

Beast Tamer 311

Chapter 311 - Subduing Dragon and Nightmare Tiger!_3

Fang Mu certainly couldn't just smash two or three hundred million Dragon Rising Coins to secure the Dark Nightmare Tiger, betting that others wouldn't bid higher than him!

"May I use Creator resources to substitute Dragon Rising Coins for bidding?"

The short-haired woman leading the Solemn King Pavilion shook her head upon hearing this. She was about to reply when a sudden thought hit her and she spoke again.

"If anyone can produce an Earth Element Potion with a purity level above eighty-five, they may participate in the bidding."

"Anyone with an Earth Element Potion with a purity level of ninety percent can skip the auction altogether and directly take the Dark Nightmare Tiger!"

The Solemn King Pavilion has a good relationship with a Master Creator, they can exchange for master-level Creator resources from that Master Creator.

That's why the Solemn King Pavilion doesn't bow to anyone for Creator resources below the master level.

This is something that even many major forces like the Ten Thousand Treasures Commerce couldn't accomplished.

However, the abilities of the Master Creator who has a good relationship with the Solemn King Pavilion are limited. A potion with a purity of eighty-five percent is the limit for this Master Creator.

The Solemn King Pavilion has no channels to obtain higher-level Creator resources. If there's an opportunity, the Solemn King Pavilion would like to strive for it.

Many of those who were prepared to bid became nervous when they heard the short-haired woman, who led the Solemn King Pavilion, say that Creator resources could be exchanged for it.

In auctions and trade dealings with some commerce associations, most people present have been backstabbed by others using Creator resources.

The demand for Creator resources is exclusive to each individual and power, and varies to different extents.

Some powers and individuals are willing to exchange Creator resources for supplies.

However, some powers and individuals can only purchase resources via Dragon Rising Coins.

Yet the requirements of the Solemn King Pavilion for the level of Creator resources are indeed somewhat high.

Would anyone really be willing to pay with Creator resources of such a level?

Many people who were ready to bid felt awkward thanks to the question Fang Mu asked.

Fang Mu didn't know what others thought, but when he heard the words of the leading lady from the Solemn King Pavilion, he felt relieved.

He began to analyse the unique characteristics of the Dark Nightmare Tiger.

[Beast Name]: Dark Nightmare Tiger

[Beast Type]: Feline/Python Tiger

[Beast Level]: Silver (2/10)

[Beast System]: Dark

[Beast Potential]: Silver

[Beast Quality]: Perfect

Skills:

[Dark Armor]: Forms a layer of armor outside the fur using dark energy. The dark energy inside the armor can reduce injuries when attacked by other elemental energies.

[Blood Spreading]: Increases ferocity when hurt or hurting enemies. Each level of ferocity increases one percent of strength and speed.

Exclusive Attributes:

[Proliferating Python Tail]: The Python tail splits each time it advances a major rank. After splitting, nurturing does not affect the tail's individual abilities and potential.

Evolutionary Paths:

:Subduing Dragon Nightmare Tiger, :Nightmare Cursed Tiger, :Giant Claw Nightmare Tiger.

Upon inspection, Fang Mu felt that for people with ample resources, it's not just about a potion with a purity of ninety percent Earth Element.

Even if it were five or ten, Fang Mu was willing to swap it.

The Exclusive Attribute [Proliferating Python Tail] allows the Dark Nightmare Tiger to have six python tails when it steps into the sequence.

The spiritual intelligence of the six python tails is independent from each other, which is far stronger than the Hellfire Cerberus's three heads!

So many people are fighting over the Dark Nightmare Tiger now because the exclusive attribute [Proliferating Python Tail] does not affect the speed of the Dark Nightmare Tiger's power improvement much.

With slightly more resources than other dark-element beasts, one can get multiple returns.

Otherwise, if each additional python tail required multiples of resource consumption,

Even if the Dark Nightmare Tiger was highly trained, not so many people would vie for it.

It's just like the Eden Greenfield lying at the Merit Pavilion for so long, but no one has exchanged it for the same reason.

However, the reason Fang Mu was willing to spend any amount of resources to get the Dark Nightmare Tiger was not just because of the Exclusive Attribute [Proliferating Python Tail].

It was due to the first evolutionary path, Subduing Dragon Nightmare Tiger.

Like the second evolutionary path Nightmare Cursed Tiger, it requires the cultivation of a large amount of dark elemental energy.

It's investing little by little to induce the Dark Nightmare Tiger to obtain the ability to curse.

The curse of the dark element is a very troublesome ability, and it can only be removed by special skills.

However, the attack method of injuring the enemy through the curse does not coincide too much with the close combat attack method of the Dark Nightmare Tiger.

The third evolutionary path, Giant Claw Nightmare Tiger, is far better than the second evolutionary path.

Tiger type familiars basically pounce and bite in close combat. The destructive force of the tiger's paw attack is not much weaker than the biting.

The slap of the tiger's paw is even more agile.

Once evolved into the Giant Claw Nightmare Tiger, it will greatly enhance the Dark Nightmare Tiger's close combat ability.

However, comparing these two evolutionary paths with the first one, whether it is the input of resources or the improvement of the Dark Nightmare Tiger's capabilities, it is like the difference between coal and diamond.

To make the Dark Nightmare Tiger evolve into the Subduing Dragon Nightmare Tiger, what is needed is a complete Dragon Ball.

By inducing one of the python tails of the Dark Nightmare Tiger to get the Dragon Bloodline through the Dragon Ball, and guide it towards the Dragon-type beast evolution.

Each Dragon Ball can induce one python tail to get a different Dragon Bloodline.

The attribute of the python tail will influence the original dark attribute of the Dark Nightmare Tiger, eventually becoming a multi-system beast with dual bloodlines of dragon and tiger.

Others can't make out the evolutionary path of the Dark Nightmare Tiger.

Even the Creators must carry out experiments through the blending of Spiritual Liquid, and hands-on experience to determine how the beast should evolve.

Like bronze-level skill [Dark Armor], it forms an armor outside of the fur with dark energy, resisting the damage from other elements to itself.

It enhances the defensive capability of the Dark Nightmare Tiger, allowing the Dark Nightmare Tiger not to fear elemental attacks from afar.

The silver grade skill [Blood Spreading] allows the Dark Nightmare Tiger to receive a BUFF that increases strength and speed by one percent, whether it is injured itself or it has inflicted injury on the enemy.

This ability is of little use at the beginning of the battle.

But once you start stacking the layers of [Blood Spreading], the Dark Nightmare Tiger will surely become a lethal force on the battlefield.

This is particularly true since both the bronze-level skill [Fantasy Shadow] of Fang Mu's Eden Illusionary Village and the exclusive attribute [Curtain Water Decay and Prosperity] of the Rainy Doll have healing effects.

They can restore the injury of the Dark Nightmare Tiger during the battle.

Since the decision was already made to get it, Fang Mu didn't shout out directly that he had an Earth Element Potion with a ninety percent purity.

Instead, he wrote it on the bidding card and handed it to the short-haired woman leading the Solemn King Pavilion.

Chapter 312 - The Upcoming Starwheel Gathering!_1

The people of the Solemn King Pavilion kept collecting the bidding cards and returning the security deposits.

After all, only one person would ultimately own the Dark Nightmare Tiger, so having a few powerful competitors would be enough.

The short-haired woman leading the Solemn King Pavilion had focused her attention on Fang Mu when he was asking his question.

It's not because a young man like Fang Mu is so eye-catching.

For a force like the Solemn King Pavilion that had been fighting and killing all year round, appearances didn't matter.

No matter how beautiful someone was, they would still rot after death, turning into dry bones.

She Wan and Yin Nanzhen had revealed their auras, but these could only demonstrate their identities as Hexagram Beastmasters to the outside world.

There were plenty of Hexagram Beastmasters present.

The reason this short-haired woman had noticed Fang Mu was because the Deputy Tower Master of the Solemn King Pavilion had recently visited the Mu Commerce Association.

