

Crazy! Are You Really A Beast Tamer?

#Chapter 16 - 16: 16: Target – National Beastmaster League of High School Graduates!_1 - Read Crazy! Are You Really A Beast Tamer? Chapter 16 - 16: 16: Target – National Beastmaster League of High School Graduates!_1

Chapter 16 - 16: 16: Target – National Beastmaster League of High School Graduates!_1

However, due to the lack of the bond of a contract, it is quite difficult for a Beast Master and the beast to share mutual understanding.

And the Beast Master cannot amplify the beast's strength through the use of Mystic Marks.

Fortunately, the Aromatherapy Rabbit is not a combat Guardian Beast.

Fang Mu decided to cultivate the Rabbit well during the early stages.

As he moved on to using more advanced blood-supplying spiritual materials, there were more and more beasts that could help him recover his Qi and Blood.

Soon, Fang Mu would have an excess of Covenant Blood Essence.

By then, forming a contract with the Aromatherapy Rabbit would be possible.

By that time, the Aromatherapy Rabbit might have even evolved into a Flower Fairy Demon Rabbit.

Jinghai High School for Beast Masters, as a provincial key high school in Jinghai Province, even covers a larger area than Dinghai Mall.

This means that if visiting vehicles could only stop at the school gate, students would have to wait for the school bus to circle back to the gate.

That process would take quite a bit of time and would be very inconvenient.

Therefore, the school allowed vehicles registered with regular transportation companies to enter the school premises.

Despite being only a second-year high school student now, Fang Mu is quite a well-known figure in the school.

Although he is not a Beast Master, shining as a rising Maker's Assistant is far more valuable than being a Beast Master.

Building a good relationship with a Maker's Assistant would be far more beneficial than building a relationship with a three-point star Beast Master, who can control platinum-level Guardian Beasts.

Because a three-star Beast Master might not necessarily hold sway with a Creator.

But a Creator's Assistant definitely would.

From the perspective of inheritance, a Maker's Assistant is equivalent to half a disciple of a Creator.

Every so often, he saw students he knew waving to him.

Among them were many senior students in their third year of high school.

This morning, Fang Mu had just gone to see the newly graduated primary school students awaken their Destiny Guidebooks as they were about to be promoted to junior high.

The arrival of summer in June marks the annual graduation season.

These senior year brothers and sisters have already taken the extremely important College Entrance Examinations in their lives.

After waiting for half a month, they will be able to check their results and find out which college they have scored.

The results of the practical classes are given there and then.

So now, only the results of the Six-item written test are awaited.

The Six-item written test covers a vast majority of basic knowledge in the Beast Master field.

This vast compendium of knowledge is challenging to grasp, let alone master, even for a clever person with an excellent memory.

Previously, in order to assess Fang Mu's abilities, Teacher Cui Ruochen had given him a mock paper for the six-item written test of the college entrance examination.

At that time, the highest score in the entire senior grade was 876.

Everyone was complaining about the difficulty of the mock exam.

However, when Fang Mu's results came out, he scored 927.

Because Teacher Cui Ruochen had put Fang Mu's test paper with the other teachers to be graded collectively.

Thus, Fang Mu's grades were made known to everyone.

It was only after that, Teacher Cui Ruochen started to appreciate Fang Mu even more.

Teacher Cui Ruochen realized that his student for almost two years had already mastered all the knowledge that a high school Beast Master should know.

He might even have learned more.

If not, it would not have been possible for Fang Mu to have such profound insights in the Beastmaster Thesis and assignment he had written.

One enthusiastic round-faced senior sister waved at Fang Mu in the car and shouted.

"Junior Brother Fang, I'm sure I can score at least 850 on the written test this time!"

"Work hard, I'll be waiting for you at Jinghai Tianyu University!"

If someone had said this to Fang Mu when he first enrolled in school, it would have definitely been a mockery or a sneer.

But now, when someone says these words to Fang Mu, their tone is filled with sincerity and admiration.

The Federation's expectations for high school students mainly revolve around learning basic knowledge.

The maximum score for practical classes is only 150.

The requirements for practical classes are incredibly strict.

So achieving over 120 points in practical classes is considered remarkably high.

80 to 100 points is considered normal.

The entrance scores for Jinghai Tianyu University change somewhat each year due to fluctuating numbers of examinees.

But they tend to stay around 940.

Given that Fang Mu scored 927 on a highly challenging mock exam, it is highly possible that he can score over 940 just on the six-item written test in the actual examination.

Recognizing the senior sister's voice, Fang Mu quickly identified her as the senior sister with whom he has shared a table in the library several times.

Fang Mu hurriedly waved back from inside the car as a way of returning her greeting.

