifespan to other beings.

Both Shu Liangjun and Jun Feng under Fang Mu's command had clung to life thanks to the Hundred Longevity Carp; now, both could have their lifespans further extended.

Fang Mu had always been worried that during the rank advancement of the Hundred Longevity Carp, uncontrollable factors might cause a mutation in its bloodline.

If a mutation occurred in the bloodline of the Hundred Longevity Carp without evolving into the Thousand-Lifespan Carp, then extending the lifespan by a hundred years would have been the limit for the Hundred Longevity Carp.

In the evolutionary path of the Thousand-Lifespan Carp, there is the Ten Thousand Life Carp, and once it evolves successfully, with the exclusive attribute [Longevity Calculation], it can extend the lifespan of a life for ten thousand years.

Even for a Divine Realm Level Strong entity, a lifespan shouldn't exceed ten thousand years.

Lian Dai had specifically mentioned this when she discussed Divine Realm Level powerhouses with Fang Mu.

The lifespan of human Divine Realm Level Strong entities could reach about eight thousand years at most, and even for mermaids, it's just around fifteen thousand years.

The Ten Thousand Life Carp, merely with one exclusive attribute [Longevity Calculation], could extend a human's lifespan surpassing even those of Divine Realm Level Strong entities!

Powerful as this ability was, Fang Mu was well aware that it would be tremendously difficult for the Thousand-Lifespan Carp to elevate its bloodline to the level of the Ten Thousand Life Carp.

The resources consumed for the evolution of the Hundred Longevity Carp to the Thousand-Lifespan Carp were beyond the imagination of any Grandmaster Creator.

Even a Saint Creator like Han Ming could not possibly produce thousands of Life Elixirs with a hundred percent purity.

In fact, a Saint Creator couldn't even prepare such pure Life Elixirs.

The Spiritual Intelligence of the Thousand-Lifespan Carp had increased quite a bit compared to before, and its attitude towards Fang Mu was much more affectionate and warm than the Sacred Objects: Heavy Sakura Cleansing Carp.

After all, like the Original Blood Nuwa Female, the Thousand-Lifespan Carp had been raised by Fang Mu right from its All-Kinds Carp period.

The Platinum Tier skill [Water Fusion Illusion] and the Legendary Quality exclusive attribute [Fish Bone Regeneration] of the Thousand-Lifespan Carp weren't very useful.

But the Diamond Level Skill [Life Blessing] was a very useful skill.

[Life Blessing] allows for the permanent blessing of a chosen target, granting them enhanced healing abilities and extremely rapid recovery from injuries.

Even if they suffer life-threatening injuries, they could still recover to their prime condition through the nourishment from the Thousand-Lifespan Carp.

The Thousand-Lifespan Carp had essentially become a battery filled with energy for rapid injury recovery!

With the energy reserve inside the Thousand-Lifespan Carp, it most certainly merited the title of an energy battery.

Since Fang Mu had started his journey in the Beastmaster world, he had only ever had three All-Kinds Carps, and he had asked Fang Yuan to help him search for more All-Kinds Carps.

Indeed, Fang Yuan had found some information about All-Kinds Carps, but these were generally already being cultivated by others.

Even if these All-Kinds Carps were well-cultivated by others, they still lost their value to Fang Mu.

Fang Mu left the cultivation room, Hu Tao and Jiang Tuo were diligently studying under the guidance of He Deen, both taking their studies very seriously.

He Deen's guidance for Hu Tao and Jiang Tuo could be described as extremely dedicated.

Although He Deen did not take Hu Tao and Jiang Tuo as his disciples, he treated them nearly the same as his disciples.

Upon seeing Fang Mu, He Deen stood up and bowed deeply, his expression full of respect for Fang Mu.

He Deen felt more and more that the strike he had taken for Fang Mu initially was the most correct decision in his life.

That intervention indeed cost He Deen his three Main Battle Mystic Beasts, who were his old partners in battle.

But purely from a benefit perspective, each of the three Mystic Beasts He Deen currently contracted had awakened the Phoenix Breed Bloodline, and the daily resources consumed by them, even the least, were of Master-level Creator standard.

These resources were all provided by Fang Mu.

If it were up to him, He Deen himself would have no means to acquire these resources.

Besides improvements in the realm of Mystic Beast handling, since moving into Half Mountain Manor and starting to tutor Hu Tao and Jiang Tuo, He Deen had begun to have opportunities to interact with Master Creators like Lu Zhong.

Although Lu Zhong had left, now He Deen got the chance to meet Grandmaster Creators like Zhang Yue.