This short-haired woman was one of those who had accompanied him.

Although she hadn't chatted with the Red Sleeve of the Mu Commerce Association, she had admired the Red Sleeve's style.

The young man standing before her now looked remarkably like the Red Sleeve of the Mu Commerce Association!

If this young man were a bit taller, his temperament a bit more restrained, and his expression a bit colder she would have definitely mistaken him for the Red Sleeve.

Wu Shuang would have mistaken the person for sure.

Wu Shuang, as the leader of the Solemn King Pavilion at the Dark Gathering to sell supplies, should not have had to personally handle the collection of bidding cards.

But because of Fang Mu's face, Wu Shuang took his bidding card herself.

Wu Shuang had seen that Fang Mu had written something on his bidding card.

Picking it up and looking at it, she had seen fourteen bold and striking characters stating 'A bottle of soil element potion with a purity of 90%' written on it.

Wu Shuang could tell with just one look that the person who wrote the characters on the bidding card must have practiced for a very long time and been guided by a famous teacher.

Otherwise, it would be impossible to write such excellent characters!

Of course, this also spoke of the boy's great talent.

Fang Mu's handwriting was the result of practice in two lives, and his handwriting in his previous life had always been praised.

Many old professors, after reading Fang Mu's papers, would first comment on his excellent handwriting.

In this life, Fang Mu, who loved biology, had come to the Beastmaster world, where various creatures could evolve infinitely.

Since childhood, he harbored a strong curiosity about this world and had transcribed numerous notes.

Later, because he did not possess the talent of a Beastmaster, Fang Mu threw himself wholeheartedly into cultural studies.

Hence, although Fang Mu appeared to be just a youngster, he had practiced handwriting for over forty years in total!

The short-haired woman leading the Solemn King Pavilion, after unconsciously admiring Fang Mu's handwriting, was astonished by the line of text on the bidding card.

The Dark Nightmare Tiger was actually being traded for a bottle of Earth Element Potion with a purity of 90%!

This could be called a great harvest!

The Pavilion Master currently wanted his Guardian Beast to advance further, and what was lacking were Grandmaster Creator resources.

The Earth Element Potion happened to be the required attribute for the Pavilion Master.

Originally, Wu Shuang thought of immediately ending the auction and directly handing over the Dark Nightmare Tiger to Fang Mu.

But considering that the young man had discretely handed over his bidding card instead of loudly announcing the price, it indicated that the young man was a restrained person.

In the end, Wu Shuang didn't make a fuss. She just lowered her head to make a please gesture to Fang Mu.

She signaled Fang Mu to come to the temporary shed that her people had set up behind their stall to talk.

Wu Shuang planned to wait for Fang Mu to enter the shed, and after some time, she would come out to return all the security deposits and end the silent bidding on the Dark Nightmare Tiger.

There were many people who looked alike, but that didn't necessarily mean people who looked similar were related.

But no matter what, the young man in front of her was able to offer Grandmaster Creator resources to exchange for the Dark Nightmare Tiger.

He must be in possession of substantial Grandmaster Creator resources.

Only those with abundant Grandmaster Creator resources would be willing to use them as exchangeable supplies.

The Solemn King Pavilion did not have such capability.

Don't be fooled by the Solemn King Pavilion's usual domineering blood-spreading grandeur, they were still able to discern which friends to make.

Making the right friends could confer endless benefits to the Solemn King Pavilion.

It was because the Solemn King Pavilion made the right friends that they achieved so much.

In response to Wu Shuang's invitation, Fang Mu graciously walked towards the shed located behind the stall.

Looking at the Dark Nightmare Tiger groaning in pain, its two serpent tails weakly coiled around its back,

Except for making a hissing sound , it couldn't even move a bit. Fang Mu really didn't have any good ideas.

Once the extraction of the Illusion Pain Mint was injected into the body, it can only be metabolized by the body itself.

If other methods were used to help the Dark Nightmare Tiger to forcibly metabolize the Illusion Pain Mint in the body, it would probably leave sequelae such as neuroparalysis and stiffness.

Looking at the color of the tears the Dark Nightmare Tiger was shedding, it would take at least a day to completely metabolize it.

The Solemn King Pavilion might be a powerful force for Yin Nanzhen, but for She Wan, the Solemn King Pavilion wasn't that big of a deal.

Judging by the overall strength of the forces, the Solemn King Pavilion was not much different from the Mountain-Opening Construction where Lin Ziyuan belonged.

They were not on the same level as the Lu Dushe clan.

Getting to know Fang Mu by selling the Dark Nightmare Tiger, and being able to use this opportunity to befriend Fang Mu,

Was a great piece of fortune for the Solemn King Pavilion!

She Wan watched with wide eyes as Origin Construction, Keystone Construction, Mountain-Opening Construction, and Feng Chenhao from Langya Biology, among others, rose up through their connections with Fang Mu.

Chapter 313 - The Upcoming Starwheel Gathering! _2

The high-star Creator resources released by Fang Mu won't significantly improve these powers in a short span of time.

However, these Grandmaster Creator resources are sure to markedly elevate the top-tier power of these factions.

The increase in top-tier power can, in a way, represent the growth of the family's foundation.

With more top-tier powers backing them, the future development of these powers is destined to become smoother.

After bringing Fang Mu into the tent, Wu Shuang hurriedly had someone prepare a pot of good tea for him.

Fang Mu courteously picked up the teacup and sniffed it, but didn't drink the tea.

A friendly smile appeared on Wu Shuang's typically cold face.

"Sir, please wait here for a while. I need to go out and oversee the situation," he said.

“I will be bringing in the Dark Nightmare Tiger for you very soon!”

“May I have a way to contact you? If any problems arise with the Dark Nightmare Tiger on your hands, you can call me!”

Wu Shuang was very careful with his words, but also clearly expressed his intention to establish a connection with Fang Mu.

Otherwise, no matter where or even in the most top-tier trading centers, there would be no after-sales service for the Guardian Beasts already sold.

Who knows whether the Guardian Beast would be wrongly cultivated once it got into someone’s hands?

In Wu Shuang’s eyes, the fact that Fang Mu could exchange Grandmaster Creator resources for Supplies indicated that Fang Mu must be a very prestigious and respectable individual.

It was unlikely that he would extort the Solemn King Pavilion just for one Guardian Beast.

Otherwise, Wu Shuang would not have dared to rashly make such a promise, which could result in trouble for the Solemn King Pavilion.

If someone else had asked for his contact information, Fang Mu would never have given it.

But the Solemn King Pavilion was different—it had saved Fang Yuan before.

Even though the Solemn King Pavilion was not aware of this, Fang Mu was still willing to give it a chance for a connection.

So, Fang Mu asked She Wan to leave her contact information for Wu Shuang.

“Sister Wan, leave a contact number for them,” he said.

After speaking to She Wan, Fang Mu said to Wu Shuang,

“If there are any problems with the Dark Nightmare Tiger later, I will have my guards contact you!”

On hearing this, Wu Shuang was overjoyed.

He had not expected that with just one suggestion, the other party was willing to give him—and the Solemn King Pavilion—a chance!

Wu Shuang himself did not have sufficient authority; there were many things he did not dare to promise rashly.

Once he returned, Wu Shuang planned to directly report the situation to his immediate superior—the Deputy Tower Master of the Solemn King Pavilion.

Then let the Deputy Tower Master discuss it with the Pavilion Master.

They could figure out how to establish a connection with this young man who could afford Grandmaster Creator resources.

Upon hearing Fang Mu's instructions, She Wan quickly left her contact information for Wu Shuang.

After Wu Shuang left, She Wan said to Fang Mu in a low voice.

"Young master, I know a bit about the Solemn King Pavilion," she said. "It is a very righteous power."

"However, it has offended many people in recent years due to its way of doing things."

"The pavilion master of the Solemn King Pavilion, Gu Dong, treats his subordinates very well, but he despises the Thief Group."

“This reportedly has a lot to do with his childhood experiences.”

“When Gu Dong was young, his family was ruined because of the Thief Group.”

