

## **Beast Tamer 281**

Chapter 281: Merge: Xi Hui Reflecting Sun Crane!\_3

From the beginning, this scion from the side branch has been close to Yi Han, earning Yi Han's high regards.

Now he has become the true core of the Yi Family.

However, Yi Dong never forgot his primary duty, still serving as Yi Han's coachman whenever Yi Han traveled.

Sitting in a beast car pulled by two lion-type guardian beasts, Fang Mu could feel that the speed of the beast car was at least four to five times faster than before.

And this was when the two lion-type guardian beasts didn't speed up to their full capacity to maintain a steady ride.

Fang Mu examined these two lion-type guardian beasts.

One was named Feast Blood Lion, and the other was named Thunder-Ascending Imperial Lion.

The Fool's Shadow had not yet advanced to the Silver Stage, and thus couldn't probe the Guardian Beasts of rank nine.

But in Fang Mu's view, neither Feast Blood Lion nor Thunder-Ascending Imperial Lion appeared to be rank nine Guardian Beasts.

She Wan said softly to Fang Mu.

"Young Master, both of these lion-type guardian beasts have reached the level of rank seven."

During the conversation, She Wan inwardly admired Yi Han's style.

Normally, the highest specification of beast cars in the Dragon Soaring Federation uses rank nine Guardian Beasts as drivers.

Because if the strength of the Guardian Beasts exceeds rank nine, even if the beast car doesn't fall apart, it would be very difficult to maintain the stability inside the cabin when they run at full speed.

Being a coachman isn't a respectable job, making a strong individual serve as a beast car driver would damage their dignity.

Shuo Yang Grandmaster's beast carriage was pulled by rank nine Guardian Beasts.

As a senior creation zenith master, Shuo Yang Grandmaster has the ability to cultivate stronger Guardian Beasts for his subordinates to drive.

The fact that even Shuo Yang Grandmaster did not do this, shows just how extravagant Yi Han was.

Hearing She Wan's words, Yi Han replied with some regret.

"It's a pity about Yi Dong's two Guardian Beasts."

"Before they advanced in rank, valuable resources weren't used to make up for their previous deficiencies, leading to some innate shortcomings."

"Even if they were to make up for it now, rank seven would already be their limit."

"Nephew, your coachman's three hellhounds have good innate abilities."

"If the strength of their dark flame can be increased further, the threshold of rank six will no longer be their limit."

She Wan had heard about what Yi Han was saying before.

The Guardian Beasts of the direct descendants of the She family did not rush to advance after they reached the diamond rank.

They would stay at the diamond rank for a few years to ensure that the Guardian Beasts are at their best state before stepping into rank.

This was done to pave a better path for their future!

Because Yin Nanzhen fell from grace at a young age, he has been able to survive until now solely through his own exploration.

The circles Yin Nanzhen associates with are mostly adventurers struggling for a living.

Those from big forces, even if they are on a mission, often do not want to associate with someone like Yin Nanzhen who cannot maintain his daily life.

So Yin Nanzhen didn't know about this.

Now that he heard about it, Yin Nanzhen immediately thought of everything Fang Mu had done for him.

Fang Mu has repeatedly said to first use the dark element potion to increase the strength of the hellhound's dark flame, and then raise their rank when the strength of the dark flame reached the limit.

Yin Nanzhen greatly yearned for the level of rank, and was eager to quickly increase the strength of his Guardian Beasts.

In Yin Nanzhen's view, if the Hellhounds can become Hellfire Cerberus after stepping into rank, that would have sufficed.

Now that Yin Nanzhen finally understood, it turned out that Fang Mu was helping to solidify and make up for the deficiencies of the hellhound from the copper rank to diamond rank.

To give the hellhound a boundless future.

At this moment, gratitude filled Yin Nanzhen's heart.

It doesn't matter if their Guardian Beast reaches rank, or even reaches the legendary pinnacle rank one.

Yin Nanzhen is willing to always stay by Fang Mu's side and work as his coachman.

Suddenly, a faint fragrance wafted in from the window.

This fragrance was very faint, but also very high-grade.

In terms of fragrance, it was inferior to the Heaven Fragrance Peony, but it was on the same level as the Fragrant Peony.

Fang Mu looked out of the window, and upon seeing what was outside, he froze instantly.

Hills covered in ivory branches and jade trees swayed in the breeze. The branches' rhythmic dance reminded Fang Mu of a young girl gracefully dancing on her tiptoes.

These ivory branches and jade trees were a succulent plant named Elegant Dance. Fang Mu did not need to use the Eye of Omniscience to check.

Legend has it that there was a torrential downpour that lasted millions of years during the sixth era.

This downpour caused the near extinction of succulent plants, which hate humid environments.

Succulent plants that may not have been considered valuable before the sixth era are now hard to come by.

Any one of these Elegant Dances brought to auction can fetch a minimum of 1.5 million Dragon Rising Coins.

Just like many forces like to use furniture made by grandmaster craftsmen, many forces also like to display succulent plants at home.

They use the rarity of succulent plants to show off their status.

In fact, the leaves of succulent plants are very suitable for propagation by cuttings.

However, the continuous downpour lasting over ten million years during the sixth era caused succulent plants to lose the ability to propagate from leaf cuttings.

To propagate them now requires cutting and separating the succulent plants.

In this process, a little carelessness could result in the succulent plants rotting from the sections that were cut, leading to a complete loss.

Many low-level creators attempt to propagate succulent plants for profit.

Because the purity of the life elixirs they cultivate does not meet the standard, many suffer losses.

If it were just a few hundred Elegant Dances, Fang Mu wouldn't have been so surprised.

But there are hundreds of thousands of these Elegant Dances scattered all over the hills.

No wonder Yi Han referred to this mountain as Elegant Dance Mountain.

Just from the Elegant Dances planted on the mountain, Fang Mu had a new understanding of the Chang Le Pavilion.

Yi Han's beast car sped along the winding road on the mountain.

Fang Mu vaguely saw a large market at the top of the mountain.

Six women, dressed in purple and holding long flutes, stood with their hands behind them in front of the market, clearly waiting for Yi Han and himself.

The coachman, Yi Dong, parked the beast car in front of these six women.

Then he got out of the car and helped Fang Mu and Yi Han open the doors of the car, one on the left and one on the right.

After Fang Mu and Yi Han got out of the car, the six ladies in purple curtsied.

The four behind started playing their flutes, and the gentle and melodious sound of the flutes resonated immediately.

The two ladies in purple at the front spoke softly.

“At the order of the Pavilion Master, we are here especially to welcome Master Yi Han and Sir Jianmu!”

“Please follow us six to sit for a while in the Faint Eyebrow Gazebo, the two Pavilion Masters will come soon.”

“This would be a good time to taste the Elegant Drunken Brew made from Elegant Dance by our Chang Le Pavilion.”

Chapter 282: Fang Mu’s Ghost System Beast!\_1

Hearing the words ‘Elegant Drunken Brew’, Yi Han couldn’t help but swallow unconsciously.

His Adam’s apple bobbing, he showed great anticipation for the Elegant Drunken Brew.

Yi Han turned his head and said to Fang Mu.

“Dear nephew, Elegant Drunken Brew is a magnificent beverage!”

“Not only does it have a curse-dispelling effect, but its taste is also unrivalled!”

“One can hardly taste such a fine brew anywhere else.”

Fang Mu knew this world held the same wine culture as the previous one he inhabited.

However, the scholarly world in this era had not developed in the direction of cellular microbiology, and the people of this world did not know the existence of molds and yeasts.

Indeed, with every Beast having its unique abilities, scholars could not even complete the study of Beasts.

They didn’t have time to focus elsewhere.