In the Six-Item Written Test, the most difficult subject in Fang Mu's opinion is 'Beastmaster Emotional State Observation'.

This exam requires one Guardian Beast with minor health problems to be placed in each room.

Then, the examinees analyze the state and emotion of the beast through short observations.

There are ten rounds in total, with a full score of 150.

Fang Mu lost more than half of his points in this subject during the Six-Item Written Test.

Now that Fang Mu possessed the Innate Divine Ability Eye of Omniscience from his Destiny Guardian Beast, Fool's Shadow.

He can have precise control over the state of the Guardian Beasts through data analysis.

Fang Mu has already confirmed this with the Aromatherapy Rabbit.

Fang Mu could have chartered his way into Jinghai Tianyu University based solely on his scores from the Six-item Written Test.

Now it's even easier.

However, Fang Mu has now become a Beast Master.

Fang Mu plans to take part in the Practical Examination as a Beast Master when the actual examination arrives.

He aims to compete for the top position.

As the top scorer, if he chooses to attend Jinghai Tianyu University, he will enjoy numerous benefits.

At the moment, Fang Mu hasn't revealed his Beast Master identity because he fears that when his eldest sister, second brother, and third sister find out,

They would put aside everything at hand and make a trip back home all the way.

Fang Mu doesn't plan to hide his Beast Master identity from his family.

He plans to inform them after they have finished what they need to do.

With more than a year's time left, Fang Mu has enough time to catch up with his peers in terms of Beast Mastery.

Conducting contract beasts with Contracting Blood can cause leaps in the life level of a Guardian Beast.

In addition, the Blood Aged Wine promises numerous resources for Fang Mu.

Enough for Fang Mu to build a Master Creator or even Grandmaster Creator identity on the Beastmaster Web — a year's time is sufficient.

Before he became a Beast Master, Fang Mu immensely admired the National Beastmaster League of High School Graduates.

Once he completes the College Entrance Examination as a Beast Master, he will be eligible to participate in the National Beastmaster League of High School Graduates.

Fang Mu has already set his short-term goals in his mind.

Because he had no personal experience fighting as a Beast Master, participating in the National Beastmaster League of High School Graduates will be the perfect chance for him to gain a firsthand experience.

That experience should allow him to confidently discern how much more catching up he has to do to reach his peers.

Or perhaps, he might have already surpassed them!

17: 17 Chapter 17 Sequential Type: Sleepy Night Cloud_1**

Chapter 17 - 17: 17 Chapter 17 Sequential Type: Sleepy Night Cloud_1

If asked who among the three batches of students at Jinghai High School for Beast Masters the librarian knows the best...

The answer would undoubtedly be Fang Mu.

The librarian is a kind old woman with a warm look in her eyes.

With white hair and a slender figure, she stands straight as a rod.

Age spots lightly speckle her cheekbones and the apples of her cheeks.

They lend her an elegance that only comes with age.

What the old woman enjoys doing most every day is stroking a large, fat black cat in her arms.

The big fat cat isn't afraid of people at all.

But whenever anyone tries to touch it, it sharpens its claws in warning.

Its intentions are clear:

If you dare to touch me, I'll scratch you!

The reason why the old woman is so familiar with Fang Mu is not because of any particular achievement Fang Mu has made in school.

Rather, it's because Fang Mu visits the library more than any other student.

Seeing Fang Mu, the old woman put the black cat from her embrace down on the table beside her and smiled.

"Fang Mu, you've come to read again?"

Fang Mu handed over his student card, saying,

"Auntie Silver, I want to study with a friend later to catch up on the lessons I've missed."

"Can you arrange a study room for me?"

Upon hearing this, the old woman picked up a register that was set aside and looked at it before asking,

“The classmate you said you would study with, is it Little Walnut?”

“She has already reserved a study room.”

“If you two are together, you can just go directly to the A317 study room to find her.”

Fang Mu raised his eyebrows at this, finding it strange.

Walnut was an enthusiast for practical combat classes.

Her Beast Master chose a close combat path, with brute force as its focus.

The best way for this type of Guardian Beast to enhance its combat ability is to face direct combat tests.

Fang Mu checked the time on his cell phone. It was now twenty past five.

He wasn't late. On the contrary, he was forty minutes early.

Fang Mu had thought that he would have to read for at least half an hour before Walnut arrived.

Receiving his student card back from the librarian, Auntie Silver, he prepared to go to the A317 study room.

He saw the black cat eyeing a snack jar of dried fish on the table, and with its deft little paws, it unscrewed the tightly closed jar lid.

Before the big black cat could open the jar, a pair of slender hands covered with age spots stopped it, picking up the black cat in its arms and continuing to stroke it.

Out of curiosity, Fang Mu used the Eye of Omniscience instinctively to probe the black cat.