“Our She Family has subordinate powers that work with the Solemn King Pavilion, so we have diligently investigated the Pavilion.”

Hearing She Wan’s words, Fang Mu got a general understanding of the Solemn King Pavilion.

To be honest, Fang Mu didn’t care whether the Solemn King Pavilion was a righteous power.

All that mattered to Fang Mu was that the Solemn King Pavilion had saved Fang Yuan before.

For a power to develop, there is no absolute righteousness.

The strengths of the Pavilion Master of the Solemn King Pavilion far exceeded those of the Lionheart Brigade.

The Solemn King Pavilion, which possesses Sequential powerhouses, can cooperate with the Jianmu Commerce Association in multiple aspects.

As Fang Mu established ties with the Solemn King Pavilion and gave it an opportunity,

He also intended to help the Jianmu Commerce Association through the Solemn King Pavilion.

Soon, Wu Shuang resolved the situation outside and had the iron cage housing the Dark Nightmare Tiger brought into the tent.

The Dark Nightmare Tiger, being observed by people outside just now, was already on the verge of an emotional explosion.

If it weren't for the fact that it was under the effects of the Illusionary Mint Extract, the Dark Nightmare Tiger would have tried to break free from the iron cage long ago.

It would then be engaged in a desperate fight with the onlookers outside the cage.

Though the Dark Nightmare Tiger was struggling to endure, it suddenly exploded in fury when it was moved without warning.

Despite its body being weakened by the Illusionary Mint, the Dark Nightmare Tiger's body still fiercely struck the iron cage, producing a loud "bang".

This startled the two members of the Solemn King Pavilion who were carrying the cage.

Wu Shuang reflexively looked at Fang Mu, afraid that the Dark Nightmare Tiger's reckless behaviour would anger this important guest.

Fang Mu had anticipated that the Dark Nightmare Tiger would react in such a manner when provoked by strangers.

He took out a bottle of Dark Element Potion with ninety-two percent purity, quickly uncapped it and passed it into the cage.

The Dark Nightmare Tiger was brimming with aggression at that moment.

However, it could distinguish what was beneficial to it and what it needed.

Although the extract from the Illusionary Mint could not be artificially exterminated once it entered the body of a Feline Royal Beast,

It was possible to lessen the pain the beast experienced from the Illusionary Mint by enhancing the beast's physical constitution.

The Dark Nightmare Tiger leaned its head towards the Potion Bottle in Fang Mu's hand, and Fang Mu generously poured the entire bottle into the tiger's mouth.

The aroma of King of all Beasts on the Dark Nightmare Tiger became denser, and the tiger's two tails became much more agile compared to before.

Chapter 314 - The Upcoming Starwheel Gathering! _3

Fang Mu's actions seemed utterly normal and ordinary to She Wan and Yin Nanzhen, but they almost made Wu Shuang drop his jaw.

This young man, after just trading a Grandmaster-level potion with the Solemn King Pavilion, actually took out another Grandmaster-level potion to feed the Dark Nightmare Tiger.

And the purity of this Grandmaster-level potion was even more refined than the one he just traded with the Solemn King Pavilion.

Fang Mu's attitude towards Grandmaster-level potions shattered Wu Shuang's worldview, while also bringing joy to his heart.

Wu Shuang planned to report everything he had seen to his immediate superior, the Deputy Tower Master of the Solemn King Pavilion.

However, a bottle of Dark Element Potion was just the beginning, Fang Mu took out three more similar potions in succession and fed them to the Dark Nightmare Tiger.

On the one hand, it was to alleviate the painful state of the Dark Nightmare Tiger at the moment.

On the other hand, it was to prevent the Dark Nightmare Tiger from having any lingering issues with its nervous system due to the overdose of the Illusionary Mint Extract.

The successive feeding of three Dark Element Potions by Fang Mu pacified both the head of the Dark Nightmare Tiger and the two python-like tails behind it, keeping them from roaring or hissing at Fang Mu.

However, as soon as anyone from the Solemn King Pavilion approached the Dark Nightmare Tiger, it would immediately enter a state of alert.

The two python tails rose high, ready to strike at any time.

When the Dark Nightmare Tiger's python tails were coiled around its body before, one wouldn't think they were that long.

But now, with the Dark Nightmare Tiger's python tails fully extended, each of them was actually much longer than the tiger's body itself.

The tiger body of the Dark Nightmare Tiger was only three meters, but the longest of the python tails had reached four and a half meters.

The shorter one also just made it to four meters.

Obviously, the shorter python tail had only grown out when the Dark Nightmare Tiger ascended to the Silver Stage.

After trading for the Dark Nightmare Tiger, Fang Mu no longer stayed at the Solemn King Pavilion's booth.

He took advantage of the still ongoing Dark Gathering to browse around.

But despite browsing until the end of the Dark Gathering, Fang Mu didn't make any significant gains.

He hoarded some Undying Species Spiritual Material and dark element spiritual material, so for a long time to come, Fang Mu won't have to worry about the daily consumption of these materials.

When he returned to the Jianmu Commerce Association, it was already four o'clock in the morning.

Fang Mu went back to his room and fell into a deep sleep next to the porcelain basin where the Sacred Relics of Sakura Tempering Carp were kept.

The next morning, after breakfast, Fang Yuan and Yan Wood began packing for Fang Mu.

Even though they knew Fang Mu was not lacking anything, they still prepared him with food, clothing, and daily necessities.

Before, Yan Wood was optimistic and cheerful in front of her family, but deep down, she was somewhat unconfident.

This had a lot to do with the environment Yan Wood was in.

There were many people like Wang Xingming around Yan Wood.

The consequence of not yielding to these peoples' oppression was suffering. If it was severe, it might even harm her family.

This made Yan Wood unable to compete and dare not to compete when she had many opportunities.

Additionally, Yan Wood wanted to improve her Beast Master skills, and she was lacking in resources.

The Dragon Garden University of the Capital City was a gathering place for talents.

With the lack of resources, Yan Wood could only ensure her rank in the middle of the class, no matter how capable she was.

However, after contracting with the Xi Hui Reflective Crane, Yan Wood's mentality underwent a significant change.

Yan Wood was no longer self-conscious in her bones, but truly confident.

As family members, they always want to care about each other's situation all the time.

Fang Mu and Fang Yuan both noticed Yan Wood's weakness hidden beneath her optimistic appearance.

It was only because they had no ability to resolve it previously, that they had kept their mouths shut and had not discussed it with Yan Wood.

Now, both Fang Yuan and Fang Mu have sensed the change in Yan Wood.

They were delighted about her change and were no longer necessary to talk with Yan Wood.

Yan Wood's hand still can't use force and is still hanging around her neck.

But seeing Fang Mu about to leave, she managed to bump Fang Mu's arm with her shoulder and said,

“Little bro, take care!”

Fang Mu has always disliked goodbyes, but when he heard Yan Wood’s solemn farewell, he couldn’t help but show a helpless smile.

“Third Sister, you’ve got your own club now, there’s no need for you to stay in the Capital over the New Year.”

“The room in your new home is ready, we’ll see each other again over New Year, won’t we?”

“And don’t shoulder bump me, if your bone injury gets worse, you will have to spend at least an extra week healing.”

“Maybe in this week, some other people might snatch away your potential teammates.”

Fang Yuan watched the interaction between Yan Wood and Fang Mu, feeling that he, as the older brother, had somehow morphed into the role of a father figure at that moment.

“No need to wait until the Spring Festival, I’ll help handle the club guild matters.”

“Once Xiao Yan has found her teammates and is certain she can participate in the club secondary league next year.”

“Xiao Yan can bring her team back to Jinghai!”

“Besides, wherever they are, they need to adjust to each other. Going back home for the adjustment is a good choice.”

Yan Wood’s eyes lit up at the sound of that.

Speaking of which, Yan Wood missed the life with Fang Mu very much.

Despite life being tough back then, it was filled with a warmth that couldn’t be erased.