As a result, the wine of this world was generally under 20 proof, and there was no existence of strong liquor.

Although Fang Mu knew the principles of brewing wine, he had never been in the habit of drinking.

Clear-headedness is required for academic research. Drinking would not contribute any benefits.

Still, Fang Mu had quite some anticipation for the so-called “Elegant Drunken Brew”.

If Fang Mu can understand the characteristics of good wine in this world based on the Elegant Drunken Brew.

Maybe apart from the Flower Beads produced by the Heaven Fragrance Peony, Jianmu Commerce could have another signature specialty product.

Before becoming a Beast Master, Fang Mu had thought about making a fortune through brewing wine.

But in this world, wine is a relatively luxurious item.

For him to brew and sell wine as a youngster.

Without a solid background, it would surely invite disaster.

Soon, Fang Mu and Yi Han arrived at Faint Eyebrow Gazebo under the leadership of the woman in the purple dress.

Surrounding Faint Eyebrow Gazebo were hundreds of flower stands, each with an Elegant Dance plant of different brocade colors.

The value of Elegant Dances varies up to 20 to 100 times depending on the color of the brocade.

Fang Mu found it hard to imagine just how fond the Big Leader of Chang Le Pavilion is of the Elegant Dance, a Guardian Beast with little utility.

To have invested such resources and thoughts into cultivating the Elegant Dance.

As a disciple of the Grandmaster Creator, Fang Mu didn't forget his character setting.

He didn't dwell too long on these Elegant Dances of different brocade colors.

Yi Han was clearly not a first-time visitor to Chang Le Pavilion, and was quite familiar with the place.

As soon as they sat down, four women dressed in white brought four trays.

Two trays held exquisite fruits and desserts, and the other two held a pot each.

The woman in the purple dress who had led the way spoke softly.

“The Big Leader said not all of you may enjoy wine, so a pot of tea brewed with Blood Brocade Elegant Dance has been specially prepared.”

“A cup of this tea can help accelerate blood metabolism for three days and has the effect of purifying the blood.”

“If you drink the tea made from Blood Brocade Elegant Dance, don’t forget to prepare high-grade Blood-supplying Spiritual Material for bodily recovery within three days.”

“Otherwise, having tens of thousands of milliliters of your blood metabolized all at once, your body would be drained!”

The woman in the purple dress’s words didn’t move Yi Han at all, his gaze still rested on the pot of Elegant Drunken Brew.

Purifying one’s blood offers limited benefit to a Beast Master.

Only ordinary people who haven’t awakened their Destiny Guidebook and who can’t control their spiritual power would be inflicted with diseases such as cerebral infarction and vascular occlusion.

A Beast Master can use their spiritual power to accelerate blood flow, causing a natural blood vessel dilation.

Most of the impurities in the human body are concentrated in the Five Viscera and the bone marrow, and blood contains only a small part of it.

After becoming a Five Point Star Beast Master, the impurities in the blood have been self-cleansed.

The only merit the Blood Brocade Elegant Dance Tea holds in the eyes of Yi Han is that it tastes good.

However, regardless of how you compare, it definitely falls short of the Elegant Drunken Brew!

As soon as they sat down, Yi Han was ready to pour wine for Fang Mu.

Just a hint of the Elegant Drunken Brew was poured into Fang Mu's teacup when Fang Mu said,

"Uncle Yi, I do not excel at drinking, I would prefer tea!"

With that, Fang Mu picked up his cup and drank the hint of Elegant Drunken Brew, finding that aside from bearing the fragrance of the Elegant Dance, there was nothing particularly unique about it.

If one must differentiate the Elegant Drunken Brew from ordinary wine, it would be that the Elegant Drunken Brew has a high concentration.

It is around 32 or 33 proof.

Fang Mu's behavior didn't escape Yi Han's eyes.

On one hand, Yi Han felt he was a bit hasty, on the other, he found that Fang Mu was incredibly considerate!

Even though he didn't drink, he still drank the wine that Yi Han had already poured into his cup.

Fang Mu's actions made a subtle shift in Yi Han's mindset, a change that even Yi Han himself did not notice.

As soon as the woman in the purple dress started describing the effect of Blood Brocade Elegant Dance Tea, Fang Mu's heart was filled with uncontrollable excitement.

The pot holding the tea was carved from Magnolia Blood Amber.

Magnolia Blood Amber does not easily dissolve under high temperature, and it releases the extravagant aroma of magnolia when at around a hundred degrees.

The extravagant aroma of magnolia fits well with the bitter taste of the tea, suppressing some of the bitterness.

Therefore, Fang Mu purposely used the Eye of Omniscience to see through the semi-transparent Magnolia Blood Amber to examine the Blood Brocade Elegant Dance.

Upon examination, Fang Mu realized that he was a bit too overjoyed.

The Blood Brocade Elegant Dance does have the effects as the woman described, but such effects could only occur once.

After this one time, it would be useless.

Fang Mu's plan to solidify Covenant Blood Essence rapidly using Blood Brocade Elegant Dance was thwarted entirely.

Chapter 283: Fang Mu's Ghost System Beast!\_2

The metabolism of blood is a whole body process, during which Heartblood also goes through the same metabolism.

Within three days, metabolizing tens of thousands of milliliters of blood might enable Fang Mu to condense more than one drop of Contracting Blood.

It was when Fang Mu had drunk the touch of Elegant Drunken Brew in the cup and was pouring tea for himself-

Yi Han, who gobbled down a cup of Elegant Drunken Brew in a hurry, exclaimed, "Refreshing!"

"My dear nephew, you won't be able to taste such strong wine elsewhere once you miss Elegant Drunken Brew!"

Hearing what Yi Han said, Fang Mu was first taken aback, then his eyelid twitched involuntarily.

At that moment, Fang Mu simply didn't know how to retort.

Wasn't a sixty-degree wine I brewed supposed to blow you away when you find a thirty-two-degree Elegant Drunken Brew strong?

Fang Mu thought that his identity as a Grandmaster Disciple could do something about it.

Brewing wine is an art inherited from Fang Mu's previous civilization of five thousand years; it's a medium.

Using wine as a catalyst can extract the medicinal properties from spiritual materials.

The path of limited edition circulation has already been paved in the Beastmaster World.

Without the internal allocation of goods, Peach Blossom Brand might have all products already booked for the next five years.

Single product sold only for tens of thousands of Dragon Rising Coin is speculated to nearly seven hundred thousand in the black market.

Feng Chenhao, hearing of this, felt that the scalpers were simply too much and deliberately mentioned the matter to Fang Mu over the phone.

Listening to Feng Chenhao's narration, Fang Mu didn't think it was a bad thing that scalpers were raising the price of Peach Blossom Brand's single product.

Limited edition circulation is bound to be accompanied by the appearance of scalpers.

Every individual who purchased a Peach Blossom product could choose to sell the product for profit after recognizing the value of Peach Blossom.

The rapid rise of the Peach Blossom Brand's prestige in a short period has an inextricable relationship with the efforts of these scalpers in reselling.

The Heaven Fragrance Peony and the Restoring Appearance Palm only have two plants with limited yield, so they have to follow the present path.

Fang Mu can brew some forty-degree wines as unlimited products for sale in the Mu Commerce Association.

Now, wine itself has luxury attributes, many associations are using various methods to lure customers in, aren't they?

Mu Commerce Association can completely imitate this.

Only those forces that have spent ten billion Dragon Rising Coin in Mu Commerce Association can order fifty-degree wine.

The sixty-degree wine is only provided to the strong ones who are in good terms with Mu Commerce Association and forces that have spent a hundred billion Dragon Rising Coin.

Fang Mu could have taken the path of customizing medicinal wine, but this path is too simple.