[Beast Name]: Sleepy Night Black Cloud

[Beast Species]: ???

[Beast Level]: ???

[Beast Element]: ???

[Beast Potential]: ???

[Beast Quality]: ???

Skill: ???

Exclusive Traits: ???

Evolutionary Path: ???

After probing, Fang Mu paused his initial steps forward.

Then, as usual, he began to walk towards the study room Walnut had prepared.

His Guardian Beast, Fool's Shadow's, innate divine ability Eye of Omniscience, could not detect any living being more than five ranks higher than itself.

Fool's Shadow is currently at the Bronze Stage. Beyond Bronze, there's Silver, Gold, Platinum, Diamond.

After Diamond Stage is another level of life.

Fang Mu had once heard his eldest sister, Fang Qin, mention it.

The legion commander of Jing Hai Army possessed a sequential beast.

The sequential beast is a term referring to all kinds of guardian beasts whose strengths broke through the diamond rank, and their life level underwent a metamorphosis.

The sequential beast could open up a chapter of its own.

Then with the ninth sequence as the threshold, continue to progress forward.

The Fool's Shadow being unable to investigate this black cat named Sleepy Night Black Cloud, indicates that this black cat must indeed be a sequential type existence.

This was the first time Fang Mu had seen a sequential beast personally.

No, it should not be said as the first time!

The previous Fang Mu could see Sleepy Night Black Cloud every time he came to the library.

He just didn't realize that a sequential beast was right beside him.

Fang Mu previously thought Silver Shade was just an ordinary man.

Through the rank of Sleepy Night Black Cloud, Fang Mu could speculate that Silver Shade was at least a Five Point Star expert.

No wonder the school strongly emphasized during the previous safety exercise, that when an emergency such as a dimensional rift occurs or a beast attacks, everyone should seek shelter in the library, the martial arts arena, or the main hall.

Thinking about it, there must be other experts with strength similar to Silver Shade in the Martial Arts Arena and the main hall.

When Fang Mu left, he deliberately turned his gaze towards the direction of Silver Shade and Sleepy Night Cloud.

Fang Mu found that his Eye of Omniscience investigation of Sleepy Night Black Cloud did not cause any abnormalities from Silver Shade and Sleepy Night Black Cloud.

This suggests they hadn't noticed anything.

This further emboldened Fang Mu to use the Eye of Omniscience in the future to investigate higher-order beasts without any hesitation.

Reaching the doorway of classroom A317, Fang Mu discovered the classroom had been left unlocked.

Fang Mu walked straight in and saw Hu Tao using her right hand to write on a paper.

She was having difficulty with a problem and subconsciously tried to scratch her head with her left hand.

The result was that she moved her bandaged left arm, causing her to gasp for breath and her eyes reddened with pain.

Fang Mu hurriedly approached her and asked, "Did you get injured in the practical class in the martial arts arena this afternoon?"

"Teacher Wei should still be in the school infirmary."

Seeing Fang Mu, Hu Tao quickly put down her pen and whined, "I was a bit too rash today in the combat class and let the Iron-winged Sparrow charge too far forward."

"This resulted in me getting slapped on the arm by the bypassing Iron Guts Berserk Bear."

"Teacher Wei has already treated me."

"But it's easy to heal the outward injury; the musculoskeletal injury needs some time to heal."

While speaking, Hu Tao's expression was somewhat regretful.

She was injured, and for the following month she would probably only be able to watch when it comes to practical combat classes.

Upon hearing this, Fang Mu took out a Blood Nourishing Honey Date he had just bought from the Mirror Turtle Pendant in Dinghai Mall.

Now Fang Mu understood why Hu Tao's pale face seemed so familiar.

Her face color was exactly the same as his after blood sampling.

The claws of the Iron Guts Berserk Bear were two to three centimeters long.

This claw length wasn't much to the beasts, but it could cause significant damage to the fragile beast masters.

The blade-like claws can cause severe lacerations to flesh and bones.

Even if Hu Tao was immediately taken to the school infirmary, she would have lost at least a liter of blood.

A silver-grade Blood Nourishing Honey Date should be able to improve Hu Tao's condition.

After eating one, Hu Tao could replenish the loss of Qi and Blood quickly.

There would be no need for a week of recuperation.

Hu Tao was a great friend that Fang Mu had made in high school and helped Fang Mu a lot.

Naturally, Fang Mu would not be stingy towards Hu Tao.

As the common saying goes, 'A bone injury can take up to a hundred days to heal,' but this phrase only applies to the previous life.

In this life, healing can occur through a healing type beast, as long as no limbs are broken.