“If second brother you can help me handle the club guild related matters, I can probably return to Jinghai in mid-December!”

“I have contracted with the crane beast that Xiao Mu gave me, which has enhanced my command of Fire System Royal Beasts.”

“I plan to mainly look for teammates who have contracted with powerful Fire Beasts.”

Creating a club guild to compete in the professional league is Yan Wood's dream.

Fang Mu and Fang Yuan, these two inexplicably 'father-like' souls, plan to let Yan Wood go through the wringer herself, to experience the joy of struggling on the path of her dream.

Yin Nanzhen originally planned to drive the Beast Car when leaving. With the speed of the Fiery Hellhound, they could reach JA City in four or five days.

However, to his surprise, Fang Mu was able to take the route of the Beastmaster Alliance and teleport directly to JA City.

With the protection of the Star Cloud Messenger, Fang Mu didn't feel any discomfort from the consecutive long-distance teleports.

Upon his return to the estate, Fang Mu stretched luxuriously.

The gains from this trip to the Capital City were enormous. It could be perfectly described as a return trip loaded with bounty!

According to the time estimation, the Starwheel Gathering should be starting soon.

Within three days at the latest, he would be able to acquire a large amount of Shadow Eye Stones and high-level Blood Tribe hearts via the Starwheel Gathering.

Chapter 315 - City Protecting Magpie!_i

Fang Mu stayed around The Capital for about seven days.

Since Keystone Construction, Origin Construction, and Mountain-opening Construction jointly undertook the construction of the Mu Commerce Association's infrastructure, both Mountain-opening Construction and Origin Construction dispatched a large number of craftsmen to help Fang Mu build his mansion.

They took advantage of Fang Mu's trip to The Capital to rush their work, hoping to give him a surprise.

Although they were rushing, their craftsmanship was not compromised.

All three factions, which had master craftsmen, went to this extent in building Fang Mu's mansion in order to earn his favor.

If rushing work affected the quality of craftsmanship, it would be better not to rush.

For these seven days, the craftsmen from these three factions hardly rested at all.

As soon as anyone felt tired, they would choose to use a special Guardian Beast known as Yuanqi Sloth to temporarily replenish their day's consumption.

The entire mansion was fully completed by the time Fang Mu returned.

The main theme of the entire mansion's design style was a garden-style aesthetic, conformed by Fang Mu himself.

Originally, Keystone Construction wanted to plant a myriad of flowers and plants in the mansion for Fang Mu.

However, considering Fang Mu's identity as a Grandmaster Creator disciple, they did not rashly do so.

Ordinary flowers and plants were of no great importance to Fang Mu.

Rather than having to dig them all up later, they better leave the decision-making space to Fang Mu.

The master craftsmen from the three factions chose not to wait for Fang Mu to return after completing the construction, but instead communicated with Fang Mu's personal assistant, Lu Xiaoyin.

They allowed Lu Xiaoyin to sign off on the work ahead of time.

The master craftsmen from these three factions, along with a group of craftsmen, still remained in JA City.

Only after Lu Xiaoyin had confirmed the sign off to Fang Mu, and that there were no areas needing improvements, did the master craftsmen lead the group of craftsmen back home and report back to their respective families.

As Fang Mu's personal assistant, Lu Xiaoyin informed Fang Mu about the situation a long time ago.

As Lu Xiaoyin always sent video updates of the mansion's construction progress to Fang Mu's phone, there was no necessity for a formal inspection.

If there were any areas that needed alteration, Lu Xiaoyin's meticulousness would absolutely preclude any premature signing off.

Fang Mu turned to Lu Xiaoyin and said.

"Xiao Yin, this is Yin Nanzhen, who will also be a member of the mansion from now on."

"You escort him to a room!"

“Then contact the few senior creators we’ve worked with before, and ask them to prepare some high-purity light element elixirs for Yin Nanzhen.”

Lu Xiaoyin had noticed Yin Nanzhen, who was driving for Fang Mu, earlier.

If Fang Mu assigned his original personal driver, He Qing, to himself, then this man named Yin Nanzhen should be Fang Mu’s new personal driver.

In JA City, He Qing is definitely sufficient and can accomplish his duties very well.

However, once the scope extends to the whole Dragon Rising Federation, He Qing would fall short of such capacity.

Lu Xiaoyin guessed that Fang Mu probably had He Qing act as his personal driver before, most likely to give He Qing a leg up.

Facing someone who would be working closely alongside her in service of Fang Mu in the future, Lu Xiaoyin was very courteous.

She did not deliberately mention that she was Fang Mu’s personal assistant, insinuating that Yin Nanzhen should obey her arrangement on a regular basis.

Just now, Fang Mu’s references to her and Yin Nanzhen explained everything.

As long as Yin Nanzhen is a person with reasonable emotional intelligence, he should certainly be able to catch on.

Yin Nanzhen had heard She Wan mention Lu Xiaoyin before.

Even though Yin Nanzhen had not had any contact with Lu Xiaoyin before, he was able to sense the respect and restraint in She Wan’s voice when she mentioned Lu Xiaoyin.

This indicated that Lu Xiaoyin's relationship with Fang Mu was even closer than that of She Wan's.

If Yin Nanzhen would flatter She Wan, naturally, he would also ingratiate himself with Lu Xiaoyin.

"Brother Lu, I'm a rough man, I've slept in the fields before!"

"You don't need to bother arranging a room for me."

Yin Nanzhen was clearly older and more powerful than Lu Xiaoyin.

Yet the moment he began speaking, he directly addressed her as 'Brother Lu.'

This let Lu Xiaoyin know that Yin Nanzhen is a smart man.

Lu Xiaoyin had never intended to establish dominance in front of Yin Nanzhen.

As long as Yin Nanzhen was aware of her identity, and didn't interfere with her arranging tasks for him, that would be sufficient.

"Brother Yin, you're older than me, please call me Xiao Yin."

"Sister Wan also calls me that."

"As a servant under the young master, how could I possibly let you sleep in a place like the countryside!"

Walking down to the second-floor corridor, Lu Xiaoyin directly pushed open the door to the first room.

She turned to Yin Nanzhen, who was wide-eyed in surprise and said.

“This here is the room where you will be living.”

“I’ll prepare your household items immediately!”

“If the young master ever needs to use the Beast Car, I will inform you at the earliest.”

Looking at the room that was over 200 square meters, Yin Nanzhen was astonished to find that all the furniture used were all pieces crafted by master-level craftsmen.

If he owned this room in the past he could have sold all the furniture and decorative items inside the room.

It certainly would have been a far cry from the inconveniences he had to face then.

Being with Fang Mu not only allowed him access to excellent creator resources, but even the living environment was amazing!

Even when he was a direct descendant of his previous faction, Yin Nanzhen had never received such preferential treatment.

Lu Xiaoyin did not spend too much time with Yin Nanzhen.

As a personal assistant, there were many servants in the mansion that she had to manage.

Lu Xiaoyin had a plethora of minor tasks to attend to, and there would be plenty of opportunities to interact with Yin Nanzhen in the future.

Interacting during actual events was far more meaningful than casual regular interactions.

Chapter 316 - City Protecting Magpie!_2

Fang Mu sat on the sofa in his room, sipping on the Blood Replenishing Tea brewed in his thermos cup.

After drinking all the Blood Replenishing Tea, Fang Mu summoned Yan Yubanruo out.

A dark purple ghost qi suddenly filled the room, spreading all around.

The form of Yan Yubanruo quietly stood behind Fang Mu.

Locked under the shackles transformed from Yan Yubanruo's chains was the Ghost Fish Princess with a mermaid bloodline.

The Ghost Fish Princess swam around Yan Yubanruo's feet with her fish tail.

Yan Yubanruo clearly didn't intend to step on it, and directly threw the Ghost Fish Princess to one side with a tug of the chains.

The Ghost Fish Princess moved her tail ruefully a couple of times.

Seeing Yan Yubanruo's cold gaze impatiently landed on her.

The Ghost Fish Princess helplessly lay on the ground, covering her face with her seaweed-like long hair.

