

Beast Tamer 67

Chapter 67: Angel Species and Angel Reincarnation Pool! 1

As he spoke, a look of longing appeared on Shui Miao's face.

Shui Miao was certain that after [Stellar Start] received the Descendant Star Messenger and heard what Jianmu had to relay, [it] would genuinely appreciate him.

Though the Descendant Star Messenger may seem weaker during the initial stage of maintaining its
bloodline for evolution,

once it metamorphoses into a Star Scar Angel, its rank would drastically change.

Compared to the Star Fire Messenger that the Golden Bull painstakingly evolved into to prolong its life,
the former holds a higher limit.

A Grandmaster Creator itself can generate top-notch resources for Creators

Hence, after hearing his reminder, [Stellar Start] would surely know what to choose.

If Fang Mu knew what was on Shui Miao's mind, he would surely spit up old blood.

Ah Shui, no... Brother Shui!

I have no idea what an Angel Species is!

I am my own master!

How could I possibly know what that implies?!

As the saying goes, advice is a good meal.

Fang Mu was initially fond of the Star Fire Messenger, but after hearing Shui Miao's words, he planned to evolve the Descendant Star Messenger into the Star Cloud Messenger

Shui Miao was eager to please his master, so it's unlikely he would harm himself.

About the Starwheel sacred ground that Shui Miao mentioned, Fang Mu, who will eventually become a formal member of Starwheel, will have opportunities to learn about it.

Even though he had made a choice, Fang Mu still wanted to know what an Angel species really was.

His youthful curiosity slipped through, which wouldn't bother Shui Miao in explaining a bit for him.

Fang Mu was still young. Even a disciple of a Grandmaster Creator his age would not have access to all-encompassing knowledge.

A lack of advanced level knowledge is quite normal.

"Elder A Shui, what's special about Angel species?"

"My studies haven't been progressing well lately, so I don't dare ask my master all kinds of questions!"

Nervously, just like a teenager, Fang Mu stuck out his tongue.

This showed a typical fear of being reprimanded by a stern teacher.

Hearing this, Shui Miao burst into hearty laughter.

At this point, Fang Mu finally slipped back into being a teenager again.

“Your master loves you so, why would he ever scold you for wanting to learn more!”

While saying this, Shui Miao started to explain for Fang Mu.

“When a Guardian Beast evolves into an Angel species, an Angel Reincarnation Pool will appear at its birthplace.”

“If the Angel species Guardian Beast is killed, as long as life energy is injected into the Angel Reincarnation Pool, the Angel can regenerate in the pool.” “And retain its previous strength.”

“Aside from that, the Angel species Guardian Beast can also protect the Beast

Master, helping them to ward off curses and enhance luck.”

Upon saying this, Shui Miao paused a bit before continuing.

“There are some other Messengers within Starwheel.”

“If you want to contract with a Messenger, you can ask your master.”

“If your master has made significant contributions in Starwheel, he could get extra Messengers.”

Having said that, Shui Miao abruptly stopped.

Indeed, it is not only possible to contract with one Messenger.

But the resources needed to cultivate Messengers are extremely high.

To cultivate two, even a Grandmaster Creator would find it hard to afford.

After all, a Grandmaster Creator has to spend time concocting Spiritual Liquid.

Otherwise, he should have contracted a second Messenger by now.

Hearing Shui Miao's words, Fang Mu's eyes brightened.

If you can apply for a Messenger again, what is there to hesitate about!?

When the time comes, he would find a way to contract another Descendant Star Messenger from Starwheel!

Regarding resources, Fang Mu didn't have to worry at all.

Although Fang Mu has not yet met a real-life Grandmaster Creator, and doesn't know how long it takes for a Grandmaster Creator to concoct a bottle of Spiritual Liquid,

But even for a Grandmaster Creator, concocting a bottle of Spiritual Liquid would require high-grade spiritual materials.

It takes time to find high-grade spiritual materials.

But his 'Absorb' can do it by just eating garbage.

No matter if it's good garbage or bad garbage, or whether it's dry or wet garbage.

All could be turned into premium resources.

The time it would take a grandmaster creator to prepare a bottle of Life Elixir with a purity of ninety percent, would certainly not be quicker than a low-level creator preparing a bottle with a purity of twenty percent.

But 'Absorb' only needed a few hours to produce a bottle.

If normal Grandmaster Creators producing resources are compared to "constipated patients," then Fang Mu would be a spray warrior who ate three pounds of Haricot Beans.

Just as Fang Mu was about to present two bottles of Life Elixir and four bottles of Element Potion that he had prepared in advance to Shui Miao,

Shui Miao lightly tapped his forehead with his finger.

Then the skin on Shui Miao's face started to ripple.

Like an overweight man dancing a belly dance, his belly swaying.

Then a yellowish page peeled off from Shui Miao's face.

All Fang Mu saw was Shui Miao, who was ordinarily looking, transformed entirely in demeanor, looks, and even facial bones.

Blue eyes like the sea, a smile hanging off the corner of his lips.

This man, in his youth, could be perfectly described as handsome and extraordinary.

"This paper is one of Starwheel's legacies, wearing it can completely change your appearance, fooling everybody."

"Your physique, looks, and even facial structure can be changed according to your will."

“But after the first transformation, the image will be fixed and can’t be changed again.”

“You can think of the Noface Star Paper as a no-rank spiritual instrument.” Initially, Shui Miao was just casually introducing it, and seeing Fang Mu curiously looking at the Noface Star Paper in his hand,

Shui Miao casually handed the Noface Star Paper to Fang Mu.

“Although this paper has been set to appear like my face, it’s a good disguise in a crowd.”

“It’s much more convenient than you wearing a mask.”

“If you like it, I’ll give it to you!”

Fang Mu didn’t stand on ceremony with Shui Miao and took the so-called Noface Star Paper from him.

Fang Mu has opened so many sub-accounts, but some things are not convenient to do with these sub-accounts.

With this Noface Star Paper, the things that aren’t convenient for all of Fang

Mu’s sub-accounts can be done under a new identity.

After running around for so many days, hoarding up resources,

‘Absorb’ condensed two bottles of Life Elixir with a purity of ninety percent.

To test the speed at which ‘Absorb’ condenses higher-quality Life Elixir, Fang Mu deliberately raised the purity.

As a result, Fang Mu found out the time 'Absorb' took to make a bottle of Life Elixir with a purity of ninety-two percent, is three times the time it took to make a bottle with a purity of ninety percent.

That is to say, the time to produce one bottle of Life Elixir with ninety-two percent purity can produce three bottles with a purity of ninety percent.

Fortunately, 'Absorb's pocket space can refine life energies of different concentrations separately.

While refining Life Elixir with a purity of ninety percent, other pocket spaces can also refine Life Elixir with a purity of sixty.

So, Fang Mu letting 'Absorb' refine high-purity Life Elixir wouldn't be too much of an impact on its daily output.

As the saying goes, interaction should always be mutual!

Shui Miao has expressed such sincerity towards him, so he should give something in return.

Only this way can the relationship grow healthily!
