

## Beast Tamer 1421

Chapter 1421: The Opportunity to Transform the Silver Chrysosplenium Stamen Cassia!

Qi Yue, even if she yields to Qixing, the entire Cyan Deer Tribe will be under Qixing's control, but Qi Yue's heart is still aligned with the Beast Controlling Force.

This is something that is very difficult to change and basically lacks any possibility of change.

Qi Yue agreed to this matter so quickly because she was certain that she could easily fulfill Qixing's demands.

With over eighty percent of the strong individuals in the Emperor Beast Court enthused about this, the Beast Controlling Force is willing to let a human Creator participate despite their usual discordance with humans.

Even though the Beast Controlling Force and Human Forces are as incompatible as water and fire, the higher-ups of the Beast Controlling Force still frequently interact with those of the Human Forces.

Secondly, this matter itself does not pose any harm to the Beast Controlling Force; on the contrary, it is beneficial.

By observing creatures from the Outer Realm, these creatures can perfectly adapt to this world.

This indicates that the environment of the Dimensional World on the other side of the Sea of Domains is not much different from here.

Humans have poor adaptability to environments, but Guardian Beasts are exceptionally adaptable.

Once it's time to divide the resources of the Dimensional World, the Beast Controlling Force will definitely benefit!

“Sir Jianmu, I have used the Pray for Sky Covenant on you, and have agreed to all of Master Qixing’s demands. I think it’s time for you to extend my lifespan!”

“When does Master Qixing plan to explore the Dimensional World?”

“If Master Qixing plans to explore the Dimensional World in the short term, I will bring up this matter at the next core meeting of the Emperor Beast Court.”

Qi Yue has been feeling nervous; the idea that Fang Mu could restore a thousand years of her lifespan, regardless of the method used, sounded incredibly shocking.

Qi Yue does not distrust Fang Mu; both Fang Mu and Qixing have negotiated to this point, and there’s no need for them to deceive her.

But Qi Yue is always afraid that something unexpected might happen.

“No rush, preparing for the exploration of the Dimensional World on the other end of the Sea of Domains is essential, and I would like to invite the Sea Clan to join us as well.”

“The impact of the Dimensional World on the other end of the Sea of Domains is much greater on the Sea Clan than on us Humans and the Beast Controlling Force.”

“However, Miss Qi Yue, you can represent the Cyan Deer Tribe internally within the Emperor Beast Court to release relevant information, letting other Beast Controlling Forces realize the choices made by the Cyan Deer Tribe. Just harboring such thoughts is good.”

During the conversation, Fang Mu took out the pot of Sleep Moss obtained from the Truth Hall and handed it to Qi Yue.

“Miss Qi Yue, to restore your lifespan, you will need to be in a sleeping state, and I am always ready to assist Miss Qi Yue in restoring her lifespan.”

“Miss Qi Yue, your lifespan held by the Endless Wood’s core can still last a few more years; whether you want to extend your lifespan now here is up to you to decide.”

Fang Mu had not previously mentioned restoring her lifespan because he needed to let Qi Yue consume the Sleep Moss in order to summon the Thousand-Lifespan Carp.

Otherwise, the secret of the Thousand-Lifespan Carp would be exposed!

A single Pray for Sky Covenant is insufficient for Fang Mu to control Qi Yue; Fang Mu believes Qi Yue intrinsically does not want the Praying Sky Cang Lu clan to suffer from the covenant’s backlash.

But facing secrets like the Thousand-Lifespan Carp that could drive any force or powerful individuals insane, Fang Mu would certainly not allow its exposure.

Now that Qi Yue has brought it up, Fang Mu smoothly informed Qi Yue about the precondition for extending her lifespan.

Upon hearing Fang Mu’s words, Qi Yue’s eyes flickered slightly; just like Fang Mu did not fully trust Qi Yue, she also did not trust Fang Mu fully.

Letting herself consume Sleep Moss and drift into sleep in front of Fang Mu, leaving herself at his mercy, was something Qi Yue found hard to accept.

Qi Yue hesitated but decided to trust Fang Mu.

Her lifespan was already not much; if Fang Mu harbored ill intentions, it meant he had deceived her from the start regarding the restoration of her lifespan.

Qi Yue was willing to use her sparse remaining lifespan to test whether Qixing could be trusted.

Her visit to meet Qixing in the Dragon Rising Federation and the intra-tribal affairs of the Qi Tian Pale Deer clan were known by some.

If she couldn't successfully return, the tribe members would inform other Beast Controlling Forces, and the Emperor Beast Court would not let it go!

After Qi Yue solidified her thoughts, she tore off the Sleep Moss and began chewing it in her mouth.

The taste of the Sleep Moss was slightly bitter, with only a faint bitterness remaining along with a mouthful of refreshing flavor.

Qi Yue needed a process to fall asleep; during this process, she conversed with Fang Mu.

"Let's do it right here. I've sensed this forest; there are no excessively powerful beings. With your Dao Protector here, our safety is sufficiently ensured."

Fang Mu was pleased with the trust Qi Yue showed him; he had not had any contact with Qi Yue prior.

The trust shown by Qi Yue now equated to her compromise.

With such an attitude in contacting him, after helping Qi Yue restore her lifespan, it would be enough to rebuild mutual trust, by then she would undoubtedly be more convinced by him.

Fang Mu summoned the Mechanism Fortress.

Being at the peak of Diamond Level with Legendary Quality, this Mechanism Fortress could shield perception from creatures below the Order level.

With the capacity of the Mechanical Heart and the number of Mechanical Gears in a usual Diamond Level Mechanical Beast measured as one unit each, compared to a regular Mechanical Beast, the Mechanism Fortress's Mechanical Heart capacity could reach 2.3 units.

Chapter 1422: The Opportunity to Transform the Silver Chrysosplenium Stamen Cassia! (Part 2)

The number of mechanical gears can reach nearly four units.

The cultivation of mechanical beasts has a low lower limit and high upper limit, entirely dependent on the resources invested.

Since Fang Mu did not form a contract with the Mechanism Fortress, it won't be restricted by the Beast Master star level of Fang Mu.

The Mechanism Fortress should be able to ascend in rank soon if Fang Mu continues to invest resources.

While summoning the Mechanism Fortress, Fang Mu said to Qi Yue.

"Miss Qi Yue, once I have restored your lifespan, I will help you remove the Tree Heart of the Endless Wood from your body."

"I will take away the Tree Heart of the Endless Wood, and in return, I will try to eliminate its influence on you."

"Meanwhile, let's see if I can give you a great gift in terms of power enhancement!"

Right now, Qi Yue's mind is wholly focused on whether Fang Mu can increase her lifespan by a thousand years, she doesn't care about the Tree Heart of the Endless Wood or the great gift Fang Mu mentioned.

"No problem, once my lifespan is restored, the Tree Heart of the Endless Wood is yours."

"I will enter the fortress first, the effect of the Sleep Moss won't take long to take effect."

Qi Yue still cares greatly about her dignity, it's fine for her to show a poor state in front of Fang Mu.

Qi Yue won't allow others to see her unconscious!

Fang Mu said with a smile.

"Miss Qi Yue, go ahead, don't be nervous. Restoring your lifespan isn't a difficult task, it can be easily achieved, you don't need to feel too much pressure!"

"Uncle Feng had his lifespan restored once before, and everything is still fine, isn't it!?"

Hearing this, Qi Yue subconsciously looked at Jun Feng, who nodded at Qi Yue.

Seeing Jun Feng nod, Qi Yue's hanging heart suddenly felt much relieved.

In Qi Yue's view, even if Fang Mu deceives herself, Jun Feng has no reason to conspire with Fang Mu.

However, when it comes to restoring her own lifespan, Qi Yue's heart is still very tense.

Fang Mu did not follow Qi Yue into the Mechanism Fortress, since Qi Yue cares so much about her dignity, let her keep it until the end.

Almost two hours have passed, Qi Yue must be in a state of unconsciousness by now.

Fang Mu said to Jun Feng.

"Uncle Feng, now that the master has clearly identified the means to restore a thousand years of lifespan, I will help you restore it before your hundred years of lifespan is about to be exhausted; perhaps by then, the master will have found a way to restore ten thousand years of lifespan!"

"Your bond with Aunt Ning is stronger than gold; the master was very moved when hearing about your situation."

“If Aunt Ning encounters a lifespan issue in the future, the master will also help her restore it!”

“From now on, Uncle Feng, you just need to think about living a good life with Aunt Ning.”

