

Beast Tamer 52

Chapter 52: Eden Greenfield! 1

Fang Lin had many guesses in her mind.

How would this young man react to her direct exposure of his disguise?

Perhaps, after the surprise, there would be a brief panic.

She never expected that Fang Mu would confess his previous masquerade so openly.

However, this was better. Honesty is the premise of communication.

No one needed to play a guessing game anymore.

Fang Lin gently lifted the hem of her green velvet dress, revealing her slender and fair bare feet in high heels.

On her bare foot, a silver anklet studded with green crystals shimmered.

These crystals on the anklet formed the shape of a vine.

Fang Lin gently stepped on the floor of the incineration room.

In an instant, the anklet detached from Fang Lin's ankle.

It transformed into a spatial portal on the floor. Fang Lin looked at Fang Mu and said,

"Let's continue our conversation in my office!"

"You should know what it means to break the Scavenger's record."

Apparently, Fang Lin's anklet was a spiritual instrument.

Spiritual instruments with teleportation abilities were at least Gold-level. During forging, dimensional crystals dropped when a dimensional rift is destroyed are needed.

This was Fang Mu's first time seeing a spiritual instrument of such a high level, it was an eye-opener.

However, the identity crafted by Fang Mu dictated that he couldn't show surprise or curiosity.

He couldn't ask too many questions.

Otherwise, with Fang Mu's curious and studious nature,

He would definitely ask Fang Lin about the knowledge of spiritual instruments.

Having broken the "Scavenger's" history and Fang Lin's unusual emphasis on him,

Fang Lin would most likely satisfy his curiosity.

He calmly stepped into the spatial portal opened by Fang Lin's foot.

Fang Mu felt the fluctuations of space and the surrounding scenery gradually blurred.

In its place was a room full of vine-like plants.

Since Fang Lin had revealed his true identity, and there were no other people in the room,

Fang Mu simply took off his "Scavenger" standard mask on his face.

Communicating with Fang Lin while wearing a mask seemed somewhat impolite.

Fang Lin had previously seen Fang Mu's photograph in his profile.

But compared to the photo, the real person appeared much more lively.

The photo could only show looks but couldn't reveal a person's aura.

If Fang Mu, who wore the mask, had an extremely confident aura and intense energy,

Then Fang Mu's juvenile face suppressed all these intensities.

That hint of confidence had invisibly turned into positive energy.

If no prior understanding was present,

Even if Fang Lin had known Fang Mu before, it would be hard to link the masked Fang Mu to Fang Mu without the mask.

Wow! This young lad has two faces at such a young age!

Fang Lin directly proceeded to the main point.

“He Qing must have already told you about the benefits of breaking the record.”

“You can completely seal off your records and prevent outsiders from investigating.”

As she said this, Fang Lin paused for a moment, then continued,

“You have two identities at such a young age, you could completely separate Fang Mu and Jianmu.”

“Which strong person doesn’t have a disguise when wandering in the outside world?”

“In addition, you can freely exchange for supplies with merits in the various layers of the Merit Hall.”

“And each year, you will receive ten times the base salary of ordinary Scavengers of your rank.”

After becoming a formal member of the Scavengers, even if there’s only one bud on the badge,

He could still receive a monthly base salary of six thousand Dragon Rising Coins.

Even if he failed to clean up any Alien Beast Corpse this month, as long as he completed the basic task of training three newcomers.

He would be able to receive the reward in full.

Being a formal member of the Scavenger meant he had obtained a stable job.

But now, for Fang Mu, it was no longer simply about having a steady job.

He was holding a golden goose.

Who wouldn't love a golden goose!

However, for Fang Mu now, Dragon Rising Coin was no longer hard to obtain.

So the Dragon Rising Coin no longer interested Fang Mu.

What Fang Mu was really interested in were the precious Guardian Beasts, spiritual instruments, and materials available at the Merit Hall.

While talking, Feng Lin was continuously observing Fang Mu's expression.

Through someone's expression, a lot of valuable information can be gleaned.

However, Feng Lin noticed that Fang Mu's expression remained unchanged. This calm demeanor made Fang Mu appear nothing like a young man. "Our Cleaner Division in Jinghai Province is the least established." "We rank low among all divisions."

"We never had an opportunity to outcompete other divisions."

"You are the face of our Qinghai Cleaner Division."

"So I decided to represent the Jinghai Cleaner Division to reward you with a Copper-Rank Guardian Beast other than the Ghost System, and a lower-grade silver spiritual instrument."

"You can share your thoughts with me."

“If there isn’t an existing spiritual instrument, I can have one custom made for you based on your needs.”

The first three benefits had already satisfied Fang Mu greatly.

But he hadn’t expected Feng Lin to offer an additional reward.

Fang Mu had mastered the Rune Wood System: Eruption and hadn’t gotten around to finding a suitable wood system beast yet.

This was the perfect chance to have Feng Lin help him search.

Even though Fang Mu could use Covenant Blood Essence to contract unlimited numbers of beasts, he always held the principle of quality over quantity.

Fang Mu was very strict in his choices of beasts.

Once quarantined, he would put all his effort into training it.

There were many common Wood System beasts suitable for the Wood System: Eruption rune, many of them were vine-type beasts in this room.

But one has to have ambitions right!

Especially when the opportunity was right before Fang Mu's eyes!

"Miss Feng Lin, I want a Wood Domain Type Beast."

"Best if the beast is suitable for pairing with major amplification category burst subtype runes."

Feng Lin was stunned upon hearing Fang Mu's request, then blinked twice.

She wasn't gifting any Ghost System beasts because they were far too rare.

But this boy chose a Wood Domain Type Beast.

Moreover, this beast must be compatible with a burst rune of the major amplification category.

With all these requirements combined, the beast he's looking for may be even harder to find than a Ghost System beast.

However, there happens to be one of these beasts in the Jinghai Cleaner Division's Merit Hall.

Feng Lin could exchange her contribution points from the Merit Hall and reward it to Fang Mu.

However, this Wood Domain Type Beast is very special and its cultivation cost is very high.

Many advanced Scavengers who had wanted this Beast had enough merit points.

But were scared off by its enormous cultivation cost!

Otherwise, this precious beast wouldn't still be available in the Merit Hall.

Before agreeing to Fang Mu, Feng Lin decided to explain the circumstances to Fang Mu first.

"The Wood Domain Type Beast you're talking about does exist, it's named Eden Greenfield."

"Eden Greenfield, according to your different methods of training, can be compatible with any categorization of Wood System rune."

"But I don't suggest you cultivate this Beast."

“Even if you just cultivate it to the Diamond Rank, the resources spent alone could cultivate five equally excellent Beasts!”