Once someone gets the medicinal wine, they'd find that the so-called customized medicinal wine is nothing more than soaking spiritual materials in wine.

At that time, Mu Commerce Association can kindly notify this and let those forces that got the strong wine mess around themselves.

At that moment, Fang Mu didn't notice at all that on the arch bridge far away from Faint Eyebrow Gazebo, there were two veiled figures standing.

The moment Fang Mu chose to drink tea instead of Elegant Drunken Brew, the complicated look in Lang Huan's eyes dimmed.

How can he be his disciple if he doesn't love wine!

It seems like it's not Qixing!

At the time he had just met him, he, like Jianmu, was also a young man full of vitality.

After completely suppressing the chaotic thoughts in his heart, Lang Huan said to the woman beside him.

"A Li, let's go meet our visitors!"

"Although Chang Le Pavilion collaborates with several Grandmasters, it's safer to work with the Grandmasters of the Dragon Rising Federation than those from foreign lands."

“According to the information we’ve gathered, Qixing treats his disciples well.”

“Jianmu has abundant Mastership resources in his hands, which on one hand shows Qixing’s favour to Fang Mu.”

“On the other hand, it also shows that Qixing does not object to intimacy with other forces through resource connections.”

“Such generous Grandmasters are rare!”

“So rather than facilitating a partnership between Chang Le Pavilion and Qixing, it’s better to get along with Qixing.”

“To become allies who support each other behind the scenes.”

Upon hearing this, a smile emerged from behind Li Xu’s veil.

Li Xu was afraid that Lang Huan would be stubborn, but it turned out that Lang Huan was calmer than she had imagined.

After determining that Fang Mu was not his disciple, he no longer dwelled on it.

Instead, he started to consider the development of Chang Le Pavilion.

Indeed, if Chang Le Pavilion could get along well with a Senior Creation Zenith Master and established a good relationship,

It could bring great benefits to the development of Chang Le Pavilion.

According to the currently available information, Qixing is indeed the most suitable one for Chang Le Pavilion.

Li Xu didn't notice the look in Lang Huan's eyes.

If Li Xu did, she would definitely notice the hidden color of reminiscence in Lang Huan's eyes.

Only two hundred milliliters of Blood Brocade Elegant Dance Tea need to be drunk to achieve sufficient effects.

This means that after Fang Mu finishes a cup of tea, he only needs to refill it once more.

If you have to drink one or two liters of Elegant Dance tea to take effect, Fang Mu can only use the teapot as a thermos.

Without seeing the two owners of Chang Le Pavilion and knowing their situation-

Fang Mu could not guarantee that if he modestly did not drink the Blood Brocade Elegant Dance tea, he could exchange for some leaves of Blood Brocade Elegant Dance.

The saying goes, a gentleman does not seize the beloved thing of others.

It can be seen that the owners of Chang Le Pavilion really love Elegant Dance.

Listening to Yi Han talking about various ways of evolution of All-Kinds Carp, Fang Mu feels very heartbroken.

These evolution methods that Yi Han think are good are too far away from the Ten Longevity Carp and Origin Blood Carp I have strengthened!

Chapter 284: Fang Mu's Ghost System Beast!\_3

Before Fang Mu could linger on his heartache, two figures appeared out of thin air on the chairs at the jade table in the pavilion.

Upon their appearance, Yi Han's gaze landed directly on the face of the silhouette in a dress adorned with stitched images of apricot blossoms and weeping willows.

He looked like a male cat in need of neutering.

He completely forgot to introduce Fang Mu to the two leaders of the Chang Le Pavilion.

This left Fang Mu somewhat embarrassed, inwardly chiding Yi Han for his unreliability.

Yi Han had been well aware upon arrival that he was a go-between, so why did he act as if he had never seen a woman before?

To Fang Mu, behaving like a foolish lover or a fawning pet was rather disgraceful.

Foolish lovers and fawning pets often receive little in return in relationships.

Yet, the woman Yi Han was watching never once glanced his way.

As Fang Mu looked at this woman, he realized that she was looking back at him with interest.

Li Xu had made a point of learning about Fang Mu and was curious about how a young man with no particular background had caught the eye of a Senior Dizong Master.

Li Xu had thought that Fang Mu would look away subconsciously after meeting her gaze.

Yet Fang Mu met her gaze resolutely, his pure eyes tinged with curiosity and scrutiny.

His gaze was an exact copy of her own.

This meant that Fang Mu must be a confident man with a strong inner spirit.

Li Xu purposely maintained eye contact with Fang Mu for half a minute.

Seeing Fang Mu's fixed gaze, Li Xu took the initiative to introduce herself.

"I am the second proprietor of the Chang Le Pavilion, Li Xu."

"This is my sister."

Li Xu did not introduce Lang Huan.

Li Xu knew that Lang Huan didn't like strangers to know her name.

unexpectedly, after she finished speaking, Lang Huan took the initiative to speak.

"My name is Lang Huan, and I'm in charge of the Chang Le Pavilion."

"I heard from Yi Han that you want a Heavenly Disaster Level Ghost System Summoning Beast, so you should know something about them."

"The best welcome gift is something the other person likes."

"So, let me give you this Heavenly Disaster Level Ghost System Summoning Beast!"

As she spoke, Lang Huan flicked her wrist, revealing a black egg in her palm.

This black egg radiated a dark purple ghost aura.

The ghost aura rolled outwards, giving Fang Mu an eerie feeling.

Fang Mu had heard from She Wan that the ghost aura on a Ghost System Beast emerging from a Horror Level Dimensional Rift is gray-black.

For those from a Destruction Level Dimensional Rift, the ghost aura is ink-green.

The Ghost System Beast emerging from a Catastrophe Class Dimensional Rift can have a ghost aura of any color.

Anyone familiar with Ghost System Beasts would know from looking at this dark purple ghost aura that the egg contained a Heavenly Disaster Level Ghost System Beast.

Yi Han had little contact with Lang Huan, the Big Tavern Master of the Chang Le Pavilion. All he knew was that she was known for doing things grandly.

Now, Yi Han finally understood what it truly meant to be grand.

Offering a Heavenly Disaster Level Ghost System Beast as a token of acquaintance was beyond mere grandeur.

This was part of Lang Huan's grand vision.

Lang Huan's vision was incredibly vast, willing to give so generously to establish a connection with Master Qixing!

Especially considering that she had not previously had any contact with Master Qixing or Jianmu. Wasn't she worried that this Heavenly Disaster Level Ghost System Beast would be wasted?

Hearing this, Fang Mu shifted his gaze from the black egg in Lang Huan's palm, suffused with dark purple ghost aura, to her face.

This kind of gift left Fang Mu somewhat surprised.

Fang Mu was momentarily at a loss as to how to respond.

However, Fang Mu knew that Lang Huan's actions would allow him to have a good relationship with the Chang Le Pavilion.

Lang Huan could not have given him such a thing without a reason; there must be a purpose behind it.

Gifts are typically given by elders to their juniors.

For example, the Purple Ice Crystal Ring that Shui Miao had given him was actually a gift for his master, Master Qixing.

Clearly, Lang Huan had the same goal in mind.

Seeing that Fang Mu didn't immediately accept her gift, a thoughtful expression appeared on Lang Huan's face.

She guessed that Fang Mu had understood her meaning.

Lang Huan enjoyed communicating with intelligent people.

If she had to hint or explain everything to Fang Mu, the interaction would be terribly dull.

She had once been as sharp as Fang Mu.

Thinking of this, Lang Huan took a deep breath and quickly distanced herself from the impression she had of Fang Mu.

"After a Dimensional Rift disappears, Ghost System Beasts become eggs."

"The eggshells can shield others' perceptions. Before contracting a Ghost System Beast, no one knows what kind of being it is."