Upon hearing this, Jun Feng first showed gratitude to Qixing, then bowed to Fang Mu and sincerely said.

“Little Wood, thank you!”

Jun Feng sincerely thanked Fang Mu without saying more.

Because in Jun Feng’s opinion, many words are simply unnecessary; it’s better just to act.

The situation between him and Ning Hongshu was conveyed to Qixing by Fang Mu; otherwise, Qixing would definitely not know about his relationship with Ning Hongshu, nor would he express any admiration.

It could be said that whether intentionally or unintentionally, the opportunity was facilitated by Fang Mu for him and Ning Hongshu.

Fang Mu said with a smile.

“Don’t be polite with me, Uncle Feng. I will be troubling you to guard outside the Mechanism Fortress for the next few days.”

“Don’t let anyone disturb me!”

Hearing this, Jun Feng replied with a very serious and earnest tone.

“Little Wood, don’t worry, I will absolutely not let anyone disturb you.”

“If anyone does break into the Mechanism Fortress, it will only be because I have already died in battle.”

Fang Mu enhancing Qi Yue’s lifespan is not a difficult task, as Fang Mu has already helped many people extend their lifespans.

All it requires is for the Thousand-Lifespan Carp to cast its skill.

What really keeps Fang Mu busy inside the Mechanism Fortress, is using the heartwood of Endless Wood to cultivate the Bright Moon Golden Osmanthus, which has always been inconspicuous among all of Fang Mu’s Guardian Beasts.

The heartwood of Endless Wood can not only support those with exhausted lifespans but is also a treasured item for enhancing and stimulating the bloodlines of trees.

Whether Fang Mu has contracted the Bright Moon Golden Osmanthus through the Eden Dreamland or the Bright Moon Golden Osmanthus originates from the relics in Star Moon Canyon, it is worth cultivating by Fang Mu!

Upon entering the Mechanism Fortress, Fang Mu uses the Innate Divine Skill [Eye of Omniscience] of Fool’s Shadow to locate the position of Qi Yue’s tree heart of Endless Wood.

The heartwood of Endless Wood is located on the left side of Qi Yue’s heart, very close to Qi Yue’s heart.

Fang Mu summoned Xi Xi and shared the discovered image with Xi Xi.

Xi Xi precisely used its mechanical cilia to extract the tree heart of Endless Wood and also absorbed the surrounding Dead Qi.

The Dead Qi in Qi Yue’s body is easy to absorb, while clearing the Dead Qi in the soul is more difficult.

The Dead Qi in the soul needs to be cleared by Qi Yue herself using her energy once she wakes up.

As a being at the Peak of Order who has awakened a Xuan Body, the wounds on Qi Yue caused by the extraction of the heartwood of Endless Wood healed quickly.

Fang Mu let the Thousand-Lifespan Carp use its skill Longevity Calculation on Qi Yue, instantly restoring a thousand years of Qi Yue's lifespan.

The Thousand-Lifespan Carp, having restored Qi Yue's thousand-year lifespan, appeared somewhat weakened and likely needed some time to recover.

During this time, Fang Mu would provide a large amount of Life Elixirs to the Thousand-Lifespan Carp to help it accumulate and restore energy.

Qi Yue is stuck at the threshold of Gods' Domain in terms of quality; Qi Yue currently remains at Legendary Quality and how far from the godlike quality Qi Yue is, Fang Mu does not know.

Fang Mu therefore injected two thousand milliliters of Blood Aged Wine into Qi Yue's body.

Fang Mu had mentioned that he wanted to give Qi Yue a gift, but whether this two thousand milliliters of Blood Aged Wine could truly help Qi Yue, Fang Mu was unsure.

Fang Mu then summoned the Bright Moon Golden Osmanthus.

[Beast Name]: Bright Moon Golden Osmanthus

[Beast Species]: Oleaceae/Prolific Osmanthus Genus

[Beast Level]: Platinum Tier (10/10)

[Beast Element]: Wood

[Beast Potential]: Diamond

[Beast Quality]: Legendary

Skill:

[Moon Laurel Shadow]: Scatters blossoms using moonlight to form shadows around the target, reducing the damage received by the target.

[Osmanthus Fragrance Solidifying]: Wraps a designated target in its fragrance, not only rejuvenating but also soothing the elemental energy around the target to prevent elemental damage.

[Osmanthus Strong Protection]: Condenses its wood attribute energy into a shield around the target, blocking physical damage, while also able to restore a small amount of energy when the target takes physical damage.

[Tree Heart Protection]: Releases a part of the energy condensed in its tree heart to heal the original wounds of plant beings. As long as the consumption does not exceed eighty percent, the tree heart will not be damaged, and the used up energy can slowly replenish.

Exclusive attributes:

[Moon Under Laurel]: Absorbs moonlight and stores the energy transformed into the tree trunk, turning it into tree heart energy. It can convert the tree heart energy into surging energy if necessary.

[Tree Heart Same Life]: When the tree trunk can no longer absorb energy to condense tree heart, it will expel the tree heart out of the body, and continue to absorb energy. The tree heart can rejuvenate dead plant life and bring them back to life.

[Tree Spirit Blessing]: Keeps itself permanently in a blessed state by tree spirits, maximizing its growth potency and accelerating the rate of its rank advancement and frequency of bloodline transformation.

Evolutionary Path:

① Silver Chrysosplenium Stamen Cassia, ② Bright Moon Gold Osmanthus, ③ Rabbit Raising Moon Laurel.

Looking at the tree heart of Endless Wood in his hand, constantly releasing a peculiar wood attribute energy, and then at the Bright Moon Golden Osmanthus, Fang Mu felt somewhat regretful.

Because not only had the tree heart consumed too much energy inside Qi Yue's body, Fang Mu was truly uncertain whether the tree heart of Endless Wood could help Bright Moon Golden Osmanthus undergo its bloodline transformation.

To transform into that legendary Guardian Beast depicted in the murals, the Silver Chrysosplenium Stamen Cassia!

Chapter 1423: The 2nd Dimensional Channel!

The Fool's Shadow's innate divine powers, Eye of Omniscience, allow Fang Mu to see the evolutionary path of guardian beasts.

Bright Moon Golden Osmanthus evolving into Silver Chrysosplenium Stamen Cassia is a definite path that can already be seen, not just Fang Mu's subjective conjecture.

The summoned Bright Moon Golden Osmanthus stands tall and straight, with fresh green leaves bearing clusters of goose-yellow flowers.

The colors of these goose-yellow flowers and their stamens, dark and light, complement each other like the glow emitted by the round moon in the sky.

The Bright Moon Golden Osmanthus doesn't have much presence in Fang Mu's place, but Fang Mu has always provided it with resources.

When Fang Mu first acquired the Bright Moon Golden Osmanthus, it looked like a lifeless stick used for kindling.

Fang Mu nourished the Bright Moon Golden Osmanthus with life elixirs of one hundred percent purity, encouraging it to root and sprout.

The investment Fang Mu made in cultivating resources for the Bright Moon Golden Osmanthus would be unbearable even for the Saint Creators, Eternal Mother Yongle and Han Ming!

Of course, Fang Mu contracted the Bright Moon Golden Osmanthus through Eden Dreamland not only because there was a chance it could transform into Silver Chrysosplenium Stamen Cassia, but initially, Fang Mu was not aware of this.

Fang Mu highly values the skills and exclusive traits of the Bright Moon Golden Osmanthus; its unique trait, Tree Heart Same Life, is a foundational ability for any plant-type beastmaster.

Fang Mu stepped closer to the Bright Moon Golden Osmanthus and placed the heart of the Endless Wood at its base.

As soon as the Bright Moon Golden Osmanthus sensed the aroma of the Endless Wood, it became restless, clearly showing its desire for the heart of the Endless Wood.

Upon receiving Fang Mu's permission, the roots of the Bright Moon Golden Osmanthus rapidly extended from the ground, entwining the heart of the Endless Wood like a cage.

Immediately afterward, the green luminescence of the Endless Wood was transmitted to the body of the Bright Moon Golden Osmanthus.

The Bright Moon Golden Osmanthus itself lit up with a green phosphorescence, the natural fragrance on its body being stimulated more than five times.

The green glow on the Bright Moon Golden Osmanthus continually strengthened, eventually transforming into a brilliant green flame!

This magnificent glow made the figure of the Bright Moon Golden Osmanthus appear somewhat unreal.

Other guardian beasts contracted through Above the Green Field in Eden Dreamland have had their ranks raised to the Diamond Level.