If Teacher Wei's Twinkling Bell Orchid wasn't a silver-stage beast but a gold-stage one, then Hu Tao wouldn't have to wait for forty to fifty days to recover.

She would have recovered within just seven or eight days.

**Crazy! Are You Really A Beast Tamer? #Chapter 18 - 18:
18 Hu Tao's Destiny Guardian Beast!_1 - Read Crazy!**

Are You Really A Beast Tamer? Chapter 18 - 18: 18 Hu Tao's Destiny Guardian Beast!_1

Chapter 18 - 18: 18 Hu Tao's Destiny Guardian Beast!_1

Hu Tao's written exam scores were not exceptional, but that did not make Hu Tao a poor student.

If Hu Tao were a poor student, she would not have been able to get into Jinghai High School for Beast Masters.

So, at a glance, Hu Tao recognized what Fang Mu handed to her was a Silver Stage Blood Nourishing Honey Date.

The Silver Stage Blood Nourishing Honey Dates were a size larger than the Copper Stage ones, with a more vivid red color.

Hu Tao's family was financially comfortable.

In Hu Tao's personal stash, there were also twenty to thirty thousand Dragon Rising Coins.

A Blood Nourishing Honey Date worth 120 Dragon Rising Coins wasn't a big deal for Hu Tao.

But it was the first time Fang Mu had given her a gift.

On Hu Tao's pallid face, there seemed to be a touch of faint rouge, akin to a blooming peach blossom in the mountain temple at the beginning of spring.

Hu Tao did not act courteously with Fang Mu. After taking the Silver Stage Blood Nourishing Honey Date from him, she quickly ate it.

Then she threw the pit into the trash can in the study room.

As soon as the Silver Stage Blood Nourishing Honey Date entered her stomach, Hu Tao's complexion immediately improved significantly compared to before.

The rosy glow concealed the faint blush.

"It's really sweet, way more delicious than the Copper Stage Blood Nourishing Honey Dates!"

“Fang Mu, I saw Teacher Cui when I came in.”

“It seems that Teacher Cui will stop teaching us Spirit Material Analysis Class after this semester.”

“He asked me to ask you whether you’ve decided yet.”

Hu Tao knew that Cui Ruochen often gave Fang Mu extra guidance, involving him in research projects.

Hu Tao did not envy such preferential treatment at all.

That’s because such preferential treatment was not something everyone could handle.

While speaking, Hu Tao seemed a bit disappointed.

Despite Cui Ruochen’s stern demeanor, he was certainly a good teacher who always considered his students.

Fang Mu was aware that Cui Ruochen was preparing for his evaluation as a Junior Creator.

Cui Ruochen’s decision to temporarily suspend teaching showed that he was ready for the final push.

Cui Ruochen had previously asked Fang Mu if he wanted to join two research projects with him.

The two research projects combined would take approximately two months.

At that time, Fang Mu’s answer was that he would consider it.

Now Fang Mu had become a Beast Master.

Before the formation of the Covenant Blood Essence, he had a lot of free time.

Using this time to do research studies would bring Fang Mu significant benefits in the academic field.

Fang Mu was unsure how long it would take for a drop of Covenant Blood Essence to condense, but it definitely wouldn’t be fast.

So, Fang Mu decided to go ahead and complete these two research projects with Cui Ruochen.

The Blood Aged Wine allowed Fang Mu to effortlessly impersonate a Master Creator and a Grandmaster Creator.

However, Fang Mu still chose not to forsake his pursuit of knowledge and self-improvement.

Even in the Beastmaster world, knowledge was power.

It allowed Fang Mu to make informed decisions instead of blindly following others.

After finishing these two research projects with Cui Ruochen,

Even if the condensation of the Covenant Blood Essence was slow, at least one drop would have formed.

The process of the research subject would not hinder Fang Mu's regular blood extraction.

With so many blood-supplying spiritual materials to assist him, Fang Mu didn't need to worry about blood extraction affecting the next day's research.

The class that Fang Mu and Hu Tao missed mainly discussed the effects and differences of Poison Series Beasts.

The class provided a detailed classification of this series, such as blood poison, skin toxins, and mental toxins.

It also mentioned the environmental and land pollution caused by the toxins carried by dimensional beasts in the Dimensional Rift.

This is why after killing dimensional beasts, they cannot be buried on the spot for natural decomposition.

Instead, a significant amount of manpower and resources are required to perform unified disposal in the city's incinerator.

Fang Mu had already mastered this lesson a long time ago.

Fang Mu had written a research paper on toxic elements.

However, this paper applied many types of knowledge that Fang Mu had mastered in his previous life.

Such knowledge cannot be proven in this world, hence his research couldn't be published.

It would be more accurate to say that the tutoring session was basically Fang Mu teaching Hu Tao, rather than a reciprocal learning session.