Seeing this, Fang Mu couldn't help but speak to Yan Yubanruo.

"Ming Ye, be a little nicer to the Ghost Fish Princess. In the future, you'll have to rely on the Souls of Death that she produces!"

While speaking, Fang Mu took out more than six thousand Souls of Life that he had traded from the Mad Wolf Mercenary Group.

In a place like the Dark Gathering, the sight of Souls of Life was far less shocking than under the bright light.

In the huge jar, countless grey-white phantom figures were hissing and roaring.

Most of these phantom figures were various beings, occasionally mixed with human souls.

Souls of Life are not simply formed after death.

First, a specific environment is needed, followed by the sedimentation of time.

The settling of Souls of Life is not as complicated as Souls of Death, but it still requires years of time.

Otherwise, Souls of Life wouldn't be sold for fifty Dragon Rising Coins each.

Fang Mu placed the whole jar of Souls of Life in front of the Ghost Fish Princess, letting her refine these Souls of Life into Souls of Death using the silver grade skill, [Soul Absorbing Hook].

Fang Mu had asked Yan Yubanruo before.

The time required for the Ghost Fish Princess to absorb and digest the free-floating souls and refine them into Souls of Death using [Soul Absorbing Hook] was five times the time it took for consuming Souls of Life directly.

The price of Souls of Life is not expensive, they are available in the periphery of ancient battlefields.

For Fang Mu, who makes money faster than printing it, spending money to buy time is a very worthwhile deal.

In front of Fang Mu, the Ghost Fish Princess was much less cautious than when dealing with Yan Yubanruo.

But there was still an air of respect and flattery.

Because the Ghost Fish Princess can sense the hierarchical relationship between Yan Yubanruo and Fang Mu.

The Ghost Fish Princess accepted the jar handed to her by Fang Mu and wagged her tail in gratitude.

The Ghost Fish Princess was very willing to produce Souls of Death to nurture Yan Yubanruo.

As if this was her glory!

Hearing Fang Mu's words, Yan Yubanruo said disdainfully.

"A ghost servant is just an inferior servant, a tool to be at one's disposal."

"However, master, since you asked me to treat it better, I will attempt to do so."

Yan Yubanruo's words suddenly made Fang Mu realize something.

That is, why the suppression of bloodline was so tremendous among ghost system beasts!

High bloodline ghost system beasts, inherently, are not friendly to low bloodline ghost system beasts.

Perhaps they never thought of coexisting peacefully with low bloodline ghost system beasts.

It's all due to the bloodline, so Fang Mu didn't ask for more.

He decided to let Yan Yubanruo make his own decision on how to get along with the Ghost Fish Princess.

For Dark Nightmare Tiger, Fang Mu couldn't make a contract immediately due to the lack of Covenant Blood Essence.

So, at least for half a month, the Dark Nightmare Tiger had to stay in the Purple Ice Crystal Ring accumulating dust.

In order for the Dark Nightmare Tiger to evolve into the Subduing Dragon Nightmare Tiger, the Dragon Ball became a resource that Fang Mu needed to focus on obtaining in the future.

Enhancing the Dark Nightmare Tiger was not possible, but the three Tomb Hunting Corpses and the Giant Brutal Butcher could still be.

Especially the evolution paths of the three Tomb Hunting Corpses are Grave Offering Brewer, Grave Babysitter, and Grave Child respectively.

This combination could very well form a "Ritual Cemetery Three Treasures" group.

[Mommy! Hey!]

[When can we pull out the grass on the grave!?]

[Wait for the prey to arrive!]

[The three of us are a family for cemetery hunting!]

Expelling the automatically ringing tune from his mind, Fang Mu took out the cage containing three Tomb Hunting Corpses and the Giant Brutal Butcher from the Purple Ice Crystal Ring.

Then, he spread a bottle of Life Elixir around the cage to prevent the spread of Dead Qi.

The Tomb Hunting Corpses often do not attack actively when no prey enters within a certain range, and appear relatively quiet.

But the Giant Brutal Butcher started to struggle violently.

The chains locking its body had already been embedded deeply into the rotten flesh of its body due to the struggle.

Seeing Yan Yubanruo's immediate preparation to implement the [Golem Paper Control] to control the three Tomb Hunting Corpses and the Giant Brutal Butcher,

Fang Mu immediately stopped Yan Yubanruo and handed over the bottle of Souls of Death.

Among the Souls of Death that Fang Mu traded from the Mad Wolf Mercenary Group, there were more than 870.

However, he didn't need as many as 870 Souls of Death.

It only needed about 500 to elevate Yan Yubanruo's strength to Silver Peak.

Ghost System Beasts can rapidly convert absorbed souls of death.

Fang Mu planned to upgrade Yan Yubanruo's level first before attempting to control the Tomb Hunting Corpse and the Giant Brutal Butcher.

Otherwise, Yan Yubanruo with a copper level one Perfect Quality, might have the white paper man burst due to the target's violent struggle during the control process,

leading to a waste of contract materials.

Takes note that it also takes Yan Yubanruo some time to coagulate a piece of white paper man.

Chapter 317 - City Protecting Magpie!_3

“Ming Ye, try to absorb as much as you can from the Soul of Death first.”

“Raise your rank to Silver Stage before trying to control these four undead creatures.”

“It also takes time to absorb and refine the pure Dead Qi.”

“Even if you form a contract with these four undead creatures right now, there’s no way to quickly increase their stage and quality.”

Yan Yubanruo had long been envious of the Soul of Death Fen Mu purchased.

However, Yan Yubanruo considers Fang Mu his master, and in the dictionary of a Ghost System Beast, there is no saying of a servant demanding anything from the master.

But now that Fang Mu has given him the entire jar of the Soul of Death, Yan Yubanruo revealed a rare smile on his face.

He greedily clutched the jar containing the Soul of Death to his chest.

He opened the jar, leaving a small gap, and took a sip.

Immediately, about thirty to forty pure black souls, constantly emitting harrowing screams, were absorbed into Yan Yubanruo’s belly.

Instantly, the dark aura of the Soul of Death began to surge in Yan Yubanruo's purple Ghost Flames.

Despite Yan Yubanruo's fast absorption and conversion of the Soul of Death, it is no match for their overwhelming numbers.

Fang Mu planned to read a book while dozing off next to the Sakura Tempering Carp.

Wait for Yan Yubanruo to reach the Silver Stage, absorb and condense a batch of Undead Crystals from the Dead Qi.

Then let Yan Yubanruo control these three Tomb Hunting corpses and the Giant Brutal Butcher through the White Paper Man, and upgrade these four undead creatures.

Fang Mu hadn't read his book for long when Hu Tao called.

As soon as Fang Mu picked up the call, he heard Hu Tao laughingly ask on the other end.

"Fang Mu, school starts tomorrow. My mom asked if she should make breakfast with a three-delicacy filling or make an egg crepe roll with sausage?"

Thinking about it, Fang Mu hasn't eaten Hu Tao's mom's breakfast for almost two months.

Fang Mu is not sure how to describe the breakfast that Hu Tao's mom makes.

If he really had to describe it, everything she makes is delicious.

When Hu Tao asked what he wanted to eat, Fang Mu didn't feel he had the liberty to choose.

"Your mom's breakfast is all delicious, just let her make whatever you like to eat!"

No matter what Hu Tao's mom makes, it doesn't make a difference to Fang Mu.

Because ever since the quality of the Blood of Abundance improved, Fang Mu's stomach turned into a bottomless pit.

Filling up his stomach relies entirely upon nutrition meals.

The amount of breakfast Hu Tao brings, is just enough for Fang Mu to taste.

Thinking about the snacks that Yan Wood and Fang Yuan packed for him in the capital, Fang Mu said to Hu Tao.

"I just came back from the capital, right? I brought back some snacks."

"You can bring some home to your mom tomorrow."

Although he's eating Hu Tao's mom's meals every day, Fang Mu really felt a bit guilty.