“To ascertain its type, Hexagram Beastmasters must use Soul Power to investigate it at the moment the Dimensional Rift disappears and before the eggshell forms and is covered by Ghost Flame.”

“Rest assured, this Heavenly Disaster Level Ghost Series Beast is indeed a summoning type.”

Fang Mu had already heard about this from She Wan.

This was why, despite the utmost importance of privacy, various major forces still chose to trade Ghost System Beasts with each other.

The abilities of a Ghost System Beast can only be understood by the Contractor at the moment of the contract.

So any Beast Master capable of making a contract with a Ghost System Beast likes to keep it as their trump card.

As Fang Mu took the black ghost egg burning with purple ghost flames from Lang Huan’s hand, he quietly used the Eye of Omniscience to investigate it.

Upon investigation, Fang Mu found that the Eye of Omniscience could penetrate the Ghost Flame.

However, the black eggshell did provide some resistance to the Eye of Omniscience’s investigation.

Still, Fang Mu could faintly see a humanoid creature curled up inside the egg, surrounded by floating white paper men.

These paper men were also ablaze with dark purple Ghost Flames.

Half of the face of the curled up humanoid creature was visible, covered by an enchanting and eerie mask.

Just as Fang Mu was preparing to investigate further, he suddenly felt heat in his eyes and his vision turned a bit blurry.

Immediately afterwards, Fang Mu instinctively closed his eyes.

The investigation of this Ghost System Beast through the Eye of Omniscience had exhausted the power of his pupils.

If Fang Mu hadn't desperately resisted the discomfort in his eyes, tears would have certainly streamed down his face.

Just as Fang Mu closed his eyes, he saw a name from the data.

Yan Yubanruo!

Chapter 285: Evolution, Eden Dreamland!\_1

The name struck a chord deep within Fang Mu.

As expected of a Heaven Calamity Ghost Series Beast, even its name is formidable!

Regrettably, the status and quality of his Destiny Guardian Beast, the Fool's Shadow, were still too low. Apart from the name, Fang Mu was unable to see any further data.

However, as Fool's Shadow increases in status and quality, the Eye of Omniscience will definitely be able to probe into the detailed information of the Ghost System Beast hidden beneath the Ghost Flame and the eggshell.

This was completely different from what Big Tavern Master Lang Huan and She Wan had said at Chang Le Pavilion.

Both had said that they could only detect the type of Ghost System Beast by using Soul Power before it was engulfed by Ghost Flame.

They couldn't see the appearance and capabilities of the Ghost Type Beast within the eggshell at all.

She Wan, who already had a sequential Guardian Beast and was a Hexagram Beastmaster, originated from a wealthy family like the Lu Dushe clan.

There should be no problem with her grasp of common knowledge.

If She Wan's level wasn't enough, then Lang Huan, who could interact on equal footing with a Grandmaster Creator like Yi Han, must be situated in a higher sequential position.

Lang Huan's level couldn't be insufficient, so Fool's Shadow's natural divine ability, the Eye of Omniscience, could see the truth that even the Beastmaster World couldn't perceive.

This gave Fang Mu quite a delightful surprise, and gave him a deeper understanding of his two Destiny Guardian Beasts.

Previously, it was always Blood of Abundance that was outstanding.

Now it seems that Fool's Shadow is no worse than Blood of Abundance!

As Fang Mu thought that, a pair of black goat skulls appeared in his closed eyes.

The two black goat skulls seemed somewhat aggrieved and dissatisfied as they rotated.

At that moment, a black silhouette emerged, enveloping the black goat skulls.

This caused the rotating black goat skulls to involuntarily stagnate.

The instant Fang Mu opened his eyes, both the goat skulls and the silhouette disappeared.

Fang Mu, now with his eyes open, didn't dare continue using the Eye of Omniscience to investigate the still egg-shaped Yama Pragya.

If he continued looking, Fang Mu would start shedding tears in front of Lang Huan, Li Xu, and Yi Han!

It would be more embarrassing to cry for no reason.

All three of them were top-notch figures of the current era and they would certainly be able to discern something.

Fang Mu didn't want people to know about his ability to investigate.

Heaven Calamity Ghost Series Beast Yama Pragya was now his own.

He could very well wait until making a contract with Yama Pragya through Soul Power, before investigating it.

After receiving Yama Pragya from Lang Huan, Fang Mu didn't show too much curiosity.

Instead, he directly put Yama Pragya into his Purple Ice Crystal Ring, then looked at Lang Huan and said seriously.

"Thank you, Elder Lang Huan for giving me this Ghost System Beast."

"I don't have anything of equal value to this Ghost System Beast."

"I will have my elder brother personally bring a return gift later."

"My master once said that every gift received must be reciprocated."

"My master is currently in closed-door cultivation, I don't want him to know that I received a Heaven Calamity Ghost Series Beast for nothing and then blame me!"

Fang Mu, who fancies himself a professional actor, is becoming more and more proficient in his lies.

In fact, Fang Mu doesn't like to communicate with people in this manner.

It's just that he doesn't have a real Grandmaster Creator behind him, for he himself is that so-called Grandmaster Creator.

Without fabricating some lies, it would be difficult to justify many things. Worse, if he catches someone's attention, he and his family may fall into danger, from which there would be no recovery!

Fang Mu has always been a doted disciple in his pretense, but doting has its limits.

Even if Qixing really spoils his disciple, he would not let his disciple run around with a large amount of High-purity Life Potion.

Therefore, letting someone send a thank-you gift on his behalf makes more sense.

More importantly, Fang Mu wants Fang Yuan to contact Chang Le Pavilion in the name of the Mu Commerce Association.

Judging from the attitude of the Pavilion Master towards him, he should not mind cooperating with Mu Commerce Association.

Having a powerful ally for Mu Commerce Association will bring great benefits to its future development.

Fang Mu has guessed that the pavilion master of Chang Le Pavilion must have wanted to see his so-called master.

Instead of waiting for someone to speak and then explain, it is better to put the words first and block Lang Huan and Li Xu's mouths.

Since his master is in seclusion, it would be inappropriate for the two to request a meeting.

When a Grandmaster Creator is in seclusion, there is no fixed timeframe. It's common for a seclusion period to last several years or even a decade.

The development of more than a decade will be enough for Fang Mu to stand on his own.

By then, he will not need to frequently mention his master's name when dealing with major powers.

Lang Huan had a favorable impression of Fang Mu because he overlapped with a person he remembered in his mind.

Li Xu had just exchanged glances with Fang Mu and saw nothing but purity in his gaze.

They were therefore completely unaware of the intricate web that Fang Mu had spun with his words.

Both Lang Huan and Li Xu were somewhat disappointed.

Without meeting with Qixing in person, it's hard to develop a mutual watchful relationship.

To form such a relationship, they first need to determine each other's value and what both parties can bring to each other.

Mutual help is both the core and the fundamental basis.

From the moment Lang Huan presented the Heaven Calamity Ghost Series Beast to Fang Mu, Yi Han had already guessed Lang Huan's intentions.

At the right moment, Yi Han spoke up.

"Qixing is indeed in seclusion, attempting to break through to a higher level of the Creator."

"This process will not be short. It took me decades to accumulate enough experience to break through from the peak of a Master Creator to a Grandmaster Creator."

Chapter 286: Evolution, Eden Dreamland!\_2

“I will speak directly with my nephew Jianmu about any matters, and Jianmu will help me contact Qixing.”

“I have always admired Qixing’s speed of concocting Spiritual Liquids.”

The purpose of Yi Han’s words was partly to build a bridge between the Chang Le Pavilion and Fang Mu.

He had been initially entrusted by the Chang Le Pavilion to help facilitate this connection.

For this, he had even been sarcastically called out by Fang Mu.