With Fang Mu's explanation, within an hour, he completely explained a two-hour lesson to Hu Tao.

Afterward, Fang Mu worked with Hu Tao to complete a test paper on Bird Beast Masters.

By the time Fang Mu and Hu Tao left the library, the bright moon was already hanging in the sky.

Fang Mu had planned to do as usual – go to the school cafeteria with Hu Tao for dinner, and then each of them would head home.

But Hu Tao made a suggestion.

"There's a great seafood restaurant in Lingshui District."

"Let's go there for dinner, my treat!"

Fang Mu had helped Hu Tao review her lessons many times.

Yet Hu Tao had never made such a suggestion before.

It might be because he gave Hu Tao a Silver Stage Blood Nourishing Honey Date. Hu Tao wanted to show her gratitude.

The prices at the new seafood restaurant in the Lingshui District were quite high, a meal would cost at least 500 Dragon Rising Coins.

Many ingredients used in the dishes came from Guardian Beasts.

Fang Mu chuckled and shook his head, saying,

"Every time I help you to review your lessons, you treat me to a meal in the cafeteria."

"Let's go. I'll treat you to a meal in the cafeteria today!"

Fang Mu quickly changed the topic of conversation.

You, young lady, will aim to break through the Two Mang star when you are in Senior three.

At that time, not only your Destiny Guardian Beast but also the later-contracted Iron-winged Sparrow, will face an upgrade in strength.

And that's a significant investment!

Therefore, you mustn't be wasteful with your money!

Moreover, Fang Mu was helping Hu Tao out of friendliness. There was also no need for her to keep looking for ways to return the favor.

Hu Tao has a rare puppet-type Destiny Guardian Beast named the Bird Armor Puppet.

Hu Tao had not kept the skills of the Bird Armor Puppet from Fang Mu.

This puppet-type Destiny Guardian Beast could attach itself to any bird-type Guardian Beast.

In essence, it was a set of weapons and equipment that could adapt to any bird-type Guardian Beast.

Furthermore, when the Bird Armor Puppet was combined with a bird-type Guardian Beast, it enabled Hu Tao to increase her control over that bird-type Guardian Beast.

Otherwise, even if Hu Tao wanted to practice controlling the Iron-winged Sparrow to fight against two Iron Guts Berserk Bears, the teacher overseeing wouldn't have allowed it.

The National Beastmaster League of High School Graduates was an individual strength competition.

Conversely, the National Beastmaster League of University Students was a team competition.

Each team consisted of six members, and only five could participate at once.

The six members rotated taking turns as substitutes according to the situation of their opponents.

Due to the limitations of the number and abilities of contracted beasts, Beast Masters could only exhibit their strongest battle power through team cooperation.

Therefore, once they reached university, the Dragon Rising Federation's education focus shifted to teamwork.

Before Fang Mu became a Beast Master, he hadn't even considered participating in the National Beastmaster League of High School Graduates, let alone the National Beastmaster League of University Students.

However, now that he had become a Beast Master, during his university years, he would undoubtedly look to participate in the National Beastmaster League of University Students.

The National Beastmaster League of University Students was conducted within teams made up from various universities.

Both Hu Tao and Fang Mu planned to apply to Jinghai Tianyu University.

Hu Tao would be a fantastic teammate for Fang Mu!

Crazy! Are You Really A Beast Tamer? #Chapter 19 - 19: 19 Healing Aromatherapy Rabbit_1 - Read Crazy! Are You Really A Beast Tamer? Chapter 19 - 19: 19 Healing Aromatherapy Rabbit_1

Chapter 19 - 19: 19 Healing Aromatherapy Rabbit_1

By the time Hu Tao and I returned home after dinner, it was already past nine.

Luckily, my Third sister Fang Yan had gone to be an exchange student and no longer lived at home at night.

Otherwise, if I came home this late, I'd surely get another earful from my third sister.

I had always been a night owl from my previous life.

Those who carry out academic research often tend to stretch an hour into two.

My habit of staying up late was brought into this life as well.

On normal days, after going back to my room, I would spend at least until one o'clock reading various books related to Guardian Beasts.

All of this I did behind my elder brothers and sisters' backs.

Because the ones who truly love you – your own family – are always the first ones to worry about your health.

If I had the talents of a Beast Master, I could refine myself with spiritual power, then staying up late wouldn't matter.

Ordinary people need eight hours of sleep to meet daily sleep requirements.

But Beast Masters only need five.

The higher the level of the Beast Master, the less sleep they need.

Legend has it that upon becoming a Five-pointed star Beastmaster with a Sequential Type Beast, just one hour of deep sleep in two days is enough to meet one's own needs.

