

## **Beast Tamer 56**

### Chapter 56: Armored Fish Inner Armor and Spider Flash Ring! \_1

Feng Lin gazed at Fang Mu for a while before gently rubbing her slender, fair hands.

It was reminiscent of the emoji of a fly rubbing its hands that Fang Mu had seen in his previous life.

Finally, Feng Lin forcibly suppressed the surprise and expectation in her heart and did not continue to inquire about Fang Mu's master.

Fang Mu did not bring up the topic either.

Fang Mu wanted to gain the protection of the "Scavenger" by claiming himself as a disciple of the Grandmaster Creator.

His objective was achieved as soon as he revealed that his teacher was a Grandmaster Creator.

The more he said after achieving his goal, the more likely he was to make mistakes.

Although Fang Mu could produce the resources of a Grandmaster Creator, he did not have a real Grandmaster Creator backing him up.

Feng Lin did not carry on the conversation, which made Fang Mu relieved.

Of course, even if Feng Lin asked, Fang Mu could evade by saying "my master doesn't like revealing too much to outsiders".

Fang Mu had opened his mailbox.

He chose two design blueprints that he had tinkered and presented them to Feng Lin.

At a glance, Feng Lin could tell from Fang Mu's blueprints that he had not received professional training as a Spirit-smithing Master.

Because Fang Mu's drawings did not follow the format used by Spirit-smithing Masters.

But Fang Mu's drawing skills indeed surprised Feng Lin.

According to Fang Mu's file, there was no record of him learning to draw.

Even for someone naturally gifted at drawing, it would take at least three to five years to produce something so outstanding.

While Fang Mu's designs for spiritual instruments were not standard in format, they were detailed in content.

At a glance, Feng Lin could tell it was an earth attribute soft armor that covered half the body.

Worn over clothes, it could provide protection from the chest to the knee.

Because it uses the inner skin of the Silver-tiered Beast Controlling Tough Armored Fang Fish, it has excellent elasticity.

So even if the user grows or uses skills or exclusive features of a fused type Guardian Beast, there's no need to worry about discomfort.

The armor uses Vibrating Manganese Stone as the energy core, forming a series of independent earth system circuits.

It adds to the overall robustness of the armor.

Due to the effect of the Vibrating Manganese Stone, it can rebound physical attacks and reduce the impact.

If Feng Lin were to grade this design for a spiritual instrument, without considering the format,

This design, named by Fang Mu as “Armored Fish Inner Armor,” could definitely score eighty points.

But there are many areas that could be improved.

Feng Lin did not intend to take Fang Mu as a disciple before and is even less inclined to do so now.

However, Feng Lin didn’t mind giving some advice to Fang Mu.

“A spiritual instrument is called as such because it can be actively used by a Beast Master. ”

“Incorporate the soul of a Silver Peak Tough Armored Fang Fish, along with some Vibration Gold that can fuse with the Vibrating Manganese Stone.”

“This will allow you to summon the phantom of the Tough Armored Fang Fish by consuming your own energy.”

“It can help you proactively withstand damage and enhance the rebound effect.’

“In addition, I suggest incorporating the backplate of a rock turtle.”

“Grind the backplate into coin size, and cover it on the earth system circuit.” “Then carve a fire system circuit on top of it to wrap the earth system circuit.”

“In this way, when counterattacking, you can not only bounce back the attack but also splash out a small amount of lava.”

Such design and improvement are routine for Feng Lin, yet they have opened up a new perspective for Fang Mu.

Fang Mu had not come into contact with silver spiritual instruments prior to this.

He didn't know that, in addition to incorporating materials from the Guardian Beasts, the souls of the Guardian Beasts could also be added into the silver spiritual instruments.

Feng Lin's suggestion made Fang Mu realize that Feng Lin must at least be a Spirit Forging Master.

Otherwise, Feng Lin wouldn't have suggested transforming the original earth-themed "Armored Fish Inner Armor" into an Earth Fire Double System.

Once Feng Lin's identity as a Spirit Forging Master was confirmed, Fang Mu knew that his vision for the "Spider Flash Ring."

Feng Lin should be able to help him realize it!

Once his thinking was opened up by Feng Lin, Fang Mu developed a deep interest in the field of Spirit-smithing.

He was eager to explore the realm of Spirit-smithing Masters.

And Fang Lin also turned to look at another one of Fang Mu's design drawings.

Upon seeing this design, Feng Lin's eyes squinted.

Then he glanced at Fang Mu with an odd expression.

The idea for this spiritual instrument, called the “Spider Flash Ring”, was excellent!

Fang Mu wanted to utilize the fogging effect of the Fog Spider silk thread to secretly secure an object.

Then, through the space circuit engraved on the “Spider Flash Ring”, he intended to swap positions with the other end of the object fixed by the Fog Spider silk thread.

This effect utilized two elements: water and space.

If Fang Mu’s idea could be realized, then this “Spider Flash Ring” will be a functional spiritual instrument that won’t be replaced even before he becomes a Three-Point Star Beast Master.

Just engraving at least two hundred space circuits on a tiny ring is a challenging task.

Even a regular Spirit Forging Master would find it difficult.

However, with the assistance of the Peak Butterfly, Feng Lin was still confident he could forge the “Spider Flash Ring” designed by Fang Mu.

While studying the two designs, Feng Lin noticed something.

That is, Fang Mu never considered incorporating the soul of the Guardian Beast into the silver spiritual instrument.

If the soul of the Fog Spider were added to this “Spider Flash Ring” ,

then the ability of the “Spider Flash Ring” to change places would be considerably enhanced.

And it would even gain a considerable attack capability.

“I suggest you replace the spider silk with the soul of a Fog Spider, and pair it with a Silver-tiered Black Void Diamond.”

“That way, once it’s decorated with two hundred space circuits, it will improve the activation speed and stability of the displacements.”

“Normally, when you activate the Spider Flash Ring, it will summon a ball of mist.”

“After the mist dissipates, it can form into a Fog Spider.”

“The Fog Spider can serve as an offensive measure, as well as used for position swapping.”

“You won’t have to worry about the Fog Spider silk thread being severed by an enemy!”

Upon hearing Feng Lin’s words, Fang Mu’s eyes lit up.

After being amended by Feng Lin, the “Spider Flash Ring” had undergone a radical transformation from its original conception.

It’s true that specialization leads to proficiency!

Mist is formless and intangible, making it hard to detect in battle.

Fog Spiders are sharp, lean killer type spiders.

They enjoy hiding in damp places, perfect for ambushing prey.

Once a Fog Spider appears behind the enemy, it can directly deliver a stab in the back.

This allows a ring originally intended for escape to also have the ability to attack.

And without having to worry about the silk thread issue, it can directly change positions with the Fog Spider, equivalent to teleportation!

Just as Fang Mu was about to finalize his request for Feng Lin to customize the

“Spider Flash Ring”, he heard Feng Lin say,

“Both of these design drawings are good and suit your usage.”

“So, I will make them both for you.” “You can come collect them in half a month.”

Upon hearing this, a look of joy appeared on Fang Mu’s face.

At the same time, he knew that Feng Lin added another dual-attribute low-grade silver spiritual instrument on top of the original reward, indicating that there must be a purpose behind it.

After thanking Feng Lin, Fang Mu looked straight at him, quietly waiting for Feng Lin’s next words.

Just now, when he mentioned that his master was a Grandmaster Creator, Feng Lin obviously had a lot to say.

At that time, Feng Lin diverted the topic, and now it was time to bring it back.

Otherwise, once he left, there would be no chance for Feng Lin to bring this topic up again!