By not uplifting the rank of Bright Moon Golden Osmanthus and keeping it at Platinum Tier Level 10, Fang Mu was seeking a transformational opportunity through bloodline like the one right now.

Fang Mu could feel the form of Bright Moon Golden Osmanthus constantly changing beneath the green glow, the body height increasing from the original.

From four meters gradually rising to about seven meters.

Suddenly at one moment, Fang Mu wasn't sure if he was seeing things, but under the green luminosity, he saw thousands of silver glimmers flickering.

And the quantity of silver glimmers continued increasing!

Before Fang Mu could react, the green luminosity faded away.

Fang Mu then saw that the tree of Bright Moon Golden Osmanthus was full of bright golden flowers, the original color-coordinated stamens had turned silver.

The recent glimmers were from these silver stamens.

The contrast in color between the flowers and the stamens was stunningly beautiful, signifying that the Bright Moon Golden Osmanthus had successfully transformed into Silver Chrysosplenium Stamen Cassia.

Now evolved into Silver Chrysosplenium Stamen Cassia, the aura of the Bright Moon Golden Osmanthus was much denser than before, indicating that its rank had also escalated during the bloodline transformation.

Fang Mu used the Eye of Omniscience again to gather information on Silver Chrysosplenium Stamen Cassia.

[Beast Name]: Silver Chrysosplenium Stamen Cassia

[Beast Species]: Oleaceae/Prolific Osmanthus Genus

[Beast Level]: Diamond Level (1/10)

[Beast Element]: Wood

[Beast Potential]: Diamond Level

[Beast Quality]: Legendary

Skills:

[Moon Laurel Shadow]: Scatters flowers with the moonlight to shield the target, reducing the damage received.

[Osmanthus Fragrance Solidifying]: Envelops the specified target with its own aroma, not only invigorating but also calming the elemental energy around the target, preventing elemental damage.

[Osmanthus Strong Protection]: Condenses its wood energy into a shield around the target, blocking physical damage; the plant can recover a small amount of energy when the target is physically damaged.

[Tree Heart Protection]: Releases some energy from the condensed tree heart to heal the origin of injured plant spirits, the energy consumed from the tree heart will not damage it if it doesn't exceed eighty percent, additional energy can be slowly replenished.

[Purity from Impurities]: Both the flowers and pollen can strip impurities from the target's body; the effect is enhanced when brewed into honey. Repeated consumption can cleanse the target's body completely from impurities.

Exclusive Traits:

[Moon Under Laurel]: Absorbs moonlight and stores it as energy in the trunk, condensing it into the tree heart, to be converted into surging energy when needed.

[Tree Heart Same Life]: When the tree heart in the trunk reaches its limit, it will be expelled from the body to continue absorbing energy, rejuvenating dead plant life and reviving it.

[Tree Spirit Blessing]: Keeps itself permanently under the blessing of tree spirits, maximizing its output, accelerating the speed of its rank advancement and the frequency of bloodline transformations.

Chapter 1424: The 2nd Dimensional Channel!\_2

Evolutionary Path:

1: Silver Chrysosplenium Stamen Cassia (Soul Cleansing), 2: Silver Ruimonthly Brilliant Gui, 3: Silver Ruijian Light Gui.

Fang Mu had read a large number of ancient texts written during The Fifth and Sixth Eras. In some valuable ancient texts, it was recorded that the Silver Chrysosplenium Stamen Cassia has the ability to purge impurities.

From the moment a life is born, its body is imbued with numerous impurities, and these impurities continue to accumulate as it grows.

Lifeforms have become accustomed to being tainted by impurities and do not feel any abnormalities during growth.

However, these impurities themselves pose significant limitations to the growth of a lifeform. It is said that when a lifeform's body is completely rid of impurities, its aptitude will improve to some extent.

Regarding this speculation, Fang Mu didn't know if the people from The Fifth and Sixth Eras had any definitive proof. In The Seventh Era, it was impossible to verify.

Because Fang Mu had never heard of any ability to strategically purge impurities from the body.

Currently, the Silver Chrysosplenium Stamen Cassia tree is full of blooming flowers, and crafting honey from these blossoms is quite a simple task.

Fang Mu picked a few flowers from a cluster and chewed on them lightly, finding a noticeable sweetness while chewing.

This indicates that the Silver Chrysosplenium Stamen Cassia has a relatively rich nectar yield.

However, since the Silver Chrysosplenium Stamen Cassia only has one flowering season per year, even if it has a good nectar yield, the production quantity could never be substantial.

For such foundation-level Supplies capable of thoroughly cleansing internal impurities, Fang Mu would definitely use them cautiously for his own people.

In terms of Evolutionary Path, be it Silver Ruimonthly Brilliant Gui or Silver Ruijian Light Gui, they are certainly not as preferable as Silver Chrysosplenium Stamen Cassia (Soul Cleansing).

Now Silver Chrysosplenium Stamen Cassia only removes the impurities of the flesh. Once the bloodline of Silver Chrysosplenium Stamen Cassia is advanced again, it will most likely cleanse the soul of impurities as well.

The soul is the most mysterious aspect of a life, cleansing the soul of impurities will surely bring about significant benefits for the lifeform.

Such benefits will definitely be enjoyed by the legion of Dead Creatures under Fang Mu's command.

The Dead Creatures are driven by the Soul Flame. Removing the impurities within the Soul Flame can make it burn more fiercely and purely.

This kind of enhancement is akin to a positive transformation of the Dead Creatures' bloodline.

After cultivating the Silver Chrysosplenium Stamen Cassia, Fang Mu stored it and then sat to the side, taking out an ancient text to read.

When Qi Yue was consuming the Sleep Moss, Fang Mu specifically instructed that it was fine as long as the sleep did not exceed one day—Qi Yue would be able to awaken after over half a day.

When Qi Yue woke up, Fang Mu fulfilled his promise, and the Praying Sky Cang Lu clan officially became Fang Mu's partner.

Moreover, Fang Mu can always play the leading role in the cooperation between the two parties!

Fang Mu has always had the habit of reading; now, rather than books of travel logs and anecdotal experiences, Fang Mu prefers to read these ancient texts.

Books of travel logs and experiences often carry too much subjective color and boast exaggerated elements, making them difficult to discern when reading.

As Fang Mu reached higher levels and his experiences broadened, revisiting these ancient texts gave him a feeling of learning anew.

Fang Mu had personally nurtured the Silver Chrysosplenium Stamen Cassia, and upon seeing the records of it in the ancient texts again, he was no longer surprised.

Once Fang Mu started reading these ancient texts, he lost track of time, until he heard a noise and saw Qi Yue sitting up. Then Fang Mu put away the ancient text and smiled at Qi Yue, asking,

"How are you feeling, Miss Qi Yue?"

“After consuming the Sleep Moss, it’s inevitable to experience some dizziness, but it will recover after a while.”

Upon awakening, Qi Yue immediately began to check the status of her lifespan and was certain that she had indeed gained a thousand years of lifespan.

Qi Yue did feel a little dizzy after waking up, but more so, she felt a sudden sense of clarity in her heart.

Finally, the predicament of her lifespan was resolved,

And her current state of lifespan was sufficient to prove every word Fang Mu had said as truth.

“Sir Jianmu, thank you for helping me restore my lifespan. In the future...”

Qi Yue’s words came to an abrupt halt as she suddenly felt a new energy inside her, an energy that had been mostly absorbed by her body during her slumber.

This energy seemed to have loosened the barriers to advancing into the Gods’ Domain.

Qi Yue was filled with immense joy, and her body couldn’t help but tremble with excitement.

In fact, Qi Yue had awakened to her Xuan Body three thousand years ago, and ever since, she had been striving to set foot in the Gods’ Domain.

These three thousand years made Qi Yue realize one thing: she was both made and unmade by the bloodline of the Prayers to the Cyan Deer Clan.

The high level of the bloodline of Praying Sky Cang Lu, combined with a backlash suffered from previously probing into the secrets of heaven, meant that Qi Yue was never able to shake her own quality.

If the leap from Legendary Quality to godlike quality was a wall, then Qi Yue's wall had not even a single crack in it—no sunlight penetrated it.

But now, a crack had suddenly appeared on this wall, and Qi Yue, as a Peak Order Practitioner, had extremely strong control over her own energies.

Qi Yue could be sure that this energy was not her own!

She thought of the gift Fang Mu had mentioned giving her.

Qi Yue had originally dismissed Fang Mu's talk of gifts, but could it be that what Fang Mu intended to give her was this? Such a gift would indeed be incredibly generous!