That's why it's tough to capture and contain the wicked organizations' forces outdoors, even when the official shelter organization "Court" sends out many more forces than the evil organizations have.

Because in a battle in the wild, high-star Beast Masters almost never exhaust their strength and energy in a chase.

The moment I opened my front door, I was greeted by Xixi's warm welcome.

As soon as Xixi heard my key in the lock, it had already moved to the front door.

Then it used its gear collision sound, to simulate the words it hears at my arrival at home every time.

"Fang Mu, Welcome home!"

I habitually stretched out my hand to stroke Xixi's handle.

And then held Xixi and returned to my room.

Once I changed into my nightclothes, I first adjusted the diets of Bai Hao and Bai Ya's Guardian Beasts.

Then I sent the modified diets to Bai Hao and Bai Ya through the mail.

I always prioritized fulfilling the promises I made to others before I did my own tasks.

The main reason I was able to attend Jinghai High School for Beast Masters, was that both my elder sisters and my elder brother were all honored alumni of Jinghai High School for Beast Masters.

Even if I was just an ordinary person, Fang Qin, Fang Yuan and Fang Yan still wished to give me the best possible life.

Usual nights when I lived with Fang Yan, Fang Qin and Fang Yuan would call me and Fang Yan every night.

The development of my life at Jinghai High School for Beast Masters completely exceeded the expectations of Fang Qin, Fang Yuan, and Fang Yan.

None of them expected their little brother, who has been calm and independent since childhood, to have such outstanding qualities.

An ordinary person, despite having a physical Constitution inferior to Beast Masters, could compete equally with Beast Masters.

Not only did I rank first in my grade in academic fields, I even had the chance to be admitted to Jinghai Tianyu University.

This made Fang Qin, Fang Yuan and Fang Yan feel both proud and hesitant to waste my time by calling me every night.

Especially after Fang Yan became an exchange student, the three of them could definitely not call me every evening to rotate.

So the three of them held a family meeting and agreed that every evening, only one person would call me.

This way, each person could contact me once every two days.

I was the last person to know about this.

On one hand, I could feel the care from my eldest sister, second brother, and third sister.

On the other hand, I was somewhat helpless.

In fact, even if all three of them called me every day, it would not waste much time.

The time for academic research is squeezed out of my schedule.

Even when eating, I would look at my research topics.

So I could easily squeeze out the time to chat with my family.

However, I did not reject my siblings' good intentions.

The person who called me today is second brother Fang Yuan.

Fang Yuan usually calls right at ten o'clock every evening.

If there is a special procurement task from the Ten Thousand Treasures Commerce, Fang Yuan will inform him a day in advance.

At this time, Fang Mu could totally use the Needle Mosquito to extract a hundred milliliters of Heartblood.

But once the Heartblood was extracted, he wouldn't be able to recover within an hour.

Fang Yuan was not as fond of video chats as Fang Qin and Third Sister Fang Yan.

But his older brother's concern for him was certainly not insensitive.

He would definitely be able to hear the weakness in his voice.

Fang Mu decided to wait until after his older brother had finished the phone call before extracting the Heartblood.

The Aromatherapy Rabbit hadn't been disturbed for such a long time within the Mirror Turtle Pendant.

It should have become desensitized from its stress response.

Fang Mu decided to first treat the Aromatherapy Rabbit's gastrointestinal injury.

Otherwise, if the moderate gastrointestinal injury were to worsen.

Even if the Aromatherapy Rabbit were fed petals, it would have difficulty in digesting and absorbing them.

With this in mind, Fang Mu immediately brought out the iron cage carrying the Aromatherapy Rabbit from the Mirror Turtle Pendant.

The Aromatherapy Rabbit had been curled up in a corner of the iron cage all along.

When Fang Mu first saw the Aromatherapy Rabbit, its body trembled incessantly.

The Aromatherapy Rabbit, which had stopped trembling in the Mirror Turtle Pendant, was now stimulated as Fang Mu took it out.

It mildly began to tremble again.

Fang Mu didn't immediately open the cage and drag the Aromatherapy Rabbit out.

Instead, he quietly sat by the Aromatherapy Rabbit, letting it familiarize itself with his scent.

About twenty minutes later, Fang Mu gently opened the iron cage.

His hand gently touched the Aromatherapy Rabbit's slightly pink, white fluff.

As soon as Fang Mu touched it, the Aromatherapy Rabbit instinctively tried to escape.

But without having eaten for a long time, the Aromatherapy Rabbit had no strength to struggle.

It could only passively enjoy Fang Mu's gentle strokes.

Under Fang Mu's stroking, the trembling of Aromatherapy Rabbit's body gradually ceased.

This whole process took yet another twenty minutes.

Fang Mu was very patient, showing no impatience at all.