Previously, Master Creators were already people He Deen had to look up to, and he had no chance to interact with Grandmaster Creators.

First it was interacting with Master Creators, and then Grandmaster Creators, He Deen was one step closer to becoming a Master Creator himself.

If he could interact more with Zhang Yue, receive guidance from him.

Within five years, He Deen hoped to progress even further!

Previously, He Deen had already lost hope of advancing his Creator abilities, all of which was now enabled by Fang Mu.

If it wasn't for Fang Mu's influence, neither Lu Zhong nor Zhang Yue would likely be willing to guide him.

After greeting Fang Mu, He Deen said to Jiang Tuo and Hu Tao,

“Your lessons for today are essentially over; remember to spend an hour reviewing before going to bed tonight.”

Chapter 1340: The Explosive Yan Luo!\_2

“These past few days, the knowledge I have imparted to you all must have seemed a bit overwhelming. If you don’t review, you’ll just have to return that knowledge to me!”

With that, He Deen patted Jiang Tuo and Hu Tao on their shoulders before turning and leaving the breeding room, leaving space and time for Fang Mu.

Hu Tao had broken through and become a Two-Ray Star Beast Controller the night before, and her Guardian Beast’s strength had all been enhanced by Fang Mu.

Hu Tao fought several duels in the Second World overnight and advanced smoothly to Gold One, on the verge of starting her promotion matches to ascend to the Platinum Tier, which could be said to be the best achievement Hu Tao had ever attained.

For such a result, Hu Tao felt very pleased.

Fang Mu and Jiang Tuo were moving up, and it really wouldn’t do for her not to advance to the Platinum Tier herself.

“Ah Mu, are you planning to go to the Second World for a duel today?”

“I checked earlier today, and the number of people in your fan club in the livestream has already broken through twenty thousand.”

Hu Tao had hardly finished speaking when Jiang Tuo couldn’t help interject.

“Sister Taozi, you must have checked Brother Mu’s fan club numbers really early, right?”

“The number of people in Brother Mu’s fan club has long since surpassed sixty thousand! I checked right before Teacher He’s lecture.”

Hu Tao, hearing this, made a quick calculation of the time; indeed, she had checked very early in the morning.

If Jiang Tuo had looked just before Teacher He’s class, then the difference between when she and Jiang Tuo had checked was almost three hours.

Which meant that in three hours, the number of fans had grown by forty thousand!

Such an increase was nothing short of astonishing.

Keep in mind, this was not the number of viewers during Fang Mu’s livestream, but the number of people joining the fan club.

The Second World had introduced the livestreaming function some time ago, and the audience that consistently enjoyed watching livestreams had already picked out their favorite streamers.

Fang Mu was essentially taking other streamers’ spots as a newcomer.

Fang Mu had just started livestreaming in the Second World, and he was currently in the phase where his popularity was exploding.

He Deen’s lecture had lasted about two hours, and Hu Tao could hardly imagine the extent to which Fang Mu’s popularity would explode during that time.

Fang Mu was neither surprised nor concerned about this situation.

Fang Mu had a clear understanding of his own strength, and his abilities far exceeded those of his contemporaries in the younger generation.

No matter which identity Fang Mu used to compete in the Second World, he would be an absolute star among those under twenty years old in his age group.

Fang Mu had no doubt about this.

Therefore, Fang Mu was unconcerned about whether the popularity of his livestream room grew rapidly or slowly.

Though Fang Mu didn't mind his popularity, he was very grateful for those who were willing to support him.

Fang Mu planned to give back to those who supported him through a lottery in the fan club.

Fang Mu glanced at the Lotus Fish Life Lotus, which was in the process of upgrading its rank.

Given the current strength of the bloodline of the Lotus Fish Life Lotus, it would probably evolve into the Lotus Fish Ascending Lotus while advancing to the Platinum Tier.

To proceed all the way to the Diamond Rank and reach the same rank as the Heavy Cherry Washing Carp, maximizing the enhancement,

It would take at least another two to three days.

Fang Mu had no need to keep watch over the evolution of the Lotus Fish Life Lotus; he wanted to fight his way up to the Hall Stage and compete with the talented youth between the ages of twenty and thirty.

Even with consecutive wins, that would mean hundreds of duels, so Fang Mu indeed needed to engage in more duels in the Second World!

"Ah Tao, I'm going to log into the Second World in a little while. If you have time after this duel, help me draw a lottery in the fan club."

Having said this, Fang Mu took out ten bottles of Life Elixir with a ninety percent purity, and then continued speaking to Hu Tao.