Fang Mu must have used exceptionally precious supplies!

Fang Mu using such supplies must certainly have been prompted by Master Qixing.

Actually, Qi Yue had always doubted the idea of cooperation between Master Qixing, the Beast Controlling Force, and even the Sea Clan.

From Qi Yue's perspective, the three factions each had their own interests, and in cooperation, they would inevitably focus only on their own benefits.

Perhaps short-term cooperation won't cause any issues, but over the long term, it could very well lead to grudges arising from the partnership, eventually resulting in disputes.

But now, Qi Yue began to understand Master Qixing somewhat.

Master Qixing helping her to break through the barrier showed that Master Qixing was not just concerned about the conflicts between Humans and the Beast Controlling Force; Master Qixing truly had a vision of the bigger picture!

Qi Yue did not dare claim that Master Qixing could truly achieve peaceful coexistence among Humans, the Beast Controlling Force, and the Sea Clan,

but in terms of exploiting the other side of the Sea of Domains' Dimensional World, Master Qixing would surely be able to cleverly balance the relationship between the three factions.

Qi Yue, standing up, bowed deeply to Fang Mu.

"Thank you, Sir Jianmu, for the gift you have given me. I hope Sir Jianmu can convey my gratitude to Master Qixing when you return!"

"Master Qixing has granted me a life-changing favor for which I can never fully repay, but I cannot make no gesture of thanks."

"In fact, the channel connected to that Dimensional World exists not only in the Sea of Domains but also deep in the God-breaking Mountain Range."

"The Emperor Beast Court has controlled this entrance, and they have already dispatched two squads into this Dimensional World."

"The first squad did not succeed in going deep but returned; the second squad encountered a siege by a massive number of Dimensional Creatures on the fourth day of exploration."

"The second squad barely managed to return wounded to the entrance, having lost two members."

"Because of the losses sustained by the second squad, the Emperor Beast Court has not arranged for a third squad, and the channel in the Sea of Domains has very poor connectivity, with Dimensional Creatures being severely damaged when they pass through."

"The connectivity of this channel only strengthens during certain tidal events."

“If we wish to exploit this Dimensional World long-term, relying on the channel in the Sea of Domains is definitely not going to work.”

“Our Prayers to the Cyan Deer Clan have sent people to join these two squads, possessing many firsthand details about the Dimensional World, and have obtained some special items in this world.”

“I believe the things obtained by our Qi Tian Pale Deer clan in this Dimensional World should be useful to Master Qixing!”

Chapter 1425: Resonance of the Destiny Guardian Beast!

Qi Yue revealed a resolute expression when she shared this information with Fang Mu.

Indeed, Qi Yue had made up her mind to divulge this information to Fang Mu.

If Fang Mu hadn't helped Qi Yue break free from the constraints of her bloodline, enabling her to see the possibility of stepping into the Gods' Domain, and thus understand the layout of Qixing,

Then even if the Qi Tian Pale Deer clan and Qixing collaborated, and Qi Yue was under Qixing's control, she could have chosen not to reveal this information.

This passage, controlled by the Emperor Beast Court and connecting to the Dimensional World, is the core secret of the Beastmaster world, and the information and intelligence held by the Qi Tian Pale Deer clan have all been bought with blood.

Upon hearing this, Fang Mu's face first registered surprise, then his heart surged with joy, and the light in his eyes shone even brighter than before.

While staying in the Han Yang Empire, Fang Mu had the Soul Whale Princess take him to the vicinity of the portal connecting the Sea of Domains to the Dimensional World.

Shu Liangjun and Jun Feng, following alongside Fang Mu, sensed the spatial energy around the portal and both remarked that the spatial energy here was too chaotic.

Shu Liangjun even said that with the current state of spatial energy, if one were to attempt teleportation through this portal, even a Diamond Rank Guardian Beast would be torn to pieces, only a Beast of Sequence Level might be capable of barely making it through, but would also sustain significant injuries.

This vexed Fang Mu greatly.

It is known that the tides are still in their active stage, and it would certainly become more difficult to travel through the portal after the tides subside.

Fang Mu had been pondering how to conquer the challenge of the portal that connects to the Dimensional World in the Sea of Domains.

As the saying goes, with mountains heaped and waters duplicating there seems to be no way out, then suddenly willows darken and flowers brighten and another village appears, Fang Mu after deciding to collaborate with Qi Yue, found a way to solve the portal dilemma.

Through the content expressed by Qi Yue, Fang Mu learned that the Emperor Beast Court controls a passage that can communicate bidirectionally with the Dimensional World.

And that the Emperor Beast Court has already organized personnel to explore the Dimensional World twice, obtaining much valuable intelligence.

Since this was a group action by the Emperor Beast Court, all major Beast Controlling Forces within it sent personnel, so the higher-ups in the court must be aware of the situation.

Before contacting Qi Yue, Fang Mu had two subordinates within the Beast Controlling Force whose ranks were exceptionally high, one is the Clan Leader of the Bamboo Green Pale Deer clan and the other is Zhuo An, who serves as the chair of the Eternal Dark Council among the eight major councils in the Emperor Beast Court.

Zhuo An regularly contacts Fang Mu via Legend Butterfly, providing Fang Mu with some intelligence.

But among these intelligence reports, there wasn't any content relating to this passage.

The Clan Leader of the Bamboo Green Pale Deer clan was unaware of Fang Mu's intention to explore the Dimensional World, but Zhuo An knew.

Regarding the core information and intelligence of the Emperor Beast Court, Zhuo An did not divulge any to Fang Mu, and this held no surprise for Fang Mu.

Zhuo An, compelled by a lack of alternatives, was controlled by Fang Mu, and while under Fang Mu's control, Zhuo An had indeed delivered Fang Mu some resources, so that Zhuo An, even while controlled, would try to please Fang Mu in hopes of obtaining more resources.

However, Zhuo An's heart still belonged to the Emperor Beast Court; even under Fang Mu's command, he wouldn't actively betray the court.

Fang Mu didn't blame Zhuo An for this; when Fang Mu needed Zhuo An to exert effort, Zhuo An truly had, and even nearly lost his life.

All of these were Zhuo An's contributions, and Fang Mu took notice.

Only in the future, as interactions between Fang Mu and the Beast Controlling Forces become more frequent, Zhuo An's status under Fang Mu would continue to fall further, without the benefits of an old subordinate under Fang Mu's banner.

"Miss Qi Yue, I am in great need of the information and intelligence regarding the Dimensional World; my mentor would certainly find the data on the Dimensional World immensely interesting."

"In recent years, the mentor has devoted his energy to researching the Dimensional World, especially this tidal phase which has further stimulated his interest in it."

"In due course, I will tell my mentor about Miss Qi Yue volunteering the information about the Dimensional World."

“I imagine that once the mentor learns about this, he will certainly reward Miss Qi Yue, and perhaps even help Miss Qi Yue with your journey to the Gods’ Domain!”

Qi Yue had no intention of expecting any return when she shared this information with Fang Mu, but regarding the reciprocal outcome from Qixing, not only would she not refuse, her heart was filled with exceptional anticipation.

Qi Yue was acutely aware of how great Qixing’s aid could be on her path to the Gods’ Domain.

At this moment, Qi Yue only heard Fang Mu continue to ask her.

“Miss Qi Yue, since the Emperor Beast Court has already deployed personnel twice to explore the Dimensional World, how is the security situation there?”

“I have plans to enter the Dimensional World through a special passage for exploration soon; would Miss Qi Yue be capable of facilitating this for me?”

With these words, Fang Mu was basically making a direct request to Qi Yue.

Qi Yue did not expect that after expressing her intent to learn about the passage, Fang Mu would immediately voice his desire to enter the Dimensional World.

This was something within Qi Yue’s capability to manage.

After clarifying the situation to Fang Mu, Qi Yue would not conceal it from the Emperor Beast Court.

Originally, Qi Yue was planning to use this opportunity to promote cooperation between the Emperor Beast Court and Qixing, but regarding Fang Mu’s proposal, Qi Yue was extremely hesitant and even a bit apprehensive.

Chapter 1426: Resonance of the Destiny Guardian Beast!\_2

Qi Yue was very afraid that Fang Mu's safety would be compromised after entering the Dimensional World.

Even though the Dimensional World does not seem overly dangerous based on what the Emperor Beast Court currently knows, Qi Yue still can't make such a guarantee.

"Sir Jianmu, if you wish to enter the Dimensional World to explore, I can help you facilitate this. However, if you truly want to explore the Dimensional World, you must also inform Master Qixing about the situation!"