Feeling that the Aromatherapy Rabbit was no longer so frightened of him.

Fang Mu took the teacup from the table, poured a cup of warm water from a thermos flask, and placed it in front of the Aromatherapy Rabbit.

Following incorrect ingestion that leads to gastrointestinal injury, drinking some warm water can help activate the gastrointestinal movement, which would be greatly beneficial to the Aromatherapy Rabbit.

People who raise Flower Eating Rabbits usually don't feed them water.

That's because Flower Eating Rabbits mainly get their water from food.

The Aromatherapy Rabbit couldn't normally eat Flower Eating Rabbit's food, so it was severely dehydrated.

Seeing there was water, the Aromatherapy Rabbit wanted to move to drink.

But the Aromatherapy Rabbit didn't even have the strength to dodge Fang Mu's palm just now.

Naturally, it couldn't move successfully to the teacup to drink water either.

Fang Mu gently exerted force in his palm after noticing the Aromatherapy Rabbit's intent, bringing the rabbit's head to the teacup.

The Aromatherapy Rabbit lowered its head to test the temperate of the water before rapidly burying its head into the teacup.

It began to sip the warm water clumsily with its tiny mouth.

Fang Mu had intended to take the Red Jade Mountain Tea potted plant and feed the few remaining flowers from the Red Jade Mountain Tea to the Aromatherapy Rabbit.

Red Jade Mountain Tea inherently possesses the effects of stopping bleeding, reducing inflammation, relieving pain, and promoting blood regeneration.

It could serve as food for the Aromatherapy Rabbit and directly treat its ailments.

The effects of Red Jade Mountain Tea are very gentle, and wouldn't burden the Aromatherapy Rabbit's already damaged stomach.

But just as Fang Mu was about to fetch the Red Jade Mountain Tea plant, Fang Mu's phone rang.

Chapter 20 - 20: 20: Fang Yuan's Intention!_1

Fang Mu had assumed that the person calling at this hour would be his second brother, Fang Yuan.

But, to his surprise, when he looked, he saw that the call was from Hu Tao.

Picking up the phone, he could hear Hu Tao's voice on the other end, which sounded a bit strained.

This was just like when Hu Tao had taken the Silver Stage Blood Nourishing Honey Dates from him and thanked him.

“Fang Mu, my mom chopped up a lot of meat tonight, and she says she’s going to make meat pies tomorrow morning.”

“I’ll bring you a couple when I go to school, so you won’t need to bring your breakfast!”

During high school, whether it was in his past life or this one.

The workload was always extremely heavy.

There was simply no shortcut to be found in this curriculum that was heavily focused on theory and knowledge.

So, out of consideration for the students, Jinghai High School for Beast Masters starts morning self-study at 6:30 am.

They don’t get to go to the canteen for lunch until around 12 pm.

If students have breakfast before morning self-study, they would feel hungry before 11 am.

This might distract the students during the final class.

So, the school allows students to bring breakfast.

They even set aside fifteen minutes before the end of the 8 am self-study session for mealtime.

Why is Hu Tao thinking about bringing breakfast for him?

Fang Mu's breakfast had always been prepared by Yan Wood.

Yan Wood's culinary skills had a vague hint of the Old Fang Family's traditional dark cuisine.

Her tofu pudding carried the flavors of salt, sweet, and sour.

Upon closer tasting, you could also detect a note of bitterness and spiciness.

No matter if you preferred sweet or savory, you could find both in the tofu pudding made by Yan Wood.

Having grown up eating Old Fang Family's traditional dark cuisine, Fang Mu was already accustomed to it.

However, this didn't mean that he didn't crave for the assorted breakfast Hu Tao's mother made for Hu Tao each day.

Beef meat pies, duck fat crisp pastries, shrimp dumplings, crab roe soup dumplings.

As Hu Tao's desk mate, there was a long period when all Fang Mu could do was smell the aroma of Hu Tao's breakfast while munching on his own weird-tasting meal.

"Then I'm counting on you, and please thank your mom for me!"

As for Hu Tao voluntarily offering to bring him breakfast, Fang Mu didn't think much of it.

He just thought that the events of the day had deepened the friendship between him and Hu Tao.

After a few words with Hu Tao, Fang Mu hung up.

The moment Fang Mu hung up, he received a call from Fang Yuan.

The time was exactly ten o'clock.

Fang Mu couldn't help but wonder if his second brother specifically set an alarm for ten o'clock just to call him.

"Little Wood, I'm about to take over a pretty big project here."

"This project will take almost a month."

"Because the project is confidential, I won't be able to call you during its confidential phase."

Hearing this, Fang Mu hurriedly asked.

"Second Brother, is there any danger involved in this kind of confidential mission?"