“In addition to managing my livestream room, you’re also managing Xiao Tuo’s livestream room. Take five bottles for the lottery in my livestream room, and the other five to Xiao Tuo’s livestream room for their lottery!”

Hu Tao’s face showed a look of surprise upon hearing this. She had some expertise in managing and operating fan clubs.

Indeed, carrying out some appropriate lotteries during the operation of a fan club could increase the stickiness among the fans in the club.

“But Fang Mu, in his own fan group and that of Jiang Tuo, scattered five bottles of Life Elixir with a purity of 90 percent, no matter how you looked at it, this did not seem like a regular lottery draw.

And more like distributing qualification cards worth over a hundred million.

Each bottle of 90 percent purity Life Elixir, if placed in an auction, could easily sell for at least two hundred million Dragon Rising Coins.

Converted into World Coins used in the Second World, that’s also worth over seventy million.

Because Jiang Tuo has livestreamed for a longer period, he has many more people in his fan group than Fang Mu’s.

The probability of winning in Jiang Tuo’s fan group is somewhat smaller.

But now, Fang Mu’s fan group has at most just over a hundred thousand fans, meaning there would be a winner every twenty thousand people.

Such odds couldn’t be said to be low!

After this lottery draw, the number of people in both Fang Mu's and Jiang Tuo's livestream fan groups was bound to significantly increase.

Even if some people didn't like Fang Mu or Jiang Tuo, they would still choose to join their fan groups for a chance to strike it rich.

Fang Mu indeed had such an idea, whether he cared about the number of people in the fan group or not, only by managing it could it grow explosively and become more cohesive.

This issue had already been validated in Fang Mu's previous life.

Having been by Fang Mu's side for a long time, Hu Tao knew full well that Fang Mu's resources were extraordinarily abundant.

Fang Mu being able to give away these ten bottles of Life Elixir for the draw indicated that these ten bottles of Life Elixir were of no importance to him.

Taking the ten bottles of elixirs, Hu Tao said,

'I will go to the service center in the Second World to contact the relevant staff to take over these ten bottles of elixirs, and then send these ten bottles into the Second World through the Dream Beast.'

Since the inception of the Second World by the Ten-thousand Nations Federation, a special office had been set up in every Federation capable of connecting to the Second World.

After Hu Tao made the necessary contacts, the elixirs could be synchronized in the Second World within an hour, a process that was quite swift!

Once the elixirs were synchronized, Fang Mu, Hu Tao, and Jiang Tuo all entered the Second World practically at the same time.

Upon entering the Second World, Fang Mu immediately saw that his friend request and message tabs were flickering with a massive amount of information, having reached the 9999+ mark.

Fang Mu did not have time to browse through these messages.

In the Second World, Fang Mu had little desire for social interaction, the main reason Wang Longfei could add Fang Mu as a friend was because Wang Longfei recognized Fang Mu's identity during their battle.

It also made Fang Mu aware that Wang Longfei was a person of the Dragon Rising Federation.

Qixing was also one of Fang Mu's alternate identities, Fang Mu's Qixing persona corresponded to the top big shots in the entire Beastmaster world.

Being proactive in making friends with these younger generations brought no benefits to him.

Although Fang Mu did not intend to actively make friends with any of these younger talents, making friends due to certain reasons also wouldn't be bad for him.

The Second World had just started and was not as matured as the Dragon Rising Federation's Battle Network.

Even on the Battle Network, some industries started to revolve around exhibition matches.

Before Shuoyang Grandmaster left, Fang Mu handed over five Infinite Silver Silkworms to Shuoyang Grandmaster, instructing Shuoyang Grandmaster to give them to outstanding youths of the Dragon Rising Federation.

Upon seeing the Infinite Silver Silkworms, Shuoyang Grandmaster immediately understood their effects.

Such Guardian Beasts that could help Beast Masters sprint to higher ranks were extremely rare, and the rise of Qingmu Commerce was driven by Spirit Mayflies.

Shuoyang Grandmaster never expected that Qixing could mass-produce such Guardian Beasts that assisted Beast Masters in sprinting their ranks.

Distributing these five Guardian Beasts, the Dragon Rising Federation's performance in the entire East Competition District would surge tremendously.

It wasn't even impossible to aspire to top the East Competition District!

Fang Mu specifically mentioned to have Shuoyang Grandmaster pass an Infinite Silver Silkworm to Wang Longfei for a contract, which surprised Shuoyang that Fang Mu knew Wang Longfei.

Shuoyang did not take Wang Longfei as a disciple but indeed had invested in cultivating him.

For Wang Longfei to make a friend like Fang Mu was indeed a stroke of luck for him!"