"Only after Master Qixing agrees to your exploration of the Dimensional World and arranges enough military support for you can I be at ease."

"To speak plainly, if your safety in the Dimensional World is compromised, neither I nor the Emperor Beast Court can bear that responsibility."

"Honestly, I can't offer you much advice with regards to safety in the Dimensional World."

"The Emperor Beast Court has only conducted two explorations, and much of the information obtained is very one-sided."

"Treating such one-sided information as intelligence is a major taboo when exploring unknown environments!"

Hearing this, Fang Mu smiled. Through Qi Yue's words, Fang Mu knew that Qi Yue was a person who handled matters with great meticulousness and prudence.

"Miss Qi Yue, rest assured, if I were to explore the Dimensional World, I would certainly be accompanied by God-REALM Experts."

"Otherwise, I would not put myself in hazardous situations."

“The information about this Dimensional World that you’ve shared is an unexpected delight for me.”

“I am interested in contracting a Praying Sky Cang Lu as my partner, and I will provide the best supplies for it.”

“May I ask what are your thoughts on this, Miss Qi Yue!?”

Had someone else made such a request to Qi Yue, she would have been extremely angry.

To the free Beast Taming Tribes, the act of humans contracting Guardian Beasts is a hugely shameful matter, but if the individual were replaced by Fang Mu, the disciple of a Saint Creator, it would be entirely different.

Whether in the Human World or the Beastmaster World, alliances are always forming.

Guardian Beasts and humans cannot intermarry, but allowing Fang Mu to contract a Praying Sky Cang Lu is akin to bridging the relationship between Fang Mu and the Qi Tian Pale Deer clan.

Considering Fang Mu’s standing with Master Qixing, the Praying Sky Cang Lu that gets contracted by him is very likely to be more outstanding than the leaders of the younger generation of the Qi Tian Pale Deer clan that are carefully nurtured by themselves.

“If Sir Jianmu intends to explore the Dimensional World, you will surely need to visit the territory of our Qi Tian Pale Deer clan.”

“I will gather all the eligible young generation of the clan and let you choose for yourself.”

“Choosing a Contract Guardian Beast surely also requires a certain affinity. Whichever young member of the Praying Sky Cang Lu is chosen by Sir Jianmu, I will grant them the position of High Priest within the Qi Tian Pale Deer clan.”

“The High Priest is considered the foremost figure under the Great Priest.”

Hearing Qi Yue so readily agreeing to his request, Fang Mu reached out his hand very earnestly and said.

“Miss Qi Yue, you will certainly feel happy about today’s choice in the future.”

“The Qi Tian Pale Deer clan will thrive under your leadership and become one of the top forces in the Emperor Beast Court!”

“I believe you will see the day I speak of!”

Qi Yue smiled upon hearing Fang Mu’s words.

“I already feel honored by my choice!”

“You have restored a thousand years of my lifespan and provided me with so many resources; I am confident that the Qi Tian Pale Deer clan has a bright future!”

“With that in mind, I shall go back and make preparations. Contact me when you’re ready!”

After Qi Yue left, Fang Mu let out a sigh of relief. Meeting with Qi Yue brought Fang Mu significant gains, and he could feel that Fool’s Shadow was becoming increasingly active.

This indicated that Fool’s Shadow was getting closer to a Mythical Breed.

Fang Mu looked forward to the enhancement of Fool’s Shadow’s quality, which could potentially bring great benefits to his exploration of the Dimensional World.

Qi Yue left the Mechanism Fortress first, and after she was gone, Fang Mu collected the Mechanism Fortress before leaving.

Jun Feng could tell from Fang Mu's expression that everything must have gone smoothly.

"Little Wood, with Master Qixing able to subdue someone like Qi Yue, the cooperation between the Beast Controlling Force and Master Qixing is sure to become even closer!"

"Master Qixing must be well aware, but I have to remind you that in all previous cooperations between humans and the Beast Controlling Force, not only have humans not gained any advantage, but they have also suffered quite a few losses."

"As for the losses we humans have suffered, the Beast Controlling Force not only refuses to acknowledge them, but also believes that they have borne even more losses on their side."

Jun Feng treated Fang Mu as if he were his junior, giving Fang Mu his wholehearted advice. Otherwise, there would be no need for Jun Feng to remind Fang Mu of these matters.

Fang Mu took Jun Feng's words to heart, and he could roughly guess why such a situation would arise between humans and the Beast Controlling Force.

Both humans and the Beast Controlling Force were completely standing on their own grounds, and under such circumstances, neither side would consider the other's interests in cooperation.

And both sides were desperately trying to safeguard their own interests.

When both sides have invested human resources and supplies, it's normal to feel that their own side has come up short after deducting the costs.

Fang Mu, whether in cooperation with humans or the Beast Controlling Force, always had his own scale in mind.

Fang Mu would not allow this scale to be unbalanced, and he certainly wouldn't let others take advantage of him in cooperation.

“Uncle Feng, I have my priorities straight. My cooperation with the Beast Controlling Force isn’t charity; I will definitely prioritize my own interests.”

“The Beast Controlling Force has an entrance to the Dimensional World, and I plan to explore the Dimensional World soon.”

“I’ll need Uncle Feng to accompany me when the time comes!”

After finishing speaking to Jun Feng, Fang Mu turned to Shu Liangjun and said,

“Elder Shu, let’s head straight back to Half Mountain Manor. When we get back, please inform She Wan that there’s no need for her to rush back and she can spend a few more days with the family.”

“I need to go into seclusion for some time after returning to Half Mountain Manor.”

The tremors of Fool’s Shadow were becoming more intense, as it had already digested the contents of more than two hundred Spirit Capturing Boxes filled with Extraterrestrial Embryos.

Among them, there were undeniably the presence of S-class Alien Embryos.

Fang Mu’s Covenant Blood Essence was limited. After contracting the King-level exotic body, the Tianyuan Qiongyan, with his Covenant Blood Essence, he lost interest in contracting those S-class Alien Embryos.

These S-class Alien Embryos became the fodder for the Fool’s Shadow to break through in quality.

The main purpose of Fang Mu’s upcoming seclusion was to use these continually obtained Extraterrestrial Embryos to completely advance the quality of Fool’s Shadow.

It was just right for Fang Mu to use the Extraterrestrial Embryos to cultivate the Tianyuan Qiongyan to its prime state before exploring this Outer Realm world.

In order to be safe, Fang Mu, who was planning to travel to the Dimensional World through the barrier, would certainly contact Lian Dai to accompany him.

Fang Mu believed Lian Dai would not refuse him, but it was necessary for Fang Mu to explain the matter to Lian Dai.

As the King of Han Yang Empire, Lian Dai was undoubtedly extremely busy on a daily basis, with many matters to attend to.

Informing Lian Dai in advance would allow her to finish her tasks ahead of time and free up her schedule for Fang Mu without affecting her substantive work.

Back at Half Mountain Manor, Fang Mu began his seclusion. During his seclusion, in addition to customarily receiving the Extraterrestrial Embryos from the Ten-thousand Nations Federation and Han Yang Empire, Fang Mu no longer paid attention to any external affairs.

Fang Mu, situated in the cultivation chamber, hadn't returned to the Second World for a duel since entering the Hall Stage of those under the age of twenty.

As time fermented, Fang Mu's fame in the Second World showed signs of trending on the Battle Network.

On the Battle Network, Fang Mu was a hands-off shopkeeper, and he was similar in the Second World, much to Liu Tiantian's helplessness.

However, Liu Tiantian understood Fang Mu very well.

As a disciple of the Saint Creator, Fang Mu surely had many things to be busy with on a daily basis, far from being as leisurely as she imagined.

At this moment, Fang Mu had no intention of dealing with happenings in the Second World. With the tremors of Fool's Shadow intensifying, a mysterious gray mist also began to shroud Fang Mu.

At that moment, a strange resonance formed between Fang Mu and Fool's Shadow.

Chapter 1427: 2 Innate Divine Abilities!

Fang Mu could feel his Destiny Guardian Beast, Fool's Shadow, continuously feeding back a stream of energy to him, causing Fang Mu's figure to also gradually become ethereal.

Fang Mu stretched out his hand and discovered that it could actually pass through his own ethereal body.

Previously, Fool's Shadow had not granted Fang Mu this ability to become intangible.

Now, Fool's Shadow had provided Fang Mu with an additional ability, suggesting that after absorbing the Extraterrestrial Embryos for such an extended period, it had finally completed its upgrade in quality, ascending from Legendary Quality to Mythical Quality.