Upon hearing this, Hu Tao's face involuntarily reddened, as if she was thinking about something.

Since Hu Tao returned, she would call him every two or three days.

Usually, every time she called, Hu Tao would find a topic and chat with Fang Mu for at least three to five minutes.

But this time, after hearing what Fang Mu said, she hurriedly hung up.

Seeing this, Fang Mu raised an eyebrow and thought to himself.

If Hu Tao's Iron-winged Sparrow fully exploits its potential, its bloodline is very potent.

Fang Mu had observed Hu Tao's Iron-winged Sparrow through the Eye of Omniscience. The Iron-winged Sparrow could evolve into a City Protecting Magpie, awakening the bloodline of the Phoenix.

Once it evolves into a City Protecting Magpie, its evolutionary path will become much more open.

Just as Fang Mu was preparing to go to the school library tomorrow to find some books related to the Phoenix and study its bloodline, he noticed that Yan Yubanruo's rank had risen from Copper Stage One to Copper Stage Four.

This rate of strength improvement exceeded Fang Mu's expectations.

Each Ghost System Beast has different capabilities in absorbing the Soul of Death.

Even if they belong to the same Heaven Calamity Ghost Series Beast, their abilities to absorb the Soul of Death differs greatly.

Yan Yubanruo has an exceptionally high affinity for the Soul of Death, which is good news for Fang Mu.

Staying up all night doesn't pose a problem to Fang Mu, who's already a Beast Master.

If he doesn't drain his soul energy in a day, the Covenant Servant Soul Ant Queen won't have many objections.

He hadn't been reading for more than half an hour when a strong energy fluctuation came from Yan Yubanruo's body.

In the pervasive dark purple Ghost Flames, Yan Yubanruo's rank was enhanced.

Upon checking, Fang Mu found that Yan Yubanruo's Silver Grade Skill was [Execution Shackles].

[Execution Shackles]: When the target's life energy and vitality are less than thirty-five percent of one's own, the shackles will bind the target and inflict serious damage. The target will receive exponentially multiplied damage when attacked, and its own energy consumption will also double."

Seeing Yan Yubanruo's Silver Grade Skill, Fang Mu knew he had acquired another functional ability.

Once the [Execution Shackles] are attached to a target, the target receiving double damage is only a little part of it.

The increased energy consumption by oneself to some extent equals to sealing the target beast's sacrificial abilities.

Even if the target beast successfully performs a sacrifice, its combat power after the sacrifice will be significantly reduced due to the doubled energy consumption.

This skill is very rare among Fang Mu's known abilities of the Guardian Beast.

After Yan Yubanruo upgraded his rank to Silver Stage, he completely suppressed the three Tomb Hunting corpses and the Giant Brutal Butcher who's only a Copper Stage Seven in terms of rank.

Yan Yubanruo didn't rush to absorb the remaining Soul of Death, to make his rank reach the Silver Peak.

Instead, he simply touched the White Paper Man hovering around him with his finger.

The crimson fingernail stabbed into the four White Paper Men, leaving four bright red traces.

Immediately afterwards, the four paper men marked the tombs of the three Tomb Hunting corpses and the face of the Giant Brutal Butcher without hesitation.

The three Tomb Hunting corpses and the Giant Brutal Butcher all felt threatened by the White Paper Man.

The Tomb Hunting corpses crawled out from their tombs and, together with the Giant Brutal Butcher, brandished their shackled claws, trying to attack the White Paper Man.

However, the White Paper Man was extraordinarily tough, and the claw tearing did not break the White Paper Man.

The four pieces of White Paper Men were respectively stamped onto the bodies of the Tomb Hunting corpses and the Giant Brutal Butcher.

The three Tomb Hunting corpses and the Giant Brutal Butcher's bodies stiffened for a moment and quickly returned to normal.

Yan Yubanruo whispered to Fang Mu.

"Master, these four undead creatures have now been controlled by me and have become my paper puppets."

"You can safely let them out of the cage now!"

Chapter 318 - Yan Luo and Comprehensive Upgrade! _i

Upon hearing this, Fang Mu stepped forward, putting all his strength to tug at the lock of the iron cage.

However, only when he tried to pull did Fang Mu realize that the lock had been smudged by the Dead Qi, and welded shut by a grey-green rust.

Opening this cage from the outside had now become quite difficult.

Frowning, Fang Mu summoned the Blood of Abundance, enshrouding himself within a massive blood-red fog.

Fang Mu's black hair turned blood-red and fell down to his neck and shoulders. A black goat's skull, hidden within the fog, gently rotating.

The mysterious pressure even made Yan Yubanruo, who was contracted to him, feel uneasy.

The three Tomb Hunting Corpses and the Giant Brutal Butcher, these terrifying undead creatures, all shrank nervously together at this moment.

When Fang Mu used his hands to pull at the cage, he hadn't even exerted too much strength when he already snapped off one bar after another.

The shackles binding the wrists and ankles of the Tomb Hunting corpses and the Giant Brutal Butcher were of the same material as the cage.

Hence, Fang Mu hardly used much strength as he pulled these shackles apart.

The three tomb hunting corpses and the giant furious butcher released because of Yan Yubanruo, controlled meekly stood upfront Fang Mu like a statue.

The giant brutal butcher was not as bad, covered in a layer of thick corpse skin.

The corpse skin was covered with moss and looked like clothing.

But the three tomb hunting corpses were not obstructed at all, which looked a bit disharmonious.

Dead Qi is invasive to many substances and will corrode many materials.

Ordinary clothes are not suitable for undead creatures that are covered in Dead Qi.

Generally, Beast Masters who form contracts with undead Guardian Beasts don't choose to clothe their creatures.

Firstly, the undead-series beasts do not possess spiritual power, so they could not use spiritual instruments.

If heavy armor is put on the undead-series beast, it will lessen the undead-series beast's mobility.

Secondly, in many formal events and Battle Network duels, beasts are not permitted to wear any form of defensive gear.

However, a type of fungi could coexist with undead beasts.

The spores of this fungus would absorb energy from the soul flame of undead beings to multiply and change colors based on the undead creature's own cognition, forming clothing of various styles.

This fungus was known as "Funeral Robes".

Because people in the Dragon Rising Federation that have contracted the undead-series Guardian Beasts are fewer, plus the "Funeral Robes" fungus commonly appears in ancient battlefields, its price isn't high.

Fang Mu had already purchased it in advance from the Dark Gathering.

As the "Funeral Robes" fungus symbiotically coexisted with undead beings and does not possess any defensive effect,

Therefore, any major event does not regulate its usage, and it can be used freely.

But for the "Funeral Robes" fungus to stay active, it demands a daily sprinkling of elemental elixirs from the wood element.

This was quite a costly expense for many Beast Masters who had contracted undead Guardian Beasts.

After all, Beast Masters who had contracted undead Guardian Beasts usually used Life Energy to clear the invasion of Dead Qi in their bodies, which was already a significant expense.

Fang Mu stepped forward, planting the “Funeral Robes” fungus onto the three Tomb Hunting Corpses and the Giant Brutal Butcher.

Then he poured elixir with 70% purity of the wood element onto the “Funeral Robes” fungus.

Nurtured by the Dead Qi and the energy of the wood element, the “Funeral Robes” fungus immediately started to take root and multiply.

Yan Yubanruo, on the other hand, continued to consume the Soul of Death, elevating her own rank.

Meanwhile, Fang Mu was planting the “Funeral Robes” fungus and Yan Yubanruo’s level already rose to Silver Level Four.

For an undead being like the giant brutal butcher that had an undetermined evolutionary path, only after ascending to the gold rank and gaining a unique trait,

Could the evolutionary path be decided according to skills and unique traits.

Hence, Fang Mu directly fed the Undead Crystals produced by the Soul Absorption to the giant brutal butcher.

He watched as the giant brutal butcher’s level kept increasing, breaking through to the silver rank in no time.

And under the nourishment of the pure Dead Qi that had a hundred percent purity, its quality soared straight through the Elite Quality, reaching the Perfect Quality.

