

Beast Tamer 66

Chapter 66: Star Scar Angel!_I

The seemingly casual comment from Shui Miao sent shivers down Fang Mu's spine.

What? Within Starwheel, at least seventy-four Hexagram Beast Masters have Sequential Type Beasts!

What an unimaginable power that is!

Shui Miao mentioned this to him because his teacher "Stellar Start" is a formal member of the organization.

He will later sit on the Golden Chair, named in the remaining three constellations.

And he is the one to stand in his teacher's shoes and attend the Starwheel gathering, he would learn these eventually.

So that's why Shui Miao took the liberty to talk about the inner workings of Starwheel.

If Shui Miao's demeanor after meeting him was due to personal cultivation.

The two gifts he gave for no particular reason were obviously a goodwill gesture for his teacher.

Since it was a goodwill gesture, Shui Miao would not be wasting words for nothing.

Therefore, it shouldn't take long before Shui Miao presents an organization member with a Sequential Type Beast.

To become his servant.

The price naturally is that he, from his side, provides the corresponding Creator's resources for this member.

If Fang Mu gets a Hexagram Beast Master with a Sequential Type Beast as his servant.

Then Fang Mu and his servant could confidently confirm the identity of the disciple of the Grandmaster Creator no matter who they might meet.

Fang Mu sincerely thanked Shui Miao.

Although Shui Miao had ulterior motives.

Regardless of Shui Miao's intentions, Fang Mu was the beneficiary.

His role as "Stellar Start" was just a pseudonym.

Fang Mu noticed an invisible wave of energy has been enveloping him and Shui Miao within a radius of 5 meters since they started talking.

Clearly, Shui Miao was using some method to shield them from external scrutiny.

So, even outside the room, Fang Mu can openly communicate with Shui Miao without worry.

Once in the room, Shui Miao turned serious and spoke earnestly to Fang Mu.

"What I say next, you need to relay it verbatim to your teacher." As he spoke, Shui Miao took out a gemstone with a silver star.

He ceremoniously handed the gemstone to Fang Mu.

"This is a beast of the double system of space and the star spirit, called the Descendant Star Messenger."

“Only a meager amount of spiritual power is needed to form a contract with it.” “The amount of spiritual power consumed is less than one tenth of the usual beast contract.”

“Once you have a contract with it, you can be guided by it to participate in the Starwheel gathering.”

“The Descendant Star Messenger is our Starwheel’s inherited guardian beast.” “After contracting, you will naturally understand its wonders.”

“Training the messenger requires the consumption of life energy, the purer the absorbed energy from the beginning, the bigger and more powerful the body of the messenger.”

While Shui Miao was speaking, Fang Mu had already used the Eye of Omniscience to inspect the beast called Descendant Star Messenger.

[Beast Name]: Descendant Star Messenger

[Beast Species]: Star Guard Department / Star Servant [Beast Level]: Bronze (1/10) [Beast Element]: Space System/ Star Spirit System

[Beast Potential]: Silver [Beast Quality]: Ordinary

Skills:

[Space Star Guide]: This guide forms a spatial portal through coordinates, indexes the life that steps into the portal to the pre-set area, and guards the target during the teleportation.

Evolution Direction:

O: Star Cloud Messenger, @: Star Fire Messenger, O: Fallen Star Old Lady.

Upon exploring, Fang Mu knew that entering the Starwheel gathering place as mentioned by Shui Miao depended entirely on the Bronze Level skill [Space Star Guide] of the Descendant Star Messenger.

The beasts of the Space System are already rare, and Fang Mu heard of the beasts of the Star Spirit System for the first time.

As a heritage beast of the Starwheel, the Descendant Star Messenger must be unique to the Starwheel.

With the continuous improvement of the Descendant Star Messenger's level and quality, more skills and exclusive characteristics will emerge.

Shui Miao clearly hid something in what he said.

He did not tell Fang Mu about the other special aspects of the Descendant Star Messenger.

He simply said that Fang Mu would understand its usefulness in the future.

If a powerful individual like Shui Miao calls it useful, then the Descendant Star Messenger must be excellent.

Despite Shui Miao's claim that contracting the Descendant Star Messenger only requires one-tenth of the spiritual power needed to contract Ordinary Beasts.

Fang Mu still plans to use Covenant Blood Essence to contract with the Descendant Star Messenger.

Fang Mu has this ability, and although he doesn't have Covenant Blood Essence for a short period of time.

Earning twelve to thirteen drops in one year is definitely not considered slow.

Compared with consuming his own spiritual power, waiting for Covenant Blood Essence undoubtedly allows Fang Mu to maximize his benefits.

With complete spiritual power, Fang Mu can comprehend mysterious patterns, no one in the entire Beastmaster world can compare with him in this regard.

Fang Mu can't guarantee on objective factors, but he can do his best on subjective factors, thus, he will never compromise.

This attitude is also one of the reasons why Fang Mu was able to achieve great success in the academic field in his previous life.

The evolutionary path of the Descendant Star Messenger under the Eye of Omniscience also surprised Fang Mu.

Star Cloud Messenger is clearly the direct evolutionary path of the Descendant Star Messenger.

Just like the Flame-winged Lion Scorpion evolving into Glory Lion Scorpion, and Coagulated Jade Camellia evolving into Falling Jade Camellia.

Relying on its own bloodline for evolution, without any mutations.

This evolution method is most suitable for the current function of the Descendant Star Messenger.

The second evolution path, Star Fire Messenger, is produced by the Descendant Star Messenger's bloodline undergoing certain mutations and evolving.

The Star Fire Messenger still has the function of the Descendant Star Messenger.

In addition to the purification of life energy needed for evolution into Star Cloud Messenger.

It also requires Fire Elemental Energy that matches the purity of the consumed life energy.

The Star Fire Messenger can allow the Contractor to refine the physical body under the starlight at night and improve physical fitness.

Compared to the Star Cloud Messenger, the Star Fire Messenger requires more resources.

Few beasts can have an enhancing effect on the Beastmaster himself.

All Fang Mu needs to ensure is that he can attend the Starwheel gathering through the evolved Descendant Star Messenger.

Therefore, the evolution method of the Star Fire Messenger is more attractive to Fang Mu than the Star Cloud Messenger.

As for the third evolution method, the Fallen Star Old Lady, it clearly does not have the function of the Descendant Star Messenger.

The bloodline has completely mutated, becoming an aggressive type Star Spirit System and Earth System Beast.

When it grows to an extremely powerful state, it can even drive a group of stars to fall as meteorites.

Just as considering the three evolutionary paths, Shui Miao hesitated and said.

“Tell your master, even if he is a Grandmaster Creator, he can make the

Descendant Star Messenger evolve, try to maintain the bloodline of the

Descendant Star Messenger.”

“Because if the Descendant Star Messenger follows its bloodline without mutation and evolves.”

“According to the ancient records passed down in Starwheel, there is a chance to evolve into a Star Scar Angel.”

“Your master should know what a Beast of the Angel species means.”

“Moreover, each Star Scar Angel has an opportunity to enter the Secret Starwheel realm once, and one can freely choose a treasure inside the

Starwheel secret realm..”