The fully upgraded Fool's Shadow appeared largely unchanged in its outward appearance from before, instead it seemed even less perceptible.

Fang Mu used the Eye of Omniscience to investigate Fool's Shadow.

[Beast Name]: Fool's Shadow

[Beast Species]: ???

[Beast Level]: Silver (1/10)

[Beast Element]: Mystery

[Beast Potential]: ???

[Beast Quality]: Mythical

Skill:

[Breath Convergence]: Passively, it can autonomously shield its own spiritual power fluctuations. When actively activated, it completely conceals its own aura, making itself undetectable.

[Fool's Intuition]: Actively initiating this skill will enter Fool's state. Being in Fool's state continuously consumes one's own spiritual power, but while in Fool's state, one can discern truth from falsehood during conversations with other targets.

Exclusive Traits:

[Twilight of the Gods]: Anchor a target as a god, weaken the anchored god target, enhance one's own lethality against the god, and reveal the target's weaknesses; judge the target's next move based on changes in their body, nerves, blood flow, and breath. Once cast, the targeted god must be slain or the effects of Twilight of the Gods cannot be lifted and cannot be cast on the next target.

[Order Realm Peeking]: Tear open a notch to a higher dimension world, to lure and search for the younglings of higher dimension creatures, bringing these younglings of the higher dimension world into the present world.

① If one's consciousness suffers devastating damage in the higher dimension world, it interrupts the journey in that higher dimension world, causing the consciousness to return to the original body, unable to bring back a life from a higher dimension.

② If one's consciousness is damaged and forcefully brings back a young creature from a higher dimension world, one has to endure trauma to the soul and consciousness.

[Dimension Monarch]: In the process of exploring and conquering a dimensional world, one's integration level with that dimension world will gradually increase. When the integration level with a dimensional world reaches or surpasses sixty percent, one can manipulate the rules of that dimension, and at eighty percent or above, one can become the Dominator of that dimensional world. Reaching

complete integration, Fool's Shadow will absorb the dimensional world and store it within itself as an energy source.

[Dimensional Passage]: Choose a dimensional world and use the power of a high dimension world along with one's own aura to establish an immovable channel that enables transportation between the dimensional world and the real world (only one channel can be established per dimensional world).

Innate Divine Ability:

[Eye of Omniscience]: When the target's Life Level does not exceed one's own and the tier is no more than five tiers above one's own, one can datafy and investigate the target's condition.

[Ethereal Wandering]: Render one's body incorporeal; the intangible body is immune to physical and Elemental Damage, and the intangible body can break through restrictions, immune to any factors that hinder breaking external restrictions.

Upon investigation, Fang Mu found that his Destiny Beast, Fool's Shadow, had acquired a new Innate Divine Ability.

The element that had been continuously displayed as "?" in the data now revealed Fool's Shadow's element to be Mystery.

Fang Mu didn't know what Mystery meant, but just by looking at the name of this element, he knew that this previously undiscovered element was no simple matter.

Blood of Abundance has not yet revealed its element; perhaps when Blood of Abundance ascends to Mythical Quality, its element will also become apparent.

Looking at the new Innate Divine Ability acquired by Fool's Shadow, Fang Mu fell into deep thought.

His own Destiny Guardian Beast was different from others' right from the start. With Fool's Shadow manifesting a second Innate Divine Ability, Fang Mu was uncertain whether all Destiny Guardian Beasts

that advance to Mythical Quality would obtain new innate abilities, or if Fool's Shadow was just too exceptional.

His own body's intangibility came from the newly acquired Innate Divine Ability [Ethereal Wandering] of Fool's Shadow.

[Ethereal Wandering] not only allows one to counter physical and elemental damage with an incorporeal body but also allows one's body to become completely insubstantial, able to easily pass through any barrier and restriction.

This means that even without the channel connected to the dimensional world held by the Emperor Beast Court, Fang Mu could still travel between the dimensional world and the real world through the channels in the Sea of Domains during periods of weak tides.

This Innate Divine Ability fits well with what Fang Mu has to do next; it's like being given a pillow when feeling sleepy.

Although he no longer needs to use the channel controlled by the Beast Controlling Force thanks to [Ethereal Wandering], Fang Mu's original intention to affiliate with the Beast Controlling Force wasn't for the channel.

When Fang Mu opted to try to forge ties with the Emperor Beast Court through the High Priest, Qi Yue of the Qi Tian Pale Deer clan, he had no idea such a channel existed.

Chapter 1428: The 2nd Innate Divine Ability!\_2

For better exploration and development of the Dimensional World, the power of the Beast Controlling Force is indispensable to Fang Mu.

Fang Mu wishes to explore the Dimensional World because his Destiny Beast, Fool's Shadow, acquired the unique attribute [Dimension Monarch] upon ascending to Legendary Quality.

The deployment of [Dimension Monarch] requires Fang Mu to enhance his integration with the Dimensional World through its conquest and strategy.

Fang Mu alone certainly cannot conquer the Dimensional World that borders the Beastmaster World.

Currently, Fang Mu is not aware of the full scale of the Dimensional World map, and even if a Dimensional World's map is small, it would still be difficult for Fang Mu alone to conquer this world.

The stronger the forces gathered by Fang Mu, the more he can improve his integration with the Dimensional World during exploration.

Therefore, Fang Mu will not give up on forging ties with the Beast Controlling Force just because Fool's Shadow has ascended in quality.

Fool's Shadow, upon ascending to godlike quality, gained the unique attribute [Dimensional Passage], which allows Fang Mu to use the energy within the Dimensional World to open a transport pathway that can be activated at any time after entering the Dimensional World.

This allows Fang Mu to transport between the Beastmaster World and the Dimensional World at any time.

This capability makes it more convenient for Fang Mu to explore the Dimensional Worlds that border the Beastmaster World.

No longer is there a need to enter this Dimensional World through the transport channels controlled by the Beast Controlling Force and the Sea Clan.

However, the unique attribute [Dimensional Passage] has two drawbacks; firstly, a conduit can only be established once in a Dimensional World, and this conduit cannot be moved.

And each time, it can only be bound to one Dimensional World.

Wanting to unbind from a Dimensional World will cause this unique attribute to be unusable for a long period of time.

Unless Fool's Shadow successfully absorbs this Dimensional World, but how easy is it for Fool's Shadow to absorb a Dimensional World?

To achieve that, the integration of Fool's Shadow with the Dimensional World must reach one hundred percent!

Fang Mu has not yet conquered a Dimensional World, but from the introduction of the unique attribute [Dimension Monarch], becoming a Dominator requires only an eighty percent integration.

After becoming a Dominator, raising the integration from eighty percent to one hundred percent would inevitably be extremely difficult.

However, this doesn't mean that the unique attribute [Dimensional Passage], gained when Fool's Shadow ascended to godlike quality, is useless.

On the contrary, [Dimensional Passage] allows Fang Mu to conquer new Dimensional Worlds in addition to the current one bordering the Beastmaster World, especially when linked with [Order Realm Peeking].

[Order Realm Peeking] indeed connects Fang Mu to higher Dimensional Worlds, but Fang Mu's power is also accumulating continuously.

As a guest and observer through [Order Realm Peeking], Fang Mu can travel across various Dimensional Worlds and select a relatively weaker Dimensional World.

Using the unique attribute [Dimensional Passage] to connect with this Dimensional World, he can create his own force inside it and gradually consume this world.

After Fool's Shadow ascends to godlike quality, Fang Mu no longer needs to suppress the rank of his Destiny Beast, Fool's Shadow.

This time, upon ascending to godlike quality, Fool's Shadow opportunistically broke through the Copper Level limit and became a genuine Silver Stage Guardian Beast.

The skill acquired by the heart, [Fool's Intuition], is often more useful than the skill [Breath Convergence].

For most Beast Masters in the Beastmaster World, acquiring resources from the Creator is the hardest thing.

However, for Fang Mu, the hardest thing has always been discerning people's intentions.

[Fool's Intuition] allows Fang Mu to effectively discern the truth from falsehood in people's words during conversations.

Even if it cannot enable Fang Mu to obtain genuine intelligence, it can at least keep Fang Mu from being deceived and falling into traps.

Fang Mu was very satisfied with the skills acquired by Fool's Shadow, as well as its exclusive characteristics and Innate Divine Ability, which elevated the quality of the Guardian Beast to a godlike quality, a pursuit already achieved by Peak Order Practitioners.