If this bridge wasn’t eventually built, then the Chang Le Pavilion would not owe him any favors.

On the other hand, Yi Han also wanted to subtly suggest that he was quite familiar with Qixing, who was trying to break through the peak of Grandmaster Creators.

He hoped this would improve his image in the eyes of Li Xu.

Fang Mu subconsciously twitched his lips upon hearing Yi Han’s words.

Fang Mu suspected Yi Han's intentions, but he couldn't deny that Yi Han's words were well timed.

Lang Huan and Li Xu had always regarded Fang Mu as a junior, a disciple who would find it difficult to speak in front of a Grandmaster Creator.

It was even less possible for him to dictate the relationship or agreement between a Grandmaster Creator and a force.

Based on this thought, Lang Huan and Li Xu had somewhat dispelled the idea of mutual watching over Qixing.

Yi Han's words now shocked Lang Huan and Li Xu.

Qixing was not merely an ordinary Senior Creation Zenith Master, but had even reached the threshold of a Top Creation Master.

If this information could be confirmed, Qixing would be even stronger than Shuo Yang.

After all, there hadn't been any rumors in the Dragon Soaring Federation about Shuo Yang preparing to retreat and break through to become a Top Creation Master.

Yi Han had been in contact with Fang Mu for some time.

Fang Mu and Yi Han got to know each other through the snatch for the divine relic, Sakura Tempering Carp.

Although other forces didn't know about this, Lang Huan and Li Xu were well aware of it.

If Yi Han had known Qixing earlier, there would have been no need for him to curry favour with Sect Master Xiao Xiang at the headquarters of the Creator's Guild in the past.

Yi Han was willing to help Fang Mu find a Heaven Calamity Ghost Series Beast, no doubt because he got many benefits from Qixing.

Otherwise, a man like Yi Han who always prioritizes self-interest would not exert such a great effort and even go to the extent of approaching the Chang Le Pavilion.

So, communicating with Qixing through Fang Mu seemed to be a reliable option.

This got Lang Huan and Li Xu thinking about the mutual watching with Qixing again.

They had just said that the Heaven Calamity Ghost Series Beast was a gift of acquaintance.

With Qixing in retreat, all affairs would be handled by Fang Mu on behalf of Qixing.

Fang Mu could totally sneak away with this Heaven Calamity Ghost Series Beast without telling Qixing.

But Fang Mu didn't choose to do so, which made Lang Huan and Li Xu look at him in a new light.

That's why they understood why Qixing trusted his disciple so much.

Li Xu, who had been quiet after introducing himself, said softly,

"I don't know how much you understand about our Chang Le Pavilion."

"The influence of Chang Le Pavilion in the Dragon Soaring Federation is just a small part, its main body is more in the Outer Realm."

"If you and your master come across any issues in the Outer Realm that you cannot resolve or resources that you wish to collect, feel free to let us know."

"We will help solve them!"

“Regarding the usual interchange of resources, we will swap with the spiritual materials based on Qixing’s quotations, there is no need for Qixing to do any favors.”

“If one day the Chang Le Pavilion does encounter a disaster, we hope Qixing could lend us a helping hand.”

Communicating indirectly with Qixing made the talks much easier and relaxed.

In Li Xu’s eyes, Fang Mu was just a messenger.

After proposing the mutual watch approach, all she needed to do was wait for a reply.

Upon hearing Li Xu’s words, Fang Mu gazed at her warily.

If Chang Le Pavilion’s main influence was in the Outer Realm, then they would be the second force he encountered that had developed on a global scale.

The first force Fang Mu had interacted with that operated on the world scale was the Starwheel.

It was time for the second Starwheel gathering.

Fang Mu thought Chang Le Pavilion couldn't compare with Starwheel, after all, the Starwheel's legacy had been passed down from the fifth or sixth epoch.

On the other hand, Chang Le Pavilion was established by Lang Huan and Li Xu standing in front of him.

Connecting with a force that operates across the world held a great advantage.

The conditions set forth by Li Xu were attractive enough.

The resources that Fang Mu wanted to collect from the Outer Realm could be obtained from the Starwheel gathering.

However, seeking help from the Starwheel members to solve dilemmas was not quite suitable.

If he took this route, he might be traced back to his real identity by the Starwheel member he chose to assist.

If Chang Le Pavilion could take on this role, that would be great!

However, there is no such thing as a free lunch.

Conversely, they have to help out to the maximum extent when the Chang Le Pavilion encounters a disaster.

Fang Mu's subconscious thought was, could it be that Chang Le Pavilion had offended some kind of force and was about to go to war with it?!

If that was the case, forming such a relationship with the Chang Le Pavilion would become a major problem instead of an advantage.

Seeing Fang Mu's expression, Li Xu immediately realized her words might have been misunderstood due to the lack of clarity.

Just as Li Xu was preparing to explain, Lang Huan abruptly said,

"If Chang Le Pavilion does encounter a disaster within the next ten years, your master Qixing doesn't need to help out."

"For the first ten years, we will just exchange supplies with Qixing, whether to make the exchange or not ultimately depends on Qixing."

"Only after ten years, when Chang Le Pavilion encounters a disaster, would Qixing need to fulfill his responsibility."

Chapter 287: Evolution, Eden Dreamland!\_3

“I hope you can convey the message!”

Fang Mu had a liking for Lang Huan and Li Xu’s straightforward character.

Speaking straightforwardly saved a lot of trouble compared to when communicating with Yi Han.

“Okay, I will deliver the message completely.”

“But I can’t guarantee if the master would approve.”

“I will have my brother let you know as soon as I get a reply!”

After the discussion, Fang Mu drank some more tea brewed with Elegant Dance.

Lang Huan and Li Xu wanted to keep Fang Mu for dinner, but he declined directly.

“I have something important to report to the master, so I won’t stay for dinner!”

Fang Mu’s words made them both believe he was reliable.

But his words made Yi Han frown. Yi Han really wanted to dine at the Chang Le Pavilion.

Li Xu would surely remove her veil during the meal.

Thinking of Li Xu's face, Yi Han was obsessed.

Fang Mu was his guest, so he had to accompany him when leaving.

Yi Han didn't have any excuse to stay any longer.

Even when getting into the car, his face was still gloomy.

Fang Mu's thoughts were all on the contract beasts.

This morning, he had condensed a drop of Covenant Blood Essence, ready to make an Eden Greenfield contract.

Now, he had obtained a Ghost System Beast at the level of a Heaven Calamity, the Yama Pragya.

Also, due to drinking tea brewed with Elegant Dance, Fang Mu was going to metabolize tens of thousands of milliliters of blood within the next few days.

It was still uncertain how many Covenant Blood Essences could be condensed!

Before, the only beast that Fang Mu could use in combat was the Rainy Doll, but now he was about to have more.

If he contracts with a few more beasts, Fang Mu could try to raise his Battle Network ranking to Gold.

No matter how rich Fang Mu's academic knowledge was, his practical battle skills were still lacking.

After grinding his combat skills to the Gold rank on the Battle Network, Fang Mu planned to go on an adventure.

Therefore, Fang Mu did not notice Yi Han's grim expression.

But She Wan, who was by his side, did notice.

She Wan had been standing behind Fang Mu during his talk with the proprietors of Chang Le Pavilion.

As for Yi Han's gaze at the second proprietor of Chang Le Pavilion, She Wan didn't know how to react.

Is it appropriate for a Grandmaster Creator to look like such a lecher!?

Yi Han's facial expression shattered the image of him as a Grandmaster Creator in She Wan's eyes.

She Wan was always secretly supporting the couple from Chang Le Pavilion.

If a beast could change Yi Han into a woman, perhaps he could become more involved in front of the second proprietor of Chang Le Square.