On the other end of the phone, Fang Yuan, seeing Fang Mu's concern, allowed a hint of warmth to creep into his normally austere face.

Seeing this, a member of the Golden Gloves who had been working with Fang Yuan for a long time and had recently moved into Fang Yuan's dormitory was so shocked that his eyes almost popped out of their sockets.

One could say that this was the first time Lu Bo had ever seen this side of Fang Yuan.

The two other Golden Gloves members who had been living with Fang Yuan in the nearly three-hundred square meter room had already gotten used to this.

But, when they first saw Fang Yuan calling his younger brother, their expressions weren't much better than Lu Bo's.

"Don't worry, we're not like the Blue Gloves or Red Gloves, our confidential missions aren't dangerous."

"Little Wood, it's not like I haven't been on a confidential mission before, don't worry about me!"

"But you, even if you're studying with Professor Cui, don't forget to rest."

Fang Yuan was very emotionally intelligent.

When reminding Fang Mu to rest, he never emphasized the fact that Fang Mu was not a Beast Master.

Even though Fang Yuan is a boy, he is not necessarily as meticulous as Fang Qin and Yan Wood.

But Fang Yuan's care for Fang Mu doesn't fall short of Fang Qin and Yan Wood's.

If this were a previous life, Fang Yuan's "brotherly devotion" wouldn't be well received by prospective marriage candidates.

After having a chat about school matters with Fang Mu, Fang Yuan said.

"Little Wood, I'll transfer twenty thousand Dragon Soaring Coins to your card tomorrow."

"You're on your own at home, don't skimp on money when you need to."

Not giving Fang Mu a chance to refuse, Fang Yuan hung up the phone instantly.

The moment Fang Yuan ended the call, he saw Lu Bo's ghost-bumped expression.

Fang Yuan immediately retracted his smile, and then said.

"Go rest now, we got a task in three hours!"

Lu Bo smacked his lips.

“I thought you were calling a girl after watching you hover around your phone for more than ten minutes.”

“Turns out it was your brother!”

“Heard the president’s daughter of our commerce company is interested in you.”

“Are you going to accept or not!?”

“Bro, let me tell you...”

Before Lu Bo could finish his sentence, he saw Fang Yuan turn and walk towards his room.

“If you don’t sleep now, don’t look for me to cover for you when it’s time to work!”

“The goods this time are transported from the Outer Realm!”

Lu Bo knew that Fang Yuan is much more talented than him and has a wider network.

So he naturally gets more information than him.

If these goods really came from the Outer Realm, there is a likelihood that some pollutants might be mixed in.

These pollutants must be separated, otherwise, a major accident could occur!

Thinking of this, Lu Bo didn't have the mood to gossip or joke anymore.

He hurriedly returned to his room to rest.

Fang Mu noticed that as his second brother's situation got better, the amount of money he transferred to him also increased.

Due to demand, the money transferred to him was just the tip of the iceberg.

A larger portion was transferred to the eldest and third sisters.

The reason why Fang Yuan chose to join Ten Thousand Treasures Commerce to become a Gold Glove member, instead of developing in the Beastmaster Alliance.

Was to bear the economic consumption of the three Beastmasters at home and to provide Fang Mu with a better future.

One could say he has noble intentions!

Otherwise, in the eyes of ordinary people, the developmental potential of the official Beastmaster Alliance.

Is much better than joining the Ten Thousand Treasures Commerce.

Fang Mu initially thought that if the Covenant Blood Essence was too difficult to form.

The remaining ten thousand-plus Dragon Soaring Coins might not be enough for the daily purchase of materials.

Tomorrow, he would receive another twenty thousand Dragon Soaring Coins transferred by his second brother.

With this, Fang Mu would not only have no worries about the expenditures for buying materials.

But also, if he stumbled upon something valuable, he could choose to buy it.

Now Fang Mu could finally start extracting his Heartblood without worries.

Fang Mu brought over the pot of Red Jade Mountain Tea.

Looking at the two palm-sized Red Jade Mountain Tea plants in the basin-like pot, Fang Mu couldn't help scratching his head.

For extravagant Floral Beasts like Red Jade Mountain Tea, only wealthy families could afford to keep them.

Otherwise, not to mention producing a flower spirit, whether it could survive is a problem.

Fang Mu observes the Aromatherapy Rabbit who has already drunk most of the water in the teacup, now weakly watching him.

At this point, the Aromatherapy Rabbit doesn't fear him as much as before.

But it was still somewhat cautious.

Fang Mu directly plucks one of the only two tea flowers from the Red Jade Mountain Tea.

Then gently picks up the Aromatherapy Rabbit from the cage, and places it on a Goose Feather Cushion.