As a minor Two-Ray Star Beast Controller, Fang Mu had already accomplished what those Peak Order Practitioners sought, fulfilling a fundamental criterion to step into the Divine Realm.

Fang Mu stretched lazily; assisting Fool's Shadow in its quality enhancement had cut down his sleeping hours to less than three hours a day.

The demand for Extraterrestrial Embryos by Fool's Shadow had decreased after its quality improvement, but that did not hinder Fang Mu from dealing with those Extraterrestrial Embryos.

The King-level Alien Creature Sky Abyss Pupil had replaced Fool's Shadow and began frenziedly devouring and absorbing those Extraterrestrial Embryos.

These Embryos contained relatively pure Special Energy, and Xi Xi was also digesting these embryos to purify the Special Energy.

Under such cultivation by Fang Mu, the strength of the King-level Alien Creature Sky Abyss Pupil was visibly improving at a rapid pace.

If the now-powerful Sky Abyss Pupil were to encounter Bu Jue again, even if its strength still fell short compared to Bu Jue, it would no longer end up as distressed as before.

Time flew by, and half a month had passed; Fang Mu contacted Qi Yue through the Legend Butterfly. During this period, Qi Yue had reached out to Fang Mu twice without volunteering any information about her activities within the Emperor Beast Court.

Now that Fang Mu had settled his affairs, it was time to inquire about the progress with Qi Yue.

Qi Yue was standing gloomily next to the altar; usually, at this time, Qi Yue would be absorbing the energy emitted by heavenly bodies within the altar, but tonight, Qi Yue was not in the mood.

Since her return, the Emperor Beast Court had been holding meetings almost every two days, where Qi Yue had suggested allying with Qixing and proposed cooperation between the Emperor Beast Court, Humans, and the Sea Clan to jointly explore and open the Dimensional World's channels.

Qi Yue saw no issues with her proposal and believed it beneficial for the Emperor Beast Court in the long run, but she faced considerable opposition from many high-ranking members of the Court.

Initially, Qi Yue thought the other leaders were just averse to working with Humans, much like Qi Yue herself was at the beginning.

Qi Yue hoped that after this meeting, the high-ranking members would reconsider the pros and cons and change their stance.

Qi Yue had anticipated resistance to her proposal, but she hadn't expected it to be this substantial!

Yesterday, a vote during the Emperor Beast Court's meeting clearly rejected Qi Yue's proposal.

Over two-thirds of the high-ranking members disagreed with opening this channel connecting to the Dimensional World for Humans and the Sea Clan.

The Beast Controlling Force had already given up explorations of the Dimensional World, and the major clans were unwilling to expend resources on further exploration.

They were even more unwilling to risk their powerful members in the exploration of the Dimensional World.

The initial two explorations into the Dimensional World were conducted with full vigor, but despite considerable sacrifices, they yielded little in terms of resources.

Qi Yue was disgusted by this shortsightedness to cling to something they were no longer interested in exploring.

A proposal rejected by the Emperor Beast Court could not be brought up again for three years, leaving Qi Yue at a loss for how to explain the situation to Fang Mu until he approached her.

Upon connecting, Qi Yue did not exchange pleasantries with Fang Mu but went straight to the point.

"Sir Jianmu, I deeply apologize; I underestimated the complexity of the situation."

"The proposal to explore the Dimensional World jointly with Humans and the Sea Clan has been rejected, and your plan to access the Dimensional World through this channel held by the Emperor Beast Court will also need to be postponed."

"Do not worry, I will definitely find another way!"

Had Fang Mu heard Qi Yue say this before the advancement of the Fool's Shadow's quality, he would have been very disappointed and would have had to consider further communications with the Emperor Beast Court to achieve his goal.

But now, the refusal from the Emperor Beast Court no longer impacted Fang Mu.

Chapter 1429: The 2nd King-level Exotic Body!

From the tone of guilt and apology in Qi Yue's voice, Fang Mu knew Qi Yue must have considered this matter of great importance.

The Emperor Beast Court did not approve Qi Yue's proposal, and there was nothing Qi Yue could do about it.

As the High Priest of the Qi Tian Pale Deer clan, Qi Yue could extend her influence over the entire Cyan Deer Tribe, but she could not make decisions for the Emperor Beast Court.

Since the Emperor Beast Court was unwilling to overly collaborate with humans and the Sea Clan, and insisted on guarding this dimensional channel, let them guard it.

If Qi Yue were to press further after being rejected in advance, it would make the Emperor Beast Court feel that this side is overly eager to explore the dimensional world.

Fang Mu did not want the Emperor Beast Court to think they could leverage this matter, as it would be extremely detrimental to future collaboration.

What Fang Mu needed to do now was first understand this dimensional world adjacent to the Beastmaster world; everything else could be decided thereafter.

"Miss Qi Yue, collaboration between humans, the Sea Clan, and your Emperor Beast Court representing the Beast Controlling Force to explore the dimensional world is, no matter how one looks at it, a win-win strategy."

“I don’t know how long the Emperor Beast Court has discovered this channel, but who can guarantee it won’t have tidal phenomena like the dimensional channel in the Sea of Domains!?”

“At that time, I hope your Emperor Beast Court can find a way to combat external pollution while resisting those outworld creatures.”

“Otherwise, when those outworld creatures wildly contaminate the land and environment, imagine how many Beast Taming Tribes will lose their homes!”

“Beasts inherently have territorial awareness; those displaced Beast Controlling Forces will migrate everywhere, and Ms. Qi Yue, you should be able to foresee the friction and chaos that might occur during these migrations.”

With these words, Fang Mu clearly pointed out the crisis the Emperor Beast Court might face in the future, without showing any overt threat, while still expressing dissatisfaction with their decision.

Qi Yue sighed softly; this was the first time she realized that internal issues existed within the Emperor Beast Court.

However, the decision had already been made and could not be changed. Qi Yue was well aware that forcing the matter would likely prove fruitless.

Just as Qi Yue prepared to speak, she heard Fang Mu continue.

“Miss Qi Yue, since the Emperor Beast Court rejected your proposal, you don’t need to take the initiative to facilitate tri-party collaboration.”

“Instead, you can help me with some other matters!”

Fang Mu’s words gave Qi Yue a sense of relief, and she quickly responded.

“Sir Jianmu, if there’s anything you need me to handle, please just say the word! I couldn’t accomplish this task, but I will surely strive to meet your other requests!”

“May I know what else you would have me do, Sir Jianmu?”

Fang Mu lightly tapped the table twice with his fingers and said to Qi Yue,

“Since the Emperor Beast Court does not agree to tri-party collaboration, there’s no need for me to pursue my current itinerary. Miss Qi Yue, why don’t you personally go and bring me all the information you can obtain about the dimensional world.”

“You should have harvested some high-level extraterrestrial embryos from the dimensional world; aside from the S-rank embryos, do you have anything of an even higher level?”

The Qi Tian Pale Deer clan had internal records relating to the dimensional world, and recently Qi Yue had mobilized her network to collect additional intelligence.

These records and intelligence within her own clan had already been prepared for Fang Mu to review, so making another trip to the Dragon Rising Federation was not an issue for Qi Yue.

Since Fang Mu couldn’t come to the Qi Tian Pale Deer clan territory to select young members to form contracts with, she would just bring the younger generation of the Qi Tian Pale Deer clan to him!

News had circulated that a tidal phenomenon had brought a King-level Exotic Body into the Sea of Domains, which had caused significant losses to the Ten-thousand Nations Federation.

One of the three Saint Creators among humans, Han Ming, and the Han Yang Empire’s King Lian Dai, had even disputed over the ownership of this King-level Exotic Body.

Lian Dai ultimately refused to hand over the King-level Exotic Body to Han Ming, which seemed to be the reason Fang Mu learned of the existence of Outer Realm bodies beyond S-level.

Fang Mu's inquiry likely indicated his intent to obtain high-level extraterrestrial embryos from Qi Yue.

"Sir Jianmu, there indeed are extraterrestrial embryos beyond S-level. Our Qi Tian Pale Deer clan possesses one."

"This was obtained at the cost of the life of one of our Order Level warriors during exploration of the dimensional world. Different forces rarely disclose the resources they acquire."

"However, I believe other Beast Controlling Forces may also have acquired embryos beyond S-level!"

"If you want a King-level Exotic Body, I can present the one our Qi Tian Pale Deer clan has obtained to you."

"Other tribes' King-level Exotic Bodies might be impossible for me to trade for."

