

Beast Tamer 53

Chapter 53: The Legendary Guardian Beast! 1

Feng Lin's tone was extremely serious.

Beastmasters, in order to enhance their guardian beasts, never have an endpoint in investing resources.

The stronger a guardian beast, the higher the concentration of the spiritual liquid it requires, increasingly relying on high-star creators' resources.

However, high-star creators' resources are truly scarce.

High-star creators have the privilege of autonomously distributing their produced resources.

Under such circumstances, high-star creators will definitely reserve their resources for people they have bonds with.

This is why many people, even with money and willingness to pay a premium, cannot find high-star creators to help them.

Once a Beastmaster contracts a guardian beast that requires a significant amount of creator resources,

They tend to be suffocated by the guardian beast, limiting their own growth.

However, the more creator resources a guardian beast needs, the stronger its power and potential.

If she wasn't incompatible with wood-element guardian beasts and didn't want to sink so many resources into one guardian beast,

Feng Lin would definitely have chosen to contract with Eden Greenfield.

Hearing Feng Lin's words, Fang Mu slightly raised his eyebrows.

Eden Greenfield!

This name of the wood element domain-type beast sounded pretty good!

Fang Mu thought that he would make such stringent requirements, in which Feng Lin would search for him for a while.

However, it turned out that Jinghai's Scavenger Branch already had a ready-made option.

It seemed that Eden Greenfield and he were quite fated!

Fang Mu had plenty of creator resources.

Otherwise, he wouldn't be able to play the role of a Grandmaster Creator.

As long as this guardian beast's potential was strong enough, Fang Mu would not hesitate to spend more creator resources.

Because producer resources could be derived from his own blood and garbage that can be seen everywhere.

Even Beastmasters from wealthy and powerful families need to consider cost-effectiveness.

But Fang Mu did not have to worry about this.

Just the fact that Eden Greenfield could merge with any wood-energy patterns was enough to move Fang Mu.

After that, even if Fang Mu comprehended other types of wood-energy patterns, he wouldn't need to contract other wood-element guardian beasts for new wood -energy patterns.

He would only need to use the newly comprehended wood-energy patterns to enhance Eden Greenfield.

As this concerned his own guardian beast contract, Fang Mu did not immediately decide.

If he proposed to confirm Eden Greenfield without even knowing what its skills were,

That would give Feng Lin the impression that he was unstable.

A disciple of a Grandmaster Creator would never be so sloppy.

“Miss Feng Lin, I want to see Eden Greenfield first, is that all right?” Upon hearing Fang Mu’s words, Feng Lin chuckled.

A young man who didn’t get excited and lose himself when he found the guardian beast he needed,

But still maintained calm and rationality, that was very rare!

“Of course!”

“Nini. don’t hide! Go get Eden Greenfield!”

As soon as Feng Lin’s words finished, rustling sounds came from under the worktable covered with vines not far away.

Soon, a doll-like little girl crawled out from under the table.

Her expression was timid.

If it wasn’t for the lower half of this girl being made up of light blue vines,

And on the vines were emerald green flowers the size of bottle caps, Fang Mu would’ve thought she was Feng Lin’s daughter.

These emerald green flowers on the vines continuously sprayed healing energy.

It was obviously a powerful humanoid beast.

Fang Mu instinctively activated the Eye of Omniscience to scrutinize it.

Fang Mu originally thought that the humanoid beast hidden in Feng Lin's studio would be a sequential type.

However, he didn't expect the data to appear before his eyes.

[Beast Name]: Hundred Lilies Flower Child [Beast Species]: Sedum/Lotus Flower [Beast Level]: Platinum (6/10) [Beast Element]: Wood [Beast Potential]: Diamond Rank [Beast Quality]: Epic Quality

Skills:

[Heal]: Uses the power of healing to quickly recover the target's wounds and replenish a certain amount of physical strength.

[Falling Blossom]: Plucks a flower bud from its body and projects it onto the target. When the target is treated, the excess healing energy will spread indiscriminately around.

[Healing Song]: Soft singing to soothe soul wounds and nourish the soul.

[Praise Cry]: A crying summoning a tide formed from life energy, healing targets within the region.

Exclusive Features:

[Mind Divide]: Through thought, it can voluntarily divide itself into several units, each units energy is evenly distributed by the main body.

[Life Peel]: Consumes an equivalent amount of its own life force as the price to strip away the target's life force.

Evolutionary Path:

O:Hundred Lilies Lady,@:Grudge Demon Florist,O:Fallen Lily Flower Witch.

This is the first time Fang Mu has seen a beast of epic quality.

Wanting to raise a beast from perfect quality to epic quality is not easy.

Fang Mu has been cultivating Coagulated Jade Camellia recently.

Even if Fang Mu provides a life elixir with a purity of 60%, and wood element potions every day.

It still takes almost twenty days to raise it from standard quality to perfect quality.

To upgrade from perfect quality to epic quality, it takes at least over three months.

Every week, it should be induced with life elixirs of at least seventy percent purity.

Of course, life elixirs of low purity and wood element elixirs can also achieve the effect of raising the Coagulated Jade Camellia to perfect quality.

It's just that the cycle will be longer.

However, it's impossible to improve Coagulated Jade Camellia from perfect quality to epic quality!

Just looking at the quality of the Hundred Lilies Flower Child, it is clear that Feng Lin has invested a lot of resources in it.

As the Hundred Lilies Flower Child carefully avoids Fang Mu's gaze, she carefully goes to the Merit Pavilion.

Feng Lin explains to Fang Mu.

"Nini is a bit shy, she will get used to you after more contact!"

Speaking of this, Feng Lin sighed.

“Ah! Nini is just an example.”

“Even for me, it’s difficult to raise Nini again!”

Upon hearing this, Fang Mu had a curious look on his face.

As a Green Screen Knight, her skill must have reached the level of a Hexagram Beastmaster.

There are many Spirit Artisan tools on Feng Lin’s workbench, and she had even mentioned that she could help custom make spiritual instruments.

So she must be at least an advanced Spirit Forger.

How could such a person not be able to afford a Platinum Rank Beast?

Feng Lin finally saw a change of expressions from Fang Mu’s face.

This gave her a mysterious sense of accomplishment.

Showing such an expression is more like a young man.

So, Feng Lin was willing to tell Fang Mu what was not possibly recorded in the books of the Jing Hai Beastmaster High School Library.

“The Hundred Lilies Flower Child reportedly carries the bloodline of a legendary beast called Lily Lily from the Fifth Age.”

“It is said that in the Fifth Age, there was a substance called ‘spiritual energy’.” “This substance disappeared abruptly in the mid-sixth age.”

“By the end of the Sixth Age, life energy has become the main energy for biological evolution.”

“Presumably in the Fifth Age, Lily Lily was also an exceptionally difficult to cultivate rare beast!”
