

## **Beast Tamer 44**

### Chapter 44 The Conduct of a Grandmaster! 1

Fang Mu had always been suppressing Blood of Abundance's craving for Blood Crystals.

Now that Blood of Abundance has been summoned, Fang Mu felt resentment from its squirming movements.

It was like a large cat being denied a feast of canned food.

At his home, there was no need for Fang Mu to hide any longer.

He directly threw three Blood Crystals into Blood of Abundance.

Blood of Abundance began to squirm violently.

A red blood mist covered half the room.

After nearly three minutes, the blood mist was sucked back into Blood of

Abundance.

Fang Mu used the Eye of Omniscience to examine Blood of Abundance.

He found out that Blood of Abundance was still of standard quality, with no changes.

However, Fang Mu could distinctly feel that after swallowing the three Blood Crystals, Blood of Abundance's quality has been improved.

Apparently, Blood Crystals could enhance the quality of Blood of Abundance.

Once Feng Mu has made history as a "Scavenger", and as he becomes a key talent for the "Scavengers".

He should have as many Bloodline Race corpses as he wants.

Handling Bloodline Race corpses is a way of contributing to the "Scavengers".

Fang Mu has found a way to enhance the quality of Blood of Abundance.

However, he has no clue as to how to improve the quality of Fool's Shadow.

The means to upgrade the quality of Destiny Guardian Beasts should be explored by the Beast Masters themselves.

Many Beast Masters feel happy when they awaken their Destiny Guardian Beast.

However, there are plenty of Beast Masters who, in their old age, have yet to find a method to improve the quality of their Destiny Guardian Beast.

This certainly prevents the Destiny Guardian Beast from gaining exclusive traits, greatly impacting their strength.

Of course, the main reason for this is a lack of knowledge and experience.

Without access to many resources, they naturally wouldn't know what their Destiny Guardian Beast needs.

But Fang Mu already has a way to expand his horizons.

As Fang Mu's horizon continues to broaden, finding a way to improve the quality of Fool's Shadow is only a matter of time.

Fang Mu had just pulled Blood of Abundance back into the Destiny Guidebook.

The phone suddenly rang.

“Time, which makes us unprepared, gives us fair weather and rain.”

“We rush through time, reminiscing about the past, and it steals youth but leaves a memory of you.”

Hearing this ringtone, Fang Mu knew this was a phone call from his older sister, Fang Qin.

As soon as he answered the phone, he heard a spring-like voice from the other end.

“Little Wood, it’s the hottest time of year now.”

“You don’t have a lot of summer clothes, so I mailed some to you.” “Recently, even if you’re reading, don’t stay up late.” “When reading, don’t get too close to the book; take care of your eyes.”

“You have to eat your fruits every day on time!”

Fang Mu quietly listened to Fang Qin’s nagging.

This feeling of being cared for in every possible way made Fang Mu feel extraordinarily warm.

“Big Sister, when you’re training or on tasks, be careful with your safety and health, don’t push yourself too hard!”

On the other end of the call, Fang Qin instinctively looked at her left hand, which had only three fingers left.

She had lost two fingers in a task, and since they had been completely severed, they could not be regenerated.

In the entire Beastmaster world, there was no healing beast tamer who could regenerate severed limbs.

So Fang Qin’s two fingers were replaced with mechanical fingers.

While it didn’t interfere with her daily life, it could be easily noticed at first glance.

Her siblings – Fang Mu, Fang Yuan and Yan Wood – were still uninformed about this.

Fang Qin knew that she would have to explain this when she went home for the holidays.

She always told her younger siblings to take care of their health, but she didn't practice what she preached.

However, it was worth it to get a low-frequency stimulation spirit power elixir and four Flame Thorns.

Fang Qin knew that even though Fang Mu didn't say it, he was very interested in becoming a Beast Master.

As a result, Fang Qin merely carried on the conversation with Fang Mu as usual.

She didn't tell him about the low-frequency spiritual power potion in her possession.

It is only when one has expectations that one will feel disappointed.

Fang Qin was worried that if Fang Mu's expectations soar unnecessarily high, he might end up being disheartened due to a mere wild goose chase.

It would be better to talk about it when she returns.

After hanging up the phone, Fang Mu once again logged onto his [Stellar Start] Beastmaster Web Account.

Despite having cleared the space for incoming messages and deleting the posts yesterday, he found that people had tirelessly contacted him, hoping for a response.

Fang Mu ignored these messages.

Besides notifying Fang Yuan that he had collected the 100 Life Elixirs with 60% purity, Fang Mu had logged onto the Steward's Network Account for two other reasons.

The first reason was to certify [Stellar Start] as a Grandmaster Creator.

The second was to look for live Bloodline newborns up for sale on the Beastmaster Web, which could be used for Pure Water Spirit.

Establishing [Stellar Start] as the identity of a Grandmaster Creator wasn't difficult.

All he needed to do was list a Life Elixir with 90% purity in the auction area.

A Life Elixir with a 90% purity level was the threshold for the Grandmaster Creator.

By doing this, Fang Mu could transact directly with powerful entities, thus gaining access to the real top-tier channels.

If [Stellar Start]'s identity as a Grandmaster Creator were revealed, it would boost Fang Yuan's confidence within the Ten Thousand Treasures Commerce.

Since this was a win-win situation, why wouldn't Fang Mu happily comply!?

Fang Mu then went to the trade area, and only then did he discover that a Life Elixir with a 90% purity level had never been auctioned on the Beastmaster Web before.

Not only that, even Life Elixirs with purity levels over 70% were only a few in the auction area.

This made Fang Mu unable to determine the exact value of a Life Elixir with a 90% purity level.

But this was good, because the sudden appearance of something that had never been available before would cause quite a sensation.

Moreover, since it was going to be auctioned, it didn't matter even if he wasn't clear about the price.

After all, the one holding the auction would keep increasing the price anyway.

With this in mind, Fang Mu listed a Life Elixir with 90% purity in the auction area.

Every second of every minute, someone was keeping an eye on the auction area in the Beastmaster Web.

Because the auction duration was a whole day.

Such a timeframe was not long for an auction.

Only those who noticed it at the very first moment would have the convenience of preparing their resources.

The sudden listing of the 90% pure Life Elixir nearly blinded those who were keeping an eye on the auction.

Fang Yuan was among them.

Until now, Fang Yuan hadn't communicated with the president, informing him about the order of 100 Life Elixirs with a 60% purity level.

Obviously, since [Stellar Start] didn't require a deposit, he still had enough time on his side.

Therefore, Fang Yuan had been pondering how to prevent the Ten Thousand Treasures Commerce from taking [Stellar Start]'s channel away from him.

The more he thought about it, the more uncertain he became.

Although the Ten Thousand Treasures Commerce had treated him well, that was only because he could bring considerable benefits.

The operation of a commerce company was always focused on profits.

Fang Yuan knew the maximum value he could bring was by clinching a Master Creator's channel for the Ten Thousand Treasures Commerce.

If he were to divulge this, he might not receive much reward.

But if he didn't, he would definitely be stuck in a rut with the commerce company.

Moreover, the Ten Thousand Treasures Commerce itself could contact Master [Stellar Start].

Seeing the auction page of the 90% pure Life Elixir, Fang Yuan was stunned.

What caught Fang Yuan's attention wasn't the elixir itself, but the seller of the elixir.

It was none other than Master [Stellar Start], who had just completed a transaction with him yesterday!

Those who could list a Life Elixir with a 90% purity level for auction...

This was no Master, it was a Grandmaster!