"Because of the dispute between Han Ming and Lian Dai over the King-level Exotic Body before, all major Beast Controlling Forces now regard King-level Exotic Bodies as extremely precious supplies."

Upon hearing this, Fang Mu raised his brows; the Qi Tian Pale Deer clan indeed had a King-level Exotic Body!

Being able to gain another King-level Exotic Body was already more than sufficient for Fang Mu.

Before fully understanding the situation of this dimensional world, Fang Mu did not plan to cultivate too many outworld creatures.

Fang Mu remained uncertain whether the King-level outworld beings he cultivated could truly be of help to him in the dimensional world.

"Miss Qi Yue, then I appreciate your willingness to present this King-level Exotic Body to me!"

“When can you arrive at the Dragon Rising Federation?”

Chapter 1430: The 2nd King-level Exotic Body!\_2

“I hope you can come quickly; I will be heading to the Han Yang Empire soon!”

Upon hearing this, Qi Yue hurriedly replied,

“Sir Jianmu, I had already prepared everything during the days we were awaiting news from the Emperor Beast Court.”

“If I set out now, I can definitely reach the Dragon Rising Federation by tomorrow evening!”

“Shall we still meet at the same manor in Lu City as before?”

Fang Mu’s relationship with Qi Yue had entirely transformed compared to before. Fang Mu provided the address of Half Mountain Manor to Qi Yue, instructing her to head directly there. Fang Mu would wait for her at the manor.

After ending his communication with Qi Yue, Fang Mu connected with Lian Dai through the Guardian’s contract.

“Aunt Dai, you were right—just as you predicted, the Emperor Beast Court didn’t approve this proposal.”

“You need not make a pointless trip to me. In a few days, I will be heading to the Han Yang Empire!”

Lian Dai quickly responded to Fang Mu through the Guardian’s contract:

“Little Wood, do you know why I came to such a conclusion?”

“I made this judgment because I understand the situation at the Emperor Beast Court. Unlike the Four Sea Countries of our Sea Clan, the Emperor Beast Court is composed of multiple beast-controlling forces, making internal authority fragmented.”

“Even if this proposal could tempt many of the beast-controlling forces, those forces must consider not only the pros and cons of cooperating but also what benefits such cooperation would bring to their respective clans.”

“From a defensive perspective, those beast-controlling forces whose territories are far from the dimensional rift would gain less benefit, and they themselves wouldn’t face an immediate crisis.”

“Moreover, the relationship among various beast-controlling forces leans more toward competition than cooperation. This proposal’s approval is simply impossible!”

“The Qi Tian Cang Lu Clan certainly has competitors within the beast-controlling forces who would obstruct the proposal.”

“How could those opponents possibly allow the Qi Tian Cang Lu Clan to establish a relationship with a human Saint Creator?!”

As the ruler of the Han Yang Empire, Lian Dai’s keen foresight revealed itself at this moment. Her tone carried a hint of disdain toward Qi Yue.

Although Qi Yue, as the High Priest of the Qi Tian Cang Lu Clan, was undeniably powerful, her judgment and foresight regarding broader situations were clearly lacking.

To think she hadn’t even considered such a basic issue before presenting this proposal!

Fang Mu chuckled at her remarks but refrained from commenting further, for he himself held an overly optimistic outlook on this collaboration.

This revealed that Fang Mu, too, had underestimated the complexities of the situation.

“Aunt Dai, in the future, we will have ways to make the beast-controlling forces actively seek cooperation with us. Let’s hope they won’t regret today’s decision then!”

Lian Dai had zero doubt about Fang Mu’s assertion. In her eyes, this Dimensional World was no less than an enormous trap.

The Han Yang Empire under her rule had already paid a steep price for it. Who could guarantee that the passage controlled by the beast-controlling forces would remain safe in the future?

Fang Mu was already preparing to explore the Dimensional World. From a spatial-science perspective, the boundary area where the Beastmaster World and Dimensional World connected wouldn’t be extensive.

Otherwise, the collision between the two worlds would surely have caused much greater repercussions!

Fang Mu planned to enter the Dimensional World from the rift at the Sea of Domains. After some exploration, it should be possible to discover the entrance to another passage.

Even if there weren’t any extraterrestrial creatures intending to invade this passage, Fang Mu could artificially instigate a beast tide!

At that point, the problems troubling the Emperor Beast Court would naturally compel them to seek Fang Mu’s help.

By then, wouldn’t the Emperor Beast Court be at Fang Mu’s mercy?

“Little Wood, none of these are real issues. When the opportunity arises, I will also put pressure on the beast-controlling forces for you.”

“The immediate question is, are you truly prepared to explore the Dimensional World?”

“Exploring the Dimensional World is an extremely dangerous endeavor. If you’re intent on venturing inside, I can go in your stead and report everything I witness back to you!”

“There’s no need for you to take such a risk yourself—I cannot ensure your safety with absolute certainty.”

Lian Dai, who had unwavering confidence in her own strength, especially after refining her bloodline, could feel her power growing day by day.

Yet, even she dared not guarantee anything against the unknown threat that was the Dimensional World. If something untoward happened while assisting Fang Mu, not only would she be unable to explain to Qixing, but she also did not wish for Fang Mu to face danger!

Fang Mu responded earnestly and resolutely:

“Aunt Dai, I must personally venture into the Dimensional World through this spatial corridor. If I don’t personally explore it, how can I help my master gauge the strength of this dimension? If I were afraid of danger, I wouldn’t embark on this mission at all!”

“Rest assured, Aunt Dai, I have my contingencies. Should I exhaust all my trump cards, I will proactively call off the exploration!”

“This time, I’ll only bring you and Elder Shu along. Our minimal team makes it less likely for us to become targets of those extraterrestrial entities.”

Bringing only Lian Dai and Shu Liangjun along had been a calculated decision by Fang Mu. Though Shu Liangjun’s combat prowess wasn’t particularly strong, his expertise in spatial teleportation made him invaluable during travel and marking specific points during exploration.

Lian Dai, being the strongest person connected to Fang Mu, would also face less pressure ensuring their safety with a smaller team.

As for the Peak Order Practitioner, Jun Feng, though he would undoubtedly be helpful in the Dimensional World, his presence was required at Half Mountain Manor to defend against any sudden issues that emerged while they were away.

Seeing Fang Mu's resolve regarding the journey, Lian Dai refrained from dissuading him further.

On a personal level, she was also interested in exploring the Dimensional World.

However, if she were on her own, she wouldn't dare take such a risk.

With Qixing's support in the background, Lian Dai could proceed with much greater peace of mind.

The Emperor Beast Court had already organized two exploration teams for the Dimensional World, yet without suffering significant losses.

This indicated that the overall power of the Dimensional World wasn't particularly formidable. As a God Territory Powerhouse, she only needed to remain sufficiently cautious.

"Little Wood, I'll make all necessary preparations before your arrival. At present, the state of this corridor is as clear as it can possibly get."

"According to the calculations and observations of our Han Yang Empire, the current tidal surge in the Sea of Domains is at its peak."

"Seizing this moment to explore would be the ideal choice!"

"In the future, attempting exploration might require some additional strategies."

"I'm unaware of the Dimensional Rift's exact position in Emperor Beast Court's territory, but if it's very close to the Qi Tian Cang Lu Clan, perhaps we could enlist Qi Yue's help as the High Priest of the Qi Tian Pale Deer Clan to smuggle us through covertly!"

“Though Qi Yue may lack the capacity to facilitate larger collaborations, she should be able to manage such a small favor for us!”

Hearing this, Fang Mu smiled and replied to Lian Dai:

“When I said I’d no longer cooperate with the beast-controlling forces, it wasn’t just an impulsive statement. Even during low-activity tidal periods, my master has the means to ensure we pass through the corridor smoothly!”

“Even in the most stable conditions, we can traverse this corridor as we please.”

Lian Dai’s expression shifted to one of surprise, yet she had no doubts regarding Fang Mu’s claim.

Qixing, as a Saint Creator, would not make assertions about something he could not accomplish.

This new realization drastically altered the perceived value of the corridor at the Sea of Domains!

From being a potential crisis for the Han Yang Empire, it now stood a chance of becoming a significant opportunity for it.

“Little Wood, I’ll have Longze clear the corridor entrance completely within three days. This passage lies within the boundary zone between humans and the Sea Clan.”

“During our prior alliance talks with the Contract Garden, Han Ming, after I refused to hand over the King-level Exotic Body, had wanted to claim this corridor as part of the Han Yang Empire.”

“I might as well construct a fortress around the passage and thereby isolate it entirely from external forces.”
