

## **Beast Tamer 34**

### Chapter 34 Epoch 7\_1

An organization dealing with the disposal of strange beast corpses and the resolution of environmental pollution should be based in the city center.

On one hand, it reflects Jinghai Province's support for the "Scavenger" division, and affirmation of the organization's status.

On the other hand, it is also to take care of the alien beast corpses transported from the surrounding city areas, ensuring they can all be sent to the Exotic Beast Incinerator within two days.

The blood and bodily fluids of strange beasts possess potent corrosiveness and toxicity, splashing on people like sulfuric acid.

If not immediately cleaned and thoroughly rinsed with a copious amount of water.

If the toxins infiltrate the skin, at best you would need hospitalization and careful care from healing Beast Masters.

At worst, amputations might be required and it could even be fatal.

The peculiarity of the strange beast's fluids and blood makes their meat inedible as guardian beast feed.

Even Poison Series Beasts experience a series of abnormal reactions after consuming the remains of these beasts.

Only a minority of fungi are capable of decomposing the carcasses of strange beasts.

However, these fungi are incredibly weak and slow in decomposing the strange beast carcasses.

The cultivation of these fungi is more costly than the benefits they bring.

After several Master Creators tested this together, this plan was ultimately declared bankrupt.

The bodies of lower-level strange beasts will decay within two days.

For Terror Level beasts and above, due to their stronger venom in their blood and body fluids, they often cannot be preserved for more than one day.

The black vehicles marked with the special “Scavenger” symbol on the streets can ignore traffic rules.

Other vehicles are required to give way to them.

This is to ensure that the corpses of destruction level and higher beasts are sent to the incinerator in time.

As a transmigrator, Fang Mu has carefully studied the history of the world he is currently in.

Dimensional Rifts have existed as long as recorded history.

However, there seem to be gaps in this world's history.

The era Fang Mu lives in is referred to as the Seventh Era.

The history before the Sixth Era is only recorded in fragments.

This confuses Fang Mu greatly.

Humans are a race that enjoys inscribing history.

If humans existed before the Sixth Era, historical records should not be so incomplete.

However, the fragmented records from before the Sixth Era confirm that human civilizations indeed existed then.

Fang Mu still remembers three words from historical texts.

“Shine”, “Freedom”, and “Azure”.

When confronted with things he couldn’t comprehend, Fang Mu didn’t dwell on them.

In fact, the existence of Dimensional Rifts brings not only harm but also benefits to human life.

The levels of Dimensional Rifts have a precise and comprehensive measurement method.

By using a special instrument called the Dimensional Fluctuation Instrument and standing within the fluctuation range of the Dimensional Rift, one can measure the fluctuation value of the dimension.

A fluctuation value of less than a thousand indicates a soldier-level Dimensional Rift, with the strongest creature inside having only soldier-level strength.

This corresponds to Bronze and Silver Stage Guardian Beasts.

A dimensional fluctuation value of one thousand to five thousand indicates a heavy artillery-grade Dimensional Rift.

The strongest dimensional creature inside is artillery-level, corresponding to Silver Stage and Gold Stage Guardian Beasts.

Due to the great variety of strange beasts and the lack of benefits their carcasses provide to humans, there isn't much research value.

Therefore, there isn't a strict classification system for the strength of strange beasts.

Soldier-level and artillery-grade Dimensional Rifts often appear in the wilderness outside the city.

Since there are towering Dimension Towers situated at regular intervals inside the city to stabilize the space,

soldier-level and artillery-grade Dimensional Rifts generally do not appear within the city.

When the level of a dimensional rift reaches "Terror," it has the potential to be unaffected by the stabilizing effect of the Dimensional Tower.

It can appear directly within a city.

If a terror-level dimensional rift opens within a city, it becomes a disaster.

The strength of a Terror Level Beast corresponds with the Beastmaster Ranks of Gold and Platinum.

Above the Terror Level, there are also Destruction and Catastrophe Levels of dimensional rifts.

Information about these levels of dimensional rifts is no longer available in books.

Fang Mu once asked Cui Ruochen why such common knowledge wasn't recorded in the library's documents.

Cui Ruochen's answer to Fang Mu was "To avoid unnecessary panic."

It is said that each time a dimensional rift of Terror Level or higher is destroyed, a unique Ghost System Beast is created.

Ghost System Beasts are formed from Dead Qi produced by killing in dimensional rifts, which interacts with Soul Power.

A Ghost System Beast can be considered the most valuable of all known types of beasts.

The high value of Ghost System Beasts is not only because they are rare and powerful.

It also has to do with the way they contract.

To contract with ordinary beasts, one needs to consume spiritual power. But to contract with a Ghost System Beast, a certain level of soul power is needed.

This doesn't affect a Beast Master's ability to Comprehend Mysterious Patterns.

Moreover, Ghost System Beasts guard the souls of their contractors.

Furthermore, even when Soldier Level or Heavy Artillery Level dimensional rifts are destroyed, they drop dimensional crystals corresponding to the type of the dimensional rift.

Dimensional crystals are vital materials for crafting silver or higher spiritual instruments.

This is why the price of silver spiritual instruments is at least ten times higher than that of bronze ones.

While dimensional rifts bring disaster to humans, they also enhance the overall strength of the Beast Masters.

The overall improvement of Beast Masters indirectly stabilizes human society.

Fang Mu was not even a Beast Master two months ago.

He never thought he would become a “Scavenger.”

The internal situation of the “Scavengers” has always been kept secret from the outside world.

Only after joining the “Scavengers” can one gain insight into this.

The Six-hoofed Yak Car Fang Mu was riding stopped in the parking lot of the “Scavengers” base.

Since it was a holiday, Fang Mu was not dressed in Jinghai High School for Beast Masters’ uniform.

Moreover, last night, Fang Mu donated 1,500 milliliters of blood to his Destiny Guardian Beast, Blood of Abundance.

This caused Fang Mu to look pale and unsteady.

Ever since he began donating blood to the Blood of Abundance, Fang Mu has always carried a thermos cup.

He added petals and leaves from Coagulated Jade Camellia to his regular Blood

Replenishing Tea.

The blood replenishing effect was astonishing.

By this afternoon, Fang Mu's complexion should look normal.

The driver in the front often looked at Fang Mu through the rearview mirror.

He always seemed to have something to say.

When Fang Mu prepared to get off the car, the driver couldn't hold back any longer.

"Young man, you look like you're not even eighteen yet!?"

“I suggest if you really need money, you can go to the Spirit Materials Shop to ask if they need a clerk or some odd jobs.”

“You don’t have powerful beasts like those Beastmasters in the Scavengers to protect you while disposing of the Alien Beast Corpse.”

“Once you inhale the smell emitted when an Alien Beast is incinerated.”

“It won’t be long before abnormalities start appearing in your nose, trachea, and Five Viscera..”