Fang Mu did not have high hopes for the giant brutal butcher.

Before determining its evolutionary path, as long as the giant brutal butcher can properly be in the frontline and has Fang Mu's approval, it was enough.

However, the giant brutal butcher presented Fang Mu with an enormous surprise.

[Beast Name]: Giant Brutal Butcher

[Beast Species]: Giant Corpse Family/Tyrant Corpse Genus

[Beast Level]: Silver (2/10)

[Beast Element]: Undying

[Beast Potential]: Gold

[Beast Quality]: Perfect

Skill:

[Gluttony]: Rapidly heals its own injuries by swallowing corpses. In the absence of corpses to swallow, it prioritizes eating its own flesh to recover from lethal injuries.

[Flesh Erosion Trap]: When hit by external force, it can turn its own flesh into a muddy trap, restricting its target.

Exclusive traits:

[Flesh and Blood Armament]: By devouring corpses that are not higher than its own life level, it can hide the material of the corpses inside its body or fix it on its body surface, making it part of its body.

Evolutionary Path:

: Melting Body Butcher, : Sickie Butcher, : Giant Bone Butcher.

Since Yan Yubanruo is only at Silver Rank Level 5, the level of the Giant Brutal Butcher, as an undead creature controlled by Yan Yubanruo, cannot be higher than Yan Yubanruo.

But once Yan Yubanruo rises to Silver Rank Level Ten, with these Qi Crystals of Death, the Giant Brutal Butcher could easily rise to Silver Rank Level Ten.

After ascending to the Silver Grade Perfect Quality, the Giant Brutal Butcher obtained a new skill and exclusive trait.

Chapter 319 - Yan Luo and Comprehensive Upgrade! _2

The Silver Level skill [Flesh Erosion Trap] is quite unique, allowing it to merge the hands, feet, or even the sharp-toothed heads of attackers into its own flesh when attacked.

The essence of life for undead creatures is the soul flame, the flesh is just a vessel.

The Giant Brutal Butcher doesn't need to use its body as a prison, in fear of being destroyed by enemies.

If its body is destroyed, it can recover by consuming some flesh.

For instance, in a battle with a wolf beast, the wolf beast's forepaw is trapped in the Giant Brutal Butcher's body as soon as it strikes.

It's the same for biting.

This allows the Giant Brutal Butcher to control multiple targets at once with the Silver Level skill [Flesh Erosion Trap], becoming a mobile super glue.

The flesh of the Giant Brutal Butcher contains a high concentration of death qi and mold poison, along with other toxins.

These toxins will infect the flesh of the target while trapping them, posing a threat to their life.

Its exclusive trait [Flesh and Blood Armament] allows the Giant Brutal Butcher to modify its body in the process of devouring flesh.

For example, after devouring the corpse of an eagle beast, the Giant Brutal Butcher can hide the eagle's claw in its flesh or use it as a weapon on its body surface.

If Fang Mu lets the Silver Rank Level Ten Giant Brutal Butcher devour the remains of a hundred Iron Bone Wolves.

The Giant Brutal Butcher can use the hard spinal bones of the Iron Bone Wolf to build its own skeleton, and grow sharp teeth on its palms and arms.

To damage the enemy in battle.

This exclusive trait [Flesh and Blood Armament] allows the Giant Brutal Butcher to gain infinite possibilities through foreign objects.

Following the current skills and exclusive traits, the most suitable evolutionary path for the Giant Brutal Butcher is the Melting Body Butcher.

When the Giant Brutal Butcher advances toward the gold tier, Fang Mu can formally evolve the Giant Brutal Butcher into the Melting Body Butcher by feeding it Blood Aged Wine.

Next, Fang Mu only needs to let the Giant Brutal Butcher quietly absorb the Death Qi Crystal to increase its level.

Fang Mu turned his attention to the three Grave Hunting Corpses.

These three Grave Hunting Corpses have exactly the same skills and exclusive traits, but their evolutionary paths are different.

The evolutionary paths chosen by Fang Mu are the Grave Sacrifice Pregnant Mother, the Grave Sacrifice Father, and the Grave Sacrifice Child.

Fang Mu is most interested in the Grave Hunting Corpse that can evolve into a Grave Sacrifice Pregnant Mother.

He immediately took a crystal bottle of Blood Aged Wine, and after feeding the Death Qi Crystal to this Grave Hunting Corpse that could evolve into a Grave Sacrifice Pregnant Mother.

He opened the crystal bottle and let Yan Yubanruo control the amount the Grave Hunting Corpse drank according to its status.

After Fang Mu fed this Grave Hunting Corpse that could evolve into a Grave Sacrifice Pregnant Mother, he did the same for the other two.

Fang Mu wanted to see what kind of difference there would be in the exclusive traits and evolutionary paths after the “Ritual Cemetery Three Treasures” band of Grave Hunting Corpses completed their evolution.

The Death Qi Crystals fed to the Grave Hunting Corpses were not only absorbed by the Grave Hunting Corpses themselves, but also a part was taken away by the “Funeral Robes” fungus.

The “Funeral Robes” fungus that had just taken root in the three Grave Hunting Corpses quickly differentiated.

When this Corpses Hunting that could evolve into a Grave Sacrifice Pregnant Mother grew grey-green hair and had a rounded belly.

The “Funeral Robes” fungus had already turned into a pure white wedding dress.

Fang Mu used the Eye of Omniscience to examine the evolved Grave Hunting Corpse.

[Beast Name]: Grave Sacrifice Pregnant Mother

[Beast Species]: Corpse Family/Hunter Corpse Species

[Beast Level]: Silver (3/10)

[Beast Element]: Undying

[Beast Potential]: Gold

[Beast Quality]: Epic Quality

Skills:

[Spine Lock]: Uses death qi to generate a spine, which grows out of the body to form chains that bind the target. When the chain snaps, the death qi inside will turn back into a chain for a second binding.

[Swift Rend Claw]: Increasing the speed of strikes while attacking with sharp claws, the faster the strike, the stronger the tearing effect.

Exclusive Traits:

[Bone of the Same Cold]: When undead creatures related to its own bloodline are attacked, it enhances its own fierceness, allowing it to enter a furious state. When undead creatures related to its own bloodline die, they can be devoured and regrown with death qi.

[Flesh Newborn]: Swallow flesh tainted by death qi to nourish the unborn fetus in the belly, letting the fetus be born. The newborn can sacrifice itself to revive undead creatures of the same bloodline through the Bone of the Same Cold.

Evolutionary Path:

1: Burial Kind Mother, 2: Graveside Witch, 3: Hunting Corpse Mother Soldier.

Under the stimulation of the pure death qi and Blood Aged Wine, the originally perfect quality Grave Hunting Corpse was upgraded in quality when it evolved into a Grave Sacrifice Pregnant Mother.

It became a silver rank epic quality undead creature.

Fang Mu was immediately attracted by the Grave Sacrifice Pregnant Mother's new exclusive trait, [Flesh Newborn].

The new exclusive trait of the Grave Sacrifice Pregnant Mother is indeed related to the fetus in her belly.

In battle, the Grave Sacrifice Pregnant Mother continuously picks flesh tainted by death qi to hatch the unborn fetus in her belly.

The newborn can exponentially amplify the effect of the exclusive trait [Bone of the Same Cold].

Utilize the exclusive trait to sacrifice itself, reviving the now evolved Grave Sacrifice Father and Grave Sacrifice Child.

With this ability, as long as the Grave Sacrifice Pregnant Mother can successfully give birth to a newborn in battle through [Flesh Renewal].

The Cemetery Three Treasures can become a perpetual motion machine.

No matter how many times they are killed, they can reappear on the battlefield.

The three new evolutionary paths of the Grave Sacrifice Pregnant Mother are excellent.

The Hunting Corpse Mother Soldier makes the Grave Sacrifice Pregnant Mother naturally regarded as a mother by the Corpse Hunting Beasts in the wild, uncontrollably gathering around the Hunting Corpse Mother Soldier.