Upon returning to Jianmu Commerce Association, Fang Mu told Fang Yuan and Fang Yan of his plan to seclude himself for three days.

During these three days, while metabolizing his blood, Fang Mu wanted to summon his Destiny Guardian Beast, Blood of Abundance.

He would keep injecting blood into the Blood of Abundance.

This process was so strange that Fang Yuan and Fang Yan would certainly become worried if they saw it.

Fang Yuan and Fang Yan both accepted Fang Mu's sudden retreat without any qualms.

Fang Yuan and Yan Wood would sometimes choose to retreat when upgrading their Guardian Beasts, but in terms of duration, it would only last around ten hours at most,

They have never taken as long as three days.

When Fang Mu left the Chang Le Pavilion, Lang Huan specifically asked if he had ever metabolized impurities in his blood.

After learning that this was Fang Mu's first time, Lang Huan thoughtfully prepared Blood Replenishing Spiritual Material for him.

This spared Fang Mu the hassle of making additional preparations.

Even while in the car, Fang Mu could already feel the surging vitality within his body.

After entering the room and summoning the Blood of Abundance, Fang Mu immediately embarked on his routine task of blood infusion.

Normally, Fang Mu infuses only about three thousand milliliters of blood into the Blood of Abundance. This time, he did not control the amount of blood he used.

Instead, he continuously circulated his spiritual power to accelerate the flow of blood, allowing the excess to flow out from the wound of its own accord.

As Fang Mu massively transfused his blood into the Blood of Abundance, the Origin Blood Carp at the bottom of the well happily leapt around nonstop.

Fang Mu could faintly hear the sound of the blood splashing from the bottom of the well.

While donating blood, he took out the bottle of Covenant Blood Essence that was prepared in the morning.

Fang Mu planned to first form a contract with Eden Greenfield.

Contracting a Ghost System Beast required his spiritual power to be absolutely abundant.

Fang Mu planned to form a contract with Eden Greenfield and then have a good sleep at the well of Blood of Abundance.

Let the Covenant Servant Soul Ant Queen drain his spiritual power, and then after waking up on the second day, he would fully restore it and drink two bottles of soul-restoring elixirs.

This would allow his soul power to overflow before contracting with Yama Pragya.

The Covenant Servant Soul Ant Queen, living parasitically within Fang Mu's soul, essentially became a part of Fang Mu's spiritual power.

With the help of the Covenant Servant Soul Ant Queen, Fang Mu was sure to succeed in contracting the Heaven Calamity Ghost Series Beast Yama Pragya, no matter how difficult the process.

The Wood Domain Type Beast, Eden Greenfield, currently resembled nothing more than an unremarkable patch of green grass.

As Fang Mu prayed that contracting his Destiny Guardian Beast, Eden Greenfield, would not turn his hair green,

He simultaneously inserted the grass-like Eden Greenfield into a glass bottle filled with Covenant Blood Essence.

As soon as the grass-like Eden Greenfield touched the Covenant Blood Essence, it immediately started to glow with a green light.

Instantly after, Fang Mu felt a connection being established between himself and Eden Greenfield.

A large, glow-in-the-dark, green meadow sprouted around Fang Mu, growing outwards in all directions from his feet.

A green glowing light even emerged on Fang Mu's body.

Eden Greenfield ceaselessly absorbed the Covenant Blood Essence in the bottle, and the connection between Fang Mu and Eden Greenfield became increasingly stronger.

However, Eden Greenfield did not undergo significant changes like the former and Clear did when they absorbed the Covenant Blood Essence.

But just as Eden Greenfield finished absorbing this drop of Covenant Blood Essence, and Fang Mu was about to find a mirror to check any changes to his own body,

The green grass beneath Fang Mu suddenly grew taller, covering his ankles.

The leaves of the grass, which were originally green, took on a translucent, crystal-like quality.

This texture, a transition between plant and crystal, was very unusual; each leaf of the grass displayed a unique, dark green pattern.

These patterns made the meadow appear verdant at a glance.

While looking at the unique, dark green patterns on each leaf,

Fang Mu realized that the different combinations of leaves seemed to manifest various illusions,

As if observing these leaves could actualize any form of imagination.

Fang Mu scrutinized the grass beneath his feet only to discover that one drop of Covenant Blood Essence had directly caused Eden Greenfield to evolve into Eden Dreamland.

Chapter 288: Building the Village and Three Drops of Covenant Blood Essence!\_1

[Beast Name]: Eden Dreamland

[Beast Species]: Poaceae/Nyctaginaceae

[Beast Level]: Bronze (10/10)

[Beast Element]: Wood

[Beast Potential]: Gold

[Beast Quality]: Epic Quality

Skill:

[Fantasy Shadow]: Spreads greenery around based on self as a point, which has certain healing and hallucinatory effects. The area of greenery varies with the energy consumed.

Exclusive Features:

[Above the Green Field]: With each level up, a plant-type beastmaster can be planted on the green field in its juvenile phase, becoming a part of the green field. The green field obtains the exclusive feature of the plant-type beastmaster. (Once [Above the Green Field] takes effect, leveling up will no longer yield subsequent skills.)

[Constructing Hometown]: Contributes spiritual materials to the Dreamland, building homes for the sheltered souls and growing plants in the Dreamland. These homes are closely connected with the souls and plants, providing shelter for them and enhancing their abilities.

Evolutionary Path:

(If tangled with other life and souls, it is impossible to evolve again.)

The Covenant Blood Essence not only evolved the Eden Greenfield into the Eden Dreamland but also updated its quality from Standard Quality to Epic Quality.

Compared with when it was still Eden Greenfield, the Bronze skill has changed from [Greenery] to [Fantasy Shadow].

In addition to the original healing effect, [Fantasy Shadow] can also cast hallucinations on the target.

Hallucinations can make the target generate fantasies, which is very similar to confusion.

But it is a more advanced form of confusion.

The beast and the Beast Master are interlinked by their spiritual powers.

Therefore, when [Fantasy Shadow] causes an illusion, it is challenging for the beast to consider the Beast Master as an enemy.

However, it can regard other beasts outside the Beast Master as aggressive enemies.

To induce the beast affected by hallucination to attack a specified target.

In team battles, it can also make the hallucinated beast consider friendly units as companions and protect them.

But using the skill [Fantasy Shadow] to induce illusions on beasts on the same level will undoubtedly consume a lot of energy.

It cannot be used as a controlling skill from the start.

Yet, the hallucinatory effect of [Fantasy Shadow] at a critical moment could tilt the scale of victory towards us, reversing the adverse conditions into an advantage.

After upgrading to Epic Quality, the new exclusive feature [Constructing Hometown] that Eden Dreamland has obtained is powerful in Fang Mu's view.

He uses various spiritual materials to build homes for the souls and plants that exist in the Dreamland and make the homes establish connections with the souls and plants.

The most significant weakness of the plants planted on the Dreamland is their insufficient defense.

Once attacked, the plants will be damaged or die.

The exclusive features of the plant can then no longer be used.

After the plants are planted on Eden Greenfield, they cannot change their location, making them perfect targets.

However, if Fang Mu uses sturdy spiritual materials to build a shelter for the plants, it can greatly enhance the defensive abilities of the plants.

When the enemy considers the plants as a breakthrough, it can also serve as a decoy.

The exclusive feature [Constructing Hometown] does not limit the type of spiritual materials.

Fang Mu can entirely find some higher-level resources for Ling Poison Dark Lotus [Constructing Hometown].

Among all the metal spiritual materials, there is one metal called Solid Poison Soft Gold.

Solid Poison Soft Gold can strongly absorb toxins and solidify the toxin on the surface.

Once a Dimensional Rift appears in the city area, after the Alien Beast Wave in the city area is cleared,

To prevent the spread of toxins in the city, the Scavenger tend to use Solid Poison Soft Gold, each gram of which is worth tens of thousands of Dragon Rising Coins.

Luckily, Solid Poison Soft Gold can be reused, and the absorption and solidification of toxins do not consume Solid Poison Soft Gold.

Otherwise, even if the Dragon Rising Federation was to allot more funds to the Scavenger each year, it wouldn't be enough for the Scavenger's daily consumption.

The skill [Poison Gathering] of Ling Poison Dark Lotus gathers the toxins within the range through its roots,

And provides healing effects for the targets within the range covered by the roots.

But after Ling Poison Dark Lotus is planted on the Above the Green Field, the Bronze skill [Poison Gathering] loses its effect.

This has always been a regret in Fang Mu's mind.

Using Solid Poison Soft Gold for [Constructing Hometown], to some extent, is equivalent to restoring the effect of Ling Poison Dark Lotus's Poison Gathering.

And it lets Ling Poison Dark Lotus use the skill [Poison Gathering] without any consumption.

Meanwhile, Solid Poison Soft Gold can improve the effect of Ling Poison Dark Lotus's exclusive feature [Leaf Lotus Dance].

Gathering the toxins around Ling Poison Dark Lotus,

The frequency of Ling Poison Dark Lotus compressing the deadly poison into attack from its core and bursting out poison will increase.

Solid Poison Soft Gold is known as soft gold.

If Solid Poison Soft Gold is gently stretched, it has strong stretchability.

But once a rapid force works on Solid Poison Soft Gold, it will have some non-Newtonian fluid characteristics.

It is not inferior to other metals in terms of its defensive performance.

The Cicada Frog Soul parasite of the Ling Poison Dark Lotus's exclusive feature [Cicada, Frog, Lodging on Lotus], existing in the form of spirit, is most afraid of skills and abilities that target spirits.

The soul power of Rain Curtain Cicada and Poison Dart Frog, which Fang Mu values, is their unique functionality.

Building a home for the souls of Rain Curtain Cicada and Poison Dart Frog with Soul Nurturing Wood can not only enhance their effects,

But also allow them to return to the Soul Nurturing Wood to recover their soul power once their soul power is depleted.

Chapter 289: Building the Village and Three Drops of Covenant Blood Essence!\_2

He quickly launched the second round of attacks.

This made it possible for the soul within the Ling Poison Dark Lotus's unique characteristic, "Cicada Frog Lodging on Lotus," to keep fighting continuously.

The unique characteristic of "Constructing Hometown" had significantly enhanced the overall strength of his Eden's Dreamland from multiple dimensions.

Of course, it also made the cultivation of Eden's Dreamland even more challenging.

Neither Solid Poison Soft Gold nor Soul Nurturing Wood was a bargain.

Fang Mu could apply for Solid Poison Soft Gold within the Scavenger internally.

In order to fight for his Sakura Tempering Carp channels, a Bishop Flowers had personally vouched for him.

Applying to exchange some resources would definitely not be a problem!

However, for Soul Nurturing Wood, which had a strong nourishing effect on the soul, Fang Mu would have to put forth some effort.

There was a rumor that Soul Nurturing Wood was capable of preserving Soul Fire Seeds.

If someone died and was assisted by a specific Soul-System Beast, the soul of the deceased could be maintained within the Soul Nurturing Box for a century without dispersing.

From a certain perspective, Soul Nurturing Wood can be said to have extended a person's lifespan by a hundred years in an unconventional way.

Many powerful forces, even if they possessed Soul Nurturing Wood, wouldn't be willing to trade it.

Fang Mu also felt it inappropriate to search for it through his existing channels.

Because if he did so, he might give the impression that Qixing's absence was not for a breakthrough.

Instead, people might think that he was on the verge of dying, wanting to forge a Soul Nurturing Box to extend his life.

Such a misunderstanding would inevitably lead to many baseless probes.

Fang Mu, who had finally managed to firmly establish his identity as a disciple of a Grandmaster Creator, didn't want to encounter any more trouble.

Luckily, the spiritual material used for the unique characteristic "Constructing Hometown" from Eden Greenfield could be replaced.

If Soul Nurturing Wood was absolutely unattainable, he could substitute it with other spiritual materials for the time being.

Based on the display of the Eye of Omniscience, Eden's Dreamland could not evolve any further as it had already bonded and tangled with other souls and lives.

However, Fang Mu didn't consider this critical.

Eden's Dreamland, a Domain-Type Control Beast, was merely a vessel.

As long as the Wood System beasts planted on “Above the Green Field” could keep evolving, it would be sufficient!

The evolution of every single Wood System beast on “Above the Green Field” would bring about an overall enhancement to Eden’s Dreamland.

After examining Eden’s Dreamland, Fang Mu did not immediately plant the Ling Poison Dark Lotus onto Eden’s Dreamland beneath his feet.

Instead, he nervously walked over to the mirror, fearing that his hair had turned green.

After staring at his reflection for quite a while, Fang Mu did not notice any changes in his appearance.

Fang Mu hurriedly undressed and scrutinized his body in front of the mirror.

After checking several times and still finding no changes, Fang Mu nearly thought that he had formed a contract with a fake Domain-Type Control Beast.

Fang Mu was sure that he had observed very carefully.

Deciding not to dwell on it, he lightly stepped forward.

Eden Greenfield appeared beneath Fang Mu's feet again.

As he stepped forward with his left foot, Fang Mu felt a slight warmth on his sole.

Sitting on Eden Greenfield and looking down, he found a leaf tattoo with dark green patterns on the sole of his left foot.

This must be the change brought about by the Domain-Type Control Beast, Eden's Dreamland.

Although having a tattoo on his left sole felt somewhat strange, it was certainly better than having green hair or such a tattoo on his face.

Fang Mu took out the Ling Poison Dark Lotus, which had been stored in the Purple Ice Crystal Ring for a long time, and attracted it through the unique characteristic of Eden's Dreamland, "Above the Green Field".

The Ling Poison Dark Lotus immediately squirmed its roots and took root on Eden's Dreamland.

The Ling Poison Dark Lotus, which had taken root on Eden's Dreamland, was nourished by Eden's Dreamland.

The originally wilted lotus leaves and flowers sprung up instantly, looking very spirited.

Fang Mu immediately took out two bottles of one hundred percent pure Wood Element Potion and Life Elixir, and poured them onto Eden's Dreamland under his feet.

Having absorbed these potions, Eden's Dreamland instantly broke free from the constraints of the Bronze Rank.

It leveled up from Bronze Rank Level Ten to Silver Rank Level One.

Eden's Green Field, which could initially only spread over fifty square meters, instantly expanded to beyond one hundred square meters.

Once upgraded to the Silver Peak, the area of Eden's Dreamland could reach nearly three hundred square meters.

In a duel on the stage, such an area coverage would be enough to cover half the stage.

Because Fang Mu provided the maximum amount of resources to Eden's Dreamland, its range also reached the upper limit of a Domain-Type Control Beast.

Otherwise, a Silver Rank Domain-Type Control Beast could hardly cover such a large area.

Since the Ling Poison Dark Lotus was rooted in Eden's Dreamland, it was no longer an independent life form.

Instead, it relied on Eden's Dreamland for nourishment.

Therefore, Fang Mu only needed to feed Eden's Dreamland.

Eden's Dreamland would automatically use a portion of the Wood Element Energy and Life Energy to nourish the Ling Poison Dark Lotus, helping it upgrade its rank and quality.

Watching the Ling Poison Dark Lotus blossom next to his feet, Fang Mu would no longer panic when encountering beasts like the Iron Arm Fire Monkey in close combat on the Battle Network.