Chapter 320 Yan Luo and Comprehensive Upgrade! _3

The Hunting Corpse Mother Soldier is a veritable treasure trove for those forces who make a living from selling Undead Species Guardian Beasts and routinely explore ancient battlefields.

The Hunting Corpse Mother Soldier could easily enable the massive capture of corpse hunters.

However, this evolutionary path is obviously unsuitable for Fang Mu.

Even if Fang Mu was to explore an ancient battlefield, he would not need to capture corpse hunters for sale.

With his resources, Fang Mu doesn't need to worry about other ways to make money.

The other evolutionary path which involves the Graveside Witch causes the bloodline of the Grave Sacrifice Pregnant Mother to shift, transforming it into a long-ranged undead guardian beast.

Undead guardian beasts capable of long-range combat are extremely rare and excellent among Undead Species Guardian Beasts.

If the exclusive trait of the Grave Sacrifice Pregnant Mother wasn't a battlefield-resetting ability like Flesh Newborn, Fang Mu might consider the evolutionary path of the Graveside Witch.

However, even if the long-range combat ability of the Graveside Witch is strong, it doesn't compare with the Grave Sacrifice Pregnant Mother in terms of functionality.

Therefore, Fang Mu decided to keep evolving the Grave Sacrifice Pregnant Mother towards the Burial Kind Mother.

Like the Grave Sacrifice Pregnant Mother, the Silver Grade Skill of the Grave Sacrifice Father and Child is the Swift Rend Claw.

The ability of Swift Rend Claw to enhance the attack speed is not very strong, as clawing attacks mainly rely on strength rather than speed for damage.

However, the Swift Rend Claw skill adds a ripping effect to each claw attack, causing damage to the enemy's superficial defense.

This is particularly compatible with Rainy Doll.

It allows the Rainy Doll to better breach the target's superficial defense with toxins and infiltrate their body.

A giant shield-like formation can be seen around Daddy Grave Sacrifice's left shoulder.

Obviously, this is related to the exclusive trait, [Sacrifice Armoured Gesture], acquired when the Daddy Grave Sacrifice reached Epic Quality.

[Sacrifice Armoured Gesture]: A specialized bone has formed at the shoulder, which is used to shield the body when the life connected to Daddy Grave Sacrifice's own blood lineage is under attack. In a near-death state, it may self-sacrifice for a corpse explosion.

[Sacrifice Armoured Gesture] allows Daddy Grave Sacrifice to protect both Mummy Grave Sacrifice and Child Grave Sacrifice, much like a father's concern for his wife and children in a family.

When resisting damage and being seriously injured, Daddy Grave Sacrifice can deal with the enemy by exploding his own body.

He bears the responsibility of being the most powerful force among the Ritual Cemetery Three Treasures.

Fang Mu found the strategic significance of the Child Grave Sacrifice's exclusive trait, the Corpse Spirit Fire Seed, to be much greater than that of Daddy Grave Sacrifice's exclusive trait [Sacrifice Armoured Gesture].

[Corpse Spirit Fire Seed]: The soul flame is stripped from itself and transmitted into the target's body to serve as fuel for reigniting the target's soul flame.

Whether it's the Grave Sacrifice Pregnant Mother or Daddy Grave Sacrifice, the interaction they form is limited to the Ritual Cemetery Three Treasures.

But Child Grave Sacrifice breaks the conventional mould, and his exclusive trait [Corpse Spirit Fire Seed] can benefit all undead creatures controlled by Yan Luo Pragya.

Child Grave Sacrifice can split his soul flame and distribute the soul flame.

This can save other dying undead system guardian beasts, reigniting their soul flames.

It greatly reduces Fang Mu's losses and also enhances the sustained combat capabilities of the undead.

Fang Mu is very satisfied with the Grave Sacrifice Pregnant Mother, Daddy Grave Sacrifice, and Child Grave Sacrifice.

The best evolutionary path for Daddy Grave Sacrifice is towards Coffin-carrying Violent Father.

Fang Mu was mildly curious as to what would cause a doting father, who had sacrificed everything for his wife and son, to become a violent father.

The best evolutionary path for Child Grave Sacrifice is towards the Body-burning Abandoned Child.

However, judging by the name of this evolutionary path, it's like a grand family drama.

In Fang Mu's previous life, not even a hundred episodes of a TV series would be enough to fully portray this!

Speaking of funerary, carrying coffins, and burning bodies—isn't it a total funeral package!

After the power ups of the Ritual Cemetery Three Treasures, it seems more fitting to rename them the Funerary Artifacts!

After Yan Yubanruo put four undead creatures under his control with the White Paper Man, Fang Mu didn't forget to upgrade the Ghost Servant Spectral Fish Princess, which Yan Yubanruo had.

He also used the Undead Crystals extracted from Xixi to nourish the Spectral Fish Princess.

He aimed to enhance the Spectral Fish Princess, which was already a Silver Rank Level 5 and of Epic Quality, to Silver Rank Level Ten.

After approximately an hour, once Yan Yubanruo's strength reached Silver Rank Level Ten,

The horde of undead creatures under Yan Yubanruo's control had all reached Silver Rank Level Ten.

Checking the time, it was already 4 a.m.

Since there was no time to drain the Soul Ant Queen of soul power and let its soul power regenerate slowly,

Fang Mu thought of putting his Ghost System Beast on the Battle Network to have a few fights.

Yan Yubanruo, with five undead creatures under his control, already formed his independent combat system and needed no cooperation from Rainy Doll and Eden Greenfield.

This allowed Fang Mu to split his identity on the Battle Network. In addition to his original identity as Jianmu, he could create a new one.

Now that Fang Mu had full control over the Beastmaster Alliance's Teleportation Array, getting the Beastmaster Alliance to verify his new identity on the Battle Network was just a piece of cake.

He could buy a special mask from the Battle Network with 50,000 Dragon Rising Coins to cover his face.

Many members of big forces and many star players from various club guilds often had two accounts on the Battle Network.

When they were tired of fighting in the ranking zone, they would switch to a different identity in the age zone to relax.

Fang Mu quickly completed the operation and entered the Battle Network with a new identity.

He named his new identity on the Battle Network "Yan Luo".

On one hand, Fang Mu commanded and manipulated Ghost System Beast Yan Yubanruo with this identity.

On the other hand, "Yan Luo" was the entity in charge of the dead and souls in Fang Mu's previous life.

Given that Yan Yubanruo has a lot of undead creatures under his command, the name Yan Luo is suitable in any way you look at it.

The masks sold by the Battle Network for 50,000 Dragon Rising Coins came in many designs and were finely crafted.

Instead of picking a fancy mask, Fang Mu chose a pure black mask without any decorations and put it on his face.

Fang Mu quickly finished his positioning matches with five consecutive wins, placing him in the promotion matches from Bronze to Silver.

His battle record was completely identical to his previous time on the Battle Network.

Apart from the first positioning match where Fang Mu summoned Yan Yubanruo, who ended the battle in one fell swoop,

Fang Mu didn't summon Yan Yubanruo in the remaining four fights.

Because Fang Mu found that as Yan Yubanruo's Contractor, he could summon the undead creatures controlled by Yan Yubanruo without summoning him.

The first opponent Fang Mu encountered didn't recognise Yan Yubanruo as a Ghost System Beast.

Strength and vision determine knowledge

Let alone recognising Yan Yubanruo, a name that is unfamiliar amongst Black Iron Rank,

Even in the following four positioning match, Fang Mu's opponents didn't recognise the Cemetery Baby as an Undead Creature in the contests.

Continuous victories allowed Fang Mu to skip ranks. Fang Mu, who had few previous opportunities to battle, ended up playing a total of sixteen battles in a row.

With a record of sixteen consecutive wins, he skipped ranks to Silver Two with full victory points. This rank was even higher than his Silver Four rank under the identity of “Jianmu”.

Seeing that the time was already 5.50 a.m, Fang Mu intended to finish three promotion matches within forty minutes before starting a new term.