The Ling Poison Dark Lotus would launch a defensive boost using its unique characteristic, "Leaf Lotus Dance," creating a poisonous explosion within, to protect Fang Mu from attacks.

At Fang Mu's current rate of watering Eden's Dreamland with four elixirs every three days,

After ten turns, Eden's Dreamland would be able to level up to Silver Rank Level Ten and reach Legendary Quality.

Chapter 290 Building the Village and Three Drops of Covenant Blood Essence!\_3

Fang Mu took some Blood Aged Wine to feed the Ling Poison Dark Lotus separately, hoping it could evolve into a Ling Poison King Lotus while achieving legendary quality.

Every single King Lotus is a big fellow.

Since Fang Mu had to apply to the Scavenger for Solid Poison Soft Gold, he decided to apply for more at once.

So he wouldn't have to apply again one month later when the Ling Poison Dark Lotus evolved into a Ling Poison King Lotus.

Fang Mu consumed some Blood-supplying Spiritual Material from Ya Le Mountain while he thought about the special instructions the Second Proprietor of Chang Le Square, Li Xu, had given him.

"Don't contract a Ghost System Beast haphazardly."

"If possible, it would be best to use some spiritual material and elixirs that are beneficial to the Ghost System Beast and pour them on the eggshell of the beast before contracting."

"The embryonic Ghost System Beast has a strong absorption power for energy beneficial to itself."

“Ghost System Beasts have great wisdom before hatching, treat it well, assist it in growing up.”

“It will be closer to you after it hatches and you contract it, it can also reduce many resistances encountered during the contract.”

Li Xu’s emphases to himself surely weren’t aimless.

The best things for the Ghost System Beast were the Blood Aged Wine and the advanced version of it, the Covenant Blood Essence.

From She Wan, Fang Mu learned that each Ghost System Beast had a unique bloodline that could not evolve.

It could only continue along its own bloodline.

Before hatching, the enhancement of a Ghost System Beast’s bloodline with equal resources is more than three times that after hatching.

Seeing his own continuously outflowing blood pouring into the Blood of Abundance, Fang Mu prepared to use a drop of the Covenant Blood Essence on the Ghost System Beast before contracting.

This should substantially enhance the bloodline of the Ghost System Beast.

Apart from being used for contracting beasts, Covenant Blood Essence can also cause the life level of a Guardian Beast to positively transition.

Using it now while the Ghost System Beast is still in its egg stage, the effect would be more than three times that after it hatches.

Why not use one drop of Covenant Blood Essence to do the work of three!

Fang Mu once again climbed to the bottom of the Blood of Abundance.

While eating some Blood Replenishing Spiritual Material, he let the Aromatherapy Rabbit eat the buds of the Coagulated Jade Camellia and assist him with the Skill [Fragrance].

He spent the entire duration of the effect of the Blood Brocade Elegant Dance Tea staying there.

The three days allowed Fang Mu to settle down at the bottom of the well, spending some quality time with the Aromatherapy Rabbit.

This greatly deepened the bond between Fang Mu and the Aromatherapy Rabbit.

When he emerged from the Blood of Abundance to check how much Covenant Blood Essence had solidified in three days, he almost couldn't believe his eyes.

There were actually three drops in the grooves at the mouth of the well!

Aside from giving one drop to Yan Yubanruo, Fang Mu could divide the remaining two drops, one for the Origin Blood Carp, and the other for summoning-type Ghost System Beasts that would greatly assist Yan Yubanruo, such as Omen Butterfly.

He wanted to see if the Omen Butterfly could further awaken the bloodline of the American God Butterfly with the help of Covenant Blood Essence.

In fact, Fang Mu was somewhat hesitant about whether to use the Covenant Blood Essence for the Omen Butterfly or the Ten Longevity Carp first.

But when he thought of how the Omen Butterfly could enhance its own combat capability, and the Ten Longevity Carp had no chance of use in the near future,

So Fang Mu decided to contract with the Omen Butterfly first.

When Fang Mu was buying Dark Attribute Spiritual Material previously, he saw some rare Undying Series Spiritual Material.

These Undying Series Spiritual Materials contain a special Dead Qi, which does not directly deprive the living body of its life energy.

It induces the body towards the Undead Species instead.

Fang Mu planned to use pure Dead Qi to strengthen the All-Kinds Carp after contracting it with the Guardian Beast.

He wanted to see if it would allow the All-Kinds Carp to become an Undead, becoming Yan Yubanruo's first summon.

Taking a deep breath, Fang Mu took out the egg of Yan Yubanruo.

Through the dark purple ghost flame, Fang Mu's hand rested on the shell of Yan Yubanruo's egg.

Ghost flame is the product of condensed ghost aura, not real flame with burning effects.

Since Yan Yubanruo showed high intelligence even before hatching, Fang Mu spoke to the Yan Yubanruo inside the egg through his soul power.

“I will use my blood to aid your growth before you hatch.”

“Absorb as much as you need, don’t hesitate to ask me for more!”

Having said his piece, Fang Mu quietly waited for Yan Yubanruo’s response.

In his soul, Fang Mu heard a voice much like a queen’s.

“Thank you my contractor!”

Fang Mu was slightly startled when he heard Yan Yubanruo’s voice.

In part, it was because of the tone of Yan Yubanruo’s voice.

On the other hand, uttering such polite words in the voice of a queen seemed slightly bizarre.

Fang Mu could vaguely sense from Yan Yubanruo’s tone that Yan Yubanruo had actually developed a fear towards him.

There had only been two interactions between Fang Mu and Yan Yubanruo.

One was when he probed Yan Yubanruo using the Eye of Omniscience, and the other was their conversation now.

Fang Mu planned to ask Yan Yubanruo about its fear after it has hatched.

In any case, as the contractor of his Guardian Beast, Fang Mu could ask about anything he didn't understand without hesitation.

Fang Mu carefully poured the Covenant Blood Essence onto Yan Yubanruo's eggshell.

Upon contact with the Covenant Blood Essence, the purple flame on the shell's surface instantly intensified until it exploded toward the ceiling.

Then, after hitting the ceiling, it spread out in all directions.

When Yan Yubanruo absorbed the drop of Covenant Blood Essence, Fang Mu could feel a blood connection between them.

Now Fang Mu was essentially contracted with Yan Yubanruo, except that contracting a Ghost System Beast needed the soul as a medium.

The contract would only be considered complete when the Ghost System Beast entered Fang Mu's soul.

Seeing that Yan Yubanruo had absorbed the Covenant Blood Essence, Fang Mu immediately poured the Blood Aged Wine on it.

While Blood Aged Wine may not compare to Covenant Blood Essence, it was still extremely beneficial for the evolution of Guardian Beasts.

Yan Yubanruo absorbed the entire 5000 milliliters of Blood Aged Wine that was poured on it, and the eggshell was still absorbing it.

If it weren't for the fact that Fang Mu was constantly communicating with Yan Yubanruo through soul power.

Fang Mu would have thought something was wrong.

Previously, even a diamond rank Guardian Beast hadn't absorbed this much Blood Aged Wine.

Yan Yubanruo had absorbed a drop of Covenant Blood Essence, and yet it could still absorb so much Blood Aged Wine.

This gave a glimpse of Yan Yubanruo's immense potential.

Upon seeing that the eggshell no longer absorbed Blood Aged Wine, Fang Mu released his soul.

Just then, the dark purple ghost flame turned into dozens of ghost hands.

Each swipe of the ghost hands would deeply embed themselves into the black shell.

In the blink of an eye, they tore the shell that was binding Yan Yubanruo into shreds.

Before Fang Mu's eyes, a being whose mask and clothing completely differed from what he saw using the Eye of Omniscience, now emerged.
